(2) In such cases, the plans and specifications shall be submitted to the Executive Engineer for the approval of the proper officers in the Public Works Department, who shall sanction them on satisfying themselves that they are safe and suitable and can be executed for the estimated amount. The construction of the building may then be left to the managers or trustees of the private contributions raised, with whom must rest the responsibility for excess, if any, over the amount of this sanctioned estimate.

(3) In such cases, the grant will ordinarily not be paid in full until the Executive Engineer has certified that the building has been completed in accordance with the sanctioned plans and specifications; but the Executive Engineer may make advances out of the sanctioned grant on receiving sufficient proof that the building is proceeding satisfactorily, and on the managers or trustees certifying that all subscriptions relied on in support of the application for the grant have been paid up in full or guaranteed by sufficient security.

(4) When a grant is made under clause (b) of this rule for a church intended partly for the use of non-official residents and others for whom grants are not admissible under these rules, there shall be a trust deed, duly registered—(1) declaring that the building is granted in trust for church purposes only; (2) giving to Government a prior lien on the building for the recovery of the grant in the event of the former being diverted to other purposes; (3) providing for the legal ownership of the building; and (4) indicating sufficient sources for its proper maintenance.

**RULE XXII.**—In any case in which a church is built partly from private contributions and partly from a Government grant, the Government is entitled at any time to require that a proportion of the seats in the church, not exceeding the proportion which the Government grant bears to the whole expenditure incurred in building the church, shall be reserved for troops and other Government servants who may be allowed free seats under Rule XXVII.

**RULE XXIII.**—The preceding rules shall apply, as far as may be, to the enlargement of existing churches.

#### CHURCH FURNITURE.

**RULE XXIV.**—The supply of church furniture will be regulated by the following rules. All expenditure connected with the articles to be supplied by the Public Works Department will be provided for under the rules laid down for that purpose:—

(1) Each Protestant church, Civil, Railway, or Military (Cathedrals excepted), will be supplied by the Public Works Department with the following articles of furniture, the cost of which will be allowed in addition to the grant for the building. The renewal and repair of such articles will also be provided for by the Public Works Department subject to the conditions of Rule XXVII:—

The renewal and repair of such articles will also be provided for, subject to the conditions of Rule XXVII, and on the production of the Executive Engineer's certificate as to the necessity for the expenditure. The articles required for churches at Military stations will be supplied and repaired or renewed by the Military Department, and those for churches at Civil and State Railway stations by the Civil Department:—

**NOTE.**—The cost of re-gilding articles of plate supplied under the foregoing rule will be met by the Military or Civil Department subject to the conditions of Rule XXVII, and on the production of the Executive Engineer's certificate as to the necessity for the expenditure.

(6) Churches rented by Government of Government buildings set apart temporarily as churches, for use of European troops or European-born subjects in the service of Government, or of State Railway servants, should be supplied by the Departments concerned (vide clauses 1, 2, 4 and 5) with such church furniture and articles of service as are absolutely necessary for the performance of Divine service. The number and description of the articles to be supplied should be determined by a committee, consisting of the Chaplain, the Executive Engineer, and the Chief Local Magistrate. In the case of churches for troops or for State Railway servants, the senior Military officer, or the Manager of the railway, will take the place of the Chief Local Magistrate.

The articles of furniture and service should be of the plainest description, unless there is under construction by Government a church for which church furniture and articles of service would have to be supplied under clauses 1, 2, 4 and 5.

Articles supplied for use in temporary churches should be returned into store when the building ceases to be used as a church, unless they are required for supply to a permanent church built by Government.

(7) All applications for funds for the supply to Roman Catholic churches of the articles of service mentioned in clause 5 should be submitted through the Roman Catholic Bishop of the diocese in which the church is situated.

(8) The following articles of furniture will be supplied by the Public Works Department for lych gates of Government cemeteries:—

|                            | Maximum cost.<br>Rs. |
|----------------------------|----------------------|
| Two benches, at Rs. 9 each | 18                   |
| One small table            | 12                   |
| Two chairs, at Rs. 5 each  | 10                   |
| <b>Total</b>               | <b>40</b>            |

**RULE XXV.**—The Executive Engineer will be guided, in granting the certificates alluded to in clauses 2 and 5 of Rule XXIV, by the following principles :—

*Class I, Churches built by Government.*—The certificate should state that the church was built by Government for the use of European troops or European British-born subjects in the service of Government, or of State Railway servants, and is still maintained for the same purpose.

*Class II, Churches which have received building grants from Government.*—The certificate should state that the church received a building grant of Rs. ———, equal to the ———, part of the total cost of the building, and that the grant was made on account of European troops or European British-born subjects in the service of Government or of State Railway servants, and that the building is still used by them.

For this class of churches a proportion of the standard cost of the articles of service will be sanctioned equal to the proportion of the grant-in-aid to the total cost of the building itself.

*Class III, Churches rented by Government and Government buildings temporarily set apart as churches.*—The certificate should state that the building is wholly rented by Government or is a Government building temporarily set apart as a church for the use of European troops or European British-born subjects in the service of Government, or of State Railway servants.

**NOTE.**—The required certificates should afford information as to when the article was originally supplied, and by whom, and the reason for recommending its renewal. When, however, the Government pay for the use of a certain varying number of seats in a church, the hire of the seats should include everything necessary for the performance of the service.

**RULE XXVI.**—When a church, whether Protestant or Roman Catholic, is to be furnished, the Executive Engineer should communicate with the Ecclesiastical authorities concerned with a view to afford the congregation an opportunity of furnishing the church by private subscriptions in more costly style, should they wish to do so. It is to be understood, however, that any article of furniture to which any public funds may have been applied will remain the sole property of Government, even though a portion of its cost may have been contributed by private persons. And in cases where articles of furniture are procured from England, they should be purchased through the Secretary of State in the ordinary way, with the exception of articles to which note I. to clause (2) of Rule XXIV applies, which may be purchased as therein allowed.

**RULE XXVII.**—Government will not ordinarily undertake the cost of the renewal and repair of furniture and articles of service in churches which are not primarily intended for the accommodation of troops. Where pew rents are charged, the cost of such renewals and repairs will be met from the pew rent fund; where pew rents are not charged, it is expected that the cost will be met from contributions by private persons and members of the congregation. In churches in which a portion of the seats are actually reserved by Government for troops or other Government servants entitled to free seats, the Government will pay a share of the cost of renewals and repairs equal to the proportion which the number of seats so reserved bears to the whole number of seats in the church. Seats will be reserved by Government under this rule only for troops and Military officers on duty with troops, and for such Government servants of the classes described in Rule X, and State Railway servants of the classes described in Rule XII, as cannot afford to pay for seats. But all Government servants (other than troops and Military officers on duty with them), who are in a position to pay for seats, will be liable to be charged pew rents.

**RULE XXVIII.**—In cases in which articles of furniture belonging to a Government church are stolen, an immediate enquiry should be held in view to ascertaining whether the loss was caused through the negligence of the person responsible for the custody of such furniture. In the case of Protestant churches at Civil or Railway stations, the enquiry should be conducted by the Chaplain and the members of the Church Committee; and in the case of Roman Catholic churches at such stations, by the Chaplain in charge and the chief Civil officer of the place, or such other person or persons as the chief Civil officer may nominate for that purpose. As regards Protestant and Roman Catholic churches in cantonments, the investigation should be made by a committee assembled under the orders of the Officer Commanding, as is the case in respect of all other enquiries into loss of Government property, the Chaplain in charge being invited either to be a member of the committee or to give evidence before it.

(2) If the result of the enquiry should be to show that the loss was occasioned by negligence on the part of the person responsible for the custody of the furniture, such person should, if possible, be required to make good the loss; or if it should appear that the loss was due to circumstances beyond the control of the responsible officer, then the Government of India will be prepared to consider an application for the replacement, at the public expense, of the articles stolen. Such application should be submitted through the ordinary channels and should be accompanied by a full report of the enquiry.

**RULE XXIX.**—The care of church clocks is to be charged against the pew rent fund, where it exists.

**RULE XXX.**—The pay of chowkidars of churches will be disbursed through Chaplains.

**RULE XXXI.**—Churches are under the control of the Bishop of the Diocese in respect to the erection of tablets, ornaments, &c., while in course of construction, as well as after completion and consecration.

#### OWNERSHIP AND REPAIR OF CHURCHES.

**RULE XXXII.**—All churches built under these rules, except Rule XXI, clause (b), shall be considered the property of the Government.

As a general rule, all churches, whether Protestant or Roman Catholic, which have in past times been built by the Government, are the property of the Government.

Churches, whether built wholly by private contributions or by such contributions jointly with State grants, which have been borne for a series of years on the books of the Public Works Department and have been repaired and otherwise dealt with, unchallenged, as Government buildings, shall be deemed to be the property of Government.

Churches built wholly or in part by private contributions which have not been so borne, repaired or dealt with, but which may be taken over on behalf of Government, under sanction of competent authority, shall be brought on the books of the Public Works Department as the property of Government.

**RULE XXXIII.**—All churches which are the property of Government shall be in charge of the Executive Engineer, and shall be repaired under the ordinary rules of the Public Works Department.

In every case in which any alteration in a church belonging to the Government, which affect its structure or its permanent fittings, may be desired by the Chaplain or other clergy, the Executive Engineer must be consulted and his consent obtained in writing before the alteration is carried out.

#### COMPENSATION FOR ACCOMMODATION IN CHURCHES NEITHER BELONGING TO, NOR RENTED BY GOVERNMENT.

**RULE XXXIV.**—The rate of compensation for sittings for Protestant and Roman Catholic soldiers shall be determined by the Public Works Department with reference to the value and description of the accommodation provided, subject to a limit of Rs. 3 per seat per annum, broken periods within a year counting as a year, but when sittings are occupied consecutively for any period exceeding twelve months, payment will be made for the number of months in excess of the year for which the sittings are so occupied, at the rate fixed for the year.

**NOTE.**—The payment should, as far as possible, be regulated by the official year.

**RULE XXXV.**—The number of sittings for which compensation is allowed will be regulated by the highest attendance at a parade service during the year of soldiers and their families (two children up to the age of 16 being counted as one adult) actually quartered in the station, subject to the following maximum limits in the case of Roman Catholics and each denomination of Protestants recognised by the Government of India (vide note to Rule III):—

**NOTE.**—One maximum should be taken for the nominal strength of the whole garrison instead of the several maxima of the several units.

**RULE XXXVI.**—Compensation may be charged for sittings provided for British-born commissioned and non-commissioned officers (including families) employed on the staff or with Native Regiments; in addition to the number of sittings for which compensation is admissible under Rule XXXV.

**RULE XXXVII.**—Compensation may, under the conditions of Rule XXXIV, be paid for Protestant or Roman Catholic State Railway servants for whom church accommodation has not been provided by the Government; the number of sittings for which

compensation may be allowed being regulated by the highest attendance on any one occasion during the year of Railway servants and their families (two children up to 16 being taken as one adult) who are of European descent, pure or mixed, retaining European habits and modes of life and professing the Christian religion.

**RULE XXXVIII.**—Charges for compensation require the previous sanction of the Government of India, and must be supported by a certificate from the Officer Commanding the station or the Manager of the Railway of the numbers of soldiers or State Railway servants and their families for whom accommodation has been obtained under Rules XXXV, XXXVI and XXXVII, and by a receipt for the money paid.

Such charges as have once been approved by the Government of India need not be re-submitted annually for sanction, but may be paid on the authority of the Local Government or Administration, or Director-General of Railways, as the case may be, subject to the conditions under which the original sanction was obtained.

**RULE XXXIX.**—Local Governments and Administrations, including the Director-General of Military Works and the Director-General of Railways, may delegate to Chief and Superintending Engineers the power vested in them under the foregoing rule.

#### APPENDIX A.

*Extract from the Proceedings of the Government of India in the Home Department,  
No. 6—370-382, (Ecclesiastical), dated Simla, the 9th November 1876.*

Read Home Department Resolution, Nos. 314 to 318, dated 6th October 1875, appointing a Committee to report upon the following matters connected with Ecclesiastical administration:—

- (1) The framing of joint estimates for expenditure on cemeteries or churches by the Executive Engineer and clergyman in charge.
- (2) A revision of establishments for cemeteries according to their area.
- (3) The size of monuments and amount of ground that may be enclosed.
- (4) Provision for planting cemeteries and preserving them in decent order.
- (5) Mode of supply of certain articles of church furniture.
- (6) The substitution of three for two classes of churches with respect to the expenditure allowed for them by Government.

Read the Report of the Committee, dated 29th October 1875.

**RESOLUTION.**—The Report of the Committee has been considered by the Governor-General in Council, who desires to express to the Committee his satisfaction at the result of their labors.

The following rules have been approved relative to the subjects referred to the Committee for report:—

1. Churches and cemeteries have already been divided into two classes: (1) those in stations where there are military cantonments and the military works in which are under the charge of the Inspector-General of Military Works, and (2) those in other military cantonments and civil stations.

In both classes of stations joint estimates\* of expenditure should be framed annually by the undermentioned officers:—

(a) In the case of all expenditure connected with establishments, *e.g.*, pay of servants, alterations in their pay or number, &c., also all expenditure by Government connected with the provision of articles of church furniture supplied by the Civil Department.

By the Chief Magistrate of the District and by the Chaplain.

(b) In the case of all expenditure connected with repairs and additions to church fabric, to church compound or cemetery walls, to cemetery gates, walks, wells, chowkidars, or other church servants' houses, provision of necessary appliances for graves or for the repair of tombs or for the planting of trees and shrubs in cemeteries and keeping the same in decent order; also all expenditure by Government connected with the provision of articles of church furniture supplied by the Public Works Department.

By the Executive Engineer and by the Chaplain.

\* The estimates should be for the financial year, and should be prepared in advance as is prescribed for other budget estimates.

The estimates of expenditure to be prepared by the Executive Engineer and the Chaplain should show distinctly the probable charge under each of the following heads:—

- (I) New works connected with additions to existing churches and improvements to church compounds.
- (II) New supplies of furniture for churches and sanctioned articles of church use.
- (III) New works connected with additions to existing burial grounds.
- (IV) Repairs to churches and church furniture and maintenance of church compounds.
- (V) Repairs to burial grounds to be executed by Public Works officers.
- (VI) Repairs to burial grounds, including planting and cleaning, to be entrusted to the Chaplain or chief civil or military officer of the station or cantonment under paragraph 4.

It would be convenient if distinct estimates were prepared for each of these classes of expenditure.

The provision of funds to meet the charges above enumerated will be made in the budget estimate of the Public Works Department. The estimates for the same will be subject to the scrutiny of, and be passed by, the Superintending or Chief Engineer or Local Government or Administration, according to the rules in force in the Public Works Department.

In stations in which the churches and burial grounds are under the Local Governments and Administrations in which the Provincial Service arrangements are in force, the charges debitable to the Public Works Department will be provided for in the Provincial Public Works budget estimate. In other provinces and in the Military Works Branch the charge will be provided for in the Imperial Public Works budget estimate under Civil Buildings.

2. The following scale of establishments should be maintained at all cemeteries:—

- (i) for a cemetery of which the area is five acres or less, one mali-chowkidar;
- (ii) for a cemetery of which the area is more than 5 and less than 10 acres, one mali-chowkidar and one assistant coolie;
- (iii) for a cemetery of which the area is more than 10 and less than 15 acres, one mali-chowkidar and two assistant coolies; and
- (iv) for a cemetery of which the area is more than 15 acres, one mali-chowkidar and three assistant coolies.

It is left to the Local Governments and Administrations to determine the proper wages to be given to each servant. The cost of this establishment will be charged to Provincial Services in the case of those Local Governments and Administrations in which the Provincial Service arrangements are in force, and in the case of other Local Governments and Administrations and the Military Works Branch of the Public Works Department to Imperial Funds. In either case the charge will be included in the Civil budget estimate.

4. No portion of the receipts from cemeteries and church compounds should be retained by any Government officer to be directly expended by himself; all such receipts should be paid into the Civil Treasury to the credit of the Public Works Department. In the case of receipts from cemeteries and church compounds in charge of the Military Works Branch, and under those Governments and Administrations in which the Provincial Service arrangements are not in force, the credit will be treated in the Public Works Accounts as a receipt under Imperial Public Works Revenue. In the case of the other Governments and Administrations, the credit will be raised to Provincial Service Public Works Revenue. But the amount passed upon the joint estimate framed by the Executive Engineer and Chaplain to provide for planting a cemetery and preserving it in decent order should be entrusted to the Chaplain where there is one. Where there is no resident Chaplain, the amount should be placed at the disposal of the Chief Magistrate on the spot, or of the senior military officer if the cemetery is attached to a military cantonment. The necessary funds for the purpose will be advanced by the Executive Engineer concerned to the Chaplain or Civil or Military officer. Bills for the expenditure should be rendered by the officer to whom the advance has been made, either monthly or otherwise, to the Executive Engineer, who will charge for the amount thereof in the usual way in his accounts. Until the bills are received and charged off, the advance will be placed in the Miscellaneous Advance Account of the Executive Engineer. All planting

of shrubs and trees\* by private persons in cemeteries should be under the control of the Chaplain if resident, otherwise under that of the Magistrate or senior military officer, as the case may be. When practicable a well should be sunk in or near every cemetery.

5. It should be understood that the Government cannot provide cemeteries at the public expense for Native Christian communities.

**NOTE.**—Where their number is small, the question is of little importance and is best arranged by mutual concessions or by special provisions Ecclesiastical Proceedings, made locally by the parties immediately concerned. And November 1877, No. 15. I am to suggest for His Lordship's (Bishop's) consideration whether, if the necessity of dealing at the present time with this matter of Native Christian interment be in his judgment unavoidably established, it should not be carefully examined in consultation with the several Local Governments, having regard to the diverse needs and circumstances of the population in each separate province.

\*In regard to churches and cemeteries situated within the limits of a military cantonment, the Government of India have decided—

- (1) that the Chaplain is required to obtain the permission of the Officer Commanding the station before ordering a tree to be cut down in a cemetery or church compound situated within the limits of a cantonment;
- (2) that the Officer Commanding the station may order a tree to be cut down in the cemetery or church compound without the Chaplain's consent;
- (3) that it rests with the Chaplain to sell the trees cut down in the cemetery or church compound, the proceeds being paid in, as required by the standing rules, to the Civil Treasury to the credit of the Public Works Department; and
- (4) that the consent of the Commanding Officer should be obtained in respect of all repairs or alterations over which he or the Cantonment Committee may exercise control under the Cantonment Rules and Regulations, e.g. Rules 13 and 26 of Chapter IV.

These orders, however, do not interfere with the duty of the Chaplain to see that the cemetery is kept clean of rank

5. The Government of Bombay proposes (1) to raise the pay of chowkidar-bearers (2) to allow a peon to each Chaplain; (3) to retain clerks for second class military churches; (4) to do away with water-carriers and sweepers, and provide for their duties from the contingent allowance of Rs. 20 a month for lighting for first class churches; and (5) to allow a small contingent allowance to poor third class non-military churches. The tabular statement submitted by the Bombay Government also shows other variations from the standard scale fixed in 1875. The Governor-General in Council regrets that he is unable to sanction peons for Chaplains in Bombay; but he is pleased to sanction the following scale for adoption in the Bombay Presidency from 1st April 1877, with a request that a tabular statement showing the charges now made may be forwarded to Government for communication to the Audit Department:—

|                                                                                | 1st class military churches. | 2nd class military churches. | 3rd class non-military churches. |
|--------------------------------------------------------------------------------|------------------------------|------------------------------|----------------------------------|
| 1 Clerk                                                                        | A                            | 7                            | 7                                |
| 1 Chowkidar-bearer                                                             | 7                            | 7                            | 7                                |
| Contingent allowance to cover lighting and sweepers' and water-carriers' wages | 20                           | 10                           | B                                |

A.—On the pay proposed by the Archdeacon of Bombay.

B.—A list of the poorer churches, for which a special contingent allowance is asked, should be entered in the tabular statement.

6. The proposal of the Government of Bengal in respect to the six military (first class) churches, including the two within the Fort William, for which the authorised allowance of Rs. 47 a month is considered to be sufficient, is sanctioned with effect from the 1st April 1876; Rs. 100 a month is also allowed for each of the four (third class) non-military presidency churches noted in the margin from 1st April 1877, for two years, subject to reconsideration at the end of that period; and an allowance of Rs. 55 a month is sanctioned for St. Stephen's Church, Kidderpore, and the church at Howrah, on the same terms. Considering the peculiar character of St. Andrew's Kirk in Calcutta, and its use by the military, the recommendation of the Reverend Mr. Thompson, for an allowance of Rs. 100 when there are two Chaplains and Rs. 185 a month when there is one, is approved from the same date. The necessity for so large an allowance as Rs. 32 a month for the care of the clock must be further established. The entire services of a competent Native artisan could probably be secured for a much smaller sum.

7. In respect to the non-military (third class) churches in Bengal, the Governor-General in Council considers that the scale laid down in February 1875 should be more closely adhered to than is proposed by the Government of Bengal. The exceptional allowances there contemplated were intended only for churches with fluctuating and limited congregations, and not for general adoption. The churches at Dacca, Cuttack, Berhampur, and other places do not appear to be of this class. His Excellency in Council desires, therefore, that the Government of Bengal will submit a tabular statement more in accordance with the scale laid down in February 1875, and showing the financial results of the arrangements now sanctioned for church establishments in Bengal.

8. The classification of churches, submitted by the Government of the North-Western Provinces, shows that there are 36 churches, as given in the margin, the proposed cost for the establishments of which is Rs. 670. But it appears doubtful if this classification includes the Episcopalian and Presbyterian churches at Allahabad. This should now be made clear; and the church at Chunar should be ranked as a third class (non-military) church, and not as a second-class military church. The usual tabular statement should also be submitted, showing the financial result of the charges now authorized with effect from the beginning of the next financial year.

9. There are 48 churches in the Punjab, and the cost of the establishments proposed for them is Rs. 878 a month. It is also recommended that Rs. 50 a month may be placed at the disposal of the Government of the Punjab for allotments when necessary to the poorer third class (non-military) churches. The proposals of the Government of the Punjab are sanctioned with effect from 1st April 1877. The usual tabular statement should be submitted.

10. There are 15 churches in the Central Provinces, the cost of the establishments of which is Rs. 205 a month. Revised establishments as shown below are sanctioned for these churches, resulting in an increase of Rs. 17 a month over the existing charge:—

|                                                | Existing cost,<br>per mensem. | Now sanctioned,<br>per mensem. |

| Increase                                       |                               | 17                             |

11. The Chief Commissioner of British Burma submits a list of church establishments in that Province, and recommends "that the establishments should be restricted to the scale fixed by the Government of India; but that the rates of pay should be in accordance with those which are customary throughout Burma, where the cost of living is greatly in excess of that of India." He also recommends that an allowance of Rs. 80 a month may be granted to the Roman Catholic church at Thayetmyo. In accordance

\* This charge was subsequently accepted by the Government of India as an Ecclesiastical charge and as part of the church allowance which is given in consideration of the benefit derived by the public from the use of the clock. (Letter to Government of Bengal, No. 318, dated the 27th September 1877.)

A.—As detailed in paragraph 1 of this Resolution.  
B.—Do. plus the pay of a clerk, temporarily, as sanctioned in paragraph b

with these recommendations, the establishments noted below, which are in conformity with the scale laid down in February 1875, are sanctioned for the churches in British Burma with effect from 1st April 1877:—

12. In addition to the higher rates of pay for chowkidar-bearers on account of the prevalent wages in the Hyderabad Assigned Districts, the Resident at Hyderabad proposes to add 8 peons at a cost of Rs. 56 a month to the authorized scale of church establishments. The Governor-General in Council regrets that he is unable to depart from the scale already fixed, but is pleased to sanction the other proposals, as shown below, from the beginning of the next financial year:—

13. The list submitted by the Chief Commissioner of Oudh shows that there are only six churches in Oudh—three of the first and three of the second class. The proposed classification of these churches is approved with effect from 1st April 1877 with a request that a tabular statement may now be forwarded.

14. The Chief Commissioner of Assam states that there are in Assam six third-class non-military churches, and proposes to pay the chowkidar-bearers at Rs. 10 each a month, remarking that "this is the lowest salary on which a servant can be entertained to perform the above duties in this Province." The Governor-General in Council sanctions a chowkidar-bearer for each of the churches in Assam on the pay of Rs. 6 each a month from 1st April 1877, and requests that the usual tabular statement may now be forwarded.

(2) Order No. 572, dated the 12th May 1881, forwarding a copy of the above-mentioned resolution to the Military Department for information and guidance, with the intimation that the scale of charges mentioned above (which are debitable to the Military Department on account of Roman Catholic churches) should have effect from the 1st April 1880.

(3) A letter from the Military Department to the Controller of Military Accounts, Bengal, No. 1216 S.D., dated the 26th August 1881, sanctioning, as a very special case, the grant to the Roman Catholic Chaplain, Fort William, of the difference of lighting allowance between Rs. 33 and Rs. 47 a month, with arrears from the 15th August 1876 up to the 1st January 1881, and intimating that final orders in regard to the allowances admissible to Roman Catholic churches generally will be shortly passed.

RESOLUTION.—On reconsideration, the Governor-General in Council is pleased to declare that the Resolution of the 15th August 1876 read in the 1st section of the preamble is inapplicable to Roman Catholic churches. Those churches are mostly not the property of Government, and it is only to churches owned by Government that the Resolution applies. Moreover, the application of the Resolution to Roman Catholic churches would have the effect, in the majority of cases, of largely reducing the allowances now given to them, and the Governor-General in Council does not consider that their reduction would be expedient.

2. Under this decision the increased grant passed in the Military Department for the Roman Catholic church of St. Patrick, Fort William, should be discontinued.

From J. O'KINEALY, Esq., Officiating Secretary to the Government of India, Home Department, to the Secretary to the Government of Madras, dated Fort William, the 9th January 1878, No. 7.

I am directed to acknowledge your letter, dated the 2nd January 1877, No. 2, submitting for approval the Proceedings of the Madras Government, determining the proposed scale of establishment for the Cathedral.

2. In reply, I am to say that the Governor-General in Council is pleased to fix a limit of Rs. 400 per mensem as the maximum grant towards the maintenance of the establishment of the Cathedral, with effect from the 1st April 1878.

From J. O'KINEALY, Esq., Officiating Secretary to the Government of India, Home Department, to the Secretary to the Government of Bengal, dated Fort William, the 9th January 1878, No. 9.

With reference to paragraph 8 of your letter, dated the 5th February 1877, No. 876, regarding the establishment at St. Paul's Cathedral, Calcutta, I am directed to say that the Governor-General in Council is pleased to comply with the recommendation of His Honour the Lieutenant-Governor, and sanctions the continuance of the Government grant of Rs. 400 per mensem at present made towards the maintenance of the Cathedral establishment.

From J. O'KINEALY, Esq., Officiating Secretary to the Government of India, Home Department, to the Secretary to the Government of Bombay, Ecclesiastical Department, dated Fort William, the 9th January 1878, No. 11.

With reference to the correspondence ending with your letter, dated the 29th November last, No. 249, regarding the establishment at St. Thomas' Cathedral, Bombay, I am directed to observe that it appears from the papers submitted that the cost of the Cathedral establishment and contingent charges amounts to Rs. 1,084 per mensem, and the Trustees of the Cathedral object to any reduction being made, holding that under the trust-deed they have an indefeasible right to claim from Government both establishment and contingent charges on the existing scale.

2. The Governor-General in Council does not admit that the Trustees alone have the power to decide the question at issue, but His Excellency in Council does not desire to press the matter, and leaves it to be settled by the Bombay Government on the most favorable terms which may be found possible.

3. I am to add that a maximum grant of Rs. 400 per mensem has been fixed for the Cathedrals at Calcutta and Madras.

Office Memorandum from the Military to the Home Department (Ecclesiastical), No. 1618 S.D., dated the 17th October 1881, proposing a general rule to regulate the incidence of charges on account of clerical and menial establishments for religious services in connection with the troops.

The undersigned is desired to acknowledge the receipt of the docket from the Home Department, No. 75, dated 5th May 1881, on the subject of the provision of a clerical and menial establishment for Presbyterian religious service in connection with troops. The case in point is that of the 72nd Highlanders.

2. In reply, he is to forward the correspondence marginally noted, and to suggest that, as (in regard to the general question) there would seem to be some doubt as to the proper incidence of charges on account of such establishments, the present opportunity be taken to settle the question finally.

From Adjutant-General in India, No. 2795-B, dated the 29th June 1881.

From Controller of Military Accounts, Bengal, No. 10642. Return requested.

3. The present rule as regards Chaplains is understood to be as follows, viz.—  
The Church of England Chaplains and the church establishments are paid in the Civil Department, even though employed in a cantonment solely for the use of the troops.

The pay of the Roman Catholic Chaplains and of the chapel establishments engaged for the service of the troops is borne by the Military Department.

The pay of Presbyterian Chaplains and of the church establishments at ordinary stations is borne by the Civil Department, but the pay of Presbyterian Chaplains with Highland regiments is a military charge.

4. It seems, therefore, to the Military Department right that the charge on account of establishments for the church services of Highland regiments should also be a military charge, when the Chaplain employed in the services is paid by the Military Department, and that in all other cases where there is a service performed for Presbyterian troops by a civil Presbyterian, Wesleyan, or other Chaplain, the charge for his services and any temporary establishment should be borne by the Civil Department.

5. The Military Department consider that the above would be a clearly defined rule, which would prevent the mistakes which appear to have been made on more than one occasion in regard to the debit of such charges, and the undersigned is to recommend its adoption to the Home Department.

RESOLUTION.—The rule proposed in paragraph 4 is sanctioned.

#### APPENDIX B.

Extract from the Proceedings of the Government of India in the Home Department, Nos. 2—275 to 287 (Ecclesiastical), under date Simla, the 8th September 1875.

Read the undermentioned correspondence relative to a proposed revision of the rules at present in force for the guidance of Chaplains of the Church of England in regard to the burial of such persons as have laid violent hands upon themselves and of those who having been members of the Roman Catholic Church, have been refused burial by the Priests of that church—

From Government of Fort St. George, No. 142, dated 12th June 1874, No. 203, dated 28th August 1874.

To Solicitor to Government, No. 327, dated 22nd September 1874.  
From do. do. No. 2316, dated 20th September 1874.  
From the Lord Bishop of Calcutta, dated 13th January 1875.

RESOLUTION.—The first question was raised by the refusal of the Reverend C. H. Deane, Chaplain of Bangalore, to read the funeral service over a person who was found by a Court of Inquest to have committed suicide while in a state of temporary insanity.

\* To Mr. Knox, dated 2nd January 1874. 2. The subjoined letter\* from the Rev. C. H. Deane sets forth the ground of his refusal:—

"When I answered your memorandum about the interment of the remains of the late Sergeant Spiers, of the 18th Hussars, I was not aware that he had committed suicide. If, as I understand, there is no doubt that he poisoned himself, I regret to say that I shall not be able to officiate at his funeral. The Rubric before the burial service distinctly forbids it to be used for any that 'have laid violent hands upon themselves,' so that I have no option in the matter. The grave will be ready at 5 P.M., but no service can be used."

† To the Acting Chief Secretary to the Government of Fort St. George, No. 433, dated 24th March 1874. 3. The view taken of the question by the Right Reverend the Bishop of Madras is stated in the subjoined letter:†

"I am directed by the Right Reverend the Bishop of Madras to acknowledge your communication of the 17th ultimo, forwarding copy of a letter from the Deputy Adjutant-General, transmitting correspondence relative to the Reverend C. H. Deane's refusal to read the funeral service over the late Sergeant Spiers, 18th Hussars, who committed suicide."

"2. In reply, I am desired to state that Mr. Deane seems to have been requested to perform the funeral without having been furnished with the customary death-report or any intimation that it was a case of suicide."

"3. The Coroner's warrant in itself appears to be 'no more than a certificate that the body is not demanded by the law, and that therefore the relations may dispose of it as they please'.—(Wheatley on the book of Common Prayer.) It does not, therefore, indicate the duty of a clergyman, or place him under legal obligation to give to a body Christian burial."

"4. In keeping with this view, the Government Notification in *Fort St. George Gazette*, June 11th, 1850, page 623, when it intimates that 'the Reverend Chaplains will in future consider the warrant of the Coroner for the interment of a body on which an inquest has been held to be a sufficient authority for their performance of the burial service over it,' adds, 'if it would be their duty, under ordinary circumstances, to perform that service.'"

"5. What is the duty of a clergyman when requested to bury a person who has committed suicide is to be ascertained partly from the Rubrics of our Church, which are binding upon the clergy and have the force of law, and partly from the limitations of recognized legal commentators."

"6. The Rubric at the opening of 'the Order for the Burial of the Dead forbids a clergyman to use that service for any that have laid violent hands upon themselves.'"

"7. In Burn's 'Ecclesiastical Law' it is laid down: 'Of this sort (suicide) are to be understood not all who have procured death unto themselves, but who have done it voluntarily, and consequently have died in the commission of a mortal sin; and not idiots, lunatics, or persons otherwise of insane mind.'"

"8. In the same book it is also stated that 'the proper judges whether persons who died of their own hands were out of their senses are doubtless the Coroner's jury.'"

"9. In case under consideration, it appears that the Reverend Mr. Deane having regard only to the Rubric and *foro conscientie* according himself responsible for the interpretation of it, refused to bury the corpse even when he knew that the Coroner's jury had returned a verdict of 'temporary insanity.'"

"10. In this refusal, I am instructed to state that Mr. Deane has not, so far as the Bishop can ascertain, violated any law, but he has departed from a recognized custom in not accepting the verdict of the Coroner's jury as a justification for the using of the Church's service over the remains of Sergeant Spiers."

"11. Mr. Cripps, in his 'Practical Treatise on the Law relating to the church and the clergy' [Ed. 1869], states: 'No case appears ever to have occurred in which a clergyman who has refused to bury the corpse of one who has committed suicide in insanity has been punished by the Ecclesiastical Law.' At the same time he adds: 'It must be doubtful whether a departure from a custom of such acknowledged propriety would not be visited with ecclesiastical punishment.'"

"12. In the absence of any Court competent to visit with ecclesiastical punishment, the Bishop desires me to point out that it is very painful to a laborious and conscientious clergyman, such as Mr. Deane is, to deny the last offices of the Church to one who has

been under his spiritual charge, and it must, the Bishop thinks, be allowed that there was much in the circumstances of the present case to support the conclusion at which Mr. Deane arrived. I am, therefore, directed to say that His Lordship is disposed to take a lenient view of Mr. Deane's action, and the more so as those who are endeavouring to check the prevalence of intemperance in the army can ill-afford to lose any aid which a clergyman in the honest discharge of his duty can lawfully render."

4. The Government of Madras referred the who correspondence for the information and orders of the Government of India.

5. The following brief statement of the English Law will be found sufficient for the present purpose: By Common Law Christian persons are entitled to burial with the rites of the Church. The Statutes passed from time to time for the uniformity of public worship have proceeded upon, though not expressly dealing with this state of things. The 68th of the Canons of 1603 recognises it and enjoins the clergy to act upon it. In that Canon occurs the exception of persons excommunicated for some grievous and notorious crime, and of whose repentance no testimony could be given. The Canons of 1603 are no part of the Statute Law, and it is only in a qualified sense that they are part of the law at all. But this Canon has been taken as truly expressing the ancient Common Law of the Church. The Books of Common Prayer have been embodied into the Statute Law by the various Acts of Uniformity, and Rubrics are authoritative guides when they speak on the question when the services are or are not to be used.

6. Down to the year 1661 there was no Rubric forbidding the performance of the Burial service over any persons except persons excommunicated. The Rubric now in force was framed in the year 1661, and received the force of law from the Uniformity Act of 1662. It prescribes that "the office is not to be used for persons unbaptised or excommunicated or who have laid violent hands on themselves."

7. The question now is whether the expression "have laid violent hands on themselves" includes all who have committed the overt act of suicide, or only those who have done so deliberately, being in their sound senses and in a state in which moral responsibility, attaches to them.

\* Page 793.

8. In Mr. Cripps' Treatise the following statement is made:—

"The uniform practice, however, so far as it has been able to be ascertained, is in accordance with the reasoning and opinion of Dr. Burn, and it must be doubtful whether a departure from a custom of such acknowledged propriety would not be visited with Ecclesiastical punishment."

9. The opinion of Dr. Burn will be found in his work on Ecclesiastical Law, Vol. I, p. 265. After referring to the ancient Canon which forbade Christian burial to those who violently put themselves to death, and stating that this rule was understood to apply to those who did the act voluntarily, Dr. Burn intimates that the Rubric should not be construed as severer than the preceding Ecclesiastical Law, and therefore should not apply to persons of insane mind.

10. In the year 1809 the Court of Arches, speaking of the treatment of suicides, puts on the ground that they are supposed to die in the commission of mortal sin, and to have renounced Christianity.—(*Kemp versus Wickes*, 3 Phillimore, pp. 272, 273.)

11. The Government of India have not been referred to, and do not know of, any authority for holding that the words of the Rubric apply to persons who are not responsible for their actions. It is certain that the practice has not been to apply these words in that way.

12. Under the circumstances, the Governor-General in Council comes to the following conclusions:—

(a) It is reasonable in this matter to regulate the conduct of clergymen of the Church of England, who serve the Government of India, by the law and practice of the Church of England.

(b) There is no authority for holding that the Rubric under consideration applies to those who have caused their own death when in a state of mental insanity. For holding the contrary there is the authority of commentators and of judicial dicta. There is also the much greater authority derived from a usage which is very widespread and long continued, if indeed it is not quite unbroken. Testing the question by reason, it is only reasonable to hold that the framers of this Rubric did not intend, as regards the burial of suicides, to alter the law and practice that they found in existence, or to visit with what must be considered as an ecclesiastical penalty, an act for which the doer is not responsible.

(c) Sincere respect is due to the scruples felt by conscientious men in performing a service of extreme solemnity. Nevertheless, it would not be reasonable that such scruples should prevail against the ancient law and practice of the Church of England which has been handed down to the present time, and which plainly authorizes the use of the burial service over persons who have caused their own death while in a state of insanity.

13. The Governor-General in Council must, therefore, require from all clergymen connected with the Government their conformity to this ruling.

14. The next point for consideration is the rule requiring Chaplains to read the funeral service over the bodies of persons who, having died in the profession of the Roman Catholic faith, have been refused burial by the Priests of that church. It is stated by the Bishops of Calcutta and Madras that the clergy of the Church of England look upon the rule as bearing hardly upon them, and they desire to have it reconsidered.

15. This rule was laid down in the year 1855 under the belief that the case was governed by positive law, viz., the 68th of the Canons of 1603. But, on reconsideration of the matter, the Governor-General in Council is of opinion—1st, that the Canon in question, which is founded on the English parochial system, cannot, for the purpose now under consideration, be applied to the very different circumstances of an Indian station; and, secondly, that even if it were applicable, it would not prevent the Government from establishing a different rule of conduct for Indian Chaplains if found expedient.

16. The Governor-General in Council further thinks that for the case now under review a different rule is expedient. The Chaplain of an Indian station does not stand to the residents in the station in the relation which the Parson of an English parish bears to his parishioners. It was expressly so ruled by the Court of Directors in their Despatch on this subject bearing date the 30th October 1844. Chaplains have been ordered to abstain from endeavours to influence the religious tenets of Roman Catholic soldiers, and in one case a Chaplain was compelled to resign the service for persisting in such endeavours.

17. As regards the Chaplains themselves, it does not seem consistent that they should be compelled to perform duties towards the corpse of a man whom when living they were forbidden to approach in any pastoral relation, and the Governor-General in Council admits that the dissatisfaction which the Chaplains have felt with the order of 1855 rests on reasonable grounds.

18. As regards other persons, it can hardly be agreeable to the feelings of either Protestants or Roman Catholics that the Chaplain should be called in to supply a service which the Priest has refused. To Protestants it must seem that, in so acting, their church is lax and careless about the performance of its solemn rites. To Roman Catholics it can hardly be otherwise than offensive that a stranger, who in their eyes has no authority, should affect to give to a member of their church what the recognised authority of that church has thought fit to withhold. And neither community can wish it on account of any advantage to the dead man: not Protestants, because the whole notion of such an advantage is contrary to their tenets; and not Roman Catholics, because they do not attribute any spiritual character to the Chaplain.

19. For the above reasons the Governor-General in Council is pleased to revoke the order issued in the year 1855, and he will request the Military authorities to make arrangements for the decent burial of Roman Catholic soldiers to whom the rites of their church have been refused by the Priests.

Home Department Resolution, No. 275—287, dated the 8th September 1875, laying down certain rules for the guidance of Chaplains of the Church of England in regard to the burial of suicides, &c.

Office Memorandum from the Military Department, No. 810, dated the 16th November 1875, forwarding, for an expression of opinion, a draft General Order which His Excellency the Commander-in-Chief proposes to issue on the subject in accordance with the above rules.

**RESOLUTION.**—On a reconsideration of the subject, the Government of India think it necessary to modify the rules contained in the resolution of 8th September 1875, so far as regards the burial of deceased Roman Catholics. The Government of India have now decided—

1st, that at stations where there is a Roman Catholic Priest drawing an allowance from Government, he shall be held bound to read the burial service over the body of every deceased Roman Catholic soldier brought for burial, unless he be excused from doing so by the Rubrics and Canons of the Roman Catholic church; and that when the Roman Catholic Priest refuses to read the burial service over the body of a deceased Roman Catholic soldier, the Military authorities shall make proper arrangements for the decent interment of the corpse;

2ndly, that where there is no Roman Catholic Priest paid by the State, the Protestant Chaplain shall, if requested by the friends of the deceased, or by the Officer Commanding, be bound to bury the deceased according to the rites and ritual of the Church of England, except in either of the three cases in which Protestant Chaplains in India are excused from burying a deceased Protestant, viz., dying unbaptized even by lay baptism; excommunicated by the major excommunication, or declared to be *felo de se*; and that when a Protestant Chaplain refuses to officiate at the burial of a deceased Roman Catholic soldier on either of the three above-mentioned grounds, the Military authorities

shall, as in the case of refusal by a Roman Catholic Priest, make proper arrangements for the decent interment of the corpse;

3rdly, that whenever, with or without furnishing any explanation of his reasons, a Roman Catholic Priest paid by the State or a Protestant Chaplain refuses to perform the funeral rites of his church over the body of a deceased Roman Catholic soldier, the circumstances of the case should be fully reported by the Military authorities for the consideration and orders of the Government.

2. The Governor-General in Council is accordingly pleased to direct the modification in the above sense of the provisions of paragraphs 15 to 19 inclusive of the Resolution, dated 8th September 1875.

**NOTES.**—(1) The expression “proper arrangements for the decent interment of the corpse” in Rules 1 and 2 means that when both the Roman Catholic and Protestant Chaplains refuse burial in a case of suicide by a Roman Catholic soldier whilst of unsound mind, the burial service should be read over the body by the Officer Commanding the deceased’s company.

(2) The intention of the passage “bound to bury the deceased according to the rites and ritual of the Church of England” in Rule 2 is, that the service of the Church of England should be read over the body, if the Protestant Chaplain is requested by the friends of the deceased to do so, but the rule does not in any way reimpose on Protestant

Chaplains the burden of reading the burial service over either soldiers or civilians to whom a Roman Catholic Chaplain has refused burial. There is nothing to prevent a Chaplain burying any one if he chooses to do so, provided they are not unbaptized “even by lay baptism,” excommunicated by the major excommunication, or declared to be *felo de se*; only the Protestant Chaplain is no longer bound to do so.

(3) The expression “unbaptized even by lay baptism” in Rule 2 is equivalent to “unbaptized by either clerical or lay baptism.” The meaning intended to be conveyed is that baptism, either by lay or clerical, is sufficient to prevent a person from being regarded as “unbaptized” for the purposes of the rule.

In the case of Native Christians wishing to erect a monument, the charge may be reduced to one-half of the amounts specified above.

IX. British soldiers, non-commissioned officers and regimental warrant officers are exempted, with retrospective effect, from the payment of any fee for the construction of graves, or for the erection of monuments in burial-grounds to the memory of their comrades, wives or children, but not from the fees prescribed under Rule VIII (6) and (7). The widows and children of British soldiers, non-commissioned officers and regimental warrant officers are also exempted from payment of the former class of fees in the case of their deceased husbands and parents. No monument, either regimental or private, shall exceed the dimensions prescribed in XVI *et seq.* of these rules.

NOTES.—(1) This rule is applicable to British soldiers and non-commissioned officers, whether in military or civil employ.

(2) Monuments erected under this rule subscribed for partly by non-commissioned officers and men, and partly by officers, are likewise exempted from the prescribed fee.

(3) Departmental warrant officers and volunteers are not exempted from payment of Ecclesiastical fees.

X. Applications for the erection of monuments, must, like those for interments, be made in writing to the Secretary to the Committee, and all charges for monuments must in every case be paid for in advance.

XI. The Secretary to the Committee shall keep a plan of the entire cemetery, to be provided by the Public Works Department, with references written upon it, in a book in which the names of parties interred are recorded; this plan and book being kept with the Church registers.

NOTE.—The Executive Engineer prepares a plan of the cemetery showing on it all the existing graves and the spaces allotted for future graves, and giving them all consecutive numbers.

XII. The Secretary to the Committee may reserve grave space, as limited by Rule XIII below, on the application of near relatives of persons already buried in the cemetery and for the burial of the persons named in the application. A double ground-fee shall be levied in advance before granting any such application, and each grant shall be registered in a book to be kept for the purpose and indicated on the plan. The ground will then be reserved for 10 years. Before the expiry of that period, a fresh application should be made and a further double fee paid, failing which the ground will be resumed.

\* This fee is intended to be chargeable in the case of a grave of any description; and the expression "ground occupied" is meant to refer (1), in the case of a non-enclosed grave, to the area actually occupied by the grave, and, (2), in the case of enclosed graves, graves with monuments, or graves partly covered by monuments and partly enclosed, to the area actually occupied by the grave plus all additional space either enclosed or occupied by a monument. The fee in question is independent of all charges for monuments, which are leviable under Articles (2) to (5) of this rule.

† The item "stone or marble" does not include slate.

XIII. The size of each grave, whether of masonry or not, is limited to 9' x 4', and the area of ground to be enclosed must not exceed 11' x 7' by external measurement.

XIV. (1) All graves must be at least 6 feet in depth.

(2) No body shall be buried in any vault or masonry grave which it is intended at any aftertime within 14 years to re-open, unless the coffin be separately entombed in an air-tight manner by properly-cemented stone or brick-work, which shall never be disturbed.

(3) One body only shall be buried in a grave at one time, unless the bodies be those of members of the same family.

(4) No non-masonry grave or masonry grave unprovided with the separate air-tight compartment prescribed in clause (2) shall be re-opened within 14 years after the burial of a person above 12 years of age, or within 8 years after the burial of a child under 12 years of age, unless to bury another member of the same family, in which case a layer of earth not less than one foot thick shall be left undisturbed over the previously buried coffin. If on re-opening the grave, any soil is found to be offensive, such soil shall be left undisturbed.

(5) There shall never be less than 3 feet of earth between the topmost coffin in a grave and the surface of the ground.

#### ERECTION AND REPAIR OF MONUMENTS.

XV. Monuments may be erected by any interested person. The inscription before being cut, and the design, when the monument is other than a simple headstone, must be first approved of by the Secretary to the Committee. Should an inscription be disapproved, it may be referred, if those interested desire it, to the Government for decision.

XVI. When a grave is not of masonry throughout, the only monument ordinarily allowed over it is a simple cross or headstone on an adequate masonry foundation not exceeding 3' x 2'; and the whole structure must not stand higher than 3' 6" from the ground-level. But with the permission of the Secretary to the Committee, a monument, such as may be erected over a masonry grave, may be placed over a non-masonry grave when adequate masonry foundations are provided on which the monument may rest.

XVII. No monument, of whatever material constructed, shall exceed 8' x 4' at the base without the previous sanction of the Government.

XVIII. No monument of masonry shall stand higher than 3 feet from the ground-level.

XIX. No cenotaph shall be more than 6 feet square at the base.

XX. The enclosure of ground round a grave must be by a metal railing, or by chains or bars of metal supported on masonry or metal pillars. Wooden or masonry enclosures are not permitted. The previous sanction of the Committee is necessary to the enclosure of a non-masonry grave: and no such sanction shall be given unless the same fees are paid as for the construction of a masonry grave.

XXI. When a monument needs repairing, the Secretary to the Committee should communicate with the friends of the deceased, or, when such communication is not possible, advertise three times in the *Gazette of India* and the *Gazette of the province*; and if a monument falls into a ruinous condition, and no person will undertake to restore it, the ruined monument shall be made level with the ground during the next repairs, and any slab it contained will be placed over the grave in simple masonry, or be inserted in the wall of the cemetery.

NOTES.—(1) This rule does not apply to monuments of historical or archaeological interest. Lists of such tombs should be obtained by local Governments and Administrations, and as many of them as may be properly preserved at the public expense should be looked after by the local Public Works Department.

(2) The cost of the advertisements in the *Gazette* is met by the Government. XXII. All work connected with monuments must, as far as possible, be carried on outside the cemetery, and any undertaker not removing the debris of his work immediately upon its completion, is liable to a fine of Rs. 5, which shall be paid to the Committee and credited to the funds of the cemetery.

XXIII. The cemetery shall be inspected once in a half-year by the President, Municipal Commission, Madras, in company with the Executive Engineer, the plan and book kept under Rule XI being also examined, and a report made to the Government.

J. F. PRICE, Chief Secretary.

As the fees levied are not enough to pay the wages of four gardeners, and otherwise maintain the cemetery in good condition, persons interested in the graves are requested to become subscribers to the Cemetery Fund.

As equal attention is paid to all the graves, persons interested in the graves are strictly prohibited from giving anything to the gardeners, who are liable to immediate dismissal if they accept such gifts.

Visitors desirous of becoming subscribers are requested either to inform the undersigned or leave their name and address with the head gardener, who has a supply of stationery.

As a rule all the four gardeners should be at work from early morning till 6-30 p.m. Visitors are requested to record briefly any irregularities they may notice in a book kept for that purpose in the cemetery office.

J. LAZARUS, Manager.

## SUBSIDIARY RULES FOR THE ERECTION AND REPAIR OF ENDOWED MONUMENTS IN GOVERNMENT CEMETERIES.

### APPLICATION FOR ERECTION OF ENDOWED MONUMENTS.

G. O., No. 104, Ecclesiastical, dated Ootacamund, 17th June 1901.

I. A person desiring to erect an endowed monument should submit his application in form A (appended), with a drawing of the monument, to the Chaplain or other officer in charge of the cemetery.

II. The Chaplain or other officer in charge will then send on the application and drawing with a forwarding letter (form B.) to the Executive Engineer of the district, who will fill in column 9, and return the application with the drawing.

The repair of fragile or costly work liable to receive damage cannot be undertaken by Government, and should not be taken into consideration in the estimate of column 9 (b).

III. On return of the application the Chaplain or officer in charge of the cemetery will obtain from the applicant the amount of the endowment calculated as in rules VII and VIII, and shall give a receipt in the form C.

IV. In the case of tombs in that part of the cemetery which is reserved for the Church of England, on the endowment money being paid, the officer in charge of the cemetery, if he is himself the Chaplain, will give or refuse sanction to the erection and endowment: if the officer in charge is not the Chaplain, he will forward the application in form A with the drawing to the resident or visiting Chaplain, or, if there be none, to the Archdeacon, for sanction. If the tomb is to be erected in any other part of the cemetery, the officer in charge will forward the application for approval of the design to the minister of the denomination to which the deceased belonged. Should there be no resident or visiting minister of that denomination, the application should be sent to the senior minister belonging to it in the presidency or, if there be none, to the local Government. On receipt of approval, the officer in charge will sanction the erection and endowment of the monument.

V. As soon as the permission has been given, the officer in charge of the cemetery must inform the Executive Engineer and the latter will see that the monument is properly set up, and enter it upon the list for repairs by the Public Works Department. The officer in charge of the cemetery will send in April every year to the Archdeacon a list of the monuments erected and endowed during the year ending March 31st together with the amounts of the endowment fees.

### AMOUNT OF ENDOWMENT.

VI. An endowment fee of Rs. 15 will be charged when a person wishes to endow the simplest form of memorial (namely, a cross, head-stone or slab) consisting of a single stone over an adequate foundation. Other endowed monuments shall be divided into two classes—

(1) Plain and solid monuments, which are likely to require only occasional repair; and

(2) elaborate monuments and other monuments which are likely to require special attention or frequent repair.

An endowment fee of Rs. 50 will be charged for monuments of the first of these classes and of Rs. 100 for monuments of the second class. The classification will rest with the Executive Engineer, but any person objecting to his decision may appeal to the Superintending Engineer. With the sanction of the Superintending Engineer a higher fee may be charged in case where fees on the classified scale are clearly insufficient.

VII. The endowment is intended to cover the cost of ordinary annual maintenance, relettering and repairs, and not the risk of accidents due to floods or earthquakes or other extraordinary causes. It is open to any person to provide any larger sum entered by the Executive Engineer in column 9 (b) of the application for work such as Government officers can undertake to execute.

### ACCOUNTS AND ESTIMATES.

VIII. When permission has been granted for the erection and endowment (or in the case of existing monuments for the endowment only) of a monument, the Chaplain or other officer in charge of the cemetery shall enter the capital sum received under rule III in the column "Endowment—Savings Bank" in a cash-book in form D, with the necessary particulars, and after obtaining the authority from the Postmaster-General, required by rule 89 (e) of the rules for the guidance of depositors in Post Office savings banks, shall deposit the amount at once in the savings bank in a separate account opened for each cemetery.

Provided that a separate account shall be opened for each monument for which a special endowment exceeding Rs. 25 has been made under rule VII.

NOTE.—This proviso should be applied as far as possible to endowments made prior to the issue of these rules.

IX. The interest only on the deposit shall be used in meeting the expenditure for the repair of those monuments for whose preservation deposits have been made. In no circumstances should the capital sum be applied to meet such expenditure, nor should the interest be separate for each monument. The interest accruing on the deposits shall form

a common fund to be used exclusively for the repairs of all endowed tombs: provided that the interest on deposits for which separate accounts are opened under rule VIII shall be used exclusively for the particular monument on account of which the deposit is made.

If a monument becomes so damaged as not to admit of repair, the Chaplain shall communicate with the friends of the deceased, or when such communication is not possible, advertise three times in the *Gazette of India* and the *Fort St. George Gazette*; and if no person will undertake to restore it, the monument shall be treated at the next repairs in such manner as the Chaplain may decide to be necessary for the maintenance of the cemetery in decent order, provided always that any inscribed slab or tablet which formed part of it shall be placed over the grave in simple masonry or be inserted in the wall of the cemetery and shall be carefully preserved.

X. Joint estimates shall be framed in April each year by the Executive Engineer and the Chaplain (or officer in charge) of the cost of repairs of tombs, and the aggregate of the sums so estimated as required for endowed tombs shall be placed to the credit of the Executive Engineer, Public Works Department, at the treasury, by the Chaplain or other officer in whose name the monies are in the deposit at the Government savings bank.

vide also appendix A, rule 1-(b) to Government of India, Home Department's Notification No. 178, dated the 21st May, 1897.

XI. Interest received from the Comptroller, Post Office, on Government securities purchased from the endowment money (rule XII) and that allowed by the savings bank on the deposit shall be credited in the cash-book in the column "Interest," and when any amount is withdrawn from the bank for payment to the credit of the Public Works Department for the repair of the monuments, it shall be debited in the corresponding column on the charge side of the cash-book, the particulars being given in the book. The interest received from the Comptroller, Post Office, shall at once be deposited in the savings bank, unless it is required for immediate payment to the Public Works Department for repairs, in which case it should be paid at once into the treasury.

XII. When the balance at credit of the account, exclusive of interest, exceeds Rs. 500, it may be invested in Government securities, through the Comptroller, Post Office, under savings bank rules. The amount required for the purchase will, on receipt of intimation from the Comptroller, Post Office, be deducted by the local post office from the cemetery savings bank pass-book. The officer in charge will make the corresponding entries in cash-book, by charging the cost of the investment in the column "Savings Bank" under "Endowments" and crediting *per contra* the nominal amount of the securities purchased in column "Securities" under "Endowment".

XIII. At the close of each official year, the cash-book shall be closed, and the balance agreed as follows:—

#### (i) Endowments—

(a) *Securities*.—With the original receipts forwarded by the Comptroller, Post Office, for Government securities purchased through him and kept in the custody of the Comptroller-General.

(b) *Savings Banks*.—With the balance of the pass-book after deducting the interest credited but not drawn.

#### (ii) Interest—

With the cash in hand, if any, being interest drawn but not yet disbursed (this should be avoided as far as possible towards the end of the official year), plus the amount of interest included in the savings bank pass-book.

XIV. A copy of this account, as closed on 31st March, should be sent to the Accountant-General, supported by the treasury receipts for the payments to the credit of the Executive Engineer and certified copies of intimations from the Comptroller, Post Office, showing the cost of investments in Government securities, the latter being obtained from the local savings banks.

### ENDOWMENT OF EXISTING MONUMENTS.

XV. When application is made for the endowment of an existing monument, the above procedure should be followed as far as applicable. The application in form A must be submitted to the Chaplain or other officer in charge, and forwarded by him to the Executive Engineer. The latter, besides framing an estimate of annual repairs, must estimate the cost of placing the monument upon a suitable foundation, if he is satisfied that such a foundation does not exist. On the sums thus estimated being paid, the application should be sent to the Archdeacon, and with his consent the monument will be brought on to the books of the Public Works Department. The amount paid for the foundation should be made over to the Executive Engineer, who will carry out the work without delay.

XVI. In order that Government may know that the tombs are kept in proper repair, an annual report in form E should be forwarded in April each year by the Chaplain (or officer in charge) with respect to their condition, for each cemetery, to the Accountant-General, who will consolidate the returns so received and render a general return to Government.

The reports sent to the Accountant-General should contain remarks, both by the officer in charge of the cemetery and by the Executive Engineer, as to the state of the tombs for which endowments have been made.

#### CIRCULAR MEMORANDUM.

1. Certain cases of failure to deliver regularly for registration, books, periodicals, magazines or serial publications *within a month* from the date of issue from the Press, as required by Section 9 of Act X of 1890, having recently been noticed, the Registrar of Books finds it necessary once more to call the attention of all Proprietors of Printing-presses, located in Madras and its suburbs, to the provisions of the law relating to the neglect to deliver for registration at this Office, within the prescribed time, every book, pamphlet or periodical printed by them, or to any evasion of the law to supply books, &c., claimed by the Librarians of the British Museum or India Office, London, or by both, as the case may be, within a month from the date of requisition from this office. By such neglect or evasion, a printer renders himself *liable to prosecution before a Magistrate* under Section 16 of the Act.

2. The absence of the publisher, author, &c., and the consequent difficulty of getting copies for delivery of printed publications for registration, and for the supply of books claimed for the public Libraries named above, is often urged as a plea for delays, but that cannot be accepted as an excuse at this Office or in a Law-court.

3. It is the duty of every printer before delivering an edition to the publisher or author to secure such copies as are necessary to meet the requirements of the Registration Act XXV of 1867 and Act X of 1890, and thereby remove all cause of complaint from this Office and the higher authorities.

#### NOTICE TO PRINTERS AND PUBLISHERS.

The Registrar of Books having noticed that books and pamphlets are not unfrequently printed with words on the title-page intimating to the public that the copyright is "Registered" when in fact it is not registered, the attention of all Printers, Publishers and Proprietors is called to the following brief abstract of the Copyright Act (No. XX of 1847) so far as it affects them:—

In order to secure the proprietary right in any publication, a written application must be made to the Registrar in the subjoined form given in the schedule to Act XX of 1847 as modified up to the 1st May 1896 (*vide* Section V):—

TO THE REGISTRAR OF BOOKS,  
Madras.

Sir,—I have the honor to request that you will be so good as to cause my proprietorship of the copyright of the work described in the annexed schedule to be registered under Rule 8, Section 20 of Act XXV of 1867, as amended by Act X of 1890, and I herewith forward the prescribed fee of two rupees for the registry.

| Time of making the entry. | Title of book. | Name of the publisher and place of publication. | Name and place of abode of the proprietor of the copyright. | Date of first publication. |
|---------------------------|----------------|-------------------------------------------------|-------------------------------------------------------------|----------------------------|
|                           |                |                                                 |                                                             |                            |

Unless the copyright is secured thus formally the Author or Proprietor will have no copyright. Any body else may publish the work with impunity and deprive him of his interest in his work, and no remedy can be had in a Court of law (Section XIV). If, on the other hand, copyright is registered, the fact will be admissible as *prima facie* evidence of title and the registered Proprietor can exercise the right to assign his interest or any portion of his interest in the book: (Section V).

Should any person print, or cause to be printed, any book in which there subsists copyright without the consent in writing of the Proprietor entered as such in the Registry book of this office, or have in his possession for sale or hire any book so unlawfully printed without such consent, such offender makes himself liable to a special action for damages (Section VII). And all printed copies of such work are forfeited to the copyright Proprietor: (Section XII).

The practice which now prevails of inserting such formula as "Copyright registered" or "Copyright reserved" on the title-page of a book and then omitting intentionally or otherwise to register the same, is highly objectionable. It amounts to a false statement, made with a view to deter others by misrepresentation from publishing the book. Apart from the utter worthlessness of such false statement, the party making it may probably render himself liable to prosecution for *cheating* under the Penal Code.

Under Section III of the Copyright Act, the Registry book kept at this Office is open to inspection at all reasonable times on payment at this Office of eight annas for every entry which any person may require to be searched for or inspected in the said book, and therefore such person can thus inspect it to satisfy himself whether the copyright has been registered or not, or he can obtain, if required, a copy of any entry in such book, certified under the Registrar's hand, on payment of Rupees 2; and such copies so certified are receivable in evidence in all Courts and in all summary proceedings, and are a *prima facie* proof of the proprietorship of copyright.

2. The Registrar of Books would now warn all concerned that hereafter there can be no excuse for any false statement made concerning copyright or for any infraction of the rules regarding the registration of books generally under Act XXV of 1867, on plea of ignorance; and that any omission to register a publication after the receipt of this notice will be presumed to be intentional, and all parties concerned are hereby warned against the consequences of such neglect.

## GOVERNMENT COPYRIGHT.

## NOTICE TO PRINTERS AND PUBLISHERS.

It having been brought to the notice of the Director of Public Instruction that Government copyright works are occasionally reprinted and published with notes or otherwise, without authority, and as ignorance is generally pleaded as an excuse when an explanation is called for, it is hereby notified that, should any person reprint, or cause to be reprinted, wholly or in part and with or without notes, glossaries, translations or other additions, any book, the copyright of which vests in the Government of Madras, without the consent in writing of the Government as Proprietors, or have in his possession for sale or hire any Government book so unlawfully printed without such consent, such offender makes himself liable to a special action for damages under Section 7 of the Copyright Act XX of 1847. And all printed copies of such work are forfeited to the copyright Proprietor under Section 12 of the same Act.

2. All Printers and Publishers are further informed that, under Section 3 of the Copyright Act, the Registry book kept at this Office is open to inspection at all reasonable times on payment at this Office of 8 annas for every entry which any person may require to be searched for or inspected in the said book, and therefore such person can thus inspect it to satisfy himself whether the Government copyright has been registered or not; or he can obtain, if required, a copy of any entry in such book, certified under the Registrar's hand, on payment of Rs. 2.

3. The requisite information being thus obtainable from the Registry books, as well as from the Quarterly Catalogues of all registered works published in the *Fort Saint George Gazette*, there can be no excuse for any infringement of the Government copyright, on plea of ignorance. On the contrary, unauthorized publication of such copyright book will be presumed to be intentional, and all the parties concerned are therefore hereby warned against the consequences of violating the rights of Government.

OLD COLLEGE, MADRAS, 14th Sept. 1883.

## TO THE DISTRICT REGISTRAR OF ASSURANCES.

Sir,

I have the honor to call your special attention to the subjoined extract from an Order of the Government of India regarding reprints of Books, Pamphlets, &c., and to request that in all future Memoranda of Particulars delivered by Printers with copies of their books under Act XXV of 1867, you will call upon them to enter in the column headed "No. of the Edition," in the case of every reprint of a copyright book, the words "New Edition," besides noting the number of the edition, and the word "Republication" when a reprint is one of a work in which copyright has not been secured or in which no such right exists.

*Extract from a Resolution of the Government of India, Home Department.*

"His Excellency in Council is pleased to determine that the distinction between 'New Editions' and 'Republications' suggested by the Government of Bengal shall be observed, i.e., that the reissue of a book of which the copyright is still in the hands of an author or his assignee, shall be considered a new edition, while that of a book of which no copyright exists shall be considered a republication."

This Order applies to all copyright works reprinted, whether they be original works or translations; and I hope that care will be taken to insist on this additional information being supplied in the Printer's Memorandum when he delivers it, he having the means of procuring such information from the Proprietor of the copyright or the Publisher. This additional information is needed for the Quarterly Catalogues and the Annual Analysis required by the Government of India.

I have, &c.,

## CIRCULAR No. 213.

The subjoined opinion of the Government Solicitor regarding the insertion, legibly on every printed or lithographed book, pamphlet, sheet, chart or map, of "the name of the printer and the place of printing and (if the book be published) of the publisher and the

place of publication," as required in section 3 of Act XXV of 1867, is communicated to the proprietors and managers of all registered Presses in the Madras Presidency for their information and guidance:—

*Extract of a letter from the Government Solicitor, No. 417, dated the 28th September 1888, to the Director of Public Instruction, Madras.*

From ERNEST BARCLAY, Esq., Government Solicitor.

To THE DIRECTOR OF PUBLIC INSTRUCTION.

Dated 28th September 1888, No. 417.

Sir,

In reply to your letter of the 20th instant, No. <sup>B.D.</sup><sub>637</sub>, enquiring whether the insertion of the name of the press or society, and not of the printer or proprietor, on a page of the book, either along with the place of publication and the name of the publisher or elsewhere, may be considered as a proper compliance with the provisions of Section 3 of Act XXV of 1867, I would point out that all that section requires is that every book printed in British India shall have printed legibly on it the name of the printer and the place of printing, and (if the book be published) of the publisher and the place of publication. Nothing is said as to where these particulars are to be printed on the book.

2. In the case of a press or society which is incorporated, and which prints or publishes or prints and publishes the book, the name of such press or society would be sufficient, but, in cases where the press or society is not incorporated, the name of the printer and publisher, or the names of the printers and publishers, if more than one, must be printed legibly on the book. The object of the Act is, as I understand it, to let the public know by whom and where the book is printed, and by whom and where it is published, and this information must be printed legibly on the book. I do not think that to put the name of an incorporated press or society on a book as the name of the printer or publisher would be a compliance with the Act, as the public would then have to find out who were the proprietors of the press or the members of the society. I think that the name of the superintendent of a press, such as the Lawrence Asylum Press, or the Evangelical Lutheran Mission Press, would be sufficient.

I have, &c.,

(Signed) ERNEST BARCLAY, Government Solicitor.

## CIRCULAR TO PRINTERS AND PUBLISHERS.

With reference to Section 3 of Act XXV of 1867 (amended by Act X of 1890) which requires that "Every book or paper printed within British India shall have printed legibly on it the name of the printer and the place of printing, and (if the book or paper be published) of the publisher, and the place of publication," the Registrar of Books hereby notifies that failure to insert on the title-page of any work delivered for registration the names referred to will be treated as an evasion or neglect of the abovementioned section, and will be dealt with according to Section 12 of the Act.

2. The names in question should also be entered in columns 5 and 6 of the Memorandum of Particulars which should accompany every book delivered by a Printer pursuant to clause a of the first paragraph of Section 9 of the amending Act (X of 1890).

The Society was established in the year 1820 with a view to the general diffusion of useful knowledge by the supply of approved school books at the cheapest possible rates, and for furnishing such other elementary works, both in the English and Vernacular languages, as might tend to the mental and moral improvement of the people. The production of school books is now well carried on by private agency, and so the main object of the Society is now to help to form a good vernacular literature by means of translations and original works. The Society was registered in 1893 under Act XXI of 1860. The books of the Society are now sold at the S. P. C. K. Depot, Vepery, Madras. Orders should be sent to the Manager, S. P. C. K. ## RULES OF THE MADRAS TEXT-BOOK COMMITTEE.

1. The Madras Text-Book Committee has been appointed for the following purposes:—

(a) To take into consideration such books as may be submitted to it by the Director of Public Instruction and to advise Government in regard to their suitability as text-books for the several classes and forms in recognised schools in accordance with the curricula from time to time prescribed for such classes and forms, the list in each subject and for each class or form being as varied and complete as possible, so that managers of schools may have a wide field in which to exercise the freedom of choice vested in them.

(b) To advise the Educational Department as to the steps to be taken for the preparation and publication of new text-books when necessary.

(c) To help in forming, under the control of the Director of Public Instruction, (i) an educational library containing copies of all text-books approved from time to time by the Department, copies of text-books approved or prescribed in other provinces of India and in other countries, and copies of works on the theory, the practice, and the history of education; and (ii) an educational museum containing plans and models of school buildings and specimens of maps, diagrams, apparatus and appliances suitable for schools.

2. The committee shall consist of not more than twenty members in addition to the president.

3. The members of the committee shall be appointed by Government, which may, at any time and without assigning reasons, remove any member. A member leaving the presidency for an absence exceeding six months shall vacate his seat, and the vacancy thus caused shall be filled by Government on the recommendation of the Director of Public Instruction. Vacancies not exceeding six months in duration may be temporarily filled by the Director.

4. The Director of Public Instruction shall be *ex-officio* president, and one of the members shall be secretary.

5. The committee shall have power to appoint sub-committees, each consisting of not more than five members in addition to the chairman, for the purpose of dealing with different subjects and languages. It shall also have power to consult specialists who are not members of the committee. Any member appointed to fill a temporary vacancy on the committee shall *ipso facto* become a member of the sub-committee to which the absent member belongs. Every book referred to the committee by the Director shall be referred by it to the appropriate sub-committee for examination and report.

6. The chairman of each sub-committee shall be appointed by the committee, with the limitation that in the case of the sub-committees for the vernaculars an Inspector of the Department shall always be chairman.

7. The committee shall meet ordinarily twice a year, on the last Wednesday in March and the last Wednesday in October. The president shall have power to convene special meetings as occasions arise or on the requisition in writing of not less than four members. Sub-committees shall meet at such times as their respective chairmen may consider necessary.

8. Seven members of the committee shall form a quorum. The quorum for a sub-committee shall be not less than half the members of such sub-committee, who are resident in Madras.

9. The meetings of the committee and of sub-committees shall ordinarily be held at the Office of the Director of Public Instruction.

10. At all meetings of the committee or of sub-committees, the president or the chairman, as the case may be, shall take the chair; but in case of his absence the members present shall appoint a chairman.

11. All questions that may arise at meetings of the committee or of sub-committees shall be decided by a majority of the votes of those present. In the event of the votes, including that of the president or the chairman, being equal, the president or the chairman shall have a second or casting vote. Opinions of absent members may be submitted in writing, but shall not count as votes.

12. It shall be the duty of the secretary to give notice of the meetings of the committee and of sub-committees when held at the ordinary place of meeting, to attend the meetings of the committee, and whenever possible the meetings of the sub-committees, and to keep a record of the proceedings. When the secretary cannot be present at a meeting of a sub-committee, a similar record of the proceedings shall be kept by the chairman of the sub-committee, who shall forward it to the secretary.

13. A copy of the proceedings of every committee meeting shall be forwarded to the Director of Public Instruction within two weeks after the meeting.

14. The committee shall, not later than the 1st June in each year, forward to the Director of Public Instruction a report on the work done during the official year. This report shall be submitted to Government by the Director with such remarks as he may see fit to offer on the operations of the committee.

15. Each book forwarded to a sub-committee shall be referred to not less than two of its members for expression of opinion.

16. No books referred to a member shall be kept for more than a month.

17. In the case of books rejected as unsuitable by the Text-Book Committee, some brief indication of the grounds on which the judgment has been formed shall be given.

18. The lists of books passed by the various sub-committees shall be printed and circulated among the members of the committee at least a fortnight before the date of the meeting at which they are to be approved.

19. The committee will have no concern with the text-books of schools classed as European schools by the Director of Public Instruction unless they are specially referred to them for opinion by Government or by the Director.

## MADRAS MEDICAL COLLEGE.

## HISTORY.

The Madras Medical College was originally established as a Medical School in 1835 by the Right Honourable Sir Frederick Adam, K.C.B., under the terms of G.O., No. 7, dated 18th February 1835. The classes assembled for instruction, at first, in rooms adjoining the quarters of the Surgeon of the General Hospital. The accommodation, however, was insufficient for the purpose, and, as the arrangements were otherwise inconvenient, the Government of India, on the representation of His Excellency the Governor, were induced to sanction the erection of a separate building. The Medical School was accordingly built at a cost of Rs. 9,861-3-3, and opened for work in July 1836. The Medical School building consisted of four apartments—a theatre or lecture room, a library, a museum, and a laboratory.

Action originated with the Governor in Council, who considered "it very advisable that some steps should be taken at this presidency for affording better means of instruction in medicine and surgery than are now available. The Governor in Council is of opinion that the institution, from its extensive usefulness alone, may become the foundation of important benefits both to the native community and the State independently of its tendency, by proving to the natives of India that the acquirement of one branch of European science is within their reach; to introduce a spirit of emulation and inquiry, and stimulate them on the road to general knowledge." "that the Governor in Council considers the Medical School to be deserving of the most liberal encouragement."

The teaching staff, when the school was established, consisted of Surgeon Mortimer, M.D., as Superintendent of the Medical School, and Assistant Surgeon George Harding as Assistant Superintendent, with two Assistants—a Warrant Officer, Assistant Apothecary D'Beaux, and a Dresser, P. S. Mootoosawmy Moodeliar, now a retired Native Surgeon. The classes with which the school began work in July 1835 consisted of 10 Medical apprentices and 11 Native Medical pupils.

Private students were first admitted in 1838. They obtained, in common with other Government students, a free education. In 1851 the Medical School became a college. In 1855 the College was transferred from the direction of the Medical Board to the control of the Director of Public Instruction on the ground that the "introduction of the higher education had altered the character of the school from a mere Military Medical School to the position of a component part of the general arrangements of the Educational Department." In 1857 the University of Madras was inaugurated, a Medical Faculty constituted, and the Medical College placed in the list of affiliated institutions.

As the outgrowth of the College in all its departments steadily progressed, the necessity of enlarging the building began to be felt, and in an order, dated 18th November 1864, it is noted that the Government approved of certain alterations and additions being made. The work, which commenced in May 1865, was completed in 1867. The result of these alterations and additions was to add considerably to the architectural appearance of the building, to provide ample space to meet the wants of the institution, and to render the Medical College an ornament to the City of Madras. In 1835 separate anatomical buildings were erected, to which were added a theatre with a dissecting room for the pupils of the Hospital Assistant Department and a museum in 1837-38. Tiffin-rooms for the use of the caste students were also built in the same year. In the Sessional year 1838-39 an upper storey was erected on the north wing of the College containing three large commodious rooms with water service pipes, two of which are utilized for a histological laboratory, and the other for the Principal's office. An ornamental wooden gallery with a set of book-cases adapted to the walls above and below was also constructed with sundry other improvements. A terraced verandah supported on cast-iron columns has been erected surrounding the main building during the Session 1889-90, and supplied with desk seats affording students a pleasant shelter for study. Two latrines—one for Europeans and the other for Natives—were built in the early part of the year at an actual cost of Rs. 5,019-3-0 and handed over for use in April 1892. A hygienic laboratory was constructed at a cost of Rs. 18,552-15-9, and was fitted up with the required apparatus valued at £549-17-8. Practical course was given for the first time in April 1891. To meet the pressing demand of the gradually increasing chemistry classes, the laboratory has been extended by the addition of a block to the southern part of the original rooms in 1895-96 at a cost of Rs. 15,418; and a substantial compound wall also has been built this year, with a strong iron gate, at a cost of Rs. 3,823.

Great need was felt for the protection of coaches and horses of Professors and Assistant Professors and perambulators belonging to students. The Government was addressed on the subject, and in G.O., No. 191, Educational, dated 15th March 1893, construction of a coach house, stable and perambulator shed was sanctioned. They were built at a cost of Rs. 1,985-12-10 and handed over for use in 1894.

During the Session 1898-99, a large tiffin and reading-room for the use of European and Eurasian students was built towards the south-east of the main College buildings at a cost of Rs. 5,686-15-11.

The Medical College, which, except in its College Department, had hitherto been almost exclusively an institution for supplying the army with Apothecaries and Hospital Assistants, in 1875 admitted on its rolls three new classes of students, viz., candidates for the degree of Licentiates in Medicine and Surgery, for the new grade of Civil Apothecary, and female students. The system of free education for the students of the College Department was abolished a year before this Department had been closed, in order to allow the Professors to devote themselves to the teaching of subordinates for the service of Government. A public meeting was held in Madras and a petition was sent to His Excellency the Governor in Council, praying that the College Department of the College should be again opened, and stating that the students were willing to pay for their education. This request was acceded to.

It was decided by Government that female students should receive a free education.

In G.O., No. 6793, dated 30th November 1885, it was ruled that the vacancies in the Warrant Subordinate Medical branch of the service should, in future, be filled up from graduates of the University. This method of recruiting the grade utterly failed, and consequently, in accordance with G.O., No. 5824, dated 27th August 1888, it was re-opened with the admission of 10 Military apprentices into the College on 1st October 1888.

The Hospital Assistant Department of the College was moved over to an Auxiliary Medical School at Rayapuram in the year 1882 and continued working there till August 1887, when it was again sent back to the College. On the 1st April 1903, the training of the Hospital Assistants was again transferred to the Medical School at Rayapuram.

After the repeated representations of the Sanitary Commissioner that Sanitary Inspectors of Municipalities be put through a course of Hygiene under the Professor at the Medical College, as their knowledge even in the common principles of Hygiene is very defective, the Government in their order No. 1914 M., dated 10th December 1891, sanctioned the formation of such a class and subsequently they extended the curriculum in their Order, No. 697 L., dated 9th June 1903. The Professor of Hygiene teaches the theoretical, and the Sanitary Commissioner conducts the practical, portion of the subject. The curriculum of study for this class corresponds to the syllabus of the Intermediate Examination in Hygiene and Physiology of the Government Technical Examinations. The class opens on the first working day of November every year and lasts for five months, at the end of which period students are required to pass a final examination.

The first Sanitary Inspectors' class, consisting of 32 Sanitary Inspectors of Municipalities and 22 private pupils, under the old rules, began work on January 15th, 1895.

Members.

Upon the resignation, in November 1858, of the President of the College Council, a Principal was appointed, who was held responsible for the efficient working of the College. The Council, as a governing body, was abolished, but the Professors form a consultative Council, whom the Principal consults on any proposal involving a change in the course of instruction; but this does not preclude him from availing himself of their advice, either collectively or individually, on other occasions.

The following rules for the government of the Madras Medical College were submitted by the Director of Public Instruction and brought into force in November 1858:—

(1) The government of the Madras Medical College shall be vested in a Principal, aided by a consultative Council composed of all the Professors and of any other members who may be appointed by Government, subject to the general control of the Director of Public Instruction.

(2) All correspondence on the business of the College shall be conducted by the Principal.

(3) The Principal shall convene a meeting of the Council whenever he may think it expedient to do so, or whenever a requisition signed by three Professors and setting forth the question to be discussed shall be made to him for this purpose.

(4) At the meeting of the Council, the Principal or, in his absence, the Senior Professor present, shall take the chair. The chairman shall have a vote on all questions put to the meeting; and, in the event of opinions being equally divided, shall have a second or casting vote.

(5) Minutes of the proceedings of all such meetings shall be forwarded to the Office of the Director of Public Instruction for record or for such orders as may be necessary.

(6) Any proposal involving a change in the prescribed course of instruction or in the general management of the College which the Principal may desire to submit for the sanction of superior authority shall be laid before a meeting of the council for discussion before being so submitted, and the Principal, when forwarding his own proposal, shall forward also any resolution which may have been passed on the subject by the meeting.

(7) All notices, orders, &c., relating to the delivery of lectures and other matters connected with the routine of the College shall be signed and issued by the Principal, who shall exercise a general superintendence over the interior economy of the college, the supervision of the building, museum and library.

Casual students are also admitted, see page 1170.

2. The academical year extends over a period of nine months, from July to March and is divided into an Autumn and a Spring Session.

3. The clinical year extends over ten months, from June to March, and for the final year student, of the College and Apothecary Departments eleven months from May to March.

4. Every student is required to attend punctually at the stated hours for lectures and dissections.

5. Every private student shall provide himself with all the prescribed text-books, dissecting instruments and blow-pipes.

6. Every student must attend at least 80 per cent. of each of the class meetings to enable him to obtain a certificate of attendance.

7. No certificate of attendance shall be granted to any student unless he has given satisfaction to the authorities responsible for granting the certificates.

8. Every student shall salute the teachers on the occasion of his first meeting them for the day within the College precincts.

10. No pupil shall be allowed to leave the class-room without the permission of his teacher or until the class is dismissed.

11. Immediately after the bell for the assembly of the class has been rung, the roll shall be called and the absence of any student noted. A student coming into the class-room after roll-call may be punished by loss of marks or by a fine. Any misconduct shall subject a student to such loss of marks in his class or such fine as the offence may appear to the Professor to warrant. Should this punishment be deemed insufficient, a report shall be made to the Principal.

12. At all examinations in future, whether ordinary class examinations or sessional examinations, students are forbidden to take into the examination hall text-books, notes or manuscripts of any kind. Any student detected in the violation of this rule or having recourse to unfair practices, will be removed from the examination room, and the occurrence will be reported to the Principal.

13. Gross irregularity of any kind shall be brought to the notice of the Principal and such penalty awarded as he may deem fit.

14. Any student who shall absent himself without leave (unless such absence be satisfactorily explained) shall be punished by loss of marks or fine.

15. In case of absence on account of sickness duly certified, marks shall not be deducted, nor fine imposed.

16. To prevent irregular attendance of students on the pretext of temporary ailment or of taking medicine, the following rules shall be strictly observed:—

(a) College Department students when attacked with illness are to report the same in writing to the Principal, and are to produce a certificate from some competent medical authority covering the whole time during which they have been absent from College and Hospital.

(b) All students of the Assistant Surgeon Department attached to the General Hospital when requiring medicine, and all students of the same Department present in College when falling sick, shall apply to the Apothecary of the General Hospital, and shall remain in the hospital for the rest of the day. If reporting sick after midday, they shall be detained in hospital till the Medical officer's visit next morning. The usual certificate of absence must be produced.

(c) Such students when indisposed for more than one day are to be admitted into the General Hospital as in-patients, and on discharge shall present to the College authorities the usual certificate.

(d) Students of the Apothicary Department doing duty at other hospitals and dispensaries shall remain on the premises when taking medicine, and shall be transferred to the General Hospital as patients, if the duration of the illness exceeds one day; the usual certificate must be produced.

(e) Students recommended for leave by the Medical officer of any Hospital where they may have been under treatment must on their discharge, and prior to availing themselves of such leave, obtain the sanction of the Principal to the grant of the leave recommended.

17. Students will not be granted leave to get married during working days of the Session, unless under most exceptional circumstances, when permission must be obtained before arrangements for the marriage are definitely made.

18. Any student absenting himself for the purpose of attending the Police Office shall be subject to the same penalty as if absent without leave, unless he can produce a certificate, for the information of the Principal, that his attendance has been necessary either as witness, or, if as a defendant, that he has been acquitted by the Magistrate of the charge preferred against him. Absence on account of attendance at the Small Cause Court shall be regulated by the same principle.

19. Leave of absence during the vacation shall be granted only to those students who have paid satisfactory attention to their studies during the previous course, and whose conduct has been in all other respects satisfactory.

## HISTORICAL NOTICE.

The College of Engineering was developed from a Surveying School which was established in 1794, in connection with the Observatory, at the instance of Mr. Michael Topping, Astronomer and Geographical and Marine Surveyor at the Presidency of Fort St. George. The first Superintendent was Mr. John Goldingham. The operations of the School were temporarily suspended in 1811, but were revived in 1818 under Major de Havilland, Inspector of Tank Estimates. In 1857 the School became a Civil Engineering College, which in 1877 was affiliated to the Madras University. The College was reorganised in 1887 and placed on its present footing under the name of the Madras College of Engineering.

The above Institution was founded by the Rev. John Anderson, in Black Town, on 3rd April 1837. Its aim is to provide for native youth a liberal Christian education that shall cultivate, expand, and quicken the whole man, the conscience and will as well as the understanding and memory. With this view all the branches of a liberal education are so taught as to show their connection with the great central truths of religion and Christianity. The Bible is regularly taught as the record of God's revelation of Himself for man's salvation.

The instruction is carried on by the Professors, Assistant Professors, and Teachers mentioned above; and the managing body is the College Council. As the College is intended to be the centre of the higher Christian education in Southern India, its constitution is as catholic as possible, and the members of the Council represent the majority of the Protestant Churches in the Presidency. The Church Missionary Society and the Wesleyan Missionary Society contribute each £300 a year to the support of the College, so that the Secretary of the former and the District Chairman of the latter are *ex-officio* members of the Council, as well as the Secretary of the United Free Church of Scotland Mission. The College educates up to the standard of the Bachelor of Arts degree of the Madras University. It has at present about 800 students.

In the School department there are about 1,000 pupils, of whom 550 are in the Upper and 450 in the Lower school.

Visitors are welcome on working days between the hours of 12 noon and 1 P.M.

#### SCHOOLS OF THE UNITED FREE CHURCH OF SCOTLAND MISSION.

In connection with the United Free Church of Scotland Mission there are, besides the Christian College, three High Schools, viz., at Nellore, Conjeevaram and Chingleput; two Lower Secondary Schools, viz., Chingleput Boys' Boarding School, Walajabad School and Primary Schools at Ponneri, Conjeevaram, Walajabad, Muthialpet, Rajampet, Guduvancheri, Sriperumbudur, Kallatur and Royapooram, with an attendance of upwards of 1,460 boys. The fees paid by these boys equals more than Rs. 18,000 a year. There have

also been established 16 Village Congregational Schools in the Mission District of Chingleput, with 6 Night Schools attached, also an Agricultural School. The roll number of these schools is 350. There are also 6 Village Schools in the Walajabad District, and 10 Village Congregational Schools in the District of Sriperumbudur, with 7 Night Schools attached. There are also 3 Village Schools in the District of Madras, with 3 Night Schools attached.

Besides these there are Girls' Schools, viz., one Christian Boarding School, with Normal School attached, and six Caste Girls' Schools (including the Rajahgopal Schools), all in Madras; at Ponneri, one; at Conjeeveram, three; at Rajampet, one; at Walajabad, one; at Sriperumbudur, one; at Chingleput, three, one of which is a Christian Boarding School; these schools have an aggregate roll of nearly 2,000 girls. The fees paid by these girls equal more than Rs. 8,700 a year.

In connection with the Zenana Agency there are about 600 pupils.

In the whole, including the pupils at the Christian College, there are in connection with the United Free Church of Scotland Mission between 6,800 and 7,000 of the youth of the country under regular Christian instruction.

The Committees of the Foreign Missions of the Free Church and of the Edinburgh Medical Missionary Society united in sending Mr. D. H. Paterson, Surgeon, as a Medical Missionary to co-operate with the Missionaries of the Free Church in Madras. In March 1857 he opened a Dispensary in Black Town, and afterwards another at Royapuram. Both were very successful. The Royapuram Dispensary is still maintained for the treatment of women and children. The Medical Mission for Women is now an integral part of the United Free Church of Scotland Mission. A few years ago a Dispensary was opened in Black Town and a Hospital in Royapuram for women and children.

## ST. THOMAS' CONVENT.

SAN THOMÉ.

The Convent founded by the Franciscan Missionaries of Mary, 8th September 1888, numbers at present, 21 religious.

The Adoration of the Most Holy Sacrament daily exposed in the Convent Chapel from 7 A.M. to 5 P.M., and the different works of the Convent form the day's work of the Nuns. The Convent's works are:—

1. *The English School*, for English and Eurasian children, comprises,—(i) the Primary; (ii) the Lower Secondary; (iii) the Upper Secondary Departments. The course of instruction is that prescribed by the curriculum of the Madras Educational Rules, and the pupils are prepared for the different Government School Examinations of the Madras Presidency. The actual number on the rolls is 115, of which 67 are children from the families in San Thomé, and 26 are Convent children. Out of the 115 pupils on the rolls, 84 are Catholics and 31 are Protestants. The Catholic children receive their religious education and are prepared for the reception of the Sacraments. A monthly progress sheet keeps the parents informed of the Order of Merit each child holds in its respective class.

2. *The Boarding School*, for English and Eurasian children, counts but 27 pupils at present, 10 of whom are 1st class boarders and 17 second class. The recent alterations and improvements ensure to the children every comfort. They are trained to become useful members of society, and the greatest care is taken to infuse in them a profound Christian spirit. Three Associations help to lead them on to virtue:—

- (i) The Sodality of the Children of Mary; chiefly intended for the grown-up boarders, also receives day scholars who may be desirous to join it. The weekly meeting, held every Sunday, gathers the youthful members to sing in common the praises of their Heavenly Mother.
- (ii) The Association of the Holy Angels.
- (iii) The Confraternity of the Holy Infant Jesus is intended for very young children.

3. *The Third Order of St. Francis*.—The Convent also receives young native women who have a taste for the religious life. They are received as members of the Third Order, and follow a rule appropriate to them. The number of these at present is 18.

4. *Vernacular Poor School*.—This School gathers together all the poorer children of the San Thomé parish. The School is free, and since June 1900 of the Lower Secondary Grade, teaching up to Form III. The curriculum of the Madras Educational Rules for Fixed Grants is followed. The 96 pupils on the rolls are with but few exceptions Catholics, including about 20 little boys. Daily Catechism lessons are given to the children.

5. *Eurasian Orphanage*.—This is for Eurasian children; its limited space does not allow of more than 20 children being accepted. They all receive an education suited to their position, have daily Adoration of the Most Holy Sacrament, and can become members of the Sodality of the Children of Mary. They are taught needlework and embroidery to help the Convent and to be able to work for themselves later on. Many attempts have been made to raise funds for a new building, but have as yet been unsuccessful.

6. *The Native Orphanage* consists of 75 children. These children have no other support but the Convent; they were mostly pagans when admitted and, according to their desire, were instructed in the truths of our Holy Religion and made children of Our Mother the Church. These children all learn to read and write their own vernacular, study up to Class IV, and are in their free hours made to work. They also assist daily at Holy Mass and Benediction; and have half-an-hour's Adoration before the Most Blessed Sacrament exposed, and are members either of the Sodality of the Children of Mary or of the Confraternity of the Holy Infant Jesus.

7. *Babies*.—These are mostly pagan children brought by their mothers or other relations. The number of little pagan babies thus received during the year was 33. Since 1901 the Babies received are sent on to St. Thomas' Mount.

8. *The Hospice for poor old women* is entrusted to the Convent by the Mission, which entirely defrays the expenses for the support, shelter and clothing of its 25 inmates. These are mostly poor parishioners sent by the Fathers of the Mission, but very many pagan women are also admitted. These poor women, often very infirm, find in the Hospice a home where they pass their remaining days in peace, quiet and happiness; and in every-day life, these dear old people find yet ways to render themselves useful to the Convent; the stronger among them assist the others. They all follow a rule of life suited to them, and daily assistance at Holy Mass, half-an-hour's adoration, prayers and Catechism instruction prepare them for a happy death. None of them has yet died without having been at the hour of death strengthened with the rites of Our Holy Mother the Church.

9. *The Catechumenate* is also the Mission's work. Begun in August 1898 by the then Prior of the Cathedral, this really Apostolic work has since continued and brought many a blessing to the fisher-families living around San Thomé. While the men were taken charge of by the Rev. Father Prior, the women, daughters and younger children were sent over to the Convent to live there for a fortnight or, if necessary, for a month even,

to be instructed and prepared for the reception of the Holy Sacraments. Thus prepared, they, with their husbands, returned home with a better knowledge of their Christian duties. A large number of such women and children have been, while new comers are yet, under instruction.

10. *Free Out-door Dispensary*.—In it every one without distinction of religion is treated. The number treated during the last year was 30,129.

*Industries*.—To help to the support of the works different industries have been started, and so far succeed fairly well.

*TEACHING STAFF*.—The Teaching Staff consists of seven religious Nuns of the Franciscan Order and four lay teachers.

Two other Nuns give special lessons in the School in Music, French and Needlework.

Six Native Nuns of the Third Order of St. Francis teach in the Vernacular School under the supervision of one of the Franciscan Missionary Nuns.

*Chaplain of the Convent*.—Rev. J. Doyle.

## THE FRANCISCAN CONVENT.

ST. THOMAS' MOUNT.

The Convent, situated on the hill, founded by the Franciscan Missionaries of Mary on the 23rd April 1901, numbers at present 8 religious.

The Most Holy Sacrament is daily exposed during Mass which is followed by Benediction, and owing to the small number of the Convent inmates, the Exposition cannot be continued throughout the day.

The Convent works are:—

1. *The English School*, at the foot of the hill, opened on the 1st July 1901 for English and Eurasian children, comprises (i) The Primary and (ii) the Lower Secondary Departments. The course of instruction is that prescribed by the curriculum of the Madras Educational Rules and the pupils are prepared for the different Government Examinations of the Madras Presidency. The number on the rolls is 27, all children from the families in St. Thomas' Mount and Pallavaram. Of these pupils 10 are Catholics and the remaining 17 Protestants. The Catholic children receive their religious education and are prepared for the reception of the Sacraments. A monthly progress sheet keeps the parents informed of the order of merit each child holds in its respective class.

2. *Eurasian Orphanage*.—This is for Eurasian children, of whom there are 5 who, having received an education suited to their position, are taught needlework and embroidery to help the Convent and to be able to work for themselves later on. They have daily adoration of the Most Holy Sacrament and can become members of the Sodality of the Children of Mary.

3. *The Native Orphanage*.—This Orphanage consists of 17 children. These have no other support but the Convent; they were mostly pagans when admitted and, according to their desire, were instructed in the truths of our Holy Religion and made children of our mother, the Church. These children all learn to read and write their own vernacular and are also made to work. They assist daily at Holy Mass and Benediction and have half-an-hour's adoration before the Most Blessed Sacrament, and are members either of the Sodality of the Children of Mary or of the Confraternity of the Holy Infant Jesus.

4. *Babies*.—These are mostly pagan children brought by their mothers or other relations. Their actual number is 4. They are brought up in a separate building and when 3 years old join the Orphanage. The number of little babies thus received during the year, was 8.

5. *Industries*.—To help to the support of the works different industries have been started, each being under the supervision of one of the Franciscan Missionary nuns.

- (i) Lace-making with pins is done by little Native Orphans.
- (ii) Embroidery on church vestments, net and fancy work is done by the little Eurasian orphans.
- (iii) Book-binding is done by the bigger children among the Eurasian orphans.

*Teaching Staff*.—The teaching staff consists of three nuns of the Franciscan Order. One other gives special lessons in the school in Music, French and Needlework.

### THE GOVERNMENT HOBART TRAINING SCHOOL.

(For Muhammadan Mistresses.)

N. 3, WHITE'S ROAD, ROYAPETTAH, MADRAS.

This Institution has been in existence for upwards of 30 years.

Its income was originally derived from the following sources—(1) An endowment of Rs. 10,000 bestowed by Lady Mary Hobart; (2) donations and subscriptions from the public; (3) profits from the sale of work. These being found inadequate to defray the increasing expenditure, the Government in 1889 took over the entire responsibility of its maintenance. In 1890 it was placed under the supervision of the Superintendent of the Presidency Training School for Mistresses, which facts afford sufficient proof of the utility of the School. It provides education up to the Lower Secondary Standard, in their own vernacular, for all classes of Muhammadan female children. It has several classes, including a normal class, which yearly sends out duly qualified teachers. Industrial occupations were formerly taught, but owing to want of support and decreasing attendance, this class has become extinct. Embroidery is still taught to the pupils of the various classes as fancy work. The teaching of English was begun in 1902 to the pupils in the 3rd class and upwards. A large and commodious building has been purchased by Government for the accommodation of the School.

Prizes and Scholarships are awarded by the Madras Government.

There are 9 Teachers on the Staff. *Head Mistress.*—Miss Karney. *1st Assistant Mistress.*—Miss Paulie. *Drawing and English Mistress.*—Miss Peters.

The school may be inspected by ladies during the school hours, 10—4. Friday and Sundays excepted.

#### *Statement of the Objects, and an Appeal in behalf of the Civil Orphan Asylums.*

The "MADRAS MALE AND FEMALE CIVIL ORPHAN ASYLUMS" were founded by Eurasians for relief of the poorer members of the community in the early part of the past century, so far back as 1807, and have, therefore, been in operation for over ninety years.

A full statement of the funded capital and financial resources of these Institutions will be found in the Annual Report. Improvements have been introduced into the system of education pursued in each of the Asylums, with a view to increasing their public utility. For the furtherance of this object, these schools are now placed under Government inspection.

All orphan children throughout the Presidency, descended from parents either Eurasian or European, not in military employ, are eligible for admission.

This fact, it may be assumed, is generally known throughout the mofussil, from the applications which are made from various stations for the admission of orphans; but the Directors regret that the claim resulting from this fact, upon persons residing in the mofussil for some contribution towards the support of these Institutions, does not appear to be so generally recognized.

The Bishop of the Diocese is the President, the Archdeacon is the Vice-President, and the rest of the Clergy of the Church of England are *Ex-officio* Patrons of these Institutions. The Directors, therefore, earnestly request the Clergy in the Presidency and mofussil either to make regular periodical collections in their Churches in behalf of the Asylums, or else to circulate this appeal, together with the accompanying report, among the European and Eurasian residents at their stations, who are particularly invited to come forward and contribute, according to their means, towards the support of Institutions which provide such efficient relief for the destitute and distressed members of their own community.

Contributions may be remitted to Mr. A. J. Rebeiro, Honorary Treasurer, Kennet's Lane, Egmore, or to the Honorary Secretary, Civil Orphan Asylum, Egmore, Madras.

#### HISTORY OF THE MILITARY FEMALE ORPHAN ASYLUM.

*Origin*.—The Asylum was instituted in 1787, when Sir Archibald Campbell was Governor, and its necessity was prompted, according to his own words, "by the wretched condition of the many orphan children of the soldiers who perished during the late war on the coast." The funds for the maintenance of the Institution were at first raised

by public subscription, and His Highness the Nabob having presented a house and garden for the accommodation of the orphans, Government proposed to assist the Managers by furnishing the house. They also recommended the young Asylum to the protection of the Court of Directors of the Honourable East India Company, who had previously suggested the establishment of some such charity.

The first meeting of the Governors was held on the 9th April 1787.

*Early Organization*.—The Institution, which was opened in July 1787, was termed "The Asylum," and the funds were managed by a Treasurer acting under the superintendence of the Governors, consisting of the Governor and Council, and eight other gentlemen, "including the two clergymen." The children were under the immediate care of governesses and nurses, subject to the control of twelve Directresses, who were ladies belonging to the Settlement. The earliest rules framed for the Asylum relate mainly to its internal management. It does not appear by whom they were framed, but there can be little doubt that they were prepared either by Lady Campbell herself (who had set the subscription on foot, and took so liberal and active a part in the establishment of the Institution, that, at the first meeting of the Governors, on the 9th April 1787, thanks were voted to her for the liberal manner in which she had instituted the charity, and at the first recorded meeting of the Directresses, on the following day, she was requested to act as President of the Society), or under her immediate direction and that of the ladies associated with her.

These rules provide for the appointment of a Governess, a teacher and servants, whose duties are prescribed; for the admission of children, requiring preference, to be given to those who had lost both parents, and, after them to such as had lost only their mothers; for the division of the children into two classes according to age—the junior class including those between two and five, and the senior class those of five and upwards; for their clothing, diet, and dismissal. Some of the more forward of the juniors were to be taught reading and the time of the elder class was "to be divided between reading, hair-dressing and working in the manner best suited to their disposition and abilities such as may qualify them for servants." The children were required to learn plain sewing, to be taught to mend their clothes and to help the Asylum ayahs to wash and dress the younger orphans. A lace woman, "and she that teaches marking and knitting," are also enumerated among the instructors. As soon as some of the children were far enough advanced in their learning not to need to attend school every day they were to be employed in servile capacities by turns to inure them for future service.

In addition to children entirely dependent on the Charity, provision was also made for the admission, as boarders, of orphans or other female children possessing some property. Those owning "1,000 pagodas were to be considered parlour boarders, and to have such masters as shall be deemed necessary to qualify them for that station of life in which their fortune and connections are likely to place them."

*Present Organization*.—The general conduct and management of this charitable Institution are entrusted to two Committees, the one of Ladies, and the other of Gentlemen. The Committee of Ladies consists of the wife of the Governor of Fort St. George as Patroness, the wives of the Commander-in-Chief, the Chief Justice, the Right Reverend the Bishop, and Members of Council, and such other Ladies as may be nominated by the Governors, as Vice-Patronesses, and fourteen other Ladies elected as Directresses.

The Committee of Gentlemen consists of the Governor as President, the Lieutenant-General Commanding the Forces in Madras, the Chief Justice, the Right Reverend the Bishop, and Members of Council, as Vice-Presidents, with twelve other gentlemen elected as Governors.

The present rules provide for the admission of girls of the following classes:—

- I. Orphans of European Non-Commissioned Officers and soldiers.
- II. Orphans of European Commissioned Officers and Warrant Officers, if left destitute.
- III. Orphans of East Indian Warrant and Non-Commissioned Officers and others borne on the returns of the Army.
- IV. Orphans of Pensioners of the above classes.
- V. Orphans of Volunteers.
- VI. Orphans of non-military parents.
- VII. Children of living fathers of the above classes in special cases of destitution.

The great object of this Institution is that the girls shall be brought up in sound Christian principles, and that they shall be thoroughly trained in every description of domestic work, so as to fit them to become, in all respects, useful and industrious women.

*Accommodation*.—The existing buildings were purchased in 1819 for a sum of Rs. 29,750, which was paid from the proceeds of the sale of the old buildings in Chintadripettah. Subsequently a large sum aggregating Rs. 47,000 was spent by Government in improving and enlarging the premises, and a handsome Chapel, which cost Rs. 16,437, was erected in 1883-84 from Asylum funds. At one time repairs were executed at the expense of Government, but according to existing rules the Building Sub-Committee is charged with the special "oversight of the Asylum buildings and are authorized to order the

execution of all ordinary repairs" provided for in the Annual Estimate. The Asylum stands in a large wooded compound affording sufficient space and shade for out-door recreation, and remote from the insanitary surroundings of more crowded localities.

The main buildings of the Asylum consist of a long double-storied range with the residence of the Superintendent in the centre. The rooms on the ground floor serve as eating and play-rooms, those on the upper floor are used as class-rooms by day and as bed-rooms at night. The buildings can accommodate 180 children. The children are not furnished with cots, but sleep on the floor, each being provided with a pillow, rug and mat to lie on, and a blanket or sheet to cover them according to season.

Since its institution in 1787, 2,888 girls have passed through the Asylum.

### MAGDALEN ASYLUM.

Mrs. Firth, *Honorary Secretary.* Messrs. Arbuthnot & Co.—*Treasurers.*

### THE GORDON ORPHAN REFUGE.

ST. THOME, MADRAS.

H. E. Lady Amphyll, *President.* Mrs. Firth, *Honorary Secretary.* Messrs. Arbuthnot & Co., *Treasurers.*

The design of this Institution is to afford a Refuge for such destitute orphan girls of European descent, as are not eligible for either the Military or the Civil Female Orphan Asylums. As such, it is one, the Committee plead, well deserving of public support.

For the information of new subscribers, it may be mentioned that "The Refuge" was commenced in 1860, by Mrs. W. A. Morehead, by whose exertions sufficient money was raised to purchase the premises at St. Thome, where "The Refuge" is now located. Subsequently the Trustees of the property of the late Mrs. Gordon of the Mount endowed it to the amount of about Rupees 479-8-0 per annum, on condition that it assumed its present title. From April 1st, 1873, the Institution has received a Grant-in-Aid from Government of Rupees 100 per mensem, provided the subscriptions reach that amount.

As many old subscribers have left Madras, and as it is most desirable to secure the Government Grant, and, if possible, to enlarge the operations of this Institution, the Committee think it right to put forth this statement, in the hope that new subscribers will kindly come forward. The Committee invite those who may be disposed to aid this Institution to visit it between the hours of 5 and 7 p.m., and to judge by personal inspection whether it be worthy of support.

### "INDUSTRIAL HOME" FOR GIRLS.

ST. THOME, MADRAS.

The girls in the "Industrial School" receive an elementary education in reading, writing, and arithmetic, are taught domestic duties, and all kinds of useful needlework, so that after leaving us, they may be able, as neat good workers, to maintain themselves in comparative comfort. The number now in the Institution is 19.

The undersigned trusts that this project may meet with the approbation of the public, and that they will kindly give the Institution that practical and pecuniary support of which it stands so much in need. All subscribers are invited to visit it between the hours of 5 and 7 p.m., and to judge by personal inspection whether it be worthy of support.

A. FIRTH.

### "HOME" FOR DESTITUTE INFANT CHILDREN.

The following brief account of the Infants' Home will show its present position and requirements:—

The Home was started in January 1882, under the auspices of the Lord Bishop of Madras, in the old premises of the Girls' Industrial School. Commencing with 12, the number of inmates increased to 20 European and Eurasian children. All interested in this charity are invited to visit it between the hours of 5 and 7 p.m., and judge for themselves of its worthiness of support; and the undersigned trusts that this statement will be sufficient to ensure the enlarged and liberal support needed to carry it on.

A. FIRTH.

### MADRAS INDUSTRIAL SCHOOL.

POPHAM'S BROADWAY, BLACK TOWN.

GENERAL COMMITTEE.

*President.*—The Right Rev. the Lord Bishop of Madras. *Vice-President.*—The Ven'ble the Archdeacon of Madras. *Honorary Secretary and Treasurer.*—Rev. W. Muspratt, M.A., Chaplain of St. Mark's Church.

*Members.*—The Ven'ble the Archdeacon of Madras, the Chaplain of Fort St. George, the Chaplain of North Black Town, the Chaplain of South Black Town, Captain H. C. Taylor, Mr. J. H. Waples, Rev. C. N. Bazely, J. Hamilton, Esq., and J. G. Baskett, Esq. *Superintendent.*—Mr. J. Balfour. *Schoolmistress.*—Mrs. E. Balfour. *Drawing Master.*—Mr. Hunter.

Carpentry and moulding are taught.

The condition of the poorer classes of Europeans and East Indians residing in Black Town and the neighbouring suburbs is admitted to be most deplorable. This distress is occasioned by their inability to earn a livelihood. Those who are most seriously affected are the old and the infirm who are physically unable to labour, and the young who have not the necessary skill to compete with others in the labour market. The former fall more legitimately for relief on the Friend-in-Need Society. The young require help of a special nature—to be taught how to earn an honest livelihood. The education given in the several Charitable Institutions of this city fits them only for Writers and Accountants—a section of the labour market which is already supplied to overflowing. Other portions, therefore, of the labour market must be tried. To meet this great difficulty, this Industrial School has been established for the poorer classes of Europeans and East Indians in the Presidency of Madras.

Contributions in aid of the Industrial School will be most thankfully received by the Honorary Secretary, Rev. W. Muspratt, M.A., and will be duly acknowledged.

### RAJAHGOPAUL CASTE GIRLS' SCHOOLS.

The following Schools of the United Free Church Mission—Chetty Girls' School, established 1870; Rayapuram Hindu Girls' School, 1877; and Mint Girls' School, 1880—were founded by the late Rev. P. Rajahgopaul for the purpose of giving an elementary education on Christian principles to Hindu girls. More than 600 children are on the rolls and the Staff consists of 4 male and 23 female teachers. The annual cost of the Schools exceeds Rs. 7,000, which is met from the proceeds of the Founder's Endowment, Government Grant, fees, and subscriptions from friends in Scotland.

The Chetty School is conducted in its own building in Thumboo Chetty Street, the Mint Girls' School in its new premises in Kondal Aiyar Street, and the Rayapuram School in a rented building in Mannarswamy Covel Street, Rayapuram.

These Schools are under the management of the Secretary of the United Free Church Mission, Madras.

The existence of this Society is owing in great part to the exertions of the late Dr. Wight, formerly a Surgeon in the Madras Army, whose valuable contributions to Botanical Science have gained for him a widely-spread and well-earned celebrity.

The ornamental gardens are situated opposite to the chief entrance to the Cathedral, and a piece of ground on the east of the Cathedral contains experimental plots and nurseries.

The gardens occupy a space of about 22 acres, part of which was originally granted by the Local Government. Part is laid out as a landscape garden and much increased of late in space, with the additions of a number of new and rare plants, especially tropical palms and Australian trees; the whole forming a splendid collection, gathered from various parts of the world, which is constantly being increased by exchanges and purchases. It is open at all times to the public, and forms a healthful place of recreation for the inhabitants of Madras.

A nursery for seedlings and cuttings of useful and ornamental trees is maintained to meet the requirements of the Members, who are supplied from it *gratis*. European vegetable and flower seeds are also similarly distributed; but all these advantages are open to the general public on payment.

Many of the plants are labelled with their botanical names, and information regarding them can be obtained on enquiry at the Office.

There is also a Botanical Library attached, to which access can be had by Members or persons known or introduced to the Honorary Secretary.

The general affairs of the Society are managed by an Honorary Secretary, assisted by a Committee who meet monthly and compile annually, in the month of March, a Report of the year's Proceedings, which is submitted to a General Meeting of the Members. The Proceedings of each Meeting of the Committee are also published and distributed to Members, Corresponding Societies, and others.

Persons of all nations are eligible as Members of the Society and may have a voice in the annual election of the Committee and Office-bearers.

Up-country Members are entitled to all the advantages of the Members residing in Madras, which it is possible to place at their disposal.

An Annual Show is held on the last Saturday of February, when a large number of prizes are awarded for flowers, fruits, vegetables, and other articles of importance in connection with botanical science, economic plants, food-grains, fibres, dyes, &c.

The objects of the Society are the relief of the deserving poor and the suppression of mendicancy amongst the European and Eurasian Christians of every denomination. The means employed for the attainment of these objects are:—(1) The provision of an Asylum, called the Friend-in-Need Society's Home, for the aged, infirm and destitute, in which they are lodged, clothed, and supplied with the necessaries for health and comfort; (2) the allotment of pensions to aged and infirm persons in whose cases exceptional circumstances exist rendering them fitter subjects for out-door than for indoor relief; (3) the maintenance of Workshops for women; (4) the establishment of a

Labour-yard to which members of the Society can refer all male beggars whose profession of willingness to work they desire to test; (5) the investigation of all cases referred to the Society for relief and the grant of such assistance as may be considered necessary; (6) the detection and exposure of imposture; and (7) the doing of whatever else is necessary for the attainment of the above objects.

To ensure proper relief in all cases, and the detection and exposure of imposture, Madras is divided into six districts managed by Local Committees who carefully investigate all applications.

This is the oldest Charitable Institution in Madras, and by supporting it, the public obviate the necessity for a Poor Rate, which would prove a far heavier tax.

All subscribers are *ipso facto* Members of the Society; as such they are requested to exercise their right of referring to the Society all applicants for relief; and in the case of beggars, to make use of the Society's mendicancy tickets.

A Finance Sub-Committee has been appointed who meet regularly once a month to scrutinize the expenditure and receipts and to report generally to the Committee on any special subject.

A School for the children of the Inmates has been started under a duly qualified Mistress and receives assistance under the Grant-in-Aid Code.

The General Committee meet once a month at "The Home" when the business of the current month is carefully gone into; the Gentlemen on "The Home" Committee visit "The Home" each week by rotation and report the result in a book kept specially for the purpose and scrutinized at Committee.

Every half-year the Pay Masters of Local Committees send in a return of the out-door pensioners as a check to prevent imposition.

The Government have promised an Annual Grant of Rs. 15,000, provided the public will, by subscribing Rs. 30,000 per annum, place the Society in a position effectually to carry out the objects for which it was founded.

Subscriptions and donations may be paid to the Bankers, Messrs. Arbuthnot & Co., to the Honorary Secretary, or the Honorary Treasurer.

And all Presidents of Branches of the C. E. T. S. in Madras as *Ex-officio* Members.

John H. Waples, Esq., *Honorary Secretary and Treasurer*.

In view of the increased need for the advocacy and extension of Temperance principles, it was determined at a meeting of the representatives of the various Societies working on the lines of the C. E. T. S. in Madras in 1893, to form, with the approval and sanction of the Madras Conference, a Diocesan Branch of the C. E. T. S. It is intended that this Diocesan Branch should include all existing Local Branches of the C. E. T. S. It has been thought that increased energy would be imparted to the cause, and a more general interest awakened, by the formation of a strong Central Executive Committee.

The main objects of this Society are:—

- (1) The formation of Local Branches in all places where the Church of England is represented by Chaplains, Missionaries, Native Pastors, or other members, and to unite all these local Societies into one body. Branches include three divisions,—
  - (a) Total Abstinents.
  - (b) Non-Abstinents.
  - (c) Juvenile Section.

It is well to bear in mind the importance of the Juvenile Section; since it not only rears up a large body of Total Abstinents, but also creates great interest in Temperance work amongst the parents. This Section is very easily worked, and may be made very popular with the children.

- (2) That one of the Joint Secretaries, or some other Member of Committee, should visit places in the Diocese for organizing purposes, whenever invited by a Chaplain or other Minister of the Church of England to do so.
- (3) To collect and supply Temperance literature, and to afford such information regarding the movement as may be required by the Branches.

The advantages of such co-operation for religious, social and political ends, are so obvious that they need not here be urged in detail.

The annual subscription to the Diocesan Branch has been fixed by the Executive Committee at Rs. 5 for a Local European Branch, and at Rs. 2 for a Local Native Branch.

The Society commends itself to the support and co-operation of the community on the following catholic grounds:—

I. Its SPECIAL OBJECTS:—The prevention of cruel and improper treatment of animals and the amelioration of their condition generally throughout the Madras Presidency. The means to this end are:—

1. The agency of paid officers, whose duty it is, in the City, to watch, warn, and threaten, or prosecute, as needful, all persons found guilty of inhumanity to animals.
2. Inviting information and suggestions from all who are interested in the cause of civilization, throughout this Presidency, respecting any barbarous practices, whether arising from cruelty or ignorance, over which this Society may be thought able to exercise any influence, towards the improvement in the treatment and condition of labouring and domestic animals.
3. Seeking the aid of the pulpit, the press, and all public instructors in advocating the principles and objects of this Society, having in view the promotion or humanity towards the animal creation.
4. Offering medals for the best essays on the "Duty of kindness to animals" to the public schools in the Presidency, and thus organising prize competitions with a view to instruct and educate the school-going population in their duty towards animals.
5. Holding Animal Show on a large scale and offering prizes to the best-conditioned horses, ponies, donkeys, bulls, dogs, &c., thus inducing kind treatment among a class of people who have to earn their living by the use of their animals.

II. Its important share and influence as an agent in the education of the people,—the cultivation of those merciful impulses which tend to the growth of humanity, and prevention of cruelty.

Towards these ends the moral support and co-operation of the community are not less sought than its pecuniary aid to meet the varied expenses incidental to the Society's operations, the extent and utility of which, in a field so wide, can be furthered only by the means at its command.

III. The Society maintains an Infirmary in its new buildings at the Vepery High Road for the treatment of sick, diseased or disabled animals sent to it by the Magistracy in cases prosecuted under the Acts relating to cruelty.

Communications and contributions will be thankfully received by the Honorary Secretary on behalf of the Committee.

## SOCIETY FOR THE PROTECTION OF ANIMALS FROM VIVISECTION AND CRUEL TREATMENT, MADRAS.

46, NARAYANA MUDALI STREET, MADRAS.

**President.**—Mr. M. Kuppuswami Chetti, M.A.

**Honorary Secretary.**—Mr. V. Ranganatham Nayudu.

The Society for the Protection of Animals from Vivisection and Cruel Treatment, Madras, was established on the 27th March 1895, to save dumb animals from the most horrible cruelties and the most exquisite tortures of vivisection. Vivisection is a branch of the work inseparably connected with the proposed Pasteur Institute for India, and as the arguments on which it is to be justified are baseless and against the ethics of all religions and opposed to all principles of morality, humanity and the prevailing laws of the country, it loudly demands our stern protest in the interests of humanity and justice. The hellish practice of vivisection: being quite against religion, humanity, morality, and illegal, is thoroughly condemned by many eminent men of science, religion and compassionate hearts, including Lord Llangattock, Cardinal Gibbons, the Duchess of Somerset, the Duke of Beaufort, the Marchioness of Queensbury, the Marquis of Hertford, of Bute, of Worcester, the Earl of and Countess of Chester, Viscount of Clifden Sidmouth, Lady Windsor and Abinger, the Lady Edith Ashley, Lord Bishop of Manchester, of the Bishop of Zanzibar, Bishop Barry, Bishop of Cramer Roberts, Lord Shaftesbury, the Hon'ble Stephen Coleridge, Lord Tennyson, Robert Browning, Cannon Liddon, Professor Ruskin, Professor Freeman, Cardinal Manning, Mr. R. ## GOVERNMENT MUSEUM.

Established on the 14th August 1851, by the Madras Government.

EDGAR THURSTON, Esq., Superintendent.

There is a Museum illustrating the Natural History, Arts, Industries, Ethnography, Antiquities, etc., of Southern India. The Natural History Section is the most extensive and embraces a number of Mammals, and extensive collections of Birds, Reptiles, Fish, Shells, Insects, Crustacea, etc. There is also an extensive Herbarium and very large collections of Mineralogical and Geological specimens. The Museum is intended chiefly to illustrate the natural history, natural resources and manufactures of Southern India, and the manners, customs, and antiquities of its inhabitants. There is also a very interesting collection of gold, silver and copper coins, which can be seen by personal application to the Superintendent. In the Archaeological department is an extensive and interesting collection of sculptures from the Buddhist tope at Amaravati. The marbles were much defaced, but a portion of the out rail has been restored, and also sections of the great Dagoba set up, so that visitors will be able to form some idea of the grandeur and beauty of the vast structure before its destruction. The carvings are quite different from those seen on Hindu temples or other buildings, and are more allied to specimens of ancient Greek art than anything Dravidian. Galleries, devoted mainly to antiquities and containing collections of arms from the Tanjore Armoury and Madras Arsenal have also been added, as well as an Art gallery, in which are displayed the artistic manufactures of various localities and a collection of native jewellery. In the Museum grounds is the Connemara Public Library, to which large numbers of new books are annually added, and in the Reading Room of which those over seventeen years of age may consult books daily from 7 A.M. to 5-30 P.M. from October 1st to March 31st, and from 7 A.M. to 6 P.M. from April 1st to September 30th.

The Museum is open free to the public daily, Fridays excepted, from 7 A.M. to 5 P.M.

N.B.—On the first Saturday of every month, after 12 noon, male visitors are excluded, to enable Native ladies to visit the Museum.

## THE MOORE MARKET.

The ceremony of laying the foundation stone of the new market was performed on 29th April 1898, in the People's Park, by Col. Sir George Moore, President, Madras Municipal Commission, in the presence of a large and distinguished audience. Colonel Sir George Moore, in course of a speech giving some particulars of the evolution which brought about the construction of the above market said, *inter alia*, that in the year 1788 the building in Black Town, known as the General Market, was erected by a Mr. Popham out of a loan raised among the leading European residents of Madras for the purpose of a market. This market scheme proved a failure, and in 1794 the buildings were purchased by Government for the accommodation of native troops stationed in the Presidency City. Subsequently the buildings appear again to have been used as a market, for up to March 1857, the stalls in the market were occupied free of charge. On that date a recommendation was made to Government to have them put up to public competition, the rents to be collected by the Collector of Madras. This arrangement obtained till 1864, when the attention of the Government of India was drawn to an assignment of Rs. 1,000 made by the local Government for repairs to the market which they remarked seemed to be of a nature properly debitable to Local Funds. This resulted in the market being handed over to the Municipal Commissioners from 1st May 1865. From the date of this transfer began the era of its condemnation. The President of the Sanitary Commission, Madras, in August 1865, specially brought to the notice of His Excellency the Governor in Council that it was, in a sanitary point of view, highly desirable that an early and entire transfer of the market should take place from Black Town. Several proposals were made, and in January 1867 the then President brought the subject prominently to notice. Matters dragged along, and in January 1870 the Improvement Committee waited on the then Commander-in-Chief and obtained his sanction to erect a market on the Esplanade known as Pachalappas. In the same month Government sanctioned the grant to the Municipality of the 4 acres of the ground alluded to. Designs with specifications were then called for by advertisement, and two prizes were awarded for the two best designs. In 1873 the then President resuscitated the subject which appears to have been dropped until 1878 when Government was applied to for a loan of Rs. 1,50,000. In 1879 the idea of building a new central market was abandoned. In 1886 the subject was again mooted. In 1887 it was proposed to erect a public market. Committee after Committee sat until in 1895 and after mature consideration this site was selected as being the most central one for all parts of Madras in close contiguity to both lines of Railway. The market has a frontage of 350 ft. facing south and a depth of 242 ft. There are 260 stalls, and 10 gates

lead into the verandah which runs all round the building, which is lighted throughout at nights by brilliant electric arc lamps. The foundation stone bears the following inscription:—

Madras Municipality  
The Moore Market.  
This foundation stone was set by  
Lt.-Col. Sir George Moore, Kt., C.I.E.,  
President, Madras Municipality,  
on Friday, 29th April, 1898.

### PEOPLE'S PARK.

INSTITUTED IN 1859.

Custodians.—MUNICIPAL COMMISSIONERS FOR THE CITY OF MADRAS.

Mr. C. J. HAY-ELLIS, Superintendent.

We owe the People's Park to Sir Charles Trevelyan. It is not at all improbable that the idea of some such place suggested itself to many a man in power before his day. It would be singular indeed if Europeans should, for a hundred years, have seen a large native town growing up on the site of a small village—a vast population massing together with lungs to be fed with fresh air and limbs to be allured to exercise and health—without sometimes thinking it possible that the “village greens,” “commons,” and “parks” of his native land might perhaps be reproduced with advantage within reach of Black Town. The monotony of Indian life, and the lack of sympathy between the classes of Indian society, may be regarded as the causes why such an idea, if suggested, was never carried into execution. While the “upper ten thousand” could have their drive along the Beach and round the Island, it mattered little to them that the “masses” (unfriendly phrase) who could not drive, or were to be stimulated to recreation, had no place convenient for health, exercise and amusement.

But then Sir Charles Trevelyan was a man not given to routine; and somewhat wide in his sympathy. So the idea of the people's want suggesting itself to him, and he having the power as well as the will—the people got their Park. Thousands who know nothing of the step that cost him a Governorship, will hold his name in memory by the People's Park.

But when Sir Charles was re-called, the scheme was in a most elementary state. The plan was on paper; but never adopted. Little else was done, and little else would have been done if the inheritors of Sir Charles Trevelyan's dignity had not also inherited his sympathy with the people. We owe it to the various gentlemen who have been entrusted with the execution of the scheme, that the “plan” was not thrown into the official waste paper basket and the idea recorded as one of Sir Charles' amiable follies. It is in unison with Sir William Denison's career, previous to his arrival in this country, that he should have shown a hearty approval of an undertaking so intimately connected with the health and pleasure of the middle class population.

There can be no doubt that the Park has been a success. Any one may convince himself of that by a visit morning or evening. The place has already fixed its character as a popular resort, and is pleasing to see that the native population appreciate the pleasure provided for them, and when the sternness of social life amongst them is relaxed, we may expect to see not only the Ramasawnies, but the Lutchmies of Black Town taking their ease in the fretted shade of well-grown trees.

There are two Lawn Tennis Courts on the south-east of the Band-stand for the public use; out of the two, one is used by the members of the Madras Volunteer Guards' Club.

A portion of the Park lying north of the Poonamallee Road has been taken up for the erection of the Victoria Public Hall, and the Moore Market, which are now completed.

The Zoological collection in the Park consists of the following specimens:—

|                            |                                    |                  |
|----------------------------|------------------------------------|------------------|
| 1 Lioness.                 | A number of Parrots and birds      | 7 Pea-hens.      |

The Aviary contains a great variety of ornithological specimens, too numerous to detail here.

The area of the Park is 88 cawnies, or 116 English acres.

### THE NAPIER PARK.

CHINTADREPETTA.

Mr. C. J. Hay-Ellis, Superintendent.

Madras owes so much to the administration of Lord Napier that it is very fitting that some permanent and palpable token of the public approbation of his labours should remain in our midst, at once to stimulate succeeding Governors to walk in Lord Napier's steps, and to remind generations to come of how much the sick, the suffering and the poor must always owe to one who has initiated so great improvements in all our public charities that their effect must long continue—blessing those who are too weak or poor to help themselves. The Napier Park is such a memorial. Its very position is most fitting. Standing midway between Government House and one of the most squalid quarters of Madras, its beneficent influence will rest upon both. Its site had been for scores of years a pestiferous swamp, covered for months in each year by salt and stagnant water, the overflow of the filthy Cooum. Within was a wretched parcherry, notorious for its liability to epidemic disease, that spread from thence throughout the city. To partially remedy the evil, the Municipality made it a depot for street sweepings, so that in time its level might be raised sufficiently to ensure its being free from water. This while amending one evil created another—placing on the borders of a dense population masses of putrescent matter that could not but be very injurious to both the water and air of the locality. This grew to be such an evil that the Sanitary Commissioner at last put a stop to the discharge of sweepings on the land. It was, however, impossible to build on such a spot and the whole remained a useless “dismal swamp.”

At present all is changed. The level has been raised by material dug from ornamental tanks. Trees of useful and beautiful kinds have been planted, and are rapidly growing to their full height. Parks are things of slow growth, and it must be years before this can be worthy of the name it bears—a boon that cannot but greatly influence for good the whole population of Chintadrepettah and Nursingapuram.

The Park contains an area of about 18 cawnies. A great part of this was formerly the property of Government, but was generously given to the town on condition that the Municipality purchased the rest from the native owners. For this purpose the Municipality has expended several thousands of rupees, and the total cost, previous to the public opening, will not be less than twenty thousand rupees. A new road divides the northern side from Chintadrepettah. The design and laying-out the park are the work of Mr. Standish Lee, the Municipal Engineer, who deserves great credit not only for this but also for the economical but yet effectual manner in which the whole work has been performed.

As a last gift, Lord Napier has provided the whole of the funds required for erecting on the west side of the Park a handsome building for a girls' school in the Indian fashion. The cost will not be less than 6,000 rupees. It is intended to be a purely national girls' school and to lead on through carefully gained experience to some mode of teaching which will embody the best Western systems while not departing from Hindu customs any more than may be necessary. It is greatly to be hoped the scheme will prove a benefit to the public while the school shall ornament the Park. This school has been opened and well attended.

### ROBINSON PARK.

#### RAYAPURAM.

The management of the Robinson Park was taken up by the Madras Municipality from 1st April 1899.

2. It has a Botanical Garden, divided into plots for the various Orders of plants, each being represented by many specimens. It is nearly circular in form, the centre being occupied by a Fountain presented to the Park by the late Pitty Moonnoosawmi Chetty in commemoration of his daughter's marriage. This Garden contains a Sago palm planted by Mrs. Grant Duff.

3. There is an island at the N.-E. of the Park, where a large Fernery has been constructed at a cost of Rs. 1,500, presented to the Park by the late M.R.Ry. A. Armoogam Mudaliar. The Fernery is reached from the road by an iron bridge, having a span of 50 feet, which is neatly boarded and railed with teakwood. It was opened to the public by Lady Grant Duff in the month of February 1886, and honored by a visit from Lady Dufferin.

4. The Park is maintained by the sale of grass irrigated with sewage. Hay is also supplied at the rate of Rs. 60 per ton. It has a Band-stand, where a Band plays every Wednesday from 6 to 7 P.M.

5. The Hon'ble C. Pelly having recorded his vote in favour of amendment No. 2, at the Meeting, this amendment is declared carried, and the Rule No. X is ordered to stand as amended by it.

6. From list No. 3 it is stated, that Rs. 603, annas 15, have been paid in to the Funds of the Hall in answer to the appeal; and it is hoped that this sum, together with the sums collected at the Hall on the occasions of the Convocations for Prayer, held in it during the past week, will all but place the building out of debt. The Committee yet need Funds to furnish the Hall with seats, enclose the building with a railing, and inscribe the 12th verse of Psalm cxv. on the front of it.

7. The suggestions made by some of the subscribers, in regard to modifications and verbal corrections of the Rules were then taken into consideration *seriatim*, and discussed, and it was resolved, that the words "or Trustees" in Rules Nos. IV., VI., and VII. be omitted; that the words "and in the Trust Deed," be added, at the close of Rule No. VII., after the words "in these Rules;" that in the 4th line of Rule No. IX., the words "Society or" be inserted after "by the same," and before "party;" that the word "Religious" be inserted before "Educational" in the second line of Rule No. X.; that the words "and that 5 Members shall form a quorum" be added to Rule No. XIII.; and that the following be added to the Rules as Rule No. XIV., "That these Rules shall be regarded as *Fundamental*, and that therefore it shall not be competent, at any time, to the Committee of Management, or to the Trustee, or to any other person, to introduce any alteration or addition into them, inconsistent with their spirit, principles, or scope."

## THE VICTORIA PUBLIC HALL, MADRAS.

Narayanaswami Chetty, Esq., Mahomed Sudfer Hussain Sahib, Esq., J. H. M. Ryan, Esq., M. K. Lutchoomana Chariar, Esq., A. E. Rencontre, Esq., S. Loane, Esq., and S. D. Pears, Esq. *Chairman.*—N. The idea of erecting a Town Hall, Madras, originated with the Hon'ble Mr. A. T. Arundel, late President of the Madras Municipality, at whose instance a meeting of the leading members of the Madras community was held in the Chamber of Commerce, on the 27th January 1882, at which it was resolved "that a movement be set on foot to erect a Town Hall in Madras with suitable offices attached, and that a public meeting be convened to support the movement at an early date." In accordance with this resolution, a numerous signed requisition was addressed to the then Sheriff of Madras, Mr. B. Lavery, for convening a public meeting of the inhabitants of Madras to discuss the project of the erection of a Town Hall. In compliance with this requisition a meeting, composed of all sections of the Madras community, was held in Pachaiyappa's Hall on the 17th March 1882, with the Hon'ble D. F. Carmichael in the Chair, at which meeting it was announced that the subscriptions that had already been promised amounted to Rs. 50,000, and a resolution moved by Sir Charles Turner and seconded by the Hon'ble P. Macfadyen was unanimously adopted, "that it was desirable that a Town Hall should be erected in Madras to be vested in Trustees for the use and benefit of the public."

The foundation stone was laid by H. H. late Maharaja Mirza Ananda Gajapati Raj Munney Sultan, of Vizianagram, on the 8th December 1883, and the building was completed in 1887, Mr. Chisholm being the Architect.

The total cost of the building is Rs. 1,79,000, of which Rs. 79,000 were realized by subscriptions from the public, including the princely donation of Rs. 10,000 from H. H. late Maharajah Mirza Ananda Gajapati Raj Munney Sultan, of Vizianagram, and the sum of one lac of rupees was obtained as a loan from His Highness on the mortgage of the building.

The Hall may be granted by the Trustees for the following purposes: public or private meetings, exhibitions, lectures, concerts, dinners, balls, theatrical or musical performances, nautches, or other entertainments and for any other purposes conducing to the moral, social and intellectual welfare or rational recreation of the public of Madras, without reference to caste, creed or nationality, subject to such conditions and rules as the Trustees for the time being shall direct or sanction.

Owing to the scant support from the Madras public the financial condition of the Hall is very unsatisfactory, the Trustees not being able even to pay the interest on the money borrowed from H. H. the late Maharajah Mirza Ananda Gajapati Raj Munney Sultan, of Vizianagram.

Since the beginning of 1892 the Hall has been frequently engaged for public performances and private entertainments, a proof that its usefulness has begun to be appreciated by the public of Madras, and the charges are considered moderate.

## PRAYER AND READING HALL, NEW TOWN.

(Foundation laid 22nd October 1866 and opened 12th October 1867.)

## COMMITTEE.

Mr. Fred. Lewin (*President and Treasurer*), Mr. G. Kent, Dr. Robertson and Mr. E. S. Dunhill, B.A.

The above Hall was built by voluntary contributions, and for a four-fold object, namely, 1st, for Weekly Prayer Meetings; 2nd, for Lectures; 3rd, as a Reading Room; and 4th, for Tamil-preaching on the Sabbath and week days.

A Ragged Sunday School, consisting of 150 children, is held in this Hall every Sunday, at 11 A.M., where they are taught the vital truths of the Gospel, and a plain meal of curry and rice is given before dismissing them.

*Weekly Prayer Meetings.*—A Weekly Prayer Meeting is held every Saturday evening, at 6-30, when Ministers and Laymen of the various Evangelical Churches take part in the Services.

*Sunday Services for the Adult Poor.*—These Services were established for the benefit of the very poor of the district, who, from poverty and ignorance, are backward to attend a respectable place of worship. These Services are conducted by some of the brethren in rotation.

The Service in the morning begins at 9 A.M. and in the evening at 5-30 P.M. The attendance at the morning Service has, as a rule, been large. The brethren who conduct these Services are conscious that the good seed sown does not always bear fruit at once and they are therefore prepared to toil on in faith and wait in hope. The Committee rejoice to know that in this place "to the poor the Gospel is preached."

*Industrial School.*—The Committee were obliged to close this department of their work for want of funds, but they hope to resuscitate it as soon as the financial condition is improved.

The work of this Institution is entirely undenominational, and the Committee consists of representatives of the different Protestant Churches.

Monthly subscriptions towards the Ragged Sunday School are earnestly solicited.

The smallest sum will be thankfully acknowledged.

Cast-off clothing, or a piece of check, or other cloth, will be very thankfully received and acknowledged by Mr. Fred. Lewin, President and Treasurer.

## THE N. KRISHNASAWMI MUDALIAR LIBRARY AND FREE READING ROOM.

ESTABLISHED IN THE YEAR OF THE DIAMOND JUBILEE OF HER LATE MOST GRACIOUS MAJESTY, QUEEN VICTORIA, EMPRESS OF INDIA.

*Central Premises.*—"Krishna Mandiram," No. 27, Subramania Mudali Street, Black Town.

*Branch Premises.*—Tondaimandalam T. V. High School, Mint Street, Black Town.

*Hours open.*—6 to 8-30 A.M. at the central premises (FREE) and 6 to 8 P.M. at the Branch premises.

*Object.*—Mental and moral improvement of its members and the formation of a healthy public opinion on this side of the metropolis.

In October 1897, a few friends and relatives of the late lamented Negapatam Krishna-swami Mudaliar, B.A., Uncovenanted Assistant, Board of Revenue, Department of Revenue Settlement, Land Records and Agriculture (1893), desirous of manifesting their regard for him and of perpetuating his memory, opened a Reading Room in his premises, No. 27, Subramania Mudali Street, Central Black Town, and associated his name with it. The use of this Reading Room was for a time confined to a small circle of friends, but as the want of a Reading Room in the central part of the City is greatly felt, it has been found necessary to extend the scope of its usefulness, and accordingly a branch Reading Room was established in the year 1900, at Tondaimandalam Taluva Velalar's High School (which is centrally situated and with which the deceased gentleman was connected as Honorary

Secretary for a pretty long time) and is open to the public in the evenings on a small monthly subscription of 4 annas. All the local dailies, a few weeklies and journals are placed on the table for the members' perusal.

Lately a small circulating library was formed for members, and for the present it consists of light literature and journals only.

The Reading Room will be open from 6 to 8-30 A. M. at the central premises and has been made free to the public in HONOR OF THE CORONATION OF H.M. KING EDWARD VII.

The Reading Room has no endowment and is maintained by subscriptions received from members.

It is hoped that with the sympathetic help of the public, the circulating library will become popular and highly useful.

Further particulars may be obtained from Mr. T. Santhalinga Mudaliar, B.A., C. Sundararamanujam Nayudu, B.A., and C. Tadulinga Mudaliar, *Honorary Secretaries*.

Further information in a Symposium entitled “Godward Ho!” Specially issued for the Ananda Mission, by Satyananda S. Sarma c/o The Secretary, D. K. Agency.

Dr. Culbert Hall, the Barrows Lecturer for 1902-03 writes “Will you kindly express to Mr. S. — my appreciation of the spirit in which he writes and my conviction that he is rendering a real service to the complex religious life of India by steadily endeavouring to rise above disputes upon secondary matters, and to dwell upon those elements of the absolute truth which are of permanent validity and of universal application. It is with great joy that I find many in India who thus are reaching out toward an absolute truth which may afford a religious basis for men of diverse training.”

“It shows unmistakable evidence in its pages of an earnest desire to demonstrate that the ultimate ideal of all true religions is the unification of mankind.”

## MEMBERS AND SUBSCRIPTIONS.

The Samajam is not only under the kind support of a good number of Subscribers from among the Natives of India, Burmah and Ceylon, but also patronised by some benevolent Anglo-Indians and Eurasians who take a lively interest in the Samajam's work. Membership is open to persons of all classes, irrespective of caste, creed or sex; and the following are the three classes of Members:—

- (a) A *Life Member* is one who pays Rupees one hundred or upwards in a single instalment; any further contribution, monthly or otherwise, being optional.
- (b) A *Special Member* is one paying a monthly subscription of not less than one rupee.
- (c) An *Ordinary Member* is one who pays a monthly subscription of less than a rupee.

Application Forms for Admission can be obtained gratis on application to the Honorary Secretary. Subscriptions in Town may be paid to the Bill-Collectors of the Samajam, who will present the bills regularly every month while those from the mofussil may be remitted in advance annually or otherwise.

## FEEDING AND CLOTHING.

*Regular Feeding.*—The Samajam feeds out of its subscriptions about one hundred poor every day, besides special feeding of nearly 2,000 persons per mensem by special contributions. A regular monthly treat may be given to 100 poor by a monthly subscription of Rs. 10 or an annual contribution of Rs. 120; and all higher subscriptions of not less than Rs. 240 per mensem are wholly utilised for such regular treats.

*Special Feeding.*—The Samajam also undertakes *Special Feedings* in honour of marriages and other ceremonial occasions (auspicious or otherwise); and the cost of feeding 100 poor is Rs. 10 for ordinary meals [boiled-rice, colour bu, (sauce), kuttu (vegetable curry) and pepper-water] or Rs. 14 for sumptuous meals [dholl, gh-oo, butter-milk, vada; (black-gram cake) and payasum (milk gruel) etc.]

Those desirous of giving special treats are requested to communicate the same to the Secretary one or two days previous to the (appointed) date of feeding, with remittance of the cost for the same.

**Permanent Feeding.**—The Institution, moreover, makes arrangements for Permanent Feedings on the Anniversary occasions of Births and Deaths, or on account of other circumstances, out of interest accrued on special endowments made by any person or any body of persons for feeding the poor annually or otherwise in his (or her) name, or in the name of the body, or of any one in whom such person or body of persons may be interested. An annual treat may be given to 100 poor by a permanent investment of Rs. 200 at 5 per cent. per annum.

**Ordinary Clothing.**—The Samajam further undertakes to clothe the poor on special occasions; and Rs. 60 is the minimum cost of clothing 100 persons consisting of nearly 60 men, 30 women and 10 children. Any ordinary unbleached long-cloth of a moderate texture is generally recommended for clothing the destitute poor, the length of the cloths being from 5 to 6 cubits for each adult male, 10 to 12 cubits for each female and 3 to 4 cubits for each boy.

#### SYSTEM OF FEEDING.

The unfortunate poor, especially the old and the blind, come in large crowds and gather near the Samajam's premises daily between 6 and 7 A.M., all of whom being generally seated in long rows according to caste distinctions. At about 7-30 A.M., the Clerk of the Samajam, with the usual help of a Director and after a careful enquiry, distributes without any distinction of caste or creed, the tickets (made for the purpose) among the deserving poor to the required number. At about 11 o'clock, the poor are admitted inside on production of the tickets and are always seated in large rows according to caste distinctions. They are then supplied with a leaf each and a cup of water, and treated to a hearty meal, which generally consists of boiled-rice, columbia (prepared out of different kinds of vegetables), kuttu (vegetable curry with dholl) and pepper-water. These poor will be offering their congregational prayers to the All Merciful Father in their own language, while food is being distributed, and until the last leaf is served to each community; so that all of them with one stirring voice in the name of God would simultaneously commence to eat. They are also given the privilege of eating as much as they desire, but they are allowed neither to take anything outside nor to waste anything in the leaf. All the eaten leaves are at last examined by the Supervisor of the Samajam before the poor are ordered to get up from their seats, and they are collected by a person in each community and thrown in the dust-bin in the street. The want of help being more keenly felt at present among the lower than among the higher classes, the Samajam feeds only the Hindus (middle classes), Mahomedans and Panchamas. Special arrangements will, however, be made for feeding the higher classes, should any necessity arise for so doing.

#### EXECUTIVE COMMITTEE.

The affairs of the Samajam are managed by a representative Committee consisting of one President, one Vice-President, one Secretary, one Assistant Secretary, one Treasurer, three Trustees,\* and not less than 8 Directors—all of whom being elected annually by the General Body. The Executive Committee regularly meets every month to examine the monthly accounts and to dispose of papers, if any, on important matters; the proceedings of each meeting being recorded in a book kept for the purpose. The Committee also prepares, at the close of every year, a report of the work of the Samajam, during the year, together with an abstract of accounts duly audited, and publishes the same for general information after its adoption by the Samajam in a General Meeting. Besides, a grand Public Meeting is annually held for the celebration of the Samajam's anniversary.

#### ACCOUNTS AND AUDITOR.

The accounts of the Samajam are kept in as clear and systematic manner as possible. The Samajam maintains the following books:—(1) Cash account, showing a detailed account of the daily receipts and charges (only supported by proper vouchers in each case), (2) Bank account, (3) Stock account, (4) Postal account, (5) Bill Book, (6) Inventory, (7) Order Book of Special Feedings, (8) Personal account of subscriptions and other subsidiary books.

The accounts of each month are regularly sent by turns to one of the Directors for examination and report, before they are submitted to the Executive Committee at its monthly meetings. Besides this, an Auditor, who is a member of the Samajam, but not one of the Executive Committee, is annually appointed by the General Body to examine and report upon the accounts of the Samajam.

\* The property of the Samajam, movable and immovable, is acquired by and vested in three Trustees duly appointed by the General Body. The funds of the Samajam are at present invested partly with Messrs. Arbuthnot & Co., and partly with Messrs. Binny and Co., Madras, at 5 per cent. per annum.

## LODD GOVINDAS' BABIES' HOME, MADRAS.

This institution was founded by Mr. Govindas on the Gujarati New Year's day of the Vikrama Era, 1955, that is, 14th November 1898. The object of the Home is to render help to such poor babies who, for the most part, suffer from want of good nourishment. As milk forms the most essential nourishment for infants, it has been arranged to supply each baby with an allock of milk every morning. From 14th November 1898 to 31st October 1903 the total number of babies supplied with cow's milk was 52,492, which shows an average of 30 per diem. The "Home" is located in a spacious house in Lakmudas Street, Black Town, and can accommodate a large number of babies.

All interested in this Charity are invited to visit the institution between the hours of 8 and 9 A.M. All correspondence to be addressed to Mr. G. V. Anny, Hony. Secretary to Lodd Govindas Babies' Home, Sowcarpet, Madras.

## THE INDEPENDENT ORDER OF GOOD TEMPLARS.

This great Brotherhood was first started in New York in 1851, and thence it soon spread throughout the United States and Canada. In 1868 it was established in Great Britain, and in 1872 in India. Since then it has been introduced into all the British Colonies and Dependencies, and, in short, into every civilised country of the world.

The Order consists of a number of Lodges or Branches called Subordinate Lodges. They hold weekly meetings for the admission of new members, from each of whom a pledge of strict total abstinence from all intoxicating beverages, and belief in Almighty God, is required. There are 11,600 Subordinate Lodges, and 2,877 Juvenile Branches, with a total membership of 576,126.

A Grand Lodge is composed of delegates from the several Subordinate Lodges in one State, province or country, who meet annually to decide disputes and to make such laws as are suitable for the Order in the Grand Lodge jurisdiction.

There are 84 Grand Lodges, and these send members to represent them at a meeting held once in every two or three years, in some country previously chosen. This body is called the International Supreme Lodge, and has the sole control of the constitutions and rituals, their composition and alterations; and thus uniformity of general principles and working is secured to the Order in every part of the globe. The next session of the International Supreme Lodge will be held on the 1st Tuesday in August 1905, at Belfast, Ireland.

## THE GOOD TEMPLARS' PLATFORM IS:—

1. Total abstinence from all intoxicating liquors as a beverage.
2. No license in any form, under any circumstances, for the sale of liquor to be used as a beverage.
3. The absolute prohibition of the manufacture, importation and sale of intoxicating liquors for such purposes: prohibition by the will of the people, expressed in due form of law, with the penalties deserved for a crime of such enormity.
4. The creation of a healthy public opinion upon the subject by the active dissemination of the truth in all the modes known to enlightened philanthropy.
5. The election of good, honest men to administer the laws.
6. Persistence in efforts to save individuals and communities from so dreadful a scourge, against all forms of opposition and difficulties, until success is complete and universal.

The head of the whole Order is Mr. Joseph Malins, Birmingham, England, who is called Right Worthy Grand Templar, who visited Madras in January 1900; the R. W. G. Secretary is Colonel Parker, Milwaukee, Wis., U. S. A.; and the head of the Juvenile Branch is Miss Jessie Forsyth, Boston, Mass., U. S. A.

The Grand Lodge of Madras was instituted in 1884, by John Grant. The next meeting will be held at Madras, 4th August 1904. The principal Officers are: *Grand Chief Templar*.—Staff Sergt. A. S. Fairbairn, Gun Rock, Trimulgherry, Deccan. *Grand Counsellor*.—F. A. Derham, Esq., Myrtle Cottage, Cleveland Town, St. Johns Hill, Bangalore. *G. Supt., Juvenile Temples*.—Pte. S. W. ## PART XI.—MOFUSSIL DIRECTORY.

## BANGALORE.

Bangalore is a large town situated in 12° 57' N. Lat. and 77° 35' E. Long., and is 71 miles north of Seringapatam; it is 218½ miles by rail west of Madras. It covers an area of 13½ square miles, and is divided into two distinct parts, viz., the City or Pettah, which is the old Native Town of Bangalore Proper, and the Cantonment or Civil and Military Station. Bangalore is the seat of Government for the Mysore Province, and the Civil and Military Station is the head-quarters of the Bangalore Division of the Madras Army.

The name Bangalore is a corruption of *Bengaluru*, which is derived from *Bengalu*, a kind of bean (hence the proverbial "City of Beans"), and the following story has been related in connection with it: One day, when King Viru Ballala was hunting, he became separated from his attendants, and losing his way, wandered about till nightfall. At last, faint and weary, he came upon a solitary hut, in which was an old woman, to whom he applied for something to eat. She had nothing better to offer him than some Bengal, green beans boiled in a little water, which, however, he was glad to get, and sharing them with his horse, passed the night under shelter of the lowly hut. The incident speedily became known, and the village (*luru*) which sprung up, thence took the name of *Bengaluru*. The city stands in the centre of the Mysore table-land, about 3,000 feet above the sea, the general level being broken by a few slight elevations. The old Fort stands in the extreme south-west, north of which is the Pettah. The Cantonment stretches away towards the north-east, terminating in the new Native quarter of the Cantonment Bazaar, beyond which is the suburb of St. John's Hill or Cleveland Town, dotted with the cottages of a large number of pensioned European soldiers. The large open space between the two Native quarters contains the Race Course, the Cubbon Park and the Parade-ground. Here also are situated the chief Government offices, and the houses of well-to-do European residents. The station of the Madras Railway is the extreme north, and in an opposite direction beyond the Fort is the Lal Bagh, or Horticultural Gardens. The Mysore Railway Station is situated to the west of the Pettah and now forms the terminus of the Poona Railway also. The Fort is said to have been built originally in 1537 with mud walls by a local Chieftain. The present fortifications of stone were constructed by Hyder Ali in 1761. When the British assumed the direct administration of Mysore in 1837, the principal Departmental offices of Government found accommodation in the palace inside the Fort. In 1886 new offices were erected in the Cantonment; and the old palace was suffered to fall into decay, but a small portion was restored in 1896 by Mr. Girdlestone, during the time he officiated as the British Resident. The arsenal, which was in the Fort, was removed to Madras. The Pettah contains an area of about 2½ square miles, and trade is brisk in cotton and grain. The Cantonment or Civil and Military Station covers an area of about 12½ square miles. The Public offices are situated in the Cubbon Park. They were erected at a cost of £50,000. The Central Jail covers a large space to the west of Cubbon Park, and is built on the radiating principle, with workshops for many trades. The Central College, to the south-east of the Jail, contains a hall with a roof supported by light monolithic columns, 30 feet high, quarried in the neighbourhood. The Maharajah's palace is on the High Ground, in the extreme north. There are numerous Churches of the different Christian sects and many Hindu temples and Mahomedan mosques. Bangalore is the head-quarters of the Mysore Division of the Madras Army, and contains separate barracks for Artillery, Cavalry and Infantry, as well as Sepoy lines.

## MYSORE.

The capital of the Province and the residence of the Maharajah, is situated in 12° 18' N. lat., and 76° 42' E. long. at the north-western base of the Chamundi Hill. It contains three suburbs and embraces an area of about 9 square miles. The town is built in a valley formed by two ridges running north and south. There is also a slight ascent on the northern side, so that the town is almost in a basin. The houses of the European residents are situated to the east of the Town. The front portion of the Residency was built by Colonel Wilks at the beginning of the present century, and is after the Doric order of architecture. The back was added a few years later by Sir John Malcolm, and comprises one of the greatest halls in Southern India. A new suburb has sprung up to the west at the village of Kookerhulli. New public offices and several houses have been recently built, roads nicely laid out, and the whole place made bright and cheerful.

**Fauna.**—The wealth of the animal kingdom in the Mysore Province can be most conveniently illustrated by naming the animals to be met with in each of the districts of the country. In the Bangalore District there are the tiger, deer, cheetah or panther, wild hog, porcupine, bear, jackal, buffalo and wild cat. The larger game is mostly confined to the Magadi, Kankanahalli and Closepet taluks. Bandicoots are very numerous. Among birds are the jungle fowl, pea-fowl and spur-fowl, the bustard, florican, partridge, quail, and rock-pigeon, snipe, teal and wild ducks. Several species of fresh-water fish are obtained in the larger tanks. In the Kolar District, the chief wild animals are a few bears, met with in the Mickalnaikanpalya and Budikoti jungles; cheetahs and wild bear in the Nundydoo, Mudimadagu, Sannukal and Dokkal-konda hill ranges; hyenas, jackals, antelope, porcupines and hares in unfrequented parts; and the mongoose and smaller animals in the hedges around villages. The birds are similar to those of the Bangalore District, except a large kind of vulture, which is found on the top of Worlakonda, a large hill between Peresandra and Gudibunda. The town of Kolar and the villages adjacent to it are noted for turkeys, which are reared in large numbers for export to Bangalore, Bellary, and other places. In the Tumkur District the tiger, panther, bear and wild hog are to be met with in the reserved forest tracts around Devarayandroog; while deer and cheetahs are sometimes to be seen in the jungly parts of the Sira taluk. Birds of prey are said to be

numerous in this District. In the Chittaldroog District, the tiger, panther, bear, hyena and wild hog infest most of the hilly and wild tracts; and deer are to be found chiefly in Hiriyur, Chittaldroog and Pavagada. All kinds of wild fowl are very numerous in the secluded tanks in the south; and pelicans may be seen about Mattod. Good herds of oxen and sheep are found in the east, north and north-western parts of this District. The Mysore District lays claim to the possession of the chief elephant tracts, which are to be found in the jungles in the south, east and west; but their destruction is prohibited by the Government. This District is famous for its cattle, especially the breeds known as the *Amrat Mahal*, the *Halikar* and the *Madesvara betta* or *Madhugiri*, and good sheep can be obtained from the Nagamangala, Madur and Mandiya taluks. In the Hassan District, the forests of the Mulnad and the rocky hills, in the Hassan, Arkalgud and Harnahalli taluks give shelter to numerous wild beasts, among which tigers, cheetahs, bears, elk, spotted deer, jungle sheep and wild pigs are the most common; black cheetahs are occasionally shot in Manjarabad, and herds of elephants and bison visit the hilly tracts on the verge of the ghauts. In the Shimoga District bison and elephants are common in the Sagar taluk, while tigers, panthers and bears are found principally in the west, and in Shikarpur. Wild boar abounds in Chennagiri, Nyagar and other parts; sambar, chital and jungle sheep are general in the wooded tracts. Wild geese, ducks and teal frequent the tanks in Chennagiri and Shimoga, while pea-fowl and jungle fowl are to be had in the woods.

### THE RENDITION.

His Highness the late Krishna Raja Wodeyar, who was placed on the throne of Mysore in 1799, by Lord Harris, and Meer Allum, acting as representatives of the Allied Powers, the Honourable E. I. Company, and the Nizam of Hyderabad, died in March 1868, and in accordance with the decision of the British Government, was succeeded by his infant adopted son, father of the present Maharajah; it being arranged that the British Government should take charge of the kingdom during the minority of the young prince. This arrangement was made public by the following proclamation, issued on the death of the late Maharajah:—

"His Excellency the Right Honourable the Viceroy and Governor-General in Council announces to the Chiefs and people of Mysore, the death of His Highness the Maharajah Krishna Raja Wodeyar Bahadur, Knight Grand Commander of the Most Exalted Order of the Star of India. This event is regarded with sorrow by the Government of India, with which the late Maharajah had preserved relations of friendship for more than half a century.

"His Highness Chamrajendra Wadiar Bahadur, at present a minor, the adopted son of the late Maharajah, is acknowledged by the Government of India as his successor, and as Maharajah of the Mysore Territories.

"During the minority of His Highness, the said territories will be administered in His Highness' name by the British Government, and will be governed on the same principles and under the same regulations as heretofore.

"When His Highness shall attain to the period of majority, that is, the age of eighteen years, and if His Highness shall then be found qualified for the discharge of the duties of his exalted position, the Government of the country will be entrusted to him, subject to such conditions as may be determined at that time."

In accordance with the terms of this *nuncio*, His late Highness Chamrajendra Wadiar Bahadur was formally installed on the throne on the 26th of March 1881, the young Prince having attained the age of eighteen on the 5th of the same month. The late Maharajah died at Calcutta in 1894.

H. H. Krishna Raja Wodeyar Bahadur was installed by His Excellency Lord Curzon, Viceroy and Governor-General of India on the 8th August 1902.

This Church was formed on the above date by the late Rev. T. C. Page (formerly of Madras), then temporarily residing at Bangalore. It enjoyed the pastoral superintendence of that esteemed servant of Christ for the first few months of its existence, but was for some time subsequently to his departure from the station without a Minister. On the 30th March 1856 the late Mr. Marsden, who had been previously set apart for the work of the Gospel Ministry at Madras, became its Pastor. He died on the 2nd September 1890, at the ripe old age of 89, after an exemplary service in the Ministry of 33 years.

Besides watching over this Christian Society, the Pastor devoted a considerable portion of his time to Evangelistic visitation among the residents of Bangalore, particularly the Military, of whom there is always a very large number at the station. Mr. Gillings entered on the Pastorate in 1891. Present residence of Pastor, Leaghur, 25, Infantry Road, Bangalore.

## A NEW COLLEGE.

The Good Shepherd Convent School at Bangalore is now affiliated to the Madras University under the title of the Sacred Heart College. It is the only College for young ladies in the Station, and pupils are there prepared for the First-in-Arts Examination.

Though the Nuns do all in their power to qualify their pupils to pass examinations still their principal care is to instruct young ladies in the duties of Religion.

Protestants are exempted from assisting at the religious instructions given to their Catholic companions. Other occupations are found for them on these occasions, and they, like the Catholics, are always under the supervision of one or more of the Nuns.

These Schools and College were founded, in connection with the scheme originated by the late Bishop Cotton of Calcutta, to provide, in a healthy climate and at a moderate cost, the means of a sound education for the children of European parents resident in India and the East. The religious teaching is that of the Church of England. There are two distinct and separate establishments—(i) for boys, (ii) for girls.

(i) *The Boys' School* provides systematic tuition in the usual branches of a liberal education, and the course of instruction is graduated from the elementary lessons of the preparatory class (intended for boys of seven years) to the Matriculation Standard of the Madras University. The tuition fees are Rs. 2, 3, 4 and 5. The work and progress of each class is tested frequently by the Warden, and periodical reports are sent to parents and guardians. The School is under Government inspection; pupils are also presented annually at Bangalore for the Matriculation, Lower Secondary, and Primary Examinations; the Annual Report is issued as soon as the results of these examinations are known.

Gymnastics and Drilling are conducted by the Garrison Instructors. The senior boys belong to the Schools' Company of the Bangalore Rifle Volunteers. There is also a good and smart Cadet Corps, drilled by a Garrison Instructor. Cricket, Football and Athletics are encouraged.

(ii) *The Girls' School* is taught by a staff of seven Mistresses under Miss May Gow. The preparatory class provides careful elementary instruction for quite young children. Pupils are presented annually at Bangalore for the Matriculation, Lower Secondary, and Primary Examinations. The School is under Government inspection; the Annual Report is issued as soon as the results of the examinations are known. The work and progress of each class is tested frequently, and periodical reports are sent to parents and guardians. The tuition fees are Rs. 2, 3, 4 and 5. Regular instruction is given in Needle-work.

Lessons are given in both schools in the following subjects at an extra charge:—

Music—Piano, Rs. 6; Violin, Rs. 8; Singing, Rs. 3 and 6; Singing class, Re. 1.

French, Rs. 3; Drawing, Re. 1; Vernaculars, free.

Besides athletics for out of school hours, pupils are encouraged to make use of the excellent library, and to collect specimens for the School museum. The girls have started a Recreation Club, which is full of vitality; while the boys have set on foot a Club for taking in English newspapers.

Boarders are received into both Schools, and special arrangements can be made when more than one of a family are received. Particulars may be had from the Warden.

Every pupil must bring sheets, blankets, pillow-cases, towels, and a chest of drawers or a strong box with good lock and key.

*The Boys' Boarding Establishment* is under the immediate care of the Warden and his wife, who are assisted by a resident Master. The Warden will correspond with parents on matters connected with the health and personal comfort of their sons. Provision is made in a detached bungalow for sick boys, who are under the care of the Matron and the Medical Attendant. Boarders prepare their lessons at regular hours under the supervision of the resident Master, who is present to render assistance. Boarders are not allowed to leave the school compound without special permission.

*The Girls' Boarding Establishment* is under the immediate care of Mrs. Armstrong, who will correspond with parents on matters connected with the health and personal comfort of their daughters. Boarders prepare their lessons at regular hours under supervision. Boarders are never allowed to leave the school premises except with the Lady Superintendent's permission and accompanied by some responsible person approved of by her. Invitations can only be accepted by friends previously sanctioned by parents and not oftener than once a month.

## THE LAL BAGH.

THE MYSORE GOVERNMENT BOTANICAL GARDEN, commonly known as the "LAL BAGH" (from the Hindustani derivation—red or ruby garden) is under the direction of a Superintendent, who is responsible to the Local Government. The present Superintendent, Mr. J. Cameron, has held the office since 1874. The appointment of Curator is vested in Y. Rama Rao; a passed student of the Madras Agricultural College. The Garden is pleasantly situated about two miles south-east of the Cantonment of Bangalore, and within one mile of the City. It covers an area of about 100 acres of rich land and rock. The contour was formerly oval, with a gentle fall towards the north; but recent additions have included the higher lands on the east and south-east, and the boundary now includes the rock on which Kempe Gowda's watch-house is situated. On this commanding ground the visitor obtains a good view of the City with its surroundings, while contemplating the changes which have taken place since Hyder Ali first selected this favoured spot as the site for his Bangalore garden. In 1836 the Chief Commissioner of Mysore made over the Lal Bagh to an Agri-Horticultural Society, which was then formed at Bangalore, but on the dissolution of this Society in 1842—six years later—the property was restored to Government and has remained in its possession up to the present date. Since the rendition of the Province, the institution has been maintained by the State, and it is gratifying to know that His Highness' Government shows much solicitude for the preservation and improvement of this historical Garden. A large tank situated above the grounds, affords a permanent water-supply which is laid on by a system of masonry channels. Pipe water has recently been laid on, and the grounds have been embellished by two ornamental ponds with fountains. The greater portion of the ground is very tastefully laid out in ornamental lawns and terraced flower gardens with green houses, aviary, and cages for lions, tigers and cheetahs, &c. The Menagerie is mostly contained in a separate enclosure on the west side of the ground, with a few commodious cages in different parts of the Garden. The Albert Victor Conservatory occupies a commanding site on the eastern slope, where it is the centre of attraction. This fine structure has cost Rs. 75,000, and is the only one of its class in India. The materials are almost wholly composed of iron and glass, and were supplied by Messrs. Walter MacFarlane & Co., the well-known Iron Founders of Glasgow. In addition to its being a Conservatory, the half-yearly Horticultural Shows are held in this building, the foundation stone of which was laid by His Royal Highness Prince Albert Victor. The deer park is situated at the south end of the Gardens and contains a number of sambar, antelope, spotted deer, and other species. A public golf ground has been made in the new grounds skirting the rock. The Garden is open from 6 A.M. till dusk. Carriages, horses, and cyclists are expected to enter by the left-hand entrance gate, and return by the one on the right, keeping to the main drive which encircles the Garden. Furious driving is strictly prohibited. Visitors are not permitted to pluck flowers or fruits; and are expected not to bring dogs to the Garden, as they do much injury to the seed beds and attack the deer. Plants and seeds may be purchased at the Garden. A detailed catalogue of the stock on sale, showing the prices, can be obtained from the Superintendent on application, and also a botanical catalogue of all the known plants in the Garden. The Garden Office is situated at the back entrance on the Hosur Road, opposite the rock.

A large ornamental fernery has been built adjoining the rockery. The plants in the Garden are being permanently named for the information of visitors. Special attention is given to introducing economic plants from other countries.

HORTICULTURAL SHOWS.—Since the Mysore Agri-Horticultural Society has been dissolved, the Half-yearly Shows, which are held in the Gardens in the beginning of August and February, are conducted and managed by the Superintendent, assisted by a temporary Committee of Jurors.

The Menagerie and Aviary are fairly stocked with collections of animals and birds which vary in kind as time goes on.

## NOTICE.

1. Any one giving a picnic in the Government Gardens must apply to the Superintendent, at least 24 hours previously, for permission to do so; and on the occasion of such picnics, a hire of Rs. 2 per day will be charged for the use of the house—Darwinia—and the adjacent grounds.

2. Servants sent by those giving picnics must abide by the orders of the Superintendent.

3. The Garden gates will not be kept open on such occasions, unless by special permission.

4. Persons will not be allowed to occupy the Darwinia unless the above rules are strictly observed.

(By order.)

J. CAMERON,

Superintendent, Government Gardens.

## BELLARY.

The District of Bellary (Valahari) lies between latitudes 14° 14' and 15° 57', and longitude 75° 45' and 77° 40'. It is bounded on the north by H. H. the Nizam's territory, from which it is divided by the Tungabhadra river; on the south-west and south by the Mysore country, on the east by the districts of Anantapur and Kurnool, and on the west by Mysore and the district of Dharwar in the Bombay Presidency. The height of the plateau averages from 800 to 1,000 feet above the level of the sea. The western taluks are the highest, as the country there gradually slopes toward the western ghats. In the southern taluk also, as the table-land of Mysore is reached, the elevation

is not inconsiderable. The soil in the eastern taluks is largely composed of the celebrated régada or black cotton soil. In the western taluks, there are patches of the same soil, but the red soils predominate, and in the neighbourhood of hills good gravel is found.

The general aspect is that of an extensive plateau, elevated on the shoulders of the western and eastern ghats, the plain of which forms a considerable angle with the horizon inclining towards the east coast of the peninsula. Thus at Belgaum, in the South Mahratta country, the height of the plain is 2,568 feet above the level of the sea; at Bellary it is 1,600 feet. The western ghats clearly form the anticlinal line to which the arenaceous and schistous eastern ranges are more or less conformable. The plain has another and more gentle dip towards the north, to the beds of the Kistna and Tungabhadra rivers. The bed of the Tungabhadra is a little more than 1,000 feet above the level of the sea, the plain rises as we proceed south, and in the centre of the district it is 1,500 feet, and on Mysore frontier in the south, 2,223 feet above the sea. To the centre of the district the surface of the plain presents a monotonous and almost treeless extent, bounded by the horizon, and unbroken, save by a few rocky elevations that stand forth abruptly from the sheet of black soil-like rocks from the ocean. Of this tract, Sir T. Munro wrote: "These districts are more destitute of trees than any part of Scotland I ever saw; the traveller scarcely meets with one in twenty miles and nowhere with a clump of fifty." Since this was written large sums of money have been spent in planting topes and trees and some success has been attained. The town of Bellary itself is fairly well-wooded, and along all the roads in the district avenues have been planted. The Sandur hills are covered with a good growth, though the trees are nowhere very large. Almost every variety of tree known in S. India can be found on these hills. In the Kadligi Taluk there are large areas now under reservation, containing a fair growth of small forest.

In the reign of Krishna Rayel of Vijayanagar, a small fort was built at Bellary by Timmapa, a dependent of that king. He and his son Rangappa held it for many years, paying an annual tribute of Rupees 1,000. After the battle of Telikota, Bellary became subject to the Muhammadan sovereigns of Bijapur, but the successors of Rangappa Nair were almost independent, and in 1659, Hanumappa, his grandson, defeated the descendant of the Vijayanagar Rajas, who claimed tribute from him, in a battle which was fought near Kampli. For another century the feud went on between the Rajas of Bellary, as they now styled themselves, and their former masters. After a time Bellary became part of the possessions of the Nizam and was included in the Jaghire of Adoni which had been given to Basalat Jung, the Nizam's brother. In 1769 Sadfar Jung and M. Bussay were sent from Adoni to collect the tribute which the Poligar had for some years refused to pay. The Poligar rashly called Hyder Ali to his aid, who reached Bellary by forced marches, and engaged and defeated the army of Basalat Jung in the plain at the foot of the rock. Doddappa Naick, the Poligar, who had watched the contest from the top of the rock fled by night to Sholapur, and Hyder took possession. He spent much money on the fortifications, and with the assistance of some French adventurers who were in his camp, he built the upper and the lower forts much as they now are. Tradition adds, that at the completion of the work these Frenchmen were hanged near the fort gate, because Hyder then for the first time discovered that the other rock was the higher, and that from it his stronghold could be commanded. Bellary was held by Hyder Ali and afterwards by Tipu till 1792, when by the partition treaty of 1792 it fell to the Nizam. The rock round which Bellary town is built is a huge granitic mass rising somewhat abruptly from the plain. It is about 450 feet above the level of the plain and nearly two miles in circumference. To the east and south the appearance presented is that of a heap of boulders irregularly piled one on the other, but to the west it slopes down more gradually and offers an unbroken surface of sheet-rock. To the north is a smaller detached mass of rocks.

The climate of Bellary is characterized by extreme dryness in consequence of the air passing over such an extent of heated plains. Less rain is supposed to fall at Bellary than at any place in South India. The quantity of moisture in the air, as indicated by the hydrometer, is exceedingly minute, though the air is remarkable for its transparency. More rain falls in the taluks bordering on the Tungabhadra. From the situation of the district almost in the centre of the peninsula, it benefits by both monsoons and yet does not get the full force of either. From the commencement of November to the end of May rain rarely falls, though sometimes in April and May there are violent thunderstorms and much atmospheric disturbance. In the first week in June the south-west monsoon is looked for, and with the first few heavy showers the hot weather is at an end. About 5 inches of rain fall in this month and July. Towards the end of September the wind veers round to the north, and about the middle of October the district is visited by the north-east monsoon. The average rainfall in September and October is 9½ inches.

The cool season begins in the month of November at the close of the north-east monsoon. During this period the wind is steady from the north-east and the weather is extremely pleasant. In the early mornings the thermometer is often as low as 62°, but the usual daily range is from 67° to 83°. The atmosphere is clear and the nights very cool. Towards the end of February the weather begins to get hot, and early in March the country presents an altered appearance. As the month advances the hot west winds set in, vegetation disappears, all the grass is burned up, and the country

resembles a dreary waste. In the black cotton country the soil, baked as hard as a stone, is split in all directions by cracks and fissures from one to three feet in depth. In the other taluks dust-storms are of frequent occurrence. The atmosphere glows intensely, and the glare increased by the white and sparkling nature of the ground is most distressing. The tanks rapidly dry up and expose beds of slime and decomposing mud. The nights are generally calm, and the atmosphere is stagnant and oppressive to a degree. Towards the end of May the heat, both night and day, is almost insupportable. At midnight even the thermometer sometimes marks 100 Fahr., and glass and wood crack simply from the heat. In the daytime the house can be cooled by cuscus tatties, but after sunset the hot wind usually fails. At the end of the month, or in the beginning of June, heavy ink-black clouds begin to gather in the south-west, and generally after a few days of oppressive stillness, the approach of the monsoon is heralded by two or three violent thunderstorms. These cool and refresh the air, and the hot weather is at an end. The interval between the two monsoons is generally very pleasant. The days are cloudy, and the air fresh and agreeable. September is usually close and oppressive, and this lasts till the rain falls. On the whole, from its elevation above the sea-level and from other natural causes, the climate of Bellary is better than that of most of the other districts in the Presidency. For three months of the year the heat is excessive, but the remaining nine months are comparatively cool and pleasant.

## COCHIN DIRECTORY.

**Description.**—This is a Native State in subsidiary alliance with the British Government, and politically connected with the Presidency of Madras—called after the town of the same name, formerly its capital, but since its capture from the Dutch in 1795, a British possession, and included within the limits of the district of Malabar. That district bounds the State of Cochin on the west, north and north-east; a small portion at the south-west is washed by the Arabian Sea; and the State of Travancore forms the southern boundary. It lies between 9° 40' and 10° 50' N. lat., and between 76° 5' and 76° 58' E. long.; and contains 7 sub-divisions—namely, Cochin, Kanayanur, Mukundapuram, Trichur, Talapilly, Chittur and Cranganur.

**Physical Geography.**—The most striking physical feature of the country is the series of shallow lakes or backwaters, which receive the drainage of the numerous streams descending from the Western Ghats, and are consequently liable to great rises as these feeders swell, and to equally considerable reductions in volume as they dry up. One of these feeders, the Alwaye, has been known to rise nearly 16 feet in twenty-four hours; and the backwater into which it flows sometimes continues swollen for months, while, in the dry season, it shrinks in many places to a depth of 2 feet, and even to 6 inches at the northern and southern extremities. The limits of the Cochin backwaters extend from north to south for a distance of about 120 miles, passing considerably beyond the boundary of the State. Their breadth varies from a maximum of 10 miles to not more than a few hundred yards; and they are very irregular in form, branching into a great number of intricate and shallow channels, containing several low alluvial islands. The communication with the sea is at three points—one at the city of Cochin, another at Kodungalore or Cranganur, and the third at Chetwye. Though the backwaters are in most places shallow, navigation is at all times possible from Cochin to Cranganur, and from Cochin to Alleppey both for passenger and cargo boats. During the rains, all parts are navigable by flat-bottomed boats; but for the conveyance of petty merchandise, canoes drawing little water are preferred. All the lands washed by the estuary, whether islands or enclosing banks, are low and swampy, and liable to be flooded during the monsoon inundations. They are in general densely covered

\* Proof not received up to time of going to press.

with luxuriant cocoanut palms; and in such places as are embanked great quantities of rice are grown. The chief rivers of Cochin are the Ponnani, the Tattamangalam, the Manali, the Karuvannur and the Chalakudy. The Alwaye or Periyar also passes through a portion of the State. The timber of Cochin is amongst the most valuable of its products, the revenue derived from the forests in 1901-02 being Rs. 6,00,801. The principal timber tract is Irooyairy in the north-east, which is covered with dense forests of teak trees of enormous size, but less durable and elastic than timber of the same kind produced in Travancore and Malabar. It is consequently more in demand for building houses than for ships, for which latter purpose it is also rendered less suitable by being cut into short blocks, in order that it may be dragged to the torrents which sweep it down to the backwater. The violence with which it is carried down the streams often renders it unfit for purposes requiring wood of large dimensions. Other valuable descriptions of timber are poon, of which excellent masts are made; and blackwood, anjaly, jack, ben-teak, and bastard cedar. The only mineral products which contribute to the revenue of the State are laterite and granite; for though both gold and iron were at one time worked, these industries have now died out. The flora, however, abounds in plants of commercial value. Besides the timber-trees already mentioned, the hills afford a great variety of drugs, dyes, and gun-yielding shrubs; cardamoms are produced in many parts, and everywhere on the hills this jungle exhibits a splendid luxuriance of foliage and flowers. The fauna includes all the larger animals of Southern India—elephant, bison, bear, tiger, leopard, sambur, and ibex; with many varieties of deer. The cheetah, hyæna, wolf, fox, monkey, &c., are also found, and birds are very abundant, as also are snakes and other reptiles.

## HYDERABAD DIRECTORY.

The Dominions of His Highness the Nizam lie between 15° 10' and 21° 50' North latitude and between 74° 45' and 81° 35' East longitude.

They occupy a polygonal tract, 82,698 square miles in area, in the central portion of the table-land of the Dekhan, which, in the generally accepted sense of the term, refers to that portion of Southern India, which is bounded on the north and south by the Nerbudda and the Kistna, and laterally by the Eastern and Western Ghâts.

The Dominions are bounded on the north by the province of Khandesh and the river Tapti, which separates them from the district of Burhanpur in the Bombay Presidency; on the south by the rivers Tungabhadra and Kistna, forming the northern boundary of the districts of Bellary, Kanul and Guutur, and by the district of Kistna, all in the Madras Presidency; on the east by the Rivers Wardha and Godavari, which flow along the western limits of the districts of Chanda and Sironcha, both in the Central Provinces; and on the west by the districts of Dharwar, Kaladgi, Sholapur and Ahmednagar, all in the Bombay Presidency. A portion of the River Sina also forms the western boundary of the Nizam's Dominions, but the taluks of Janker, Barsi and a part of Kaigam, all belonging to the British territory, are to the east of that river. Similarly, a part of the River Godavari separates the Nizam's Dominions on the west from British territory; but a few villages of the Nizam's Dominions are situated beyond that river.

*Physical features.*—The Dominions are a vast plateau of an average elevation of 1,250 feet, though some summits reach an altitude of 2,500 feet above the level of the sea, as, for instance, Golcondah, a fort six miles to the west of Hyderabad, which is 2,024 feet above the level of the sea. The country is geologically and ethnologically divided into two large and almost equal divisions. The Godavari and the Manjira rivers separate these natural divisions. The first of these geological divisions consists of regions of trappean rocks to the north and west, and the other to the south-east is composed of granite and limestone. The former is inhabited by the Mahratta and Kanarese people, whose staple food is wheat and jawari; and the latter is peopled by the Telugus, who subsist chiefly on rice.

In this granitic and calcareous region, which presents a solitary sterile appearance, hills nude of vegetation, brushwood of every description scattered in profusion, detached perpendicular rocks and collections or masses of boulders, which seemed to be piled by giant hands, are not scarce. The soil, formed from the decomposition of these rocks, is generally sandy and hence sterile. The rivers in this region, too, flow only in the rainy season, their sandy beds, which are quite too pervious, not admitting of the continual flow of the stream throughout the year.

The trappean region generally presents a pleasing aspect with its luxuriant vegetation and its craggs, cliffs and hills with graceful and undulating outlines. The soil derived from the decomposition of this formation—the ordinary black cotton soil and *regar*—is productive, fertile and impervious, so that the retention of moisture is not so difficult as in the soil of the other region. Thus, while the granitic region is suggestive of sterility, the trappean region is synonymous with fertility.

Thick jungles and forests are met with, for the most part, in the valleys of rivers, especially those of the Wardha, the Godavari and the Kistna. There is much sandstone along the right bank of the Godavari, some of which is carboniferous.

**Political divisions.**—Land in H. H. the Nizam's Dominions may be divided into three distinct heads, with regard to administration and collection of revenue:—

(1) *Sarf-i-Khas* lands, assigned to the Sovereign in lieu of cash payments from the public treasury, comprising an area of 7,113 square miles, with a population of 700,000. They consist of an entire district surrounding Hyderabad City (Atraf-i-Balda), two talukas in Bidar, two in Aurangabad, one in Nandor, four in Naldurg and a few scattered villages. The total revenue from these exceeds 41 lakhs of rupees.

(2) *Paigah* lands assigned by His Highness the Nawab Nizam Ali Khan Nizam-ul-Mulk Asaf Jah to Nawab Shamsul-Umra Amir-i-Kabir Bahadur for the maintenance of a body of horse called "His Highness Household troops," comprising about 2,373 square miles, with a population of about  $\frac{1}{2}$  lakhs; and

(3) *Khalaka* lands or Divani territory divided, for administrative purposes, into four subhas, or divisions, which are further sub-divided into sixteen districts.

**Jagirs.**—As far back as the time of Tamerlane, it had been the custom to bestow jagirs as royal presents upon those who had in any way distinguished themselves by their services to the state. The jagirs were granted either free of rent, for perpetuity, for life or on condition of rendering military service when required, &c. The jagirdars do not pay any fixed annual tribute to the government. But those who used to pay *Chouth* (or a fourth part of their revenue) to the late Mahratta Peshwas, continue to pay the amount to the Nizam's Government from the time they came under it. The jagirs extend over 11,000 square miles, and many jagir villages are scattered over the Government territory. The total population of the jagirs is about 31½ lakhs.

**Tributary Chiefs.**—The principal tributary chiefs are the Rajas of Gudwal, Wanparti, Aunagundi, Gopalpet, Amarchinta, and Javalgiri. They hold small tracts of country and pay tribute to H. H. the Nizam's Government, ranging from Rs. 25,000 to 1½ lakhs per annum.

**Commerce.**—The principal imports are: sugar, salt, glass, Englishware, spirits, hardware and cutlery, coffee, tea, saltpetre, mercury, opium, camphor and musk. The exports are: carpets, grain, oilseeds, cotton, honey, wax, coarse woolen cloth, *bidriware* and timber.

**Industries.**—The bulk of the people are engaged in agriculture. The principal manufactures in the country are: steel, manufactured out of iron ores, and used for making swords, spear heads, &c.; *bidriware*, consisting of vases, wash hand basins, cups, dishes, boxes, &c., which are made of an alloy of copper, lead and tin or zinc, and beautifully inlaid with flowers or other ornaments of gold and silver; sword blades, knives, daggers, muskets, &c., military accoutrements and leather goods; carpets and rugs; *kamkhab* or gold cloth; embroidered muslins, brocades of coloured silk with gold and silver thread, Tassa silk, saltpetre, Persian paper and pottery.

There are three Spinning and Weaving Mills at Secunderabad, Gulbarghah and Aurangabad, besides numerous cotton ginning and pressing factories.

**The Cave Temples of Ellora.**—These Cave temples form the largest and most varied group of the rock temples in India, containing some of the finest specimens of Buddhist, Brahmanic and Jaina temples. The village of Ellora is situated about 14 miles to the north-west of Aurangabad, and about 6 miles from Daulatabad, a station on the H. G. V. Railway line. There is no bungalow at Ellora, but close by at Roza there is a luxuriously furnished Guest House maintained by His Highness the Nizam's Government.

The caves are excavated in the scarp of a large plateau and run nearly north and south for a distance of a mile and a quarter. At each end, the scarp throws out a horn to the west. The oldest caves, the Buddhist, are situated at the south end, at the point where the scarp begins to turn to the west. At the other extremity and in the north horn are the Jaina caves, while the Brahmanic group is situated between the two. Taking the Kailasa as the centre, 16 caves lie to the south of it, 14 of which are Buddhist—and nearly as many to the north of it being Brahmanic and Jaina. The Buddhist caves of Ellora are all of the Mahayana group and range in time from 350 to 550 A.D.

**Ajantah Caves.**—The celebrated caves of Buddhism at Ajantah in the Aurangabad district are situated in the Indradri hills, 4 miles to the north-west of the village of Ajantah. The paintings in the caves comprise "scenes of every-day life, such as preparing food, carrying water, buying and selling provisions, hunting scenes, elephant fights, men and women engaged in singing, dancing and playing on musical instruments. Many are most gracefully and almost graphically depicted upon these walls." Some of the earlier paintings are probably as old as the second century of the Christian era, the majority belonging to the sixth and seventh centuries.

**Climate, &c.**—The climate is not altogether salubrious, but it may be said to be good, for it is rather pleasant and agreeable during the greater part of the year, there being a medium between extreme heat and cold. As the country is very hilly the hot winds are not felt so keenly as in places where there are extensive sandy or arid plains. It is only the south-west monsoon which sets in, in June, and continues till October, that is of any importance whatever to the country, for the average rainfall during this monsoon is

30 inches. The rainfall during the south-east monsoon is very scanty and of little benefit to the country, the average being about 4 to 8 inches. The westerly winds blow from June to September when they change for an easterly direction from October to February; and during March, April and May the winds are north-westerly. The Western Ghats do, in a measure, interfere with the volume of rain that might otherwise fall, but immediately the rain passes the ghats, it increases again, though very gradually.

Hyderabad is the capital of the Nizam's territories and the seat of Government. It is situated within six miles from the Fort of Golcondah. Its distance from Calcutta is about 1,220 miles, from Madras 460, and from Bombay 470 miles. The Nizam's country, viz., that part under the sole management of His Highness' Government, contains an area of about 80,000 square miles. The population of H. H. the Nizam's Dominions is, according to the recent Census, 11,310,001. The population of the City of Hyderabad is 297,801. The City is approached by numerous bridges, gates and posterns, it being surrounded by a stone wall, which, however, is in a weak and ruined state. Great improvements have, however, been effected in the City, by widening the streets in several parts, and many sanitary arrangements have been introduced.

The hill fort of Golcondah was formerly the seat of Government, and in the fort as well as near it, are the far-famed tombs of Golcondah, a series of splendid mausoleums built in oriental style over the departed Sovereigns and Princes of the Golcondah dynasty. The tombs are greatly admired for their extent and beauty.

## THE HYDERABAD RESIDENCY.

The building in which the British Resident resides is called by this name. It is an elegant and lofty edifice, said to be the next in splendour and magnificence only to the Government House at Calcutta, and is enclosed by a high wall with bastions at the entrance gates. It is situated about a mile to the north of the City of Hyderabad, the River Musi running in the intervening space.

To the right and left of the building are attached two handsome wings, each containing accommodation sufficient for a large number of guests. The building is furnished in the handsomest style, and is described by Sir John Mackintosh to be "Oriental only in its magnificence, but perfectly English in its comforts." Opposite the front of the building, which is the entrance for European visitors or noblemen of Hyderabad, on ordinary as well as on State occasions, is a pretty flower garden choicely laid out, while the whole building presents a delightful view. In the compound there are good dwelling-houses for the First and Second Assistant Residents, and office accommodation for the Administrative, Printing, Treasury, Military, Judicial, and Persian Departments. At one end of the compound is a barrack for a detachment of Cavalry, and a Company of Native Infantry, designed to be the Resident's Escort, under the command of a European Commissioned Officer. There is also a Burial-ground, a Racquet Court and Croquet Ground within the Residency compound. The Hyderabad Telegraph Office is situated within the Residency walls. The Branch Bank of Bengal is closely situated.

Surrounding the Residency is a number of populous *Bazaars*, embracing an area of about a square mile, over which the Resident exercises jurisdiction, both in Civil and Criminal matters.

## SECUNDERABAD.

Secunderabad (named after the Nizam Sikandur Jah) is the largest Military Station in India, situated 6 miles north-east of Hyderabad City, and forms the Head-quarters of the Hyderabad Subsidiary Force which constitutes a division of the Madras Army.

The Military Force stationed here consists of one Regiment of European and another of Native Cavalry, one Battery of Royal Horse Artillery, three Batteries of Royal Artillery (Field and Garrison), two Regiments of British and three of Native Infantry, with a Company of Sappers and Miners. An Ordnance Establishment has charge of the Arsenal, and there is also a large Supply and Transport Staff. This force is maintained by the British Government, under the terms of a treaty with the Nizam, dated 21st May 1853,

in lieu of certain Contingent and Auxiliary Forces, which had been previously raised by the Nizam to co-operate with the British Army. The cost of the Force is defrayed out of the Revenues of certain districts ceded by the Nizam under the treaty of May 1853, revised by a second treaty in 1860. Up to the year 1850, previous to the head-quarters of the Subsidiary Force being stationed here, the Cantonment of Secunderabad consisted of a line of barracks and huts, extending for a distance of 3 miles from east to west, with the Artillery in the front and on the left flank, and the Infantry on the right; since that date, however, the Cantonment boundaries have been extended as far as Bolarum, covering a total area of 19 square miles, including many interspersed villages. New double storied barracks have been erected for the European soldiers, and the quarters for the Native troops, which are situated at some distance, are also comfortably built. The country for many miles around undulates into hummocks with a few out-crops of underlying rock, crossed from east to west by green-stone dikes. East of the Cantonment are two large outbursts of granite; in the north-east is a granite hill known as Moula Ali, and near it another called Khadam Rasool, from a legend that it bears an impress of Mohamed's foot. Shady trees line the roads of the Cantonment, and near the European barracks and Native lines there are clusters of the date and palmyra palms; otherwise the face of the country is bare, with but little depth of soil in the elevated parts. Cultivation is carried on in the dips and valleys, in several of which tanks have been constructed. Immediately to the south-west of the Cantonment is a large artificial reservoir or tank known as the Hussain Sagar, about 13 miles in circumference.

The Parade ground of Secunderabad is of great extent, upon which a Force of seven or eight thousand troops can be manœuvred with ease. Close by is the Cemetery containing the graves of many officers who have died here. A short distance from Secunderabad is the Cantonment of Trimulgherry, containing an entrenched camp capable of accommodating all the Europeans in the neighbourhood. At Trimulgherry is the Military Prison, styled "Windsor Castle." Here soldiers sentenced by Courts-martial to punishment are confined. The place contains fifty-two cells. It has also a Clock Tower, from the summit of which a distant view of Hyderabad may be obtained. The Hyderabad Subsidiary Force is not the sole body in the neighbourhood. Adjoining Secunderabad Cantonment to the north is the Bolarum Cantonment, one of the stations of the Hyderabad Contingent. The force stationed here consists of one Regiment of Cavalry, one of Infantry, and one Battery of Artillery. Again, about 5 miles south of the Secunderabad Cantonment are the lines of the Hyderabad Troops, also belonging to the Nizam, comprising Cavalry, Artillery and Infantry. Altogether, within a space of 19 miles from north to south, about 8,000 disciplined soldiers are cantoned. A short distance west of Secunderabad, Begampett and Bowinpalli are situated. The Pioneers are stationed at the first place and a Madras Cavalry Regiment at the latter.

## TRIMULGHERRY.

At Trimulgherry are the Barracks of the European Regiments of the Subsidiary Force, as also of the Horse, Field and Heavy Artillery. All the European Troops have been removed from Secunderabad to the new and stately buildings erected at Trimulgherry. At Trimulgherry is also an entrenched Fort, which contains all the barracks and principal buildings of the two Regiments of European Infantry, affording accommodation, if need be, for four thousand people. It is surrounded by a stone ditch and earthen parapets flanked by five batteries. Besides these are an Arsenal (removed from Secunderabad), two Magazines, Commissariat Store Houses, a Bakery, and a good supply of water.

North Trimulgherry, where the Regiment of British Cavalry is located, is south-east of the Bolarum Residency, and immediately behind Byam's Cenotaph. This will give them, who know anything of this locality, some idea of what the Station of Trimulgherry now is. Several Officers' quarters are finished to the east of, and in line with, the Bolarum Residency, and within a short distance of it.

A People's Garden has also been laid out, and is a great ornament to the Station. The Band of the Infantry Regiment plays in the Garden once a week. ## NELLORE DIRECTORY.

*Description.*—This is a district on the Eastern or Coromandel Coast, lying between  
 30° 25' and 15° 55' N. lat., and between 79° 9' and 80° 14' E. long. On the east it is washed  
 by the Bay of Bengal; its western boundary is formed by the Eastern Ghâts, which  
 separate it from the districts of Kurnool and Cuddapah; north it is bordered by Kistna  
 District; south by North Arcot and Chingleput. Estimated total area, 8,739 square miles;  
 total population, according to the Census of 1901, 1,496,987 persons. The administrative  
 head-quarters are at Nellore Town.

*Physical Geography.*—Nellore District occupies a tract of low land stretching from  
 the base of the Eastern Ghâts to the sea. Its general aspect is forbidding. The coast-  
 line is uniformly constituted by a fringe of blown sand, through which the waves  
 occasionally break and spread a salt sterility over the fields. Farther inland, the country  
 begins to rise. But the soil is not naturally fertile, nor are means of irrigation readily at  
 hand. Scarcely one-half of the total area is cultivated. The rest is either a rocky waste or  
 covered with dense scrub jungle. The finest trees are to be found in the neighbourhood of  
 the village sites. Along the western frontier rises a barren range of mountains, which  
 throws out numerous spurs into the plain. A remarkable natural feature is the island  
 of Shreeharicota, a low ridge of sand which divides the Lake of Pulicat from the main  
 sea. Inhabited chiefly by scattered families of the wild tribe of Yanaudies, most of it has  
 never been brought under cultivation; but Madras city is regularly supplied with fuel  
 from this otherwise unprofitable waste. The chief rivers of Nellore are the Pennair, the  
 Swarnamookhy, and the Goondlacumma, which all rise in the table-land above the Ghâts,  
 and flow east through the district to the sea. The numerous minor streams are little more  
 than mountain torrents, unavailable for irrigation. The Pennair runs through the district  
 for a total course of about 70 miles, passing by the town of Nellore. For nine months of  
 the year its bed, which is rocky among the hills but sandy lower down, is almost dry, with  
 deep pools here and there, into which the fish collect. The season of flood (full or partial)  
 lasts altogether for about 60 days. When the stream is at its highest, the volume of water  
 is 500 yards wide and 30 feet deep, filling the bed from bank to bank. The chief irrigation  
 works on the Pennair are the ancient at Nellore town, from which numerous channels are  
 led off on the south bank, and an ancient made at Sungam, a place 18 miles west of  
 Nellore, and which irrigates land north of the river. The floods of the Swarnamookhy  
 also supply a series of irrigation channels. The bordering range of the Eastern  
 Ghâts rises in its highest peak, Penchalacondah, to an elevation of about 3,600 feet  
 above sea-level. Detached from this range is the isolated hill or droog of Oodaya-  
 gherry (3,079 feet), which was till recent times the rock fortress of an independent

Mahomedan chieftain. Throughout the district generally, the underlying rocks belong to the metamorphic series, which occasionally crops up in the form of gneiss, schist, and quartz, and is intersected by veins of quartz and volcanic rocks. The Eastern Ghâts, on the other hand, are capped by a series of sedimentary formation, chiefly altered sandstone and slate, known as the "Cuddapah Group." Organic remains of fern-like plants have been found in several places. A band of laterite, varying greatly in width, extends almost continuously along the coast, and is largely quarried for building materials. Copper was discovered in the western hills in 1801. The ore was found on assay to yield a large percentage of metal, and European capital was attracted to the spot. But the enterprise has repeatedly proved unsuccessful, and no fresh attempt has been made since 1840. Iron, ore, chiefly in the form of sand, is collected and smelted, according to native methods, in many places. It is worked up into tools, but no steel is manufactured. Saltpetre is made in a few villages, by refining down the nitrous earth to be found on the surface. Wild animals are comparatively rare in Nellore. Tigers are now almost unknown, except when a stray one wanders across the mountains from Cuddapah. Leopards, bears, sambar, deer, and occasionally bison, are still to be found among the western hills. Antelope, spotted deer and wild hog are generally distributed, while the small game comprise snipe, duck, bustard and florican.

## NILGIRIS DIRECTORY.

*Geographical position.*—The Nilgiri District, as it existed prior to the annexation on the 31st March 1877, of the tracts known as the Nambalakód, Cheramkód and Munanád Amshoms, hitherto appertaining to the Waiuad Taluk of the Malabar District, lies between latitude 11° 8' and 11° 37' north, and longitude 76° 27' and 77° 4' east. Within these limits rise the Nilgiri Hills, a vast mountain block, comprising two more or less distinct hill ranges, usually known as the Nilgiris Proper and the Kúndas.

Apart from the Kúnda and Nidumalé ranges, the surface of the Nilgiris is divided into an upper and lower plateau. The lower forming an irregular shelf, rests upon the north-eastern and southern slopes of the Doddabetta, or great central range, and its offshoots, including the north-east angle of the plateau, sometimes, though without sufficient reason, called the Kótágiri range. The higher plateau, known amongst the aborigines as the "Mél," or upland nad, comprises the tract lying between the western slopes of Doddabetta and the Nidumalé and Kúnda ranges. The average elevation of this higher plateau above the lower may be roughly stated at from 1,000 to 1,500 feet.

*Waterfalls.*—The waterfalls are numerous and picturesque, though not of any great depth or volume. The highest is that of Kólakambe, north of the hill of that name, having an unbroken fall of about 400 feet. Second to this is St. Catherine's Fall (250 feet) in a stream south of Kótágiri. Then follows the lower Fall of Paikaré (200 feet) and after it the upper (180 feet). Of nearly the same height as this latter is the Kallatti Fall (170 feet) on the Segúr Pass. The Kátéri Fall in the river of the same name, six miles from Ootacamund, is 180 feet in depth.

*Lakes.*—There are no natural lakes in the plateau, but art has attempted to supply in the neighbourhood of Ootacamund the defects of nature. In the neighbourhood of this station there are some artificial lakes or reservoirs, formed by banking up the stream at a narrow part of the valley. The most important is that known as the Ootacamund lake, a marked feature in the station, and one which adds greatly to its beauty. Its form is serpentine or sinuous, the bends being caused by the projecting spurs of the hills on either side. Its length is about two miles and a half, its breadth from three to four hundred yards. A road follows the windings of its banks throughout and forms the principal drive of the station, its length being nearly eight miles.

*Scenery.*—The interior of the plateau consists chiefly of grassy undulating hills, divided by narrow valleys, which invariably contain a stream or a swamp. In the hollows of the hill-sides nestle small beautiful woods, locally known as shólás. It is seldom that so much variety of beauty is found in so small a compass. Let a visitor take a short ride in almost any direction from almost any part of the plateau, and passing along shady English-looking lanes, sheltered by thickets of blackberry and wild rose; across bare breezy downs, sometimes dotted with twisted crimson flowering rhododendron and intersected by swampy valleys, where buffaloes wade and wallow, through dense woods carpeted with rare beautiful ferns and gorgeous in spring-tints, beside which the colouring of an

English autumn is faint and dull, by native villages, with their patches of cultivation and their magnificent single trees, he will find himself on some ridge or promontory, looking straight down from 4,000 to 6,000 feet, on a scene that changes like the figures in a kaleidoscope. In the morning a sea of clouds lies at his feet, and gradually rises round him. In the afternoon this has cleared away, and reveals perhaps a vast crimson plain, veined by dark lines of wood, dotted with isolated hammocks like giant ant-hills, and terminating in faint blue lines of mountains, the furthest of which seems to hang half-way up the sky; perhaps on a tumbled mass of hills and valleys, a perfect dissolving view, or the eye has hardly traced the outline of some rocky ridge, glowing red in the sun-light, before a blue cloud-shadow blots it out, and a fresh series of crests and ravines start into sight beyond. Broken peaks, hung with wood, frame the picture, and on all sides lies tropical sun-light, intensified by the keen thin mountain air.

The climate, or rather climates, of the Nilgiri Hills—for that of each hill and valley seems to vary according to its exposure to the monsoons, its elevation, or other local causes—may be generally described as for the greater part of the year dry, bracing and exhilarating, and more equable than those of Europe; the maximum range of the thermometer being only from 8 to 9 degrees at Ootacamund, and from 12 to 15 degrees at Wellington throughout the year, in the middle of the day, as against 28 degrees in London.

*South-west monsoon.*—During the south-west monsoon, which usually prevails until the early part of October, much rain falls, and the air is generally saturated with moisture. The hills become quickly covered with luxuriant grasses and the forest trees put forth their fresh leaves. During the months of August and September breaks, as they are called, occur. The mists clear off, and the sun shines forth for several days successively. The scenery, usually beautiful, is now surpassingly so, the undulating ground of the whole plateau being clothed with verdure of peculiar richness. This season is usually considered to be the most salubrious period of the year, and Europeans who have resided for any length of time upon the Hills, and judge of the climate by experience, invariably prefer the rainy season to any other.

*Cases of illness which derive most benefit from a change to the Hill climate.*—On the Nilgiri table-land we have a climate essentially temperate, and one which experience tells us is capable of conferring the greatest benefit in suitable cases. The cool refreshing breezes, together with the lovely mountain scenery, and relaxation from work, combine to effect an improvement in the health of those who have been exposed for any length of time to the enervating influences of the plains. For the following classes the climate will be found unquestionably most suitable and invigorating. Young people of weakly constitution, who have broken down through overwork in a tropical climate, or who from having come out to India before their constitution may be said to have been properly formed, and in consequence have been reduced to a state of general debility after their arrival in the country. Older persons who, by reason of a prolonged residence on the plains without any change, or who, after suffering from some slight illness, have been troubled with dyspepsia, nervous debility, mental depression, or loss of appetite, and who in consequence feel an inability to perform their accustomed duties. These are the cases which derive the most permanent benefit from a residence on the Hills. It is presumed that in the above cases there is a freedom from all structural disease. Convalescence from many of the more trivial diseases to which Europeans are subject on the plains is generally hastened by a residence on these Hills, attention being paid to the selection of a station for such cases in due accordance with the age and state of the patient and the season of the year.

#### WELLINGTON.

The station of Wellington, which is the Convalescent Depot for the British troops in the Madras Presidency, is in the Péranganád Division of the Nilgiri District, and lies in latitude 11° 5' north, and longitude 77° 5' east, with an area of 446 acres, or nearly two square miles, and a native population of 1,597. It is 6,100 feet above the level of the sea, situated on a spur running to the south-east from the Doddabetta or middle range of mountains, is well sheltered, only partially exposed to the monsoons, and well adapted from situation for a sanatorium. It is bounded on the north by the Doddabetta mountain, which is 8,760 feet above sea-level, and is sheltered by it partially from the south-west monsoon; on the south by Coonoor, two miles distant, from which it is separated by a deep ravine; on the east by Kotagiri, 13 miles distant; and on the west by a spur of the Doddabetta range stretching towards Kateri.

*Climate and its influence on health.*—The climate at Wellington, although only 11 degrees from the equator, is most salubrious, temperate, and invigorating. The thermometer seldom rises in the shade above 75 degrees, and the days throughout the cold months are clear and bracing. The mornings are always refreshing, and, if the character and time of the setting in of the south-west monsoon is regular, the months of the middle part of the year are pleasant and healthy.

The soil in and about Wellington is of a rich red ferruginous clay or marl, resting on a granitic base, with Sienite in many places, and here and there felspar, mica, and veins of quartz. Flint and amethyst appear to be embedded in the granite, sienite or gneiss, in the form of crystallized silica.

The road up the ghât runs from east to west. On the first portion of the ascent the bamboo grows in abundance, sheltering the road. On going higher, one observes the indigenous forest trees, among which are conspicuous the teak, of an inferior quality, the blackwood, which is useful for furniture, and takes a handsome polish, the sal, wild jack and vengay. Vengay is a superior timber considered by some equal to teak, and from it the bridges throughout the ghât are made. Lastly, the red and white cedars, the woods of which are suitable for building or making furniture. These trees are conspicuous for their great girth. About two-thirds up the ghât it is a pleasing relief to meet a resting-place, known as the "Toll-bar." Here coffee is provided for troops coming up. It is well shaded, and a perennial spring of clear water flows close by. The ascent from Mettappolli to Coonoor is about 4,500 feet.

## GOVERNMENT BOTANICAL GARDENS AND PARKS, NILGIRIS.

Curator.....R. L. Froudlock, Esq.

The following are the Gardens and Parks on the Nilgiris:—

1. Government Botanical Gardens.....Ootacamund.
2. Government Experimental Garden.....Burliar.
3. Sim's Park.....Coonoor.
4. Church Hill Park.....Ootacamund.
5. Crewe and Otley Hall Park.....Do.
6. Government House Gardens.....Do.

The Ootacamund Botanical Garden was opened during the Governorship of the Marquis of Tweeddale in 1817, and covers an area of about 51 acres. The grounds are beautifully laid out and planted with a great variety of exotic timber and ornamental trees, shrubs and herbaceous plants. There is a fine terrace laid out with flower beds in the Italian fashion, a conservatory which is open to the public, and a range of propagating houses.

The objects of this and the branch gardens are as follow:—

1. To improve horticulture in this Presidency.
2. To introduce, to propagate and to distribute vegetable productions not indigenous to India.
3. To further the distribution of seeds and plants.
4. To conduct experiments in the cultivation of indigenous and exotic economic plants, and in the preparation of commercial samples of their various raw products, with a view to making better known the value, and furthering and extending the cultivation, of such plants for the sake of their commercial products in this Presidency.

Residents in Southern India are indebted to these gardens for the introduction and distribution of many varieties of English and foreign fruits, vegetables, fodder plants, useful timber trees and also various medicinal plants. In 1861 the valuable quinine-yielding Cinchonas, that now cover many thousand acres in India and Ceylon, were introduced.

The Burliar Experimental Garden,  $7\frac{1}{2}$  miles below Coonoor, on the Coonoor Ghât, is at an elevation of 2,800 to 2,500 feet, and was purchased in 1871 for Rs. 2,000. Experience has proved that the site, which commands a plentiful supply of water all the year round for irrigation purposes, is well adapted to the growth of trees and plants peculiar to Tropical America, the West Indies, Tropical Africa, the Straits and the Eastern Archipelago.

The Para, Central American, Ceara, and Kickxia rubber trees, the Mangosteen, Nutmeg, Cinnamon, Clove, Allspice, Cocoa, Coca, Mahogany, Ipecacuanha, Camphor, Coffee trees of different species, Oranges, Breadfruit, Coconut, Custard Apple, Litchi, Langsat, Paraguay Tea, Avocado Pear, Durian and Plantains—including the Manilla Hemp plant—are all represented and thriving well in the Garden, which covers about 8 acres.

Sim's Park, Coonoor, was opened in 1874, as a pleasure ground for the inhabitants of, and visitors to, Coonoor and Wellington. It is prettily situated in a valley on the north side of Coonoor at an elevation of 5,800–5,500 feet, and is about 30 acres in extent.

Church Hill Park, Ootacamund, is situated immediately behind and above St. Stephen's Church; and the main approach to the Government Botanical Gardens passes through Crewe and Otley Hall grounds. These grounds and Church Hill Park are planted with Conifers and other exotic trees and shrubs.

Government House Gardens, Ootacamund.—These gardens and grounds belong to the hill residence of His Excellency the Governor of Madras. They are purely ornamental in character, and are not open to the public.

## GOVERNMENT CINCHONA PLANTATIONS, NILGIRIS.

|                                 |                     |
|---------------------------------|---------------------|
| Director .....                  | W. M. Standen, Esq. |
| Office Manager .....            | Mr. D. Campbell.    |
| Superintendent, Dodabetta ..... | H. V. Ryan.         |
| Do. Nedivattam .....            | E. Collins.         |
| Factory Overseer Do. ....       | W. H. P. Collins.   |

The following are the several Plantations on the Nilgiris:—

1. The Government Cinchona Plantation.....Dodabetta.
2. Do. do. ....Nedivattam.
3. Do. do. ....Hooker (Pykara).

Government Cinchona Plantation, Dodabetta, which was opened in 1862, is situated in the ravine behind the Government Gardens, Ootacamund, on a site selected by Mr. Clements Merkam, the great Pioneer of the Cinchona Industry in India. It is at an elevation of from 7,500 to upwards of 8,000 feet above the level of the sea, with a temperature ranging from 60 to 70 degrees (Fahrenheit). During the winter the frost is often sharp, causing some damage to the Cinchonas in the lower portions of the Estate. Its extent is 526.16 acres, of which 322.19 are under cultivation. The majority of the trees are the Cinchona officinalis var: condaminea, bonplandiana and crista, which varieties of the genus Cinchona yield the Loxa or famous Crown bark of commerce rich in quinine. Besides these there are other varieties and hybrids.

Government Cinchona Plantation, Nedivattam, is situated at the top of the Gudalur Ghât, about 21 miles from Ootacamund, at an elevation of from 5,000 to 6,000 feet above the level of the sea. Its mean temperature is 60 degrees, with a maximum of 80 and minimum of 54, Fahrenheit. It is 547.93 acres in extent, of which 394.97 are under cultivation. Sulphate of quinine has been manufactured since May 1889, and is supplied to the Medical Stores of Madras and Bombay, to Local Fund and Municipal hospitals throughout Madras, Central Provinces, Rajputana, Berars, North-West Provinces and Oudh, Mysore and the Native States situated within these Provinces. Packets of 5 grain Quinine powders are also distributed for sale to the Public through the agency of the Postmasters in the Provinces named above.

Government Cinchona Plantation, Hooker, is situated on the left bank of the Pykara river, about 29 miles from Ootacamund. It is 719.21 acres in extent, of which 553.57 are under cultivation. Its highest elevation is about 6,000 feet above the level of the sea, with a temperature similar to that of Nedivattam. The trees are chiefly officinalis and hybrids.

## COONOOR.

Coonoor is the alternative sanitarium with Ootacamund on the Nilgiris and being in a more sheltered position is sometimes preferred in that capacity. Its position is lat.  $11^{\circ} 20' N.$ , and long.  $76^{\circ} 50' E.$ , and it is distant 363 miles from Madras, 12 from Ootacamund. The scenery of Coonoor differs very greatly from that of Ootacamund; its vegetation is semi-tropical, the contour of the hills is bold, and the colouring of the scenery is bright and warm. On the other hand the vegetation of Ootacamund is rather that of the Temperate Zones; its hill lines are unbroken and undulating, and the colouring of the landscape is ordinarily cold and grey. The climate of Coonoor also differs as widely as its scenery, being warm, moist and relaxing, whilst that of Ootacamund is ordinarily cool, dry and invigorating. Each supplies a need. The mean annual temperature in the shade at Coonoor is  $62^{\circ} F.$ . In the warmer months the thermometer fluctuates between  $55^{\circ}$  and  $75^{\circ} F.$ ; in the colder months  $38^{\circ}$  and  $68^{\circ} F.$ . The average annual rainfall is 76 inches. The rate of mortality is remarkably low. The height of All Saints' Church above the sea-level is 5,954 feet, that of the Coonoor bridge about 5,500 feet. Most of the houses occupied by Europeans are between 5,700 and 6,000 feet above sea-level. Coonoor peak, however, is 6,893 feet above sea-level, or only 300 feet below the level of the Ootacamund lake. Coonoor lies at the head of the ravine and pass which bears its name. The native town spreads over the lower slopes of the spurs of two hills, which terminate in a wedge-like promontory where the united waters of three streams break over the edge of the ghât and are precipitated down the gorge under the name of the Coonoor river, finally joining the Kartaary river. The three streams are crossed by three bridges. On an eminence on the western spur stands the Protestant Mission Chapel, and on the eastern the Roman Catholic Church; below the latter is the market. The road to Upper Coonoor passes up the ridge and thence round the head of the valley, and along the wooded ridge which encloses it on the east and south. On this ridge stands the Coonoor Church, dedicated to All Saints, with a lofty square tower. The Church is surrounded by a grave-yard planted with exotic trees and flowers. To the east of this ridge is a ravine separating it from Tiger Hill, round which winds Lord Hobart's road, passing into the road to Lamb's Rock, Lady Canning's Seat, and the Dolphin's Nose, some five miles eastward of Coonoor above the Kotagerry gorge. Below this road, stretching away to the east as far as the eye can see, are the Coimbatore and Salem plains, the ancient Conga country; northwards the Bilgherryrnnam hills and the ranges which mark the line of the Balaghat country; whilst south and westwards is the Coonoor pass, walled in on the south by the "Hooliculldroog," which is backed by

the Lambton's Peak range south of the Bhawany river and by the distant Anamullay mountains. Behind the hill on which the Church stands is another valley, one of the ravines on the western side of the Coonoor peak, along which runs the road to Kotagerry. This valley has been formed into a garden named Sim's Park, after Mr. J. D. Sim, a late Member of the Madras Council. It is an offshoot of the deep ravine which divides Coonoor from Wellington, and the upper portion of which has been converted into a race-course, unrivalled by any in India for the picturesqueness and beauty of its position. The drainage of this valley forms the middle stream of Coonoor, which meets the other streams at the old Coonoor bridge. This bridge is the central point of the Coonoor road system. Here the old and new ghât roads meet, and from it, along the right bank of the western stream as far as the Wellington bazaar, runs the main road to Ootacamund. Above this road to the left is the Sub-Magistrate's Court, the Police Station, Post Office, and a few private residences; and below it the Railway Station. The Nilgiri Railway was opened in 1899 from Mettupalaiyam to Coonoor, the line being on the rack-rail system from the foot of the hills. A continuation of the line from Coonoor to Ootacamund will shortly be taken in hand. Three miles up the old Ootacamund road is situated the Government Cordite Factory now under construction—to be worked by electric power obtained from the Kartairy Falls.

## OOTACAMUND.

Ootacamund, the chief town of the Nilgiri district, the principal sanatorium of India, the summer head-quarters of the Madras Government, and the head-quarter station of the Madras Army, occupies the western slope of the Dodabetta mountain range. The town proper lies within the basin formed by two spurs of the Dodabetta mountain, the highest point of the southern being Elk Hill, and that of the northern the Club Hill. Owing to its peculiar features, Ootacamund is much exposed to the westerly winds, but is well protected upon the north and east. The bottom of the Ootacamund basin has been converted into an artificial lake some two miles in length and one-third of a mile in width, by throwing a dam across the main stream at a narrow pass where it issues from the central valley. This lake is divided into two by means of a causeway and bridge known as the "Willow Bund," from the Indian willows which line its banks. The bund is the means of communication between the north-west and south-west portions of the town. The western lake is sinuous in form. Upon the hills which surround it, more or less concealed by woods of eucalyptus, acacia, cypress and pine, stand some of the best private residences in the town. On a foreland of its southern bank stands the new Church of St. Thomas, a Gothic building; and opposite to this on the north bank, though at a greater distance from the lake, the Roman Catholic Church dedicated to the Blessed Virgin. The upper lake, an oval piece of water, much contaminated by the drainage of the native town or bazaar which lies on its northern bank, has been reclaimed lately and is now utilized as a Gymkhana ground and Race Course. Round the margin of the whole lake runs a wide carriage-drive. The marsh at the head, or eastern extremity of the lake has been reclaimed, levelled, and forms a park, known as the Hobart Park, still used for purposes of public recreation. The area, including the lands lying on the northern and southern margins of the lake as far as the Willow Bund, is about thirty acres. Opposite to this, at the eastern extremity of the native bazaar, stands the Hobart School for native girls. To the east of this is the public market. Beyond the market is the agra-haram, or Brahmins' village. On the slope of the hill behind the market are the Police lines and station; and above these ranges of buildings St. Bartholomew's Hospital, behind which, on the top of the ridge, are the jails for Europeans and Natives. At a short distance to the east, on the same spur, is the Public Library, and opposite to it the Post Office; a little further on are the Brecks' Memorial School and the public offices of the district. Nearer to the hill stands the Church of St. Stephen, the old station church; and opposite its gates the church and school of the Church of England Native Christians. The sides of the hill to the east and west of St. Stephen's are thickly studded with houses and cottages, including westward the Club House and the principal hotels, and eastward the Assembly Rooms. Looking to the east from St. Stephen's, but at a much lower elevation, on the western extremity of a minor spur of Dodabetta, stands "Stonehouse," which contains the Council Chamber and the offices of the Madras Secretariat. In the hollows and on the spurs of Dodabetta to the north and south of "Stonehouse" are many residences. The lands on these slopes are generally very fertile and well watered, and for this reason a considerable and yearly extending area is cultivated as garden land. In a steep ravine, about half a mile to the north of "Stonehouse," are the Public Gardens and the "Todah" "mund," from which Ootacamund takes its name. Above the Public Gardens, stretching across the Dodabetta saddle, is the large Government Cinchona plantation. On the northern shoulder of the ravine, adjoining the Public Gardens, lies "Norwood," the hill residence of the Governor, backed by a fine wood of eucalyptus on the side of the Snowdon mountain. From the foot of "Stonehouse" towards the south runs the highway to Coonoor, disappearing in the deep cutting which separates Elk Hill from the Dodabetta range. This cutting is bridged by a viaduct. This is a simple description of the main valley, but the limits of the station lie far beyond it and include two other important valleys; to the south and parallel with it, Lovedale, with its picturesque lake, above which stand the extensive storied buildings of the Lawrence Asylums (founded 1853); to the north the valley of Marlemund, which opens out towards the head of the Seegoor Pass. Between the Ootacamund and the Marlemund valleys is a hollow, across the outlet of which a dam has been thrown, forming the Marlemund reservoir from which, through a channel nearly three miles in length, the northern portion of Ootacamund is supplied with water. The houses occupied by Europeans in the station have generally not less than five or six acres of land attached,

and many have from twenty to seventy acres. In the chief native bazaar on the border of the lake, some two or three thousand persons are congregated; and perhaps half of this number again in Kandal, a bazaar in a small valley to the west of the station. But a large number of natives have their homes in scattered hamlets, chiefly in the eastern portions of the station. The inhabitants of these hamlets are chiefly Canarese, with a sprinkling of Tamuls. There is no Badaga village within municipal limits, and only three or four Toda mounds. The nearest railway station is Coonoor on the Nilgiri Railway, connecting Mettapolliem and Coonoor.

The amalgamation of the Madras Military Male Orphan Asylum with the Ootacamund Lawrence Asylum was effected in September 1871, on the completion of the new buildings at Lovedale.

The salubrity of the situation (which surpasses that of some of the healthiest public schools in England) is shown by the diminished percentage of sick in Hospital, and the robust appearance and healthy appetite of the children.

Although the Institution may be said to have been adopted by the State, it is not perhaps so generally known that Government has never contemplated doing more than furnishing it with a liberal *Grant-in-Aid*.

The boys receive such a training as will fit them for usefulness hereafter in various lines of life, whilst the girls are employed in such occupations as will tend to qualify them to become useful wives and mothers.

#### AMENDED RULES.—22nd December 1900, No. 4.

1. The following code of rules relating to the constitution and working of the Lawrence Asylum, Ootacamund, has been sanctioned by Government, and shall have effect from 1st January 1901.

In these rules the term "Eurasian" shall be restricted to the children of European fathers by Eurasian or native mothers, and of Eurasian fathers and mothers of whom both are the children of Europeans.

#### OBJECT.

2. The object of the institution, which shall consist of a male and a female branch, is to secure for European and Eurasian children of the classes specified in rule 39 a healthy and invigorating climate, to remove them from objectionable surroundings, to afford them secular and religious education, and to train them to earn a livelihood.

#### CONTROL.

3. The management of the Asylum shall be vested in a committee, consisting of the Brigadier-General Commanding the Southern District as *ex-officio* chairman, the Collector of the Nilgiris as *ex-officio* vice-chairman, the Assistant Adjutant-General, the Assistant Quartermaster-General, the Senior Medical Officer at Ootacamund, and the Commandant of the Depot at Wellington, as official members, and three non-official members resident at Ootacamund and elected by the Committee. The Committee shall be directly responsible to Government for the administration of the Asylum, and shall carry out all the orders of Government relating thereto. The Principal shall ordinarily be the Secretary to the Committee; but if the Principal be not a clergyman of the Church of England, a clergyman of that Church shall be appointed as Chaplain, and the Committee may empower the latter to perform the duties of Secretary, and, with the sanction of Government, fix his remuneration as Chaplain and Secretary and define his duties in relation to those of the Principal.

4. A meeting of the Committee shall be held every month for the transaction of business. Three members shall form a quorum. In the absence of the Chairman and the Vice-Chairman, the Committee shall elect its own chairman.

5. Any three members shall have the power of convening an extraordinary meeting on giving the Chairman, or, in his absence, the Vice-Chairman, through the Secretary, one week's notice.

6. A non-official member may at any time resign by giving notice, in writing, to the Chairman, or, in his absence, the Vice-Chairman, through the Secretary. He shall also be held to have vacated his appointment if he ceases for a period of three consecutive months to reside at Ootacamund, or if he fails to attend three consecutive meetings of the Committee. The Committee shall supply any vacancy which occurs and report the appointment to Government.

7. The Chairman, or, in his absence, the Vice-Chairman, shall have power to defer declaring a resolution to have been carried, until he shall have obtained in writing the opinion, on the point at issue, of members who may have been absent from the meeting.

8. All letters to Government shall be passed by the Committee and shall be signed by the Chairman or the Vice-Chairman, or, during the absence of both from head-quarters, by the Secretary for the Chairman, and shall be submitted through the Director of Public Instruction.

9. The Committee shall, at each monthly meeting, appoint two of their members to visit the Institution during the ensuing month. These shall record any remarks they may have to make in a book provided for that purpose. This book shall be laid on the table at each monthly meeting.

10. The Committee shall elect six ladies resident in Ootacamund as Visitors, two of whom shall be appointed at each monthly meeting to visit the Female Branch during the ensuing month. These shall record any remarks they may have to make in a book provided for that purpose. This book shall be laid on the table at each monthly meeting.

#### STAFF.

11. The Principal shall be appointed by Government on the nomination of the Committee, to which he shall be directly responsible and subordinate. All other appointments shall be made by the Principal, subject to the confirmation of the Committee. The approval of the Inspector or the Inspectress, as the case may be, shall be obtained before the appointments of teachers are confirmed.

12. The Principal, besides possessing suitable educational and administrative qualifications, shall be a member of the Church of England and a clergyman. If, however, at any time, a duly qualified clergyman is not available, a military officer, who is a member of the Church of England, may be appointed.

13. The Government may dispense with the services of the Principal at any time on giving him six months' notice or six months' salary in lieu of notice. Before resigning his appointment, the Principal shall give six months' notice, unless a shorter notice be accepted by Government.

14. The Principal shall perform such duties as may be enjoined on him by the Committee. He shall be responsible for the moral and intellectual training of the pupils. If a clergyman, he shall have pastoral charge of the institution. He shall be the executive officer of the Committee and shall be held responsible for the accounts; and he shall make all necessary disbursements, subject to the provisions of Rule 62. He shall communicate with the Chairman, or, in his absence, with the Vice-Chairman, either directly or through the Secretary, if there be a separate Secretary, on all important matters which cannot be

conveniently postponed to the next meeting of the Committee and shall generally be immediately subordinate to the Chairman or Vice-Chairman as representing the Committee.

15. The Principal or the Chaplain specially appointed by the Committee under Rule 8 shall, besides performing all such religious services as he may be required to perform by the Committee with the sanction of Government, give religious catechetical instruction to all the pupils, except such as are exempted by these rules.

16. The Headmaster shall superintend the tuition in the Male Branch, and take such part in the teaching as the Principal may direct.

17. The headmistress shall superintend the tuition in the Female Branch, and take such part in the teaching as the Principal may direct. She shall also be responsible for the moral and intellectual training of the girls, who shall be subject to her control, both in and out of the school.

18. The Assistant teachers in the Male Branch shall be under the immediate direction of the Headmaster, subject to the general authority of the Principal.

19. The Assistant teachers in the Female Branch shall be under the immediate direction of the Headmistress, and shall assist her both in and out of school, subject to the general authority of the Principal.

20. The domestic arrangements of the Male Branch shall be under the control of the Principal. Those of the Female Branch shall, subject to the approval of the Principal, be carried out by a Matron subordinate to the Headmistress. The Matron shall instruct the girls in the duties of housewifery and be present at their meals. In her absence, the Headmistress or one of the Assistant Mistresses shall be present at meals.

23. *Instruction in technical subjects.*—In the Male Branch instruction shall be given in drawing, in music, in commercial correspondence and in shorthand or type-writing up to the standard of the Intermediate Technical examination, and in telegraphy up to the standard required for the Telegraph Department. Boys who are selected to enter on the upper secondary course, shall be taught, in addition to drawing, two other optional subjects, in lieu of a second language as prescribed for the Upper Secondary examination. Other boys, after passing the Lower Secondary examination, will be taught telegraphy or music, or be prepared for the Civil and Military Medical Entrance examinations or for the examination of Inspectors' Assistants for the Madras and other Railways.

24. *Instruction in religion.*—The work of the day shall commence with religious teaching. The authorized version of the Bible shall be used, and the main truths of Christianity shall be taught without allusion to controverted points of faith and practice. The children of the Roman Catholic faith shall not be compelled to receive religious instruction from other than a clergyman or layman of their own faith. At the time when religious instruction is given in school, clergymen of the Church of Rome, or ministers of the Church of Scotland or other Presbyterian church or of a Nonconformist body, may, on giving previous notice to the Principal, attend and give instruction to the children of their respective communions in a place set apart for that purpose.

#### DIVINE SERVICE.

25. Divine service, in accordance with the rites of the Church of England, shall be performed twice in each Sunday.

26. On the application of a clergyman of the Church of Rome, or a minister of the Church of Scotland, or other Presbyterian church or Nonconformist body, requesting permission to perform divine service on a Sunday, with such of the pupils or officers of the institution as are members of his communion, a place shall be set apart for the purpose. Such applications, however, shall be made to the Principal on or before the previous Saturday. The children of the Roman Catholic faith shall not be compelled to attend divine service conducted otherwise than in accordance with the rites of the Church of Rome.

27. The pupils shall be assembled daily, morning and evening, when the sanctioned form of prayer shall be read by the Principal or by such officer as he may appoint, subject to the condition in the preceding rule.

Applications for admission shall be made through Officers Commanding Regiments, or the Head of the Departments to which the parents or guardians belong; and, in the case of pensioners, through their Paymasters or employers. In other cases, applications shall be made through any person of known respectability. All applications shall be addressed to the Secretary, who shall furnish printed forms of application and descriptive rolls to be filled up. The baptismal certificate of the candidate shall also be required, with the last-pay certificate, if he is in receipt of a Government allowance; also a leaving certificate if the candidate had attended a recognized school. Application forms shall contain a provision to the effect that, on withdrawing a pupil, the parent or guardian shall state his reason for doing so.

34. No candidate shall be admitted under five, nor above twelve years of age, except in special cases to be decided by the Committee.

35. The Secretary, in announcing to the parent or guardian the election of a candidate, shall fix a reasonable time for the candidate to join. If the candidate does not join within the period fixed, the fact shall be reported to the Committee.

36. On any boy attaining the age of sixteen (or eighteen in the case of boys allowed to enter on their Upper Secondary course) or any girl that of eighteen, the Principal shall report the circumstances to the Committee, and the Committee shall call upon the parent or guardian to remove the pupil. In the event of such pupil having neither parent nor guardian, the Committee shall take such measures as may seem best for the pupil's settlement in life. This rule, however, shall not prevent the Committee from accepting any suitable situation for a girl who shall have attained the age of sixteen years.

#### QUALIFICATIONS FOR ADMISSION.

37. The legitimate children of Europeans and Eurasians being officers or soldiers of His Majesty's British and Indian Military and Marine services, or persons employed in the Military and Civil Medical services, or effective Volunteers, of Civilians, whether connected with the public service or not, shall be eligible for admission. ## LAWRENCE ASYLUM PRESS.

No. 166, Mount Road, Madras.

ESTABLISHED 1790.

In September, 1789, the Rev. Dr. Kerr, the then Superintendent of the Lawrence Asylum, proposed the establishment of a Printing Press, for the double purpose of replenishing the funds of the Asylum and furnishing occupation to the pupils. The Press was established first in the basement of the Principal's house, now occupied by the girls of the Civil Orphan Asylum, next in what is now the Chapel, afterwards in John Pereira's, and, lastly, where it now stands on the Mount Road, and commenced operations in 1790. At first its proceedings were limited, till Lord Clive, in 1800, gave to it the Government printing, under certain conditions equally favorable to both parties. Later on, it published an official Gazette or *Government Gazette*, as it was called, the origin of the present *Fort St. George Gazette*, although it also was the best ordinary newspaper. In 1832 Government withdrew many of the privileges it had accorded to the Press, establishing the present *Fort St. George Gazette*, compelling the *Asylum Gazette*, or *Male Asylum Herald*, to pay postage, and diverting its printing to other presses.

The Ooty Branch Press was established in 1884, chiefly for the purpose of printing the Orders of the Army Head-Quarters; it also undertakes a certain quality of general work.

Almost the whole of the profits of both presses is given to the Lawrence Asylum; in 1903 Rs. 27,000 was transferred to the Asylum. The Press is conducted strictly on commercial principles, its earnings being derived mainly from work done for the public.

*Agents to the Trustees.*—R. Hill, Esq., Lieut.-Col. R. F. R. Formby, I.A., and Hon'ble Mr. C. J. Weir, I.C.S.

*Ag. Superintendent.*—Mr. H. Plumbe.

OOTY BRANCH PRESS.

*Superintendent.*—Mr. W. G. Wright.

regularly built and is divided into two parts, the White town and the Black town, separated by a canal. The White town is by the seaside. Its streets are regularly laid out and cut each other at right angles, and the houses are well built. The town has no port, but an open roadstead, which being to windward for nine months of the year, having less surf and possessing a river, is superior to that at Madras. In consequence of the small depth of water in the bar and the violence of the surf, landing can be effected only by flat-bottomed boats constructed for the purpose. Pondicherry is the seat of French empire in India. This empire, founded in 1749 by M. Dupleix, presented for some time a brilliant aspect, and seconded by native alliances threatened to subvert the foundations of the British power in the East. Towards the close of the war of 1756 Pondicherry fell into the hands of the British; and though restored by subsequent treaties never on the renewal of war made any effectual resistance. Pondicherry was raised by the French from a village to be the handsomest European city in India. It contains many fine houses in the European style; and the high culture of the vicinity, the numerous canals crossed by neatly constructed bridges and roads planted with trees, give to the surrounding district the appearance of a great garden. The inhabitants have suffered much by repeated hostilities, and being unfavourably situated for trade have been unable entirely to retrieve their affairs. But of late years trade is doing better.

## FRENCH SETTLEMENTS IN INDIA.

PONDICHERRY is situated on a flat sandy coast south-east of a long flat hill. The settlement forms part of the delta [conamooam] of the Ponnaiar, and a great portion of its surface is alluvial. Many artesian wells have been sunk, and excellent drinking water is obtainable. The hills known as the Montagnes Rouges form a natural girdle to the country about Pondicherry. The coast board of the settlement is about five miles, and its breadth from three to four miles. The climate is healthy. The territory is divided into three districts—the district of Pondicherry, properly so-called, containing besides the town, eleven villages; the district of Villenoor, containing forty-five villages; the district of Bahoor, containing thirty-six villages. These ninety-two villages are not all contiguous to each other, several being separated by English villages. The total superficies of the three districts is estimated at 59,000 acres which, in consequence of the parcelment, is scattered over a space of about 173,000 acres. The first French settlement was made here in 1674 under François Martin. In 1693 it was captured by the Dutch and restored at the Peace of Ryswick in 1699. The town was besieged by the English unsuccessfully in 1748; but was taken by Sir E. Coote in 1761 and restored in 1763. It was again captured by Sir Hector Munro in 1778 and restored in 1785; Colonel Braithwaite once more took it in 1793, and finally restored it in 1816. Down to the middle of last century Pondicherry was the finest city in India. It now extends along the sea coast about a mile and a quarter, and is about three-quarters of a mile in breadth. The town is

## PUDUKKOTTAI STATE (TRICHINOPOLY).

## MADRAS PRESIDENCY.

*Description.*—This Native State, otherwise called the Tondiman's country, lies between 19° 15' and 10° 29' N. lat., and between 78° 45' and 79° E. long., and is entirely surrounded by the British districts of Tanjore, Trichinopoly and Madura. Its area is 1,350 square miles; its population, 330,532, almost entirely agricultural. The country is for the most part a flat plain, interspersed with small rocky hills, some of which are crowned by old forts. In the south-west, hills and jungles are found, but elsewhere the State is well cultivated. There are 7,549 tanks, some of considerable size. The gross revenue of the State is about 10 lakhs of rupees. The first connection of the British Government with this Chief, then usually called Tondiman, (a family name derived from the word Tondai, an abridged form of Tondaimandalam, the supposed original home of the family) was formed at the siege of Trichinopoly in 1753, when the British army greatly depended on his fidelity and exertions for provisions. Subsequently, he was serviceable in the wars with Hyder Ally and in the Poligar War, the latter being the name given to the operations against the usurpers of the large zemindary of Shivagunga in the Madura district after the cession of the Carnatic. In 1803 he solicited as a reward for his services the favourable consideration of his claim to the fort and district of Kilanelly, situated in the southern part of Tanjore. This claim was founded on a grant by Prataap Sing, Rajah of Tanjore, and on engagements afterwards entered into by Colonel Braithwaite, General Coote, and Lord Macartney; the Government of Madras granted the fort and district of Kilanelly; the cession was confirmed by the Court of Directors, with the condition that the district should not be alienated, and that it should revert to the British Government upon proof being given at any time that the inhabitants laboured under oppression. The Rajah maintains a military force of 162 officers and men. Languages spoken, Tamil and Telugu.

Chief town, bearing the same name, is 32 miles south of Trichinopoly and 36 miles south-west of Tanjore. A Residency bungalow, a Travellers' bungalow and various other public buildings are in the town.

## THE PALANI HILLS.

The Palani Hills are situated in the Madura District of the Madras Presidency. They are about 54 miles long from East to West and 15 miles broad. Including Annjinad they cover 793 square miles. The plateau has an average elevation of about 7,000 feet. Like the Nilgiris and the Shevaroy, the Palanis consist of a mass of the charnockite series, and the general scenery is that which is characteristic of this class of rocks. The Palanis are connected towards the north-west with the Anamalais and towards the south with the Travancore hills.

The European settlement, Kodaikanal, which was a very small place twenty-five years ago, now contains over 100 European houses scattered over an area of about 4 square miles. There are also several native villages outside the drainage area of the Lake containing 354 huts with a population of about 1,900.

The settlement was in 1899 made a Municipality to the great advantage of the station, as regards sanitation and roads.

The Lake, which forms the centre of the original settlement, is formed by an artificial bund erected by the late Sir Vere Levinge and covers an area of 66 acres. Its height above sea level is 6,872 feet. There is a flourishing Boat Club with a number of good boats. The lake is well-stocked with baril (*Barilius gatusia*) which takes a fly readily.

The Club, which is centrally situated contains a good billiard table and a well supplied reading room.

In former days considerable difficulty was experienced in getting supplies at Kodaikanal, but this no longer is the case. There are several shops which retail stores at moderate prices; beef and mutton butchers are numerous, and excellent vegetables can be obtained all through the season. Bread and milk of high quality are got at Tapp's Bakery and Dairy, which is also a resort for afternoon teas. Almost all the houses in the station can now be reached by driving roads, though some of them are, naturally, rather steep. There are also driving roads to "Neutral Saddle", 7 miles away at the foot of Perumaul (7,326 feet) where there are a few houses at an elevation of about 5,200 feet; to the "Pillar Rocks" one of the finest pieces of scenery in South India and towards Pumbari, a hill village 8 miles distant. Bridle paths permit of riding excursion in many directions.

The climate of Kodaikanal is probably the best of any hill station in India. This at least was the opinion of the meteorological authorities when they fixed upon it as the site of the new solar Physics Observatory, which now forms a conspicuous object on the

top of Nadingipuram Hill. The only meteorological statistics available are those published in the Annual Reports of the Observatory for 1899-1900 and 1900-1901, and they are for a place nearly 800 feet above the Lake. The highest shade temperature recorded was 74° in March, the lowest 40°·4 in November. In low lying places, especially near the lake, frost is not uncommon in the early mornings between November and February. The monthly mean temperatures varied only from 52°·4 in November to 69°·4 in May. One of the most striking features of the climate is the extreme dryness of the atmosphere during the early months of the year. Though the annual rainfall is about 60 inches, the subsoil is so porous that even during the monsoon, water never lies on the ground for any length of time and muddy roads are practically unknown. During the south-west monsoon winds are strong in exposed places, but the Lake basin is so well sheltered that this causes no inconvenience. The usual way of coming to Kodaikanal is by rail to Ammayanayakanur station, where there is a good Travellers' bungalow. Thence by bullock transit or by jutka to the Tope bungalow at the foot of the ghaat (32 miles) where meals can be obtained if previous notice has been sent. Thence to the top—a distance of 12 miles—the journey may be made on ponies or in chairs or doolies. There are several boarding houses in the station, but as these are generally well filled during the season, no visitor should risk coming without having made all arrangements beforehand.

Stores and luggage may be sent from Ammayanayakanur by common carts, always waiting, at reasonable rates, and are carried up the Hills at a charge of 8 annas for 50 lbs. The wage of each bearer carrying a chair or dhooly is 10 annas, and the hire for riding ponies is 8 annas to Vengai paray, one rupee to the 6th mile stone, Re. 1-8 to Shembaganur, and two rupees to Kodaikanal, or Neutral Saddle, whether one or two ponies are supplied to a person.

## THE SHEVROY HILLS

Are situated in the Salem Collectorate between 78°20' East longitude and 11° 03' North latitude, and extend over an area of 150 square miles.

The highest point, Branfill's Hill, about a mile north of the Shevaroyan, from which an extensive view of the surrounding country can be obtained, is 5,410 feet above the level of the sea.

Yercaud, 4,500 feet elevation, is the principal European settlement and is resorted to by a large number of visitors as a Sanitarium in preference to the Nilgiris on account of the facility with which it is reached from Madras and other towns; and of its more genial and milder climate which suits many for whom the Nilgiris are too cold. Salem railway station, from which alone the Shevaroyas should be visited, lies 207 miles south-west of Madras, and 14 miles by road and ghât, from the centre of Yercaud station. If the necessary arrangements have been made for ascending the ghât, Yercaud may be reached within 12 hours from Madras. It (Salem railway station) is 206 miles distant from Calicut, 97 miles from Coimbatore and 126 from Trichinopoly. These Hills are approached by three ghâts, one on the southern side communicating with the town of Salem and the railway station, another on the western side leading to Kadiampatty station, distant about 12 miles; and the last traced formerly as Bandy ghât on the northern side of these Hills, connecting them with the Mullapuram railway station, distant about 19 miles. This ghât was abandoned by Government for want of funds and because of much less use to the community than a carriage-ghât to Salem, the construction of which was commenced two years ago, thanks to His Excellency Sir Arthur Havelock, after whom it will be called and is expected to be completed and thrown open to traffic in May next. From the station Yercaud is reached in about three hours, to the foot of the ghât in jukkas at one rupee each, and the ascent is done on chairs at 5 annas per cooly carrying same, six coolies to a chair. Luggage coolies 4 annas each.

No ghât is practicable for wheeled traffic, all supplies being brought up by coolies and by pack-ballocks.

Yercaud contains the following public buildings:—Holy Trinity Church (Anglican), Roman Catholic Chapel, Roman Catholic Convent, French Mission, London Mission Chapel and School, Leipzig Lutheran Mission Chapel, Post Office, Victoria Rooms, Kutcherry, three Hotels, Police Station, Market-place, Hospital and Dispensary, Chutrum for native travellers, Peons' and Clerks' quarters and Police Office and lines. There is also a Sub-Treasury in charge of the Deputy Tahsildar sanctioned by Government for the convenience of planters and residents. There is also a Sub-Registrar's office in charge of the Deputy Tahsildar, who is the Sub-Magistrate of the Hills.

The European and Eurasian inhabitants of the Shevaroyas number about 850 souls, the former being a large majority; three-fifths of this population is settled in Yercaud and the remainder are scattered in the outlying coffee estates. The Hills boast of a Rifle Volunteer Corps commanded by a Captain. Yercaud supports two Clubs, the Yercaud Club and the Shevaroy Hills Club.

There are decent drives in and around Yercaud and good bridle-paths leading to most of the plantations and villages; a Market or Shandy is held twice a week, on Sundays and Wednesdays, where all supplies can be purchased. There are also three Bakeries in Yercaud and two shops for sale of European stores and liquors.

Nearly all the English vegetables and fruit trees thrive remarkably well, and might be cultivated with profit to the grower.

The largest coffee estates are situated from 4 to 7 miles away from Yercaud at Nagalore and on the Green Hills. Here some of the most flourishing estates are to be seen.

Several exotic trees are met with, such as Eucalyptus (Blue Gum), Norfolk Pine (*Auracaria Excelsa*), Pinus Longifolia (Pine), Grevillia Robusta (Silver Oak), &c., &c., which present a striking contrast to the forest trees indigenous to these Hills, to which, however, with the exception of the Casuarina, they are much inferior in beauty. Roses and ferns of different kinds grow very well.

The permanent residents are chiefly planters, who also possess houses which they rent out during the season, which lasts from April to October, and even throughout the year. Visitors resort to these Hills to enjoy their quiet repose, bracing air, and lovely scenery.

The climate is healthy from June to February, but from March to May fever is prevalent amongst natives, who, from want of sufficient clothing and carelessness, are more exposed to it than Europeans, who, by exercising a little precaution, very rarely suffer, especially if living in the high-lying houses. These Hills get the benefit of both the south-west and north-east monsoons, which causes the rainfall to be more evenly distributed throughout the year, and thus enhances the value of the place as a coffee-growing district.

A tribe of natives, called Mallainlis (Hill-men), Vellallans by caste, the descendants of immigrants from near Conjeevaram (Kanchipuram), are to be met with living in numerous villages of from 20 to 100 conical-shaped huts. They are an agricultural race, cultivating different kinds of grain and breeding cattle and remarkable for their extreme cleanliness.

Labour is cheap. Independent of these Hill-men, coolies from the lowlands come up to work on the estates at the following rates: men Re. 1, women 10 annas, and children 6 to 8 annas per week.

There are very many spots within easy distance of Yercaud, commanding beautiful views of the low country and distant ranges, suitable for picnics and walking and riding parties, which have only to be seen to be appreciated, and the visitor is amply repaid for his walk, when he arrives at his destination, by the picturesque scenery that presents itself to his gaze.

## TRAVANCORE DIRECTORY.

*Description.*—This (the southern portion of the ancient division of Kerala) is a Native State, situated between 8° 4' and 10° 22' N. lat., and between 76° 12' and 77° 38' E. long. It is bounded on the north by the Native State of Cochin and the British District of Coimbatore; on the east by the British Districts of Madura and Tinnevely; on the south and west by the Indian Ocean. The extreme length of Travancore from north to south is 174 miles, its extreme breadth 75 miles; area, 6,730 square miles. The State is in subsidiary alliance with the British Government, to which it pays a tribute of Rupees 8,00,000 a year. It is divided for administrative purposes into 31 taluks. Trivandrum is the chief town and the residence of the Maharajah.

*Physical Geography.*—Travancore is one of the most picturesque portions of Southern India. The mountains which separate it on the east from the British districts on the Coromandel Coast, and which at some points rise to an elevation of 8,000 feet above the sea, are clothed with magnificent primeval forest; while the belt of flat country, to an average distance of about 10 miles inland from the sea, is covered with an almost unbroken mass of coconut and areca palms, which, in a great measure, constitute the wealth of the country. The whole surface is undulating, and presents a series of hills and valleys, traversed from east to west by many rivers, the floods of which, arrested by the peculiar action of the Arabian Sea on the coast, spread themselves out into numerous lakes or lagoons, connected here and there by artificial canals, and forming an inland line of smooth water-communication which extends nearly the whole length of the coast, and is of the utmost value when the sea itself is closed for navigation during the monsoon. Nanjenda, with its numerous villages, palmyra groves, and extensive swamps of rice, resembles in some respects the neighbouring district of Tinnevely, except that, unlike Tinnevely, it is nowhere sterile. Northward, this fertile plain is succeeded by the wooded and rugged surface of the Malayan country. The rich and variegated tract along the coast is finely contrasted with the mountainous wilds farther inland. The hill scenery has peculiar beauties, among which are the wild, rocky and precipitous acclivities and fantastic forms of the mountains in the southern parts. Farther north, the mountain chain becomes less bold, a few rugged cliffs and conical summits alone breaking the sameness of its outline. The high range breaks into clusters of hills, and the valleys are studded with temples and churches. Indeed, the numerous houses and gardens, scattered thickly over the country, give it an appearance entirely different from that of the eastern coast. Manacody,

Colachel, Vizhinjam, Poondoray, Anjengo, Quilon, Cauyancollam, Poracaud and Alleppey are seaport towns, of which Alleppey, Quilon and Colachel are by far the most important, the remainder being frequented only by small native craft. The hill region is so extensive, and so marked a feature of the State, that it merits special notice. The mountains are of every variety of elevation, climate and vegetation. Some tracts are even now considered inaccessible, and very little has been accurately surveyed. Certain portions have been made over to European and native capitalists, by whom the natural fertility of the soil is being turned to the best account. Some of the loftier mountains are entirely detached, except near their bases, from the neighbouring heights; they often have a precipitous descent towards the west, and are connected on that side with a succession of low hills, which diminish in altitude as they approach the coast. From Quilon southward, these secondary ranges soften down into undulating slopes, intersected by glens and valleys, which grow wider as the elevation of the hills decreases, and are cultivated invariably with rice, proving very productive. Among the mountains a few rough elevated tablelands are found; but the alternation of hill and valley is in most cases too rapid to allow of any large extent of level surface. The above remarks refer to the country west of the Periyar river, between which and Dindigul rises a confused mass of hills. These have, however, similar characteristics; their summits, either broken into projecting cliffs, or thickly covered with trees, fall generally with precipitous abruptness, and present a variety of wild and magnificent forest scenery. These solitudes inclose some elevated plains (about one-twelfth of the whole area), which afford pasturage for cattle, and enjoy a good climate for a portion of the year. To the north, the mountains rise to an elevation of 8,000 feet, with plateaux over 7,000 feet. The more important of these is part of the group known as the Anamullays. The southernmost peak of note is the sacred Agasteshwaramullay, the source of the Tambrapurny river. The plateaux, by reason of their good climate, rich soil, abundant timber and water-supply, are likely to become better known as the demand for coffee land increases. One plateau alone (Eroovinmullay or Hamilton's Valley) is 6 miles long by 3 wide, and contains about 10,000 acres of excellent tea and coffee land. Similar smaller valleys are found in the group called Melmullay, or the Kanandevan Hills. At the head of the Travancore Hills stands Aneimooddy (8,837 feet), the highest peak south of the Himalayas, and near it are several other peaks of 8,000 feet. South of this group is the lower region of the Cardamom Hills, so called from their special product. South of these, again, are large tracts of unsurveyed forest, which, with the exception of the Ashambo coffee plantations, and one or two narrow strips near the main passes, continue to the Atchancoll river. Even south of this, although the hills become lower and narrower, the country is thinly inhabited almost to Cape Comorin. Numerous rivers run down from the ghâts, which flow by tortuous courses, with high banks and rocky beds, into the backwater; most of these are navigable only near the sea. The chief river of Travancore is the Periyar, rising in the High Ranges, which after a course of 142 miles enters the backwater at Codangalore; 60 miles of this river are navigable. The Pamba, and its tributary the Atchancoll, and the Kallada are the next in importance. The Western Tambrapurny, or, as it is locally known, the Coolitor river, rising in the mountains to the north of Mahendragherry, a sister river of the larger Tambrapurny which flows east into Tinnevely, flows westward, like all other Travancore rivers. Numerous small streams cross the narrow plain between the mountains and the sea, but no large irrigation works exist on them, the plentiful rainfall making these unnecessary, except in the extreme south. Here on the Paraly and Koda there are anicuts constructed by Pandyan kings. A succession of lagoons or backwaters, connected by navigable canals, extends along the coast, from Trivandrum northwards, forming a most important means of communication. Its extreme length is nearly 200 miles, namely, from Chauvaud to Trivandrum; between the latter place and Quilon, there rises a high promontory of land about 6 miles in breadth, the highest portions of which in two places have recently been tunnelled through, to a length of over 3,000 feet and the remaining portion cut open into a canal, thus making the line of water communication complete. The total area of these lakes is 227½ square miles, of which 157½ are in Travancore, 53½ in Cochin, and 16½ in British territory. The largest lake is the Vembanaud (east of Alleppey), but except during the monsoon, it is very shallow. A strip of land from 7 miles to about half a mile wide separates these backwaters from the sea. There are, however, several outlets, those at Chetwy, Codangalore, Cochin, Cauyancollam, Idava and Paruvor being the principal ones. Every kind of merchandise and a very large portion of the produce of the country is carried on these waters. There are also several good cart roads in the inland parts of the country for local traffic and for communication with Tinnevely and Madura. The boats for water communication are of various sizes, and in most instances are formed of a single tree, the trunk of which is hollowed out. The ordinary size is about 20 feet by 2½ feet; the boats for carrying rice to a distance are larger, and have a deck or roof. Tampakam and anjaly trees are generally selected for boat-building, being durable and sufficiently large. Iron is abundant. Alum, sulphur, lignite and plumbago and mica exist. There are plumbago mines at Neyyattinkara and Nedumangand and mica mines at Eraniel. The mountains and forests of Travancore afford some of the best sport to be got anywhere in India, especially in the shape of "large game." Elephants, whose ivory is a source of State revenue, are very numerous. Tigers, leopards (including the black variety), bears, bison, sambar, or "elk," and various kinds of deer abound.

Situated in North Travancore, the British Boundary dividing them from the Pulni and Madura District on the East, and the Coimbatore District on the North.

Elevation from 1,000 feet rising to Aneimudi, 8,837 feet, the highest mountain in Southern India.

Munaar, 4,800 feet elevation, is the Head-quarters of the Kanan Devan Hills Produce Company, at which place there is a Post Office and Telegraph Office, and is within easy reach of the other estates.

Ammanakanur is the nearest Railway station, a cart road thence to Bodynaikanur, the foot of the ghât, and from there a bridle path for 20 miles to Devacolam; a Ropeway and Tramway have been constructed to Munaar, while a Railway concession has been granted to Messrs. Most of the hills is the property of the Kanan Devan Hills Produce Company, who have opened out the country.

Tea, coffee and cinchona have all been proved to thrive excellently, as also all sorts of English vegetables, fruits and flowers. The climate (excepting during the rains in the south-west monsoon) is perfect, and during December, January and February, there are sharp frosts most nights on the plateaux. The average rainfall is 100 inches, well distributed throughout the year, but the greater quantity falling during the monsoon from June to September.

Provided that nothing in this section shall apply to any railway or tramway subject to the provisions of the Indian Railways Act, 1890.

(2) Where any difference or dispute arises as to whether energy is or is not supplied or to be supplied for electric traction or to the public for any purpose within the meaning of sub-section (1), the matter shall be referred to the Local Government, and the decision of the Local Government thereon shall be final.

4. (1) The Local Government may grant a license to any person to supply energy for any purpose in any specified local area, and also to lay down electric supply-lines for the conveyance and transmission of energy from a generating station situated outside such specified local area to the boundary of such specified local area in any case in which the energy to be supplied is to be generated outside such specified local area; and in respect of every such license and the grant thereof the following provisions shall have effect, namely:—

- (a) Before granting a license under this Part the Local Government shall consult every local authority concerned, and where such local authority advances any objection to the grant of a license, the Local Government shall take such objection into consideration and, if in its opinion it is insufficient, shall record in writing and communicate to such local authority its reasons for such opinion.
- (b) Any person applying for a license under this Part shall publish a notice of his application in such manner and with such particulars as the Governor General in Council may by rule direct, and no such license shall be granted until three months from the date of the first publication of such notice as aforesaid have expired and until all representations or objections received by the Local Government within that period with reference thereto have been considered by it.
- (c) No application for a license under this Part shall be made by any local authority except in pursuance of a resolution passed at a meeting of such authority held after one month's previous notice of the same and of the purpose thereof has been given in the manner in which notices of meetings of such local authority are usually given.
- (d) A license under this Part may prescribe such terms as to the limits within which, and the conditions under which, the supply of energy is to be compulsory or permissive, and as to the limits of price to be charged in respect of the supply of energy, and generally as to such other matters as the Local Government may think fit.
- (e) The grant of a license under this Part for any purpose shall not in any way hinder or restrict the grant of another license to another person within the same area of supply for a like purpose.

(f) The provisions contained in the schedule shall be deemed to be incorporated with, and to form part of, every license granted under this Part, save in so far as they are expressly added to, varied or excepted by the license, and shall, subject to such additions, variations or exceptions (if any) which the Local Government, with the previous sanction of the Governor General in Council, is hereby empowered to make, apply to the undertaking authorized by the license, and shall be binding in like manner and to the same extent as if enacted in this Act.

(2) The Local Government may, if in its opinion the public interest so requires, revoke a license, as to the whole or any part of the area of supply, in any of the following cases, namely:—

- (a) where the licensee, in the opinion of the Local Government, makes wilful and unreasonably prolonged default in doing anything required of him by or under this Act;
- (b) where the licensee breaks any of the terms or conditions of his license the breach of which is expressly declared by such license to render it liable to revocation;
- (c) where the licensee not being a local authority fails, within a period of six months after the date of his license or such further period as the Local Government may determine and before exercising any of the powers conferred on him thereby in relation to the execution of works, to show, to the satisfaction of the Local Government, that he is in a position fully and efficiently to discharge the duties and obligations imposed on him by his license, or fails to make the deposit or furnish the security required by his license;
- (d) where the licensee is, in the opinion of the Local Government, unable, by reason of his insolvency, fully and efficiently to discharge the duties and obligations imposed on him by his license;
- (e) where the licensee, not being a local authority, shows, to the satisfaction of the Local Government, at any time after the commencement of his license, that his undertaking cannot be carried on with profit and ought to be abandoned;
- (f) where the licensee supplies energy by means of some system not approved by the Local Government;
- (g) in any other case, with the consent of the licensee and, if the licensee is not a local authority, with that of the local authority (if any) concerned, and upon such terms and conditions as it thinks just:

Provided that the Local Government shall not revoke the license as to part only of the area of supply if the licensee represents that he desires to be relieved of his liabilities in respect of the whole.

(3) Where the Local Government might, under sub-section (2), revoke a license, it may, instead of revoking the license, permit it to remain in force subject to such further terms and conditions as it thinks fit, and any further terms or conditions shall be binding upon, and be observed by, the licensee, and shall be of like force and effect as if they were contained in the license.

5. Where the Local Government revokes the license of any licensee, not being a local authority, as to the whole or any part of the area of supply, the following provisions shall have effect, namely:—

- (a) The Local Government shall serve a notice of the revocation upon the licensee and upon any local authority concerned, and shall in the notice fix a date on which the revocation shall take effect, and on and with effect from that date all the powers and liabilities of the licensee under this Act shall absolutely cease and determine.
- (b) Within one month after the service of such notice as aforesaid any local authority concerned may, if the Local Government has intimated to the local authority that it is at liberty so to do, by notice in writing, require the licensee to sell, and thereupon the licensee shall sell, to the local authority the undertaking or such part thereof as is carried on within the area for which it is constituted, on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purpose of the undertaking or such part thereof as aforesaid, such value to be, in case of difference or dispute, determined by arbitration:

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant, and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate

working, and to the suitability of the same for the purposes of the undertaking, and, where a part only of the undertaking is purchased, to any loss occasioned by severance, but without any addition in respect of compulsory purchase or of goodwill or of any profits which may be or might have been made from the undertaking, or of any similar considerations.

(c) Where no purchase has been effected by a local authority under clause (b), and any other person is willing to purchase the undertaking or such part of it as aforesaid, the Local Government may, if it thinks fit, with the consent of the licensee, or without the consent of the licensee in case the price is not less than that for which the local authority might have purchased the same, require the licensee to sell, and thereupon the licensee shall sell, to such other person the undertaking or such part thereof as aforesaid.

(d) Where a purchase has been effected under clause (b) or clause (c), the undertaking, or such part thereof as aforesaid, shall vest in the purchasers free from any debts, mortgages or similar obligations of the licensee or attaching to the undertaking; and the revocation of the license shall extend only to the revocation of the rights, powers, authorities, duties and obligations of the licensee from whom the undertaking, or such part thereof as aforesaid, is purchased, and, save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee.

(e) Where no purchase has been effected under clause (b) or clause (c), the Local Government shall have the option of purchasing the undertaking, or such part thereof as aforesaid, and, if the Local Government elects to purchase, the licensee shall sell the undertaking or part thereof to the Local Government upon terms and conditions similar to those set forth in clauses (b) and (d) save that where the Local Government is the purchaser the license shall, in so far as the Local Government is concerned, cease to have any further operation.

(f) Where no purchase has been effected under any of the foregoing clauses, the Local Government may forthwith cause the works of the licensee to be removed and the street to be reinstated and recover the cost of such removal and reinstatement from the licensee.

(g) If the licensee has been required to sell the undertaking or any part thereof, and if the sale has not been completed by the date fixed in the notice issued under clause (a), the purchaser may, with the previous sanction of the Local Government, work the undertaking or such part thereof pending the completion of the sale.

6. Where the Local Government revokes the license of a local authority as to the whole or any part of the area of supply, it may forthwith cause the works of the licensee to be removed and the street to be reinstated, and recover the cost of such removal and reinstatement from the licensee.

7. (1) Where a license has been granted, a local authority shall, on the expiration of such period, not exceeding forty-two years, and of every such subsequent period, not exceeding ten years, as shall be specified in this behalf in the license, have the option of purchasing such portion of the undertaking as is in the area for which it is constituted, and, if the local authority, with the previous sanction of the Local Government, elects to purchase, the licensee shall sell the undertaking or part thereof to it upon terms and conditions similar to those set forth in section 5, clauses (b) and (d).

(2) In any such case as aforesaid, if a local authority does not elect to purchase, the Local Government shall have the like option upon the like terms and conditions save that where the Local Government purchases the undertaking or any part thereof under such option the license shall, in so far as the Local Government is concerned, cease to have any further operation.

(3) Where, in exercise of the option conferred by sub-section (1), a local authority has elected to purchase the portion of the undertaking which is within the area for which it is constituted, the Local Government shall have the like option upon the like terms and conditions in respect to any portion of the undertaking which is without such area.

(4) Not less than twelve months' notice in writing of any election to purchase under this section shall be served upon the licensee by the local authority or the Local Government, as the case may be.

(5) Notwithstanding anything hereinbefore contained, the local authority may, with the previous sanction of the Local Government, waive its option of purchase and enter into an agreement with the licensee for the working by him of the undertaking or such portion thereof as is in the area for which such authority is constituted, until the expiration of the next subsequent period referred to in sub-section (1) upon such terms, and conditions as may be stated in such agreement.

8. Where, on the expiration of any of the periods referred to in section 7, sub-section (1), neither the local authority nor the Local Government purchases the undertaking or any portion thereof, and the license is, with the consent of the licensee, revoked, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit:

Provided that, if the licensee does not exercise such option within a period of six months, the Local Government may proceed to take action as provided in section 5, clause (f).

9. (1) The licensee shall not, at any time without the previous consent in writing of the Local Government, acquire, by purchase or otherwise, the undertaking of, or associate himself with, any person supplying, or intending to supply, energy under any other license, and, before applying for such consent, the licensee shall give not less than one month's notice of the application to every local authority, both in the licensee's area of supply, and also in the area or district in which such other person supplies, or intends to supply, energy.

(2) The licensee shall not at any time transfer his undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise without the previous consent in writing of the Local Government.

(3) Any agreement relating to any transaction of the nature described in sub-section (1) or sub-section (2) which may be made without such consent as aforesaid shall be void.

11. (1) Every licensee shall prepare and render to the Local Government, on or before such date in each year as the Local Government may by rule fix, an annual statement of accounts of his undertaking made up to such date, in such form, and containing such particulars, as may be prescribed by the said rule.

(2) The licensee shall keep copies of such annual statement at his office and sell the same to any applicant at a price not exceeding one rupee per copy.

Provided that any stay or strut required for the sole purpose of securing in position any support of an aerial electric supply-line may be fixed on any building or land or, having been so fixed, may be altered, notwithstanding the objection of the owner or occupier of such building or land, if the District Magistrate, or, in a Presidency-town, the Commissioner of Police, by order in writing so directs:

Provided also that if at any time the owner or occupier of any building or land on which any such stay or strut has been fixed shows sufficient cause, the District Magistrate or, in a Presidency-town, the Commissioner of Police, may by order in writing direct any such stay or strut to be removed or altered.

- (e) Where no requisition has been served by the owner upon the licensee under clause (d), the owner shall be deemed to have approved of the works and plan, and in that case, or where after a requisition for arbitration the matter has been determined by arbitration, the works may, upon payment or securing of compensation, be executed according to the notice and plan, subject to such modifications as may have been determined by arbitration or agreed upon between the parties.
- (f) Where the works to be executed consist of the repair, renewal or amendment of existing works of which the character or position is not to be altered, the licensee shall, except in cases of emergency, give to the repairing authority, or to the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works, and, on the expiry of such notice, such works shall be commenced forthwith and shall be carried on with all reasonable despatch and, if possible, both by day and by night until completed.

Provided that such aerial line shall be used only until the defect in the underground electric supply-line can be made good, and in no case for a period exceeding six weeks, and shall be removed as soon as may be after such defect is removed.

14. (1) Any licensee may alter the position of any pipe (not forming, in a case where the licensee is not a local authority, part of a local authority's main sewer), or of any wire under or over any place which he is authorized to open or break up, if such pipe or wire is likely to interfere with the exercise of his powers under this Act; and any person may alter the position of any electric supply-lines or works of a licensee under or over any such place as aforesaid, if such electric supply-lines or works are likely to interfere with the lawful exercise of and powers vested in him.

- (e) The owner may, at any time before the operator is entitled to commence the alteration, serve upon the operator a statement in writing to the effect that he desires to execute the alteration himself and requires the operator to give such security for the repayment of any expenses as may be agreed upon or, in default of agreement, settled by arbitration.
- (f) Where a statement is served upon the operator under clause (e), he shall not less than forty-eight hours before the execution of the alteration is required to be commenced, furnish such security and serve upon the owner a notification in writing intimating the time when the alteration is required to be commenced, and the manner in which it is required to be made; and thereupon the owner may proceed to execute the alteration as required by the operator.
- (g) Where the owner declines to comply, or does not, within the time and in the manner prescribed by a notification served upon him under clause (f), comply with the notification, the operator may himself execute the alteration.
- (h) All expenses properly incurred by the owner in complying with a notification served upon him by the operator under clause (f) may be recovered by him from the operator.

may be (hereinafter in this section referred to as "the operator") shall, unless it is otherwise agreed upon between the parties interested or in case of sudden emergency, give to the Local Government or local authority, or to such duly authorized person, or to the licensee, as the case may be (hereinafter in this section referred to as "the owner"), not less than forty-eight hours' notice in writing before commencing to dig or sink the trench, and the owner shall have the right to be present during the execution of the work, which shall be executed to the reasonable satisfaction of the owner.

(2) Where the operator finds it necessary to undermine, but not to alter, the position of any pipe, electric supply-line or work, he shall temporarily support it in position during the execution of the work, and before completion shall provide a suitable and proper foundation for it where so undermined.

(3) Where the operator (being the licensee) lays any electric supply-line across, or so as to be liable to touch, any mains, pipes, lines or service-pipes or lines belonging to any duly authorized person or to any person supplying or using energy under this Act, he shall not, except with the consent of such person and of the Local Government, lay his electric supply-lines so as to come into contact with any such mains, pipes, lines or service-pipes or lines, or except with the like consent, employ any such mains, pipes, lines or service-pipes or lines as conductors for the purpose of supplying energy.

(4) Where the operator makes default in complying with any of the provisions of this section, he shall make full compensation for any loss or damage incurred by reason thereof.

(2) Where any person fails to comply with any of the provisions of sub-section (1), the person having the control or management of the street, railway, tramway, sewer, drain or tunnel in respect of which the default has occurred, may cause to be executed the work which the defaulter has delayed or omitted to execute, and may recover from him the expenses incurred in such execution.

(3) Where any difference or dispute arises as to the amount of the expenses incurred under sub-section (2), the matter shall be determined by arbitration.

17. (1) Nothing in this Part shall be deemed to authorize or empower a licensee to place any aerial line along or across any street unless and until the Local Government, after consulting the local authority, has communicated to him a general approval in writing of the methods of construction which he proposes to adopt.

Provided that the communication of such approval shall in no way relieve the licensee of his obligations with respect to any other consent required by or under this Act.

(2) Where any aerial line has been placed or maintained by a licensee in breach of the provisions of sub-section (1), the Local Government may require the licensee forthwith to remove the same, or may cause the same to be removed and recover from the licensee the expenses incurred in such removal.

Provided that the provisions of this section shall not apply in any case in which any difference, or dispute of the nature described in section 30, sub-section (7) has been referred for determination by an Electric Inspector or other person as therein provided until such Inspector or other person has given his decision.

**25.** Where any electric supply-lines, meters, fittings, works or apparatus belonging to a licensee, are placed in or upon any premises, not being in the possession of the licensee, for the purpose of supplying energy, such electric supply-lines, meters, fittings, works and apparatus shall not be liable to be taken in execution under any process of any Civil Court or in any proceedings in insolvency against the person in whose possession the same may be.

**27.** (1) Nothing in this Act shall be deemed to authorize or empower any licensee to lay down any underground, or place any aerial, electric supply-line or other works, or to make any alterations in any telegraph line, maintained or worked by the Government or by any person licensed under the Indian Telegraph Act, 1885, without the previous sanction of the telegraph authority, to whom the licensee shall give not less than one month's notice in writing of his intention, specifying the course of the works or alterations proposed, the manner in which the works are to be utilized, the amount and nature of the energy to be transmitted, and the extent to, and manner in, which (if at all) earth returns are to be used; and the licensee shall conform with such reasonable requirements, either general or special, as may be laid down by the telegraph authority for preventing any telegraph line from being injuriously affected by such works or alterations:

Provided that, in case of emergency (which shall be stated by the licensee in writing to the telegraph authority) arising from defects in any of the electric supply-lines or other works of the licensee, the licensee shall be required to give only such notice as may be possible after the necessity for the proposed new works or alterations has arisen.

(2) Every licensee shall take all reasonable precautions in constructing, laying down and placing his electric supply-lines and other works and in working his undertaking, so as not injuriously to affect, whether by induction or otherwise, the working of any wire or line used for the purpose of telegraphic, telephonic or electric-signalling communication, or the currents in such wire or line.

(3) Where any difference or dispute arises between the licensee and the telegraph authority or any person licensed under the Indian Telegraph Act, 1885, as to whether the licensee has constructed, laid down or placed his electric supply-lines or other works, or made alterations in a telegraph line, or worked his undertaking, in contravention of sub-section (1); or sub-section (2), or as to whether the working of any wire, line or current is or is not injuriously affected thereby, the matter shall be referred to the Governor General in Council; and the Governor General in Council, unless he is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the licensee after the construction of such lines or works, may direct the licensee to make such alterations in, or additions to, his system as may be necessary in order to comply with the provisions of this section, and the licensee shall make such alterations or additions accordingly:

Provided that nothing in this sub-section shall apply to the repair, renewal or amendment of any electric supply-line, so long as the course of the electric supply-line and the amount and nature of the current transmitted thereby are not altered.

**28.** (1) Every licensee shall, within twenty-four hours of the occurrence, send to the Local Government and to the District Magistrate, or in a Presidency-town, to the Commissioner of Police, notice in writing of any accident by explosion, fire, electric shock or fall of an aerial line and also of any other accident resulting or likely to have resulted in loss of life or personal injury in any part of the licensee's works or circuits, in connection with the same, and also notice of any loss of life or personal injury actually occasioned by any such accident.

(2) The Local Government may also, if it thinks fit, appoint any Electric Inspector or other competent person to inquire and report as to the cause of any accident affecting the safety of the public, which may have been occasioned by or in connection with a licensee's works, or as to the manner in, and extent to, which the provisions of the license and of this Act, so far as these provisions affect the safety of the public, have been complied with by the licensee.

*Explanation.*—For the purposes of this section, a telegraph line shall be deemed to be injuriously affected by a work if telegraphic communication by means of such line is, whether through induction or otherwise, prejudicially interfered with by such work or by any use made thereof.

**29.** If at any time it is established, to the satisfaction of the Local Government,—

(a) that a licensee is supplying energy otherwise than by means of a system which has been approved of by the Local Government or (except in accordance with the provisions of his license) has permitted any part of his circuits to be connected with earth, or

(b) that any electric supply-lines or works of a licensee are defective; or

(c) that any works of a licensee or his supply of energy are or is attended with danger to the public safety;

the Local Government may, by order in writing, specify the matter complained of and require the licensee to remedy it in such manner as shall be specified in the order, and may also in like manner forbid the use of any electric supply-line or works until the order is complied with or for such time as is specified in the order.

**30.** (1) In the absence of an agreement to the contrary, the amount of energy supplied to a consumer or the electrical quantity contained in the supply (such amount or quantity being hereinafter referred to as "the value of the supply") shall be ascertained by means of a duly certified meter, and the licensee shall, if required by the consumer, cause the consumer to be supplied with such a meter:

Provided that the licensee may require the consumer to give him security for the price of a meter and enter into an agreement for the hire thereof, unless the consumer elects to purchase a meter.

(2) Where the consumer so enters into an agreement for the hire of a meter, the licensee shall keep the meter in proper order for correctly registering the value of the supply, and, in default of his doing so, the consumer shall, for so long as the default continues, cease to be liable to pay for the hire of the meter.

(3) Where the meter is the property of the consumer, he shall keep the meter in proper order for correctly registering the value of the supply, and, in default of his doing so, the licensee may, for so long as the default continues, cease to supply energy through the meter.

(4) The licensee or any person duly authorized by the licensee shall, at any reasonable time and on informing the consumer of his intention, have access to, and be at liberty to take off, remove, test, inspect and replace, any meter whereby the value of the supply is ascertained or to be ascertained; and, except where the meter is so hired as aforesaid, all reasonable expenses of, and incidental to, such taking off, removing, testing, inspecting and replacing, and the procuring the meter to be again duly certified, where that is thereby rendered necessary, shall, if the meter is found to be otherwise than in proper order, be recovered from the consumer; and where any difference or dispute arises as to the amount of such reasonable expenses, the matter shall be determined by arbitration:

Provided that the licensee shall not be at liberty to take off or remove any such meter if any difference or dispute of the nature described in sub-section (7) has arisen until the matter has been determined as therein provided.

(5) A consumer shall not connect any meter, whereby the value of the supply is ascertained or to be ascertained with any electric supply-line through which energy is supplied by a licensee, or disconnect the same from any such electric supply-line, without giving to the licensee not less than forty-eight hours' notice in writing of his intention.

(6) In addition to any meter which may be placed upon the premises of a consumer to ascertain the value of the supply, the licensee may place upon such premises such meter or other apparatus as he may think fit for the purpose of ascertaining or regulating either the amount of energy supplied to the consumer, or the number of hours during which the supply is given, or the maximum power taken by the consumer, or any other quantity or time connected with the supply.

Provided that the meter or apparatus shall be of a construction and pattern approved of by the Local Government, and shall be fixed and connected with the service-lines in a manner so approved, and shall be supplied and maintained entirely at the cost of the licensee, and shall not, in the absence of an agreement to the contrary, be placed otherwise than between the mains of the licensee and the consumer's terminals.

(7) Where any difference or dispute arises as to whether any meter, whereby the value of the supply as to pressure or quantity is ascertained, is or is not in proper order for correctly registering the value of the supply, or as to whether such value has in any case been correctly registered by the meter, the matter shall be determined, upon the application of either party, by an Electric Inspector or by a competent person specially appointed by the Local Government in this behalf; and, where the meter has, in the opinion of such Inspector or person, ceased to work for a period not exceeding one month, such Inspector or person shall estimate the value of the supply for such period on the basis of the value of the previous supply; and the decision of such Inspector or person shall be final, and the costs of or incidental to such determination shall be recoverable as such Inspector or person may direct: but, save as aforesaid, the register of the meter, whereby the value of the supply is ascertained, shall, in the absence of fraud, be conclusive proof of such value.

*Explanation.*—A meter shall be deemed to be "duly certified" if it is certified by an Electric Inspector or by a competent person appointed by the Local Government in this behalf to be a correct meter, and to be of a construction and pattern approved by the Local Government, and to have been fixed and connected with the electric supply-lines in a manner so approved:

Provided that, where any alteration is made in a duly certified meter, or where any such meter is unfixed or disconnected from the electric supply-lines, it shall cease to be a duly certified meter unless and until it is again duly certified as aforesaid.

### PART III.

#### RESTRICTIONS ON USE OF ENERGY NOT SUPPLIED UNDER PART II.

## THE SCHEDULE

PROVISIONS TO BE DEEMED TO BE INCORPORATED WITH, AND TO FORM PART OF,

EVERY LICENSE GRANTED UNDER PART II.

[See section 4, sub-section (1), clause (f).]

## Security and accounts.

Security for execution of works of licensee not being local authority. I. Where the licensee is not a local authority, the following provisions as to giving security shall apply, namely:—

- (a) The licensee shall, within a period of six months after the commencement of the license and before exercising any of the powers by the license conferred on him in relation to the execution of works, show, to the satisfaction of the Local Government, that he is in a position fully and efficiently to discharge the duties and obligations imposed upon him by the license throughout the area of supply.
- (b) The licensee shall, also, within six months after the commencement of the license or within such extended period as may be approved by the Local Government and before exercising any of the powers conferred on him in relation to the execution of works, deposit or secure, to the satisfaction of the Local Government, such sum if any as may be fixed by the license or, if not so fixed, by the Local Government.
- (c) The said sum deposited or secured by the licensee under the provisions of this clause shall be repaid or released to him in equal moieties, when and so soon as it may be certified by an officer appointed by the Local Government in this behalf that amounts equal to the sums so to be repaid or released have been expended by the licensee upon works executed for the purposes of the undertaking, or that distributing mains have been duly laid down by the licensee in every street or part of a street in which he is required to lay them down within a limited time, or shall be repaid or released at such earlier dates, and by such instalments, as may be approved by the Local Government.
- (d) Where the area of supply includes two or more local areas for which local authorities are constituted, the Local Government may require the deposit to be made or, the security, to be given in respect of such local areas severally, and in that case the deposit or security shall be repaid or released separately as to each local area.

Audit of accounts of licensee not being local authority. II. Where the licensee is not a local authority, the following provisions as to the audit of accounts shall apply, namely:—

- (a) The annual statement of accounts of the undertaking shall, before being rendered to the Local Government under section II of the Indian Electricity Act, 1903, be examined and audited by such person as the Local Government may appoint in this behalf, and the remuneration of the auditor shall be such as the Local Government may direct, and his remuneration and all expenses incurred by him in or about the execution of his duties, to such an amount as the Local Government shall approve, shall be paid by the licensee on demand.
- (b) The licensee shall afford to the auditor, his clerks and assistants, access to all such books and documents relating to the undertaking as are necessary for the purposes of the audit, and shall, when required, furnish to him and them all vouchers and information requisite for that purpose, and afford to him and them all facilities for the proper execution of his and their duty.
- (c) The audit shall be made and conducted in such manner as the Local Government may direct.
- (d) Any report made by the auditor, or such portion thereof as the Local Government may direct, shall be appended to the annual statement of accounts of the licensee, and shall thenceforth form part thereof.

III. The licensee shall, unless the Local Government otherwise directs, at all times keep the accounts of the capital employed for the purposes of the undertaking distinct from the accounts kept by him of any other undertaking or business.

## Nature and mode of supply.

IV. Energy shall be supplied by the licensee only by means of some system approved in writing by the Local Government and save as otherwise provided by rules under the Indian Electricity Act, 1903, the licensee shall not permit any part of any circuit to be connected with earth unless the connection is for the time being approved by the Local Government, with the concurrence of the telegraph authority.

Provisions as to electric railways and tramways. V. Where and in so far as energy is supplied to a tramway for purposes of electric traction, the following provisions shall apply, namely:—

- (a) The licensee shall employ either insulated metallic returns, or uninsulated metallic returns of low resistance, save in the case of vehicles in which the motive power is entirely self-contained.
- (b) The licensee shall take all reasonable precautions in constructing, placing and maintaining his electric supply-lines and circuits, and other works of all descriptions, and also in working his undertaking, so as not injuriously to affect, by fusion or electrolytic action, any gas or water-pipes, or other metallic pipes, structures or substances.

## Compulsory works.

VI. The licensee shall, within a period of two years after the commencement of his license, lay down suitable and sufficient distributing mains for the purposes of general supply throughout such streets or parts of streets as the Local Government may, by order in writing issued within six months of the commencement of the license, direct.

VII. Every licensee shall, not less than one month before commencing to lay in any street any electric supply-line for the supply of energy to any particular consumer, and not for the purposes of general supply, serve upon the local authority (if any) and upon the owner or occupier of all premises abutting on so much of the street as lies between the points of origin and termination of the electric supply-line so to be laid, a notice stating that the licensee intends to lay the electric supply-line, and intimating that, if within the said period any two or more of such owners or occupiers require in accordance with the provisions of the license that a supply shall be given to their premises, the necessary distributing main will be laid by the licensee at the same time as the electric supply-line intended for the particular consumer.

VIII. (1) Where, after the expiration of eighteen months from the commencement of the license, a requisition is made by six or more owners or occupiers of premises in or upon any street or part of street within the area of supply or by the Local Government or a local authority charged with the public lighting thereof, requiring the licensee to provide and lay down distributing mains for the purposes of general supply throughout such street or part thereof, the licensee shall comply within six months with the requisition, unless,—

- (a) Where it is made by such owners or occupiers as aforesaid, the owners or occupiers making it do not, within fourteen clear days after the service on them by the licensee of a notice in writing in this behalf, tender to the licensee a written contract, duly executed and with sufficient security, binding themselves to take or guaranteeing that there shall be taken, a supply of energy for not less than three years to such amount as will in the aggregate produce annually, at the current rates charged by the licensee, a reasonable return to the licensee; or,
  - (b) where it is made by the Local Government or a local authority, the Local Government or local authority, as the case may be, does not, within the like period, tender a like agreement binding itself to take a supply of energy for not less than three years for the public lighting of such street or part thereof.
- (2) Where any difference or dispute arises between the licensee, and such owners, occupiers or local authority as to the sufficiency of the security offered under this clause, or as to the amount of energy to be taken or guaranteed as aforesaid, the matter shall be referred to the Local Government and either decided by it or, if the Local Government so directs, determined by arbitration.

(3) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee.

(4) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1903; and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant.

IX. (1) Where a requisition is made by the owners or occupiers of any premises situate within one hundred yards from any distributing main in which the licensee is required to maintain a supply of energy for the purposes of general supply, requiring the licensee to supply energy for such premises, the licensee shall supply; and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy in accordance with the requisition, unless the person making it fails, within fourteen days after the

service on him by the licensee of a notice in writing in this behalf, to tender to the licensee a written contract, duly executed and with sufficient security binding himself to take a supply of energy for not less than two years to such amount as will produce, at current rates charged by the licensee, a reasonable return to the licensee;

Provided, first, that the cost of so much of any electric supply-line as may be laid for the purposes of the supply upon the property in respect of which the requisition is made, and of so much of any electric supply-line as it may be necessary for the said purposes to lay for a greater distance than one hundred feet from the licensee's distributing main, although not on that property, shall, if the licensee so requires, be paid by the owner or occupier making the requisition:

Provided, secondly, that the licensee may, after he has furnished a supply of energy for any premises, by notice in writing require the owner or occupier within seven days after the date of the service of the notice, to give him security for the payment of all money which may become due to him in respect of the supply, in case the owner or occupier has not already given that security, or in case any security given has become invalid or is insufficient; and, if the owner or occupier fails to comply with the terms of the notice, the licensee may discontinue to supply energy for such premises so long as such failure continues:

Provided, thirdly, that if the owner or occupier of any such premises as aforesaid adopts any form of lamp or burner, or uses the energy supplied to him by the licensee for any purposes, or deals with it in any manner, so as to interfere unduly or improperly with the efficient supply of energy to any other person by the licensee, or fails to keep his meter in proper order, the licensee may discontinue the supply of energy for such premises so long as such lamp or burner is so adopted, or the energy is so used or dealt with, or the meter is not kept in proper order, as the case may be:

Provided, fourthly, that the licensee shall not be bound to furnish a supply of energy to any premises if an Electric Inspector or other competent person appointed by the Local Government is satisfied that the electric line, fittings, works and apparatus therein are not in good order and condition and are likely to affect injuriously the use of energy by the licensee, or by other persons:

Provided, fifthly, that in the event of any alterations of, or additions to, any electric wires, fittings, works or apparatus within such premises as aforesaid, all such alterations or additions shall be notified to the licensee by the owner or occupier before being connected to the source of supply, with a view to their being examined and tested: and

Provided, sixthly, that, in the event of any requisition being made for a supply of energy from any distributing main of which the licensee can prove, to the satisfaction of an officer appointed by the Local Government in this behalf,—

(a) that it is already loaded up to its full-current-carrying capacity, or  
(b) that, in case of a larger amount of current being transmitted by it, the loss of pressure will seriously affect the efficiency of the supply to other consumers in the vicinity,  
the licensee may refuse to accede to the requisition for such reasonable period, not exceeding six months, as such officer may think sufficient for the purpose of amending the distributing main or laying down a further distributing main.

(2) Where any difference or dispute arises as to the sufficiency of the security offered by such owner or occupier or as to the improper use of energy, or as to any alleged defect in any wires, fittings, works or apparatus, or as to any alleged excess or defect in the pressure or quantity of the energy supplied, the matter shall be referred to the Local Government and either decided by it or, if the Local Government so directs, determined by arbitration.

(3) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee:

(4) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1903; and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant.

X. (1) Where a requisition is made by the Local Government or by a local authority requiring the licensee to supply for a period of not less than one year energy for any public lamps within the distance of one hundred yards from any distributing main in which the licensee is required to maintain a supply of energy for the purposes of

general supply, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy for such lamps in such quantities as the Local Government or the local authority, as the case may be, may require.

(2) The provisions contained in the first, fourth, fifth and sixth provisos to sub-clause (1) and in sub-clause (2) of clause IX shall, so far as may be, apply to every case in which a requisition for the supply of energy is made under this clause as if the Local Government or local authority were an owner or occupier within the meaning of those provisions.

## Charges.

Methods of charging. XI. In the absence of an agreement to the contrary, the licensee may charge for energy supplied by him to any consumer—  
(a) by the actual amount of energy so supplied; or  
(b) by the electrical quantity contained in the supply; or  
(c) by such other method as may be approved by the Local Government:

Provided, first, that, where the licensee charges by any method so approved by the Local Government, any consumer who objects to that method may, by not less than one month's notice in writing, require the licensee to charge him, at the licensee's option, either by the actual amount of energy supplied to him or by the electrical quantity contained in the supply, and thereafter the licensee shall not, except with the consent of the consumer, charge him by another method:

Provided, secondly, that, before commencing to supply energy through any distributing main for the purposes of general supply, the licensee shall give notice, by public advertisement, of the method by which he purposes to charge for energy so supplied; and, where the licensee has given such notice, he shall not be entitled to change that method of charging without giving not less than one month's notice in writing of such change to the Local Government, to the local authority (if any) concerned, and to every consumer of energy who is supplied by him from such distributing main:

Provided, thirdly, that, if the consumer is provided with a duly certified meter for the purposes of ascertaining the value of the supply and the licensee changes the method of charging for the energy supplied by him from the distributing main, the licensee shall bear the expense of providing a new duly certified meter if such is necessary for the purpose of ascertaining the value of the supply according to the new method of charging.

XII. The price charged by the licensee for energy supplied by him shall not exceed the maximum fixed by his license, or, in the case of a method of charge approved by the Local Government, such maximum as the Local Government shall fix on approving the method:

Provided that, if, at any time after the expiration of seven years from the commencement of the license, the Local Government considers or is satisfied that the maximum so fixed or approved as aforesaid should be altered, it may, after such inquiry (if any) as it thinks fit, make an order accordingly, which shall have effect from such date as may be mentioned therein:

Provided, also, that where an order in pursuance of the foregoing proviso has been made, no further order altering the maximum fixed thereby shall be made until the expiration of another period of seven years.

XIII. The price to be charged by the licensee and to be paid to him for energy supplied for the public lamps, and the mode in which those charges are to be ascertained, shall be settled by agreement between the licensee and the Local Government or the local authority, as the case may be, and, where any difference or dispute arises the matter shall be determined by arbitration.

## Testing and inspection.

XIV. The licensee shall, at any place within reasonable distance from any main, establish at his own cost and keep in proper condition such number of testing stations as the Local Government may direct for the purpose of testing the supply of energy in the main, and shall supply and keep in proper condition thereat, and on all premises from which he supplies energy, such instruments for testing as the Local Government may approve, and shall connect all such testing stations, by means of proper and sufficient electric supply-lines, with the distributing mains, and shall supply energy to each testing station for the purpose of testing.

XV. The licensee shall afford all facilities for inspection and testing of his generating, converting and testing stations and all other parts of his electric system and for the reading, testing and inspection of instruments.

XVI. The licensee may, on each occasion of the testing of any distributing main or electric supply-line or the testing or inspection of any instruments, be represented by an agent who may be present but shall not interfere with the testing or inspection.

XVII. On the occasion of the testing of any main of the licensee by an Electric Inspector, reasonable notice thereof shall be given to the licensee, and the testing shall be carried out at such suitable hours as, in the opinion of the Electric Inspector, will least interfere with the supply of energy by the licensee, and in such manner as the Electric Inspector may think

(4) Nothing in sub-section (2) shall be deemed to preclude any such officer or his servants or workmen from exercising at any time the said powers for the purpose of removing, wholly or in part, any building or other obstruction maintained, created, added to, altered, planted, stacked, stored or otherwise accumulated in contravention of this Act or of any rule or order made thereunder or of any condition prescribed in accordance therewith.

Application of certain sections to the Indian Penal Code. **11.** Every person required to make or deliver a statement under section 9 or section 10 shall be deemed to be legally bound to do so within the meaning of sections 175 and 176 of the Indian Penal Code, 1860.

**12.** On the day fixed under section 9, or on any other day to which the inquiry has been adjourned, the Collector shall proceed to inquire into the objections (if any) which any person interested has stated pursuant to a notice given under the said section to the measurements made under section 8, and into the decrease in the value of the land, and into the respective interests of the persons claiming the compensation, and shall make an award under his hand of—

**15.** For the purpose of inquiries under this Act the Collector shall have power to summon and enforce the attendance of witnesses, including the parties interested or any of them, and to compel the production of documents, by the same means, and (so far as may be) in the same manner, as is provided in the case of a Civil Court under the Code of Civil Procedure, 1882.

Matters to be considered and neglected. **16.** In determining the amount of compensation, the Collector shall be guided by the provisions contained in sections 23 and 24.

**17.** Whenever the officer exercising powers conferred by section 6 considers it necessary that anything in respect of which any person is or may be entitled to compensation but of which no notice has been given or compensation awarded, under sections 9 and 12, respectively, should be done in pursuance of the said powers, the Collector shall cause supplementary notice to be given, as nearly as may be, in the manner prescribed by section 9 and subject to the limit of time imposed by sub-section (1) of that section, and the provisions of sections 10 to 16 shall, so far as they are applicable, be deemed to apply to any further inquiry and award which may be held or made in consequence of such supplementary notice.

### PART III

#### REFERENCE TO COURT AND PROCEDURE THEREON.

**18.** (1) Any person interested who has not accepted the award may, by written application to the Collector, require that the matter be referred by the Collector for the determination of the Court, whether his objection be to the measurement of the land, the amount of the compensation, the persons to whom it is payable, or the apportionment of the compensation among the persons interested;

Provided that every such application shall be made,—

- (a) if the person making it was present or represented before the Collector at the time when he made his award, within six weeks from the date of the Collector's award;
- (b) in other cases, within six weeks of the receipt of the notice from the Collector under section 18, sub-section (2), or within six months from the date of the Collector's award, whichever period shall first expire.

(2) The application shall state the grounds on which objection to the award is taken.

Collector's statement to the Court. **19.** (1) In making the reference the Collector shall state, for the information of the Court, in writing under his hand,—

- (a) the situation and extent of the land with particulars of any damage caused under section 6 or of restrictions imposed under section 7;
- (b) the names of the persons whom he has reason to think interested in such land;
- (c) the amount of compensation awarded under section 12; and,
- (d) if the objection be to the amount of the compensation, the grounds on which the amount of compensation was determined.

(2) To the said statement shall be attached a schedule giving the particulars of the notices served upon, and of the statements in writing made or delivered by, the parties interested respectively.

**20.** The Court shall thereupon cause a notice specifying the day on which the Court will proceed to determine the objection, and directing their appearance before the Court on that day, to be served on the following persons, namely:—

- (a) the applicant;
- (b) all persons interested in the objection, except such (if any) of them as have consented without protest to receive payment of the compensation awarded; and,
- (c) if the objection is in regard to the area of the land, the nature of the obstructions or the amount of the compensation, the Collector.

Restriction on scope of proceedings. **21.** The scope of the inquiry in every such proceeding shall be restricted to a consideration of the interests of the persons affected by the objection.

Proceedings to be in open Court. **22.** Every such proceeding shall take place in open Court, and all persons entitled to practise in any Civil Court in the Province shall be entitled to appear, plead and act, as the case may be, in such proceeding.

Matters to be considered in determining compensation. **23.** (1) In determining the amount of compensation to be awarded for damage caused, or to be caused, or for restrictions imposed under this Act, the Court shall take into consideration—

- (a) the actual decrease in market-value of the land owing to the publication of the declaration relating thereto under section 3 and any damage caused or to be caused under section 6;
- (b) the damage sustained by the person interested, by reason of the removal of any standing crops in the exercise of any power conferred by section 6;
- (c) the damage (if any) sustained by the person interested, by reason of ceasing to be able to use such land conjointly with his other land;
- (d) the damage (if any) sustained by the person interested by anything done or ordered under sections 6 and 7 injuriously affecting his other property, movable or immovable, in any other manner, or his earnings; and,
- (e) if, in consequence of the imposition of restrictions, the person interested is compelled to change his residence or place of business, the reasonable expenses (if any) incidental to such change.

(2) In addition to the amount representing the actual decrease in the market-value of the land as above provided, the Court shall in every case award a further sum of fifteen per centum on such amount.

Matters not to be considered in determining compensation. **24.** In determining the amount of compensation to be awarded for damage caused, or to be caused, or for restrictions imposed under this Act, the Court shall not take into consideration—

- (a) the degree of urgency which has led to the damage or the imposition of restrictions;
- (b) any disinclination of the person interested to submit to damage or restrictions;
- (c) any damage sustained by him, which, if caused by a private person, would not render such person liable to a suit;

- (d) any increase to the value of the other land of the person interested, accruing or likely to accrue from anything done under this Act; or
- (e) any outlay or improvements on, or disposal of, the land commenced, made or effected without the sanction of the Collector after the date of the publication of the declaration under section 3.

**25.** (1) When the applicant has made a claim to compensation, pursuant to any notice given under section 9, the amount awarded to him by the Court shall not exceed the amount so claimed or be less than the amount awarded by the Collector under section 12.

(1) When the applicant has refused to make such claim or has omitted without sufficient reason (to be allowed by the Judge) to make such claim, the amount awarded by the Court shall in no case exceed the amount awarded by the Collector.

(3) When the applicant has omitted for a sufficient reason (to be allowed by the Judge) to make such claim, the amount awarded to him by the Court shall not be less than, and may exceed, the amount awarded by the Collector.

**26.** Every award under this Part shall be in writing signed by the Judge and shall specify the amount awarded under section 23, sub-section (1), clause (a), and also the amounts (if any) respectively awarded under each of the other clauses of the same sub-section, together with the grounds of awarding each of the said amounts.

**27.** (1) Every such award shall also state the amount of costs incurred in the proceedings under this Part, and by what persons and in what proportion they are to be paid.

(2) When the award of the Collector is not upheld, the costs shall ordinarily be paid by the Collector, unless the Court is of opinion that the claim of the applicant was so extravagant or that he was so negligent in putting his case before the Collector that some deduction from his costs should be made, or that he should pay a part of the Collector's costs.

**28.** If the sum which, in the opinion of the Court, the Collector ought to have awarded as compensation is in excess of the sum which the Collector did award as compensation, the Court may direct that the Collector shall pay interest on such excess at the rate of six per centum per annum from the date of his award to the date of payment of such excess into Court.

Collector may be directed to pay interest on excess compensation.
