Owing to the volume of statistics compiled for presentation in India Volume I—Part III, the Tables are presented in two separate books. This first book contains the Household Economic Tables B-X—B-XVII and SCT-V for all States (except Uttar Pradesh). The second book contains the tables for India, Zones, Uttar Pradesh and Union Territories.

NOTE

For the first time in the Indian Census an attempt was made in 1961 to collect economic data on the basis of households in addition to what is collected for each individual citizen. In a predominantly agricultural country where most of the population is in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as an entity. A decision was therefore taken that the information relating to the economic activities of the majority of Indian households *viz.*, cultivation and household industry, should be collected at the Census.

A Household Schedule was used at the Census for the purpose. In the schedule information on the extent of land cultivated by the household either owned or held from Government or held from private persons or institutions for payment in money, kind or share; land given to private persons for cultivation for payment in money, kind or share; nature of household industry conducted by the household and the duration of the industry in a year alongwith number of family workers and hired workers engaged in cultivation or household industry or in both were collected. At the back of the Household Schedule there was a Census Population Record as counted at the Census in each household giving the essential information for each individual enumerated in the household like name, sex, relationship to Head of household, age, marital status and description of work, if working. The procedure adopted was to copy out part of the information collected in the individual slip on to the Census Population Record. A copy each of the Household Schedule and Census population Record is reproduced in Appendix I to this note.

The Household Schedules were filled up by the enumerators at the time of 1961 Census enumeration. The instructions issued to the enumerators for filling up the Household Schedule are reproduced below:—

A. Instructions for filling up the Household Schedule

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district,

tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census, a Census House has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'un-related persons living together'. In such a Household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the weekdays in town and spends the week-ends at home, he should be recorded as Head of Household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is in charge in his absence should be recorded as the Head of the household.

If the Head of the Household is a member of a Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the head of the household belongs within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without

the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);
- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
- (d) tenants holding land on temporary leases who are liable to ejectment; and
- (e) areas held on condition of rendering service either to a village community or to Government, (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following :—

- (a) land taken for a fixed amount of money,
- (b) land taken for a fixed amount of produce,
- (c) land taken for a share of the produce,
- (d) land for which money is paid partly in one and partly in any other form mentioned above, and
- (e) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of

separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. The area figures should be recorded in acres up to the first place of decimal, and not rounded up to the nearest acre. For example, if a household has $3\frac{1}{4}$ standard bighas of land, it will be entered as 2.2 acres (1 acre=1 bigha 12 kathas, where 1 katha=1,361 sq. ft. and 1 acre=4,840 sq. yds.) The local bigha may, however, vary from place to place. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold :

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and

members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the Industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head', and ascertain how

many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholtime employment during last working season or should be in whole-time employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to 'Total.' Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a Household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly in the case of Households engaged in Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon,

The Household Schedule was not canvassed in Union Territories of Goa, Daman and Diu and North-East Frontier Agency

The following Household Economic Tables have been prepared on the basis of the data collected on the Household Schedule :

Table B-X	Sample Households (i) Engaged neither in Cultivation nor Household Industry (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas.
Table B-XI	Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately
Table B-XII	Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately
Table B-XIII	Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately
Table B-XIV	Sample Households engaged only in Household Industry classified by Principal Household Industry in all areas.
Part A	Households classified by Major Groups of Principal Household Industry and number of persons engaged
Part B	Households classified by Minor Groups of Principal Household Industry
Table B-XV	Sample Households engaged both in Cultivation and Household Industry classified by size of land in Rural and Urban areas separately.
Table B-XVI	Sample Principal Household industry classified by period of working and total number of workers engaged in Household Industry in all areas.
Table B-XVII	Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (a) neither in Cultivation nor in Industry (b) in Household Industry only and (c) in Cultivation sub-classified by size of land cultivated

Table SCT-V Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only. (Households of members of Scheduled Castes/Tribes in a 20% Sample of all Households)

Part A for members of Scheduled Castes

Part B for members of Scheduled Tribes

The Household Economic Tables have been prepared on the basis of 20% sample of family households except for Andaman and Nicobar Islands and Dadra and Nagar Haveli for which all the Schedules were tabulated. The following instructions were issued regarding the selection of Sample Households:

"For purposes of tabulation every fifth schedule from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluk and for urban areas of a district i.e., the households left over in a household schedule pad should be carried over to the next household schedule pad for the selection of sample household.

Before marking the sample households the household schedule pad should be arranged in the order of location code number of villages in a tahsil/taluk in the case of rural areas and in the order of location code number of towns in a district for urban areas. The first sample schedule should be chosen randomly among the first five households in the first household schedule pad and stamped (S) as selected. This random number (random start) should be chosen separately for rural areas of each tahsil/taluk and for urban areas of the district. From the first random household every fifth household should be continuously stamped as selected. A rubber stamp will have to be specially prepared for this purpose. The samples should be continuously marked for all pads of villages in tahsil/taluk or urban area in a district. If in a particular household schedule pad at the end, some households (this will be four or less) are left after marking sample households, the households left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household.

In short the following points should be strictly followed while selecting the sample households.

(i) (a) All pads of household schedules of rural areas of one tahsil should be arranged in order of ascending number of location codes of villages. If in a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.

(b) Similarly all pads of urban areas in a district should be arranged in ascending order of location code numbers. Within an urban area these pads will be arranged in the order of block numbers.

(ii) After selection of the first sample schedule the sample will be continuously picked up without a break until the last pad of the Tehsil is exhausted in the rural areas and the district in urban areas.

(iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner with a rubber stamp (s).

(iv) The sample schedules (i.e. those having rubber stamp mark) will be carefully removed from the pad and tied together for a tahsil in the sequence of villages within the tahsils and in the sequence of towns in the case of urban areas the slips being arranged in the same order as when the samples were removed.

(v) These bundles should be despatched to this office.

(vi) In case two or more household schedules are utilised for a household on account of large size of the household, all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.

(vii) The programme of selection of sample household schedules should be arranged in such a way that selected household schedules for one district are sent to this office every month by each Tabulation Office.

(viii) We are not concerned with institutions, and therefore, in taking out sample we should discard institutions and confine the samples only to family household. In counting every fifth household schedule, therefore, the schedule for institutional household should be left out, the order of the sample being confined only to the schedules of households."

The Household Schedules were tabulated on machines. The schedules for all the States and Union Territories except Andhra Pradesh, Bihar, Gujarat, Jammu and Kashmir, Maharashtra and Mysore were tabulated on the machines acquired by this office. The schedules for Andhra Pradesh and Mysore were tabulated by the Gokhale Institute of Politics and Economics, Poona, on their own machines. The schedules for Bihar, Gujarat and Maharashtra were tabulated on the machines of the respective Directorate of Economics and Statistics. The schedules of Jammu and Kashmir State were tabulated manually.

Table B-X—In this table all households are divided into four categories viz., (i) households engaged neither in Cultivation nor Household Industry; (ii) households engaged in cultivation only; (iii) households engaged in Household Industry only and (iv) households engaged both in Cultivation and Household Industry. The data are given separately for Total/Rural/Urban.

Table B-XI—In this table a more detailed examination of the cultivating households which have been separated in the previous table is made. The cultivating households are classified according to the size of land cultivated. It is further cross-tabulated by the interest in land. The holding sizes in acres are Less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9 and 50+. The interest in land is classified in three types viz., (a) owned or held from Government; (b) held from private persons or institutions for payment in money, kind or share and (c) partly held from Government and partly from private persons for payment in money, kind or share. The table has been prepared separately for Rural and Urban.

Table B-XII—In this table a further study of households that are engaged only in Cultivation has been made. Each household having a particular size of holding mentioned against Table B-XI has been further cross-tabulated with reference to the number of persons working in Cultivation. The holding has been grouped into the following size ranges (in acres): Less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9, and

NOTE : Part II Census Population Record overleaf should be filled up during the first round of enumeration 10 February to 28 February; from the enumeration slips relating to the household and brought up-to-date with corrections, if any, after the second visit during check period 1 March to 3 March, 1961.

2—3 R. G. India/61

50+. In the case of households where more than one person is working the number of family workers and hired workers have been separated. Family workers have been separately tabulated by sex. The table has been prepared separately for Rural and Urban.

Table B-XIII—This table makes a study of households engaged both in Cultivation and Household Industry. There is a cross-classification of the sizes of holdings and Household Industry. The Household Industries are given up to Major Groups of the Indian Standard Industrial Classification. The table gives figures only for Major Groups of Household Industry where the number of Households is 10% or more of the total number of households in the respective Division. Major Groups of Household Industry where the number of households is less than 10% of the total number of households in the respective Division are given in the Appendix to the Table. The table gives figures for Rural and Urban separately.

Table B-XIV—This table relates to households engaged in Household Industry only. There are two parts to the Table.

In Part A, the households are classified by nature of Household Industry and the number of persons engaged in each grouped under 1, 2, 3-5, 6-10 and more than 10 persons. The Household Industries are given up to Major Groups of the Indian Standard Industrial Classification. The table gives figures only for Major Groups of Household Industry where the number of households is 10% or more of the total number of households in the respective Division. Major Groups of Household Industry where the number of households is less than 10% of the total number of households in the respective Division are given in the Appendix to the Table.

Part B gives the number of households engaged in Household Industry. For this purpose under each Major Group a list of Common Household Industries was drawn up. These were given the respective Minor group numbers. If, in a minor group, there were more than one Household Industry these were represented by sub-groups as 005.1, 005.2, etc. The list of such industries is given in Appendix II to this Note.

The tables have been prepared for Total/Rural/Urban.

Table B-XV—This table relates to households engaged both in Cultivation and Household Industry. This table is a counter part to Table B-XII. Table

B-XII relates to households engaged in Cultivation only whereas this table relates to households engaged both in Cultivation and Household Industry. This table has been prepared for Rural and Urban separately.

Table B-XVI—This table relates to households engaged in Household Industry. Data are given separately for households engaged in (a) Household Industry with Cultivation and (b) Household Industry without Cultivation. The Principal Household Industry is classified according to the period of working of the industry. The periods are 1-3 Months, 4-6 Months, 7-9 Months and 10 Months to 1 Year and months not stated. The households under each period of industry are further classified by family workers and hired workers. Family workers are tabulated by sex.

The table gives figures only for Major Groups of Household Industry where the number of households is 10% or more of the total number of households in the respective Division. Major Groups of Household Industry where the number of households is less than 10% of the total number of households in the respective Division are given in the Appendix to the Table. The table has been prepared for Total/Rural/Urban.

Table B-XVII—In this table all households have been divided into three categories viz., (i) households engaged neither in Cultivation nor Household Industry; (ii) households engaged in Household Industry only and (iii) households engaged in Cultivation. All rural households engaged in Cultivation have been further classified according to the size of land cultivated. Each of the above categories has been classified by the size of the households. The sizes are (a) households with single member, (b) households with 2-3 members, (c) households with 4-6 members, (d) households with 7-9 members and households with 10 members and over. In the case of urban areas the total number of households have been divided according to sizes.

Table SCT-V Part (A)—This is a special table for members of Scheduled Castes and corresponds to Table B-XI. This table has been prepared for Rural only.

Table SCT-V Part (B)—This is a special table for members of Scheduled Tribes and corresponds to Table B-XI. This has been prepared for Rural only.
