NOTE

In this volume the Social and Cultural (C Series) Tables of West Bengal and Sikkim have been presented. The social and cultural questions asked in the 1961 Census follow the usual Census pattern. There was a question on Nationality, Religion, Scheduled Castes and Scheduled Tribes, another on Literacy and Education and a third on Mother Tongue and Bilingualism. The 1961 Census Questionnaire and Enumeration Instructions have been fully reproduced in the Preface to the Part II-A—General Population Tables Volume, and it is not intended to cover the same ground again.

2. For facility of reference, a brief resume is given here of the tables presented in this volume. Table C-I shows the Composition of 20 per cent Sample Households by Relationship to Head of Family and is prepared from the Census Population Record. The table has a limited correspondence to Table C-I of the 1951 Census prepared on a sample roughly of 1 in 1,000 households taken from the National Register of Citizens.

2.1. Table C-II which shows the Marital Status Classification of the population by broad Age-groups recalls Table C-III of 1951. All Age Tables of the 1951 Census were based on a 10 per cent sample of the total population excluding the displaced population. The 1961 tables, on the other hand, are on the entire population.

2.2. Table C-III which is prepared in three parts for Total, Urban and Rural areas respectively, shows the Classification by Literacy and Levels of Education of each age-group of the population. The corresponding table of the 1951 Census was Table C-IV. The Special Tables on Scientific and Technical Personnel which are printed in the Appendix to Table C-III are based on a special enquiry held as an ancillary to the 1961 Census. The tables furnish within the limitation explained in the Note preceding them, data on availability and utilisation of technical personnel of different branches of science and technology.

2.3. Table C-IV which shows the Single Year Age Returns of the entire population has a reference to Table C-V of the 1951 Census. It was for the first time in the 1951 Census that a table on single year ages was presented, if only for a representative sample. In earlier Censuses tabulation for single year ages used to be attempted for a few selected tracts only for use of the Census Actuary in his construction of the life tables.

2.4. Table C-V shows the Returns for Mother Tongues arranged in alphabetical order with annotations by the Linguist to the Registrar General.

This table corresponds to Part I of Table D-I of the 1951 Census, while Table C-VI of 1961 on Bilingualism has a correspondence to Part II of Table D-I of 1951.

2.5. Table C-VII which is the only table on Religion in the 1961 Census recalls Table D-II of the 1951 Census.

2.6. Table C-VIII classifies the Scheduled Castes and Scheduled Tribes population by Literacy, nine Industrial Categories of Workers and Non-workers. This table has a limited correspondence to Table D-III of 1951 which showed the Scheduled Castes/Tribes population classified by Sex alone. The principles of classification of the population into the nine Industrial Categories of Workers and Non-workers in the 1961 Census have been discussed in the Prefatory Note to Part II-B(i)—General Economic Tables Volume.

3. Each table presented in this volume is preceded by a brief note which explains conceptual matters and the scope of the table.

4. My grateful thanks are due to Shri S. Sinha, Officer on Special Duty, Shri B. Ray, Deputy Superintendent of Census Operations, and to the staff of the Central Tabulation Unit of my office where all the tables presented in this book, except Table C-I and the Special Tables on Scientific and Technical Personnel, were prepared. The services rendered by Shri J. N. Bose, Statistical Assistant, Shri D. P. Chatterjee, Shri A. K. Ghosh and Shri S. Neogy, Tabulation Assistants need special mention. Shri R. C. Bhar, Printing Inspector and his team of Proof Readers have given this publication the same care and consideration with which they treated its predecessors.

4.1. In the Registrar General's Office among all the officers who were generous with their time and effort there are three who must be given special mention. These were Shri K. D. Ballal, Central Tabulation Officer, who checked the tables for arithmetical accuracy and internal consistency, Shri S. C. Sharma, Mechanical Tabulation Officer, who prepared Table C-I, and Shri R. C. Nigam, Linguist, who scanned the Mother Tongue returns and prepared a note on their classification.

4.2. Census is one of the toughest of a civil servant's assignments. What little justice I could do it I owed largely to the advice and guidance of Shri Asok Mitra, Registrar General, India. My grateful obligations are also due to Shri J. C. Sen Gupta, former Superintendent of Census Operations, West Bengal & Sikkim, who initiated me in the art of administration and in the science of Census taking.

COMPOSITION OF SAMPLE HOUSEHOLDS
BY RELATIONSHIP TO HEAD OF
FAMILY CLASSIFIED BY SIZE
OF LAND CULTIVATED

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% Sample)

This table broadly corresponds to Table C-I(ii)—Family Composition of Sample Households of 1951. A special feature of the 1961 Census was the supplementation of the data collected on the basis of the individual by information on the household as an entity. A Household Schedule was filled up for each household containing data on economic activities of the household. At the back of the Household Schedule there was a "Census Population Record" which contained a record on certain essential information for each individual enumerated in the household. This information consisted of social and demographic features such as name, sex, relationship to head of the household, age, marital status and description of work if working. The present table is based on this Population Record. This table has been prepared on the basis of a 20 per cent sample of the Household Schedules. Extracts from the instructions issued by the Registrar General, India, on the selection of Sample Household Schedules are reproduced below:

"For the purpose of tabulation every fifth household from the starting random household will be selected to make a 20 per cent sample. The sample household will be marked continuously for rural areas of a police station and for urban areas of a district i.e., households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

Before marking the sample households the household schedule pads should be arranged in the order of location code-numbers of villages in a police station in the case of a rural area and in the order of the location code numbers of towns in the district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped(S) as selected. This random number (random start) should be chosen separately for rural areas of each police station and for the urban areas of the district. From the first random household every fifth household should be continuously stamped as selected. A rubber stamp will have to be specially prepared for that purpose. The sample should be continuously marked for all the pads of villages in a police station and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after the marking of the sample household, the households left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household.

In short the following points should be strictly followed while selecting the sample households:

(i) All pads of household schedules of rural areas of one police station should be arranged in order of ascending number of location codes of villages. If in a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.

Similarly all pads of urban areas in a district should be arranged in ascending order of location code numbers. Within an urban area these pads will be arranged in the order of block numbers.

(ii) After selection of the first sample schedule the sample will be continuously picked up without a break until the last pad of the police station is exhausted in the rural areas and the district in urban areas.

(iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner with a rubber stamp(S).

* * *

(vi) In case two or more household schedules are utilised for a household on account of large size of the household all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.

* * *

(viii) We are not concerned with institutions and therefore, in taking out sample we should discard institutions and confine the samples only to family household. In counting every fifth household schedule, therefore, the schedule for institutional household should be left out, the order of the sample being confined only to the schedules of households."

2. The operations of coding, punching and machine processing of the sample Household Schedules as well as the construction of this table were done by the Central Mechanical Tabulation Unit of the Registrar General's Office.

3. "Household", for purposes of the Census, means the entire group of persons who commonly live together in the same Census-house and take their meals from a common mess unless the exigencies of work prevent them from doing so. The Head of the household according to the Census definition is a person on whom falls the chief responsibility for the maintenance of the household. Thus, the

head of the household need not necessarily be the eldest member but may even be a female or a younger member of either sex. It was not however for the Enumerator to make any elaborate enquiry about this. He was instructed to record as head of the household the name of the person who was actually acknowledged as such.

4. It will be seen from the instructions on selection of samples reproduced above that households which were "Institutions" were excluded from the sample. An Institutional Household refers to penal, charitable or mental institutions, hostel, hotel, hospital, boarding house, etc.

5. This table has been prepared separately for Total, Rural and Urban Population and presents figures at the State, Division and District levels. It gives the composition of the members in a household. Family and non-family members of the household have been shown separately. Among the 'family' members are the heads of households,

their spouses, married relations (i.e., married sons, other married male relations and other married female relations) and never married, widowed, divorced or separated relations. Figures in each class have been shown separately. There are separate figures for all unrelated persons.

6. For households engaged in Cultivation, figures have been further subclassified by size of holding groups. These size groups refer to the land under family cultivation by the cultivating households.

7. The heads of households are shown as less than the total number of households in some areas on account of the fact that some Enumerators had apparently not indicated any person as the head of household in the 'Population Record' where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

8. This table is of sociological interest indicating as it does, the strength of the joint family system.

AGE AND MARITAL STATUS

TABLE C-II—AGE AND MARITAL STATUS

This table corresponds to Union Table C-III—Age and Civil Conditions of 1951. While the data of Marital Status was tabulated on a 10 per cent sample in 1951, this table is based on the entire population. In 1951, the information on civil condition was classified as Unmarried, Married, and Widowed or Divorced. The age groupings were 0, 1-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75 and over, and Age not stated. In 1961, divorced and separated persons are not shown together with the widowed ones. The classification on marital status this time is Never Married, Married, Widowed, and Divorced or Separated. The age groupings are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69 and 70+, and Age not stated.

2. As regards the classification by Marital Status it is important to note that for persons who are acknowledged by custom or society as married and for persons in stable *de facto* union, the marital status has been recorded as "Married". Even if a marriage is disputed in the locality, the status has been recorded as "Married" provided the person concerned said that he or she was married or was in a stable *de facto* union. A person whose husband or wife was dead and who was not again married was returned as "Widowed". For a person who was divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who was not remarried, or a person who had been separated from wife or husband and was living apart with no apparent intention of living together again, the status recorded was "Divorced or Separated". For a prostitute the return on marital status was as declared by her.

3. It was directed by the Registrar General, India, that during Sorting Operation all Slips in age-groups 0-4 and 5-9 were to be classified as

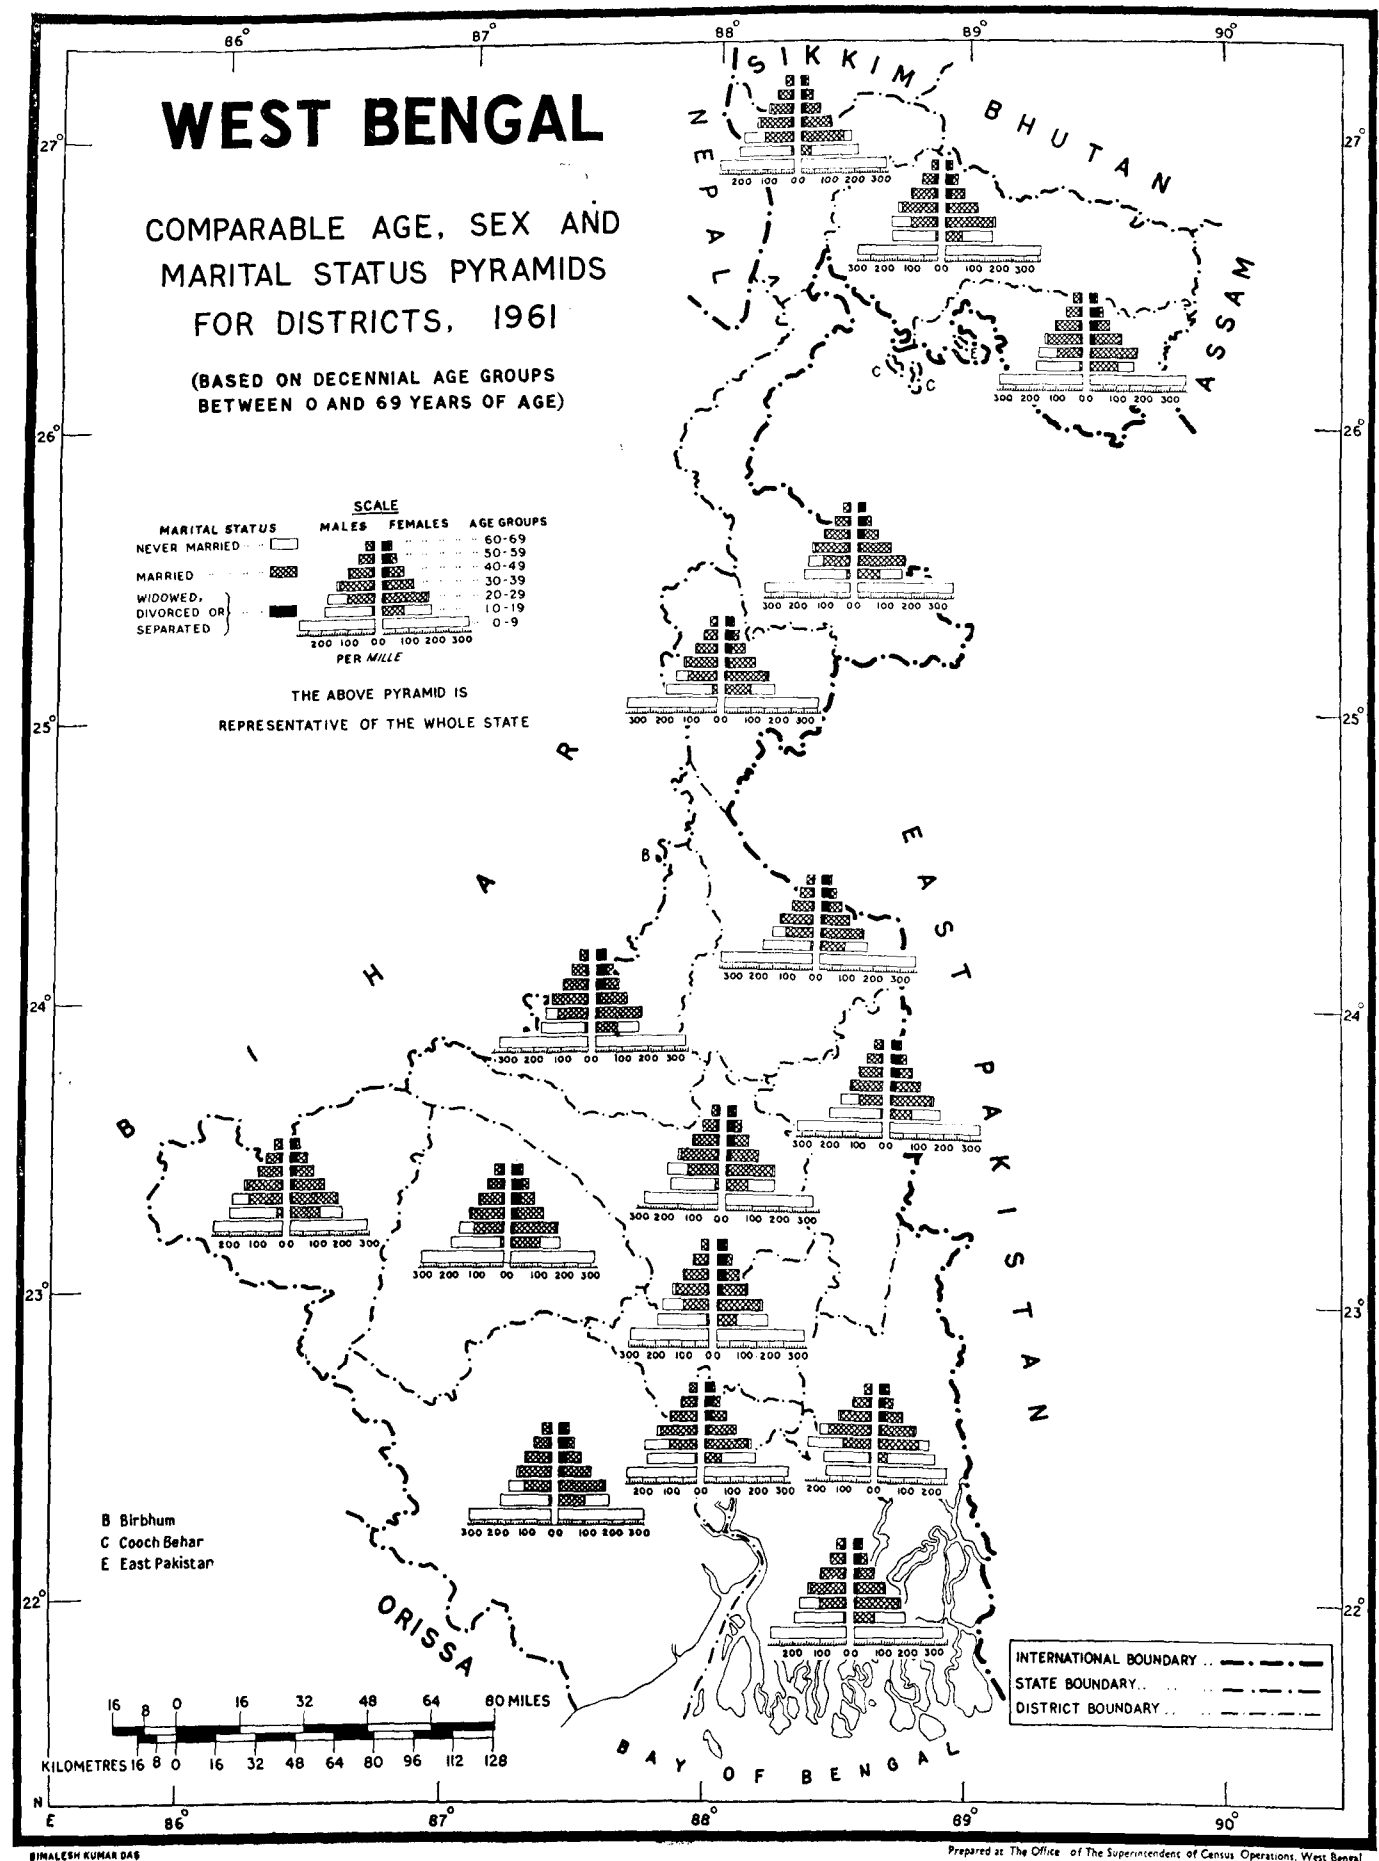

"Never Married", irrespective of the actual entry recorded on the Slips. The idea behind this instruction was that population in these age-groups, even if married, did not enter the fertility picture of the country, and the primary purpose of the table was a study of the fertility history and growth potentiality. All persons in age-group 0-4 and 5-9 have therefore been shown as "Never Married" in this table.

4. Statement I shows figures of original returns in West Bengal and Sikkim of a marital status other than 'Never Married' in ages 0 to 9 (which were later merged into 'Never Married' under instructions referred to above) will be of much interest. It will give an indication of the prevalence of child marriage, specially among Females in rural areas.

5. This is a very important demographic table. From this table can be studied trends of variations in the proportions of the various marital status conditions over the last ten years. The table can also be utilised for an examination of a discernible change in the age at marriage. It will also give an indication of mortality in different marital statuses and age-groups. The data on married females by age-groups can also be availed of for forecasting the future births from age specific birth rates.

6. Statement II shows the percentage of population in each age-group under a marital status to the total population under that marital status in West Bengal.

7. Statement III shows the percentage of population under each marital status separately for males and females in each age-group to the total population of that age-group.

TABLE C-III—AGE, SEX AND EDUCATION

This table has been prepared in three parts. The first part relates to All Areas, the second part to Urban Areas and the third to the Rural Areas. It shows, under five-yearly age-groups upto 34, one group from 35—44, another from 45—59 and yet another for 60+, and for 'Age not stated' the population classified by literacy and levels of education. The levels of literacy and education are different for rural and urban areas and have been described in the Fly-leaf to the respective part of the table.

2. For the purpose of the Census, an illiterate person was one who could neither read nor write or could merely read but could not write in any language. A literate person was one who could both read and write. The test for reading as specified in the Instructions to Enumerators was "ability to read any simple letter either in print or in manuscript i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity, he may be taken to have passed the test for reading. The test for writing is ability to write a simple

letter. The test for literacy is satisfied if the person can with understanding both read and write". All children aged 4 or below have been treated as illiterate. This table corresponds to Table C-IV of 1951 Census. In 1951, literate persons were not classed separately for levels of education. But there was a third group for persons who were able to read only. The table was prepared on a 10 per cent sample of the total population excluding the displaced persons. In 1961, the table covers the entire population.

3. This table will measure the growth of Literacy in the Total Population as well as in the different age-groups since the last Census and furnish information about the spread of education.

4. The following statement shows the proportion to the total population of persons who are illiterates, literates (without educational levels) and persons who have attained educational levels of Primary or Junior Basic and Matriculation and above :

TABLE C-III—PART B—AGE, SEX AND EDUCATION IN URBAN AREAS ONLY

This part of the table relates to the Urban Population. The age-groups are the same as in Part A of the table, but the educational levels have been further refined. They are:

- Literate (without educational level)
- Primary or Junior Basic
- Matriculation or Higher Secondary
- Technical diploma not equal to degree
- Non-technical diploma not equal to degree
- University degree or post-graduate degree other than technical degree
- Technical degree or diploma equal to degree or post-graduate degree:
- Engineering
- Medicine
- Agriculture
- Veterinary and Dairying

Technology
Teaching
Others

2. The concept of literacy has been explained in the main Fly-leaf to Table-C-III.

3. It will be seen that in age-group 10—14, a few returns have appeared under the educational levels "Technical diploma not equal to degree" and "Non-technical diploma not equal to degree". Although these returns may be partly due to understatement of age in the Enumeration Schedules, it is worthwhile to keep in view the possibility of persons in that age-group taking diplomas in such subjects as sewing, embroidery, tailoring, woodcraft, music, type-writing, etc.

APPENDIX TO TABLE C-III

SPECIAL TABLES ON SCIENTIFIC AND TECHNICAL PERSONNEL

The Government of India took a decision to have a Special Enumeration of technically qualified personnel along with the Enumeration for the 1961

Census. For this purpose a Special Enumeration Card was devised, a specimen of which is given below :

(Obverse)				
CENSUS OF INDIA 1961 : SCIENTIFIC & TECHNICAL PERSONNEL				
Only a person with a recognised Degree or Diploma in Science, Engineering, Technology or Medicine should fill in this card.				
READ CAREFULLY BEFORE FILLING IN. TICK (V) WITHIN BRACKETS PROVIDED WHERE APPLICABLE.				CENSUS LOCATION CODE

The Registrar General, India, Ministry of Home Affairs, 2A, Man Singh Road, NEW DELHI-11				

In West Bengal and Sikkim the enquiry was confined to Urban areas only. The arrangement made was that each Census Enumerator in an urban area was given a sufficient number of blank cards. He gave the necessary number of cards at each household in which there were technically qualified persons. Such persons were those who had a recognised degree or diploma in Science, Engineering, Technology or Medicine. Before leaving the cards at the household, the Enumerator filled up the rectangle on the top right hand side of the card for writing the Location Code and also wrote the Code for the State. The Enumerator requested the technical persons in the household to fill up the cards themselves and to hand them over to him when he would come back on the revisional round. No compulsion in this matter was exercised but those who did not hand over the filled up cards were requested to post them. The cards (business reply) were addressed to the Registrar General, India.

3. This Special Enumeration was only for technical personnel of the following educational levels:

(a) *Science*—B.A. or B.Sc., M.A. or M.Sc., or higher degrees (Ph.D. etc.) in Science subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geo-Physics, Geography, etc.

(b) *Engineering*—Degree or Diploma in Engineering.

(c) *Technology*—Degree or Diploma in technical subjects like Chemical Technology, Leather Technology, Textile Technology, Glass and Ceramic Technology, Food Technology, etc.

(d) *Medicine*—Degree or Diploma in Medicine and/or Surgery.

4. Thus the under-Graduate Scientists (i.e., those who have not got at least a Bachelor's Degree) or Mechanics and Technicians even though holding certificates did not come under the scope of this Special Enumeration.

5. All filled up cards collected by the Enumerators on their revisional rounds were sent along with the Census documents to the District Census Officer through the usual channel of Charge Officers and Subdivisional Census Officers. The District Census Officer sent all the cards collected in his district direct to the office of the Registrar General at New Delhi in bulk by registered postal parcel. These cards along with those received at that office directly from the technical personnel concerned were processed for the purpose of preparation of the tables

which are printed in this Appendix. The tables are:

Table I—Classification by each branch and sub-branch of Science or Technology.

Table II—Type of Activity and Marital Status of persons in each branch of Science or Technology.

Table III—Year of obtaining Post-Graduate Degrees in Physical Sciences and Graduates and Doctorates in Engineering, Technology and selected branches of Medicine.

Table IV—Persons holding Degrees in Engineering, Technology and selected branches of Medicine and also holding Degrees in selected branches of Physical Science.

Table V—Nature and sector of employment of persons in each branch of Science or Technology.

Table VI—Total monthly income of persons employed in each branch of Science or Technology classified by sector of employment.

Table VII—Tenure and sector of employment of persons in each branch of Science or Technology.

Table VIII—Age and period of unemployment of unemployed persons qualified in any branch of Science or Technology.

6. The tables furnish a wealth of information on different aspects of the availability and utilization of technical personnel in the State. Rural areas have been left out of reckoning but this certainly is not a factor which detracts much from the worth of the material compiled, because urban areas account for most of the demand and supply of technical skill in the land. What actually has impaired the value of the tables is their lack of coverage even for urban areas alone. The procedure adopted for the Special Enumeration as described in the foregoing paragraphs had itself left scope for possible omissions. Cards were issued to the Census Enumerator who was to distribute them to those households where he came across persons of requisite qualifications. There was no check to ascertain whether the Enumerator left a card or whether the card he left had reached the person for whom it was meant. Even if it did, it might or might not have been filled up and mailed, or returned to the Enumerator during his revisit. In the circumstances it is not possible to make with confidence any assessment of the magnitude of the deficiency in the coverage caused by such a variety of causes.

SINGLE YEAR AGE RETURNS

TABLE C-IV—SINGLE YEAR AGE RETURNS

This table corresponds to Union Table C-V of 1951. Comprehensive tabulation of single year ages was done for the first time in 1951, but the scope of the tabulation was then confined to a 10 per cent sample of the population, excluding the displaced population. In 1961, the table has been prepared on the total count.

2. For the 1961 Census the question on age was the same as in 1951. Age in completed years last birth day had been recorded. The relevant instruction to the Enumerator was :

“Write age in years completed last birth day. For infants below one year of age, write ‘O’. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events etc. You may use any local calendar of such events that may have been prepared for the purpose”.

3. The calendar of events of local importance used is reproduced below :

4. The table presents figures for each individual year of age from 0 to 100. The returns for ages 101 and above have been clubbed together. There are separate figures for 'Age not stated'. For each

age, the data have been classified by Sex into Total, Rural and Urban sectors of the population. Figures have been presented down to the District level. Details for ages above 100 will be found *in extenso* at Statement I.

5. The table will be of immense interest to the demographers and actuaries. It is well known that Census Age Returns everywhere are subject to inaccuracies due to misstatements. In India particularly, the age returns are marked by definite biases for certain ages, resulting in a tendency towards heapings in 0's and 5's. Even a cursory glance at the table will show how prominent preferences for selected ages have been. The reasons and effects of these preferences are a subject of scientific study. But the trend of the distribution will lend itself to the general observation that young women often have a tendency to understate their age while young men sometimes overstate theirs. At high age brackets, people feel inclined to exaggerate their age. Ignorance about one's age is a very big factor making for the inaccuracies in age returns.

6. The importance of this table from the actuarial point of view consists in its affording the basic data for computation of mortality rates and preparation of life tables.

7. The following statement shows the returns for ages above 100 for the State and districts :

9. A person's knowledge of his own age and that of a member of his household is usually so defective that the age recorded by a Census represents, at best, a guess estimate of the respondent within the limitations of his knowledge and Judgment. In the result, certain age digits come to a heavy concentration at the expense of others. Information about the female members of a household is usually collected second hand. So the estimates in their case are likely to be more crude than in the case of the males.

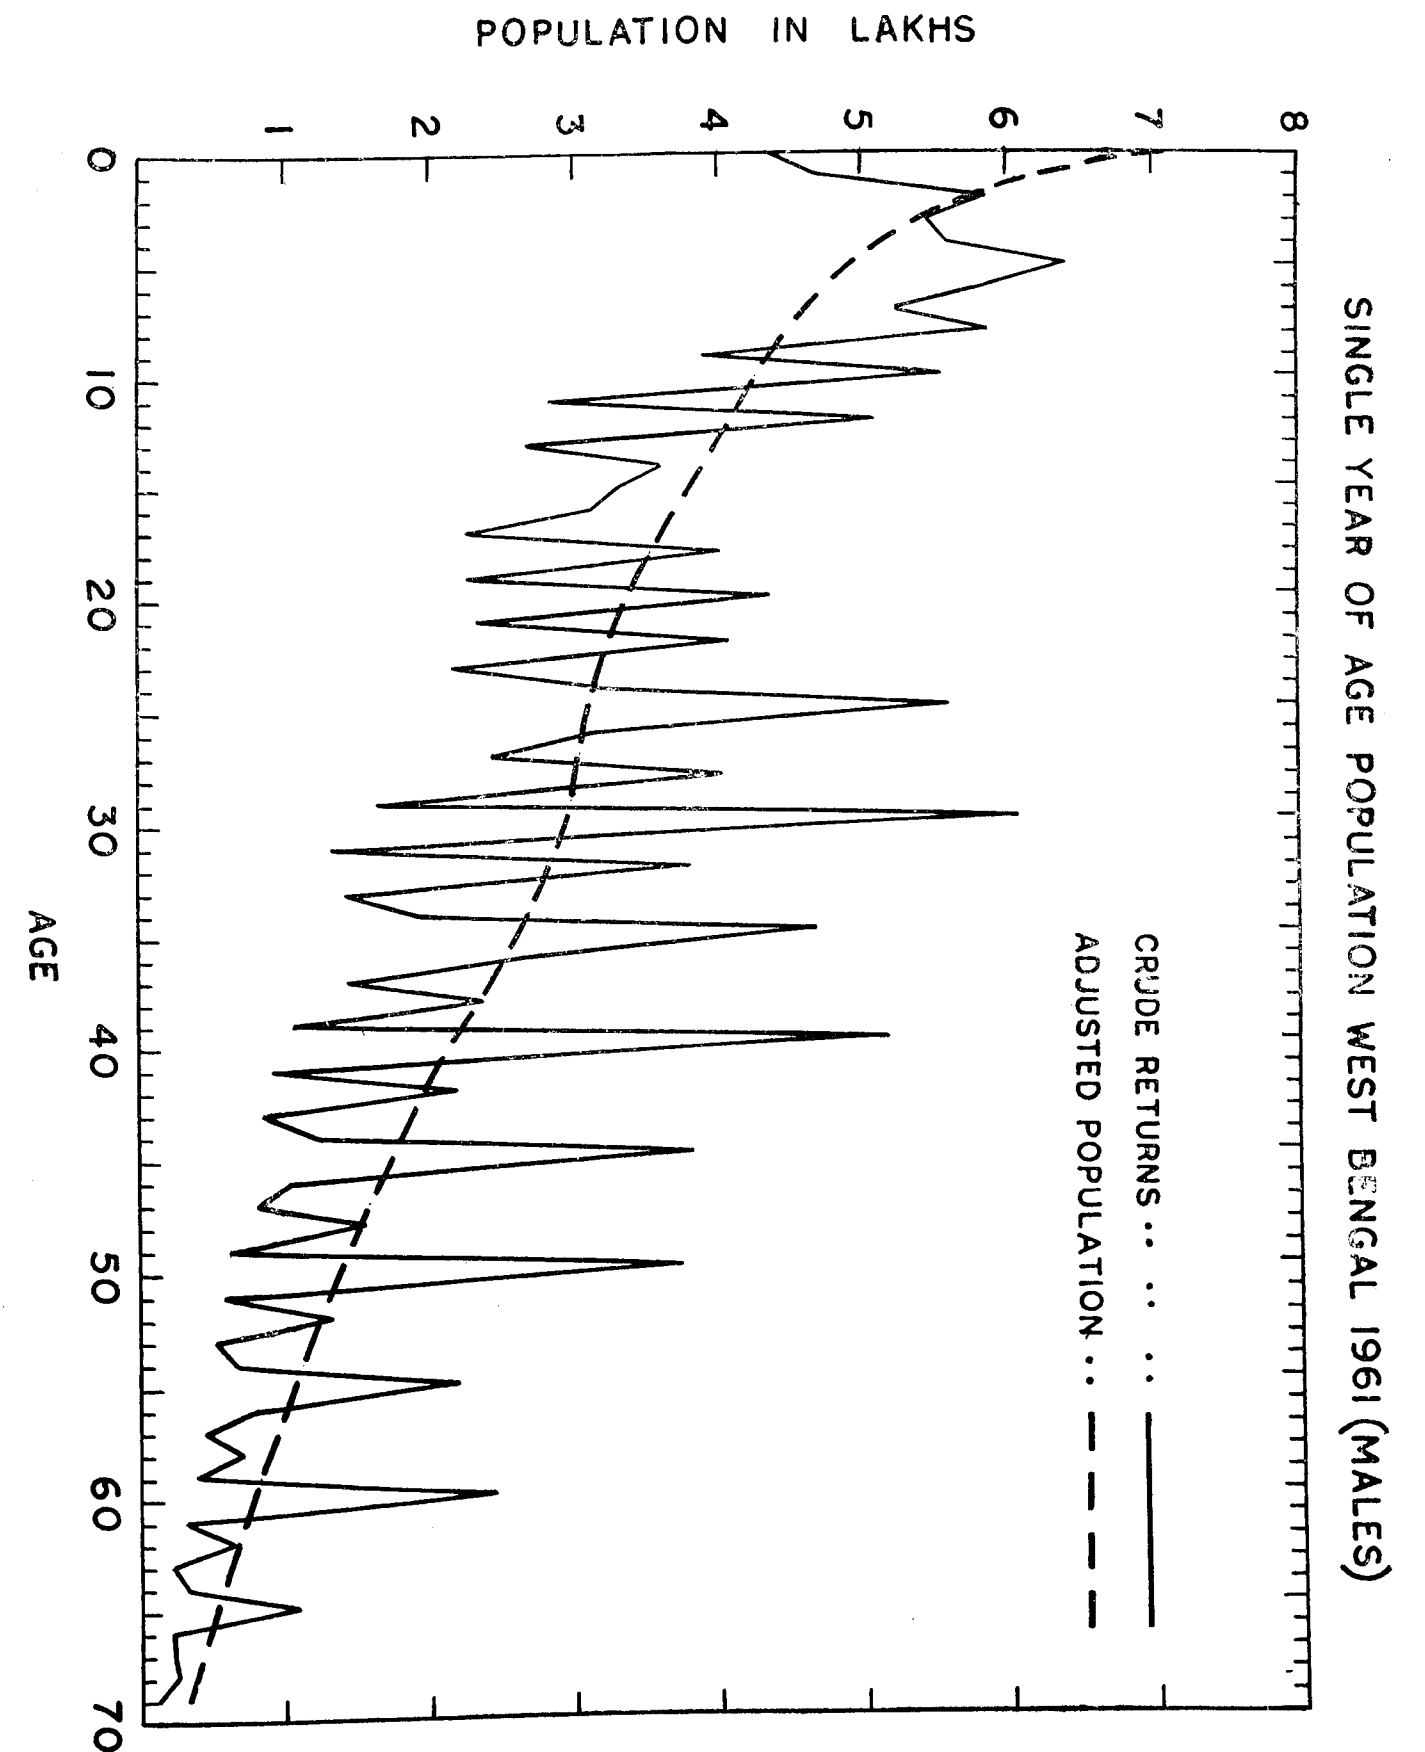

10. It is the practice of the Indian Census to attempt an estimate of the magnitude of misstatement in the age returns by a process of graduation or smoothing of the returns. The age tables are

submitted to an Actuary who uses mathematical formula to smooth the returns by removing from them, as far as possible, irregularities caused by biases for particular digits and otherwise. In 1961, this process of smoothing was carried out by Shri S. P. Jain, till recently the Deputy Registrar General of India. The smoothed tables, along with a description of the methodology applied, have been given in Census Paper No. 2 of 1963. The smooth tables for West Bengal and Sikkim are reproduced in Statement III.

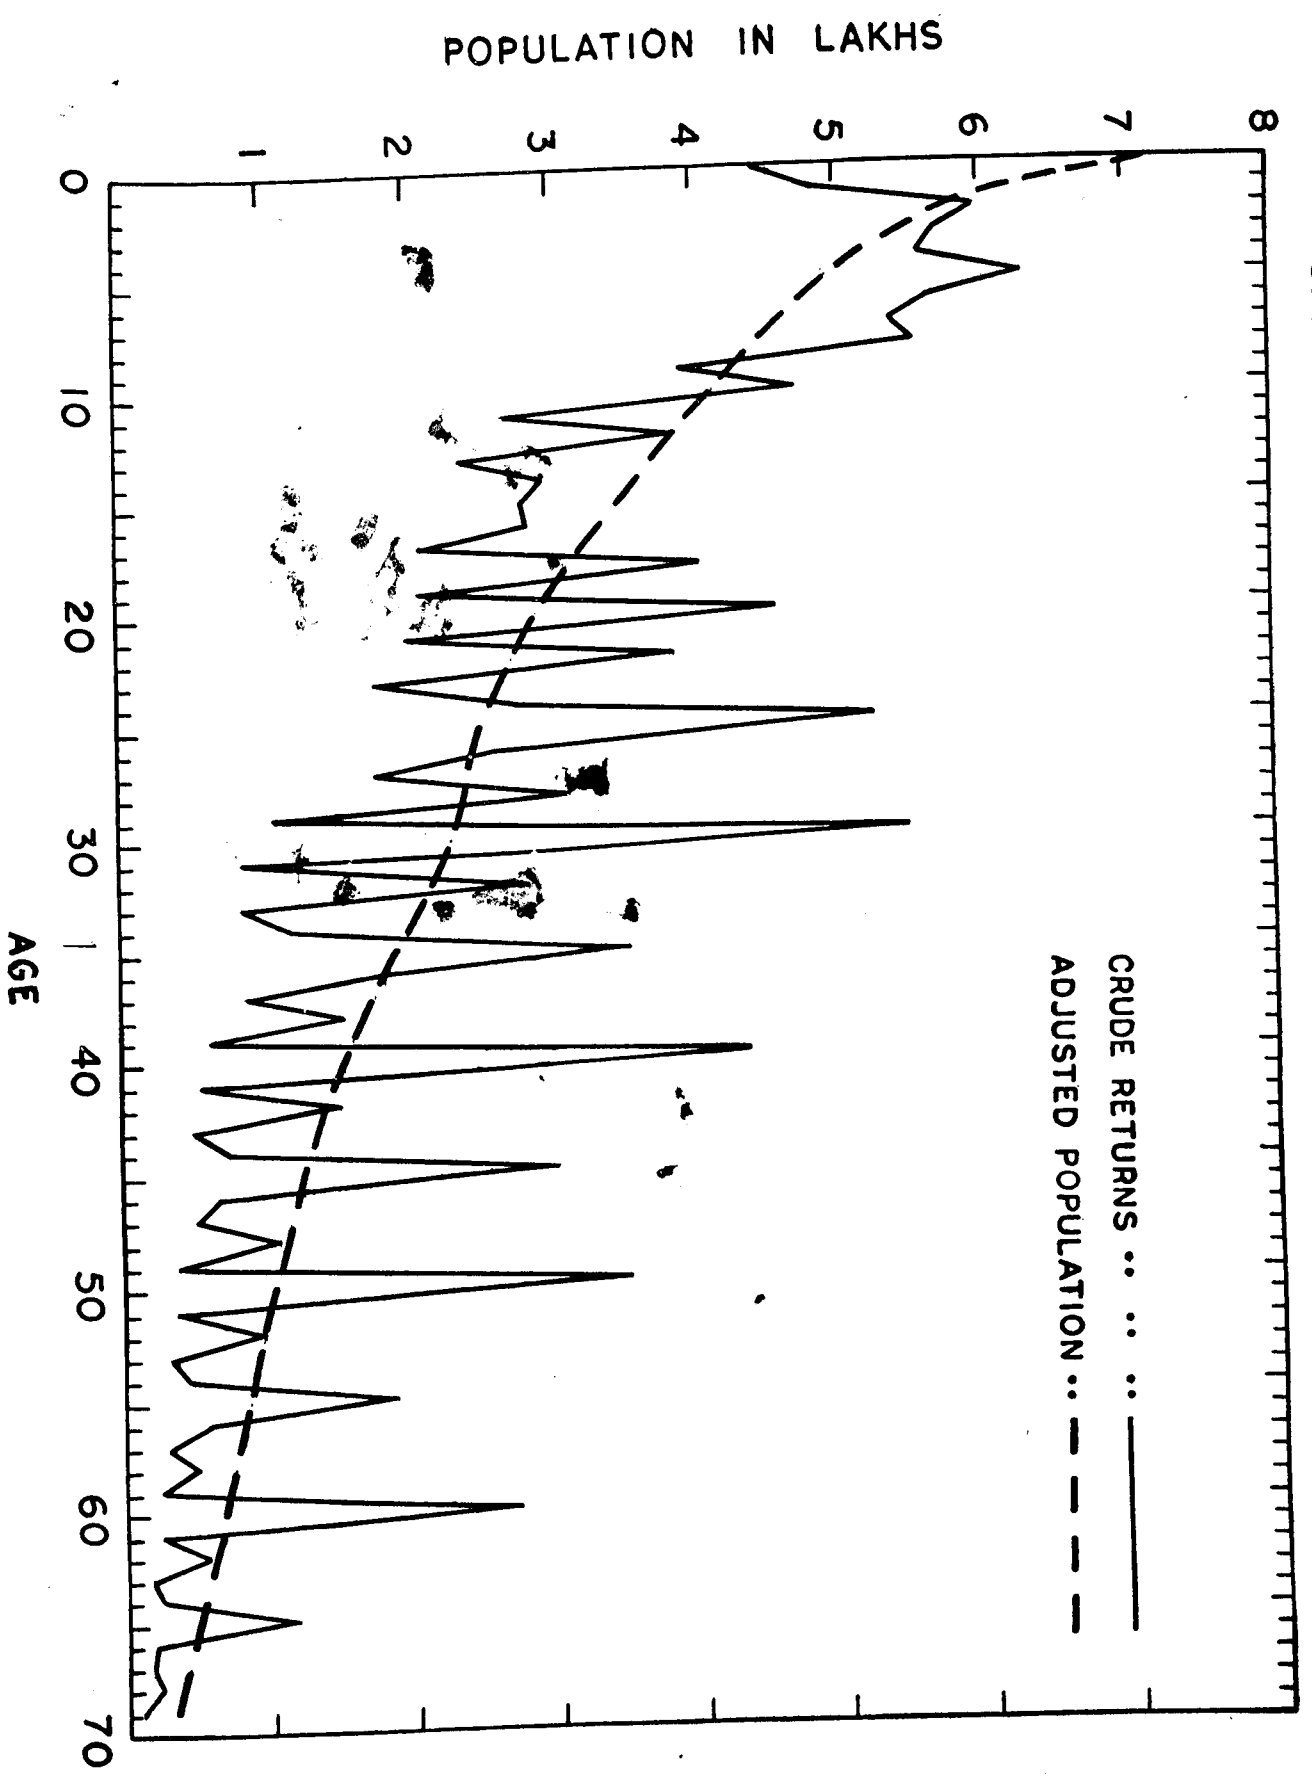

11. Two graphs have been appended to the Statement to illustrate the pattern of the biases in the age return separately for the male and female population of West Bengal.

MOTHER TONGUE

TABLE C- V—MOTHER TONGUE

This table corresponds to Union Table D-I, Part I of the 1951 Census.

2. The definition of 'mother tongue' in the 1961 Census was the same as in 1951. The enumeration instructions are reproduced below :

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

3. It will be seen from column 1 of the table that 277 mother tongues were returned in West Bengal and Sikkim. In West Bengal alone there were returns for as many as 273 mother tongues. But the problem of linguistic diversity is not as complicated as these figures suggest. Only a few mother tongues are of numerical importance. Speakers of Bengali, Hindi, Santali, Urdu and Nepali constitute about 97 per cent of the total population.

4. The mother tongues returned are given in alphabetical order in column 2. Those printed in italics belong to countries outside the Indian Sub-continent. Names occurring after hyphens (-) have been introduced by the Linguist to the Registrar General to indicate groupings. An asterisk (*) against a mother tongue means that the mother tongue is unclassified in the Linguistic Survey of India. A dagger (†) means that the mother tongue though classified in the Linguistic Survey of India is either tentatively re-classified or considered unclassifiable by the Linguist. A combination of an asterisk and a dagger (*†) means that the mother tongue is unclassified by Grierson but is tentatively classified by the Linguist.

5. The notes at pages 279 to 286 have been prepared by the Linguist on the C-V Table of West Bengal and Sikkim. The Appendix to the table (printed at page 287) was also prepared by him.

WEST BENGAL

Note 1.

(i) The following mother tongues arranged in alphabetical order in Col. 1 of the table given below as per Table G-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother tongue of Col. 1 then it would mean that the name refers to either old or middle Indo-Aryan language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a dialect or

another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group has been given of which the mother tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spelling according to Linguistic Survey of India has been given against each mother tongue of Col. 1.

Note 1.

(i) The following mother tongues arranged in alphabetical order in Col. 1 of the table given below as per Table C.V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother tongue of Col. 1 then it would mean that the name refers to either old or middle Indo-Aryan language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a dialect or

another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group has been given of which the mother tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spellings according to Linguistic Survey of India has been given against each mother tongue of Col. 1.

APPENDIX II TO TABLE C-V

VARIATIONS IN THE PROPORTION OF THE POPULATION (1911 TO 1961) SPEAKING THREE NUMERICALLY PREDOMINANT LANGUAGES (INCLUDING DIALECTS) AS OF 1961

Comparison of the language returns of the 1961 Census for the State and Districts, as they were then constituted, with the corresponding returns of the earlier Censuses have been rendered difficult by large scale changes in territorial jurisdiction. The Central Tabulation Officer, New Delhi, prepared, at the instance of the Registrar General, an estimate of the number of speakers in past Censuses for three predominant languages (including dialects) as of 1961. This Appendix compares these estimates with the 1961 Census figures and shows the intercensal variations. Figures for the 1941 Census are not available. Dialects of a language are, for the purpose of this Appendix, the mother tongues which have been classified under that language in the 1961 Census plan of classification of mother tongues.

2. The figures for previous Censuses for areas involved in jurisdictional changes have been calculated on ratio and proportion methods. Transfers of small areas for which details are not available have not been taken note of.

3. It is obvious that adjustments by ratio and proportion methods have not worked satisfactorily in some cases, especially in the districts affected by the Re-organisation of States in 1956. The heavy increase of the proportion of the Bengali speaking population in the districts of West Dinajpur and Purulia in 1961 and the corresponding decrease there of the Hindi speaking population, for example, are to a large extent illusory. The areas which were transferred to these districts under the States' Re-organisation were distinct Bengali speaking regions of the former districts of Bihar of which they formed part. But application of the district average to these regions have resulted in an underestimate of the Bengali speaking population and overestimate of the Hindi speaking population for the past Censuses. A part of the variations may, of course, be real and the result of the more accurate returns of 1961 when, for the first time in many decades, the enumeration in the area was conducted in an atmosphere free from the age old controversy, set at rest by the States' Re-organisation, between Bengali and Hindi.

APPENDIX II TO TABLE C-V—contd.

VARIATIONS IN THE PROPORTION OF THE POPULATION (1911 TO 1961) SPEAKING THREE NUMERICALLY PREDOMINANT LANGUAGES (INCLUDING DIALECTS) AS OF 1961

Explanation of symbols :

a indicates Absolute Figures

b indicates Percentage Variation

c indicates Percentage to Total Population

† indicates that the language includes mother tongues grouped with it as per Statement annexed (page 335).

* indicates that the total speakers of all languages, if derived, would be slightly less than the total population given in Table A-II, because adjustments due to jurisdictional transfers of small areas for which details are not available have not been done.

** indicates that the total speakers of all languages, if derived, would be slightly in excess of the total population given in Table A-II for reasons stated above.

C-VI

BILINGUALISM

TABLE C-VI—BILINGUALISM

This table corresponds to Union Table D-I, Part-II, of 1951. There has been a question on bilingualism in almost all the Censuses. In 1951, for instance, the question was: "What other Indian Language do you commonly use?" If a person used several such languages, the one in which he was the most fluent was to be recorded.

2. In 1961, even a foreign language could be returned as a subsidiary language. The question and the instructions on it were:

"Q. 7(b) Any other Language(s).

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language."

3. Although two subsidiary languages could be

recorded in the Enumeration Schedule, at the sorting stage only the first language recorded was taken into account and the second language, if any, was discarded.

4. This table does not include those mother tongues the speakers of which are not bilingual (in the sense that they do not know any subsidiary language) in any part of West Bengal or Sikkim as the case may be. For notes on the classification of mother tongues reference is invited to the Fly-leaf to Table C-V.

5. Data on subsidiary languages are obviously less appropriate for the identification of ethnic groups than data on mother tongue. These data are of limited value even for a study of the linguistic assimilation of various immigrant groups, because for multilinguals only one subsidiary language was tabulated. It will be impossible, for example, to find out from this table the total number of persons in West Bengal who know Bengali though Bengali is not their mother tongue, for if such a person knows, apart from Bengali, another subsidiary language, it is possible that the table has shown that other language and excluded Bengali.

6. Like mother tongue, the question on subsidiary language was asked of everybody, irrespective of age or literacy.

C-VII

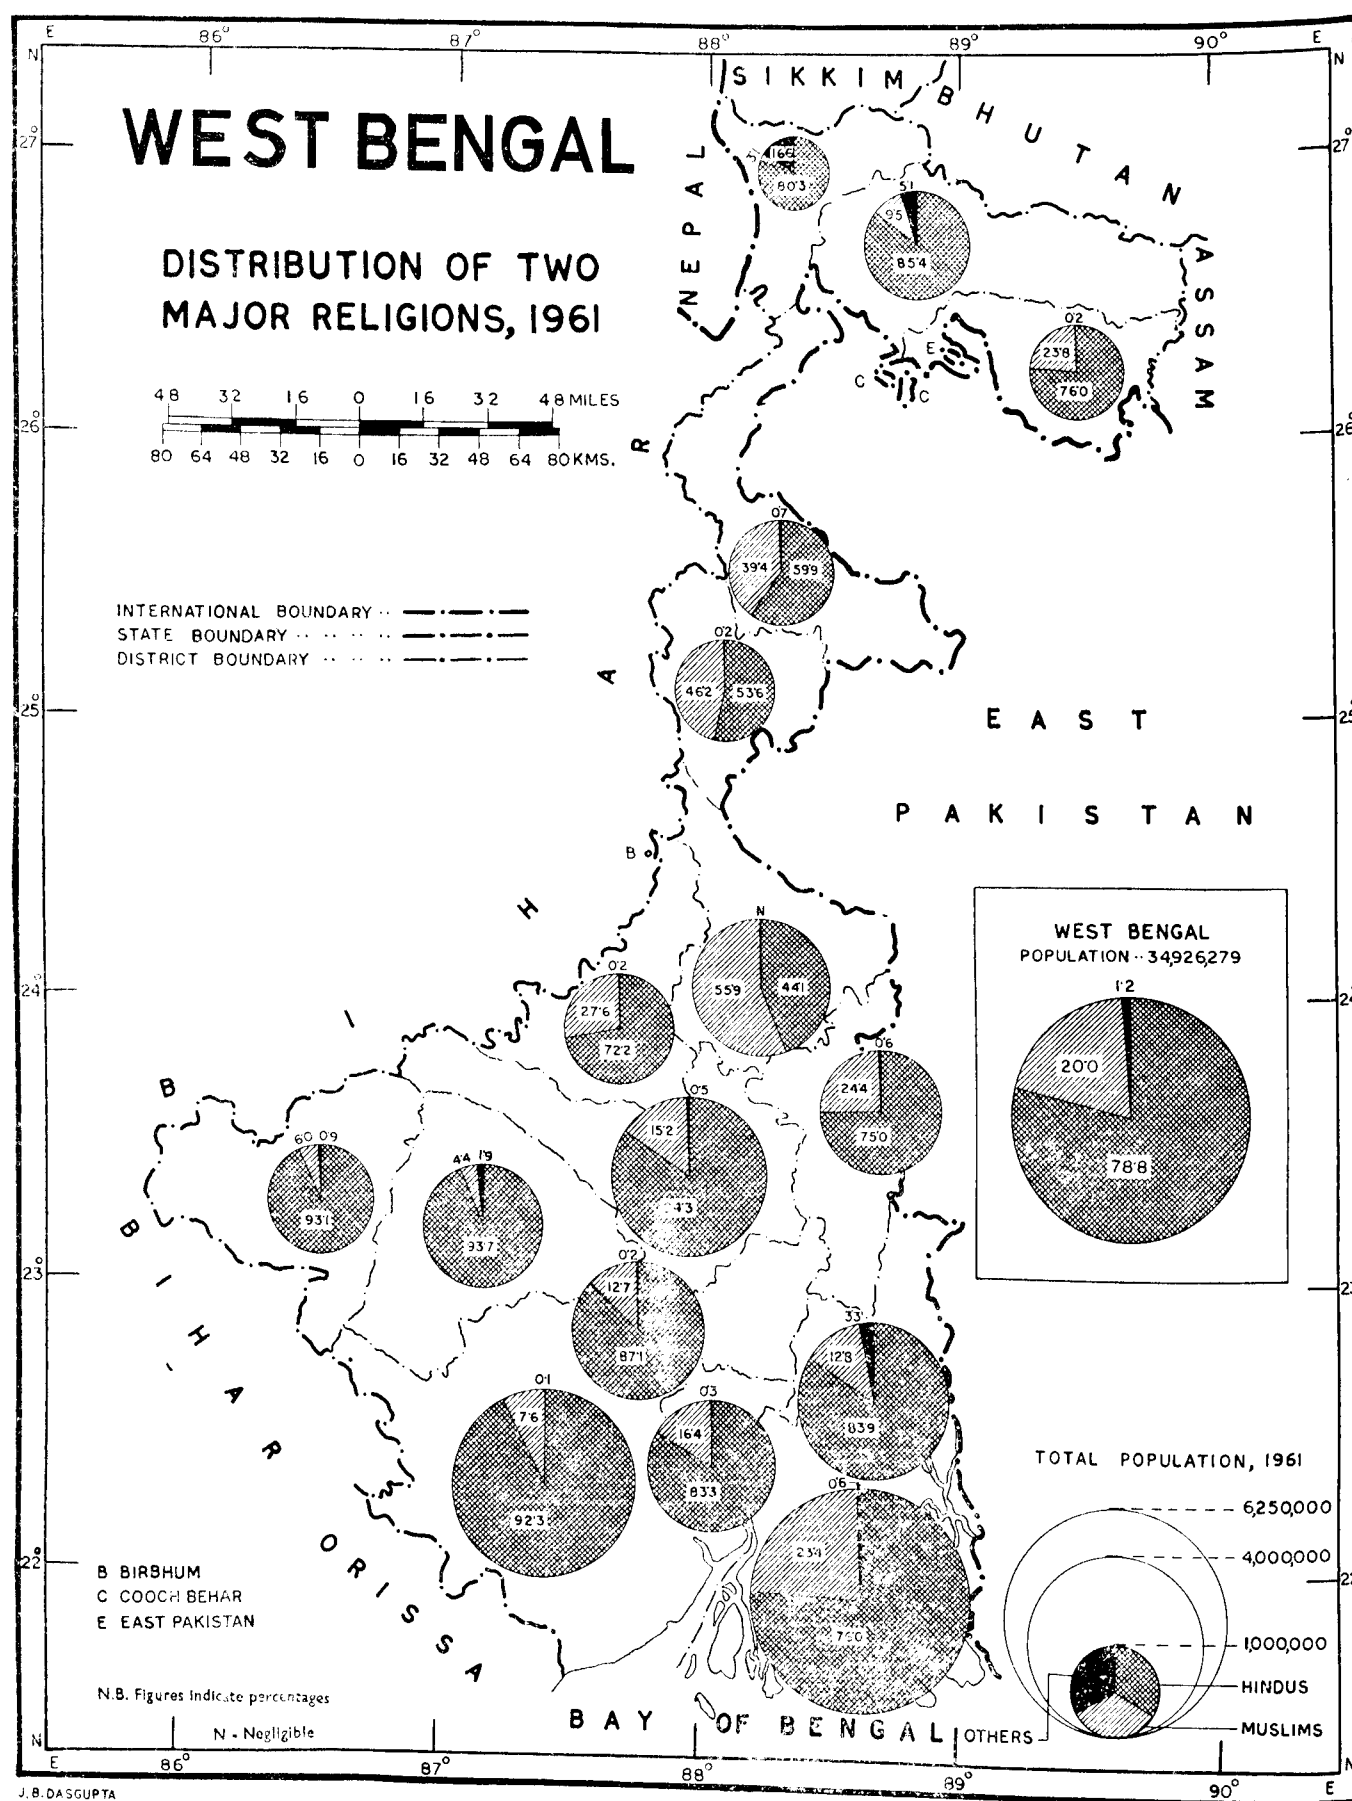

RELIGION

TABLE C-VII—RELIGION

This table recalls Union Table D-II of the 1951 Census. It shows separately for Total, Rural and Urban population the number of persons, classified by Sex, professing different Religions. The main table presents separate figures for six principal religions only, viz., Buddhists, Christians, Hindus, Jains, Muslims and Sikhs. Figures relating to other religions and beliefs have been shown in the table under the omnibus column headed "Other Religions and Persuasions". For persons for whom religion was not recorded in the Enumeration Slip, there is a separate column, headed "Religion not stated". The supplement to the table shows individual figures for all the religions and beliefs which have been clubbed together in column Nos. 18 and 19 (Other Religions and Persuasions). The classification of other religions into tribal and non-tribal, as was done in the 1951 Census, has been abandoned because the supplement spells out the other religions and persuasions individually.

2. In all Indian Censuses down to 1941 the primary sorting of Enumeration Slips was done on the basis of religion. Therefore, population figure for each unit from the village upwards was available differentiated by religion. This grouping by religion had been maintained till the final stages of sorting and as a result many important social and demographic tables like Age, Marital Status, Literacy etc. could be presented religionwise. From 1951 classification by religion conceded its pride of place to economic classification. The information extracted at the 1951 and 1961 Censuses on Religion has been restricted to the ascertainment of numbers only.

3. The instructions in 1961, as in 1951, required the Enumerator to record Religion as returned by the respondent.

C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

PART A

**CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF
WORKERS AND NON-WORKERS AMONG SCHEDULED CASTES**

PART B

**CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF
WORKERS AND NON-WORKERS AMONG SCHEDULED TRIBES**

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES CLASSIFIED BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS

This table is prepared in two parts. Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes population. Each part gives figures separately for Total, Rural and Urban sectors of the population. Figures are presented down to the district level. The table shows the total Scheduled Castes/Tribes population, its distribution by Sex and Literacy, into the broad nine Industrial Categories of Workers and Non-workers adopted for the Primary Census Abstract. This table has a limited correspondence to Union Table D-III of 1951 which showed the total Scheduled Castes/Tribes population of the State and Districts, classified by Sex alone.

2. The table will produce valuable information on literacy and employment of the members of the Scheduled Castes and Tribes, who enjoy certain rights and privileges guaranteed by the Constitution. It is for the first time in the 1961 Census that the Scheduled Castes/Tribes population has been classified by Literacy.

3. The following is an extract of the instructions issued to the Enumerators for recording the answer to the question relating to Scheduled Castes and Scheduled Tribes :

“ Q. 5(c) Scheduled Castes and Scheduled Tribes

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write ‘X’ in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Caste in general terms as ‘Harijan’, ‘Achhut’. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely ‘Harijan’ tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either ‘H’ or ‘S’ in the answer to question 5(b)*. Scheduled Tribes may belong to any religion.”

4. The President’s Order classifying the Scheduled Castes and Tribes is contained in the “ Scheduled Castes and Scheduled Tribes lists Modification Order 1956 ”. This list gives only the names of the main castes or tribes. A caste may also be known by a local name which may be either a generic name or a synonym of the main caste, and a tribe by the name of its sub-tribe or class. It was not possible to include all these nomenclatures in the President’s Order. In the 1951 Census, due to the strict application of the “ Order ” many persons who returned themselves by generic names or synonyms of castes were omitted to be enumerated as members of Scheduled Castes. In order to avoid such difficulties in the 1961 Census it was decided by the Registrar General to ascertain for each district whether any generic name or synonym was found in the case of Scheduled Castes or whether the Tribes were generally known by the name of sub-tribe or class and to prepare lists accordingly for circulation to the Enumerators for reference at the time of Enumeration. A list was accordingly prepared in consultation with the District Magistrates and referred to the Director of Tribal Welfare, Government of West Bengal for scrutiny. The final list of synonyms and sub-caste/sub-tribe names that emerged from his scrutiny was circulated to the Enumerators along with the list as per the President’s Order. A list of those synonyms and the sub-caste/sub-tribe names against each main caste/tribe is given in an Appendix to this Fly-leaf.

* Question 5 (b) was on a person’s religion.

5. As regards Sikkim, it was reported by the Chief Secretary to the Government of Sikkim that the Sikkim Durbar had not passed any Order declaring any caste or tribe as Scheduled Caste or a Scheduled Tribe. No person was, therefore, returned in Sikkim as belonging to a Scheduled Caste or a Scheduled Tribe.

6. In addition to this table a number of special tables on each Scheduled Caste and Scheduled Tribe

have been prepared. These special tables are printed in Part V-A of the Census Publications.

7. The following two statements show percentage distribution of total males and females population of Scheduled Castes and Scheduled Tribes among literates and illiterates and workers and non-workers:
