## INTRODUCTORY NOTE

The Economic Tables pertaining to 1961 Census are divided into two broad groups, namely, General Economic Tables and Household Economic Tables. Due to their considerable bulk, the General Economic Tables of Orissa are presented in two volumes, namely, Part II-B (i), the present publication, and Part II-B (ii), the continuation.

2. A departure has been made in the concept for the collection of economic data. Any country with a changing economy should have its data recorded in such a manner that the major changes in the social, economic and industrial sectors are properly accounted for. The scheme of recording economic classification of population which is generally implemented through the Census Organization will have no occasion to change if the country has stagnant economy. But in India, no two Censuses have had identical economic classification, as the line of investigation was made to adjust itself to the contemporary situation as obtaining from decade to decade. With changes deemed necessary as early as the beginning of the century, considerable improvements were made in the 1931 scheme of economic classification. A major departure, however, was necessitated by 1951, when a full-fledged and self-contained scheme, known as the Indian Census Economic Classification was evolved. But shortly after, when the concepts of 1951 were sought to be applied to national planning, the incongruities were clearly discernible. The Indian Census Economic Classification Scheme was then found inadequate and defective, and it was indispensable that a more rational and appropriate scheme was adopted if the apparent short-comings were to be avoided. This explains the origin of the Indian Standard Industrial Classification Scheme and the National Classification of Occupations, which were adopted for the Census of 1961. The ISIC and NCO schemes are based on corresponding International Schemes, carefully modified so as to suit Indian conditions.

3. The last decade covering two Five-Year Plans will, in future, be regarded as the great Economic and Industrial divide. The results of 1951 Census were extensively used by way of standard assumptions behind these two Plans, as well as behind the third. Authorities at the

helm of Census affairs were thus aware of the great onus which rested on their shoulders in the collection of materials required to build the foundation of the future Five-Year Plans. A group of experts in consultation with the likely users of Census data started deliberations from 1958 onwards and framed and pre-tested the schedules and the questionnaire before finalizing them for use in the enumeration of 1961.

4. *Questions on Economic activities*—As a result of these deliberations, a set of five principal questions emerged, which was expected to cover the economic activities of individuals in a comprehensive manner. The questions are listed below :

Question 8—Working as Cultivator

Question 9—Working as Agricultural Labourer

Question 10—Working at Household Industry

(a) Nature of Work

(b) Nature of Household Industry

(c) If Employee

Question 11—Doing work other than 8, 9 or 10

(a) Nature of Work

(b) Nature of Industry, Profession, Trade or Service

(c) Class of Worker

(d) Nature of Establishment

Question 12—Activity, if Not Working

5. *Intensive training given to personnel*—The apparent simple character of the questions did not lead to complacency in the matter of training the personnel. The hidden intricacies likely to arise when spade work began were anticipated and thrashed out. Executive circular orders and Manual of Instructions for all categories of workers were carefully drafted and issued, and it was necessary to make sure that the District Officers realized that accuracy in enumeration depended on the intensity and thoroughness of training. They ensured strict adherence of the training programme in a large number of centres dispersed throughout the districts. Relevant extracts from the Manual of Instructions relating to questions on economic activities are given below :

## EXTRACTS FROM MANUAL OF INSTRUCTIONS

## I. WORKING PERSONS—(Questions 8 to 11)

6. Four questions, namely, questions 8 to 11 apply only to WORKERS. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

7. Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a jail, he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution, he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded, but 'I' should be recorded in Q. 12 below.

8. The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been

offered work but has not actually joined, should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working.

9. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

10. Persons like beggars, pensioners, or receivers of agricultural or non-agricultural royalty, rent or dividend who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

11. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

12. Question No. 8—Working as Cultivator—For a person working as cultivator, write C. For a person not working as cultivator and for a person not working at all put X. For purposes of the Census, a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

13. A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or

lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as cultivator in this question.

14. Question No. 9—Working as Agricultural Labourer—Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

15. Question No. 10 (a) and 10 (b)—Household Industry—If a person is working in a Household Industry write the nature of work done by him in the Household Industry against question 10 (a) and also the nature of the Household Industry against question 10 (b). Otherwise put X in both questions 10 (a) and 10 (b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

16. A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or washerman or astrologer.

17. A person, though he may not be working in his own Household Industry, may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10 (a) and the nature of the Household Industry against 10 (b).

18. Question No. 10 (c)—If Employee in Household Industry—This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write EE. For all others put X. The following examples will illustrate how questions 10 (a) to 10 (c) should be filled up for persons working at Household Industry:—

| 12. Polishing and scraping metal                          | Electroplating                             | X               |
| 13. Labourer employed for putting iron hoop on cartwheels | Cartwheelwright                            | EE              |
| 14. Repairing of guns                                     | Gunsmithy                                  | X               |
| 15. Bee keeping                                           | Production of honey                        | X               |
| 16. Tending cattle                                        | Livestock raising                          | X               |

19. Question No. 11—Doing work other than 8, 9 or 10—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry, write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work which does not relate to any of the three questions 8, 9 or 10, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above, write here the work on which he devotes more time. In the case of persons not working at all or who work only as cultivator or as agricultural labourer or at Household Industry, put 'X'.

20. *Question No. 11 (a)—Nature of Work*—Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous Censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

21. *Question No. 11 (b)—Nature of Industry, Profession, Trade or Service*—In the case of a person who is working and the nature of whose own work has been recorded in question 11 (a), you should write here the nature of industry, profession, trade or service in which the person works. In the case of a person for whom an X is put in question 11 (a), put an X in this question also.

22. As in the case of question 11 (a), you should describe in detail the nature of industry, profession, trade or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced, the chief article produced or serviced or repaired should be given. In the case of trade the principal article of trade should be described. In the case of service or profession, describe the nature of the service or profession to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English. The following are too vague and must not be used by themselves:

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

23. In the following cases instructions have been given how to describe fully the nature of industry, profession, trade or service. Accordingly, questions 11 (a) and 11 (b) should be filled up :

(i) Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown up women who do any of the works mentioned above in addition to the usual household duties, such

work should be fully described and HW written in brackets after the full description.

(ii) Domestic services—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. In the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hostel, restaurant, etc., should be added.

(iii) If a person makes the articles he sells, he should be entered as maker and seller of them.

(iv) Labourers—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

(v) Shop-keepers, retail dealers, shop assistants—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, shop assistant or salesman (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

(vi) Commerce—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

(vii) Transport workers—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

(viii) Machine operators—Always state the kind of machine giving its recognized name, if any.

(ix) If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:—

Manufacturer, merchant, agent, broker, dealer, engineer and iron works, etc.

(x) Services—For a person engaged in the Defence Services write 'Service of Central Government'. In case of other service write the name of the post in full and also describe the office in which the person is serving.

24. *Question No. 11(c)—Class of Worker*—For a person who is:

1. an *Employer*, that is, who hires one or more persons in his work described in Q. 11(a) write MR

2. an *Employee*, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind write EE

3. a *Single Worker*, that is, who is doing his work described in Q. 11(a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives. write SW

4. a *Family Worker*, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind write FW  
For a person for whom an 'X' is put in Qs. 11 (a) and 11(b), put an X in this question also.

25. *Explanation:—*

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an Employer, even if he has the power to employ another person in his office on behalf of his own Employer or Employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc, and in that capacity employ or control other workers on behalf of their own employers. Such persons are only Employees, as explained above, and should not be regarded as Employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint

partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11. such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage.

26. *Question No. 11(d)—Name of Establishment*—Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'. For a person for whom an X is put in Qs. 11 (a), 11(b) and 11 (c) put an X in the question also.

27. *Difference between certain categories of work in question 8 and question 11*—Although cultivation in general comes under question 8, there are some categories of activities akin to cultivation, which should not be entered in question 8, but should more appropriately be entered under question 11. The following examples will clarify the difference between the two categories:

(i) *QUESTION 8*—Cultivation work including ploughing, sowing and harvesting of the following classes of crops should be entered in question 8 :—

1. Production of cereal crops, such as, rice, wheat, jowar, bajra, maize, roots and tubers like potato, yam, beet, sugarcane, etc.
2. Production of pulses, such as, arhar, moong, masur, khesari and other grams
3. Production of raw jute and kindred fibre crops
4. Production of raw cotton and kindred fibre crops

(ii) *QUESTION 11*—The following categories of Work should be entered under question 11 and not question 8 :—

A. *Other field produce*—

1. Production of other crops including vegetable not covered in question 8
2. Production of fruits and nuts in plantations and orchards (like cocoanut, arecanut, etc.)

3. Production of wood, bamboo, cane reeds, thatching grass, etc.

4. Production of juice by tapping palms

5. Production of other agricultural produce (including fruits and nuts not covered by serial No. 2 and flowers) not covered above

**B. Plantation crops—**

1. Production of coffee in plantation

2. Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation)

3. Production of ganja, cinchona, opium, poppy, saffron, etc.

4. Production of other plantation crops not covered above

**28. Principal work and Secondary work—**On the basis of work, the entire population of the country is divided into two classes, namely, (i) WORKERS and (ii) persons NOT WORKING. All the WORKERS will be shown against the four questions, namely, Nos. 8, 9, 10 and 11 as mentioned in paragraph 6 above. All persons NOT WORKING will be shown against Question No. 12. But before you consider question 12, you have to decide and record one more matter relating to the workers in questions 8, 9, 10 and 11. The matter to be decided is, which of the work in which the person is engaged is "Principal work" and which is his "Secondary work". The following instructions should be carefully followed as the matter is very important for preparing records of economic activity of the people.

(i) *In case of one work*—If the person is doing only one category of work either in question 8 or 9 or 10 or 11, do not make any enquiry about his principal work or secondary work.

(ii) *In case of two works*—If the person is engaged in two different categories of work, e.g., working as a cultivator (Q. No. 8) and also working as a school teacher (Q. No. 11), then ask him which work takes more of his time, that is to say, whether he devotes more time in cultivation or in teaching work. If he says that he spends more time in cultivation and less time in teaching, then cultivation (Q. No. 8) is his principal work and teaching (Q. No. 11) is his secondary work. In such a case, mark Question No. 8 with a ring round 8, such as ⑧. This ring will show that this is his principal work. It is not necessary to mark Question No. 11 in any way to show that it is his secondary work.

(iii) *In case of three works or more*—If the person is engaged in three or more categories of work, then enquire which is the first work, second work, third work, etc., according to length of time he devotes for each such work. Supposing he says that he devotes 6 hours a day as an agricultural labourer, 2 hours a day in the evening in his retail betel shop and one hour a day at home spinning yarn or weaving, then it will appear that Question No. 9 (working as agricultural labourer) is his principal work, Question No. 11 (working as a shop keeper) is his secondary work, and Question No. 10 (working at household industry) is a less important work. Then put a ring round 9 such as ⑨ to indicate that this is his principal work and put a tick mark before Question No. 11 such as √ 11, to show that this is his secondary work, and do not put any mark against Question No. 10 which is less important work. Similarly if there is a fourth category of work which is less important, no mark should be put against it.

**II. PERSONS NOT WORKING—(Question No. 12)**

29. *Question No. 12—Activity, if not working*—Write X in this question for a person who is working, that is, for whom you have recorded the work in any of the questions 8 to 11 above. If the person is NOT WORKING according to the four questions 8 to 11, then an answer should be recorded here to show what class of non-working person he is.

30. The following activities should be recorded in the case of persons NOT WORKING :

1. For a full-time student or child attending school who does no other work, such as, make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or profession

write ST

2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as, make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or profession

write HW

3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age

write D

4. For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work

write R

5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence

write B

6. For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution

write I

7. For a person who has not been employed before but is seeking employment for the first time

write NE

8. For a person employed before but now out of employment and seeking employment

write UN

*Explanation*—If a person, who does not work, cannot be readily classified in any of the above categories, but him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in questions 8 to 11.

31. A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

32. *Comparison of the economic classification of 1951 and 1961*—The basic differences in the schemes of 1951 and 1961 Censuses can be attributed to the historical and economic development preceding them. The first Census after attainment of political independence, conducted in 1951, coincided with the inauguration of the first Five-Year Plan, mainly intended to make up leeway of various aspects neglected under 250 years of foreign rule, and also aimed at repairing the damages done by war. While the Caste Tables of the previous Censuses were no longer relevant in the secular state, the basic economic data required for planning purposes deserved greater attention. It was realized that any sound national planning would have to begin first by laying emphasis on development of agriculture and increased food production, and so the broad treatment of population as 'agricultural' and 'non-agricultural'

was perhaps appropriate a decade ago. After execution of two Five-Year Plans in the meanwhile, there is a gradual shift in the emphasis from agriculture to industry. Accordingly, the 1951 concept of agricultural and non-agricultural livelihood classes has to yield to the present scheme of industrial classification of workers and non-workers.

33. The divergence between the schemes of 1951 and 1961 is wider than what has been stated above, and is conceptual as well as operational in nature. With such wide difference in concepts and classifications, the two Censuses are farther from one another than any other two Censuses in the past. The principal features of 1951 economic scheme as distinguished from those of 1961 may be summarily categorised under four different heads, viz. :—

- (i) the ICEC of 1951 and the combination of ISIC and NCO of 1961,
- (ii) the dependency concept of 1951 and the work concept of 1961,
- (iii) the earning concept of 1951 and the maximum time spent over work concept of 1961, and
- (iv) the self-supporting, earning dependent and non-earning dependent classification of 1951 and the worker and non-worker division of population of 1961.

34. According to 1951 Census scheme, the total population was divided into two broad classes, namely, Agricultural and Non-agricultural. Each of these two categories were again divided into four livelihood classes as indicated below :—

*Agricultural*

- I. Cultivators of land, wholly or mainly owned and their dependents,
- II. Cultivators of land, wholly or mainly unowned and their dependents,
- III. Cultivating labourers and their dependents, and
- IV. Non-cultivating owners of land; agricultural rent receivers and their dependents.

*Non-agricultural*

- V. Production (other than cultivation),
- VI. Commerce,
- VII. Transport, and
- VIII. Other services and miscellaneous sources.

The above eight livelihood classes are again divided into three sub-classes with reference to their economic status—(i) Self-supporting persons; (ii) Non-earning dependents and (iii) Earning dependents. Thus the economic data is correlated to incomes and earnings as subtle distinction has to be drawn between self-supporting and earning dependents. This scheme has excluded

the participants in the family economic activities without individual incomes.

35. All the above economic concepts of 1951 Census have undergone complete modification to facilitate collection of more comprehensive data based on 'work' which is the chief criterion of the 1961 Census. The broad division of the population into 'workers' and 'non-workers' is the essential feature of the 1961 economic classification as stress has been laid on 'work' to include all persons working as well as the working children irrespective of their earning incomes. The workers or the working population is regrouped under nine broad industrial categories according to the answers recorded against questions 8 to 11, namely :—

- I. As cultivator,
- II. As agricultural labourer,
- III. In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities,
- IV. At household industry,
- V. In manufacturing other than household industry,
- VI. In construction,
- VII. In trade and commerce,

#### ECONOMIC TABLES OF 1951 AND 1961

37. In 1951 Census only three Tables were prepared, but on the present occasion the number of such Tables is considerably large. Apart from Household Economic Tables which constitute a new feature, claiming a special

VIII. In transport, storage and communications, and

IX. In other services.

36. All those who do not come under the above categories of workers are treated as non-workers. Their activities were investigated and they were classified into eight categories, namely:—

- (i) full-time student or child attending school who does no other work,
- (ii) a person engaged in unpaid household duties,
- (iii) a dependent, an infant or child not attending school or disabled,
- (iv) a retired person, rentier or any other person of independent means,
- (v) a beggar, vagrant or an independent woman without indication of source of income and others of unspecified source of existence,
- (vi) a convict in jail or an inmate of a penal, mental or charitable institution,
- (vii) a person who has not been employed before but is seeking employment for the first time, and
- (viii) a person employed before but now out of employment and seeking employment.

volume for themselves, the General Economic Tables are nine in number covering two whole volumes. The caption of the Tables of both the Censuses are given below for a broad comparative idea :—

#### 1951 Census

- B-I—Livelihood classes and sub-classes
- B-II—Secondary means of livelihood
- B-III—Employers, employees and independent workers in industries and services by division and subdivision

#### 1961 Census

- B-I—Workers and Non-workers classified by sex and broad age-groups
- B-II—Workers and Non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups
- B-III—Part A—Industrial classification of Workers and Non-workers by educational levels in urban areas only
- B-III—Part B—Industrial classification of Workers and Non-workers by educational levels in rural areas only
- B-IV—Part A—Industrial classification by sex and class of worker of persons at work at Household Industry
- B-IV—Part B—Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service
- B-IV—Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation
- B-V—Occupational classification by sex of persons at work other than cultivation
- B-VI—Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urban areas only

B-VII—Part A—Persons working principally—(i) as cultivators (ii) as agricultural labourers or (iii) at household industry classified by sex and by secondary work—(i) at household industry (ii) as cultivator or (iii) as agricultural labourer

B-VII—Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry

B-VIII—Part A—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in urban areas only

B-VIII—Part B—Persons unemployed aged 15 and above by sex and educational levels in rural areas only

B-IX—Persons not at work classified by sex, broad age-groups and type of activity

38. Unit of presentation—The data on economic activities of the population have been presented in respect of the State and each district of the State. It is not possible to go down the level of a district in the present volume in consideration of the great bulk of statistics of lower units. The District Census Handbooks are intended to contain information relating to smaller administrative divisions of a district.

39. Conclusion—In each Census, emphasis was laid on certain basic objectives which, however, kept on changing from time to time. As a result, no two Censuses had identical economic classification as observed earlier. For a serious scholar interested in the

study of comparability, the position, however, is not entirely discouraging. There are threads of continuity as well as palpable grounds of comparability if one has the patience to find them out. The two-fold classification of ISIC and NCO, though primarily intended to secure more detailed classification of the sectors of production and services and of personal talents and skills, serve well to maintain comparability of the present with the past. For the facility of close study of the Tables appearing in this volume, brief notes precede each of them explaining the contents of the Table and various terms and expressions used therein.

**TABLE B-1**

**WORKERS AND NON-WORKERS CLASSIFIED  
BY SEX AND BROAD AGE-GROUPS**

**TABLE B-I**  
**WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS**

This is a summary Table prepared from the Primary Census Abstract giving the total population, the nine industrial categories of workers and also the number of non-workers. Sex split up is shown in each case. Each category is divided into four broad age-groups, viz., 0-14, 15-34, 35-59 and 60+.

2. Table B-I is the basic Economic Table in the series of Census Statistics. The classification of workers and non-workers by age-groups is a special feature of 1961 Census. These age-groups correspond to different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons. Classification of non-working population has not been provided in this Table to avoid unwieldiness, but is given in another Table.

3. **Definitions**—(i) *Cultivator*—A cultivator is a person who is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned by himself or by a member of his household or held from Government; (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

(ii) *Agricultural labourer*—An agricultural labourer is a person who works in another person's land in lieu of wages in cash, kind or share without exercising any right of supervision or direction in matters connected with cultivation.

(iii) *Household Industry*—A household industry is an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion of a household industry is the participation of one or more members of a household in rural areas. In urban areas the industry should be confined to the house. It should relate to production, processing, servicing, repairing and making and selling of goods. It does not include professions, such as, pleader or doctor or barber or washerman or astrologer.

4. *Comparison with B-I Table of 1951 Census*—B-I Table of the 1961 Census materially differs from the Table B-1 of 1951 Census. Tabulation in 1951 covered the distribution of population into eight livelihood classes and their further subdivision into self-supporting persons, earning dependants and non-earning dependants. But in 1961, the entire working population is divided into nine industrial categories, while the non-workers constitute the tenth category. The respective divisions during 1951 and 1961 Censuses are indicated below :

| 1951 CENSUS                                                                                                          | 1961 CENSUS                                                                                                     |

7. Although the proportion of males and females is shown as 50:50, there is a negligible increase in the number of females. The actual ratio is 49.98 males to 50.02 females but 0.02 per cent is ignored as negligible. The sex distribution of the broad age-groups has not exhibited any abnormalities in the rural areas. But in the urban areas, the number of females is much less in the age-groups, 15—34 and 35—59 which can be attributed to the large number of male workers living in the towns without their families.

8. Percentage of workers in the nine industrial categories by sex and broad age-groups :—

The following statement will give the percentage of persons engaged in different industrial categories classified by age-groups and sex break-up :—

**WORKERS AND NON-WORKERS IN CITIES AND TOWNS  
ARRANGED TERRITORIALY CLASSIFIED BY  
SEX AND BROAD AGE-GROUPS**

TABLE B-II

**WORKERS AND NON-WORKERS IN CITIES AND TOWNS ARRANGED TERRITORIALLY  
CLASSIFIED BY SEX AND BROAD AGE-GROUPS**

This Table partially corresponds to Table A-V of 1951 Census and furnishes the Economic data already given in the Table B-I for all the age-groups in respect of each city and town. It does not materially differ from the Table B-I except that this is exclusively meant for urban areas.

2. *Definition of Town*—A town is a continuous group of houses inhabited usually by not less than 5,000 persons which having regard to the character of the population, the relative density of dwelling, the importance of the place as a centre of trade, administration and human associations, the Census authorities decide to treat it as a town for Census purposes. One important test with regard to the character of the population is that there must be considerable preponderance of inhabitants dependent on non-agricultural professions as means of livelihood.

*Reference to Enumeration Slip*—Q. 4 (b), whether born in village or town, gives the data for separating the urban population from the rural. The instruction issued for filling up the answer to the above question is reproduced below:

Use the following abbreviations:—

1. If born in a village write R
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth write U

3. *Urban Population*—The urban population which constitutes 6.3 per cent of the total population in 1961 stands at 1,109,650 (613,988 males and 495,662 females). The corresponding figure for 1951 Census is 594,070 (315,876 males and 278,194 females) constituting 4 per cent of the total population. The remarkable increase during the decade is due to the growth of towns from 39 in 1951 to 62 in 1961. The emergence of industrial towns like Rourkela, Rajgangpur and Hirakud has also contributed substantially to the rise in urban population.

4. The following statement gives the comparative figures for 1951 and 1961 Censuses in respect of the total workers and non-workers of the urban population:—

|                | 1951    |         |         | 1961      |         |         |
|----------------|---------|---------|---------|-----------|---------|---------|
|                | Persons | Males   | Females | Persons   | Males   | Females |
| Workers ..     | 218,910 | 178,832 | 40,078  | 416,318   | 351,284 | 65,034  |
| Non-workers .. | 375,160 | 137,044 | 238,116 | 693,332   | 262,704 | 430,628 |
| Total ..       | 594,070 | 315,876 | 278,194 | 1,109,650 | 613,988 | 495,662 |

5. The following statement will indicate the percentage of males and females to the total urban population in their respective age-groups:—

| Age-group                 | Persons | Males | Females |
|---------------------------|---------|-------|---------|
| 1                         | 2       | 3     | 4       |
| Total urban population .. | 100.0   | 55.3  | 44.7    |
| 0—14 ..                   | 35.3    | 18.2  | 17.1    |
| 15—34 ..                  | 38.1    | 22.2  | 15.9    |
| 35—59 ..                  | 21.8    | 12.7  | 9.1     |
| 60+ ..                    | 4.7     | 2.2   | 2.5     |
| Age not stated ..         | 0.1     | N     | 0.1     |

Growth of trade and commerce providing higher wages in urban areas, establishment of several industries and concentration of male workers in industrial urban areas are likely to have contributed to the adverse sex ratio in the age-groups 15—34 and 35—59.

6. The statement below shows the percentage of urban workers and non-workers by broad age-groups to total workers and non-workers:

TABLE B-III—PART A

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY  
EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This Table which is confined to urban areas only gives the data for the following educational levels :—

Primary or Junior Basic ;  
Matriculation or Higher Secondary ;  
Technical diploma not equal to degree ;  
Non-technical diploma not equal to degree ;  
University degree or Post-graduate degree other than technical degree ;

Technical degree or diploma equal to degree or Post-graduate degree in the following branches :

Engineering,  
Medicine,  
Agriculture,  
Veterinary and Dairying,  
Technology,  
Teaching and  
Others.

The nine industrial categories of workers as also the non-workers are cross-tabulated by literacy and educational standards shown above.

2. A large number have been included under 'Others' under the educational level "Technical degree or diploma equal to degree or Post-graduate degree" as the technical degree-holders who cannot be classified under any of the branches, 'engineering', 'medicine', 'agriculture', 'veterinary and dairying', 'technology' and 'teaching' have to be grouped under this category. For example, geologists, chemists, zoologists, specialists in fisheries and allied subjects, chartered accountants, statisticians, etc., who are also degree-holders come under this category of 'Others'. Some of the technical degrees which are not clearly described in the enumeration slip have also been tabulated under this sub-head, which explains for the large number.

3. The absence of degree-holders in the urban areas of Sundargarh and Mayurbhanj districts in 'Agriculture' and urban areas of Dhenkanal and Keonjhar districts in 'Veterinary and Dairying' might be due to inadequate description in the enumeration slips. There is also the possibility of non-degree-holders remaining in temporary charge of the respective offices at the time of enumeration which might have contributed to the nil figures. No degree-holders in "Technology" in the districts of Koraput, Boudh-Khondmals, Dhenkanal and Mayurbhanj are found as the urban areas of these districts are not well developed.

4. Although the recording of one agricultural graduate in category V and two agricultural graduates in category VI apparently appear to be incongruous, the possibility of agricultural graduates participating in industrial concerns for better emoluments or taking up individual contracts in construction works cannot be totally ruled out.

5. This is an important Table as it shows the employment of persons of different educational standards among various categories of workers. The information can also be used for assessment of the educational qualifications of available man-power in urban areas.

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY  
EDUCATIONAL LEVELS

The Table is divided into two parts. The first part relates to urban areas and the second part to rural areas. It contains data of the nine categories of workers and also of non-workers. This is followed by cross-tabulation on the basis of literacy and educational standards.

2. *Reference to Enumeration Slip*—Question 6 of the Enumeration Slip has elicited the data for tabulation. The instructions issued for filling up the question 6 are reproduced below :

Q. 6—Literacy and Education

Use the following abbreviations :—

For a person

1. Who can neither read nor write or can merely read but cannot write in any language write 0
2. Who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity, he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can, with understanding, both read and write. If the person can both read and write and has also passed a written examination as proof of an educational standard attained, write the highest examination passed instead of L.

3. *Comparison with 1951 Census*—Table D-VII of 1951 Census which corresponds to these Tables does not give the data separately for urban and rural areas. Presentation of separate data for urban and rural areas is a new feature of 1961 Census. Some of the educational levels of 1951, viz., middle school, intermediate in arts and science, etc., are not adopted in 1961 Census. Separate data for technical and non-technical personnel has been collected.

4. The number of illiterate and literate persons by the educational standards in 1951 Census and 1961 Census are given below. It will appear that illiteracy has been reduced from 84.2 per cent in 1951 to 78.3 per cent in 1961, even in spite of general increase of population by 19.8 per cent.

**TABLE B-III—PART B**

**INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS  
BY EDUCATIONAL LEVELS IN RURAL AREAS ONLY**

This Table relates to rural areas only and shows the following educational levels:—

- Illiterate;
- Literate (without educational level);
- Primary or Junior Basic;
- Matriculation and above.

The nine industrial categories of workers as also the non-workers are cross-tabulated by literacy and educational standards mentioned above. The importance of the Table lies in the fact that it gives the data of literate and educated persons in the rural areas pursuing different types of economic activity.

**TABLE B-VI**

**OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION  
CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL  
LEVELS IN URBAN AREAS ONLY**

This Table is prepared exclusively for urban areas and only upto the Divisions of the National Classification of Occupations. It deals with literate workers other than those who work as cultivators and as agricultural labourers. The population under each division is classified by four broad age-groups 0—14, 15—34, 35—59, 60+ and age not stated, which are further cross-tabulated according to the educational levels.

2. The occupational and educational levels adopted for this Table are given below:—

| <i>Occupational</i> |                                                                              | <i>Educational</i> |                                                                                                                                                                                          |

The study of occupational divisions by broad age-groups and their educational levels is conceived for the first time during 1961 Census. The occupations which attract the educated personnel are essential for planning the country's economy. Thus, this table which is auxiliary to Table B-V is important as it gives information regarding the occupations which allure the educated persons.

TABLE B-VII

The Table B-VII which aims at finding out the principal and secondary occupation is presented in two parts, Part A and Part B. Part A deals with the workers in industrial categories, I,II and IV while Part B relates to other industrial categories of workers who are also engaged in household industry.

2. In the Censuses of 1931, 1941 and 1951 two separate questions were framed to find out the principal and secondary means of livelihood. But a departure is made in the present Census when separate questions are avoided and the method of putting a ring round the question number to indicate the principal work and putting a tick to indicate the secondary work is introduced. The instructions issued to the Enumeration Personnel are already given in the Introductory Note.

3. This Table corresponds to Table B-II of 1951 Census. The concept of dependency and livelihood in economic classifications of 1951 has been given up in 1961, and in its place the concept of work for the production of goods and services has been adopted. Secondly, more detailed differentiation of personal skills and of the types of production and services have become possible in 1961 due to the adoption of the two-fold classification of NCO and ISIC. As a result, comparability has suffered as indicated in the Introductory Note to this volume. Any broad comparison between the figures of two Censuses by treating the livelihood classes I and II of 1951 as equivalent to category I of 1961, livelihood class III of 1951 as equivalent to category II of 1961 and all non-agricultural classes of 1951 as equivalent to the categories III to IX of 1961 Census must make allowance for the appreciable difference arising from the change in concept between means of livelihood in 1951 and productive work in 1961. The statement below attempts to compare the relevant figures.

4. The secondary means of livelihood of 1951 Census is not comparable with the secondary work of 1961 Census. The instructions in 1961 left no ambiguity in distinguishing between the primary and secondary work. As compared to the secondary work, primary work is one on which more time is spent. Where the primary and the secondary work are either two types of household industries or two types of non-household industries, no secondary work was recorded. Only the primary work on which more time was spent was recorded. In 1951, the principal means of livelihood was one which fetched more income as compared to the secondary means of livelihood. In this way, an unproductive occupation like rent-receiving could be a principal means of livelihood, while the income derived from a productive work could be a secondary means of livelihood. Conceptually, this would be very much different in 1961.

TABLE B-VII PART A

**PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK**  
**(i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR**  
**(iii) AS AGRICULTURAL LABOURER**

This Table is a cross-tabulation in the case of persons whose principal and secondary work are any two of (i) cultivation (ii) agricultural labour or (iii) household industry. This is an important Table as it shows the extent to which cultivation is supplemented by household industry and *vice versa*. The percentage of workers in each of these three categories having secondary occupations are discussed below :

(i) *Cultivation*—10·8 per cent of the male cultivators and 3·5 per cent of the female cultivators in the rural areas work as agricultural labourers while 3·0 per cent of the male cultivators and 0·9 per cent of the female cultivators are engaged in household industry as secondary occupation.

(ii) *Agricultural labourer*—10·3 per cent of the male and 4·2 per cent of the female agricultural labourers in rural areas work as cultivators while 1·4 per cent and 1·1 per cent of the male and female agricultural labourers respectively are engaged in the household industry as secondary occupation.

(As the above two categories are concentrated in rural areas mostly, urban figures are not given.)

(iii) *Household Industry*—9·5 per cent of the male and 3·3 per cent of the female workers at household industry are engaged in cultivation while 2·2 per cent of the male and 1·8 per cent of the female workers work as agricultural labourers in the form of secondary occupation. The rural-urban break-up is given below:

|       | As Cultivator |              | As Agricultural labourer |              |
|-------|---------------|--------------|--------------------------|--------------|
|       | Males         | Females      | Males                    | Females      |
|       | (Percentage)  | (Percentage) | (Percentage)             | (Percentage) |
| Rural | 9·8           | 3·4          | 2·2                      | 1·8          |
| Urban | 3·3           | 0·8          | 0·6                      | 0·4          |

It is obvious that the percentage of workers having secondary occupation is much higher in rural areas than in urban.

*Note:—Major groups of household industry, where persons having cultivation or agricultural labour as secondary work are less than 5 per cent of the persons having the major group as principal work, have not been shown in this Table, but are given in the Appendix to this Table. Divisions thus affected are marked with asterisk (\*).*

## TABLE B-VII PART B

## INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY.

This Table gives the data on the basis of cross-tabulation in the case of persons who are principally engaged at non-household industry, etc., and also engaged in household industry. The number of workers in non-household industry as well as the number having secondary work in household industry are given below :—

| State  | Total Rural Urban | Workers in non-household industry |         | Secondary work at household industry |         |
|--------|-------------------|-----------------------------------|---------|--------------------------------------|---------|
|        |                   | Males                             | Females | Males                                | Females |
| 1      | 2                 | 3                                 | 4       | 5                                    | 6       |
| Orissa | Total             | 1,052,495                         | 421,702 | 5,574                                | 2,818   |
|        | Rural             | 755,494                           | 372,801 | 5,168                                | 2,752   |
|        | Urban             | 297,001                           | 48,901  | 406                                  | 66      |

The above figures show that about 0.5 per cent of the male and 0.6 per cent of the female workers in non-household industry have secondary occupation out of which the majority are in rural areas. The secondary occupations of urban workers are negligible as they constitute about 0.1 per cent only.

This Table, which shows the principal workers in each division and major groups followed by additional workers in each division and major groups, is presented separately for Total, Rural and Urban.

SEX AND EDUCATIONAL LEVELS IN  
RURAL AREAS ONLY

**TABLE B-VIII**  
**PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS**  
**AND EDUCATIONAL LEVELS**

This Table which deals with the classification of unemployed persons by their educational standards and age-groups is presented in two parts. Part A relates to urban areas and Part B to rural areas.

2. **Part A**—This Table for the urban areas is prepared separately for those who are seeking employment for the first time and for those persons who were employed before but are now out of employment and are seeking work. In the first case the broad age-groups are 15—19, 20—24, 25—29, 30—34, 35+ and in the second case 15—19, 20—24, 25—34, 35—44, 45—59, 60+. The educational levels as given in Table B-III Part A are followed in this Table for finding out the educational qualifications of the unemployed persons in the respective age-groups.

3. **Part B**—This Table which gives the figures of unemployed persons in rural areas is akin to Part A except that the broad age-groups are omitted and that the educational levels are confined to Primary or Junior Basic and Matriculation and above.

4. These two new Tables which are introduced for the first time in 1961 Census are expected to be useful for the purpose of planning for employment and also for finding out the available man-power.

TABLE B-IX

**PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD  
AGE-GROUPS AND TYPE OF ACTIVITY**

This Table which relates to categorisation of the non-workers is the first to be attempted ever. In the past, no investigation was made into the activities of non-workers. The eight-fold activities of non-workers are based on the recommendation of the United Nations. Question 12 of the Enumeration Slip provides the data for this Table. The question and the instruction for recording the answer are given in the Introductory Note.

2. This Table gives separate data in respect of those earning without working, house-wives who do domestic work but are regarded as economically inactive, school-going children, dependents, infants and disabled persons. The study of age-groups with reference to age-tables will throw light on the children of school-going age who are not attending school and persons in working age-groups who are not working.

3. The percentage of non-workers classified by sex, broad age-groups and type of activity is given in the statement below :—

N Stands for 'Negligible'

4. The female non-workers are nearly double that of the male non-workers which is a normal feature as the house-wives who do domestic work are mostly classed as non-workers. The sex disposition in the eight-fold activities are analysed below :

(i) *Full-time students*—The proportion of males is much higher than females in the age-groups 0—14 and 15—34 as male students are usually in large number than females. Incompatibility is noticed in the figures of full-time students in the age-group 0—14 and the literate population in the age-group 5—14 in a few districts. Non-attainment of the prescribed standard of literacy by the elementary school children deprives them from being classed as literate, while giving up schooling after being literate does not entitle one to be recorded as a student. The apparent incompatibility is thus accounted for.

(ii) *Household duties* :—Male non-workers constituting 0.8 per cent of the total non-working population are shown in this category. 76,780 males are classed as attending to household duties out of the total of 3,442,220 male non-workers (roughly 2.2 per cent) and the general nature of their duties are explained as follows :—

(a) There are cases of several households particularly in north-western districts where male members look after the upkeep of the house, tend the cattle and take care of children, when the women folk are busy in the market or go out in an economic pursuit such as hawking of garden fruits and vegetables, or eatables made at home such as *chura*, *murhi*, etc., or pluck *kendu* leaves from forest areas for sale to contractors. In such households male members are not engaged in any job with the object of adding income to the family. The nature of work of these male members has been described as household duties.

(b) In large families the activities of some members are unremunerative. They are not interested in finding out jobs due to their preoccupation at home which are mostly in the form of assisting the elderly family members. As there is no specific assignment for them and as the work generally depends on the bidding of the earning members, they are classed as persons doing household duties.

(c) The household duties in which children are mostly engaged in rural areas are tending the cattle, procuring green grass, collection of cowdung and visiting markets for purchases besides assisting their mothers in household duties.

(iii) *Dependents, infants and disabled*—22.4 per cent of the male non-workers and 26.8 per cent of the female non-workers come under this category out of which the age-group 0—14 only accounts for 20.6 per cent of the males and 22.9 per cent of the females. Large number of children of school-going age who are not actually attending any school has contributed to the high percentage in this age-group. The percentages in the working age-groups 15—34 and 35—59 are negligible. The figures for the age-group 60+ is normal.

(iv) *Retired persons, Rentiers, etc.*

(v) *Beggars, Vagrants, etc.*

(vi) *Inmates of institutions*

(vii) *Persons seeking employment for the first time*

(viii) *Persons employed before but now out of employment and seeking work.*

As the percentage in these categories of non-workers is low and as there are no abnormalities, comments are not necessary.
