During 1961 Census, the following sets of tables were prepared.

1. General Population Tables
2. Economic Tables
 - (a) General Economic Tables
 - (b) Household Economic Tables
3. Social and Cultural Tables
4. Migration Tables
5. Housing and Establishment Tables
6. Scheduled Castes and Scheduled Tribes Tables.

The present volume contains the first two sets of tables *viz.*, General Population Tables and Economic Tables.

I am greatly indebted to Shri Ashok Mitra, I.C.S., Registrar General of India, for his help and guidance. Shri K. D. Balal, I.A.S., Central Tabulation Officer has always guided us at every stage in the preparation of this volume. I am also grateful to Shri B.M. Gupta, M.A., our Tabulation Officer who was primarily responsible for the entire tabulation process and under whose able guidance these tables were processed. All the explanatory notes were ably prepared by Shri K. C. Sehgal and Shri B. M. Gupta to whom also my thanks are due.

My thanks are also due to Sarvshri M. L. Sharma, M. R. Gupta and S. D. Tripathi, the Statistical Assistants and other members of Tabulation Office who helped in the preparation of all these tables. In particular Shri M. L. Sharma did commendable work in preparing the tables and seeing them through the Press expeditiously.

PREFATORY NOTE
CENSUS OPERATIONS, 1961

Declaration for the taking of the 1961 Census

Notification No. 2/115/59-Pub.I, dated 5th December 1959, issued by the Government of India, Ministry of Home Affairs, stated as follows:

"In pursuance of Section 3 of the Census Act 1948 (XXXVII of 1948) the Central Government is pleased to declare that a Census of the population of India shall be taken during the year 1961. The reference date for the Census will be sunrise on the 1st March 1961."

The period of enumeration

The 1961 Census count was spread over a period of 19 days. During the 19 days between February 10 and sunrise of 1st March 1961, the census enumerator was required to visit all the households under his charge for purposes of enumeration. He was to follow this up by a revisional round of all the households during the five days i.e., from 1st to 5th March 1961, during which period he was required to make corrections for any birth or death that had occurred between the time that he visited a household and the sunrise of 1st March 1961. The revisional round was as necessary as the first round for the simple reason that the reference date was the 1st March, 1961, that is to say, all persons living on the sunrise of the 1st March were to be included in the census count and all those who died before the sunrise of 1st March, 1961, were to be struck out, even if counted during the first round.

Whom to enumerate

The enumerator visiting a household was required to enumerate all persons who were normally resident in the household i.e., those who lived in the household and also those who had recently become members of the household through marriage or birth or other vital social or domestic ties at the time of the visit. The enumerator was also required to enumerate all persons who were normal residents in the household even if they were absent at the time of his visit provided they left the household on or after the 10th February 1961, or if they left earlier than 10th February 1961, were likely to return before the sunrise of 1st March 1961. Further, the enumerator was also required to enumerate a visitor, a boarder, a guest found in the household at the time of his visit if he had not been enumerated before and if he was away from his household between the 10th and 28th February 1961 and warn him not to permit any other enumerator to enumerate him even if he went back by 1st March 1961.

Enumeration of the houseless persons

The Census of houseless persons in the rural areas and in small towns was to be undertaken on the night of 28th February 1961. In big cities and towns where there was reason to believe that there was a large houseless population, the census of houseless persons was to be conducted over a period of more than one night. These cities were divided into well-marked sectors and special enumerators were appointed for the purpose. The help of social welfare organisations like the Bharat Sewak Samaj etc., and also of the local police was taken for this Census.

Enumeration of inmates of institutional households

Inmates of institutional households like hospitals, boarding schools, hostels, hotels and other similar institutions were to be enumerated separately in the institutions themselves.

Pre-testing the census schedules

The first draft of the schedules and houselist and instructions was drawn up by the office of the Registrar General in 1958 and was pretested with the help of the Directors of State Statistical Bureaus in the various States. The pretest was held during February-March 1958. The object of the pretest was to ascertain the suitability and convenience of the schedules, their size, form, usability of concepts and definitions, the suitability of abbreviations and to obtain information on time requirements.

Second pre-test and the final drafts of the Census Schedules

Based on the experience of the first pretest certain modifications were made and a second draft was prepared by which time the Superintendents of Census Operations had come into position. Opportunity was therefore taken to have the second draft pretested by the Census Superintendents. This not only enabled them to understand the intricacies of the questionnaire and the houselist, but also gave them opportunity to conduct actual enumeration in the field before final schedules were drawn up. This pretest was conducted through the normal administrative channel and most persons of the calibre of actual enumerators (mostly school-teachers) were used. A final draft of the Schedules and the Houselist was then prepared which was discussed and finalised at a meeting of the State Census Superintendents in September-October, 1959. The final forms of the Houselist, the Household Schedule and Census Population Record and the Individual Slip are printed below:

Instructions to the enumerators for filling in these forms and schedules are given in Annexure A. The household schedule was designed to collect data on the chief economic activities of the households in the country viz., cultivation and household industry. This was a new feature of the 1961 Census. It was considered that in the case of countries of such economic status as India where not all the goods produced enter the money market and where much of the goods produced are consumed by the family itself, collection and analysis of information purely on the basis of individuals might lead to misleading conclusions unless such information was supplemented by information concerning economic activities of the household as an entity.

In the Household Schedule, data on the extent of land cultivated by a household either owned or held from Government or held from private persons or institutions for payment in money, kind or share, land given to private persons for cultivation for payment in money, kind or share, nature of household industry conducted by a household and the duration of the industry in a year along with number of family workers and hired workers engaged in cultivation or household industry or in both was to be collected. At the back of the household schedule was a Census Population Record as counted at the Census in each household giving the essential information for each individual enumerated in the household, like name, sex, relationship to head of household, age, marital status and description of work, if working.

So far as individuals were concerned, the 13 questions given in the individual slip were asked.

The 'houelist' was supposed to collect some essential housing data and data relating to industrial establishments etc. As regards housing data, it was to relate to different categories of numbers of occupied houses, tenure status of households, the material of wall, material of roof of Census houses and number of rooms occupied. As regards industrial establishments, data was to be collected regarding the name of the establishment or proprietor, name of product (s) or repair or servicing undertaken, average number of persons employed during the week preceding the houselisting (including proprietor of household members, if working) and kind of fuel or power, if machinery was used.

Formation of Census Tracts, Charges, Circles and Blocks

The first step towards carrying out the actual Census Operations was to delimit the entire Union Territory of Delhi into tracts, charges, circles and blocks. The entire area was first divided into four main tracts, namely New Delhi, Delhi Cantonment,

Delhi Municipal Corporation Urban area and Delhi Municipal Corporation Rural area. The urban area of the Municipal Corporation was then divided into seven Zones, which were coterminous with the seven administrative zones of the Corporation. These tracts and zones were then divided into charges, the size of each charge being so kept that it became a viable unit capable of being conveniently managed by one officer. The charges were further sub-divided into circles and the circles into blocks, a block being the lowest unit which one enumerator had to cover. An average of five or six blocks formed a circle and each circle was put in charge of a Supervisor. Each enumerator was expected to cover, on an average, 750 persons in rural areas and 600 persons in urban areas.

The circles and blocks were mainly carved out with the help of the electoral rolls supplemented by personal visits to various localities of a few experienced men in the office who had previously worked in the elections and thus possessed the latest knowledge about the geography and housing in Delhi. The circles and blocks were thoroughly revised as a result of experience gained from house-numbering and houselisting operations. Help of all the maps procured from the various authorities was also taken. For each charge, a separate booklet was printed in which one page was devoted to each circle. Each line in that page gave particulars of one block in which full description of the houses, along with their number and location etc., was given.

There were no boundary changes in the area of the Union Territory since the last Census, and no resultant complications.

Census Calendar:

After the formation of charges, circles and blocks, our most important task was to finalize the Census Calendar. This was done in February 1960 and was duly approved by the Registrar General on 5th March 1960. The Census Calendar is reproduced below:

Housenumbering and Houselisting:

Housenumbering and houselisting was done simultaneously. In the walled-city area where old numbers fixed by the erstwhile Municipal Committee existed on all the houses, they were adhered to for purposes of Census. In new colonies built by Government and private coloniers, the houses were numbered block-wise. It was considered convenient and practicable to adhere to those numbers in those localities. In New Delhi and Delhi Cantonment, all the houses bore Municipal numbers which were adopted. In those areas where the numbers did not exist, or if they did exist, they were very unsatisfactory and defective, in such cases temporary numbers were given by the enumerators.

There were two courses of training. One for the housenumbering and houselisting which was done

well ahead of the main Census Operations and consisted of giving oral instructions and practical demonstrations. The second course of instructions for actual enumeration commenced from October 1960 and continued up to the enumeration period.

Unique features of the 1961 Census

A few unique features of 1961 Census are listed below :

(i) As required by the instructions issued by the Registrar General, maps were prepared down to the block level so as to ensure cent-per-cent coverage and facilitate the work of enumerators.

(ii) For the first time in the history of Indian Census, it was decided to collect comprehensive housing data for the country as a whole as well as for the different States and their cities, towns and villages. A form known as the 'Houselist' was prescribed which was finalized after two "pretests" and after a thorough discussion in a meeting of the Census Superintendents. The houselist was supposed to collect data regarding the number of buildings, houses and households in the country and also the number of establishments, workshops and factories in each city, town etc. It was also expected to bring out the number of families occupying one room, two rooms and so on and also of families occupying only a part of a room. The data thus collected was tabulated in accordance with the Tabulation Plan prepared with great care and labour in the office of the Registrar General. The Housing tables (E-series tables) have since been prepared and analyzed and form the subject of a separate volume 'Census of India 1961, Delhi. Report on Housing and Establishments.

(iii) Another innovation introduced for the first time during the 1961 Census was the "Household Schedule" and the "Census Population Record". The Household Schedule was to collect information regarding the different tenures of cultivated land (if any) held by a household and also the household industry (if any) in which that household was engaged. On the back of this Schedule, the particulars of each member of the household were to be entered. The idea behind the Census Population Record was that if at any later date it becomes necessary to make the population record up-to-date, it could be done without much difficulty. If, for instance, it is decided to take a sample Census during any year, the Census Population Record could be of great help.

(iv) The tripartite division of the economic status into self-supporting persons, earning dependents and non-earning dependents was done away with. Instead, work was made the sole criterion for the assessment of the economy of the country. The

entire population was broadly divided into 'workers' and 'non-workers'. Workers were classified in terms of Industrial Classification into nine categories as given in the Primary Census Abstract.

(vi) Workers and non-workers were also classified by broad age groups as follows:

0-14
15-34
35-59
60+

(vii) Special Tables were prepared for Scheduled Castes. They were classified by literacy, industrial category of workers and non-workers and by age group and marital status.

(viii) For big cities like Bombay, Calcutta, Delhi etc., special migration tables were prepared which are expected to throw out data of immigrants regarding their sex, age distribution, religion, industrial classification of workers, occupation and employment status, marital status and duration of residence in the State.

(ix) For the first time in the 1961 Census, non-workers were divided into eight categories as given in Table B-IX.

Annexure-A

CENSUS OF INDIA 1961 INSTRUCTIONS TO ENUMERATORS

The 1961 Census count will relate to the sunrise of 1st March, 1961. The count will be spread over a period of 19 days, beginning on the 10th February and ending on the 28th February, 1961. During this period you should visit every household in your block for enumeration. On the night of 28 February you will have to go round your enumeration block and enumerate all persons who are houseless. (In large cities the enumeration of houseless persons will have to be undertaken in a different manner for which more elaborate arrangements will be made). During the period 1st March to 3rd March you will have to pay a revisional round to every household and verify that your earlier work of enumeration has been completed in every respect. If during this revisional round you find that a birth has taken place in any household between the time of your first visit and the sunrise of 1st March, 1961 you will have to fill up a new slip for this birth; if there has been a death in any household during the same period you will have to cancel the slip of the dead person; if there is a visitor in any household who has come to stay during the same period and has not been enumerated elsewhere, you will have to fill up a new slip for this visitor. But you will not have to take notice of any birth or death or visit occurring after sunrise of 1st March, 1961.

You will have been supplied by your Supervisor household schedule forms in books of 50 or 25 each for recording information relating to the household as a whole and enumeration pads consisting of 100 or 25 slips each to record information of individuals living in the household. Instructions for filling up the household schedule and the individual slips are given in this booklet. You should carefully observe them when filling each household. You can fill up the household schedule first or the enumeration slips first but for every household you should fill up both before you leave the household and also fill up the Census Population Record at the back of the household schedule.

A. Instructions for filling up the Household Schedule

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You

should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'un-related persons living together'. In such a household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the week-days in town and spends the week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the Head of the household marked "S.C./S.T." If the Head of the household is a member of a Scheduled Caste or a Scheduled Tribe obtaining in your state or in your district you should write S.C. or S.T. as the case may be within the parallelogram. If the Head of the Household does not belong to Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1 (i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1 (i) and 1 (ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land', Category

1 (i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession (ii) with rights of permanent and heritable possession, but without the right of transfer, and (iii) temporary or conditional leases of any kind with the Government. Category 1 (ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer, (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
 - (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);
 - (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
 - (d) tenants holding land on temporary leases who are liable to ejectment; and
 - (e) areas held on condition of rendering service either to a village community or to Government. (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and
- (iv) the following:—
- (a) land taken for a fixed amount of money,
 - (b) land taken for a fixed amount of produce,
 - (c) land taken for a share of the produce,
 - (d) land for which money is paid partly in one and partly in any other form mentioned above,
 - (e) land held free of consideration.

Category 2—Land given to private persons, for cultivation for payment in money, kind or share will include the classifications mentioned in category 1 (ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the

household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly three-fold:

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of

the goods offered for sale from the household should be manufactured or processed by members of the household.

- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.
- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry

of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholtime employment during last working season or should be in wholtime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to 'Total'. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of

Households engaged in Household Industry put 'X' in the columns relating to, Household Cultivation only, and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

B. Instructions for enumerating individual members of households.

I. GENERAL

1. Enumerate all persons who are normally resident in the household, i.e., those who live in the household and also those who have recently become members of the household through marriage or birth or other vital social or domestic ties and are present at the time of your visit.

2. Enumerate also all persons who are normal residents in the household even if they are absent at the time of your visit, provided they left the household on or after the 10th February, 1961, or if they had left earlier than 10th February, 1961, are likely to return before the sunrise of 1st March, 1961.

3. Enumerate a visitor, a boarder, or a guest found in the household at the time of your visit, if he had not been enumerated before and if he will be away from his household between the 10th and 28th February, 1961, and warn him not to permit any other enumerator to enumerate him even if he goes back by 1st March, 1961.

4. Do not enumerate pavement dwellers or others who do not form part of the household, when you are enumerating the households. These along with persons who do not normally reside in houses, i.e., members of wandering tribes, tramps, sadhus, etc., would be separately enumerated on the night of the 28th February and on the 1st and 2nd March, 1961.

5. Each individual has to be enumerated in one slip. Before commencing enumeration of an individual make sure to fill the Location Code in each case. The Location Code in the slips will be the same as in the household schedule to which the individuals relate.

6. The questions have been briefly printed in the slips, but only briefly, and you should study the detailed question forms and instructions for answering them without which you will be liable to miss some of the range and implications of the questions. You

should ask the questions in the order in which they are given in the slips and proceed to record the answers in their given order. You should make use of the abbreviations recommended in these instructions for recording the answers to the various questions. All abbreviations required to be entered within the geometric designs should be written well within the designs.

7. Make repeated enquiries about new born babies and very young children for they are liable to be missed because they neither talk nor walk and no meals are usually cooked for them.

8. Before leaving one household for the next make doubly sure that all the persons that are to be enumerated in the household have been enumerated. As soon as you have completed the enumeration of the household fill up the Census Population Record at the back of the Household Schedule for that household before you proceed to the next household. Strike the total for the number of males and females in the household and check it with the number of enumeration slips used before you sign the Population Record.

9. You should revisit every household in your block during the period of final check (1st to 3rd March) when you should enumerate every birth that has taken place in the household since your visit but before sunrise of 1st March. You should cancel the slip for any death that might have taken place since your last visit but before sunrise of 1st March by drawing a bold line diagonally across the slip and write DEATH along the diagonal line. You should enumerate any visitor who may have arrived to stay since your last visit and who says he has not been enumerated anywhere else. But you should not take notice of any birth or death or visit occurring after sunrise of 1st March, 1961. After your revisit if you have added any new slip or cancelled any slip already prepared you should make corresponding changes in the Census Population Record at the back of the Household Schedule.

10. As soon as you have completed a pad, you should fill up the enumerator's abstract on the cover of the pad. After you have completed the enumeration of your block and filled up all the abstracts in the pads, you should total up your figures and prepare your abstract for your entire block and hand it over to your supervisory along with your pads.

11. Under the Census Act, every person is legally bound to furnish you with the information you need for recording your answers. You must not ask information on any matters not necessary for the purposes of the census, for example, the amount of any person's income. Nor must you disclose to any unauthorised person any information given to you or the results of the enumeration. All census entries are confidential and cannot be admitted as evidence in any civil proceeding whatever or in any criminal proceeding other than a prosecution for a census offence.

II. Instructions for Filling up the Slips.

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household are left out. Please make repeated enquiries about infants and very young children for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grandchildren, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

Location Code

Write the Location Code of the household in each slip. For instructions please see Section A above.

Q. 1(a) Name

Write the name of the person enumerated. If a woman's name is not given out describe her as 'so-and-so's mother, wife or daughter'. If a woman does not take the name of a person's husband and that husband's particulars have to be recorded write 'so-and-so's husband'.

For newly born infants who have not yet been given a name write 'Baby' and write 'father's or mother's name'.

Q. 1(b) Relationship to the Head of the household

In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the Household' has been fully explained in Part A. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

If on the check or revisional round between the 1st and 3rd March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him, by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

In the case of places like messes, boarding houses, chumneries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of

the household. Other members should be recorded as 'unrelated' in this question.

Q. 2 Age in completed years last birthday.

Write age in years completed last birthday. For infants below one year of age, write 'O'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by the referring to historical incidents or religious events etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital Status

For never married	write	NM
Married	write	M
Widowed	write	W
Separated or Divorced	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4(a) Birthplace

- If born in village or town in which enumerated write PL
- If born in another village or town of district in which enumerated write D
- If born in another district in the State of enumeration write name of district
- If born in another State in India write name of district and State if name of district is known; otherwise write name of State.
- If born in a country outside India e.g., Pakistan or any other country write name of country.
- Persons born at sea or in air or in railway carriages or on road transport e.g., buses etc., should be entered as such.

Q. 4(b) Whether born in Village or Town

- If born in a village write R
- If born in a town which is considered a town at the present time even if it was not so considered at the time of birth write U

Q. 4(c) Duration of Residence

- For a person born in village or town or city in which enumerated write X
- For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration write the number of completed years this person has been in the village/town/city of enumeration
(Do not take into account periods of temporary absence on leave or holiday or tour or business.)
- If the duration of residence is less than one year write O
- If the duration of residence is one year or over write the actual number of completed years of residence.

Q. 5(a) Nationality

- For Indian nationals write I
- For other nationals write the nationality in full

Q. 5(b) Religion

For Hindu	write	H
Muslim	write	M
Christian	write	C
Jain	write	J
Buddhist	write	B
Sikh	write	S

For others write the answers actually returned.

Q. 5(c) Scheduled Castes & Scheduled Tribes

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 Literacy & Education

I. Illiterate or Literate

For a person

1. Who can neither read nor write or can merely read but cannot write in any language write O
2. Who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L.

Q. 7 (a) Mother Tongue

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7(b) Any Other Language(s)

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) reported by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Qs. 8 to 11 Working

These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental

institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work.

Persons under-training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

Q. 8 Working as Cultivator

For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of

17

land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share such as share of the produce (agricultural labourer) will not be treated as cultivator in this question.

Q. 9 Working as Agricultural Labourer

Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land for wages in money, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10 (a) & 10(b) Household Industry

If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against questions 10(a) and (2) the nature of the Household Industry against question 10(b). Otherwise put X in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c) If Employee in Household Industry

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E. E. For all others put X.

The following examples will illustrate how

questions 10(a) to 10(c) should be filled up for persons working at Household Industry:

The following examples will illustrate how

Q. 10—Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) if employee
1. Spinning yarn	Spinning yarn in Ambar Charkha	X
2. Dying and pining yarn	Handloom weaving	X
3. Threshing and cleaning grain	Flour making <i>chakki</i>	X
4. Labourer employed for crushing oil	Oil <i>ghani</i>	E.E.
5. Tempering and polishing implements	Blacksmithy making agricultural implements	X
6. Labourer employed for making and firing kiln	Earthenware pottery	E.E.
7. Throwing and Turning pottery	Earthenware pottery	X
8. Making wooden doors and windows	Carpentry	X
9. Filling gold ornaments with lac	Goldsmithy	X
10. Labourer working hosiery machine	Hosiery	E.E.
11. Keeping accounts	Hosiery	X
12. Polishing and Scraping metal	Electroplating	X
13. Labourer employed for putting iron hoop on cart wheels	Cartwheelwright	E.E.
14. Repairing of guns	Gunsmithy	X
15. Bee Keeping	Production of honey	X
16. Tending cattle	Livestock raising	X

Q. 11 Doing Work other than 8, 9 or 10.

If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a) Nature of Work

In the case of persons not working or who work only as cultivator or as agricultural labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b) Industry, Business, Trade, Profession or Service

In the case of a person who is working and the nature of whose own work has been recorded in Question 11 (a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11 (a), put an X in this question also.

Important points to remember in Questions 11 (a) and 11 (b).

1. Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in bracket after the full description.

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves:

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5. *Labourers*—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6. *Machine Operators*—Always state the kind of machine giving its recognised name, if any.

7. *Shop-keepers, Retail Dealers, Shop Assistants*—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship

and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. *Transport Workers*—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. *Services*—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name use that name. Managers, Foreman, etc., should be given the department/branch wherever applicable e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:—

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. *Domestic services*—In the case of any private servant e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. *Commerce*—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c) Class of Worker

For is person who is :

1. an <i>Employee</i> , that is, who hires one or more persons in his work described in Q. 11(a)	write	MR
2. an <i>Employee</i> , that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind	write	EE
3. a <i>Single Worker</i> , that is, who is doing his work described in Q. 11 (a) without employing others except casually, and without the help of other members of the family except casually. This will include workers working as members of co-operatives	write	SW
4. a <i>Family Worker</i> , that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind	write	FW

For a person for whom an 'X' is put in Qs. 11 (a) and 11(b) put an X in this question also.

Explanation:—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several person hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages, in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d) Name of Establishment

Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

Q. 12 Activity, if Not Working

This question will apply to a person NOT working.

Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :

1. For a full time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business write ST
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age write D
4. For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work write R

5. For a beggar, vagrant or independent woman without indication of source of income and others of un-specified source of existence write B
6. For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution write I
7. For a person who has not been employed before but is seeking employment for the first time write NE
8. For a person employed before but now out of employment and seeking employment write UN

Explanations—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Question 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

Q. 13 Sex

Write 'M' for Males; 'F' for Females.

For eunuchs and hermaphrodites, write 'M'.

A-SERIES TABLES (General Population Tables)

Introduction to General Population Tables

General Population Tables.

Tables I, II, III & IV follow the 1951 model. Table II gives the variation for sixty years while the 1951 Table gave variation only for fifty years. The corresponding Table to Table A—V of the 1951

Census has been included in the Economic Tables. Table A-III in 1951 was for Villages and Towns whereas in 1961 it is for villages only. Table A-IV in 1951 gave data for 50 years; in 1961 the data is given for 60 years.

A-I AREA, HOUSES AND POPULATION

TABLE A-I
AREA, HOUSES AND POPULATION

FLY-LEAF

Changes in Area from 1901 to 1961 :

Until 1901, Delhi was one of the five administrative divisions or Commissionerships of Punjab, the other four divisions being Jullundur, Lahore, Rawalpindi and Multan. The districts included in the Delhi division were Hissar, Rohtak, Gurgaon, Delhi, Karnal, Ambala and Simla.

This state of affairs continued till the next Census of 1911. Towards the end of that year, i.e., on the 12th December, 1911 King Emperor George V in his Coronation Darbar, held at Delhi, proclaimed that Delhi in place of Calcutta would thenceforward be the capital of the Indian Empire. In the following year, i.e. in 1912, the District was remodelled and placed under a separate local Government as a separate province. The position at the time of 1921 Census is explained at page 2 of the Census of India Vol. XV Punjab and Delhi, as follows:

"The present province of Delhi bears little relation to the old Punjab district of that name; that district consisted of three tehsils—Delhi, Sonapat and Ballabgarh; at the time of separation, the tehsil of Sonapat with an area of 448 square miles was transferred bodily to the Rohtak district whilst an area of 280 square miles from Ballabgarh tehsil was transferred to the Gurgaon District. The major portion of the old district, therefore, remained in the Punjab and only the Delhi tehsil and a small portion of the Ballabgarh tehsil went to the new province; later on the Delhi province was enlarged by the addition of some 46 square miles from the Meerut District of the United Provinces, and was thus brought to its present size of 593 square miles."¹

There was no appreciable change in the area of the province during the next decade. "The only transfer of area during the last decade amounting to less than a square mile was from the Meerut Division of the United Provinces as a result of the fixation of boundaries between the two provinces vide G.O. No. 5171/B. 173 dated 7th September, 1923."²

However, the Census Report of 1931, Vol. XVI Delhi Province, gives the area of the province, as supplied by the Survey Department, to be 573 square miles. In the 1941 Census the area of the whole of Delhi province was stated to be 574 square miles.³

While the difference of one square mile in the area between the two Censuses of 1931 and 1941 has been satisfactorily explained, no reason is forthcoming about the difference of about 20 square miles in the area between the Censuses of 1921 and 1931.

The position about the correct area figures during the 1951 Census was rather obscure. At page XV of the District Census Handbook for Delhi for 1951, the following observations occur:

"Area: The area of the State as constituted at present is 577.6 square miles according to the latest figures supplied by the Survey Department."

In the very first Table AI in the book, the total area in square miles is shown as 578.2 square miles. Again, in AI table as printed at page 2 of Part II of Vol. VIII 1951 (Punjab, Delhi etc.), the area of Delhi is shown as 538 square miles.

With a view to resolve this confusion, a reference was made to the Surveyor General of India and also to the Registrar General to communicate, if possible, the area figures for Delhi for 1951 as supplied by the Surveyor General. The Surveyor General's Department (The Director Map Publication) vide his letter No. T.D.O. 3566/66-B dated the 22nd June, 1962, has clarified the position in the following terms:

"It is confirmed that area figures 577.6 square miles for Delhi State were supplied by us in 1951. The increase in the area figures over the 1941 value was due to fresh planimetry on small scale maps. In 1951 when the area figures were being worked out, rapid changes in the administrative set up in the entire country were taking place and the alignment of all the administrative boundaries were not precisely known to us. Furthermore, it is to be noted that in the system followed by us, correction of area figures of a particular State or district cannot be done arbitrarily, unless it is possible to adjust such changes with the area figures of the adjoining states or districts. Hence no attempt was made to reconcile the slight difference between 1941 and 1951 values at that stage, since, in any case, the figures supplied were provisional. The use of suitable foot notes to this effect

(1) Census of India 1921, Vol. XV Punjab and Delhi page 2.

(2) Census of India 1931, Vol. XVI Delhi.

(3) Census of India 1941, Vol. XVI (Tables). In the fly-leaf it has been observed as follows: "The areas in Column 2 are those of the latest determination of the Survey Department. The difference of one square mile from the last Census is due to recalculation."

in the Census Report was suggested by this department in order to explain the proper position (*vide* para 7 of letter No. T-727/11-C-4 dated 19-2-52 addressed to the Registrar General of India from the Surveyor General of India).

"At present it is not desirable to reconcile the difference of one square mile between the latest and the 1941 area figures as the same will affect the area figures of adjoining states. Till the final figures are obtained from our latest large scale maps (after they have been surveyed) the latest figures as supplied by us may be accepted provisionally for census purposes.

"Area figures 578.2, 578 and 538 square miles were not supplied by us.

"It is not possible for us to show reasons for the difference between our figures and those supplied by the Revenue Authorities as the following are not known to us:

- (i) the scale and accuracy of the maps marked with boundaries used for calculating the areas by the Revenue Authorities, and
- (ii) the exact methods by which the area was determined by the Revenue authorities."

It would appear from the contents of the above letter that the area figures 578.2, 578 and 538 sq. miles quoted in various parts of the 1951 Census report are incorrect and that the correct area figure for the 1951 Census may be taken to be 577.6 sq. miles.

Coming to the present Census, the latest area figure as supplied by the Surveyor General for the Union Territory of Delhi is 573 square miles. The figure supplied by the Revenue authorities is 365589 acres which works out to 571.24 square miles.¹ The difference of 1.76 square miles, can, of course, be due to different methods of calculation. It is, therefore, proposed to give the area figure for the Union Territory of Delhi as 573 square miles.

Effect of States Reorganization in 1956.

The position remained the same till the Census of 1941, that is to say, Delhi continued to be a Chief Commissioner's province and no change came about in its area or boundaries. The advent of Independence and the Partition of the country also did not bring about any change in its set up. However, when the new Constitution came into force in 1950 and India became a Sovereign Democratic Republic, Delhi attained the status of a 'Part C' State with a separate Vidhan Sabha of its own. The office of the Chief Commissioner still remained intact, but he became more or less a Cons-

titutional head like a Governor in a Part A State, the real power having been transferred to the Chief Minister and his cabinet colleagues. The next change came in 1956 when as a result of the recommendations of States Reorganization Commission, Delhi became one of the Union Territories and came to be administered directly by the President, "acting, to such extent as he thinks fit, through an Administrator to be appointed by him with such designation as he may specify" (Sec. 239 of the Constitution of India). The Vidhan Sabha was dissolved with effect from 1-9-56 and the whole of the territory came to be administered by the Chief Commissioner who as its Administrator became directly responsible to the President for its administration.

Another far reaching change came in the administrative set up of Delhi in 1958 when the Delhi Municipal Corporation Act came into force and with it was born the Municipal Corporation for Delhi. The Corporation was set up on the model of the Bombay Municipal Corporation. All the local bodies functioning in Delhi (except the Cantonment Board and the New Delhi Municipal Committee) were merged together to form one large body which enveloped within its fold not only the major urban areas of Delhi but also the entire rural area of Delhi.

Apart from what has been stated above about the changes in the Constitutional set up for Delhi, there was no other change in area or jurisdiction as a result of the recommendations of the States Reorganization Commission.

Rural and Urban Population

Definition of town or city: "In the past Censuses no uniform criterion was adopted strictly for declaring an area as urban. For the first time in the 1961 Census a uniform criterion was adopted. All Corporations, Municipalities and Cantonment Boards were to be treated as urban. In other cases a place was to be treated as urban only if it had a population of not less than 5,000, had a density of 1,000 per square mile and had three-fourth of its population in non-agricultural pursuits. In exceptional cases where a place had definite urban characteristics, the criteria could be relaxed."²

In the Census of 1901, a town was defined to include any municipality, civil lines or Cantonment, and any place, with a population of not less than 5000 inhabitants, which had urban characteristics.³

In the Census of 1961, a town was defined as follows:

"A town includes:-

(1) every municipality; (2) all Civil Lines not included within municipal limits; (3) every Cantonment; and (4) every other continuous collection of houses inhabited by not less than 5000 persons, which the provincial Superintendent may decide to treat as a town for Census purposes."

NOTE: In dealing with questions arising under head (4), the Provincial Superintendent will have regard to the character of the population, the relative density of the dwellings, the importance of the place as a centre of trade and its historic associations and will bear in mind that it is undesirable to treat as towns overgrown villages which have no urban characteristics."

The definition of a town in the 1921 and 1931 Censuses was the same as that adopted in the 1911 Census. The definition of 'Town Group' has been given in Fly-leaf to Table A-IV.

Effect of Changes in definition:

So far as the Union Territory of Delhi is concerned, the change in definition of the town has not had any effect on the statistics of urban areas for 1951. Nor have any towns treated as such in the 1951 Census been eliminated or declassified in the 1961 Census. But as will be seen from a later part of the report, owing to the changed set up of Delhi with the formation of the Municipal Corporation the small local bodies of Najafgarh, Nerela, Civil Lines, West Delhi, Shahdara, Red Fort and Mehrauli were all merged in the Municipal Corporation. Again, owing to rapid urbanization of Delhi, quite a few villages which were treated as such in the 1951 Census, have been treated as urban areas because they were from time to time since the last Census urbanized by means of notifications issued by the Chief Commissioner. The names of these villages along with the notifications by which they were urbanized are given below:

Villages Oldanpur and Saqdarapur were the two villages in Shahdara area which were among the first to be urbanized.

The following villages became urbanized as a result of the formation of the South Delhi Municipal Committee by virtue of Chief Commissioner's Notification No. F. 11(40)/53-LSG (i) dated 4th March, 1954:

1. Hauz Khas
2. Humayun Pur
3. Mubarakpur Kotla
4. Masjid Moth
5. Sarai Kalekhan
6. Zamarudpur
7. Chiragh Delhi

8. Garhi Jharia Maria
9. Khirki
10. Toot Sarai
11. Sheikh Sarai
12. Kalu Sarai
13. Shahpur Jat
14. Kharera
15. Jia Sarai
16. Adhchini
17. Nangli Razapur
18. Basant Nagar
19. Joga Bai
20. Mohdpur-Munirka
21. Khizarabad
22. Okhla
23. Chack Chilla
24. Kilokri
25. Begumpur
26. Yaqutpur
27. Bahapur
28. Sarai Shahji

The following villages were urbanized as a result of the formation of the West Delhi Municipal Committee by means of Chief Commissioner's notification No. F. 11(36)/53-L.S.G. dated 1st November, 1954:

1. Basai Darapur
2. Shadipur
3. Khampur
4. Chaukhandi
5. Nangli Jalib
6. Tihar
7. Tatarpur
8. Posongi Pur

The following villages were urbanized as a result of Notification No. F.9/5/59-R&S dated the 28th December, 1959 issued by the Commissioner of the Municipal Corporation under Section 507 of the Municipal Corporation Act 1957:

1. Khureji Khas
2. Silampur
3. Karkar Doman
4. Azadpur
5. Gondli
6. Shakurpur

Urbanized due to the formation of the Corporation:

1. Charagah Janubi
2. Improvement Trust
3. Outside Narela N.A.C. (Mamurpur)

The following statement gives the progress in the number of towns from 1901 to 1961:

Statement of progress in the number of towns, 1901-1961

	1961	1951	1941	1931	1921	1911	1901
Delhi	3	10	9	3	1	2	2

It will be seen that up to 1921, the area administered by the Municipal Committee of Delhi (*i.e.* the walled city) was the only one treated as a town. In 1931, for the first time, New Delhi and Shahdara were added as new towns bringing the number of towns to three. In 1941, apart from the three towns mentioned above, the following six areas were treated as towns for the first time; bringing the total number of towns to nine:

1. Cantonment
2. Civil Lines
3. Narela
4. Mehrauli
5. Najafgarh
6. Fort Delhi

At the time of the 1951 Census, a new area known as West Delhi was added as a new town due to the urbanization of a few villages towards the West of Delhi and the formation of the West Delhi Municipal Committee to administer these areas. The number of towns at the time of the 1951 Census thus became ten.

The picture was entirely different at the time of the 1961 Census. In 1958 the Delhi Municipal Corporation Act came into force and with it was born the Municipal Corporation for Delhi which enveloped within its fold all the local bodies in Delhi except the New Delhi Municipal Committee and the Cantonment Board, *i.e.* Delhi Cantt. The number of towns was thus reduced to only three *viz.*, the D. M. C. (Urban) *i.e.* the urban area covered by the Municipal Corporation, New Delhi and Delhi Cantonment. All these 'three towns' grouped together were called as a 'Town group' for the purpose of the 1961 Census.

Further details about the towns will be found in the flyleaf to Table A-IV.

Definition of a village:

Unlike the definition of a town which has been slightly changing from Census to Census, the definition of a village has been uniform throughout the

various Censuses. The definition used was identical with that of an 'Estate' under Section III-1 of the Punjab Land Revenue Act 1887, which is as follows:

"'Estate' means any area (a) for which a separate record of rights has been made; or (b) which has been separately assessed to land revenue or would have been assessed if the land revenue had not been released, compounded for or redeemed; or (c) which the local Government may, by general rule or special order, declare to be an estate."

It should be noted that the definition applies to a demarcated area of land and not to a group of residential sites.

During the Census of 1961, however, Delhi no longer adopted the definition of the village as given in the Punjab Land Revenue Act 1887, but had its own simpler definition as given in Section 3(23) of the Delhi Land Reforms Act 1954, as follows:

"'Village' means any local area whether compact or otherwise recorded as a village in the revenue records of the Delhi State and includes any area which the Chief Commissioner may, by a general or special order published in the official Gazette, declare to be a village."

As a general rule, there is one residential site to each village with, here and there, a hamlet or a few temporarily occupied cottages built at a distance from the main village site for the protection of the outlying fields, or for the heeding of cattle adjacent to a grazing ground. According to the above definition, the scattered cottages will also form part of the main village.

Given below is a statement of the number of inhabited villages from 1901 to 1961:

	1961	1951	1941	1931	1921	1911	1901
Delhi	276	304	305	307	314	NA	NA

An attempt has been made in the following paragraph to reconcile the difference between the number of villages in the respective Censuses:

The set up of Delhi at the time of 1911 Census being quite different, it is not possible nor worthwhile to trace the history of the villages at the time of that Census.

The position at the time of the 1921 Census has been found in a manuscript record of the Census of the villages of Delhi taken at the time of the 1931 Census, a valuable record preserved in the office of the Deputy Commissioner, Delhi. According to the manuscript record there were 357 Revenue Estates in Delhi at the time of 1921 Census. Out of these, one Revenue Estate (Pachera) went out to U.P. by means of Notification No. 4626 R & A dated 24th July 1925 and 25 new Revenue Estates were added, the net increase being 24, and the total number of Revenue Estates at the time of the 1931

Census being 381 (357+24). The break up of these 381 Revenue Estates according to the 1931 Census Report for Punjab and Delhi, page 32 was as follows:

Inhabited villages	307
Uninhabited villages	49
Included in Delhi City	18
Included in New Delhi City	6
Included in Shahdara Town	1
Total	381

About the number of villages at the time of the 1941 Census, the Tables printed at that time give the number of inhabited villages in Delhi to be 305. Although no recorded explanation is forthcoming about the decrease in the number of two inhabited villages over the 1931 Census, it can be stated as a safe guess that the decrease was due to the inclusion of two villages of Shahdara, named Oldanpur and Saqdarpur in the Shahdara town. The position about the un-inhabited villages and the villages included in cities and towns presumably remained the same as at the time of the 1931 Census.

The 1951 District Census Handbook shows the number of inhabited villages at that time to be 304. According to the Revenue authorities there were 363 Revenue Estates in Delhi at that time, thus showing a decrease of 18 Revenue Estates over the previous Census. The reason for this decrease appears to be that the 18 Revenue Estates which in 1931 were included in Delhi City no longer retained the status of Revenue Estates as they became part of the Municipal area of Delhi. Deducting 304 inhabited villages from 363 Revenue Estates, we have to account for 59 villages. It has been found that out of these 59 villages, twenty-two were urbanized before 1951 and 37 were found deserted at that time. The two lists are given below:

Urbanised	Deserted
1. Aliganj	1. Garhi Khasru

The present position is as follows:

According to the Revenue authorities, the number of Revenue Estates at present is 363. Out of these, twenty-two as per list given above, were urbanized before 1951 and 47, as per details given below were urbanized between 1951 and 1961 bringing the total of urbanized villages to 69 and being a balance of 294 villages. Eleven new villages came into being which were not treated as new Revenue Estates (being built within the old Revenue Estates), but which were treated as separate villages for Census purposes. This brings the total of villages to 305. Out of these, five villages *viz.*, Sabapur, Jagatpur, Pur, Badarpur and Shinjarpur have a special feature inasmuch as their land exists on both sides of river Jamuna and each of these villages has been shown in two Revenue Estates *viz.*, Shahdara and Khadar. For Census purposes we showed each of these villages as one village, thus reducing the total number of villages by five and bringing the total according to us as 300.

According to the 1961 Census record, there were 24 deserted villages and 276 inhabited villages. According to the Revenue authorities the number of deserted villages is 26. Some villages shown as deserted according to the Revenue authorities were found at the time of the Census to be inhabited and *vice versa*.

The following statement gives the number of villages and towns in the State during 1961:

Total No. of villages Borne in Revenue Registers	No. of uninhabited villages.	No. of villages included in towns		No. of inhabited villages	No. of towns
		Fully	Partly		
1	2	3	4	5	6
363	24	69	9	276	3

The following nine villages have been partly included in towns. The names of the new colonies built in the areas of each of these villages are given against each village:

The following statement gives persons per occupied census house, number of females per 1,000 males, the percentage of rural and urban population to total population and the density per square mile for Delhi total, rural and urban for 1961.

Persons per occupied census house			No. of females per 1000 males		
T	R	U	T	R	U
1	2	3	4	5	6
7	7	8	785	847	777

T	R	U	T	R	U
7	8	9	10	11	12
100.0	11.3	88.7	4,640	670	18,714

The above statement brings to light that there are more females per thousand males in rural areas than in urban areas, the reason for which probably is that a large number of migrants flock to urban Delhi in search of employment, leaving their females behind. For the same reason the ratio of females to males in Delhi is lower than the All-India ratio of 941 females to a thousand males. Secondly, a large majority of Delhi's population is concentrated in urban areas, the population of rural Delhi being only 11.3%. Thirdly, the density of population of urban Delhi is roughly three times the density of rural Delhi.

AREA, HOUSES AND POPULATION APPENDIX III

Houseless and Institutional population

Fly-leaf

Houseless Persons : A houseless person is one who has no roof to sleep during night time. This class generally comprises of beggars, coolies, labourers and other pavement dwellers, who after roaming about the whole day begging or working, lie down at night on pavements or under the balconies of some public or private buildings or under railway or other bridges, and wait for the day to dawn so that they can resume their roamings once again.

Institutional Population : By institutional population is meant population living in penal, charitable or mental institutions hostels, hotels, jails, boarding houses, etc.

The following arrangements were made to enumerate Houseless and Institutional Population in Delhi.

The first step taken was to collect lists of places where houseless persons usually sleep at night. These lists were obtained from the Bharat Sevak Samaj and the Superintendents of Police of North, Central and South districts. Thereafter special enumerators

were appointed for these areas who were asked to carry out the census of houseless persons in their respective areas on the nights of 28th February and 1st March. For other areas the work was entrusted to block enumerators. Incidentally, the Bombay Anti-Beggary Act was applied to Delhi with effect from 1st March, 1961, the very night on which enumeration of houseless population was held. When the enumerators along with the police appeared to enumerate houseless persons consisting mostly of beggars, the latter fearing that the police had come to round them up ran away and hid themselves at places where they could not be located. This very probably led to greater under-enumeration than what might be normally expected.

For the enumeration of institutional population, special blocks were constituted and personnel was drafted from the staff of the institutions concerned except in the case of All India Institute of Medical Sciences, Safdarjang and Lady Hardings Hospitals outside enumerators had to be employed as these institutions did not spare their own men. Institutional population was enumerated in the entire enumeration period of 10th February to 28th February, 1961.

A-II. Variation in Population During 60 Years.

TABLE A-II
VARIATION IN POPULATION DURING 60 YEARS

FLY-LEAF

This table furnishes data on the area and population for the seven Censuses from 1901 to 1961 and the variation of population. This gives the growth of population from decade to decade and in the absence of reliable vital statistics data forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is also being presented from decade to decade.

It may be pointed at the very outset that there has been no transfer of areas from or to the Union Territory between 1951 and 1961 and therefore Appendix to table A-II is not applicable to it.

Population Growth.

The following table reviews the percentage variation of population from 1901 to 1961 :

	1901 to 1961	1951 to 1961	1941 to 1951	1931 to 1941	1921 to 1931	1911 to 1921	1901 to 1911
Total	555.12	+52.44	+90.00	+44.27	+30.26	+18.03	+1.98
Rural	+56.08	-2.52	+38.10	+17.72	+2.59	+4.62	-8.24
Urban	+1,001.93	+64.17	+106.58	+55.48	+46.98	+27.94	+11.13

It will be seen from the above statement that while the population of Delhi has always shown an increase since the turn of the century, the maximum increase occurred during the decade 1941-51 which was because of the large influx of refugees

from West Pakistan consequent on the partition of the country.

The graph on the opposite page represents the growth of Delhi and also the growth of urban and rural Delhi separately since 1901. It is based on the following table :

Growth of Population in Delhi

	1961	1951	1941	1931	1921	1911	1901
Delhi							
Total	2,658,612	1,744,072	917,939	636,246	488,452	413,851	405,819
Rural	299,204	306,938	222,253	188,804	184,032	175,907	191,704
Urban	2,359,408	1,437,134	695,686	447,442	304,420	237,944	214,115

The growth of population in Delhi—rural as well as urban—during the last six decades is traced on this graph. The shift of the seat of the British Government in 1911 to New Delhi, gave an impetus to the growth of population of Delhi. The curve rises steeply, however, only after the year 1941 and the rate of growth during the last two decades is almost constant as is revealed by the curve tending to be a straight line during this year.

The growth of the urban population follows broadly the same pattern as that of the Union Territory as a whole. But the curve in this case is comparatively more regular up to 1941 after which its slope, like that of the curve for the whole of Delhi Territory rises steeply.

The curve for the rural population also follows a similar pattern upto 1901. The net result, however, is a rise in the rural population over these sixty years. But the phenomenon of spectacular growth in the forties and fifties, which is the hallmark of the population trend in Delhi as a whole is markedly absent in the case of rural areas, so much so that the rural population has actually shrunk

during the last decade. The main reason for this shrinkage is that many villages have been urbanized, thus reducing the rural population.

Changes in the proportions of Sexes

The table given below indicates the changes in the proportion of the sexes, 1901 to 1961.

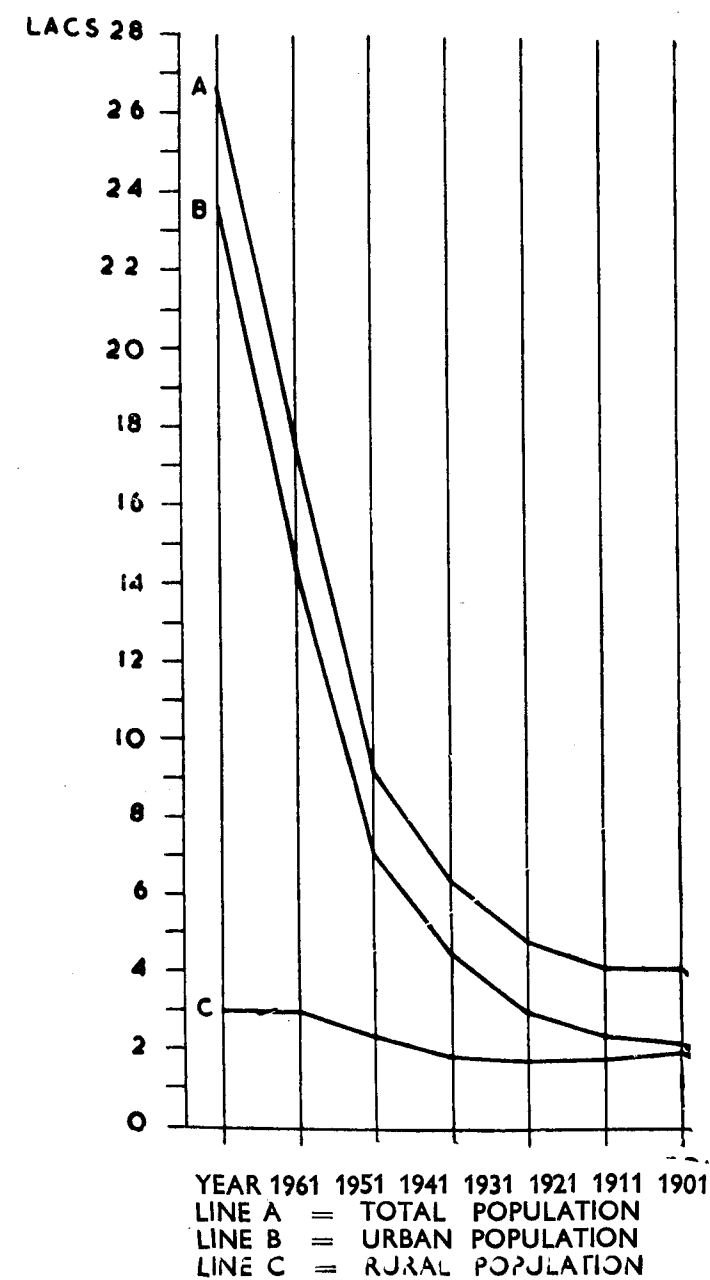

Total, Rural, Urban (Females per 1000 males)

	1961	1951	1941	1931	1921	1911	1901
Total	785	768	715	722	733	793	862
Rural	847	837	846	860	845	869	916
Urban	777	754	677	670	672	740	817

The highest proportion of females per thousand males, was in 1901. It declined steadily in 1911 through 1921, 1931 and 1941 and it is rising gradu-

ally since 1951. The proportion of females has always been higher in rural areas for reasons which have already been explained.

Note

There is no change in the jurisdiction of 1951 and 1961, but the difference in the area of 1951 and 1961 is explained below. The position about the correct area figures during the 1951 Census was rather obscure. At page XV of the District Census Handbook for Delhi for 1951, the following observations occur.

"Area : The area of the State as constituted at present is 577.6 square miles according to the latest figures supplied by the Survey Department."

In the very first Table A-I in the book, the total area in square miles is shown as 578.2 square miles. Again, in the A-I Table as printed at page 2 of Part II of Vol. VIII 1951 (Punjab, Delhi etc.), the area of Delhi is shown as 538 square miles.

With a view to resolve this confusion, a reference was made to the Surveyor General of India and also to the Registrar General to communicate, if possible, the area figures for Delhi for 1951 as supplied by the Surveyor General. The Surveyor General Department (The Director Map Publication) vide his letter No. T.D.O.—3566/66-B dated the 22nd June, 1962, has clarified the position in the following terms :

"It is confirmed that area figures 577.6 square miles for Delhi State were supplied by us in 1951. The increase in the area figures over the 1941 value was due to fresh planimetry on small scale maps. In 1951 when the area figures were being worked out, rapid changes in the administrative set up in the entire country were taking place and the alignment of all the administrative boundaries were not precisely known to us. Furthermore, it is to be noted that in the system followed by us, correction of area figures of a particular state or district cannot be done arbitrarily, unless it is possible to adjust such changes with the area figures of the adjoining states or districts. Hence no attempt was made to reconcile the slight difference between 1941 and 1951 values at that stage, since, in any case, the figures supplied were provisional. The use of suitable foot notes to this effect in the Census Report was suggested by this department in order to explain the proper position (vide para 7 of letter No. T-727/11-G-4 dated 19-2-52 addressed to the Registrar General of India).

At present it is not desirable to reconcile the difference of one sq. mile between the latest and the 1941 area figures as the same will affect the area figures of adjoining states. Till the final figures are obtained from our latest large scale maps (after they have been surveyed) the latest figures as supplied by us may be accepted provisionally for census purpose.

It is not possible for us to show reasons for the difference between our figures and those supplied by the Revenue Authorities as the following are not known to us :—

- The scale and accuracy of the maps marked with boundaries used for calculating the areas by the Revenue Authorities.
- The exact methods by which the area was determined by the Revenue Authorities."

It would appear from the contents of the above letter that the area figures 578.2, 578 and 538 sq. miles quoted in previous parts of the 1951 Census report are incorrect and that the correct area figure for the 1951 Census may be taken to be 577.6 sq. miles.

Coming to the present census, the latest area figure as supplied by the Surveyor General for the Union Territory of Delhi is 573 square miles. The figure supplied by the Revenue authorities is 365,589 acres which works out to 571.24 square miles. (i) The difference of 1.76 square miles can, of course, be due to different methods of calculation. It is, therefore, proposed to give the area figure for the Union Territory of Delhi as 573 square miles.

A-III Villages Classified By Population

TABLE A-III
VILLAGES CLASSIFIED BY POPULATION

FLY-LEAF

'Village' demand

The concept of a village during the successive Censuses has been explained in the Note to Table A-I. The short definition of a village as given in the Delhi Land Reforms Act 1954 is: "Any local area whether compact or otherwise recorded as a village in the revenue records of the Delhi State including any area which the Chief Commissioner

may, by general or special order published in the official Gazette, declare to be a village."

Population living in Villages of various population sizes

The following table gives the percentage of population living in villages of various population sizes with reference to the total rural population of Delhi, 1961:

	Less than 200	200 to 499	500 to 999	1,000 to 1,999	2,000 to 4,999	5,000 to 9,999	10,000 & above
	0.94	6.28	24.53	28.11	40.14	..	..

The table shows that a little more than one-third of the rural population is living in villages with a population range of 2,000 to 4,999, and a little less than one third is living in villages with a population range of 1,000 to 1,999; in other words more than two-third of the entire rural population is living in big villages, and the remaining (less than one-third) in small villages. It is also significant that

there is no village in Delhi with a population of 5,000 or more.

Proportion of villages and population by class of villages over the past Censuses

The following statement shows the percentage of village and population by class of villages 1921, 1951 and 1961:

The number of villages with a population of less than 500 declined almost to half during the period 1921-51. It went down further in 1961. The reason probably is that with the enormous increase in Delhi's population, the margin of 500 population has been narrowing down and dwelling the next grade viz., the population group of 500-999 which has been steadily increasing. The percentage of villages in the population range of 1,000 to 1,999 registered a

marked increase during this period, showing a performance exactly the reverse of villages with population range of less than 500.

The proportionate increase in the number of villages with a population range of 2,000 to 4,999 during the period 1921-1952 was as much as four times. The reason behind all these rapid increases is the same viz., increase in population and consequent transplantation of the villages into the next higher category.

TABLE A-IV
TOWN AND TOWN-GROUPS CLASSIFIED BY POPULATION IN 1961 WITH
VARIATION SINCE 1901

FLY-LEAF

TOWN

The concept of a town as obtaining in the various Censuses has been fully explained in the note to Table A-I. Cities and towns have been classified into size groups viz., Class I or those with a population of 100,000 and over, Class II or those with a population between 50,000 and 99,999, Class III or those with a population between 20,000 and 49,999, Class IV or those with a population between 10,000 and 19,999, Class V or those with a population between 5,000 and 9,999 and Class VI or those with population below 5,000. If two or more urban units are adjacent and together form a compact urban unit, the entire Town Group will be classified with reference to the total population.

The concept of a Town Group in the 1961 Census.

One of the innovations attempted in 1961 in the presentation of urban statistics is by the way certain clusters have been grouped to denote 'town groups'. It was realized that in certain clusters the urban area is not really limited only to the notified boundary of any one or two places but embraces satellite towns and cities industrial towns or settlements close to this urban area, which may even be surrounded by rural areas. There was, therefore an attempt from the very beginning to define well-formed clusters and treat them as town groups the main determinants being facility of road and railway transport, and the interchange of population on account of business and work. These town groups emerged in two types: (a) town groups which were made up of a cluster of neighbouring municipalities only; (b) town groups which were made up of cluster of municipal and non-municipal localities. In actual practice, in those cases where there was no clear articulation of extension, any town falling within a radius of 2 to 4 and some times 5 miles of the periphery of the main and most populous city was empirically examined in respect of continuity of urban characteristics, communications, possibility of satisfactory commutation and economic interdependence of functions to determine whether the town should be incorporated in a town group. These town groups were devised with the intention of marking off areas of conglomerate growth which as

a whole rather than the individual units should henceforth receive attention in matters of planning and development. Further, a town group also suggests the spatial directions of future growth.

Changes in the Classification of towns over the past Censuses.

There were two towns at the time of 1901 and 1911 censuses, one being the area covered by the Delhi Municipal Committee and the second being Shahdara-Shahadara which was a town in 1901 and 1911 in the State of Uttar Pradesh was transferred to Delhi in the year 1915 and at the time of 1921 this town was declassified. At the time of 1931 census there were two cities in the province (i) Old Delhi which includes the Municipality, the Civil Station Notified area and the Fort or Lal Qila and (ii) New Delhi or the Imperial Delhi, originally named Raisina after an estate of the same name included in its limits. Shahdara again re-appeared as a class V town in 1931.

At the time of the 1941 Census, the urban area of Delhi was divided into 9 towns, as follows :⁽¹⁾

1. Delhi (M)		Class I
2. New Delhi (M)		Class I ₁
3. Delhi Cantt.		Class III
4. Delhi Civil Lines		Class IV
5. Shahdara		Class IV
6. Narela		Class V
7. Mehrauli		Class V
8. Najafgarh		Class V
9. Red-Fort		Class VI

Thus, Shahdara which was a Class V town at the time of the 1931 Census, was raised to the status of a Class IV town and Narela, Najafgarh and Mehrauli which were being treated as villages heretofore, became towns for the first time in 1941 owing to their urban characteristics.

Also Delhi Cantt. and Civil Lines attained their separate entities.

At the time of the 1951 Census, there were several changes in the Constitution of Cities and towns. The urban area towards the West of Delhi City became a separate Municipality and was therefore treated as a separate Class II town. Delhi thus

(1) Census of India 1941, Volume XVI Delhi (Tables) Page 14.

came to have ten towns at the time of the 1951 Census, with the following classifications:

1. Delhi City	I
2. New Delhi	I
3. Civil Lines	II
4. West Delhi	II
5. Delhi Cantt.	III
6. Shahdara	III
7. Red Fort	IV
8. Narela	V
9. Mehrauli	V
10. Najafgarh	V

At the time of the 1961 Census, the picture of Delhi was completely changed. The Municipal Corporation for Delhi came into being in 1958 and all the Municipalities and Notified areas (except New Delhi Municipal Committee and the Cantonment Board Delhi) were merged in the said Corporation. A good part of the area of the New Delhi Municipal Committee was also taken out from it and given over to the Municipal Corporation. The urban area of Delhi at the time of the 1961 Census thus consisted of three towns viz., (i) D.M.C. (Urban) (ii) New Delhi and (iii) Delhi Cantonment. The

first two are Class I towns while the third is a class III town. However, D.M.C. Urban, New Delhi and Delhi Cantt. put together were treated as one 'Town Group' for the purposes of the 1961 Census.

No new towns have been added to Delhi during the 1961 Census. The following towns which were treated as such in 1951 census no longer retain their separate entity as they have been merged in the Municipal Corporation to form one town viz., D.M.C. (Urban).

1. Delhi Civil Lines.
2. Shahdara.
3. Red Fort.
4. Mehrauli.
5. Najafgarh.
6. West Delhi.
7. Narela.

For this reason, the number of towns has shrunk from 10 in 1951 to 3 in 1961.

Elsewhere we have given the list of villages which have been wholly or partly included in the town of D.M.C. (Urban).

†In 1961 the following towns were merged with the Delhi Municipal Corporation and the Population of these towns for the previous decades has been added up with the Population of the Delhi Municipal Corporation.

(i) Delhi Civil Lines with a population of 83,273 (48,637 M; 34,636 F) in 1951 and 19,395 P (12,404 M; 6,991 F) in 1941.

(ii) West Delhi with a Population of 58,862 (M 34,939 ; 23,923 F) in 1951.

(iii) Shahdara with a Population of 30,802 (17,027 M; 13,775 F) in 1951; 15,955 P (10,051 M; 5,904 F) in 1941. 8,262 P (4,801 M; 3,461 F) in 1931; 5,107 P (2,876 M; 2,231 F) in 1911 and 5,540 P (3,057 M; 2,483 F) in 1901. In 1921 this town was declassified.

(iv) Red Fort with a Population of 10,022 (6,587 M; 3,435 F) in 1951 and 1,740 P (1,256 M; 484 F) in 1941.

(v) Narela with a Population of 9,597 (5,052 M; 4,545 F) in 1951 and 8,050 P (4,549 M; 3,501 F) in 1941.

(vi) Mehrauli with a Population of 7,436 (3,800 M; 3,636 F) in 1951 and 6,050 P (3,136 M; 2,914 F) in 1941.

(vii) Najafgarh with a population of 5,088 (2,675 M; 2,413 F) in 1951 and 5,774 P (3,060 M; 2,714 F) in 1941.

‡In 1921 New Delhi (Imperial Delhi) and Delhi Cantt, with the Population of 31,456 (20,126 M; 11,330 F) and 6,272 P (4,580 M; 1,692, F) respectively were parts of Delhi Municipality. The combined Population of Delhi (M.C.), New Delhi (M) and Delhi Cantt for 1921 has been shown against Delhi (M.C.)

@In 1931 Delhi Cantt was a part of New Delhi Municipality and its population of 8,798 (6,093 M; 2,705 F) has been added in New Delhi Municipality.

PRIMARY CENSUS ABSTRACT

based on the structural unit and in others on the social unit viz., family or household. In the 1951 Census, it was decided that there should be a uniform definition of a house. Since both the concepts mentioned above were important and could be studied individually it was decided at that census to retain both the 'house' and the 'household', the 'house' relating to the structural unit and the 'household' to the family unit. Hence a 'house' was defined as 'a dwelling with a separate main entrance' and a 'household' as 'all persons who live together in the same house and have a common mess'.

The 1961 Census continued to have the concepts of 'house' and 'household' as already defined at the beginning of this Section. Besides, it added the concept of BUILDING, defined as 'an entire structure on the ground'. It is to be observed that while in the case of household here is not any material change from the definition adopted in the 1951 census, in the case of 'census house' the usual definition of a house namely, a dwelling, has not been adopted. More emphasis has been laid on the structural aspect, because in the houselist it was proposed to collect data on housing conditions as well as industrial establishments. Even in the earlier censuses though the census house was defined as 'a dwelling with a separate main entrance all structures or parts of a structure where any human being was likely to be found at the time of the census were numbered and entered in the houselist. The 'BUILDING' is a new concept adopted for the 1961 census, keeping mainly in view the linkage of the numbers given by the municipalities for purposes of assessment with the Census numbers. It was hoped that this linkage would help in the permanent maintenance of the house numbers and for making statistical sample studies.

Proportion of Households to Number of Houses in Delhi.

The following statement gives the percentage of households to number of houses in rural and urban areas of Delhi, separately, as well as for Delhi as a whole.

	Total	Rural	Urban
Delhi.	143.28	108.20	148.37

The statement reveals that in urban Delhi we have 148 households for every 100 census houses, which means that nearly 30.2% of the households were sharing accommodation with others and were

in need of accommodation of their own. As compared to this, the position in rural Delhi seems to be easy.

Density of Households per square Mile

The following statement gives the density of households per square mile in rural and urban areas separately as well as for Delhi as a whole:

	Total	Rural	Urban
Delhi	899.70	110.41	3,696.95

The density of households per square mile in the urban areas of Delhi is as much as 33.48 times the corresponding density for its rural areas and 4.11 times the corresponding density for the Delhi Territory as a whole. The Union Territory of Delhi has 789.29 households per square mile more than those in its rural areas, the density of households per square mile in Delhi as a whole is thus 8.15 times its corresponding rural density.

Literacy and Education

A person who can neither read nor write or can merely read but cannot write in any language is deemed to be illiterate. A person who can both read and write is literate. The test for reading is ability to read any simple letter either in print or in manuscript. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

If a person can both read and write and has also passed a written examination or examinations as proof of an educational level attained, the highest examination passed by him was to be recorded in answer to question 6.

Worker and Non-worker

In the 1961 Census, work was made the criterion for the assessment of the economy of the country. The entire population was broadly divided into

workers and non-workers. In the category of workers came those persons who were earning either individually or as members of a household, that is to say, all those persons who were contributing to work were classified as workers; all others, like rent receivers, moneylenders, dividend receivers etc., who earned money without working were classified as non-workers. In this last category also came beggars, pensioners etc. who though earning an income, were not participating in any productive work.

In the case of seasonal workers, the basis of work was satisfied if the person has had some regular work of more than one hour a day throughout the greater part of the working season. Work included not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages were to be regarded as working.

An adult woman engaged in household duties but doing no other productive work to augment the family's resources was to be considered as a non-worker. If, however, in addition to her household work, she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., she was to be treated as a worker.

Household Industry

The relevant passages in the Instructions to Enumerators (refer Annexure A) explaining the term "Household Industry" may be reproduced here:

"Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the Household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes making and selling of good.

The test for a Household Industry is mainly threefold:

- Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired labour being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.
- Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where women folk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Scheduled Castes

Section 341 (1) of the Constitution of India lays down that "The President may with respect to any State or Union Territory—by public notification, specify the castes, races or tribes which shall for the purposes of this Constitution be deemed to be Scheduled Castes in relation to that State or Union Territory, as the case may be."

The Scheduled Castes and Scheduled Tribes Lists Notification order 1956 issued by the President on 29th October 1956 by Notification No. S.R.O. 2477A contains the following list of 36 Scheduled Castes for the Union Territory of Delhi:

1. Adi Dharmi
2. Agria
3. Aheria
4. Balai
5. Banjara
6. Bawaria
7. Bazigar

Before entering upon a discussion of the statistics of Scheduled Castes and Scheduled Tribes it may be mentioned that in the President's order dated the 29th October 1956 quoted above, no list of Scheduled Tribes in Delhi has been given, the discussion will therefore be confined to Scheduled Castes only.

Scheduled Castes—their numerical strength

The following statement gives the percentage of Scheduled Castes to total males and females by rural and urban areas of Delhi separately (for population of 50,000 and over):

	Scheduled Castes (Percentages)			
	Males		Females	
	Rural	Urban	Rural	Urban
Delhi	22.92	11.48	23.46	11.62
D.M.C. (Urban)	..	11.31	..	11.58
New Delhi	..	12.07	..	10.76

The Scheduled Castes have 12.8% of the total population, 12.7% of the total males and 13.0% of the total females of the Delhi Territory. The Scheduled Castes living in the rural areas constitute 23.2% of the rural population and those living in urban areas 11.5% of the urban population of the Delhi Territory. The tracts D.M.C. (Urban), New Delhi and Delhi Cantt., have 11.4%, 11.5% and 18.1% of their respective total population belonging to the Scheduled Castes.

Literates

Given below is a statement of percentage of literate and educated persons to total population, males and females, by rural and urban areas of Delhi separately (for population of 50,000 and over).

	Percentage Literate and Educated					
	Rural			Urban		
	T	M	F	T	M	F
Delhi	25.13	38.45	9.40	56.25	63.47	46.96
D.M.C. (Urban)	..	..	..	55.39	62.81	45.97
New Delhi	..	..	..	62.92	68.03	55.90

The level of literacy in the rural areas is proportionately quite low, and more so amongst the females. It may be pointed out that in urban Delhi, the level of literacy is about the highest in the country.

Distribution of 100 persons into workers and non-workers

The following table shows the distribution of 100 persons into workers and non-workers.

'N' denotes negligible figure.

For the total population of the Union Territory, 'workers' constitute 32.1% and 'non-workers' as high as 67.9%. In other words the number of 'non-workers' is 2.12 times the number of 'workers' in the Union Territory of Delhi. For the rural areas of Delhi, the percentages of workers and non-workers are 36.0 and 64.0, the number of non-workers being 1.78 times the number of workers. For the Urban area of Delhi, workers account for 31.7% and non-workers for 68.3%, the number of the latter being 2.15 times that of the former. Delhi Rural has, thus, a lower percentage of non-workers to its total population, as compared to the corresponding percentages of both Delhi Urban as well as Delhi as a whole.

Only 2.7 per cent of the total population of the Union Territory is engaged in cultivation, agricultural labour, quarrying, livestock maintenance, forestry, fishing, orchards and allied activities. Industry both Household and Manufacturing other than Household supports 7.0% of the total population and construction work engages 1.3% of the population. Trade and Commerce account for 5.5% and Transport and Communications for 1.9% of the total population of Delhi. As high as 13.7% of the total population of Delhi are engaged in 'Other Services'. Thus we see that amongst all the categories

of individual workers 'Other Services' is the largest single category in the occupational structure of Delhi.

In Rural Delhi, Industrial categories I, II and III account for 19.9% of the total population of Rural Delhi, Industry, of categories IV and V accounts for 6.4%, Construction for 0.9%, and other services for 7.0%.

Of the total population of Delhi urban, the most important category of workers is Other Services which accounts for 14.6% of its total population. Household Industry as well as Manufacturing other than Household Industry provides work for 7.1% population of Delhi urban, Trade and Commerce account for 6.1%, Transport and Communications for 2.0% and the primary sector which includes cultivation, agricultural labour, mining, quarrying, livestock, forestry, fishing and orchards and allied activities account for 0.5% of the population of urban Delhi.

Sex Ratio

The following statement gives the sex ratio (females per 1,000 males) among total population, total workers, each category of workers and non-workers in rural and urban areas in Delhi.

Sex ratio (females per 1,000 males) among total population, total workers, each category of workers and among non-workers in rural and urban areas.

State	Total Population	Total Workers	Industrial Categories										IX	X

Total	785	98	603	436	253	266	43	84	15	18	106	1537		
Rural	847	389	636	453	400	283	328	205	99	22	128	1267		
Urban	777	66	341	357	179	261	21	75	13	18	105	1574		

The urban areas of Delhi have lesser number of females per thousand males as compared to the rural areas, presumably because many of the migrants of the urban areas tend to leave behind their women folk resulting in a lower sex ratio in the urban areas.

As regards the sex ratio between workers and non-workers, the non-workers have comparatively much higher number of females per 1,000 males as

compared to the workers. In our social set up, where it is the duty of man to earn livelihood and that of a woman to look primarily to the household duties, this phenomenon is quite normal. The sex ratio amongst the workers reveals a comparatively much higher number of females per 1,000 males in the rural areas, which suggests that a large number of women folk in rural areas help their men folk in income-earning activities as compared to the urban areas.

Looking to the sex ratio amongst the workers in different occupational categories, it is found that in the Delhi Territory as a whole, the largest number of females per 1,000 males are engaged in category I—Cultivation and the smallest in category VIII—Transport and Communications'. In the urban areas of Delhi, Category II—Agricultural Labour has the largest and category VII—Trade and Commerce the smallest number of females per 1,000 males.

In the rural areas of Delhi the largest number of females per 1,000 males is found in category I—Cultivation and the smallest in category VIII—Transport and Communications'. In the urban areas of Delhi, Category II—Agricultural Labour has the largest and category VII—Trade and Commerce the smallest number of females per 1,000 males.

B-SERIES TABLES (Economic Tables)

The Economic Questions.

There were five economic questions for the 1961 Census. A departure was made in the 1961 Census in the concept for the collection of economic data. In earlier Indian Censuses or at least at the last few censuses prior to the 1961 Census, income or economic independence were made a criterion for measuring the economy of the country. A count was made of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced from the 1931 Census. This category was called working dependent in the 1931 Census, partly dependent in 1941 and earning dependent in 1951 and even here an element of income was introduced. In the 1961 Census, however, stress was laid on work so that all people who worked, including family workers, who were not in receipt of any income, or working children, who could not work enough for their maintenance, were also included as workers. This was done, because it was felt that the strict application of the criterion of income or economic independence suppressed those who worked in economic activities but did not actually earn an income, like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household.

In the 1961 Census, those people who were not working were separately categorised into (i) students, (ii) house-wives and persons engaged in unpaid home duties, (iii) infants and other dependents including permanently disabled or old persons, (iv) retired persons, rentiers and others who are in receipt of income without doing any work, (v) beggars, vagrants, and others of unspecified source of existence, (vi) convicts in jails or inmates of penal, mental or charitable institutions, (vii) persons not employed before but seeking employment for the first time, and (viii) persons employed before but now out of employment and seeking employment.

It is possible to establish a comparison between the 1951 Census economic data and that of the 1961 Census, as the self-supporting persons plus the earning dependents of the 1951 Census should correspond with the total of actual workers and persons who are in receipt of income without work at the 1961 Census.

In respect of persons who are workers, the questions have been designed to show how many are working separately as cultivators, as Agricultural Labourers, at Household Industry or doing any other work or working in any combination of the above four.

For a person who is working in more than one of the above four categories, his principal work is that in which he spends the maximum time and the secondary work is that in which case he spends comparatively less time.

B. Economic Tables.

Seventeen tables have been prepared for the 1961 Census, of which twelve are single tables and of the remaining tables four have two parts and one has three parts. Nine out of the seventeen tables relate to the general population and eight are household economic tables. As against the seventeen tables prepared during the 1961 Census, there were seven economic tables (Table A-V, E, B-I, B-II, B-III, C-II and D-VII) at the 1951 Census and all of them related to the General Population.

The 1951 Census tabulation covered only the distribution of population by eight livelihood classes and their further sub-division into self-supporting persons, earning dependents and non-earning dependents. There was a cross tabulation of self-supporting persons and earning dependents with reference to the secondary means of livelihood which was confined only to the eight Livelihood Classes. The self-supporting persons were classified by divisions and sub-divisions of industries and services, according to the Indian Census Economic Classification. There was also cross tabulation of the eight Livelihood Classes by age groups and by literacy and educational standards.

At the 1961 Census, the number of Economic tables is more than twice the number prepared at the 1951 Census. The tables are also more elaborate. The working and non-working population has been divided by broad age-groups viz., 0 to 14, 15 to 34, 35 to 59, and 60 and over. The working population has been classified separately according to the returns for occupation and industry. The

Indian Census Economic Classification adopted at the 1961 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only 10 divisions and 88 sub-divisions of industries and services. The 1961 Census has followed the Indian Standard Industrial Classification and National Classification of Occupations adopted by the Government of India (Refer Annexures B and C).

Similarly, the cross tabulation of persons engaged in Household Industry and also working in non-household industry, trade, business, profession or service has been attempted with reference to the Major group in Household Industry and Major group in non-household industry, trade, profession or service. The non-working population has also been classified according to the eight-fold activity under which they were enumerated. Tables have been prepared showing population of persons who have returned themselves as unemployed and seeking employment for the first time, classified by sex, broad age-groups and educational levels.

The Household Economic Tables are a special feature of the 1961 Census. Attempts have been made to prepare tables which give as much data as possible based on the returns in the Household Schedules relating to extent of land under cultivation, nature of Household Industry, period of working of Household Industry and the number of persons who are employed in Cultivation or Household Industry either as family workers or as hired labourers.

Broad Industrial categories

In the 1951 Census, the entire population was divided into eight livelihood classes. Economically semi-active people known as earning dependants were divided according to their secondary means of livelihood and the economically inactive people or dependants were divided on the basis of livelihood classes of persons on whom they were dependant.

In the 1961 Census, non-workers are not classified by their dependence on one or the other sector of economy. The working population alone is classified in nine broad industrial categories:—which are explained below one by one:—

Category I.

This category includes both owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy right are included in this category.

Category II.

All other persons working on land as labourers on wages, without holding any right upon the land are classified as agricultural labourers and included in this category.

Category III.

Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV.

Household Industry has been defined in detail in 'Instructions to the Enumerators' which are reproduced as Annexure 'A' to the present volume.

Category V.

'Manufacturing' includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing etc., which may be classified as Household Industry.

Category VI.

This category includes workers engaged in Construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, water-ways, reservoirs, etc.

Category VII.

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending, banking etc.

Category VIII.

This category includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading etc. Workers engaged in storage, warehousing and communications services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX.

This category includes (i) Public Utility Services like electricity, gas or water supply and sanitary services; (ii) Central, State, Quasi-Governments or Municipal employees in administrative departments or offices; (iii) professional services; and (iv) Trade or Labour associations, recreational services etc.

Industrial classification:

In addition to the primary classification in the nine broad categories mentioned above, the 1961

Census has also classified the workers according to the Indian Standard Industrial Classification (Refer Annexure) scheme into divisions, major groups and minor groups of industry.

Occupational classification.

Tables BV and BVI presented in this volume show the distribution of workers by their occupations classified according to the National Occupational Classification Scheme which is also reproduced in an Appendix to this volume.

'Occupation' of a worker is the function which he personally performs by engaging himself in work in any branch of economic activity which is called his industry. The concept of 'Occupation' is thus distinct from that of 'Industry'. The latter is defined as the sector of economic activity in which a worker is engaged. A worker, no doubt, follows his 'Occupation' within a certain 'industry' but the basis for classification of the latter is the character of the establishment or the field of activity in which he is working, while that for classification of the former is the work performed personally by the individual concerned. Thus for a clerk working in a cotton textile mill, the industry is 'manufacture of cotton textiles', while the occupation is that of a clerk. A clerk working in a bank is engaged in an identical occupation but his industry is 'Banking'. The 'industry' of a spinner working in a cotton textile mill is identical with that of the former clerk, but he engages himself in a different 'occupation', viz., spinner.

Although the concepts of 'Occupation' and 'industry' are different, certain occupations are normally found to exist in only one industry. For example, the occupation "fisherman" will be confined only to the 'fishing' industry and the occupation 'miner' only to the 'mining' industry. But a great number of occupations are found to exist in several industries. Occupations falling in Divisions 3, 4 and 5 of the National Classification of Occupations, will be found confined mainly to particular industrial

categories, although a few of these may be found returned in small numbers in other industrial categories, also. Division 3 'Sales workers' will be found confined mainly to industrial category VII mentioned above and Division 4 'Farmers' fishermen, Loggers etc.' and Division 5 'Miners, Quannymen, etc.' to category III if the industry is a non-household industry and to Category IV if it is a household industry.

A question about a person's occupation had been asked in the Indian Censuses right from the earliest Census in 1872. But the word has been used more to indicate the means of subsistence or livelihood or the supporting sector of economy. It had never been used to mean the exact function performed by the individual in any branch of economic activity. Only in the Census of 1931, there were two separate economic questions regarding the principal occupation of earners and dependants, and the industry in which they were employed. Unfortunately, no separate tables had been prepared even at that 'Census' on industries and the entire Census classification of occupations from 1872 to 1951 has, therefore, been into the means of livelihood which at best were a combination of both industry and occupation.

For the first time in the 1961 Census, the two concepts of 'industry' and 'occupation' have been used with specific meanings distinct from each other and Tables have been prepared separately with very elaborate classification of the working population both by Industry and Occupation.

Question 10(a) of the 1961 Census Questionnaire pertained to the nature of work performed by the individual at household industry. Question 11(a) was about the nature of work performed by the individual in economic activity other than cultivation, agricultural labour and household industry. Questions 10(b) and 11(b) were about the nature of household industry and the nature of non-household industry, profession, trade or service, respectively. Question 10(a) and 11(a) thus elicited information about the occupation in which he was working.

The Economic Questions over the past Census

The economic questions asked in the Censuses from 1881 to 1961 are reproduced below:—

1881

10. Occupation of men, also of boys and females who may do work.

1891

11. Occupation or means of subsistence.

1901

9. & 10. Occupation or means of susistence of actual workers.
9. Principal.
10. Subsidiary.
11. Means of subsistence of Dependants on Actual workers.

1911

9. & 10. Occupation or means of subsistence of actual workers.
9. Principal occupation.
10. Subsidiary occupation, if any.
11. If dependant, principal occupation or means of subsistence of actual worker on whom dependent.

1921

9. & 10. Occupation or means of susistence of actual workers.
9. Principal.
10. Subsidiary.
11. For dependants, the occupation of the worker by whom supported.

1931

9. Earner or dependant.
10. Principal occupation this will be blank for dependant.
11. Subsidiary occupation (occupation of dependants may be given).
12. Industry in which employed (for organized employees only).

1941

9. Are you wholly or partly dependant on any one else?
10. If so, means of livelihood of persons on whom dependant.
11. Do you employ :

(a) paid assistants,

(b) members of household? If so, how many?

12. Are you in employment now?

13. (Only to those who reply in the negative to question 12):

Are you in search of employment?
To those who reply in the affirmative, the further question will be put:

How long have you been in search of it?

14. Means of livelihood in order of importance.

15. (Only to be asked in regard to means of livelihood of a person shown as partly dependant against question 9 or any subsidiary means of livelihood returned by other persons against question 14):

Does this means of livelihood exist throughout the year?

If not, for what part of the year?

16. If you are employed by some one else, what is his business.

1951

9. Economic Status :

Part One : Dependency.

Part Two : Employment.

10. Principal means of livelihood.

11. Secondary means of livelihood.

1961

8. Working as Cultivator.

9. Working as Agricultural Labourer.

10. Working at Household Industry :

(a) Nature of work.

(b) Nature of Household Industry.

(c) If employee.

11. Doing work other than 8, 9 or 10 :

(a) Nature of work.

(b) Nature of industry, profession, trade or Service.

(c) Class of worker.

(d) Name of establishment.

12. Activity if not working.

ANNEXURE B

A STANDARD

INDUSTRIAL CLASSIFICATION

Adopted By The Government of India

Issued by the Director of Employment Exchanges
DECEMBER, 1960

DIRECTORATE GENERAL OF EMPLOYMENT AND TRAINING
MINISTRY OF LABOUR AND EMPLOYMENT
GOVERNMENT OF INDIA NEW DELHI

EXPLANATORY NOTE ON THE USE OF
INDUSTRIAL CLASSIFICATION

1. In order that information regarding employment and unemployment in various sectors of the economy may be more specifically known, an industrial classification of all economic activity has been prepared by the Government of India for being used by its various fact finding agencies. This classification which may be called the 'Standard Industrial Classification' is given in this document. Employment Exchanges will use the Standard Industrial Classification and the Code Numbers provided for purposes of classification of applicants and vacancies.

2. Code numbers have been devised for each industrial group on what is known as the 'digit' system. The system is closely related to international usage as recommended by the I.L.O. Employment Officers must study the industrial classification system as an essential preparation for work under the Second Five-Year Plan so that they may be able to classify applicants and vacancies industrially. The work of industrial classification, it is recommended, should be carried out by persons thoroughly trained in the use of the Industrial Classification Code.

3. It is important that the concept of 'industry' should not be confused with that of 'occupation'. 'Industry' means that sector of economic activity in which the earner is engaged, e.g., textile industry, automobile industry, etc. whereas the 'occupation' describes the exact function that an individual performs in that sector e.g., fitter, carpenter, etc.

Construction of Industrial Classification Code.

4. The following system of notation has been adopted in the classification of Industries:

Divisions

The whole range of economic activity is divided into nine 'Divisions', and a 'code number' given to each. The first digit of any code number represents the 'Division' under which that activity is classified, e.g. the number given to the Manufacturing Division and manufacturing activity of any kind will have code numbers beginning with '2' or '3'.

Major Groups:

Each 'Division' is then divided into a number of 'Major Groups' not exceeding ten. The first two digits of any code number together represent the 'Division' and the 'Major Group' under which that activity is classified. Thus the number "20" has been given to the "Production of Foodstuffs" (Major Group) under "Manufacturing" (Division).

Minor Groups:

Each 'Major Group' is again sub-divided into a number of 'Minor Groups' not exceeding ten. The 'Minor Group' is represented by a third digit added to the 'Major Group' code number, e.g. '5' under Major Group 20 relates to production of bread, biscuits, cake, etc. Thus if we find code No. 205 we know that it means production of bread, biscuits, cakes, etc. (Minor Group) in the 'Foodstuffs Industry' (Major Group) in the 'Manufacturing' (Division). Again if we find No. 701, we know that it means "Transporting by tramway, and bus service" (Minor Groups) in the "Transport Industry" (Major Group) in the 'Transport, Storage and Communication' (Division).

Thus, a one-digit code number represents a division, a two-digit code number represents a major group of industries and a three-digit code number represents a minor group of industries. A classi-

fication more detailed than the minor groups (3-digit level) has not been made.

5. The code number that should be allotted for economic activity connected with repairing or servicing will be the same as the code number provided for manufacturing of the article or product in that branch of industry (for example, Repairing of electric lamps and fans will be classified under 375 and Repairing of radios under 378), unless a code number is specially provided for repairs or servicing under the 'Minor Group' (for example, Repairing of bicycles and tricycles has been classified under 388, and Repairing and servicing of motor vehicles under 384).

Classification of Order Cards/Vacancies

6. The Industrial Classification Code appropriate to the economic activity of the employer who notifies the vacancy should be entered against the item 'I.C.I.' at the top right hand corner on the front page of the order card (X-2).

7. The following principles should be observed in deciding the industrial classification to be given to order cards:

(a) Industrial classification should be decided on the basis of local knowledge of the economic activity of the establishment concerned. In case of doubt, enquiries should be made directly from the firm or from the Factory Inspectorate, or any other authoritative source.

(b) The term 'establishment' means the whole of the premises under the same organisation or management at a particular address, for example, a factory, a mine, a firm, or a shop.

(c) The establishment should be classified under the code number which best describes the products made or the services provided by that establishment. Where a firm has, at the same address, two or more separate departments manufacturing different products, thereby justifying classification under two or more code numbers, the industrial classification to be allotted is the one which best describes the major activity of the firm in terms of employment.

(d) Ancillary departments within the establishment, e.g., a department engaged in carrying out repairs, or making containers for the firm's products, or warehousing, transporting, accounting, selling etc. are to be regarded as a part of the firm and should be given the code number allotted to the establishment's principal activity. For example, a firm manufacturing medicinal

products etc., is classified as "335". If that firm makes its own packages or distributes its own products by road, the activity of the department manufacturing the packages as well as the road transport department should be classified as "335".

8. The Industrial Classification Code with reference to vacancies notified, filled/cancelled and outstanding at Employment Exchanges should be the same as the classification number allotted to the order card.

Classification of Employers/Establishments

9. The Industrial Classification Code appropriate to the economic activity of employers included in the employers' register (on form EM-1) should be entered against the item 'I.C.I.' at the top right hand corner on the front page of EM-1 cards. The industrial classification code as entered on EM-1 should also be entered on the EM-returns received from the employer against the dotted portion of item 1 of the return which refers to the principal activity of the employer. In allotting the industrial classification code on EM-1 cards or on EM-returns received from employers, the same principles as laid down in para 7 above should be observed.

Classification of Persons Registering for work

10. In addition to the occupational Code number allotted to an applicant an industrial classification code number should also be recorded at the time of registration. The applicant should, therefore, be carefully questioned to ascertain the industrial field of activity in which he was last engaged. An Industrial Classification Code Number of that activity should then be entered against item 'I.C.I.' at the top right hand corner on the front page of Index Card (X-1). In cases where an applicant is re-registered, care should be taken to review the Industrial Classification Code Number previously allotted.

11. The following principles should be observed in classifying applicants registering at Exchanges:-

(a) The applicant should be carefully questioned in order to ascertain the industrial activity in which he was last engaged. For this purpose the record of employment of the applicant should be completely obtained in chronological order in each case. The record of previous employment will help to ascertain the industrial classification of the applicant. It is, therefore, essential that industrial classification should invariably be reviewed at the time of re-registration. In deciding the industrial classification, the applicant's oral statement may be relied upon and it should not be necessary to verify it by certificates or other documents. At the same time, the economic

activity on the basis of which the industrial Classification Code has been given should be supported by details on the Index Card in the 'record of employment' column. The main aim of industrial classification should be to determine the economic activity which the registrant has just left or was last engaged in.

(b) An applicant who was in employment should be classified according to what his employer or he himself was making or doing. An applicant who has been working on his own account, i.e. self-employed and who is now seeking wage earning or salaried employment should be classified in accordance with the industry in which he was self-employed. For example, if a man who was working on his own account as a fisherman registers at an Employment Exchange, he should be allotted No. 03 (Fishing).

(c) A person who was engaged in more than one industry should be classified in the industry from which he derived the major part of his earnings. Where the person appears to be in receipt of equal income from two or more jobs, he should be classified under the Code Number of that industry to which he devotes the greater part of his time.

(d) Where the activity, in which the applicant has been engaged is not provided for in the Standard List, he should be classified under 900 (Activities not specified elsewhere). Any person who has clearly been identified as gainfully employed either as an employee or on his own account, but cannot provide sufficient information about his industrial affiliation, should also be given the same Code No. 900.

(e) Applicants who are new entrants to the labour market i.e. persons who have not so far worked for livelihood as either employees or on their own account should be industrially classified as 999. This classification number should not be given merely because the applicant is a 'fresher' in the occupation for which he is registered. A 'fresher' who has been engaged in some

economic activity (e.g. a 'fresher' clerk who has been a school teacher) should be given the Code number appropriate to his former means of livelihood.

(f) The economic activity of such persons as wiremen, carpenters and painters who are self-employed (engaged on jobwork) should be classified under the code number appropriate to the industry to which their activity can be assigned. For example, a wireman who was engaged in electric installations in buildings, etc. will be classified under 40 (Construction); a wireman who was engaged in repair of heavy electrical machinery will be classified under 374 (Manufacture of heavy electrical machinery and equipment such as motors, generators and transformers). There may be other persons who are casual workers, who change industry at quick intervals or there may be persons who fail to provide sufficient information about their industrial affiliations to enable them to be classified. Such persons should be classified under 900. These should, however, be few and far between. The Code number 900 should be used sparingly and only in case of activities that cannot be specified and included in one or another industry group.

(g) Code, No. 804, 805 and 809 should be allotted if the economic activity concerned is only administrative in nature, and should not be allotted if a more specific code number can be used (see note against Division 8—Public Services). For example, a carpenter, who has worked in the public owned Sindri Fertilizer Factory will be classified under 332 (Manufacture of fertilisers) and not 805. Similarly, a teacher who has worked in a Government High School will be classified under 811 (Educational Services) and not 804 or 809.

12. It should be made quite clear to applicants at the time of registration that the allocation of an industrial code number will have no effect on their submission against suitable employment which will continue to be based on their occupational suitability.

STANDARD INDUSTRIAL CLASSIFICATION

Division O—Agriculture, livestock, forestry, fishing and hunting

Major Group (Code)	Description	Minor Group (Code)
00	Field Produce and Plantation Crops	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	Plantation Crops	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048

10 Mining and Quarrying

Mining of coal	100
Mining of iron ores	101
Mining of gold and silver ores	102
Mining of manganese	103
Mining of mica	104
Mining of other non-ferrous metallic ores	105
Mining of crude petroleum and natural gas	106
Quarrying of stone (including slate), clay, sand, gravel, limestone	107
Mining of chemical earth such as soda ash	108
Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109

Divisions 2 and 3—Manufacturing

20 Foodstuffs

Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and foodgrains	200
Production of sugar and syrup from sugarcane in mills	201
Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
Production of fruits products such as jam, jelly, sauce and canning and preservation of fruits	203
Slaughtering, preservation of meat and fish and canning of fish	204
Production of bread, biscuits, cake and other bakery products	205
Production of butter, ghee, cheese and other dairy products	206
Production of edible fats and oils (Other than hydrogenated oil)	207
Production of hydrogenated oils (Vanaspati)	208
Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209

21 Beverages

Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
Production of country liquor	211
Production of indigenous liquor such as toddy, liquor from mahua, pam juice	212
Production of other liquor not covered above	213
Production of aerated and mineral water	214
Production of ice	215
Production of ice cream	216
Processing of tea in factories	217
Processing of coffee in curing works	218
Production of other beverages	219

Manufacture of cigars and cheroots	221
Manufacture of cigarette and cigarette tobacco	222
Manufacture of hookah tobacco	223
Manufacture of snuff	224
Manufacture of jerda and other chewing tobacco	225
Manufacture of other tobacco products	226

23 Textile—Cotton

Cotton ginning, cleaning, pressing and bailing	230
Cotton spinning (other than in mills)	231
Cotton spinning and weaving in mills	232
Cotton dyeing, bleaching	233
Cotton weaving in power looms	234

Division 2 & 3—Manufacturing—contd.

Major Group (Code)	Description	Minor Group (Code)
23 Textile—Cotton—contd.		
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24 Textile—Jute		
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25 Textile—Wool		
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power-loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256

(I) GENERAL ECONOMICS TABLES

**B-I Workers and Non-Workers classified by Sex and Broad
Age-Groups**

TABLE B-1

(Workers and Non-Workers classified by Sex and broad age-groups).

FLY-LEAF

This table has been prepared separately for total, rural and urban population as well as for all the Census Tracts and Zones. This is a summary table prepared from the Primary Census Abstract giving the total population and the nine industrial categories of workers and also non-workers. Each category gives data about age-groups, total, 0-14, 15-34, 35-59, and 60+ and age not stated. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle aged persons and elderly persons. Further, classification of non-working population has been attempted in another table.

In 1951, the population was divided into two broad livelihood categories, namely, Agricultural Class and Non-Agricultural Class, each class containing four categories. Each class was further sub-divided into three sub-classes with reference to the economic status, namely, self-supporting persons, non-earning dependants, and earning dependants. As income was substituted by productive work in the present Census, the sub-classifications, 'Self-supporting', 'earning dependants' and 'non-earning dependants' have been given up. The tabular statement given below gives the classifications adopted in 1951 and 1961 Censuses.

LIVELIHOOD CLASSIFICATION OF

1951	1961
I. Cultivators of land wholly or mainly owned and their dependants.	I. Cultivator.
II. Cultivators of land wholly or mainly un-owned and their dependants.	II. Agricultural Labourer.
III. Cultivating labourers and their dependants.	III. Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Planations, Orchards and allied activities.
IV. Non-cultivating owners of land, Agricultural rent receivers and their dependants.	IV. Household Industry.
V. Production other than cultivation.	V. Manufacturing other than Household Industry.
VI. Commerce.	VI. Construction.
VII. Transport.	VII. Trade and Commerce.
VIII. Other Services and Miscellaneous sources.	VIII. Transport, Storage and Communications.
	IX. Other Services.
	X. Non-workers.

Comparison with past Censuses

For the purpose of comparison with the figures presented in the tables of earlier Census, the following statement will indicate the groups and sub-divisions adopted at each of the previous Censuses as corresponding to the 10 broad categories now adopted at the 1961 Census.

TABLE B-1

**B—II Workers and Non-Workers in Cities, Town-Groups
and Towns Arranged Territorially Classified by Sex
and Broad Age-Groups**

FLY LEAF TO TABLE B-II

(Workers and Non-workers in cities, town-groups and towns arranged territorially, classified by sex and broad age-groups).

In this table, economic data furnished in Table B-I including the age-groups is given for Delhi Town Group, D.M.C. Urban, New Delhi, Delhi Cantt and for each of the seven zones of D.M.C. Urban Tract.

The concept of a Town-group in the 1961 Census.

The concept of 'Town-group' adopted in the 1961 Census is elaborated below as is given in 'Census of India 1961, (p. 52) Volume I, India, Part II-A (i) General Population Tables':—

"One of the innovations attempted in 1961 in the presentation of urban statistics is by the way certain clusters have been grouped to denote 'town groups'. It was realized that in certain clusters the urban area is not really limited only to the notified boundary of any one or two places but embraces satellite towns and cities, industrial towns or settlements close to this urban area, which may even be surrounded by rural areas. There was, therefore, an attempt from the very beginning to define well-formed clusters and treat them as town groups, the main determinants being facility of road and railway transport, and the

inter-change of population on account of business and work. These town groups emerged in two types: (a) town groups which were made up of a cluster of neighbouring municipalities only; (b) town groups which were made up of a cluster of municipal and non-municipal localities. In actual practice, in those cases where there was no clear articulation of extension, any town falling within a radius of 2 to 4 and some times 5 miles of the periphery of the main and most populous city was empirically examined in respect of continuity of urban characteristics, communications, possibility of satisfactory commutation and economic interdependence of functions to determine whether the town should be incorporated in a town group. These town groups were devised with the intention of marking off areas of conglomerate growth which as a whole rather than the individual units should henceforth receive attention in matters of planning and development. Further, a town group also suggests the spatial directions of future growth".

The term 'Delhi Town-group' stands for the urban area of the Delhi Municipal Corporation, New Delhi and Delhi Cantt. put together.

TABLE B-II

B—III Part A Industrial Classification of Workers and Non-Workers by Educational Levels in Urban areas only

TABLE B-III PART A

(Industrial classification of Workers and Non-workers by educational levels in urban areas only).

This table relates to urban areas viz., Delhi Urban, D.M.C. Urban tract and its seven zones, New Delhi and Delhi Cantt. Each of the nine categories of workers and also the non-workers have been cross tabulated by literacy and educational levels. The educational levels given are:

Agriculture;
Veterinary and Dairying;
Technology;
Teaching; and
Others.

Total;
Illiterate;
Literate (without educational level);
Primary or Junior Basic;
Matriculation or Higher Secondary;
Technical Diploma not equal to degree;
Non-technical diploma not equal to degree;
University degree or post-graduate degree other than technical degree;
Technical degree or diploma equal to degree or post-graduate degree;
Engineering;
Medicine;

This table shows the employment of persons of different educational levels among the various categories of workers.

As regards the educational levels shown in this table, it may be pointed out that persons who were able to read and write a simple letter but had not passed any recognised examination of 5th standard and above were classified as 'literate (without educational levels)'. Persons who had passed the 5th standard but had not passed the matriculation or higher secondary are shown under the educational level of 'Primary or Junior Basic'. All diplomas not equal to degree and of non-technical nature like proficiency in Oriental languages, etc., were classified as 'Non-technical diploma not equal to degree'.

TABLE B-III PART B

**B—IV PART-‘A’—Industrial Classification by Sex and Class
of Worker of persons at work at Household Industry**

TABLE B-IV PART A

(Industrial classification by sex and class of worker of persons at work at Household Industry)

The table has been prepared separately for Delhi total, Delhi Rural, D.M.C. Urban and its seven zones, New Delhi and Delhi Cantt. The Indian Standard Industrial Classification (I.S.I.C.), which has been given as an Annexure 'B' to the present volume, has been followed. Data have been furnished for Divisions 2 and 3 and their Major Groups in Industrial Classification. Data is given for the categories 'total', 'employee' and 'others'.

Household Industry.

Household Industry has been given special cognizance for the first time at the 1961 Census in view of the significant role that handicrafts and similar other production and servicing processes carried on a household industry basis play in the economy of the country and a different type of individual skill practiced by the workers engaged in such Household Industries which is quite different

from that needed of the factory workers in Organised Large Scale Industry, which also explains the difficulty of the inter-change of the craftsman in Household Industry with the workers in Large Scale Industry, though apparently both would appear to be engaged in a common industry as far as the industrial classification is concerned. For example, a factory worker i.e. a textile mill will not be able to produce a fine handloom cloth or vice versa; a toy maker at home cannot handle the production of moulded toys in a factory.

The definition of Household Industry has already been given in the 'Instructions to the Enumerators' given as an Appendix to the present volume.

A list of common Household Industries in the country with their industrial code numbers, prepared by the Registrar General, India is reproduced below:

B-IV Part 'C'—Industrial Classification by Sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation.

TABLE B-IV PART 'C'

(Industrial Classification by Sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation.)

It gives data about the Branch of Industry, Division, Major Group and Minor Group of I.S.I.C. for Delhi Total, Delhi Rural, D.M.C. Urban and its 7 zones, New Delhi and Delhi Cantt. Data for Total Workers, Workers at Household Industry and Workers in Non-household Industry, are available in this table.

A complete classification list giving the description of the Divisions, Major Groups and Minor Groups of the Standard Industrial Classification is given as Annexure 'B' to the present volume for guidance. In the Table itself only the number of the Division, Major Group or Minor Group is shown. The description of the Industry, Business or Service concerned can be found from Annexure 'B' referred to above.

TABLE B-IV PART C

B-IV PART-C—INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

Note:—

(a) In the case of D.M.C. (Urban), Zone I Shashdara, Zone II City Sadar Pahargani, Zone III Karol Bagh, Patel Nagar, Zone IV Civil Lines Sub-station, Zone V Transferred Area, Zone VI South Delhi, Zone VII West Delhi New Delhi and Delhi Cantt. 'Rural' figures are nil and have not been shown in the table. Figures for 'Total' and 'Urban' are identical and in these cases the figures have been presented for 'Total' only. The same figures may be read as for 'Urban'.

(b) In case of D.M.C. (Rural), the figures for 'Total' and 'Rural' are the same.

Minor Groups having less than 1 percent of workers of the respective division (Less than 0.5 percent in case of Minor Groups of Division 2 & 3) have not been shown in this table but have been shown in the Appendix to this Table. Divisions thus affected are marked with an asterisk.

**B-V. Occupational classification by sex of persons at
work other than cultivation**

B-V. OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This table has been prepared separately for Delhi total, Delhi Rural, D.M.C. (Urban) and its seven zones, New Delhi and Delhi Cantt. It gives the occupational classification of persons who are working in non-agricultural occupations. For this purpose, the National Classification of Occupations, which is given as Annexure 'C' to the present volume, has

been followed. Data have been furnished for each 'family' of the National Classification of Occupations. Separate data have been furnished for persons working in non-agricultural occupations and the main Industrial Categories adopted for the Primary Census Abstract.

OCCUPATIONAL DISTRIBUTION

The percentage distribution of workers in each Division to workers in different Occupational Divisions in the Delhi Territory is as shown below.

Percentage of workers in each Division to workers in all Divisions

7-8. Craftsmen, production process workers and labourers not elsewhere classified	280,563	35.44	88.31
9. Service, sport and recreation workers	105,924	13.38	95.10
X. Workers not classifiable by occupation	1,903	0.24	91.43

It will be seen that Occupational Division 7-8, craftsmen production process workers and labourers not elsewhere classified is the biggest group with 35.44 per cent. The second biggest is Division 2

of clerical and related workers with 17.73 per cent. The third rank goes to Division 3, relating to sales workers, which accounts for 14.71%.

Rural-urban Distribution

The predominantly urban concentrating of occupations is clearly brought out by Col. 4 of the above table.

Occupations and Broad Industrial Categories

The percentage distribution of workers for each Occupational Division in broad Industrial Categories III to IX is as follows:—

Percentage of workers in different Occupational Divisions by Categories of Economic Activity

Notes.— (1) Absolute figures are given in brackets.
(2) (—) denotes nil
(3) N denotes Negligible.

It will be observed that Occupational Division 0, 1, 2 and 9 are mostly in Category IX—Other Services. Occupational Division 3 is mostly in Category VII—Trade and Commerce. Occupational Division 4 is heavily concentrated in Industrial Categories III—Mining, Quarrying, Livestock Forestry etc. and in

Category IX, Other Services respectively. Occupational Division 5 is almost wholly in Industrial Category—III. Division 6 is largely concentrated in Category VIII—Transport, Storage and Communication.

Notes.— (1) N—Negligible (2) Brackets contain absolute figures. (3)(—) denotes nil.

It will be observed that majority of the workers in each of the Industrial Categories IV (Household Industry), V (Manufacturing other than Household Industry) and VI (Construction) are concentrated in Occupational Division 7-8 (Craftsmen, production process workers and labourers not elsewhere classified). Majority (53.5%) of the workers in Industrial Category III (Mining, Quarrying, Livestock, Forestry etc.) are placed in Division 4, followed by 28.8% in Division 7-8 and 72.8% of the total workers of Industrial Category VII (Trade and Commerce),

are in Division 3 (Sales Workers). Amongst workers in Industrial Category VIII, 56.5% are in Division 6, 24.4% in Division 7-8 and the rest in others. Of the total workers in Industrial Category IX, 28.2% are in Division 2 (Clerical and related workers), 27.6% in Division 9 (Service, Sport and Recreation Workers), 19.2% in Division 7-8, 13.9% in Division 0 (Professional, Technical and Related Workers), 7.3% in Division 1 (Administrative, Executive and Managerial Workers) and the rest in others.

It may be pointed out that some occupations in Table B-V may appear improbable under certain industrial categories. The following statement gives the appropriate industrial categories in which they

can be classified. In all these cases, the industrial categories reported in Census have not, however, been disturbed.

NOTE.—

(i) In the case of D.M.C. (Urban), Zone I Shahadara, Zone II City Sadar Paharganj, Zone III Karol Bagh Patel Nagar, Zone IV Civil Lines Subramandi, Zone V Transferred Area, Zone VI South Delhi, Zone VII West Delhi, New Delhi, and Delhi Cantt. 'Rural' figures are nil and have not been shown in the table. Figures for 'Total' and 'Urban' are identical and in these cases the figures have been presented for 'Total' only. The same figures may be read as for 'Urban'.

(ii) In case of D.M.C. (Rural), the figures for 'Total' and 'Rural' are the same.

(iii) Occupational families having less than 1% of workers of the respective occupational division other than Division 7-8 and less than 0.5 per cent in the case of Division 7-8 are not exhibited in this table but have been shown in the Appendix to this Table. Occupational Divisions thus affected are marked with an asterisk.

B-VI. Occupational Divisions of persons at work other than cultivation classified by Sex, Broad Age-Groups and Educational levels in Urban Areas only.

B-VI. Occupational Divisions of Persons at work other than cultivation classified by Sex. Broad Age-Groups and Educational Levels in Urban Areas only.

This is a new table introduced for the first time in 1961. The literate workers under each occupational division are classified by broad age-groups: 0-14, 15-34, 35-59 and 60 + and further classified according to educational levels, viz, literate (without educational levels), Primary or Junior Basic, Matriculation or Higher Secondary, Technical diploma not equal to degree, Non-technical diploma not equal to degree, University degree or post-graduate degree other than technical degree and Technical degree or diploma equal to degree or post-graduate degree under the heads Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and Others.

The distribution of total workers by broad age-groups for each occupational division is not available and not shown under columns 3, 4 and 5.

All the occupational divisions are spelt out below in terms of their description so as to facilitate the reading of the table.

Divisions.

0. Professional, Technical and Related Workers.
1. Administrative, Executive and Managerial Workers.
2. Clerical and Related Workers.
3. Sales Workers.
4. Farmers, Fishermen, Hunters, Loggers and Related Workers.
5. Miners, Quarrymen and Related Workers.
6. Workers in Transport and Communication Occupations.
- 7-8. Craftsmen, Production Process Workers and Labourers not elsewhere classified.
9. Service, Sport and Recreation Workers.
10. Workers not classifiable by occupation.

Lines with nil entries have been omitted.

dary work (i) At Household Industry (ii) As
Cultivator or (iii)As Agricultural Labourer.**

B VII—Part A. Persons working principally (i) As Cultivators (ii) As Agricultural Labourers or (iii) At Household Industry classified by sex and By secondary work (i) At Household Industry (ii) As Cultivator or (iii) As Agricultural Labourer.

This table has been prepared for total, rural and urban. It also gives data separately for D.M.C. (Urban) and its seven zones. The relevant figures in the case of New-Delhi and Delhi Cantt, are nil and so these units do not appear in this table.

This table is prepared for the persons whose principal work is given as cultivator, agricultural labourer or working at household industry and whose secondary work is any one of the remaining two categories.

In case of persons engaged in more than one productive activity that which occupied most of his time, was considered as his principal work. The principal work was distinguished by a ring round

one of the four economic questions; viz, 8, 9, 10 and 11 of the individual slip, viz., cultivator, agricultural labourer, household industry or non household industry respectively, which occupied most of his time. The secondary work was that which occupied most of his time next to his principal work. Whenever a person followed only two activities, the activity other than the principal work was treated as secondary work. However in case of workers having more than two activities, the secondary work was distinguished by a tick on the right hand side of the question number.

The principal work viz., cultivator, agricultural labourer or household industry is shown with division and major group as against secondary work in the columns.

B—VII—PART 'A' PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER.

Note (i) In the case of D.M.C. (Urban), Zone I Shahdara, Zone II City Sadar Paharganj, Zone III Karol Bagh Patel Nagar, Zone IV Civil Lines Subzimandi, Zone V Transferred Area, Zone VI South Delhi, Zone VII West Delhi, New-Delhi and Delhi Cantt, 'Rural' figures are nil and have not been shown in the table. Figures for 'Total' and 'Urban' are identical and in these cases the figures have been presented for 'Urban' only. The same figures may be read as for 'Total'.

(ii) In case of D.M.C. (Rural), the figures for 'Total' and 'Rural' are the same.

**B-VII Part 'B'—Industrial Classification By Sex of Persons
working in Non-Household Industry, Trade,
Business, Profession or Service who are also
engaged in Household Industry.**

B—VII Part—B—Industrial classification By Sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry.

In this table, the principal work, *viz.*, industrial classification of the non-household industry is given by divisions and major groups and the additional work, *viz.*, household industry is also given by divisions and major groups. This part is prepared by cross-tabulation of persons whose principal work is non-household industry, trade, business, profession or service and who also work in household industry. In such cases Q11. is marked with a ring and there

is also an entry in Q10. The additional work in this table is confined to household industry only.

This table has been prepared for total, rural, urban, D.M.C. (Urban) and its seven zones. The relevant figures in the case of Zone I, Zone IV, Zone V and Zone VII are nil and so these units do not appear in the table.

B-VIII Part A—Persons Unemployed Aged 15 and above by Sex, Broad Age-groups and Educational Levels in Urban Areas Only

This table gives classification of unemployed persons aged 15 and above by their educational levels and broad age-groups. The unemployed persons have been divided into two categories viz., (i) those who are seeking employment for the first time and (ii) those persons who were employed before but now out of employment and seeking work. The age-groups adopted in case of (i) are quinquennial viz., 15–19, 20–24, 25–29, 30–34 and 35+, and those for (ii), are 15–19, 20–24, 25–34, 35–44,

45–59, and 60+. The age-groups are further cross-tabulated with different educational levels. The educational levels are the same as shown in Table B-III Part A.

This table has been prepared for Delhi Urban, D.M.C. (Urban) and its seven Zones, New-Delhi and Delhi Cantt.

Lines with nil entries have been omitted.

B-IX. Persons not at work classified by sex, Broad Age-Groups and Type of Activity.

The table gives figures for Delhi Total, Rural, Urban, D.M.C. (Rural), D.M.C. (Urban) and its seven zones, New-Delhi and Delhi Cantt. The activities of non-workers have been classified among the following eight categories :-

- (1) Full time students.
- (2) Household duties.
- (3) Dependents, infants and disabled persons.
- (4) Retired persons, rentiers or persons of independent means.
- (5) Beggars, Vagrants, etc.
- (6) Inmates of penal, mental and charitable institutions.
- (7) Persons seeking employment for the first time.
- (8) Persons employed before but now out of employment and seeking work.

Persons in each of the above categories have been classified further according to sex and age-groups 0-14, 15-34, 35-59 and 60+. This kind of tabulation was never attempted before, nor were questions even asked on the activities of non-workers. The eight categories are based on the recommendations of the United Nations.

B- (II) HOUSEHOLD ECONOMIC TABLES

HOUSEHOLD ECONOMIC TABLES

The Household Economic Tables are a special feature of the 1961 Census in that economic data are for the first time collected and tabulated on the basis of household. They are prepared from Household Schedules by mechanical tabulation on a 20 per cent sample of households.

B-X—Sample Households (i) engaged neither in Cultivation nor Household Industry, (ii) engaged either in Cultivation or Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry for all areas.

B-XI—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately.

B-XII—Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately.

B-XIII—Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately.

B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in all areas.

Part-A—Households classified by major groups of Principal Household Industry and number of persons engaged.

Part-B—Households classified by minor groups of Principal Household Industry.

B-XV—Sample Households engaged both in Cultivation and Household Industry classified by size of land in Rural and Urban areas separately.

B-XVI—Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in all areas.

B-XVII—Sample Households classified by size and participation in Household Cultivation or Industry.

The tables aforesaid give all possible data relating to the extent of land under cultivation by household (i) owned or held from Government, (ii) held from private persons or institutions for payment in money, kind or share, and (iii) given to private persons for cultivation for payment in money, kind, or share, local name of right on land under cultivation, nature of Household Industry, period of working of Household Industry and the number of persons employed therein either as family workers or as hired workers.

For the purposes of sampling, the following method described in letter No. 6/6/59-RG dated the 9th May, 1961 from the Deputy Registrar General was followed.

"The method of taking out the sample has already been prescribed in the Summary of Proceedings of the Second Conference. Every 5th household from the first random household will be taken. The sample households will be marked continuously for rural areas of a taluka/mahal and for urban areas of a district, i.e., households left over in a household book should be carried over to the next household book for the selection of sample households. Thus, to start with all the pads of household schedules of one taluka/mahal should be arranged in order to ascending number of the location codes of villages. Secondly, the random number necessary to make a start should be picked up. Thirdly, the first schedule chosen will correspond to this random number. Thereafter the samples will be continuously picked up without a break until the last pad of the taluka/mahal is exhausted. This procedure is essential to ensure the quality of the sample. The sample household will be indicated by a bold tick at the right hand corner."

B-X—Sample Households (i) Engaged neither in Cultivation nor Household Industry (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas.

B-X. Sample Households (i) Engaged neither in Cultivation nor Household Industry, (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas.

This table is prepared on a 20% sample of households. All the households are divided into the following four categories:

- (i) households engaged neither in cultivation nor household industry;
- (ii) households engaged in cultivation only;
- (iii) households engaged in household industry only; and
- (iv) households engaged both in cultivation and household industry.

The material is presented separately for Delhi Total, Rural, Urban, D.M.C. (Urban) and its seven Zones, New Delhi and Delhi Cantt. In the table the figures against the columns Rural are nil in the cases of Delhi Urban, D.M.C. (Urban) and its seven Zones, New Delhi and Delhi Cantt., as these areas are exclusively of urban in nature and do not include rural area at all. In the case of D.M.C. (Rural) the figures against Urban are nil.

Economic data was never collected or tabulated on a household basis in the past censuses.

B.—XI Sample Households Engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban areas separately.

B—XI Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban areas separately.

This table is prepared on the basis of 20% sample of households. Cultivated households are classified according to the size of land in acres and cross tabulated by the interest in land cultivated.

The classification by size of land cultivated is in ten size groups and is shown by the horizontal spread in columns 3 to 13. The size group are as follows:—

- (1) Less than 1 acre;
- (2) 1.0 to 2.4 acres;
- (3) 2.5 to 4.9 acres;
- (4) 5.0 to 7.4 acres;
- (5) 7.5 to 9.9 acres;
- (6) 10.0 to 12.4 acres;
- (7) 12.5 to 14.9 acres;
- (8) 15.0 to 29.9 acres;
- (9) 30.0 to 49.9 acres;
- (10) 50.0 acres and above.

A last group of 'Unspecified' size is shown in column 13 and consists of the sample households for which area of land cultivated had not been recorded at the Census.

The interests in land are classified into the following three categories and are shown by a vertical spread under column 1 only by abbreviations (1), (2) & (3) used for the three types as follows:—

- (1) Owned or held from Government;
- (2) Held from private persons or institutions for payment in money, kind or share;
- (3) Partly held from Government and partly from private persons for payment in money, kind or share.

This table has been prepared for D.M.C. (Rural), Delhi (Urban), D.M.C. (Urban) and its seven zones, New-Delhi and Delhi Cantt.

Lines with nil entries have been omitted.

B—XII. Sample Households engaged in Cultivation only classified by size of land Cultivated and number of family workers and hered workers in Rural and Urban areas separately.

This table has been prepared on a basis of 20% sample. It gives data for D.M.C. (Rural) Delhi Urban, D.M.C. (Urban) and its seven zones, New Delhi and Delhi Cantt. In this table a further study of households that are engaged only in cultivation has been made. Each household having a particular size of holding mentioned in table B-XI has been

cross-tabulated with reference to the number of persons working in cultivation. In the case of households where more than one person are working, the number of family workers and hired workers has been shown separately.

Lines with nil entires have been omitted.

TABLE B-XII

B-XIII. Sample Households engaged both in Cultivation and Household Industry showing size of Land cultivated classified by Principal Household Industry in Rural and Urban areas separately.

B—XIII. Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and urban areas separately.

This table has been prepared on 20% sample of households. It gives data for D.M.C. (Rural), Delhi Urban, D.M.C. (Urban) and Delhi Cantt. The classification by size of land cultivated is in ten size groups, viz., less than 1 acre, 1.0 to 2.4 acres, 2.5 to 4.4 acres, 5.0 to 7.4 acres, 7.5 to 9.9 acres, 10.0 to 12.4 acres, 12.5 to 14.9 acres, 15.0 to 29.9 acres, 30.0 to 49.9 acres, 50 acres and above and is shown by a horizontal spread in columns 3 to 12. The last group of 'Unspecified' size is shown in column 13 and consists of the sample households for which

area of land cultivated had not been recorded at the Census.

Lines with 'Nil' entries have not been presented in the table.

The description of divisions, major groups and minor groups is appearing at pages 85 to 94 of this volume.

B-XV. Sample Households Engaged both in cultivation and Household Industry classified by size of Land in Rural and Urban areas separately.

B—XV. Sample Households engaged both in Cultivation and Household Industry classified by size of Land in Rural and urban areas separately.

The classification of households by the number of persons engaged is in five types *viz.*, households with 1 person engaged, 2 persons engaged, 3 to 5 persons engaged, 6 to 10 persons engaged and more than 10 persons engaged. The last group of 'Unspecified' type is shown and consists of the sample households for which the number of persons engaged had not been recorded at the Census. The number of family workers and hired workers are shown under each of the above five types. The number of family workers is also shown for male and female.

The classification by size of land cultivated is in ten groups and is shown by vertical spread under column 1. The size group are as follows:—

- (1) Less than 1 acre;
- (2) 1·0 to 2·4 acres;
- (3) 2·5 to 4·9 acres;
- (4) 5·0 to 7·4 acres;

- (5) 7·5 to 9·9 acres;
- (6) 10·0 to 12·4 acres;
- (7) 12·5 to 14·9 acres;
- (8) 15·0 to 29·9 acres;
- (9) 30·0 to 49·9 acres;
- (10) 50·0 acres and above.

A last group of 'Unspecified' size is shown which consists of the sample households for which area of land cultivated had not been recorded at the Census.

The table is based on 20% sample of the households and is prepared for Delhi Rural, Delhi Urban, D.M.C. (Urban) and its seven zones and Delhi Cantt. In the case of zone III Karol Bagh, Patel Nagar, Zone V Transferred Area, Zone VII West Delhi; the figures are nil and as such these units do not appear in the table. Lines with nil entries have been omitted.

B.-XVII. Sample Households classified by (i) Number of Male and Female members by size of Households and (ii) Engagement

- (a) Neither in Cultivation nor in Industry**
 - (b) In Household Industry only and**
 - (c) In Cultivation sub-classified by size of Land Cultivated.**
-

B-XVII. Sample Households classified by (i) Number of male and female members by size of households and (ii) Engagement (a) Neither in Cultivation nor in Industry (b) In Household Industry only and (c) In Cultivation sub-classified by size of land cultivated.

The classification of households by size is into five groups, viz., (i) Single member; (ii) 2 to 3 members; (iii) 4 to 6 members; (iv) 7 to 9 members and (v) ten members and over.

The classification of households by economic activities is limited to rural areas only, which is in three types, viz., (1) households engaged neither in cultivation nor in household industry; (2) households engaged in household industry only; and (3) households engaged in cultivation. The last category i.e. the households engaged in cultivation have been further sub-classified by size of holdings (cultivated land) into ten groups, i.e., less than 1 acre; 1.0 to 2.4 acres; 2.5 to 4.9 acres; 5.0 to 7.4 acres; 7.5 to 9.9 acres; 10.0 to 12.4 acres; 12.5 to 14.9 acres; 15.0

to 29.9 acres; 30.0 to 49.9 acres; 50 acres and over. The last group of 'Unspecified' size represents households for which the area of cultivated land had not been recorded at the Census.

This table has been prepared on the basis of 20% sample of households and the material is presented separately for Delhi Total D.M.C. (Rural), D.M.C. (Urban) New Delhi and Delhi Cantt.

In case of D.M.C. (Rural), Urban figures are nil. In case of D.M.C. (Urban) New Delhi, Delhi Cantt, rural figures are nil. The figures have been presented for Urban only. The same may be read as for total.
