TABLE C–I

HOUSEHOLD (SIZE AND COMPOSITION)

This table furnishes districtwise figures relating to (*a*) the number of households and total household population with its break up by sex, and (*b*) the size of the households and their composition both by age groups and marital status. Figures for (*a*) were compiled from all the National Registers * pertaining to the district concerned, and those for (*b*) from one out of every one thousand households selected from the National Registers on a random sample basis on lines indicated in paragraph 3. Figures relating to the size of households are furnished in terms of four categories, namely the *small* households consisting of three members or less, the *medium* consisting of 4 to 6 members, the *large* consisting of 7 to 9 members and the *very large* consisting of 10 or more members. Figures relating to the composition of household by age groups are furnished in terms of three categories, namely the *infants, i.e.*, those aged less than one year, the *non-adults, i.e.*, those who have completed one year but have not completed 21 years of age and the *adults, i.e.*, all those who are aged 21 years and above. Figures relating to the composition of households by marital status are furnished in terms of three categories, namely the *unmarried*, the *married* and the ***widowed or divorced.***

**Note*:—The National Registers were generally written during the census enumeration period and contained with reference to each individual enumerated, the answers given to the more important of the fourteen census questions. In rural areas, the Registers were written separately for each village. In urban areas, they were generally written separately for each ward of the town or city. The entries in each of the Registers were made separately for each household in the serial order of house numbers.

2. In the instructions issued to enumerators it was specified that a household meant all the persons who lived together in the same house and had a common mess. It was added that it was not necessary that each of such persons should invariably use the mess. As indicated in paragraph 6 of the flyleaf to Table A-I, the house for census purposes meant every dwelling with a separate main entrance. Thus, a house could contain more than one household and a household one or more members. This distinction between the house and the household is one of the features of the 1951 Census. The instructions issued to enumerators with regard to the recording of age and the definition of unmarried, married, widowed and divorced persons are given in paragraph 2 of the flyleaf to Table C-II and in paragraph 1 of the flyleaf to Table C-III respectively.

3. The data pertaining to the size and composition of households is based on a 0.1 per cent sample of the households in the National Registers. The ' frame ' for the random selection was the despatch notes, which had been prepared immediately after the census enumeration separately for the rural and urban areas of each tahsil, by the Tahsildar or the Municipal Officer, as the case may be. These notes contained data villagewise and, in case of towns, wardwise pertaining to the population with break up by sex, the number of residential houses, *the number of households*, etc. With the help of these despatch notes, in rural areas, in case of villages having hundred households or more, blocks were formed by grouping approximately hundred households. In this process of grouping, if the remainder of the households in a village was fifty or more, the residual households were regarded as a distinct block, and if less than fifty, they were regarded as

constituting a part of the preceding block. In case of villages having less than hundred households, the number of households in the next village, or consecutive villages, in the despatch note was added till the number of households totalled to hundred or more. If this total was less than one hundred and fifty, the villages were regarded as one block, and if it was one hundred and fifty or more they were regarded as constituting two blocks. As far as possible, attempts were made to retain each big village as an independent block, or blocks, and each small village as a component of a block without splitting the village. The blocks were then numbered in serial order. The total number of blocks thus formed for a tahsil (or, in some cases, a combination of tahsils) was divided by hundred and one was added to the remainder thus obtained. The resulting figure was adopted as representing the number of the first sample block and every hundredth block thereafter was taken as the subsequent sample block for the tahsil or tahsils, as the case may be. The last house number in every sample block was divided by ten and one was added to the remainder. The household number corresponding to this figure was taken as representing the first sample household and every tenth household thereafter as representing the subsequent sample household in the sample block.

In urban areas, the same procedure as outlined above for rural areas was adopted for the selection of sample blocks, except that instead of hundred households, about five hundred households were grouped to form a block. The towns were first arranged in order of their Census Location Code Numbers for the whole district, or for the revenue division. The cities and big towns in the State were, however, treated as independent units. In the towns of this State, the number of households in the census blocks, formed for purposes of numbering houses, varied considerably. In view of this, if such a census block in a town contained approximately five hundred households, then it was treated as a distinct block and if it contained a considerably lower number, then the number of census blocks needed to raise the total of households to approximately five hundred were grouped together. If a census block had considerably more than five hundred households, it was split up into as many blocks of five hundred households as possible. If the remainder in this process of splitting the census blocks, happened to be two hundred and fifty or more households, it was treated as a separate block and if less than two hundred and fifty it was treated as part of the preceding block. The total number of blocks thus formed for the area was divided by twenty and one was added to the remainder. The resulting figure was adopted as representing the number of the first sample block and every twentieth block thereafter was taken as the subsequent sample block for the area. The last house number in every sample block was divided by fifty and one was added to the remainder thus obtained. The household number corresponding to this figure was taken as representing the first sample household and every fiftieth household thereafter as representing the subsequent sample household in the sample block. In all, 3,243 sample households were thus selected. Of this number, 2,693 were in rural and 550 in urban areas. The total number of households in the State was 3, 755,144 of which 3,083,205 households were in rural and 671,939 in urban areas. The actual number of households selected was thus 1 in 1,158 for the State, 1 in 1,145 for rural and 1 in 1,222 for urban areas, though the sampling fraction aimed at theoretically was 1 in 1,000.

These sample households were also utilized for the verification of the 1951 Census Count some months after the termination of the enumeration in March, 1951. With a view to render the sample study of these households, as representative as possible of the actual conditions in the State, the few errors that were detected during the course of this verification were also taken note of in the preparation of this table.

4. Table C-III pertaining to Age and Civil Condition and Table C-V pertaining to Single Year Age Returns, have been prepared on a ten per cent sample of the census enumeration slips selected on lines indicated in paragraph 1 of the flyleaf to Table C-II. Figures relating to age groups adopted for purposes of this table and marital status are also contained in these two tables. A comparison of the results obtained from both these sources for the State and each of its two divisions is contained in the following statement :—

TABLE C-II

LIVELIHOOD CLASSES BY AGE GROUPS

The " Age Tables ", namely Tables C-II pertaining to Livelihood Classes by Age Groups, C-III pertaining to Age and Civil Condition, C-IV pertaining to Age and Literacy and C-V pertaining to Single Year Age Returns are based only on a ten per cent sample of the enumeration slips, whereas Table C-I pertaining to Household (Size and Composition) is based on a sample of one in one thousand and the other tables are based on all the slips. The Sorters of the Tabulation Office had been instructed, at the very outset of sorting operations, to break every enumeration pad relating to a ward (in case of towns and cities) or village and to cut and shuffle the slips in the pad as in a game of cards. Each of the enumeration pads contained hundred slips, with one slip for each person enumerated. The Sorters were then asked to deal the slips into ten pigeon holes in serial order, keeping aside the slips relating to displaced persons from Pakistan. The slips in the sixth pigeon hole constituted the " Sample Slips ". The number of such slips (S) as compared with the total number of slips (T) for the State and for each of the two divisions with break up by livelihood classes is indicated below :—

The proportion of the sample slips actually obtained for the preparation of the four tables, referred to above, to every 10 of the total number of slips (minus those of the displaced persons from Pakistan) works out to 0.999 for the State, 1.000 for Livelihood Class I, 0.992 for Livelihood Class II, 1.002 for Livelihood Class III, 0.996 for Livelihood Class IV, 0.998 for Livelihood Class V, 1.000 for Livelihood Class VI; 1.007 for Livelihood Class VII and 1.000 for Livelihood Class VIII. Thus, the number of slips actually obtained was almost identical with the sampling fraction of 1 in 10 aimed at.

2. In the instructions issued to enumerators with regard to age, they were told that for census purposes age meant the age attained by the person enumerated on his last birthday. It was added that the reference date for fixing the last birthday was the 1st of March, 1951. In other words, age meant the number of years completed by a person on 1st March, 1951.

3. Table C-II gives figures districtwise, separately for the total, rural and urban population, pertaining to the number of persons belonging to each of the eight livelihood classes under the age groups 0, 1-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74 and 75 and over. The number of persons whose age was not recorded by the enumerators in the slips is indicated separately under the group " Age not stated ". These decennial age groups are based on the recommendations of the United Nations Population Commission. This grouping includes all the digits with the most favoured digit, *i.e.*, 0, at the centre and is likely to be most free from the effect of preference for particular digits in actual age returns.

TABLE C–III

AGE AND CIVIL CONDITION

This table gives figures districtwise, with break up for the rural and urban areas in each district, pertaining to the civil condition of the people under each of the eleven age groups, including the group 'Age not stated'. For purposes of this table, however, persons in the age groups of '0' and '1-4' have been treated as unmarried irrespective of the answers recorded on their enumeration slips. In the instructions issued to enumerators about the question pertaining to civil condition, it was specified that marriage should be deemed to have taken place if it was performed in accordance with any religious rite, or any custom or form of marriage recognised by the caste, tribe, or community concerned, or if it was by registration; and a divorce should be deemed to have been effected if marital ties had been severed as permitted under any religion or custom or form recognised by the caste, tribe or community concerned, or by law or mutual consent of the husband and the wife. The enumerators were further directed to treat as unmarried only that person who had never married; and as widowed only that person who had lost his wife (*or her husband, as the case may be*) by death and had not remarried.

2. Figures for divorced persons are not given separately in the table but are clubbed with the figures for the widowed. The number of divorced persons under each

of the age groups for the State and the two divisions split up sex-wise and by rural and urban areas is indicated below :—

Table C-V

Single Year Age Returns

This table gives the single year age returns for the State and for North and South Hyderabad Divisions with break up by rural and urban areas. The enumerators were asked to ascertain and record the number of years completed by the persons enumerated on the first of March 1951. The returns are as actually furnished by the people.

2. This table also has been prepared from a ten per cent sample of the slips. The procedure adopted for obtaining the sample is indicated in paragraph 1 of the flyleaf to Table C-II. This table may be of use to actuaries and research workers for constructing any desired age groups and smoothing the figures by any desired formula.

The Economic Tables for the 1951 Census are based on the Indian Census Economic Classification Scheme, 1951, prepared by the Registrar General, India, which is reproduced below (with all Appendices).

INDIAN CENSUS ECONOMIC CLASSIFICATION SCHEME

1. 1931 *Scheme of Occupations.*—The last occasion on which the economic characteristics of the people were not only ascertained but also classified and tabulated on an All-India basis was in the 1931 census.

The basis of classification adopted at that census was a Scheme of Occupations consisting of four Classes, 12 Sub-classes, 55 Orders and 195 Occupational Groups. The total following the occupations for each Class, Sub-class, Order and Group was given, together with sub-totals for numbers following occupations as "principal occupation" or as "working dependent" or as "subsidiary to other occupations."

2. *I.C.E.C. Scheme.*—The Scheme of Classification set out in this memorandum may be referred to as the Indian Census Economic Classification Scheme. It is based on the 1931 Scheme of Occupations. It embodies, however, extensive revision and re-arrangement designed to secure the following purposes, *viz.*,—

(*i*) to establish a comprehensive economic classification of the people as a whole, and not merely of persons who are gainfully occupied;

(*ii*) to simplify and improve the method of presentation of census economic data; and provide additional data; and

(*iii*) to secure international comparability of data as recommended by the Economic and Social Council of the United Nations.

3. *Basis of Classification—Economic Status and Means of Livelihood.*—The 1951 Census seeks to ascertain, the "economic status" and the "means of livelihood" of every person enumerated. Questions 9, 10 and 11 relate to these economic characteristics. What the enumerators are required to ascertain and record in respect of these questions is explained in Appendix I. The answers to Question 10 and the two parts of Question 9 will form the basis of classification of each individual.

4. *Livelihood Categories and classes.*—On the foregoing basis, the people will be divided into two broad livelihood categories, *viz.*, the Agricultural Classes and the Non-Agricultural Classes.

There will be four Agricultural Classes, defined as below:—

I—Cultivators of land, wholly or mainly owned; and their dependants.

II—Cultivators of land, wholly or mainly unowned; and their dependants.

III—Cultivating labourers; and their dependants, and

IV—Non-cultivating owners of land; agricultural rent-receivers; and their dependants.

There will be four Non-Agricultural Classes, defined as comprising all persons (including dependants) who derive their principal means of livelihood from—

V—Production (other than cultivation).

VI—Commerce.

VII—Transport.

VIII—Other Services and Miscellaneous Sources.

All these Classes will be referred to as Livelihood Classes.

5. *Livelihood Sub-classes.*—Each of the 8 Livelihood Classes will be divided into three sub-classes, with reference to their economic status as below:—

(*i*) Self-supporting Persons;

(*ii*) Non-earning Dependants; and

(*iii*) Earning Dependants.

The tests to be applied in determining to which subclass, any individual belongs are defined and fully explained in Appendix I.

6. *Economically active, semi-active, and passive persons.*—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their

individual contribution is deemed to be too small to justify their description as economically active. [Their contribution to economic activity is, however, taken into account, in the tabulation of data based on secondary means of livelihood (*vide* para. 9 below)].

All self-supporting persons are, ordinarily, economically active. But, there are certain classes and groups which constitute an exception to this rule.

These are mentioned below :—

(*i*) All self-supporting persons of Agricultural Class IV.

(*ii*) The following groups of self-supporting persons who are included in Non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders,

(*c*) Persons living on charity and other persons with unproductive occupations, and

(*d*) Inmates of penal institutions and asylums*

7. *Classification of economic activities and economically active persons.*—Economic activities may be defined as including all activities of which the result is the production of useful commodities or the performance of useful services; but not including the performance of domestic or personal services by members of a family household to one another.

The most important among all economic activities is the cultivation of land (or the production of field crops). It stands in a category by itself. All other economic activities may be regarded as falling in another category which may be referred to as "Industries and Services." All these activities may be classified with reference to the nature of the commodity produced or service performed. Under the present scheme, all Industries and Services are classified in 10 divisions; and these divisions are subdivided into 88 sub-divisions, as shown in Appendix II. The scope of activities included in each sub-division is indicated by its title, as well as by the specification of groups which are comprised in them.

Economically active persons engaged in cultivation, are either cultivators or cultivating labourers —that is, they are persons of sub-class (*i*) of agricultural classes I to III.

Economically active persons engaged in Industries and Services are classifiable in the divisions and sub-divisions shown in Appendix II. All persons included in each sub-division are further divisible into three Sections, *viz.*,—

(*i*) Employers,

(*ii*) Employees, and

(*iii*) Independent Workers.

In effecting this classification, no account will be taken of whether the classified person was actually employed or unemployed on the date of enumeration. He should be allocated to that particular description of economic activity, from which he has in fact been deriving a regular (that is non-casual) income, as his principal means of livelihood.

8. *Form and Method of Tabulation.*—The replies recorded in Census slips against Census Questions 9, 10 and 11 will be used for classifying every enumerated person within the framework of economic classification of the people described above. The result will be exhibited in three tables entitled, "The Economic Tables I, II and III."

9. *Comments on Economic Tables.—Economic Table No. I*—will show the numbers of 24 livelihood sub-classes grouped under 4 agricultural classes, and 4 non-agricultural classes. A complete picture will be presented of economically active, semi-active and passive persons.

Economic Table No. II—will specify the numbers in each of the 8 classes mentioned above, who possess a secondary means of livelihood; and cross-classify them (according to the nature of such means of livelihood) under the same eight classes. [This table is designed to include not only self-supporting persons who have more than one means of livelihood, but also earning dependants—who supplement (with their own contribution) the resources provided for their maintenance by the persons on whom they are dependent. The contribution made to economic activity by economically semi-active persons (*vide* para. 6 above) will be shown by this Table].

Economic Table No. III—is limited to economically active persons. The numbers of persons engaged in industries and services as a whole, as well as in each division and sub-division thereof will be shown in this table, divided into the three sections "Employers", "Employees" and "Independent Workers."

In all three tables, the numbers are separated by sexes, as well as residence in urban and rural areas. The All-India Tables will furnish totals by States. The State Tables will furnish total by districts.

10. *Comparability.*—The principal change involved in the present Scheme is the setting up of a comprehensive economic classification of the people, as a whole; and not merely of those among them who are engaged in gainful occupation. In the process of sorting of census information, the division of the people into "livelihood classes" takes the place of the division of the people into "communities" at the former censuses.

Consistently with this main purpose, the present scheme of classification is based mainly on the Scheme of Occupations of former censuses. Comparability with the published census tables of 1931 is secured by the references to the Occupational Group numbers of the 1931 census which are found under each sub-division in Appendix II.

The United Nations Organisation has evolved a Scheme of Classification of all Economic activities known as the "International Standard Industrial Classification "Scheme. The Scheme of divisions and sub-divisions of industries and services set out in Appendix II has been framed so as to maintain comparability with data arranged in accordance with the I.S.I.C. Scheme. This is explained fully in Appendix III.

*In Hyderabad State convicts in jails and lunatics in asylums were treated as non-earning dependants. Under-trial prisoners, however, were recorded on the basis of the answers given by them.

APPENDIX I

Census Questions 9, 10 *and* 11 *and related instructions*

1. The Census is concerned with two economic characteristics of every individual—his economic status, and his means of livelihood. The scope and meaning of these expressions will appear from an explanation of three Census questions, *viz.*:—

Question 9—Economic status;

Question 10—Principal Means of Livelihood;

and

Question 11—Secondary Means of Livelihood.

2. Form of questions:

Question 9.—*Economic status*—

Part One—Dependency.—Write 1 for a self-supporting person, 2 for a non-earning dependant, and 3 for an earning dependant.* Write the answer in the first compartment.

Part Two—Employment.—If a self-supporting person earns his Principal means of livelihood as an employer write 1, as an employee write 2, as an independent worker write 3. Write 0 in other cases. Write the answer in the second compartment.

Question 10.—*Principal means of Livelihood.*—An answer to this question should be recorded on every slip. If the slip relates to a self-supporting person record his principal means of livelihood. If the slip relates to a dependant (whether earning or non-earning) record here the principal means of livelihood of the self-supporting person on whom he is dependent. The means of livelihood which provides the largest income is the Principal means of livelihood for a self-supporting person who has more than one means of livelihood. In the case of other self-supporting persons it is the only means of livelihood.

Use the following contractions.—Write 1 for a person who cultivates land owned by him; 2 for a person who cultivates land owned by another person; 3 for a person who is employed as a labourer by another person who cultivates land; 4 for a person who receives rent in cash or kind in respect of land which is cultivated by another person.

For all other means of livelihood write fully and clearly what the person does in order to earn his livelihood and where he does it.

Question 11.—*Secondary means of livelihood.*—For a self-supporting person who has more than one means of livelihood write the means of livelihood next in importance to his principal means of livelihood. For an earning dependant write the means of livelihood which provides the earning. Use contractions given in question 10.

For a self-supporting person who has only one means of livelihood write 0. In the case of a non-earning dependant also, write 0.

3. *Question* 9—*Economic Status.*—This question is in two parts. The first part requires the labelling of every person as "a self-supporting person," or "an earning dependant" or "a non-earning dependent." Every single human being must be allotted one of these labels and not more than one of them, and this will be referred to as his Primary Economic Status.

The second part of the question has no application to non-earning dependants or to earning dependants. It relates only to self-supporting persons; and even

*In Hyderabad State 2 was written for earning dependents and 3 for non-earning dependents.

among them, those exceptional cases of self-supporting persons who support themselves without gainful occupation or economic activity (*e.g.* rentiers and pensioners) are not covered. All others (that is, all those self-supporting persons who are both economically active and gainfully occupied) are to be allotted one or other of the three labels *viz.*, "Employer"; "Employee"; or "Independent Worker"; and this will be referred to as his Secondary Economic Status.

The following extracts from the model-instructions to enumerators explain the criteria to be applied and the treatment of border-line cases.

"Where a person is in receipt of an income, *and that income is sufficient at least for his own maintenance* then he (or she as the case may be) should be regarded as a "self-supporting person." Such income may be in cash or kind.

Anyone who is not a "self-supporting person" in this sense is a "dependant". A dependant may be either an "earning dependant" or a "non-earning dependant"; the test is whether or not he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is an 'earning dependant'. A person who does not secure any income either in cash or in kind, is a 'non-earning dependant'.

Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning a part of the income. None of them, is, therefore, a non-earning dependant. Each of them should be classed as either a self-supporting person or an earning dependant, according to the share of income attributable to him (or her). The same applies to any other business carried on jointly.

This does not mean that anyone *who works* is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also secure an income.

(An) Employer (is) only that person who has necessarily to employ other persons *in order to carry on the business from which he secures his livelihood.* A person (who) employs a cook or other person for domestic service should not be recorded as an employer merely for that reason.

Persons employed as managers, superintendents, agents, etc. (who) control other workers are also employees only, and should not be recorded as employers.

An independent worker means a person who is not employed by anyone else and who does not also employ anybody else in order to earn his livelihood."

4. *Question* 10—*Principal Means of Livelihood.*—"Means of Livelihood" of any individual ordinarily means the gainful occupation which forms the source from which that income which is utilised for his maintenance is normally derived; but it is more comprehensive, inasmuch as in exceptional cases, income may be secured without gainful occupation. "Principal Means of Livelihood" means the same thing as "Means of Livelihood" for every person who has only one means of Livelihood. Where a person has more than one, that which gives him the greater part of his income is his "Principal Means of Livelihood." In the sense thus defined, every human being, without any exception, has a Principal Means of Livelihood—whether or not he is a self-supporting person. Every non-earning dependant is maintained exclusively by the income of some self-supporting person on whom he is dependent. Consequently, the Principal Means of Livelihood of the latter is required to be recorded as the Principal Means of Livelihood of the former. The same rule applies to Earning Dependants also (no attempt being made to assess the degree of sufficiency of his own income or the extent of his dependence on others).

Agricultural and non-agricultural means of livelihood are distinguished by the manner in which enumerators are required to record the answers to this question. This is important for purposes of subsequent classification of the answers. The following extracts from instructions are relevant:—

"Four simple contractions have been provided which will cover most cases where the livelihood is dependent on agriculture—Write 1 for a person who cultivates land owned by him; 2 for a person who cultivates land owned by another person; 3 for a person who is employed as a labourer by another person who cultivates land; 4 for a person who receives rent in cash or kind in respect of land which is cultivated by another person. If you find that a person falls under two of these categories note that category which provides the largest income against question 10 and the second against question 11. No note need be taken of more than two such categories in any case.

In all other cases.....Write fully and clearly what the person does in order to earn his livelihood and where he does it. There are three lines on the slip provided for answering this question. Use them fully. Avoid vague and general terms. Do not write "service", or "labour". If you are enumerating a trader, describe the articles in which he is carrying on trade and state clearly whether he is a wholesale trader or a retail trader. A retail trader, sells to the public. A wholesale trader does not. If you are enumerating a factory worker give the name of the factory or the product it makes. *e.g.*, coal mine, jute factory, cotton mill, etc."

[NOTE.—The word "owned," used in relation to land, includes every tenure which involves the right of permanent occupancy of land for purposes of cultivation. Such right should be heritable; it may be, but need not necessarily be also transferable].

5. *Question* 11—*Secondary Means of Livelihood.*—A self-supporting person may or may not have more than one means of livelihood. If he has more than one, that which provides the greatest income is recorded under question 10 as the "Principal Means of Livelihood" and the next under Question 11 as the "Secondary Means of Livelihood". It has been laid down that no note should be taken of more than two such means of livelihood in any case.

The answer to this question is invariably 'Nil' for non-earning dependents. *Exhypothesi* they secure no income; they are supported by the Principal Means of Livelihood of the persons on whom they are dependent which alone is taken to be their only means of livelihood.

In the case of every earning-dependent, there are two means of livelihood which are combined in order to support him. One is the Principal Means of Livelihood of the person on whom he is dependent. The other is the source wherefrom he secures his own income. The former is always to be treated as the "Principal Means of Livelihood" of the "earning dependent;" and the latter as his "Secondary Means of Livelihood".

6. Further elucidation of the scope and implications of these questions has been provided in supplementary instructions in the form of question and answer.

These are extracted below:—

I—*Census Question* 9 (1)—

Question 1.—In the Instructions the words are "the test is whether he secures a regular income, even though it may be small. Does the use of word 'regular' rule out persons who earn an income by seasonal employment?

Answer.—No. The word 'regular' is used in the sense of 'non-casual'. It is not intended to be confined only to income derived from continuous employment. It also includes income derived from seasonal employment. What it does exclude is individual income accruing casually and not constituting a source of income which is regularly depended upon.

Question (2).—The word 'self-supporting' as defined in the instructions, means any person whose income is sufficient at least for his own maintenance. Does this mean that an income sufficient for one man is self-supporting income? What about his direct dependents—wife, children etc.?

Answer.—Yes. The instructions mean what they say. A person must be deemed to be self-supporting if his income (such as it is) is sufficient to support him individually at his present level of living (such as it is). He does not cease to be self-supporting merely for the reason that he, his wife and children taken together are not maintained by his own income.

If the wife and children have no income of their own, they are non-earning dependents. The instructions provide that their principal means of livelihood should be deemed in every case to be the same as that of the person on whom they are dependent. This would in most cases be the husband or father who will also be the head of the household. In those exceptional cases where the husband or father is *not* the head of the household, and is also not able to support anyone but himself, then the head of the household in which the non-earning dependent is living is the person on whom he (or she) is dependent.

Remember—every "family household" is (collectively) self-supporting; otherwise it would not exist. The surplus of self-supporting persons within a family household is in every case sufficient to meet the deficit on the earning and non-earning dependents in that family household.

Question (3).—In the instructions it is recorded that if two or more members of the family household jointly cultivate land they would be classed as self-supporting or earning dependent "according to the share of income attributable to him or her". How are these shares to be assigned? What about females who, in some cases, take an active part in agricultural operations?

Answer.—The share of the income attributable to a person is what the head of the household (or whoever is the managing member) deems it to be. No attempt should be made to make a detailed calculation of this share. All that has to be ascertained is whether (in the opinion of the head of the household or managing member) the member concerned is entitled to a share which would be sufficient to cover the cost of his own maintenance.

If the answer is 'yes,' he is 'self-supporting;' if the answer is 'no' he is an 'earning dependent'.

The considerations are exactly the same whether the individual is a male or a female, an adult or a non-adult.

II—*Census Question* 9(2)—

Question (4).—Are doctors and lawyers, who employ compounders and clerks independent workers or employers ?

Answer.—They are employers. A doctor employs a compounder in order to relieve him of part of the work connected with the business on which he is engaged and by which he secures his livelihood. A lawyer employs a clerk for a like purpose.

Question (5).—A money-lender employs four persons to realise interest. Is he an employer or independent worker ?

Answer.—He is an employer. He would be an employer even if he employed only one person provided that person was regularly employed and derived his principal means of livelihood by such employment. Casual employment, or part-time employment which does not provide the principal means of livelihood of the person employed, should not be taken into account.

Question (6).—What is the status of tenants or zamindars who do not cultivate themselves but employ labourers ?

Answer.—If they employ others they are 'employers'—provided the purpose of the employer and the nature of the employment are as stated in the answers to the two preceding questions.

Question (7).—What is the status of beggars; orphans in orphanages; convicts in jails ?

Answer.—They fall in none of the three categories. Record 0 for them.

III—*Census Question* 10—

Question (8).—What is the category of a minor, a blind person or a lady who has land in his or her name but gets it cultivated by labourers. Category 1 or Category 4 ?

Answer.—Learn to distinguish between "cultivation of the land", and "performance of labour necessary for cultivating the land". There are, of course, millions of persons who perform both functions—but the functions are distinguishable and should be distinguished. The man who takes the responsible decisions which constitute the direction of the process of cultivation (*e.g.*, when and where to plough, when and what to sow, where and when to reap and so on); it is this person who should be referred to as the cultivator, even though he does not perform any manual labour whatever. The man who ploughs, or sows, or reaps, under the directions of someone else is not the cultivator—but a cultivating labourer, a different thing altogether.

The cultivator may be the owner of the land cultivated. In that case he is category 1, whether or not he also combines in himself the functions of a cultivating labourer.

Alternatively, the cultivator may be a lessee, an agent or manager (paid or unpaid). Even in this case it is immaterial whether this lessee or agent or manager also combines in himself, the functions of a cultivating labourer; he (the cultivator) is category 2, and the other person (the owner) is category 4.

Applying these principles, the answer to the question put depends on whether the minor, blind person, or lady does or does not actually direct the process of cultivation. If the person does this, the answer is category 1; otherwise, the answer is category 4.

APPENDIX—III

NOTE ON THE RELATIONSHIP BETWEEN THE INDIAN CENSUS ECONOMIC CLASSIFICATION (I.C.E.C.) SCHEME AND THE INTERNATIONAL STANDARD INDUSTRIAL CLASSIFICATION (I.S.I.C.) SCHEME OF THE UNITED NATIONS.

1. *Comparison with I.S.I.C. Scheme.*—The United Nations Organisation has evolved a Scheme of Classification of all economic activities known as the "International Standard Industrial Classification" Scheme. The Economic and Social Council of the United Nations has recommended the use of this Scheme by all member Governments "either by adopting this system of classification as a national standard, or rearranging their statistical data in accordance with this system for purposes of international comparability". The present scheme of classification gives effect to the latter of the two alternative forms of this recommendation. There are 10 divisions and 44 major groups of economic activities under the I.S.I.C. Scheme which include Agriculture and, in addition, correspond to the 10 Divisions and 88 Sub-Divisions of Industries and Services under the I.C.E.C. Scheme. The elements of the I.C.E.C. Scheme which correspond to each individual Division and each individual Major Group of the I.S.I.C. Scheme are set out in Appendix IV.

2. *Unit of Classification.*—Under the I.S.I.C. Scheme, the Unit of Classification is the organised "Establishment". The commodity produced or the service performed as a result of the work of the organised establishment is the criterion for classifying the establishment. The classification of the establishment is the classification of every member of the establishment.

Under the present (I.C.E.C.) Scheme the unit of classification is, in every case, the individual. All employers and all independent workers will be classified with reference to the commodity produced or service performed by them individually—this will be same as in the I.S.I.C. Scheme there being no question of an "establishment" distinct from the individual in these cases.

As regards "Employees", all persons engaged in production, commerce or transport (and not being domestic servants) will be classified under the appropriate sub-divisions with reference to their own activity, and without reference to that of their employer. Domestic servants will all be classed in one sub-division without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) will be classified with reference to the commodity produced or service rendered by their employers.

Thus, there is a technical distinction regarding the unit of classification adopted in the two Schemes. This is unavoidable having regard to the nature of the questions which alone can be put in a general population census in India. Nevertheless, there will be no difference between the two Schemes except as regards the allocation of those "employees" who are individually engaged in activities classifiable as production, commerce or transport, and who are employed in "establishments" whose main purpose is classifiable differently from the activity of the individual employee. The proportion of employees of this kind to the total of all active workers in industries and services (as they are organised at present in India) is unlikely to be large enough to make a significant difference to the comparability of data classified under the two Schemes.

Economic Table II

Secondary Means of Livelihood

This table gives districtwise figures, separately for males and females, in each of the livelihood classes pertaining to (*a*) self-supporting persons who have a secondary means of livelihood and (*b*) earning dependants, according to the following eight classes of the secondary means of livelihood :—

I. Cultivation of owned land.

II. Cultivation of unowned land.

III. Employment as cultivating labourer.

IV. Rent on agricultural land.

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

In a large number of cases census enumerators had recorded persons as earning dependants without indicating the particular occupation which provided the secondary means of livelihood. The number of such earning dependants, in each livelihood class, is also given separately in the last two columns of this table.

2. The terms 'Self-supporting person' and 'Earning dependant' are explained in paragraph 5 of the Indian Census Economic Classification Scheme at page (99) and Appendix I referred to therein. The procedure adopted for the classification of persons for purposes of this table according to their secondary means of livelihood under the livelihood classes of 'Production (other than cultivation)', 'Commerce', 'Transport', or 'Other services and miscellaneous sources', was the same as adopted initially for the classification of persons among these four classes according to their principal means of livelihood. This procedure is explained in the last two sub-paragraphs of paragraph 5 of the flyleaf to Table A-V.

Economic Table III

Employers, Employees and Independent Workers in Industries and Services by Divisions and Sub-divisions

In this table self-supporting persons of non-agricultural livelihood classes are classified according to their secondary economic status, namely Employer, Employee and Independent Worker, and are distributed in the various divisions and sub-divisions of Industries and Services.

The terms ' Self-supporting Person ', ' Employer ', ' Employees ' and ' Independent Worker', as adopted for census purposes, are defined in paragraphs 5 to 7 of the Indian Census Economic Classification Scheme at pages 99 and 100 and paragraph 3 of Appendix I at page 101.

2. The non-agricultural classes classified in Economic Table I correspond to the divisions and sub-divisions into which they are distributed in this table as follows :—

(*a*) Livelihood Class V—Production (other than cultivation) corresponds to Division 0, Primary Industries not elsewhere specified; Division 1, Mining and Quarrying; Division 2, Processing and Manufacture—Foodstuffs, Textiles, Leather and Products thereof; Division 3, Processing and manufacture—Metals, Chemicals and Products thereof; and Division 4, Processing and manufacture—Not elsewhere specified.

(*b*) Livelihood Class VI—Commerce corresponds to Division 6, Commerce.

(*c*) Livelihood Class VII—Transport corresponds to sub-divisions 7.0 Transport and communications otherwise unclassified and incidental services, 7.1 Transport by road, 7.2 Transport by water, 7.3 Transport by Air and 7.4 Railway transport.

(*d*) Livelihood Class VIII—Other services and miscellaneous sources includes the whole of Division 5, Construction and Utilities; sub-divisions 7.5 Storage and warehousing, 7.6 Postal Services, 7.7 Telegraph Services, 7.8 Telephone Services and 7.9 Wireless Services; and Divisions 8, Health, Education and Public Administration and 9 Services not elsewhere specified.

Livelihood Class VIII—Other services and miscellaneous sources, includes persons who derive their principal means of livelihood from unproductive activities, such as income from investments, pensions and family remittances, proceeds of begging, etc. But as explained in the paragraph 7 of the Indian Census Economic Classification Scheme at page 100 such persons are considered to be economically inactive and are excluded from the purview of this table. Consequently, the number of self-supporting persons of non-agricultural classes, as given in this table, is less than the corresponding number given in Economic Table I to the extent of the number of self-supporting persons deriving their principal means of livelihood from unproductive activities. The total number of

such persons in this State is 89,421. The districtwise details of this number, with break up both by sex and rural and urban areas, are given in the following statement :—

State and District		Total			Persons living principally on income from non-agricultural property		Persons living principally on pensions, remittances, scholarships and funds		Inmates of asylums, almshouses and recipients of doles		Beggars and vagrants		All other persons living principally on income derived from non-productive activities

3. As indicated in paragraph 7 of the Indian Census Economic Classification Scheme at page 100 only those *self-supporting persons* who derive their *principal* means of livelihood from activities the result of which is the production of useful commodities or the performance of useful services—excluding, however, the performance of domestic or personal services by members of a family household to one another—are considered to be economically active. Further, this table is confined only to such of the economically active persons as are engaged in Industries and Services. Thus, a large number of employers, employees and independent workers, in the sense the terms are generally understood, do not fall within the purview of this table. For example, village officers or artisans who returned their principal means of livelihood as one or the other of the four agricultural livelihood classes and their secondary means of livelihood as government service or the craft concerned, as the case may be, are not included in this table, as secondary means of livelihood is not taken into consideration for purposes of this table. For similar reasons, school teachers, nurses, etc., who are partly dependant on their male relatives for their maintenance, or sons of artisans or traders who assist their parents in their occupations and are partly dependant on them for their maintenance, are also excluded from the purview of this table. Again, for similar reasons, persons who earn their principal means of livelihood as employers, employees or independent workers through one or the other of the four livelihood classes, namely 'Production', or 'Commerce', or 'Transport', or 'Other services and miscellaneous sources', and their secondary means of livelihood through one or the other of the remaining three livelihood classes, are included in this table only once. For example, an employer who returned his principal means of livelihood as ownership of a cotton ginning factory and his secondary means of livelihood as ownership of a wholesale commercial concern, is classified for purposes of this table as an employer under sub-division 2.6 (Cotton Textiles) only and to this extent sub-divisions 6.4 or 6.5 (Wholesale Trade) will be short of an employer. And again, no cognizance whatsoever has been taken in census enumeration of any means of livelihood beyond the principal and secondary. In addition to these limitations inherent in the procedure adopted, the actual conduct of enumeration has also 'clouded' certain entries. The principal means of livelihood of many self-supporting persons was

returned simply as '*Khangi Mulazimath*' *i.e.*, private service. Such persons are classified under sub-division 9.0 (Services otherwise unclassified), whereas, if further details had been given they would have probably gone under other sub-divisions. For example, if such a person was a '*Gharelu Mulazim*', *i.e.*, a domestic servant, he would have been classified under sub-division 9.1 (Domestic services), and if an employee of an individual or organisation engaged in activities connected with 'Production', 'Commerce', 'Transport', or 'Other Services and Miscellaneous Sources', under the relevant sub-divisions, other than 9.0. Similarly, the prinicipal means of some self supporting persons was returned simply as '*Sarkari Mulazimath*' *i.e.*, Government service. Such persons are classified under sub-division 8.7 (Employees of State Government but not including persons classifiable under any other division or sub-division), whereas, with further details, they would have probably gone under other sub-divisions. For example, if such a person was a gangman of the Public Works Department, he would have been classified under sub-division 5.2 (Construction and maintenance—Roads, Bridges and other Transport Works); if a compounder, a vaccinator or a nurse, under sub-division 8.1 (Medical and other Health Services); and if a teacher, under sub-division 8.2 (Educational Services and Research).

District Index of Non-Agricultural Occupations

This Index gives the break-up of the number of self-supporting persons in non-agricultural livelihood classes, other than those who are economically inactive, according to each of the Divisions, Sub-Divisions and Groups of Industries and Services envisaged in the Indian Census Economic Classification Scheme—vide page 104.

2. This Index is confined to self-supporting persons deriving their principal means of livelihood from Industries and Services, and takes into account only their principal means of livelihood. Thus, self-supporting persons who are principally owner or tenant cultivators, or agricultural labourers or rent receivers, but secondarily stock raisers, rearers of small animals and insects, artisans—particularly in the rural areas—like weavers, rope makers, cobblers, tanners, makers of leather equipment for '*Moats*', etc., blacksmiths, brass-smiths silversmiths, potters, carpenters, basket makers and labourers, traders, money lenders, bankers, lawyers and their *gumasthas*, priests and *purohits*, village officers and servants, barbers, washermen, etc., have not been taken into account in the preparation of this Index. Similarly, self-supporting persons engaged in flower, fruit or vegetable gardening, or in the making of jaggery or any processing of agricultural produce, in conjunction with, or in the course of, the production of ordinary field crops, are beyond the purview of the Index, as they would have been returned principally as owner or tenant cultivators or agricultural labourers. Again, stock raisers who are principally dairymen; money lenders, bankers or exchange agents who are primarily traders; journalists, poets, authors, tutors, insurance agents, *gumasthas* of lawyers, accountants or clerks in shops, employees of theatres and cinemas, whose principal source of sustenance is something else than the occupation indicated above; persons who repair cycles or petromax lamps but principally let them out on hire; and repairers of watches, fountain pens, radios, electric goods, etc., who principally sell them, are included in the Index only on the basis of their principal means of livelihood. And again, self-supporting persons who manufacture ice or aerated waters, bakery products, or sell *pan* and cigarettes, as incidental to their running a hotel or restaurant; or persons who sell newspapers, books, drugs, chemicals, medicines, etc., as incidental to their trade in general stores, are included in this table only on the basis of the general specification of their profession. Further, self-supporting persons whose principal means of livelihood are professions which could be classified under one or more categories, *e.g.* employees of rice and oil mills—and there are quite a number of such establishments* in the state—have been classified only under one or the other of the concerned categories, thus decreasing correspondingly the number of workers in other categories. Apart from these cases, sons of artisans or traders, assisting their parents in their professions and women collecting and selling *bidi and patroli* leaves, etc., but not earning enough for their sustenance, are excluded from the Index for the reason that they are only earning dependents and are not self-supporting. Besides, women and children who pound rice, or grind flour, or collect cow-dung, as part of 'domestic or personal services by members

*There are even some combined 'Decorticating, ginning, rice and oil' mills in the state.

of a family household to one another' are also not taken into consideration as the performance of such domestic services does not by itself entitle the treatment of any person as being economically active. In addition to these limitations which are inherent in the system of enumeration and tabulation adopted during the Census and which are unavoidable under existing conditions, some omissions have also occurred due to incomplete entries in the census enumeration slips which have been detailed in paragraph 3 of the flyleaf to Economic Table III. These *illustrations* would make it obvious that the figures given in the Index do not represent the total number of persons engaged in each of the groups.
