CENSUS HANDBOOK

CHINGLEPUT DISTRICT

PRINTED BY THE SUPERINTENDENT
GOVERNMENT PRESS
MADRAS
1953

P R E F A C E

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did, not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, but also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables village-wise, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

- I. Cultivators of land, wholly or mainly owned, and their dependants.
- II. Cultivators of land, wholly or mainly unowned, and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

- V. Production other than cultivation,
- VI. Commerce,
- VII. Transport, and
- VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

- (i) Self-supporting persons,
- (ii) Non-earning dependants, and
- (iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

- (1) Self-supporting persons of Agricultural Class IV,
 - (2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—
 - (a) Non-working owners of non-agricultural property,
 - (b) Pensioners and remittance holders ;
 - (c) Persons living on charity and other persons with unproductive occupations ;
- and
- (d) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook, covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the General Population Tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) (Table C-I) and Tables showing Livelihood Classes and literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped together to form a non-city urban tract. All the rural tracts in the State have been assigned

numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each are furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries, such as, cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise details of Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

12. CHINGLEPUT DISTRICT.

INTRODUCTION TO CHINGLEPUT DISTRICT

I. (a) *Situation and physical characteristics.*—Chingleput is a coastal district lying between 12° 12' and 13° 42' of the northern latitude and 79° 32' and 80° 22' of the eastern longitude. Nellore district is situated to the north of it; the Bay of Bengal skirts its eastern boundary, South Arcot district is situated on its southern boundary and North Arcot and Chittoor districts are on its west. The Madras City which is the

capital of the State and which also lies on the coast of the Bay of Bengal is surrounded on three sides by Chingleput district. During the decade the district lost about 19 square miles of its area to the Madras City. The district lies elongated in shape from south to north with a coast line of nearly 115 miles in length. It consists of the following seven taluks comprised in two Revenue divisions as noted below :—

Revenue division.	Headquarters.	Taluks.	Area in square miles.	Headquarters.
Tiruvallur ..	Tiruvallur ..	Ponneri	626	Ponneri.
		Tiruvallur	523	Tiruvallur.
		Sriperumbudur	306	Sriperumbudur.
Chingleput ..	Chingleput ..	Saidapet	227	Saidapet.
		Kancheepuram	412	Kancheepuram.
		Chingleput	436	Chingleput.
		Madurantakam	531	Madurantakam.
Total ..			3,061	

Ponneri is the northern most taluk and Madurantakam, the southern most. Saidapet taluk is to the south of Ponneri taluk on the coast and Chingleput taluk lies to the south of Saidapet taluk and north of Madurantakam taluk.

The general aspect of the country is that of an almost level plain. Along the sea coast there are ridges of blown sand. Behind these ridges there are backwaters connected together by the Buckingham Canal, a waterway running along the entire length of the district near the coast and through the Madras City. The chief of the back waters are the Pulicat lake in the north-eastern corner of Ponneri taluk, and the one at Covelong in the north-east corner of Chingleput taluk.

Hills.—The Nagalapuram and Satyavedu hills and the Kambakam hills in the western part of the Ponneri taluk are the important hills in the district. Seven miles to the west of the coast in the southern part of Madurantakam taluk runs a ridge of low hills rising here and there into peaks with a similar ridge seven miles further west. Besides these there are a few stray conical hills or ridges of no great elevation, some of which such as, the St. Thomas Mount, the Tirunermalai hills with the temple on its top and the

Pallavaram quarry hills with the Darga on it in Saidapet taluk, the Tirukalikundram hills in the Chingleput taluk, etc., form important land marks.

(b) *Rivers.*—The chief rivers of the district are the Palar, the Kortalaiyar and the Arani river.

The Palar has its source in Mysore State. It flows through Palmaner taluk in Chittoor district and then across the entire breadth of North Arcot district and enters the Chingleput district a few miles west of Kancheepuram. It is joined at Thirumukkudal in Kancheepuram taluk by the Cheyyar river also flowing from the North Arcot district and by the Vegavathi river in the same taluk. The Palar then flows for about 30 miles forming the boundary between Kancheepuram and Chingleput taluks and lower down between Madurantakam and Chingleput taluks and finally enters the Bay of Bengal 3 miles to the south of Sadras.

The Kortalaiyar has its source from the surplus of the Kaveripak tank in North Arcot district. It flows through Tiruvallur and Ponneri taluks. Its waters are drawn into the Cholvaram tank and the Red Hills lake for the supply of drinking water to the Madras City. The river falls into the Ennore backwaters about 10 miles north of Madras.

The Arani river has its source in Puttur taluk in Chittoor district. It enters Chingleput district, flows along the major part of the boundary between Ponneri and Tiruvallur taluk and enters the sea across the Pulicat swamps.

The Cooum and the Adyar though not large, are two well-known rivers of the district. The Cooum river flows across Tiruvallur, Sriperumbudur and Saidapet taluks and enters the sea at Madras. The Adyar river takes shape near Guduvancheri and flows in Sriperumbudur taluk and between that taluk and Saidapet taluk. It receives the surplus waters of the Chembarambakkam tank in Sriperumbudur taluk and finally flows across Saidapet taluk to enter the sea at Adyar in Madras district.

The Kiliar and Kallar are two other rivers in Madurantakam taluk. They are dry during the major part of the year.

(d) *Climate and rainfall.*—The particulars of the average annual rainfall and the average number of rainy days in a year for the taluks in the district are furnished below :—

(c) *Forests.*—The area of the forests in each of the taluk of the district is given below :—

The Reserved Forests contain deciduous type of trees of poor height and fuel trees and low scrub jungle. They also serve as grazing grounds. The Estate forests taken over are also of the same type as the Reserved Forests, but they contain some valuable timber.

The coastal taluks get more rainfall than the interior ones.

The particulars of the monthly mean of daily maximum and daily minimum temperature, the highest recorded and the lowest recorded temperature and mean monthly total of rainfall for the years 1881-1940 and similar particulars and actual monthly total of rainfall for 1951 as recorded at Meenam-bakkam Observatory are furnished in the following statement :—

October to December. Humidity is considerable. In the coastal taluks the heat of the summer sun is mitigated by the sea breeze in the after noon.

(e) *Soils.*—There are three classes of soils in the district, viz., black, red and arenaceous with sub-classes loam, clay and sand under each. Loam is considered the best, clay next and sand the worst. The black soil is generally more fertile than red, while the

arenaceous is useful only for casuarina plantations. The red soil predominates in the northern taluks; while black is prevalent in the southern taluks. The percentage distribution of the various kinds of soils in the taluks is furnished below :—

(f) *Irrigation and drainage facilities and liability to famine.*—Tanks form the principal sources of irrigation in the district. The Palar, the Cheyyar, the Kortalaiyar, the Arani and the Cooum also irrigate some areas. Channels take off from these rivers and feed a number of tanks. A channel called 'Kambakkal' carries water from the Palar to several tanks in Kancheepuram and Sriperumbudur taluks. The Cheyyar feeds the big Uttiramerur tank in Kancheepuram taluk. The Kortalaiyar feeds Cholavaram and Red Hill tanks which irrigate 10,007 acres in Ponneri and Saidapet taluks. The Cooum feeds the Chembarambakkam tank which irrigates a total area of 12,955 acres in 37 villages in Sriperumbudur taluk. There are 456 river and spring channels in the district. They are either permanent ones taking off from spring heads or temporary ones dug by the ryots along the beds of rivers after the freshes have flown out. The Palar river has sub-soil currents affording supply even in years of drought. Madurantakam taluk gets some supply from spring channels from the Palar river. Wells form supplemental sources of irrigation. Artesian springs have been found in certain villages in Ponneri taluk.

The district is mainly dependent on the seasonal rains. There will be distress in the event of failure of rains.

The particulars of the number of minor and major irrigation sources and their ayacut in each taluk are furnished below :—

(g) *Area cultivated with food crops and commercial crops.*—A statement showing the area cultivated with food crops and commercial crops in each taluk in 1942-43 which was the last normal year for the district is furnished in *Annexure I*. Casuarina is now widely planted along the coast in areas which were lying waste till a few years ago. The casuarina plantations provide fuel supply to the Madras City.

(h) *Communications.*—(i) *Roads.*—There are 1,664 miles of roads in the district consisting of 133 miles of National Highways, 580 miles of the Major District roads, 279 miles of other District roads, 591 miles of village roads, 5 miles of Public Works Department roads and 76 miles of Municipal Roads. Their talukwise distribution except in the case of Public Works Department and Municipal Roads is furnished below.—

The major roads are maintained in fairly good order. The village roads which are earthen roads deteriorate during rainy season and are passable only during fair weather. A large number of villages with a population of more than 500 lack proper road communications. The requirements have been however provided for in the five-year programme. A bridge across the Palar river on the Grand Southern Trunk road near Chingleput is under execution. The bridge is to be built with pre-stressed concrete at an estimated cost of 21 lakhs. It will be the first bridge

to be built with pre-stressed concrete in the whole of India and the longest pre-stressed road bridge in the world.

(ii) *Railways*.—There are 58½ miles of broad gauge and 89¼ miles of metre gauge railway of the Southern Railway in the district. The north-east line (broad gauge) from Madras to Calcutta and Delhi passes through the taluks of Saidapet and Ponneri. The north-west and south-west (broad gauge) lines from Madras to Bombay, Bangalore, Ootacamund and the West Coast pass through the taluks of Saidapet, Sriperumbudur and Tiruvallur. The southern main metre gauge line from Madras to Tiruchirapalli and beyond passes through the taluks of Saidapet, Chingleput and Madurantakam. A branch metre gauge line connects Chingleput with Arkonam passing through Chingleput and Kancheepuram taluks. Broad gauge suburban railway service is worked from Tiruvallur and Ponneri to Madras. An Electric metre gauge suburban service operates from Tambaram in Saidapet taluk to Madras. All the taluk headquarters except Sriperumbudur are connected by railway.

(iii) *Canals and waterways*.—The Buckingham Canal passes through Madurantakam, Chingleput, Saidapet and Ponneri taluks. It is used for transport of goods in boats to Madras City and to the villages on the side of the canal. The coastal produce like Casuarina and salt is transported cheaply by this means.

(iv) *Posts and Telegraphs*.—The details of the number of post and telegraph offices in each taluk are furnished below :—

The following extract from the Census report contains an illuminating analysis of the growth of population in this district :—“The District increase is 8.3 per cent as against 9.6 per cent in the previous decade. The seasonal conditions have been very adverse since 1947–48 owing to the continued failure of the north-east monsoon, and this has made a lot of difference; the seasons were much more satisfactory during the previous decade. This explains the smaller increase of population during the present decade. Madurantakam as usual, was the taluk most affected by the adverse seasonal conditions. From this and other taluks, there has been considerable migration to Madras City. In Madurantakam taluk the tappers from a number of villages have migrated to Madras City and other areas and some even to Mysore in search of employment. Excluding Saidapet taluk which is referred to below, Ponneri taluk has shown the largest increase (11.3 per cent). The increase in the rural area in Ponneri taluk is only 8.5 per cent which is only about the district average, while, in the urban area, the increase is 80.1 per cent. Of the three towns in this taluk, there has been a large increase in Arani which is an important weaving centre and a still larger increase in Ponneri town which has attracted emigrants on account of the educational facilities (High School) available and a number of families who left Madras City during the evacuation period have continued to stay on there, as it is conveniently connected by rail with Madras City. In Sriperumbudur taluk, there has been an actual decrease (2.2 per cent) in the rural population, while, in Kancheepuram, the increase in the rural population is only 1.5 per cent. In Chingleput taluk also the rural population has decreased (1.6 per cent). All these figures undoubtedly reflect the migrations resulting from the adverse seasonal conditions since 1947–48.

Saidapet taluk presents a contrast, as its population has increased by 36.7 per cent. Its urban population has decreased by 29.2 per cent. This is of course due to the transfer of Saidapet Municipality to Madras City. The spectacular increase in the rural area (131.9 per cent) is due to the fact that there is, in the suburban area in Saidapet taluk up to Tambaram in the south, Ennore in the north and Avadi in the west, a large population which depends for its work on Madras City but resides in these areas for want of accommodation in the City proper. Many workers in Madras City prefer to live in their own or rented buildings in the suburbs rather than in the congested City. These suburban areas are well-connected by rail and bus with the City. The suburbs extending up to Tambaram are the most popular, thanks to the electrification of the Suburban Railway up to this point. Tambaram has grown enormously owing to the establishment of the Madras Christian College and the Railway Colony there. The Civil Aerodrome at

Meenambakkam and the Tuberculosis Sanatorium near Tambaram are also factors which have contributed to the increase of population in this suburban area in Saidapet taluk.”

(ii) *Vital statistics*.—A statement showing the number of births and deaths and the deaths due to various causes in the district for the decade 1941–50 is furnished in *Annexure II*.

While the average birth rate of 30.7 per mille for the decade was slightly less than the rate of 31.7 for the State, the average death rate of 22.4 per mille was slightly in excess of the rate of 21.2 for the State. The survival rate is therefore comparatively small. The death rates show a downward trend, especially in the latter years. Like most other districts, a severe epidemic of cholera was prevalent in 1943 causing 4,846 deaths. The district was again affected by cholera epidemic in 1948. In spite of these two severe epidemics, the average death rate from cholera was only 0.5 per mille, as against 0.6 for the State during the decade. The mortality rates from other principal diseases were about the normal for the decade. The maternal mortality rates show a steady decline from 9.87 per 1,000 births in 1944 to 4.76 in 1950, a reduction of over 50 per cent.

(b) *Medical facilities*.—A list of medical institutions and their bed strength in the various taluks of the district is furnished below :—

(3) Local Fund Dispensaries, Chunampet, Acharakam and Padalam.	..

All the Government hospitals in the district run leprosy clinics.

There is one minor X-ray set for screening at the Government Headquarters Hospital at Chingleput.

Special Medical and Health institutions—(1) *The Government Tuberculosis Sanatorium at Tambaram*.—This contains 420 beds and is equipped with two minor X-ray sets for fluoragraphy and radiography.

A Colony called “Amrit Nagar Colony” was opened on 3rd March 1952 at Chitlapakkam village near the Tambaram Tuberculosis Hospital. The colony is intended for the rehabilitation of ex-tuberculosis patients. The present strength of the colony is 24 and the ex-patients are accommodated in 8 cottages (3 ex-patients in each cottage). They are now engaged on gardening, and spinning work. A printing press has been installed for training the men in the printing press.

(2) *The Health Unit, Poonamallee (Sriperumbudur taluk)*.—This was started in 1935 with the help of the Rockefeller foundation to demonstrate what could be done to the health of the rural population by a well organized public health effort and also to train workers in all aspects of public health. The field of activities consists of an area of 35 square miles with a population of 61,000 in 36 villages.

The activities of the unit were curtailed in 1940 when the Rockefeller foundation withdrew help and the unit was reorganized in 1945. Proposals for permanent retention of the unit are under the consideration of the Government. The staff of the unit at present consists of a I class Health Officer, a woman Medical Officer, 4 Health Inspectors, 4 Health visitors, 10 midwives and a few inferior staff. The health unit concentrates its attention on Maternity, Child Welfare, provision of bore-wells and latrines. Concentrated efforts are taken to vaccinate all unprotected children in the area and special precautions are taken against epidemics.

Health exhibitions, village improvement weeks, cleaning campaigns, Harijan day celebrations, Children's Day and Parents' Day are being conducted with a view to raising the health conscience of the villagers. Family Planning scheme will be instituted in the unit in the near future.

A research into the causes of Infant morbidity and mortality has been started in the unit under the auspices of the Indian Council of Medical Research and a staff of one Assistant Research Officer, 2 health visitors, 2 ayahs and one peon has been sanctioned.

(3) *The Lady Willingdon Leprosy Sanatorium at Tirumani near Chingleput.*—The institution provides 840 beds for Leprosy patients who are treated there. This is one of the Premier institutions of the kind in India. The Institution was started and developed by the Church of Scotland Mission. The management of the Institution was taken over by the Government in 1948. The Institution is a sort of Leper Settlement and provides occupational activities for the inmates in agriculture, carpentry and weaving.

(c) *Water-supply and drainage arrangements.*—The municipalities of Kancheepuram, Chingleput and Tiruvallur towns have protected water-supply through taps. Wells form the chief sources of drinking water-supply in other places. There are no underground drainage arrangements anywhere in the district. There are open drains along public streets in the municipalities of Kancheepuram and Chingleput. The particulars of the number of public drinking water wells constructed in each taluk of the district are furnished below :—

Name of taluk.	Number of public drinking water wells constructed.

Salt is also manufactured at Ennore in Saidapet taluk, Cheyyur and Chunampet in Madurantakam taluk, Covelong in Chingleput taluk and at Vallur and Athipattu in Ponneri taluk.

V. *Items of general interest.*—Chingleput, Kancheepuram and Tiruvallur are the municipalities in the district.

St. Thomas Mount-cum-Pallavaram is a cantonment.

The Collector's headquarters is at Saidapet within the limits of the City of Madras.

Kancheepuram is famous as a pilgrim centre and contains a number of Hindu temples, the most famous among them being the Sri Ekambareswarar temple, Sri Varadarajaperumal temple and Sri Kamakshi Amman temple. The object of worship is in Sri Ekambareswarar temple, viz., the lingam, is one of the 5 (five) lingams representing the five elements Ether, Air, Fire, Water and Earth and represents

the element of Earth among the five. Kancheepuram is also famous for its silk sarees and is a very big handloom centre.

The temple at *Uttiramerur* in Kancheepuram taluk contains an inscription regarding the origin of the ancient panchayat systems.

The anicut across the Cheyyar constructed at a cost of Rs. 6.26 lakhs to feed the Uttiramerur tank is a permanent landmark.

Sriperumbudur, the birth place of Sri Ramanuja, is also an important place of pilgrimage in the district.

Kunrathur in Sriperumbudur taluk is famous for the manufacture of lungis and kylis. Kunrathur is also the birth place of Sri Sekizhar, the author of "Periapuranam."

The Vishnu temple of Sri Kothandaramaswamy in *Madurantakam* and Sri Venkateswarar temple near *Madurantakam* contain Chola inscriptions in Grantha and Nagari characters.

The Calingula of the Madurantakam tank is a fine piece of masonry construction and is built in the form of a wavy line.

There is a famous Vishnu temple at *Thiruvadanthai*, 3 miles north of Covelong in Chingleput taluk.

The mosque and church at Covelong in Chingleput taluk are important for Muslims and Christians respectively.

Tirukkalikunram as the name implies is the hill of the Holy Kites. High up on a hill which is about 500 feet high there is a rock cut temple dedicated to Lord Siva (known here as Vedagiriswarar). Every day just before noon, a priest emerges from the temple with cooked rice, squats on a ridge near by, offers prayers and sounds a vessel. Immediately two white kites put in their appearance in the sky, come down and take some food from the hands of the priest. The popular belief is that these birds make their way every day from Benares to Lanka. The custom of feeding the kites is the hereditary right of a family and it is said to be several centuries old. The temple is accessible by a flight of steps in cut stone.

Mahabalipuram on the coast in Chingleput taluk is a place of architectural interest. The shore temple and the mono-lithic chariots, elephant and Arjuna's Penance are magnificent pieces of sculpture which attract hundreds of tourists throughout the year.

The Link Industries Limited have a factory in Chingleput for the manufacture of zipfasteners, the only one of its kind in the State.

Poondi reservoir (Satyamurthisagar) intended for augmenting the supply of drinking water to the Madras City, is at a distance of 6 miles from Tiruvallur.

There is an Irrigation Research Station at Poondi near the Reservoir.

There is a Government Rice Research Station at Tirur, Tiruvallur taluk.

The Stoneware Pipes Limited located at Tiruvallur are making glazed stoneware pipes useful for drainage and water-supply.

The Western India Match Factory at Tiruvottiyur is one of the biggest manufacturers of matches in South India employing about 1,500 workers.

A wood screw factory and a Pilot pen factory are new industries started in Saidapet taluk recently.

The Civil Aerodrome and the Madras Flying Club are at Meenambakkam 10 miles from Madras on the Great Southern Trunk Road.

The T.I. Cycle Works at Ambattur, the Ashok Motors at Ennore and the Standard Motor Company works at Vandalur are important cycle and automobile engineering enterprises in India.

The farms at Athur in Chingleput taluk and at Kuthambakkam in Sriperumbudur taluk are managed by educated individuals on scientific lines with latest agricultural implements and machinery. There are internal telephone connexions in the farm at Athur with facilities for recreation, spinning and adult education to the 100 workers employed there. The Farm at Kuthambakkam supplies all the vegetable seeds required by the Agricultural department of this state.

There are two light-houses in the district one at Pulicat in Ponneri taluk and the other at Mahabali-puram in Chingleput taluk.

Pulicat in Ponneri taluk, Alambarai in Madurantakam taluk and Covelong and Sadras in Chingleput taluk were Dutch settlements on the coast. There are still ruins of Dutch Forts to be seen.

PART I.

Section (i)

A—GENERAL POPULATION TABLES.

A—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in

respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. Pulicat in Ponneritaluk, though not having the population minimum of 5,000 has been treated as a town, for the reason that it possesses definitely urban characteristics.

5. "House".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

12. CHINGLEPUT DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population, of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes, in order to afford a correct basis of comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. Twenty-eight villages which originally formed part of Saidapet taluk and six villages which were in Ponneri taluk of this district were transferred to Madras City and Nellore district respectively as shown below :—

12. CHINGLEPUT DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories viz. the Agricultural, classes and the Non-agricultural classes. There are four Agricultural classes and four Non-agricultural classes as shown below :—

(i) *Agricultural Classes.*

- I. Cultivators of land wholly or mainly owned; and their dependants.
- II. Cultivators of land wholly or mainly unowned; and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

- V. Production (other than cultivation).
- VI. Commerce.
- VII. Transport.
- VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately, but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters, (M), (P), (C), respectively within brackets.

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

B—ECONOMIC TABLES.

B-I—Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up for each census tract in the district, the distribution of population, sex-wise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the I.C.E.C. Scheme—vide fly-leaf to Table A-V.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependants.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood."

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An 'earning dependant' is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a 'non-earning dependant'.

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholar-ships and funds ;

(3) Inmates of jails, asylums, almshouses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

12. CHINGLEPUT DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross classifies them (according to the nature of such means of livelihood) under the name eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in im-

portance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the a living, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

12. CHINGLEPUT DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each census tract in the district. The areas comprised in each census tract denoted by its number in Col. 1 have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four non-agricultural classes given in economic table B-I are distributed in the various divisions and sub-divisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their Secondary Economic Status, namely, Employer, Employee, and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ any one else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards employees, all persons engaged in production, commerce, or transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one sub-division without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Division and sub divisions of the I.C.E.C. Scheme.
(1)	(2)
Class V.—Production other than cultivation.	Division 0—Primary Industries not elsewhere specified.
	Division 1. Mining and Quarrying.
	Division 2. Processing and Manufacture of Foodstuffs, Textiles, Leather and Products thereof.
	Division 3. Processing and Manufacture—Metals, Chemicals and Products thereof.
	Division 4. Processing and Manufacture—Not elsewhere specified.
Class VI.—Commerce.	Division 6. Commerce.
Class VII.—Transport.	Subdivisions 7.0 to 7.4 of Division 7. Transport, Storage and Communications.
Class VIII.—Other services and miscellaneous sources.	Division 5. Construction and utilities.
	Division 7. Transport, Storage and Communications with the exception of sub-divisions 7.0 to 7.4.
	Division 8. Health, Education and Public Administration; and
	Division 9. Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence there will be difference to this extent between the total self-supporting persons of the non-agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each *Census tract*, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale,

3. The areas covered by each Census tract in the district denoted by its number in column (1) have been given in the Fly-leaf to Table B-I.

Tract No.	Total number of establishments.			Number of non-textile establishments.			Number of textile establishments.			
	Total.	Non-textile.	Textile.	Perennial (nine months and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Perennial (nine months and over).	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sex-wise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each Village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the

course of the Census of Small Scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf of general population Table A-V.

3. The areas included in each Census tract in the district have been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given below :—

PART II.
C.—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-1—Household (size).

This table has been prepared in respect of a population covering the members of Sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth House-numbering block in the Rural areas and every fiftieth household in every twentieth House-numbering block or locality in Urban areas.

2. The agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include

the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the Non-Backward Classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been given in the Fly-leaf to Table B-I.

C-II—Livelihood Classes by Age-group.

This table shows the livelihood distribution by age-groups for rural, urban and district totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "cut" as in a card game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked "G" and the other marked "S" as follows :—

The first five slips were placed in the pigeon-hole "G" then one slip was placed in the pigeon-hole "S." Thereafter for every nine slips placed in the pigeon-hole "G" one slip was placed in the pigeon-hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G." All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as "Sample" slips.

2. No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age "O" represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (Vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract in the district denoted by its number in column (1). The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—
