FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations / modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government / Union Territory administration. It inter - alia provides data / information on some of the basic demographic and socio-economic characteristics and on availability of certain important civic amenities / facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (wardwise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories, including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part - B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part - A comprised Village and Town Directories, the PCA of villages and towns (wardwise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil /town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also

provided for the first time during 1981 Census in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement, details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes / centres were added in Statement IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Blocklevel presentation of data in the Village Directory and PCA instead of the traditional Tehsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along-with the corresponding codes of 1981.

This publication is a joint venture of the State Government / UT administration and the Census Organisation. The data have been collected and completed under the direction of Shri. K. Sampath Kumar, Director of Census Operations, Tamil Nadu, on behalf of the State

Government which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri. M.M. Dua, Joint Director, for the sake of uniformity in presentation of information / data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of census / non-census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri. M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri. A.K. Singh, Deputy Director who was assisted by Shri. N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992

A.R. NANDA
Registrar General, India

PREFACE

The District Census Handbook is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village / panchayat at the lowest level to the district level including panchayat union / taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception and by 1961, it reached the dimensions of a compendium for the district. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Handbook in this State is narrated in the Introductory Chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the community Development Block / Panchayat Union level to help planners in the formulation of micro-level developmental plans at the lowest administrative unit level. In this State, for development planning, the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users of Village Directory and PCA data from the magnetic tapes / floppies or from the published records, the computer code as well as the manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part - A - Village and Town Directory and Part - B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as part A & B for smaller districts.

Part - A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communications, etc., and if any of

these facilities are not available to any village, distance range of the nearest place from where available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data on infra-structure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro - level' local area development planning at the lowest administrative unit viz., C.D.Block/Panchayat Union level. This is the reason why this time data are being published at C.D. Block / Panchayat Union level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of the population of the town at each of the censuses from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and District Headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and SC & ST population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes / centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic and other amenities available in all notified slums in Class - I and Class - II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part - B deals with the Primary Census Abstract for all the villages in the rural areas and wardwise for urban areas. This time the PCA data like Village and Town Directory data are arranged C.D.Block / Panchayat Unionwise giving area of the village (in hectares), area of town (in Sq.Km), number of occupied residential houses, households, population by sex, Scheduled Caste and Schedule Tribe population, literates, main workers and their distribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers, and the population in the age group 0 - 6 by sex.

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA and Publication of data at C.D. Block / Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at

micro-level for local area developmental plans as the C.D. Block / Panchayat Union is the lowest administrative unit for developmental planning.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part - A - Village and Town Directory, history and general features of the district, etc., I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February - March, 1991, the reference date being sunrise of 1st March, 1991.

I remain grateful to the Director of Census Operations, Shri. K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri. M. Thangaraju, Joint Director of Census Operations and Shri. Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to N. Manjini, Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri. S.P. Grover, Joint Director of Census Operations and Shri. Phool Singh, Deputy Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

Apart from that, Shri. Gummodi Bapuji, in-charge of DCH Section took a meticulous care to arrange this volume in a systematic manner with the help of his colleagues S/Shri. A.V. Raman, K. Sambamoorthy, Investigators, P.G.Sankaran, and M. Thangavelu, Statistical Assistants and other section officials. The preparation of maps included in this volume were done under the supervision of Shri. Jogesh Das, Senior Geographer.

In the compilation and processing of Village Directory and Town Directory data, was ably assisted by Smt. R. Rani Bai and Smt. A.M. Mangayarkarasi, Investigators and their assistants respectively while Statistical Assistant, Sri. K. Madhavan is chiefly responsible for preparing the analytical notes, inset tables, draft write - ups and arrangements of the matter in order.

ANALYTICAL NOTE

Census concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every census and present data separately for rural and urban areas. Urban areas which are specifically defined for census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 Census are :

a) All places with a Municipality, Corporation or Cantonment Board or Notified Town area, committee, etc

b) All other areas which satisfied the following criteria :

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities:

(iii) A population density of at least 400 per sq.km. (or one thousand per square mile)

The above definition adopted for both the 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. As of the 1961 and 1971 Censuses, the males engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criterion. But in 1981 Census as well as in 1991 Census, they have been treated on par with agricultural activities for the purpose of the test for this criterion. Prior to 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in 1971 Census and continued in 1981 and 1991 Censuses also.

An urban agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, university campuses, port areas, military camps, etc., would have come up around a city or town but falling outside the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city / town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called urban agglomeration. All the constituent units of urban agglomerations are also independent urban units or towns.

Census House

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant and may be used for residential or non - residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes / Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste or Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In the 1981 Census, a literate was defined as a person who can both read and write with understanding in any language. A person who could merely read but cannot write was not a literate. It was not necessary that for a person to be considered as a literate must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all the children of the age of 6 years or less are treated as illiterates where as in the 1981 Census all children of the age of four years or less were treated as illiterates.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Main and Marginal workers

The dichotomy of workers and non-workers of 1961 and 1971 Censuses had been dropped and the trichotomy of main workers, marginal workers and non-workers were introduced in the 1981 Census and has been continued in the 1991 Census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person had done any work during the reference period and if he had worked for the major part of the year, i.e. if he had worked for 183 days or more, he was considered to be a full-time worker (Main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers.

All the main workers and the marginal workers have been classified under one of the four main categories in the 1981 Census. While in 1991 Census, they have been classified under one of the nine industrial categories as was done in 1971 Census. They are : I) Cultivators (C), II) Agricultural Labourers (AL) III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV) Mining and Quarrying, V) (a) Manufacturing, Processing, Servicing and Repairs in Household Industry, V) (b) Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI) Construction, VII) Trade and Commerce, VIII) Transport, Storage and Communication and IX) Other Services.

The definitions of these nine industrial categories of workers are given below :

I. *Cultivators (C)*

For the purpose of census, a person is considered as cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. *Agricultural Labourer (AL)*

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/ she has no risk in the cultivation, but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III. *Livestock, forestry, fishing, hunting and plantations, orchards and allied activities*

Persons who were reported as engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities are treated as workers under this category.

IV. *Mining and Quarrying*

Persons who were reported as workers in mining and quarrying are classified under this category.

V. a) *Manufacturing, processing, servicing and repairs in household industry*

Household industry is defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in case of rural areas and within the precincts of the house only in case of urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Merely selling of food items or other edibles should not be regarded as household industry.

b) *Manufacturing, processing, servicing and repairs in other than household industry*

Persons reported as workers in manufacturing, processing, servicing and repairs other than those mentioned in V-(a) are treated as workers in this category.

VI. *Construction*

Persons working as plumbers, mason, electricians, painters and others eganged in construction work were treated under this category.

VII. *Trade and Commerce*

Persons engaged in work such as wholesale or retail business or trade are treated as workers in this category.

VIII. *Transport, storage and communication*

Persons who were reported as drivers, conductors, technicians, fitters, welders and other communication workers were treated under this category.

IX. *Other Services*

Persons engaged in services other than those mentioned in I to VIII categories are treated under this category. Workers who could not be classified in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration have been considered as non-workers.

Thus, non - workers cover all persons who are engaged in his / her household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependants such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

After the census of 1951, Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of 1971 District Census Handbook was in three parts, viz., Part-A, Part-B, and Part-C; Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census tables and certain administrative statistical tables.

The tradition of bringing out the District Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present District Census Handbook will be published in two parts, viz., Part - A – Village and Town Directory and Part - B – Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE AND TOWN DIRECTORY STATEMENTS AND PRIMARY CENSUS ABSTRACT

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of ward or division of a town wards of towns which are constantly referred to by the data users.

The Village Directory statement gives the list of villages by C.D.Block and for each village the

area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail / road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix - I gives C.D. Blockwise abstract of educational, medical and other amenities available viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, maternity and child welfare centres, family planning centres, community health workers etc., and the number of such institutions, various types of sources of drinking water such as tap, well, tank, tube-well, river, fountain, canal, etc., post and telegraph offices, bus stops, railway station, power supply, etc., and also the number of villages not having such amenities.

Appendix - II gives for each non - municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix- III is only the list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc., are available.

Appendix - IV gives list of villages according to the proportion of SCs/STs to the total population by ranges. Part-A of the Appendix lists out villages according to the proportion of SC population. The information is presented by the ranges in per cent, viz., 0-5, 6-10, 11-15, 16-20, 21-30 and 31 + percent and above. Part-B according to the proportion of ST population ranges viz., 0-5, 6-15, 16-25, 26-35, 36-50 and 51 + percent and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A.

In all the statements, except IV-A, the towns are arranged in alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment which are required to be left out. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

The concept of "urban agglomeration" was introduced for the first time in 1971 replacing the concept of "town group" of 1961. The concept of urban agglomeration has been continued in 1981 and 1991 Censuses also. An urban agglomeration may be explained as "it must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets :

"(See the name of the main town of the agglomeration)"

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

Statement I - Status and Growth History

Statement - I provides some basic data based on the Primary Census Abstract for the towns and urban agglomerations of 1991 Census. For analysing the town directory data at the State level and all India level, some new columns, have been introduced in the 1981 Census. The new items are :- class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981 and 1991 Censuses are also provided in this statement. In 1991 Census, a new item, the name of C.D. Block is also provided in the statement.

Classes of the towns are presented according to 1991 Census population of the towns as follows :

Population			Class
100000	and	above	I
50000	to	99999	II
20000	to	49999	III
10000	to	19999	IV
5000	to	9999	V
Below		5000	VI

Location Code Number of Towns

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole. In 1991 Census, name of C.D. Block has been included with a view to locate the town in the appropriate C.D. Block.

Statement II - Physical aspects and location of towns, 1989

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of Statistics, Tamil nadu, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For Col.(9), nearest city with population of one lakh and more is furnished according to 1991 Census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The zero within brackets in columns 10 and 11 denotes that the referent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows : "Cauvery (R)-5". In this case, 5 is the distance in Kms of the navigable river Cauvery from the referent town. In brackets, "R" for river and "C" for canal have been given.

Statement III - Municipal Finance, 1988 - 89

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The receipts and expenditure are furnished in terms of rupees in hundreds.

Statement IV - Civic and other amenities, 1989

The civic and other amenities existing in the towns as in 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Column 3 - Civic administrative status : It is a new column introduced in this statement in 1981 to facilitate analysis.

Column 4 - Population : It is also a new column introduced in this statement in 1981 to measure the amenities in respect of population.

Column 5 - Scheduled Caste and Scheduled Tribe population :

It is introduced to know the size of the population of the weaker sections of the community in the towns based on 1991 census population data.

In this statement, information on road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply (source of supply, system of storage with capacity) and fire frighting service are also collected from the Municipal Commissioners and Panchayat Union Commissioners.

Electrification

Electrification particulars obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners have been furnished as given below :

i) *Domestic Connections*

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

ii) *Industrial connections*

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills, oil mills, grinding machines, cotton ginning and engineering industries etc.

iii) *Commercial connections*

This refers to the services given to shops, business houses, public institutions like offices, schools and commercial establishments.

iv) *Road lighting points*

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected alone has been furnished under street lights and not the points.

v) *Other connections*

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A - Civic and other amenities in notified slums, 1989

This is a new statement on civic and other amenities in the notified or recognised slums of Class I and II towns introduced during 1981 Census. Generally, in cities or towns having slums, the local authority such as Municipality or

Municipal Corporation or even the Development Authority have notified the recognised slums. Such notifications are linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil etc., are given in this statement.

Statement V - Medical, educational, recreational and cultural facilities, 1989

In this statement, medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. Under medical facilities, number of hospitals/dispensaries/T.B. clinics etc, and number of beds in medical institutions etc., are furnished.

In educational facilities, the number of Arts / Science / Commerce colleges, Medical Colleges, Engineering Colleges and Polytechnics obtained from the State Education Department are furnished.

Column 10 - Recognised shorthand, typewriting and other vocational training institutions :

Particulars were obtained from the District Industries Officers and from the Directorate of Employment and Training. The term recognised refers to institut recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc., of the Government or by Semi-Government or autonomous bodies, public sector projects etc.

Column 16 - Number of working women's hostel with number of seats :

This is a new column introduced during the 1981 Census. Considering the increase in the employment of women in urban areas, the housing need of working women has been considered as an important subject for study.

Cinema in column 18 - refer only to the permanent cinema theatres and do not include the touring cinemas.

Column 19 - Community Halls have been added in this column as they are fast becoming a common feature of the urban land scop.

Statement VI - Trade, commerce, industry and banking in 1989

In this statement, trade, commerce, industry and banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract, as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different Panchayats) in the "Villagewise Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract will give the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, number of SC/ ST population, literates, total main workers, distribution of main workers by nine industrial categories, marginal workers and non-workers in respect of each unit. In 1981, the main workers were classified into four categories whereas in the 1991 Census they are classified into nine industrial categories as in 1961 and 1971 Censuses. For the first time in this census, the population in the age group 0-6 with sex break up is presented in PCA in order to arrive at the realistic literacy rate as all the persons below seven years are treated as illiterates in the census. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary Census Abstract for each CD Block is presented for the first time in the Indian Census, . Besides these, separate Primary Census Abstract for scheduled castes and scheduled tribes which contain similar details as those in the PCA for general population is presented for State/ District/Taluk/Community Development Block/ UA/City/Town.

With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also, wherever portions of one village happen to be in two or more panchayats. The segment-wise data have to be used separately or

added with the data of concerned segments so as to derive panchayat data. For example, a portion of a revenue village bearing L.C.No.9, Thingalur, forms part of two panchayats, the figures are given seperately for each portion of the village against L.C. No.9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz., 9 a/b and 9 b/b given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be added up to arrive at the total figures for the respective panchayats. An appendix presented in the case of the Urban Primary Census and Abstract it gives 1991 population, Scheduled Caste and Scheduled Tribe population for each enumerator block of the town. This may be useful for administrative and election purposes in the urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of presentation

At the beginning, the District Primary Census Abstract containing data for District and C.D.Blocks (for Total, Rural, Urban areas) as also towns under each C.D. Block and at the end, all the towns/UAs in the district are presented. In 1991 Census, the C.D.Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alphabetical list of villages for each C.D. Block in the district. This is followed by Village / Urban PCA. In the Village / Urban PCA, data for the first C.D.Block for total, rural and urban areas separately, followed by data for villages and census towns falling under each C.D. Block are presented. Thereafter, similar data for second, third and subsequent C.D.Blocks in the district are presented. At the end of the last C.D.Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban blockwise PCA, total population and population of Scheduled Castes/Scheduled Tribes for each Enumerator Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Annexe - I contains details of Community Development Blocks falling under each taluk and Annexe - II contains names of the villages/segment of villages constituting each town in the district.

Maps

Apart from the District Map given as frontispiece, maps for each taluk showing the villages, Location Code numbers and their boundaries are presented. The boundaries of the C.D.Block falling in the taluks are also shown. As compared with the maps presented in 1971 and 1981 District Census Handbooks, some improvements have been effected in the maps presented in this volume. All towns are shown with shading screens and also spheres according to the population size of towns in the district and taluk maps.

Area Figures

In the District Primary Census Abstract, the area figures are given in Sq.Km for total, rural and urban areas. In the Village Primary Census Abstract, the area figures for each revenue village are given in hectares upto two decimals. The area figures for each town is given in Sq.Km. in the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities. The total of the urban (area) of a district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of the district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D.Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D.Blocks will not add up to the district area figures because, the C.D.Block area figures represent the "Land use" area, while those of the district represent "Geographical Area", supplied by the Surveyor General of India. The total of the village areas given in the Villages/Urban Primary Census Abstract may not tally with the rural area of the C.D.Block given, as the C.D. Block area figures include hills, forests, rivers etc. whereas the village area may not include the same. One Sq.Km is equal to 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

Part - A

Brief analysis of the villate and town directory data based on inset tables.

A brief analysis relating to certain population characteristics is made utilising that information collected in the village and town directory. A number of tables have been generated for this purpose. The tables are generated at the district / C.D. Block level for the rural areas and in regard to urban areas, townwise particulars are presented.

SOUTH ARCOT DISTRICT - AN OUTLINE

Brief History

South Arcot district formed part of the Tondaimandalam. During the Sangam age, the district along with the rest of Tondaimandalam territory had passed into the hands of Cholas. Karikala Chola (50-90 AD) defeated the combined forces of the Cheras and Pandias and later made an Alliance with the Cheras and established friendly relations with the ruler of the Pandia Kingdom. The Cholas were overthrown during the Pallava regime by Simha Vishnu Pallava and South Arcot region was under Pallava rule for a few centuries. Later, the Pallavas were overpowered by Pandias. Chola rule was once again revived by Vijayalaya Cholan and his son and successor, Aditya I (871-907 AD) consolidated the new Chola dynasty who annihilated the Pandian power at first and later subdued the Pallavas. South Arcot continued to remain under Chola supremacy along with other regions of Tondimandalam since Adityal was followed by a succession of powerful rulers. The later Chola rulers of 10th and 12 th century AD were weak and finally South Arcot along with rest of the Chola empire passed into the hands of the Eastern Chalukyas. For a period, Cholas regained thier lost power with the assistance of the Hoyslas of the north, but their supremacy came to a close with the rise of Jatavarman Sundara Pandia-I(1251 AD) who defeated the Cholas and established Pandian power over South Arcot regions. the swam of the Pandian kings over the region lasted little over 50 years, followed by Muslim domination from 1338 to 1378 AD.

By 1378 A.D,m South Arcot came under the rule of Vijayanagar Kingdom and petty Chieftains called Nayakas were appointed to rule the region. By about 1610 Gingee which comprised of almost the whole of South Arcot district fell to Muslims for a while. Later, the forces of Bijapur took Gingee form the Golkonda army and from 1648 to 1677, South Arcot was under the control of Bijpur generals. In 1677, Shivaji took Gingee area with the assistance of Golkonda forces. In 1680, Harji, the Maratha chief of Gingee area not only asserted his individual position, but also encouraged the British to settle down in his territory which caused the establishment of certain factories at Cuddalore, Porto-Novo, etc.

After the death of Harji, the fort near Tindivanam fell into the hands of the Mughals in 1694, the Mughal emperor Aurangazeb had an eye on Gingee and after prolonged fighting, The Gingee fort was stormed in 1697 by Zulfikar Khan and it fell into the hands of the Mughals in 1698. subsequent history was group rivalries of the Nawab of Arcot, the Nizam and the two foreign powers-the British and the French. For a brief period, one Sadat-Ullah Khan held sway over Gingee from 1714 onwards. His nephew Dost Ali succeeded him on his death. His two sons Safdar Ali and Hasanr Ali were set against each other and in 1740, Safdar Ali assumed office as Nawab of the carnatic when Dost Ali and his son Hasan Ali were killed by the Marathas. In 1743, Anwaruddin was installed as Nawab by the Nizam. during the Mughal regime, both the English and French acquired settlements in South Arcot for their trading purposes. During the Anglo-French rivalry, South Arcot district was turned into a cockpit of war.

After severe fighting, Gingee fell into the hands of British in 1760. During the years 1748-95 when Mohammed Ali was the carnatic Nawab, South Arcot regions were administered by managers appointed by him. In 1774, the Nawab leased out the district as a whole for a fabulous rent. Whenever the district was under assignment to the East India Company, for payment of Nawab's debts, it was adminsitered by British officials. In due course, the Nawab had become completely dependent on the company for financial as well as military aid. After the death of Mohammed Ali, the company insisted on the surrender of the districts of carnatic region in lieu of payments due from the Nawab towards the maintenance expenses of the troops of the company in the maintenance expenses of the troops of the company in carnatic, the East India Company entered into an agreement with Azeemud-Daulat, son of Ammer-ul-umrah in 1801, According to which he was recognised as the Nawab of carnatic and he gave up his claims to the carnatic regions. Thus, by virtue of that agreement of 1801, South Arcot along with other regions of the carnatic passed into the hands of the East India company. From that date onwards, south Arcot had remained under British authority till 1947 when the coountry became independent.

Jurisdictional changes

At the time of independence, the district was having eight taluks. They were Chidambaram, Cuddalore, Tirukkoyilur, Tindivanam, Villupuram, Gingee, Kallakkurichi and Vriddhanchalam.In 1961 and 1971, the number of taluks had remained the same. But, during 1971-81, four new taluks have been formed by the bifurcation of four existing taluks. The newly formed taluks are Ulundurpettai from Tirukkoyilur, Panruti from Cuddalore, Tittakudi from Vriddhachalam and Kattumannarkoil from Chidambaram. the number of taluks has thus increased to 12, during 1981 Census. After the 1981 Census, one more taluk Viz. Vanur has been effected by the bifurcation of Tindivanam taluk in December, 81, thereby increasing the number from 12 to 13 in 1991. However, there was no change affecting the jurisdiction of the district during the past four decades from 1951 to 1991.

Physical Aspects

The coastal district of South Arcot lies between 11° 5' and 12° 30' of the northern latitude and 78° 37' and 80° of the eastern longitude. It is bounded on the north by Chengalpattu-MGR and Tiruvannamalai-Sambuvarayar districts, on the west by Dharmapuri and Salem districts, on the south by Tiruchirappalli and Tanjavur districts and on the east by Bay of Bengal. The district has an area of 10,895 Sq.Kms., constituting 8.38 per cent of the State's total area(130,058 Sq. kms.). The Vellar, an important river of the district along with its tributaries, Vasishtandadi and Swetanadi form the boundary between Tiruchirappalli and South Arcot districts for about 58 Kms. Coleroon river which branches off from Cauvery forms the boundary approximately for 60 Kms. between South Arcot and Thanjavur districts. Besides the sea barrier on the east, the Kalrayan hill range which divides South Arcot from Dharmapuri and Salem districts stands as yet another natural border for the district. The district has a lengthy coastline of about 100 Kms., stretching out from Marakkhanam in the north to the mouth of coleroon (Kollidam) in the south.

The district is for the most part a flat plain sloping gently from the west to the sea on the east and also from the north to the south except for a strip of high ground running across the district from Pondicherry to Vriddhachalam. The region can be distinguished into the following natural divisions. On the west, the Kallakkurichi taluk and the neighbouring areas with the Kalrayan Hils and their undulating valleys are noted for dense woods and green jungles. Thje eastern part consists of red soil tracts and wide spread paddy fields and green groves onrun bearing trees marked here and there by broad open tanks. The most uninviting part of all regions in the district lies to the north of Tirukoilur taluk, prossessing most by arenaceous and virtually barren soil. The lands in the north, especially those around Gingee Hills are most fascinating. With numerous hills and hillocks of fantastic shapes and thick jungles that go with them. The southern region of the district is comparatively green and fertile. The seashore is fringed with a belt of blown sand of varying width.

Forestry

The forest resources of South Arcot district are very meagre when compared with other districts of the state and therefore, there is nothing significant in the flora and fauna of this district. Margosa, Banyan,Palmyra, Coconut, Tamaring, Mango etc. are the common trees found in the district. In the hilly tracts, certain botanically interested varieties of plants are also seen.

Since there are no dense forests in the district, large varieties of wild animals are very rare. Hyenas are seen in Kallakkurichi, while spotted deer occurs in the Kalrayans. Antelopes are found in both Kallakkurichi and Tirukkoyilur taluks. Rabbits are seen in many localities. Smal birds like partridges and quail are very common in Villupuram and Tirukkoyilur taluks. Florican, teal, duck and peafowl are also seen in the district. The oysters of Cuddalore backwater is very famous. There is nothing significant about the cattle which is inferior. Two varieties of sheep viz., Sammeri and Kurumba are very common in the district.

Hills

Among the hills of the district, the Kalrayans which runs north to south in the western part of Kallakkurichi taluk and spreads into Dharmapuri and Salem districts is an important range. The boundary between South Arcot and the two districts of Dharmapuri and Salem runs through the top of the mountain range. The portion of Kalrayan hill range lying in South Arcot is approximately 40 Kms. In length and 12 to 20 Kms. In breadth. The Kalrayans are 2000 to 3000 feet high and rise abruptly like a wall shutting off Kallakkurichi taluk from the west. The level of the Kalrayan range is generally uniform and at either end of the hills are two historic passes-the Attur pass in the South and the Chengam pass in the north. The Gingee hills run south westwards from very near to Gingee for approximately 22 Kms. and

most part of it is covered by reserve forest. The Mount capper plateau, situated west of Cuddalore is the third prominent range of hills in the district. This range runs from a point about 16 Kms. North of Pondicherry, South-Westwards to near Srimushnam. The plateau forms part of a belt of red laterite ground running southwards from the north of Pondicherry across villupuram, Panruti, Cuddalore and Chidambaram taluks. Besides the above continuous hill ragnes, there are several isolated elevations in the district. Such elevations are common in Gingee and Kallakkurichi taluks.

Soil

The soils of the district are mainly of the varieties, viz., red, black and arenaceous. Red ferruginous soil is the predominant variety and it covers over 60 per cent of the area of the district. The comparatively fertile black soil is found mostly in the southern taluks of Panruti, Cuddalore, Vriddhachalam, Tittakudi, Chidambaram and Kattumannarkoil. Red soil covers large extents of Gingee, Tirukkoyilur and Kallakkurichi taluks. The arenaceous (both loamy and sandy type) soil is found along the coast in the taluks of Chidambaram, Cuddalore and Tindivanam and such area is generally used for casuarina plantations. The black soil, due to its imperviousness and the moisture-retaining capacity, is best suited for wet and garden cultivation alike. The red soils are suited for dry crops like groundnut and pulses. The Tindivanam area is sandy with 75 per cent of coarse fractions, sandy and fine sand. The soils are alkaline, with moderate soluble salts with a trace, of calcium oxide and magnesium oxide. The soils contain a fair amount of total lime. They are poor in organic matter, nitrogen and phosphoric acid and potassium nitrate. With the exception of black soil tracts, the district can not be said to be fertile. In spite of the low fertility of the soil, the district is renowned for sugarcane and ground nut cultivation.

Minerals and Mining

South Arcot district has a fairly rich mineral deposits, Lignite or brown coal is found to occur in the Neyveli tracts. The gneissaic formations are in evidence in the west of the district from Tyaga Durg in the south to the Gingee Hills in the north. The fossiliferous cretaceous lime-stones are found in Parur, north-west of Vriddhachalam and in Thiruvakkarai near Tindivanam. The Cuddalore sandstone formation which is a more recent sedimentary deposit in this part forms the Red Hills near Pondicherry and the Mount Capper Hills south west of Cuddalore.

Lignite is found to occur mainly in two areas of the district, in the Aziz Nagar region and in the Neyveli tracts. Lignite or the brown coal in Neyveli is being exploited. Lignite here lies under a depth of about 180 to 200 feet and covers an area of about 160 Km2. Associated with the lignite, there is a vast reserve of white refractory clay.

Iron ore is also found to occur in small quantities along the banks of Pennar river in Kallakkurichi taluk. Laterite is found over a wide belt of the area between Pondicherry and Vriddhachalam, in the red soil tract. Lime stone occurs in Pondicherry and the neighbouring areas of Tindivanam taluk. Clay deposits are found in large numbers. Magnetic iron ore occurs on the Kalrayan range and in Kallakkurichi taluk. It is also found in small sizes in a few other areas of the district. In Kunnam near Tindivanam, the famous Black Granites are available in plenty which are exported mainly to foreign countries.

In Marakkanam near Tindivanam, plenty of lime shell deposits which is of high chemical grade are found, all along the coast. Silica sands of high purity occur as natural sands near Marakkanam. These sands find extensive use in foundaries and also in glass manufacture. Important mineral based industries in the district are lignite and refractories. The Neyveli Lignite Corporation, a Government of India enterprise is the agency engaged in working in the mine. Neyveli Thermal Power Station is the major establishment consuming large quantity of lignite from Neyveli Lignite Corporation.

Rivers

The important rivers that flow through South Arcot district are the Gingee river, also known as the Varahanadi, Ponnaiyar, Gadilam, Vellar and the Coleroon also known as Kollidam river. Among them, the principal river is the Ponnaiyar or Pennar. The river rises in the Chenna Kesava hill, east of Nandidurg in Karnataka and passes through Dharmapuri district and southern tip of Tiruvannamalai Sambuvarayar district and enters into South Arcot district through Tirukkoyilur taluk. Later, the river flows across Tirukkoyilur taluk and along the boundary between Villupuram and Panruti and Cuddalore taluks and empties into the Bay of Bengal, about 5 Kms. north of Cuddalore.

The Gingee river rises in the extreme north-west corner of Gingee taluk. Flowing past the taluk in southernly course into Tindivanam taluk, the river becomes the boundary between Villupuram and Tindivanam taluks for a few Kms. before empties into the Bay of Bengal with two mouths near Pondicherry. The Gadilam river rises from the eastern part of Tirukkoyilur taluk and flows through Tirukkoyilur and Panruti taluks before it joins the Malattar river and later the river passes through Cuddalore taluk and empties into the Bay of Bengal. The Ponnaiyar and Gadilam are connected by a river course called Malattar.

The vellar river is formed by the junction of Vasishtanadi and Swetanadi which rise in Salem district. The Vasishtanadi enters the South Arcot district through the Attur pass, south of Kalrayans and forms the boundary between South Arcot and Tiruchirappalli districts for about 25 Kms. The river flows for another 32 Kms. gathering the waters of Manimuktanadi, Gomukhanadi and Mayuranadi which drain the eastern slopes of the Kalrayans. The river passes through Chidambaram taluk and joins the bay of Bengal near Parangipettai. Coleroon river (branching off from Cauvery and also called Kollidam) forms the boundary between South Arcot and Thanjavur districts. The river flows on the southern boundary of Kattumannarkoil and Chidambaram taluks.

There are a few backwaters on the sea-coast caused by the sea water breaking into the water courses of streams and rivers, mainly seen in Tindivanam and Cuddalore taluks. A typical backwater is the Kaluveli swamp in Tindivanam taluk which is spread to an are a of about 50 Km²

Electricity and Power

The thermal power station of Neyveli Lignite Corporation is the only power plant located in this district. Incidentally, this is south east Asia's first and only lignite fired thermal power station. Its ability to generate sustained power is its spectacular advantage. Even if the monsoons fail, the Neyveli power station wont, but will curtail power cuts. Neyveli is the prime supplier of power to the State. Its power station, the first "power behing power" is the first pit head thermal power station in the country. Almost all the villages in South Arcot district have been provided with electric power supply. As on 31st March, 1991, fourteen towns and 2,280 villages have been electrified in the district. During 1990-91, 6,084 pumpsets have been energised and a total number of 150, 396 pumpsets have been energised in South Arcot district, as on 31-3-91.

Land and Land use Pattern

South Arcot district has an area of 10,895 Km² constituting 8.38 per cent of the State's total area of 130,058 Km². Among the total area of the district, the gross area sown is 689,243 hectares and the net area sown is 532,651 hectares. Out of the net area sown, 49.5 per cent of area is irrigated by various sources, Roughly, the land use pattern of South Arcot district other than the net area sown is as follows:-

Forests	-	500 Km²
Barren and cultivable land	-	1000 Km²
Land put to non-agricultural uses	-	1300 Km²
Cultivable waste	-	400 Km²
Land under tree crops and groves	-	550 Km²
Currant fallows	-	1400 Km²
Other fallow lands	-	340 Km²
Permanent pastures and other grazing	-	80 Km2

Nearly 50 per cent of the total geographical area of the district comes under cultivation which is higher by 8 percentage points when compared with the State's average.

Agriculture

South Arcot district occupies an important place in the field of agriculture since it is the main stay of the people of this district. As per the latest census in 1991, a little over 79 percent (79.24%) of the working population are engaged in agricultural activities as against 77.40 percent in 1981. It means that the extent of dependency on agriculture is gradually incerasing in this district.

Paddy is the important food crop cultivated over an extent of 179,942 hectares in the district during 1990-91. It is cultivated in all the taluks and more extensively in Chidambaram, Villupuram and Tindivanam taluks. Cumbu, Cholam and Ragi are the other important cerials cultivated in this district Cumbu is the most important dry grain raised over an area of 94,808 hectares, followed by Cholam (13,407 hectares) and Ragi (6,953 hectares). During 1990-91, hearly 55,900 hectares

are being utilised for the production of pulses in the district. Among pulses, black and green grams are the most important varieties grown over an extent of 40,965 and 7,047 hectares respectively. other varieties of pulses raised in the district viz. Horse gram, Red gram and Bengal gram are predominantly cultivacted as rainfed crops.

Oil seeds are grown throughout the district as a summer crop. Ground nut, Gingelly and Castor seeds are the main oil seeds cultivated here. The area under cultivation of Ground nut was 152,514 hectares followed by Gingelly with 30,108 hectares during 1990-91. Sugarcane which is a major commercial crop in the district is cultivated to an extent of 58,219 hectares. other crops grown in South Arcot are Cashew, Cotton and Tobacco. Cotton is mainly cultivated in Vriddhachalam, Villupuram and Cuddalore taluks while Tobacco is grown in Vriddhachalam, Chidambaram and Kallakkurichi taluks. Jack fruit, banana and mango are the important fruits grown in this district.

Details of area under principal crops and production in tonnes in the district during 1990-91 are given below:

Sl. No.	Crop	Area in hectares	Production of crops in tonnes (Provisional)
1.	Paddy	179,942	611,610
2.	Cholam	13,407	11,450
3.	Cumbu	94,808	102,420
4.	Ragi	6,953	14,290
5.	Other cereals	11,300	10,920
6.	Total cereals	306,410	750,690
7.	Total pulses	55,980	25,750
8.	Sugarcane	58,219	620,560 (Gur)
9.	Cotton	10,284	30,330 (BL)
10.	Gingelly	30,108	9,300
11.	Ground nut (unshelled)	152,514	199,980

Irrigation

South Arcot plays a prominent role in the agricultural sector which is mainly due to its irrigation facilities. More than 56% of area sown in the district is under irrigation. The chief source of irrigation in the district is the rivers supplemented by larege number of tanks, wells and spring channels. There are 369 canals in the district with a length of 4,874 Kms. As per the available statistics, there were 138,750 wells used for irrigation purpose alone in South Arcot in 1991. There are 2,677 tanks in the district used for irrigation. Most important among major tanks are Veeranam, walajah and Ponneri tanks in Chidambaram taluk.

The important irrigation projects of the district are the Lower Anicut, Sethiathope, Palandurai, Mehamathur Anicut, Vriddhachalam Anicut, Tirukkoyilur Anicut, Ellis choultry Anicut and Wellington reservoir. During 1990-91, out of the 532, 651 hectares of net area sown in the district, 263,800 hectares constituting 49.5 per cent were irrigated. The gross area irrigated in the district during the same period was 335,322 hectares. This works out to 48.7 per cent of the gross area sown (689,243 hectares)

Animal Husbandry

The district does not possess any distinctive breed of cattle. The indigenous cattle which are of inferior breed are fit only for ploughing. The improved and good breeds are imported from karnataka and other neighbouring areas. The inadequate fodder and the dependence on straw may be attributed as the causes for the inferior quality of the cattle. Now-a-days, fodder cultivation is being encouraged and veterinary assistance rendered. In 1991, there were three veterinary hospitals in the district besides one clinician centre and 64 veterinary dispensaries. Nearly, 220 veterinary sub-centres are also functioning in South Arcot district to render necessary veterinary assistance. During 1990-91, 1,230,800 animals were treated in these instituttions.

To improve the quality of cattle, one Intensive Cattle Development Project is functioning at Panruti. The object of the scheme is to upgrade the cattle by cross breeding with exotic breed and to step up the milk yield in the area. There are four bull stations in the district engaged in the supply of semen to the veterinary institutions for carrying out artificial insemination work.

A rinderpest district squrd is functioning at Cuddalore for successful eradication of rinderpest disease among cattle. There is a sheep farm at Chinnasalem for development of sheep in the district. A few sheep breeding societies are also functioning in the district. The poultry development has been phenomenal and a couple of poultry extnesion centres are functioning in the district.

Fishery

South Arcot district with a coast line of about 90 Kms. is one of the major fishing centres in the State. Fishermen from 58 coastal villages are engaged in the inland and marine fishing. Very large number of crafts, mechanised boats and catamarans are used for fishing by them and during 1990-91, the porduction of marine fish in the district was 22,634 tonnes-17,214 tonnes by non-mechanised crafts and 5,420 tonnes by mechanised boats. The two important inland fishing centres in the district are the Veeranam tank and the vellaru. To develop inland fishery, fingerlings are stocked in the ponds owned by the Government and supplied to different parts at nominal cost.

There are 62 fishermen co-operative societies in the district. These societies control the production and marketing of fish for their members and render financial assistance.

Industries

South Arcot district is one among the industrially backward districts in the State. The establishment of the Lignite Coporation at Neyveli, the East India Distilleries Limited, sugar factories, Chemical and fertilizer factories, creamics and Refractories Industires and a number of medium and small-scale industries accelerated the industrial growth in the district.

According to the industrial profile of Tamil Nadu Published by the Department of Statistics, nearly 60 per cent of the industrial group are engaged in the manufacture of food products, followed by manufacture of chemicals and chemical products (20 per cent).

The most important industry in the district is the Lignite Corporation located at Neyveli. The Neyveli Lignite Corporation Limited is a Government of India Enterprise engaged in commercial exploitation of Lignite, together with lignite mining in Mine I and Mine II, it has got integrated production units viz. Thermal power Station-I (600 M.W.), Thermal Power Station-II (630 M.W.) a Fertilizer Plant producing urea, a Briquetting and low temperature Carbonisation Plant and Clay Beneficiation plant.

Sugar Industry is the next major industry in the district. There are six sugar factories located at Pennadam, Mundiambakkam, Moongi thuraipattu, Nellikuppam, Periyasevalai and Tiruvennainallur. Besides sugar, Chemicals and Fertilizers, refined oil, ceramic products and paper are the other major industrial products of South Arcot district. Quite a large number of small-scale industries are also functioning in this district.

Production of raw silk to the tune of 20,750Kgs. has been recorded in the district during 1990-91. The value of the raw silk was Rs.17,637.500/-. About 75 hectares of land were under mulberry plantation during 1990-91.

Handloom industry has been a traditional occupation of the people and the industry flourishes mainly in Cuddalore, Naduveerapattu, C.N. Palaiyam and Melbhuvanagiri. Shirting and lungies are the chief varieties of fabrics woven on handlooms. More than 60 per cent of the total looms in the district are within the co-operative fold.

Trade and Commerce

Though South Arcot has an intermediary port at Cuddalore, there do not exist much sea borne trade. Urea is imported on a large scale through this port.

South Arcot is linked with all major cities/ towns by well laid roads. The important commodities exported from South Arcot are sugar, beverages and other food products, chemicals and fertilizers, etc. Commercial banks play a vital role in promoting trade and commerce in the district. As per the 1991 Census 86,705 persons have reported as workers engaged in trade and commerce. There are 26 regulated markets and one sub-regulated market in the district. The annual turnover in quantity during 1990-91 was 163,459 tonnes and the receipts was Rs.112.47 Lakhs, which was highest among the districts in Tamil Nadu.

Transport and Communications

Roads

South Arcot is linked with other parts of theState with well laid roads. The district has a well knit road system of 7,220 Kms of surfaced road and 5,289 Kms. of unsurfaced road in 1989. Among the 7,220 Kms of surfaced road, 47 Kms. have cement concrete; 4,617 Kms are bituminous

type and the remaining 2,556 Kms. are water bound macadam type.

Buses

Thanthai Periyar Transport Corporation with headquarters at Villupuram plays the prominent role in the transport system, of South Arcot. In 1991, the corporation had a fleet strength of 1,013 buses. The Corporation mainly covered the entire South Arcot district and the southern part of Chengalpattu-MGR district.

Railways

The main railway line from Madras to Dhanushkodi runs via Tindivanam, Villupuram, Cuddalore and Chidambaram. The Chord line from Villupuram to Tiruchirappali runs through Ulundurpettai and Virddhachalam. A branch line connects Villupuram and Katpadi and another connects Villupuram and Pondicherry.

Post and Telegraph

Post and Telegraphs form an important component of communication and almost all the villages have post office facilities either within the village itself or within easy reach. Nearly 200 telegraph offices are also functioning in the district. Thus, the district has got remarkably good facilities in the field of transport and communications.

Rainfalls and Climates

Generally, dry weather prevails in South Arcot district. The following table shows the rainfall in this district during 1989-90.

Month and year	Normal rainfall (in mm.)	Actual rainfall (in mm.)
June 1989	43.9	53.7
July	73.6	123.0
August	132.5	34.9
September	141.8	100.3
Total of South-west monsoon period	**391.8**	**311.9**
October	215.9	138.2
November	277.8	305.8
December	134.6	58.5
Total of North-east monsoon period	**628.3**	**502.5**
January 1990	53.7	79.5
February	14.6	19.8
Total of winter period	**68.3**	**99.3**
March	15.3	31.8
April	29.3	4.7
May	56.4	73.7
Total of hot weather period	**101.0**	**110.2**
Total of all periods	**1189.4**	**1023.9**

It may be noted that the district gets more rain to the influence of North-east monsoon (October-December). During south-west monsoon period also, the district gets fairly good quantity of rainfall. During 1989-90, the district received a total of 1,023.9 mm of rainfall as against the normal rainfall of 1,189.4 mm.

Temperature

The temperature both the maxium and the minimum, recorded in the Cuddalore Meteorological station during the period 1989-90 is furnished below.

Month and year	Maximum Temperature (in celsius)	Minimum Temperature (in celsius)
June 1989	38.8	26.1
July	34.1	24.7
August	36.4	25.6
September	34.3	24.9
October	32.7	23.9
November	29.0	22.0
December	28.6	20.5
January 1990	29.2	19.1
February	31.0	21.8
March	32.6	24.3
April	34.5	25.6
May	35.9	25.8

It may be observed that the mercury touched the maximum of 38.8°C in June. The maximum temperature of 28.6°C recorded in December 89 is the lowest maximum temperature in the district. The mercury level has gone down to the lowest temperature of 19.1°C in January 90.

Education

South Arcot district is very poor in the field of education when compared with other districts of the State. As per the latest 1991 Census, only 52.86 per cent of the population aged seven years and above are literates in the district. Almost all the villages in the district have the facilities of primary education either within the village itself or very near, within easy reach.

The Annamalai University is located in the district. It is a residential university having varieties of courses of study. More than that it has acted as a centre of Tamil Language and culture and stimulated several studies. In the sphere of professional education, the university has advanced considerably. Courses are offered in several branches of engineering. A medical college was opened in the university in 1986. Students from different parts of the State as well as country are visiting the university every year for their higher and professional studies

Major social and cultural events during the decade 1980-90

General elections to the Lok Sabha was held on 6th January 1980 in the district along with other areas in the country. On 16th January, 1980, a total solar Eclipse was witnessed in this part also. After 3 months of the dissolution of Tamil Nadu assembly on 17th February, 1980, elections to the State assembly were held in the district along with other districts in the State in May, 1980. Again in December, 1984 and in January, 1989, there were general elections to State assembly. In November, 1989, general elections to Lok Sabha were held.

The decade 1981-90 had witnessed the death of the then Prime Minister Smt. Indira Gandhi (31st October 1984), the then Chief Minister of the State and Shri M.G. Ramachandran (24th December, 1987). In 1987, from 17th to 23rd August, the 'Vanniar Sangam' in the district launched an agitation. The district suffered badly due to heavy rain and floods in 1983, 84 and 85. At Rishivandiam in Kallakkurichi taluk, a Sub-Registrar's office was started functioning from 18th July, 1983. On 5th August, 1986, a Sub-Treasury was opened at Sankarapuram in Kallakkurichi taluk. In 1981, the Chengalvarayan Co-operative sugar Mills was started at periyasevalai in Ulundurpettai taluk.

In Panruti, a District Munsiff court was opened and a bronze statue of Shri K. Kamaraj was unveiled in 1982. In Cuddalore, a TV relay station was started functioning in 1989. The then Prime Minister visited South Arcot district and dedicated the second Thermal Power Station to the nation commissioned at Neyveli.

The President of India visited Annamalai University in March, 1988 and opened a Medical College and again in 1989, the Priesident visited the Annamalai University in Connection with the Diamond Jubilee celebrations of the university.

Mahakumbabishegam was performed in the famous Lord Nataraja temple in Chidambaram, during the decade 1981-90 in February 1987.

Places of Tourist importance

South Arcot district do not have many places of tourist importance worthy to be mentioned. However, there are certain ancient temples at various places which are noteworthy. The famous ancient tample of Lord Nataraja at Chidambaram town is one of the largest temples in South India, covering an area of about 40 acres. The name Chidambaram immediately bring to one's mind Nataraja or Siva as the Lord of Dance. There are several stone inscriptions inside the temple. Some of these are not clear now. Appar, Sambandar, Sundarar and Manickavasagar have composed songs in praise of the deity. The four main towers were built by various rulers between 12th and 16th centuries.

The sanctum of the presiding deity Shri Nataraja and his consort shri Sivakama Sundari is known as chit sabai or ponnambalam. Chola rulers covered the vimanam with gold tiles. Every gold tile contains the word "Namasivaya", the Panchaksharam. To its right is the sanctum of the Akaya Lingam adorned with a gold garland of vilva leaves. There is a Spatika Lingam in ponnambalam, preesented by Loka Sankarar who also installed a chakkaram here. Kanakasabai, Devasabai, Nirutyasabai and Rajasabai are the other mandapas in the Shrine. Poojas are performed six times daily by the Dhikshidars. The Spatika Lingam is first worshipped and then only poojas are done to Shri Nataraja and his consort. The Arudhra in the Tamil month of Margazhi is the most important of all festivals when lakhs of devotees from all over the country visit Chidambaram.

Shri Bhoovarahaswamy temple in Srimushnam, Shri Vriddhagiriswarar temple in Vriddhachalam, Shri Tiruvikramaswamy temple in Tirukkoyilur, Shri Krupapureeswarar temple in Tiruvennainallur, Shri Padaleeswarar temple in

Tirupadiripuliyur and Shri Subramanyaswamy temple in Mailam are the other most important temples in the district.

Shri Bhoovarahaswamy temple at Srimushnam is dedicated to Sri Varaha Perumal, an incarnation of Vishnu in the form of a boar. The principal deity in the temple has a boar's head and a human body with two arms folding the discus & couch. This is one of Swayamuyaktha Koshtrams (i.e.) self-created in the South India. The utsavamoorthy is known as sri Yagnamurthy. His consort is Sri Ambujavalli Thayar. Among various festivals, the Brahmothsavams in the month of Chithirai (April-May) for 15 days and in the month of Masi (February-March) for 24 days are the important festivals observed. During the Masi brahmotsavam, the deity is taken to the Sea shore at Kille which is about 65 kms. away from Srimushnam for Theerthavari (Holy dip in the sea). During the visit at Kille, the deity makes a halt in the local mosque as a respect to a Muslim devotee who has faith in the power of the deity. This is continued even to-day.

Shri Vriddhagiriswarar temple in Vriddhachalam is located on the banks of the river Manimuttar. Lord Vriddhagiriswarar and his consort Vriddhambigai are the presiding deities of the temple. This shrine is one among the 22 Siva temples where the Nayanmars have sung in praise of the Lord. The Masi Brahmothsavam, Adi pooram and Vaikasi Vasantha uthsavam for a period of 10 days each are the important annual festivals which attract large number of devotees.

Shri Tiruvikramaswamy Temple in Tirukkoyilur is one of the famous ancient shrines of South India. Shri Ulaganatha Permual and Poongovil Thayar are the presiding deities of the temple. The idol of the Moolavar is 50 feet in height and is in a standing pose on one leg. It is made of wood. Panguni Uthiram and Manavalamamuni uthsavam in the month of Ayppasi and Vaikunta Ekadasi uthsavam are the important annual festivals observed of which the panguni uthiram is the most important.

Shri Krupapureeswarar temple in Tiruvennainallur dedicated to Lord Siva was in existence in the 8th century since Shri Sundaramurthy Nayanar has praised the Lord in his famous song pitha Piraisoodi. There are several stone inscriptions relating to the 12th and 13th centuries. Shri Krupapureeswarar also called as "Thaduthatkondanathar" is the presiding deity here. The Brahmothsavam in the month of Panguni is the main festival which attracts large number of devotees.

Shri Padaleeswarar temple in Tirupadiripuliyur in Cuddalore town should have been in existence in the 7th Century as Appar and Sambandar have sung in praise of the deity. The entire temple except the main tower was renovated early in the 20th century. shri Padaleeswarar and his consort Brahan Nayaki are the presiding deities. There are separate sanctums with separate entrances for the Lord and his consort. Among the several festivals, the main ones are the Brahmothsavam in Vaikasi and Sangabhishekam on the first Monday in Tamil month of Karthigai. Large number of persons from far and near visit the temple every year, especially during festival months.

Shri Subramanyaswamy temple in Mailam near Tindivanam is yet another famous temple of South Arcot district. The temple gopuram has five tiers. The presiding deity is Shri Sybramanyswamy with Valli and Devasena. Saint Arunagirinathar has composed songs praising the deity. Special festivals are observed on Karthigai asterism days in the month of Adi, Karthigai and Thai. The Brahmothsavam in Panguni is the main festial, celevrated for 10days. It is attended by large number of devotees.

The Fort at Gingee is a rare monument of historic beauty and attracts tourists. The fort stretches about 2Kms. and stands on three hills. It is a very interesting monument for history students and also for tourists. The citadal on the north is called Krishnagiri, that on the south Chandrayandurg and that on the west Rajagiri.

The Pichavaram backwater lake with picturesque forests attracts large number of tourists throughout the year. There is a fossil geological park at Thiruvakkarai. This park also attracts large number of tourists every year.

Table - 8 shows townwise proportion of schools per 10,000 population in South Arcot district. The district's average ratio of Higher Secondary, Secondary, Middle and Primary Schools are 0.72, 0.90, 1.44 and 2.80 respectively. The availability of Higher Secondary school is hghest is Thorapadi (TP) with 1.53 schools per 10,000 population, Secondary School is highest in Arakandanallur (TP) with 2.19 schools per 10,000 population, Middle and Primary schools are highest in Gengaikondan (TP) with 5.68 schoools and 9.08 schools per 10,000 population respectively. While all 18 towns of South Arcot have Primary Schools. Arakandanallur (TP) does not have Higher Secondary schools. Cuddalore Port (NMA) does not have Higher Secondary, Secondary and Middle Schools. Gengaikondan (TP) does not have Higher Secondary and Secondary schools.

TABLE - 9

NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS

Sl No.	Class, Name and Civic Status of the town	Number of Beds in Medi-cal Institutions per 1,000 population
1	2	3
1.	V Annamalai Nagar (PTS)	32.58
2.	VI Arakandanallur (TP)	0.22
3.	IV Bhuvanagiri (TP)	0.68
4.	II Chidambaram (M)	2.03
5.	I Cuddalore (M)	3.06
6.	VI Cuddalore Port (NMA)	- -
7.	V Gangaikondan (TP)	6.81
8.	III Kallakkurichi (TP)	3.30
9.	III Kurinjipadi (TP)	- -
10.	III Nellikuppam (M)	0.23
11.	I Neyveli (TS)	2.96
12	II Panruti (M)	0.47
13.	III Parangipettai (TP)	1.19
14	V Thorapadi (TP)	- -
15.	II Tindivanam (M)	1.23
16	III Tirukkoyilur (TP)	8.42
17	II Villupuram (M)	1.37
18	II Vriddhachalam (M)	2.54
	ALL TOWNS	**2.56**

Table - 9 Provides information about townwise number of beds available in Middle Institutions per 1,000 population. The district's average is 2.56 beds per 1,000 population. Out of 18 towns in the district, 3 towns do not have bed facilities in medical institutions and such a facility is highest in Annamalai Nagar (PTS) with 32.58 beds per 1,000 population followed by Tirukkoyilur (TP) and Gengaikondan (TP) with 8.42 and 6.81 beds per 1,000 population respectively.

TABLE - 10

PROPORTION OF SLUM POPULATION IN TOWNS

Sl. No.	Class, Name and Civic status of the town	Proportion of the Slum Population to total population of the Town	Density in Slums (per sq.km.)
1	2	3	4
1.	II Chidambaram (M)	4.75	60000
2.	I Cuddalore (M)	7.57	13953
3.	I Neyveli (TS)	- -	- -
4.	II Panruti (M)	- -	- -
5.	II Tindivanam (M)	- -	- -
6.	II Villupuram (M)	5.05	68712
7.	II Vriddhachalam (M)	- -	- -
TOTAL		**6.23**	**20,329**

Table-10 shows proportion of slum population in class I and class II towns of South Arcot district. It is seen from the table that Cuddalore Municipality has highest proportion of Slum population with 7.57, while the density is highest in villupuram Municipality with 68,712 persons per sq.km among other notified slums in the district.

TABLE - 11

MOST IMPORTANT COMMODITY MANUFACTURED, IMPORTED AND EXPORTED IN TOWNS

Sl. No.	Class, Name and Civic status of the town	Most Important Commodity		
		Manufactured	Exported	Imported
1	2	3	4	5
1.	V Annamalai Nagar (PTS)	- -	- -	- -
2.	VI Arakandanallur (TP)	Paper Products	- -	- -
3.	IV Bhuvanagiri (TP)	Bricks	- -	- -
4.	II Chidambaram (M)	Handlomm cloth	Paddy	- -
5.	I Cuddalore (M)	Lungies	- -	Ferlilizer
6.	VI Cuddalore Port (NMA)	- -	Paddy	- -
7.	V Gangaikondan (TP)	- -	- -	- -
8.	III Kallakurichi (TP)	Oil	Jaggery	Wheat
9.	III Kurinjipadi (TP)	Handloom cloth	Handloom cloth	- -
10.	III Nellikuppam (M)	Sugar	Sugar	Rice
11.	I Neyveli (TS)	Electricity	Leco	Conveyor belts
12.	II Panruti (M)	- -	Cashewnut	- -
13.	III Parangipettai (TP)	Bricks	- -	- -
14.	V Thorapadi (TP)	- -	Cotton	Weaving thread
15.	II Tindivanam (M)	Bricks	Salt	Cloth
16.	III Tirukkoyilur (TP)	- -	Gingelly	Redgram
17.	II Villupuram (M)	Vanaspathi	Bone Meal	Soyabeans oil
18.	II Vriddhachalam (M)	Ceramic Articles	Groundnut	- -

Table - 11 furnishes townwise most Important Commodity Manufactured, Imported and Exported in South Arcot district and which is self explanatory.

PART – A

1. VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN VILLAGE DIRECTORY

NA ... Information not available

EDUCATIONAL

P ... Primary or Elementary School
M ... Junior Secondary or Middle School
H ... Matriculation or Secondary School
PUC ... Higher Secondary / Intermediate / Pre-University / Junior College
C ... College, Any College (Graduate level and above) like Arts, Science, Commerce, etc.
I ... Industrial School
TR ... Training School
AC ... Adult Literacy Class / Centre
O ... Other educational institutions. These include Sanskrit Pathshala, Senior Basic School, Makhtab, etc.

MEDICAL

H ... Hospital
MCW ... Maternity and Child Welfare Centre
MH ... Maternity Home
CWC ... Child Welfare Centre
HC ... Health Centre
PHC ... Primary Health Centre
PHS ... Primary Health Sub-centre
O ... Others
D ... Dispensary
FPC ... Family Planning Centre
TB ... T.B.Clinic
NH ... Nursing Home
RP ... Registered Private Practitioner
SMP ... Subsidised Medical Practitioner
CHW ... Community Health Worker

DRINKING WATER

T ... Tap
W ... Well
TK ... Tank
TW ... Tube well
HP ... Hand pump
