PREFACE

It was in 1976 that the Government of India had decided to bring out Supplements for all ten year old district Gazetteers so that they can provide latest statistical information relating to the subjects discussed in their parent volumes. Accordingly Madhya Pradesh produced its first three supplements in 1992. This is fourth in the series.

The district gazetteer of Indore was published in 1971. There has been considerable development in the district over the last 22 years, especially in the fields of education, science and technology, and the notes and tables included in this Supplement are bound to speak for the same. In many cases it was difficult to procure yearly figures without break and, therefore, for the sake of uniformity data have been provided quinquennially for earlier years of the past two decades.

The Tables were collected, compiled and finalized in 1992 and the manuscript was sent to the Press in May 1993. The officers who actively participated in this work include Dr. N.P. Pandey, Joint Director, Sarvashri V.K. Jain, Dr. K.S. Sharma, Dr. M. Sharma, Nawal Kishore and S.C. Chaturvedi, Deputy Directors, and Sarvashri S.S.C. Kerketta, Dr. Prabir Kumar Jha, Dr. Vandana Pandey, Dr. Suresh Tiwari and H.R. Ahirwar, Assistant Directors. Dr. Prabir Kumar Jha supervised the printing under the guidance of Dr. N.P. Pandey, while Shri Yaduraj Singh, artist, prepared the map, also under the same guidance. Photographs were supplied by the Director, Centre for Advanced Technology (CAT) and the Registrar, Devi Ahilya Vishwavidyalaya, Indore. The State Archaeology Department furnished material for a note on History and Excavations. The Deputy Controller, Govt. Regional Press, Gwalior, took special interest to see the printing through. I am thankful to all of them.

Bhopal,
1st June, 1993.

K.R.R.C. Nair
Director

In Retrospect

Indore has occupied a pivotal position in the cavalcade of history down the centuries. The contemporaneity of the chalcolithic and painted grey ware cultures was also noticed in this region. This region also saw the ascendancy of illustrious rulers and mighty dynasties. Sometime it was part of vast empires, as during the rule of the Mauryas, the Sungas, the Imperial Guptas, the Gurjara-Pratihars, the Sultans and the Mughals. At others, dynasties like the early Kalchuries, the Parmaras, the Kachhapaghatas, the Tomars, the Sultans of Malwa arose independently in Malwa. Later, the Marathas brought this region under their sway and thereby paved the way for the emergence of Scindhia, Holkar, Pawars and other Rajput dynasties. Each of them contributed to the growth and enrichment of art, architecture, painting, music, literature, etc.¹

EXCAVATIONSAzad Nagar (Indore) Excavation-1974

The recent excavations by the Department of Archaeology and Museums, Government of Madhya Pradesh, in Collaboration with Vikram university, Ujjain at Azad Nagar (Indore) in 1974 showed the existence of archaeological remains. The site has four mounds of which only two were excavated as the other two were badly disturbed. The cultural sequence of Period I, II and III termed as Kayatha, Malwa and early historic is described below.²

1. Extract from - Malwa through the Ages.

2. Ibid., Dr. V.S. Wakankar, Azad Nagar (Indore) Excavation (1974) pp. 89-90.

Period III : Early Historic (100 B.C. to A.D. 200)

A house of the Mauryan period with walls built of stone rubble and wooden poles, was exposed in layer I of TR I. The house yielded a copper inlaid - iron dagger handle, a potsherd inscribed DATASA in Brahmi, N.B.P. and associated wares. Trench III was taken at a lower level towards north of trench I. It was mostly dug in the earth deposits of a mud rampart built to protect Kushan or Shunga habitations on the mound. The fillings have given very important objects of the Mauryan period such as punchmarked coins, antimony Copper rods, ivory mother Goddess figure and antimony rods. The rampart sections are visible on the Chalcolithic deposits.

On mound 3, a brick structure of three courses were exposed. It was highly damaged. Still it could be traced as a Stupa built during shunga period. The Stupa was built in mud mortar on a square platform which contained skeletal remains of a Buddhist monk with a terracotta barrel. Below the stupa, remains of earlier habitations of the conch shell bangle makers, as well as smiths were excavated on the northern side of the mound.

Period II, Malwa Chalcolithic (1800 B.C. to 1300 B.C.)

Chalcolithic habitation is confined only to mound I. On this mound below the Mauryan habitation the Chalcolithic deposits were exposed in a soil made up of black humus, probably indicating dwindling settlement and Vegetation growth. The Malwa Chalcolithic pottery from this site is highly specialized and it is significant that the light red thick slipped Malwa ware and coarse fabric ware were so common in other chalcolithic sites of Malwa are nearly absent. The Malwa ware of this site is highly developed like Kayatha ware. The fabric is highly levigated and the ware is well fired.

Period I, Kayatha (2100 B.C. to 1800 B.C.)

There is no gap between Malwa Chalcolithic and Kayatha cultural deposits. The red painted chocolate were red and black painted buff ware. incised rough ware are like those of Kayatha.

Rectangular houses of mud walls with wooden post supporting the tools were unearthed. The roof were most probably made of weeds and grasses. The houses had gravel floors, occasionally using burnt lumps of clay. A few rubble alignments were also detected. Even though there was no sufficient place to dig the chalcolithic remains, whatever evidence has been obtained in this salvage operation is very significant and throws new light on the earliest chalcolithic habitations of Malwa dating back to about 4,000 years from the present.

Nehru Centre, LalBag, Indore

On November 14, 1988, the Lalbag palace and campus have been inaugurated as a Nehru Centre for Arts and Sciences. The main palace will house a relatively quiet centre of activities including Nehru Centre for ideas, a library, exhibition on science and technology, contemporary mediaeval, classical and folk arts both applied and fine art-photographic exhibits, a cell for musical research and an open and closed door auditorium. Restored to its prestine splendour, layout and decor, the Lalbag palace and premises will be a home for all the adventures of human mind and spirit in the future Lalbag, with Nehru, now belong to the ages.

LASER LABORATORY, CAT, INDORE

(Courtesy: Director, CAT)

Table No. 25

Centre for Advanced Technology (CAT), Indore

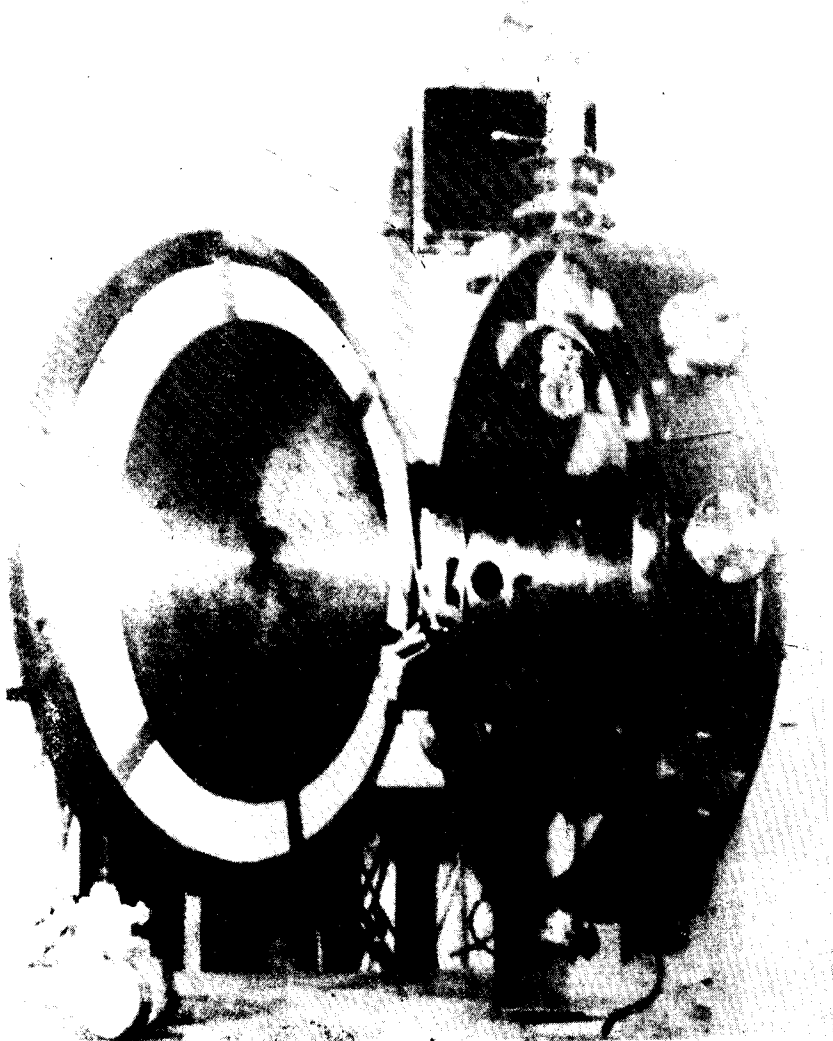

The Department of Atomic Energy (DAE), sharing the vision of its founder Dr. Homi J. Bhabha, has remained a firm believer in the catalytic role science and technology has to play in making our nation self-reliant and strong. Therefore, it has always encouraged R & D in frontline technologies. A major step in this direction was taken when DAE established a new research centre, the Centre for Advanced Technology (CAT) at Indore to expand R & D activities being carried out at Bhabha Atomic Research Centre (BARC), Bombay in two frontline areas of science and technology namely accelerators and lasers.

A site selection committee headed by Dr. Raja Ramanna, selected the picturesque Sukhniwas lake and surrounding area as the site for this new centre. This site was approved by the Prime Minister Smt. Indira Gandhi on February 7, 1983. The construction work at the centre was inaugurated by the then President Shri Gyani Zail Singh on February 19, 1984. The construction of laboratories and houses was taken up in May 1984. The first batch of scientists from BARC, Bombay moved to CAT in June 1986. Since then the centre is rapidly growing into a premier institute for work related to R & D in lasers, accelerators and their applications.

The centre already has a staff of about eight hundred including two hundred scientists and engineers. The CAT campus spread over a 760 hectare picturesque site on the outskirts of Indore, encompasses laboratories, housing for the staff and other basic amenities like school, sports complex, etc.

With the establishment of CAT, most of the laser programme at BARC has been shifted to CAT. CAT has now been identified by the Government of India as a premier institution for development of lasers. It is also playing a pivotal role in co-ordination and implementation of the national laser programme, formulated by the Science Advisory Council to the Prime Minister, for providing a major thrust to laser technology in India.

Table No. 100

Devi Ahilya Vishwavidyalaya, Indore *

Established as Indore University in 1964 by an Act of 1963, and rechristened as Devi Ahilya Vishwavidyalaya in 1982-83. As a fitting tribute to an illustrious member of the Holkar family, this centre of higher education is a worthy addition to the educationally and culturally advanced city of Indore.

From the very beginning the Vishwavidyalaya is being shaped to assume the stature of a residential university and, therefore, its area of jurisdiction runs concurrently with that of the District. Initially it had only 8 faculties which number rose to 16 by 1993. They are : Arts, Social Sciences, Science, Bio-Science, Law, Education, Engineering, Medical, Ayurveda, Home Science, Commerce, Management, Dental Surgery, Technical

Engineering, Liberal studies and Engineering Science. There were only 14 Colleges affiliated to the Vishwavidyalaya with 8 thousand students earlier, but their number rose to 31 with 30 thousand students in 1992-93.

The number of students, teachers, study centres, etc., directly under the university for the period from 1985 to 1992-93 was as under.

	1985	1990	1992-93
1. Number of Students	649	2,036	2,500
2. Number of Teachers	44	118	151
3. Study Centres/Institutes	12	18	28
4. Hostels	01	03	04

Various courses of Degree, Diploma and Research work are being conducted by the Vishwavidyalaya. Under the Self-finance Scheme also several courses have been taken up such as, M.C.A. of 5 years and M.M.S. of six years. M.Phil Degree in Science, Bio-Science and Social Science, and Higher Research studies are also carried out in the Institutes.

For the development of tourism and to create an awareness on the subject among the students a one year Post-graduate Diploma course has also been started by the Vishwavidyalaya.
