2. The circumstances leading to the substitution of revised figures are briefly as follows:—

At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognized synonym such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organized in Madras.

(ii) Before commencing the sorting, a list of synonymous names (i.e.), names synonymous with those of the communities published in the 'Constitution (Scheduled Castes) Order, 1950' was prepared in consultation with the Collectors of districts and sent to the State Governments

of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be Scheduled Castes in the Composite Madras State (as it existed before the formation of the Andhra State) by the 'Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names in the list below:—

PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did, not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, but also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables village-war, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II. Cultivators of land, wholly or mainly unowned, and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

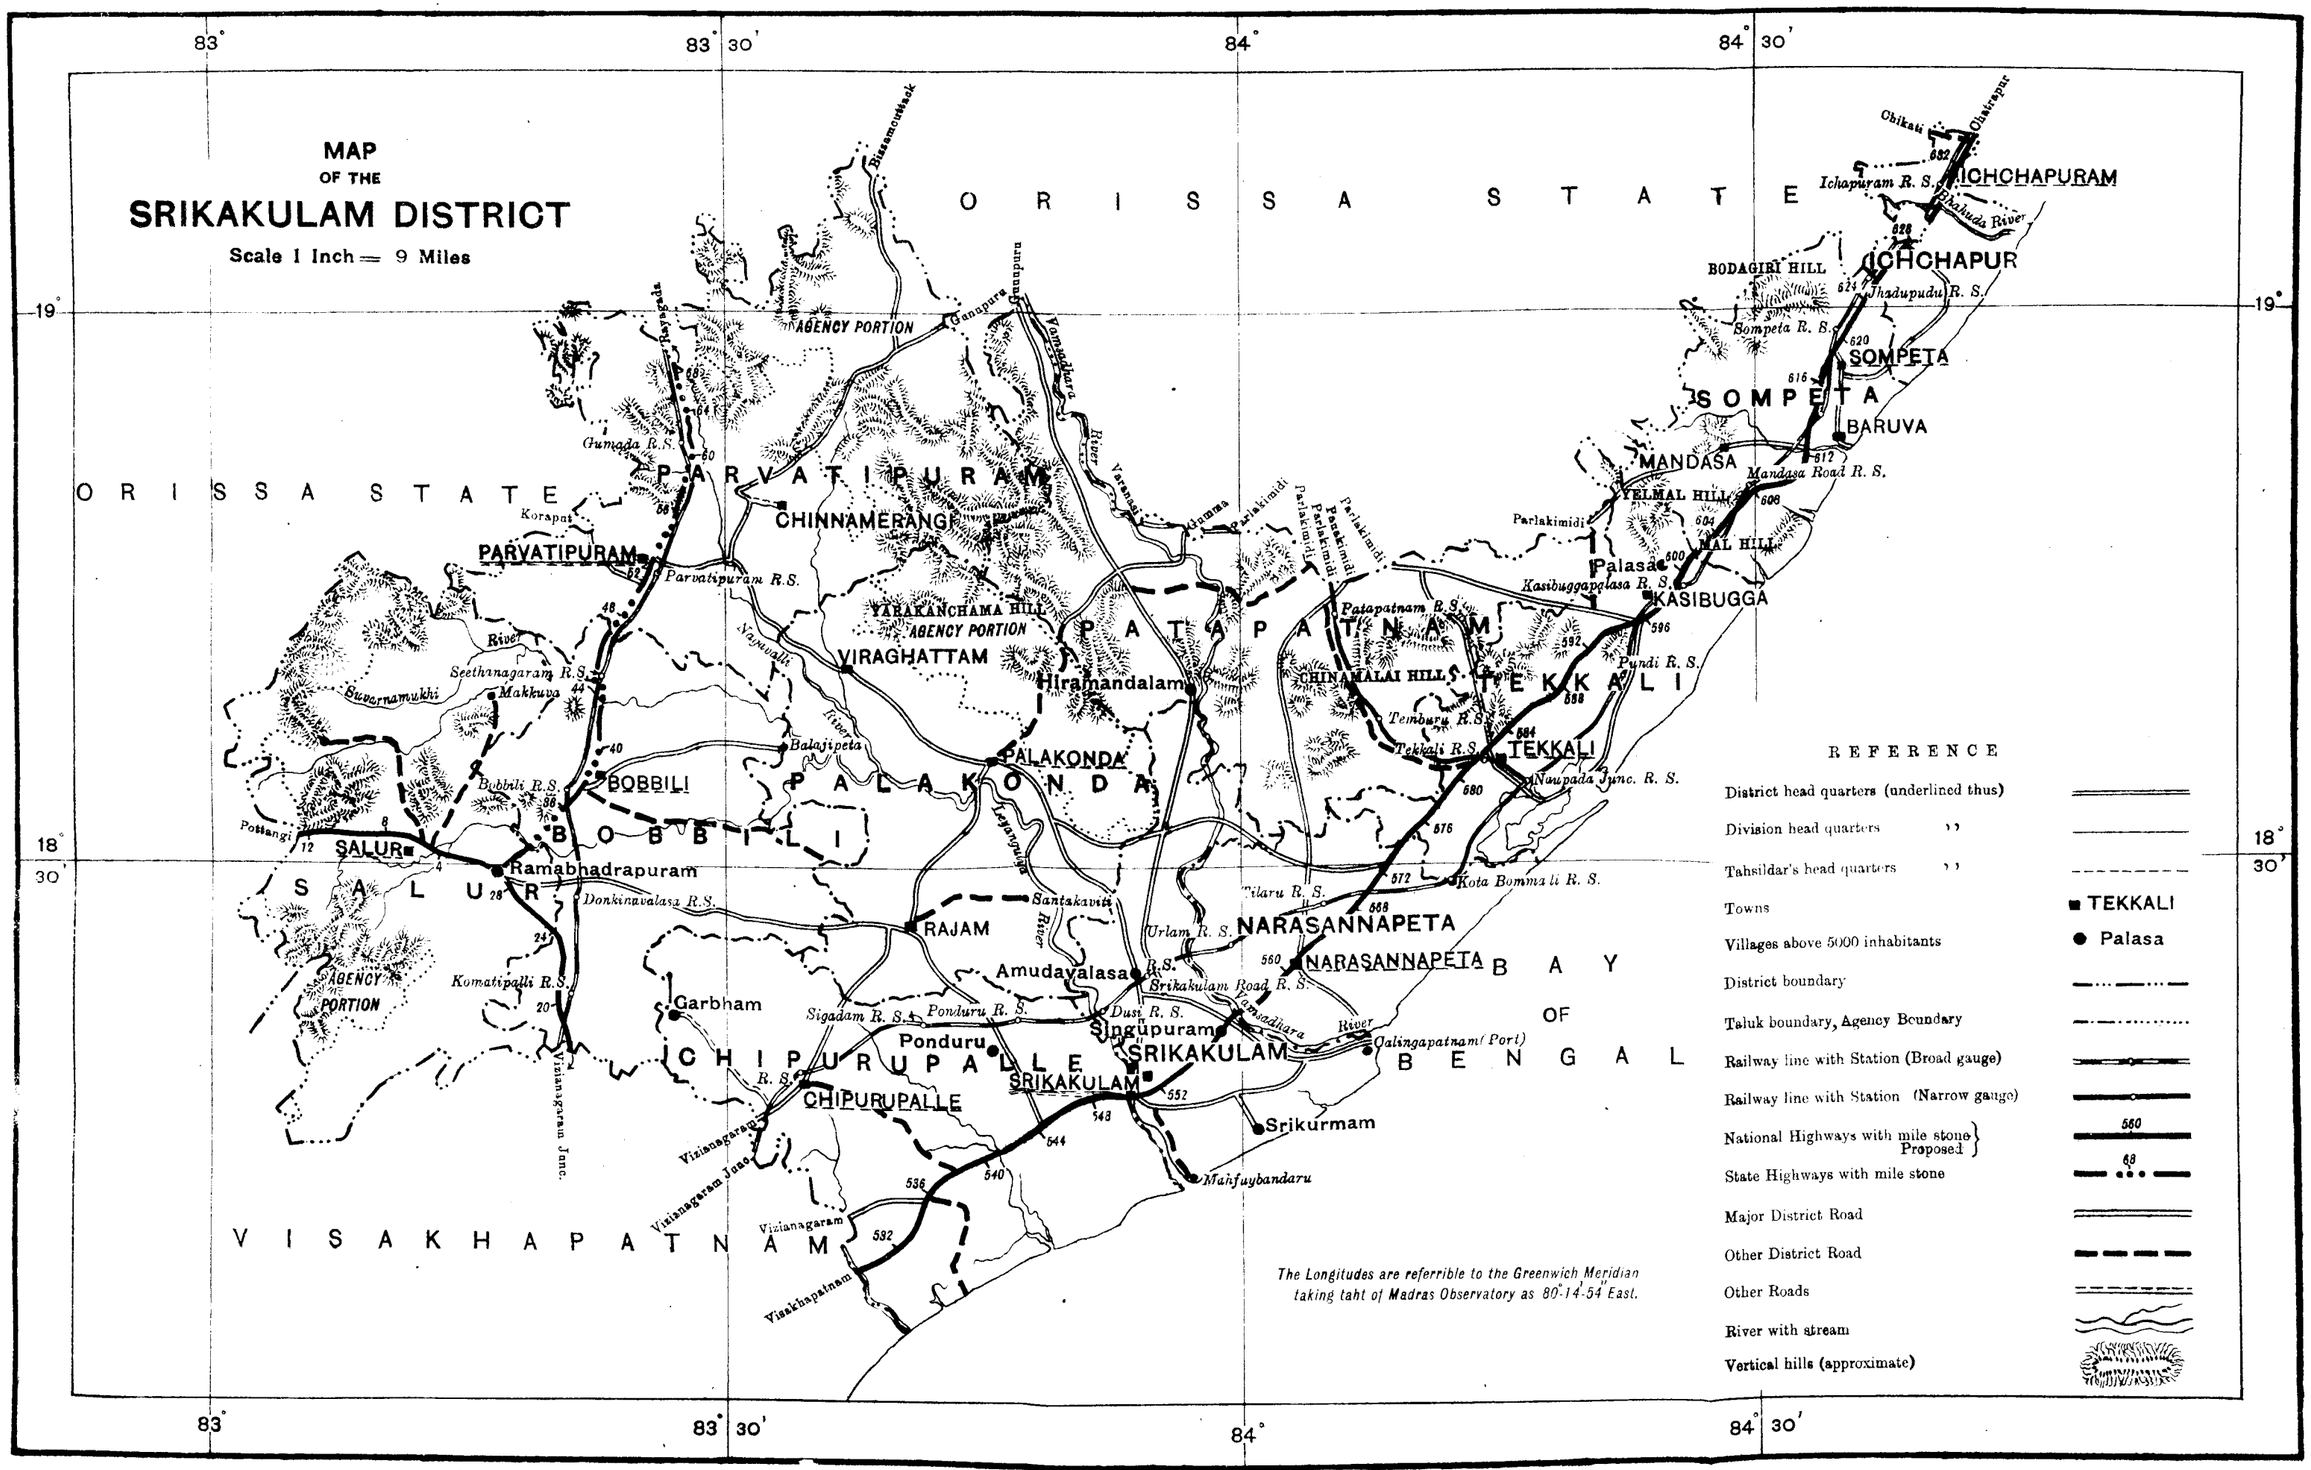
Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook, covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the General Population Tables (A-series), the Economic Tables (B-series), Summary figures for the district by Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) (Table C-I) and Tables showing Livelihood Classes and literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D-series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A-series, the summary figures by taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I—Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out o areas declared as cities and census towns in each district. Every city was treated as a separate tract: Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped together to form a non-city urban tract. All the rural tracts in the State have been assigned



Reg. No. 70 '53-440

Helio, P.Z.P., C.S.O., Madras.

numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each are furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries, such as, cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise details of Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION

TO

SRIKAKULAM DISTRICT

I. (*a*) *Situation and physical characteristics.*—Srikakulam is the northernmost district of the Madras State. This district was constituted in 1950, having been carved out of the old Visakhapatnam district. It lies between 18° 20′ and 19° 10′ of the northern latitude and 83° 5′ and 84° 50′ of the eastern longitude. It is bounded on the north and west by the State of Orissa, on the east by the Bay of Bengal and on the south by the Visakhapatnam district. The district lies elongated from north-east to south-west and is narrow in its northern part.

The revenue divisions comprising the district and the taluks comprised in each of the revenue divisions are mentioned below :—

Name of the revenue division.	Headquarters of the division.	Names of taluks in the division.	Area of taluk (in square miles).	Headquarters of the taluk.
1 Tekkali	Tekkali	Srikakulam	227	Srikakulam.
		Narasannapeta	200	Narasannapeta.
		Sompeta	212	Sompeta.
		Pathapatnam	463	Pathapatnam.
		Ichapuram	87	Ichapuram.
		Tekkali	272	Tekkali.
2 Parvathipuram	Parvathipuram	Parvathipuram { Agency	294	Parvathipuram.
		Parvathipuram { Plains	296	
		Palakonda { Agency	146	Palakonda.
		Palakonda { Plains	348	
		Bobbili	391	Bobbili.
		Cheepurapalli	462	Cheepurapalli.
		Salur { Agency	69	Salur.
		Salur { Plains	422	
		Total	**3,889**	

Portions of Parvathipuram, Palakonda and Salur taluks consist of hilly areas known as agency tracts occupied mainly by hill tribes. The taluks of Ichapuram, Sompeta, Tekkali, Narasannapeta, Srikakulam and Cheepurapalli are on the coast. The district may roughly be divided into two natural divisions namely the hilly regions and the plains. The hilly regions consist of parts of the agency taluks of Palakonda, Parvathipuram and Salur and parts of the taluks of Pathapatnam and Sompeta. The coastal taluks include extensive sandy tracts. The Eastern Ghats run roughly parallel to the sea coast from the north east to the south-west and the country drains from the ghats to the sea.

(*b*) *Rivers.*—The Chief rivers in the district are the Nagavalli and the Vamsadhara. The Vamsadhara rises in the eastern ghats in the Orissa State and enters the district in Pathapatnam taluk and flows between Narasannapeta and Srikakulam taluks. The Nagavalli also rises in the Eastern Ghats in Orissa State, and enters the district in Parvathipuram taluk. After flowing across Palakonda taluk the river forms the boundary between Srikakulam and Cheepurapalli taluks. In the lower reaches it is called the Langulya. The Swarnamukhi river flowing from Bobbili taluk is a tributary of the Nagavalli. The Vamsadhara and Nagavalli rivers flow into the Bay of Bengal. The other rivers in the district are the Bahuda in Ichapuram taluk, the Mahendratanaya in Sompeta and Pathapatnam taluks and the Vegavathi in Salur taluk.

(c) *Forests.*—The area of forests in each taluk and their classification is given below :—

Name of taluk.	Reserved forests (sq. miles).	Estate forests taken over (sq. miles).	Total (sq. miles).
Ichapuram ..	..	..	..
Tekkali	..	7·1	7·1
Sompeta	..	74·94	74·94

Narasannapeta ..	..	..	..
Cheepurapalli ..	..	11·12	11·12
Total ..	**64·50**	**174·43**	**238·93**

The forests in Tekkali taluk are in small isolated blocks and are fuel areas. The forests in Sompeta are of good deciduous type and cover large blocks of hills. The forests in Parvathipuram and Palakonda are of deciduous type with Sal patches. The forests in Salur contain important timber and fuel trees. The forests in Bobbili contain deciduous type. The estate forests in Cheepurapalli taluk are found on scattered hills and contain scrub type with tree species in the upper slopes.

(d) *Climate and rainfall.*—The particulars of the average annual rainfall and the average number of rainy days in a year in each of the taluks are given below :—

Name of taluk.	Average annual rainfall (inches).	Number of rainy days in a year.
Ichapuram	45·31	54·3

April to June are the hottest months. The district gets the benefit of both the North-East and the South-West Monsoons. The climate is moderate in Sompeta, Ichapuram and Srikakulam taluks. In the other taluks the summer is very hot and winter very cold. The coastal taluks have a moist atmosphere.

(e) *Soils.*—The prevailing rock of the district is a soft pinkish garentiferous gneiss. Intrusive bosses of granite and dionite are abundant. The soils formed by the disintegration of these rocks are highly ferruginous and often sandy. The soils in the district belong chiefly to the regar or black cotton and red

ferruginous series. Each type of soil gradually shades into another and so the classification is only arbitrary. Near the hills the red varieties are predominant but towards the coast the soil becomes finer and in the richest valleys there is a fertile black clay with a tendency to crack on drying. The distribution of soils in the settled areas of the district is given below in thousands of acres :—

	Regar Clay.	Regar Loam.	Regar Sand.	Red Loam.	Red Sand.

Srikakulam	0·8	0·4	0·5	..	0·2
Ichapuram	0·2	..	..	..	0·2

(f) *Irrigation and drainage facilities and liability to famine.*—The chief sources of irrigation in the district are the Nagavalli or the Langulya, Vamsadhara and Bahuda rivers. An anicut has been built across the Nagavalli at Thotapalli in Parvathipuram taluk from which irrigation channels take off. The Nagavalli with its tributary, the Swarnamukhi irrigates large extents in Palakonda and Srikakulam taluks and some extent in Parvathipuram taluk. The Vamsadhara irrigates large extents in Pathapatnam and Srikakulam taluks. The Bahuda irrigates considerable extents in Ichapuram taluk.

A statement showing the number of minor irrigation sources and the area served by them and the area served by major irrigation sources in the taluks of the district is furnished below :—

The minor irrigation tanks in all the taluks are generally in good repair except in the areas which formed part of Zamindaris recently taken over by the Government. Repairs to the sources in these excepted areas are being gradually attended to.

(g) *Area cultivated with food and commercial crops.*—Paddy is the chief food crop. Groundnut is the chief commercial crop. A statement showing the particulars of area cultivated with food crops, pulses and commercial crops for the year 1945–46, the last normal year for the district is furnished in *Annexure* I.

(h) *Communications*—(i) *Roads.*—Roads from the district lead to Visakhapatnam district and the adjoining State of Orissa. There are 885 miles of roads in the district, consisting of 134 miles of National Highways, 38 miles of Provincial Highways, 438 miles of major district roads, 130 miles of other district roads, 103 miles of village roads and 42 miles of municipal roads. Their taluk-wise distribution except for municipal roads is furnished below :—

The facilities for communications within each taluk are not adequate. The condition of the existing roads also is not up to standard.

(ii) *Railways.*—The district has 147 miles of broad gauge and 21 miles of narrow gauge railway of the Eastern Railway. The Madras-Calcutta line traverses the taluks of Cheepurapalli, Srikakulam, Narasannapeta, Tekkali, Sompeta and Ichapuram. A narrow gauge line takes off from Naupada in Tekkali taluk and proceeds to Parlakimedi and Gunupur in Orissa State via Pathapatnam. A broad gauge line from Vizianagaram to Raipur traverses Salur, Bobbili and Parvathipuram taluks. Salur out agency is served by Bobbili railway station for parcels and goods. Srikakulam out agency is served by Srikakulam Road station for passengers, parcels and goods. The nearest railway station to Narasannapeta is Tilaru four miles away. The headquarters of Palakonda and Narasannapeta taluks are not served by railway or railway out agencies.

(iii) *Posts and Telegraphs.*—The details of the number of Post and Telegraph offices and branch offices in the various taluks of the district are given in the sub-joined statement :—

District increase :—5·4 per cent. The increase in the plains area is 5·7 per cent. The variations in the taluk populations in the plains area range from 1·1 per cent in Pathapatnam to 11·3 per cent in Srikakulam. This is a backward district with malaria prevalent both in the coast in the eastern part of the district, and in the agency tracts on the western side of the district. There has been neither industrial activity nor agricultural prosperity to promote any large increase in population. For these reasons, and owing to the fact that this is a deficit district, there has been emigration on an appreciable scale. From Pathapatnam taluk, there has been migration to Parlakimedi in Ganjam district in Orissa State, which is a surplus area for rice. From Tekkali taluk, owing to the failure of crops during the four years preceding the census, there was migration from the coastal area to West Bengal, notably to Calcutta and Kharagpur and to Assam. There is no taluk in this district, which is entirely agency. The agency portions of Parvathipuram and Salur taluks have shown decreases of 9·7 per cent and 18·3 per cent, respectively, while the agency portions of Palakonda has registered an increase of 10 per cent. The plains portions of these same taluks have registered increases of 9 per cent, 4·3 per cent and 6·3 per cent, respectively.

(Extracted from Census Report Part I).

(ii) *Vital Statistics.*—A combined statement for Visakhapatnam and Srikakulam districts showing the particulars of births and deaths and deaths due to various causes for the decennium ended 1950 are given in *Annexure II*.

The average birth rate of 31·3 per mille recorded during the decade, 1941–50, differs little from the average rate of 31·7 for the State. The average death rate of 23·1 per mille is higher than that for the State 21·2. The registered death rates show a tendency to decrease during the latter half of the decade. The mortality from fevers is considerably higher than in other districts, the average mortality rate from this cause during the decade in the district and in the State being 9·9 and 5·4 per mille respectively. Fevers caused on the average 43 per cent of the total deaths. A noticeable fall in the fever mortality is however recorded since 1944. The average death rates from other principal causes are less than the average for the State. The average maternal mortality rate was 7·2 as against 8·1 for the State.

(*b*) *Medical Relief.*—The medical institutions in the various taluks of the district are listed below :—

Ichapuram taluk.—Local Fund Hospital, Ichapuram (14 beds), Local Fund Dispensary, Rajpur.

Tekkali taluk.—Government Hospital, Tekkali (14 beds), Local Fund Dispensaries at Kota Bommali, Naupada and Palasa, Rural Dispensary, Santa Bommali.

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. The following places not having the population minimum of 5,000 have been treated as towns for the reason that they possess definitely urban characteristics:—

(1) Chinna-Merangi in Parvatipuram taluk.

(2) Kasibuggapalasa in Tekkali taluk.

5. "House".—Every dwelling with a separate main entrance has been treated as a house for Census purposes.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis of comparison. The adjusted figures show the population of taluks and the district as constituted at present.

This district was formed in 1950 by the bifurcation of the old Visakhapatnam district.

1. SRIKAKULAM DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	Limits of population.
I	100,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

3. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

4. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

6. Towns newly appearing at this Census have been printed in *italics*.

A-V—Towns arranged talukwise with population by Livelihood Classes.

This table shows the analysis of the urban population in towns by livelihood classes, instead of by communities as in the previous censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the agricultural classes and the non-agricultural classes. There are four agricultural classes and four non-agricultural classes as shown below :—

(i) *Agricultural classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

(ii) *Non-agricultural classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).
VI. Commerce.
VII. Transport.
VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

E—Summary Figures by Taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "Urban" are those furnished by the District Officers. The areas for "Rural" have been obtained by deducting the figures for "Urban" from those for district and taluk "Total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous census figures of population have been adjusted with reference to the inter-district changes. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "Rural" and "Urban" for 1941, the areas of the towns newly formed at the present census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for "Rural" in the districts and taluks where new towns have been recognized.

5. In respect of Pathapatnam taluk which has no urban areas, the figures represent the total alone.

No. 2—Parvatipuram and Chinnamerangi towns in Parvatipuram taluk, Palakonda, Viraghattam and Rajam towns in Palakonda taluk, Bobbili town in Bobbili taluk, Salur town in Salur taluk and Cheepurapalli town in Cheepurapalli taluk.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An "earning" dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a "non-earning dependant".

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

1. SRIKAKULAM DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income, if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

B-III. Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each Census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four non-agricultural classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary economic status, namely, employer, employee and independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce or Transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The non-agricultural classes classified in Economic Table B-I correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class. ..	Divisions and subdivisions of the Indian Census Economic Classification Scheme.
Class V—Production other than cultivation.	Division 0—Primary industries not elsewhere specified.
	Division 1—Mining and quarrying.
	Division 2—Processing and manufacture of foodstuffs, textiles, leather and products thereof.
	Division 3—Processing and manufacture—Metals, chemicals and products thereof.
	Division 4—Processing and manufacture—Not elsewhere specified.
Class VI—Commerce	Division 6—Commerce.
Class VII—Transport	Subdivision 7·0 to 7·4 of Division 7—Transport, storage and communications.
Class VIII—Other services and miscellaneous sources.	Division 5—Construction and utilities.
	Division 7—Transport, storage and communications with the exception of subdivisions 7·0 to 7·4.
	Division 8—Health, education and public administration.
	Division 9—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence there will be difference to this extent between the total self-supporting persons of the non-agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

SMALL-SCALE INDUSTRIES.

III—Employment in Non-Textile Establishments.

This table gives for each Census tract the number of persons employed in non-textile establishments referred to in Table I. The establishments have been grouped with reference to the scheme of grouping adopted in the Indian Census Economic Classification Scheme.

2. As in Table II, 'Boys' and 'Girls' refer to persons below 15 years of age.

3. The areas covered by each Census tract in the district have been given in the fly-leaf to Table B-I.

NOTE.—The symbols 'W.T.' and 'P.T.' adopted in this table stand for 'Whole-time' and 'Part-time.'

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth House-numbering block in the Rural areas and every fiftieth household in every twentieth House-numbering block or locality in Urban areas.

2. The agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census Tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly leaf to Table B-I.

C-II—Livelihood Classes by Age-groups.

This table shows the livelihood distribution by age-groups for rural, urban and district totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "cut" as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked "G" and the other marked "S" as follows :

The first five slips were placed in the pigeon-hole "G", then one slip was placed in the pigeon-hole "S". Thereafter for every nine slips placed in the pigeon-hole "G", one slip was placed in the pigeon-hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G". All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as "Sample" slips.

No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

The figures under age '0' represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population—vide fly-leaf to Table C-II.

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age groups 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract (Rural and Urban) denoted by its number in column (1) in the district. The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—

D—SOCIAL AND CULTURAL TABLES.

D-I—Languages.

(i) *Mother-tongue.*

This table shows for each Census tract in the district, denoted by its number in column (1) the languages spoken as mother-tongue and the number of persons speaking each one of them. The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

2. Mother-tongue means the language spoken by the person from the cradle. In the case of infants and deaf mutes the mother-tongue of the mother is taken as the mother-tongue.

3. "One hundred and twenty-seven females speaking Burmese and two hundred and one males and one female speaking Javanese have been returned in Srikakulam district. These figures possibly represent evacuees from Burma and Java whose languages should have been incorrectly recorded as Burmese and Javanese instead of their original mother-tongue language."
