In fact, in these days you cannot take up any serious administrative, economic or social work without referring to the Census Report which is an essential part of every inquiry, of every study. Even for the solution of minor problems you have often to consult the Census Reports. In future their importance will be still greater because I hope you will deal with the live man and tackle the various human problems in such a way that what you say now in your Reports may be of help and may prove of great assistance to those who may have to carry on these tasks of administration, planning, reconstruction of the economic order and social order.

— *Shri Gobind Ballabh Pant, Home Minister of India,*
addressing the Conference of Census Superintendents in New Delhi on the 27th September 1959

INTRODUCTORY NOTE

The tenth decennial Census of India, which eventually was the third for Orissa as a separate State, was conducted between the 10th of February and the 4th of March 1961, the sunrise of the 1st of March being specified as the zero hour of the reference day for purpose of all calculations. This Census like all the previous ones, was held according to the fundamental principle, namely, that the Census should be simultaneous throughout the State and must cover every human being.

2. The burden of organizing and conducting a decennial Census is great indeed. It requires detailed planning in advance, elaborate arrangements for training and enumeration and strict schedule of time to be followed by several thousand personnel engaged in the work. This onerous task from the beginning to the end of the operations is accomplished not only by harnessing the vast administrative machinery of the Government but also by seeking extensive co-operation of a large number of voluntary, honorary workers.

3. *Legislation*—The legal basis for holding the Census is provided by the Census Act (XXXVII of 1948), which authorizes the Central Government to take Census whenever it may so consider necessary. Census taking has become convenient and systematic on account of the various provisions contained in the Act. While the duties and functions of public servants have been clearly defined, the obligations of the members of the public have also been laid down and penalties indicated for non-compliance.

4. *Pre-tests*—The Census of 1961 has the distinction of introducing some new features, particularly with regard to the numbering and listing of houses and the form and substance of enumeration questionnaire. It was, therefore, considered necessary that the draft Schedules and instructions should be put to test before the actual operations started. Two Pre-tests were held accordingly. (221 C en.—I)

The first one came as early as January 1959 under the responsibility of the Bureau of Statistics of the State Government. On the result of this Pre-test, the draft Schedules, the questionnaire and the instructions underwent some changes. The revised drafts were again tested for the second time in July-August 1959 in course of the second Pre-test, which was held under the direct responsibility of the Superintendent of Census Operations. This Pre-test was conducted in all the districts of the State with the co-operation of District Officers who appointed District Pre-test Officers one for each district. They were made responsible for the training of workers, for selecting suitable localities for the test and for conducting and completing the operation. Each locality selected for the test was expected to have about 100 households in urban and 150 households in rural areas. Enumerators at the rate of one for 50 households in the urban and one for 75 households in the rural locality were appointed, mostly from school teachers or subordinate village revenue officers. Supervisors were appointed for working at the rate of one for two separate localities. They were selected from amongst Tahasildars or other junior officers. The programme which covered 14 days, namely, first 5 days for study of instructions by the field-staff, next 3 days for house-listing and the last 6 days for actual enumeration was strictly followed in all districts. Fifty-two localities containing 6,551 households and 29,949 persons were taken up for the Pre-test. The results were tabulated. The Pre-test disclosed *inter alia* certain difficulties in filling up House Lists, Household Schedules and Enumeration Slips and emphasized on the necessity of further elaborating the final instructions for filling up these forms. Tabulation similarly disclosed some interesting features relating to the size of the household and high increase in literacy figures. Thereafter, a Conference of the Superintendents of all States in India was convened by the Registrar

General for purpose of finalizing the forms, the instructions and other details on the basis of experience gained in the Pre-tests.

5. *Approved Schedules*—Among the forms and schedules finalized in the Conference of Superintendents, three are important, namely, the House List, the Household Schedule and Census Population Record and the Individual Slip. Samples of these three Schedules are given in Annexure I.

(i) *House List*—Preparation of House List is a new feature of the Census of 1961. It contains a large number of information relating to all Census houses, such as, the purpose for which the house is used, the materials of wall and roof, the number of rooms and the number of persons living in the house and so on. If the house was used as a workshop or a factory, some additional items of information concerning the name of product, the extent of labour employed, the kind of fuel or power used, etc., were recorded. The collection of information in this form has been useful for building up a picture of the country in regard to housing condition, regarding which little knowledge existed till now.

(ii) *Household Schedule*—The form consists of two parts, namely, Part-I—Household Schedule and Part-II—Census Population Record. It is intended to record consolidated information regarding the household as a unit. Among the important items of information contained therein, one is cultivation of the family holding with details of acreage, nature of tenure and ownership, and another, household industry conducted by the head of the household or by a member thereof, based on manufacture, processing or servicing in a small-scale not falling under the scope of registered factories. The second part of the Schedule, the Census Population Record, is a complete list of the members of the household indicating the name, sex, relationship, age, marital status and description of work, if any. This form is a convenient and economical substitute for the National Register of Citizens prepared in 1951.

(iii) *Individual Slip*—This is an enumeration record of every individual who was alive on the reference date. It is otherwise known as Enumeration Slip. It gives a large number of personal information with regard to the enumerated person, including his age, marital status, birth-place, religion, education and economic activities and so on. The Slip has been designed to be small but compact, for convenience of hand-sorting in the Tabulation Office, by use of symbols, numerals and contractions to save time and space.

6. The standard forms in English were translated into the regional language, Oriya, and arrangements were made for printing them expeditiously in the Government of India Press. They were printed in such large bulks that no local Press could have undertaken the responsibility of delivery in time. But the instructions meant for the Census personnel were printed in English and in Oriya in local Presses in the form of booklets and circular letters issued from time to time.

7. *The Questionnaire*—There are 13 main questions in the Individual Slip, a few of which are divided into sections, so that the total number of questions and subsidiary questions comes to 24. Questions as to name, age, nationality and religion are basic questions and were included now, much as in the first Census of India in 1872. The questions on marital status, place of birth, mother-tongue and sex were first included in the year 1881. In 1891, the question on a language other than mother-tongue was included for the first time. With regard to economic activity, a broad enquiry was made from 1872 onwards but details with regard to the principal and subsidiary means of subsistence and the status of dependency were taken up from the year 1901 onwards. In 1951 greater details were included with regard to dependency, employment and principal and secondary means of livelihood and finally in 1961, the questions on economic activity received the utmost emphasis. Information was elicited on the basis of work done which embraces a larger section of population than an enquiry confined only to the earning category. Investigations

were also made into the activities of non-working population.

8. The set of questions finalized for 1961 did not contain some items which used to be included in earlier Censuses. The question, for example, on infirmities which featured for over half a century from 1872 to 1931 were at last discarded in 1941 and were not considered practicable since then. Recording the name of the caste was considered important from the very inception of the Census of India, but it was omitted for the first time in 1951 as the Indian Constitution laid stress on the secular character of the State.

9. Out of the 13 main questions appearing in the Individual Slip of 1961, five are demographic, three are social and cultural, and the remaining five are economic. The following constitute the demographic questions :

Question No. 1 (a) Name.

(b) Relationship to Head of household,

No. 2 Age last Birthday,

No. 3 Marital Status,

No. 4 (a) Birth-place,

(b) Born rural/urban,

(c) Duration of residence if born elsewhere, and

No. 13 Sex.

10. There are three questions for collection of social and cultural data. They are mentioned below :

Question No. 5 (a) Nationality,

(b) Religion,

(c) Whether the enumerated person is a member of the Scheduled Castes or the Scheduled Tribes,

No. 6 Literacy and education,

No. 7 (a) Mother-tongue,

(b) Any other language.

11. There are five questions for the collection of economic data. Four of them relate to persons who work and the fifth to persons who are not working. In case of a worker, four questions are put in a series and answers separately recorded to find out whether he or she is working as follows :

Question No. 8 As cultivator,

No. 9 As agricultural labourer,

No. 10 At household industry,

No. 11 In activities other than mentioned in questions 8, 9 or 10.

12. Instructions were given that if a person is engaged in more than one work, this will be indicated against the appropriate column. The principal work will be indicated by drawing a ring round the number of the question which relates to it. The secondary work will be indicated by a tick against the appropriate question number. In the case of persons engaged in work other than cultivation, full details as to the actual work he is doing and the nature of industry, profession, trade or service in which he is engaged will be recorded. It was emphasized that full information on the economic activity must be noted so as to enable classification of the activity under the Standard Industrial Classification Scheme. Instructions were also given to record if a working person is an Employer, Employee, Single Worker or Family Worker. In case of a person who is not doing any work, it was necessary to record whether he is engaged in household duties only, or as a full time student, or a pensioner, rentier, beggar, convict, unemployed or infant and so on. The questions and the concepts used were simple though vital in importance, and it was hoped that the records will correctly depict the economic condition of the population.

13. *Stages of Operation*—There were broadly six stages in the Census Operations of 1961. They are briefly described in the following paragraphs.

14. *Delimitation of Census Divisions*—The first task was the checking of the territorial limits of the State, particularly with reference to the boundary as it existed in the Census taken in 1951. Thereafter, smaller territorial units were delimited in such a manner that they corresponded as far as possible to the existing administrative units, from the level of a district downwards, that is to say, the district, the subdivision, the police station or the taluk and the village or the town. There was no difficulty with regard to the district and the subdivision being the top divisions, but the question was what should be the next one. So many alternatives were open, namely, Gram Panchayats, N.E.S. Blocks, Electoral constituencies and Police Stations. A careful examination was made for adopting either the Gram Panchayat or the N.E.S. Block as a territorial unit for presentation of Census statistics. After discussions with the concerned authorities it appeared that the State had not yet been fully covered by these units. Moreover, in the case of at least the Gram Panchayats, change of jurisdiction and reduction of size was under contemplation. It appeared that no useful purpose would be served by adopting such an unstable basis for Census statistics. There was no other choice but to accept the police station as the unit although previous experience showed that the arrangement was not quite desirable. The State was divided into 393 Charges, each Charge being equivalent to the full jurisdiction of a police station or a part of such police station wherever it was apportioned between different taluks or subdivisions. As a result, no standard size could be obtained in respect of the Charges. Some were quite big and some too small.

15. The Supervisor's Circle was more or less standardized by carving it out so as to comprise 5 Enumerators' Blocks. There were departures here and there in consideration of local convenience. The smallest Census territorial unit, namely, the Enumerator's Block was either a village or a ward or a portion of a village or a ward according to its population. In urban areas, a Block had

120 households or 600 inhabitants while in rural areas the number was 150 and 750 respectively. In this manner the State was divided into 22,469 Blocks and 4,570 Circles and 393 Charges.

16. *Census hierarchy*—The second stage of the operation came with the fixing of hieratic levels of Census responsibility. The usual tradition of previous Censuses was generally followed in the matter of building up the structure of Census personnel. Subject to the general control of the District Magistrate, there was at the top a District Census Officer, who invariably happened to be the Additional District Magistrate of the district concerned. Below him was the Subdivisional Census Officer, one for each subdivision of a district. The subdivision was divided into a number of Charges which were generally coterminus with a police station or a town. The nomenclature of all Census divisions from the level of the district downwards and the designation of Census Personnel-in-charge of each Census Division is given below :—

Census Division		Census Personnel-in-charge
(1)		(2)
District	..	District Census Officer (A. D. M.).
Subdivision	..	Subdivisional Census Officer (S. D. O.).
Charge	..	Charge Officer (Officer in-charge of Police Station or Chairman or Executive Officer of Municipality).
Circle	..	Supervisor
Block	..	Enumerator

17. The Supervisor-in-charge of a Circle and the Enumerator-in-charge of a Block were appointed on the recommendation of the District Census Officer. They were mostly drawn from a large number of Primary School teachers and from the paid clerical ranks of Government or quasi-Government institutions. Educated non-officials were also appointed, but to a smaller extent.

18. *House-numbering and house-listing*—This is the third stage of the operation. The house-numbering operation was spread over 22 days from the 1st to the 22nd May 1960. The required number of printed forms of House Lists and House List Abstracts were supplied to the Enumerators well in advance. They were directed to complete the preliminary numbering of houses with chalk or *gerumati* between the 1st and the 7th of May. The Supervisors then checked if the numbering was done in correct order and without omission or duplication. The house-numbers were then inscribed with coal-tar. The work was completed throughout the State by the 22nd May 1960, excepting in a few urban areas, where the operation was delayed by a few days.

19. The number allotted to a Census house was composite in Constitution. Its first element indicated the serial number of the 'Building' within the village or ward, the second element indicated the serial number of Census house within that building and the last element related to the serial number of household within the Census house. The triple elemented number was a source of confusion to some of the workers, particularly for those that were unable to distinguish between a 'Building' and a 'House' on the basis of the definition.

20. *Training of Personnel*—The fourth stage came with the arrangements made for training of all levels of Census agency. The training was given in two stages, the first specifically relating to house-numbering and house-listing. The District Census Officers were given a course of two-day training at Cuttack and were asked to impart similar training in their own districts to those officers who might be selected for conducting the training classes of Supervisors and Enumerators. Such training was given in each district between the 16th and the 30th April 1960. There were no Deputy Superintendents in the Census Organization at that time and so the burden of training was borne by the District Census Officers. (221 Cen.—2)

21. The second part of the training related to enumeration work. It was impressed on all concerned that accuracy in enumeration depended on the thoroughness of training. The State was divided into three zones, each under a Deputy Superintendent with headquarters at Berhampur, Cuttack and Sambalpur. On the one hand the District Census Officers were busy organizing intensive course of training for the personnel of the district, and on the other the Deputy Superintendents were moving throughout their respective zones and supervising the Training Classes and sometimes themselves playing the role of Instructors. A number of Training Centres were selected in such a manner that no locality attached to a Training Centre was more than six miles in distance. Each Centre was to hold the Training Class on a particular day of the week for eight consecutive weeks out of which every Census personnel attached to the Centre was obliged to attend at least six. A large number of Training Officers after receiving thorough training, were mobilised between November 1960 and January 1961 to impart training and to give practical lessons to thousands of Enumerators and Supervisors by organizing sample Census. The quality of the training was high and attendance was quite satisfactory.

22. *Census Count*—The Census count started in the morning of the 10th February and ended at Sunrise of 1st March 1961. The canvasser method of enumeration was employed, i.e., an Enumerator was supposed to call at every household or on every human being and take down particulars relating to the household and the individuals in appropriate forms himself. Each Enumerator was given the above period of 19 days to complete his work, which consisted of filling up for each household a Household Schedule and for each human being an Individual Slip. Sunrise of the 1st March is called the reference date, which means that all births and deaths occurring between the time the count was taken and the Sunrise of the 1st of March detected during the revisional round during the next four days were to be accounted for. The Enumerator was also

required to enumerate any person found in a household during the revisional round who had not been enumerated elsewhere during the enumeration period. The revisional round lasted for four days, namely, from the 1st to the 4th of March. The count of the 1961 Census included all persons who were alive at the Sunrise of 1st of March 1961.

23. As a general rule, every person was enumerated at his normal place of residence, except those who were away from such residence throughout the period of count. These persons were enumerated at the places where they were first found by an Enumerator during the enumeration period or during his revisional round. Houseless persons were enumerated at the places they were found in the night of the 28th of February. The Enumerator had to move throughout his jurisdiction this night in search of houseless persons, if any, and to prepare Enumeration Slip, one for every such person.

24. *Reporting of figures*—This is the last stage of the operation. After the revisional round was completed and the figures were corrected up to the reference date, a quick process of reporting from stage to stage was followed up. On the 5th of March, the Enumerator sent his final abstract to the Supervisor, who prepared a summary of figures in respect of his circle. On the 6th of March, the Charge Officer similarly prepared a summary of figures in respect of his Charge on the basis of Circle summaries received from Supervisors. The Subdivisional Census Officer prepared the Subdivisional summary on the 7th of March and the District Census Officer commenced checking of the Subdivisional summaries for compilation of the District summary. The District summary was scrutinized and approved by the District Magistrate, who on the 10th of March sent telegraphic messages to the Registrar General, India and the Superintendent of Census Operations, conveying the provisional population totals of his district.

25. *Enumeration in Non-synchronous areas*—In the Census of 1951 and of earlier decades, the problem of enumeration in inaccessible areas was tackled by extension of the actual period of enumeration and by appointment of paid Enumeration agency. The process was technically called 'Non-synchronous Enumeration'. In the year 1941 the total area involved under non-synchronous enumeration was 14,158 sq. miles extending over 3 districts, namely, 3,583 sq. miles in Ganjam, 9,875 sq. miles in Koraput and 700 sq. miles in Mayurbhanj. In 1951 the non-synchronous tracts were reduced considerably to the level of 9,685 sq. miles, namely, 2,184 sq. miles in Ganjam, 6,801 sq. miles in Koraput and 700 sq. miles in Mayurbhanj. In these areas enumeration began sometime in November-December of the year preceding the Census year and was concluded either simultaneously with the regular enumeration or a little later.

26. With the gradual spread of literacy and improvement in the modes of communication, it was thought possible to reduce the non-synchronous tracts considerably in 1961 or to eliminate them altogether. After discussion with the District Officers concerned it was considered worth while to eliminate the non-synchronous method. The old practice of prolonged enumeration outside the regular enumeration period in inaccessible areas was finally given up for the first time in 1961.

27. *Enumeration in inaccessible areas*—Although the system of non-synchronous enumeration was abandoned, the problem of tackling the inaccessible areas remained, though to a lesser extent than in the previous Census. The Registrar General was moved to accord sanction to a scheme of appointment of paid Enumerators and Supervisors in inaccessible areas for a certain period so that such paid agency would be able to complete the enumeration work within the regular enumeration period. In Koraput and Mayurbhanj, a few paid personnel were thus appointed to undertake the work in inaccessible areas. The

work was satisfactorily completed within the regular period by such paid agency.

28. *Changes in Territorial jurisdiction*—A brief account of the changes in the territorial limits of Orissa from time to time since 1901 has been given in the Fly-Leaf to the opening Table in this Volume. It has been mentioned therein that there was no change in the jurisdiction of the State or of any district during the decade 1951-61. But some extent of changes in the area and boundary of lower administrative units, such as, subdivisions, taluks and police stations were necessary as the result of some administrative measures, such as, the abolition of the zamindari system resulting in the vesting of all the estates in the Government, direct collection of land revenue by the introduction of Naib-Tahsildari system and problems arising out of the necessity of maintenance of law and order. These changes are noted below districtwise:

29. *Kalahandi district*—The subdivisional boundaries of Sadar and Dharamgarh subdivisions were redrawn after transfer of the areas of Kashi-pur and Thuamul Rampur police stations and of Borda OP (a portion of Kegaon police station) from Dharamgarh subdivision to Sadar subdivision. A new police station named Jonk PS was created in Nawapara subdivision by taking out a portion of the Nawapara police station around Khariar Road town due to its rising importance as a trade centre with the establishment of several rice-mills.

30. *Koraput district*—No changes were made in subdivisional boundaries. But the taluks were constituted or reorganized extensively. Koraput and Nandapur taluks in Koraput Sadar subdivision, Borigumma and Umarkot taluks in Nowrangapur subdivision and Bissamcuttack taluk in Rayagada subdivision were newly constituted to deal with land revenue administration due to the vesting of Jeypore estate in the State Government. The formation of these new taluks necessitated changes in the jurisdiction of the old

taluks, namely, Jeypore, Nowrangapur and Rayagada as indicated below:

Name of new Taluk (1)	Present Jurisdiction (2)
Koraput ..	Koraput PS Dasamantapur PS Lakshmipur PS Narayanapatna PS
Nandapur ..	Semiliguda PS Pottangi PS Nandapur PS Padwa PS Machkund PS
Borigumma ..	Kodinga PS Borigumma PS Kotpad PS Bhairavasingpur PS
Umarkot ..	Umarkot PS Dabugam PS Jorigam PS
Bissamcuttack ..	Bissamcuttack PS Ambodala PS

31. The present jurisdiction of old taluks which are now in existence is given below:

Name of old Taluk (1)	Present Jurisdiction (2)
Nowrangapur ..	Nowrangapur PS Tentulikhunti PS Pappadahandi PS
Jeypore ..	Jeypore PS Boipariguda PS Kundra PS
Malkangir ..	Malkangiri PS Venkatapalam PS Mathili PS Motu PS
Rayagada ..	Rayagada PS Kalyansingpur PS
Gunupur ..	Gunupur PS Gudari PS Padmapur PS Puttasingi PS

32. The construction of Machkund Hydro-Electric Project and the development of Machkund town led to the creation of a new police

station, Machkund PS by separating the relevant portion from Padwa police station. As the area of Venkatapalam PS was too unweildy, Motu police station was newly carved out of it. Muni-guda OP was abolished by merging it with Bissam-cuttack PS and Chandrapur OP was merged with Gudari PS. Two police stations existing in 1951 Census, namely, Maidapur and Dheppi-guda were reconstituted into two new police stations, namely, Pappadahandi and Padmapur respectively.

33. *Sambalpur district*—No change in the boundary of any subdivision has taken place. A few police stations of Sadar subdivision underwent changes in consequence of the construction of the Hirakud Dam Project. Major portions of Mahadebpali, Mura and Rampella police stations were submerged in the Hirakud Reservoir. Two new police stations, namely, Rengali and Lakhan-pur were formed by reorganization of the villages of the above mentioned police stations. Two other police stations, namely, Hirakud and Burla were created mainly for dealing with security measures and law and order problems since the time of the construction of the Hirakud Dam.

34. *Baudh-Khondmals district*—The district has changed its name from time to time. In different official records and at different times it has been named as Baudh district, Baudh-Phulbani district or Baudh-Khondmals district. The district has undergone some internal territorial changes. The Subarnagiri police station has changed its name to Kotgarh police station since shifting of the headquarters from Subarnagiri to Kotgarh in Baliguda taluk in June 1952. Subarnagiri is now an outpost under Kotgarh PS. A new police station was created at Raikia in G. Udayagiri taluk out of a portion of G. Udayagiri police station for effective control of law and order. Dahia outpost under Manamunda police station in Baudh subdivision was abolished in 1956. The area is now controlled directly by the police station.

35. *Ganjam district*—A new subdivision known as Parlakhemundi was created in Government

notification No. 1424—XIII-33/56-R., dated the 24th August 1956, comprising the areas in Parlakhemundi taluk, R. Udayagiri taluk and Mohana ex-Agency excluding Jerrow Merikote and Gourgotha Muthas. Digapahandy and Chikiti taluks were newly formed in Berhampur subdivision in 1953, the former comprising portions of Nuagam, Hinjili and Pattapur PSs. and the latter comprising portions of Nuagam, Jarada and Berhampur taluk PSs. One hundred and forty-four villages of Nalaghat OP and seventy villages of Bamunigam police station were merged with Mohana police station.

36. *Sundargarh district*—In 1951 Birmiritrapur PS had two outlying OPs., namely, Raiboga and Hatibari. These two OPs. were separated from Birmiritrapur PS. The area of Raiboga OP was constituted into a new police station of the same name, while Hatibari OP was merged with Bisra PS. As a result of the erection of the Steel Plant and construction of the Rourkela township, a police station was specially established for controlling law and order within the area of the Plant and the township.

37. *Puri district*—Balianta and Balipatna police stations of Sadar subdivision together with the Bhubaneswar, Chandka and Jatni police stations of Khurda subdivision have been grouped together to form a new subdivision, namely, Bhubaneswar.

38. *Keonjhar district*—The headquarters of Kuanr police station was shifted to village Kanjipani which now gives the new name to the police station. Similarly, the headquarters of Jhargaon police station was shifted to Barbil and its name was changed into Barbil police station.

39. *Cuttack district*—Charbatia police station in Sadar subdivision has been renamed as Chowdwar police station.

40. *Mayurbhanj district*—Similipal was one of the police stations in the district in 1951. It has been abolished and its area divided between six surrounding police stations, namely, Baripada

Bangriposi, Karanjia, Jashipur, Thakurmunda and Udala. In Bamanghaty subdivision there were four police stations but at present there are six. Rairangpur police station has been reconstituted into two, namely, Rairangpur and Badampahar police stations while Bahalda has similarly been divided into two, namely, Bahalda and Tiring police stations.

41. *Balasore district*—Two police stations have been formed in the Sadar subdivision, namely, Shergada and Raibania by taking out portions from Balasore Sadar and Jaleswar police stations respectively. In Bhadrak subdivision, Bansada police station was created by taking out a portion of Chandbali police station for dealing with law and order problems effectively.

42. No territorial changes of any kind took place in the districts of Bolangir and Dhenkanal.

43. *Census Calendar*—Mostly based on central instructions, a programme of operations was drawn up, keeping in view the local difficulties justifying a certain amount of adjustment. For example, the importance of completing the house-numbering work before the onset of monsoons was borne in mind. Road communications to many localities in Orissa are cut off during the rains, either due to floods or due to unbridged rivers and streams getting swelled. Besides, the rural folk would not mind any responsibility other than the cultivation work during the monsoon months. Thus the earlier stages of the operation were completed before the rains of 1960, so that the winter season was left free to be utilized for purpose of training of the personnel. The programme was divided into seven principal stages for convenience of work. A complete list of events constituting the Census Calendar is given in Annexure II.

44. *Govind Dwadasi Festival*—A festival of unprecedented sanctity in the history of the Hindu religion, called the 'Govind Dwadasi', took place on the 27th of February 1961. Such a festival is believed to occur once in a thousand years or more. There is no record of the previous

(221 Cen.—3)

festival taking place during historical times. On account of its great sanctity, pilgrims from all over India were expected to congregate in Puri roundabout the date of the festival which fell within the enumeration period. District authorities roughly estimated the expected number of pilgrims at about 10 to 12 lakhs. An uncontrollable movement of population was apprehended from within and outside Orissa, disturbing the usual Census arrangements to a considerable extent. Elaborate arrangements were made by the Railway Administration to meet the transport problem and by the State Government to handle the situation relating to law and order, public health, sanitation, food and accommodation. It was obvious that many of the pilgrims would be leaving their normal residence during the enumeration period and will be either on the way or at Puri where it would be very difficult to catch them for a count. Puri was ready with an enumeration agency to tackle the population of 60,000 and not 12 lakhs, although after the festival was over it appeared that only 6 lakhs of pilgrims had visited Puri on account of the festival. So it was necessary to make elaborate arrangements for enumeration of this extra population. Special arrangements were made to ensure enumeration of every pilgrim not censused anywhere else by establishing four Check Posts on the roads from different directions leading to Puri. A few selected Railway stations were also the Centres of special enumeration. All these Check Posts and Centres were manned by special paid Enumerators working round the clock in three shifts of 8 hours each. They succeeded in enumerating many pilgrims who had not been accounted for in any normal process of enumeration.

SPECIAL FEATURES OF 1961 CENSUS

45. The present Census is distinguished by many new features which were not present in the Census of 1951 or of earlier decades. Some of the most important features are indicated in the paragraphs below.

46. *Maps and Atlas*—Maps numbering several hundred are ready to be presented in two volumes. One of them will mainly contain maps of Orissa showing features of population against natural background of physiography, geology, rainfall, soils, etc. It will also contain maps representing interesting demographic features of the State, such as, inter-censal changes, ratios relating to sex, age, birth and death, rural and urban etc. The second volume is mainly devoted to the maps of administrative units of Orissa. Such maps were built with unflinching labour in the collection of basic data and with the greatest possible care and cartographic skill. No source, likely to possess any kind of useful and reliable data, was left untapped. The Land Records, the Survey and Settlement, the local Revenue authorities, the Police, the Development and Planning, the Statistical Bureau and all private sources, such as, ex-Zamindars and ex-Gauntias, who were reported to be in possession of any original record which might be helpful for building up the maps, were contacted. It is hoped that when the maps of the police stations and districts of Orissa will be available to the administrator, the planner, the surveyor, the scholar and the student in one handy volume, it will remove a long-felt want.

47. Besides the maps of larger units as mentioned above, maps of villages drawn on notional basis were also built up and compiled in manuscript form. These maps show the approximate location of important features of the village, such as, the roads, tanks, educational institutions, places of worship, cultivated area, forest and hills, etc. They have been kept in bound volumes for future administrative use.

48. *House List and Housing and Establishment Tables*—In earlier Censuses the number of houses were merely counted but now it is possible to study the housing condition in towns and villages with regard to all sections of the people, the rich and the poor. The House List provides a large number of information as mentioned in an earlier paragraph. On the basis of data available

in the House List, the Housing and Establishment Tables and finally a Report on the subject have been prepared. These Tables and the Report indicate whether people have got adequate dwelling accommodation in view of the increasing number, whether they have got dependable houses made of suitable materials so as to give them adequate protection from weather and accidents and whether they have got necessary amenities which are characteristics of a good house. The Report is expected to be useful in planning improvements to the existing conditions of housing which are not considered satisfactory.

49. *Household Schedule and Census Population Record*—In the Census of 1961 every family or household has been treated as an entity for purpose of certain specific information. In the past, the Census enquiry was confined to the individual. The practice was to collect various items of information with regard to the individual and to account for them in the shape of a number of statistical tables. Now for the first time, a family or a household has been taken as one unit of enumeration in addition to an individual being also treated as a similar unit. It was considered that in a country where not all the goods produced in a household entered the money market and where much of the goods produced was consumed by the family itself collection of information purely on the basis of individuals tended to be slightly misleading unless such information were supplemented by some more concerning the economic activities of the household as an entity. With regard to cultivation, for example, it is possible to get a more accurate picture by enquiring about the family as one economic unit rather than enquiring separately about each single member of that family. Under local conditions the cultivating operations are generally attended to by many members of a family. Such members lend a helping hand in different cultivating operations beginning from preliminary ploughing of the land to harvesting and disposal of the crop. Similarly with regard to household industries, such as, prepara-

tion of fried rice for sale, making of clay toys and other varieties of dolls, manufacture of ornaments made of lac, etc., it is seen that several members of the family from an old woman to a young boy, give assistance to the principal worker. The product of such household industry is really the outcome of the labour of all members of the family who took part in it. Thus a correct picture of the family economy can be built up more satisfactorily by treating the family as one unit. This is expected to give a more reliable account of the economic and social structure of the country than what was obtained in the Censuses of past decades. Cultivation and household industry being the chief economic activities of households in this country, the Household Schedule was designed to collect data on these two aspects in particular.

50. Household cultivation relates to the extent of land under cultivation, either owned or held from Government, or held from private persons or institutions for payment of money, kind or share, or both. The land was classified according to the local name of right of ownership or of cultivation. Household cultivation also included land not actually cultivated by a household, but given to a private person for cultivation for payment in money, kind or share.

51. Under household industry, the nature of the industry and the number of months in the year during which it was conducted was given. A simple definition acceptable to all levels of intelligence and application was adopted for household industry. The emphasis was laid on participation of the head of the household or of one or more members of the household in conducting the industry.

52. At the back of the Household Schedule, there is the 'Census Population Record'. It is a list of the persons as counted at the Census in each household giving essential information for each individual enumerated, viz., name, relationship to the head of the household, age, marital status and description of work, if working. This will serve as a valuable document that can be

used as a sampling frame after the 1961 Census in any enquiry based on households.

53. *Household Economic Tables*—These tables are introduced for the first time during the present Census. The criterion of enquiry relating to economic activities of the people has undergone remarkable change at present. In the last few Censuses, income or economic independence was the criterion for measuring the economy of the country. A count was made of all persons who were economically independent and of those who were not. The intermediate category of economic semi-independence was also introduced from 1931. This category continued under some name or other up to the Census of 1951. The element of income was always the basis of such category. But in the present Census, stress has been laid on actual work and not income, so that all people who work, including family workers who are not in receipt of any income, or working children who cannot earn enough for their maintenance, have been included as workers. In the past such category of persons were missed from the class of economically active persons. It was felt that the strict application of the criterion of income or economic independence suppressed those who participated in economic activities but did not actually earn any income. The departure from income to work as the basis in the present Census is considered an improvement in obtaining the economic characteristics of the country.

54. There are 8 Tables classified as the Household Economic Tables which give the gist of answers returned to the questions contained in the Household Schedule relating to the extent of land under cultivation, nature of household industry, period of working in the household industry and the number of persons who were employed therein either as family workers or as hired labourers. All these data were tabulated centrally in the Central Tabulation Unit at New Delhi on 20 per cent samples.

55. *Industrial and Occupational Classification*—The Indian Economic Classification adopted in the 1951 Census was neither purely industrial

nor occupational classification of the population, but was a combination of both. There were only ten divisions and eighty-eight subdivisions of industries and services. In the present Census, the classification as given in the National Classification of Occupations, and the Standard Industrial Classification adopted by Government of India has been followed with the minimum of necessary modifications. There are now 9 divisions, 45 major groups and 343 minor groups in the Standard Industrial Classification with 331 Occupational Groups, for which figures are given sexwise. This was achieved by pre-coding the slips and the schedules for both the occupational and industrial classifications before they were subjected to manual sorting. A specially selected and trained team of coders was employed in each tabulation office. The industrial and occupational divisions were again cross-tabulated by educational standards. In the case of occupational divisions there was a further cross-tabulation by broad age-groups for the urban areas.

56. *Special Migration Tables*—In 1951, only one table, namely, Table D-IV was prepared, giving the distribution of population enumerated in each district according to the place of birth of the enumerated person. More elaborate data are available in the present Census. In addition to the usual Table showing rural-urban migration there is one Table particularly relating to the non-Indian Nationals living in different districts. In another Table the migrants have been classified not only by place of birth but also by duration of residence. The migrants to cities, furnished in a separate Table, are likely to unfold interesting aspects, as they have been classified not only by age-groups but also by educational levels, and in case of workers, by occupational divisions and groups. This table will show the type of persons that were drawn to a city for different reasons.

57. *Table for Scheduled Castes and Scheduled Tribes*—In the previous Census, the information given with regard to the Scheduled Castes and the Scheduled Tribes was limited to the total number and their distribution in various liveli-

hood classes. This was considered inadequate for planning ameliorative measures for the uplift of this section of population, for whom special safeguards have been provided in the Constitution. More detailed tabulation was, therefore, undertaken at present. In addition to the usual population figures of each such caste or tribe, there are Tables to show their classification by religion, age, marital status, education and the industrial category to which they belong.

58. *Classification by Educational Qualification*—Tables showing the industrial classification of workers and non-workers by their educational standard is a special feature of the present Census. In rural areas, the educational qualifications are shown in the following three categories, namely, (a) Literate (without educational standard), (b) Primary or Junior basic, and (c) Matriculation or Higher Secondary. In urban areas, more detailed classification is attempted so as to include technical diploma not equal to degree, non-technical diploma not equal to degree, university degree or post-graduate degree other than technical degree, technical degree or diploma equal to degree or post-graduate degree in Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and other similar subjects.

59. *Classification of non-workers*—The non-working population is classified according to eight kinds of activities under which they were enumerated. These activities are—

(i) a full-time student or child attending school who does no other work,

(ii) a person engaged in unpaid house duties (like housewife or other adult female) who does no other work nor help regularly even part-time in family cultivation, industry, trade or profession,

(iii) a dependent, including an infant or child not attending school or a person permanently disabled from work because of old age or illness,

(iv) a retired person, a rentier, a person living on agricultural or non-agricultural royalty, rent or dividend or any other person of inde-

pendent means for securing which he does not have to work,

(v) a beggar, a vagrant, or an independent woman without indication of source of income or a person of unspecified source of existence,

(vi) a convict in jail or an inmate of a penal, mental or charitable institution,

(vii) a person who has not been employed before but is seeking employment for the first time, and

(viii) a person employed before but now out of employment and seeking employment.

60. *Post-Enumeration Check*—It was considered necessary that the degree of error, if any, which the enumerated figures might contain, should be ascertained by conducting a special check soon after the enumeration was over. In order that such a check may yield reliable results, a verification staff was appointed which was completely different from the staff which conducted the enumeration work in any particular locality. The independent character of the check was maintained by taking precautions at various stages according to the instructions received from the Registrar General. The check had twofold objects, namely, to find out if any Census house altogether escaped the Enumerator's notice and to find out the percentage of error in the enumeration of population resulting from either omission or duplication in counting. The operation was organized in localities selected on random basis throughout the State in a fixed period, namely, the 21st and the 22nd of March 1961. The check was confined to 10 per cent of houses situated within 1 per cent of Blocks in rural areas and 5 per cent of houses situated in 5 per cent of Blocks in urban areas. Inaccessible areas were excluded because the check intended to be made in other areas would suffice for the general purpose of ascertaining the average extent of error. The final results, which indicated that the enumeration work contained only a negligible amount of error, are indicated below :

(i) *Rural areas*—On checking 22,157 houses, 20 houses only were found missing. Similarly
(221 Census—4)

59 persons were found missing out of a population of 111,194.

(ii) *Urban areas*—The number of houses missed is 21 out of 13,278, and the number of persons missed is 40 out of 57,506.

61. *Concluding Remarks*—A population Census is intended to present a broad picture of dimensions. One should not expect it to achieve results that can be better obtained by an intensive survey of a specific subject. A Census, in fact, may be fallible in many ways, in spite of great precautions taken in its organization and in the training of personnel. It does not allow indulgence in too great a refinement of concepts and definitions, because thousands of field-workers of varying talents and abilities dealing with a complicated questionnaire cannot always be expected to act in the prescribed manner. They may be taken to have given a satisfactory account of their work if they have acted with common-sense and within the broad frame. It is necessary to remember that in spite of honest effort on the part of these workers to secure uniform result of investigation, there are certain social, economic and regional factors which do their best to defy the correctness of the facts elicited and recorded. This is more particularly observable when the investigation is connected with property and local laws. Thus there are certain limits beyond which the efforts to secure correctness of details do not bear fruit.

62. But within these limitations, Census investigations succeed in building up a structure of useful data as nothing else succeeds to any comparable degree. This view is supported by the excellent results of the Post-enumeration Check, which revealed a degree of error of no considerable magnitude. It has confirmed the notion that the enumeration staff discharged the onerous responsibility entrusted to them in a praiseworthy manner and fully deserved the honour of winning Silver and Bronze Medals awarded by the Government of India and Sanads and Certificates awarded by the State Government.

(ii)—HOUSEHOLD SCHEDULE AND CENSUS POPULATION RECORD

CONFIDENTIAL

CENSUS OF INDIA, 1961

[To be filled up during Enumeration]

PART I—HOUSEHOLD SCHEDULE

Is this an institution ?

LOCATION CODE : _____

Full Name of Head of Household _____

S. C.
S. T.

A. Cultivation		Local name of right on land	Area in acres
1. Land under cultivation by Household (i) owned or held from Government			
(ii) held from private persons or Institutions for payment in money, kind or share			
(iii) Total of items (i) and (ii)			
2. Land given to private persons for cultivation for payment in money, kind or share			
B. Household Industry		Nature of Industry	Number of months in the year during which conducted
Household industry (not on the scale of a registered factory) conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas (a)			
(b)			
C. Workers at Cultivation or Household Industry		Members of family working	
Members including Head of family working and hired workers, if any, kept wholetime during current or last working season		Head	Other males
		Other females	Total
Hired workers			
1. Household Cultivation only			
2. Household Industry only			
3. Both in Household Cultivation and Household Industry			

Dated Signature of Supervisor _____

Dated Signature of Enumerator _____

Note—Part II—Census Population Record overleaf should be filled up during the first round of enumeration (10 February to 28 February) from the enumeration slips relating to the household and brought up-to-date with corrections, if any, after the second visit during check period 1 March to 3 March 1961.

ANNEXURE II

CALENDAR OF CENSUS OF 1961 FOR ORISSA

I. ORGANIZATIONAL ARRANGEMENTS

19-2-1960 to 29-2-1960	..	(i) Formation of Charges
		(ii) Allotment of Code numbers to Police Stations and Towns.
		(iii) Selection of Charge Officers
19-2-1960 to 18-3-1960	..	Preparation of Town Register and Village Register.
1-3-1960 to 18-3-1960	..	(i) Issue of appointment orders of Charge Officers.
		(ii) Checking of preparation of Town and Village Registers.
		(iii) Calling for recommendations for appointment of Supervisors and Enumerators.
19-3-1960 to 31-3-1960	..	(i) Formation of Circles and Blocks
		(ii) Preparation of sketch maps of Charges and Circles.
		(iii) Final selection of Supervisors and Enumerators.
1-4-1960 to 15-4-1960	..	(i) Issue of appointment letters to Supervisors and Enumerators.
		(ii) Preparation of Charge Register and Circle Register.

II. HOUSE-NUMBERING AND HOUSE-LISTING

16-4-1960 to 30-4-1960	..	(i) Training of Charge Officers, Supervisors and Enumerators in house-numbering and house-listing.
		(ii) Distribution of House List Forms and Abstracts.
		(iii) Payment of cost of house-numbering materials to Enumerators.
1-5-1960 to 7-5-1960	..	Preliminary house-numbering with chalk or <i>gerumati</i> .
8-5-1960 to 22-5-1960	..	(i) Final house-numbering and preparation of House Lists.
		(ii) Preparation of House List Abstracts

23-5-1960 to 31-5-1960	..	(i) Preparation of second copy of House Lists and House List Abstracts.
		(ii) Final check of House Lists and Abstracts by the supervising officers.
1-6-1960	..	Transmission of House Lists and Abstracts to Charge Officers.
2-6-1960 to 9-6-1960	..	Scrutiny of House Lists and Abstracts by Charge Officers.
10-6-1960 to 11-6-1960	..	Despatch of House Lists and Abstracts by Charge Officers to Subdivisional Census Officers.
12-6-1960 to 15-6-1960	..	Verification of House Lists and Abstracts by Subdivisional Census Officers and despatch to District Census Officer.
16-6-1960 to 30-6-1960	..	(i) Scrutiny and verification of the House Lists and Abstracts in the District Census Office.
		(ii) Despatch of one set to the Subdivisional Census Officer and second set to Superintendent of Census Operations, Orissa.

III. ENUMERATION

25-10-1960 to 14-11-1960	..	Training Officers to receive instructions in imparting training to Census personnel.
15-11-1960 to 15-1-1961	..	Training of Census personnel at the rate of one day per week for eight weeks.
15-1-1961 to 9-2-1961	..	Sample Census in selected areas
10-2-1961 to 28-2-1961	..	Final enumeration and preparation of Census Schedules.
Night between 28-2-1961 and 1-3-1961		Enumeration of Houseless population

IV. REVISIONAL ROUND

1-3-1961 to 4-3-1961	..	Enumerator to revisit every household for revisional work.
----------------------	----	--

V. TRANSMISSION OF POPULATION TOTAL

5-3-1961	..	Enumerator to hand over to the Supervisor the Pads of all Census Schedules and Enumerators' Final Abstract.
6-3-1961	..	Supervisor to hand over Circle Summary and Enumerators' Final Abstracts to Charge Officer.
7-3-1961	..	Despatch of Charge Summary with supporting papers by Charge Officers to Subdivisional Census Officer.

8-3-1961	..	Preparation of Subdivisional Summary by Sub-divisional Census Officer and despatch to District Census Officer.
9-3-1961	..	District Census Officer to prepare District Summary.
10-3-1961	..	District Summary to be reviewed by District Collector who will transmit District Population figures to Registrar General, India, Superintendent of Census Operations, Orissa, by express telegrams.

VI. COLLECTION OF ENUMERATION SCHEDULES AND OTHER PAPERS

11-3-1961	..	Supervisor to make over Circle Bundle of all Census Schedules, accounts of used and unused Pads and other Papers to Charge Officer.
16-3-1961	..	Charge Officer to despatch the bag of Census Schedules, accounts of used and unused Pads and Papers of the Charge to Subdivisional Census Officer.
Between third week of March and first week of April 1961.		Despatch of all Census Schedules and other Papers from the Subdivisional Census Office together with statements and accounts of used Pads and other Papers to the Zonal Tabulation Office.

VII. POST-ENUMERATION CHECK

8-3-1961 to 11-3-1961	..	Preparation of Censused House List by Supervisors.
12-3-1961	..	Despatch of Forms I and V by Supervisor to Subdivisional Census Officer.
16-3-1961	..	Forms II and VI to be supplied by Subdivisional Census Officer to Verification Officers.
22-3-1961	..	Verification Officers carry out verification work.
27-3-1961	..	Despatch of Forms II and VI by Verification Officer to Subdivisional Census Officer.
31-3-1961	..	Matching of House Lists and Reverification by Subdivisional Census Officer.
6-4-1961	..	Despatch of Summary of Results of Checks by Subdivisional Census Officer to District Census Officer.
13-4-1961	..	Despatch of District figures by District Census Officer in Forms IV and VIII to the Superintendent of Census Operations, Orissa.

TABLE A-I

AREA, HOUSES AND POPULATION

FLY-LEAF

TABLE A-I—AREA, HOUSES AND POPULATION

This Table is presented in two forms, namely, Union Table A-I and State Table A-I. In the Union Table A-I the figures relating to the State and each district of the State have been given, but in the State Table the figures go down to the level of taluks (wherever they exist) and police stations as well as cities and towns. Both the Tables furnish the area in sq. miles and in sq. kilometres, the density of population per sq. mile, the number of inhabited and uninhabited villages, as well as of towns, of occupied residential houses and lastly, the total population shown sexwise according to the Census of 1961. Figures have been shown for each territorial unit in three series, namely, Total, Rural and Urban.

2. In the Union Table, the area has been shown in two sets of figures, the first indicated by mark (a) being the figures supplied by the Surveyor General of India and the second indicated by mark (b) furnished by local authorities of the State Government. In the State Table the area figures of the second category, namely, those available from the local authorities only have been shown. Again, in respect of each unit, the area has been shown in sq. miles as well as in sq. kilometres. The Surveyor General's figures have been shown in round numbers as they are provisional and approximate as stated by the Director, Map Publication, Dehradun. The area figures in sq. miles have been shown up to one place of decimal except in respect of towns, etc. in which case the figures run to two places of decimal.

3. Density of population has been worked out on the area figures supplied by the local authorities of the State Government. Columns 5 to 7 show the number of villages, inhabited and uninhabited and also of towns. The definition of a village and a town is given below :

A village means a revenue village or a mauza other than that which is absorbed within the area of a town or a city. It may contain one or many groups of houses or hamlets, or on the other hand, contain no houses at all.

A town is a continuous group of houses inhabited by usually not less than 5,000 persons which having regard to the character of the population, the relative density of dwelling, the importance of the place as a centre of trade, administration and human associations, the Census authorities decide to treat it as a town for Census purposes. One important test with regard to the character of the population is that there must be considerable preponderance of inhabitants dependent on non-agricultural professions as means of livelihood.

4. In previous Censuses, it was the practice to give the number of occupied houses which included shops, factories and workshops, institutions, such as, schools, offices, grain-golas, reading rooms, etc. In the present Census, the figures are confined to occupied residential houses only. A house and an occupied residential house are defined as follows : —

A house means a 'Census House', that is to say, a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

An occupied residential house is a Census house which is partly or wholly used for purpose of residence at the time of Census enumeration.

Brief account of changes in the area of the State and of districts from 1901 to 1961

5. In 1901 Orissa was a Division of Bengal Presidency consisting of three coastal districts of Cuttack, Puri, Balasore and one inland district, Angul-cum-Khondmals. There were also 17 non-regulation tributary Mahals known as Orissa Feudatory States within the limits of Orissa. In 1905 the district of Sambalpur and 5 Feudatory States from the Central Provinces, namely, Patna, Kalahandi, Sonepur, Bamra and Rairakhol and two Feudatory States from Chhotnagpur, namely, Gangpur and Bonai were transferred to Orissa Division. Thus in the Census of 1911, Orissa Division had 5 districts and 24 Feudatory States. In 1912, Orissa and Bihar were separated from Bengal to constitute the separate Province of Bihar and Orissa which continued as such till 1936. On the 1st of April that year, Orissa assumed the status of a separate Province, and comprised six districts, namely, Cuttack, Puri, Balasore, Sambalpur, Ganjam and Koraput. The old district of Angul was split up administratively into two portions and the Collector of Cuttack became the Deputy Commissioner of Angul while the Collector of Ganjam became the Deputy Commissioner of Khondmals. The Province comprised an area of 32,198 sq. miles taken from three different Provinces, namely, (i) Orissa Division of the Province of Bihar and Orissa as it was constituted in the year 1912, (ii) a portion of Ganjam district of Madras Presidency constituted of the entire Ganjam Agency and the taluks of the Ganjam Plains excluding Chicacole, Ichhapur, Somepet and Tekkali. Another portion taken from the Madras Presidency was a considerable area from Vizagapatam Agency which was constituted into the district of Koraput and (iii) the Khariar zamindari and a portion of Padampur tract of the Central Provinces constituted into Nawapara subdivision.

6. No territorial changes in the constitution of the State or districts took place for over ten years. In the years 1948 and 1949, all the princely States of Orissa merged with the rest of Orissa. This administrative change was legalised on the 1st August 1949, when the 24 ex-States were formally merged with the Province under the States Merger (Governor's Provinces) Order, 1949, increasing the area of the State to what it is now. The ex-States which thus merged are Athgarh, Tigiria, Baramba, Narsingpur, Nilgiri, Nayagarh, Daspalla, Khandpara, Ranpur, Bamra, Rairakhol, Dhenkanal, Talcher, Pallahara, Athmallik, Hindol, Keonjhar, Baudh, Patna, Sonepur, Gangpur, Bonai, Kalahandi and Mayurbhanj.

7. The ex-States of Athgarh, Tigiria, Baramba and Narsingpur were joined with Cuttack district ; Nilgiri with Balasore district ; Nayagarh, Daspalla, Khandpara and Ranpur with Puri district ; and Bamra and Rairakhol with Sambalpur district. The Angul subdivision of Cuttack district was separated from that district. This subdivision and the Feudatory States of Dhenkanal, Talcher, Pallahara, Athmallik and Hindol were constituted into one district, namely, Dhenkanal. The Khondmals and Baliguda agency areas of Ganjam district were taken out and together with the ex-State of Baudh formed the district of Baudh-Khondmals. The Nawapara subdivision was separated from Sambalpur district and was put together with the ex-State of Kalahandi to form another district named Kalahandi. The two ex-States of Keonjhar and Mayurbhanj formed each a separate district with their names as such. The ex-States of Sonepur and Patna were formed into one district, namely, Bolangir, while the ex-States of Gangpur and Bonai together formed the present Sundargarh district. Thus 13 districts had been formed after the merger of the ex-princely States by the time 1951 Census was taken. No changes have taken place in the State or district boundary during the decade 1951—61.

8. The changes in the area of the State from 1901 to 1961 are shown in square miles in the statement below :

Year	Orissa proper	Orissa States	Total
1	2	3	4
1901	9,841	14,387	24,228
1911	13,743	28,046	41,789
1921	13,736	28,046	41,782
1931	13,706	28,046	41,752
1941	32,198	25,194	57,392
1951	60,136	..	60,136
1961	60,164	..	60,164

9. The areas of districts from decade to decade as obtained from local sources is shown in the statement below :

Serial No.	State/District	1941 Square Miles	1951 Square Miles	1961	
				Square Miles	Sq. Km.
1	2	3	4	5	6
	ORISSA	..	32,198	60,127	60,171.8
1	Kalahandi	..	*N. A.	5,057	5,057.0
2	Koraput	..	9,875	9,875	9,919.0
3	Sambalpur	..	5,419	6,765	6,764.6
4	Bolangir	..	*N.A.	3,412	3,411.6
5	Baudh-Khondmals	..	*N.A.	4,282	4,282.0
6	Ganjam	..	7,688	4,725	4,725.0
7	Sundargarh	..	*N.A.	3,788	3,788.0
8	Dhenkanal	..	*N.A.	4,226	4,226.0
9	Puri	..	2,451	4,043	4,043.3
10	Keonjhar	..	*N.A.	3,216	3,216.5
11	Cuttack	..	4,571	4,210	4,210.0
12	Mayurbhanj	..	*N.A.	4,021	4,021.8
13	Balasore	..	2,194	2,507	2,507.0

*(The area figures for seven districts which were not in existence in 1941 Census are not available).

Effect of States Reorganization in 1956

10. The Reorganization of States in 1956 has not affected the State of Orissa and no territorial changes took place in the State or district boundary.

Discrepancy between the figures of the Surveyor General and local Revenue authorities

11. The area of the State is 60,164 sq. miles according to the figures supplied by the Surveyor General, India, while the area as collected from the local authorities is 60,171.8 sq. miles. There is a difference of about 8 sq. miles which is difficult to reconcile as the Surveyor General does not keep a record of areas of administrative units below the district level. The areas of smaller administrative units as ascertained from the local authorities were worked out for each district to get the total area of the district and this figure differs from the figures of Surveyor General to a small extent in case of all the districts as given below. The different methods of survey employed by the Surveyor General and by the local authorities may account for divergence in these two sets of figures.

Statement

State/District	Area in square miles		
	As furnished by Surveyor General		As furnished by Local Authorities
1	2	3	
ORISSA	..	..	60,164
Kalahandi	..	..	5,099
Koraput	..	..	9,864
Sambalpur	..	..	6,763
Bolangir	..	..	3,439
Baudh-Khondmals	..	..	4,284
Ganjam	..	..	4,824
Sundargarh	..	..	3,751
Dhenkanal	..	..	4,177
Puri	..	..	3,999
Keonjhar	..	..	3,206
Cuttack	..	..	4,236
Mayurbhanj	..	..	4,022
Balasore	..	..	2,500

Full account of changes in the jurisdiction of the State, districts and lower administrative units

12. No territorial changes have taken place in the jurisdiction of the State or the districts consequent on the States Reorganization Scheme. A few administrative measures, such as, the abolition of the zamindari system resulting in the vesting of all the estates in the State Government, direct collection of land revenue by the introduction of Naib-Tahsildari system, problems arising out of the maintenance of law and order and lastly administrative expediency in certain cases, have necessitated changes in the jurisdiction of some of the subdivisions, taluks and police stations, which are noted below districtwise :

(i) *Kalahandi district*—The subdivisional boundaries of Sadar and Dharamgarh subdivisions were redrawn after transfer of the areas of Kashipur and Thuamul Rampur police stations and of Borda OP (a portion of Kegaon police station) from Dharamgarh subdivision to Sadar subdivision. A new police station named Jonk PS was created in Nawapara subdivision by taking out a portion of the Nawapara police station around the Khariar Road town due to its rising importance as a trade centre with the establishment of several rice-mills.

(ii) *Koraput district*—No changes were made in subdivisional boundaries. But the taluks were constituted or reorganized extensively. Koraput and Nandapur taluks in Koraput Sadar subdivision, Borigumma and Umarkot taluks in Nowrangapur subdivision and Bissamcuttack taluk in Rayagada subdivision, were newly constituted to deal with land revenue administration due to the vesting of Jeypore estate in the State Government. The formation of these new taluks necessitated changes in the jurisdiction of the old taluks, namely, Jeypore, Nowrangapur and Rayagada as indicated below :

Name of new Taluk	Present jurisdiction	Remarks
1	2	3
Koraput	.. Koraput PS Dasamantapur PS Lakshmipur PS Narayanapatna PS	.. New
Nandapur	.. Semiliguda PS Pottangi PS Nandapur PS Padwa PS Machkund PS	.. New
Borigumma	.. Kodinga PS Borigumma PS Kotpad PS Bhairavasingpur PS	.. Kodinga PS was formerly in Nowrangapur taluk. Other PSs were in Jeypore taluk.
Umarkot	.. Umarkot PS Dabugam PS Jorigam PS	.. These PSs were in Nowrangapur taluk
Bissamcuttack	.. Bissamcuttack PS Ambodala PS	.. These PSs were in Rayagada taluk

The present jurisdiction of the old taluks is given below :

Name of the old Taluk	Present jurisdiction	Remarks
1	2	3
Nowrangapur	.. Nowrangapur PS Tentulikhunti PS Pappadahandi PS	
Jeypore	.. Jeypore PS Boipariguda PS Kundra PS	
Malkangiri	.. Malkangiri PS Venkatapalam PS Mathili PS Motu PS	
Rayagada	.. Rayagada PS Kalyansingpur PS	
Gunupur	.. Gunupur PS Gudari PS Padmapur PS Puttasingi PS	

The construction of Machkund Hydro-Electric Project and the development of Machkund town led to the creation of a new police station, Machkund PS by separating the required portion from Padwa police station. As the area of Venkatapalam PS is too unwieldy, Motu police station was newly carved out of it. The Muniguda OP was abolished by merging it with Bissamcuttack PS. Chandrapur OP was merged with Gudari PS. Maidapur and Dheppiguda police stations of 1951 Census are reconstituted into two new police stations, namely, Pappadahandi and Padmapur respectively.

(iii) *Sambalpur district*—No changes in the boundary of subdivisions have taken place. A few police stations of Sadar subdivision underwent changes on account of the construction of the Hirakud Dam Project. A major portion of Mahadebpali, Mura and Rampella police stations was submerged in the Hirakud Reservoir. Rengali and Lakhanpur police stations were formed after reorganization of the police stations out of the remaining villages of submerged police stations. Hirakud and Burla police stations were created for dealing with security measures and law and order problems at the time of the construction of Hirakud Dam and they continue as such.

(iv) *Baudh-Khondmals district*—The district has changed its name from time to time. In different official records and at different times it has been named as Baudh district, Baudh-Khondmals district or Baudh-Phulbani district. The Subarnagiri police station has changed its name to Kotgarh police station since shifting of the headquarters from Subarnagiri to Kotgarh in Baliguda taluk in June 1952. Subarnagiri is now an outpost under Kotgarh PS. A new police station was created at Raikia in G. Udayagiri taluk out of a portion of G. Udayagiri police station for effective control of law and order. Dahia outpost under Manamunda police station in Baudh subdivision was abolished in 1956.

(v) *Ganjam district*—A new subdivision known as Parlakhemundi was created in Government notification No. 1424—XIII-33/56-R., dated the 24th August 1956 comprising the areas in Parlakhemundi taluk, R. Udayagiri taluk and Mohana ex-Agency excluding Jerrow Merikote and Gourgotha Muthas. Digapahandy and Chikiti taluks are newly formed in Berhampur subdivision in 1953, the former comprising portions of Nuagam, Hinjili and Pattapur PSs, and the latter comprising portions of Nuagam, Jarada and Berhampur taluk PSs. One hundred and forty-four villages of Nalaghat OP and 69 villages of Bamunigam police station are merged with Mohana police station.

(vi) *Sundargarh district*—In 1951 Birmiritapur PS had two outlying OPs, namely, Raiboga and Hatibari. These two OPs have already been separated from Birmiritapur PS and constituted into a police station named Raiboga, while Hatibari OP merged with Bisra PS. Rourkela town police station is created after the erection of the Steel Plant and construction of the township.

(vii) *Puri district*—Balianta and Balipatna police stations of Sadar subdivision together with the Bhubaneswar, Chandka and Jatni police stations of Khurda subdivision have been grouped together to form a new subdivision, namely, Bhubaneswar.

(viii) *Keonjhar district*—The headquarters of Kuanr police station was shifted to Kanjipani and it is now called as Kanjipani police station. The headquarters of Jhargan police station was shifted to Barbil and its name was changed into Barbil police station.

(ix) *Cuttack district*—Charbatia police station in Sadar subdivision has been renamed as Chowdwar police station.

(x) *Mayurbhanj district*—Similipal was one of the police stations in the district in 1951. It has been abolished and its area divided between six surrounding police stations, namely, Baripada, Bangriposi, Karanjia, Jashipur, Thakurmunda and Udala. In Bamanghaty subdivision there were four police stations. At present there are six. Rairangpur police station has been reconstituted into two, namely, Rairangpur and Badampahar police stations while Bahalda has similarly been divided into two, namely, Bahalda and Tiring police stations.

(xi) *Balasore district*—Two police stations have been formed in the Sadar subdivision, namely, Shergada and Raibania by taking out portions from Balasore sadar and Jaleswar police stations respectively. In Bhadrak subdivision, Bansada police station was created by taking out a portion of Chandbali police station for dealing with law and order problems effectively.

No changes of any kind have taken place in the districts of Bolangir and Dhenkanal.

Rural and Urban population

13. Urbanisation in Orissa is a slow process although it is now tending to proceed at a faster pace than before. Development of towns has resulted not so much from industrial or commercial activities but from political and religious necessities. In the past the establishment of headquarters of Rulers and Chiefs led to the development of populous localities which served as nucleus for ultimate growth into towns in many cases. Some towns like Puri and Bhubaneswar emerged from their religious importance. The tendency for urbanisation on account of industrial or commercial activities is noticeable only from the last decade.

Urban Areas—Towns and Cities

14. The definition of 'town' has been given in paragraph 3 above. As regards 'city', it ordinarily means a locality with a population of not less than one lakh. This definition as adopted in the present Census does not differ from that of the past. None of the urban areas of 1951 Census were declassified in 1961 according to the above definition. Twenty-three new towns in different districts have been included in the present Census. Their classwise break-up of population is given below:

Class II	.. 1 town	90,287
Class IV	.. 9 towns	124,605
Class V	.. 11 towns	79,814
Class VI	.. 2 towns	6,901
Total	.. 23 towns	301,607

Progress in the number of towns 1901-1961

State/District	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
ORISSA	62	39	29	21	20	18	14
Kalahandi	3	1	1	1	1	1	1
Koraput	7	5	2	1	1	..	..
Sambalpur	7	4	4	3	3	2	1
Bolangir	5	5	4	3	2	2	1
Baudh-Khondmals	1	1	1	..	..	..	..
Ganjam	10	6	6	4	4	4	2
Sundargarh	4	2	..	..	..	..	..
Dhenkanal	4	3	3	2	2	2	2
Puri	5	3	1	1	1	1	1
Keonjhar	2	1	1	..	..	..	..
Cuttack	7	5	3	3	3	3	3
Mayurbhanj	2	1	1	1	1	1	1
Balasore	5	2	2	2	2	2	2

Village

15. The term 'village' has been defined in paragraph 3 above. In settled areas, the Census village is a 'mauza', the boundaries of which have been demarcated in Survey and Settlement Operations. In unsurveyed areas the group of houses paying Government revenue as a unit has been taken into a Census village. The term 'village' is not confined to the site of normal residential unit but it extends to the entire area of a revenue village whether demarcated or not. 'Inhabited village' is a village which has human habitation whereas 'uninhabited village' means a village which contained no residential population on the Census day.

Number of inhabited villages from 1901 to 1961

State/District	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
ORISSA	45,466	48,398	45,387	48,092			
Kalahandi	2,902	2,939	2,885	2,245*			
Koraput	5,579	5,746	5,181	8,090**			
Sambalpur	3,393	3,426	3,358	3,300			
Bolangir	2,524	2,524	2,457	2,593			
Baudh-Khondmals	4,471	4,307	3,850	3,805			
Ganjam	3,773	4,513	3,928	4,138			
Sundargarh	1,588	1,631	1,638	1,485			
Dhenkanal	2,512	2,526	2,457	2,466			

* Except the figure of Nawapara subdivision which was under C. P.

** The figures for the portions of Parbatipur and Salur taluks which were included in Orissa are not included in the above figures as separate figures are not available.

Number of inhabited villages from 1901 to 1961—concl'd.

State/District	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
Puri	4,374	5,068	4,405	4,482			
Keonjhar	1,973	1,982	1,993	1,956			
Cuttack	5,883	6,248	5,842	6,054			
Mayurbhanj	3,671	3,655	3,677	3,708			
Balasore	3,823	3,833	3,716	3,770			

N.B.—As the figures for 1921, 1911 and 1901 are not available they have been omitted.

16. The above statement discloses a reduction in the number of inhabited villages by 1,932 during the last 10 years, namely, from 48,398 in 1951 to 46,466 in 1961. The decrease is considerable in six districts, namely, Kalahandi, Koraput, Sambalpur, Sundargarh, Puri and Cuttack, while the decrease in Bolangir, Dhenkanal, Keonjhar and Balasore is negligible. Some districts have gained in the number of inhabited villages, namely, Baudh-Khondmals and Mayurbhanj. The reduction in the number of villages is due to several factors. In the Census 1951, a number of inhabited hamlets seem to have been listed as full-fledged villages. This has been eliminated to a great extent in 1961. The decrease in Cuttack, Puri and Ganjam is mostly due to this reason. Secondly, a few small villages have been completely abandoned on account of the havoc from depredation of wild animals, particularly the man-eating tiger. On account of this reason Kalahandi has lost in the total number of inhabited villages. Koraput to some extent has suffered on account of the same, but an additional reason for decrease in this district is due to the execution of the Dandakaranya Project, giving incentive to inhabitants of small villages to move to areas with better economic prospects. In Sambalpur district complete evacuation of a large number of thickly inhabited villages came as a result of submersion by the Hirakud Dam, while in Rourkela a large number of villages were acquired by the Government for establishment of the Steel Factory. Thus a large number of villages have been deleted from the old list. Last and perhaps the most important reason is the conversion of 23 new localities from rural to urban areas. Each of these localities is constituted of a good many villages which no more find place in the list of villages of the year 1961.

Districtwise Statement of villages and towns in 1961

17. The following statement is self-explanatory:—

State/District	Total No. of mauzas borne on the jurisdiction lists	No. of uninhabited mauzas	No. of mauzas included in towns		No. of inhabited mauzas	No. of towns
			Fully	Partly

18. The average number of persons per occupied Census house varies between 4 and 6 persons in the rural as well as urban areas. As regards the growth and distribution of population during the last decade one noticeable feature is the increase in male births compared to female births, which has tended to reverse the sex distribution of the previous censuses. This new trend is more conspicuous in the urban areas than rural areas and is most marked in Sundargarh district. Growth of trade and commerce providing higher wages in urban areas, establishment of new industries and concentration of male workers in industrial urban areas like Rourkela have mainly contributed to the adverse sex-ratio. The general increase in the rate of male births might have affected the sex distribution of population in the rural areas of Koraput, Sundargarh, Keonjhar, Mayurbhanj and Balasore where the female population has gone down. All these districts excepting Balasore are predominantly Adibasi areas. This increasing masculine character of the population is likely to manifest itself to a great extent by the next Census if the trend is not unexpectedly disturbed.

19. The highest percentage of urban population is concentrated in the district of Sundargarh due to the sudden emergence of Rourkela and Rajgangpur industrial towns, while the percentage is lowest in Baudh-Khondmals district which is full of forests and hilly tracts. The density of population is highest in the district of Cuttack while it is lowest in the district of Baudh-Khondmals where it varies from 727 to 120 respectively.

Appendices

20. **Appendix I** traces the growth of the State to the present area since the last Census. Although no changes have taken place in the State or district boundaries, the jurisdiction of the subdivisions, taluks (wherever they exist) and some police stations have undergone change. This Appendix shows what 1951 territories constitute the present subdivisions, taluks or police stations.

As this Appendix gives information in respect of all the units up to the level of police station no brief note seems necessary.

21. **Appendix II**—The rural urban definition has not undergone any change. But some clarifications have been introduced in 1961. So there has been no declassification of any town of 1951 Census in 1961.

List A of the above Appendix includes two towns Gopalpur and Khallikote. The reasons for treating them as urban areas are given below :

Gopalpur—On sea—This town is a seaport and an important health resort with hotels under European management. The population is largely non-agriculturists. Hence it has been included in the list of towns of 1961.

Khallikote—This town is the headquarters of one of the big ex-zamindars of South Orissa, namely, Raja of Khallikote. There are many public institutions including a School of Arts and Crafts. The population is non-agriculturist to a large extent. It has, therefore, been included in the list of towns of 1961.

22. **Appendix III**—The names and number of institutions in each district or tahsil were not listed during the sorting stage. It is not, therefore, possible now to give a classified numerical list of such institutions. Definition and comment are given below :

A houseless person is one, who in the night of February 28, 1961, did not have his normal residence in any particular household. Sadhus, persons dwelling in boats, wandering tribes, pavement dwellers are included among this category of persons.

Institutional population means and includes the inhabitants of an institution, such as, hostel, boarding house, hotel, mess, hospital, police barrack or any penal, charitable or mental institution.

Comment—The number of institutions seem to have been correctly enumerated. There was some confusion, however, with regard to house used as hostels, hotels, hospitals, boarding houses, penal, charitable or mental institutions, clubs, town-halls, dakhungalows and village rest-sheds which were to be treated as institutions. Clear instructions were given in course of circulars.

With regard to the count of houseless population, a systematic vigil was maintained by the field-workers during the entire enumeration period. The enumeration was completed on the basis of such observation in the night of 28th February 1961. In spite of this, omissions are likely to have taken place. The extent of such omission may be nearly 10 per cent.

23. **All India Table A-I**—The Table A-I for India, all the States and Union Territories is given in the Annexure III at the end of this volume.

Abbreviations

24. The following abbreviations have been used:—

T	for	Total
R	for	Rural
U	for	Urban
PS	for	Police Station
OP	for	Out Post
M	for	Municipality
NAC	for	Notified Area Council

Foot Notes : (1) Under columns 3 (a) and 3 (b), (a) represents the area figures furnished by Surveyor General of India; (b) represents the area figures furnished by the local revenue authorities. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a district is obtained by subtracting from the State Survey area, the urban area.

(2) †The Sq. Kilometres and density figures of urban areas of District State are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Km. are further adjusted to make the District State totals tally.

(3) Population per square mile has been calculated on area figures supplied by local revenue authorities.

Foot Notes : (1) The Sq. Kilometres and density figures of urban areas of Police Station/Taluk/Subdivision/District/State are worked out using the area figures corrected up to 2 places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Km. are further adjusted to make the Police Station/Taluk/Subdivision/District/State totals tally.

(2) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(3) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

TABLE A-II

VARIATION IN POPULATION DURING 60 YEARS

FLY-LEAF

TABLE A-II—VARIATION IN POPULATION DURING 60 YEARS

This Table furnishes data on the variation of population for the seven Censuses from 1901 to 1961. Its importance lies in the fact that the growth of population from decade to decade as given here may be the basis of study of the rate of growth in the absence of reliable vital statistics or any other source of information. One of the main changes in this table since the last Census is that percentage variation is also given from decade to decade.

The Appendix to this Table gives the adjustments necessary to bring the 1951 Census population of the district to the territorial jurisdiction of the district as it was at the time of Census enumeration in 1961.

Although no territorial changes have taken place in the jurisdiction of the State or districts, 1961 Census shows an increase in the area of the State by 44·8 sq.miles compared with the area of 1951 Census. The difference is confined to two districts of Koraput and Mayurbhanj. In the former district there is an error of 44 sq.miles which was due to the computation of the area on rough estimate during 1951 Census. After the survey of the district during the last decade the actual area as reported by the local Survey Authorities is adopted. Similarly the difference of 0·8 sq.miles in Mayurbhanj district is detected at the time of apportioning of the area of Similipal hills, hitherto inaccessible, among the neighbouring police stations.

The urban area has doubled from 1951 to 1961, from 192 sq.miles to 397·43 sq.miles. This indicates a tendency of rapid urbanization.

No territorial changes have taken place in the district boundaries from 1951 to 1961 Census. Some internal changes within the jurisdiction of the police stations, taluks and subdivisions in the districts have been made as will be evident from the territorial changes discussed in the fly-leaf to Table A-I. As there are no changes in the population of the district of 1951 Census which are adjusted to the jurisdiction of 1961 Census, the Appendix to this table is nil. A skeleton form of it is reproduced at the end of the table.

The above table discloses that the rate of growth is highest during the last decade, namely, triple that of the decade preceding 1941—1951 and roughly double that of each of the decades 1921—31 and 1931—41. The percentage of increase in the urban population is more conspicuous than in the rural and it is the highest in the district of Sundargarh (+783.5) due to the emergence of two new industrial towns during the decade. The establishment of a Steel Mill at Rourkela and a Cement Factory at Rajgangpur have contributed to the sudden and spectacular rise in the urban population of this district. The increase in the percentage of urban population of Keonjhar district (+242) is due to the development of mining areas and consequent growth of a new town (Barbil), while the increase in Mayurbhanj district (+206) is due to the general prosperity and consequent growth of a new civil town, Rairangpur. There is also considerable increase in the urban population of Kalahandi, Sambalpur and Balasore districts on account of the formation of new towns. The rise in the percentage of Baudh-Khondmals, Ganjam, Dhenkanal and Cuttack cannot be regarded as abnormal considering the rate of general growth of population. However there is a decline in the percentage of urban growth in respect of Koraput, Bolangir and Puri districts compared with that of 1951 Census.

This table shows the number of females per 1,000 males by total, rural and urban. Statement of changes in the proportion of the sexes 1901—1961 (Females per 1,000 males)

Districts of Orissa may be divided broadly into five categories in consideration of the characteristics displayed by sex-ratio:

(i) *Progressive decline*—There is one district, namely, Bolangir, which exhibits a steadily declining sex-ratio from decade to decade during the last sixty years. The factors responsible for this unwelcome phenomenon require close study.

(ii) *Gradual rise in early period, gradual decline in later period*—A large number of 8 districts, namely, Sambalpur, Sundargarh, Dhenkanal, Puri, Keonjhar, Cuttack, Mayurbhanj and Balasore had rising female ratio during the early two or three decades from 1901, and declining ratio thereafter till the present decade. Consequences of gradual urbanization, industrialization and growth of education may be partly responsible. The State as a whole belongs to this category.

(221 Can.—2)

(iii) *Stable*—Sex-ratio in Baudh-Khondmals has behaved more or less in a stable manner. The fluctuations are small, varying between 1,012 and 1,022 during the last sixty years. Kalahandi may also be brought under this category, though the feature of stability is less marked here than in case of Baudh-Khondmals.

(iv) *Minority zone*—Koraput is notoriously poor in sex-ratio. The only decade when females exceeded males is 1931, when the surplus was 2 only in 1,000.

(v) *Surplus zone*—Ganjam has persisted in maintaining a high female ratio throughout the last 60 years. In 1921, females out-numbered males by 223 in 1,000. This is very high.

While the average sex distribution in the rural areas is much higher than the total ratio of the State, there is considerable decline in the urban ratio. Although the rural sex ratio in the districts of Balasore, Sundargarh, Koraput, Keonjhar and Mayurbhanj varies between 983 to 996, this variation is negligible compared to the fall in the urban ratio of Sundargarh (630), Cuttack (745), Keonjhar (780) and Puri (788). The growth and establishment of industrial towns in the districts of Sundargarh, Cuttack and Keonjhar where the male working population drawn from the neighbouring as well as distant rural areas is concentrated and the development of Bhubaneswar (State Capital) in the district of Puri have largely contributed for this adverse ratio.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

State/District	Year	Persons	Decade variation	Percentage decade variation	Males	Females

1	2	3	4	5	6	7	8	9

Nil

N. B.—As there are no changes in the population of the districts of 1951 Census which is adjusted to the jurisdiction of 1961 Census, this Appendix is nil.

TABLE A-III

VILLAGES CLASSIFIED BY POPULATION

FLY-LEAF

A-III—VILLAGES CLASSIFIED BY POPULATION

This table gives the number and population of villages in the various population groups, viz.—less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above. A little more than two-thirds of rural population live in villages having less than 1,000 population. The group of less than 500 of the last Census has been split up into two, namely, less than 200 and 200-499. The definition of the term 'village' has been given in the Fly-leaf to Table A-I.

Statement below shows the percentage of population living in villages of various population sizes with reference to the total rural population in each district according to the current Census.

State/District	Less than 200	200-499	500-999	1,000-1,999	2,000-4,999	5,000-9,999	10,000 +
1	2	3	4	5	6	7	8
ORISSA	..	12.18	29.48	30.30	20.24	7.25	0.55
Kalahandi	..	12.66	27.86	32.99	21.80	4.16	0.53
Koraput	..	22.72	32.67	26.65	14.29	3.67	..
Sambalpur	..	8.99	26.34	31.94	22.50	9.37	0.86
Bolangir	..	8.49	36.18	34.05	16.61	3.78	0.49
Baudh-Khondmals	..	50.62	33.72	10.41	3.55	1.70	..
Ganjam	..	8.49	18.62	27.32	27.23	16.99	1.35
Sundargarh	..	10.14	33.28	32.42	19.48	4.68	..
Dhenkanal	..	11.17	24.26	28.54	24.48	10.92	0.63
Puri	..	9.54	30.47	30.19	19.15	9.36	1.29
Keonjhar	..	11.71	37.45	32.89	13.26	4.69	..
Cuttack	..	6.55	25.11	33.80	27.73	6.44	0.37
Mayurbhanj	..	13.74	42.94	30.45	10.21	2.66	..
Balasore	..	12.84	31.57	30.50	18.42	6.27	0.40

The largest percentage of rural population is confined to small and medium sized villages. Villages with population size of less than 500 comprise 41.66 per cent of the rural population as against 51.7 per cent during 1951. The villages with a population of 500 to 2,000 each contain 50.54 per cent of the rural population as against 43.9 per cent during 1951. The percentage of population in the large sized villages containing more than 2,000 each, works out at 7.80 out of which 0.55 is concentrated in villages with population more than 5,000 each. The fall in the percentage of population of small villages and the rise in the percentage of the medium sized villages indicate the progress and the development of small sized villages into medium sized villages. Some of the medium sized villages have also developed into large sized villages during this decade.

Districts where larger percentage of population prefer to live in large and medium sized villages are Kalahandi, Sambalpur, Bolangir, Ganjam, Sundargarh, Dhenkanal, Puri, Cuttack and Balasore. In the remaining districts greater concentration of population is in the small sized villages.

Statement of percentage of villages and population by class of villages 1901, 1921, 1951, 1961

State/District		Less than 500		500-999		1,000-1,999		2,000-4,999		5,000-9,999

N.B.—The figures for 1901 and 1921 are not available. Columns 11 and 12 of the prescribed form are omitted as they are nil.

A comparative study of the above Table discloses that the percentage of the small sized villages and the population living in them have fallen from 84 per cent and 51.70 per cent respectively during 1951 to 77.80 per cent and 41.66 per cent respectively in 1961. There is a corresponding increase in the percentage of medium and large sized villages and the population living in them as evident from the columns 3 to 10 of the above Table of 1951 and 1961. In the previous Census (1951) large sized villages with more than 5,000 population were sparingly found only in two districts of Sambalpur and Puri, while in the present Census their number has increased. The decline in the percentage of small sized villages and the corresponding increase in the medium and large sized villages reflect the natural growth and development of the rural areas during a decade which must have been prosperous for the people as a whole.

TABLE A-IV

TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

FLY-LEAF

A-IV—TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

This Table gives the growth of each town since the Census of 1901. The area of the town at the 1961 Census both in square miles and square kilometres is also given. The definition of the term 'Town' has been given in the Fly-leaf to Table A-1.

2. For the purpose of this Table, towns are divided into six classes according to population as follows:

- Class I .. 100,000 and over
- Class II .. 50,000 to 99,999
- Class III .. 20,000 to 49,999
- Class IV .. 10,000 to 19,999
- Class V .. 5,000 to 9,999
- Class VI .. Less than 5,000

3. As there is no town-group in the State, the definition is not furnished.

4. Statement of changes in classification of towns 1901 to 1961

Towns	1961	1951	1941	1931	1921	1911	1901
Cuttack	I	I	II	II	II	II	II
Rourkela	II	..	..	..	..	..	..

5. Statement of number of towns of each class during 1901 to 1961

	1961	1951	1941	1931	1921	1911	1901
Class I	1	1	..	..	..	..	..
Class II	3	1	1	1	1	1	1
Class III	8	5	3	3	2	3	3
Class IV	22	8	8	6	6	5	5
Class V	25	23	16	10	9	6	4
Class VI	3	1	1	1	2	3	1

6. Statement of percentage of towns in each class to total number of towns and percentage of population in each class to total urban population 1901 to 1961.

Class of town	1961		1951		1941		1931		1921		1911		1901	
	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Class I	1.61	13.19	2.57	17.26	..	..	..	..	..	..	..	..	..	..
Class II	4.84	20.55	2.56	10.49	3.45	18.01	4.76	20.57	5.00	18.12	5.55	19.09	7.14	20.17
Class III	12.90	20.27	12.82	23.24	10.34	25.60	14.29	30.07	10.00	25.37	16.67	33.62	21.43	37.67
Class IV	35.49	27.99	20.51	18.15	27.59	27.53	28.57	26.78	30.00	33.09	27.78	28.09	35.72	29.87
Class V	40.32	17.13	58.93	30.03	55.17	27.93	47.62	21.53	45.00	20.54	33.33	14.21	28.57	10.56
Class VI	4.84	0.87	2.56	0.83	3.45	0.93	4.76	1.05	10.00	2.88	16.67	4.99	7.14	1.73

7. Statement of percentage of towns in each class to total urban area of the State and density of population per urban square mile in each class 1901-1961.

Class of town	1961		1951		1941		1931		1921		1911		1901	
	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Class I	5.79	6,361	10.02	4,457	..	..	..	..	..	..	..	..	..	..
Class II	13.06	4,394	3.74	7,249	14.71	3,230	18.64	2,838	19.59	2,218	23.37	2,284	26.72	2,233
Class III	17.89	3,164	13.80	4,355	10.56	6,402	13.37	5,781	12.86	4,730	22.26	4,224	25.45	4,381
Class IV	36.64	2,133	26.33	1,783	33.97	2,139	34.04	2,023	29.30	2,708	28.05	2,800	32.07	2,757
Class V	25.71	1,860	45.33	1,714	40.03	1,841	33.03	1,676	35.57	1,385	17.95	2,215	9.83	3,179
Class VI	0.91	2,667	0.78	2,753	0.73	3,355	0.92	2,918	2.68	2,576	8.37	1,666	5.93	863

N.B.—The area figure of Binka town was not available. So the area of Binka village in 1961 Census is taken as the area of the town in 1941, 1931, 1921 and 1911 for calculation of the percentage of the area as well as density.

The area of the towns for the Censuses from 1901 to 1941 are not available. Therefore the area of 1961 Census is taken for all the previous decades in calculating the percentage of the area and density. As these figures do not reflect the correct percentage and density, they may be treated as approximate.

8. The appendix to this table shows the area and population of new towns added in 1961. None of the towns of 1951 Census have been declassified during 1961 Census. What would have been the population in 1951, if the places treated as new towns in 1961 Census had been treated as towns in 1951 Census also, is calculated and given below:

Name of town	Population in 1951		Name of town	Population in 1951	
1	2		1	2	
1. Rourkela	..	15,562	B. F.	104,918	
2. Brajarajnagar	..	9,123	13. Koraput	..	4,791
3. Burla	..	4,319	14. Kotpad	..	6,853
4. Rajgangpur	..	8,942	15. Hirakud	..	6,559
5. Angul	..	12,237	16. Hinjili	..	5,839
6. Khurda	..	9,988	17. Bellaguntha	..	5,138
7. Barbil	..	9,467	18. Nayagarh	..	4,911
8. Chowdwar	..	5,957	19. Jajpur Road	..	3,559
9. Soro	..	10,582	20. Rairangpur	..	5,746
10. Jaleswar	..	6,204	21. Chandbali	..	6,475
11. Khariar	..	6,562	22. Gopalpur	..	2,739
12. Khariar Road	..	5,975	23. Khallikote	..	3,506
	C. O.	104,918	Total	..	161,034
Urban population of 1951					
				..	594,070
Population of above mentioned 23 places in 1951				..	161,034
Total urban population in 1951 in case the above 23 places were then treated as towns.				..	755,104

9. The following abbreviations have been used:

M for Municipality
NAC for Notified Area Council

TABLE A-IV—TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

PRIMARY CENSUS ABSTRACT

FLY-LEAF
PRIMARY CENSUS ABSTRACT

The Union Primary Census Abstract gives figures relating to the State, districts and lower administrative Units up to the Police Stations and Towns. The Abstract shows the area in square miles, number of occupied residential houses and households, total number of persons enumerated including inmates of Institutions and houseless persons, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and total number of workers classified into the following nine industrial categories:—

Category	Classification of worker
I	As Cultivator,
II	As Agricultural labourer,
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities,
IV	At Household Industry,
V	In Manufacturing other than Household Industry,
VI	In Construction,
VII	In Trade and Commerce,
VIII	In Transport, Storage and Communications, and
IX	In Other Services.

Lastly, the Abstract gives the total number of Non-workers. Population figures in all columns are given sexwise.

2. Terms appearing in the column headings of the Abstract are defined as follows:

(i) House—A house means a ‘Census House’, that is to say, a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

(ii) Occupied Residential House—An occupied residential house is a Census house which is partly or wholly used for purpose of residence at the time of Census enumeration.

(iii) Household—A household means the entire group of persons who commonly live together and take their meals from a common mess unless the exigencies of work prevented any of them from doing so.

3. Statement showing percentage of households to number of houses in Rural and Urban areas of each district:

State/District	Total	Rural	Urban
ORISSA ..	107.92	108.02	106.60
1. Kalahandi ..	105.33	105.22	108.83
2. Koraput ..	101.17	101.13	101.91
3. Sambalpur ..	115.62	115.75	114.15
4. Bolangir ..	115.58	115.29	121.70
5. Baudh-Khondmals ..	108.44	108.41	110.87
6. Ganjam ..	106.93	107.41	101.70
7. Sundargarh ..	105.71	105.99	104.77
8. Dhenkanal ..	109.66	109.42	114.70
9. Puri ..	118.55	119.65	106.42
10. Keonjhar ..	103.85	103.86	103.74
11. Cuttack ..	105.27	105.18	106.58
12. Mayurbhanj ..	104.75	104.86	100.52
13. Balasore ..	103.14	103.06	104.28

The percentage of households to houses is highest in Puri district, where there are 119 households for 100 houses. As far as individual Police Stations are concerned, the highest figures are noticeable in Gania Police Station of Puri district, Betnoti Police Station of Mayurbhanj district, Ambabhona Police Station of Sambalpur district and Ghantapada Police Station of Baudh-Khondmals district, the respective figures being 167, 166, 140 and 135.

4. Statement showing density of households per square mile in Rural and Urban areas district by district:

State/District	Total	Rural	Urban
ORISSA	59.49	56.00	584.66
1. Kalahandi	40.74	39.67	329.68
2. Koraput	33.30	31.70	542.41
3. Sambalpur	51.17	47.56	622.29
4. Bolangir	65.37	62.69	443.13
5. Baudh-Khondmals	27.92	27.62	462.33
6. Ganjam	86.03	79.55	1,389.36
7. Sundargarh	40.49	32.02	492.25
8. Dhenkanal	46.39	44.35	568.14
9. Puri	90.09	84.37	579.74
10. Keonjhar	43.39	41.43	337.56
11. Cuttack	140.57	133.06	824.40
12. Mayurbhanj	57.21	56.00	622.11
13. Balasore	108.88	103.85	376.51

The table shows that concentration of households in rural as well as urban areas is high in the coastal districts of Cuttack, Balasore, Puri and Ganjam compared to the low density in the districts of Baudh-Khondmals, Koraput, Kalahandi and Sundargarh which are predominantly tribal areas. The density in the rural areas varies between 285 households per square mile in Gobindpur Police Station in Cuttack district and 6 per square mile in Venkatapalam Police Station in Koraput district. The concentration of households in the towns of Puri (1,805 per square mile) and Berhampur (1,790 per square mile) is very high compared to Cuttack City (1,079 per square mile). The two well-planned towns, Rourkela and Bhubaneswar have low density of 653 and 433 per square mile respectively. The density of urban areas is highest in the district of Ganjam due to the emergence of new towns whose area is only approximate pending fixation of the boundaries on a definite basis. The towns with less than 250 households per square mile are: Khariar, Jaleswar, Patnagarh, Deogarh, Talcher, Nayagarh, Soro and Chandbali.

5. Scheduled Caste and Scheduled Tribe—A person is said to belong to a Scheduled Caste, if he belongs to any one of the Castes specified in the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1956. A person is said to belong to a Scheduled Tribe, if he belongs to any one of the Tribes specified in the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1956.

6. Literate and Educated Persons—A person is said to be literate if he can read and write a simple letter. An educated person is one who has passed a written examination of a recognised educational standard.

7. Worker—A worker is one who is engaged in economic activity of the following nine categories. "Work" includes not only actual work but also effective supervision and direction of work. The nine categories of economic activities mentioned above comprise persons who are engaged:—(I) as Cultivator, (II) as Agricultural Labourer, (III) in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities, (IV) at Household Industries, (V) in Manufacturing other than Household Industries, (VI) in Construction, (VII) in Trade and Commerce, (VIII) in Transport, Storage and Communications, (IX) in Other Services.

I. Cultivator—A cultivator is a person who is engaged either as employer, single worker or family workwer in (a) cultivation of land, or supervision or direction of cultivation of land owned by himself or by a member of his household or held from Government; (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

II. Agricultural Labourer—An agricultural labourer is a person who works in another person's land in lieu of wages in cash, kind or share without exercising any right of supervision or direction in matters connected with cultivation.

III. In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities—This category is not defined as it is self-explanatory.

IV. Household Industry—A household industry is an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. It should relate to production, processing, servicing, repairing and making and selling of goods. It does not include professions, such as, pleader or doctor or barber or washerman or astrologer.

- V. Manufacturing other than Household Industry,
- VI. In Construction,
- VII. In Trade and Commerce,
- VIII. In Transport, Storage and Communications and
- IX. In Other Services.

These categories of workers are not defined separately as they are self-explanatory.

8. Non-worker—A person is said to be not working if he or she does not come under any of the categories of "Worker" mentioned above. A person who has been offered work but has not actually joined it is treated as a non-worker. The activities of non-workers have been classified into the following eight categories:

- (i) a full-time student or child attending school who does no other work,
- (ii) a person engaged in unpaid house duties (like housewife or other adult female) who does no other work nor help regularly even part-time in family cultivation, industry, trade or profession,
- (iii) a dependent, including an infant or child not attending school or a person permanently disabled from work because of old age or illness,
- (iv) a retired person, a rentier, a person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work,
- (v) a beggar, a vagrant, or an independent woman without indication of source of income or a person of unspecified source of existence,
- (vi) a convict in jail or an inmate of a penal, mental or charitable institution,
- (vii) a person who has not been employed before but is seeking employment for the first time, and
- (viii) a person employed before but now out of employment and seeking employment.

The proportion of total workers to non-workers in the coastal districts of Cuttack, Puri and Balasore is far below the State average. The large number of economically inactive female population is responsible for the adverse distribution in these three districts. In Dhenkanal district, the distribution of total workers is slightly less than the State average but the participation of female workers is much better than the coastal districts. The proportion of total workers is much higher than the State average and exceeds 50 per cent in the districts of Baudh-Khondmals (564), Sambalpur (523), Keonjhar (518) and Sundargarh (505). In the remaining five districts, it is above the State average. The participation of large number of female workers in these districts not only accounts for the favourable distribution but indicates their awareness to overcome the social barriers and work on common footing with their male partners for economic advancement.

The sex ratio of workers to non-workers is largely dependent on the general sex distribution of population. While there is marked decline in the overall sex ratio, it is conspicuously low in the urban areas which explains the proportionate reduction of urban female workers. The sex ratio is highest in the rural areas of Ganjam, Baudh-Khondmals, Mayurbhanj, Koraput, Sambalpur and Sundargarh while it is above the State average in the districts of Keonjhar, Bolangir, and Kalahandi. In the remaining districts the ratio of female workers is low which may be attributed to the social restrictions forbidding the females to work outside their homes.

15. Abbreviations—The following abbreviations have been used:

T	for	Total
R	for	Rural
U	for	Urban
M	for	Municipality
NAC	for	Notified Area Council

* Surveyor General's figures. State Survey figures not available.

** These figures relate to area where All-India Schedule was canvassed (i.e. for 38,705 population)

The figures for N. E. F. A. are provisional.

Note—(1) Under column 3, (a) represents the area figures furnished by Surveyor General of India, (b) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for State is obtained by subtracting the urban area from the State Survey Area.

(2) The Density figures of urban areas of State/Zone/India are worked out using the area figures corrected up to 2 places of decimal obtained by adding the areas of individual towns in the respective units. For total and rural the density figures are worked out on area figures corrected up to 1 place of decimal.

(3) Population per square mile has been calculated on area figures supplied by State Survey Department, except in the case of Jammu & Kashmir, Andaman & Nicobar Islands and N. E. F. A. for 'total' and 'rural' where these have been calculated on the figures supplied by Surveyor General of India.

(4) Area figures of some suburban units and Port Areas included as urban in Gujrat are not separately available. Population of these units is ignored for working out urban density. Rural density is based on the rural population only but the area figures also include the area of the urban units of which separate area is not available. The same procedure has been followed in the case of eight towns of Goa, Daman & Diu for which area is not available.

ANNEXURE IV

**INSTRUCTIONS FOR CENSUS PERSONNEL
TO FILL UP CENSUS SCHEDULES**

ANNEXURE IV

INSTRUCTIONS FOR CENSUS PERSONNEL TO FILL UP CENSUS SCHEDULES

A—FILLING UP ENUMERATION SLIP

An Enumeration Slip is a small printed form, meant for recording information on 25 specified points with regard to one particular person. Such person may be a man or a woman, a freshly born infant or a very old person. For every such person living in your allotted area, one slip is to be filled up. In this manner a large number of slips will have to be filled up, the number of slips being equal to the number of persons living within your specified area. Such slips will be supplied to you in several pads. Some of the pads contain 100 slips each, and some 25 slips each.

Who should be enumerated

2. Enumerate all persons who are normally residents in the household, i. e., those who live in the household and also those who have recently become members of the household through marriage or birth or other vital social or domestic ties and are present at the time of your visit.

3. Enumerate also all persons who are normal residents in the household even if they are absent at the time of your visit, provided they left the household on or after the 10th February, 1961 or if they had left earlier than 10th February, 1961, but are likely to return before the sunrise of 1st March, 1961.

4. Enumerate a visitor, a boarder, or a guest found in the household at the time of your visit, if he had not been enumerated before and if he will be away from his household between the 10th and the 28th February, 1961 and warn him not to permit any other enumerator to enumerate him even if he goes back by 1st March, 1961.

5. Make repeated enquiries about newborn babies and very young children, for they are liable to be missed because they neither talk nor walk and no meals are usually cooked for them.

6. Do not enumerate pavement dwellers or others who do not form part of the household, when you are enumerating the household. These along with persons who do not normally reside in houses, i. e., members of wandering tribes, tramps, sadhus, etc., would be separately enumerated in the night of the 28th February, 1961.

How to fill up slips

7. Each individual has to be enumerated in one slip. Before commencing enumeration of an individual make sure to fill the Location Code in each case. The Location Code in the slips will be the same as in the Household Schedule to which the individuals relate.

8. The questions have been briefly printed in the slips, but only briefly, and you should study the detailed question forms and instructions for answering them without which you will be liable to miss some of the range and implications of the questions. You should ask the questions in the order in which they are given in the slips and proceed to record the answers in their given order. You should make use of the abbreviations recommended

in these instructions for recording the answers to the various questions. All abbreviations required to be entered within the geometric designs should be written well within the designs.

9. Under the Census Act, every person is legally bound to furnish you with the information you need for recording your answers. You must not ask information on any matters not necessary for the purposes of the Census, for example, the amount of any person's income. Nor must you disclose to any unauthorised person any information given to you or the results of the enumeration. All Census entries are confidential and cannot be admitted as evidence in any civil proceeding whatever or in any criminal proceeding other than a prosecution for a Census offence.

Action to be taken after filling up slips

10. *Census Population Record*—Before leaving one household for the next make doubly sure that all the persons that are to be enumerated in the household have been enumerated. As soon as you have completed the enumeration of the household fill up the Population Record at the back of the Household Schedule for that household before you proceed to the next household. Strike the total for the number of males and females in the household and check it with the number of Enumeration Slips used before you sign the Population Record. In this connection see Part C.

11. *Enumerator's Abstract*—As soon as you have completed a pad, you should fill up the Enumerator's Abstract on the cover of the pad. After you have completed the enumeration of your block and filled up all the Abstracts in the pads, you should total up your figures and prepare your Abstract for your entire block and hand it over to your Supervisor along with your pads.

Revisional Round

12. You should revisit every household in your block during the period of final check (1st to 4th March) when you should enumerate every birth that has taken place in the household since your visit but before sunrise of 1st March. You should cancel the slip for any death that might have taken place since your last visit but before sunrise of 1st March by drawing a bold line diagonally across the slip and write DEATH along the diagonal line. You should enumerate any visitor who may have arrived to stay since your last visit and who says he has not been enumerated anywhere else. But you should not take notice of any birth or death or visit occurring after sunrise of 1st March, 1961. After your revisit if you have added any new slip or cancelled any slip already prepared you should make corresponding changes in the Census Population Record at the back of the Household Schedule and also in the Enumerator's Abstract on the cover of the pad.

Questions and Answers

13. When you come to a particular household for preparing Enumeration Slip, you should first meet the Head of the household, or in his absence, the senior and responsible member of the

household and introduce yourself. You should be courteous and should explain the object of your visit, and show a blank enumeration pad saying that you are going to fill up the slips in respect of everybody, man or woman, rich or poor, living in your block. Also impress on him that whatever information he will give, will be kept strictly confidential, and no private person or no other Government department will be allowed to see the slips.

14. After introducing yourself and speaking about the object of your visit, you should proceed to fill up one slip, first in respect of the Head of the household. Thereafter take other members of the household one by one in the most convenient manner, and see that not one person in the household is left out. Please make repeated enquiries about infants and small children, for they are liable to be left out of count. The order in which you should count the members of the household is given below :—

First, (i) Head of the Household

Then (ii) Near relatives, such as the wife of the Head of the household, son, son's wife, daughter, daughter's husband, grand children and others.

(iii) Distant relatives, such as uncle, aunt, mother-in-law and others.

(iv) Domestic servants and other employees living in the household.

Lastly, (v) Visitors, boarders, etc., who may not have been enumerated elsewhere.

Location Code

15. Write the Location Code of the household in each slip relating to that particular household.

Question No. 1 (a)—Name

16. Write the name of the person whom you are going to enumerate. If a woman's name is not given out, write "So and so's mother, or wife", etc. If a woman does not give out the name of somebody's husband, write, "So and so's husband". For newly born infants who have not yet been given any name write "Baby of so and so".

Q. 1 (b)—Relationship to the Head of the household

17. In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the Household' has been fully explained in para 5 of part B. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor,' 'boarder,' or 'employee' as the case may be.

18. If on the check or revisional round between the 1st and 4th March the Head of the household as recorded previously is found to have died, the person in household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

19. In the case of places like messes, boarding houses, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household. Other members should be recorded as 'Unrelated' in this question.

Q. 2—Age in completed years last birthday

20. Write age in years completed last birthday. For infants below one year of age, write '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events, etc.

Q. 3—Marital Status

For Never married	write	NM
Married	write	M
Widowed	write	W
Separated or Divorced	write	S

21. For a person who has never been married write 'NM'. For a person married, whether for the first or another time, write 'M'. Write 'M' also for persons who are recognized by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4 (a)—Birthplace

22. The following abbreviations should be used:—

1. If born in village or town in which enumerated	write	PL
2. If born in another village or town of district in which enumerated	write	D
3. If born in another district in the State of enumeration	write name of district.	
4. If born in another State in India	write name of district and State if name of district is known, otherwise write name of State.	
5. If born in a country outside India, e.g., Pakistan or any other country	write name of country	
6. Persons born at sea or in air or in railway carriages or on road transport, e.g., buses etc., should be entered as such.		

Q. 4 (b)—Whether born in Village or Town

23. Use the following abbreviations:—

1. If born in a village	write	R
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth	write	U

Q. 4(c)—Duration of Residence

24. Use the following abbreviations:—

1. For a person born in another village or town or city in which enumerated	write	X
2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration	write the number of completed years this person has been in the village/town of enumeration. (Do not take into account periods of temporary absence on leave or holiday or tour or business.)	
3. If the duration of residence is less than one year	write	O
4. If the duration of residence is one year or over	write the actual number of completed years of residence.	

Q. 5(a)—Nationality

25. Use the following abbreviations:—

1. For Indian nationals	write	I
2. For other nationals	write the nationality in full	

Q. 5(b)—Religion

26. Use the following abbreviations:—

For Hindu	write	H
Muslim	write	M
Christian	write	C
Jain	write	J
Buddhist	write	B
Sikh	write	S
For others write the answers actually returned		

Q. 5(c)—Scheduled Castes and Scheduled Tribes

27. If the person does not belong to any Scheduled Caste or Scheduled Tribe, write 'X' in this column. If the person gives out that he is a member of a particular Caste which is a Scheduled Caste, find out the name of the Caste in the list of Scheduled Castes. If the name of the Caste as given by him tallies with or is locally considered to be equivalent to the name of the Caste, then the name of the Caste as it appears in the list should be recorded in this column and then the letters (S.C.) should be written after the name of the Caste.

28. Similarly if the person claims to be a member of the Scheduled Tribe, verify the name of the Tribe from the list and then note down the name of the Tribe in this column and write (S.T.) after the name of the Tribe. The name of the Caste or Tribe which does not appear in the approved list, or which is not considered locally as equivalent to one of the approved names of the Castes or Tribes, should not be entered in this column.

29. Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the Caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

(221 Cen.—53)

30. Scheduled Castes can belong only to the Hindu or Sikh religion. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6—Literacy and Education

31. Use the following abbreviations:—

For a person		
1. Who can neither read nor write or can merely read but cannot write in any language	write	O
2. Who can both read and write	write	L

32. The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write. If the person can both read and write and has also passed a written examination as proof of an educational standard attained, write the highest examination passed instead of L.

Q. 7(a)—Mother-Tongue

33. Write the mother-tongue in full including dialect as returned by the person enumerated. Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

34. If the mother-tongue is a non-Indian language, the correct name of the language (such as English, German, Burmese, etc.) as given by the person should be recorded. If the mother-tongue is an Indian language, attempt should be made to record the name under one of the 14 languages laid down in the Constitution of India, a list of which is given below. If the person's mother-tongue is Oriya, the word "Oriya" should be recorded, as it is one of the 14 recognized languages. If the mother-tongue is given as "Lariha," it will be seen that this is not a recognized language, but on enquiry it will appear that Lariha is a dialect of Oriya. So the name of the language should both be recorded, such as, "Lariha (Oriya)". If he gives out a tribal language, such as Kui, the words "Kui (Tribal)" should be recorded. If he says that his mother-tongue is Marwari, you should see in the list that Marwari is not a principal language. So you should ask him, or otherwise ascertain under which principal language the Marwari language should be classified. If you are satisfied that the Marwari language spoken by him is a branch of Hindi, you should write "Marwari (Hindi)". Otherwise simply write "Marwari". Do not write any language as Hindustani which is vague, and which is not included in the recognized list. The list contains such names as Hindi, Urdu, etc., and you should write Hindi or Urdu as the case may be.

List of Indian Languages (Under Constitution of India—Eighth Schedule)

1. Assamese	8. Marathi
2. Bengali	9. Oriya
3. Gujarati	10. Punjabi
4. Hindi	11. Sanskrit
5. Kanada	12. Tamil
6. Kashmiri	13. Telugu
7. Malayalam	14. Urdu

Q. 7(b)—Any other Language (s)

35. After recording the mother-tongue, enquire whether the person knows any other language (s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

36. The number of languages recorded against this question should not be more than two. These languages should be other than his mother-tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Q. 8 to 11—Working Persons

37. These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

38. Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail, he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution, he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded, but 'I' should be recorded in Q. 12 below.

39. The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working.

40. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

41. Persons like beggars, pensioners, or receivers of agricultural or non-agricultural royalty, rent or dividend who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

42. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

Q. 8—Working as Cultivator

43. For a person working as Cultivator, write 'C'. For a person not working as Cultivator and for a person not working at all put 'X'.

44. For purposes of the Census, a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

45. Cultivation involves ploughing, sowing and harvesting and does not include fruit-growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

46. A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as Cultivator. Similarly, a person working on another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9—Working as Agricultural Labourer

47. Write AL for a person working as Agricultural Labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put 'X'. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Q. 10(a) & 10(b)—Household Industry

48. If a person is working in a Household Industry write the nature of work done by him in the Household Industry against question 10(a) and also the nature of the Household Industry against question 10(b). Otherwise put 'X' in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

49. A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or washerman or astrologer.

50. A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10 (c)—If Employee In Household Industry

51. This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write 'EE'. For all others put 'X'.

52. The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons working at Household Industry:—

Q. 10—Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1. Spinning yarn	Spinning yarn in Ambar Charkha.	X
2. Dyeing yarn	Handloom weaving	X
3. Threshing and cleaning grain	Flour making <i>chakki</i>	X
4. Labourer employed for crushing oil.	Oil ghani	EE
5. Tempering and polishing implements.	Blacksmithy making agricultural implements.	X
6. Labourer employed for making and firing kiln.	Earthenware pottery	EE
7. Throwing and turning pottery	Earthenware pottery	X
8. Making wooden doors and windows.	Carpentry	X
9. Filling gold ornaments with lac	Goldsmithy	X
10. Labourer working hosiery machine.	Hosiery	EE
11. Keeping accounts	Hosiery	X
12. Polishing and scraping metal	Electroplating	X
13. Labourer employed for putting iron hoop on cart-wheels.	Cart-wheelwright	EE
14. Repairing of guns	Gunsmithy	X
15. Beekeeping	Production of honey	X
16. Tending cattle	Livestock raising	X

Q. 11—Doing Work other than 8, 9 or 10

53. If a worker is not working as a Cultivator or as an Agricultural Labourer or at any Household Industry, write the actual work he is doing. If a person is working as a Cultivator or as an Agricultural Labourer or at Household Industry and also does some other work which does not relate to any of the three questions 8, 9 or 10, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above, write here the work on which he devotes more time. In the case of persons not working at all or who work only as Cultivator or as Agricultural Labourer or at Household Industry, put 'X'.

Q. 11 (a)—Nature of Work

54. Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous Censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the Individual Slips, you will be required to make a further visit for that purpose.

Q. 11 (b)—Nature of Industry, Profession, Trade or Service

55. In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, profession, trade or service in which the person works. In the case of a person for whom an 'X' is put in Question 11(a), put an 'X' in this question also.

56. As in the case of Question 11(a), you should describe in detail the nature of industry, profession, trade or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced, the chief article produced or serviced or repaired should be given. In the case of trade the principal article of trade should be described. In the case of service or profession, describe the nature of the service or profession to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English. The following are too vague and must not be used by themselves:

Scientist, technician, civil servant, clerk, engineer, inspector checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

57. In the following cases instructions have been given how to describe fully the nature of industry, profession, trade or service. Accordingly question 11(a) and 11(b) should be filled up:—

(i) Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In

the case of married or grown up women who do any of the work mentioned above in addition to the usual household duties, such work should be fully described and HW written in brackets after the full description.

(ii) Domestic services—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. In the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hostel, restaurant, etc., should be added.

(iii) If a person makes the articles he sells, he should be entered as maker and seller of them.

(iv) Labourers—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

(v) Shop-keepers, Retail Dealers, Shop Assistants—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

(vi) Commerce—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

(vii) Transport workers—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

(viii) Machine Operators—Always state the kind of machine giving its recognized name, if any.

(ix) If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:

Manufacturer, merchant, agent, broker, dealer, engineer and iron works, etc.

(x) Services—For a person engaged in the Defence Services write 'Service of Central Government'. In case of other service write the name of the post in full and also describe the office in which the person is serving.

Q. 11(c)—Class of Worker

58. For a person who is:

(1) an *Employer*, that is, who hires one or more persons in his work described in Q. 11(a) write MR

(2) an *Employee*, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind write EE

(3) a *Single Worker*, that is, who is doing his work described in Q. 11(a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives write SW

(4) a *Family Worker*, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind write FW

For a person for whom an 'X' is put in Qs. 11 (a) and 11 (b) put an 'X' in this question also.

59. *Explanations*—(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11 (a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an Employer, even if he has the power to employ another person in his office on behalf of his own Employer or Employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only Employees, as explained above, and should not be regarded as Employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognized partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage.

Q. 11(d)—Name of Establishment

60. Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'. For a person for whom an 'X' is put in Qs. 11 (a), 11 (b) and 11 (c) put an 'X' in this question also.

61. The following example will illustrate how Qs. 11 (a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

Q. 11 (a)	Q. 11 (b)	Q. 11 (c)	Q. 11 (d)	Q. 11 (a)	Q. 11 (b)	Q. 11 (c)	Q. 11 (d)
Nature of Work	Nature of Industry, Profession, Trade or Service	Class of Worker	Name of Establishment	Nature of Work	Nature of Industry, Profession, Trade or Service	Class of Worker	Name of Establishment
1. Cutting trees in forests.	Logging in forests.	EE	Forest Department of Government.	19. Dealer	Wholesale Stores in grains and cereals.	MR	Sahu & Co.
2. Gardner in mango orchard.	Fruitgrowing	EE	Master's mango orchard.	20. Contractor	Supplying gypsum to Fertilizer Factory.	MR	Rourkela Fertilizer Factory.
3. Paid farm-labourer.	Cocconut plantation.	EE	Satyabadi Co-operative Farm.	21. Bus driver	Motor transport service.	EE	Government Motor Transport Service.
4. Day-labourer	No fixed job	SW	No fixed place of work.	22. Air pilot	Air transport	EE	Bhubaneswar Flying Club.
5. Labourer	Assisting brick-layer in house building.	EE	N. Sur & Co.	23. Foreman	Kiln room in Ceramic Factory.	EE	Mayurbhanj Potteries.
6. Private cook or domestic servant.	..	EE	Master's house	24. Boiler room Foreman.	Thermal Station.	EE	Talcher Thermal Power House.
7. Cook	Hotel	EE	Phulbani Hindu Hotel.	25. Foreman	Packing Department in Oil mill.	EE	Lakshmi Oil Mills, Khariar.
8. Khansama	Club	EE	Sambalpur Club	26. Foreman	Saw mill	EE	Sakti Saw Mills, Keonjhar.

Difference between certain categories of work in question 8 and question 11.

62. Although cultivation in general comes under question 8, there are some categories of activities akin to cultivation, which should not be entered in question 8, but should more appropriately be entered under question 11. The following examples will clarify the difference between the two categories:

(i) **QUESTION 8**—Cultivation work including ploughing, sowing and harvesting of the following classes of crops should be entered in Question 8 :—

1. Production of cereal crops such as rice, wheat, jowar, bajra, maize, roots and tubers like potato, yam, beet, sugarcane, etc.
2. Production of pulses, such as arhar, moong, masur, khesari and other grams.
3. Production of raw jute and kindred fibre crops
4. Production of raw cotton and kindred fibre crops

(ii) **QUESTION 11**—The following categories of work should be entered under question 11 and not question 8 :—

A. Other field produce—

1. Production of other crops including vegetable not covered in question 8.
2. Production of fruits and nuts in plantations and orchards (like cocoanut, arecanut, etc.)
3. Production of wood, bamboo, cane reeds, thatching grass, etc.
4. Production of juice by tapping palms
5. Production of other agricultural produce (including fruits and nuts not covered by serial No. 2 and flowers) not covered above.

B. Plantation crops—

1. Production of coffee in plantation
2. Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation).
3. Production of ganja, cinchona, opium, poppy, saffron, etc.
4. Production of other plantation crops not covered above

Principal work and Secondary work

63. On the basis of work, the entire population of the country is divided into two classes, namely, (i) WORKERS and (ii) persons NOT WORKING. All the WORKERS will be shown against the four questions, namely, Nos. 8, 9, 10 and 11, as mentioned in paragraph 37 above. All persons NOT WORKING will be shown against question No. 12. But before you consider question 12, you have to decide and record one more matter relating to the workers, in questions 8, 9, 10 and 11. The matter to be decided is, which of the work in which the person is engaged is "*Principal work*" and which is his "*Secondary work*". The following instructions should be carefully followed as the matter is very important for preparing records of economic activity of the people.

(i) *In case of one work*—If the person is doing only one category of work either in question 8 or 9 or 10 or 11, do not make any enquiry about his Principal work or Secondary work.

(ii) *In case of two works*—If the person is engaged in two different categories of work, e.g., working as a Cultivator (Q. No. 8) and also working as a School teacher (Q. No. 11), then ask him which work takes more of his time, that is to say, whether he devotes more time in cultivation or in teaching work. If he says that he spends more time in cultivation and less time in teaching, then cultivation (Q. No. 8) is his Principal work and teaching (Q. No. 11) is his Secondary work. In such a case, mark Question No. 8 with a ring round 8, such as ⑧. This ring will show that this is his Principal work. It is not necessary to mark Question No. 11 in any way to show that it is his Secondary work.

(iii) *In case of three works or more*—If the person is engaged in three or more categories of work, then enquire which is the first work, second work, third work, etc., according to length of time he devotes for each such work. Supposing he says that he devotes 6 hours a day as an agricultural labourer, 2 hours a day in the evening in his retail betel shop and one hour a day at home spinning yarn or weaving, then it will appear that Question No. 9

(working as agricultural labourer) is his Principal work, Question No. 11 (working as a shop-keeper) is his Secondary work, and Question No. 10 (working at Household Industry) is a less important work. Then put a ring round 9 such as ⑨ to indicate that this is his Principal work and put a tick mark before Question No. 11 such as √11 to show that this is his Secondary work, and do not put any mark against question 10 which is less important work. Similarly if there is a fourth category of work which is less important, no mark should be put against it.

Q. 12—Activity, if Not Working

64. Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the questions 8 to 11 above. If the person is NOT WORKING according to the four questions 8 to 11, then an answer should be recorded here to show what class of non-working person he is.

65. The following activities should be recorded in the case of persons NOT WORKING:—

1. For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or profession write ST
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade, or profession write HW
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age write D

4. For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work write R

5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence write B

6. For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution write I

7. For a person who has not been employed before but is seeking employment for the first time write NE

8. For a person employed before but now out of employment and seeking employment write UN

Explanation—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in questions 8 to 11.

66. A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in item 7 or 8.

Q. 13—Sex

67. Write 'M' for Males and 'F' for Females. For eunuchs and hermaphrodites, write 'M'.

B—FILLING UP HOUSEHOLD SCHEDULE

The definition of household has been given in the Instruction Manual as follows:—

"A household is a group of persons who commonly live together and take their meals from a common kitchen, unless the exigencies of work prevent any of them from doing so."

2. Every household in your area has already been given a number during the house-numbering operation. First check up if this house number is written in a prominent place. If the number has faded out or disappeared, it must be written again at once. Thereafter, one piece of Household Schedule should be filled up for each household in the following manner :—

Location Code

3. The first entry to be made relates to the Location Code. Write the Location Code of the household according to the instructions given earlier.

Is this an Institution

4. At the right hand corner of the form this question has been mentioned together with a rectangle below it. If the house under enumeration is a hostel, hotel, hospital, boarding house or any penal, charitable or mental institution, write the nature of the institution within the rectangle, viz., (jail, hostel, etc.).

Full name of Head of Household

5. Below the Location Code, there is a column for recording the full name of the Head of the household. The Head of the household for Census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

6. Institutions like boarding houses, messes, etc., should also be regarded as Census Households. They are however to be regarded as households of "unrelated persons living together". In such a household, the Manager or Superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution, separate families are also living, each such family should be treated as a Census Household and a separate Household Schedule should be filled. In such cases the full name of the recognized Head of the household should be written.

7. If the Head of the household is a person who spends the week-days in town and spends the week-end at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period, then the person who is in charge in his absence should be recorded as the Head of the household.

Scheduled Caste or Scheduled Tribe

8. On the right hand side there is a parallelogram with the letters S.C. written outside it. If the Head of the household is a member of Scheduled Caste, find out the name of the Caste in the list of Scheduled Castes. If the name of the Caste as given by the Head of the household tallies with or is considered to be equivalent to the name of the Caste then the name of the Caste as it appears in the list should be recorded within the parallelogram and then the letters (S.C.) should be written after the name of the Caste. Similarly, if the Head of the household claims to be a member of any Scheduled Tribe, verify the name of the Tribe from the list, and then record the name of the Tribe in the parallelogram and write (S.T.) after the name of the Tribe. The name of a Caste or Tribe which does not appear in the list or which is not considered locally as equivalent to one of the names of the Castes or Tribes should not be entered. If the Head of the household does not belong to a Scheduled Caste or a Scheduled Tribe, you should put 'X' within the parallelogram.

A—Cultivation

9. You should then fill up the part of the Household Schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation, sub-part 'B' to Household Industry and sub-part 'C' to workers at Cultivation or Household Industry.

10. Sub-part 'A' relating to Cultivation will have to be filled in only where the household actually cultivates the land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in the schedule, namely, in items 1(i), 1(ii) and 2.

11. Items 1(i) and 1(ii) relate to land actually cultivated by one or more members of the household. Item 2 relates to the land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases, the total area of separate plots or parcels of land in different places should be entered up to one place of decimal. A number of lines has been provided for this purpose 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognized local rights. If the household cultivates a land owned or held from

Government or taken from private persons or institutions or if the household has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to "local name of right on land".

12. Category 1(i), namely, land owned or held from Government will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment

- (i) with rights of permanent, heritable and transferable possession,
- (ii) with rights of permanent and heritable possession, but without the right of transfer, and
- (iii) temporary or conditional leases of any kind with the Government.

13. Category 1(ii), namely, land taken from private persons or institutions for payment in money, kind or share, will include land

- (i) with rights of permanent, heritable and transferable possession,
- (ii) with rights of permanent and heritable possession but without right of transfer, and
- (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :—
 - (a) tenants holding land with permanent and heritable rights whose land can not be resumed by the owner on grounds of personal cultivation (Such tenants may, in some cases, have the right of transfer also.),
 - (b) tenants who have been given permanent rights subject to the right of resumption by the owner (In some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right.),
 - (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period,
 - (d) tenants holding land on temporary leases who are liable to ejectment, and
 - (e) areas held on condition of rendering service either to a village community or to Government. (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights.)

14. Category 1(ii) will also include the following :—

- (a) land taken for a fixed amount of money,
- (b) land taken for a fixed amount of produce,
- (c) land taken for a share of the produce,
- (d) land for which money is paid partly in one and partly in any other form mentioned above, and
- (e) land held free of consideration.

15. Category 2, namely, land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

16. Categories 1(i) and 1(ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, land which lies within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to "Area in acres." You should write the total of separate plots, or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure into acre. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted. Areas should be filled up to one place of decimal, such as 5.2 acres.

17. This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

18. Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under "right" enter "co-operative farm". Labour hired by such a co-operative farm should not be entered for this household.

B—Household Industry

19. Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself or by any or all members of the household either at home or within the village in rural areas. In case of urban areas, it should be at home only and not outside. The industry should not be on the scale of a registered factory. The participation of the Head of the household or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

20. The test for a Household Industry is mainly threefold—

(a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least a part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers (221 Cen.—55)

from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

21. The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at "place of work" or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

22. Ascertain from the head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

C—Workers at Cultivation or Household Industry

23. Sub-part 'C' relates to workers in Cultivation or Household Industry.

24. In the case of households which are engaged only in Cultivation, if the Head of the household is working, write '1' under the column "Head". Then ascertain how many other male and female members of the family are working, and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to "Total". Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in whole-time employment during last working season or should be in whole-time employment during current working season.

25. Similarly in the case of households engaged in Household Industry only, if the Head of the household is working, write 'I' in the column relating to the "Head", and also ascertain how many male members and female members of the family are working, and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to "Total" and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

26. If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 'I' under the column relating to the "Head" and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to "Total". Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a Household engaged both in Household Cultivation

and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

27. Even if any of the working members of the family or any hired labourer is absent during the period of the Census count, he should be counted for the purposes of the Household Schedule.

28. In the case of households engaged in Cultivation only, put 'X' in the columns relating to "Household Industry only", and "Both in Household Cultivation and Household Industry". Similarly, in the case of Households engaged in Household Industry put 'X' in the columns relating to Household Cultivation only, and "Both in Household Cultivation and Household Industry". If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to "Household Cultivation only" and "Household Industry only". If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

C—FILLING UP CENSUS POPULATION RECORD

The Census Population Record is a small register for noting down the names and some particulars of all the persons enumerated in one particular household.

2. For each household within your Block, one copy of the Household Schedule has to be filled up according to Section III. On the back side of the Household Schedule form, there is the form of Census Population Record. Immediately after preparing Enumeration Slips of all the members of a particular household, you should begin to fill up the Census Population Record at the back of the Household Schedule for that household, before you proceed to the next household for enumeration work.

3. The Census Population Record is meant for recording six items of information only, in respect of every individual of the particular household.

These six items are—

(i) **Name**—The name of the person enumerated, as you have recorded against question 1 (a) of the Enumeration Slip, should be recorded here.

(ii) **Sex**—It should be noted down whether the person is a male or a female as recorded by you in question 13 of the Enumeration Slip.

(iii) **Relationship to Head**—Whatever entry you have made in question 1 (b), should be entered here, to show the relationship of the enumerated person to the Head of the household.

(iv) **Age**—Note down the age as recorded in question 2 of the Enumeration Slip.

(v) **Marital status**—Similarly record the marital status of the person enumerated as noted in question 3 of the slip.

(vi) **Description of work**—This column will be filled up in respect of a person who has been treated as a worker (that is to say, for whom a certain entry has been made in question 8 or 9 or 10 or 11). Whatever entry has been made with regard to his work should be repeated here. This column should not be filled up in respect of a person who is treated as not working (that is to say, for whom an entry has been made in question 12). Put 'X' in this column in respect of a person not working. This is how six entries should be made with regard to one person.

4. If there are 3, 4 or more persons in that household, similar entries should be made in respect of each such person in the Census Population Record.

5. You will find that there are only 14 lines for making entries in the Census Population Record. In other words, if a household contains 14 members, the form will be completely filled up. If it contains lesser number of members, a few lines will be left blank. Put an underline below the last entry in this form to show that this is the end of the record relating to that household. Supposing there are five members in the household, five lines should be filled up and below the 5th entry one bold underline in ink should be put.

6. In the lower part of the form there are columns for recording the total number of persons—males and females, in that household. Strike the total for the males and another for the females and lastly a grand total of all the males and females in that household. After completing the Census Population Record in this manner, you should proceed to the next household for enumeration.

7. In case there is addition of members to the household by birth, marriage, etc., or in case of death of a member of the household after the date of enumeration and before the sunrise of 1st of March, the Census Population Record will have to be amended according to the instruction given in Part A.

D—FILLING UP THE HOUSE LIST

Superior Census Officers must make sure that the Enumerator correctly knows the Location Code of his area by frequently asking him to mention it. The Enumerator should also satisfy himself by shaking up his memory in the following manner:

Location Code

2. If he is an Enumerator for a rural area, his Location Code consists of four numbers as follows :—

- (i) First Code No. relates to District. What is the Code No. of his District ?
- (ii) Second Code No. relates to Police Station. What is the Code No. of his Police station ?
- (iii) Third Code No. relates to Village. What is the Code No. of his Village ?
- (iv) Fourth Code No. relates to House. Has the House Number been correctly written on the wall of the house which he is now going to write in the House List ?

3. If he is an Enumerator for a town area, his Location Code consists of four numbers as follows :—

- (i) First Code No. relates to District. What is the Code No. of his District ?
- (ii) Second Code No. relates to Town. What is the Code No. of his Town ?
- (iii) Third Code No. relates to Ward. What is the Code No. of his Ward ?
- (iv) Fourth Code No. relates to House. Has the House Number been correctly written on the wall of the house, which he is now going to write in the House List ?

Circle Number and Block Number

4. Each Enumerator should also remember two other numbers which are different from the Code Nos. He must remember what is the number of the Circle of his Supervisor and what is the number of the Block in his own charge. The Circles are numbered as 1, 2, 3, 4 and so on, and the Blocks are numbered as A, B, C, D and so on. These two numbers are not part of Code Numbers, but are separate numbers.

Entries in the top of the House List

5. After the Enumerator correctly remembers the Location Code, and the Circle and Block No., he will begin to fill up the House List form. On the top of the form, he will first write out the name and Code No. of the District, Police Station (or Town), Village (or Ward) and Enumerator's Block No. Then he should fill up different columns of the House List, as per instruction below.

Column 1—Line Number

6. There are 20 lines on every page. So 20 (twenty) households can be entered on each page. Only one digit of the line number has been printed in col 1. When the household Nos.

exceed 9, the earlier digit should be written by Enumerator. For example, 0 should be 10, 1 should be 11, 2 should be 12 and so on till 20, 21, 22 and further onwards. It should be borne in mind that when there is only one whole village covering the whole Block or when there is more than one village in the Block, there should be one continuous line No. for each of the villages. If the village is big and contains two or more Blocks, there should be one continuous line No. for each of the Blocks.

Column 2—Building Number

7. The definition of "Building" has been given in paragraph 3 of Section 6. This number will be found on the wall of the building and it should be entered in this column.

Column 3—Building Number with sub-numbers for each Census house

8. In this column, the building No. should be written and then the sub-number of all the Census houses within that building should be written.

Column 4—Purpose for which Census house used

9. The actual use to which a Census house is put should be written here. In the case of a factory or workshop, 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place, e. g., bank, etc. But rooms or apartments where professional consultations are held, such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary, where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for place of worship or congregation or if unoccupied, 'vacant'. If the Census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—If this Census house is used as an Establishment, Workshop or Factory

10. These columns apply only in cases where the Census house is a factory or a workshop, i. e., where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the Census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of Establishment or Proprietor

11. Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like the confectioneries where no distinct name has been given to them like *Haluai* shop, etc. If the Census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken

12. In this column enter the actual work that is being done in the establishment, factory or workshop, like paper-making, shoe-making, cycle-repairing, motor-servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if any)

13. The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

14. In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used

15. If the factory or workshop uses steam or diesel engine or fuel, e. g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Column 9—Material of wall

16. Under this column the material out of which most of the walls of the house are made, i. e., grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete or timber should be written. Where a house consists of separate structure of each of different materials, the material out of which the walls of the main bed rooms are made are to be recorded.

Column 10—Material of roof

17. The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i. e., tiles, thatch, corrugated iron, zinc or asbestos, cement sheets or concrete, etc., should be written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor.

Column 11—Sub-number of each Census Household with Census House number

18. The House number as written in column 3 should be written here first and then the Household number should be written.

Column 12—Name of the Head of Household

19. The name of the Head of each household given in column 11 should be written here. The Head of a household for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the Manager or Superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

20. If the Census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of owner).

Column 13—Number of rooms in Household

21. If a Census house is occupied by one household the enumeration of rooms should be simple.

22. If a Census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

23. A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i. e., it should be at least 6 ft. long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14— Does the Household live in own or rented house ?

24. If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

25. In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—Number of persons residing in Census household on day of visit.

26. Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—Remarks

27. If the Head of the household is a member of Scheduled Caste, find out the name of the Caste in the list of Scheduled Castes. If the name of the Caste as given by the Head of the household tallies with or is considered to be equivalent to the name of the Caste as given in the list, then the name of the Caste as it appears in the list should be recorded in the remarks column and then the letters (S.C.) should be written after the name of the Caste. Similarly if the Head of the household claims to be a member of the Scheduled Tribe, verify the name of the Tribe from the list of Scheduled Tribes and then record the name of the Tribe in the remarks column and write (S.T.) after the name of the Tribe. The name of a Caste or Tribe which does not appear in the list or which is not considered locally as equivalent to one of the names of the Castes or Tribes given in the list, should not be entered in the remarks column. In such a case remarks column should be left blank. The remarks column should also be left blank in all cases of other Hindus, Muslims, Christians and others, as they do not come under the category of Scheduled Castes or Tribes.

28. If, however, there is any useful or significant information about the Building, Census house or Household that has not been entered in any other column, such fact may also be written in the remarks column.

Duplicate Copy

29. In the above manner two sets of House List should be prepared for every Village or Block, as the case may be. Then House List Abstracts should be prepared.

LIST OF AGENTS FOR THE SALE OF GOVERNMENT OF INDIA PUBLICATIONS (as on 31st December 1962)
