UNION PRIMARY CENSUS ABSTRACTS

Owing to the volume of the Statistics compiled for presentation in India Volume I—Part II-A, it has been found convenient to present the tables in two separate books. The first book contains the General Population Tables A-I to IV. This second book contains the Union Primary Census Abstracts which give Abstracts down to the level of each district and for individual towns with a population of 50,000 and over. The Appendix gives three additional Abstracts:— (*i*) Abstracts for Town Groups and Towns consisting of more than one part, each having a population of more than 100,000 and 50,000 and over respectively; (*ii*) Abstracts for the Calcutta Industrial Region, a delineation of which has been attempted on the proportion of workers outside agriculture resident in Calcutta and its environs, both rural and urban; (this Census Industrial Region should not be associated with the Calcutta Metropolitan Planning Region or any concept of Calcutta Metropolitan Zone) and (*iii*) Abstracts for Madras Industrial Region which has been delineated on the same principles as the Calcutta Industrial Region.

The condensed decadal comparisons of variations in population and density (population per Square mile) afforded by Columns 3 and 6, 7 and 8, 9 and 10 of Table 'E' of 1951 have been dispersed among several tables in 1961. Thus population per Square mile has been given in Col. 4 in Union Table A-I (1961), while densities for 1951 and 1961 will have to be worked out from information given in Appendix to Union Table A-II. The figures for decade variations, available in Columns 7 and 8 of Table 'E' of 1951 will be available in Union Table A-II of 1961. Accounts of houseless and institutional population will be found in Village Directories of some States in 1951, while separate accounts for houseless and institutional population will be found in Appendix III to Union Table A-I. Columns for census houses and for literate (and educated) persons were provided in the Village Directory for 1951.

The six Columns for members of Scheduled Castes and Scheduled Tribes in 1961 are a new feature. The economic classification reflects the differences between 1951 and 1961 detailed below.

The information in this Abstract will be fully reproduced down to the level of the village in the Village Directory for each district in 1961.

The statistics of occupied residential houses (houses and households) have been compiled from the enumerator's abstract of household schedules completed at the close of Census Operations by the enumerator himself. This abstract was checked at the sorting and Tabulation Offices before the pads of household schedules were broken up for drawing the 20% sample of household schedules.

The way a census house or household was located and numbered is described in the following instructions on housenumbering and houselisting.

Column 3—Building Number (Column 2) with sub-numbers for each Census House

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school *etc.*, with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers *e.g.*, the number of the building and the sub-number of the census house. The census house number should be written after the building number in arabic numerals in brackets such as 2(2), 3(2), *etc.* A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number.

Column 11—Sub-number of each Census Household with Census House number (Column 3).

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (*A*), (*B*), (*C*), *etc.* For example, if building No. 2 is also a census house and has three households, the household numbers will be 2(*A*), 2(*B*) and 2(*C*). If building No. 4 has two census houses, the house will be numbered as 4(1) and 4(2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4 (1*A*), 4(1*B*), 4(1*C*) and 4(2*A*) and 4 (2*B*).

A three-tier classification was thus attempted in 1961. First the building, which is essentially a structural unit. But although buildings were recorded at the houselisting stage, no data on buildings have been tabulated. Secondly, the census house, which is a structure or part of a structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school *etc.* with a separate entrance. An occupied residential house means a census house which is used, in addition to any other purpose, for purposes of human habitation by people who are actually living at the time of census enumeration. It may also be entirely used as a family dwelling. Thirdly, the household which is a social unit. A household is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. A household implies the existence of a common kitchen and common partaking of meals. Generally, a household means members of a family living together but there may be cases where persons not connected with family ties may also be living together, as in a hostel or mess or hospital. These would also be households, not family, but institutional. It is possible for more than one family or one census household to live in one census house.

The procedure adopted for the enumeration of houseless and institutional population has been explained in connexion with Appendix III to Union Table A-I. It is possible that a small proportion of the smaller institutions like small messes and boarding houses may have been missed and included in family households. It is difficult to state with any certitude what the proportion would be. But there was little danger of large and medium institutions like hospitals, boarding houses *etc.* having been missed under this specific head.

The following statement shows (*a*) the number of household per 100 census houses and (*b*) the number of households per Square mile in rural and urban areas of each State and Union Territory.

Articles 341 and 342 of the Constitution lay down that for certain purposes the President can schedule a number of castes and tribes respectively for specified areas of the country. In exercise of the powers conferred by these Articles of the Constitution the President has scheduled certain castes and tribes in respect of the areas noted against them. The instructions for enumerating households of Scheduled Castes and Scheduled Tribes in the household schedule are given below :

> You will find a parallelogram at the right hand side against the Full Name of the head of the household marked 'SC/ST'. If the Head of the household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your district, you should write SC/ST as the case may be within the parallelogram. If the head of the household does not belong to a Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

This was later modified by a circular (No. 23/3/59-RG, dated 2-2-60) as follows :

> If the head of the household is a member of a Scheduled Caste or Scheduled Tribe obtaining in your State or in your district you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the head of the household belongs within the paralellogram.

The instructions for recording members of Scheduled Castes and Scheduled Tribes under Q:5(*c*) in the individual census slip are reproduced below.

> The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State or in your district write the name of the caste or tribe to which he belongs. For all others write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district will be found in the instructions given to you.
>
> If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.
>
> Do not write the names of Scheduled Castes in genera terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

A tabulated statement of the schedules used in the 1961 Census for the purpose of enumerating members of Scheduled Castes and Scheduled Tribes is given below.

The test for literacy in the Census of 1961 was satisfied if a person could with understanding both read and write. The test for reading was ability to read any simple letter either in print or in manuscript. If the person could read one of the examples in the Enumerator's Handbook with felicity he might be taken to have passed the test for reading. The test for writing was ability to write a simple letter. To qualify for literacy a person was not required to pass a standard examination like primary or junior basic. On the other hand literacy was recognised as something a man still possessed and actively put to use and it was in this general practical sense that it was uniformly applied throughout India. The results are thus comparable from area to area.

If a person could both read and write and had also passed a written examination or examinations as proof of an educational standard attained, the highest examination passed was to be recorded.

The statement at pages xlvi and xlvii gives the percentage of literacy in general and in rural and urban areas of each State and Union Territory.

Three sets of ratios among total population are given for comparison. The first is the ratio of literates and educated to total population inclusive of age group 0-4. The second is the literacy ratio to total population, exclusive of the unsmoothed population in age group 0-4. The third is the literacy ratio to total population exclusive of the smoothed population in age group 0-4, the smoothing having been done by the Census Actuary for 1961.

Among rural population the literacy ratios have been based on the rural population exclusive of the unsmoothed population in age group 0-4.

Among urban population the literacy ratios have been based on the urban population exclusive of the unsmoothed population in age group 0-4.

The most important departure in the Primary Census Abstract of 1961, is the adoption of the International Standard Industrial Classification as modified by the Director General of Employment and Training in the Ministry of Labour for the classification of all workers into nine industrial categories. In 1951 a different classification called the Indian Census Economic Classification was adopted which continued the Indian Census tradition of an amalgam of the Industrial and Occupational Classifications. It was decided in 1961 to elect for the Industrial Classification for the presentation of primary data relating to the industrial characteristics of the working population. The basis on which the population has been divided into workers and non-workers will be found in the definition of work reproduced in the General Note. The difference that the concepts, definitions and classifications adopted in 1961 may have made to the results of previous censuses will be discussed in the General Report for the Union and for each State and Union Territory. For the purpose of this note the following chart which lists under each 1961 industrial category the Industrial Divisions, Major Groups and Groups of the Indian Standard Industrial Classification and the corresponding conversion digits of the I.C.E.C. (Indian Census Economic Classification) will be of interest.

A comparative statement of 1961 Indian Standard Industrial Classification and 1951 Indian Census Economic Classification

The definitions and instructions of Household Industry adopted for the Individual slip and the Household Schedule have been given in the General Note. They are reproduced here for convenience :

INDIVIDUAL SLIP

Q. 10 Working at Household Industry.

(*a*) Nature of work

(*b*) Nature of Household Industry

(*c*) If employee

Q. 10 (a) and 10 (b) If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against quesion 10 (*a*) and (2) the nature of the Household Industry against question 10(*b*). Otherwise put X in both questions 10 (*a*) and 10(*b*). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should , therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(*a*) and the nature of the Household Industry against 10 (*b*).

Q. 10 (*c*) This question will be filled up only for a person who is working as a paid employee in another persons Household Industry. In his or her case write E.E. For all other put X.

HOUSEHOLD SCHEDULE

Sub Part B

Household Industry (not on the scale of a registered factory) conducted by the Head of the household himself and/or mainly by members of the household at home or within the Village in rural areas and only at home in urban areas.

1. Nature of Industry

2. Number of months in the year during which conducted

Sub Part C (Portion relating to Household Industry)

3. Members including Head of family working and hired workers, if any, kept wholetime during current or last working season.

(*i*) Members of family working (*a*) Head (*b*) Other males (*c*) Other famales (*d*) Total.

(*ii*) Hired workers.

This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold :

(*a*) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by member of the household.

(*b*) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use a machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answer will be written and put a bold cross on this sub-part.

The following statements may be found generally useful as ready reckoners. The footnotes indicate where certain areas have been included in or excluded from calculations of proportions.

UNION PRIMARY CENSUS ABSTRACTS

NOTES

The Primary Census Abstracts give summary information of area, number of occupied residential houses, number of households, general population, population belonging to Scheduled Castes and Scheduled Tribes, literate and educated persons, working population classified into the nine industrial categories and non-working population in 1961. Each information is classified by sex. Data are given for all-India, States, Union Territories and Other Areas, Districts and Towns with a population of 50,000 and over.

Daman town in Daman District and Diu town in Diu District. The area of other towns is not separately available, therefore, it is included in the rural area. There are no figures in Industrial Category IV (Household Industry) in Goa, Daman and Diu, as this information was not collected at the time of enumeration in 1960.

7. For those areas of North East Frontier Agency where an abridged family schedule was canvassed instead of the general all-India individual slip and household schedule, data relating to occupied residential houses and also industrial

INDIA
Part II-A (ii)—Union Primary Census Abstracts

(To be pasted facing page 1)

Add the following paragraph 10 to the notes for PCA, after para 9:

10. The area shown against India in col. 3 under (a) *viz.*, 1,232,561 Sq. miles is arrived at by adding area figures of individual state and union territory as supplied by the Surveyor General and includes 2,744 Sq. miles (7,107 Sq. Km.) area of Sikkim but excludes non-censused area of 32,358 Sq. miles (83,807 Sq. Km.) of Jammu & Kashmir.

The total area of India as a whole including Sikkim and non-censused area of Jammu & Kashmir according to the Surveyor General is 1,264,341 Sq. miles (3,274,643 Sq. Km.). The total of areas of individual state & union territory will not tally with the above area of India as the area figures of Andhra Pradesh, Madras & Bihar states are approximate, and for some districts of Maharashtra, Mysore, Madhya Pradesh & Pondicherry provisional. Due to these facts and some other changes revealed by the latest surveys the difference of 578 Sq. miles (1,497 Sq. Km.) in area shown against states & union territories has yet to be reconciled.

The area figures against the state of Jammu & Kashmir excludes the non-censused area 32,358 Sq. miles (83,807 Sq. Km.).

(Conversion factor : 1 Sq. mile = 2·59 Sq. Km.)

NOTE *In the case of Noapara, Barrackpore, Baranagar and Titaghur Police Stations in West Bengal, the urban areas of the Police Stations are greater than the total area of all towns of these Police Stations (0·66 Sq. miles if the figures are rounded off upto two decimal places) for the following reasons:

(*a*) Municipal area figures have been adopted as furnished by the municipal authorities while Police Station area figures are based on last published jurisdiction lists:

(*b*) River areas appertaining to the Police Stations have not always been included in municipal area figures:

(*c*) Several municipalities fall in the jurisdiction of more than one Police Station.

† Dum Dum Aerodrome Area actually extends over three Police Stations *viz.*, Dum Dum, Rajarhat (which does not appear in Calcutta Industrial Region) and Barasat, but its exact area falling under each could not be ascertained. For the purpose of classifying the area of each of these Police Stations into rural and urban, the urban portion has been computed without taking into account the Dum Dum Aerodrome Area. Part of Dum Dum Aerodrome Area has been accounted for under Dum Dum Police Station because it is in North Dum Dum and Dum Dum municipal towns but the remainder which is the major portion is included in the rural area of the two remaining Police Stations of Rajarhat and Barasat. The area of Dum Dum Aerodrome Area (2·75 Sq. miles) has however been included in the total of Calcutta Industrial Region.
