PREFACE

The report on Housing and Establishments in Punjab along with the Subsidiary Tables (Volume XIII, Part IV-A) and five Main Tables (Volume XIII, Part IV-B) have been bound into two separate books. The object of distributing the stuff in this way is to make the books handy, and secondly, in case a reader wants to consult the detailed Tables along with the report, he can keep the two books side by side. Each Table in this book is preceded by a Fly leaf explaining the terms used.

Acknowledgement is made of the excellent work done by Shri Pawan Kumar, Tabulation Officer, for supervising and guiding the staff in the Tabulation Office and for his help in preparing this book, and by Shri Shyam Sunder Sharma, Assistant, in connection with printing.

TABLE E-II

TENURE STATUS OF SAMPLE CENSUS HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS

This Table has been prepared on the basis of 20 per cent sample of such households as were found to be living in census houses used as dwelling, shop-*cum*-dwelling, workshop-*cum*-dwelling, or dwelling along with other uses.

The Table is presented on the same pattern as the Table E-I, giving total, rural and urban area figures for the State as a whole and for Divisions, Districts, Tahsils, and Cities/Towns with population not less than 50,000. Urban figures for Tahsils are totals of the figures for Cities/Towns shown below the Tahsils, and Towns with population less than 50,000 which have not been mentioned in the Table.

Column 4 shows the total number of households forming the sample, and columns 5 to 8 show their distribution according to the type of census houses lived in. These households are further distributed vertically according to (*i*) those owning the census house, and (*ii*) those living in any other capacity, collectively labelled as rented.

Abbreviations used in the Table denote :

M.C.	Municipal Committee
C.B.	Cantonment Board
.. . . . .	Nil

TABLE E-III

CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS, CLASSIFIED BY (1) INDUSTRY, (2) POWER AND NO POWER USED, AND (3) SIZE OF EMPLOYMENT

This Table has been prepared on full count, and presents data for the State as a whole, each Division and each District, for rural and urban areas, separately. Information has not been given for Tahsils in order to economise space; but figures for Cities and Towns with population not less than 50,000 have been shown. Urban figures for the Districts are totals of the figures for Cities and Towns shown below the Districts, as also for Towns with population less than 50,000 which have not been mentioned.

Factory or Workshop is a place where some kind of production, processing, repair or servicing is undertaken, or where goods are made and sold.

The Table gives a three-fold classification :

Firstly, factories and workshops are classified by industry , according to the Divisions, Major Groups and Minor Groups adopted in the 'Indian Standard Industrial Classification'. The numbers given under column 1 of the Table, are explained in the statement on pages 48 to 54.

Secondly, factories and workshops are distributed according to the power or fuel used in case machinery is employed, *viz.*

(*a*) electricity ;

(*b*) liquid fuel ;

(*c*) coal, wood & bagasse ; and

(*d*) other types of power.

All such factories and workshops where no machinery is employed or where the machinery is propelled manually, have been classified under 'No Power'.

Thirdly, factories and workshops have been distributed according to the size of employment: 1 person; 2—5 persons; 6—9 persons; 10—19 persons; 20—49 persons; 50—99 persons; and 100 or more persons.

Abbreviations used in the Table denote :

M.C.	Municipal Committee
C.B.	Cantonment Board
.. . . . .	Nil.

TABLE E-IV

DISTRIBUTION OF SAMPLE HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS, BY PREDOMINANT MATERIAL OF WALL, AND PREDOMINANT MATERIAL OF ROOF

This Table has been prepared on the basis of the same 20 p.c. sample as explained in Flyleaf to Table E-II (page 23). The presentation according to the area units is also the same.

The total number of households in sample is given in col. 3.

The census households have been distributed according to the predominant material used for walls and roofs of the census houses they lived in. Where a census house consisted of separate structures each of different materials, the material out of which the walls of the rooms where the members of the households slept was recorded.

The predominant materials for walls are grouped under the following heads (cols. 4 to 12) :—

Grass, leaves, reeds or bamboo;

Timber;

Mud;

Unburnt bricks;

Burnt bricks;

Corrugated iron sheets or other metal sheets;

Stone;

Cement concrete; and

All other material.

The material recorded was that of which most of the outer roof exposed to the weather was built and not that from which the ceiling was made. In the case of multi-storeyed buildings the intermediate floor was taken as the roof of the lower floor. The predominant materials for roof are grouped under the following heads (cols. 13 to 19) :—

Grass, leaves, reeds, thatch, wood, or bamboo;

Tiles, slate, shingle;

Corrugated iron, zinc or other metal sheets;

Asbestos cement sheets;

Brick and lime;

Concrete and stone; and

All other material.

Abbreviations used in the Table denote :

M.C.	Municipal Committee
C.B.	Cantonment Board
.. . . . .	Nil

TABLE E-V

SAMPLE HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER OF ROOMS OCCUPIED

This Table has been prepared on the basis of the same 20 p.c. sample as described in the Flyleaf to Table E-II (page 23). The presentation according to area units is also the same.

The total number of households in the sample is given in col. 3. The total number of members of these households is shown in cols. 4 and 5 (males and females). The total number of rooms occupied by the households is shown in col. 6.

The households and their members are then distributed according to the dwelling units consisting of no regular room, one room, two rooms, three rooms, four rooms and five or more rooms, respectively.

In this context it requires to be stated that only such rooms were taken into account as had four walls with a doorway and a roof overhead, and were wide and long enough for a person to sleep in. Unenclosed verandahs, and rooms used exclusively as kitchen, store, garage or cattleshed were not taken into account as also latrines and bath-rooms.

Abbreviations used in the Table denote

M. C.	Municipal Committee
C. B.	Cantonment Board
.. . . . .	Nil
