tions, they render themselves ineligible to the benefits of free passages.

Adjutant General's Office, Simla, 30th December 1893.

1154. Attention is invited to the following Army Order, dated 1st November 1893 :—

Army Order 196, "Schedule of age and other qualifications of recruits"; amendment.

1155. A service cover addressed to "Landour" having recently been inadvertently sent to "London" by the Postal officials, it is directed that, to prevent the possibility of a similar mistake being again made, the words "Dehra district" shall be added on service covers intended for "Landour."

1156. It has been brought to notice that officers commanding batteries, squadrons or companies frequently permit themselves too wide a latitude in the interpretation of the expression "special cases" used in Art. 1236, Army Regulations, India, Volume I, Part I, regarding cash payments to soldiers in debt, with the result that avoidable loss is caused to the State, in consequence of the ledger debts of men discharged with Ignominy, &c., not having been reduced to the lowest attainable limit before the occurrence of the casualty.

They are therefore reminded that undue liberality in this matter may involve the State in extra expenditure, and are at the same time directed to limit the issue of cash to such soldiers to two pence a day, except in cases which are *really of a special and unusual nature*, necessitating a higher daily rate, a full explanation regarding which should in future be submitted with applications for the repayment of ledger debts.

In the absence of a satisfactory explanation, it will be for consideration whether the personal responsibility of the officer who allowed the relaxation of the rule should not be enforced.

A. O. 203.—*Military Examinations.*

The Commander-in-Chief has learned with much regret that some officers have not fully appreciated the extreme importance of their duties when detailed to serve on a board of supervision for a competitive examination.

The remarks of His Royal Highness on a recent case are published for information :—

Extract.

"The officers appointed to supervise such an examination are trusted, not only to superintend the actions of the individual candidates at their centre, but also to adhere in every detail to the instructions issued, and so ensure the several examinations at all centres being conducted in a uniform manner. The directions to secure this end are clear and precise.

"The manner in which the board in question complied with these directions is as little creditable to their sense of discipline, as their conception of their duties as a board has been to their sense of fairness.

"The conduct of the president and all the members merits the gravest censure, and in the case of one of the members, His

Royal Highness has been compelled to have recourse to more than a verbal expression of his displeasure."

Instructions for Boards assembled to conduct the **examination of Majors for promotion** to the rank of Lieutenant-Colonel.

1. The board will, under the general supervision of the general officer commanding, superintend the exercises (*a*) and (*b*) in the synopsis, and prepare the schemes for (*b*) and (*c*), and the questions for (*e*).

2. As a tactical problem frequently admits of more than one solution, it is not to be expected that the officers will always hold the same view as the board, but they will be called upon to give reasons for their proposed action. They may ask for any information which would probably be available on service as the result of a reconnaissance or otherwise.

3. They are to deal with the actual circumstances represented in the schemes, however unfavourable they may appear to them. The board will award credit for intelligence, judgment, common sense, and readiness of resource in making the best of any critical situation.

4. Their capabilities in (*a*) may be tested by placing under their orders units of the force referred to in (*b*). Majors of Garrison Artillery who have previously served in the mounted branches of the regiment may be given the option of handling either a battalion of infantry, or a battery of artillery, as they may elect.

* G.O.C. No. 160 of 1894.

As one object of (*b*) is to test an officer's readiness and decision, the board will record the time which elapses between the receipt by an officer of his orders, and the putting in motion of the force under his command.

The board will issue general and special "ideas" for the opposing forces.

When circumstances in (*a*) and (*b*) or (*c*) demand quick decision, the board should require immediate action; in other cases time may be allowed for reflection and deliberate calculation.

The board may at their discretion allow an officer a second trial in (*b*), if he fails to satisfy them in the first trial.

The board may satisfy themselves as to (*d*) during the performance of the exercises (*a*) and (*b*).

Two hours will be allowed for the officer to answer the two questions in subject (*e*).

5. The board will compile separate proceedings for each officer examined; will enclose with such proceedings the schemes, the tactical paper, and the replies; and will record the strength of the different arms employed in (*a*) and (*b*). The members will express their individual opinions as to the knowledge the officer possesses of the tactics of the three arms, as to his readiness and decision in the field, and as to his tactical qualifications for promotion. Each member will regard as absolutely confidential the opinions expressed by himself and the other members.

6. An officer reported by a board as qualified will be noted as passed for promotion. An officer unfavourably reported on will not as a rule be allowed to again present himself for examination before the following year.

*7. The proceedings will be forwarded by the president to the general officer commanding for transmission to the Director of Military Education in India.

*Para. 7 cancels the second clause of para. 7 of G. O. C. C. No. 265† of 1894, commencing with the words "The proceedings."

GENERAL ORDERS

BY

HIS EXCELLENCY

THE COMMANDER-IN-CHIEF.

Head Quarters, Ootacamund,
Friday, 13th July 1894.

No. 334.—The following extracts from **General Orders by His Excellency the Commander-in-Chief in India** are republished :—

Head Quarters, Simla, the 12th June 1894.

601. The result of the **competitive shooting of Batteries and Companies of Royal Artillery in India for prizes for Skill-at-Arms, 1893-94,** is published for general information :—

Group I.—Royal Horse Artillery and Field Batteries armed with 12-pr. B. L. Guns.

Prize given by His Excellency General Sir G. S. White, G.C.I.E., K.C.B., Commander-in-Chief in India.

Group II.—Mountain Batteries (British and Native) armed with 2·5-inch R. M. L. guns.

Prize given by Major-General H. C. Lewes, Inspector-General of Artillery in India.

Group III.—Mountain Batteries, Native, armed with 7-pr. R. M. L. guns of 200 lbs.

Group IV.—Garrison Companies practising with 6-inch B. L. guns.

Prize given by His Excellency Lieutenant-General C. E. Nairne, C.B., R. A., Commander-in-Chief, Bombay Army.

Group V.—Heavy Batteries and Garrison Companies practising with 40-pr. R. M. L. Guns.

Prize given by His Excellency Lieutenant-General C. M. Clarke, C.B., Commander-in-Chief, Madras Army.

Group VI.—The three Siege-Train Companies practising at Rurki.

2. The conditions were—

Groups I, II and III.

Targets—1st Series.—Three columns of infantry, each 30 strong (standing dummies) in fours, advancing directly on the battery, and 25 yards apart; depth 25 yards.

2nd Series.—A line of Infantry (standing dummies) in three groups, 25 yards apart: each group consisting of 15 dummies evenly distributed over a length of 30 yards.

Ranges.—Unknown at two positions, but within the following limits :—

	1st Series.	2nd Series.
Group I	... 2,200 and 2,600	1,800 and 2,200
Group II	... 2,000 and 2,400	1,600 and 2,000
Group III	... 1,100 and 1,500	700 and 1,100

Ammunition—1st Series.—To fire as many rounds as possible in 6 minutes.

2nd Series.—To fire 24 rounds, or as many of that number as can be fired within 8 minutes of coming into action.

Procedure.—The battery drawn up about 5 miles from the target, the position of which is unknown: advance to preparatory position, halt and prepare for action: then advance to first position approximately pointed out and come into action.

After replenishing ammunition, repairing targets, &c., advance at a trot to the second position pointed out as before, and proceed as at first position.

This procedure to be followed by Mountain Artillery as far as practicable.

Points.—Hits—One for each "lodge" or "through" (strikes not counted).

Group IV.

Targets.—Two stationary targets anchored at different ranges—one about 1,600 and the other about 2,400 yards.

Ammunition.—Twenty-four rounds 6-inch B. L. common shell, plugged.

Procedure.—Each company to parade 4 gun detachments and man two 6-inch B. L. guns in one group, the second two detachments acting as a relief to the first two.

Twelve rounds, *i.e.*, six rounds from each gun, to be fired by first two detachments at the further target: to be then relieved by second two detachments, who will fire 12 rounds at the nearer target.

Points.—For rapidity of fire.—Thirty if competition is concluded in 30 minutes. Four to be added or deducted for each minute under or over, but not more than 50 to be allotted.

For accuracy.—Shots falling within a rectangle 80 yards long by 10 wide to score as hits; outside no score. Total points for 24 hits, 175.

For fire discipline.—From a maximum of 75.

Group V.

Targets.—Six feet by 6 feet—one about 1,500 yards and the other about 2,000 yards, with rectangles 70 yards by 6 and 85 yards by 6 respectively.

Ammunition.—Forty rounds of 40-pr. R. M. L. common shell, filled.

Procedure.—Each company to parade 4 gun detachments with at least 15 qualified layers. In Heavy Batteries the four guns to be manned together and fired in succession, 20 rounds being fired at the first position and 20 at the second. In garrison companies two guns to be used (if procurable) and manned together, the detachments being relieved after 20 rounds: if only one gun available, the detachment to be relieved after every 10 rounds. In either case 20 rounds to be fired at each range.

Points.—Inner rectangles 7 and 10 points; outer rectangles 4 and 7 points.

Group VI.

Targets.—A rectangle 21 yards along line of fire, with breadth of $2\frac{1}{2}$ yards on each side, in the centre of an outer rectangle 60 yards by 10, at a range of 1,600 to 1,800 yards. Position concealed and unknown to companies.

Ammunition.—Forty-four rounds of common shell, live, per company.

Procedure.—Four guns to be manned in a Siege Battery with observing and plotting parties, and the whole practice conducted under service conditions. Eight selected layers, two for each gun, will lay for the company, and will fire six and five rounds respectively.

Points.—Each shot in inner rectangle to count 5; in outer 3.

Fire discipline.—Maximum: 40 points.

Time.—For each minute, or fraction thereof, by which the carrying out of the practice exceeds the time limit mentioned, one to be deducted from the total score.

3. The result shows, on the whole, a most marked improvement in the Horse and Field Artillery. Rapidity has increased and accuracy has not suffered. The difference between the batteries at the top of the list and those at the bottom is, however, more marked than ever; and Sir George White looks to these latter for increased exertions to shoot up to the power of their guns.

A conscientious and methodical analysis of each day's practice report will disclose to a commanding officer where the faults lie, and no time should then be lost in eradicating them.

The first eight batteries in Group I are Horse and Field alternately, a battery of Horse Artillery heading the list as was the case last year.

In Group II (Mountain Artillery armed with 2·5-inch R. M. L. guns) the result is disappointing. In point of rapidity there is an improvement, but in accuracy there has been a falling off greater than can be accounted for by the fact that the target was slightly more difficult this year than last.

The shooting in Group III (Mountain Artillery armed with 7-pr. R. M. L. guns) was fairly good.

In Group IV the shooting has not come up to expectations: rapidity has not improved, and accuracy has suffered; the scores comparing unfavourably with those made last year.

The shooting of Group V (Heavy Batteries and Garrison Companies practising with 40-pr. R. M. L. guns) shows a most decided advance on last year.

Group VI.—The three Siege-Train Companies practising at Rurki also show a creditable improvement on last year.

GROUP I.—12-PR. B. L. GUNS.

		1894.	1893.	1892.	1st Position.	2nd Position.	Total.	*First position.* Mins.	*First position.* Secs.	*Second position.* Mins.	*Second position.* Secs.		
No. 23 Company, Eastern Division (Heavy Battery).	Captain Block	9	11	9	88	106	189	12	7	12	35	Palipahari, near Jhansi.	At first position the range was found; the laying for elevation generally found, but not so for line. At second position ranging was badly managed and range not found until twelfth round. The laying throughout this series was regular.
No. 24 Company, Southern Division.	Major Henn ...	10	13	2	86	100	186	25	40	27	20	Quetta ...	At the long range, owing to want of uniformity in the laying, the range was not found until the ninth round, after which laying was fairly regular. At the short range the operation of ranging was not well managed, and observation being at fault, range was not found until twelfth round. Laying at this position was fairly regular. Two guns used.

No. 20 Company, Western Division.	Major Mansel	11	14	...	76	107	183	19	15	20	45	Quetta ...	At the long range, range was found and laying regular. At the short range observation was faulty: trajectory too high and laying not uniform. Two guns used.
No. 11 Company, Southern Division.	Major Ryan ...	12	4	6	66	40	106	22	57	30	55	Delhi ...	Two guns used which shot differently. The range at both positions was eventually found with each gun. The laying with Gun No. 62 was not uniform during ranging at 1st position, but regular at 2nd. The laying with Gun No. 103 was irregular. This Company won 3rd prize last year.
No. 22 Company, Eastern Division (Heavy Battery).	Captain Drake	13	12	7	...	...	...	11	14	10	45	Sital-ki-Mari, near Multan.	No points can be given to this battery as it is reported that, owing to the state of the ground, it was impossible to distinguish between the strikets of shell and that of fragments of the same. According to the observation of the range party, the range appears to have been found at both positions: the laying at the long range fairly regular, at the short very irregular.

602. The results of the **Annual Inspection in Signalling of British troops in India,** for the year 1893-94, are published for general information.

2. The Commander-in-Chief is of opinion that on the whole the results are very satisfactory in the Cavalry and Infantry, special credit being due to the signallers of the 2nd Battalion, Royal Scots Fusiliers, 1st Battalion, Gordon Highlanders, 2nd Battalion, Lancashire Fusiliers, 2nd Battalion, Royal Inniskilling Fusiliers, and the 18th Hussars, for the very high state of efficiency to which they have attained in this most important branch of military training.

3. His Excellency, however, regrets to notice that the signalling efficiency of some of the Regiments and Batteries inspected is not all that can be desired, and the attention of Officers Commanding is again invited to the provisions of G. O. No. 11* of 1892, paragraph 8, which do not, in some cases, appear to be interpreted as liberally as they might be.

Examination in Part II, para. 331, Army Regulations, India, Volume II.

Head Quarters, Simla, the 29th June 1894.

666. The reports showing the results of the **inspection of the signallers of Native corps in India** carried out by the Inspectors of Army Signalling and their Assistants during the past cold season have been received and considered by the Commander-in-Chief.

2. His Excellency is glad to see such an improvement in the signalling of the Native Army, there being 1,806 qualified signallers this year as compared with 867 last year. The signalling in the Hyderabad Contingent has also much improved since last year, when there were only 76 efficient signallers as against 158 this year. The signalling equipment generally is also reported to be in good order and kept clean, this being in marked contrast with last year's report.

3. With a few exceptions, Commanding Officers have afforded every encouragement and facility for practice, which has contributed largely to the excellent results obtained.

4. The following regiments have now got their full complement of efficient signallers :—

In Bengal Circle—

2nd Bengal Lancers.
3rd ,, Cavalry.
10th ,, Lancers.
12th ,, Cavalry.
5th ,, Infantry.
9th Goorkha Rifles.

24th Punjab Infantry.
25th " "
30th " "
32nd Pioneers.
33rd Bengal Infantry.
38th " "
45th Sikhs.
1-1st Goorkha Rifles.
1st Sikh Infantry.
3rd " "

In Madras and Bombay Circles—

3rd Madras Lancers.
2nd Bombay "
4th " Cavalry.
2nd Lancers, Hyderabad Contingent.
4th " " "
6th Madras Infantry.
7th " "
15th " "
16th " "
17th " "
20th " "
1st Bombay "
4th " Rifles.
5th " Light Infantry.
10th " " "
13th " Infantry.
23rd " Rifles.
25th " "
2nd Hyderabad Infantry.

In addition to the above, several corps have 12, 14 and 15 efficient signallers.

5. The majority of the men instructed at the special classes held in accordance with paragraph 1352, Army Regulations, India, Volume II, Part I, have been reported qualified as regimental signallers, and this too is very satisfactory.

6. In a few regiments men in regimental employ, such as writers, schoolmasters, etc., are used as signallers. This practice should be discontinued, it being essential that signallers should consist only of duty men available to proceed on detachment at any moment.

7. The Commander-in-Chief notices the good results obtained from the system pursued by some Corps of sending signallers to school for an hour daily to learn English, and trusts that all Commanding Officers will, as far as possible, adopt similar measures.

8. Finally, His Excellency trusts that the general improvement in signalling efficiency shown in the present report throughout the Native Army in India will be fully maintained in the future, and that next year's inspection will show even better results.

Bangalore,
6th August 1894.

J. A. W[illie], Captain,
Superintendent of Army Schools,
Madras Presidency.

By order of His Excellency the Commander-in-Chief,

ELPHINSTONE BEGBIE, Colonel,
Officiating Adjutant General.

GENERAL ORDERS
BY
HIS EXCELLENCY
THE COMMANDER-IN-CHIEF.

Head Quarters, Ootacamund,
Friday, 17th August 1894.

No. 393.—The following **General Order by His Excellency the Commander-in-Chief in India** is republished:—

Head Quarters, Simla, 11th July 1894.

711. The Commander-in-Chief is pleased to direct the publication of the accompanying return shewing the **results of the annual course of musketry for the season 1893-94,** executed by the British and Native troops in India, including the Hyderabad Contingent.

Owing to changes in the musketry course for the British Army, no accurate comparison can be made with the shooting of previous years.

The standard of efficiency attained by British Cavalry is not, however, so good as it might be. Of the eight regiments exercised, two are classified as "moderate" and six "bad," a result which leaves much to be desired, and His Excellency trusts that all ranks will endeavour to secure an improvement in this branch of instruction.

The results obtained by British Infantry are more satisfactory, especially considering that, with very few exceptions, this is the first annual course executed by many Regiments with Lee-Metford rifles. A large number of battalions have, however, failed to attain the standard "good," but the Commander-in-Chief is convinced that there will be an improvement in this respect, during the current year, when the men will have become more familiar with the Magazine rifle.

The shooting of the Native Army shews a general improvement on that of last year, and is, on the whole, very satisfactory.

RETURN showing the results of the annual course of musketry for the season 1893-94, *executed by the British and Native troops in India, including the Hyderabad Contingent.*

No. 417.—The following extracts from **General Orders by His Excellency the Commander-in-Chief in India** are republished :—

Head Quarters, Simla, the 31st July 1894.

* * *

753. The following rules for **signal-firing** and for the use of **screens and discs** to denote the object and direction of artillery fire at field manœuvres are published for information and guidance in supersession of those published in G. O. C. C.,† dated 14th August 1891, page 455.

Rules.

Description of screen.—The screen consists of a piece of canvas secured to two light poles with iron-shod ends for fixing in the ground, dimensions 5 feet long, 4 feet high. These poles can if desired be made in two pieces with either socket or splice joints to raise the screens higher.

One side of the screen is painted diagonally black and white, the *conventional* sign for Cavalry in Topography, and when held towards the enemy means "firing at cavalry."

The other side has a flap of canvas sewn on horizontally in the centre and is painted black one side. There are two buttons on either pole, and eyes at the flap corners, so that when the flap is buttoned *up*, the target shows all white—"firing at artillery."

When allowed to fall down (buttons at foot of poles to secure it) the screen shows black below, white above, the conventional Kriegspiel arrangement (coloring) of Infantry blocks.

It is very portable, rolling up and strapping on a gun trail or it can be carried on a limber.

When a battery unlimbers, a man can easily *hold the screen up* if time is an object; in the case of a battery wishing to show that it sees another battery. No guys are necessary.

† G.O.C. No. 436 of 1891.

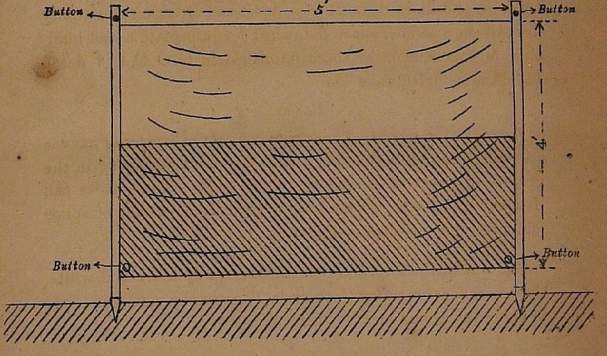
REFERENCES.

SCREEN—"INFANTRY."

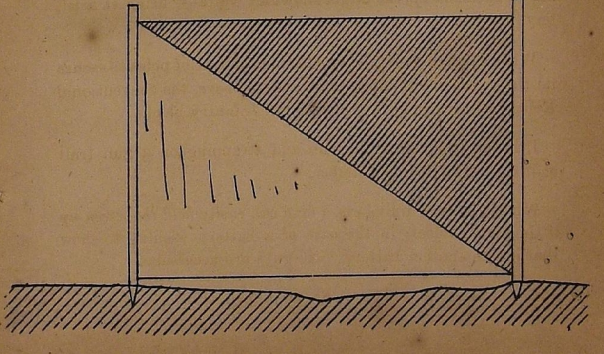
Poles 5 feet long, 4 feet high.

Flap down and secured to the buttons.

Flap up—Screen all white "Artillery,"
Artillery being as a rule first object of fire,
all white is the best being so very distinct.



"CAVALRY"



Description of rectangular disc.—The disc consists of two fold cloth, 2 feet square, one side black, the other white.

A square staff of hard wood, about 2 feet 8 inches long by 1 inch × 1 inch, carries on it two cross pieces, each 2 feet long by 1 inch × $\frac{1}{2}$ inch, loosely rivetted on it 2 feet apart.

The cloth is secured to the upper cross piece with copper tacks, and is secured to the lower cross piece by a spring hook at each end.

When not in use, the cross pieces are folded along the staff, and the cloth rolled round and secured by a strap and buckle.

The staff with disc is fixed into a square hole on the head of a tripod stand, and secured by a split key.

The tripod stand has legs 4 feet long, shod with iron, and has two guy lines 4 yards long, with iron picket pegs.

Directions for use.—When coming into action, one man takes the screen and disc off the carriage, and drops the former on the ground. He doubles out about 20 paces towards the intended object of fire and on the windward flank of the battery, and places his tripod, having meanwhile adjusted his disc and secured the staff in the head of the tripod. He then pickets the two guy lines to windward, splaying them at about 60 degrees. (The white side of disc is presented to the enemy if the background to the battery be dark, and *vice versâ*.) He then doubles back, and elevates his screen, aligning it and disc on the enemy. The object of the disc is to denote the direction of fire.

Rules for signal-firing.

When firing on Cavalry, 1 gun ...	in addition to elevating the screen so as to show the sign of the arm fired at.
„ „ „ Artillery, 2 guns in quick succession.	
„ „ „ Infantry, 3 guns in quick succession.

[S.G.O. No. 26 of 24th August 1894, page 153.]

No. 421.—General Officers Commanding Districts are requested to assemble **invaliding medical boards,** at stations occupied by British troops, to examine all men whom it is proposed to invalid during the next trooping season. The first board should be convened early in September, the second during the first week in January, and a **special** board, if necessary, at the end of February. But in the Southern District and in Burma, the first board should be held in August, and the second on the 2nd of January, if possible. The Principal Medical Officer of the District, or, in his absence, the medical officer doing his duty, will sit as President. [Section XVII, Vol. VI, A. R. I.].

2. The invalids will be despatched to Deolali *en route* to Bombay, under orders which will be issued in the Quarter Master General's Department. Those from stations in the Southern District and in Burma will be despatched *direct* to Bombay in the Indian Marine troopships plying between Rangoon and Bombay, and touching at Calicut and Cannanore. Those invalided *after* the assembly of the second board will be despatched to Bombay by the route used in previous years.

Invalids, whose state of health would make it hazardous or injurious to be forwarded to Deolali, should, in communication with the General Officer Commanding Bombay District, be sent to Bombay and attached to the Colaba Sanitarium until required to embark, particular care being taken that none but cases of serious sickness are so sent, and that, in each instance, it is first ascertained from the General Officer Commanding Bombay District that accommodation is available.

3. The instructions contained in the Regulations for the Discharge of British Soldiers serving in India are to be followed, so far as they apply to invalids, any subsidiary orders necessary in furtherance of the foregoing arrangements being issued by General Officers Commanding Districts.

4. At stations, where any men of corps under orders to embark next trooping season from Bombay for England are now serving, **special invaliding medical boards** will also be assembled, in communication with the Principal Medical Officer of the District, to ascertain what men it will be necessary to discharge from the service on arrival at home.

5. Complete invalid and discharge documents will be made out in India for all men whose discharge on arrival at home is contemplated; those of men left behind (that is, who will not

accompany their corps to England) being transmitted to the officer commanding the depôt, or station, where the men may be quartered. The documents to be prepared for men left behind, whose discharge on arrival at home is not contemplated, will be those for an ordinary transfer to the depôt company, with the usual invalid documents complete.

6. A nominal roll of *all* men not embarked with their corps will be transmitted by the commanding officer to the Adjutant General, Ootacamund, shortly before sailing, the cause of detention being specified in each case. It will further be stated whether all necessary documents in the case of each man shown in the roll have been transmitted to the proper authorities.

7. The Adjutant General of the Bombay Army will be requested, under the orders of the Commander-in-Chief, to cause any men of these corps, whose fitness for embarkation at the time intended may have become doubtful after departure from their stations, to appear before medical boards at Bombay, in view to their being detained till later in the season, when the period for arrival at home will be more suitable for men in a weakly state of health. In the cases of all such men left behind, the instructions given in paragraph 5 will be observed.

8. Presidents of invaliding medical boards will communicate the decisions in the several cases brought before them to the officer commanding the corps concerned.

9. The particular attention of General Officers Commanding Districts, and of officers commanding batteries and corps, is called to the instructions contained in paragraphs 17 and 19 of the Regulations for the Discharge of British soldiers serving in India, and to Quarter Master General's Circulars No. 2755-A of 2nd August 1888, and No. 969 of 2nd March 1889.

1104. The particular attention of General and Staff Officers is called to the instructions for the conduct of examinations in the **native languages** contained in the amendments of Army Regulations, India, Volume II, published in G.O. 32† of 1894, which, during the recent quarterly examinations in Hindustani by the Lower Standard, have been disregarded in several instances.

Unless the rules on the subject are strictly complied with, the Commander-in-Chief will be under the necessity of setting aside informal examinations.

1106. A **"long reconnaissance"** will be carried out annually by all British and Native Cavalry regiments, for a period of one week, with a "general idea" in accordance with the Cavalry Regulations, 1891. Some portion of the regiment should invariably be detached as an enemy, which can be supplemented by flagmen, if necessary. The work should be carried out, as far as possible, under service conditions (including scale of baggage, &c., in accordance with field service equipment tables).

If more than one regiment is in the station, endeavours should be made to combine in carrying out the above. In the case of adjacent cavalry stations, in the same or different districts, it is desirable that the week's reconnaissance should be that of opposing forces from the respective stations.

Regiments may execute the "long reconnaissance" at any time during the drill season, provided General Officers Commanding consider they have had sufficient preliminary instruction in reconnaissance work.

---

†S.G.O. No. 23 of 1894.

Sketches with detailed reports of the operations should be submitted to the District Staff Office for the inspection of the General Officer Commanding, who will cause them to be carefully examined and any defects brought to the notice of Commanding Officers. Those of the regiment most deserving of merit in each district should be submitted to the Inspector General of Cavalry in India.
