2. The circumstances leading to the substitution of revised figures are briefly as follows:—

At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognised synonym such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organised in Madras.

(ii) Before commencing the sorting a list of synonymous names, (i.e.) names synonymous with those of the communities published in the ' Constitution (Scheduled Castes) Order, 1950, was prepared in consultation with the Collectors of districts and sent to the State Governments

of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be Scheduled Castes in the composite Madras State (as it existed before the formation of the Andhra State) by the Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names, in the list below:—

(iii) Separate population figures have been ascertained for the following individuals castes, the names of which are likely to be considered for inclusion in or exclusion from the existing list of Scheduled Castes.

ANDHRA STATE :

1 Pombala
2 Valmiki (Agency areas).

MADRAS STATE :

1 Perumkollan
2 Vathiriyan.
3 Vedan.
4 Araya.
5 Valan.
6 Mukkuvan.
7 Koliyan (recommended by Madras Government)
8 Kurichchan.

The population figures of the communities, Valmiki and Kurichchan have been included in the re-sort of Scheduled Castes population figures as they already find a place in the 'Constitution (Scheduled Castes) Order, 1950' while those relating to the other communities have not been included.

Separate figures for the above communities are given in the Table below:—

PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II. Cultivators of land, wholly or mainly unowned, and their dependants:

III. Cultivating labourers and their dependants,

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active but the classes and groups specified below constitute an exception to this rule—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts : Part I consists of three sections, namely, Section (i) containing the General Population tables (A-series), the Economic Tables (B-series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small Scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban statistics, and Part II containing the Household (size) Table C-I, and Tables showing Livelihood Classes and Literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D-series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of Livelihood under each livelihood class and Table C-II—Livelihood classes by age groups furnish information at the district level. The other population tables in the A-series, the summary figures for Taluks (Table E) and the infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural/urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving villagewise and wardwise information for Small Scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

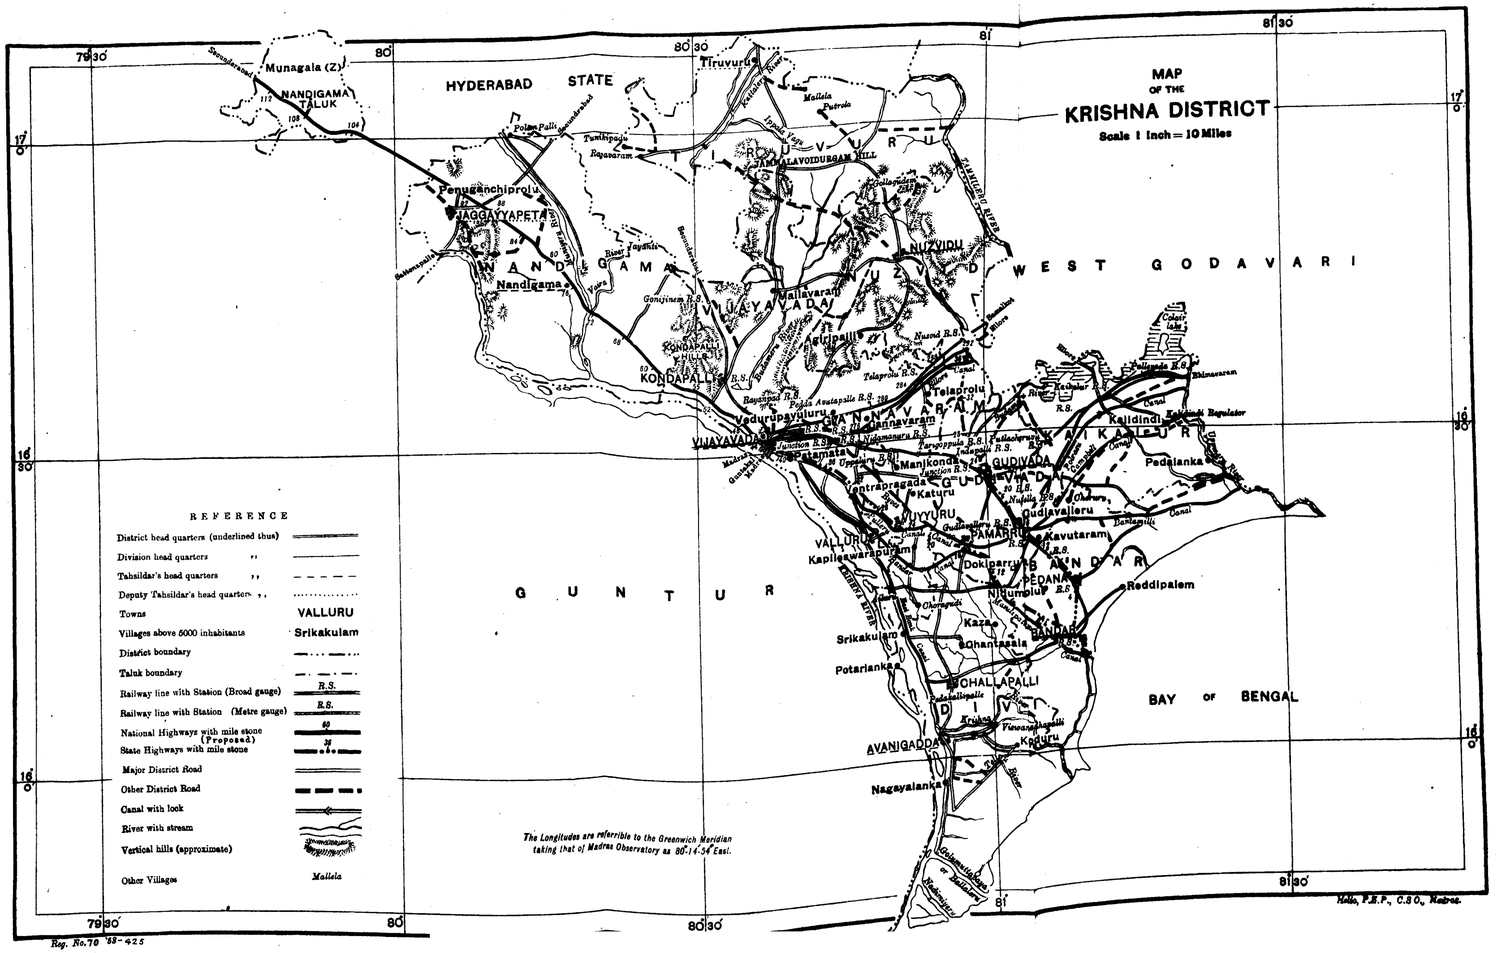
Superintendent of Census Operations, Madras.



4. KRISHNA DISTRICT.

INTRODUCTION TO KRISHNA DISTRICT

I. (*a*) *Situation and physical characteristics.*—The Krishna district lies between 15°43′ and 17°10′ of the northern latitude and 80° and 81°33′ of the eastern longitude. The district has undergone some minor changes in its territorial limits since 1950 on account of the exchange of enclaves with the State of Hyderabad. The following enclaves which originally belonged to Krishna district were transferred to Hyderabad State :—

Lingagiri, Sarvavaram, Kalavapalli, Lakkavaram, Amaravaram, Ganagalanda, Molugumada, Rompimalla and Mallavaram villages.

The following villages of Hyderabad State were absorbed in Krishna district :—

Kodavatikallu, Ustepalli Partala, Gani Atkur, Mogulur, Battinapadu, Ganugupadu, Boravancha, Mallavalli and Pullapadu villages.

The district is bounded on the north by the Hyderabad State and West Godavari district, on the east by the West Godavari district and the Bay of Bengal, on the south by the Bay of Bengal, and on the west by the Guntur district. It consists of the following nine taluks comprised in the Revenue Divisions noted against them :—

Name of Revenue Division.	Headquarters of the Revenue Division.	Name of the taluk.	Area of taluk (sq. miles).	Headquarters of the taluks.
Vijayavada	Vijayavada	Vijayavada	436	Vijayavada.
		Nandigama	679	Nandigama.
		Tiruvur	430	Tiruvur.
Nuzvid	Nuzvid	Nuzvid	335	Nuzvid.
		Gannavaram	295	Gannavaram.
Gudivada	Gudivada	Gudivada	230	Gudivada.
		Kaikalur	286	Kaikalur.
Bandar	Masulipatnam	Bandar	343	Masulipatnam.
		Divi	465	Avanigadda.
		Total ..	3,499	

The district has no regular shape and it is elongated roughly from north-west to south-east. The Hyderabad State territory wedges deep into the district between Nandigama and Tiruvur taluks. Bandar and Divi taluks abut the sea.

The district may broadly be divided into two natural zones, viz., the delta and the uplands. The taluks of Bandar, Divi, Gudivada, Kaikalur, Gannavaram and Vijayavada comprise the delta area and the rest of the district the upland area. The delta area forms part of the delta of the river Krishna. The upland area is part of the Deccan Plateau and it consists of an undulating plain broken by low ranges of hills which are the outlying spurs of the Eastern Ghats. The Kondapalli hill in the eastern border of Nandigama taluk and the western border of Vijayavada taluk and the Jammalavoidurgam hill in the southern part of Tiruvur taluk are the chief hills. There are some low ridges in Nuzvid taluk and parts of Gannavaram and Nandigama taluks.

The Collair lake, a shallow depression about 150 square miles in extent, lies in the northern part of Kaikalur taluk and the southern part of Eluru taluk of the West Godavari district. It acts as a reservoir for the drainage waters of the surrounding delta area during the monsoon and dries up in summer.

The delta is generally flat and in some places near the coast there are uncultivable swamps. The delta presents a vast and unbroken expanse of paddy fields dotted with villages.

(*b*) *Rivers.*—The Krishna and its tributary, the Muniyeru are the chief rivers of the district. The Krishna river rises in the Western Ghats near Mahabaleshwar in Bombay State about 40 miles from the Arabian Sea. Flowing across the Hyderabad State, it reaches the Madras State on the northern boundary of Kurnool district. Flowing thence along the northern boundary of Kurnool and Guntur districts it reaches the Krishna district at its north-western corner and flows down to the sea skirting the entire western boundary of the district. The river is fed by its tributary, the Muniyeru which flows from north to south across Nandigama taluk. The Tammileru river flows along the eastern boundary of Tiruvur and Nuzvid taluks and enters the West Godavari district. The Budameru is a small stream flowing through Vijayavada,

Gannavaram, Gudivada and Kaikalur taluks and emptying itself into the Collair lake.

(*c*) *Forests.*—The areas of the reserved forests in the taluks of the district are furnished below :—

Name of taluk.	Reserved forests (sq. miles.)
Nandigama	60·83
Vijayavada	56·17
Tiruvur	24·74
Nuzvid	30·03
Gannavaram	10·94
Bandar	44·15
Divi	68·29
Total ..	295·15

The reserved forests in Divi taluk are Mangrove forests.

(*d*) *Climate and Rainfall.*—April to June are the hottest months. The thermometer drops from July on the outbreak of the south-west monsoon on the West Coast. Rains are had during the south-west monsoon and the north-east monsoon. The climate from November to February is fairly cool.

The particulars of the average annual rainfall and the average number of rainy days in a year for the various taluks of the district are furnished below:—

Name of taluk.	Average annual rainfall.	Average number of rainy days in a year.
Nandigama	32·02	47·3
Vijayavada	35·66	52·3
Tiruvur	37·98	51·2

(*e*) *Soils.*—There are three classes of soils in the district—alluvial, black regar and red ferruginous. There is also a small belt of arenaceous soil fringing the coast. The black regar is most extensive and occurs in all taluks, and predominantly in Kaikalur, Vijayavada and Nandigama taluks. Next in extent is the alluvial soil which occurs in all taluks except Kaikalur. The red soils are found in uplands. The talukwise distribution of the soil varieties is given below in thousands of acres :—

Taluk.	Alluvial.	Black regar.	Red ferruginous.	Arenaceous.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The river Krishna is the main irrigation source. By means of a dam built across the river at Vijayavada the waters of the river are taken into canals on both sides of the river above the dam. The canals on the eastern side and their branches serve the Krishna district and part of West Godavari and those on the western side serve the Guntur district. The rivers Muniyeru, Budameru and the Tammileru are also used for irrigation. There are irrigation tanks in the uplands. Wells are used in the uplands for irrigating dry and garden crops. Temporary pits are dug in the sea-board villages for watering dry crops. Irrigation is also done with Collair lake water and its outlet, the Upputeru.

Nandigama taluk.—Irrigation is carried on under tanks and wells. There is a dam across the

Muniyeru river at Polampalle village and the waters of the river are diverted through a net-work of channels for irrigation. The taluk is not liable to famine though distress may be caused by the failure of the monsoon.

Vijayavada taluk.—Irrigation is carried on under channels of the Krishna Anicut System. There is a pumping installation at Guntupalli and water is pumped direct from the Krishna river and used for irrigation. In the uplands there are tanks and wells. The taluk is immune from famine though distress may be caused in the uplands if there are no rains.

Tiruvur taluk.—Irrigation is carried on solely under tanks and wells and failure of monsoon may cause distress.

Nuzvid taluk.—Tanks and wells are the main sources of irrigation. Water is pumped to a few villages for irrigation from the Eluru Canal of the Krishna Anicut System. The river Tammileru feeds a few tanks in the taluk. The taluk is not liable to famine though distress may be caused in the event of failure of the monsoon.

Gannavaram taluk.—Tanks and wells are the sources of irrigation in the uplands. The delta area is served by the Krishna anicut system. The taluk is not liable to famine.

Kaikalur taluk.—The Krishna Anicut System is the chief irrigation source. The Collair lake and its outlet, the Upputeru afford water-supply which is mostly used for the second crop. The taluk is not liable to famine.

Gudivada taluk.—This is the most fertile taluk and is served by the Krishna Anicut System. The taluk is immune to famine.

Bandar taluk.—Irrigation is carried on chiefly by the Krishna Anicut canals. The taluk is immune to famine.

Divi taluk.—The taluk is served by the canals of the Krishna Anicut System. Water is also baled to small extents from the Krishna river. The Krishna east bank canal which irrigates this taluk is taken to the island portion of the taluk for irrigation by means of a trough aqueduct over the Krishna river. The aqueduct has been constructed at Puligedda and it has replaced the Divi Pumping System of irrigation till recently resorted to in this part of the taluk.

Particulars regarding the number of Minor irrigation sources, the area irrigated by them and the area irrigated by Major irrigation sources in each taluk are given below :—

(*g*) *Food crops and commercial crops.*—Paddy is the chief food crop of the district. Cholam is raised as a dry crop. Cumbu, varagu, ragi and maize are grown in limited extents. Groundnut and tobacco are the chief commercial crops. A statement showing the particulars of the area cultivated with food crops, pulses and commercial crops for the year 1946–47 which is the most recent normal year for the district is given in *Annexure I*.

(*h*) *Communications*—(i) *Roads.*—Roads from the district lead to the Hyderabad State and to the adjoining districts. The district contains 1,474 miles of roads comprising 94 miles of National Highways, 78 miles of Provincial Highways, 446 miles of Major district roads, 208 miles of other district roads, 454 miles of Village roads, 2 miles of Public Works Department roads and 192 miles of Municipal roads. Their taluk-wise distribution except in the case of Municipal and Public Works Department roads is given below :—

Name of taluk.	National Highways (miles).	Provincial Highways (miles).	Major district roads. (miles).	Other district roads. (miles).	Village roads (miles).	Total (miles).

The roads are not adequate in the taluks of Bandar, Vijayavada, Divi, Kaikalur, Nuzvid, Nandigama and Tiruvur.

(ii) *Railways*.—The district contains about 55 miles of Broad Gauge and 77¼ miles of Metre Gauge Railway. The Madras-Calcutta and Madras-Delhi lines branch off at Vijayavada. A Metre Gauge branch line from Gudivada on the Vijayavada-Masulipatnam line connects Bhimavaram on the Nidadavole-Narasapur line in West Godavari district. The taluks of Vijayavada, Nuzvid, Gannavaram, Gudivada, Kaikalur and Bandar are traversed by railways, and no railway line passes through the other taluks.

(iii) *Posts and Telegraphs*.—There are a Departmental Telegraph Office, a Post and Telegraph Head Office, 16 Post and Telegraph sub-offices, 29 non-combined sub-Post Offices and 270 branch Post Offices in the district. Their talukwise distribution is given below :—

Name of taluk.	Branch Post Offices.	Non-combined sub-Post Offices.	Post and Telegraph Head-Offices.	Post and Telegraph Sub-Offices.	Departmental Telegraph Offices.

II. (*a*) (i) *Growth of Population*.—The particulars of the population of the district and taluks in 1941 and 1951 and the percentage of variation are furnished below :—

Name of district and taluk.	Population. 1941.	Population. 1951.	Percentage of variation.
Krishna District	**1,450,321**	**1,779,484**	**22·7**
Nandigama taluk	204,547	239,639	17·2
Vijayavada taluk	248,024	356,572	43·8
Tiruvur taluk	106,434	121,860	16·5
Nuzvid taluk	89,974	107,227	19·2
Gannavaram taluk	163,815	198,579	21·2
Kaikalur taluk	99,645	119,596	20·0

Bandar (Masulipatnam)	179,778	218,982	21·8
Divi	187,494	218,089	16·3

"The district increase is 22·7 per cent—17·4 per cent in the uplands and 24·7 per cent in the deltaic area. The taluk increases range from 15·4 per cent in Gudivada taluk to 43·8 per cent in Vijayavada taluk. The large increase in the district is in fact due to the very large increase in Vijayavada taluk (43·8 per cent) which again is due to the enormous increase (77·8 per cent) in Vijayavada Municipality. It is not surprising that the smallest increase is in Gudivada taluk which is the most congested deltaic area in the district. Being a heavily surplus district in food, this district has been benefited by the increases in food prices during the decade. The profitable nature of groundnut cultivation and the cultivation of Virginian tobacco have made a lot of difference to the uplands. In Nuzvid taluk, there has been disafforestation on an appreciable scale and cultivation of the disafforested lands with groundnut. Groundnut cultivation proved so profitable that it spread not only in the uplands but also in the delta. The increase of population even in Kaikalur taluk (20 per cent) is attributable partly to groundnut cultivation and partly to the larger area cultivated with paddy in the Collair lake area. Considerable numbers of landless poor have migrated into this taluk from Guntur district and have taken part in the extension of paddy cultivation. The enormous growth of Vijayavada Municipality is nothing surprising. It is at the head of the Krishna delta and is one of the most important Railway junctions in India. The railway colony has considerably expanded, and the town has been growing in importance as a commercial centre. There has been also a large increase in the number of Rice mills. Metal quarries in and around the City have led to

immigration not only from the surrounding villages but from Guntur district also. Apart from the large numbers of labouring classes attracted by a growing town, considerable numbers of the landed gentry have migrated into this town from rural parts of the district, partly for the education of their children and partly on account of the attraction of urban facilities and amenities in this important and convenient town in the district."

(EXTRACTED FROM CENSUS REPORT—PART I.)

(ii) *Vital statistics*.—The particulars of births and deaths and deaths due to various causes in the district for the decennium 1941–1950 are furnished in *Annexure II*.

Compared to the average birth rate of 31·7 per mille for the State during the decade under review, the average birth-rate of 34·5 per mille in the district has registered an increase of 9 per cent. The average death-rate in the district was 20·6 as against 21·2 per mille for the State. The annual death rates recorded in the decade show a downward trend. The district was free from plague during the decade. Average mortality rate of 0·3 per mille from Cholera was much less than that (0·6) for the State. The death-rates from other principal causes were about the normal for the State. The infant mortality rate during the second half of the decade has decreased by about 14 per cent as compared with that for the first half.

(*b*) *Medical relief*.—A list of medical institutions in the district with their bed strength is given below :—

There are X-Ray sets in the Government Hospitals at Masulipatnam and Vijayavada.

There is a private Leprosy Hospital with 16 beds at Kesarapalli in Gannavaram taluk.

(*c*) *Water-supply arrangements*.—In the delta areas tanks filled with Krishna river water form the chief source of supply of water for drinking. In the uplands tanks fed by rain and hill streams form the source of supply. Wells form the secondary source of water-supply. In Masulipatnam and Vijayavada Municipalities there is protected water-supply through pipes.

A statement showing the total number of villages in each taluk, the number of villages where there is protected water-supply and the number of wells in each taluk is furnished below :—

Name of taluk.	Total number of villages.	Number of villages where there is protected water-supply.	Number of water-supply wells provided by Government.

	Motor Transport Works.	11	187
	Cement	1	598
Nuzvid	Rice Mills	4	117
Nandigama	Rice and Oil Mills	15	484

There is a fruit canning company at Vijayavada. There is a Biscuit Factory and a Pharmaceutical Works Factory at Ramavarappadu in Vijayavada taluk and a Soap Factory at Peranki of the same taluk.

V. *Items of General Importance.*—There are an Electric Thermal Station and a Broadcasting Station of the All-India Radio at Vijayavada.

Masulipatnam is a minor sea-port having trade with Ceylon and the eastern countries. It is famous for its cloth-printing and dyeing industry. There are the Andhra Scientific Company and the National Chemicals at Masulipatnam.

The Pedana Sarees, manufactured at Pedana in Bandar taluk are famous and are exported.

Kondapalli in Vijayavada taluk is famous for its Chromite mines and toy making.

There are ancient Buddhist relics in Ghantasala (Divi taluk), Gudivada (Gudivada taluk), Jaggayyapet (Nandigama taluk) and Vijayavada (Vijayavada taluk).

4. KRISHNA DISTRICT.

PART I.

A.—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the Rural and Urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "*Village*" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "*Town*" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "*House*".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

A-II—Variation in Population during Fifty Years.

This table compares the population, of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial change, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial changes that occurred during the decade are

(i) the transfer of the following villages from this district to Hyderabad State :—Lingagiri, Sarvavaram, Kalavapalli, Lakkavaram, Amaravaram, Ganagalanda, Molugumada, Rompimalla and Mallavaram, and

(ii) the transfer of the following villages from Hyderabad State to this district :—Kodavatikallu, Ustepalli, Parvala, Gani Atkur, Mogulu, Battinapadu, Ganugupadu, Boravancham, Mallavalli and Pollapadu.

The transfers due to the exchange of enclaves have resulted in a net addition of 6,027 persons to the district total.

4. KRISHNA DISTRICT.

A-IV—Cities and Towns classified by Population with variations since 1901.

This table shows the population and distribution of sex of cities and towns of the district of each at the last six enumerations,

2. The following towns have been treated as cities for the 1951 Census :—

1. Vijayavada.
2. Masulipatnam.

3. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.		Limits of population.
I	..	100,000 and over.
II	..	50,000 to 100,000.
III	..	20,000 to 50,000.
IV	..	10,000 to 20,000.
V	..	5,000 to 10,000.
VI	..	Under 5,000.

4. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census, has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively, within brackets.

7. Towns newly appearing at this census have been printed in *italics*.

* Godavari District was carved out of the old Krishna district between 1921 and 1931.

4. KRISHNA DISTRICT.

A–V—Towns arranged Talukwise with Populations by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-agricultural Classes. There are four Agricultural Classes and four Non-agricultural Classes as shown below:—

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned; and their dependants.
II. Cultivators of land wholly or mainly unowned; and their dependants.
III. Cultivating labourers; and their dependants.
IV. Non-cultivating owners of land; agricultural rent-receivers; and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—
V. Production (other than cultivation).
VI. Commerce.
VII. Transport.
VIII. Other services and miscellaneous sources.

3. In this table the figures for the Agricultural Livelihood Classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Contonment are indicated by the use of the letters, (M),(P), (C), respectively within brackets.

6. For the definition of a "Town" *see* fly-leaf to Table A-I.

7. Towns newly appearing at this Census have been printed in *italics*.

4. KRISHNA DISTRICT.

A–Summary Figures for each taluk in the district.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk 'total' are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous census figures of population have been adjusted with reference to the merger of States, transfer of enclaves, and inter-district transfers, if any. The rural and urban population figures have been taken as they were at the 1941 and 1951 Census and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from Census to Census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for 'rural' and 'urban' for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural', in the districts and taluks where new towns have been recognised.

5. In respect of Tiruvur and Kaikalur taluks which have no urban areas, the figures represent the totals alone.

B—ECONOMIC TABLES.

B-I—Livelihood Classes and Sub-Classes.

This table shows by rural/urban break-up for each census tract in the district, the distribution of population, sex-wise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the Indian Census Economic Classification Scheme—(vide fly-leaf to Table A-V).

2. The areas comprised in each of the census tracts into which this district has been delimited for the purposes of census tabulation are given below :—

Rural Tracts.

No. 40—Nandigama.	All the villages and panchayats not treated as census towns.	In Nandigama taluk.
No. 41—Vijayavada.	Do.	In Vijayavada taluk.
No. 42—Tiruvur ..	Do.	In Tiruvur taluk.
No. 43—Nuzvid and Gannavaram.	Do.	In Nuzvid and Gannavarm taluks.
No. 44—Kaikalur ..	Do.	In Kaikalur taluk.
No. 45—Gudivada ..	Do.	In Gudivada taluk.
No. 46—Bandar ..	Do.	In Bandar taluk.
No. 47—Divi ..	Do.	In Divi taluk.

Non-City Urban Tracts.

No. 10—Jaggiapet town in Nandigama taluk, Valluru and Kondapalli towns in Vijayavada taluk, Nuzvid town in Nuzvid taluk, Vuyyuru town in Gannavaram taluk, Gudivada and Pamarru towns in Gudivada taluk, Pedana town in Bandar taluk, Avanigadda and Challapalli towns in Divi taluk.

City Tracts.

No. 6—Vijayavada City in Vijayavada taluk.

No. 7—Bandar (Masulipatnam) City in Bandar taluk.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An 'earning dependant, is a person who secures an income which is not sefficient to support him (or her). A person who does not secure any income either in cash or kind, is a 'non-earning dependant'.

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms-houses and recipients of doles ;

(4) Beggars and Vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

4. KRISHNA DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (I) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four non-agricultural classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee and Independant worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce, or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one sub division without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural classes classified in Economic Table B-I correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	*Divisions and Subdivisions of the I.C.E.C. Scheme.*
Class V—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce.	Division 6.—Commerce.
Class VII—Transport.	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and Miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4. Division 8.—Health, Education and Public Administration; and Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be difference to this extent between the total self-supporting persons of the Non-Agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next parag.aph.

4. KRISHNA DISTRICT.

7. Details of persons who derive their principal means of livelihood otherwise than through productive activity and who are included under livelihood class VIII mentioned in the fly-leaf to Economic Table B-I are given below :—

Tract No.	Total.			Persons living principally on income from non-agricultural property.		Persons living principally on pensions, remittances, scholarships and funds. 4. KRISHNA DISTRICT.

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each Census tract, in the district the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associated activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each Census tract denoted by its number in column (1) have been given in the fly-leaf to Table B-1.

Tract No.	Total number of establishments.			Number of non-textile establishments.			Number of textile establishments.

4. KRISHNA DISTRICT.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sexwise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the course of the Census of Small Scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf of general population Table A-V.

3. The areas included in each census tract in the district have been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given below as an appendix.

4. KRISHNA DISTRICT.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the rural areas and every fiftieth household in every twentieth house-numbering block or locality in urban areas.

2. The Agricultural and the Non-Agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are include among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each census tract denoted by its number in column (1). The areas covered by each census tract have been given in the fly-leaf to Table B-I.

C-II—Livelihood classes by age-groups.

This table shows the livelihood distribution by age-groups for rural, urban and district totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "cut" as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked "G" and the other marked "S" as follows :—

The first five slips were placed in the pigeon-hole "G" then one slip was placed in the pigeon-hole "S". Thereafter for every nine slips placed in the pigeon-hole "G," one slip was placed in the pigeon-hole "S" until the total number of slips left was less than nine and these residuary slips were all put into hole "G". All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as 'Samples' slips.

No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

The figures under age '0' represent infants below one year.

C-IV—Age and literacy.

This is yet another table prepared in respect of the 10 per cent samples of the general population. (Vide fly-leaf to Table C-II.)

2. Age groups 0 and 1 to 4 given in Table C-II have been combined into one age group, and the age group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age group 0 to 4 are treated as illiterates.

3. The figures are given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been specified in the fly-leaf to Table B-1.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literates, i.e., persons who are able to read only, have been included among the illiterates—details for each such persons are given below :—
