2. The circumstances leading to the substitution of revised figures are briefly as follows:—

At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognised synonym such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organised in Madras.

(ii) Before commencing the sorting a list of synonymous names, (i.e.) names synonymous with those of the communities published in the ‘ Constitution (Scheduled Castes) Order, 1950 ’ was prepared in consultation with the Collectors of districts and sent to the State Governments.

of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be scheduled Castes in the composite Madras State (as it existed before the formation of the Andhra State) by the Constitution (Scheduled Castes) Order, 1950 issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names, in the list below:—

P R E F A C E

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

- I. Cultivators of land, wholly or mainly owned, and their dependants,
- II. Cultivators of land, wholly or mainly unowned, and their dependants,
- III. Cultivating labourers and their dependants,
- IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

- V. Production other than cultivation
- VI. Commerce,
- VII. Transport, and
- VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

- (i) Self-supporting persons,
- (ii) Non-earning dependants, and
- (iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

- (1) Self-supporting persons of Agricultural Class IV,
- (2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—
 - (a) Non-working owners of non-agricultural property ;
 - (b) Pensioners and remittance holders ;
 - (c) Persons living on charity and other persons with unproductive occupations ;
 and
 - (d) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to eight livelihood classes and three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the general population tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial establishments and Table L showing the Incidence of Leprosy ; Section (ii) containing the Rural statistics, and Section (iii) containing the Urban statistics ; and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes and Literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the Infirmary (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The Urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf notes attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION

TO

GUNTUR DISTRICT

1. (a) *Situation and Physical characteristics.*—Guntur district lies between 15° 18' and 16° 50' of the northern latitude and 79° 10' and 80° 55' of the eastern longitude. The shape of the district is roughly the picture of an umbrella spread out with the handle pointing southwards. It is bounded on the north by the Hyderabad State and Krishna district, on the east by the Krishna district and the Bay of Bengal, on the south by the Nellore district and on the west by the Nellore and Kurnool districts and the Hyderabad State. The district consists of nine taluks comprised in four Revenue Divisions as specified below :—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in the Revenue Division.	Area of taluk. SQ. MILES.	Headquarters of the taluk.
Narasaraopet.	Narasaraopet.	Narasaraopet.	716	Narasaraopet.
		Vinukonda.	644	Vinukonda.
		Palnad ..	1,041	Gurzala.
Guntur ..	Guntur ..	Guntur ..	541	Guntur.
		Sattenapalle.	718	Sattenapalle.
Tenali ..	Tenali ..	Tenali ..	324	Tenali.
		Repalle ..	297	Repalle.
Ongole ..	Ongole ..	Ongole ..	820	Ongole.
		Bapatla ..	670	Bapatla.
		Total ..	5,771	

Ongole taluk is in the southern part of the district and is situated on the sea coast. Bapatla taluk lying to the north of Ongole and Repalle taluk to the east of Bapatla taluk are also on the sea coast. Palnad taluk forms the north-western part of the district. To the east of it are situated from west to east the taluks of Sattenapalle, Guntur and Tenali. Vinukonda taluk is situated to the south of Palnad taluk. Narasaraopet taluk is to the east of Vinukonda taluk and to the north of Ongole taluk.

The district may broadly be divided into three regions, namely, the delta, the stony uplands and hills, and the black cotton plains.

The taluks of Tenali, Repalle, a major portion of Bapatla taluk and a considerable area in Guntur taluk form the deltaic portion of the district. The hilly regions consist of (1) the southern and western parts of Palnad taluk over which the Eastern Ghats and its outliers lie, (2) the western portion of Sattenapalle taluk containing low hills, (3) the isolated spots in Guntur taluk occupied by the hills, (4) the

hilly areas in Narasaraopet taluk, occupied by the Kondaveedu range and scattered hills, (5) the areas occupied by the Chemakurthy hills in Ongole taluk and (6) the extensive low hills in Vinukonda taluk. The rest of the district consists of open plains of black cotton soil. The plains are fringed along the sea coast by ridges of blown sand which extend inland for several miles. A large part of the sandy tract in Bapatla taluk is a jungle of soapnut trees.

(b) *Rivers.*—The Krishna river which takes its rise near Mahabaleshwar in Bombay State, after flowing across the Hyderabad State and along the northern boundary of the Kurnool district, reaches Guntur district nearly at the south-western corner of Palnad taluk and skirts the district along the entire northern and the greater part of its eastern boundary. The river forms the dividing line between Guntur district on one side and the Krishna district and the Hyderabad State on the other.

The Gundlakamma river rising from the Cumbum tank in Kurnool district traverses the Vinukonda and Ongole taluks.

The Musi river from Nellore district also flows across the southern portion of Ongole taluk.

The Naguleru rises in the hills in Vinukonda taluk and flows northwards across Palnad taluk and joins the Krishna.

The Chandravanka also flows north across Palnad taluk and joins the Krishna.

(c) *Forests.*—The district has few forests of any importance. The details of area and classification of the forests in each taluk are given below :—

Name of taluk.	Reserved forests. SQ. MILES.	Private forests. SQ. MILES.	Total. SQ. MILES.
Palnad	324.67	33.15	357.82
Sattenapalle	121.63	2.61	124.24
Guntur	6.83	..	6.83
Tenali	..	..	..
Vinukonda	170.01	14.57	184.58
Narasaraopet	44.66	2.82	47.48
Bapatla	20.69	..	20.69
Repalle	33.86	..	33.86
Ongole	5.47	..	5.47
Total ..	727.82	53.15	780.97

The reserved forests on the coast are mangroves and in other parts they are of a low type varying in composition and density. The private forests contain only small tree growth and shrubs and are fit for pasture.

(d) *Climate and rainfall.*—The climate is generally hot in summer except in the deltaic taluks. The coastal areas are liable to be affected by cyclone. The particulars of the average annual rainfall and the

average number of rainy days in a year in the various taluks are furnished below :—

Name of taluk.					Average annual rainfall in inches.	Average number of rainy days in a year.

The coastal and the deltaic taluks have more rainfall than the other taluks.

A statement showing the monthly mean of daily maximum and daily minimum temperature, the highest recorded temperature and the lowest recorded tempera-

ture and monthly mean rainfall for the years 1936—1940 and similar particulars and actual rainfall for 1951 as recorded at Rentachintala is shown below :—

(e) *Soils.*—Over nearly 85 per cent of the area of the district black soil is found. It is considered the most fertile. Red soils are found principally in the neighbourhood of Guntur-Guntakal railway line and arenaceous or sandy soils border on the sea coast. A small extent along the banks of the Krishna river is alluvial. The percentage distribution of soils in the taluks of the district is furnished below :—

(f) *Irrigation and drainage facilities and liability to famine.*—The canal taking off from the Krishna anicut at Vijayavada and its branches form the main source of irrigation for the delta areas. There are a few spring channels mostly near the coast. There are rainfed tanks and a few tanks fed by minor streams and rivers in the non-deltaic areas.

Palnad taluk.—The Naguleru stream irrigates a small extent. The other sources of irrigation are hill streams and tanks. The taluk is liable to famine conditions, if rains fail.

Sattenapalle taluk.—Rainfed tanks are the chief irrigation sources. The taluk is liable to scarcity conditions, if rains fail.

Guntur taluk.—The deltaic portion of this taluk is irrigated by the Krishna anicut channels. The other irrigation sources are tanks. The taluk is not generally liable to famine.

Tenali taluk.—The taluk is entirely deltaic served by the Krishna anicut canals. There is no fear of famine.

Vinukonda taluk.—Small extents are irrigated by baling from the Gundlakamma river. The other sources are mainly tanks. The taluk is liable to famine if rains fail.

Narasaraopet taluk.—Small areas are irrigated by tanks. The taluk is liable to famine conditions.

Bapatla taluk.—A major part of the taluk is served by the Krishna anicut canals. There are spring channels along the coast. There is no fear of famine.

Repalle taluk.—The taluk is purely deltaic served by the Krishna anicut canals. The taluk is free from famine.

Ongole taluk.—A small portion is irrigated by the Krishna West Bank canal. The minor irrigation tanks provide irrigation for about 1,900 acres. There are numerous spring channels along the coast which provide unfailing supply for about 2,500 acres. The taluk has not suffered from famine in recent years.

The particulars of the number of minor irrigation sources and their ayacut and the ayacut of major sources in each taluk are furnished below :—

Name of taluk.	Number of minor irrigation sources.	Ayacut of minor irrigation sources.	Ayacut of major irrigation sources.

(g) *Area cultivated with food and commercial crops.*—Paddy is the chief food crop. Cholan and cumbu are extensively grown while ragi, korra and maize are grown on limited extents. Chillies, groundnut and tobacco are the chief commercial crops. Turmeric is an important commercial crop in Tenali taluk. Casuarina plantations and cashewnut trees are extensively found along the coast in Ongole, Bapatla and Repalle taluks.

A statement showing the extent cultivated with the chief food and commercial crops in the various taluks in 1945-46 which is the most recent normal year for the district is given in Annexure I.

(h) *Communications.*—(i) (a) *Roads.*—Roads from the district lead to Vijayavada in Krishna district and to places in Nellore district. The district has 1,659

miles of roads consisting of 99 miles of National Highways, 108 miles of Provincial Highways, 803 miles of major district roads, 140 miles of other district roads, 332 miles of village roads, 8 miles of Public Works Department roads, and 169 miles of municipal roads. The district is one which suffers from inadequate road communications, and indifferently maintained district roads. Roads in delta areas suffer from the inherent defect of all delta roads. They sink in parts. The roads in upland areas suffer from lack of water at the time of formation, so that roads are seldom well consolidated. National Highways are crossed by several unbridged causeways most of which are not even concreted, so that after rains such causeways are seriously damaged. The talukwise distribution of roads except in the case of Public Works Department roads and municipal roads is given below :—

Name of taluk.	National Highways (Miles).	Provincial Highways (Miles).	Major district roads (Miles).	Other district roads (Miles).	Village roads (Miles).	Total (Miles).

(b) *Waterways.*—The Krishna West Bank canals, the Commamur canal which joins the Buckingham canal at Pedda Ganjam in Bapatla taluk and the Buckingham canal running parallel to the coast in Ongole taluk are useful as means of communications. Country crafts ply along these canals at all times conveying passengers and goods.

(ii) *Railways.*—The district has 133½ miles of broad gauge and 162 miles of metre gauge railway of the Southern Railway.

The broad gauge line from Madras to Calcutta and Delhi traverses the taluks of Ongole, Bapatla, Repalle, Tenali and Guntur. A broad gauge line connects Guntur with Repalle through Tenali. A metre gauge line proceeds from Vijayavada to Guntakal traversing the taluks of Guntur, Sattenapalle, Narasaraopet and Vinukonda. Another metre gauge line proceeds from Guntur to Macherla traversing Sattenapalle and Palnad taluks. All the taluk headquarters and the district headquarters are connected by railways.

(iii) *Post and Telegraphs*.—The particulars of the number of post and telegraph offices in each taluk are given below :—

II. (a) (i) *Growth of population*.—The particulars of population of the district and taluks in 1941 and 1951 and the percentage of variation are furnished below :—

Name of district and taluk.	Population.		Percentage of variation.
	1941.	1951.	
Guntur district	2,277,283	2,549,996	12.0
Palnad	192,309	192,776	0.2
Sattenapalle	237,345	246,029	3.7

Ongole	311,740	333,995	7.1

“ District increase is 12 per cent : 4.1 per cent for the uplands area and 19.5 per cent for the delta. The figures for the fully upland taluks range from 0.2 per cent in Palnad taluk, 2 per cent in Vinukonda taluk, 3.7 per cent in Sattenapalle taluk, 4.5 per cent in Narasaraopet taluk to 7.1 per cent in Ongole taluk. These figures reflect the comparative conditions in these taluks. Conditions in Palnad and Vinukonda are similar to those in the adjoining areas of Kurnool district and these taluks are equally liable to be affected by adverse seasonal conditions. They are both backward and interior taluks. Between these taluks on the extreme west and the delta are to be found the good upland areas of the district where dry crops can yield very well indeed in a good year, but the upland area of this district is liable to periodical adverse seasonal conditions. The delta in this district is part of the Krishna delta, the other part of which lies in Krishna district to the east of the Krishna river, but it has no large outstanding town comparable to Vijayavada; otherwise the conditions in the two parts of the Krishna delta are not materially different. The difference in the rate of increase in these two deltas, viz., 24.7 per cent in Krishna district and 19.5 per cent in Guntur district is therefore explicable. In all the upland taluks, the seasonal conditions were adverse

during the year 1950–51, with the result that large numbers of the labouring classes migrated to deltaic areas in search of work and food. On account of terrorist communist activities, there was some particky migration to towns outside these taluks from villages where some outrages took place.”

(Extracted from the Census Report—Part I.)

(ii) *Vital Statistics*.—A statement showing the number of births and deaths and deaths due to various causes in the district for the decennium 1941–50 is furnished in Annexure II.

The average birth and death rates registered during the decade 32.1 and 21.1 per mille respectively were practically the same as those for the State namely, 31.7 and 21.2. The recorded annual death rates show a downward trend since 1944. The average mortality rate of 6.9 per mille from fevers accounted for nearly a third of total deaths. There has, however, been a steady decline in the death rate from fevers which fell from 9.0 per mille in 1944 to 5.6 in 1950. The average death rate from small-pox for the decade was higher than the average for the State, while that from cholera was less. The district was free from plague. There was a noticeable and steady fall in the maternal mortality rate from 9.7 per 1,000 births in 1944 to 5.9 in 1950.

(b) *Medical relief*.—A statement showing the number of medical institutions in each taluk and their bed strength is given below :—

V. *Items of General Importance*.—Guntur, Tenali, Chirala, Ongole and Narasaraopet are the municipalities in the district.

There is a Buddhist Stupa at Bhattiprolu village in Repalle taluk under the control of the Archaeological Department.

At Nagarjunakonda Hill north of Pallareddigudem Agraharam in Palnad taluk, there are ancient ruined forts and Buddhist relics.

There are famous Buddhist Stupas at Amaravati in Sattenapalle taluk.

Guthikonda Bilam in Palnad taluk is an important place of pilgrimage for the Hindus. It also contains a spring in which the pilgrims bathe.

Kottapakonda Hill in Narasaraopet taluk is an important place of Pilgrimage attracting large crowds on the Mahasivarathri day.

There are two ancient temples of historic importance one at Bapatla and the other at Ponnur in Bapatla taluk. There is an ancient and historic temple of Pankalaswami at Mangalagiri.

There is a waterfall called Ettipothala near Tallapilli in Palnad taluk.

Chirala in Bapatla taluk is a big weaving centre and is locally known as Chinna Bombay.

Chirala is also the Headquarters of The Indian Leaf Tobacco Development Company which is a big concern providing labour for over 5,000 workers.

Dharanikota in Sattenapalle taluk was once the capital of the Kings of Andhradesa.

PART I.

Section (i).

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column 2, differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "House" Every dwelling with a separate main entrance has been treated as a house for census purposes.

5. GUNTUR DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the

previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

A-III—Towns and Villages classified by Population.

This table shows the total number of inhabited towns and villages in each taluk of the district distributed on population basis under three main heads with sub-heads under each as follows :—

(1) *Towns and villages with less than 2,000 population—*

(a) population with less than 500.

(b) population between 500 and 1,000.

(c) population between 1,000 and 2,000.

(2) *Towns and villages with population of 2,000 to 10,000—*

(a) with population of 2,000 to 5,000.

(b) with population of 5,000 to 10,000.

(3) *Towns and villages with population of 10,000 and above*

(a) with population of 10,000 to 20,000

(b) with population of 20,000 to 50,000.

(c) with population of 50,000 to 100,000.

(d) with population of 100,000 and above.

* Guntur District was formed only between 1901 and 1911.

5. GUNTUR DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-agricultural classes. There are four Agricultural classes and four Non-agricultural classes as shown below :—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned ; and their dependants.

II. Cultivators of land wholly or mainly unowned ; and their dependants.

III. Cultivating labourers ; and their dependants.

IV. Non-cultivating owners of land ; agricultural rent receivers ; and their dependants.

(ii) *Non-agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters M, P and C, respectively within brackets.

6. For the definition of a “Town” see fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

5. GUNTUR DISTRICT.

E—Summary figures by Taluks.

The data contained in this table have been given for each taluk in the district. from those furnished by the Central Survey Office, Madras.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees

4. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and vice versa from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for 'rural' and 'urban' for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural', in the districts and taluks where new towns have been recognised.

B—ECONOMIC TABLES.

B-I Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up for each census tract in the district the distribution of population, sexwise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the L.C.E.C. Scheme vide fly-leaf to Table A-V.

2. The areas comprised in each of the Census tracts into which this district has been delimited for the purposes of census tabulation are given below :—

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning

and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "self-supporting" person in this sense has been regarded as a dependant. An 'earning' dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a 'non-earning dependant'.

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning or the largest part of their income if they have more than one source of income.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

5. GUNTUR DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each Census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and sub-divisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their Secondary Economic Status, namely, Employer, Employee, and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent Workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce, or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one sub-division without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and sub-divisions into which they are distributed in this table as follows :—

Livelihood Class.	Division and subdivisions of the I.C.E.C. Scheme.
<i>Class V.</i> —Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
<i>Class VI.</i> —Commerce	Division 6.—Commerce.
<i>Class VII.</i> —Transport	Subdivisions 7-0 to 7-4 of Division 7.—Transport, Storage and Communication.
<i>Class VIII.</i> —Other Services and miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7-0 to 7-4. Division 8.—Health, Education and Public Administration. Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other un-productive activities. These are not however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-Agricultural Class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sex-wise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the

course of the Census of Small-scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf of general population Table A-V.

3. The areas included in each Census tract in the district has been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given as an Appendix.

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of Sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth House-numbering Block in the Rural areas and every fiftieth household in every twentieth House-numbering block or locality in Urban areas.

2. The Agricultural and the Non-Agricultural classes refer to the four agricultural and the four - non - agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled

tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are include among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census Tract denoted by its number in Column 1. The areas covered by each Census tract have been given in the fly leaf to Table B-I.

3. Under L. C-III 3 females with engineering degree or diploma, 1 female with legal degree and 4 females with medical degrees or diplomas have been returned for the district. These are unusual figures. But it is possible that the figures under engineering graduates and diploma holders refer to the minor diplomas issued by private technical institutions and Government Polytechnic Schools. The medical diplomas possibly refer to Certificates issued for training course in nursing and mid-wifery.
