CENSUS HANDBOOK

CUDDAPAH DISTRICT

PRINTED BY THE SUPERINTENDENT
GOVERNMENT PRESS
MADRAS
1953

The following Corrigendum to Table D-III published at pages 165 and 166 of the 1951 Census Handbook of Cuddapah district is issued.

CORRIGENDUM.

For the figures given in columns (2), (3) and (4) against the tracts mentioned in column (1) substitute figures as follows :—

Tract number.	FOR			SUBSTITUTE		
	Persons.	Males.	Females.	Persons.	Males.	Females.
	Column (2).	Column (3).	Column (4).	Column (2).	Column (3).	Column (4).

2. The circumstances leading to the substitution of revised figures are briefly as follows:—

At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name, such as Harijan or Depressed Class or Adivasi or by a recognised synonym, such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organised in Madras.

(ii) Before commencing the sorting, a list of synonymous names (i.e.), names synonymous with those of the communities published in the 'Constitution (Scheduled Castes) Order, 1950' was prepared in consultation with the Collectors of districts and sent to the State Governments

of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below, have been declared to be Scheduled Castes in the Composite Madras State (as it existed before the formation of the Andhra State) by the 'Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names in the list below:—

- | | |
|---|---|
| 1 Adi-Andhra. | 36 Koosa. |
| 2 Adi-Dravida. | 37 Koraga— <i>Kapada Koraga, Soppu Koraga, Vastra Koraga, Tippi Koraga, Vanti Koraga.</i> |
| 3 Adi-Karnataka. | 38 Kudubi— <i>Kariya.</i> |

GENERIC NAMES.

Harijan,
Depressed Class,
Adivasi.

(iii) Separate population figures have been ascertained for the following individual castes, the names of which are likely to be considered for inclusion in or exclusion from the existing list of Scheduled Castes.

ANDHRA STATE.

- | | |
|------------|---------------------------|
| 1 Pombala. | 2 Valmiki (Agency areas). |
|------------|---------------------------|

MADRAS STATE.

- | | |
|----------------|---|
| 1 Perumkollan. | 5 Valan. |
| 2 Vathiriyān. | 6 Mukkuvan. |
| 3 Vedan. | 7 Koliyan (recommended by Madras Government). |
| 4 Araya. | 8 Kurichchan. |

The population figures of the communities, Valmiki and Kurichchan have been included in the re-sort of Scheduled Castes population figures as they already find a place in the 'Constitution (Scheduled Castes) Order, 1950,' while those relating to the other communities have not been included.

Separate figures for the above communities are given in the table below:—

Tract number.	Special communities.

P R E F A C E

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

- I. Cultivators of land, wholly or mainly owned, and their dependants.
- II. Cultivators of land, wholly or mainly unowned, and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent-receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

- V. Production other than cultivation,
- VI. Commerce,
- VII. Transport, and
- VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

- (i) Self-supporting persons,
- (ii) Non-earning dependants, and
- (iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, and all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

- (1) Self-supporting persons of Agricultural Class IV,
- (2) Self-supporting persons of Livelihood Class VIII who derive their principal means of livelihood from any source other than through economic activity, viz.—
 - (a) Non-working owners of non-agricultural property,
 - (b) Pensioners and remittance holders,
 - (c) Persons living on charity and other persons with unproductive occupations,
 and
 - (d) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts; Part I consists of three sections, namely, Section (i) containing the general population tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial establishments and Table L showing the incidence of leprosy; Section (ii) containing the Rural statistics, and Section (iii) containing the Urban statistics, and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes and literacy by age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A-series, the summary figures for Taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I—Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data.

All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public

J. I. ARPUTHANATHAN,
Superintendent of Census Operations, Madras.

7. CUDDAPAH DISTRICT.

INTRODUCTION TO CUDDAPAH DISTRICT.

I. (a) *Situation and physical characteristics.*—The Cuddapah district lies between 13°40' and 15°15' of the northern latitude and 77°55' and 79°30' of the eastern longitude. It is bounded by the Kurnool district on the north, Nellore district on the east, Chittoor district on the south and Anantapur district on the west. The district consists of nine taluks comprised in two Revenue divisions as detailed below :—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in the Revenue Division.	Area of taluk (sq. miles.)	Headquarters of taluk.
Rajampet ..	Rajampet ..	Rajampet ..	1,038	Rajampet.
		Rayachoti ..	1,103	Rayachoti.
		Siddhavattam ..	606	Siddhavattam.
		Cuddapah ..	510	Cuddapah.
Jammalamadugu.	Jammalamadugu.	Badvel ..	757	Badvel.
		Jammalamadugu ..	613	Jammalamadugu.
		Proddatur ..	430	Proddatur.
		Pulivendla ..	569	Pulivendla.
		Kamalapuram ..	303	Kamalapuram.
		Total ..	5,929	

The district consists roughly of three natural divisions. The first is a large area of black cotton soil comprising the taluks of Jammalamadugu, Proddatur, Pulivendla, Kamalapuram and Cuddapah. The second is the undulating plateau of Rayachoti taluk in the south-west of the district adjoining the plateau areas in Chittoor district and the third consisting of the taluks of Badvel, Siddhavattam and Rajampet on the eastern side of the district is a fairly well defined valley enclosed by hills.

The Veligonda hills from Kurnool run in an unbroken line along the eastern boundary of the district. The Palakonda or Seshachalam hills traverse the western part of Rajampet taluk, the southern boundary of Cuddapah taluk and the northern boundary of Rayachoti taluk. A broken chain of hills connect the Seshachalam hills with the Nallamalais in the north. In the taluks of Badvel, Siddhavattam and Rajampet there are minor ridges breaking the country still further. The Gandikot hills are to the west of Jammalamadugu in Jammalamadugu taluk. There are also other ridges and hillocks of insignificant proportions in Rayachoti,

Cud.—2

Pulivendla, Kamalapuram and Jammalamadugu taluks besides the spurs of the main hills already referred to.

(b) *Rivers.*—The whole of the district drains into the Pennar river and its tributaries the Chitravathi the Papaghni, the Kundu and the Cheyyeru. The Pennar rises in Mysore State, and flowing through Anantapur district enters Jammalamadugu taluk where it is joined by the Chitravathi river from the Dharmavaram taluk of Anantapur district. The Pennar flows west to east up to Jammalamadugu Town, from where it takes a south-easterly course and flows on the borders of Proddatur and Kamalapuram taluks, and across the Cuddapah and Siddhavattam taluks into the Nellore district.

The Papaghni also rising in Mysore State enters Rayachoti taluk after flowing along the boundary between Anantapur and Chittoor districts. Flowing north along the western part of Rayachoti taluk, and the south-eastern corner of Pulivendla taluk it forms the boundary between Kamalapuram and Cuddapah taluks and joins the Pennar two miles north-east of

Kamalapuram. Its chief tributary is the Mugamureru flowing across Pulivendla taluk and the southern portion of Kamalapuram taluk.

The Cheyyeru rises in the Chittoor district enters Rayachoti taluk under the name of Bahudanadi and after being fed by several streams, the chief of which are the Pinchanadi and Mandavyanadi finds its way towards the north through the Seshachalam hills in the north-western part of Rajampet taluk to join the Pennar in Siddhavattam taluk.

The Pullangi and Gunjana are important tributaries of the Cheyyeru in Rajampet taluk.

The Kundu river flows south from Kurnool district across Proddatur taluk and joins the Pennar just above its confluence with the Papaghni from the south.

The Sagileru river springs from the Nallamalai hills in Kurnool district and flowing south across Badvel and Siddavattam taluks joins the Pennar in the latter taluk a few miles above its confluence with the Cheyyeru.

None of the rivers feeding the Pennar are perennial. They drain bare rocky country devoid of any dense forests and are consequently torrential during rains and dwindle to trickles at other times.

(c) *Forests*.—The district has an area of 1,838.77 square miles of forests consisting of 1,798.91 square miles of reserved forest, and 39.86 square

miles of private forests. Their taluk wise distribution is given below :—

Name of taluk.	Reserved forest. SQ. MILES.	Private forests. SQ. MILES.	Total. SQ. MILES.
Jammalamadugu ..	74.42	5.06	79.48
Proddatur ..	137.76	..	137.76
Badvel ..	346.12	12.70	358.82
Pulivendla ..	44.85	..	44.85
Kamalapuram ..	0.56	..	0.56
Cuddapah ..	137.80	2.76	140.56
Siddhavattam ..	308.13	4.05	312.18
Rajampet ..	426.00	10.79	436.79
Rayachoti ..	323.30	4.50	327.80
Total ..	1,798.94	39.86	1,838.80

The reserved forests are of mixed deciduous type. The forests in Pulivendla taluk which were formerly under Panchayat management are scrub jungle and those in the other taluks are of mixed deciduous type.

(d) *Climate and rainfall*.—The climate of the district is unpleasantly hot for four months in the year. The hottest months are March to May when the thermometer rises up to 106°. The district being situated in the interior, does not get the full benefit of either the south-west or the north-east monsoon. From the middle of June however, the thermometer drops on the advent of the south-west monsoon and the climate is tolerable for the rest of the year. The coolest days and nights are from the middle of November to the middle of January. Rayachoti taluk, which lies at an altitude of 1,000' to 1,500' above the plains has a temperature some 5° less than that of the low-country.

A statement showing the particulars of monthly mean of daily maximum and daily minimum temperature, the highest recorded and the lowest recorded temperature and the mean monthly rainfall for

the years 1881 to 1940 and similar particulars and the actual rainfall for 1951 as recorded at Cuddapah is given below :—

		1881—1940.					1951.					
		Temperature.					Temperature.					
Month.	Mean of		Highest record- ed.	Lowest record- ed.	Mean rainfall (inches).	Mean of		Highest record- ed.	Lowest record- ed.	Actual rainfall (inches).		
	Daily maxi- mum.	Daily mini- mum.				Daily maxi- mum.	Daily mini- mum.

The particulars of average annual rainfall and the average number of rainy days in a year are furnished below :—

Name of taluk.	Average annual rainfall. INCHES.	Average number of rainy days in a year.
Jammalamadugu ..	20.50	37.0
Proddatur ..	24.76	39.4
Badvel ..	25.41	41.1
Pulivendla ..	23.30	36.2
Kamalapuram ..	24.79	38.6
Cuddapah ..	31.37	46.5
Siddavattam ..	32.47	47.2
Rajampet ..	32.43	44.1
Rayachoti ..	25.64	41.6

(e) *Soils*.—The soils in this district have been divided into two main classes black or regar and red. Each of these is again classified as clay, loam or sand. The percentage distribution of the several classes of soils in the district is as follows :—

Black clay 23.7 per cent, black loam 18.2 per cent, black sand 3.9 per cent, red clay 1.3 per cent, red loam 25.4 per cent and red sand 27.5 per cent.

Black clay is considered best in this district. Red clay is found scattered in Rajampet division and in Cuddapah and Proddatur taluks. Black clay is found mainly in the taluks of Jammalamadugu, Pulivendla, Kamalapuram and Proddatur. Red loam which is not so good, exists in all taluks of the district but is found extensively in Badvel, Cuddapah, Rajampet and Rayachoti taluks. The worst soil is red sand. Nearly half the extent of this red sandy soil of the district is met within Rayachoti taluk.

(f) *Irrigation and drainage facilities and liability to famine*.—The Kurnool-Cuddapah canal is the chief irrigation source of the district. It takes off from an anicut over the Tungabhadra built at 17 miles above the town of Kurnool and is 190 miles long. It enters the Cuddapah district at the north-eastern corner of Jammalamadugu taluk at its 137th mile and flows through Proddatur and Cuddapah taluks terminating at Patha Cuddapah tank. There are several distributaries from the canal. The canal crosses the Pennar by means of an aqueduct. River channels and rainfed tanks are other sources of irrigation. The river channels have open heads and water is diverted into them by means of temporary sand dams and channels in the river beds constructed by the ryots. Irrigation from wells is also resorted to in some areas.

Jammalamadugu taluk.—There are four river channels and 27 spring channels taking off from the Pennar and the Chitravathi rivers. The other irrigation sources are tanks mostly rainfed. In normal seasons the crop is good.

Cud.—2A

Proddatur taluk.—The main irrigation source is the Kurnool-Cuddapah canal. There are 13 canal-fed and rain-fed tanks. The taluk is not generally affected by famine.

Badvel taluk.—A channel nine miles long takes off from the Sagileru river and supplies nine tanks, the chief of which is the Perumamilla tank. There are six spring channels and several rain-fed tanks the chief of which is the Badvel tank. It is the biggest and most imposing tank in the district with a good catchment area having a capacity of 12 months. If the tank receives full supply there will be enough water for two crops for the entire ayacut of about 5,000 acres. This tank is much silted up and is rarely full.

Pulivendla taluk.—There are 72 minor irrigation sources of which 46 are spring channels, seven river channels and the rest rainfed tanks. The taluk is liable to famine conditions.

Kamalapuram taluk.—There are 21 spring channels and seven river channels. The other irrigation sources consist of 14 rainfed tanks. The Kurnool-Cuddapah canal irrigates a small extent in the taluk. Gangireddipalli firka is liable to famine conditions.

Cuddapah.—The taluk contains 12 spring channels and 25 river channels and about 30 minor irrigation rain-fed tanks. The Kurnool-Cuddapah canal (tail end) also serves the taluk but the supply in it cannot be guaranteed, to a few villages in Khajipet firka, if the water level in the Tungabhadra is low. After the construction of the anicut across the Pennar at Adimimmayapalle village the Kurnool-Cuddapah canal is receiving timely supplies and the supplies can now be said to be more or less fairly satisfactory. There are also wells to supplement irrigation. People depend more on dry crops which in turn depend on rains.

Siddavattam.—There are six spring channels and one river channel and 95 rainfed tanks. Irrigated dry food crops and commercial crops are the main crops raised in this taluk. These are irrigated mostly from wells which have good springs and give an assured supply of water to the crops. Famine conditions occur now and then in Vontimitta firka of this taluk.

Rajampet taluk.—There are 20 spring channels and 33 river channels and 47 rainfed tanks. They all depend on the rains and distress is caused in the event of failure of the monsoon.

Rayachoti taluk.—There are 1,058 minor irrigation sources of which 145 are spring channels and 178 river channels and the rest tanks. All the sources depend on rains and the taluk is liable to famine in the event of failure of rains.

A statement showing the number of minor irrigation works in each taluk, the area irrigated by them and the area irrigated by the major works in each taluk is given below :—

	Number of minor irrigation sources.	Extent of ayacut. ACS.	Ayacut of major irrigation sources. ACS.
Jammalamadugu ..	58	3,540-20	3,172-65
Proddatur ..	14	1,174-23	13,365-29
Badvel ..	108	6,515-66	8,707-85
Pulivendla ..	72	2,603-02	Nil.
Kamalapuram ..	41	2,799-15	2,440-96
Cuddapah ..	63	4,079-51	28,342-00
Siddhavattam ..	98	4,684-00	2,831-25
Rajampet ..	100	6,603-42	9,587-00
Rayachoti ..	1,058	8,609-26	761-48
Total ..	2,323	40,608-45	69,208-48

(g) *Area cultivated with food and commercial crops.*—Paddy, Colam, Cumbu, Ragi, Korra and Varagu are the chief food crops. There is also considerable cultivation of horsegram. Groundnut and cotton are the chief commercial crops. A statement showing the area cultivated with foodcrops, pulses and commercial crops for the year 1949-50 which was a recent normal year for the district, is furnished in *Annexure I*.

(h) *Communications*—(i) *Roads.*—There are 1,022 miles of roads within the district, consisting of 159 miles of provincial highways, 505 miles of major district roads, 207 miles of other district roads, 50 miles of village roads and 41 miles of municipal roads. The talukwise distribution of mileage of roads except in respect of the municipal roads is furnished below :—

Name of taluk.	Provincial Highways.	Major district roads,	Other district roads.	Village roads.	Total.
Jammalamadugu ..	16	53	..	8	77
Proddatur ..	49	48	5	5	107
Badvel ..	32	78	..	4	114
Pulivendla ..	..	104	17	1	122
Kamalapuram ..	..	..	21	5	26
Cuddapah ..	29	61	42	10	142
Siddavattam ..	..	31	54	3	88
Rajampet ..	..	86	25	7	118
Rayachoti ..	33	104	43	7	187
Total ..	159	565	207	50	981

The roads in Badvel taluk are not adequate.

(ii) *Railways.*—The district has 121½ miles of broad gauge railway of the Southern Railway. The Madras-Bombay line traverses the taluks of Rajampet, Siddhavattam, Cuddapah, Kamalapuram and Jammalamadugu. The other taluks are not connected by railway. The District headquarters of Cuddapah and the taluk headquarters of Rajampet, Cuddapah and Kamalapuram alone are rail heads.

(iii) *Posts and Telegraphs.*—There is a head Post and Telegraph Office at Cuddapah. There are 14 Sub-Post and Telegraph Offices, 12 non-combined sub-post offices and 189 branch post offices in the district. Their talukwise distribution is given below :—

Name of taluk.	Branch Post Office.	Non-combined Sub-Post Office.	Post and Telegraph Head-Office.	Post and Telegraph Sub-Office.
Jammalamadugu ..	14	1	..	3
Proddatur ..	25	2	..	1
Badvel ..	19	..	..	1
Pulivendla ..	18	1	..	1
Kamalapuram ..	12	..	..	2
Cuddapah ..	14	5	1	..
Siddhavattam ..	11	1	..	1
Rajampet ..	38	2	..	4
Rayachoti ..	38	..	..	1
Total ..	189	12	1	14

II. (a) (i) *Growth of population.*—The particulars of the population of the district and taluks in 1941 and 1951 and the percentage of variation are furnished below :—

Name of the district and taluk.	Population.		Percentage of variation.
	1941.	1951.	
Cuddapah district ..	1,056,507	1,161,731	10.0
Jammalamadugu ..	115,572	122,277	5.8
Proddatur ..	122,814	145,154	18.2
Badvel ..	103,273	108,711	5.3
Pulivendla ..	103,487	110,794	7.1
Kamalapuram ..	72,372	75,588	4.4
Cuddapah ..	124,820	147,389	18.1
Siddhavattam ..	69,412	75,704	9.1
Rajampet ..	175,606	185,942	5.9
Rayachoti ..	169,151	190,172	12.4

“The district population has increased by 10 per cent. The increase in the taluk populations ranges from 4.4 per cent in Kamalapuram to 18.2 per cent in Proddatur. The large increase in the Cuddapah and Proddatur taluks, by 18.1 per cent and 18.2 per cent, respectively, has been offset by the abnormally low increase in the taluks of Jammalamadugu 5.8 per cent, Badvel 5.3 per cent, Pulivendla 7.1 per cent, Kamalapuram 4.4 per cent and Rajampet 5.9 per cent. The last mentioned 5 taluks are dry taluks and rain-fed without many irrigation sources, and owing to the adverse seasonal conditions, there has been an appreciable migration from the adjoining taluks to Proddatur town where the population has increased by 35.8 per cent. There has been a similar migration to Cuddapah town where the population has increased by 32.5 per cent. Rajampet taluk was affected by floods and many labourers have migrated from this taluk to work in the Tungabhadra Project Works in Bellary district.”

(Extracted from the Census report, Part I.)

(ii) *Vital Statistics.*—A statement showing the number of births and deaths with details for deaths due to various causes in the district for decennium 1941-50 is given in *Annexure II*.

During the decade under review the average birth-rate was 28.6 per mille as compared with the average of 31.7 for the State. The birth-rate has been steady around the average rate during the second half of the decade. The average death-rate of 18.8 per mille was less than that for the State (21.2). The annual death rates recorded during the decade show a definite tendency to decline, the death rates in 1941 and 1950 being 24.9 and 16.4 respectively. The average death-rate from fevers was high and fevers were responsible for 46 per cent of the total deaths. However there has been a decline in the incidence of fevers towards the end of the decade, perhaps due to anti-malarial operations in the district. The district was subject to severe epidemics of cholera in 1942-43 and 1950. Plague was not prevalent during the decade.

(b) *Medical relief arrangements.*—A list of Medical Institutions in the various taluks of the district and the bed strength if any in each institution is furnished below :—

<i>Jammalamadugu taluk.</i>
Government dispensary at Jammalamadugu (2 emergency beds).
<i>Proddatur taluk.</i>
Government hospital at Proddatur and Local Fund Dispensary at Onipenta (17 beds)
<i>Badvel taluk.</i>
Government dispensary at Badvel and Local fund dispensary at Porumamilla (2 emergency beds).
<i>Pulivendla taluk.</i>
Local fund dispensaries at Pulivendla and Vempalli.
<i>Kamalapuram taluk.</i>
Rural dispensaries at Kamalapuram and Gangireddipalli.
<i>Cuddapah taluk.</i>
Government Hospital at Cuddapah and Rural dispensary at Chennur (101 beds).
<i>Siddavattam taluk.</i>
Local fund dispensary at Siddavattam.
<i>Rajampet taluk.</i>
Government Hospital at Rajampet, Rural dispensaries at Nandalur, Kodur and Anantarajupet (12 beds).
<i>Rayachoti taluk.</i>
Local fund dispensary at Rayachoti.

There is a minor X-ray set in the Government Headquarters Hospital at Cuddapah. There is a Mission Leprosy Hospital at Koohum with 65 beds.

(c) *Water-supply and Drainage facilities.*—Only in Cuddapah and Proddatur towns there is protected water-supply through pipes. Water is pumped from

wells constructed in the bed of the River Pennar into reservoirs from which supply is made through pipes.

The particulars of the number of villages in each taluk where there is protected water-supply and drainage arrangements and the number of public drinking water-supply wells constructed and well works in progress are furnished below :—

Name of taluk.	Number of villages with protected water-supply and drainage arrangements.	Number of public drinking water supply wells constructed.	Number of well works in progress.
Jammalamadugu ..	56	56	27
Proddatur ..	35	35	24
Badvel ..	92	92	21
Pulivendla ..	38	38	37
Kamalapuram ..	40	40	31
Cuddapah ..	40	40	59
Siddavattam ..	60	96	60
Rajampet ..	75	75	58
Rayachoti ..	74	74	65

(d) *Fairs and Festivals.*—There are no important fairs in the district. The festivals in the various taluks are detailed below :—

<i>Jammalamadugu taluk.</i>
Narapurawamy Car festival at Jammalamadugu (fifteen days commencing from seven days preceding the fullmoon day of Vaisakhi).
<i>Proddatur taluk.</i>
Mahasivaratri festival in Veerabhadraswami temple at Alladapalli village (February).
<i>Badvel taluk.</i>
Kandimallayapalli Mattam Aradhana festival at Somireddipalli (commencing from five days before Chaitra newmoon and ending three days after Vaisakha fullmoon.).
<i>Kamalapuram taluk.</i>
Urusu festival in the Dargha near Railway Station at Kamalapuram (commencing six days before and ending seven days after the Pournami (fullmoon) in the month of Thiyaipalguni. Both Hindus and Muslims take part).
<i>Cuddapah taluk.</i>
Chennakesavaswamy festival at Pushpagiri (10 days in April-May from Chaitra Bahula Tridasi ending with Vaisakhasuddha Saptami).
<i>Rajampet taluk.</i>
Mahasivaratri festival at Atrirala Agraharam (commencing two days before the newmoon in February and lasting for ten days).
<i>Rayachoti taluk.</i>
Ganga Jatra festival at Ananthapuram (two miles from Lakkireddipalli) (commencing fifteen days before and ending two days after the Palguna Sudha Dwitya March-April).

III. *Educational institutions.*—A statement showing the types and number of educational institutions in the various taluks and their strength as on 31st March 1951 is furnished in *Annexure III*.

V. *Items of general importance.*—Cuddapah and Prodattur are the two municipalities in the district.

There is a Government Fruit Canning and Preservation Farm at Kodur in Rajampet taluk.

The district is famous for its delicious melons. They are grown on the sandy beds of the Pennar, the Bugga, etc., rivers. They are raised between December and March. They are grown extensively in Siddavattam taluk. The plants spread over the sand-like creepers and are so prolific that thousands of melons can be got from a single acre plot. These melons are exported to all parts of India.

ANNEXURE I.

[Vide item I (*g*) of Introduction.]

STATEMENT SHOWING THE PARTICULARS OF THE AREA CULTIVATED WITH FOOD CROPS AND COMMERCIAL CROPS IN EACH TALUK OF THE DISTRICT FOR THE YEAR 1940-50.

7. CUDDAPAH DISTRICT.

PART I

Section (i)

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "House".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

Taluk.	Area in sq. miles.	Villages.	Towns.	Total.	Rural.	Urban.
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Jammalamadugu	613	124	1	22,241	20,286	1,955

7. CUDDAPAH DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population, of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous censuses. The figures recorded at the previous censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

Taluk. (1)	Persons. (2)	Variation. (3)	Net variation, 1901—1951. (4)	Males. (5)	Variation. (6)	Females. (7)	Variation. (8)

7. CUDDAPAH DISTRICT.

A-III—Towns and Villages Classified by Population.

This table shows the total number of inhabited towns and villages in each taluk of the district distributed on population basis under three main heads with sub-heads under each as follows:—

- (1) Towns and villages with less than 2,000 population—
 (a) population with less than 500,
 (b) population between 500 and 1,000,
 (c) population between 1,000 and 2,000,
 (2) Towns and villages with population of 2,000 to 10,000—
 (a) with population of 2,000 to 5,000,
 (b) with population of 5,000 to 10,000,

(3) Towns and villages with population of 10,000 and above—

- (a) with population of 10,000 to 20,000,
 (b) with population of 20,000 to 50,000,
 (c) with population of 50,000 to 100,000,
 (d) with population of 100,000 and above

II. For definition of a "Town" and "Village" see fly-leaf to Table A-I.

Taluk.	Total number of inhabited towns and villages.	Total population.			Towns and villages with less than 2,000 population.

7. CUDDAPAH DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.			Limits of population.	
I	..	..	..	100,000 and over.
II	..	..	..	50,000 to 100,000.
III	..	..	..	20,000 to 50,000.
IV	..	..	..	10,000 to 20,000.

3. Where possible, the former population of places treated for the first time as towns in 1941 and at this census has been extracted from village statistics. Where this could not be done, the columns have been left blank.

4. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

7. CUDDAPAH DISTRICT.

B—ECONOMIC TABLES.

B-I—Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up for each census tract in the district, the distribution of population, sex-wise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the Indian Census Economic Classification Scheme—vide fly-leaf to Table A-V.

2. The areas comprised in each of the census tracts into which this district has been delimited for the purposes of census tabulation are given below:—

No.	Rural Tracts.	
	All the villages and panchayats not treated as census towns in	Jammalamadugu taluk.
No. 69—Jammalamadugu.	Do.	Proddatur taluk.
No. 70—Proddatur.	Do.	Badvel taluk.
No. 71—Badvel.	Do.	Pulivendla and Kamalapuram taluks.
No. 72—Pulivendla and Kamalapuram.	Do.	Cuddapah taluk.
No. 73—Cuddapah.	Do.	Siddhavattam and Rajampet taluks.
No. 74—Siddhavattam and Rajampet.	Do.	Rayachoti taluk.
No. 75—Rayachoti.	Do.	

Non-City Urban Tracts.

No. 17—Jammalamadugu town in Jammalamadugu taluk, Proddatur town in Proddatur taluk, Badvel town in Badvel taluk, Vempalle town in Pulivendla taluk and Kamalapuram town in Kamalapuram taluk.
No. 18—Cuddapah town in Cuddapah taluk, Rayachoti town in Rayachoti taluk, Rajampet and Nandalur towns in Rajampet taluk.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the

principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An "earning" dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a "non-earning" dependant.

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III:—

(1) Persons living principally on income from non-agricultural property;

(2) Persons living principally on pensions, remittances, scholarships and funds;

(3) Inmates of jails, asylums, alms houses and recipients of doles;

(4) Beggars and vagrants; and

(5) All other persons living principally on income derived from non-productive activity.

7. CUDDAPAH DISTRICT.**B-II—Secondary means of Livelihood.**

This table gives for the district the number of persons in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross-classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in

importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

7. CUDDAPAH DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary economic status, namely, employer, employee and independent workers.

2. An employer is a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. An employee is a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. An independent worker is a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme, all employers and independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce or Transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural classes Classified in Economic Table B-I correspond to the divisions and subdivisions into which they are distributed in this table as follows:—

Livelihood class.	Division and Subdivisions of the Indian Census Economic Classification Scheme.
Class V—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified. Division 6.—Commerce.
Class VI—Commerce.	Subdivisions 7-0 to 7-4 of Division 7.—Transport, Storage and Communications.
Class VII—Transport.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7-0 to 7-4.
Class VIII—Other Services and miscellaneous sources.	Division 8.—Health, Education and Public Administration; and Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence, there will be a difference to this extent between the total self-supporting persons of the Non-agricultural classes in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

7. Details of persons who derive their principal means of livelihood otherwise than through productive activity and who are included under livelihood Class VIII mentioned in notes to Economic Table B-I are given below:—

Tract. No.	I. Persons living principally on income from Non-agricultural property.		II. Persons living principally on pensions, remittances, scholarships and funds.		III. Inmates of Jails, asylums, almshouses and recipients of doles.		IV. Beggars and vagrants.		V. All other persons living principally on income derived from Non-productive activities.

7. CUDDAPAH DISTRICT.

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each Census tract, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated

for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each Census tract in the district denoted by its number in column (1) have been given in the fly-leaf to Table B-1.

Tract No.	Total number of establishments.			Number of non-textile establishments.						Number of textile establishments.				
	(1)	Non-Textile.		Perennial (nine months and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.	Perennial (nine months and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.

7. CUDDAPAH DISTRICT.

II—Employment in Textile Establishments.

This table gives for each Census tract the number of persons employed in the textile establishments shown in Table I. The occupations have been grouped with reference to the scheme of grouping adopted in the Indian Census Economic Classification Scheme.

3. The areas covered by each census tract in the district have been given in the fly-leaf to Table B-I.

NOTE.—The symbols 'W.T.' and 'P.T.' adopted in this table stand for 'Whole Time' and 'Part Time.'

2. 'Boys' and 'Girls' referred to in the table, refer to persons below 15 years of age.

INFIRMITY.

L—Incidence of Leprosy by Livelihood Classes for Taluks.

This table shows for each taluk in the district the incidence of Leprosy among the population, males and females, by the eight Livelihood classes.

2. Figures are given separately for Leprosy and doubtful cases. The former refers to clear cases of Leprosy while the latter to suspected cases of Leprosy.

3. Information regarding the number of Leprosy cases and doubtful cases in each village/town of each tract has been given in the appropriate Rural and Urban statistics.

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other

classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly-leaf to Table B-I.

Tract No.				Total number of households.	Total household population.			Total number of sample households.	Sample households.

7. CUDDAPAH DISTRICT.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each census tract denoted by its number in column (1) in the district (vide fly-leaf

to Table B-I) but not analysed by religion as in the previous censuses.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—

Age-group.	Persons.	Males.	Females.	Age-group.	Persons.	Males.	Females.

D—SOCIAL AND CULTURAL TABLES.

D-I—Languages.

(i) *Mother-tongue.*

This table shows for each Census tract in the district, denoted by its number in column (1), the languages spoken as mother-tongue and the number of persons speaking each one of them. The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

2. Mother-tongue means the language spoken by the person from the cradle. In the case of infants and deaf-mutes the mother-tongue of the mother is taken as the mother-tongue.
