ACKNOWLEDGEMENTS

I am thankful to Shri K. D. Ballal, Central Tabulation Officer, Delhi, and his staff who very kindly checked the tables for accuracy.

In the Maharashtra Census Office, Shri D. V. Rangnekar, Deputy Superintendent of Census Operations, rendered valuable assistance in compilation of the tables and notes. I should specially mention Shri A. W. Mahatme, Tabulation Officer, and Sarvashri Vyas Rao and J. S. Natekar, Statistical Assistants, for their painstaking work.

I am also grateful to Shri B. W. Khadilkar, Manager, and Shri B. K. Rao, Standards Officer of the Government Central Press, Bombay, for neat and expeditious printing of the volume.

INTRODUCTION

THIS PART of the Census Report presents Industrial Classification of workers in Maharashtra, its four administrative divisions and 26 districts, cross-tabulated by sex, age-groups, educational levels, employment status and secondary work. The volume contains nine tables. The first three tables present the distribution of workers by nine broad categories of economic activity, cross-tabulated by age-groups and educational levels. The next three tables present it classified under the Standard Industrial Classification Scheme into Industry Divisions, Major Groups and Minor Groups. The following two tables present data on secondary work and the next one on unemployed persons. The last table presents material about the non-workers classified into eight types and cross-tabulated by age-groups. This Census Report volume is presenting such elaborate classification of workers and non-workers for the first time in India.

2. All the tables present the Census material for 31 units, *i.e.* the State, the four administrative divisions and the 26 districts. For purposes of the 1961 Census, the districts had been given a serial (code) number running from north-west to south-east. The order of presentation uniformly followed in the tables is based on those code numbers and is shown below :—

MAHARASHTRA STATE

BOMBAY DIVISION

- (1) Greater Bombay
- (2) Thana
- (3) Kolaba
- (4) Ratnagiri
- (5) Nasik
- (6) Dhulia
- (7) Jalgaon

POONA DIVISION

- (8) Ahmadnagar
- (9) Poona
- (10) Satara
- (11) Sangli
- (12) Sholapur
- (13) Kolhapur

AURANGABAD DIVISION

- (14) Aurangabad
- (15) Parbhani
- (16) Bhir
- (17) Nanded
- (18) Osmanabad

NAGPUR DIVISION

- (19) Buldhana
- (20) Akola
- (21) Amravati
- (22) Yeotmal
- (23) Wardha
- (24) Nagpur
- (25) Bhandara
- (26) Chanda

3. Each table starts with entries for the State. Then follow entries for Bombay Division and its districts ; then Poona Division and its districts ; and so on.

4. None of the tables presented in this volume gives break-up below the district level. Table B-II, however, presents material for each town-group and town separately. Talukawise tables have been prepared in some cases and are presented in the District Census Handbook volumes concerned.

5. A note is added at the beginning of each table to explain its layout, method of presentation, concepts, definitions and limitations of the material presented. These notes do not, however, contain any analysis or review of the material presented in the tables. That

is reserved for Part I-A of the Maharashtra Census Report. This introductory note describes the procedure, questionnaire and the scheme of economic classification adopted in the 1961 Census.

The 1961 Census

6. The 1961 Census was conducted between 10th and 28th February, 1961. The enumerators called on each household in their assigned areas and filled in Census Forms by interviewing one or more responsible members of the household. They re-visited all the households between 1st and 5th March, and corrected their forms for changes occurring between their first visit and the Census reference date, *viz.*, sunrise of 1st March, 1961. These corrections were, however, restricted to changes due to deaths or new births. No corrections were made for the change of any person's economic activity during the intervening period.

Urban Areas

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

- (a) a population of 5,000 or more ; and
- (b) 75 per cent. or more of male workers engaged in non-agricultural occupations.

An additional criterion of 'urban' density not being less than 1,000 per square mile, applied in some of the States, was not applied in Maharashtra.

Populations of urban areas for the State, division or district are shown separately in the concerned portions of Tables B-I and B-II included in this volume.

Economic Questions

8. Information collected in the Census for each individual included the following economic questions :

" 8 Working as Cultivator.

9 Working as Agricultural Labourer.

10 Working at Household Industry—

- (a) Nature of work ;
- (b) Nature of Household Industry ;
- (c) If Employee.

11 Doing work other than 8, 9 or 10—

- (a) Nature of work ;
- (b) Nature of Industry, profession, trade or service ;
- (c) Class of Worker ;
- (d) Name of Establishment.

12 Activity if not working."

9. Instructions issued to the enumerators for recording answers to these questions are reproduced as Appendix I to this note.

1961 Census Economic Classification Scheme

10. The 1961 Census Scheme of Economic Classification is altogether different from that used in the 1951 or earlier Censuses. In those former Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependents. An intermediate category of economic semi-dependence was introduced in 1931, and continued in 1941 and 1951. They were called working dependents in 1931, partly dependents in 1941 and earning dependents in 1951.

11. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of the criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income.

12. The 1961 Census, therefore, laid stress on "work" so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers. The concept of dependency has now been completely abandoned for economic classification of the population. Instead, the classification is into workers and non-workers.

Workers and Non-workers

13. A person is classified as a worker if—

(a) in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(b) in the case of regular (non-seasonal) employment in any industry, trade, profession or service, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

14. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

15. "Work" includes not only actual work but effective supervision and direction of work also.

16. Persons under training as apprentices with or without stipend or wages are regarded as workers.

17. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice-pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cow-dung cakes or grass, etc., or any such work, she has been treated as a worker.

18. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who earn an income but who are not participating in

any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession or service.

19. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activities of his party is regarded as a worker.

20. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

21. The Census Questionnaire did not ask any question to determine the extent of full employment or under-employment.

22. Classification of workers doing two or more different types of work has been done on the basis of their principal work, i.e. the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

23. As described earlier, the period of reference for regular (non-seasonal) work in any industry, trade, profession or service was 15 days preceding the date of enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., some regular work of more than one hour a day throughout the greater part of the last or current working season was the criterion. Entries in regard to industry and occupation were not corrected in the second round visits with reference to the date of reference, viz., 1st March, 1961. The material presented here, therefore, relates to the reference period approximating to the conditions as on 1st March, 1961.

Broad Industrial Categories

24. In the 1951 Census, the entire population was divided into eight livelihood classes. Economically semi-active people known as earning dependents and the economically inactive people or non-earning dependents were divided on the basis of the livelihood classes of persons on whom they were dependent.

25. In the 1961 Census, non-workers are not classified by their dependence on one or the other sector of economy. The working population alone is classified into the following nine broad industrial categories :—

- I. Cultivator.
- II. Agricultural Labourer.
- III. Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV. Household Industry.
- V. Manufacturing other than Household Industry.
- VI. Construction.
- VII. Trade and Commerce.
- VIII. Transport, Storage and Communications.
- IX. Other Services.

Category I

26. This category includes both the owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of

cultivation. All persons working at cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

27. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

28. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing, keeping of orchards or groves and working for plantations like coffee, tea, rubber, cinchona and other medicinal plantations. These excluded activities are not, therefore, included in Category I or II but have been treated as either household industries or non-household industries and persons engaged in them have been classified in Category III or IV as the case may be.

Category III

29. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations and allied activities are included in this category.

Category IV

30. "Household Industry" is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to repairing or making of goods. This may include sale of goods but should not be confined to buying and selling. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the participation of the head of the household and/or one or more members of the household. A person working as an employee in another person's household industry has also been treated as working at household industry and included in this category.

Category V

31. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing, etc., which may be classified as household industry.

Category VI

32. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

Category VII

33. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

34. This category includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting,

loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

35. This category includes (i) Public Utility Services like electricity, gas or water supply and sanitary services; (ii) Central, State, Quasi-Government or Municipal Employees in administrative departments or offices; (iii) Professional services; and (iv) Trade or labour associations, recreation services, etc.

Occupational Classification

36. In addition to the primary classification into the above nine broad industrial categories, the 1961 Census has also classified the workers for the first time according to the National Occupational Classification Scheme into occupational divisions, groups and families. Tables showing the distribution of workers by such elaborate classification of occupations, cross-tabulated by sex, age and educational levels are presented in Part II-B(ii) of the Maharashtra Census Report.

Industrial Classification

37. Tables B-IV-Part A, B-IV-Part B and B-IV-Part C presented in this volume show the distribution of workers by industry classified according to the Standard Industrial Classification Scheme, which is reproduced as Appendix II to this note.

38. Industry for a worker is the branch or sector of economy in which he performs his work (which is called his occupation). In other words, industry is the type of goods produced or services rendered by the employer establishment. For a clerk working in a textile mill, the industry is manufacture of textiles and the occupation is clerk. For a person working as a driver on a bank's vehicle, the industry is banking and the occupation is driver.

39. A question about individual occupation had been asked in the Indian Censuses right from the earliest Census in 1872. But the word had been used more to indicate the means of subsistence or livelihood or the supporting sector of economy. Only in the Census of 1931 there were two separate economic questions regarding the principal occupation of earners and the industry in which they were employed. Unfortunately, no separate table had been prepared even at that Census on the industries and the entire Census classification of occupations from 1872 to 1951 has, therefore, been into the means of livelihood, which, at best, was a combination of both industry and occupation.

40. For the first time in the 1961 Census, the two concepts of "industry" and "occupation" have been used with specific meanings distinct from each other and tables have been prepared separately with very elaborate classification of the working population both by Industry and Occupation.

41. Question 10 (a) of the 1961 Census Questionnaire pertained to the nature of work performed by the individual at household industry. Question 11 (a) was about the nature of work performed by the individual in economic activity other than cultivation, agricultural

labour and household industry. Questions 10 (b) and 11 (b) were about the nature of household industry and the nature of non-household industry, profession, trade or service respectively. Questions 10 (a) and 11 (a) thus elicited information about the occupation of the person enumerated and questions 10(b) and 11(b) about the industry in which he was working.

42. In the Tabulation offices, Census Slips were first sorted for males and females, then for workers and non-workers and later on, from among the workers, separately for each of the nine broad industrial categories. The population included in categories III to IX covered all persons whose work had been returned either against question 10 or question 11. These Slips were coded separately for occupation and industry. The answers returned against Questions 10 (a) and 11 (a) were coded for occupations under the National Occupational Classification Scheme and answers against Questions 10 (b) and 11 (b) were coded for industries under the Standard Industrial Classification Scheme (see Appendix II).

Unemployed

43. The Industrial Classification presented in this volume is of workers only. The unemployed persons with previous work experience or otherwise are not included here.

Age Limit

44. There was no age limit prescribed for treating an individual as a worker. The workers shown in the tables, therefore, include workers of all ages.

Principal Work

45. In all the tables presented in this volume the classification of workers is with reference to their principal work, *i.e.* the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Secondary Work

46. Distribution of workers doing some additional work by types of primary and secondary work is shown in Table B-VII—Parts A and B.

Non-workers

47. The last table presents the classification of non-workers into eight types cross-tabulated by sex and age-groups. Such elaborate classification of non-working population is presented in the Census Report for the first time in India. Table B-VIII—Parts A and B show the distribution of unemployed persons aged 15 and above, cross-tabulated by educational levels.

APPENDIX I EXTRACT FROM THE INSTRUCTIONS FOR ENUMERATION

Qs. 8 to-11. Working.—These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at a Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

Q. 8. Working as Cultivator.—For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of a land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations, should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as cultivator in this question.

Q. 9. Working as Agricultural Labourer.—Write AL for a person working as agricultural labourer, *i.e.*, a person who works in another person's land only as a Labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10 (a) and 10(b). Household Industry.—If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10 (a) and (2) the nature of the Household Industry against question 10 (b). Otherwise put X in both questions 10 (a) and 10 (b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c). If Employee in Household Industry.—This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write EE. For all others put X.

The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons working at Household Industry :—

Q. 10—Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1. Spinning yarn ..	Spinning yarn in Ambar Charkha.	X
2. Dyeing and pining yarn ..	Handloom weaving ..	X
3. Threshing and cleaning grain.	Flour making <i>Chakki</i> ..	X
4. Labourer employed for crushing oil.	Oil ghani ..	EE
5. Tempering and polishing implements.	Blacksmithy making agricultural implements.	X
6. Labourer employed for making and firing kiln.	Earthenware pottery ..	EE
7. Throwing and Turning pottery.	Earthenware pottery ..	X
8. Making wooden doors and windows.	Carpentry ..	X
9. Filling gold ornaments with lac.	Goldsmithy ..	X
10. Labourer working hosiery machine.	Hosiery ..	EE
11. Keeping accounts ..	Hosiery ..	X
12. Polishing and Scraping metal.	Electroplating ..	X
13. Labourer employed for putting iron hoop on cart wheels.	Cartwheelwright ..	EE
14. Repairing of guns ..	Gunsmithy ..	X
15. Bee Keeping ..	Production of honey ..	X
16. Tending cattle ..	Livestock raising ..	X

Q. 11. Doing Work other than 8, 9 or 10.—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a). Nature of Work.—In the case of persons not working or who work only as cultivator or as agricultural labourer or at Household Industry, put X.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b). Industry, Business, Trade, Profession or Service.—In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11(a) put an X in this question also.

Important points to remember in Questions 11(a) and 11(b)

1. Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.*

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves :

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5. **Labourers.**—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6. **Machine Operators.**—Always state the kind of machine giving its recognized name, if any.

7. **Shop-keepers, Retail Dealers, Shop Assistants.**—If wholly or mainly engaged in selling, write 'Dealer' (if principal) or 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. **Transport Workers.**—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. **Services.**—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves :—

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. **Domestic services.**—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hotels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. **Commerce.**—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c). Class of Worker.—For a person who is :

1. an <i>Employer</i> , that is, who hires one or more persons in his work described in Q. 11(a) ..	write	MR
2. an <i>Employee</i> , that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind ..	write	EE
3. a <i>Single Worker</i> , that is, who is doing his work described in Q. 11 (a) without employing others except casually, and without the help of other members of the family except casually. This will include workers working as members of co-operatives ..	write	SW
4. a <i>Family Worker</i> , that is, who is doing his work described in Q. 11 (a) in own family without wages or salary in cash or kind ..	write	FW

For a person for whom an 'X' is put in Qs. 11(a) and 11(b) put an X in this question also.

Explanation.—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d). Name of Establishment.—Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work write 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded i.e. more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him in his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, i.e., more than two of the questions 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, i.e. the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, i.e. the work after his principal work which occupies most time. You should put a tick against the question

number of that work on the right hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Q. 12. Activity, if Not Working.—This question will apply to a person NOT Working.

Write 'X' in this question for a person who is working, that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :—

- For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business write ST
- For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW
- For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age write D
- For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work write R
- For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence write B
- For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution write I
- For a person who has not been employed before but is seeking employment for the first time write NE
- For a person employed before but now out of employment and seeking employment write UN

Explanation.—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

APPENDIX II STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below—

TABLE B-I

**WORKERS AND NON-WORKERS
CLASSIFIED BY SEX AND
BROAD AGE-GROUPS**

EXPLANATORY NOTE

This table shows workers and non-workers classified by sex and broad age-groups. It presents distribution of workers and non-workers in the same manner as has been done in the Primary Census Abstract included in Part II-A, but with a further break-up for age-groups.

2. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts. For each unit material for total is presented first and is followed by lines for rural and urban areas. Entries for the State are presented first. Those for Bombay Division and its constituent districts follow. Then the entries for Poona Division and its constituent districts, and so on.

3. Definitions of workers and non-workers and description of each of the nine industrial categories are given in the Introduction at pages 2 and 3.

4. Tabulation by age is in four broad age-groups, viz., 0—14, 15—34, 35—59 and 60 years and over. They are shown by vertical spread under column 3. These groups broadly correspond to the different stages of life which have special significance with reference to the capacity to work, viz., children, young, middle-aged and elderly persons. A line 'Age not stated' is added, wherever necessary, to show figures for persons who had not returned their ages.

5. The distribution of workers and non-workers presented in Table B-I has been compiled down to the level of taluka and town. Presentation in this Table is, however, up to districtlevel only. Talukawise tables are presented in the District Census Handbooks concerned. Material for each town or town-group will be found in Table B-II.

6. Classification of non-workers by eight types will be found in Table B-IX.

7. The distribution of 1,000 persons into workers and non-workers, by sex and for total, rural and urban areas in Maharashtra is as follows :—

		Persons	Males	Females
TOTAL				
Total	..	1,000	1,000	1,000
Workers	..	479	571	381
Non-workers	..	521	429	619
RURAL				
Total	..	1,000	1,000	1,000
Workers	..	524	581	467
Non-workers	..	476	419	533
URBAN				
Total	..	1,000	1,000	1,000
Workers	..	364	548	134
Non-workers	..	636	452	866

8. 47.9 per cent. of the total population are workers and 52.1 per cent. are non-workers. The proportion of workers in the rural areas (52.4 per cent.) is higher than that in the urban areas (36.4 per cent.). The difference is due mainly to the very low proportion (13.4 per cent.) of workers among females in urban areas, as against 46.7 per cent. for females in rural areas. As a consequence, the proportions of non-workers among females and the total population in the urban areas are considerably higher than those in the rural areas. The other reason for larger proportion of non-workers is the larger proportion of student population in the urban areas.

9. The distribution of workers by sex and nine industrial categories is as follows :—

Industrial Categories	Persons	Males	Females
Total workers	100.0	100.0	100.0
I	46.1	40.7	54.8
II	23.8	18.1	32.9
III	2.2	3.0	0.9
IV	4.4	4.8	3.7
V	6.9	10.2	1.5
VI	1.2	1.7	0.5
VII	4.5	6.6	1.2
VIII	2.4	3.6	0.3
IX	8.5	11.3	4.2

10. Cultivators and agricultural labourers together (Categories I and II) account for 69.9 per cent. of the total workers in Maharashtra, while workers in manufacturing industries including household industries (Categories IV and V) account for 11.3 per cent. Category IX—Other Services accounts for 8.5 per cent.

11. Out of the total male workers, 58.8 per cent. are workers at cultivation—cultivators and agricultural labourers, 15 per cent. are engaged in manufacturing industries, i.e. Categories IV and V, and 11.3 per cent. are engaged in Category IX—Other Services.

12. The bulk of female workers (87.7 per cent.) appear in Categories I—Cultivators and II—Agricultural labourers. The proportions of female workers engaged in manufacturing industries (Categories IV and V) and Category IX—Other Services are 5.2 per cent. and 4.2 per cent., respectively. Female participation in the remaining categories is very low.

13. The distribution of 1,000 total workers, 1,000 male workers and 1,000 female workers engaged in each industrial category by four broad age-groups for Maharashtra is shown below :—

Industrial Classification		Total			0—14			15—34			35—59			60+		
		Persons	Males	Females	P	M	F	P	M	F	P	M	F	P	M	F

V	..	1,000	1,000	1,000	14	11	46	590	592	564	372	373	361	24	24	29
VI	..	1,000	1,000	1,000	32	23	77	576	564	639	357	374	269	35	39	15
VII	..	1,000	1,000	1,000	16	15	27	515	526	415	410	402	475	59	57	83
VIII	..	1,000	1,000	1,000	7	6	24	555	554	581	418	421	367	20	19	28
IX	..	1,000	1,000	1,000	31	26	54	549	561	500	380	375	398	40	38	48

14. Out of 1,000 total workers (all Categories), 872 are in the two working age-groups 15—34 and 35—59. The proportions of children (0—14) and old persons (60+) are 74 and 54 respectively. The proportion of workers in 0—14 age-group among female workers is higher (96) than the corresponding proportion (60) among male workers. The proportion of aged (60+) workers among female workers on the other hand is lower (38) than the corresponding proportion (64) among male workers.

15. The highest proportion (314) for workers in age-group 0—14 is in Category III (Mining, Quarrying, Livestock, Forestry, etc.). This is because more children are employed in the rural areas to look after the cattle, to gather minor forest produce and to break stone for road metal. It is significant that 0—14 age-group makes as much as 10.7 per cent. even among the agricultural labourers, 7.8 per cent. among household industry workers and 7.2 per cent. among cultivators.

16. Higher proportions of old persons (60+) among the workers are in Categories I, IV and VII that is cultivators, workers at household industry and workers in trade. The proportions of workers in the age-group 60 and over in the total workers engaged in Category V—Non-household manufacturing industry and in Category VIII—Transport, storage and communications are comparatively very low.

17. The proportion of workers in the rural areas for males varies between 48.4 per cent. for Ratnagiri District and 63.3 per cent. for Parbhani District. For females it varies between 34.9 per cent. for Sangli District and 59.6 per cent. for Bhandara District. In the urban areas, the proportion of workers among males varies between 45.9 per cent. for Satara District and 61.7 per cent. for Greater Bombay District and the proportion of workers among females varies between 8.8 per cent. for Greater Bombay District and 29.4 per cent. for Bhandara District.

18. Such regional variations in the proportion of workers to total population result from the difference in the age and sex composition of populations as well as the differences in the levels of regional economies. Columns 4, 5 and 6 of Table B-I furnish the figures from which districtwise variations in age-sex composition of the population can be worked out. Subsidiary Tables presenting worked out proportions on those aspects and an analysis of the material presented in Table B-I will be found in Parts I-C and I-A of the Maharashtra Census Report respectively.

19. The following six Subsidiary tables have been prepared from Table B-I. These are included in the Maharashtra Census Report, Part I-C:—

- (1) B-I.1—Distribution of 1,000 persons by each industrial category of workers and by non-worker and by sex.
- (2) B-I.2—Number of female workers per 1,000 male workers in each industrial category.
- (3) B-I.3—Distribution of 1,000 of total workers of each sex into age-groups and industrial categories.
- (4) B-I.4—Distribution of 1,000 workers in each sex and each industrial category by age-groups.
- (5) B-I.5—Workers per 1,000 population in each age-group.
- (6) B-I.6—Workers per 1,000 population in each of the Censuses 1901 to 1961.

Comparability with earlier Censuses

20. The changes made in the Economic Classification adopted in the 1961 Census are described in paragraphs 10-12 of the Introductory Note. They make comparison with the corresponding economic data from 1951 or earlier Censuses difficult. In 1951, the total population was divided into eight broad livelihood classes, the first four relating to Agriculture and the other four primarily but not exclusively to Non-agricultural activities. Those eight livelihood classes were as follows :—

Agriculture—

- I Cultivators of land wholly or mainly owned (owner cultivators) and their dependants.
- II Cultivators of land wholly or mainly unowned (tenant cultivators) and their dependants.
- III Cultivating labourers and their dependants.
- IV Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Activities—

Persons (including dependants) who derive their principal means of livelihood from—

- V Production other than cultivation.
- VI Commerce.
- VII Transport.
- VIII Other services and miscellaneous sources.

21. Another difference between these eight livelihood classes and the nine categories of workers adopted in the 1961 Census is that the former classify the whole population (earners and dependants) while the latter relates only to the working population.

22. The livelihood class IV in 1951 related to non-working earners who are not included in the category of workers in 1961. Earners and earning dependants in the 1951 livelihood classes I and II broadly correspond to the 1961 workers in Category I. Similarly, earners and earning dependants from 1951 livelihood class III correspond to the 1961 Category II of agricultural labourers.

23. The 1951 livelihood class V Production other than cultivation, comprises, besides manufacturing, agricultural plantations, forestry, fishing, hunting etc. There are three corresponding categories in 1961, viz. Category III—Mining, Quarrying, Fishing, Hunting etc.; Category IV—Household Industry; and Category V—Manufacturing other than Household Industry. The 1951 livelihood classes VI and VII correspond more or less to the 1961 Categories VII and VIII. The 1951 livelihood class VIII Other services and miscellaneous sources includes construction and utilities, some activities of transport, storage, communications, other services and miscellaneous sources of unearned income and unpro-

ductive activities (pension, royalty, rent, dividend, etc.). Persons living on unearned income are non-workers and are therefore not included in any category of workers. The livelihood class VIII of 1951 thus broadly corresponds to Categories VI and IX if dependants and persons living on unearned income are excluded.

24. The following table shows the correspondence between 1951 livelihood classes and the 1961 categories of workers :—

Means of Livelihood as per 1951 Census self-supporting and earning dependants.	Comparable categories of workers and Industrial groups according to 1961 Census	
	Categories of workers	Major or minor groups according to the Standard Industrial Classification
I and II. Cultivators of land wholly or mainly owned and unowned.	Category I	000 to 005
III. Cultivating Labourers.	Category II	
V. Production other than cultivation.	Categories III, IV and V.	00 (Less 000 to 005), 01, 02, 03, 04, 10, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34-35, 36, 37, 38, 39.
VI. Commerce	Category VII	60-63, 64-68, 69.
VII. Transport	Category VIII less Industrial Major Groups 72 & 73.	70-71.
VIII. Other Services (excluding persons living on unearned income and unproductive activities).	Categories VI, IX and Industrial Major Groups 72 & 73).	40, 72, 73, 50, 51, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90.

25. The Statement "A" at page 21 shows the numbers of total workers, cultivators and agricultural labourers for Maharashtra and its districts in 1951 and 1961. At the 1951 Census detailed classification into Industry Divisions and Sub-Divisions was confined only to self-supporting persons of the non-agricultural sector. It is not available for earning dependants. Any estimates of workers in Categories III to IX for 1951 have, therefore, to be based on the allocation of earning dependants over those categories in the same proportions as those of the self-supporting persons in the respective categories.

26. Subsidiary Table B-I.6 included in the Maharashtra Census Report, Part I-C, gives proportions of the working force according to the 1961 definition at each of the Censuses from 1901 to 1961.

27. The Statement "B" at pages 22-23 will show the ten broad industrial Categories of economic activity adopted in the 1961 Census and the corresponding grouping of workers and non-workers for the earlier Censuses since 1901.

TABLE B-1

TABLE B-II

WORKERS AND NON-WORKERS
IN TOWN-GROUPS AND TOWNS
ARRANGED TERRITORIALY
CLASSIFIED BY SEX AND
BROAD AGE-GROUPS

EXPLANATORY NOTE

This table shows for each Town-group and Town the distribution of workers and non-workers classified by sex and broad age-groups. The material presented in this table is exactly similar to that of Table B-I and is in fact a further break-up of the data presented for urban areas of the districts in Table B-I by each town-group and town.

2. The entries for urban areas of the State, divisions and districts appearing in Table B-I are reproduced here for ready reference. Town-groups and towns are presented separately under each district in which they are situated. Within the district they are arranged in the order of talukas in which they are situated. An alphabetical index of all towns is given at the end of this note to facilitate reference to the entries pertaining to any town-group or town.

3. Definitions of the urban area, workers, non-workers and the industrial categories will be found in the Introduction at pages 1 to 3.

4. When two or more urban units are adjacent or form a compact urban unit they have been grouped together to form a town-group. In such cases, the table first presents the entries for the town-group and then those for each of its constituent urban units.

5. The following are treated as town-groups in Maharashtra :—

Town-group	Constituent Towns

TABLE B-III

PART A—Industrial Classification of
Workers and Non-workers
by Educational levels in
Urban Areas only

PART B—Industrial Classification of
Workers and Non-workers
by Educational levels in
Rural Areas only

EXPLANATORY NOTE

This table presents the distribution of population classified by sex into nine categories of workers and one of non-workers and cross-tabulated by educational levels. The educational levels used for cross-tabulation are more elaborate for urban population and the table is, therefore, presented in two separate parts, A and B, for urban and rural areas respectively.

2. Material is presented in both the parts separately for the State, its four administrative divisions and 26 districts. In Part B, which relates to rural areas, data are presented for twenty-five districts only. Greater Bombay being an entirely urban district does not appear there.

3. The distribution of workers into Industrial categories is the same as presented in Tables B-I and B-II. The distribution by educational levels is shown by the vertical spread under column 1.

4. Educational levels shown here are those which have already been attained and not those which are being studied. A person who has completed primary level is included in the group "Primary or Junior Basic" though he may be studying in a higher standard. A person who is studying or had studied in Intermediate class is included in the group "Matriculation or Higher Secondary" and so on.

5. Part B for rural areas presents data only by four broad educational levels, viz., (i) Illiterate, (ii) Literate without educational level, (iii) Primary or Junior Basic and (iv) Matriculation and above. Part A for urban areas, however, presents the distribution in the first three educational levels as in Part B and an elaborate spread of the fourth group of "Matriculation and above" into 'Matriculation' and four other categories according to technical and non-technical diplomas or degrees.

Holders of technical degrees are shown further classified by subjects like Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others.

6. "Literacy" as defined in the Census is ability to read and write a simple letter either in print or in manuscript. If a person could both read and write and had also passed one or more written examinations as proof of educational level attained, the highest examination he had passed was recorded in the enumeration slip.

7. The figures for literates (without educational level) presented in the Table are exclusive of persons with educational levels. Similarly, the figures for any educational level are exclusive of persons who have attained higher educational levels.

8. Persons who have studied up to the 4th standard but have not passed the primary stage are included in the group of literates (without educational level). Pupils studying in the 1st or 2nd standard who could not read and write a simple letter are included in the group of illiterate persons.

9. Out of a total of 11,793,070 literate and educated persons in the State, 5,939,439 or 50.36 per cent. are workers and 5,853,631 or 49.64 per cent. are non-workers. The proportion of literate and educated workers out of total workers is 31.35 per cent. The proportion of literate and educated non-workers out of total non-workers is 28.41 per cent.

10. Actual number of workers, number of literate and educated workers and their proportions are shown below for each industrial category. The distribution of total literate and educated workers in each of the nine categories is also shown in column 5.

IX. Other Services	..	..	..	1,617,031	1,002,634	62.00	16.88

11. Out of the total literate and educated workers, Cultivators and Agricultural labourers account for 45.16 per cent. though the proportions of literate and educated workers out of total workers engaged in these two Categories I and II are only 24.67 per cent. and 11.68 per cent. respectively. The proportion of literate and educated workers is the highest (73.26 per cent.) in Category VII—Trade and Commerce. It is followed by Category V—Manufacturing other than Household

Industry with 65.06 per cent., Category VIII—Transport, Storage and Communications with 64.6 per cent. and Category IX—Other Services with 62 per cent. The lowest proportion of literate workers is in Category II—Agricultural labourers.

12. The distribution of 1,000 workers in each Industrial Category by educational levels in urban areas of the State is as follows :—

N=Negligible

13. More than half the number of workers in Categories I—Cultivators, II—Agricultural Labourers, III—Mining, Quarrying etc., IV—Household Industry and VI—Construction are illiterate. This may be due to these activities depending more on physical labour and traditional skill than on education and hence attracting a large number of illiterate labourers. The percentage of illiterate agricultural labourers is as high as 85 and that of illiterate workers in mining, quarrying etc. is 68.7. In the first three categories relating to primary production and in the household industry, the educational level Matriculation or above is found to have been reached in a very few cases. Among cultivators only 3.3 per cent. and among workers in mining and quarrying only 3 per cent. have reached this level. This proportion among household industry workers is 0.7 per cent. and among agricultural labourers, 0.1 per cent.

14. Among all the categories, Category IX—Other Services has the highest percentage of Technical Diploma or Degree holders. Category V—Non-household Manufacturing Industry and Category VI—Construction also provide opportunity of employment for Technical Degree holders. The percentages of Technical

Degree holders to the total number of workers in these two categories are 1 and 1.5 respectively.

15. The large figures under "Others" below the indention "Technical Degree or Diploma equal to Degree or Post-Graduate Degree" are due to the inclusion of B.Sc.s., M.Sc.s., etc. in general science subjects like Chemistry, Physics, Mathematics, Botany, Zoology, Microbiology, Geology, Geophysics, etc. in this group. The number of persons passing out from the Universities with degrees in such subjects is much larger than the number passing out with degrees in other subjects specifically shown in the table.

16. The figures of females under "Non-technical Diploma not equal to degree" and under "Teaching degree" are in excess of males in Thana and Akola districts. This may be due to the diploma courses in sewing, art, embroidery, music and domestic science, etc. taken more by women than men. In the case of 'teaching', the excess of females may be due to the existence of a Women's University in Maharashtra.

17. There are 297 males with engineering degrees in Category VII—Trade and Commerce in the urban area, but there is not a single engineer reported for Category VII in Table B-V for occupations. This may be due to

the fact that some of the leading manufacturing concerns prefer to have managerial and sales staff possessing engineering degrees in their shops. Such persons would report themselves as Managers (wholesale in engineering or retail trade), as salesmen or as Manufacturer's agents and not as Engineers.

18. The number of persons in Categories III to IX with degrees in engineering according to Table B-III-A is 8,695 males and 16 females, as against the occupational figures of engineers (Group 00) 18,880 males and 78 females in Table B-V for urban areas. On account of expansion of construction activities and dearth of qualified staff a large number of engineers possess only Diplomas in Engineering. There may be some even without a Diploma in Engineering.

19. As against 13,350 males and 2,322 females reported as Physicians and Surgeons for urban areas in Table B-V, in Table B-III-A the number of persons holding degrees in Medicine in Categories III to IX is 7,288 males and 1,520 females. This shows that there are many medical practitioners (Physicians and Surgeons) who hold only diplomas in Medicine.

20. There are figures in Table B-III-A under degree in medicine in Category IV—Household Industry and VII—Trade and Commerce, but there are none in these categories for occupations (Physicians, Surgeons, etc.). This may be due to the possibility of the medical graduates working as Pharmacists and Pharmaceutical technicians and shown in Categories IV or VII in Table B-III.

21. The difference in the figures appearing in Table B-III-A of degree holders in Agriculture for Categories III to IX (909 males and 2 females) and those appearing in Table B-V (Occupational family 023) for urban areas can be explained by the fact that a number of agricultural graduates are in the teaching line or in Research Institutes or as lecturers in extension training or orientation centres.

A large number of agricultural graduates working in the Community Development Blocks have been shown in Table B-V in Occupational families 050, 051 and so on.

22. Entry of agricultural graduates in Category IV—Household Industry in Table B-III-A may represent a person holding a degree in Agriculture and engaged in Household Industry carried on at his home. Similarly, entries of agricultural graduates in Category VI—Construction may represent employment of such graduates in various soil conservation schemes like bunding, terracing, etc.

23. The following three subsidiary tables have been prepared from Table B-III—Part A. These are included in Part I-C of the Maharashtra Census Report.

- (1) B-III—Part A.1.—Distribution of 1,000 workers in each sex by educational levels in Urban Areas only.
- (2) B-III—Part A.2.—Distribution of 1,000 workers in each industrial category and in each sex by educational levels in Urban Areas only.
- (3) B-III—Part A.3.—Distribution of 1,000 persons not at work by educational levels in Urban Areas only.

24. The following two subsidiary tables have been prepared from Table B-III—Part B. These are also included in Part I-C of the Maharashtra Census Report.

- (1) B-III—Part B.1.—Distribution of 1,000 workers in each industrial category and in each sex by educational levels in Rural Areas only.
- (2) B-III—Part B.2.—Distribution of 1,000 persons not at work by educational levels in Rural Areas only.

TABLE B-IV—PART A

**Industrial Classification by Sex and
Class of Workers of Persons at
Work at Household Industry**

EXPLANATORY NOTE

Parts A, B and C of Table B-IV have been treated as three independent tables because their formats and contents are different from one another. They bear a common table number (B-IV) because the original plan was to present the entire information in only one table. That plan was revised and for economy of space and for the convenience of users the material is now presented in three separate tables. Together, they present the Industrial Classification of workers (other than those engaged in cultivation) according to the Standard Industrial Classification Scheme and also cross-tabulated by sex and employment status. The Standard Industrial Classification Scheme is reproduced as Appendix II to the Introductory Note at pages 9 to 15.

2. This Table B-IV—Part A presents the distribution of workers engaged in Household Industry by Industry division and major groups and cross-tabulated by sex and employment status. Material is presented for Maharashtra, its four administrative divisions and 26 districts and for total, rural and urban areas under each administrative unit.

3. Industrial classification by division and major groups is shown by vertical spread under column 1.

4. The definition of Household Industry may be seen at paragraph 30 of the Introductory Note on page 3. Since the distribution presented here is exclusively of workers engaged in household industry, the break-up under column 1 is restricted to Industry division "0" with its major groups "00" to "04", Industry division "1" with its only major group "10" and Industry division "2 & 3" with its major groups "20" to "39".

5. Classification by employment status is in two groups, viz., (i) Employees and (ii) Others. "Employees" are persons working for salary or wages in cash or kind in some one else's household industry. "Others" are workers who are not employees, i.e. who are either employers, single workers or family workers in their own household industry.

6. Entries for major groups for which there are no workers in any administrative unit have been deleted from the table for economy of space.

7. It will be seen that out of 832,169 workers engaged in household industry, only 68,086 or 8.18 per cent. are working as employees in household industries run by others. It is significant that over 57 per cent. of the employees are from the urban areas. Their largest number is in the major group 23 (Cotton textiles). Major group 04 Livestock, major group 20 Foodstuffs, major group 22 Tobacco products, major group 27 Miscellaneous textiles, major group 28 Wood and wooden products and major group 34-35 Non-metallic mineral products also have large numbers of workers as employees. They include persons employed for minding the cattle or bidi-making, and also persons employed by village shepherds, carpenters and potters to assist them.

8. A Subsidiary table B-IV:3 showing number per 1,000 workers at Category IV—Household Industry who are "employees" and "others" has been prepared from Table B-IV—Part A. It is included in Part I-C, of the Maharashtra Census Report.

TABLE B-IV—PART-A

**B-IV-PART A—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK
AT HOUSEHOLD INDUSTRY—concl.**

[illegible]

TABLE B-IV--PART B

Industrial Classification by Sex and
Class of Worker of Persons at Work
in Non-household Industry, Trade,
Business, Profession or Service

EXPLANATORY NOTE

This Table presents the distribution of workers in non-household industry, trade, business, profession or service by Industry Divisions and Major Groups, cross-tabulated by sex and employment status. Workers engaged in Categories I, II and IV, i.e. as cultivators, agricultural labourers and at household industry, are not included in this Table.

2. Material is presented for Maharashtra State, its four administrative divisions and 26 districts, but, for economy of space, only for total and urban areas under each unit. Figures for rural areas under any administrative unit will be the difference between the corresponding figures for total and urban areas.

3. Classification by Industry Divisions and Major Groups is shown by vertical spread under column 1. The classification is according to the Standard Industrial Classification Scheme reproduced as Appendix II to the Introductory Note at pages 9 to 15.

4. Classification by employment status is in four classes of workers, viz., (i) Employer, (ii) Employee, (iii) Single worker and (iv) Family worker.

5. An "employer" is a person who hires other persons to help him in the economic activity in which he is engaged.

6. An "employee" is a person who usually works under some other person for salary or wages in cash or kind.

7. A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually. A person who works in joint partnership with one or several persons without hiring any employee is also a single worker.

8. A "family worker" is a member who works without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in household duties are non-workers and are not, therefore, treated as family workers.

9. The actual numbers and per thousand distribution of workers by class of worker for each Industry Division are shown in Statement 1 at page 190.

10. For every 1,000 workers engaged in non-household industry, etc., 40 are employers, 622 are employees, 265 are single workers and 73 are family workers. The highest proportion of employers to total workers (104) is in Industry Division 6 (Trade and Commerce), probably due to the large number of small trading establishments engaging one or two employees. The lowest proportion of employers to total workers (14) is in Industry Division 1 (Mining and Quarrying) where on account of the nature of work the proportion of self-employed persons carrying on without hired labour is high.

11. The highest proportion of employees to total workers (804) is in Industry Division 2 & 3 (Manufacturing) which covers manufacturing establishments including large-scale organised factories. The proportion of

employees to total workers in Industry Division 7 (Transport, etc.) is also high (728). In Industry Divisions 8 (Services), 1 (Mining and Quarrying) and 4 (Construction), the proportions of employees are 692, 648 and 570 respectively.

12. On account of a large number of self-employed persons like vendors and small shopkeepers, the proportion of single workers to total workers in Industry Division 6 (Trade and Commerce) is 441 which is higher than that of any other Industry Division. The lowest proportion (126) of single workers to total workers is naturally in Industry Division 2 & 3 (Manufacturing). A few establishments working practically as household industries have been treated as non-household industries because of the area restriction (within the house) in the definition of household industry in urban areas. But for such establishments the proportion of single workers in Industry Division 2 & 3 would have been still lower. The presence of a few family workers in Industry Division 2 & 3 may also be attributed to those establishments.

13. Due to the inclusion of family enterprises, Industry Division 0 (Agriculture, Livestock, etc.) and Industry Division 6 (Trade and Commerce) also have fairly large proportions of family workers to total workers.

14. The following seven subsidiary tables have been prepared from Table B-IV—Part B. These are included in Part I-C of the Maharashtra Census Report.

- (1) B-IV.1—Number per 1,000 workers in Non-household Industry, Trade, Business, Profession or Service, who are employers, employees, single workers and family workers.
- (2) B-IV.2—Number per 1,000 workers in III—Mining, quarrying, livestock, fishing, hunting and plantations, orchards and allied activities who are employers, employees, single workers and family workers.
- (3) B-IV.4—Number per 1,000 workers in V—Manufacturing other than Household Industry who are employers, employees, single workers and family workers.
- (4) B-IV.5—Number per 1,000 workers in VI—Construction who are employers, employees, single workers and family workers.
- (5) B-IV.6—Number per 1,000 workers in VII—Trade and Commerce who are employers, employees, single workers and family workers.
- (6) B-IV.7—Number per 1,000 workers in VIII—Transport, Storage and Communications who are employers, employees, single workers and family workers.
- (7) B-IV.8—Number per 1,000 workers in IX—Other Services who are employers, employees, single workers and family workers.

TABLE B-IV—PART C

Industrial Classification by Sex and
Divisions, Major Groups and Minor
Groups of Persons at Work
other than Cultivation

EXPLANATORY NOTE

This is one of the most important Tables of the 1961 Census. It shows the distribution of workers other than those engaged in Category I—‘Cultivator’ and Category II—‘Agricultural Labourer, by Industry Divisions, Major Groups and Minor Groups according to the Standard Industrial Classification Scheme (pages 9 to 15). The table thus shows the employment position in all non-agricultural sectors of economy classified for major and minor groups under each sector separately.

2. Material is presented for Maharashtra State, its four administrative divisions and 26 districts, but, for economy of space, only for total and urban areas of each unit. Figures for rural areas of any administrative unit will be the difference between the corresponding figures for total and urban areas.

3. Break-up for Industry Divisions (one digit), major groups (two digits) and minor groups (three digits) is shown by vertical spread under column 1. After the total for all Industry Divisions the entries start with Division 0. Major group 00 follows with its minor groups. Then major group 01 and its minor groups and so on. Then Industry Division 1 with its only one major group. Then Industry Division 2 & 3 and so on.

4. For each Industry Division, Major Group and Minor Group the table shows the total number of workers engaged, males and females separately for total and urban areas. The distribution is shown further for household industry and non-household industry, trade, profession, service, etc. By definition of the household industry, the break-up for household industry is of course restricted to Industry Divisions 0, 1 and 2 & 3.

5. Workers engaged in repairing or servicing establishments are generally included among the workers engaged in the corresponding manufacturing industries except in the few cases where the Standard Industrial Classification Scheme provides separate minor groups for manufacturing and repairing or servicing activities. For example, the workers engaged both in manufacturing of electric fans and repairing of electric fans are shown under the same minor group, viz., 375. Manufacturing and repairing of radios are similarly shown under minor group 378. In respect of motor vehicles, however, manufacturing is coded under minor group 383 and repairing or servicing under 384. Similarly, manufacturing of bicycles is coded under minor group 385 and repairing under 388.

6. Minor groups 000, 001, 002, 003 and 004 which relate to ‘cultivation’ will not be found in the table as it presents the distribution of workers other than those engaged as cultivators or as agricultural labourers. Similarly, Minor group ‘999—Fresh entrants to the labour market’ also does not appear in the table since it relates to non-workers.

7. Lines for minor groups which have nil entries for any administrative unit have been omitted from the table.

8. For further economy of space, entries for minor groups which have less than one per cent. of the total workers engaged in the Industry Division concerned are not printed in the table but are shown instead in run-on style in the Appendix to this Table at pages 368 to 406.

Workers reported in the Houselists

9. Data regarding the number of workers under each major group and minor group of Industry Division 2 & 3 obtained from the houselists in September-October 1960 are published in Part IV of the Maharashtra Census Report as well as in Part II of each District Census Handbook volume. The number of workers reported there for any major or minor group may not tally with the corresponding figures shown in this table which are based on the material collected at the Census enumeration stage, because—

(i) both the dates of reference and the reference periods were different in the two stages ;

(ii) the working strength of a few important industries like sugar factories fluctuates between the two seasons ;

(iii) the number of workers reported in the houselist is as returned by the employers or some responsible persons on their behalf. It includes persons who may be doing some other work as principal work and doing the work reported in the houselist only as a secondary work ; and

(iv) the houselist workers were reported for each place of work while the workers shown in Table B-IV—Part C have been compiled with references to the place of residence.

10. The total number of workers other than those engaged as cultivators and as agricultural labourers in Maharashtra is 5,701,404. Out of these workers, 4,804,866 or 84.3 per cent. are males and 896,538 or 15.7 per cent. are females. 36 per cent. of the total workers are in rural areas and 64 per cent. are in urban areas.

11. The distribution per 1,000 of these total workers, males and females by each Industry Division for total and urban areas is as follows :—

	TOTAL			URBAN		
	Persons	M	F	Persons	M	F
Total ..	1,000	1,000	1,000	1,000	1,000	1,000
Industry Division 0 .. Agriculture, Livestock, Forestry, Fishing and Hunting.	78	78	75	19	18	23
Industry Division 1 .. Mining and Quarrying.	10	9	15	5	4	8
Industry Division 2 & 3 .. Manufacturing.	359	350	409	374	371	390

	TOTAL			URBAN		
	Persons	M	F	Persons	M	F
Industry Division 4 .. Construction.	41	41	43	30	31	29
Industry Division 5 .. Electricity, gas, water and sanitary services.	11	10	12	14	13	21
Industry Division 6 .. Trade and Commerce.	150	160	95	176	186	108
Industry Division 7 .. Transport, Storage and Communications.	78	89	24	104	113	40
Industry Division 8 .. Services.	263	256	300	277	262	379
Industry Division 9 .. Activities not adequately described.	10	7	27	1	2	2

12. It will be seen that Industry Division 2 & 3 (Manufacturing) employs the largest proportion (359) of workers. The second largest sector is Industry Division 8 (Services) with 263. The lowest proportion is 10 for Industry Division 1 (Mining and Quarrying). The distribution for rural and urban areas follows more or less the same pattern, except that there are fewer workers in urban areas in Industry Division 0 (Agriculture, Livestock, Fishing, etc.), Industry Division 1 (Mining and Quarrying) and Industry Division 4 (Construction), indicating dispersal of these activities more in rural areas.

13. The number of workers in each of the Divisions 0, 1 and 2 & 3 in Maharashtra and their distribution by household and non-household industry are as shown below :—

N.B.—Figures in brackets denote proportions per 1,000 of total workers in each Division.

Division	Total	Non-Household Industry	Household Industry
All Divisions ..	5,701,404 (1,000)	4,869,235 (854)	832,169 (146)
0 Agriculture, Livestock, etc.	444,137 (1,000)	355,141 (800)	88,996 (200)
1 Mining and Quarrying	54,489 (1,000)	54,250 (996)	239 (4)
2 & 3 Manufacturing ..	2,047,269 (1,000)	1,304,335 (637)	742,934 (363)

14. Among the three Industrial Divisions 0, 1 and 2 & 3, which only are relevant to household industry, the proportion of workers at household industry to total workers is the highest (36.3 per cent.) in Division 2 & 3—Manufacturing. This includes handloom weavers, workers in bidi industry and the large number of

carpenters, potters and other artisans engaged in those sectors as household industries.

15. Sex ratios, i.e., the numbers of female workers per 1,000 of male workers for each Industry Division in household industry and in non-household industry, trade, profession, etc. are as follows :—

Industry Division	Sex Ratios			
	Non-household Industry, Trade, Profession, etc.		Household Industry	
	Total	Urban	Total	Urban
All Industry Divisions ..	147	127	486	678
Division 0 Agriculture, Livestock etc.	160	172	257	415
Division 1 Mining and Quarrying.	334	289	96	..
Division 2 & 3 Manufacturing.	94	90	519	687
Division 4 Construction.	193	144	..	..
Division 5 Electricity, Gas, Water and Sanitary Services.	211	231	..	..
Division 6 Trade and Commerce.	111	88	..	..
Division 7 Transport, Storage and Communications.	50	54	..	..
Division 8 Services.	219	220	..	..
Division 9 Activities not adequately described.	736	177	..	..

16. Female participation is considerably higher in household industries. That is so particularly in urban areas. In rural areas, a large number of females work on land and the scope of employment in non-household industry, trade, etc. is comparatively limited. Female participation is the lowest (50) in Industry Division 7 (Transport, Storage and Communications) and second lowest (94) in Industry Division 2 & 3 (Manufacturing).

17. The following statement shows the manufacturing industries both by household and non-household types in Maharashtra by major groups arranged according to their rank by the number of workers engaged. For each major group the statement shows the number of working persons, males and females separately, for total, household type of industry and non-household industry. For facility of comparison the statement also shows for each major group the sex ratio and the proportion of workers engaged per 1,000 of total workers in Industry Division 2 & 3 (Manufacturing).

18. Major group 23 cotton textiles, with 5.59 lakh workers, ranks first among the manufacturing industries in Maharashtra. It has 27.3 per cent. of the total workers engaged in manufacturing. Out of the total workers engaged, 6.8 per cent. are in household industry and the remaining 20.5 per cent. are in non-household, including large-scale organised industry.

19. Major group 23 includes workers engaged in cotton ginning, pressing and baling, spinning, weaving, dyeing, bleaching, printing of cotton textiles and manufacture of cotton nets, cordage, rope and twine.

20. Though the sex ratio is not very high the cotton textile industry has the largest number of female workers. It is however significant that female workers make as much as 48 per cent. in the household sector of cotton textile industry but only 9.2 per cent. in the organised sector. Major group 28 manufacture of wood and wooden products is second in rank in the State with 2.18 lakhs of workers. 1.53 lakhs or 70.1 per cent. are engaged in the household sector and the remaining 0.65 lakhs in the non-household sector. 95.7 per cent. of female workers are engaged in household sector in which they make as much as 27.1 per cent. Female participation in the non-household sector is insignificant as female workers are only 2.8 per cent. of the total workers. Major group 20 foodstuffs is

third in rank, with 7.8 per cent. of total workers in Industry Division 2 & 3.

21. The sex ratio is the highest (1,321) in major group 22 tobacco products. This is because of a large number of women working on bidi-making, especially in Bhandara District.

22. The following statement shows the distribution of 1,000 total workers (persons, males and females) other than those at cultivation in Maharashtra in each Industry Division and Major Group arranged according to the Standard Industrial Classification. For facility of comparison the total workers and workers engaged as cultivators and as agricultural labourers are shown both by actual numbers and by proportionate figures corresponding to 1,000 engaged in all activities other than cultivation. Column 5 also shows the sex ratio in each Industry Division or Major Group separately.

23. A subsidiary table B-IV.9 showing the distribution of 1,000 workers other than those working as Cultivators or as Agricultural Labourers by Division, Major Group and Minor Group of Standard Industrial Classification has been prepared from Table B-IV—Part C. It is included in Part I-C of the Maharashtra Census Report.

B-IV—PART C—INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

N.B.—Minor Groups having less than 1 per cent. of the workers in the respective Industrial Division in the case of Divisions other than 2 & 3 and less than 0.5 per cent. in the case of Division 2 & 3 are not exhibited in this Table. Figures for such Minor Groups have been shown in run on lines under the respective administrative unit in an Appendix to this Table.

TABLE B-VII

PART A—Persons working principally
 (i) as Cultivators,
 (ii) as Agricultural Labourers
or (iii) at Household Industry
classified by Sex and by
Secondary Work—
 (i) at Household Industry,
 (ii) as Cultivator
or (iii) as Agricultural Labourer

PART B—Industrial Classification by Sex
of Persons working in Non-household
Industry, Trade, Business, Profession
or Service who are also engaged in
Household Industry

EXPLANATORY NOTE

Parts A and B of this Table show the distribution of workers by categories or Industrial Classification of principal work cross-tabulated by similar classification of secondary work.

2. In case a worker is engaged in two or more kinds of work, the one which consumes the largest portion of his time (not necessarily yielding the largest income) is treated as his principal work, and the one consuming the second largest portion of his time is treated as his secondary work. The enumerators had been instructed to make enquiries about principal and secondary work and, in all cases where a person returned two kinds of work, to mark the principal and secondary work by

prescribed distinguishing symbols against Question 8, 9, 10 or 11 of the Individual Slip.

3. The distribution of workers who are working principally as cultivator (Category I), as agricultural labourer (Category II) or at Household Industry (Category IV) and are also engaged in secondary work at household industry or as cultivator or as agricultural labourer is presented in Table B-VII—Part A. The distribution of workers engaged in Household Industry as additional work and in non-household industry, trade business, profession or service (Categories III, V, VI, VII, VIII and IX) as principal work is shown in Table B-VII—Part B.

TABLE B-VII—PART A

4. This table presents the distribution of workers engaged in household or industry as cultivator or as agricultural labourer as secondary work cross-tabulated by the nature of their principal work. Presentation is limited to workers engaged in Categories I, II and IV as principal work. The distribution of workers engaged in the above types of secondary work, who work principally in other categories, viz., III, V, VI, VII, VIII and IX is not shown here. Similarly, the distribution of workers engaged in Categories other than I, II or IV as secondary work and engaged in any one of Categories I to IX as principal work is not shown here.

5. The classification of principal work is shown by vertical spread in column I into three main categories, viz., I, II and IV. The principal work at household industry (Category IV) is further classified into Industry Divisions and Major Groups according to the Standard Industrial Classification Scheme (pages 9 to 15). The relevant divisions and major groups are Division 0 with major groups 00, 01, 02, 03 and 04 ; Division 1 with its only one major group 10 ; and Division 2 & 3 with major groups 20 to 39. The table presents for each of the three above mentioned types of principal work the number of workers engaged in secondary work in either of the other two activities. The total number of workers engaged in Category I, II, IV or in any Industry Division or Major Group under IV as principal work is not shown in the table but will be found in Table B-I.

6. Material is presented for Maharashtra, its four administrative divisions and 26 districts and for total, rural and urban areas of each unit. Where entries for rural or urban areas under any administrative unit against any kind of principal work are nil, the line for that area is not presented in the table. For economy of space, the table does not, in such cases, present the lines for 'total' area separately. Divisions or Major Groups which have 'nil' entries have been omitted altogether from presentation.

7. With a view to further economy of space, the entries for household industry major groups for which the number of workers engaged in secondary work is

less than 5 per cent, of the total workers engaged in that major group as principal work are not printed in the table and are instead shown in run-on lines in an Appendix to the Table at page 432. This does not apply to Greater Bombay for which entries for all major groups are printed in the table and none is shifted to the Appendix.

8. The following table will show (in percentages) the extent of participation in secondary work by cultivators, agricultural labourers and workers at household industry :—

Principal work	Total Rural Urban	Secondary Work			
		Total engaged in secondary work	At household industry	As cultivator	As agricultural labourer
Cultivator	Total	19.81	1.97	..	17.84
	Rural	20.01	1.98	..	18.03
	Urban	11.85	1.31	..	10.54
Agricultural Labourer	Total	14.11	0.94	13.17	..
	Rural	14.43	0.97	13.46	..
	Urban	7.44	0.31	7.12	..
Household Industry	Total	21.75	..	14.78	6.97
	Rural	28.99	..	19.61	9.38
	Urban	3.65	..	2.70	0.95

9. The proportion of workers engaged in household industry as principal work and doing secondary work either as cultivators or as agricultural labourers is higher than that of those working principally as cultivators or agricultural labourers and doing secondary work in one of the other two activities.

10. In rural areas, as many as 28.99 per cent. of the workers engaged in household industry as principal work are also engaged in secondary work either as cultivators or as agricultural labourers.

11. Out of the total cultivators, 19.81 per cent. are engaged in secondary work, comprising 1.97 per cent. at household industry and 17.84 per cent. as agricultural labourers. In rural areas, the extent of dependence of cultivators on secondary work is 20.01 per cent. In urban areas, the percentage of cultivators doing secondary work either as agricultural labourers or at household industry is 11.85.

12. 14.11 per cent. of the total agricultural labourers are engaged in secondary work either as cultivators or as household industry workers.

13. Cultivators and agricultural labourers have larger complementary roles with each other than either of them has with household industry workers. Out of 13,247,077 workers engaged in Categories I and II, 2,153,266 or 16.25 per cent. also work on land in the other capacity. The distribution by secondary work of 1,000 persons engaged principally as cultivators or as agricultural labourers or at household industry, who also have secondary work in either of the other two activities, is as follows :—

14. Out of every 1,000 cultivators engaged in secondary work, 900 are working as agricultural labourers and only 100 at household industry. Similarly, out of every 1,000 agricultural labourers engaged in secondary work, 934 are working as cultivators and only 66 are engaged in household industry.

15. The following three subsidiary tables have been prepared from Table B-VII—Part A. These are included in Part I-C of the Maharashtra Census Report :—

(1) B-VII—Part A.1—Number per 1,000 persons working principally as Cultivators, who are

engaged in secondary work— 1. As Agricultural Labourers ; 2. At Household Industry in *Rural Areas only*.

(2) B-VII—Part A.2—Number per 1,000 persons working principally as Agricultural Labourers, who are engaged in secondary work— 1. As Cultivators ; 2. At Household Industry in *Rural Areas only*.

(3) B-VII—Part A.3—Number per 1,000 persons working principally at household industry, who are engaged in secondary work— 1. As Cultivators ; 2. As Agricultural Labourers.

TABLE B-VII—PART B

16. This table presents the distribution of workers engaged in household industry as additional work from among those working principally in Categories III, V, VI, VII, VIII or IX. Both the principal and additional work have been classified into Industry Divisions and Major Groups according to the Standard Industrial Classification Scheme (pages 9 to 15).

17. Material is presented for Maharashtra, its four administrative divisions and 26 districts for total, rural and urban areas. The break-up for total, rural and urban areas is shown by horizontal spread under columns 2 to 7.

18. For any administrative unit, the table presents the material in the serial order of Industry Divisions and Major Groups of principal work arranged according to the Standard Industrial Classification. For any Industry Division or Major Group of principal work, the first line shows the total number of workers, males and females, engaged in it as principal work. The second line shows the total number of workers out of those shown in the first line who are engaged in household industry as additional work and this is followed by lines showing the break-up for each industry division and major group of that additional work. Because of the definition of household industry this break-up is limited to Industry Division 0 and its major groups 00, 01, 02, 03 and 04 ; Industry Division 1 with its only major group 10 ; and Industry Division 2 & 3 with its major groups 20 to 39.

19. Lines with nil entries have been omitted. Divisions and Major Groups of principal work for which there are no workers engaged in household industry as additional work are similarly not exhibited in the table.

20. Out of 4,869,235 workers engaged in non-household industry, trade, business, etc. (Categories III and V to IX) as principal work, only 14,019 or 0.29 per cent. are engaged in household industry as additional work. Distribution of these persons by Industry Divisions of non-household industry as principal work and industry divisions of household industry as additional work is as follows :—

Principal Work Non-Household Industry Division	Total workers	Additional work at Household Industry			
		Total	Division 0	Division 1	Division 2 & 3

9	 57,914	207 (0.36)	39 (0.07)	(—)	168 (0.29)

N=Negligible.

N.B.—Figures in brackets denote percentages to total workers in each Industry Division of principal work.

B-VII—PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS, (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY, (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

N.B.—(1) Three lines 'T', 'R' and 'U' have been presented only where there are figures for both Rural and Urban areas. Where there are figures for only 'Rural' or 'Urban' area, only one line for the area which shows figures, 'Rural' or 'Urban' as the case may be, has been presented. In such a case, the same figures may be read as for 'Total'.

(2) Major Groups of Household Industry where persons having secondary work as Cultivator and/or Agricultural Labourer are less than 5 per cent. of persons with that Major Group as principal work are not exhibited in this Table, except for Greater Bombay District. In respect of other districts, the four Divisions and Maharashtra State, figures for such Major Groups have been shown in run-on lines under the respective administrative unit in an Appendix to this Table.

APPENDIX TO TABLE B-VII—PART A

Major Group of Household Industry where persons having Secondary work as Cultivator and/or Agricultural Labourer are less than 5 per cent of persons with that Major Group as principal work

Abbreviations—

II = Secondary Work as Cultivator

M = Male

III = Secondary Work as Agricultural Labourer

F = Female

N.B.—Three lines "Total", "Rural" and "Urban" have been presented only where there are figures for both Rural and Urban areas. Where there are figures for only "Rural" or "Urban" area, only one line for the area which shows figures, "Rural" or "Urban", as the case may be, has been presented.

In such a case, the same figures may be read as for "Total".

EXPLANATORY NOTE

Non-workers are classified into eight types and their distribution by sex and broad age-groups into each of those types is shown in the next Table B-IX. Table B-VIII deals with only two of those eight types, viz., (i) persons seeking employment for the first time; and (ii) persons employed before but now out of employment and seeking work.

2. Part A of the Table (pages 554 to 575) relates to urban areas only and presents the distribution of unemployed persons aged 15 and above in each of the two types by sex, age and educational levels. Part B of the Table (page 576) relates to rural areas only and presents the distribution of unemployed persons of the two types combined, by sex and educational levels, but without any further break-up for age-groups.

3. Material in both the Parts A and B is presented for the State, its four administrative divisions and 26 districts. In Part B, however, the entries for Greater Bombay are "nil" that being an entirely urban district.

4. Both, Parts A and B, deal only with unemployed persons aged 15 and above. Further break-up by age shown in columns 7 to 32 of Part A is into age-groups 15-19, 20-24, 25-29, 30-34 and 35+ for the first type of unemployed persons and in age-groups 15-19, 20-24, 25-34, 35-44, 45-59 and 60+ for the second type of unemployed persons. The age-group "age not stated" is shown under both the types for persons who had not returned their ages. Part B does not show any break-up by age-groups.

5. The break-up for educational levels in Part A is shown by vertical spread under column 1. The educational levels are the same as shown in Table B-III—Part A.

6. Part B, on the other hand, presents break-up for only four educational levels by horizontal spread in columns 5 To 16. The educational levels are the same as shown in table B-III—Part B.

7. The educational levels shown in both the Tables are mutually exclusive, that is, the lower levels do not include the figures for higher levels.

8. Part B of the Table has been condensed only in one page because—

(i) unlike Part A it does not show the distribution for each type of unemployed separately;

(ii) unlike Part A it does not show any break-up for age-groups; and

(iii) the break-up by educational levels is only into four groups, the fourth group "Matriculation and above" replacing the 12 detailed groups shown in Part A.

9. Unemployed is a person who, while not engaged in "work", must be seeking work. The group does not include—

(i) persons who may be under-employed and hence seeking extra work;

(ii) persons who may be in search of betterment of employment; and

(iii) persons who are not at work and are also not seeking work.

10. Out of the total non-working population of 5,930,401 aged 15 and above, 173,281 or 2.92 per cent. are unemployed.

11. The unemployment problem is more acute in urban areas. More than 80 per cent. of the unemployed persons aged 15 and above are in urban areas. The proportion of unemployed among males is sixteen times higher than that among females.

12. Actual numbers and the distribution of 1,000 unemployed persons aged 15 and above by sex and by educational levels are shown below for total, rural and urban areas separately :—

Educational levels	TOTAL			RURAL			URBAN		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10
Total unemployed aged 15 and above.	173,281 (1,000)	163,242 (1,000)	10,039 (1,000)	33,419 (1,000)	31,433 (1,000)	1,986 (1,000)	139,862 (1,000)	131,809 (1,000)	8,053 (1,000)

Total literate and educated persons	132,905 (767)	126,517 (775)	6,388 (636)	25,353 (759)	24,808 (789)	545 (274)	107,552 (769)	101,709 (772)	5,843 (726)
Literate (without educational level)	33,547 (193)	32,921 (202)	626 (62)	5,043 (151)	4,951 (157)	92 (46)	28,504 (204)	27,970 (212)	534 (66)
Primary or Junior Basic ..	70,299 (406)	68,522 (420)	1,777 (177)	16,237 (486)	15,931 (507)	306 (154)	54,062 (386)	52,591 (399)	1,471 (183)
Matriculation and above ..	29,059 (168)	25,074 (153)	3,985 (397)	4,073 (122)	3,926 (125)	147 (74)	24,986 (179)	21,148 (161)	3,838 (477)

13. More than three-fourths of the total unemployed are literate or educated. The proportion of illiterate unemployed is less than 25 per cent. in both, rural and urban areas.

14. The proportions of illiterate and literate unemployed among males are more or less the same in rural and urban areas. The proportions of "illiterate"

and "literate and educated" among unemployed females are, however, widely different in rural and urban areas.

15. In the urban areas the proportions of the two groups of unemployed aged 15 and above, viz., (i) persons seeking employment for the first time and (ii) persons employed before but now out of employment and seeking work, to total unemployed in the State are more or less the same as will be seen from the following table :—

Age-group	Total Unemployed			Persons seeking employment for the first time			Persons employed before but now out of employment and seeking work		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10
Total	100	100	100	50	50	57	50	50	3
15-19	100	100	100	70	70	79	30	30	21
20-24	100	100	100	62	61	70	38	39	30
25-34	100	100	100	38	38	47	62	62	53
35+	100	100	100	16	16	14	84	84	86

16. The proportion of the first type of unemployed decreases with increase in age while that of the second type increases. It is, however, significant that even in the age-group 15-19, 30 per cent. of the unemployed are persons employed before but now out of employment.

17. Distribution of 1,000 unemployed persons aged 15 and above by educational levels for total, males and females in urban areas is as follows :—

Educational Level	Total Unemployed		
	Persons	Males	Females
Total	1,000	1,000	1,000

Literate (without educational level) ..	204	212	66

N = Negligible

18. The largest proportion (387) is in the group Primary or Junior Basic. The second largest group is of illiterates and the third of literates without educational level.

19. The large proportion under "Others" below the indention "Technical Degrees", as compared to the subjects specifically listed, like Engineering, Medicine, etc., is explained by the fact that the former group includes all B.Sc.s, M.Sc.s, etc., in general science subjects like Chemistry, Physics, Mathematics, Botany, Zoology, Microbiology, Geology, Geophysics, etc., who usually outnumber to a considerable extent the degree holders in the subjects specifically listed.

20. A subsidiary table (B-VIII—Part A.1) showing distribution by educational levels of 1,000 males and females who are unemployed in each age-group in Urban Areas has been prepared from Table B-VIII—Part A. It is included in Part I-C of the Maharashtra Census Report.

21. A subsidiary table (B-VIII—Part B.1) showing distribution by educational levels of 1,000 males and females who are unemployed in Rural Areas has been prepared from Table B-VIII—Part B. It is included in Part I-C of the Maharashtra Census Report.

**TABLE B-IX
PERSONS NOT AT WORK
CLASSIFIED BY SEX,
BROAD AGE-GROUPS
AND
TYPE OF ACTIVITY**

EXPLANATORY NOTE

This table presents the distribution of non-workers by the following eight types cross-tabulated by sex and four broad age-groups :—

- (1) Full-time students or children attending school, who do no other work, such as make articles at home for sale, nor even help part-time in their own family cultivation, industry, trade or business ;
- (2) Persons engaged in unpaid home duties (like housewives or other adult females) who do no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business ;
- (3) Dependants, including infants and children not attending school, persons permanently disabled from work because of illness or old age, etc. ;
- (4) Retired persons who are not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend and other persons of independent means for securing which they do not have to work and who do no other work ;
- (5) Beggars, vagrants, independent women without indication of source of income and others of unspecified source of existence ;
- (6) Convicts in jail and inmates of penal, mental or charitable institutions. (Under-trial prisoners are shown as workers if they used to work before they were apprehended) ;
- (7) Persons who have not been employed before but are seeking employment for the first time ; and
- (8) Persons employed before but now out of employment and seeking employment.

2. The above classification of non-workers is based on the answer recorded against Question 12 of the Individual Slip in respect of non-workers at the 1961 Census.

3. The broad age-groups used in the table are the same as those used in Tables B-I and B-II, viz., 0—14, 15—34, 35—59 and 60 and over. The figures in respect of persons who did not return their ages have been shown separately under “age not stated”.

4. Out of the total population of 39,553,718 in Maharashtra State, 20,605,237 or 52·1 per cent. are non-workers. The proportions of non-workers among males and females are 42·9 per cent. and 61·9 per cent. respectively. Out of every 1,000 total non-workers, 425 are males and 575 females.

5. The numbers of non-workers in Maharashtra and their proportions in each of the eight types are shown below :—

Type of Non-worker	Population	Proportion out of total non-workers
Total Non-workers ..	20,605,237	100·00
Full-time Students or Children attending school ..	4,685,292	22·74
Persons engaged only in Household duties ..	4,257,066	20·66
Dependants, Infants and Children not attending school and persons permanently disabled ..	11,247,194	54·58
Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means ..	133,269	0·65
Beggars, vagrants, independent women without indication of source of income and others of unspecified source of existence ..	72,229	0·35
Inmates of penal, mental and charitable institutions ..	31,493	0·15
Persons seeking employment for the first time ..	90,586	0·44
Persons employed before but now out of employment and seeking work ..	88,108	0·43

6. The first three groups, viz., (i) full-time students, (ii) persons engaged in household duties and (iii) infants, children and dependants, etc., account for 97·98 per cent. of the total non-workers. The “Unemployed” and “Pensioners, rentiers, etc.” are 0·87 per cent. and 0·65 per cent. respectively.

7. The distribution of 1,000 non-workers in each sex by broad age-groups is as shown below :—

DISTRIBUTION OF NON-WORKERS BY AGE-GROUPS

	All Age-groups		0—14		15—34		35—59		60+		Age not stated	
	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13
Total	1,000	1,000	856	606	95	209	16	118	32	66	1	1
Rural	1,000	1,000	909	691	51	136	10	95	29	77	1	1
Urban	1,000	1,000	742	457	191	337	30	158	36	47	1	1

8. Out of every 1,000 male non-workers in the State, 856 are in 0—14 age-group, 111 are in the two age-groups 15—34 and 35—59 and 32 in the age-group 60 and over. The proportion of female non-workers in 0—14 age-group to total female non-workers is less than the corresponding proportion for males, while in the other three age-groups the reverse is the case. The higher proportions in the later age-groups among females are due to the inclusion of a considerable number of housewives in those age-groups as non-workers. The proportion of

non-workers in the age-group 0—14 is higher in rural areas than in urban areas, both for males and females. Proportions of non-workers in all the other age-groups are consequently lower in rural areas than in urban areas. These rural-urban differences arise from the concentration of high school and college students, retired persons and non-working rentier classes in urban areas.

9. The distribution of 1,000 non-workers in each sex by eight types for total, rural and urban areas is as shown below :—

	Total non-working population		Full-time students		Household duties		Dependants, infants and disabled		Retired, rentier or independent means		Beggars, Vagrants, etc.		Inmates of penal, mental and charitable Institutions		Persons seeking employment for the first time		Persons employed before but now out of employment and seeking work

N = Negligible.

10. Proportions of male and female dependants, infants, etc. out of total male and female non-workers are higher in rural areas than in urban areas. The proportions of male and female full-time students are naturally higher in urban areas. Similarly, the proportions of pensioners and rentiers are higher in urban areas.

11. The number of unemployed is only 178,694 or 0.87 per cent. out of the total of 20,605,237 non-workers. Among males the proportion of (i) persons seeking employment for the first time as also of (ii) persons employed before but now out of employment and seeking

work, is only about one per cent. It is, for both the types, 0.3 per cent. in rural areas and 2.4 per cent. in urban areas. For females, the proportions of these two types are negligible both in rural and urban areas.

12. Full-time students, persons engaged in household duties and unemployed are three important types of non-workers. Table B-VIII provides detailed distribution of unemployed persons by educational levels. The distribution of the other two types by sex and age-groups for total, rural and urban areas is as follows :—

13. On account of the better facilities for higher education, the number of full-time students continuing higher studies is greater in urban areas than in rural areas. This accounts for the higher proportion of both male and female students in the age-group 15—34 in the urban areas. In the rural areas, both male and female students are restricted mostly to the age-group 0—14. The proportion of full-time students in the

age-group 15—34 in both rural and urban areas is higher among males than among females. Females do not go in for higher education as much as males do.

14. The proportions of full-time students, persons engaged in household duties and other non-workers out of the total non-working population are as follows :—

Age-group	Total non-workers			Full-time students			Household duties			Other non-workers

15. The proportion of females engaged in household duties is thrice as large as female full-time students. In the school-going age-group of 0—14, however, the proportion of female students is greater than that of females doing household duties.

16. The figures 401 males and 298 females appearing as “full-time students in the age-group 35—59” in Table B-IX need not be considered as high, either for males or for females. There are numerous Training Schools and Colleges for Teachers and Craftsmen and training or refresher courses for village level workers, Talatis, Patwaris, Gram-Panchayat or Co-operative Societies' Secretaries in the State. These do have full-time students above the age of 35. They attend such training full-time and have, therefore, been enumerated as full-time students and not as workers under any category.

17. In the State, there are only 16,628 males against 4,240,438 females engaged in household duties. The definition given in respect of this category may raise certain doubts as to the inclusion of males in this category. The instructions to enumerators were to write “HW” for a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as attending to family cultivation, industry or business, etc.

18. Apparently, a person attending to matters relating to the family estate, without actually engaging himself in any work, is also excluded from this category, for he would appropriately go under the category, “Rentiers, etc”. If so, the only home duties which remain for a person to attend to are cooking, upkeep or cleaning of the house, baby-sitting, purchases for the household and such other minor duties. Baby-sitting and guarding of the house during the absence of elders, when they go to farms for agricultural operations, are duties commonly assigned in rural areas to boys (and also girls) of ages 6 to 14 who do not attend school. Table B-IX shows figures for male “HW” in a majority of the districts under this age-group. In the circumstances, the numbers of males engaged in household duties do appear to be reasonable.

19. From columns 7 and 8 we get the number of full-time students in the age-group 0—14. Similarly, from Table C-III, presented in Part II-C of the Maharashtra Census Report, we get the figures for literates in the age-group 5—14. No doubt the full-time students classified under the age-group 0—14 would be nearly wholly confined in actual fact to the age-group 5—14. The two groups are, however, different in composition. The first (B-IX) relates exclusively to non-workers attending school full-time, while the second includes workers and non-workers of all categories, viz., students, dependants, housewives, rentiers, etc. The differences between the two sets of figures mentioned of above are thus likely to vary from district to district depending upon—

- the age composition of population by single year ages in the age-group 5—14 ;
- the schooling facilities available for primary and secondary stages ;
- the extent to which children of ages 5, 6, 7 or 8 are sent to school ;
- the extent to which students leave the schools after attaining literacy ; and
- the economy of the district including employment opportunities available to literate children, which will encourage them to leave schools.

All the above factors would affect the number of full-time students in varying degrees and no strict comparison is possible between the two sets of figures.

20. The following three subsidiary tables have been prepared from Table B-IX. They are included in Part I-C of the Maharashtra Census Report :—

- B-IX.1—Number per 1,000 of population aged 15+ and of population of each age-group 15—34, 35—59, 60+ and “Age not stated” who are unemployed, separately for persons, males and females.
- B-IX.2—Distribution of 1,000 persons not at work by age-groups.
- B-IX.3—Distribution of 1,000 persons not at work by sex and type of activity.
