INTRODUCTION

This volume contains the Subsidiary Tables which express the data of the Main Tables of the 1961 Census in terms of percentages or proportions. In all 77 Subsidiary Tables, based on the main tables of A, B, C and D series have been prepared. Due to the enlarged programmes of tabulation undertaken in the present Census, a large number of Subsidiary Tables have been prepared and split into two parts *viz.*, Part I-C(i) and Part I-C(ii) making two independent volumes. The first part contains the tables pertaining to the General Population Tables and General Economic Tables and the second part relates to Household Economic Tables, Social and Cultural Tables and Migration Tables. The Subsidiary Tables to E Series *i.e.*, Housing and Establishments Tables have been published alongwith the main Tables in Volume I India Part IV-B. No Subsidiary Tables have been prepared for the tables of SCT/SC/ST series. Apart from these, two Subsidiary Tables of the B Series *viz.*, B-1.6(i) Working force in India by Broad Industrial Categories from 1911-1961, (ii) Workers per 1,000 population in each State and per 1,000 distribution of workers in Industrial Categories from 1901/1911-1961 and B-II.3(i) Workers in each City and Comparison of workers in Industrial Categories from 1901-1961, (ii) Workers per 1,000 population in each city and comparison of workers in Industrial Categories from 1901-1961, appear in a separate volume, Census of India, Paper No. 1 of 1967.

2. While the main Census Tables give the absolute figures of the various characteristics of the population in each Administrative Division, the Subsidiary Tables give the corresponding proportions of these various characteristics per 100, 1,000 or 10,000 as the case may be. These tables have been specially prepared to facilitate study of composition or distribution of population and comparison or correlation of various characteristics between States or from one Census to another. These tables thus highlight the main characteristics of each such unit which cannot be had at a glance from the absolute figures.

3. The Fly-leaf preceding each table is by way of an explanatory note which elucidates the general lay-out of the table and the method used in calculating the figures, wherever necessary. Besides, it indicates the source of the data appearing in the table.

4. The 77 Subsidiary Tables are based on the main tables of 1961 Census and their distribution Series-wise is as under :

1. A Series—Subsidiary Tables to General Population Tables

There are nine Subsidiary Tables in this Series. All are prepared from the General Population Tables of 1961 Census published in Volume I—India Part II-A(i). Five Tables are based on Table A-I, one each on Table A-II & A-III and two on Table A-IV. Out of nine Subsidiary Tables five tables furnish the material for earlier censuses and the remaining three tables *viz.*, A-I.1, A-III.1 and A-IV.1 show the distribution of population etc.

2. B Series—Subsidiary Tables have been divided into two parts. The first part is made up of the Subsidiary Tables to General Economic Tables and the second part the Subsidiary Tables to the Household Economic Tables

(i) The first part includes 33 Subsidiary Tables prepared from the General Economic Tables published in Volume I—India Part II-B(i), (ii), & (iii). These tables show the proportion and distribution of population etc. per 1,000 and 10,000 cross-classified with the important characteristics appearing in the Main Tables. The number of Subsidiary Tables based on each General Economic Tables is as follows:—

Main Tables	Number of Subsidiary Tables
B-I	6
B-II	3
B-III Part A	3
B-III Part B	2
B-IV	9
B-V	1
B-VI	1
B-VII Part A	3
B-VIII Part A	1
B-VIII Part B	1
B-IX	3
TOTAL	33

Of these 33 Subsidiary Tables, two tables *viz.*, B-I.6 and B-II.3 are being published in a separate volume as mentioned above. No Subsidiary Table has been prepared from Table B-VII Part B.

(ii) This portion of the Subsidiary Tables contains 12 Subsidiary Tables based on Household Economic Tables of the 1961 Census presented in Part III(i) & Part III(ii) of Volume I, India. Whereas the main tables present absolute figures for India, States and Union Territories and Other Areas on various economic characteristics of the household, the Subsidiary Tables present the same figures in term of percentage or distribution per 1,000, to facilitate comparison of various characteristics of one unit of presentation with another.

The data in respect of economic activities of each household was collected through Household Schedule for the first time in 1961 in the history of Indian Census. The information on two chief economic activities of the household *viz.*, Household Cultivation and Household Industry was collected in Household Schedules. This information was used for preparation of Household Economic Tables, which present data for 20% sample of the households drawn for rural and urban areas separately (except for Andaman & Nicobar Islands and Dadra & Nagar Haveli for which all the Schedules were tabulated, but the India figures include 20% sample of households for these areas as well). Household Schedule was not canvassed in Goa, Daman & Diu and NEFA. Thus the India figures exclude these areas. The material presented in these Subsidiary Tables is based on the data presented in the Household Economic Tables.

The Subsidiary Tables based on Household Economic Tables are :—

Definitions

URBAN

In order that an area could be classified as Urban a place had to be either a municipal corporation or a municipal area or a town committee or a notified area committee or cantonment board. Besides, places which did not have any of the above mentioned local bodies but possessed the following characteristics were also treated as urban areas or towns. (a) a density of not less than 1,000 per Sq. mile; (b) a population of 5,000+; (c) three fourths of the working population should be engaged in occupation other than agriculture; or (d) any other place which according to the S. C. O. of the State, possessed pronounced urban characteristics and amenities.

All other places were treated as rural areas or villages.

Household

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Institutions like boarding houses, messes and chummeries have also been regarded as census households but of 'unrelated persons living together'.

In 1961 Census, Household Schedules were also filled up for Institutional Households. These Schedules were however excluded at the time of drawing the sample of households. The data presented in Household Economic Tables relate only to family type households.

Household Industry

A Household Industry is defined as an industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. In the case of urban areas the household industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing servicing or repairing and includes makers and sellers of goods. The participation of the head of the household and/members of the household is an essential feature of the Household Industry. Hired labourers can also be engaged, but their role must be of secondary importance. The classification of Household Industry is according to Standard Industrial Classification Scheme. A list of common "Household Industries" up to 4 digit code household engaged in cultivation is given in appendix.

Household engaged in cultivation

A household having land under cultivation is a cultivating household when the head of the household himself and/any household member is engaged in cultivation of land which is either owned or held from Govt. or held from private persons or institutions for payment in money, kind or share, the household is said to be engaged in household cultivation. Thus both owner and tenant cultivators are included in this category. The households engaged in cultivation do not include the households whose members work only as agricultural labourers.

Interest in land

The households engaged in cultivation have been classified by interest in land in three parts.

(*a*) Owned or held from Govt.

(*b*) Held from private persons or institutions for payment in money, kind or share.

(*c*) Those engaged in cultivation of land partly owned or held from Govt. & partly from private persons or institutions for payment in money, kind or share.

Type (a) includes the total of all pieces of land owned or held in owner like possession *e.g.*, land held directly from Govt. under a grant, lease or assignment (i) with rights of permanent, heritable and transferable possession (ii) with rights of permanent and heritable possession but without the rights of transfer and (iii) temporary or conditional leases of any kind with the Government. Type (b) includes (i) with rights of permanent, heritable and transferable possession (ii) with rights of permanent and heritable possession but without right of transfer (iii) held in a variety of tenancies on tenures which are broadly classified as :

(*a*) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation.

(*b*) tenants who have been given permanent rights subject to the right of resumption by the owner.

(*c*) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period.

(*d*) tenants holding land on temporary leases who are liable to ejectment and

(*e*) areas held on condition of rendering service either to a village community or to Govt. and (iv) the following :

(*a*) land taken for a fixed amount of money

(*b*) land taken for a fixed amount of produce

(*c*) land taken for a share of produce

(*d*) land for which money is paid partly in one and partly in any other form mentioned above and

(*e*) land held free of consideration.

Type (c) is a combination of types(a) and (b) *Principal Household Industry :* The principal household industry is one which is conducted by the household for the longer period in the year.

Family worker

A family worker is a member of the household who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by the members of the family and ordinarily does at least one hour of work every day during the working season.

Hired worker

A hired worker is one who has been in whole time employment of the household during the last working season or is in whole time employment during current working season. This does not include agricultural labourers who are casually employed for short periods for harvesting of crops or other operations.

3. C Series—Subsidiary Tables to Social and Cultural Tables

In this series there are 14 Subsidiary Tables based on the Social and Cultural Tables published in Volume I—India Part II-C(i) and Part II-C(ii). One Subsidiary Table of each of the main tables C-I, C-III Part B, C-III Part C, C-V and C-VII have been prepared and two Subsidiary Tables each on tables C-IV, C-VIII Part A and C-VIII Part B. Three Subsidiary Tables have been prepared from the main Table C-II. There is no Subsidiary Table to Table C-VI. Out of these 14 Subsidiary Tables, four tables C-II.2., C-II.3, C-IV.1 and C-IV. 2 furnish comparable data with reference to previous censuses. Table C-I.1 is prepared from the data collected in Household Schedules and is based on 20 per cent sample of Households, whereas other tables are based on full count.

4. D Series—Subsidiary Tables to Migration Tables

This series consists of nine Subsidiary Tables prepared on the basis of the 1961 Census Migration Tables published in Volume I—India Part II-C(iii) and Part II-C (IV). Three Subsidiary Tables each from D-II and D-IV and one Subsidiary Table each from D-I, D-III and D-V have been prepared. There is no Subsidiary Table to Table D-VI. One small table for D-I.1 and one Inset Table for D-III.1 have also been prepared to give more detailed information.

The data furnished in the Subsidiary Tables D-IV.1, D-IV.2, D-IV.3 and D-V.1 are in respect of 109 Cities and Town Groups of 1961 Census having population 100,000 and above, Subsidiary Table D-II.1 shows the comparable figures between two decades and Subsidiary Table D-II.2 gives the variation between In-migration and Out-migration for two decades. The remaining three Subsidiary Tables *viz.*, D-I.1 D-II.3 and D-III.1 represent the distribution of important characteristics furnished in the main tables per 1,000 or per 10,000 units.

FLY-LEAF

This table has been presented for Total, Rural and Urban areas for India, States, Union Territories and Other Areas. It shows the extent of participation of households in two important economic activities *viz.*, cultivation and household industry especially in case of rural areas. The 1,000 sample households have been distributed into the following four categories :—

(i) Households engaged neither in cultivation nor Household Industry;

(ii) Households engaged in cultivation only;

(iii) Households engaged in Household Industry only;

(iv) Households engaged both in cultivation and household industry.

Figures in Cols. 4—7 have been rounded off to the nearest integers so that they add up to 1,000 sample households separately for Total, Rural and Urban areas of each unit. In the case of Gujarat State the results have been presented upto two decimal places in the State volume.

The material of this table has been obtained from Table B-X.

B-XI.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas and shows the distribution of 1,000 sample households, engaged in cultivation by interest in land and size of land cultivated.

The interest in land is classified into 3 parts and is shown in vertical spread in Col. 2 as under:

'A' Owned or held from Government;

'B' Held from private persons or institutions for payment in money, kind or share;

'C' Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The classification by size of land cultivated is in ten size groups and is shown in horizontal spread. The group of unspecified size consists of sample cultivating households for whom the area of land cultivated was not recorded at the Census.

The size groups are :—

(i) Less than 1 acre ;
(ii) 1.0 to 2.4 acres ;
(iii) 2.5 to 4.9 acres ;
(iv) 5.0 to 7.4 acres ;
(v) 7.5 to 9.9 acres ;
(vi) 10.0 to 12.4 acres ;
(vii) 12.5 to 14.9 acres ;
(viii) 15.0 to 29.9 acres ;
(ix) 30.0 to 49.9 acres ;
(x) 50.0 acres and above.

The figures shown in Cols. 4 to 14 are rounded off to two places of decimal and add up to the respective total in Col. 3 and vertically to the figures shown in each column for the 'Total' against all interest in land.

The material of this table has been obtained from Table B-XI.

B-XII.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION BY SIZE OF LAND CULTIVATED IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas and shows the distribution of 1,000 sample households engaged in cultivation by size class of land cultivated.

For each size class of cultivated land, 1,000 cultivating households for all size classes are shown classified into those engaged in cultivation only and those engaged both in cultivation and household industry.

The size classes are the same as in Table B-XI.1

The figures for various size classes are worked out as :—

$$\frac{\text{For each class} \quad \text{Households with cultivation only} + \text{Households with cultivation and household industry}}{\text{Total of all size classes} \quad \text{Households with cultivation only} + \text{Households with cultivation and household industry}} \times 1{,}000$$

The material for this table has been obtained from Table B-XII and B-XV.

B-XII.2 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION BY SIZE OF LAND CULTIVATED AND WORKING STRENGTH IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas and shows the distribution of 1,000 sample households engaged in cultivation only and those both in cultivation and household industry by size of land cultivated and working strength.

The size classes are the same as in Table B-XI.1.

The distribution in working strength is in six categories *viz.*, 1 person, 2 persons, 3—5 persons, 6—10 persons and more than ten persons and unspecified relating to households in respect of which working strength was not recorded. The persons engaged include family workers and hired workers. The figures for this category of working strength "unspecified" have not been shown in the State volume of Subsidiary Tables for the States of Assam, Madras and Pondicherry. These have, however, been presented in the all India volumes. There are some minor differences also between the all India volume and the Punjab State volume due to non-application of two way tally method in working out of the figures in the State volumes.

The figures for each size class of land have been calculated in the following manner:

$$\text{Col. 4} = \frac{\text{Sample households engaged in cultivation only employing 1 person in that size class of land}}{\text{Total sample households engaged in cultivation only}} \times 1{,}000$$

$$\text{Col. 5} = \frac{\text{Sample households engage both in cultivation and household industry employing 1 person in that size class of land}}{\text{Total sample households engaged both in cultivation and household industry}} \times 1{,}000$$

and so on.

The material of this table has been obtained from Table B-XII and B-XV.

B-XII.3 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLD WORKERS (FAMILY/HIRED) ENGAGED IN CULTIVATION WITH AND WITHOUT HOUSEHOLD INDUSTRY BY EACH SIZE OF LAND CULTIVATED AND SIZE OF EMPLOYMENT BY FAMILY AND HIRED WORKERS IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas and shows the distribution of 1,000 sample household workers engaged in cultivation with or without household industry and in each size class of cultivated holding and size of employment by family and hired workers.

The size classes are the same as in Table B-XI.1.

The size of employment is the same as in the Table B-XII.2. For each of the size class of land cultivated, 1,000 workers are first classified into family workers and hired workers, cross classified by those engaged in cultivation only and both in cultivation and household industry. Similar classification into family workers and hired workers and cross classification by cultivation only or with both cultivation and household industry is shown for 1,000 workers in each size of employment. The break up for hired worker is not shown against the employment size of one worker as they are all family workers. Under 'All persons' family workers are further classified by sex under 'with cultivation only' and 'with cultivation and household industry'. Figures for "unspecified" worker (Col. 32-34 of the table) have not been shown in the State volumes of Assam, Madras and Pondicherry. These have, however, been presented in this volume.

The material for this table has been obtained from Table B-XII and B-XV.

B-XII.4 AVERAGE NUMBER OF FAMILY AND HIRED WORKERS PER CULTIVATING HOUSEHOLD BY EACH SIZE OF CULTIVATED HOLDING IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas and shows the average number of family and hired workers per cultivating household by each size class of cultivated holding.

The size classes are the same as in Table B-XI.1.

For each of the size class of land cultivated the data in respect of (i) average of total workers (ii) average of family workers (iii) average of hired workers and (iv) the number of family workers per hired worker are shown by the horizontal spread classified separately for total cultivating households, households engaged in cultivation only and households engaged in both cultivation and household industry.

The figures are rounded off to two places of decimal except for 'No. of family workers per hired worker' in this volume. But in the State volumes of Assam, Madras and Pondicherry, the 'No. of family workers per hired worker' Col. 5, 9 & 13 have also been shown upto two decimal places. In cases where figures are negligible, these are indicated by the letter 'N'. The mark of asterisks (*) in Cols. 5, 9 & 13 is shown at such places where denominator is zero and the result is infinity.

The material for this table has been obtained from Table B-XII and B-XV.

B-XIV PART A.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY ONLY BY PRINCIPAL HOUSEHOLD INDUSTRY AND WORKING STRENGTH IN *ALL AREAS*

FLY-LEAF

This table has been presented for Total, Rural and Urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 sample households engaged in household industry only by principal household industry and working strength. Major groups of Household Industry having figures less than 10% of the respective industry division are not exhibited.

The size groups of working strength are the same as in Subsidiary Table B-XII.2.

In a household engaged in more than one household industry, the one which was conducted by it for a larger number of months in a year has been treated as the principal household industry. The classification of the industry is according to Standard Industrial Classification Scheme. Each industry is briefly described in Col. 2.

The figures in Cols. 5—9 are rounded off to two places of decimal and add upto 1,000 sample households shown in Col. 4 in each line.

The material for this table has been obtained from Table B-XIV Part A.

B-XIV PART B.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY ONLY BY PRINCIPAL HOUSEHOLD INDUSTRY (DIVISION/MAJOR/MINOR GROUPS) IN *ALL AREAS*

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 sample households engaged in Household Industry only by nature of household industry. The classification of the industry is according to Standard Industrial Classification Scheme. The minor groups are shown by 4 digit code numbers according to the list of common household industries. The distribution by rural and urban areas is shown in horizontal spread and that by major groups and minor groups in vertical spread.

The figures are rounded off to two places of decimal so that figures relating to minor groups in a major group add upto the figures of that major group and those relating to Major groups in a division add upto the figures of that division which has been taken as 1,000 in this volume, but in the State volume of Madras and Pondicherry each major group and division has been taken as 1,000 separately. A few states have not presented results of major and minor groups of household industry having less than 10% figures of their respective divisions in their State volumes. In this volume, however, the figures for all major groups and their respective minor groups have been shown.

There are a few minor differences in this table in State volume of Gujarat and Punjab which are due to non-application of two way tally in the State volume.

The material for this table has been obtained from Table B-XIV Part B.

B-XVI.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS ENGAGED IN HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY PRINCIPAL HOUSEHOLD INDUSTRY IN EACH DURATION

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 sample households engaged in household industry (with and without cultivation) classified by nature of household industry and the period of working of the industry.

The period of working has been divided into five classes *viz.*, 1—3 months, 4—6 months, 7—9 months, 10 months—1 year and unspecified relating to those households for which period of working of the household industry was not recorded. Major Groups of Household Industry having less than 10% of the figures of respective division have been omitted.

The classification by nature of industry is according to Standard Industrial Classification Scheme. Brief description of major groups is given in Col. 2.

Figures against abbreviation (a) in Col. 2 relates to Sample Households engaged in household industry with cultivation and those against (b) to sample households engaged in household industry without cultivation.

The figures are rounded off to two places of decimal such that the figures in Cols. 6, 8, 10, 12 and 14 add up to the figures in Col. 4, those in Cols. 7, 9, 11,13 and 15 add up to those in Col. 5 and the figures in Cols. 4 and 5 add up to 1,000. In State volume of Orissa the figures have been presented upto 3 decimal places. In the State volume of Andhra Pradesh the figures for industrial divisions have also been presented whereas in this volume the figures for major groups only have been shown. There are a few minor differences in the State volume of Pondicherry which are due to non-application of horizontal tally of the worked out figures.

The material for this table has been collected from Table B-XVI.

B-XVI.2 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLD WORKERS ENGAGED IN PRINCIPAL HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY FAMILY AND HIRED WORKERS IN EACH DURATION

FLY-LEAF

This table has been presented for rural and urban areas of India, States, Union Territories and Other Areas. The table shows the distribution of 1,000 workers engaged in principal household industry (with and without cultivation) in each working period by family and hired workers.

The classification of the household industry is according to the Standard Industrial Classification. The description is given in Col. 2, major groups of Household Industry having figures less than 10% of the respective division are omitted.

The duration periods are the same as in B-XVI.1.

For each major group the distribution of 1,000 sample households is first shown for total workers classified into family workers and hired workers and cross classified for rural and urban areas. For family workers only under total households a further cross classification by sex is also shown both under rural and urban areas.

The figures are rounded off to two places of decimal. The figures in Col. 3 and 4 for (a) and (b) and in Cols. 11, 16, 21, 26 and 31 for (a) and (b) add up to 1,000 respectively. The figures under family workers and hired workers under each duration add up to total workers and those of family workers and hired workers for individual durations add up all durations respectively.

Madras and Pondicherry have not followed the prescribed method for working out the figures in their State volumes and have taken 1,000 (households) separately for (a) 'with cultivation' and (b) 'without cultivation' for each Total, Rural & Urban Areas. Thus the figures in the State volume do not tally with those presented in this volume. There are also some minor differences in the State volumes of Andhra Pradesh, Assam, Gujarat, Mysore and Punjab due to non-application of two way tally in the calculated figures. Andhra Pradesh has also additionally shown Industrial Divisional proportions in its State volume.

The material for this table has been collected from Table B-XVI.

B-XVI.3 AVERAGE NUMBER OF FAMILY AND HIRED WORKERS PER HOUSEHOLD ENGAGED IN PRINCIPAL HOUSEHOLD INDUSTRY (WITH AND WITHOUT CULTIVATION) BY THE DURATION OF HOUSEHOLD INDUSTRY IN *RURAL AND URBAN AREAS*

FLY-LEAF

This table has been presented for rural and urban areas of India, States, Union Territories and Other Areas. The table shows the average number of family and hired workers per household engaged in household industry (with and without cultivation) by the duration of household industry.

For each principal household industry, the table shows by a horizontal spread first the average of total workers, average of family worker, average of hired workers and the number of family workers per hired worker for total households engaged in household industry and then similar averages and ratios for households under each duration of household industry. A vertical spread under each household industry provides similar averages and ratios for households engaged with cultivation and without cultivation.

The periods of duration are the same as in Table B-XVI.1 major groups of household industry having figures less than 10% of the respective industrial division are omitted.

The figures are rounded off to two places of decimal except for number of family workers per hired worker column.

Asterisks (*) has been used in Cols. 6, 10, 14, 18, 22 and 26 where hired workers are nil.

In the State volume of Assam, Bihar, Madras, Pondicherry and Orissa, the figures under Columns 6, 10, 14, 18, 22 and 26 have been shown upto two decimal places instead of integers. In the State volume of Assam there are a few minor differences due to non-application of horizontal tally of figures. Andhra Pradesh has additionally shown the figures for industrial divisions in its State volume.

The material for this table has been collected from Table B-XVI.

B-XVII.1 DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS BY SIZE OF HOUSEHOLDS

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. The table presents the distribution of 1,000 sample households by size of households.

The classification of 1,000 households by size is shown by a horizontal spread into five size groups *viz.*, small (i) Single member and (ii) 2—3 members; medium (iii) 4—6 members; large (iv) 7—9 members; and very large (v) ten members and over. For each size group the male and female population is also shown along with the number of households. The proportion are worked out on the basis :

$$\frac{\text{No. of males/females in each size group}}{\text{Total sample households}} \times 1{,}000$$

The single member households shown in Col. 6 is equal to total of figures in Cols. 7—8.

The figures are rounded off to two places of decimal. Those of households in Cols. 6, 9, 12, 15 and 18 add up to 1,000 sample households shown in Col. 2. Similarly the figures of males and females for different size groups add upto total male and female population of 1,000 sample households.

In the State volumes of Assam, Gujarat, Madras, Jammu and Kashmir and Punjab, figures given in the Column for total household population do not tally with the corresponding figures in Table C-I.1 of their States due to differences in rounding off the figures. In the State volumes of Assam, Gujarat, Bihar, Maharashtra and Pondicherry figures for total persons under single member size of households do not tally with the figures for size of households due to rounding off. There are a few minor differences in the State volumes of Madras and Orissa due to non-application of horizontal tally in the results.

The data have, however, been correctly processed out and presented in this volume.

The material for this table has been collected from Table B-XVII.

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the family composition of 1,000 sample households. In this table the population of 1,000 sample households has been distributed by each sex in the following categories :

C.II.1 DISTRIBUTION OF 1,000 PERSONS OF EACH SEX BY MARITAL STATUS

FLY-LEAF

This table has been presented for India, each State, Union Territories and Other Areas. The table shows the distribution of 1,000 persons of each sex by marital status for total, rural and urban. The categories of marital status in this table are : 'Never Married', 'Married' 'Widowed', and 'Divorced or Separated'. Figures relating to persons whose marital status was not recorded have been shown in the column 'Unspecified'. For all-India Table and many State Tables, the Age-group 0-9 was regarded as 'Never Married'. But in some States data for this age-group also were presented under various categories of marital status.

The figures for North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of General all-India Individual Slip and Household Schedule.

In the Union Territories of Goa, Daman and Diu and Dadra and Nagar Haveli a Census was taken as on the 15th December, 1960 and the 1st March, 1962 respectively. Data in the table relate to these dates for the two territories.

Source for the material of this table is Table C-II appearing in Vol. I Part II-C(i) Social and Cultural Tables of India, 1961 Census.

This table has been presented for India, States, Union Territories and Other Areas. It shows the distribution of 1,000 males and females by marital status with comparable figures for censuses 1921 to 1961. Figures for marital status 'Widowed' include those relating to 'Divorced or Separated' for censuses 1921 to 1951 and figures for 'Divorced or separated' and 'Unspecified' for 1961 have been shown separately.

The figures for North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of General all-India Individual Slip and Household Schedule.

C-III PART C.1 DISTRIBUTION OF 1,000 PERSONS IN EACH AGE-GROUP AND SEX BY EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been presented for rural areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 persons of each sex in each of the age-groups 5-14, 15-34, 35-59 and 60+ as well as of total population (5+) by literacy and educational levels. Similar distribution for persons of each sex whose age was not recorded, is shown in the last line against 'Age not stated'. Persons in the age-group 0-4 have been treated as illiterate irrespective of the actual returns in individual slips.

The figures for North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of the General all-India Individual Slip and Household Schedule.

In the Union Territories of Goa, Daman and Diu and Dadra and Nagar Haveli a Census was taken as on 15th December, 1960 and the 1st March, 1962 respectively. Data in the table therefore relates to these dates for the two territories.

Source of material for this table is Table C-III Part C appearing in Vol. I—India, Part II-C(i) Social and Cultural Tables, 1961 Census.

C-IV.1 FEMALES PER 1,000 MALES BY AGE-GROUP AND COMPARISON WITH 1951 CENSUS

FLY-LEAF

This table has been presented for total, rural and urban areas of India, each State Union Territories and Other Areas. It shows the sex ratio (females per 1,000 males) by age-groups with comparable figures for 1961 Census. The age-groups are : less than 1 year, 1-4, 5-14, 15-34, 35-54, 55-59 and 60+. Figures relating to persons whose age was not recorded have been shown in column 'Age not stated'.

For 1961 Census, population figures relating to age-groups 5-14, 15-34 and 60+ have been taken from Table C-III and those in age-groups, less than 1 year, 1-4, 35 54 and 55-59 have been worked out from Table C-IV. Population figures in all the age-groups other than 55-59 and 60+ for 1951 Census, have been taken from the recast Table C-III printed in the Census of India Paper No. 2 of 1957. Figures in the age-groups 55-59 and 60 and above have been worked out by splitting up 10 year age-group (55-64) by using Newtons' Formula *viz.*,

$$fn\ a = \tfrac{1}{2}\left[fn + \tfrac{1}{8}\left(fn-1\right) - \left(fn+1\right)\right].$$

The Figures for North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom and abridged family schedule was canvassed instead of General all-India Individual slip and Household Schedule.

In the Union Territories of Goa, Daman and Diu and Dadra and Nagar Haveli a Census was taken as on 15th December, 1960 and the 1st March, 1962 respectively. Data in the table, therefore, relate to these dates for the two territories.

The sources of materials for this table are as under :

1961-C-III and C-IV of Vol. I, India Part II-C(i) Social and Cultural Tables, 1961 Census.

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 persons of each sex by age-groups with comparable figures for 1951 Census. The age-groups are : less than 1 year, 1-4, 5-14, 15-34, 35-54 and 55+. Figures relating to persons whose age was not recorded have been shown in column 'Age not stated'.

For 1961 Census, population figures relating to age-groups 5-14 and 15-34 have been taken from Table C-III and those in age-groups less than 1 year, 1-4, 35-54 and 55+ have been worked out from Table C-IV. 1951 population figures in all the age-groups have been taken from Table C-III printed in the Census of India Paper No. 2 of 1957. Figures for Jammu and Kashmir, Pondicherry and North-East Frontier Agency for 1951 Census are not available. Rural and urban break up for Goa, Daman and Diu for 1951 is also not available.

C-V.1 DISTRIBUTION OF 1,000 PERSONS BY MOTHER TONGUE

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States and Union Territories and Other Areas. It presents the distribution of 1,000 persons by mother-tongue. Only those mother tongues, speakers of which are at least 1 in 1,000 in any of the States, Union Territories and Other Areas have been shown in this table. Mother tongues have been arranged in alphabetical order.

'Mother-tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy, the language mostly spoken in the person's home in childhood was treated as mother-tongue. In the case of infants and deaf/mutes, the language usually spoken by the mother was entered as mothe tongue.

The figures for North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of General all-India Individual Slip and Household Schedule.

In the Union Territories of Goa, Daman and Diu and Dadra and Nagar Haveli, a Census was taken as on the 15th December, 1960 and the 1st March, 1962 respectivcly. Data in the table, therefore, relate to these dates for the two territories.

Source for the material of this table is Table C-V appearing in Vol. I Part II-C(ii), Language Tables of India, 1961 Census.

C-VIII PART A.1 DISTRIBUTION OF 1,000 PERSONS OF ALL SCHEDULED CASTES BY SEX AND LITERACY

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States and Union Territories and Other Areas. It shows the distribution of 1,000 persons of all Scheduled Castes by sex and literacy.

No castes were scheduled in Andaman and Nicobar Islands; Laccadive, Minicoy and Amindivi Islands; North-East Frontier Agency and Sikkim. The table also excludes the Union Territory of Goa, Daman and Diu as there was no order scheduling the Castes at the time when Census was taken in 1960 in that Territory. In the absence of any Presidential Order specifying the Scheduled Castes in Pondicherry, the Castes specified in Presidential Order for any of the States of Andhra Pradesh, Kerala, and Madras adjoining or encircling one of the four constituents of Pondicherry were adopted.

Source of material for this table is Table C-VIII Part A, appearing in Vol. I, Part II-C(i), Social and Cultural Tables of India, 1961 Census.

C-VIII PART B.1 DISTRIBUTION OF 1,000 PERSONS OF ALL SCHEDULED TRIBES BY SEX AND LITERACY

FLY-LEAF

This table has been presented for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 1,000 persons of all Scheduled Tribes by sex and literacy.

The figures of North-East Frontier Agency exclude Scheduled Tribes population among 292,972 persons (Males 144,586 and Females 148,386) for whom an abridged family schedule was canvassed instead of General all-India Individual Slip and Household Schedule.

In the Union Territory of Dadra and Nagar Haveli a Census was taken as on the 1st March, 1962. Data in the table, therefore, relate to the above date for the territory.

No Tribes were scheduled in Presidential Order for Jammu and Kashmir, Uttar Pradesh, Delhi, Pondicherry and Sikkim. The table also excludes the Union Territory of Goa, Daman and Diu as there was no order scheduling the Tribes at the time when Census was taken in 1960 in that territory.

The source for the material for this table is Table C-VIII Part B appearing in Vol. I, Part II-C(i) Social and Cultural Tables of India, 1961 Census.

D-I.1 DISTRIBUTION OF 1,000 NON-INDIAN NATIONALS BY COUNTRIES OF NATIONALITIES

FLY-LEAF

This table gives the distribution of 1,000 non-Indian Nationals by countries to which they belong. Non-Indian Nationals who are residing in India with their families and are employed in foreign Embassies and Missions etc. have not been included in this table as they were not enumerated in the census.

Data are presented for India, States, Union Territories and Other Areas under each continent separately for the countries as shown below :

1. Nationals of countries in Asia beyond India (including U.S.S.R.);
2. Nationals of countries in Europe (excluding U.S.S.R.);
3. Nationals of countries in Africa;
4. Nationals of countries in two Americas;
5. Nationals of countries in Oceania; and
6. Nationality not stated.

A small table has also been prepared for India, States, Union Territories and Other Areas. It gives the data regarding non-Indian Nationals for individual countries contributing more than 1 in 1,000 non-Indian Nationals by sex break-up.

Figures for North-East Frontier Agency exclude Non-Indian Nationals among 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of all-India Individual Slip and Household Schedule.

The data collected in Census of Goa, Daman and Diu taken as on 15th December, 1960 by the then Portuguese authorities have been adopted for this table.

Persons born in the Territory of Goa, Daman and Diu and who had returned their nationality as 'Goans', were treated as Indian Nationals for the purpose of this table. Only those who were born in Portugal were treated as foreign Nationals.

Source for the materials of this table is the main Table D-I, appearing in Vol. I Part II-C(iii) Migration Tables of India, 1961 Census.

D-II.1 VARIATION IN NATURAL POPULATION

FLY-LEAF

This table has been prepared for India, States, Union Territories and Other Areas. It gives the variation in the natural population between 1951 and 1961 Censuses. This table seeks to show as to what would have been the population in 1961 and in 1951 if there had been no migration inward or outward. This population is termed as 'Natural Population.'

Figures regarding immigrants relate to persons born outside the State. The figures for emigrants are related only to those persons born in this State but enumerated in other States and Union Territories.

The natural population of India has been worked out from the recorded population of 1951 Census given in Table D-IV printed in Vol. I Part II-A Demographic Tables. Owing to unadjusted figures in Cols. 6—9 for India, Bihar, Rajasthan and West Bengal the figures in Cols. 5 and 9 are not comparable hence N.A. has been provided in Col. 10.

Since some States were constituted after 1951 Census, birth place data for 1951 had to be recast to arrive at the figures of natural population in the case of Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore and Laccadive, Minicoy and Amindivi Islands. Hence the data for 1961 alone has been presented. On account of difficulties which cropped up as a result of the reorganisation of States, data for 1951 Census have not been presented.

As the Union Territories of Dadra and Nagar Haveli, Goa, Daman and Diu and Pondicherry were under foreign possession at the time of 1951 Census. N.A. has been provided in Cols. 6—10. In the case of Jammu and Kashmir no Census was taken in 1951.

In the case of Assam and Nagaland two sets of figures have been prepared. According to the 1st set the combined figures of Assam and Nagaland have been presented for 1961 and 1951 Censuses and the 2nd set gives figures separately for each unit. In the 2nd case the figures of immigrants for the Census of 1951 are presented but for the emigrants, N.A. has been provided.

A Census of Goa, Daman and Diu was taken by the Portuguese Government as on 15th December, 1960. The figures given in the table, therefore, relate to that date.

The figures of Dadra and Nagar Haveli (where a Census was taken as on 1st March, 1962) and Goa, Daman and Diu have not been adjusted as on 1st March, 1961. The population of these territories for 1951 Census have been assumed to be the same as in 1950. Similarly the population of Pondicherry for 1951 has been assumed to be the same as in 1948.

Population of Jammu and Kashmir have been taken to be the arithmetic mean of 1941 and 1961 population, the 1941 population being adjusted with reference to the present census area of the State.

The source for the material of this table for 1961 Census is the main Table D-II, appearing in Vol. I Part II-C(iii) Migration Tables and for 1951 Census is the main Table D-IV, appearing in Vol. I Part II-A, Demographic Tables.

NOTE—*There is a difference of 4,490,693 persons between the recorded and unadjusted population for the 1951 Census on account of the following reasons:—

(i) India figures under column 6 exclude persons 3,253,852 of J. & K. State, as no Census in 1951 was conducted,

(ii) 268,602 persons of Punjab State due to the loss of enumeration records of these persons in a fire that broke out in Jullundur Tabulation Office in 1951,

(iii) 41,532 persons of Dadra and Nagar Haveli, 596,059 persons of Goa, Daman & Diu and 317,253 persons of Pondicherry as these figures do not relate to 1951 Census only assumed as such and

(iv) 13,395 persons of Rajasthan State are in excess due to some unadjusted areas.

D-II.2 MIGRATION BETWEEN THE STATES AND OTHER PARTS OF INDIA

FLY-LEAF

This table has been prepared for total areas of India, States, Union Territories and Other Areas. It gives the trends of migration between the States and other parts of India. This table shows Immigration, Emigration for the Censuses of 1961 and 1951 and variation in them. Figures given in Cols. 8 and 9 show immigration minus emigration for 1961 and 1951 Censuses.

The figures of immigrants and emigrants of India has been worked out from the recorded population of 1951 Census, given in Table D-IV printed in Vol. I Part II-A Demographic Tables. In Cols. 3 and 6 owing to unadjusted figures for India, Bihar, Rajasthan and West Bengal the figures of 1961 and 1951 are not comparable and hence N.A. have been provided in Cols. 4 and 7.

As a result of reorganisation of some States (Gujarat, Kerala, Madhya Pradesh, Madras, Maharashtra, Mysore and Laccadive, Minicoy and Amindivi Islands) the territorial adjustments presented difficulties in recasting data regarding migration movement; therefore, figure for 1951 Census have not been presented.

The Union Territories of Dadra and Nagar Haveli, Goa, Daman and Diu and Pondicherry were under foreign possession at the time of 1951 Census. So N.A. has been provided in Cols. 3 & 6. In the case of Jammu and Kashmir no Census was taken in 1951.

In the case of Assam and Nagaland two sets of figures have been prepared. In the 1st set combined figures for Assam and Nagaland have been shown for 1961 and 1951 Censuses and in the 2nd set the data are presented separately for each unit. In the 2nd case the figures of immigrants for 1951 Census have been given but for the emigrants data are not given, therefore, N.A. has been provided there.

There is difference in the figures of Cols. 3 and 7 of Table D-II.1 and in Cols. 2 and 3 of Table D-II.2. In regard to Table D-II.1 it may be stated that the figures given in this table include population migrated from outside India. But in Table D-II.2 the figures exclude the persons who have migrated from outside India and the figures of 'Unclassifiable' have been added in this table.

A Census of Goa, Daman and Diu was taken by the Portuguese Government as on 15th December, 1960. The figures given in the table, therefore, relate to that date.

The figures of Dadra and Nagar Haveli (where a Census was taken as on 1st March, 1962) and Goa, Daman and Diu have not been adjusted as on 1st March, 1961. The population of these territories for 1951 Census have been assumed to be the same as in 1950. Similarly the population of Pondicherry for 1951 has been assumed to be the same as in 1948.

The source for the material of this table for 1961 Census is the main Table D-II appearing in Vol. I Part II-C (iii) Migration Tables and for 1951 Census is the main Table D-IV appearing in Vol. I Part II-A Demographic Tables.

D-II.3 DISTRIBUTION OF 10,000 PERSONS ENUMERATED IN EACH STATE/UNION TERRITORY BY PLACE OF BIRTH RURAL/URBAN CHARACTERISTICS AND SEX

FLY-LEAF

This table has been prepared for total, rural and urban areas of India, States, Union Territories and Other Areas. It shows the distribution of 10,000 persons by each sex and also gives their place of birth as indicated below :

1. Born in place of enumeration.
2. District of enumeration other than place of enumeration.
3. Other districts within the State.
4. Other States in India.
5. Beyond India.
6. Born at Sea and
7. Unclassifiable.

Figures appearing against North-East Frontier Agency exclude 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of all-India Census Schedule.

The data collected in the Census of Goa, Daman and Diu taken as on 15th December, 1960 by the then Portuguese authorities have been adopted. No statistics were collected for place of birth, urban or rural in that Census. So the figures have been shown under "unclassifiable".

Source for the material of this table is the main Table D-II, appearing in Vol. I Part II-C(iii) Migration Tables of India, 1961 Census.

D-III.1 DISTRIBUTION OF 10,000 PERSONS BORN OUTSIDE THE PLACE OF ENUMERATION BY PLACE OF BIRTH, DURATION OF RESIDENCE AT THE PLACE OF ENUMERATION AND SEX

FLY-LEAF

This table has been prepared separately for rural and urban areas of India, States, Union Territories and Other Areas. It gives the distribution of 10,000 persons by each sex for total, rural and urban areas for (i) persons born elsewhere in the district of enumeration and (ii) persons born in other districts of the State. It also shows the duration of residence at the place of enumeration *viz.*, Less than 1 year, 1-5, 6-10, 11-15, 16+ and period not stated. Figures against "period not stated" relate to those whose period of stay at the place of enumeration was not recorded.

The Inset Tables have also been prepared for rural and urban areas of India, States, Union Territories and Other Areas. It gives the data regarding individual States and Union Territories showing 1 or more in 1,000 of total migrants by sex break-up and duration of residence and number of migrants.

Figures appearing against North-East Frontier Agency exclude migrants from among 297,853 persons (Males 147,100, Females 150,753) for whom an abridged family schedule was canvassed instead of General all-India Census Schedule.

The table could not be prepared for Goa, Daman and Diu as the data collected in the Census taken in that Territory as on 15th December, 1960 and adopted for the purposes of 1961 Census, did not contain information relating to the duration of residence in the place of enumeration. For the same reason these figures could not be included in the figures for India.

Source for the material of this table is the main Table D-III, appearing in Vol. I Part II-C(iii) Migration Tables of India, 1961 Census.
