DISTRIBUTION OF REGISTERED FACTORIES ENGAGED IN
FOOD AND AGRICULTURAL PROCESSING

Note. In column 22 to 30, figures before oblique stands for number of units and after oblique the number of workers employed.

The grading of congestion was done according to the following indices.

I Extremely congested	Value for households with 1 room being between 627-894 and combined value for 1 and 2 rooms for the district being above 900 per thousand
II Very congested	1) Value for 1 room being between 627-894 but combined value for 1 and 2 rooms for the district being less than 900 ; 2) Value for 1 room being between 471-626 but combined value for 1 and 2 rooms for the district being more than 900 and 3) Value for 1 room being between 337-470 but combined value for 1 and 2 rooms for the district being more than 900
III Congested	Value for 1 room being between 42-626 but combined value for 1 and 2 rooms being between 750-900
IV Moderately congested	Value for 1 room being between 42-626 but combined value being for 1 and 2 rooms between 600-750
V Relatively comfortable	Value for 1 room being between 42-470 but combined value for 1 and 2 rooms being between 400-600
VI Comfortable	Value for 1 room being between 42-470 but combined value for 1 and 2 rooms being less than 400
