# INTRODUCTION

THIS PART of the Census Report presents thirteen tables specially prepared from the 1961 Census material on Scheduled Castes and Scheduled Tribes in Maharashtra. These tables together present the total population of each Scheduled Caste and Scheduled Tribe and its distribution by sex, age, marital status, educational levels, religion and economic activity. One of the special tables also furnishes information on mother-tongues and subsidiary languages spoken by the Scheduled Tribes. Such comprehensive material on Scheduled Castes and Scheduled Tribes has never been published before.

**Scheme of Presentation**

The special tables are presented in two separate sections of the volume. Section I contains six special tables on Scheduled Castes and Section II seven special tables on Scheduled Tribes. An explanatory note is given before each table to explain its layout, method of presentation and the terms or concepts used. This introductory note explains a few general aspects common to all the tables and specially the concepts and definitions followed in the 1961 Census so far as they are relevant to the material presented in this volume. In addition, a note at the commencement of each of the two Sections separately describes for Scheduled Castes and Scheduled Tribes their declared lists with regional variations of synonyms, sub-castes or sub-tribes, the manner in which those variations have been combined or separately presented in the tables and a few salient findings of the 1961 Census.

The tables generally present material for 31 units, *viz.*, the State, its four administrative divisions and 26 districts and for each unit for rural and urban areas separately. Each table starts with the entries for the State followed by the entries of Bombay Division and its districts. Then follow the entries for Poona Division and its districts and so on. The order of presentation of the divisions and districts followed in all the tables is as follows :—

*BOMBAY DIVISION*
1 Greater Bombay
2 Thana
3 Kolaba
4 Ratnagiri
5 Nasik
6 Dhulia
7 Jalgaon

*POONA DIVISION*
8 Ahmadnagar
9 Poona
10 Satara
11 Sangli
12 Sholapur
13 Kolhapur

*AURANGABAD DIVISION*
14 Aurangabad
15 Parbhani
16 Bhir
17 Nanded
18 Osmanabad

*NAGPUR DIVISION*
19 Buldhana
20 Akola
21 Amravati
22 Yeotmal
23 Wardha
24 Nagpur
25 Bhandara
26 Chanda

All the tables (except SCT-V and SC-I) present material under each administrative unit for Scheduled Castes or Scheduled Tribes as a group as well as for each individual Scheduled Caste or Scheduled Tribe. The Scheduled Castes and the Scheduled Tribes are shown in alphabetical order.

Ethnographic notes based on the allied studies undertaken along with the 1961 Census have been prepared on all Scheduled Castes and Scheduled Tribes in Maharashtra. They will be found in Part V-B of the Maharashtra Census Report.

Bare 1961 population figures for the two groups of Scheduled Castes and Scheduled Tribes for the State, administrative divisions, districts, talukas and towns are presented in the Primary Census Abstract (columns 9 to 11 and 12 to 14) in Part II-A of the Maharashtra Census Report. Similar statistics for each village and ward of each town are presented in the Village Directory, Part I of each of the 25 District Census Handbook volumes.

**1961 Census**

In the 1961 Census, a sub-question 5(*c*) was asked to ascertain the name of the caste or tribe of every person belonging to one of the Scheduled Castes or Scheduled Tribes. This Census did not cover any caste or tribe under the group "Other Backward Classes". The State Government had by that time replaced* the castewise criterion for inclusion in the "Other Backward Classes" by an economic criterion of an income of Rs. 900 per annum. That income limit was subsequently raised† to Rs. 1,200 per annum.

The instructions issued to the enumerators for recording the answers to the question on Scheduled Castes/Scheduled Tribes were as follows :—

"5(*c*) The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district, write the name of the caste or tribe to which he belongs. For all others, write '×' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(*b*). Scheduled Tribes may belong to any religion."

Answers recorded against question 5(*c*) were cross-tabulated by answers to other questions of the Census Questionnaire and thirteen special tables were prepared for the two groups of Scheduled Castes and Scheduled Tribes and are presented in this volume.

* Government Resolution, Labour and Social Welfare Department, No. OBC-1759-E, dated the 18th May, 1959.
† Government Resolution, Education and Social Welfare Department, No. OBC-1760-M, dated the 7th July, 1960.

The 1961 Census was conducted between 10th and 28th February, 1961. The enumerators called on each household in the assigned areas and filled in the Census Individual Slip for each member of the household and the household schedule for each household by interviewing one or more responsible members of the household. They revisited all the households between 1st and 5th March, and corrected the Individual Slips for changes occurring between their first visit and the Census reference date, *viz.*, sunrise of 1st March, 1961. These corrections were, however, restricted to changes due to deaths or new births. No corrections were made for the change of economic activity of the household or any of its members during the intervening period. Material presented here thus relates to 1st March, 1961.

**Scheduled Castes and Scheduled Tribes**

Certain classes of people are declared by President's Orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. A few of them are so declared for the whole State, but others only for specified areas. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people, and, in particular, of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the Lok Sabha and in the State Legislative Assemblies.

The statutory provisions relating to the Scheduled Castes and Scheduled Tribes are reproduced as appendices to this note so far as they now pertain to Maharashtra. Detailed accounts of the orders issued by the President containing the declared lists of Scheduled Castes and Scheduled Tribes for Maharashtra will be found in the notes at the beginning of the two sections of the volume respectively.

The following Scheduled Castes and Scheduled Tribes have not been returned in the 1961 Census in the areas of Maharashtra in which they are declared as such:—

SCHEDULED CASTES

(1) Chadar
(2) Arwa Mala
(3) Mala Hannai
(4) Mala Masti
(5) Mitha Ayyalvar
(6) Samagara
(7) Sindhollu

SCHEDULED TRIBES

(1) Baiga
(2) Bharia-Bhumia
(3) Gadaba
(4) Kamar
(5) Kharia
(6) Kondh
(7) Korwa
(8) Majhwar
(9) Munda
(10) Parja
(11) Saonta
(12) Sawar

The lists of Scheduled Castes and Scheduled Tribes now applied to Maharashtra had been copied from the erstwhile States of Bombay, Madhya Pradesh and Hyderabad, irrespective of whether a particular Scheduled Caste or Scheduled Tribe existed in the Maharashtra area or not. The Scheduled Castes and Scheduled Tribes not found in Maharashtra may be existing in the areas of those old States now included in Gujarat, Madhya Pradesh, Andhra Pradesh or Mysore.

**Rural and Urban Population**

A town or an urban area is a place which has a municipality, a cantonment or civil lines or a population of 5,000 or over and at least 3/4ths of male population engaged in non-agricultural pursuits. The population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

**Workers and Non-workers**

In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(*i*) self-supporting persons ;
(*ii*) earning dependents ; and
(*iii*) non-earning dependents.

The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

A person is classified as worker if—

(*a*) in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any industry, trade, profession, or service, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

" Work " includes not only actual work but effective supervision and direction of work also.

Persons under training as apprentices with or without stipend or wages are regarded as workers.

An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, or service.

A public or social service worker who is engaged in public service activity or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

The population classified as workers here is the economically active population, including family workers but not including unemployed persons.

The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

Classification of workers doing two or more different types of work has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Persons who are not workers are classified as non-workers.

**Broad Categories of Economic Activity**

The workers are shown classified by sex into the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities.
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

*Category I*

This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

*Category II*

All other persons working on land as labourers on wages without holding any rights upon the land are classified as agricultural labourers and included in the second category.

*Category III*

Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

*Category IV*

A " Household Industry " is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the home.

A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in another person's household industry as paid employees are also treated as workers at household industry.

*Category V*

" Manufacturing " includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

*Category VI*

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

*Category VII*

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending, banking, etc.

*Category VIII*

This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services, such as, Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting, are also included in this category.

*Category IX*

This category includes (*i*) Public utility services like electricity or gas or water supply or sanitary services ; (*ii*) Central, State or Municipal employees in administrative departments and offices ; (*iii*) Professional services ; (*iv*) Trade or labour associations, recreation services, etc.

All these statutory provisions are reproduced as Appendices I, II, IV, V and VI to the introductory note at pages 5 to 10 and 12 to 16.

Clause (24) of Article 366 of the Constitution defines the Scheduled Castes as "such castes, races or tribes or parts of or groups within such castes, races or tribes as are deemed under Article 341 to be Scheduled Castes for the purposes of this Constitution".

The first order under Article 341 was issued by the President in 1950. That order contained, among others, three parts of the Schedule (pages 9 and 10) applicable to the three erstwhile States of Bombay, Madhya Pradesh and Hyderabad.

The 1950 Order was modified by the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1956 (pages 12 and 13). As far as Maharashtra State is concerned, this amending Act of 1956 made the following changes in the 1950 list of Scheduled Castes :—

(*i*) Amendment of paragraph 3 of the 1950 Order, stating that no person who professes a religion different from Hinduism shall be deemed to be a member of a Scheduled Caste, to include Sikh religion also ;

(*ii*) Addition of six new Scheduled Castes, *viz.*, (1) Holar, (2) Pasi, (3) Tirgar, (4) Ganda, (5) Khatik and (6) Sansi to the list ;

(*iii*) Inclusion of names of sub-castes or synonyms against some of the declared Scheduled Castes ;

(*iv*) Deletion from the 1950 list of six independent Scheduled Castes, *viz.*, (1) Chakrawadya Dasar, (2) Chuhar, (3) Dakaleru, (4) Shingdav, (5) Sochi and (6) Timali ; and

(*v*) Deletion of twelve independent Scheduled Castes from the 1950 list, and including two of them, *viz.*, Kolcha and Vitholia in the list of the Scheduled Tribes and including the remaining ten, *viz.*, (1) Asodi, (2) Chambhar, (3) Dhegu-megu, (4) Machigar, (5) Mini Madig, (6) Rohit, (7) Vankar, (8) Mochi, (9) Satnami and (10) Madig as sub-castes under other castes.

Consequent upon the reorganisation of States in 1956, the lists as amended by the 1956 Act were notified in a revised form as applicable to the new States.

For Maharashtra and Gujarat that revised order of 1956 was again amended through section 26 of the Bombay Reorganisation Act, 1960 (page 16).

## The Declared list of Scheduled Castes

Part VII-A—'Maharashtra' in the Seventh Schedule appended to the Bombay Reorganisation Act is thus the declared list of Scheduled Castes in Maharashtra in force at the moment. In substance, i.e., to the extent of the names of castes included in it, the 1960 list is, except for one minor change, exactly the same as had been declared through the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1956. That small change was the deletion of Mochi as an independent caste and its addition as a sub-caste under Ehmbi in the list applicable to Bombay and Poona Divisions.

The entire Part VII-A from the concerned Schedule to the Bombay Reorganisation Act, 1960, is reproduced below :—

**Regional lists, sub-castes and synonyms**

The following points may be noted in respect of the President's list of Scheduled Castes :—

(*i*) There are three separate regional lists for the three areas coming from the erstwhile States of Bombay, Madhya Pradesh and Hyderabad now included in Maharashtra, together making a total of 77 Castes.

(*ii*) The list applicable to the old Bombay area contains 24 Scheduled Castes which are so declared for all the areas of those 13 districts.

(*iii*) The list applicable to the five districts of Aurangabad Division contains 32 Scheduled Castes which are so declared for the entire area of those districts.

(*iv*) The Scheduled Castes at (*iii*) are also declared as Scheduled Castes for Rajura taluka which has been notified as a separate district in the President's Order but is administered as a taluka in Chanda district.

(*v*) The list applicable to the Nagpur Division districts contains 16 Scheduled Castes which are so declared for the entire area of those eight districts. In addition, five Scheduled Castes are declared as such for limited areas specified against each of them.

(*vi*) Forty out of the 77 Castes are shown in the three lists with single names. The remaining 37 have been shown with one or more names of sub-castes, generic names or synonyms.

(*vii*) The three regional lists have six names common to two or all of the three lists. Mahar and Mang are examples of names common to all the three lists. But even these common names are shown in the three lists with different synonyms or sub-castes. Mahar, for example, makes different groups in all the three lists. For Bhangi and Mehtar the old Bombay list uses the expression " Bhangi, Mehtar, etc.", the old Madhya Pradesh list " Mehtar or Bhangi " and the Hyderabad list simply " Mehtar ".

(*viii*) Castes shown independently in a region are included as sub-castes of other castes in another region. Mochi, for example, is an independent Scheduled Caste in Aurangabad Division but it is shown as a sub-caste under Bhambi and Chamar in Bombay and Nagpur Division lists respectively.

**Compilation of 1961 Census Tables**

The returns of synonyms and sub-castes were grouped into main castes strictly according to the declared list. Difficulties arose in a few cases where the name of the sub-caste was alone returned in the Census and that sub-caste was not specifically shown in the declared list. Reference to the answers to other questions gave clue to the main caste in many cases. Remaining difficult cases were taken to the category of " unclassified " Scheduled Castes.

Recording of the name of the sub-caste was moreover optional and not obligatory upon every person belonging to any Scheduled Caste. Majority of them had returned only the names of the main castes. Our figures for sub-castes might, therefore, have been misleading as to their exact numerical strength in any specified area of the State.

**Scheduled Castes not reported in the 1961 Census**

The following seven Scheduled Castes were not returned by any one in the respective specified areas in the 1961 Census:—

(1) Chadar.
(2) Arwa Mala.
(3) Mala Hannai.
(4) Mala Masti
(5) Mitha Ayyalvar.
(6) Samagara.
(7) Sindhollu (Chindollu).

Chadar is from the regional list pertaining to the Nagpur Division and is applicable to Bhandara district only. The remaining six names are from the regional list applicable to the districts of Aurangabad Division and to Rajura taluka in Chanda district. No one belonging to those castes was reported in the specifically notified areas during the enumeration period.

**Scheduled Castes and area restrictions**

Out of the 77 Scheduled Castes included in the declared list, seven have not been found in the notified areas. Bhangi, Chalvadi, Chamar, Dhor, Mahar and Mang had been included in two or all the three regional lists, though in different groups with different sub-castes or synonyms. Their combination reduced the number of Scheduled Castes by ten. Combination of Mang-Garudi with Mang and Mochi with Chambhar reduced it further by three, leaving the list with 57 Scheduled Castes.

Because of the area restrictions notified for all the Scheduled Castes, only four, *viz.*, Bhangi, Chambhar, Mahar and Mang, appearing in all the three regional lists can be recognised as such in all areas of Maharashtra. Area restriction is, therefore, a basic limitation to be always remembered while using the figures for population or other characteristics of the remaining 53 Scheduled Castes. When the tables present Scheduled Caste figures for the State, division or a district it is always implied that the presentation is only for the restricted area notified against each Scheduled Caste.

The restricted areas notified for each of those 57 Scheduled Castes are shown below. The Scheduled Castes are arranged in alphabetical order. For economy of space the restricted areas are shown with symbols as follows :—

(1) Bhangi. (3) Chambhar. (5) Mehar.
(2) Chalvadi. (4) Dhor. (6) Mang.

This has been considered necessary because of (*i*) area restrictions in respect of each ; and (*ii*) different names of sub-castes or synonyms included in their generic names for different areas in the President's Order. As for the Scheduled Caste 'Chalvadi' (Serial No. 2 above), it has not actually been returned in the districts of Aurangabad Division or in Rajura taluka of Chanda district, although notified for that area. The figures in respect of this Caste for Maharashtra thus pertain entirely to the districts of Bombay and Poona Division and hence the symbol (*a*) has been inserted against the name of this caste in all Tables presenting Castewise date. Since the figures for this caste are 'nil' in Aurangabad Division, it has not been shown in the Tables pertaining to Aurangabad Division, and its districts and in the Tables pertaining to Chanda district which includes Rajura taluka.

**Scheduled Caste groups shown by the first names**

In the case of the following Scheduled Castes, the first name appearing in the President's Order has alone been used in all the tables as the generic name to include the names of Scheduled Castes, sub-castes and synonyms, etc., included against that caste in the President's Order. Chambhar appearing as the first name against that caste group in the President's Order for Aurangabad Division list is used to represent that caste instead of Bhambi or Chamar appearing in the President's Order for the lists applicable to Bombay, Poona and Nagpur Divisions, respectively.

**Reserved Seats in Parliament, Legislative Assembly and Zilla Parishads**

In the delimitation of constituencies made in 1961, Maharashtra had 44 Parliamentary Constituencies. Six of them had been reserved for Scheduled Castes. Similarly, out of the 264 Assembly Constituencies, thirty-three were reserved for Scheduled Castes. The Election Commission has in 1963 reduced the number of seats reserved for Scheduled Castes for Parliament from 6 to 3 and for Assembly from 33 to 15.

In pursuance of section 12 of the Maharashtra Zilla Parishad and Panchayat Samitis Act, 1962, the State Government has also reserved seats for Scheduled Castes in the Zilla Parishads. The reservation is as follows :—

**1961 Census Findings**

A few salient points observed from the 1961 Census material presented in the Special Tables on Scheduled Castes are described below. The discussion is brief and is limited to demographic, social and economic characteristics of Scheduled Castes as a group. Those characteristics have also been studied in detail for individual Scheduled Castes in the ethnographic notes which are presented in Part V-B of the Manarashtra Census Report.

**Limitations**

The limitation of the population figures and other material presented in the Tables may be described here again. The total Scheduled Caste population shown here is not the entire depressed or backward caste population of the State. It includes only those castes which are declared as Scheduled Castes. For the Scheduled Castes which are declared as such for specified areas (not extending to the whole State) the population figures represent their population enumerated in those specified areas alone and do not include their population which may be residing in the State but outside those specified areas. The case of Bedar will illustrate the position. Bedar is declared as a Scheduled Caste only in Akola, Amravati and Buldhana districts. The Bedars do exist in other districts of the State also, but that Bedar population is not included in the State total shown in the Tables because they (the Bedars) are not declared as a Scheduled Caste in those remaining districts.

### Size and distribution of Scheduled Caste population

The population of Scheduled Castes in Maharashtra is 2,226,914, which is 5·63 per cent of the total population of the State. The total population, Scheduled Caste population and its proportion for India, Maharashtra, and other States and Union Territories are shown below :—

By size of the Scheduled Caste population, Maharashtra ranks eleventh among the States in India. Kerala (14·35 lakhs), Gujarat (13·67 lakhs), Assam (7·33 lakhs) and Jammu and Kashmir (2·84 lakhs) have smaller populations of Scheduled Castes than Maharashtra. Uttar Pradesh has the largest Scheduled Caste population (154 lakhs). West Bengal has 68·90 lakhs, Bihar 65·37 lakhs and Madras 60·67 lakhs. Maharashtra has the lowest proportion of Scheduled Caste population to total population (5·63 per cent) among all the States of India.

Scheduled Caste population in Maharashtra has gone down from 40·03 lakhs in 1951 to 22·27 lakhs in 1961. Its proportion to total population has gone down from 12·5 per cent in 1951 to 5·63 per cent in 1961. This has happened because of conversion of a large number of erstwhile Scheduled Castes to Buddhism. This matter is discussed on page 31.

The Scheduled Caste population of Maharashtra is 3·46 per cent of the total Scheduled Caste population in India.

### Districtwise distribution

Table SCT-1—Part A shows the population of Scheduled Castes as a group and for each individual Scheduled Caste for rural and urban areas of each administrative unit in Maharashtra separately. The distribution of Scheduled Caste population by administrative divisions and districts is shown in the Statement below :—

| State/Division/District | Total population | Scheduled Caste population | Percentage of Scheduled Caste population to total population | Distribution of 100 members of Scheduled Castes in the State, among Divisions and Districts. |

The dot map facing page 26 shows the distribution of Scheduled Caste population over different areas of the State.

Poona and Aurangabad Divisions together hold more than two-thirds of the total Scheduled Caste population in Maharashtra. Their respective shares are 39·35 per cent and 28·24 per cent. Bombay and Nagpur Divisions have 16·85 per cent and 15·56 per cent of the Scheduled Caste population.

Unlike the Scheduled Tribes, the Scheduled Castes are not concentrated in any areas and are more or less evenly spread over all areas of the State.

Greater Bombay, Thana, Kolaba and Ratnagiri districts of Bombay Division and Wardha and Bhandara districts of Nagpur Division have less than 3 per cent belonging to Scheduled Castes. The six districts of Poona Division, five districts of Aurangabad Division and the remaining districts of Bombay and Nagpur Divisions not mentioned above have larger proportions of Scheduled Caste population ranging from 3·44 per cent in Chanda district to 13·51 per cent in Bhir district.

Sholapur district has the largest population of Scheduled Castes (2·39 lakhs), though it ranks third by the proportion of Scheduled Castes to total population. Osmanabad district ranks second both by size of population (1·98 lakhs) of Scheduled Castes and its proportion to total population. Bhir district has the highest proportion (13·51 per cent) of Scheduled Caste population to total population but it ranks fifth by size of Scheduled caste population (1·35 lakhs). Kolhapur district ranks third by population of Scheduled Castes and fourth by its proportion to total population. These four districts together cover about one-third (33·86 per cent) of the total Scheduled Caste population in the State. Kolaba district has both the smallest population of Scheduled Castes (13,887) and the lowest proportion (1·31 per cent) to total population.

The distribution of 229 talukas and mahals (excluding Greater Bombay) in the State according to the percentage of Scheduled Caste population to total population is as follows :—

| Percentage of Scheduled Caste population to total population | Number of Talukas and Mahals |
|---|---|
| 0—2·5 .. .. .. | 60 |
| 2·6—5 .. .. .. | 71 |
| 5·1—10 .. .. .. | 51 |
| 10·1—15 .. .. .. | 38 |
| 15·1—21 .. .. .. | 9 |
| Total .. | 229 |

The map facing page 27 also shows the talukawise distribution by proportions of Scheduled Caste population to total population.

The highest proportion of Scheduled Caste population to total population is found in Degiur taluka (20·61 per cent) in Nanded district. Eight other talukas in the State have between 15 and 20 per cent of their population belonging to Scheduled Castes. They are Karmala, Madha and Mohol in Sholapur district, Hatkanangale in Kolhapur district, Manjlegaon and Kaij in Bhir district, Mukhed in Nanded district and Udgir in Osmanabad district. Thirty-eight talukas have proportions ranging from 10·1 to 15 per cent.

These 47 talukas having more than 10 per cent of their population belonging to Scheduled Castes will be seen in the map facing page 27 as making a contiguous tract.

The 1961 distribution is, however, of the residual elements from the 1951 Scheduled Caste population left in the group after conversions to Buddhism. Broadly speaking, this tract of larger proportions of Scheduled Caste population appears to have been less influenced by that conversion movement, partly because of lesser contacts with its centres or the larger proportions of castes other than Mahar. We will revert to this topic again on page 31.

Total population, Scheduled Caste population and the percentage of Scheduled Caste population to total population for 9 talukas which have more than 15 per cent of their population belonging to Scheduled Castes are shown below :—

| District | Taluka | Total population | Scheduled Caste population | Percentage of Scheduled Caste population to total population |

The first three numerically very important Scheduled Castes, *viz.*, Mahar, Mang and Chambhar are spread over all the districts. The next five Scheduled Castes in the numerical order, *viz.*, Bhangi, Dhor, Holar, Madgi and Khatik do not also show any specific areas of concentration. The next two Scheduled Castes, *viz.*, Mahyavanshi and Meghval are, however, largely concentrated in Greater Bombay, which holds about 80 per cent of the total population of the former Caste and 95 per cent of the latter. Mukri, Nadia, Pasi, Shenva and Turi are also similarly concentrated in Greater Bombay. Some other examples of concentration are as follows :—

(*i*) Anamuk, Byagara, Mala Dasari and Mashti in Nanded district ;

(*ii*) Aray (Mala), Bindla and Mala Sanyasi in Aurangabad district ;

(*iii*) Balahi in Amravati district ;

(*iv*) Holiya, Khangar and Sansi in Bhandara district ; and

(*v*) Manne in Chanda district.

An interesting feature is that the Scheduled Castes do not generally occur in large numbers in areas where the Scheduled Tribes predominate or are found in large numbers.

The statement in the next column shows individual Scheduled Castes arranged in the order of their population and their percentages to the total Scheduled Caste population in Maharashtra.

In spite of a large number of people converted from its ranks to Buddhism the Mahar Caste still has the largest population (7·82 lakhs) among the Scheduled Castes and constitutes 35·12 per cent of the total Scheduled Caste population in the State. The other two numerically important Scheduled Castes are Mang (7·27 lakhs) and Chambhar (4·91 lakhs) which constitute 32·65 per cent and 22·06 per cent of the total Scheduled Caste population respectively. These three Scheduled Castes together have 20 out of 22·3 lakhs or 90 per cent of the total Scheduled Caste population in the State.

The next three Scheduled Castes, *viz.*, Bhangi, Dhor and Holar, account for 5·67 per cent of the total Scheduled Caste population. Madgi, Khatik, Mahyavanshi, Meghval and Basor have populations ranging from 16,000 to 7,500. Their combined population is 57,639 or 2·59 per cent of the total Scheduled Caste population.

The last 36 Scheduled Castes have less than one thousand population each and their combined population is 5,544 or only 0·23 per cent of the total Scheduled Caste population in the State.

The following Scheduled Castes deserve to be included as sub-castes or synonyms of the main castes shown against them. Some proposals on these lines are reported to be under consideration. All the tables and the discussion in this note are, however, on the basis of the declared list of Scheduled Castes in force at the moment :—

Mang-Garudi has been shown as an independent Scheduled Caste in the lists of Bombay, Poona and Aurangabad Divisions. It is, however, shown as a sub-caste of Mang in the Nagpur Division list. As described on page 24 the tables present the total population of the Mang group as well as for the two constituents, i.e. Mang, etc. and Mang-Garudi in the respective divisions under different sub-groups, *viz.*, Mang (*a*1) and Mang (*a*2) and Mang (*b*1) and Mang (*b*2). The population of Mang-Garudi is 10,153 in Bombay, Poona and Aurangabad Divisions. It is not available for Nagpur Division separately as it is included as a sub-caste under Mang.

### 1951—1961 Variation in Population of Scheduled Castes

Allowing for due adjustments for the changed boundaries of the State, its 1951 Scheduled Caste population has been estimated at 40·03 lakhs. In 1961, the Scheduled Caste population in the State is reduced to 22·27 lakhs or by 44·39 per cent from the 1951 population. This substantial reduction in the Scheduled Caste population is entirely due to the conversion of a large number of the erstwhile Scheduled Caste persons to Buddhism or as Nav-Bauddha. These people returned their religion in the 1961 Census as Buddhism or Nav-Bauddha. For purposes of paragraph 3 of the President's 1950 Order (as amended in 1956) they were held to be professing a religion other than the Hindu or Sikh religion and were, therefore, not treated as Scheduled Castes.

The 1961 variation from the 1951 Scheduled Caste population is the net result of the following three factors: (*i*) changes made in the 1950 declared list in 1956 and 1960 ; (*ii*) conversion of some erstwhile Scheduled Caste persons to Buddhism ; and (*iii*) natural growth during the decade.

### Changes made in the list of Scheduled Castes

The changes in the President's 1950 Order made in 1956 and 1960 have been described on page 21. We may consider them in the same order :—

(*i*) The inclusion of Sikh religion along with Hindu religion has added only 38 persons to the total Scheduled Caste population in 1961 ;

(*ii*) The population of the six newly added Scheduled Castes in 1961 is as follows :—

| | |
|---|---|
| Holar .. .. .. | 27,602 |
| Pasi .. .. .. | 1,354 |
| Tirgar .. .. .. | 61 |
| Ganda .. .. .. | 275 |
| Khatik .. .. .. | 13,584 |
| Sansi .. .. .. | 4 |
| Total .. | 42,880 |

This additional population is 2 per cent of the total Scheduled Caste population in the State or 0·85 per cent of the combined population of Scheduled Castes and Buddhists in 1961;

(*iii*) Inclusion of a few names of sub-castes or synonyms against some of the Scheduled Castes should not, in view of the legal position, entitle any more persons to be treated as Scheduled Castes. But it depends upon how the notified list had been used or interpreted on the field during the 1951 Census. Specific mention of a few sub-castes should at least have reduced the number of doubtful cases. It is, however, difficult to have any quantitative assessment of the difference this change may have made in the 1961 Scheduled Caste population;

(*iv*) Six Scheduled Castes, *viz.*, (1) Chakrawadya Dasar, (2) Chuhar, (3) Dakaleru, (4) Shingdav, (5) Sochi and (6) Timaii were deleted from the list. Their population had not been reported separately in 1951. But their deletion from the list would itself suggest that none of them had any substantial population in the State;

(*v*) Two more Scheduled Castes (*viz.*, Kolcha and Vitholia) have been deleted from the list. Both of them have been included in the list of Scheduled Tribes, Kolcha as a sub-tribe of Koli Dhor and Vitholia as an independent Scheduled Tribe. The 1961 population of Kolcha is not known separately. Vitholia has 898 persons. These two together may not have made a difference of more than 2,000 to the total Scheduled Caste population in 1961;

(*vi*) Ten other independent Scheduled Castes, *viz.* Asodi, Chambhar, Dhegu Megu, Machigar, Mini Madig, Rohit, Vankar, Mochi, Satnami and Madig have been included as sub-castes under Bhambi, Mahar, Mang or Mahyavanshi and Chambhar. Persons belonging to those castes or sub-castes continue to be Scheduled Castes and this change should not make any appreciable difference in the Scheduled Caste population in 1961.

In brief, we may say that out of the changes made in the list of Scheduled Castes in 1956 and 1960, the addition of six new Scheduled Castes has alone added a population of 42,880 and all other changes either set each other off or together do not make any appreciable difference to the Scheduled Caste population in 1961.

### Conversion to Buddhism

The 1951 Census had returned only 2,487 Buddhists in Maharashtra. By the average rate of natural growth their population in 1961 might have been about 3,000. As against this, 2,789,501 persons have in 1961 returned their religion as Buddhism or Nav-Bauddha. The 1951 and 1961 population for Buddhists is shown in the statement below for the State, four administrative divisions and 26 districts :—

| 25. Bhandara .. .. | .... | 214,784 |
| 26. Chanda .. .. | 516 | 147,861 |

It will be seen that the Buddhist population has increased in each of the 26 districts. Nagpur district now has the largest Buddhist population (2·34 lakhs) and Kolhapur district has the smallest (9,695). The Scheduled Caste population has correspondingly gone down in all the districts.

The movement of conversion of Scheduled Castes to Buddhism began at Nagpur in October, 1956, when the late Dr. Ambedkar changed his religion to Buddhism, along with three lakhs of his followers. The movement gained momentum after his death. It spread to larger cities first and then to smaller towns and villages. The mass conversions continued in 1957, but it is said that there have been very few new additions to Buddhism after 1957.

The 1951 Census had not shown population figures for each Scheduled Caste separately. It is, therefore, difficult to determine the extent to which the different Scheduled Castes have been influenced by the movement. It is, however, a general presumption that the conversions were limited mostly to the members of the Mahar caste, which is the largest among the Scheduled Castes in Maharashtra.

The 1961 Census provided the first measure of the impact the conversion movement had in Maharashtra and other States. In the whole of India, the number of Buddhists went up from 1·8 lakhs in 1951 to 32·5 lakhs in 1961. The number of Buddhists in Maharashtra is 27·90 lakhs which is over 85 per cent of the total Buddhist population in India and 7·05 per cent of the total population of the State. The strength of 22·27 lakhs of the Scheduled Caste population in the State in 1961 shows that more than 55 per cent of the Scheduled Castes in Maharashtra must have changed their religion to Buddhism.

The State Government has from 1st May, 1960, extended* all concessions and facilities available to Scheduled Castes also to the Scheduled Caste converts to Buddhism except the statutory concessions under the Constitution and certain special schemes for the removal of untouchability, etc. which cannot by their very nature apply to non-Hindus.

The Buddhist population in the State and in each of its districts is very closely mixed up with the Scheduled Caste population. In fact, most of the Mahar households may, at the moment, have a few members converted to Buddhism and some others still professing Hinduism. The combined population of the Scheduled Castes and Buddhists together with that of its two constituents is, therefore, shown in the statement on page 32.

### Natural Growth

A substantial section of the Scheduled Caste population returned Buddhism as their religion at the 1961 Census and has consequently been excluded from the Scheduled Caste population of the State. Comparison of the Scheduled Caste populations of 1951 and 1961 from district to district does not, therefore, give any indication of the natural growth of the Scheduled Caste population. The statement below shows the 1951 and 1961 populations for the Scheduled Castes and Buddhists combined and the decade variation of that combined population compared with the corresponding variation for the general population.

| 26. Chanda .. .. .. | 175,396 | 190,504 | 8·61 | 17·58 | 77·62 |

It will be seen that for the State as a whole and for 17 out of the 26 districts, the decade growth of the combined population of Scheduled Castes and Buddhists is larger than that of the general population. This may be partly due to the addition of six new Scheduled Castes together having a population of 42,880 and partly to an improved standard of enumeration of Scheduled Castes in the 1961 Census. The four districts which show significantly lower rates of growth for the combined Scheduled Caste and Buddhist population than those for the general population are Kolaba, Parbhani, Yeotmal and Chanda. A plausible reason for Kolaba appears to be migration of more Scheduled Castes from Kolaba to Thana and Greater Bombay. Yeotmal and Chanda have considerable additions of non-Scheduled Caste (Tribal) population simply because of the improvement in the Census count. Parbhani might need further local investigation though the difference in the two growth rates is not quite large.

Apart from these local differences, the growth of the combined population of Scheduled Castes and Buddhists is at almost the same rate as that for the general population and the excess (1·73 per cent) growth can be attributed to the changes made in the declared list after 1951. This is quite natural because the combined population is evenly spread over all areas of the State and even its rural-urban distribution is more or less on par with that of the general population. Possibility of any under-enumeration can also be safely ruled out.

**Rural-Urban Distribution**

17·41 lakhs or 78·20 per cent of the Scheduled Caste population is found in rural areas and 4 85 lakhs or 21·80 per cent is found in urban areas. The corresponding proportions for the general population of Maharashtra are 71·78 per cent and 28·22 per cent respectively. Unlike the Scheduled Tribes, the Scheduled Castes are not entirely a rural people though they are a little more rural than the general population of the State.

Out of the 266 towns in Maharashtra, 127 have 5 per cent or more population belonging to Scheduled Castes. 22 out of them have 10 per cent or more population belonging to Scheduled Castes. They are shown below with their proportions of Scheduled Caste population:—

| District | Taluka/Mahal | Town | Percentage of Scheduled Caste population to total population |

Out of the 11 numerically important Scheduled Castes having more than seven thousand population each, 'Meghval' is found exclusively in urban areas. Other Scheduled Castes having larger proportions of their population in urban areas are Bhangi (88·65 per cent), Mahyavanshi (86·37 per cent), Dhor (47·99 per cent), Khatik (45·48 per cent) and Chambhar (28·27 per cent). The two largest Scheduled Castes, *viz.*, Mahar (13·81 per cent) and Mang (15·58 per cent), have lower proportions in urban areas than all Scheduled Castes taken together.

A few minor Scheduled Castes have a very large proportion of their population in urban areas, *e.g.*, Dom (96·80 per cent), Pasi (99·63 per cent), Chalvadi (81·66 per cent), Shenva (99·38 per cent), Mukri (97·67 per cent), Turi (98·13 per cent), Baked (99·20 per cent), Garoda (81·34 per cent), Halleer (98·01 per cent) and Ghasi (84·00 per cent).

Out of the 57 declared Scheduled Castes, five castes, *viz.*, Meghval, Nadia, Bindla, Byagara and Mala Sale have been returned exclusively in the urban areas in the State. Their names do not, therefore, appear in the tables presenting information for rural areas only [*e.g.*, SCT-I—Part A (Rural) and SCT-III—Part B (i)]. Similarly seven Scheduled Castes, *viz.*, Aray (Mala), Mala Sanyasi, Mala Dasari, Anamuk, Sansi, Mashti and Khangar have been returned exclusively in the rural areas. Their names do not appear in the tables which present material for urban areas only [*e.g.*, SCT-I—Part A (Urban) and SCT-III—Part A (i)].

**Sex Ratio**

The 1961 sex ratios (i.e. the number of females per 1,000 males) for Scheduled Caste population and the general population for total, rural and urban areas are as follows :—

| | 1961 Sex Ratios | | |
|---|---|---|---|
| | Total | Rural | Urban |
| General population .. | 936 | 995 | 801 |
| Scheduled Caste population .. | 962 | 979 | 903 |

On the whole, the Scheduled Castes have more females than the general population. It is due to a large number of non-Scheduled Caste male migrants coming from outside the State. Rural and urban sex ratios however show a different pattern. There are more females among the Scheduled Castes in urban areas, again because the sex ratio for the general population in urban areas is reduced due to non-Scheduled Caste male workers coming from outside the State as well as from rural areas within the State. Scheduled Castes in urban areas appear to live more by families than the general population. The pattern of migration to urban areas raises the sex ratio for the general population in rural areas. But the rural-urban difference is narrower for the Scheduled Castes and their rural sex ratio is, therefore, a little lower than that of the general population.

The 1951 and 1961 sex ratios for the general population and the Scheduled Caste population are as follows. Figures for Buddhists and the combined population of Scheduled Castes and Buddhists are also shown for comparison :—

| | Sex Ratios | |
|---|---|---|
| | 1951 | 1961 |
| General population .. .. | 941 | 936 |
| Scheduled Caste population .. | 997 | 962 |
| Buddhist population .. .. | 519 | 991 |
| Combined population of Scheduled Castes and Buddhists. | 996 | 978 |

The 1961 sex ratio (936) for the general population is five points lower than that of 1951. The 1961 sex ratio (962) for the Scheduled Castes is, however, 35 points lower than that of 1951. Thus, comparatively larger deficiency of females has arisen on account of—

(*i*) preponderance of males in the population (42,880) of six new Scheduled Castes added to the list in 1956; and

(*ii*) conversion of a comparatively larger number of females from the erstwhile Scheduled Caste population.

The total population of the six newly added Scheduled Castes has a sex ratio of 940 and a deficiency of about 2,000 females for parity.

The 1961 Buddhist population has a sex ratio of 991 against 962 for the Scheduled Caste population. More females have thus reported their religion as Buddhist. This is natural as employed Scheduled Caste men might have feared loss of privileges and boys the loss of free-studentships, scholarships, etc.

The sex ratio for the combined population of Scheduled Castes and Buddhists was 996 in 1951 and is 978 in 1961. Thus, the sex ratio for the combined population has gone down from 1951 to 1961 by 18 points as compared to the reduction of only five points for the general population. The male population for Scheduled Castes and Buddhists combined has increased from 20·05 lakhs in 1951 to 25·36 lakhs in 1961 or 26·48 per cent over that of 1951. The female population for the group increased from 19·98 lakhs in 1951 to 24·80 lakhs in 1961, i.e., 24·17 per cent over that of 1951. It is significant that both the growth rates for males and females for Scheduled Castes are larger than the average decade rates of growth of the general population for the State. Even for the general population, the growth of males during the decade (23·89) is larger than that of females (23·29). The larger reduction in the sex ratio for the Scheduled Caste population may indicate : (*i*) immigration of Scheduled Caste males from outside the State; and (*ii*) higher mortality among the Scheduled Caste females compared to their males.

The larger growth rates for both males and females among the Scheduled Castes should rule out the possibility of any under-enumeration of Scheduled Castes and particularly the females among them.

The 1961 sex ratios for the eleven numerically important Scheduled Castes are as follows :—

| | 1961 Sex Ratio |
|---|---|
| **All Scheduled Castes** .. | 962 |
| (1) Mahar .. .. | 962 |
| (2) Mang .. .. | 978 |
| (3) Chambhar .. .. | 964 |
| (4) Bhangi .. .. | 855 |
| (5) Dhor .. .. | 937 |
| (6) Holar .. .. | 980 |
| (7) Madgi .. .. | 948 |
| (8) Khatik .. .. | 968 |
| (9) Mahyavanshi .. .. | 839 |
| (10) Meghval .. .. | 987 |
| (11) Basor .. .. | 939 |

The three biggest Scheduled Castes have sex ratios equal to or higher than the average for all Scheduled Castes. Bhangi and Mahyavanshi have the lowest sex ratios (855 and 839 respectively). It is natural as they appear to be migrating to urban areas in Maharashtra from outside the State, most of them leaving their families at home at least for the few initial years. Meghval is another Scheduled Caste having larger proportion in urban areas. But it has the highest sex ratio among the eleven Scheduled Castes. Holar and Mang also have considerably high sex ratios (980 and 978 respectively).

**Age Composition**

Table SCT-II—Part A at pages 91 to 150 shows the distribution of Scheduled Caste population by three broad age-groups, *viz.*, 0–14, 15–44 and 45 and above. The 1961 proportions of the three age-groups for Scheduled Caste population and for the general population of the State are as follows :—

| | Proportion of population in age groups to the total population | | |
|---|---|---|---|
| | 0–14 | 15–44 | 45+ |
| General population (rural and urban combined). | 40·66 | 44·02 | 15·32 |
| Scheduled Caste population (rural and urban combined). | 43·18 | 42·65 | 14·17 |

The Scheduled Caste population is more youthful than the general population. Its proportion in the age-group 15–44 is lower than that of the general population.

The percentages of population in the three age-groups to the total population for 11 numerically important Scheduled Castes are as follows :—

| | Total | 0—14 | 15—44 | 45+ |
|---|---|---|---|---|
| **All Scheduled Castes** .. .. | **100** | **43·18** | **42·65** | **14·17** |
| (1) Mahar .. .. | 100 | 42·41 | 42·97 | 14 62 |
| (2) Mang .. .. | 100 | 43·72 | 42·30 | 13 98 |
| (3) Chambhar .. .. | 100 | 43·64 | 41 97 | 14·39 |
| (4) Bhangi .. .. | 100 | 44·34 | 45·62 | 10·04 |
| (5) Dhor .. .. | 100 | 45·25 | 40 82 | 13·93 |
| (6) Holar .. .. | 100 | 44·91 | 40 52 | 14·57 |
| (7) Madgi .. .. | 100 | 40·78 | 45·74 | 13·48 |
| (8) Khatik .. .. | 100 | 42 91 | 41·57 | 15·52 |
| (9) Mahyavanshi .. .. | 100 | 39 92 | 48·60 | 11·48 |
| (10) Meghval .. .. | 100 | 46·28 | 43·52 | 10·20 |
| (11) Basor .. .. | 100 | 40·06 | 44·95 | 14 99 |

Among the eleven Scheduled Castes shown in the statement, Meghval and Dhor have the highest proportions of population in the 0—14 age-group. These large proportions for those two castes are, however differently reflected in the other age-groups. Meghval has high proportion in the age-group 15—44 but extremely low proportion in the age-group 45 and above. Dhor, on the other hand, has a high proportion in the age-group 45 and above but extremely low proportion in the age-group 15—44. Bhangi is another Scheduled Caste having a very low proportion (only 10·04 per cent) of population in the age-group 45 and above. It may indicate that old persons from Bhangi and Meghval castes return to places outside the State. It may also indicate depressed living standards for the two castes. Mahyavanshi caste has the largest proportion (48·6 per cent) of population in the age-group 15—44. It may indicate that more adult workers of that caste migrate to Bombay and other places from outside the State.

**Marital Status**

Table SCT-II—Part A at pages 91 to 150 shows the distribution of population of the Scheduled Castes as a group as well as of each individual Scheduled Caste classified by three broad age-groups and cross-classified by sex and four marital status categories. The distribution of the Scheduled Caste population and the general population in the State by marital status for males and females of all ages is as follows :—

| | Total | Never Married | Married | Widowed | Divorced or separated |
|---|---|---|---|---|---|
| General population— | | | | | |
| Males .. | 100 | 53·54 | 43·11 | 3·13 | 0·42 |
| Females .. | 100 | 42·20 | 45·69 | 11·49 | 0·62 |
| Scheduled Caste population— | | | | | |
| Males .. | 100 | 52·03 | 44·93 | 2·57 | 0·47 |
| Females .. | 100 | 40·29 | 48·21 | 10·67 | 0·83 |

The proportions of never married among the Scheduled Castes are lower both for males and females than in the general population. Proportions of widowed are also similarly lower among the Scheduled Castes. The proportions of married are higher both for males and females. It may indicate early marriages and more remarriages among the Scheduled Castes.

The distribution of population of 11 numerically important Scheduled Castes by marital status is shown below :—

| Name of Scheduled Caste | | Never Married | Married | Widowed | Divorced or separated |
|---|---|---|---|---|---|
| 1 | | 2 | 3 | 4 | 5 |
| (1) Mahar .. .. .. | Males .. .. .. | 52·83 | 44·03 | 2·63 | 0·51 |
| | Females .. .. .. | 39·83 | 47·85 | 11·45 | 0·87 |
| (2) Mang .. .. .. | Males .. .. .. | 50·96 | 46·16 | 2·41 | 0·47 |
| | Females .. .. .. | 39·11 | 49·59 | 10·41 | 0·89 |
| (3) Chambhar .. .. .. | Males .. .. .. | 52·41 | 44·56 | 2·62 | 0·41 |
| | Females .. .. .. | 41·44 | 47·54 | 10·33 | 0·69 |
| (4) Bhangi .. .. .. | Males .. .. .. | 51·71 | 45·18 | 2·73 | 0·38 |
| | Females .. .. .. | 46·60 | 45·37 | 7·56 | 0·47 |
| (5) Dhor .. .. .. | Males .. .. .. | 55·63 | 41·01 | 3·02 | 0·34 |
| | Females .. .. | 43·71 | 45·32 | 10·25 | 0·72 |
| (6) Holar .. .. .. | Males .. .. .. | 52·64 | 44·57 | 2·35 | 0·44 |
| | Females .. .. .. | 40·29 | 47·61 | 11·22 | 0·88 |
| (7) Madgi .. .. .. | Males .. .. .. | 47·43 | 49·18 | 2·76 | 0·63 |
| | Females .. .. .. | 38·89 | 49·47 | 10·80 | 0·84 |
| (8) Khatik .. .. .. | Males .. .. .. | 54·08 | 41·98 | 3·29 | 0·65 |
| | Females .. .. .. | 44·28 | 44·54 | 10·07 | 1·11 |
| (9) Mahyavanshi .. .. .. | Males .. .. .. | 53·33 | 44·57 | 1·70 | 0·40 |
| | Females .. .. .. | 46·26 | 43·34 | 8·90 | 1·50 |
| (10) Meghval .. .. .. | Males .. .. .. | 60·73 | 37·31 | 1·37 | 0·59 |
| | Females .. .. | 50·01 | 40·76 | 8·43 | 0·80 |
| (11) Basor .. .. .. | Males .. .. .. | 51·04 | 44·26 | 4·11 | 0·59 |
| | Females .. .. | 39·16 | 47·07 | 13·03 | 0·74 |

Meghval has the largest proportions of never married persons and the smallest proportions of married persons both for males and females. It is partly due to the larger proportions of population in the age-group 0—14. Mang has the largest proportion of married for females. It may be partly due to more child marriages discussed below.

**Child marriages**

The proportions of married persons of 0—14 age-group to the total population of that age-group for general population and Scheduled Caste population as well as for the 11 numerically important Scheduled Castes are as shown in the next column :—

| | Proportions of married persons of 0–14 age-group to total population of that group | |
|---|---|---|
| | Males | Females |
| General population .. .. .. | 0·67 | 4·73 |
| All Scheduled Castes .. .. .. | 1·83 | 9·21 |
| (1) Mahar .. .. .. | 1·77 | 8·94 |
| (2) Mang .. .. .. | 2·15 | 11·12 |
| (3) Chambhar .. .. .. | 1.59 | 8·20 |
| (4) Bhangi .. .. .. | 1·01 | 4·23 |
| (5) Dhor .. .. .. | 1·63 | 6·59 |
| (6) Holar .. .. .. | 1·20 | 12·13 |
| (7) Madgi .. .. .. | 1·63 | 8·11 |
| (8) Khatik .. .. .. | 0·52 | 2·71 |
| (9) Mahyavanshi .. .. .. | 0·36 | 1·10 |
| (10) Meghval .. .. .. | 0·22 | 0·10 |
| (11) Basor .. .. .. | 1·54 | 4·78 |

The differences of proportions of married males and females from Scheduled Caste to Scheduled Caste appear to be due to the differences in their rural-urban distribution. Meghval, Bhangi and Mahyavanshi who have larger proportions of population in urban areas naturally show extremely low proportions of married in the age-group 0–14. Mang caste appears to be holding on to the custom of child marriages and has very high proportions of married in the age-group 0-14 both for males (2·15) and females (11·12).

**Literacy and Education**

Tables SCT-III—Parts A (i) and B (i) show for urban and rural areas respectively, the number of illiterates, literates (without educational level) and with different educational levels for Scheduled Castes as a group and for each Scheduled Caste separately.

The following table shows the literacy percentages for total, males and females of the general population and of the Scheduled Castes for Maharashtra and the four administrative divisions :

| State/Division | General population | | | Scheduled Caste population | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| **Maharashtra** .. .. .. .. | **29·82** | **42·04** | **16·76** | **15·78** | **25·46** | **5·70** |
| Bombay Division .. .. .. .. | 37·75 | 49·61 | 24·41 | 25·51 | 38·22 | 11·74 |
| Poona Division .. .. .. .. | 29·30 | 42·03 | 16·10 | 17·61 | 28·56 | 6·26 |
| Aurangabad Division .. .. .. | 16·29 | 26·45 | 5·75 | 5·89 | 10·68 | 1·01 |
| Nagpur Division .. .. .. .. | 27·88 | 41·06 | 14·12 | 18·53 | 30·11 | 6·51 |

The literacy rates for Scheduled Castes are no doubt lower than those for the general population in all the four divisions. Yet, during the last decade, the differences have been reduced considerably. It is significant that the State average literacy rates for the Scheduled Castes both for males and females are on par with those of the general population for Aurangabad Division. The Scheduled Castes appear to be taking full advantage of the educational facilities available to them.

The 1961 Literacy rates for the 11 numerically important Scheduled Castes (having more than 7,000 population) for total, males and females are as follows :—follows :—

| | Percentage Literacy | | |
|---|---|---|---|
| | Persons | Males | Females |
| **All Scheduled Castes** .. .. | **15·78** | **25·46** | **5·70** |
| (1) Mahar .. .. .. | 15·69 | 25·67 | 5·31 |
| (2) Mang .. .. .. | 9·87 | 17·04 | 2·54 |
| (3) Chambhar .. .. .. | 21·17 | 32·86 | 9·04 |
| (4) Bhangi .. .. .. | 26·79 | 40·16 | 11·17 |
| (5) Dhor .. .. .. | 27·12 | 39·75 | 13·65 |
| (6) Holar .. .. .. | 10·98 | 19·63 | 2·16 |
| (7) Madgi .. .. .. | 6·72 | 12·34 | 0·80 |
| (8) Khatik .. .. .. | 27·72 | 42·86 | 12·08 |
| (9) Mahyavanshi .. .. .. | 47·82 | 61·96 | 30·96 |
| (10) Meghval .. .. .. | 38·92 | 55·81 | 21·82 |
| (11) Basor .. .. .. | 21·71 | 35·47 | 7·05 |

Mahyavanshi and Meghval have very high literacy rates both for males and females. They are even better than the respective State averages for the general population. That is because of the larger proportions of their populations in urban areas.

Among the first three largest Scheduled Castes (Mahar, Mang and Chambhar), Chambhar, which again has a larger proportion of population in urban areas, has the highest literacy rates both for males and females. Mang which is the second biggest Scheduled Caste in the State has the lowest literacy rates both for males and females, not only among the first three Scheduled Castes but among the first eleven Scheduled Castes, with the only exception of Madgi which is supposed to be a Telugu speaking sub-caste of the same group. The low literacy rates for Mang appear to be depressing the average rates for all Scheduled Castes considerably.

**Educational Levels**

Out of the total Scheduled Caste population of 2,226,914, 134,096 or 6·02 per cent have completed primary education and 8,535 have attained matriculation or higher levels.

Compared to the Scheduled Tribes, the Scheduled Castes generally appear to be making very rapid progress in education at all levels.

The Scheduled Castewise distribution of 7,781 males and 754 females who have reached the matriculation or higher level is as follows :—

| | Males | Females |
|---|---|---|
| **All Scheduled Castes** .. .. .. | **7,781** | **754** |
| (1) Bhangi .. .. .. .. | 244 | 21 |
| (2) Chambhar .. .. .. .. | 2,334 | 234 |
| (3) Dhor .. .. .. .. | 329 | 34 |
| (4) Khatik .. .. .. .. | 65 | 2 |
| (5) Mahar .. .. .. .. | 3,535 | 367 |
| (6) Mang .. .. .. .. | 678 | 42 |
| Other Scheduled Castes .. .. | 596 | 54 |

Here again, the progress made by Mahars and Chambhars is in clear contrast to the educational backwardness of Mangs. It will be seen that all Scheduled Castes are not making uniform progress in education and

that some special efforts may be necessary to provide incentives to Mang, Madgi, Holar and others whose progress is obviously very slow.

**Full-time students**

Table SC-I will show that there are 170,847 full-time students among the Scheduled Castes. The population figures for school-going age-group have not been compiled for Scheduled Castes separately. The percentage of full-time students to the total population is 7·67 among the Scheduled Castes as compared to 11·85 among the general population and 3·60 among the Scheduled Tribes. These proportions again reflect the middle position occupied by the Scheduled Castes between the general population and the Scheduled Tribe population as far as education is concerned.

**Religion**

Table SCT-IV—Part A at pages 179 and 180 shows the distribution of population of each Scheduled Caste by religion. Under paragraph 3 of the 1950 Order as amended in 1956, the Scheduled Castes can belong either to Hindu or Sikh religion only. Out of 22·27 lakh persons belonging to Scheduled Castes in Maharashtra, only 38 persons have returned their religion as Sikh. 20 of them are males and 18 females. Their districtwise distribution is as follows :—

| District | Persons | Males | Females |
|---|---|---|---|
| Greater Bombay .. .. | 4 | 3 | 1 |
| Ahmadnagar .. .. .. | 1 | 1 | .. |
| Amravati .. .. .. | 4 | 2 | 2 |
| Nagpur .. .. .. | 17 | 10 | 7 |
| Bhandara .. .. | 12 | 4 | 8 |
| Total .. | 38 | 20 | 18 |

The distribution of persons professing Sikh religion by Scheduled Castes is as follows :—

| | Persons | Males | Females |
|---|---|---|---|
| Bhangi .. .. .. | 24 | 13 | 11 |
| Chambhar .. .. | 5 | 3 | 2 |
| Mahar .. .. .. | 9 | 4 | 5 |
| Total .. | 38 | 20 | 18 |

Bhangi and Chambhar (Chamar) along with many names of their sub-castes are common groups of Scheduled Castes in Maharashtra and Punjab. The persons reporting Sikh religion perhaps belong more to those Punjab Scheduled Castes enumerated in Maharashtra. The possibility of a few stray cases of conversion cannot also be ruled out.

A very large number of persons from the erstwhile Scheduled Castes (belonging almost exclusively to the Mahar caste) have in 1961 returned their religion as Buddhism or Nav-Bauddha. This subject has already been discussed on page 31.

**Mother-tongues**

Unlike the Scheduled Tribes, no special table showing the distribution of population by mother-tongues has been prepared for Scheduled Castes. A few mother-tongues are however known by the names of the castes speaking them. Material on those minor languages of the castes has been presented in Table C-V in Part II-C of the Maharashtra Census Report. They have been described in Part I-A of the report also. As far as the present volume is concerned, no material is presented in this section in respect of the mother-tongues spoken by the Scheduled Castes.

**Economic Activity**

Table SCT-I—Part A (pages 44 to 85) shows the distribution of Scheduled Caste population of rural and urban areas according to workers and non-workers and of workers according to nine broad categories of economic activity. The concepts of workers and non-workers and the nine broad categories of economic activity have been explained in the introductory note at page 3. The proportions of workers for total, rural and urban areas and for males and females out of the Scheduled Caste population and the general population of the State are as follows :—

| | Proportions of workers to total population | | |
|---|---|---|---|
| | Total | Rural | Urban |
| General population— | | | |
| Males .. .. | 57·09 | 58·07 | 54·84 |
| Females .. .. | 38·10 | 46·74 | 13·45 |
| Scheduled Caste population— | | | |
| Males .. .. | 56·92 | 59·08 | 49·48 |
| Females .. .. | 44·41 | 50·16 | 22·94 |

For males in rural areas, the labour participation rate (proportion of workers to total population) among the Scheduled Castes is slightly higher than that of the general population. In urban areas, it is five points lower. For Scheduled Caste females, however, the participation rate is higher both in rural and urban areas.

Percentages of workers to total population for males and females of 11 numerically important Scheduled Castes are as follows :—

| | Percentages of workers to total population. | |
|---|---|---|
| | Males | Females |
| **All Scheduled Castes** .. .. | **56·92** | **44·41** |
| (1) Mahar .. .. | 57·59 | 47·19 |
| (2) Mang .. .. | 59·08 | 49·71 |
| (3) Chambhar .. .. | 54·32 | 36·34 |
| (4) Bhangi .. .. | 49·02 | 30·68 |
| (5) Dhor .. .. | 50·70 | 27·98 |
| (6) Holar .. .. | 56·97 | 41·60 |
| (7) Madgi .. .. | 63·49 | 49·41 |
| (8) Khatik .. .. | 54·53 | 32·16 |
| (9) Mahyavanshi .. .. | 48·09 | 26·82 |
| (10) Meghval .. .. | 36·73 | 20·97 |
| (11) Basor .. .. | 59·55 | 54·24 |

The labour participation rates are naturally lower for Scheduled Castes which are more urbanised than for those which are not so urbanised. "Meghval" which is found exclusively in urban areas has the lowest percentages of workers to total population for both males and females (36·73 and 20·97 respectively). Similarly, Mahyavanshi and Bhangi which have more than 80 per cent of their population in urban areas have lower labour participation rates. Madgi has the highest proportion of workers among males and the second highest among females. Mahar, Mang and Basor also have higher proportions of male and female workers than for all Scheduled Castes taken together.

The distribution of workers into nine broad categories of economic activity is shown below separately for males and females among the Scheduled Castes and among the general population :—

| Category of worker | Scheduled Caste population | | General population | |
|---|---|---|---|---|
| | Males | Females | Males | Females |
| **All Categories** .. | **100·00** | **100·00** | **100·00** | **100·00** |
| I Cultivator .. | 18·16 | 19·07 | 40·68 | 54·79 |
| II Agricultural Labourer. | 38·88 | 60·87 | 13·12 | 32·90 |
| III In Mining, Quarrying, Livestock, Forestry, etc. | 4·02 | 0·43 | 2·97 | 0·86 |
| IV Household Industry .. | 14·21 | 8·71 | 4·80 | 3·74 |
| V Manufacturing other than Household Industry. | 6·88 | 1·65 | 10·22 | 1·54 |
| VI Construction .. | 1·80 | 0·78 | 1·69 | 0·53 |
| VII Trade and Commerce .. | 1·53 | 0·80 | 6·61 | 1·17 |
| VIII Transport, Storage and Communications. | 2·72 | 0·40 | 3·65 | 0·29 |
| IX Other Services .. | 11·80 | 7·29 | 11·26 | 4·18 |

The Scheduled Castes depend upon agriculture a little less than the general population in the State. The combined percentage for male cultivators and agricultural labourers is 57·04 against 58·80 for the general population. For females, the proportion is 79·94 in the Scheduled Caste population as against 87·69 in the general population.

A significant departure is that the proportions of agricultural labourers are considerably higher both for males and females among the Scheduled Castes than among the general population. It shows that the participation of Scheduled Castes in agriculture is more as agricultural labour.

The proportion of Scheduled Caste workers in Category IV Household Industry is higher because most of their traditional activities are household industries. Tanning, currying, repairing of shoes, making of brooms, baskets or ropes are a few examples. The Scheduled Caste proportions of workers in trade and commerce are extremely low.

Proportions of workers engaged in nine broad categories of economic activity for 11 numerically important Scheduled Castes are shown in the statement below:—

| Name of Scheduled Caste | CATEGORIES I Cultivators | II Agricultural Labourers | III Mining, Quarrying, etc. | IV Household Industry | V Manufacturing | VI Construction | VII Trade and Commerce | VIII Transport, Storage & Communications | IX Other Services |

Mang has the lowest proportion of Cultivators among the three major Scheduled Castes. Comparatively, it has higher proportions in Agricultural Labour and Household Industry.

Bhangi and Meghval naturally have very large proportions in their traditional occupations included in "other services".

Khatik has a very high proportion in agricultural labour.

Basor has the highest proportion in household industry. 81 per cent of their workers are engaged in their traditional occupation, i.e., basket-making.

Table SCT-I—Part A also shows figures of workers among Scheduled Castes as a group and in each individual caste engaged in two special occupations, viz., (1) tanning and currying of hides and skins and (2) scavenging. The former occupation is predominantly found in rural areas, while the latter is mostly found in urban areas. The figures of workers engaged in these occupations as principal work only are shown in the table and they are exclusive of persons engaged in those activities as subsidiary work. The distribution of workers engaged in these occupations by urban and rural areas and by sex is as follows :—

| Area | Tanning and currying of hides and skins | | | Scavenging | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

The workers in these occupations are confined to certain Scheduled Castes and are not, therefore, found among all Scheduled Castes. The castewise distribution of workers in these occupations is given below. It may be noted that tanning and currying of hides and skins does not include making or repairing of footwear and other leather goods. Scavenging includes sweeping of streets, etc.

## Size of Cultivation Holdings

Table SCT-V—Part A shows the distribution of Scheduled Caste households engaged in cultivation by interest in land and size of cultivation holdings. The material is, however, available only for rural areas and for all Scheduled Castes as a group and not for each Scheduled Caste separately.

Distribution of cultivating households in rural areas for Scheduled Castes and for the general population by interest in land is as follows :—

| Interest in Land | General households | Scheduled Caste households |
|---|---|---|
| (a) Entirely owned .. .. | 78·50 | 84·95 |
| (b) Entirely leased in .. .. | 7·28 | 5·25 |
| (c) Partly owned and partly leased in .. | 14·22 | 9·80 |
| Total .. | 100·00 | 100·00 |

It has been stated earlier that the Scheduled Caste participation in agriculture is more as agricultural labourers. The proportion of "owner cultivator" among the Scheduled Caste households is higher than that among the general households.

Percentage distribution of cultivating households by size of land cultivated is as follows :—

| Size of Holding | General households | Scheduled Caste households |
|---|---|---|
| **All Sizes** .. .. | **100·00** | **100·00** |
| (1) Less than 1 acre .. .. | 4·89 | 8·43 |
| (2) 1·0—2·4 .. .. | 15·78 | 20·00 |
| (3) 2·5—4·9 .. .. | 16·69 | 18·92 |
| (4) 5·0—7·4 .. .. | 13·73 | 14·01 |
| (5) 7·5—9·9 .. .. | 7·70 | 7·49 |
| (6) 10·0—12·4 .. .. | 9·27 | 7·99 |
| (7) 12·5—14·9 .. .. | 3·86 | 3·10 |
| (8) 15·0—29·9 .. .. | 17·48 | 12·98 |
| (9) 30·0—49·9 .. .. | 6·78 | 4·24 |
| (10) 50 and above .. .. | 3·27 | 2·13 |
| (11) Unspecified .. .. | 0·55 | 0·71 |

The proportions for Scheduled Caste cultivating households are higher for the first four small size groups and are lower for all the large size groups (5) to (10). The proportions of Scheduled Caste cultivating households in the first two size groups are considerably higher. Thus, even among the cultivating households the Scheduled Castes have comparatively a larger number of small cultivators.

# INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

## EXPLANATORY NOTE

This table presents the distribution of Scheduled Caste population by sex and economic activity. Material is presented for all the Scheduled Castes as a group as well as for each Scheduled Caste separately. The presentation of Scheduled Castes is in alphabetical order.

2. Material is presented for Maharashtra State, its four administrative divisions and twenty-six districts and under each administrative unit for rural and urban areas separately.

3. The classification of Scheduled Caste population by economic activity is into workers and non-workers and of the workers into nine broad industrial categories. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) will be found in the Introductory Note at page 3.

4. In a way this table presents castewise break-up of the material relating to economic classification presented in Table C-VIII—Part A printed in Part II-C (i) of the Maharashtra Census Report.

5. The last group of " Unclassified " given in the table is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been entered in the Census Slip.

6. The table also shows the number of persons belonging to each Scheduled Caste engaged in special occupations like (*i*) Tanning and currying of hides and skins and (*ii*) Scavenging. The number of persons shown as engaged in the two occupations consists of only those who are engaged in them as their principal work. Those engaged in them in addition to some other principal work are not included in it. The number does not obviously include those like the Nav-Bauddhas who may be engaged in those occupations but are not treated as members of Scheduled Castes. Persons engaged in tanning and currying of hides and skins include workers in the occupational family " 853 " of the National Classification of Occupations who remove hides and skins from dead or slaughtered animals, dress pelt, tan and transform hides or skins into finished leather by dehairing, fleshing liming, deliming, chemical treating, glazing, buffing, seasoning, etc.

7. The workers engaged in ' scavenging ' occupation include those who clean and sweep offices of Government or institutions, household tenements, roads, sewers, etc. The number of such persons shown in the table includes sweepers (both dry and wet) and sewer sweepers.

TABLE SCT-II—PART A

# AGE AND MARITAL STATUS FOR SCHEDULED CASTES

## EXPLANATORY NOTE

This table gives the distribution of Scheduled Caste population by sex, broad age-groups and marital status. The presentation is for all Scheduled Castes as a group as well as for each Scheduled Caste separately. Material is presented for Maharashtra State, its four administrative divisions and twenty-six districts but without any break-up for rural and urban areas.

2. The three broad age-groups adopted in this table are 0—14, 15—44 and 45 and above. The last group of "age not stated" includes persons in whose case age had not been returned. The break-up by age-groups is by a horizontal spread in the column headings.

3. Answers relating to marital status were recorded against Question 3 of the Individual Slip and have been classified in the table into the following four categories:—

"*Never married*" are persons who have never been married.

"*Married*" persons are those who are currently married, whether for the first or another time. These include those recognised as married by custom or society and those in stable *de facto* union.

"*Widowed*" persons include those whose husbands or wives are dead and who have not married again.

"*Divorced or separated*"—Persons who have been divorced, either by a decree of a law court or by a regular social or religious custom but who have not remarried are considered as 'divorced'. Those who have been separated from wives or husbands and are staying apart with no apparent intention of living together again are treated as 'separated'. The table shows only the combined figures for 'separated' and 'divorced'.

4. While compiling a similar Table (C-II) for the general population all persons in the age-group 0—9 have been treated as "Never Married" irrespective of the answer to Question 3 of the Individual Census Slip. Such presumption was not made while compiling the present Table (SCT-II) for Scheduled Castes and the classification for all persons including those in the age-group 0—14 has been made with reference to the marital status actually returned during the Census. These figures of marital status for the total and the age-group 0—14 shown in this table may not, therefore, be strictly consistent with the corresponding figures shown in Table C-II presented in the Maharashtra Census Report—Part II-C(i).

TABLE SCT-III—PART A (i)
AND
TABLE SCT-III—PART B (i)

# EDUCATION in Urban Areas only for Scheduled Castes

# EDUCATION in Rural Areas only for Scheduled Castes

## EXPLANATORY NOTE

This table presents the distribution of Scheduled Caste population by sex and educational levels. The figures are presented for all the Scheduled Castes as a group as well as for each Scheduled Caste separately.

2. The educational levels adopted for classification are more elaborate for urban areas and the material is, therefore, presented in two separate parts, Part A (i) for Urban areas and Part B (i) for Rural areas.

3. Material is presented in both the parts for the State, its four administrative divisions and twenty-six districts.

4. Part B (i) for Rural areas presents data for five broad groups of educational levels, *viz.*, (*i*) Illiterate, (*ii*) Literate without educational level, (*iii*) Primary or Junior Basic, (*iv*) Matriculation or Higher Secondary and (*v*) Above Matriculation or Higher Secondary. Part A (i) for Urban areas presents data for each of the first four groups of educational levels shown above and also gives a further break-up of the fifth group into technical and non-technical diploma holders and technical and non-technical university degree or post-graduate degree holders. The table, however, does not present any break-up of Technical degrees or diplomas into different branches, *viz.*, Engineering, Medicine, etc., as is shown in Tables B-III—Part A and C-III—Part B for the general population. These latter tables are presented in the Maharashtra Census Report—Part II-B (i) and Part II-C (i) respectively.

5. The 1961 Census definition of literacy was ability to read and write any simple letter either in print or in manuscript. If a person who could both read and write had also passed a written examination or examinations as proof of an educational level attained, the highest examination passed was recorded in the Census Slip. The figures for educational levels shown in the table relate to the levels already attained and not those being studied.

6. The figures shown for lower educational levels are exclusive of those shown under higher educational levels.

7. In a few cases where the answer to the question on literacy was blank or inadequate the persons concerned have been treated as illiterate unless the answers to the economic questions indicated that they could not be illiterate. In the latter type of cases they were classified as " literate without educational level ".

## TABLE SCT-IV—PART A

# RELIGION FOR SCHEDULED CASTES

## EXPLANATORY NOTE

This table shows the distribution of Scheduled Caste population by religion. Material is presented for all the Scheduled Castes as a group as well as for each Scheduled Caste separately. The figures are presented separately for rural and urban areas under the administrative units concerned.

2. Members of Scheduled Castes can belong either to the Hindu or Sikh religion. In Maharashtra only 38 persons, 20 males and 18 females, belonging to the Scheduled Castes have returned themselves as Sikhs. They are confined only to five districts, *viz.*, Greater Bombay, Ahmadnagar, Amravati, Nagpur and Bhandara. This table has, therefore, been prepared for those five districts, the concerned three administrative divisions and the State only. In the case of other districts, as all the Scheduled Castes belong to the Hindu religion, their figures will be the same as those of the castewise population given in Table SCT-I—Part A.

## SCT-IV—PART A—RELIGION FOR SCHEDULED CASTES

**(Areas for which different Scheduled Castes have been notified under the President's order are shown on pages 23 and 24)**

*N. B.*—Scheduled Caste persons belonging to the Sikh religion have been returned only in five districts, *viz.*, (1) Greater Bombay, (2) Ahmadnagar, (3) Amravati, (4) Nagpur and (5) Bhandara. Separate figures for Hindu and Sikh religions for only these five districts, the concerned revenue divisions and Maharashtra State are presented in this Table. The entire Scheduled Caste population in the remaining 21 districts belongs to the Hindu religion. Castewise population figures for these districts may be seen in Table SCT-I—Part A.

TABLE SCT-V—PART A

# Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural Areas only for Scheduled Castes

## EXPLANATORY NOTE

This table shows the distribution of sample households among Scheduled Castes engaged in cultivation classified by size of land and interest in land cultivated. The table is similar to the Household Economic Table B-XI for general population presented in Part III of the Maharashtra Census Report.

2. Material is presented for the State, its four administrative divisions and twenty-six districts but for rural areas only.

3. The presentation is for all the Scheduled Castes as a group and not for each Scheduled Caste separately.

4. This table has been prepared on the basis of data collected in the Household Schedule canvassed in the 1961 Census and has been compiled for a 20 per cent sample drawn from total households.

5. The classification of cultivating households is in ten size-groups and is presented by a horizontal spread in columns 3 to 13. The last size-group is of households for whom the size of land cultivated had not been specified in the Household Schedule. The cultivating households are those which are engaged in cultivation as an enterprise, principal or secondary, irrespective of the fact whether the land cultivated by them is owned or held from Government or held from private persons or institutions for payment in money, kind or share. The distribution by size-groups shown here is thus of the cultivation or operational holdings and not of the ownership holdings.

6. The three types of interest in cultivated land are : (*i*) owned or held from Government, (*ii*) held from private persons or institutions for payment in money, kind or share and (*iii*) partly held from Government and partly from private persons or institutions for payment in money, kind or share. These three interests are shown by a vertical spread under column 1 and by using symbols (*a*), (*b*) and (*c*) respectively.

TABLE SC·

# PERSONS NOT AT WORK CLASSIFIEI BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVEL FOR SCHEDULED CASTE

## EXPLANATORY NOTE

This table presents the distribution of non-working population among the Scheduled Castes by sex, type of activity and educational levels. Material is presented only for all the Scheduled Castes as a group and not for each Scheduled Caste separately.

2. The presentation is for the State, its four administrative divisions and twenty-six districts and under each administrative unit for total, rural and urban areas separately.

3. The classification of non-workers by type of activity is into the following four groups and is shown by a horizontal spread in columns 5 to 12 :--

(*i*) full-time students ;
(*ii*) persons seeking employment for the first time ;
(*iii*) persons employed before but now out of employment and seeking work ; and
(*iv*) others.

4. Groups (*ii*) and (*iii*) together show the total number of unemployed persons among the Scheduled Castes.

5. The last group of " Others " includes the following five types. Separate figures (as in Table B-IX for general population) have not, however, been compiled by those types for the non-workers among the Scheduled Castes :—

(*a*) Housewives and others engaged in unpaid home duties only;

(*b*) Dependants including infants, children not attending school, permanently disabled, etc.;

(*c*) Rentiers, pensioners and other persons of independent means, who do not work ;

(*d*) Beggars, vagrants, etc.; and

(*e*) Inmates of penal, mental and charitable institutions.

The classification by educational levels is by a vertical spread under column 1. The educational levels used are five, four up to Matriculation or Higher Secondary and the fifth for all educational levels above the fourth.

A Group of Scheduled Tribes, Thana District

# NOTE ON SCHEDULED TRIBES

THE President has under Article 342 of the Constitution declared certain tribes or tribal communities as Scheduled Tribes. Their 1961 population in Maharashtra is 23·97 lakhs, which is slightly more than 6 per cent of the total population of the State and 8 per cent of the total population of Scheduled Tribes in India.

**Statutory provisions**

Statutory provisions pertaining to the Scheduled Tribes in Maharashtra are the preamble and Articles 15, 16, 38, 46, 244, 275, 330, 332, 334, 335, 338, 339, 342 and 366 of the Constitution of India, the orders issued by the President from time to time under Article 342 to declare the Scheduled Tribes and under sub-paragraph (1) of paragraph 6 of the Fifth Schedule to declare the Scheduled Areas and a few Acts of Parliament enacted to amend those orders. All these statutory provisions are reproduced as Appendices to the introductory note at pages 5 to 18.

Clause (25) of Article 366 of the Constitution defines the Scheduled Tribes as " such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under Article 342 to be Scheduled Tribes for the purposes of this Constitution ".

The first order under Article 342 was issued by the President in 1950. That order contained, among others, three Parts of the Schedules (page 11 of the introductory note) applicable to the three erstwhile States of Bombay, Madhya Pradesh and Hyderabad.

The 1950 Order was modified by the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1956 (pages 12 and 13 of the introductory note). As far as Maharashtra State is concerned, this amending Act of 1956 made the following changes in the 1950 list of Scheduled Tribes :—

(*i*) Addition of three new talukas (Wani, Kelapur and Yeotmal) of Yeotmal district to the formerly notified three talukas, *viz.*, Melghat in Amravati district and Gadhchiroli and Sironcha in Chanda district, for which the entire list of Scheduled Tribes of the Nagpur Division was declared as such ;

(*ii*) Addition of three new Scheduled Tribes, *viz.*' Khairwar, Koli Malhar and Vitolia to the list ;

(*iii*) Inclusion of names of sub-tribes or synonyms against most of the declared Scheduled Tribes ;

(*iv*) Deletion from the 1950 list of four independent Scheduled Tribes, *viz.*, Mavchi, Pawra, Vasava and Valvi and their inclusion as sub-tribes against Bhil, or Gamit or Dhanka ;

(*v*) Restricting the notified area for two Scheduled Tribes, *viz.*, Koli Mahadev and Thakur, instead of the entire area of Bombay and Poona Divisions declared under the 1950 order, to a few talukas from Thana, Kolaba, Nasik, Ahmadnagar and Poona districts.

Consequent upon the reorganisation of States in 1956, the lists as amended by the 1956 Act were notified in a revised form as applicable to the new States. Two Scheduled Tribes, *viz.*, Chenchus and Hill Reddis from the Hyderabad list were deleted from the list applicable to the districts of Aurangabad Division.

For Maharashtra and Gujarat States, that revised order was again amended through section 27 of the Bombay Reorganisation Act, 1960 (pages 16 of the introductory note).

**The declared list of Scheduled Tribes**

Part VII-A—' Maharashtra ' in the Eighth Schedule appended to the Bombay Reorganisation Act is thus the declared list of Scheduled Tribes in Maharashtra in force at the moment. Except for the deletion of two Scheduled Tribes, the 1960 list is in substance, *i.e.* to the extent of the names of tribes included in it, exactly the same as had been declared through the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1956.

The entire Part VII-A from the concerned Schedule to the Bombay Reorganisation Act, 1960, is reproduced below :—

**Regional lists, Sub-tribes and synonyms**

The following points may be noted in respect of the President's list of Scheduled Tribes :—

(*i*) There are three separate regional lists for the three areas coming from the erstwhile States of Bombay, Madhya Pradesh and Hyderabad now included in Maharashtra, together making a total of 61 Tribes ;

(*ii*) The list applicable to the old Bombay area contains 19 Scheduled Tribes, which are so declared for all the areas of those 13 districts. In addition, three Scheduled Tribes are declared as such for limited areas specified against each of them ;

(*iii*) The list applicable to the five districts of Aurangabad Division contains 7 Scheduled Tribes, which are so declared for the entire area of those districts ;

(*iv*) The Scheduled Tribes at (*iii*) are also declared as Scheduled Tribes for Rajura taluka, which has been notified as a separate district in the President's Order, but is administered as a taluka in Chanda district ;

(*v*) The list applicable to the Nagpur Division districts contains 32 Scheduled Tribes which are so declared only for six specified Tahsils (Talukas) out of those eight districts. No Scheduled Tribe is declared for the remaining 32 talukas of those districts ;

(*vi*) 29 out of the 61 Scheduled Tribes are shown in the three lists with single names. The remaining 32 have been shown with one or more names of sub-tribes, generic names or synonyms. Some of those names of sub-tribes and generic names or synonyms have been shown with the word ' and ' or ' or ' added. Some others are without any such conjunction ;

(*vii*) Some of the names of sub-tribes are shown with the word "including" prefixed. "Including" can be considered as restrictive, as also indicating the possibility of inclusion of names hitherto left out. No name outside of the President's Order has, however, been included under this cover ;

(*viii*) The three regional lists have six names which are common either to two or all the three lists. Bhil and Gond are common to all the three lists. Most of the common names are shown in the three lists with different synonyms or sub-tribes. Gond, for example, makes different groups in the three lists ;

(*ix*) A tribe shown independently in a region is included as a sub-tribe of another tribe in another region. Thoti, for example, is an independent Scheduled Tribe in Aurangabad Division, but it is shown as a sub-tribe under Gond for Nagpur Division and that too with a slightly different spelling. In a few cases, some names appear in the list for the same region both as independent tribes and as sub-tribes under other tribes. For example, "Nihal" is shown in the Nagpur Division list both as an independent tribe and also as a sub-tribe under Korkus ;

(*x*) In some other cases, a sub-tribe is shown as such under two different tribes. In the old Bombay area list, Tadvi is shown as a sub-tribe under both Bhil and Dhanka, Valvi as a sub-tribe under both Dhanka and Gamit, and Vasava and Vasave as sub-tribes both under Bhil and Gamit ;

(*xi*) Names of some important sub-tribes have not been specifically mentioned. The name of Padvi, for example, an important name under Bhil in certain regions, does not find separate mention in the President's Order ; and

(*xii*) It may be argued whether Valvi, for example, should be included under Dhanka or Gamit. In Maharashtra, Valvi is associated with Bhil.

**Compilation of 1961 Census Tables**

The returns of synonyms and sub-tribes were grouped into main tribes strictly according to the declared list. Difficulties arose in a few cases where the name of the sub-tribe alone was returned in the Census and that sub-tribe was not specifically shown in the declared list or, as in the cases described in clause (*x*), happened to be grouped under two main tribes found in the same locality. Reference to the mother-tongue returns gave clue to the main tribe in many cases. Remaining difficult cases were taken to the category of 'unclassified' Scheduled Tribes.

Recording of the name of the sub-tribe was moreover optional and not obligatory upon every person belonging to any Scheduled Tribe. Majority of them had returned only the name of the main tribe. Our figures for sub-tribes might, therefore, have been misleading as to their exact numerical strength in any specified area of the State.

As stated in clause (*ix*) above Nihal is shown in the declared list both as an independent tribe and as a sub-tribe under Korku. It was however tabulated as included in Korku and not separately. Separate figures for Nihals are thus not available in the tables.

Strict adherence to the declared list has also led to some anomalies. Dhanka and Gamit are good examples. Valvi is included under Dhanka and Vasave and Valvi are included under Gamit, though in Maharashtra they are associated with Bhil. Local knowledge is that Dhankas are not found in Maharashtra, at least not in large numbers. The State Government also considered deletion of this tribe from the list on that ground. But, because of the inclusion of Valvi under Dhanka, the 1961 Census returns, perhaps anomalously, a population of 48,089 for that group.

**Scheduled Tribes not reported in the 1961 Census**

The following Scheduled Tribes were not returned by anyone in the respective specified areas in the 1961 Census :—

(1) Baiga.
(2) Bharia-Bhumia or Bhuinhar-Bhumia including Pando.
(3) Gadaba or Gadba.
(4) Kamar.
(5) Kharia.
(6) Kondh or Khond or Kandh.
(7) Korwa, including Kodaku.
(8) Majhwar.
(9) Munda.
(10) Parja.
(11) Saonta or Saunta.
(12) Sawar or Sawara.

All these names are from the regional list applicable to the districts of Nagpur Division. No one belonging to those tribes was reported in the six specifically notified talukas (tahsils) during the enumeration period.

**Scheduled Tribes and Area restrictions**

Out of the 61 Scheduled Tribes included in the declared list, 12 have not been found in the notified areas. Andh, Bhil, Gond, Kolam, Pardhan and Pardhi had been included in two or all the three regional lists though with different sub-tribes or synonyms. Their combination reduces the number of Scheduled Tribes by eight. Combination of Nihal with Korkus described above reduces it further by one, leaving the list with only 40 Scheduled Tribes.

Because of the area restrictions notified for all Scheduled Tribes of the districts of Nagpur Division, none of the 40 Scheduled Tribes is recognised as such in all areas of Maharashtra. Area restriction is, therefore, a basic limitation to be always remembered while using the figures for population or other characteristics of Scheduled Tribes. When the tables present Scheduled Tribe figures for the State, division or a district it is always implied that the presentation is only for the restricted areas notified against each Scheduled Tribe.

Vd 4326—15a

The restricted areas notified for each of those 40 Scheduled Tribes are shown below. The Scheduled Tribes are arranged in alphabetical order. For economy of space the restricted areas are shown with symbols as follows :—

**Common tribes combined but sub-groups also shown separately**

In respect of the following five common names, in addition to the lines ' total ', entries for three or less sub-groups (*a*), (*b*) and (*c*) are also presented under each in all Tables relating to the State :—

**Regional grouping of Scheduled Tribes**

As has been described earlier, the list of Scheduled Tribes has been declared separately for three regions based on the erstwhile States from which the respective areas have come to Maharashtra. The grouping based on those administrative units does not, however, facilitate understanding of location or ethnic and other characteristics of the Scheduled Tribes in Maharashtra. They can be more conveniently classified in the following groups :—

(*i*) Sahyadri group consisting of—
(1) Koli Mahadev, (2) Varli, (3) Kokna, (4) Thakur, (5) Kathodi, (6) Koli Malhar, (7) Koli Dhor, (8) Dubla, (9) Dhodia ;

(*ii*) Satpuda group consisting of —
(1) Bhil, (2) Gamit, (3) Korku, (4) Dhanka, (5) Pardhi, (6) Naikda, (7) Rathawa;

(*iii*) Gondvana group consisting of—
(1) Gond, (2) Andh, (3) Kolam, (4) Pardhan, (5) Halba, (6) Kawar.

The population of these three groups of Scheduled Tribes is as follows :—

| | Population | Proportion to total Scheduled Tribe population |
|---|---|---|
| (*i*) Sahyadri group .. | 1,161,279 | 48·44 |
| (*ii*) Satpuda group .. | 811,733 | 33·86 |
| (*iii*) Gondvana group .. | 417,195 | 17·40 |

This alternative scheme of grouping of Scheduled Tribes in Maharashtra is advantageous in many respects. We have followed it in this note and in the ethnographic notes of Part V-B and tried to explain common or differing features for the groups or individual Scheduled Tribes included in them.

**Scheduled Areas**

Under sub-paragraph (1) of paragraph 6 of the Fifth Schedule of the Constitution of India, the President has declared through (*i*) the Scheduled Areas (Part A States) Order, 1950, and (*ii*) The Scheduled Areas (Part B States) Order, 1950, certain areas as Scheduled Areas. The areas covered by those two orders and now lying in Maharashtra are shown in Appendices VII and VIII to the Introductory Note at pages 17 and 18.

The Scheduled Areas in Maharashtra consist of the entire areas of twelve talukas or mahals (*viz.*, Jawhar, Dahanu, and Shahapur talukas and Mokhada and Talasari mahals in Thana district, Kalwan taluka and Surgana and Peint mahals in Nasik district, Nawapur and Akalkuva talukas and Akrani mahal in Dhulia district and Melghat taluka in Amravati district) and specified portions of seven other talukas, *viz.*, Chopda, Yawal and Raver talukas in Jalgaon district, Kinwat taluka in Nanded district and Rajura, Gadhchiroli and Sironcha talukas in Chanda district.

The Scheduled Areas are the post-independence version of " excluded " or " partially excluded " areas under the Government of India Acts of 1919 and 1935. There was no excluded area in Bombay or Central Provinces but there were partially excluded areas in both and the same are now declared as Scheduled Areas. The Government of India Act of 1935 did not apply to Hyderabad State and the portions of Kinwat and Rajura talukas had been declared as Scheduled Areas for the first time in 1950.

The declaration of Scheduled Areas literally follows the description of partially excluded areas from the 1936 Order. In the meantime, Indian States have merged and the district and taluka boundaries have been overhauled in many cases.

Maharashtra is one of the eight States in India having Scheduled Areas. The total population of Scheduled Areas in Maharashtra in 1961 is 1,163,465, out of which the population of Scheduled Tribes is 70·53 per cent.

The Fifth Schedule to the Constitution envisages special administrative agencies for the administration of Scheduled Areas. No special machinery has, however, been set up so far and the administration of the Scheduled Areas has been carried on through normal machinery as in the other parts of the State.

**Reserved Seats in Parliament, Legislative Assembly and Zilla Parishads**

In the delimitation of constituencies made in 1961, Maharashtra had 44 Parliamentary Constituencies. Two of them, *viz.*, Bhivandi and Nandurbar had been reserved for Scheduled Tribes. Similarly, out of the 264 Assembly Constituencies, 14, *viz.*, Kasa, Jawhar and Mokhada in Thana district, Khalapur in Kolaba district, Nagar-Akola in Ahmadnagar district, Kalwan and Peint in Nasik district, Sakri, Nawapur, Taloda and Akrani in Dhulia district, Amalner in Jalgaon district, Dhanora in Chanda district and Yelabara in Yeotmal district, were reserved for Scheduled Tribes. The Election Commission has, in 1963, increased the number of seats reserved for Scheduled Tribes for Parliament from 2 to 3 and for Assembly from 14 to 16.

In pursuance of section 12 of the Maharashtra Zilla Parishad and Panchayat Samitis Act, 1962, the State Government has also reserved seats for Scheduled Tribes in the Zilla Parishads. The reservation is as follows :—

| Name of District | Total No. of Seats | No. of Seats reserved for Scheduled Tribes |

### 1961 Census Findings

A few salient points observed from the 1961 Census material presented in the Special Tables on Scheduled Tribes are described below. The discussion is brief and is limited to demographic, social and economic characteristics of Scheduled Tribes as a group. Those characteristics have also been studied in detail for individual Scheduled Tribes in the ethnographic notes which are presented in Part V-B of the Maharashtra Census Report.

### Limitations

The limitations of the population figures and other material presented in the Tables may be described here again. The total Scheduled Tribe population shown here is not the entire tribal population of the State. It includes only those tribes which are declared as Scheduled Tribes. For the Scheduled Tribes which are declared as such for specified areas (not extending to the whole State) the population figures represent their population enumerated in those specified areas alone and do not include their population which may be residing in the State but outside those specified areas. The case of Gonds will illustrate the position. The Gonds are declared as a Scheduled Tribe in all the districts of Bombay, Poona and Aurangabad Divisions and in only seven talukas (including Rajura, of Nagpur Division). The Gonds do exist in the other talukas of Nagpur Division also, but that Gond population is not included in the State total shown in the Tables because they (the Gonds) are not declared as a Scheduled Tribe in those remaining talukas.

### Size and Distribution of Scheduled Tribe Population

The population of Scheduled Tribes in Maharashtra is 2,397,159, which is 6·06 per cent of the total population of the State. The total population, Scheduled Tribe population and its proportion for India, Maharashtra and 14 other States are shown below :—

| | Total population | Scheduled Tribe population | Proportion of Scheduled Tribe population to total population |

By size of the Scheduled Tribe population, Maharashtra ranks fifth in India. Madhya Pradesh has the largest Scheduled Tribe population (66·78 lakhs.) Orissa has 42·24 lakhs, Bihar 42·05 lakhs and Gujarat 27·54 lakhs. By proportion of Scheduled Tribe population to total population, Maharashtra with 6·06 per cent, however, ranks seventh. Orissa (24·07 per cent), Madhya Pradesh (20·63 per cent), Assam (17·39 per cent), Gujarat (13·35 per cent), Rajasthan (11·46 per cent) and Bihar (9·05 per cent) have larger proportions of Scheduled Tribe population than Maharashtra. The Maharashtra proportion is slightly smaller than the average for India (6·86). The Scheduled Tribe population of Maharashtra is 7·96 per cent of the total Scheduled Tribe population in India.

**Districtwise distribution**

Table SCT-I—Part B shows the population for Scheduled Tribes as a group and for each individual Scheduled Tribe for rural and urban areas of each administrative unit separately. The distribution of Scheduled Tribe population by administrative divisions and districts is shown in the Statement below :—

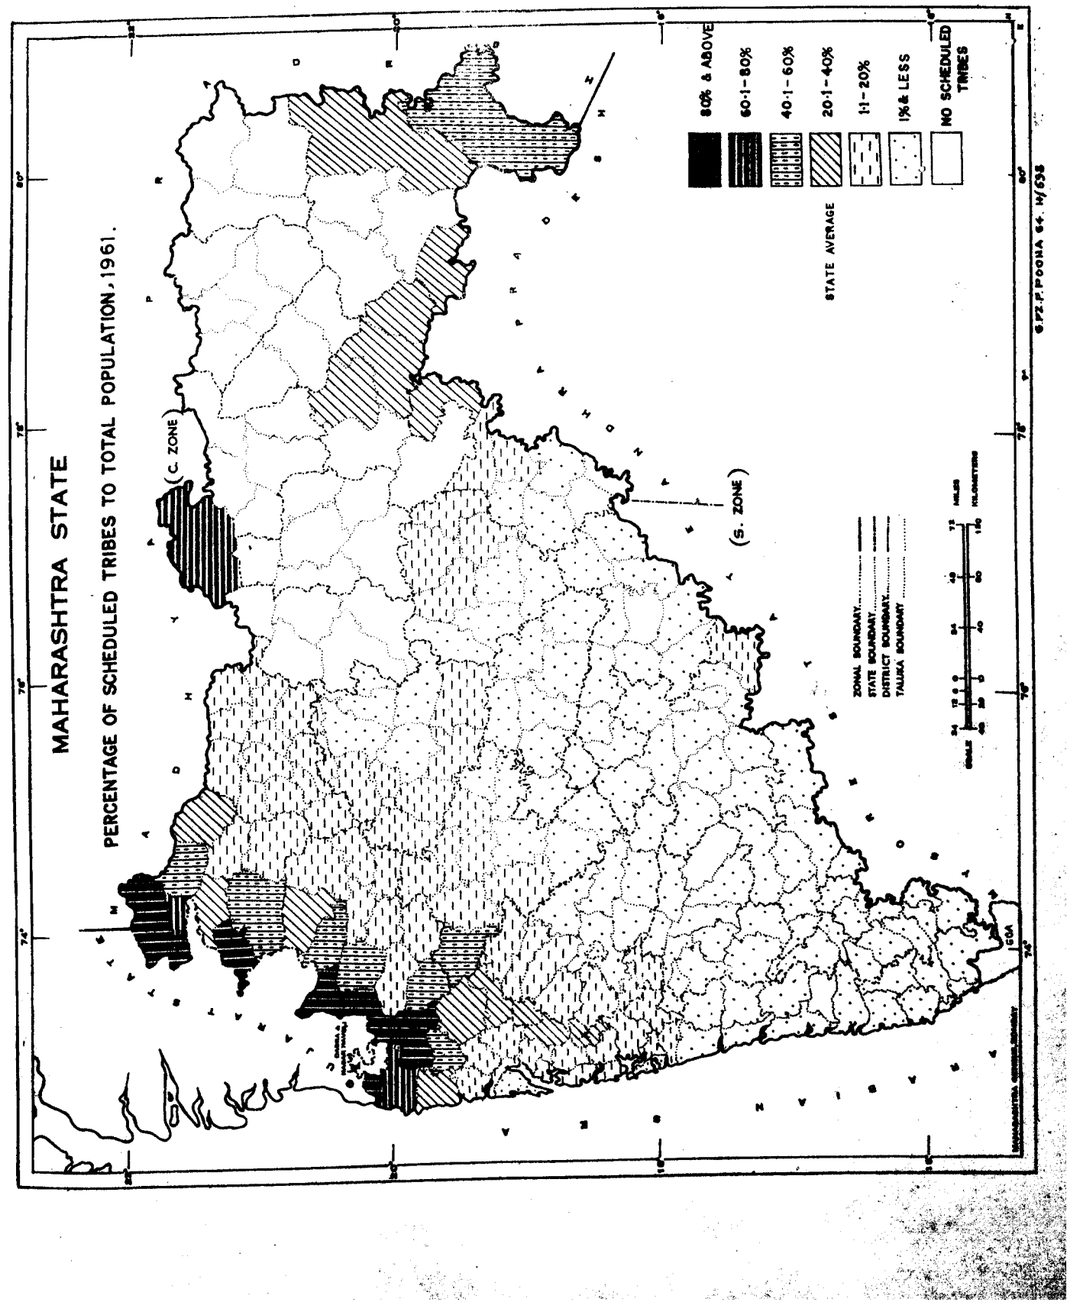
The dot map facing page 219 will also show the distribution of Scheduled Tribe population over different areas of the State.

There are no Scheduled Tribes in 5 districts, *viz.*, Buldhana, Akola, Wardha, Nagpur and Bhandara. Even in the three remaining districts of Nagpur Division, *viz.*, Amravati, Yeotmal and Chanda, there are Scheduled Tribes only in 7 talukas, *viz.*, Melghat taluka of Amravati district, Wani, Kelapur and Yeotmal talukas of Yeotmal district and Rajura, Gadhchiroli and Sironcha talukas of Chanda district. The Scheduled Tribe population shown against those three districts is, therefore, from those respective talukas only, though the corresponding total populataion is shown for the entire district.

Bombay Division contains 70·39 per cent of the State's Scheduled Tribe population, while Poona, Aurangabad and Nagpur Divisions have 8·90 per cent, 4·28 per cent and 16·43 per cent, respectively. Among the districts, Dhulia, Thana and Nasik rank as the three highest, both by the size of population of Scheduled Tribes and its proportion to total population. These three districts together hold 61·22 per cent of the State's Scheduled Tribe population. Chanda, Yeotmal, Kolaba, Ahmadnagar, Jalgaon, Amravati, Nanded, Poona and Parbhani districts also have large proportions of Scheduled Tribe population. Ratnagiri, Satara, Sangli, Sholapur, Kolhapur, Bhir and Osmanabad districts have very small Scheduled Tribe populations which make less than 0·5 per cent of the total population of those districts.



The distribution of 229 talukas and mahals (excluding Greater Bombay) in the State according to the percentages of Scheduled Tribe population to total population is as follows :—

| Percentage of Scheduled Tribe population to total population | No. of Talukas and Mahals |
|---|---|
| 0—4 .. .. | 115 |

The map facing page 220 will also show the proportions of Scheduled Tribe population to total population in different areas of the State.

Unlike the Scheduled Castes, the Scheduled Tribes have large local concentrations. The eight talukas and mahals having more than 80 per cent population belonging to Scheduled Tribes are Talasari mahal and Mokhada and Jawhar talukas in Thana district, Surgana and Peint mahals in Nasik district and Akrani mahal and Akalkuva and Nawapur talukas in Dhulia district. Three talukas have 60 to 80 per cent, eight talukas have 40 to 60 per cent and fifteen talukas have 20 to 40 per cent of their total population belonging to Scheduled Tribes.

The total population, Scheduled Tribe population and the percentage of Scheduled Tribe population to total population for all those 34 talukas and mahals which have more than 20 per cent population belonging to Scheduled Tribes are shown below. Presentation of the talukas and mahals is in the order of the proportion of Scheduled Tribes.

The total Scheduled Tribe population in the 34 talukas and mahals shown on page 221 is 1,707,288 which is 71·22 per cent of the total Scheduled Tribe population in the State. Out of the remaining 195 talukas and mahals, 37 do not have any Scheduled Tribe population and 158 talukas and mahals and Greater Bombay together have 689,871 or 28·78 per cent of the Scheduled Tribe population of the State.

The population of each Scheduled Tribe is concentrated in certain districts and within those districts also, in certain talukas. Such concentration of population may be seen inspite of some of the Scheduled Tribes having been notified for the entire area of the State. Bhils, for example, are notified as a Scheduled Tribe for the whole State but their population is mainly concentrated in Nasik, Dhulia, Jalgaon, Ahmadnagar and Aurangabad districts. In a few exceptional cases (*e.g.* Gonds in Nagpur Division), such concentration, on the other hand, perhaps appears only because of their notification for limited areas.

The concentration of population of Scheduled Tribes described above does not, however, mean that each Scheduled Tribe lives in isolation from all other Scheduled Tribes. In fact, in all the talukas having large concentrations of tribal population, at least half a dozen Scheduled Tribes are found living side by side. In Palghar taluka of Thana district, Varli, Kathodi, Koli Mahadev and Koli Malhar are found living side by side. Varli, Kokna, Thakur, Kathodi and Koli Mahadev are similarly found together in Mokhada taluka. Within the village, however, each Scheduled Tribe has its own "pada" (hamlet) or a separate locality.

Among the major Scheduled Tribes like Bhils and Gonds, some sub-tribes are more concentrated in certain areas. Mavchi Bhils live mainly in the north-western talukas of Dhulia district, Pawra Bhils in Akrani Mahal, Barda Bhils in northern talukas of Jalgaon district, Madia Gond in Bhamargad area of Sironcha taluka and so on. It is interesting to study how these concentrations of the population of Scheduled Tribes or more important of their sub-tribes have come about, how a few members of the other Scheduled Tribes came to live with them in each village and to what extent each of those groups still holds on to its distinct traits or traditions or has been influenced by its neighbours. Such accounts will

be found in the ethnographic notes on individual Scheduled Tribes in Part V-B of the Maharashtra Census Report.

The Statement below shows individual Scheduled Tribes arranged in the order of their population in the State.

N=Negligible.

Bhil is the most numerous Scheduled Tribe and constitutes nearly 24 per cent of the total Scheduled Tribe population in the State. Koli Mahadev, Gond, Varli and Kokna have over two lakhs population each. Thakur, Kathodi and Gamit have over one lakh population each. These eight Scheduled Tribes having more than one lakh population each together make 82·65 per cent of the total Scheduled Tribe population in the State.

The last eighteen Scheduled Tribes have less than one thousand population each and their combined population is 3,116 or only 0·13 per cent of the total Scheduled Tribe population of the State.

Four Scheduled Tribes, *viz.*, Gamit, Dhanka, Naikda and Barda, deserve to be combined with Bhil because they are in fact the names of sub-tribes. Such combination will also remove the anomalous position resulting from the grouping of one or more sub-tribes with two or more main Scheduled Tribes, as already described on page 215. We understand that some such proposals for grouping and rationalisation of the entire list are already under the consideration of Government. With this suggested grouping, the population of Bhils will increase from 5·75 lakhs to 7·38 lakhs. All the Tables and discussion in this volume are, however, on the basis of the declared list in force at the moment.

**Variation in population of Scheduled Tribes**

With due adjustments for the changed boundaries of the State, its 1951 Scheduled Tribe population has been estimated at 14·94* lakhs. In 1961, the Scheduled Tribe population has increased to 23·97 lakhs or by 60·44 per cent over the 1951 population. The following three factors have contributed to this apparently tremendous growth :—

(*i*) changes made in the President's Order in 1956 ;
(*ii*) natural growth ; and
(*iii*) better enumeration of Scheduled Tribes in 1961.

**1956 Changes in the list of Scheduled Tribes**

The changes made in 1956 in the President's 1950 Orders have been described on page 213. The most important change was the extension of the Madhya Pradesh declared list to three more talukas (Wani, Kelapur and Yeotmal) of Yeotmal district in addition to the formerly notified three talukas of Melghat in Amravati district and Gadhchiroli and Sironcha in Chanda district. These three newly added talukas of Yeotmal district have returned a Scheduled Tribe population of 1·56 lakhs in 1961. This change accounts for 10·42 per cent of the decade growth in the Scheduled Tribe population of the State.

The other important change made in 1956 was the addition to the declared list of three Scheduled Tribes, *viz.*, Koli Malhar, Khairwar and Vitolia, whose populations in 1961 are 89,047, 275 and 898 respectively. This addition of three new Scheduled Tribes to the list has thus added 90,220 to the Scheduled Tribe population of the State in 1961 and accounts for 6·04 per cent of the decade growth.

Another major change made in 1956 in the list of Scheduled Tribes was that names of some sub-tribes or synonyms not mentioned in the 1950 Order were shown against most of the Scheduled Tribes. In view of the legal opinion such express mention of the names of few sub-tribes should not alone entitle any more persons for inclusion in the Scheduled Tribe population. But we do not know how the 1950 list had been interpreted or used on the field in the 1951 Census. The 1956 additions may at least have reduced the number of doubtful cases. The addition of as many as 38 names of sub-tribes against Gond appears to have brought in many more people in the Gond group because there is otherwise no apparent reason why the Scheduled Tribe population in Chanda district should increase by 40·35 per cent during the decade while the general population in rural areas there has increased only by 19·43 per cent. It is,

*The figure 14·36 lakhs shown in para. 25 on page 221 of Part II-A of the Maharashtra Census Report needs to be corrected as 14·94 lakhs.

however, difficult to estimate the exact contribution this factor may have made towards the 1951–61 decade growth.

Koli Mahadev and Thakur had been declared as Scheduled Tribes for the entire area of the erstwhile Bombay State (Bombay and Poona Divisions as far as Maharashtra is concerned). In 1956, the areas of their declaration as Scheduled Tribes were reduced to certain specified talukas from Thana, Kolaba, Nasik, Ahmadnagar and Poona districts. It is difficult to say if this restriction of areas has reduced the Scheduled Tribe population. Both the Scheduled Tribes are known to be concentrated in the notified areas and the change may not have made any appreciable difference in the Scheduled Tribe population in the State.

The 1950 list had Mavchi, Pawra, Valvi and Vasava as independent Scheduled Tribes. In the 1956 list, they have been included under Bhil, Dhanka or Gamit as sub-tribes. This change also may not have made any difference to the total Scheduled Tribe population.

**Natural Growth and Improved Enumeration**

The Scheduled Tribes are known to have higher fertility than the general population. Because of the climatic and other hazards to healthy living in the past, they perhaps had very high death rates along with very high birth rates. Malaria and other campaigns of controlling epidemics appear to have benefited the tribal areas most of all and their survival rate appears to have appreciably improved during the decade. No quantitative appraisal is possible because comparable vital statistics are not available for smaller areas over a long period.

We have seen that the changes in the declared list account for 10·46 per cent of the increase in population. Thus, the net increase due to the other two causes mentioned on page 223 is reduced to 6·57 lakhs or 44 per cent over the 1951 population.

Some of the predominantly tribal areas have shown very high decade rates of growth. Akrani mahal in Dhulia district which has 95·39 per cent of its population belonging to Scheduled Tribes has the highest decade rate of growth in Maharashtra, (55·3 per cent). Other talukas or mahals which have large proportions of tribal population and also show high per cent rates of growth are Talasari (29·5) and Vada (27·5) in Thana district, Khalapur (28·3) in Kolaba district Surgana (32·9), Peint (32·1) and Dindori (28·3) in Nasik district, Akalkuva (33·5), Nawapur (30·0) and Sakri (41·0) in Dhulia district and Melghat (39·0) in Amravati district.

Similar high rates of growth in predominantly tribal areas have also been observed in the adjoining tribal areas of Dangs, Dharampur, Bansda, Songadh and Dediapada in Gujarat State.

The following Statement shows districtwise percentage variations in Scheduled Tribe population during the decade 1951-61. Percentage variation in general population in rural areas of each district is also shown for facility of comparison :—

Thana, Nasik and Chanda, which have large Scheduled Tribe populations, have shown much higher percentage growth in the Scheduled Tribe population than in the general population in rural areas.

In Dhulia district, the percentage growth in the Scheduled Tribe population (29·8 per cent) is slightly lower than in the general population in rural areas. It may be partly due to over-estimation of 1951 Scheduled Tribe population in the district worked out on the basis of figures available for the tracts formed in 1951 by grouping two or more talukas and a possibility of larger (than average) concentration of Scheduled Tribe population in the villages transferred from those tracts to Gujarat State in 1960. Another possible reason is the seasonal out-migration of many Scheduled Tribes from Dhulia district to Surat district, which is also a post-1951 feature.

Nasik, Thana, Amravati, Poona and Jalgaon districts show extremely high growth in their Scheduled Tribe population over 1951. Along with the possible high rates of natural growth a sizeable part of this increase should also be due to a definite improvement in the standard of enumeration in the inaccessible areas in 1961. Another possible reason furnished by local officers is that 1950-51 was a year of scarcity conditions in the Tribal areas and as a result many people had migrated outside the districts and had, therefore, been missed from the 1951 count in those districts.

**Comparability with earlier Censuses**

The 1941 and 1951 Censuses did not show populations of individual tribes. The administrative units for which such populations have been reported in 1931 or earlier censuses have in many cases changed beyond recognition. Moreover, the declaration of Scheduled Tribes for restricted areas makes the 1961 figures uncomparable with those of earlier Censuses when there were no such area restrictions on enumeration of tribes.

**Rural-Urban Distribution**

96·25 per cent of the Scheduled Tribe population is in rural areas and only 3·75 per cent is in urban areas. The corresponding proportions for the general population are 71·78 per cent and 28·22 per cent, respectively. Only 26 out of the 266 towns in Maharashtra have more than 5 per cent population belonging to Scheduled Tribes. These towns are shown below with proportions of their Scheduled Tribe population:—

Out of the 19 numerically important Scheduled Tribes having more than ten thousand population each, Dubla, Dhodia, Koli Dhor, Pardhi and Naikda have comparatively larger proportions of their population in urban areas. Percentages of their populations in urban areas are 51·0, 49·9, 24·7, 15·7 and 12·1 respectively.

Only 5·1 per cent of Varlis reside in urban areas. The percentage of the population in urban areas for Koli Malhar is 4·1, Bhil 3·7, Koli Mahadev and Pardhan 3·5 each and Kathodi and Gamit 3·4 each. Andh, Kokna, Kolam, Korku and Thakur have more than 99 per cent of their population in rural areas. Nine Scheduled Tribes, *viz.*, Bhattra, Birhul, Dhanwar, Kawar, Khairwar, Kol, Nagesia, Oraon and Thoti do not have any person in urban areas. Their names do not, therefore, appear in any tables presenting material for urban areas alone, *e.g.*, SCT-I—Part B (Urban) and SCT-III—Part A (ii). Only one Scheduled Tribe (Bhaina) has all persons (population only 12) in urban areas. Its name does not, therefore, appear in the tables presenting information only for rural areas, *e.g.*, SCT-I—Part B (Rural) and SCT-III—Part B (ii).

The Scheduled Tribes are thus very largely a rural people. Even in the rural areas, they are concentrated in hilly and forest tracts not yet fully opened up by rail or road communications. This pattern of rural-urban distribution is a serious handicap in their economy. It will again be referred to in the discussion on economic activity.

**Sex Ratio**

The 1961 sex ratios (*i.e.* the number of females per 1,000 males) for Scheduled Tribe population and the general population of Maharashtra for total, rural and urban areas are as follows :—

| | 1961 Sex Ratios | | |
|---|---|---|---|
| | Total | Rural | Urban |
| General population .. | 936 | 995 | 801 |
| Scheduled Tribe population .. | 978 | 981 | 911 |

On the whole there are comparatively more females among the Scheduled Tribes than among the general population. It may be partly due to the large non-tribal male population coming to Bombay and

other urban areas from outside the State. In the rural areas, however, there are comparatively more females in the general population than among the Scheduled Tribes. This again is due to the large non-tribal male population migrating from rural to urban areas. As far as urban areas are concerned, the Scheduled Tribes are found only in small towns which do not have as much deficiency of females as cities and large towns have. The above differences in the sex ratios are thus the result of migration and differences in the rural-urban distribution of Scheduled Tribes and the general population.

The 1951 and 1961 sex ratios for the Scheduled Tribe population and the general population are as follows :—

| | Sex Ratios | |
|---|---|---|
| | 1951 | 1961 |
| General population .. | 941 | 936 |
| Scheduled Tribe population .. | 943 | 978 |

The sex ratio for Scheduled Tribes has improved by 35 points from 943 in 1951 to 978 in 1961. For the general population it has gone down by five points from 941 in 1951 to 936 in 1961. Addition of Scheduled Tribe population of Yeotmal district with excess of females would improve the State average for Scheduled Tribe sex ratio by one or two points. The decade improvement by 35 points should therefore be due to some other reasons. The Scheduled Tribe population in 1951 was as much a rural population as in 1961, perhaps a little more. Its 1951 sex ratio should, therefore, have approximated more to the sex ratio of the general population of rural areas which was 1,000 in 1951 than to the sex ratio of the general population combined for rural and urban areas which was 941 in 1951. The sex ratio reported for Scheduled Tribes in 1951, therefore, needs closer examination.

The 1951 and 1961 sex ratios for the Scheduled Tribe population and the general population for Maharashtra, four divisions and 21 out of 26 districts are shown below:—

| (21) Chanda .. | 843 | 996 | 997 | 1,003 | 985 | 993 |

If districts with at least 4 per cent population belonging to Scheduled tribes are considered, it will be seen that in 1951 the sex ratios in the Scheduled Tribe population were considerably lower than the general population in Chanda, Amravati and Jalgaon districts, while they were just equal to or higher for Dhulia, Thana, Nasik, Kolaba and Ahmadnagar districts. As 96 per cent of the Scheduled Tribe population is in rural areas, their sex ratios should really be compared with those of the general population in rural areas and not with those of the total population for rural and urban areas combined. Such a comparison with the sex ratios of the general population in rural areas will show that the 1951 Scheduled Tribe sex ratios in Thana, Nasik, Jalgaon, Amravati and Chanda districts were extremely low. These sex ratios for Scheduled Tribes have, however, improved in 1961 in all the districts in question and are in all cases within a reasonable range from those for the general population in rural areas. Actual male and female population of Scheduled Tribes in those five districts in 1951 and 1961 and their decade growth rates are shown in the statement below.

| District | 1951 | | 1961 | | Decade growth rate | |
|---|---|---|---|---|---|---|
| | Males | Females | Males | Females | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Thana .. .. | 148,123 | 136,826 | 253,601 | 246,957 | 71·21 | 80·49 |
| Nasik .. .. | 122,999 | 117,588 | 230,965 | 222,742 | 87·78 | 89·43 |
| Jalgaon .. .. | 33,240 | 31,246 | 49,867 | 48,843 | 50·02 | 56·32 |
| Amravati .. .. | 20,866 | 14,173 | 27,765 | 27,116 | 33·06 | 91·32 |
| Chanda .. .. | 70,900 | 59,794 | 91,565 | 91,866 | 29·15 | 53·64 |

The disparities in the apparent growth rates of male and female population indicate an under-enumeration in 1951 of Scheduled Tribe females in all those districts and particularly in Amravati and Chanda districts. Assuming that the Scheduled Tribe population had the same sex ratio in 1951 as in 1961, we may say that about twenty-seven thousand females from among the Scheduled Tribes had been missed from the 1951 Census count in those five districts. The improvement of the Scheduled Tribe sex ratio from 943 in 1951 to 978 in 1961 thus appears to be more due to an improvement in the standard of enumeration than to demographic factors.

1961 sex ratios for 14 numerically largest Scheduled Tribes are as follows :—

| | 1961 Sex Ratio |
|---|---|
| 1. Bhil .. | 985 |
| 2. Koli Mahadev .. | 969 |
| 3. Gond .. | 1,006 |
| 4. Varli .. | 977 |
| 5. Kokna .. | 970 |
| 6. Thakur .. | 954 |
| 7. Kathodi .. | 974 |
| 8. Gamit .. | 975 |
| 9. Koli Malhar .. | 957 |
| 10. Andh .. | 998 |
| 11. Korku .. | 979 |
| 12. Dhanka .. | 984 |
| 13. Kolam .. | 1,043 |
| 14. Pardhan .. | 1,001 |
| All remaining Scheduled Tribes .. | 932 |
| All Scheduled Tribes combined .. | 978 |

It will be seen that Gonds, Kolams and Pardhans of the Gondvana group of Scheduled Tribes have excess of females. Andh which also falls in that group has a sex ratio near parity (998). The Scheduled Tribes in the districts of Aurangabad and Nagpur Divisions have excess of females over males in contrast to the pattern of excess of males in the general population even in rural areas of those districts.

Bhil, Gamit, Dhanka and Korku of the Satpuda group have sex ratios ranging between 975 and 985. The Scheduled Tribes of this group also have comparatively more females than the general population of the rural areas of the respective districts.

Koli Mahadev, Varli, Kokna and Kathodi of the Sahyadri group have sex ratios close to each other and ranging between 969 and 977. Thakur and Koli Malhar of the same group, however, have lower values of 954 and 957 respectively. The Scheduled Tribes of the Sahyadri group comparatively have lower sex ratios than those in the general population of rural areas of those districts. This should be due to the larger out-migration of non-tribal males from rural areas of those districts. Thana which does not have so much out-migration is an exception and the Scheduled Tribes of that district have a sex ratio of 974 compared with 964 for the general population for rural areas.

It will be seen that none of the 14 major Scheduled Tribes has a sex ratio lower than or approximating to the reported average of 943 for the Scheduled Tribe population in 1951.

## Age Composition

Table SCT-II—Part B shows the distribution of Scheduled Tribe population by three broad age-groups, *viz.*, 0—14, 15—44 and 45 and above. The 1961 proportions of the three age-groups for Scheduled Tribe population and for the general population of the State are as follows :—

| | Proportion of population in age-groups to total population | | |
|---|---|---|---|
| | 0—14 | 15—44 | 45+ |
| General population (Rural areas only). | 42·09 | 41·90 | 16·01 |
| Scheduled Tribe population (Rural and Urban combined). | 43·46 | 42·88 | 13·72 |

The age composition of the Scheduled Tribe population is not much different from that of the general population of rural areas. The proportion of age-group 45+ is, however, significantly lower in the Scheduled Tribe population. The slightly higher proportions in the age-groups 0—14 and 15—44 and the lower proportion in the age-group 45+ indicate high death rates among Scheduled Tribes.

The proportions of population in the three age-groups to the total population for 14 numerically important Scheduled Tribes are as follows :—

| | Proportion of population in age-groups | | | |
|---|---|---|---|---|
| | Total | 0—14 | 15—44 | 45+ |
| **All Scheduled Tribes** .. | 100 | **43·40** | **42·88** | **13·72** |
| (1) Bhil .. | 100 | 44·32 | 42·80 | 12·88 |
| (2) Koli Mahadev .. | 100 | 41·64 | 42·54 | 15·82 |
| (3) Gond .. | 100 | 40·30 | 44·20 | 15·50 |
| (4) Varli .. | 100 | 42·56 | 43·03 | 14·41 |
| (5) Kokna .. | 100 | 44·79 | 41·95 | 13·26 |
| (6) Thakur .. | 100 | 41·64 | 42·86 | 15·50 |
| (7) Kathodi .. | 100 | 44·91 | 45·55 | 9·54 |
| (8) Gamit .. | 100 | 46·93 | 41·08 | 11·99 |
| (9) Koli Malhar .. | 100 | 45·88 | 39·94 | 14·18 |
| (10) Andh .. | 100 | 44·80 | 42·91 | 12·29 |
| (11) Korku .. | 100 | 45·78 | 41·51 | 12·71 |
| (12) Dhanka .. | 100 | 46·34 | 41·96 | 11·70 |
| (13) Kolam .. | 100 | 41·26 | 43·64 | 15·10 |
| (14) Pardhan .. | 100 | 40·32 | 44·75 | 14·93 |
| Above 14 Scheduled Tribes combined | 100 | 43·38 | 42·87 | 13·75 |
| All other Scheduled Tribes .. | 100 | 43·72 | 43·16 | 13·12 |

Age composition is important not only as the result of past demographic history of the community but also as the determinant of future pattern of population variation. The proportions now noticed for different Scheduled Tribes cannot, therefore, be interpreted, without further investigation, as indicating specific, patterns of variation. We will, therefore, restrict only to a few broad observations :

(*a*) The proportions of age-group 45+ are lower for all Scheduled Tribes than the State average for general population. This may be a reflection of the lower standards of living and health. Kathodis have the lowest proportion (9·54 per cent) of population in that group. They are known to be economically the most depressed Scheduled Tribe.

(*b*) In the age-group 0—14, the Gondvana Scheduled Tribes generally have lower proportions. Gond and Pardhan have 40·3 per cent. Kolam follows closely with 41·26 per cent. Andh is however an exception and has 44·8 per cent. In contrast, the Scheduled Tribes of the Satpuda region have very high proportions. Gamit (46·93), Dhanka (46·34), Korku (45·78) and Bhil (44·32) have higher proportions than the State average.

(*c*) Koli Malhar has the lowest proportion in the age-group 15—44 and somewhat high proportions both in 0—14 and 45+. This Scheduled Tribe is notified only for Thana district and this shortage of working age-groups may apparently result if persons of that age-group move out of the district for work either seasonally or on a long-term basis.

## Marital Status

Table SCT-II—Part B at pages 275 to 314 shows the distribution of population of the Scheduled Tribes group as well as of each individual Scheduled Tribe classified by three broad age-groups and cross-classified by sex and four marital status categories. The distribution of the Scheduled Tribe population and the general population in the State for males and females of all ages is as follows :—

| | Total | Never married | Married | Widowed | Divorced |
|---|---|---|---|---|---|
| General population— | | | | | |
| Males .. | 100 | 53·34 | 43·11 | 3·13 | 0·42 |
| Females .. | 100 | 42·20 | 45·69 | 11·49 | 0·62 |
| Scheduled Tribe population— | | | | | |
| Males .. | 100 | 51·89 | 44·90 | 2·62 | 0·59 |
| Females .. | 100 | 43·77 | 47·32 | 8·22 | 0·69 |

Distribution of Scheduled Tribe population by marital status more or less conforms to that of the general population. Whatever differences are there may be due to the difference in the rural-urban or age composition of the two groups. The proportion of never married among the Scheduled Tribes is lower for males and higher for females as compared to the general population. The proportions of married are higher both for males and females. The proportion of widowed is however significantly lower in the Scheduled Tribe population both for males and females. Re-marriages are perhaps more prevalent among the Scheduled Tribes.

The distribution of population of 14 numerically major Scheduled Tribes by marital status is as shown below:—

| Name of Scheduled Tribe | | Never married | Married | Widowed | Divorced or separated |
|---|---|---|---|---|---|
| 1 | | 2 | 3 | 4 | 5 |
| (1) Bhil .. .. .. | Males .. | 53.05 | 44.42 | 2.05 | 0.48 |

| (2) Koli Mahadev .. .. .. | Males .. | 49.79 | 46.49 | 3.14 | 0.58 |

| (4) Varli .. .. .. | Males .. | 51.25 | 45.96 | 2.21 | 0.58 |

Four Scheduled Tribes, *viz.*, Gamit, Dhanka, Koli Malhar and Korku have more than half of their population in the never married category. Gamit and Dhanka even have more than half of their female population in that category. This may be partly due to larger proportion of 0—14 age-group and a higher age at marriage.

The proportion of married ranges between 41·05 per cent for Gamit and 48·42 per cent for Koli Mahadev. The proportion of widowed persons ranges from 3·6 per cent for Gamit to 7·68 per cent for Gond. The proportions of widowed for females are comparatively higher among Gond (11·88), Andh (11·24), Kolam (10·11) and Pardhan (11·94). This indicates that remarriages of widows are less prevalent among the Gondvana group of Scheduled Tribes than among the other Scheduled Tribes.

### Child Marriages

The proportions of married persons of 0—14 age-group to the total population of the group for general population of the State in rural areas and for the total Scheduled Tribe population as well as for each of the 14 numerically important Scheduled Tribes for males and females are shown below :

| | Proportions of married persons of 0—14 age-group to total population of that group | |
|---|---|---|
| | Males | Females |
| General population (rural areas) | 0·81 | 5·83 |
| Scheduled Tribe population .. | 1·16 | 4·59 |
| (1) Bhil .. .. .. | 1·03 | 5·30 |
| (2) Koli Mahadev .. .. | 1·98 | 9·28 |
| (3) Gond .. .. | 0·37 | 3·09 |
| (4) Varli .. .. | 0·79 | 2·76 |
| (5) Kokna .. .. | 1·29 | 4·83 |

| (7) Kathodi .. .. | 1·05 | 3·79 |

| (10) Andh .. .. | 1·57 | 6·82 |
| (11) Korku .. .. | 0·23 | 1·43 |
| (12) Dhanka .. .. | 0·45 | 0·83 |
| (13) Kolam .. .. | 0·69 | 2·94 |
| (14) Pardhan .. .. | 0·70 | 4·47 |

The proportions shown for the Scheduled Tribes are not strictly comparable with those shown for the general population because the latter have been worked out by treating the entire population in the age-group 0—9 years as never married, while no such assumption was made for the Scheduled Tribe population. It may however be seen that in spite of this arbitrary reduction of the proportion of married from the age-group 0—14 for the general population, the proportion of married females in the age-group is lower (4·59 per cent) for the Scheduled Tribe population (and also for 11 out of the 14 Scheduled Tribes shown here) than that for the general population (5·8 per cent). For males also, that proportion is lower for 7 out of the 14 Scheduled Tribes. Koli Mahadev and Andh have very high proportions (9·28 and 6·82 per cent respectively) of married females in age-group 0—14. Koli Mahadev and Thakur have comparatively higher proportions of married among males of age-group 0—14.

The age at marriage for girls thus appears to be higher among most of the Scheduled Tribes than that for the general population. For Bhils it seems to be the same and for Koli Mahadev and Andh somewhat lower than the State average. In contrast, the age at marriage for boys seems to be lower than the general population for seven of the 14 Scheduled Tribes shown here. Considering both males and females, early marriages appear to be more prevalent among Koli Mahadev and Andh.

### Literacy and Education

Tables SCT-III—Parts A (ii) and B (ii) show for urban and rural areas respectively, the number of illiterates, literates without educational level and persons with different educational levels for Scheduled Tribes as a group and for each Scheduled Tribe separately.

172,738 persons or 7·2 per cent. of the total Scheduled Tribe population are literates. The literacy rates for Scheduled Tribe males and females are 12·55 per cent and 1·75 per cent respectively as against 42·0 per cent and 16·8 per cent for males and females of the general population in Maharashtra. Scheduled Tribes are thus very far behind in education, particularly the females among them.

The following table shows the literacy percentages for total, males and females of the general population and of the Scheduled Tribes for Maharashtra and four administrative divisions :—

| State/Division | Percentage Literacy for General population | | | Percentage Literacy for Scheduled Tribe population | | |
|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| **MAHARASHTRA** .. .. .. .. | **29·82** | **42·04** | **16·76** | **7·21** | **12·55** | **1·75** |
| Bombay Division .. .. .. .. | 37·75 | 49·61 | 24·41 | 7·13 | 12·31 | 2·37 |
| Poona Division .. .. .. .. | 29·30 | 42·03 | 16·09 | 9·46 | 16·00 | 2·79 |
| Aurangabad Division .. .. .. | 16·29 | 26·44 | 5·75 | 4·90 | 9·30 | 0·55 |
| Nagpur Division .. .. .. .. | 27·88 | 41·06 | 14·12 | 6·91 | 12·55 | 1·28 |

The Scheduled Tribe literacy rate of 7·21 per cent is too low as compared to 29·82 for the general population. For Scheduled Tribe females particularly, the literacy rate of 1·75 per cent is extremely low. Out of the four administrative divisions, Scheduled Tribes in Poona Division appear to be most literate and the Scheduled Tribes in Aurangabad Division the least literate in the State. General literacy rate is also very low for Aurangabad Division. But Scheduled Tribes in Poona Division appear to have taken advantage of educational facilities more than those in other Divisions.

The literacy rates vary considerably from tribe to tribe. The highest rate is 13·90 per cent for Koli Dhor and the lowest is 2·38 per cent for Kathodi. These differences are natural because the levels of literacy for the general population also vary considerably from district to district and the Scheduled Tribes moreover have large local concentrations. Differences in rural-urban composition of individual Scheduled Tribes also lead to such variations.

Because of the territorial changes made during the last three decades the literacy rates shown for some Tribes in the earlier Census Reports are only broadly comparable with the 1961 Census findings. For males and females among the tribes in West Khandesh district, the 1931 Census reported literacy rates of 0·43 and 0·05 per cent respectively. The corresponding 1961 literacy rates for Scheduled Tribes in Dhulia district are 14·60 and 2·02. The literacy rates for Bhils, Kathodi and Varli reported in 1931 were 0·54, 0·13 and 0·55 per cent. The corresponding 1961 rates are 6·48, 2·38 and 4·72 per cent respectively. Those Scheduled Tribes have no doubt made good progress in the last 30 years though there is a long way still to be covered.

The 1961 literacy rates for 19 major Scheduled Tribes (having over 10,000 population) for total, males and females are as follows :—

| | Percentage of Literates to total population | | |
|---|---|---|---|
| | Persons | Males | Females |
| **All Scheduled Tribes** .. .. | **7·21** | **12·55** | **1·75** |

Vd 4326—16a

Koli Dhor, Pardhan, Dhodia, Dhanka, Gamit, Dubla, Koli Mahadev, Pardhi, Kokna and Naikda have high percentages of literates ranging from 8·91 to 13·90. Of these, Koli Dhor, Dubla, Pardhi, and Naikda have comparatively larger proportions of population in urban areas, where they have had better educational facilities since long.

For literacy among females Koli Dhor stands first with 5·09 per cent. Dubla, Dhodia, Pardhan, Pardhi, Gamit and Koli Mahadev follow in that order with literacy rates ranging between 3 and 5 per cent. Major Scheduled Tribes like Bhil, Gond, Varli, etc. have very low literacy rates for females, and bring the average literacy rate for females among Scheduled Tribes down to only 1·75 per cent.

### Educational Levels

Out of the total Scheduled Tribe population of 23·97 lakhs, 45,910 or 1·92 per cent have completed primary education and 705 have attained matriculation or higher level. Thus, not only a vast majority of the Scheduled Tribe population (92·8 per cent) is illiterate, but out of those who are literate, only 26·58 per cent have completed the primary stage of education and only 0·4 per cent have attained matriculation or higher level.

42,138 males from Scheduled Tribes have completed primary stage and 668 males have attained matriculation or higher level. The distribution of matriculate or higher level men among individual Scheduled Tribes is as follows :—

| | |
|---|---|
| Koli Mahadev .. .. | 124 |
| Bhil .. .. | 122 |
| Gond .. .. | 99 |
| Koli Dhor .. .. | 62 |
| Kokna .. .. | 49 |
| Varli .. .. | 36 |
| Other Scheduled Tribes .. | 176 |

Among the females from Scheduled Tribes, 3,772 have passed primary stage of education and only 37 have attained matriculation or higher level. The distribution of matriculate or higher level women among individual Scheduled Tribes is as follows :—

| | |
|---|---|
| Varli .. .. | 15 |
| Koli Mahadev .. .. | 5 |
| Dhanka .. .. | 3 |
| Koli Dhor .. .. | 3 |

| Gamit .. .. | 1 |
| Thakur .. .. | 1 |
| Unclassified Scheduled Tribes | 2 |

It may be added that the educational levels described above are as on 1st March, 1961.

Table ST-II shows that there are 86,223 full-time students among the Scheduled Tribes. The population figures of school-going age children have not been compiled for Scheduled Tribes. The percentage of full-time students to the total population is 3·60 among the Scheduled Tribes as compared to 11·85 among the general population in Maharashtra. The proportions of full-time students for different Scheduled Tribes generally follow their literacy pattern.

**Religion**

Table SCT-IV—Part B at pages 337 to 354 shows the distribution of population of each Scheduled Tribe classified by religion for the State, four divisions and 26 districts and for rural and urban areas under each unit separately. The distribution of the Scheduled Tribe population in the State by religions is as follows :—

| Religion | Scheduled Tribe population | Percentage of population of each religion to total Scheduled Tribe population |
|---|---|---|
| (1) Buddhists .. .. | 15 | Negligible. |
| (2) Christians .. .. | 2,694 | 0·11 |
| (3) Hindus .. .. | 2,372,562 | 98·97 |
| (4) Muslims .. .. | 21,882 | 0·92 |
| (5) Sikhs .. .. | 7 | Negligible. |
| (6) Jains .. .. | 1 | Negligible. |
| (7) Religion not stated .. | 8 | Negligible. |
| All Religions .. | 2,397,159 | 100·00 |

23·72 lakhs or 98·97 per cent of the Scheduled Tribes returned "Hindu" as their religion. Scheduled Tribes professing all other religions make a combined total of 24,607 or 1·03 per cent of the total Scheduled Tribe population in the State. 26 out of the 40 Scheduled Tribes have their entire population belonging to "Hindu" religion.

Out of the Scheduled Tribe population of 21,882 returning "Muslim" as their religion, 17,676 are from Bhils and 4,185 from Dhankas. They belong to a sub-tribe known as Tadvi Bhil. Their entire population should be in Bhil. But some of them have been wrongly included under Dhanka because the sub-tribe is itself shown in the President's Order both under Bhil and Dhanka. They are concentrated in Jalgaon district which alone accounts for 20,861 persons among them. The 1931 and 1941 Census Reports show 8,172 and 2,462 as population of Muslim Bhils for Bombay Province. The 1951 Census did not show Scheduled Tribe population by religions. The 1961 population is not inconsistent with that of 1931 but the 1941 figure was perhaps wrong.

Scheduled Tribes have returned 2,694 persons as belonging to "Christianity". Their distribution by Scheduled Tribes is as follows :—

| | |
|---|---|
| (1) Bhil .. .. | 200 |
| (2) Dhanka .. .. | 439 |
| (3) Gamit .. .. | 640 |
| (4) Kathodi .. .. | 66 |
| (5) Koli Dhor .. .. | 80 |
| (6) Koli Malhar .. .. | 7 |
| (7) Korku ... .. | 27 |
| (8) Naikda .. .. | 67 |
| (9) Varli .. .. | 1,147 |
| (10) Other Scheduled Tribes .. | 21 |

No person from among the Scheduled Tribes in the State has in 1961 returned his religion as Tribal or as Animism.

**Mother-tongues**

Table ST-I (pages 367 to 420) shows the various mother-tongues spoken by the Scheduled Tribes as well as other subsidiary languages known by them. The 1961 Census returned 74 mother-tongues spoken by the Scheduled Tribes in Maharashtra. The following Statement shows the number of speakers against each of those 74 mother-tongues arranged in alphabetical order :—

1,585,030 persons or 66·12 per cent of the total Scheduled Tribe population in the State speak Marathi as mother-tongue. This is exclusive of the large numbers of people who have either returned the names of their Tribes in reply to the mother-tongue question or returned mother-tongues which are only local dialects of Marathi. Ahirani (28,064), Halabi (1,795), Kathodi (571), Katkari (3,857), Kokna/Kokni/Kukna (37,007), Thakri (4,170) and Varli (94) are a few such examples.

5·12 per cent of the Scheduled Tribe population speaks Marathi as a subsidiary language.

Out of the 40 Scheduled Tribes in Maharashtra, only six tribes, *viz.*, Bhunjia, Birhul, Kol, Nagesia, Oraon and Thoti together having a population of only 219 have not reported any person speaking Marathi as mother-tongue. 90 out of those 219 persons have, however, returned Marathi as subsidiary language.

The speakers of "Bhili", "Gondi" and "Korku" account for 13·32 per cent, 6·48 per cent and 2·09 per cent of the Scheduled Tribe population respectively. Other seven mother-tongues have more than ten thousand Scheduled Tribe speakers each. They are Ahirani (28,064), Gujarati (39,441), Kokna/Kokni/Kukna (37,007), Kolami (33,660), Maria (31,599), Mawchi (29,446) and Pawri (38,469). As has been described earlier, Ahirani and Kokna/Kokni/Kukna are dialects of Marathi.

The second numerically important mother-tongue of the Scheduled Tribes is "Bhili" and is spoken by Bhil, Gamit, Naikda and Dhanka. Among the Bhils, the proportion of speakers of Marathi as mother-tongue is 49·89 per cent, for Bhili it is 37·00 per cent, for Pawri 6·64 per cent, for Ahirani 4·42 per cent and for Urdu 0·95 per cent.

Gondi is spoken as mother-tongue by 56·54 per cent of the Gond population. The other mother-tongues spoken by them are Marathi (27·12 per cent), Maria (11·59 per cent) and Telugu (2·06 per cent). 99·40 per cent of the "Korku" population has returned Korku as their mother-tongue. 86·52 per cent of Dubla, 86·34 per cent of Dhodia and 30·90 per cent of Pardhi tribe have returned Gujarati as mother-tongue. 1,071 persons from Varli and 1,741 from Naikda have also returned Gujarati as mother-tongue.

860 persons (812 males and 48 females) have returned English as a subsidiary language. Their distribution by major Scheduled Tribes is as follows :—

| Scheduled Tribe | Total | Males | Females |
|---|---|---|---|
| (1) Bhil .. .. | 178 | 168 | 10 |
| (2) Koli Mahadev .. | 186 | 183 | 3 |

Table ST-I shows the number of speakers for each mother-tongue under different Scheduled Tribes. The same material is re-arranged and presented below to show the number of speakers of different mother-tongues for each Scheduled Tribe. The Scheduled Tribes are shown in the order of their population. Presentation is limited only to 14 Scheduled Tribes each having more than 25,000 population.

### Economic Activity

Table SCT-I—Part B (pages 242 to 269) shows the distribution of Scheduled Tribe population in rural and urban areas classified into workers and non-workers and for workers classified by nine broad categories of economic activity. The concepts of workers and non-workers and the nine categories of economic activity have been explained in the Introductory Note at pages 2 and 3. The proportions of workers for total, rural and urban areas for males and females among the Scheduled Tribe population and the general population are as follows :—

| | Total | Rural | Urban |
|---|---|---|---|
| Scheduled Tribe population— | | | |
| Males .. | 61·54 | 61·74 | 56·49 |
| Females .. | 55·83 | 56·63 | 34·71 |
| General population— | | | |
| Males .. | 57·09 | 58·07 | 54·84 |
| Females .. | 38·10 | 46·74 | 13·45 |

Labour participation rates (proportion of workers to total population) both for males and females among the Scheduled Tribes are higher than the corresponding rates for the general population. For females particularly they are very much higher. These differences are due to the predominance of agriculture in and comparative backwardness of the tribal economy. Extremely low proportions of school-going children also contribute to the higher rates though they may in turn be the effects of social and economic underdevelopment. These high participation rates both for men and women among the Scheduled Tribes should, on the background of the hilly or forest terrain of their habitats and almost complete absence of secondary and tertiary sectors of industry, point to a very high degree of under-employment among them. Under-employment has been described as the most serious malady which the Scheduled Tribes suffer from at present. No quantitative estimate of under-employment is, however, possible on the basis of the 1961 Census material.

Proportions of workers to total population (rural-urban combined) for males and females of 14 numerically important Scheduled Tribes are as follows :—

| Name of Scheduled Tribe | Percentage of workers to Total population — Males | Females |
|---|---|---|
| **All Scheduled Tribes** .. .. | **61·54** | **55·83** |
| (1) Bhil .. .. .. | 60·18 | 54·39 |

| (5) Kokna .. .. | 60·74 | 56·39 |
| (6) Thakur .. .. | 63·80 | 56·46 |
| (7) Kathodi .. .. | 60·09 | 53·42 |
| (8) Gamit .. .. | 59·50 | 57·60 |
| (9) Koli Malhar .. .. | 61·41 | 56·38 |
| (10) Andh .. .. | 63·45 | 55·70 |
| (11) Korku .. .. | 60·74 | 55·32 |
| (12) Dhanka .. .. | 59·71 | 57·60 |
| (13) Kolam .. .. | 66·64 | 64·26 |
| (14) Pardhan .. .. | 61·82 | 59·60 |

Generally speaking, the labour participation rates are higher among the Scheduled Tribes of the Gondvana group. In fact, Kolam has the highest rates among all the Scheduled Tribes both for males and females. Gond follows very closely with the second highest rate for males and the third highest for females. The Scheduled Tribes of the Satpuda group comparatively have lower rates of participation. Gamit, Dhanka, Kathodi, Bhil and Korku have in that order the lowest five rates for males. For females, Bhil has the second lowest rate among the Scheduled Tribes. These low values both for males and females may indicate higher proportions of school-going boys and girls.

The Scheduled Tribes of the Sahyadri group are at a middle position between the other two groups. Very low rates for males and females among Kathodis may be due to the shortage of elderly working age population among them.

The distribution of workers in nine broad categories of economic activity is shown below for males and females for total Scheduled Tribe population (rural-urban combined) and for general population of the State in rural areas only.

| Workers | Scheduled Tribe population (Rural-Urban combined) | | General population (Rural only) | |
|---|---|---|---|---|
| | Males | Females | Males | Females |
| **All Categories** .. | **100·00** | **100·00** | **100·00** | **100·00** |
| I Cultivator .. | 51·84 | 51·39 | 55·74 | 59·16 |
| II Agricultural Labourer | 35·10 | 41·90 | 24·46 | 34·55 |
| III Mining, Quarrying, Livestock, Forestry, etc. | 4·68 | 2·65 | 3·38 | 0·75 |
| IV Household Industry | 0·94 | 0·38 | 5·06 | 2·66 |
| V Manufacturing other than Household Industry. | 1·60 | 0·56 | 1·86 | 0·29 |
| VI Construction .. | 0·61 | 0·24 | 1·22 | 0·36 |
| VII Trade and Commerce. | 0·55 | 0·52 | 2·19 | 0·51 |
| VIII Transport, Storage and Communications. | 0·77 | 0·08 | 0·81 | 0·05 |
| IX Other Services .. | 3·91 | 2·28 | 5·28 | 1·69 |

The Scheduled Tribes depend upon agriculture more than the general rural population in the State. The combined proportion for cultivators and agricultural labourers for males is 86·94 against 80·20 for the general population in rural areas. For females, however, the combined proportions are more or less the same.

A significant departure, however, is in the higher proportions of agricultural labour both for males and females. The participation of Scheduled Tribes in agriculture is thus more as agricultural labourers.

Category III including livestock and forestry naturally has larger proportions both for males and females among the Scheduled Tribes than among the general rural population. Logging and felling of trees, making of coal and gathering of minor forest produce naturally engage larger numbers both among males and females in the Scheduled Tribes. These activities no doubt provide supplementary employment to many more persons among them though they may be classified in Category I or II on the basis of principal work. Combined proportions for IV Household Industry and V Manufacturing are significantly lower among the Scheduled Tribes than among the general rural population. Very low proportion for Category VII Trade and Commerce for males may indicate that their participation even in local retail trade is inadequate.

The proportion for females in Category IX Other Services is higher because many of them are employed in domestic services.

Proportions of workers engaged in Categories I, II, III and other categories for 14 numerically important Scheduled Tribes are shown below for males and females separately. Proportions are out of the combined population for rural and urban areas:—

| Name of Scheduled Tribe | Category of Workers | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | I | | II | | III | | IV to IX | |

Ten out of the fourteen Scheduled Tribes shown above have more than half of their workers (both males and females) engaged in cultivation (of owned or tenanted land). Kokna has the highest proportions both for males (84·18) and females (86·05). Koknas are actually known to be devoted to cultivation. Korku, Thakur, Gamit and Koli Mahadev also have nearly two-thirds or more of their workers engaged as cultivators.

The four Scheduled Tribes which have high proportions of agricultural labourers are Bhil, Kolam, Pardhan and Kathodi. Kathodi is known as a tribe of landless labourers. Kolam and Pardhan appear to be holding more or less the same position in the Gondvana group. It is, however, significant that the numerically largest Scheduled Tribe "Bhil" has the highest proportion of workers (males 58·09 and females 68·74) in Category II.

Kathodi has its own typical distribution. It also has a majority of workers in Category II but its proportions in Categories III and IV to IX combined are the highest amongst the Scheduled Tribes. In fact, Kathodi, inspite of its seventh rank by population size, has the largest number of workers engaged in forestry, felling, logging and making of coal and catechu. Their proportions in Categories IV to IX are also high, perhaps because a large number among them are employed in domestic services.

Pardhan also has a large number engaged in other services. But they are employed more as musicians and bards and not in domestic services.

**Size of Cultivation Holdings**

Table SCT-V—Part B shows the distribution of Scheduled Tribe households engaged in cultivation by interest in land and size of cultivation holdings. The material is, however, available only for rural areas and for all Scheduled Tribes as a group and not for each Scheduled Tribe separately.

Distribution of cultivating households for Scheduled Tribes and for the general population by interest in land is as follows :——

| Interest in land | General households | Scheduled Tribe households |
|---|---|---|
| (*a*) Entirely owned .. | 78·5 | 69·1 |

It had been observed that Scheduled Tribe participation in agriculture is more as agricultural labourers than as cultivators. The above distribution will show that even among the 'Cultivator' category Scheduled Tribes participate a little less as owners and three times more as tenants.

Distribution of 1,000 cultivating households by size of land cultivated is as follows :—

| Size of holding | General households | Scheduled Tribe households |
|---|---|---|
| (1) Less than 1 acre .. | 48·93 | 34·29 |
| (2) 1·0—2·4 .. .. | 157·77 | 162·00 |
| (3) 2·5—4·9 .. .. | 166·88 | 185·14 |
| (4) 5·0—7·4 .. .. | 137·35 | 159·35 |
| (5) 7·5—9·9 .. .. | 77·02 | 89·25 |
| (6) 10·0—12·4 .. | 92·68 | 105·96 |
| (7) 12·5—14·9 .. | 38·61 | 36·56 |
| (8) 15·0—29·9 .. | 174·75 | 168·16 |
| (9) 30·0—49·9 .. | 67·84 | 39·62 |
| (10) 50 and above .. | 32·70 | 9·65 |
| (11) Unspecified size .. | 5·47 | 10·02 |

The Scheduled Tribe proportions are higher for small size groups (at 2 to 6) and are lower for the large size groups (at 7 to 10). For the lowest size group of less than one acre, Scheduled Tribe proportion is lower, perhaps because they are concentrated in hilly areas and cultivate varkas or dry lands in hilly areas more than the rice lands.

The Scheduled Tribe proportion for households cultivating above 30 acres is 4·9 per cent, as compared to 10 per cent for the general population.

The disparities of the distribution of land are, however, not wholly reflected in the above statement, as soil value and the facilities of irrigation are not accounted for in it. Lands in tribal areas are hilly and fit only for growing inferior foodgrains.

# INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED TRIBES

## EXPLANATORY NOTE

This table presents the distribution of Scheduled Tribe population by sex and economic activity. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately. The presentation of Scheduled Tribes is in alphabetical order.

2. Material is presented for the State, its four administrative divisions and twenty-one districts and under each administrative unit for rural and urban areas separately.

3. The classification of Scheduled Tribe population by economic activity is into workers and non-workers and of the workers into nine broad industrial categories. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) will be found in the Introductory Note at pages 3 and 4.

4. In a way this table presents tribewise break-up of the material relating to economic classification presented in Table C-VIII—Part B printed in Part II-C (i) of the Maharashtra Census Report.

5. The last group of "Unclassified" given in the table is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been entered in the Census Slip.

TABLE SCT-II—PART B

# AGE AND MARITAL STATUS FOR SCHEDULED TRIBES

## EXPLANATORY NOTE

This table gives the distribution of Scheduled Tribe population by sex, broad age-groups and marital status. The presentation is for all Scheduled Tribes as a group as well as for each Scheduled Tribe separately. Material is presented for Maharashtra State, its four administrative divisions and twenty-one districts but without any break-up for rural and urban areas.

2. The three broad age-groups adopted in this table are 0—14, 15—44 and 45 and above. The last group of "age not stated" includes persons in whose case age had not been returned. The break-up by age-groups is by a horizontal spread in the column headings.

3. Answers relating to marital status were recorded against Question 3 of the Individual Slip and have been classified in the table into the following four categories :—

"*Never married*" are persons who have never been married.

"*Married*" persons are those who are currently married, whether for the first or another time. These include those recognised as married by custom or society and those in stable *de facto* union.

"*Widowed*" persons include those whose husbands or wives are dead and who have not married again.

"*Divorced or separated*"—Persons who have been divorced either by a decree of a law court or by a regular social or religious custom but who have not remarried are considered as 'divorced'. Those who have been separated from wives or husbands and are staying apart with no apparent intention of living together again are treated as 'separated'. The table shows only the combined figures for 'separated' and 'divorced'.

4. While compiling a similar Table (C-II) for the general population all persons in the age-group 0—9 have been treated as 'Never Married' irrespective of the answer to Question 3 of the Individual Census Slip. Such presumption was not made while compiling the present Table (SCT-II) for Scheduled Tribes and the classification for all persons including those in the age-group 0—14 has been made with reference to the marital status actually returned during the Census. These figures of marital status for the total and the age-group 0—14 shown in this table may not, therefore, be strictly consistent with the corresponding figures shown in Table C-II presented in the Maharashtra Census Report—Part II-C (i).

TABLE SCT-III—PART A (ii)
AND
TABLE SCT-III—PART B (ii)

# EDUCATION in Urban Areas only for Scheduled Tribes

# EDUCATION in Rural Areas only for Scheduled Tribes

## EXPLANATORY NOTE

This table presents the distribution of Scheduled Tribe population by sex and educational levels. The figures are presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately.

2. The educational levels adopted for classification are more elaborate for urban areas and the material is, therefore, presented in two separate parts, Part A (ii) for Urban areas and Part B (ii) for Rural areas.

3. Material is presented in both the parts for the State, its four administrative divisions and twenty-one districts.

4. Part B (ii) for Rural areas presents data for four broad groups of educational levels, *viz.*, (*i*) illiterate, (*ii*) literate without educational level, (*iii*) Primary or Junior Basic and (*iv*) Matriculation and above. Part A (ii) for Urban areas presents data for each of the first three groups of educational levels shown above and also gives a further break-up of the fourth group of Matriculation and above into Matriculation or Higher Secondary, technical and non-technical diploma holders and technical and non-technical university degree or post-graduate degree holders. The table however does not present any break-up of technical degrees or diplomas into different branches, *viz.* Engineering, Medicine, etc., as is shown in Tables B-III—Part A and C-III—Part B for the general population. These latter tables are presented in the Maharashtra Census Report—Part II-B (i) and Part II-C(i) respectively.

5. The 1961 Census definition of literacy was ability to read and write any simple letter either in print or in manuscript. If a person who could both read and write had also passed a written examination or examinations as proof of an educational level attained, the highest examination passed was recorded in the Census Slip. The figures for educational levels shown in the table relate to the levels already attained and not those being studied.

6. The figures shown for lower educational levels are exclusive of those shown under higher educational levels.

7. In a few cases where the answer to the question on literacy was blank or inadequate the persons concerned have been treated as illiterate unless the answers to the economic questions indicated that they could not be illiterate. In the latter type of cases they were classified as " literate without educational level ".

## EXPLANATORY NOTE

This table shows the distribution of Scheduled Tribe population by religion. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately. The presentation is for Maharashtra, its four administrative divisions and twenty-one out of its twenty-six districts. Rural and Urban figures are shown separately, but without the total figures. Five districts, *viz.* Buldhana, Akola, Wardha, Nagpur and Bhandara, are not presented as there are no (declared) Scheduled Tribes.

2. Unlike the Scheduled Castes, the Scheduled Tribes may belong to any religion. The classification of tribes by religion is based on the answers returned to Question 5 (b) 'Religion' and to Question 5 (c) 'Scheduled Caste/Scheduled Tribe' in the Census Slip. Religions are arranged horizontally in alphabetical order and the number of persons from each Scheduled Tribe is shown under each religion. The last group of "religion not stated" includes those for whom answers to the question on religion were either blank or inadequate for classification.

## TABLE SCT-V—PART B

# Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural Areas only for Scheduled Tribes

## EXPLANATORY NOTE

This table shows the distribution of sample households among Scheduled Tribes engaged in cultivation classified by interest in land and size of land cultivated. The table is similar to the Household Economic Table B-XI for general population presented in Part III of the Maharashtra Census Report.

2. Material is presented for the State, its four administrative divisions and twenty-one districts but for rural areas only. The remaining five districts, *viz.*, Buldhana, Akola, Wardha, Nagpur and Bhandara, are not presented here as there are no (declared) Scheduled Tribes.

3. The presentation is for all the Scheduled Tribes as a group and not for each Scheduled Tribe separately.

4. This table has been prepared on the basis of data collected in the Household Schedule canvassed in the 1961 Census and has been compiled for a 20 per cent sample drawn from total households.

5. The classification of cultivating households is in ten size-groups and is presented by a horizontal spread in columns 3 to 13. The last size-group of 'unspecified' is of households for whom the size of land cultivated had not been specified in the Household Schedule. The cultivating households are those which are engaged in cultivation as an enterprise, principal or secondary, irrespective of the fact whether the land cultivated by them is owned or held from Government or held from private persons or institutions for payment in money, kind or share. The distribution by size-groups shown here is thus of the cultivation or operational holdings and not of the ownership holdings.

6. The three types of interest in cultivated land are: (*i*) owned or held from Government, (*ii*) held from private persons or institutions for payment in money, kind or share and (*iii*) partly held from Government and partly from private persons or institutions for payment in money, kind or share. These three interests are shown by a vertical spread under column 1 and by using symbols (*a*), (*b*) and (*c*) respectively.

TABLE ST-I

# MOTHER-TONGUE AND BILINGUALISM FOR SCHEDULED TRIBES

## EXPLANATORY NOTE

This table presents material on mother-tongues and bilingualism of Scheduled Tribes. Presentation is for Maharashtra, its four administrative divisions and twenty-one districts, but without any break-up for rural and urban areas.

2. For each administrative unit the material is presented by " mother-tongues ", that is, under each ' mother-tongue ' caption the numbers of persons (male and female) from among all the Scheduled Tribes who have returned that language as mother-tongue are shown in the first line, and the break-up of the figures for the various Scheduled Tribes is shown immediately below.

3. Column 1 shows the name of the Scheduled Tribe. The figures for ' mother-tongue ' speakers (male and female) are shown in columns 2 and 3. Columns 4 and 5 show the number of persons (male and female) out of those shown in columns 2 and 3, who have returned some language in addition to the mother-tongue, as a subsidiary language spoken by them. The names of the subsidiary languages are shown in column 6 in run-on lines, followed in each case in brackets by the numbers of male and female speakers of the respective subsidiary language. The run-on line presentation has been adopted in this column as a measure of economy of space.

4. The data presented in this table have been compiled on the basis of the answers recorded against Questions 5 (c) " Scheduled Caste/Scheduled Tribe "; 7 (a) " Mother-tongue " and 7 (b) " Other languages " in the Individual Slip.

5. " Mother-tongue " was defined as the language spoken in childhood by the person's mother to the person or mainly spoken in the person's home in childhood. In the case of infants and deaf mutes the language usually spoken by the mother, or, if the mother had died while the person was still a child, the language mostly spoken in the person's home in childhood was recorded as the ' mother-tongue '. Thus, for each and every person, the ' mother-tongue ' was recorded irrespective of whether or not he was able to speak.

6. " Subsidiary language " was defined as the language, if any, other than his mother-tongue, which a person is able to speak and understand and use with felicity in communicating with others. It is not necessary that the person should be able to read and write in that language. It would suffice if he is only able to speak that language. The question of recording a ' Subsidiary Language ' in the case of infants and deaf mutes, who were not able to speak at all, did not arise.

7. Where two or more subsidiary languages had been returned, only the first of them was taken into consideration for compiling this table.

8. The various languages shown as ' mother-tongues ' and ' subsidiary languages ' are as returned by the persons concerned.

9. The ' mother-tongues ' have been arranged in the Table in alphabetical order. Under each ' mother-tongue ' the Scheduled Tribes have again been arranged in alphabetical order. The Subsidiary Languages shown in column 6 are also arranged in alphabetical order.

## TABLE ST-II

# PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED TRIBES

Vd 4326—28 (1,000—9-64)

## EXPLANATORY NOTE

This table presents the distribution of non-working population among the Scheduled Tribes by sex and type of activity. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately.

2. The presentation is for Maharashtra, its four administrative divisions and twenty-one out of twenty-six districts. The remaining five districts, *viz.*, (*i*) Buldhana, (*ii*) Akola, (*iii*) Wardha, (*iv*) Nagpur and (*v*) Bhandara are not shown in the table as there are no (declared) Scheduled Tribes.

3. The classification of non-workers by type of activity is into the following four groups and is shown by a horizontal spread under columns 5 to 12 :—

(*i*) full time students ;

(*ii*) persons seeking employment for the first time ;

(*iii*) persons employed before but now out of employment and seeking work ; and

(*iv*) others.

4. The second and third groups together show the total number of unemployed persons among the Scheduled Tribes.

5. The last group " Others " includes the following five types. Separate figures under each of those types as in Table B-IX for the general population were not compiled for non-workers among the Scheduled Tribes—

(*a*) Housewives and others engaged in unpaid home duties only ;

(*b*) Dependants including infants, children not attending school, permanently disabled, etc. ;

(*c*) Rentiers, pensioners and other persons of independent means, who do not work ;

(*d*) Beggars, vagrants, etc. ; and

(*e*) Inmates of penal, mental and charitable institutions.
