PREFACE

This Part IV-B of Rajasthan's series of Census publications contains the Housing and Establishment Tables prepared on the basis of information collected through the uniform Houcelist used at the time of the House-numbering and House-listing Operations in October-November, 1960, preceding the Census 1961.

In the previous censuses the concept of a census house included only residential houses. In the 1961 Census the change made in the concept of the census house, on account of which all houses residential or non-residential have been listed, has made it possible to compile an inventory of all types of houses and throw some light on functional, structural, size and tenure characteristics of houses in the country.

The data compiled in the tables fills to a large extent the gap existing so far in the industrial statistics relating to the character and level of activities of smaller establishments and provides certain basic information on the structure of industrial segments. Such an attempt, which is the first of its kind and which perhaps no other country has made so far, was commended by the Third Session of the Conference of the Asian Statisticians of the ECAFE region held in 1960. A detailed report on Housing and Establishments (Part IV-A) has been issued separately. It is felt that these publications will help in the proper assessment of the housing conditions obtaining in Rajasthan and will meet the essential requirements of planning.

The compilation of information from the-houselist was done under the supervision of Shri Shyam Karan Singh, Deputy Superintendent of the Housing Tabulation Office. The tables and the subsidiary tables as presented in this part were prepared under the guidance of my Deputy Superintendent, Dr. U. B. Mathur. I thank the Central Tabulation Office of the Registrar General, India which checked this work, and the staff of my office which had to labour hard to complete this arduous work.

I am also grateful to Shri S. R. Sethi, Manager and Sarvashri Jagdish Ram Vasudev and V. R. S. Raghavan, Assistant Managers, Government of India Press, Faridabad for the help received from them in the printing of this report.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

Note on Table E-1

Table E-I prepared on full count gives figures of census houses separately for total, rural and urban areas of the State, districts, tehsils, cities and towns with population of 50,000 and over, classified into different categories according to the uses to which they are put. Those found vacant at the time of house-listing have also been shown separately as such. The following are the various types of houses into which occupied houses have been classified :—

(a) Dwellings, (b) shop-cum-dwellings, (c) work-shop-cum-dwellings, (d) hotels, hostels, sarais, dharmashalas, tourist homes and inspection houses, (e) shops excluding eating houses, (f) business houses and offices, (g) factories registered under the Factories Act and worksheds and workshops not so registered (h) schools and other educational institutions including training classes, coaching and shop classes, (i) restaurants, sweetmeat shops and eating places (j) places of entertainment and community gathering (Panchayat Ghar), (k) public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries, etc. (l) Others : Occupied census houses which are not covered by any of the above categories have been classed as 'Others' e.g. temple, mosque, church, cowshed, motor garage, water-hut, engine room, store room, grass shed, urinal, privy etc.

The following concepts and definitions have been used for the various terms occurring in the table:—

1. Census house

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling, or a place of business, workshop, school, etc., with a separate entrance.

2. Census household

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

3. Shop

A shop is a place where articles are sold for cash or for credit.

4. Workshop and workshed

A workshop or a workshed is a place where some kind of production, processing, repair or servicing such as paper-making, shoe-making, tailoring, cycle-repairing, motor-servicing, pottery-making, goldsmith, blacksmith, etc. are undertaken or where goods or articles are made and sold, and is not a factory registered under the Factories Act.

5. Business houses

Business houses are those premises where transactions in money or other articles take place e.g., banks etc.

6. Factory

A factory is a large workshop which has been registered under the Indian Factories Act.

Annexure A provides the names of the places included in the urban areas of the various tehsils and districts.

TABLE E-II

TENURE STATUS OF SAMPLE CENSUS HOUSES USED AS DWELLING

TENURE STATUS OF SAMPLE CENSUS HOUSES USED AS DWELLING

Note on Table E-II

This table has been prepared on the basis of 20 percent sample of households used as dwellings, shop-cum-dwellings, workshop-cum-dwellings, and dwellings with other uses. Shop-cum-dwellings and workshop-cum-dwellings are census houses which are partly used for residential or dwelling purposes and partly used as a shop or workshop. Dwellings with other uses are census houses such as offices, schools, temples, mosques etc. which are partly used for residential purposes by watchmen or attendants. The total number of households given in column 4 of this table gives the total of such samples classified into the aforementioned four categories of dwellings, which have been further classified according to their tenure status, whether owned or rented, for the State, districts, tehsils,

cities and towns with population of 50,000 or more, as also for total/rural/urban. The following concepts and definitions have been used in respect of tenure status:—

- (a) Owned—The term 'owned' was considered to be a situation when a household was living in its own house or a house duly mortgaged to it by some of its debtor.
- (b) Rented—The term 'rented' meant a situation when a household was found living in a house taken on rent from a landlord or in a house that was taken on lease or in a house for which no rent was being paid with the consent of the landlord.

TABLE E-III

**CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS
CLASSIFIED BY INDUSTRY, POWER AND NO POWER USED
AND SIZE OF EMPLOYMENT**

**CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY,
POWER AND NO POWER USED AND SIZE OF EMPLOYMENT**

• Note on Table E-III

This table, which gives industrial statistics of census houses used as factories, workshops and work-sheds classified by power and no power used and size of employment, has been prepared on the basis of full count. Establishments pertaining only to manufacturing industries, which include repairing or servicing of the articles produced, have been classified by Division, Major groups and 3-digit industrial codes of Minor group number of Standard Industrial Classification. The table is thus restricted to Divisions 2 and 3 of the Industrial Classification and establishments relating to all the Minor groups except 047 under Major group 04 of Division 0. To facilitate identification of industries, the description of these Divisions, Major and Minor groups has been given in Annexure B.

All the establishments have been further classified according to the kind of fuel or power used, viz.,

- (i) Electricity
- (ii) Liquid fuel
- (iii) Coal, Wood and Bagasse
- (iv) Other power
- (v) No power

The table further gives details of the persons employed classified into the following seven categories.

1 person	20—49 persons
2—5 persons	50—99 persons
6—9 persons	100 persons and above
10—19 persons	

The table gives details for the State, districts, and cities and towns with a population of 50,000 or more with rural/urban break-up. Definitions of the terms and concepts used in this table are as under:—

- (i) Other power—Forms of power or fuel other than electricity, liquid fuel, coal, wood and bagasse which are used for running machinery e.g., gas, wind and water power, animal power etc.
- (ii) No power—Physical or human labour used in case of units which are either self-employed or worked on the basis of cottage industries.
- (iii) Persons employed—Average number of persons working per day during the week preceding the day of census enquiry.

Like all other tables in E-series, Table E-III was also compiled down to tehsil. But as printing of Table E-III for tehsils requires much space, the statistics of Industrial establishments for town and village extracted from the house-lists have been made available in the District Census Handbook series. Those interested in such detailed distribution will find this information in the Census Handbook of the district concerned.

Entries having 'nil' figures have been omitted from this table.

**DISTRIBUTION OF SAMPLE HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR
PARTLY AS DWELLING BY PREDOMINANT MATERIAL OF WALL AND PREDOMINANT
MATERIAL OF ROOF**

Note on Table E-IV

This table has been prepared on 20 percent sample of households used as dwellings, shop-cum-dwellings, workshop-cum-dwellings and dwellings with other uses. The total number of houses given in col. 3 of this table gives the totals of all such sampled households. The material out of which most of the walls are made or where a house consists of separate structures each made of different materials, the material out of which the walls of the main bedrooms are made has been classified into the following nine categories :—

- (1) Grass, leaves, reeds or bamboo
- (2) Timber
- (3) Mud
- (4) Unburnt bricks
- (5) Burnt bricks
- (6) C. I. sheets or other metal sheets
- (7) Stone
- (8) Cement concrete
- (9) All other material

The material out of which most of the outer roof exposed to the weather is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, etc., or in the case of multi-storeyed building, the material out of which the intermediate floor or floors is made, has been classified into the following seven categories :—

- (1) Grass, leaves, reeds, thatch, wood or bamboo
- (2) Tiles, slate, shingle
- (3) Corrugated iron, zinc or other metal sheets
- (4) Asbestos cement sheets
- (5) Brick and lime
- (6) Concrete and stone slabs
- (7) All other material

This table has been prepared for the State, districts, tehsils, cities and towns with population of 50,000 or more, as also for Total/Rural/Urban.

**SAMPLE HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER
OF ROOMS OCCUPIED**

Note on Table E-V

This table has been prepared on 20 per cent sample of households used as dwellings, shop-cum-dwellings, workshop-cum-dwellings and dwellings with other uses. The figures given in Column 3 of this table are the totals of all such sampled households. The sex break-up of the total number of members occupying such sampled households have been further classified into the following six categories showing the number

of households and number of occupants by sex in each category :—

- | | |
|---------------------|-------------------------|
| (i) no regular room | (iv) three rooms |
| (ii) one room | (v) four rooms |
| (iii) two rooms | (vi) five rooms or more |

This table has been prepared for the State, districts, tehsils, cities and towns with population of 50,000 or more, as also for Total/Rural/Urban.
