The new Survey shows an excess of about 25 per cent over the Paimash with regards to the area of the village, & the details show a number of different sequences in the percentage. This is a high percentage of difference & is to be attributed to the recent formation of the adjoining ridge of hillock & bays or streams in the meadow rate & also opening fresh ground. According to the instructions of the Subject 35 per Cent or 1/4 or 1/5 of the increase will be allowed in Firmans & the rest charged with full assess.
