PREFACE

This part presents information on household cultivation and industry collected for the first time. The eight tables that comprise this volume portray a picture of the household economy obtaining in the State in 1961. Data is presented for the household cultivation with reference to the household size, ownership or tenancy interests in land, sizes of cultivation holdings, number of persons engaged and the varying degrees in which different types of household industries combine with it, and for the household industry and its different branches with reference to the number of persons engaged and the period for which they are employed during the year. The information has been prepared from a 20 per cent sample of households drawn from rural and urban areas separately.

The tabulation of this data was done by the Mechanical Tabulation Unit of the Registrar General's Office for which I am grateful to Shri Asok Mitra, Registrar General, India. I thank Shri S. C. Sharma, Mechanical Tabulation Officer who prepared the tables and Dr. U. B. Mathur, Deputy Superintendent Census Operations, Rajasthan, who checked them for accuracy.

I am also indebted to Shri P. S. Ramachandran, Manager, Government of India Press, Simla, for the printing of this book.

ADMINISTRATIVE UNITS

INTRODUCTION

In earlier censuses, the only information available for households was their total number and size and information on economic activity of the population was based only on individual (and not household) participation in different sectors. It was realised that in a predominantly agricultural country like ours, where most of the population lives in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as an entity. It was, therefore, decided that the information relating to economic activities of the majority of households, that is to say those engaged in cultivation of land and household industry, should be collected at the Census 1961. The following concepts were adopted :—

A. Cultivation—

Cultivation includes ploughing, sowing and harvesting of land but does not include operations treated as industry such as fruit-growing and keeping of orchards or groves. The cultivation of land includes all land normally used for cultivation including temporary fallows. It includes only those plots or parcels of land which are cultivated by the household itself. Owned land which is leased out to others is not included. Obviously it will be the land which lies within the village or in adjacent villages or within such distances as enables the household to work on the land or actively supervise the cultivation. It does not include the land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. A household having land under cultivation is called a cultivating household. When a head of the household himself and/or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken (on lease) from private persons, the household is said to be engaged in household cultivation. It will be observed that owner cultivators and tenant cultivators are both included in this category. The agricultural labourers working on land, which is not either of their own or taken from others on lease, are not treated as cultivators. The households engaged in cultivation do not thus include the households whose members work only as agricultural labourers. The households engaged in cultivation have been classified by the following three types of interests in land :

(a) Those engaged in cultivation of land entirely owned or held from Government;

(b) Those engaged in cultivation of land entirely held from private persons or institutions for payment in morey, kind or share ; and

(c) Those engaged in cultivation of land partly owned or held from Government and partly from private persons or institutions for payment in money, kind or share.

The first type includes all pure owner cultivators such as proprietors, occupants, or tenure holders with or without right to transfer land. The second type includes pure tenancy cultivators with a variety of tenancy rights. The third type is a combination of the first two.

B. Household Industry—

A household industry is an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to production, processing, servicing or repairing of goods. This may include sale of goods but should not be confined to buying and selling only. Thus, the main criteria for household industry are (*i*) its smaller scale, (*ii*) its being run at home in urban areas and within the village in rural areas and (*iii*) its essential factor of participation of the head of the household and/or one or more members of the household. The household industry conducted by the household for a longer period in the year is treated as its principal household industry.

C. Worker—

A person is called a worker if (*a*) in the case of seasonal work like cultivation, livestock, dairying, household industry etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and (*b*) in the case of regular (non-seasonal) employment in any industry he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause is treated as a worker. A person who had been offered work but had not actually joined is treated as a non-worker. Work includes not only actual work but effective supervision and direction of work also. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages in minding cattle or selling firewood or making and selling cow-dung cakes or grass etc., or any such work, she has been treated as a worker. The population classified as workers here is the economically active population including family workers but not including unemployed persons. A family worker is a member of the household who works, without receiving wages in cash or in kind, in cultivation or household industry conducted mainly by the members of the household and ordinarily does at least one hour of work every day during the working season. A hired worker is an outsider who has been in whole time employment of the household during the last working season or is in whole time employment during the current working season. This category does not include those agricultural labourers who are casually employed for short periods for harvesting of crops or other operations.

The following ten tables have been prepared on the basis of the data collected during the Census 1961:

TABLE B-X—Sample households (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry for all areas.

TABLE B-XI—Sample households engaged in cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately.

TABLE B-XII—Sample households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately.

TABLE B-XIII—Sample households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in Rural and Urban areas separately.

TABLE B-XIV—Sample households engaged only in household industry classified by principal household industry in all areas.

PART A—Households classified by major groups of principal household industry and number of persons engaged.

PART B—Households classified by minor groups of principal household industry.

TABLE B-XV—Sample households engaged both in cultivation and household industry classified by size of land in Rural and Urban areas separately.

TABLE B-XVI—Sample principal household industry classified by period of working and total number of workers engaged in household industry in all areas.

TABLE B-XVII—Sample households classified by (i) number of male and female members by size of households and (ii) engagement (a) neither in cultivation nor in industry, (b) in household industry only and (c) in cultivation sub-classified by size of land cultivated.

TABLE C-I—Composition of Sample households by relationship to head of family classified by size of land cultivated.

TABLE SCT-V—Sample households engaged in cultivation classified by interest in land & size of land cultivated in Rural areas only.

The above tables have been prepared on the basis of 20% sample of households. To ensure the quality of the sample, every 5th household from the first random household was taken. The sample households were marked continuously for rural areas of a tehsil and for urban areas of a district *i.e.* households left over in a Household Schedule pad were carried over to the next Household Schedule pad for the selection of sample households. Thus to start with, all the pads of Household Schedules of one tehsil were arranged in order of ascending number of the location codes of villages. The random number necessary to make a start was picked up and the first schedule chosen corresponded to this random number. Thereafter, the samples were continuously picked up without a break until the last pad of the tehsil was exhausted.

The first eight tables *viz.* B-X to B-XVII which form the Household Economic Tables are presented in this Volume. Tables C-I and SCT-V find place in part II-C (i) & part V-A respectively.

The form of the Schedule which was used to collect the information and the instructions given to enumerators for filling it up are reproduced below:

INSTRUCTIONS FOR FILLING UP THE HOUSEHOLD SCHEDULE

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil, town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every Household Schedule.

When you are visiting each household for enumeration you should write the Code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the Census and a separate Household Schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus, the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'un-related persons living together'. In such a household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an institution separate families are also living, each such family should be treated as a census household and a separate Household Schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the week-days in town and spends the week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

NOTE: Part II—Census Population Record overleaf should be filled up during the first round of enumeration (10 February to 28 February) from the enumeration slips relating to the household and brought up-to-date with corrections, if any, after the second visit during check period 1 March to 3 March, 1961.

If the Head of the household is a member of a Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the household belongs within the parallelogram.

You should then fill up the part of the Household Schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land (Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, *e.g.*, land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possesssion, (ii) with rights of permanent and heritable possession but without right of transfer, (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

(a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);

(b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);

(c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;

(d) tenants holding land on temporary leases who are liable to ejectment; and

(e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following:

(a) land taken for a fixed amount of money;

(b) land taken for a fixed amount of produce;

(c) land taken for a share of the produce;

(d) land for which money is paid partly in one and partly in any other form mentioned above; and

(e) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentiond in category 1(ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, *i.e.*, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. The area figures should be recorded in acres up to the first place of decimal, and not rounded up to the nearest acre. The local bigha may, however, vary from place to place. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold:

(a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electro-plating in baths, it should still be considered a Household Industry, even in urban areas as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers, who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain process like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry (s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write I under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly, in the case of households engaged in Household Industry only, if the Head of the household is working write I in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write I under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to 'Total'. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a Household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Houesehold Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry' only and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of Households engaged in Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

TABLE B-X

SAMPLE HOUSEHOLDS

(i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY

(ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND

(iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY

FOR ALL AREAS

NOTE ON TABLE B-X

This table is prepared on a 20 percent sample of households and is presented down to district level for all areas and upto tehsil level for rural areas only. The sample households have been classified into four categories viz. (i) households engaged neither in Cultivation nor Household Industry, (ii) households engaged in Cultivation only, (iii) households engaged in Household Industry only and (iv) households engaged both in Cultivation and Household Industry. Thus the table divides all the households in three important sectors of economic activity.

Cultivation includes ownership, tenancy cultivation and agricultural labour. The Household Industry relates to production, processing, servicing or repairing and includes makers and sellers of goods.

TABLE B-XI

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

NOTE ON TABLE B-XI

This table presents data down to disrtict level for rural and urban areas separately and up to tehsil level for rural areas only. In this table a more detailed examination of the cultivating households, which have been separated in the previous table, has been made. Such households have been classified according to the size of land cultivated and cross tabulated by the interest in land cultivated. The sizes of land in acres are given as less than 1, 1·0–2·4, 2·5–4·9, 5·0–7·4, 7·5–9·9, 10·0–12·4, 12·5–14·9, 15·0–29·9, 30·0–49·9, 50+ and unspecified.

The interest in land cultivated has been classified into the following three categories :—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share and

(*c*) Partly held from Government and partly from private persons for payment in money, kind or share.

Abbreviations (a), (b) and (c) have been used in place of legends for interest in land cultivated under Column 1 of the table and the same have been spelt out at the bottom of each page.

TABLE B-XII

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

NOTE ON TABLE B-XII

In this table the data has been shown for rural and urban areas separately down to district level and also up to tehsil level for rural areas only. The table will facilitate a further study of households which are engaged only in cultivation, as each household having a particular size of holding mentioned in table B-XI has been cress tabulated with reference to the number of persons working in cultivation. The holding has been grouped into the following size ranges (in acres); less than 1,1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9 and 50+

In the case of household where more than one person is working, the number of family workers and hired workers have been separated. Family workers have also been separately tabulated by sex.

TABLE B-XIII

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

NOTE ON TABLE B-XIII

The table is prepared for rural and urban areas and is presented down to district level. The table shows the distribution of sample households engaged both in Cultivation and Household Industry classified by size of land cultivated and by Household Industry. The Household Industries have been classified according to the code numbers of divisions 0, 1 and 2 & 3 and their major groups of Indian Standard Industrial Classification (see Annexure at the end of this table for detailed description). It throws light on Household Industries which are carried on as ancillary to cultivation in different parts of the State.

Major groups of Household Industry having less than 10% of the figures of the respective division are not given in the table but are shown in the Appendix at the end of the table. The divisions thus affected are marked with an asterisk (*).

APPENDIX TO TABLE B-XIII

The major groups of Household Industry which have been dropped from the main table are given in this Appendix. The data has been shown in run-on lines. The figure preceding the bracket represents the code numbers of the major group not shown in the table. Alphabets given in brackets are abbreviations used for showing the different sizes of land cultivated and are explained below. The numerical figure appearing after the alphabet denotes the number of households in that particular size indicated by that alphabet.

Abbreviation	Size of Land in Acres	Abbreviation	Size of Land in Acres
A	= Less than 1 acre	G	= 12·5-14·9 acres
B	= 1·0- 2·4 acres	H	= 15·0-29·9 „
C	= 2·5- 4·9 „	I	= 30·0-49·9 „
D	= 5·0- 7·4 „	J	= 50+ „
E	= 7·5- 9·9 „	K	= Unspecified
F	= 10·0-12·4 „

TABLE B-XIV

SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY
CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY
IN ALL AREAS

NOTE ON TABLE B-XIV

In this table the data has been presented for the total, rural and urban households separately for the districts and relates to households engaged only in Household Industry. The table has been prepared in two parts.

Part A:—It relates to households classified by major groups of principal Household Industry and number of persons engaged in each, grouped under 1,2,3-5,6-10 and more than 10 persons. The Household Industries have been classified according to the code number of divisions 0,1 and 2 & 3 and their major groups of Indian Standard Industrial Classification (for detailed description of code numbers see Annexure at the end of the Table B-XIII). The major groups of Household Industry having less than 10% of the figure of the respective division have been omitted from the main table but are shown in the Appendix at the end of the table. The divisions thus affected are marked with an asterisk(*).

Part B:—It relates to households classified by minor groups of principal Household Industry. In cases where there are more than one Household Industry under a minor group, sub-minor group numbers in four digits have been given. Detailed description of code numbers of minor groups and sub-minor groups are available in the Annexure at the end of the table.

APPENDIX TO TABLE B-XIV PART-A

The major groups of Household Industry which have less than 10 percent of the figures of the respective division have been omitted from the main table and the affected divisions are marked with an asterisk. The data for such major group is given in run-on lines in this appendix. The figure preceding the bracket represents the code numbers of the major group dropped from the table. Alphabets shown in brackets are the abbreviations used for class ranges of persons engaged in the household industry as explained below. The numerical figures given after alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation		Class Range of Persons	Abbreviation		Class Range of Persons
A	=	1 Person	D	=	6—10 Persons
B	=	2 Persons	E	=	More than 10 Persons
C	=	3—5 Persons	F	=	Unspecified

TABLE B-XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

Note

The title and main headings of this table for pages 316-317 to 416-417 should be read as :

(1) Title of the table :—

B-XV—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND

(2) Main heading over cols. 2 to 5 :—

Total of cultivating households which are engaged in household industry

(3) Main heading over cols. 6 to 26 :—

Cultivating households engaged in household industry

NOTE ON TABLE B-XV

This table has been prepared for households engaged both in Cultivation and Household Industry. The data has been shown separately for the rural and urban areas of the districts and further up to tehsil level for rural areas only. In this table, an analysis has been made of persons working in these households with reference to size of holding. In cases where more than one person is employed, the number of family workers and hired workers are separately given. Similar data in respect of households engaged in Cultivation only has already been given in table B-XII. A comparison between this table and table B-XII will show how the combination of Household Industry with Cultivation affect the employment position. This table helps to establish a co-relation between the Household Industry and the scale of Cultivation.

TABLE B-XVI

SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY
PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS
ENGAGED IN HOUSEHOLD INDUSTRY
IN ALL AREAS

NOTE ON TABLE B-XVI

This table is confined only to Household Industry and is presented down to district with total, rural and urban break-ups. The data in respect of households engaged in Household Industry only or both in Household Industry and Cultivation are given separately. Household Industry is classified according to period of working of the industry grouped under 1-3 months, 4-6 months, 7-9 months and 10 months to one year, and under each category number of households, number of family workers and number of hired workers are given. This table thus furnishes important data on the seasonality of various household industries and yields inferences on the seasonality of Household Industry with seasonality of Cultivation.

The major groups of Household Industry having less than 10% of the figures of the respective division which have been omitted from the table are shown in the Appendix at the end of the table. The divisions thus affected are marked with an asterisk (*). For detailed description of divisions and major groups of Household Industry see Annexure at the end of the Table B-XIII.

APPENDIX TO TABLE B-XVI

The major groups of household industry having less than 10 percent of the respective divisions marked with an asterisk have been excluded from the main table and have been shown in run-on-lines in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table while alphabets given in brackets are meant for showing the different ranges of period of working in the household industries 'with' or 'without' cultivation as explained below. The numerical figure shown after the alphabets denotes the number of households in that particular range indicated by that alphabet.

With Cultivation			Without Cultivation		
Abbreviation		Class range or period of working	Abbreviation		Class range or period of working
A	=	1 to 3 months	E	=	1 to 3 months
B	=	4 to 6 ,,	F	=	4 to 6 ,,
C	=	7 to 9 ,,	G	=	7 to 9 ,,
D	=	10 Months to 1 Year	H	=	10 Months to 1 year
X	=	Months not stated	Y	=	Months not stated

TABLE B-XVII

SAMPLE HOUSEHOLDS CLASSIFIED BY

(i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND

(ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY
(b) IN HOUSEHOLD INDUSTRY ONLY AND
(c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

NOTE ON TABLE B-XVII

This table has been presented down to the district with total, rural and urban break-ups. The family sizes of sample households have been classified according to single member, 2-3 members, 4-6 members, 7-9 members and 10 members and over. It may be noted that although the 'Census Household' is not exactly the same as 'Family' to the extent that it may also include unrelated persons residing with the family during the Census count yet this table gives a general idea of the family sizes as in the majority of families outsiders likely to be insignificant.

The sample households have also been classified by economic activity i.e. by work in cultivation or household industry. Households engaged in cultivation have been further classified by size of land holding. Classification by economic activity as well as by size of land holding is presented only for rural areas while classification by size of households is presented for total and urban areas.

As the table is based on 20% sample, total number of households and household population are given in a separate statement at the end of the table.
