P R E F A C E

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables village-war, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

- I. Cultivators of land, wholly or mainly owned, and their dependants.
- II. Cultivators of land, wholly or mainly unowned, and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

- V. Production other than cultivation.
- VI. Commerce,
- VII. Transport, and
- VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

- (i) Self-supporting persons,
- (ii) Non-earning dependants, and
- (iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

- (1) Self-supporting persons of Agricultural Class IV,
- (2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—
 - (a) Non-working owners of non-agricultural property,
 - (b) Pensioners and remittance holders ;
 - (c) Persons living on charity and other persons with unproductive occupations ;
 and
 - (d) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook, covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the General Population Tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) (Table C-I) and Tables showing Livelihood Classes and literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped together to form a non-city urban tract. All the rural tracts in the State have been assigned

numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each are furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries, such as, cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise details of Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevant paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

J. I. ARPUTHANATHAN,
Superintendent of Census Operations, Madras.

13. TIRUCHIRAPALLI DISTRICT.

INTRODUCTION TO TIRUCHIRAPALLI DISTRICT

I. (a) *Situation and physical characteristics.*—The present Tiruchirapalli district which includes within its limits the merged State of Pudukottai lies between 10° and 11°30' of the northern latitude and 77°45' and 79°30' of the eastern longitude. It is an inland district bounded on the north by the Salem and South Arcot districts, on the east by the Tanjore district, on the south by the Madurai and Ramanathapuram districts and on the west by the Coimbatore district. The district consists of ten taluks comprised in five revenue divisions:—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in Revenue Division.	Area of taluk in square miles.	Headquarters of the taluk.
Tiruchirapalli	Tiruchirapalli	Tiruchirapalli	328	Tiruchirapalli.
Karur	Karur	Karur	610	Karur.
		Kulittalai	913	Kulittalai.
Musiri	Musiri	Musiri	675	Musiri.
		Lalgudi	373	Lalgudi.
Ariyalur	Ariyalur	Udaiyarpalayam	749	Jayamkondashola-puram.
		Perambalur	678	Perambalur.
Pudukottai	Pudukottai	Kulathur	465	Keeranur.
		Alangudi	347	Alangudi.
		Tirumayam	367	Tirumayam.
		Total	5,505	

The district is irregular in shape with the westernmost taluk of Karur jutting into the Coimbatore district and the Udaiyarpalayam taluk in the north-east forming a wedge between South Arcot and Tanjore districts. The taluks of Musiri, Kulittalai, Kulathur and Tirumayam are in a row from north to south on the west; while the taluks of Perambalur, Lalgudi, Tiruchirapalli and Alangudi form a row on the east.

The district has no well marked natural divisions. There are a few hills the most important of which is the Pachamalai hills covering extreme north-east corner of Musiri taluk and the western portion of the Perambalur taluk. The Pachamalais are about 2,000 feet in height with peaks about 3,400 feet and extend into Salem district. Except for the Pachamalais, the Musiri and Perambalur taluks form a gently undulating upland area. The Udayarpalayam and Lalgudi taluks are fairly flat. The Karur taluk is an undulating plain with the Rangamalai rocky height (3,101 feet) in the extreme south of the taluk. The Kulittalai taluk is a fairly level plain broken here and there by isolated small hills and two ranges of larger heights, the Toppasamimalai (3,382 ft.) and the Vellimalai (2,757 ft.) in the south.

Tiruchi—1

The Tiruchirappalli, Lalgudi, Musiri and Kulittalai taluks have wet lands and topes on both sides of the Cauvery and Coleroon rivers, but away from it the country rises into uplands broken by striking rocky hills. The Kulathur, Alangudi and Tirumayam taluks forming the Pudukottai division consist of an undulating barren plain interspersed with small but picturesque rocky hills which are most numerous in the south-west portion of the division. The country here is wild and rugged with thick jungles.

(b) *Rivers.*—The Cauvery is the most important river of the district. It rises in the Western Ghats in Coorg, and flowing through the Mysore State and between Salem and Coimbatore districts enters the Tiruchirapalli district at the north-western corner of the Karur taluk. After flowing along the northern boundary of the Karur taluk the river cuts across the district from west to east dividing it into two nearly equal parts—the northern portion comprising the taluks of Musiri, Perambalur, Lalgudi and Udaiyarpalayam and the southern portion comprising the other taluks. At a place 9 miles west of Tiruchirapalli Town, the Cauvery branches itself into two. The northern branch taking the name of the Coleroon flows along the southern boundary of Lalgudi and Udaiyarpalayam taluks in a north-easterly direction.

Udaiyarpalayam taluk.—The Nandyar channel irrigates about 5,400 acres in the south-western portion of the taluk. The Ponneri channel of the Cauvery irrigates about 4,500 acres. There are 7 major tanks and 707 minor tanks serving about 12,000 acres. Large extents of manavari lands are cultivated with unirrigated paddy with the aid of rains.

Lalgudi taluk.—A major portion of the taluk, i.e., about 37,000 acres is served by the Cauvery river channels. The Nandyar channel irrigates about 2,000 acres in this taluk. The Uppar feeds a reservoir at Omandur constructed recently. There is one major tank and 142 minor tanks irrigating about 4,000 acres. The taluk is surplus in foodgrains.

Karur taluk.—The Pugalur, Vangal and the Nerur channels taking off from the Cauvery irrigate about 5,000 acres on the northern portion of the taluk alongside of the river Cauvery. The Amaravati irrigates about 10,000 acres while the Noyyal and the Nangangai irrigate about 100 acres. There are 2 major and 10 minor tanks commanding an ayacut of about 1,200 acres. There are also large extents of manavari lands. Failure of rains and failure of supply in the Amaravati create drought conditions occasionally.

Kulittalai taluk.—The Amaravati river channels irrigate 2,500 acres and the Cauvery channels 23,000 acres in this taluk. Four major tanks irrigate about 800 acres and 265 minor tanks irrigate about 11,000 acres. The taluk is fairly fertile and is not liable to famine.

Tiruchirapalli taluk.—The Cauvery channels irrigate about 42,000 acres. There are 13 major tanks commanding 3,400 acres and 338 minor tanks commanding about 10,300 acres. The taluk is surplus in foodgrains and is not liable to famine.

Kulathur, Alangudi and Thirumayam taluks.—Olavayal extension channel from the Cauvery irrigates 1,276 acres in Alangudi taluk. There are 1,812 rain fed tanks in Kulathur taluk, 791 in Alangudi taluk and 1,465 in Thirumayam taluk. There are 22 major tanks in Alangudi taluk, with an ayacut of 4,611 acres, 27

major tanks in Kulathur taluk with an ayacut of 8,346 acres and 40 major tanks in Thirumayam taluk with an ayacut of 13,748 acres. The taluks are generally dry and suffer extreme scarcity conditions whenever there is failure of rains.

(g) *Area cultivated with food and commercial crops.*—Plantain and Coconuts are grown in the delta area. The chief food crops are paddy, cholam, cumbu and varagu with limited extents of samai ragi, korra and maize. Among pulses red gram is widely cultivated. Gingelly and groundnut are the chief commercial crops with limited extents of cotton, tobacco and sugarcane. The particulars of the area cultivated with food crops, pulses and commercial crops in the various taluks in 1949-50 which was a normal year for the district are furnished in *Annexure I*.

(h) *Communications.* (i) *Roads.*—The district is connected with places outside by several roads. The Perambalur taluk is connected by two roads, one from Vriddachalam in South Arcot district and the other from Attur in Salem district. Roads from Jayamkondasholapuram lead to Vriddachalam, and Chidambaram in South Arcot district and Aduthurai in Tanjore district. A road from Ariyalur leads to Tanjore, the Coleroon being crossed by ferry. A road from Tiruchirapalli leads to Tanjore. Roads from Manapparai lead to Melur and Madurai. Roads from Karur taluk lead to Dindigul, Erode, Namakkal and Dharmapuram. Roads from Musiri taluk also lead to Namakkal. Roads from Pudukottai division connect Tanjore, Madurai and all the important towns in Ramanathapuram district.

There are 2,334 miles of roads within the district comprising 130 miles of National Highways, 191 miles of Provincial Highways, 727 miles of major district roads, 313 miles of other district roads, 691 miles of village roads, 89 miles of Public Works Department roads and 193 miles of municipal roads.

The talukwise distribution of the mileage of roads excluding Public Works Department and municipal roads is given below:—

Name of taluk	National Highways.	Provincial Highways.	Major District roads.	Other District roads.	Village roads.	Total.
Musiri	..	28	124	9	66	227
Perambalur ..	26	16	59	46	26	173

Thirumayam ..	..	17	32	..	136	185
Total ..	130	191	727	313	691	2,052

The condition of the roads in the district is fair. The communications in all the taluks are adequate except in Kamarasavalli firka in Udayarpalayam taluk and Peruvallappur firka in Lalgudi taluk where access to some villages is difficult.

(ii) *Railways.*—60 and a half miles of broad gauge and 162½ miles of metre gauge Railway of the Southern Railway traverse the district. The Broad gauge line proceeds from Tiruchirapalli to Erode across the north-western portion of Tiruchirapalli taluk and the northern portions of Kulittalai and Karur taluks. The main metre gauge line from Tanjore traverses Tiruchirapalli taluk and Pudukottai division via Tiruchirapalli Junction to Dhanuskodi. The south-east metre gauge line proceeds from Tiruchirapalli junction to Madurai and beyond across Tiruchirapalli and Kulittalai taluks. A chord line (metre gauge) from Villupuram runs via Ariyalur traversing parts of

Udaiyarpalayam, Perambalur, Lalgudi and Tiruchirapalli taluks to join the main line at Golden Rock Junction. The taluk headquarters of Lalgudi, Kulittalai, Keeranur (Kulathur), Thirumayam and Karur as well as the taluk and district headquarters of Tiruchirapalli are served by railway.

Karur station serves the out-agency of Vangal for passengers and goods and Tiruchirapalli junction serves the out-agency of Turaiyur for parcels and goods.

(iii) *Post and Telegraph.*—The district has a departmental telegraph and a head post office at Tiruchi. There is a head post and Telegraph office each at Karur and Pudukottai. There are 34 sub-post and Telegraph offices. 37 non-combined sub-post offices and 572 branch post offices in the district. Their taluk wise distribution is given below:—

II. (a) (i) *Growth of population.*—The particulars of population of the district and taluks in 1941-1951 and the percentage of variation are furnished below:—

Name of district and taluk.	Population.		Percentage of variation.
	1941.	1951.	
Tiruchirapalli district ..	2,594,136	2,942,882	13.5
Musiri	312,348	363,680	16.4
Perambalur	244,817	266,569	8.9
Udaiyarpalayam	380,031	398,231	4.8
Lalgudi	215,683	238,931	10.8
Karur	289,198	324,801	12.3
Kulittalai	353,731	405,847	14.7
Tiruchirapalli	359,980	469,145	30.3
Kulathur	127,852	147,155	15.1
Alangudi	150,755	176,070	16.8
Thirumayam	159,741	153,453	-3.9

“The population has increased by 13.5 per cent during the decade 1941-51, as against 12.1 per cent during the previous decade. The deltaic portion

has shown an increase of 18.9 per cent (as against 14 per cent during the previous decade), while the non-deltaic portion has shown an increase of 8.4 per cent (as against 10.4 per cent during the previous decade). These figures include the Old Pudukottai State area, which has been merged in this district, Thirumayam taluk of the Pudukottai revenue division has shown a decrease of 3.9 per cent. This is a dry taluk, which suffered badly on account of the failure of the north-East monsoon for a number of years in succession during the latter part of the decade, and large numbers of labouring classes migrated to Tanjore district for work and food. Udaiyarpalayam taluk has shown an increase of only 4.8 per cent. This is a dry taluk, and for want of seasonal rains there was even scarcity of water in 1950-51, and at the time of the Census enumeration, large numbers of the labouring classes migrated to adjoining areas in Tanjore district for work and food. The large increase of 30.3 per cent in Tiruchirapalli taluk is mainly due to the growth of Tiruchirapalli town; this is one of the premier towns in the State, is an important railway junction

on the banks of the Cauvery river with a large Railway Workshop in the Golden Rock Colony, and is, besides, a large trade and industrial centre and also an important educational centre. It is the main market for the portion of the Cauvery delta, which is situated in this district.

Though Tiruchipalli and Srirangam are distinct municipalities, they really constitute only one city, with only the Cauvery dividing them."

(Extracted from the Census Report—Part I.)

(ii) *Vital statistics*.—A statement showing the particulars of births and deaths and deaths due to various causes for the decennium 1941-50 is furnished in *Appendix II*.

The recorded birth and death rates during the decade show a downward trend. The average birth rate during the period under review was 29.6 per mille which is less than that for the State (31.7). The average death rate was 21.7 as against 21.2 for the State. The infant mortality rates also reveal a decline from an average of 168.9 in the first half of the decade to 133.7. The district was subject to the frequent epidemic of cholera. Except for three years (1941, 1945 and 1946), the incidence of cholera death was very high and that in 1942 was abnormally high—4,061 deaths from cholera were recorded representing 7.5 per cent of total deaths. The average mortality rates from small-pox and fevers were less than those for the State; while that from dysentery and diarrhoea and respiratory diseases was about the normal for the State. The average maternal mortality rate of 12.6 per 1,000 births was high, compared to the rate of 8.1 for the State.

(b) *Medical relief*.—A list of medical institutions in the various taluks of the district with their bed strength is furnished below:—

V. Items of general interest.—The towns of Tiruchirappalli, Pudukottai, Karur and Srirangam are municipalities.

Tiruchirappalli City which is situated on the banks of the Cauvery is a big railway junction and is reputed as one of the important educational centres in South India. It was at one time the capital of the Chola Kings. There is a huge rock (273 feet high) in the heart of the city with a Siva Temple at the foot and a Ganesa temple on the top from where one can have a panoramic view of the City and surroundings. The workshops of the metre gauge section of the Southern Railway are at Golden Rock, 2 miles from Tiruchirappalli.

The municipal town of Srirangam, 3 miles from Tiruchirappalli on the island of Srirangam is famous for the most important among the shrines held sacred by the Hindus of Vaishnava sect. The temple there, dedicated to Lord Sri Ranganatha, is one of prehistoric antiquity and of great architectural interest. The Vaikunta Ekadasi festival occurring in December-January attracts a very large concourse of pilgrims.

Tiruvanaikkaval or Jambukeswaram as it is otherwise known also situated on the island of Srirangam has a famous Siva temple. It enshrines the Aplingam (water), one of the five famous lingams representing the five elements, other, air, fire, water and earth. There is perennial flow of water from a spring beneath the lingam.

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. The following places not having the population minimum of 5,000 have been treated as towns for the reason that they possess definitely urban characteristics :—

- (1) Arimalam in Thirumayam taluk.
- (2) Ramachandrapuram in Thirumayam taluk.
- (3) Karambakudi in Alangudi taluk.
- (4) Pillamangalam (Alagapuri) in Thirumayam taluk.
- (5) Thirumayam in Thirumayam taluk.

5. "House".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous censuses. The figures recorded at the previous censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The following villages of Karur taluk of this district were transferred to Dindigul taluk of the Madur a district during the decade :—

19. TIRUCHIRAPALLI DISTRICT.

A-V—Towns arranged talukwise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous Censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural Classes and the Non-Agricultural Classes. There are four Agricultural classes and four Non-Agricultural classes as shown below :—

(i) *Agricultural Classes.*

- I. Cultivators of land wholly or mainly owned and their dependants.
- II. Cultivators of land wholly or mainly unowned and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent receivers, and their dependants.

(ii) *Non-Agricultural Classes.*

Persons (including dependants) who derive their principal means of livelihood from—

- V. Production (other than cultivation).
- VI. Commerce.
- VII. Transport.
- VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. Towns newly appearing at this census have been printed in *italics*.

19. TIRUCHIRAPALLI DISTRICT.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk 'total' are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

E—Summary figures by taluks.

4. Previous census figures of population have been adjusted with reference to the merger of States, and inter-district transfers, if any. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and vice versa from census to census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "rural" and "urban" for 1941, the areas of the towns newly formed at the present census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for rural, in the districts and taluks where new towns have been recognized.

Tiruchi—4A

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "self-supporting", if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "self-supporting" person in this sense has been regarded as a dependant. An 'earning' dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a 'non-earning dependant.'

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

- (1) Persons living principally on income from non-agricultural property ;
- (2) Persons living principally on pensions, remittances, scholarships and funds ;
- (3) Inmates of jails, asylums, alms houses and recipients of doles ;
- (4) Beggars and vagrants ; and
- (5) All other persons living principally on income derived from non-productive activity.

19. TIRUCHIRAPALLI DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood ; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in

importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income, if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

19. TIRUCHIRAPALLI DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all employers and independent workers have been classified with reference to the Commodity produced or services performed by them individually. As regards employees, all persons engaged in Production, Commerce, or Transport (and not being domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows:—

Livelihood class.	Division and subdivisions of the Indian Census Economic Classification Scheme.
Class V.—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI.—Commerce ..	Division 6.—Commerce.
Class VII.—Transport ..	Subdivisions 7.0 to 7.4 of Division 7—Transport Storage and Communications.
Class VIII.—Other services and miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7.0 to 7.4. Division 8.—Health, Education and Public Administration. Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-Agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

19. TIRUCHIRAPALLI DISTRICT.

7. Details of persons who derive their principal means of livelihood otherwise than through productive activity and who are included under livelihood class VIII mentioned in the fly-leaf to Economic Table B-I are given below:—

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each Rural Census tract in the district with sex-wise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the

course of the Census of Small-scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf of general population Table A-V.

3. The areas included in each Census tract in the district have been furnished in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given below :—

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering Block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The Agricultural and the Non-agricultural classes refer to the four Agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include

the Scheduled Castes, the Scheduled Tribes and other classes not treated as Non-Backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly-leaf to Table B-I.

Tract No.				Total number of households.	Total household population.			Total number of sample households.	Sample household.

C-II—Livelihood Classes by Age-groups.

This table shows the livelihood distribution by age-groups for rural, urban and district totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "cut" as in a card game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked "G" and the other marked "S" as follows :

The first five slips were placed in the pigeon-hole "G", then one slip was placed in the pigeon-hole "S". Thereafter for every nine slips placed in the pigeon-hole "G", one slip was placed in the pigeon-hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G". All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as 'Sample' slips.

2. No smoothing formula has been adopted in preparing the table as in previous censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age '0' represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract denoted by its number in column (1) in the district. The areas as covered by each Census tract have been specified in the fly-leaf to table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—
