No. 2538 OF 1899.

FROM

Sir Trevor Chichele-Plowden, K. C. S. I.,

RESIDENT AT HYDERABAD,

6 MAY 1899

To

The Secretary to the Government of Madras, Local and Municipal Deptt.

Dated Hyderabad Residency, the 3rd May 1899.

SIR,

I have the honour to request that you will be good enough to instruct the Plague Commissioner, Madras, to furnish each of the officers noted in the margin with a copy of the weekly statement of plague seizures and deaths in the Madras Presidency.

1. Military Secretary to Resident, Hyderabad.
2. General Officer Commanding, the Hyderabad Contingent - Bolarum.
3. Officer Commanding, Bolarum.
4. -------Do---------- Aurungabad.
5. ------Do---------- Jalna.
6. ------Do---------- Mominabad.
7. ------Do---------- Hingoli.
8. -------Do---------- Raichore.

I have the honour to be,

Sir,

Your most obedient servant,

[signature]

For RESIDENT.

Fortnightly Narrative for the period ending 22nd April 1899.

During the fortnight the disease again exhibited a marked decrease. Practically it exists now only in the North Arcot district in the neighbourhood of Vellore and Ránipéttai. The decrease has been most noticeable during the latter week of the fortnight, and this is a promising sign. It is satisfactory to be able to report that no cases have occurred in the villages which have been re-occupied after evacuation and disinfection. At first sight Berikai appears an exception, but it is not; for the hamlet in which the case reported has occurred is quite separate from the main village. The heavy rain which has been recently experienced in parts has fortunately not been followed, up to date, by any recrudescence of the disease. The following table gives the attacks and deaths, district by district, during the previous and current fortnight. It is to be noted that Kurnool district is now clean.

District.	Cases reported during fortnight ending 8th April 1899.		Cases reported during fortnight ending 22nd April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	21	15	1	1
Bellary	12	10	5	6
Kurnool	1	2	..	..
Madras	..	1	2	..
North Arcot	67	46	41	28
Salem	27	20	9	10
Total ..	128	94	58	45

2. In *Anantapur district* there has been one death of a patient attacked at Srirangarayapalli in the previous fortnight. There has been one attack in Narasápuram, a hamlet of Srikantapuram. No direct connection with infection can be discovered in this case. From the information available the disease appears to have been carried by rats.

In *Bellary district* the disease has been confined to the Alur and Hospet Unions. The infected area in Alur has been evacuated and a party of sepoys has been despatched to disinfect the place. Since evacuation at the very commencement of the fortnight there have been no attacks. In Hospet too there have been no attacks for many days.

Madras City reports two imported cases, one from Arcot and one from Mysore, the latter doubtful.

In *North Arcot* the disease appears to have been stamped out in Kuppam, where there has been only one attack during the fortnight and the same may be said of Arcot and Walajah, in each of which there have been only two seizures. At Ránipéttai the number of seizures rose considerably but still no cases have been discovered among Muhammadans who form a large proportion of the population. It is to be noted that the number of seizures far exceeds the number of deaths. This may denote that the disease is losing virulence, but it means also that our information is good, so many cases being discovered before death. Vellore shows a decided decrease in attacks and this has been most marked during the latter half of the fortnight. The people have now lost their fear of plague operations and the segregation camp is popular.

In *Salem district* there has been only one undoubted indigenous case during the fortnight. This was at Hosur early in the period. It is extremely satisfactory to find that the insistence on the complete evacuation of Hosur has been attended with such favourable results. The case reported from Berikai was, there is every reason to

believe, imported from Mysore and occurred in a hamlet quite separate from the main body of the village, which was previously infected and evacuated. The only other case which is reported as indigenous (that from Mukondahalli) is of a doubtful nature.

3. The temper of the people has been good. The change in Vellore is indeed encouraging.

4. Inoculation is nowhere popular.

5. The usual statements are appended.

MADRAS.
24th April 1899.

L. E. BUCKLEY,
Plague Commissioner.
