"The conception and practice of caste embodied the aristocratic ideal and was obviously opposed to democratic conceptions. It had its strong sense of *noblesse oblige*, provided people kept their hereditary stations and did not challenge the established order. India's success and achievements were on the whole confined to the upper classes, those lower down in the scale had very few chances and their opportunities were strictly limited. These upper classes were not small limited groups but large in numbers and there was also a diffusion of power, authority and influence. Hence they carried on successfully for a very long period. But the ultimate weakness and failing of the caste system and the Indian social structure were such that they degraded a mass of human beings and gave them no opportunities to get out of that condition educationally, culturally, or economically. That degradation brought deterioration, all along the line including in its scope even the upper classes. It led to petrification which became a dominant feature of India's economy and life. The contacts between this social structure and those existing elsewhere in the past were not great, but with the changes that have taken place all over the world during the past few generations they have become far more pronounced. In the context of society today, the caste system and much that goes with it are wholly incompatible, reactionary, restrictive and barriers to progress. There can be no equality in status and opportunity within its framework, nor can there be political democracy and much less economic democracy. Between these two conceptions conflict is inherent and only one of them can survive."

(Jawaharlal Nehru, *Discovery of India*, Page 234)

PREFACE

The present volume contains a series of Special Tables prepared for the Scheduled Castes and Scheduled Tribes which give an insight into their demographic, social and economic conditions. They are intended to supplement and, in some cases, elaborate the Tables prepared for the general population. In the 1961 Census, as in 1951, no questions were asked about the caste or tribal affiliation of an individual. But in view of the special safeguards provided in the Constitution for the Scheduled Castes and Scheduled Tribes, a question was asked of each individual whether he or she belonged to any of these communities. This enabled the separation of slips relating to the Scheduled Castes and Scheduled Tribes on the basis of which the Special Tables presented in this volume could be compiled.

During the past decade (1951-61) the Government have taken up several measures, through the Five Year Plans or otherwise, to improve the conditions of these communities by implementing suitable welfare schemes. Such efforts are still continuing. However, much difficulty has been experienced in the formulation as well as implementation of the welfare schemes for want of adequate data in regard to these communities. It was, therefore, felt that if more detailed tabulation is done at the 1961 Census in respect of the Scheduled Castes and Scheduled Tribes, the data thus thrown up would be useful in evaluating the progress that has been made by the members of these communities through the schemes undertaken during the First and the Second Five Year Plans (as the 1961 Census coincided with the completion of the Second Five Year Plan), as also in formulating schemes for the subsequent plans. Further, population figures for individual Scheduled Castes and Scheduled Tribes are often required and they are available at present only for some of them in the 1941 and previous Census Tables. Thus, these Special Tables are intended to fill up all these lacunae and serve in several other ways.

The salient aspects of the Tables have been briefly discussed in the Note. An attempt has been made to assess the position of the Scheduled Communities *vis-a-vis* the general population which, it is hoped, will provide a larger perspective in which the Special Tables will be more meaningful.

Ethnographic notes on each of the Scheduled Castes/Tribes will be published in Part V-B, in which the distribution of population of the major Castes/Tribes is also proposed to be studied for administrative units lower than a district. Relevant extracts from old publications on Castes and Tribes of Bihar are also proposed to be given in Part V-B.

I am greatly indebted to Sri K. D. Ballal, I.A.S., Central Tabulation Officer, Office of the Registrar General, India and his staff for a careful and thorough checking of the tables. Dr. B. K. Roy Burman, Officer on Special Duty, Handicrafts and Social Studies Section, kindly went through the draft Note and offered suggestions for improvement. Sri R. C. Nigam, Linguist helped in the rationalisation of language tables. I am under special obligation to both of them. My thanks are also due to the Job Printers for the care and interest in printing this volume.

PATNA :

January 16, 1965

S. D. PRASAD

Superintendent of Census Operations, Bihar.

I wish to place on record my grateful appreciation of the able assistance given by the following members of my Office in the preparation of the present volume :

Sri R. N. Misra	}	Deputy Superintendents of Census Operations
Sri U. P. Shrivastava		
Sri R. B. Singh	}	Tabulation Officers
Sri B. N. Gupta		
Sri R. B. Pandey		
Sri R. C. Sahu	}	Statistical Assistants
Sri Kanhaiya Lal		
Sri S. P. Verma	..	Tabulation Assistant
Sri Sheo Prasad	..	Proof Reader

NOTE*

SECTION I

GENERAL

The Background

The Indian sub-continent has been a veritable crucible which has, through the ages, seen the fusion of diverse races and cultures. Its vast riches tempted successive intrusions by immigrants and invaders who were undaunted by the physical barriers that nature placed in their way. The clash of foreign, and often antagonistic, cultures presumably led to a gradual stratification of the society and its various segments ; and an important, if not over-riding, consideration behind it was the preservation of racial identity and purity. Thus emerged the peculiar institution of caste, the like of which is to be found only in few other parts of the world at present. The caste system is said to have played a significant part in the survival of Hindu culture in the face of numerous political conquests during the last several centuries. At the same time it has also been responsible for engendering and promoting fissiparous tendencies in society and, more particularly, for perpetuating the low social and economic status of the socially inferior groups.

2. The caste system, and the individual castes and tribes, have formed fruitful topics for investigation and research for more than a hundred years by administrators, anthropologists and sociologists, both Indian and foreign. However, theories about the origin of caste are almost as numerous as there are writers on the subject. Yet the keen interest and indefatigable industry of the past researchers have left a mass of literature which is characterised as much by wealth of detail as by commendable objectivity of approach.

3. From the first regular Indian Census of 1872, caste and tribal denominations of the population have been regularly recorded till 1941, though variations exist in the extent of detailed tabulation. Census officials diligently strove to sort out and classify the innumerable returns. It is not without reason that the enumeration and tabulation of castes and tribes has been held to be one of the most complicated and perhaps the least dependable among Census statistics. Even so, the mere recording of castes and tribes was not enough, and attempts were made to work out social gradations and, more particularly, the evaluation of the numbers of the less fortunate groups as well as the social and religious disabilities suffered by them.

4. For the first time, caste as such was not recorded in the Census of 1951. Instead of a question of "race, tribe or caste", as in the past, the question in the Individual Slip was headed "special groups". The caste or tribe of a person was entered if he belonged to the "Scheduled Castes", or "Scheduled Tribes" or "Backward Classes".

SCHEDULED CASTES AND SCHEDULED TRIBES
IN 1961 CENSUS

5. The recording of castes for the general population was dispensed with in the 1961 Census also. However, in better fulfilment of the constitutional responsibilities, a more detailed tabulation of statistics relating to the Scheduled Castes and Scheduled Tribes was undertaken. The collective population of the Scheduled Castes and the Scheduled Tribes severally have already been published for Districts, Towns and Anchals in the General Population Tables (*Census of India, 1961, Volume IV, Part II-A*) for Bihar. Similar figures in respect of individual villages are being published in the District Census Handbooks. The present volume seeks to present certain special tables for each Scheduled Caste and Scheduled Tribe upto the level of districts. The economic characteristics are brought out in Table SCT-I showing the industrial classification of persons at work and non-workers. Tables SC-I and ST-II give the break-up of the non-working population. The cultivating households have been classified by size of holding and nature of interest in land in Table SCT-V.

The demographic data relating to marital status by age-group for each Scheduled Caste and Scheduled Tribe are presented in Table SCT-II.

The social attributes of the Scheduled Communities are brought out by Tables SCT-III (Education and Literacy) and SCT-IV (Religion).

Thus, the gap that existed hitherto in the statistics available upto 1931 has not only been made up in 1961, but considerable additional data have also been compiled and tabulated. These are expected to serve as bench-mark data for future assessments, particularly in view of the concerted efforts being directed towards ameliorating the conditions of the Scheduled Communities.

DECLARATION OF CASTES AND TRIBES AS SCHEDULED

6. The Constitution of India envisages the ushering in of an egalitarian society ultimately in which the entire body of citizens would have equal opportunities for economic and political development, irrespective of barriers of caste or tribe. Yet, the pernicious caste system has produced vast inequalities of cultural, social and economic development among the various sections of the population. So it is imperative to provide adequate stimulus in the initial stages, during which period the less fortunate citizens can be expected to level up to the standard of the general population. Thus, one of the directive principles of State policy embodied in Article 46 of the Constitution provides,

"The State shall promote with special care the educational and economic interests

* The statements made and conclusions drawn in this Note are wholly the responsibility of the author alone in his personal capacity and do not necessarily represent the views of Government.

of the weaker sections of the people, and in particular, of the Scheduled Castes and the Scheduled Tribes, and shall protect them from social injustice and all forms of exploitation."

According to Article 341, the President may "with respect to any State or Union Territory, and where it is a State after consultation with the Governor thereof, by public notification, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory, as the case may be".

The Parliament may by law include in or exclude from the list of Scheduled Castes specified in a notification issued under clause (1) any caste, race or tribe or part of or group within any caste, race or tribe, but save as aforesaid a notification issued under the said clause shall not be varied by any subsequent notification.

The Scheduled Castes and Scheduled Tribes have been last notified under the Government of India, Ministry of Home Affairs' Notification No. SRO-2477, A, dated the 29th October, 1956, issued under Article 341 (1) and 342 (2) of the Constitution.

The statement below shows the Scheduled Castes and Scheduled Tribes notified with areas where scheduled and their populations:

SCHEDULED CASTES					
Sl. no.	Name of Castes/Tribes	Area where scheduled	Population, 1961		
			Persons	Males	Females

NOTE: Figures (P'16,930, M'8,257, F'8,673) under 'Unclassified' have not been shown.

The population of each Scheduled Caste and Scheduled Tribe is given in paragraphs 31 and 46.

7. The Scheduled Castes and Scheduled Tribes have been defined as such, there being no hard and fast criteria of selection. However, the Backward Classes Commission in their Report (Vol. I, page 46),

have observed that the question of rationalisation of the lists has been receiving constant attention, though a final decision has yet to be taken. It may be noted that in the present classification some of individual castes or tribes are entitled to avail of the special benefits and safeguards conferred upon them only in certain restricted areas. Sometimes these areas are smaller than a State. Thus, Bhuiya is a Scheduled Caste only in Patna, Gaya, Shahabad and Palamau districts. Bhumij is a Scheduled Tribe in some districts, a Scheduled Caste in others and non-scheduled in the rest.

TREATMENT OF PRESENTLY SCHEDULED CASTES AND SCHEDULED TRIBES IN PREVIOUS CENSUSES

8. It will be of some interest briefly to recapitulate the manner in which the above castes and tribes have been treated in earlier Censuses.

Scheduled Castes

9. In 1901 Risley, then Census Commissioner of India, attempted for the first time to classify the Hindu Castes according to their social standing. This, according to Mitra (Castes & Tribes of West Bengal, 1951, page i), resulted in "incidentally sowing the dragon's tooth of the 'depressed' and 'scheduled' castes". According to Risley's classification, the population was divided into seven categories as follows:

- (1) Brahmans.
- (2) Castes other than Brahmans, who rank above clean Sudras.
- (3) Clean Sudras.
- (4) Clean castes served by degraded Brahmans.
- (5) Castes other than group (4) whose water is not taken.
- (6) Unclean castes.
- (7) Unclean feeders.

16 of the 23 Scheduled Castes at present, comprising 96.3 per cent of the 1961 Scheduled Caste population, find place in the last two categories of the above classification. They are—

- (1) Bantar
- (2) Bhuiya
- (3) Chamar and Mochi
- (4) Chaupal
- (5) Dhobi
- (6) Dusadh including Dhari or Dharhi
- (7) Dom
- (8) Hari, Mehtar or Bhang
- (9) Halalkhor
- (10) Kanjar
- (11) Kurariar
- (12) Musahar
- (13) Nat
- (14) Pasi
- (15) Rajwar
- (16) Turi.

10. In the next Census in 1911, an enquiry was instituted to ascertain the castes and tribes (contributing

more than 1 per mille of the total population) which suffered specified religious and social disabilities. Those which—

- (1) denied the supremacy of the Brahmans;
- (2) did not receive *mantra* from a Brahman or other recognized Hindu guru;
- (3) denied the authority of the Vedas;
- (4) did not worship the great Hindu gods;
- (5) were not served by good Brahmans as family priests;
- (6) had no Brahman priests at all;
- (7) were denied access to the interior of ordinary Hindu temples;
- (8) caused pollution by touch or within a certain distance;
- (9) buried their dead;
- (10) ate beef and did not reverence the cow;

were separately listed, according to one or more of characteristics listed above. That only 12 of the presently Scheduled Castes were mentioned in the list is accounted for by the fact that only such castes as constituted one per mille of the total population were taken into consideration for preparing the table. However, the 12 castes finding place in the list constitute 92.9 per cent of the present Scheduled Caste population. They are—

- (1) Bhuiya
- (2) Chamar
- (3) Dhobi
- (4) Dusadh
- (5) Dom
- (6) Musahar
- (7) Pasi
- (8) Rajwar
- (9) Hari
- (10) Bauri
- (11) Bhumij
- (12) Pan.

11. Although the term "depressed classes" has been mentioned in the Census Report of 1921, the castes constituting such classes have not been defined. To quote the report,

"in recent years a new and even more evasive term, 'the depressed classes' has come into common use and these classes are now represented in 'the depressed classes' has never been stated but the term would appear to include a wider range of castes and tribes than the untouchables. If it is taken to include the Hindu untouchables plus the animistic tribes, plus the Hindu tribes which are largely animistic the total comes to about 10 million or something less than one third of the population of the province (Bihar and Orissa). It is hardly necessary to say that this estimate makes no pretence to accuracy".

12. The 'depressed classes' were more elaborately dealt with in the Census Report of 1931 in which 31 castes were listed. This includes all presently scheduled except Bantar and Dabgar, which together constitute less than 1 per cent of the present Scheduled Caste population.

13. The "Scheduled Castes" were defined in the Government of India Scheduled Castes Order, 1936 (based upon the Government of India Act, 1935) and enumerated in the Census of 1941. However, neither were the castes specified in the Census publication nor caste wise figures published except for few which were included among 'tribal communities.' Most of the Scheduled Tribes were, however, separately enumerated.

14. Appendix III gives the combined list of—

- (i) 28 'unclean castes' and 'unclean feeders' of 1901 ;
- (ii) 37 castes suffering from religious disabilities as listed in 1911 ; and
- (iii) 31 depressed classes of 1931.

9 Scheduled Castes given below are common to the three lists and constitute 91.5 per cent of the Scheduled Caste population in 1961:

- (1) Bhuiya (2) Chamar (3) Dhobi (4) Dusadh
- (5) Dom (6) Hari or Bhangri (7) Musahar (8) Pasi
- (9) Rajwar.

Chaupal, Halalkhor, Kanjar, Kurariar, Nat and Turi are common to the lists of 1901 and 1931 while Bauri, Bhumij and Pan are common to the lists of 1911 and 1931. The remaining castes are Bantar, Ghasi Lalbegi and Dabgar of which Dabgar is mentioned in 1901, Ghasi and Lalbegi in 1931 and Dabgar not at all. Thus it is seen that 19 out of 23 castes presently scheduled are common to two or more of the previous lists, and four castes that remain are comparatively minor, collectively constituting only 1.6 per cent of the Scheduled Caste population of 1961.

It would thus appear that irrespective of the efforts made for the amelioration of the conditions of the backward classes, the classifications and lists prepared in the first three decades of the present century form the basis on which the list of Scheduled Castes has been formulated.

Scheduled Tribes

15. The Scheduled Tribes essentially constitute an element outside the pale of Hindu influence, notwithstanding the fact that the majority of them have in the present Census returned Hinduism as their religion. The evolution of tribes into castes has received considerable attention from sociologists, though the borderline between a caste and a tribe is generally difficult to determine. Many of the presently Scheduled Castes were considered to be tribal communities in the not too distant past and some are so considered even now. Thus the Backward Classes Commission (1955) had recommended that Bhogta and Rajwar which are Scheduled Castes, should be classified as Scheduled Tribes and that Bhuiya and Bhumij should also be classed as Scheduled Tribes throughout the State. In addition to the aforesaid four communities the Commission recommended the inclusion of 24 other communities in the list of Scheduled Tribes.

16. In the first Census of 1872, Indians were classified into five categories as follows :

- (1) Aboriginal Tribes.
- (2) Semi-Hinduised Aborigines.
- (3) Hindus.
- (4) Persons of Hindu origin not recognising caste.
- (5) Mohammadans.

18 of the present Scheduled Tribes were listed under category (1) in that Census. They are—(1) Asur, (2) Binjhia, (3) Gond, (4) Ho, (5) Kharia, (6) Kharwar, (7) Khond, (8) Kisan, (9) Korwa, (10) Mal Paharia, (11) Munda, (12) Oraon, (13) Santal, (14) Sauria Paharia, (15) Savar, (16) Bhumij, (17) Birhor and (18) Chero. 4 Scheduled Tribes were classified as semi-Hinduised aborigines, viz., (1) Banjara, (2) Bathudi, (3) Chik Baraik and (4) Mahli. Kora was mentioned as a labouring Hindu caste.

17. The Census of 1931 listed 24 tribes, mentioning that "each should undoubtedly be regarded as aboriginal though in some cases the process of absorption into Hinduism had already gone a long way." Of the present Scheduled Tribes the following were included in this list—Asur, Bathudi, Bhumij, Birhor, Birjia, Chero, Gond, Ho, Karmali, Kharia, Kharwar, Khond, Korwa, Kora, Mal Paharia, Munda, Oraon, Santal, Sauria Paharia and Savar. These 20 tribes constitute 93.7 per cent of the Scheduled Tribe population in 1961. An additional list of 17 tribes of Munda or Dravidian origin was also given and this included the following seven among the Scheduled Tribes—Banjara, Binjhia, Chik Baraik, Gorait, Korwa, Mahli and Parhaiya. Thus only three of the currently Scheduled Tribes namely Baiga, Lohra and Bedia were not mentioned in 1931. These constitute only 3.14 per cent of the present tribal population.

18. In 1941, as many as 60 castes and tribes were included under the classification "tribal communities", although the list also contained some castes which had already been scheduled under the Government of India Scheduled Castes Order, 1936. This list included each of the 30 tribes presently scheduled.

19. It would appear that the bulk of the Scheduled Tribes have always been regarded as lying outside the periphery of the Hindu Social structure.

RECORDING OF SCHEDULED CASTES AND SCHEDULED TRIBES IN THE 1961 CENSUS

20. Question No. 5 (c) of the Individual slip was headed SC/ST. Instructions given to enumerators for filling the answers to this question are reproduced below :

"The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of

the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion."

In spite of specific instruction on the point, vague returns were found both for the Scheduled Castes and the Scheduled Tribes. Often the enumerators considered their work complete after simply having written 'SC' or 'ST' without caring to enquire about and record the name of the specific caste or tribe. 'Harijan' was a name quite often returned for Scheduled Castes and 'Adivasi' or 'Kol' for Scheduled Tribes. However, there was little doubt that the person so returned did, in fact, belong to a Scheduled Caste/Tribe. Hence it was decided that in order to avoid undue depletion in the population of the scheduled communities by ignoring such returns, they should be grouped under "unclassified", separately for Scheduled Castes and Scheduled Tribes.

21. There were 16,930 slips containing vague entries in respect of Scheduled Tribes, the population involved being 0.40 per cent of the total tribal returns. A considerably greater proportion of the vague returns was obtained with regard to Scheduled Castes. 153,882 persons so returned constituted 2.35 per cent of the total Scheduled Caste population. A good portion of the 'unclassified' members of the Scheduled Castes, have figured in the tables due to erroneous enumeration and tabulation. Thus members of the Bhuiya and Bhumij castes, who are Scheduled Castes only in certain specified districts (*vide supra*) were enumerated and tabulated as Scheduled Castes even in other districts where they are not scheduled.

Altogether 31,909 persons were so recorded according to the following break-up :

Bhuiya		Bhumij	
District	Population	District	Population
1 Monghyr	4	1 Santal Parganas	10
2 Bhagalpur	4	2 Singhbhum	4
3 Purnea	5		
4 Santal Parganas	78		
5 Hazaribagh	4,260		
6 Dhanbad	26,512		
7 Singhbhum	1,032		
Total	31,895		14

22. The lists of Scheduled Castes and Scheduled Tribes as given in the Scheduled Castes and the Scheduled Tribes Modification Order, 1956, gives only the names of the main Castes or Tribes and synonyms in some cases only. However, a caste is often known by a local name which may be either a generic name or a synonym of the main caste name. Similarly, a tribe may sometimes be locally known by the name of one of the sub-tribes or clans. While it was beyond the scope of the Census to modify the President's Order in any way, it was felt that it would be useful to ascertain for each district whether any generic names or synonyms of a Scheduled Caste or names of sub-tribes or clans of a Scheduled Tribe were prevalent. It was hoped that the preparation of the lists of prevalent names would facilitate the enumerators in covering the scheduled community population more adequately than if they were simply given the list of Scheduled Castes and Scheduled Tribes as contained in the Presidential Order. Accordingly the District Officers were requested to investigate into the matter and suggest a list of prevalent names of the Scheduled Castes/Tribes which might be dovetailed into the lists of castes and tribes as appearing in the Presidential Order. This was done in May, 1959. The suggestions of the District Officers were considered in the meeting of the Scheduled Castes Advisory Board held on the 3rd June, 1960. This meeting confirmed most of the local variants reported by the District Officers but also made a few additions to synonyms of individual Scheduled Castes. Similarly, the list of variants of Scheduled Tribes was considered by the Bihar Tribal Advisory Committee in a meeting held on the 1st June, 1960. It was, however, thought that the amplifications with regard to the names of the Scheduled Tribes in the Presidential Order could only be suggested after detailed enquiries. The suggestions of the Bihar Scheduled Castes Advisory Board were again circulated to the District Officers but differences of opinion continued to persist. Moreover, it was apprehended that under the guise of including prevalent synonyms, some interested parties might seek to get distinct communities included in the lists of Scheduled Castes and Scheduled Tribes. In the absence of detailed investigations, it was considered that no useful purpose would be served by circulating the list of alternative names to enumerators, since there could be no uniformity of approach with regard to it. For, in any case, the instructions given to enumerators were sufficiently elastic to enable them to record all such castes and tribes which were known by locally varying

names but which could nonetheless be identified with reference to the main castes or tribes which found place in the Presidential Order. However, these lists

of synonymous and generic names proved useful at the sorting and compilation stage in deciphering doubtful or vague entries.

SECTION 2

DISTRIBUTION OF SCHEDULED CASTES AND SCHEDULED TRIBES

General

23. The Scheduled Castes and the Scheduled Tribes together constitute a little more than one fifth (21.52 per cent) of the country's population. Their total population is 94.39 millions, of which 10.74 millions are in Bihar. Thus, Bihar contains 11.38 per cent of the total population of the Scheduled Castes and the Scheduled Tribes in India, while the corresponding percentage on the total general population is 10.59. It follows that Bihar has a greater concentration of the Scheduled Communities than the country as a whole.

24. Among the States, Bihar ranks third in India both with regard to the Scheduled Castes and the Scheduled Tribes population. Its 6.54 million members of Scheduled Castes constitute 10.14 per cent of the country's Scheduled Castes population. Uttar Pradesh contributes 23.9 per cent and West Bengal 10.77 per cent to the country's Scheduled Castes population.

25. Scheduled Tribes in Bihar number 4.2 million and constitute just less than 1 per cent (0.96 per cent) of the country's population. They form 14.07 per cent of the tribal population of India. Madhya Pradesh and Orissa contribute 22.36 per cent and 14.1 per cent to the tribal population of India respectively.

It is thus seen that Uttar Pradesh and Madhya Pradesh contain the highest concentrations of Scheduled Castes and Scheduled Tribes respectively, but Bihar is not far behind either West Bengal or Orissa.

26. In spite of its large population of scheduled communities, being a densely populated State, the relative proportion of the population of the Scheduled communities to the State's population is only 23.12 per cent in Bihar. 5 other States have a larger percentage of Scheduled Communities to the population of the State. They are—

- | | |
|--------------------|-------------------|
| (1) Orissa | .. 39.82 per cent |
| (2) Madhya Pradesh | .. 33.77 per cent |
| (3) Rajasthan | .. 28.13 per cent |
| (4) West Bengal | .. 25.81 per cent |
| (5) Assam | .. 23.59 per cent |

27. It is significant that although Uttar Pradesh has more members of the Scheduled Castes than the

total numbers of Scheduled Communities in any other State, again being densely populated, the percentage of Scheduled Communities (there are no Scheduled Tribes in the State) is only 20.91 per cent.

DISTRIBUTION OF SCHEDULED CASTES AS A WHOLE

28. Within the State itself, the Scheduled Castes as a whole are distributed in all the districts, though they are generally to be found in greater numbers in North Bihar, i.e., the area to the north of the Ganga. This seems to be in conformity with the hypothesis that the non-Aryans of North Bihar were reduced to a servile and baser section of society, where as those of South Bihar largely retained their separate entities and continued to exist as tribes.

29. Out of every 100 members belonging to the Scheduled Castes in Bihar, 14 come from Gaya, 10 from Darbhanga and 9 from Muzaffarpur. Monghyr, Shahabad, Patna, Champaran, Purnea and Saran contribute between 5 and 8 each. Only Singhbhum contributes less than 1.

The ratio of the Scheduled Caste population to the district population is however the highest in Palamau (25.93 per cent) and only a little less in Gaya (24.54 per cent). It varies from 15 to 20 per cent in Dhanbad, Saharsa, Shahabad, Patna and Monghyr districts; and from 10 to 15 per cent in the entire North Bihar (excluding Saharsa), comprising Saran, Champaran, Muzaffarpur, Darbhanga and Purnea districts. Bhagalpur and Hazaribagh also fall in the same category. It is only in Santal Parganas (7.56 per cent), Ranchi (4.55 per cent) and Singhbhum (2.97 per cent), all strongholds of the Scheduled Tribes, that the Scheduled Caste population is less than 10 per cent of the district population.

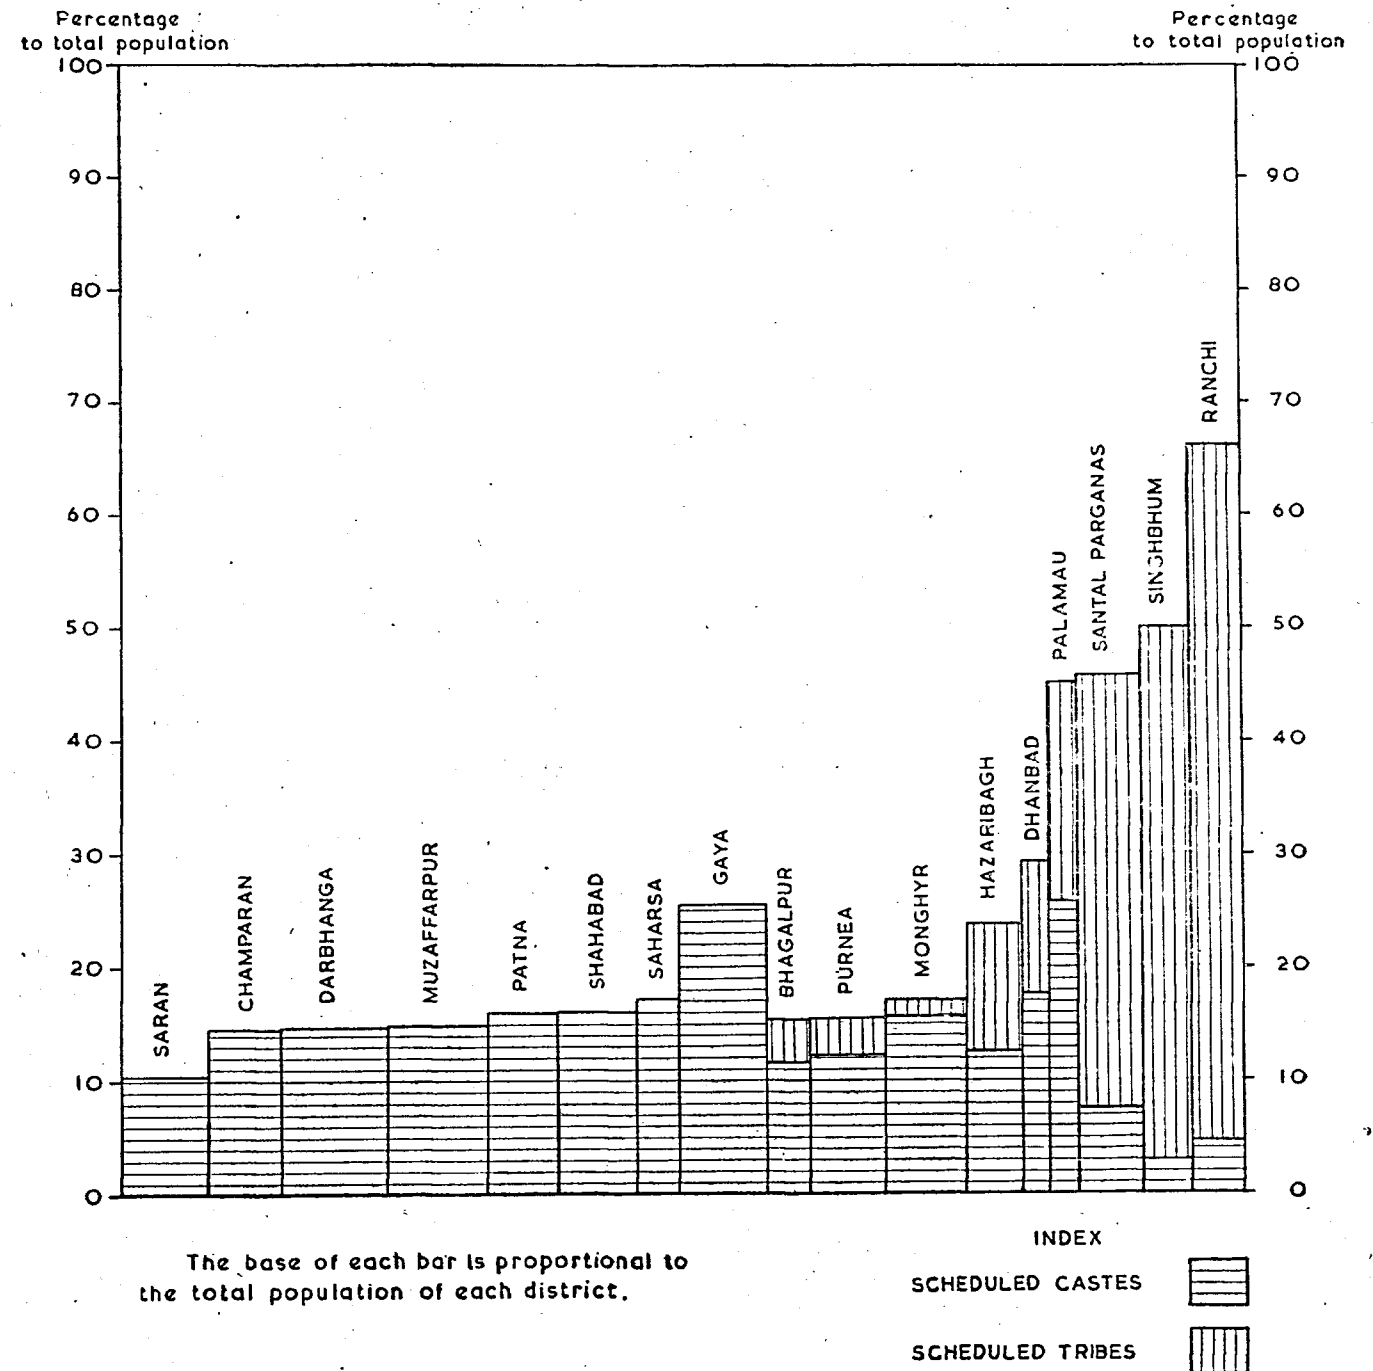

Individual Scheduled Castes

30. There are 23 Scheduled Castes in Bihar. For Census purposes, there is another category comprising 'Harijans' or persons belonging to Scheduled Castes whose specific castes were not properly enumerated. Thus for the purposes of discussion there are 24 categories in the Scheduled Caste population of Bihar.

31. The statement in the next page shows the population of each Scheduled Caste and the ratio of members of each caste to the total Scheduled Caste population. The castes have been arranged in order of their numerical strength.

BIHAR

DISTRICTWISE PROPORTION OF SCHEDULED CASTES AND SCHEDULED TRIBES, 1961

STATEMENT

Population of Scheduled Castes in Bihar and their distribution per thousand of all Scheduled Castes, 1961

Sl. no.	Name of Caste -	Population	Distribution per 1,000 members of Scheduled Castes
1	2	3	4
1	Chamar	1,895,179	289.92
2	Dusadh	1,724,553	263.82
3	Musahar	1,007,340	154.10
4	Bhuiya	360,495	55.15
5	Dhobi	332,245	50.83
6	Pasi	260,087	39.79
7	Dom	158,638	24.27
8	Rajwar	155,174	23.74
9	Unclassified	153,882	23.54
10	Turi	90,436	13.83
11	Hari	90,162	13.79
12	Bhogta	87,733	13.42
13	Bauri	76,057	11.64
14	Ghasi	55,034	8.42
15	Bantar	45,048	6.89
16	Pan	14,767	2.26
17	Nat	12,154	1.86
18	Chaupal	10,214	1.56
19	Dabgar	3,104	0.47
20	Halalkhor	2,947	0.45
21	Bhumij	533	0.08
22	Kanjar	445	0.07
23	Lalbegi	336	0.05
24	Kurariar	312	0.05
Total		6,536,875	1,000

32. There is a large variation in the numbers of different castes ranging from a few hundreds to almost two millions. The first 8 castes (each over 100,000 in number), along with Harijans, account for over 92 per cent of the total Scheduled Caste population of the State. Chamar, Dusadhs and Musahars, who numbers more than a million each, comprise more than two-thirds (71 per cent) of the Scheduled Castes population. Contrarily, the 9 least populous castes account for less than 1 (0.7) per cent.

33. Generally, the less numerous castes are concentrated in well marked pockets while the more populous ones are rather diffused throughout the State, though they are relatively fewer in the Chotanagpur Plateau.

34. Appendix I gives the district wise distribution of 1,000 persons of each Scheduled Caste in Bihar.

Chamar

35. The Chamars are distributed throughout the State, and there is no district in which they are not to be found. They are in largest numbers in the north-western part of the State. Their numbers

decrease gradually as one proceeds to the east and the south. Champaran, Saran, Muzaffarpur and Shahabad each contain more than 10 per cent of the Chamar population. The adjoining districts of Darbhanga, Patna, Gaya, Hazaribagh and Monghyr contain between 5 and 10 per cent each. Saharsa, Purnea, Bhagalpur, Santal Parganas and Palamau have 2-5 per cent each. Only Ranchi and Singhbhum contribute less than 1 per cent each.

Dusadh

36. The central districts of Bihar (excluding the Chotanagpur plateau) contain the highest concentrations of Dusadhs. Muzaffarpur, Darbhanga, Patna, Gaya and Monghyr each contain more than 10 per cent while Champaran, Saran and Shahabad contain 6-8 per cent each. Only 2-3 per cent are found in Palamau and Hazaribagh, the other four districts of the Chotanagpur Plateau contributing less than 1 per cent each.

Musahar

37. The Musahars predominate in the three north-eastern districts of Darbhanga, Saharsa and Purnea, and in Monghyr district which contains the highest number.

38. Taking the above three most numerous Scheduled Castes together, an interesting pattern emerges. 10 districts of Bihar (excluding 6 of the Chotanagpur Plateau and Bhagalpur), each contain more than 10 per cent of the total population of one or two of the three castes. The distribution of each caste is also rather marked. The Chamars are numerous in the west, Dusadhs in the central portion and the Musahars in the east. Muzaffarpur contains more than 10 per cent of Dusadhs and Musahars. The population of the 3 castes in the 10 districts comprises 63.11 per cent of the Scheduled Caste population. This population (4,627,072) is higher than the total population of all the Scheduled Tribes (4,204,770) taken together.

Other Scheduled Castes

39. Some of the Scheduled Castes are found only in the Chotanagpur Plateau, in association with the Scheduled Tribes. Thus Pans (or Sawasis) are largely confined to Ranchi and Singhbhum; Ghasis to Palamau, Hazaribagh, Singhbhum and Ranchi; and Bauris to Santal Parganas, Dhanbad and Hazaribagh.

40. On the other hand, the Chaupals are largely concentrated in North Bihar and are mainly confined to Darbhanga, Saharsa, Purnea and Monghyr. Bantars are numerous in Muzaffarpur, Darbhanga, Saharsa, Purnea and, rather peculiarly, also in Ranchi.

DISTRIBUTION OF SCHEDULED TRIBES AS A WHOLE

41. In contrast to the Scheduled Castes, the Scheduled Tribes who form less than a tenth (9.05

per cent) of the State's population, are largely confined to the low-density area of the Chotanagpur Plateau comprising the Chotanagpur Division and the district of Santal Parganas. With almost half of the State's area, the plateau contains only about a quarter of its population. However, 93.7 per cent of the tribals are to be found in this region, and they constitute just one-third of the plateau's population.

42. Out of every 100 tribals in the State, Ranchi contributes 31, Santal Parganas 24, Singhbhum 23, Hazaribagh 6, Palamau 5 and Dhanbad 3. Members of the Scheduled Tribes are also found in those parts of Bhagalpur and Monghyr which adjoin Santal Parganas and Hazaribagh; and in the hilly regions of Shahabad adjoining Palamau. Those in Purnea and Champaran districts are mostly immigrants. Scheduled Tribes are hardly to be found in the remaining districts of Saran, Muzaffarpur, Darbhanga, Saharsa, Patna and Gaya.

43. Ranchi contains the highest percentage of Scheduled Tribes among Bihar Districts. 61.6 per cent of its population is comprised of members of the Scheduled Tribes. Singhbhum (47.3 per cent) and Santal Parganas (38.2 per cent) follow. The percentage is smaller in Palamau (19.2 per cent) and more so in Hazaribagh (11.3 per cent) and Dhanbad (11.1 per cent).

44. The Scheduled Tribes of Bihar constitute a part of the Central Indian tribes. The tribal area of Bihar forms the north-eastern fringe of the tribal belt extending throughout the Central India, from Jhabua district of Madhya Pradesh (85 per cent tribals) in west to Santal Parganas district of Bihar (38 per cent tribals) in the north-east. Proceeding eastward from Jhabua, the districts of Dhar, Nimar, Betul, Chhindwara, Seoli, Mandla, Shehdul, Sarguja and Raigarh, all contain more than 30 per cent tribals. To the south of Bihar the districts of Mayurbhanj, Keonjhar and Sundargarh in Orissa contain 47 to 60 per cent tribals, those lower south containing smaller proportions. There is a pocket of tribals in the neighbouring districts of Bastar in Madhya Pradesh and Koraput in Orissa which contain 72 and 61 per cent tribals respectively.

45. In contrast the proportion of members of the Scheduled Castes, on the other hand, is never very large in any particular district in the country. Only in East Nimar (in Madhya Pradesh) it is more than 50 per cent. The proportion of Scheduled Castes in many of the districts varies from 15 to 25 per cent, and is often less. Thus there do not appear to be any distinct areas in which members of the Scheduled Castes predominate.

INDIVIDUAL SCHEDULED TRIBES

46. The following Statement shows the population of each Scheduled Tribe and the ratio of members of each tribe to the total Scheduled Tribe population. The tribes have been arranged in order of their numerical strength.

STATEMENT

Population of Scheduled Tribes and their distribution per 1,000

Sl. no.	Tribe	Population	Distribution per 1,000 members of Scheduled Tribes
1	2	3	4
1	Santal	1,541,345	366.57
2	Oraon	735,025	174.81
3	Munda	628,931	149.58
4	Ho	454,746	108.15
5	Kharwar	109,357	26.01
6	Kharia	108,983	25.92
7	Bhumij	101,057	24.03
8	Lohra	92,609	22.03
9	Sauria Paharia	55,606	13.22
10	Mahli	67,979	16.17
11	Mal Paharia	45,423	10.80
12	Bedia	38,241	9.09
13	Gond	33,521	7.97
14	Chero	30,845	7.33
15	Chik Baraik	30,770	7.32
16	Karmali	26,509	6.30
17	Korwa	21,162	5.03
18	Kora	13,824	3.29
19	Parhaiya	12,268	2.92
20	Kisan	12,011	2.86
21	Binjhia	6,725	1.60
22	Asur	5,819	1.38
23	Gorait	4,793	1.14
24	Birjia	4,029	0.96
25	Birhor	2,438	0.58
26	Savar	1,561	0.37
27	Baiga	951	0.23
28	Khond	814	0.19
29	Bathudi	456	0.11
30	Banjara	42	0.01
31	Unclassified	16,930	4.03
Total		4,204,770	1,000

47. The wide differences in the population of various tribes is obvious. Appendix II shows the district-wise distribution of 1,000 persons of each Scheduled Tribe.

Santal

The Santals are the most numerous among the Scheduled Tribes of Bihar, constituting as much as 36.7 per cent of the total tribal population. They have a long history of continuous migrations from one area to another in order to keep pace with their fast increasing numbers. They have migrated in large numbers to West Bengal and Assam as well.

In Bihar, the district of Santal Parganas (which has been so named after them) is their stronghold. More than half (56.9 per cent) of the Santals live there. Together with Hazaribagh and Singhbhum, the three districts account for more than four-fifths (82.3 per cent) of the Santals. They are also found in South Monghyr, Purnea, Saharsa and Bhagalpur. But for Saran and Champaran, there is no district without some Santals.

Oraon

Though coming next only to Santals numerically, the Oraon population is less than half of the Santal, constituting 17.5 per cent of the tribal population. The Oraons are largely concentrated in Ranchi (76.8 per cent) and are found in significant numbers in Palamau (11.4 per cent). Considerable migrants (constituting 3.6 per cent) are found in the north-eastern district of Purnea.

Munda

Like the Oraons, the Mundas also are predominantly found in Ranchi district (74.0 per cent). Singhbhum (18.9 per cent), Hazaribagh (4.4 per cent) and Palamau (1.5 per cent) account for the bulk of the remaining Mundas. Their numbers are only slightly smaller than those of Oraons.

Ho

The Hos constitute 10.8 per cent of the tribal population but unlike the more numerous tribes, they are almost exclusively confined to the district of Singhbhum which contains 99.8 per cent of the Hos.

Kharwar

Kharwars (numbering 109,357) are found mainly in Palamau district and have been returned only from that district and the neighbouring district of Shahabad in earlier Censuses. In the 1961 Census, however, Bhagalpur (11.6 per cent), Purnea (5.2 per cent) and Santal Parganas (2.4 per cent) have returned a considerable number of Kharwars. It is possible that these returns relate to Santals who also call themselves Kharwar in some places.

Kharia & Bhumij

Kharia and Bhumij are the two other Scheduled Tribes numbering over hundred thousand each. Kharias predominate in Ranchi district (88.1 per cent) while the Bhumij tribe is mostly found in Singhbhum (97.5 per cent).

Lohra

The Lohras also are found in largest number (75.5 per cent) in Ranchi district and Singhbhum contains more than one-tenth of the Lohra population (11.2 per cent). Outside the Chotanagpur Plateau they are found in significant number only in the district of Purnea.

Sauria Paharia and Mal Paharias

These two tribes are believed to be the branches of a parent tribe (Paharia) which split up during the last two or three centuries. Both are almost exclusively found in the district of Santal Parganas. The Sauria Paharias have preferred to remain on the hill-tops of the Rajmahal hills where they practise shifting cultivation. Their population is almost entirely confined to Santal Parganas.

Among Mal Paharias, small numbers have migrated to other districts also, e.g., Bhagalpur (3.9 per cent) and Saharsa (1.1 per cent).

Among the tribes which are almost confined to one district are the Binjhias in the southern portion of Ranchi district. Only 1.1 per cent are found in Dhanbad where they are presumably labourers.

Palamau district is the stronghold of the Cheros (88.6 per cent), Parhaiyas (86.4 per cent), Kisans (67.5 per cent) and Korwas (61.7 per cent).

Among the less numerous tribes, more than half the Birhors are found in Hazaribagh. The remaining tribes are largely confined to Ranchi.

SECTION 3

GROWTH OF POPULATION

48. The enumeration and tabulation of castes has always presented difficulties due to the large variations that exist in regard to caste and tribal names, with their numerous off-shoots and branches in the shape of sub-castes and *gotras*, sub-tribes and clans. The difficulties are enhanced due to tendencies, perceptible throughout, for exalting the caste names in the communities which are lowly placed in the social structure. Upto 1931, the caste and tribe denominations of the entire population were enumerated and tabulated. Although similar enumeration was continued in 1941, circumstantial exigencies prevented complete tabulation and detailed district-wise figures of only 48 tribal communities were recorded in that Census. Both in 1951 and 1961, castes and tribes were enumerated only for the Scheduled Communities, backward classes also having been recorded in 1951. The changes in the method of enumeration in the last two Censuses would naturally be expected to result in somewhat deficient enumeration consequent upon

the restricted sections of population being dealt with. This is so, because it was largely left to the enumerator to ascertain the caste or tribe and to enumerate it only if the persons concerned belonged to one of the specified communities finding place in his list. The attempt in 1961 to devise a workable list of variants and synonyms of the various Scheduled Castes and Scheduled Tribes could not materialise on account of the reasons given earlier. Again, it is also expected that the deficiency (if any) in the enumeration of the Scheduled Tribes should be greater than that in case of the Scheduled Castes. The reason is quite simple. In spite of the educational and other progress of the members of the Scheduled Tribes, the task of enumeration is largely confined to non-tribals even in tribal areas. These enumerators are fully conversant with the caste names of the Scheduled Castes, but not quite so with those of the Scheduled Tribes. Thus, even a graduate school teacher of a village in Santal Parganas had recorded the Mahli students of his school

as members of Scheduled Castes when in fact they belong to a Scheduled Tribe. However, notwithstanding these general observations, there is no reason to suppose that the present Census has in any way been less accurate and comprehensive in enumerating the specified castes than the earlier ones.

Scheduled Castes

49. The growth of the Scheduled Caste population in the State in the decade 1951-61 has been

phenomenal as compared to that of the general population. Thus, against a percentage increase of 19.77 for general population, the Scheduled Castes have increased in numbers by 33.02 per cent. The following statement gives the district wise figures of the Scheduled Caste population in 1931 to 1961 and also the percentage variation for the Scheduled Castes as also the general population.

STATEMENT

Population of Scheduled Castes, 1931-1961 with variations

State/District	Population				Percentage variation 1951-1961	
					Scheduled Castes	General population
	1931	1941	1951	1961		
1	2	3	4	5	6	7
BIHAR	4,504,593	4,449,487	4,914,230	6,536,875	+ 33.02	+ 19.77
1 Patna	303,550	287,765	345,763	474,501	+ 37.2	+ 16.67
2 Gaya	592,762	608,360	470,619	895,022	+ 90.2	+ 18.80
3 Shahabad	303,230	289,173	367,458	515,047	+ 40.2	+ 19.70
4 Saran	270,959	255,776	332,023	370,286	+ 11.5	+ 13.62

17 Singhbhum	58,495	78,821	71,262	60,925	- 14.5	+ 20.54

50. Any analysis of the changes in the population of individual Scheduled Castes during the decade is handicapped for want of caste-wise statistics for 1951, and recourse must necessarily be made to the earlier statistics which too are rather meagre in comparison to those available for the Scheduled Tribes.

51. It is seen from the statement above that Singhbhum is the solitary district in which the Scheduled Caste population has gone down. Incidentally, Singhbhum is also the district which contains the least number of the members of Scheduled Castes. So far as other districts are concerned, all except four, namely Saran, Champaran, Bhagalpur and Purnea, have rates of increase of the Scheduled Caste population much above that of the increase of the general population of the district. But even in these four districts, the increase is more than 10 per cent, being as high as 33 per cent in the case of Purnea. The increase is most marked in Gaya district (90 per cent), and varies between 30 and 40 per cent in case of others except Dhanbad (41.8 per cent). However, it is noteworthy that the increase in Gaya comes after a sudden drop of 22 per cent of the Scheduled Caste population from 1941 to 1951. The population of the

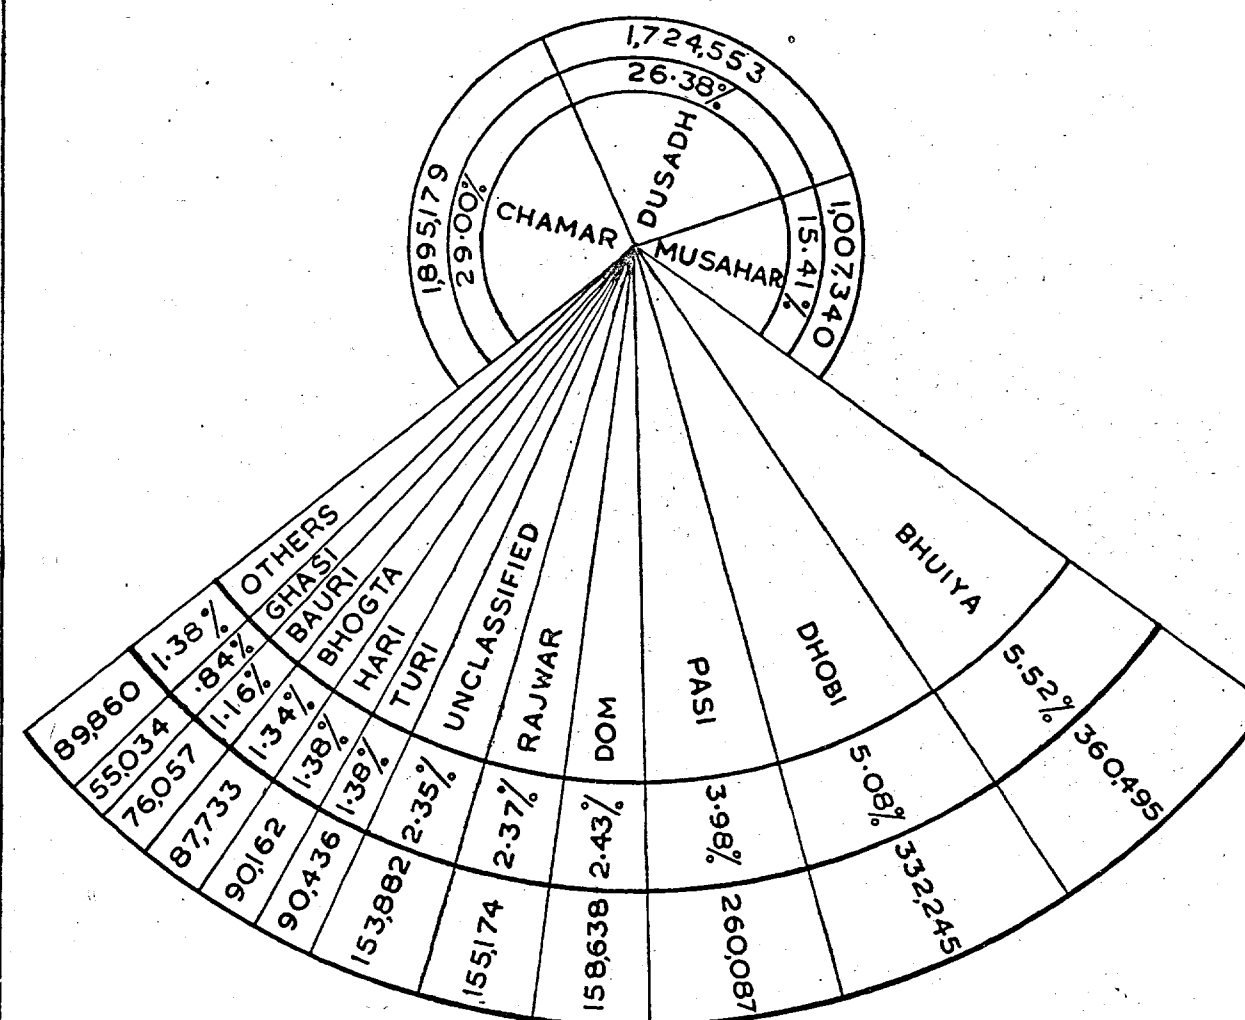

Scheduled Castes decreased in that decade (1941-51) also in Shahabad, Santal Parganas and Singhbhum. The rate of increase was more than that of the district for the decade in case of Patna, Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Saharsa and Purnea. The increase was less than that of the general population of the district in case of Bhagalpur, Palamau and Ranchi.

Scheduled Tribes

52. During 1951-61, the rate of growth of the Scheduled Tribes (9.7 per cent) has been less than half that of the general population (19.77 per cent). In fact, there has been a decrease in the population of the Scheduled Tribes in eleven out of the seventeen districts. However, only two of these, viz., Santal Parganas and Dhanbad lie in the tribal belt comprising the Chotanagpur Division and the district of Santal Parganas.

53. The following statement gives the total population of the Scheduled Tribes in 1931 to 1961 in the State and districts. The percentage variation for 1951 is given for the Scheduled Tribe as well as general population.

BIHAR COMPOSITION OF SCHEDULED CASTE POPULATION 1961

STATEMENT

Population of Scheduled Tribes, 1931-1961 with variation

State/District	Population				Percentage Variation 1951-1961

17 Singhbhum	709,892	829,403	764,297	969,807	+ 26.9	+ 20.54

54. The position may be discussed for each district, with reference to the tribe wise statistics of 1941 and 1931 since those for 1951 were not recorded.

Patna

There has been a decrease of 2,805 persons in the Scheduled Tribe population of the district. The present population is only about one-third of 1951. The decrease has been continuing since 1941, in which year 6,599 members of the Scheduled Tribes were enumerated in this district. In 1941, the bulk of the population comprised of Goraites (4,311) and Santals (2,097). Although there is a Scheduled Tribe called Gorait, the name is also used to denote village-messengers, chiefly of the Dusadh community, which is a Scheduled Caste. In 1961, only 6 Goraites have been returned, Dusadhs having been left out of the count and rightly so. Similarly, the Santals in 1961 number only 90. There is no marked concentration of Santals in the district and this seems to be borne out by the fact that only 475 Santals were returned in 1931.

Gaya

The population of the Scheduled Tribes in Gaya district in 1961 is only 593 as against 5,720 in 1951. However, the population in 1951 was more than twice that of 1941. As in the case of Patna, the bulk of the population recorded as Scheduled Tribes in 1941 consisted of Goraites (1,071) and the explanation for the large decrease in the population during the decade would appear to be the same as for Patna. As against 1,926 Santals in 1941, only 126 were enumerated in 1951.

Shahabad

Shahabad is one of the two districts lying outside the tribal belt and yet showing an appreciable increase in the tribal population. The Scheduled Tribe population in this district has increased at more than 1½ times the rate of increase of the general population. This is accounted for by the large accretion in numbers of the Chero tribe who have their stronghold in the district of Palamau which adjoins Shahabad on the south. As against 1,185 Cheros in 1941 Census, 2,743 were enumerated in 1961. Similarly, the Kharwars have also increased from 9,140 to 12,124 in 1961 and the Oraons from 3,708 to 5,207. However, appreciable numbers of Gonds (1,369) have been returned in 1961, although they were not returned in any of the earlier Censuses for which community wise figures are available. There is a community known as Gqr who are Hindus and largely grain-parchers by profession. It seems possible that the Gons have been wrongly enumerated as Gonds thereby causing a disproportionate rise in the percentage increase of the Scheduled Tribe population in the district.

Saran

The decrease in Saran district, although high in percentage, is of little significance since the total population involved in either Census is less than 500.

Champaran

The decrease of tribal population in Champaran district has been of the same order as in the case of Gaya. Champaran is known for its Oraon emigrants of whom as many as 1,216 were enumerated in 1941. That the tribal population in Champaran district in-

creased from 13,179 in 1941 to 20,998 in 1951 seems to be somewhat stretched, but nonetheless, there cannot be any valid reason in the decrease of the Oraon population to only 2,065 in 1961. It is probable that the bulk of the Oraons could not be enumerated in Champaran since they are also known locally as Dhangars which literally means paid-labourers. So long have the Oraons been settled in the district (migration commenced from the beginning of the century) that they are chiefly known by the name Dhangar there.

Muzaffarpur and Darbhanga

Both in the case of Muzaffarpur and Darbhanga districts less than 500 persons were returned in 1941 and it is difficult to conceive how they could have recorded the large increases noticed in 1951. However, the low return of 1961 is not readily accountable. In any case, the size of the population involved is too small to be significant.

Monghyr

As in some other cases mentioned earlier, the 1951 Scheduled Tribe population of 56,712 in Monghyr district seems to be rather exaggerated since the population in 1941 was only 37,553. The bulk of the tribals in Monghyr district are concentrated in its southern portion and are comprised of the Santals. They have increased from 32,518 in 1941 to 38,801 in 1961. The increase in the population of Koras, a Scheduled Tribe largely concentrated in Monghyr district, has also been appreciable, from 4,543 in 1941 to 6,100 in 1961. The apparent decrease in the population during the decade 1951-61 is therefore, largely illusory.

Bhagalpur

As in the case of Monghyr, Bhagalpur district also showed a phenomenal increase in the population of Scheduled Tribes during the decade 1941-51 from 42,561 to 96,126. However, when the tribewise figures of 1941 and 1961 are considered, it would seem that the population of the Santals, who comprise the bulk of the Scheduled Tribe population in the district, has increased only slightly from 40,321 to 41,221, though the increase is not in conformity with the general prolific rate of growth among the Santal community. This, however, is largely explained by the fact that 12,693 Kharwars have also been enumerated in Bhagalpur. These Kharwars have probably nothing to do with the tribe of the same name found in Palamau district and are actually Santals. For, Kharwar are a section of the Santals and many Santals like to call themselves Kharwars. Thus, if the 1961 population of Kharwars in the district is added to that of the Santals, the increase since 1941 becomes more in conformity with the general pattern. The overall population of Scheduled Tribes has increased from 42,561 in 1941 to 64,474 in 1961 apparently indicating that there was some over-enumeration in 1951.

Saharsa

In the case of Saharsa district, there has been a variation in the population from 28,366 in 1951 to

7,605 in 1961. This may appear to be somewhat incongruous. In 1941 Census, 23,194 persons were returned, of whom the Santals constituted the bulk (21,809). The number of Santals returned in 1961 is only 5,311. It appears that a large number of Santals, mostly share-croppers, have been compelled to leave the district following the resumption of agricultural lands by their recorded tenants, who have returned in the wake of various improvements and developments in the districts.

Purnea

Like Shahabad, Purnea is the only other district lying outside the tribal belt which has shown an increase in the tribal population. The figures are quite consistent, rising gradually from 84,612 in 1941 to 107,046 in 1951 and 120,713 in 1961. The bulk of the tribals of Purnea district are Santals and Oraons and, as in the case of Bhagalpur district, there has been considerable increase in the population of each during the last 20 years. A good number (5,740) of Kharwars have also been returned from Purnea and, like those of Bhagalpur, appear to be Santals by another name.

Santal Parganas

A decrease in the Scheduled Tribe population of Santal Parganas district is rather peculiar, because the population of the district is largely tribal in composition. However, when the tribewise statistics are examined for 1941 and 1961, it becomes apparent that none of the tribes, except the Sauria Paharias has actually decreased in numbers. As a matter of fact the overall increase of the tribal population from 1941 to 1961 has been of the order of 10 per cent. While it will not be sufficient simply to aver that there was over-enumeration in 1951, it will not also be wholly correct to suppose that the present census has in any way been deficient.

Palamau

The percentage increase of population among the Scheduled Tribes in Palamau district during 1951-61 is considerably higher than that of the general population of the district. The numbers of all the tribes inhabiting the district have shown a marked rise from 1941 which seems to be quite consistent.

Hazaribagh

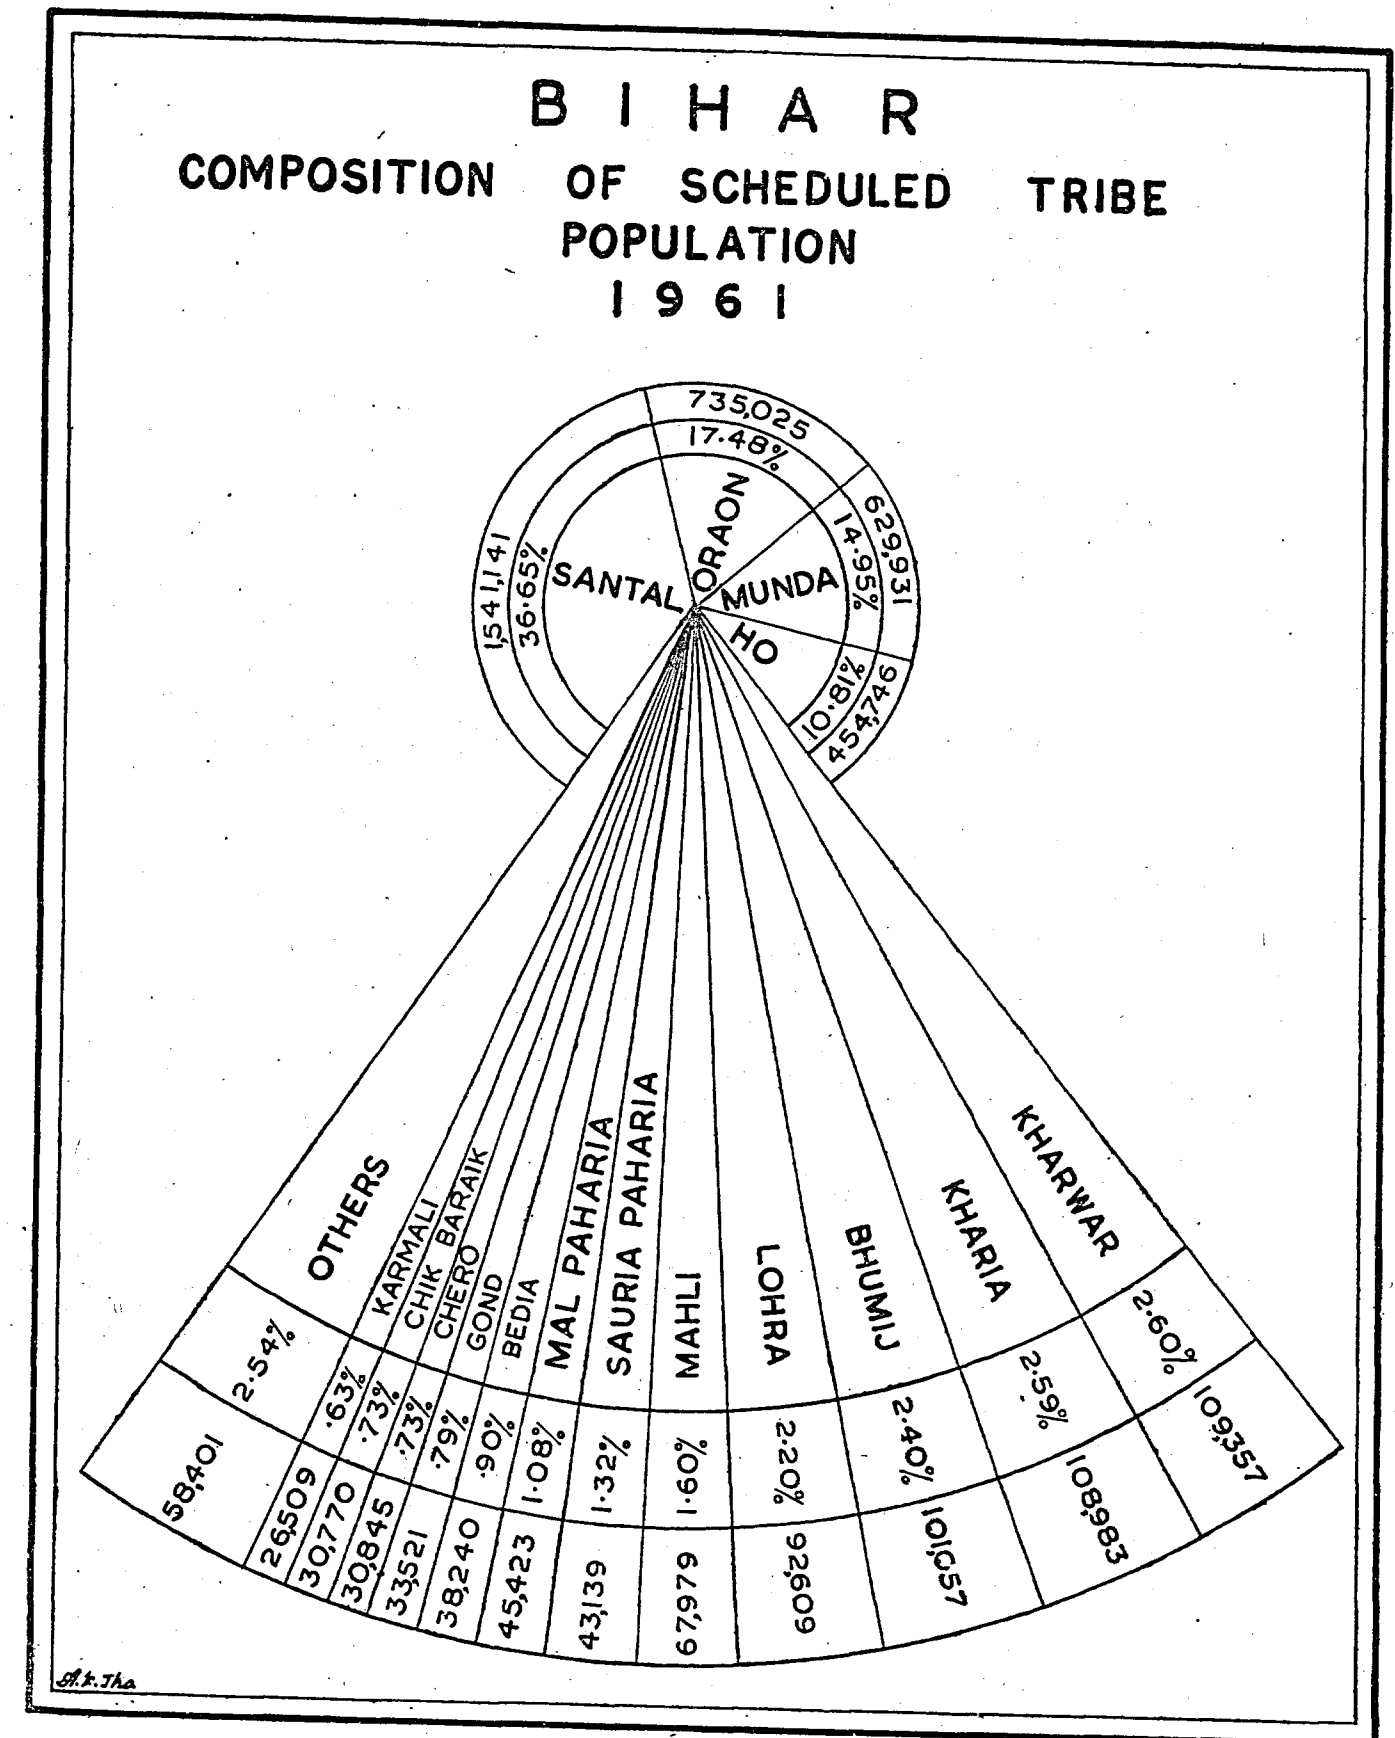

The growth of tribal population in Hazaribagh has been negligible during the decade. However, there has been considerable increase from that recorded in 1941 (219,439). All the tribes have shown increase over their numbers in 1941.

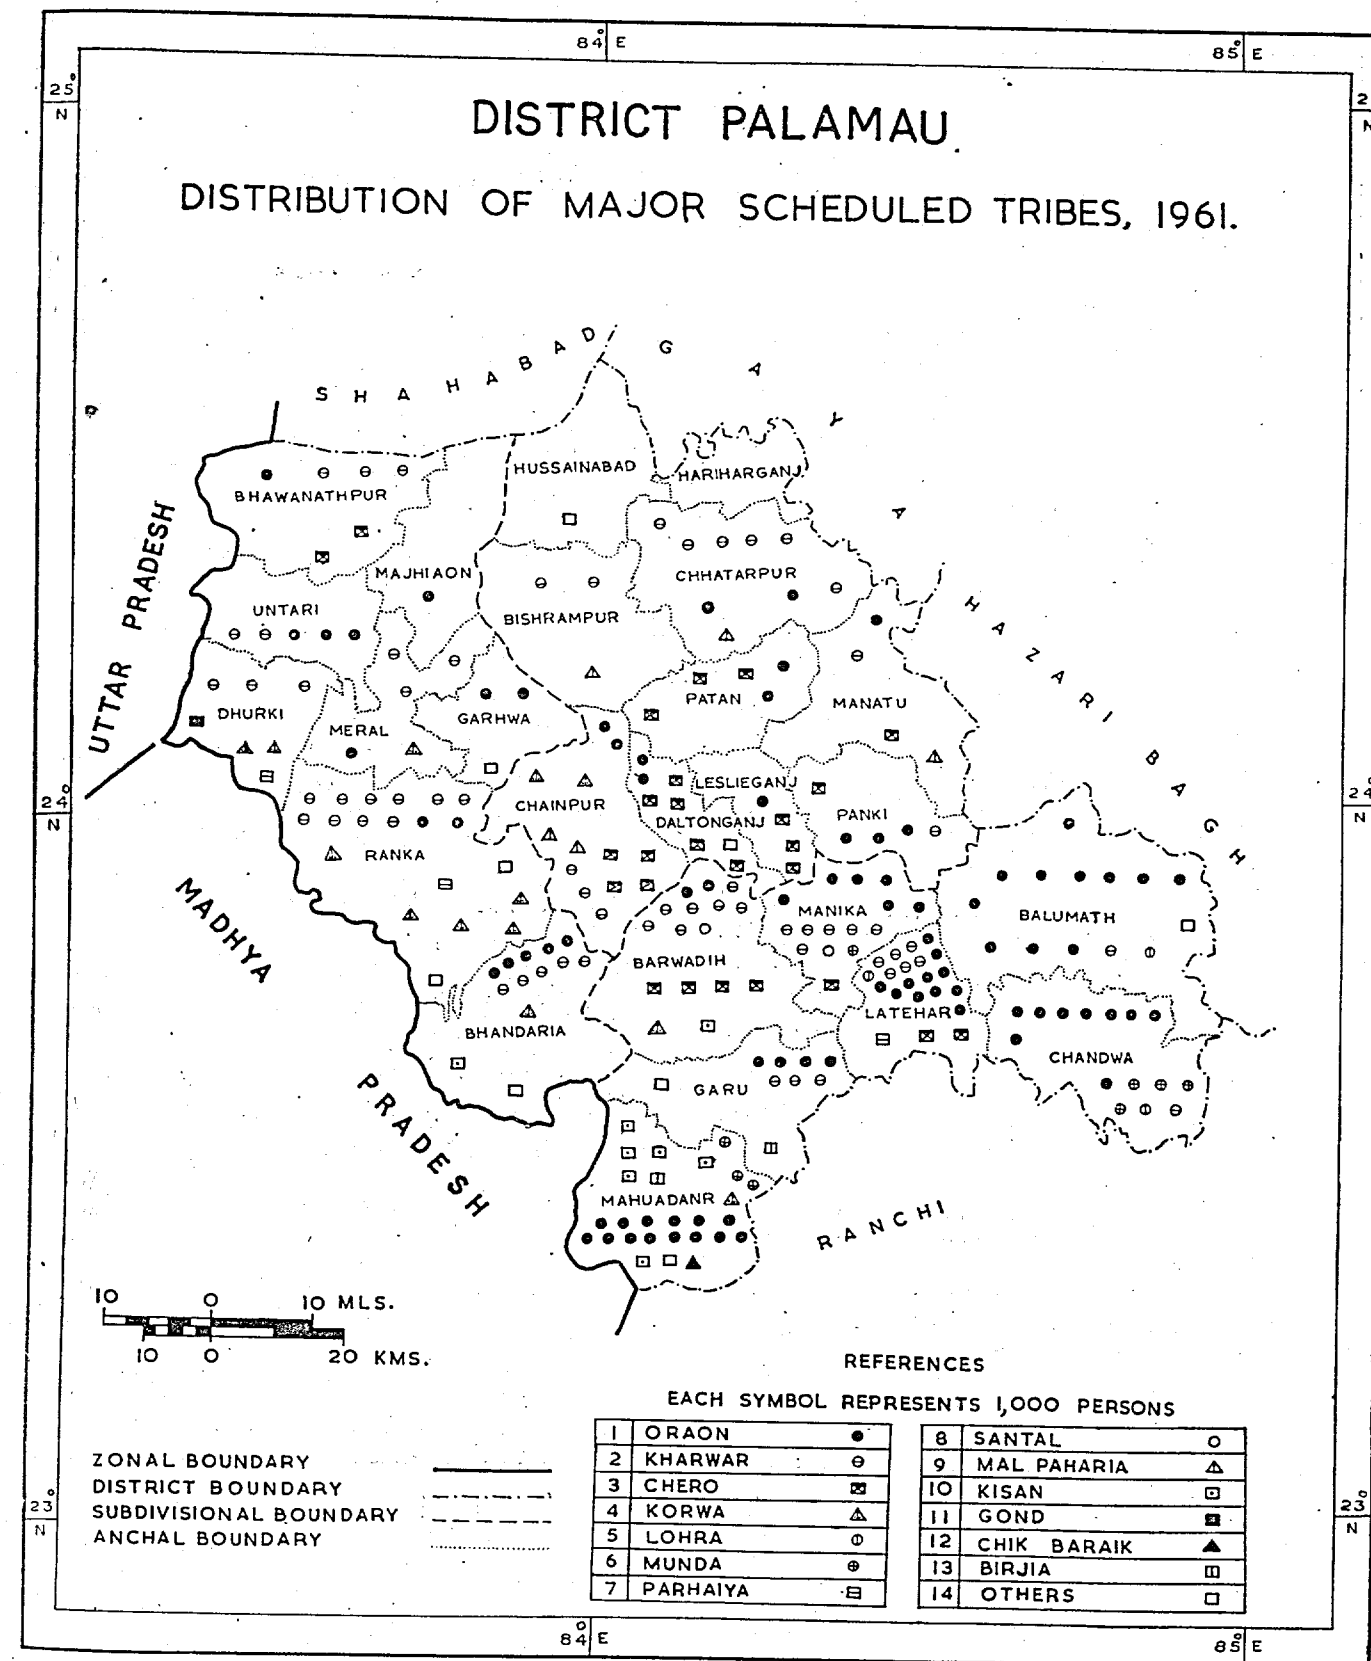

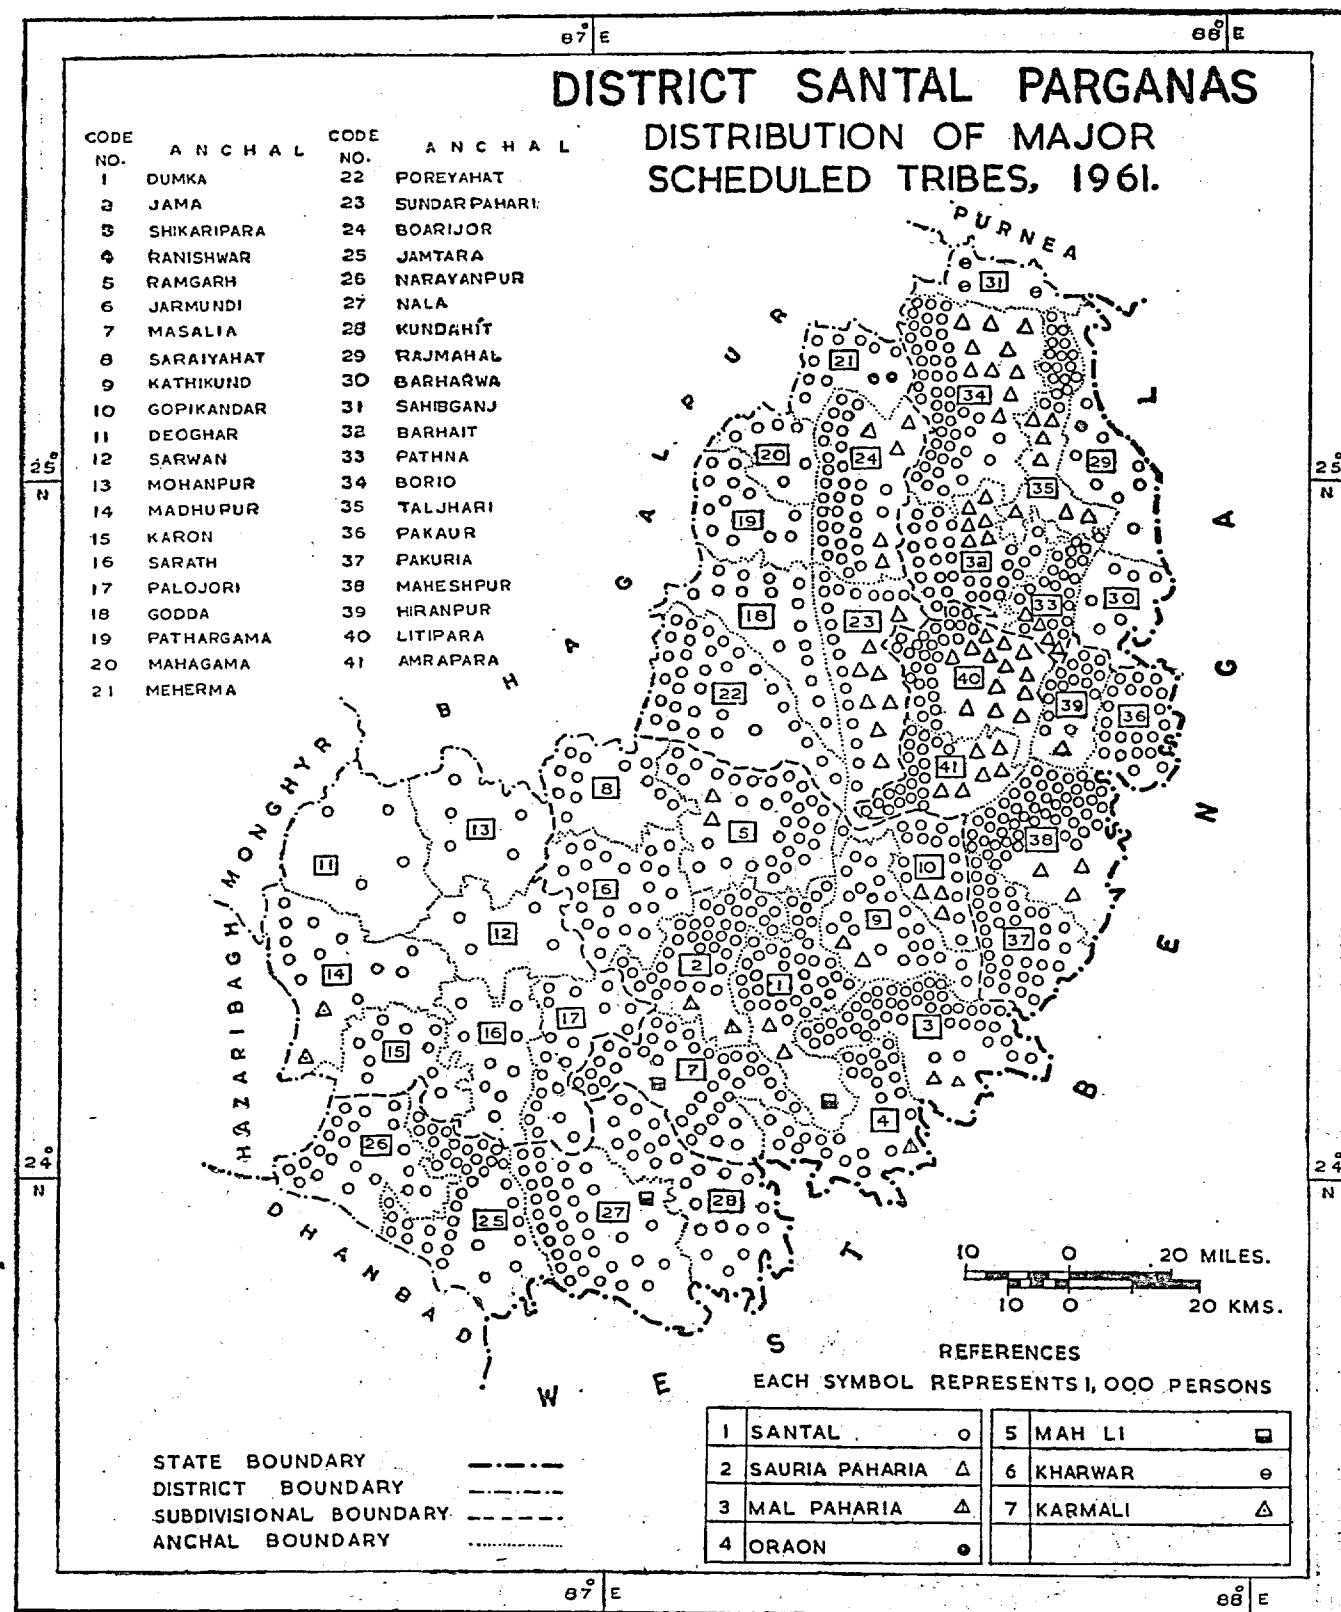

Ranchi

Ranchi is the district containing the highest concentration of members of the Scheduled Tribes and, as may be expected, the increase in the tribal population in the last decade is roughly of the same order as that of the general population.

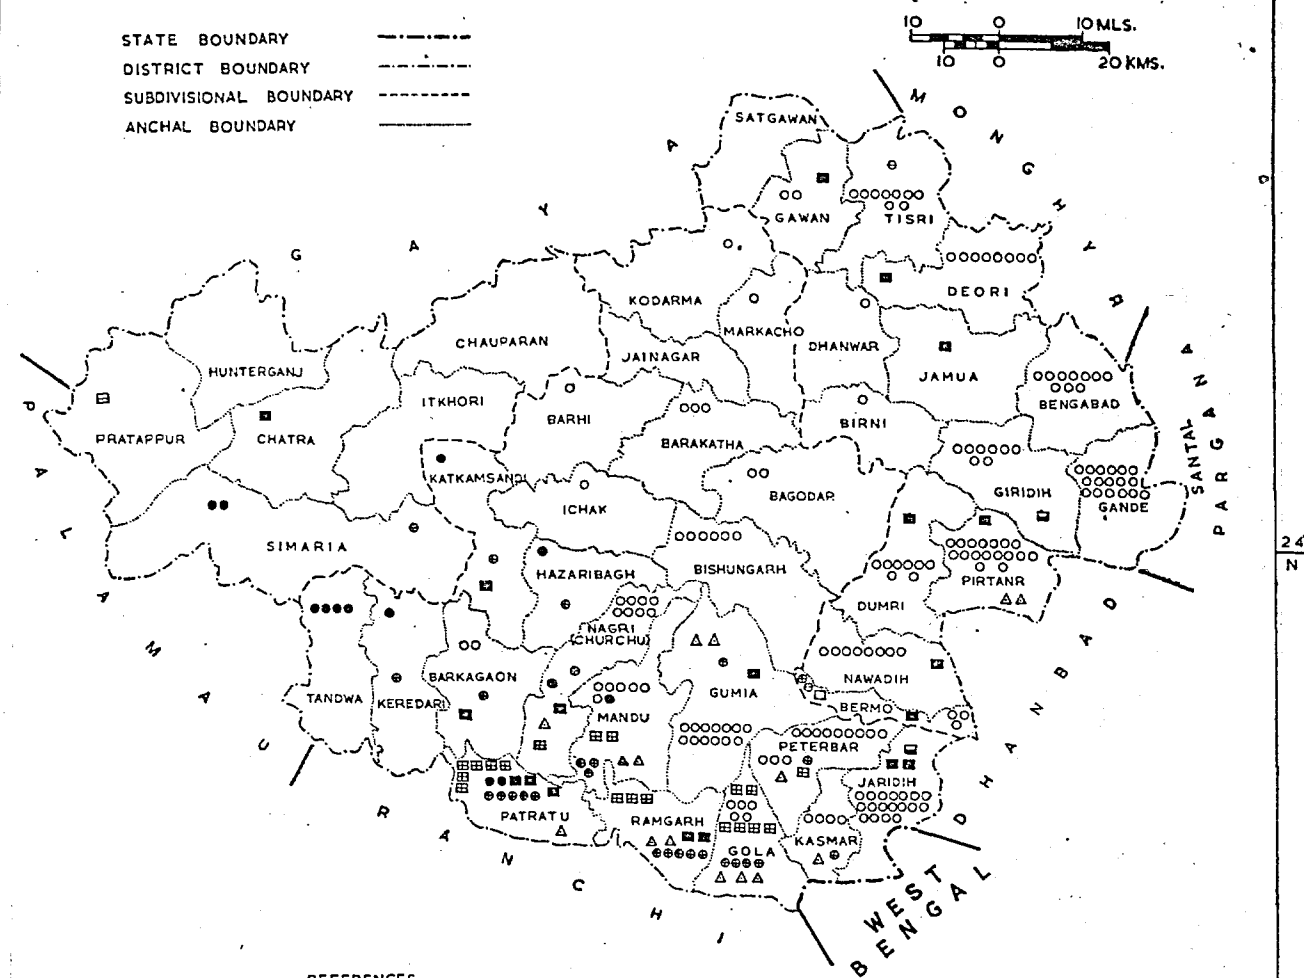

Dhanbad

There has been a decrease in the population of the Scheduled Tribes by 6,354 in the last decade.

Compared to 1941, however, the population in 1961 is about 20 per cent higher. Dhanbad district has a large urban component in its population and the employment of labour in the coal mines and other industries often fluctuates. Thus, the decrease is not very significant.

Singbhum

Singbhum also contains a heavy concentration of the tribal communities and the increase in the tribal population during the decade has been found higher (26.9 per cent) than the general population (20.54 per cent). All the tribes inhabiting the district, and particularly the Hos, the Santals and the Mundas who now number more than a 100,000 each in the district, have shown marked increase.

Individual Scheduled Tribes

55. Notwithstanding the somewhat bleak picture of growth of the Scheduled Tribe population that must necessarily engage from the foregoing discussions, it is found that most of the tribes (which include the predominantly numerous ones) have increased substantially over their numbers in 1941, though seldom does the growth in 20 years approach the extent of growth recorded for the general population during the same period.

The following statement gives the figures of population of each Scheduled Tribe in 1941 and 1961:

STATEMENT

Population of Scheduled Tribes, 1941 and 1961 with variations

30 Bhumij	109,230	101,037	-	8,193	- 7.5

N. A.—Not available

The tribes that have decreased in population are Banjara, Birhor, Gorait, Kisan, Sauria Paharia and Bhumij.

The Banjaras are a wandering tribe akin to the Lambadi of the southern States. They are itinerant magicians and herb-dealers, whose incidence in any census is a matter of chance.

The decrease in the population of Birhors is of small dimension, but presents a contrast to the decade 1931—41 in which they increased by 36 per cent. A section of the Birhors (called Uthulu Birhors) is even now nomadic in character and their under-enumeration on this account cannot be absolutely ruled out.

A reference to Gorait has been made in the section on the Scheduled Tribes of Gaya district (*supra*). As a Scheduled Tribe, the Gorait is difficult to locate and indeed, it is a moot question whether they should continue to be listed as a Scheduled Tribe at all.

The Kisans of Palamau are also known as Nagesias, a factor which may to a certain extent have stood in the way of complete coverage. Peculiarly, the extent of increase in 1931-41 was much higher than that of the decrease in 1941-61.

The Sauria Paharias are the only Scheduled Tribe whose population has consistently been falling from 1931, though the rate of decrease has been slow (2.1 per cent in 1931-41 and 5.1 per cent in 1941-61).

The Bhumijas are the only major Scheduled Tribe (with a population of more than 100,000 in 1961) who have decreased in number. This is rather unexpected.

56. There has been 32 per cent increase in the general population of Bihar during the 20 years from 1941. Judged by this criterion, there are only five tribes whose overall increase has been as high or even higher. However, at least some of the high returns appear to be rather inflated on account of the confusion regarding the tribal denominations of the population concerned. Thus, the Karmalis have recorded an increase of 151 per cent. Such a high rate of increase can only be accounted for by the inclusion of a large number of Santals under Karmalis. For, the Karmalis are believed to be only a branch of the Santal Tribe who split off and began a separate existence on account of their profession of blacksmithy. The Lohras have shown an increase of 96.5 per cent. The Lohras, like the Karmalis, branched off from the main tribe on account of their being blacksmiths by profession. In case of Lohras, the parent tribe was Munda. Moreover, the term 'Lohra or Lohar' is a general name given to blacksmiths irrespective of the caste and tribe to which they belong, and it is quite probable that many persons were enumerated as belonging to the Lohra tribe when, in fact, they were simply blacksmith by profession and actually belonged to some other community.

57. The growth of the Chero and the Kharwar population, though higher than that of the general population of the State, is not in any way extraordinary.

Both these tribes are largely found in the district of Palamau which has considerable untapped resources for economic development as well as large empty areas still waiting to be cleared for habitation. In fact, the density of population in Palamau district is still the lowest among all the districts of Bihar. Finally, while the Asurs have increased by just 32 per cent, the Birjias another tribe having close ties with the Asurs have almost doubled in their number. The Baigas are a tribe of Madhya Pradesh. The large returns in Palamau seem to have resulted from the religious priests known as Baigas being enumerated as belonging to the Baiga tribe. Actually a Baiga (Priest) may be of any tribe, e. g., Kharwar or Munda. The appellation of Baiga is given to a religious priest

SECTION 4

THE WORKING POPULATION

59. We may now take up the consideration of certain special features, e.g., economic characteristics, literacy and education, religion, etc., of the tribal population in the same order in which the tables relating to these appear in this volume.

While the economic classification of the population of the numerically major castes and tribes have been given in the past Censuses (*vide* flyleaf to Table SCT-I), it is for the first time that the economic classification of the Scheduled Caste/Scheduled Tribe population has been recorded in such detail for each community. However, the detailed classification according to the three digit 'minor-groups' of the Standard Industrial Classification and the three digit 'families' of the National Occupational Classification have not been recorded separately for the Scheduled Communities, as for the general population (Tables B-IV and B-V). As such, any comments on the statistics relating to economic activities must be handicapped first by a lack of adequate and comparable statistics from earlier censuses, and secondly, due to non-availability of detailed break-ups of the classification of economic activities. Yet the importance of detailed break-ups diminishes largely since the bulk of the working population among the Scheduled Communities is engaged in agricultural activities.

60. It will be pertinent to assess the position of the scheduled communities in comparison to the general population as also the residuary population (i.e., the population which has not been included under any of the Scheduled Communities). The following figures give the proportion of workers per 1,000 among the total population, the Scheduled Castes, the Scheduled Tribes and the residuary population, separately for persons, males and females.

STATEMENT

Proportion of workers per 1,000 Population

	Persons	Males	Females
1 Total Population	414	556	271
2 Scheduled Castes	491	581	403
3 Scheduled Tribes	589	619	560
4 Residuary Population	379	544	212

mostly in Palamau, the district in which the bulk of Baiga have recorded in 1961.

58. It will, thus, be seen that the rate of growth of major tribal communities has not been in keeping with that of the general population. The Santals have increased by only 10 per cent in twenty years. Any assessment of the effect of migration is not possible since the emigrants of Bihar enumerated in other States in 1961 have not been classified by community. The Oraons, the Mundas and the Hos have exhibited higher rates of increase varying from 15 to 20 per cent. There is nothing remarkable in the rate of growth of the other communities which has been rather sluggish.

The proportion of workers is the highest among the Scheduled Tribes, a little less among the Scheduled Castes and the least among "others". This holds true for both the male and female population, but the differences in the participation rates of the females are particularly striking. These arise due to the active participation in cultivation and agricultural labour by females among the Scheduled Communities, resulting in their being regarded as workers. That both males and females among the Scheduled Castes and the Scheduled Tribes have larger participation rates than the residuary population, is also brought out from the fact that although the male population of the scheduled communities comprises 22.8 per cent of the total male population, the percentage of workers among scheduled communities to total workers is 24.4 per cent. The difference is much more striking in the case of the female population. Thus the percentage of female population of scheduled communities to the total female population is 22.5. But the percentage of female workers of the Scheduled communities to the total female workers is as high as 40.2 per cent.

Again, the differences between the participation rates of men and women in different sectors of the population is brought out from the following table which gives the number of female workers per 1,000 male workers in each industrial category separately for the total, the Scheduled Caste, the Scheduled Tribe and the "residuary" population :

STATEMENT

Number of female workers per 1,000 male workers in each industrial category

	Population relating to			
	All persons	Scheduled Caste	Scheduled Tribe	Residuary
Total population	994	1,031	1,014	985
All workers Working	485	715	917	384
I As Cultivators	496	695	980	394
II As Agricultural labourers	716	859	1,191	594

	F	1	1	2	2
VII (In Trade & Commerce)	P	27	8	3	36
	M	35	9	3	44
	F	12	6	3	17
VIII (In Transport, Storage & Communication)	P	12	7	3	15
	M	17	12	6	20
	F	..	..	1	..
IX (In other services)	P	76	97	37	78
	M	89	103	48	91
	F	49	87	26	42

The largest number of workers among the Scheduled Castes comprise of agricultural labourers who constitute more than half (54.9 per cent) of the workers. The participation of females is relatively much greater in this section of the population. These figures speak eloquently of the poor economic condition of the members of the Scheduled Castes. It is to be noted that for purpose of census economic classification, even share-croppers or tenants cultivating land taken on lease from others have been classified as "cultivators". Agricultural labourers are those who toil in the field merely for wages in cash or kind without having any kind of right or interest in the land or the produce therefrom.

Contrarily, more than three-fourths of the workers amongst the Scheduled Tribes work as cultivators. This appears to bear testimony to the efficacy of the various laws and regulations which have been in force for preserving the rights of members of the Scheduled Tribes in the lands owned by them. Since, however, the quality of land owned by the members of the Scheduled Tribes in the Chotanagpur plateau is generally poor and, moreover, since the extent of their holdings is seldom large, (*vide* Table SCT-V, Part B) the mere fact that the bulk of the tribals are cultivators does not necessarily imply that their economic condition is appreciably better than that of the Scheduled Castes. Yet it is pertinent to observe that the proportion of agricultural labourers amongst the Scheduled Tribes is even less than in the residuary population.

62. It is seen that the percentage of workers in 'other services' (Category IX) is rather high among the Scheduled Castes (9.7 per cent). It is higher than in the total population (7.6 per cent) or in the residuary population (7.8 per cent). The extent of employment in the tertiary sector (in which the census industrial category IX is included), is ordinarily supposed to indicate the extent to which the population has progressed industrially. However, this hypothesis is not strictly applicable to the statistics relating to participation of members of the Scheduled Castes in "other services". There are altogether 309,650 members of the Scheduled Castes in Category IX. Of them only 2,681 have been tabulated as working in 'scavenging'. The latter figure, however, appears to be a gross under-estimation, for 22,829 persons amongst the general population have been returned as being engaged in "Garbage and sewerage disposal, operation of drainage system and all other types of work connected with public health and sanitation," (Minor Group 511 of the Indian Standard Industrial Classification). It may reasonably be presumed that a vast bulk of the workers in Minor Group 511 are members of Scheduled Castes since the nature of work involved is traditionally performed largely, if not solely, by the members of the Scheduled Castes. Even so about 287,000 persons in category IX have still to be accounted for. These must belong to Division 8 "Services", or Division 9 "Activities not adequately described" of the Indian Standard Industrial Classification. The bulk (75 per cent) of the Scheduled Caste workers in category IX are accounted for by the following castes, the numbers (in thousands) being indicated against each :

Caste	Population in Category IX ('000 omitted)
Chamar	65
Dusadh	65
Dhobi	61
Musahar	41
Total	232

63. Considering these statistics caste-wise, out of 65,000 Chamars, 6,000 are from urban areas who may be employed in services. Of the 59,000 from rural areas 26,000 are females who may be working as mid-wives. (The females amongst Chamars, known as *Chamains*, are the traditional mid-wives in most rural areas). That there are 37,000 Chamar males in rural areas in category IX, may be attributed to the fact that Chamars are also musicians in many areas. With regard to the Dhobis the entire number of 61,000 are probably engaged in laundry services.

The 12,000 urban dwellers amongst the Dusadhs and Musahars in category IX may again be service-holders. In rural areas the Dusadhs (42,000 males) are usually engaged as village messengers and known as *Gorais*. Musahars (38,000) are the traditional *Palki* bearers. The *Palki* is still a mode of transport in remote and inaccessible areas in the country-side.

The relatively high proportion of other Scheduled Caste workers in category IX as compared to the similar proportion of the residuary population is largely accounted for by the fact that members of the Scheduled Castes mainly work in sanitary services. The scavenging castes are indicated below, the numbers in Category IX being shown against each :

Caste	Population in categories III-IX	Population of persons in scavenging (Table SCT-I Part A)	Percentage of Col. 3 to total in scavenging
1 Hari or Mehtar	15,366	8,711	51
2 Dom	12,394	4,304	26
3 Ghasi	6,381	1,352	8

The association of a particular caste with its traditional work may be studied by a comparison of figures of workers in particular industrial categories of the caste with the figures of the general population returned for the work.

The Chamars are traditional leather workers. The concerned Minor Groups of the I.S. I.G. are :
Minor Group 310—Currying, tanning and finishing of hides and skins and preparation of finished leather.

Minor Group 311—Manufacture of shoes and other leather footwear.

Minor Group 314—Repair of shoes and other leather footwear.

33,059 persons were returned under the above three minor groups, as against 49,353 Chamars in cate-

gories IV (Household Industry) and V (Manufacturing other than Household Industry). This would tend to show that the Chamars have adopted industries other than their traditional ones.

Dhobis are launderers. Minor Group 883 (Laundry Services) shows 76,740 persons while the number of Dhobis in Category IX is 61,025 which seems to suggest that laundry services are still rendered chiefly by the Dhobis.

64. The distribution of workers in primary, secondary and tertiary sectors is given in the following statement :

STATEMENT

Distribution of 1,000 workers among the total population, S. C. population, S. T. population, and the residuary population in primary, secondary and tertiary sectors separately for Persons, Males and Females.

Industrial Category of workers		Total population	S. C. population	S. T. population	Residuary population
1		2	3	4	5
Total Workers	Persons	1,000	1,000	1,000	1,000
	Males	1,000	1,000	1,000	1,000
	Females	1,000	1,000	1,000	1,000
Primary Sector (Categories I, II & III)	Persons	802	830	919	774
	Males	775	806	897	753
	Females	859	864	941	831
Secondary Sector (Categories IV, V & VI)	Persons	83	58	38	97
	Males	84	70	46	92
	Females	80	43	29	110
Tertiary Sector (Categories VII, VIII & IX)	Persons	115	112	43	129
	Males	141	124	57	155
	Females	61	93	30	59

It becomes apparent that the Scheduled Tribes are more heavily concentrated in the Primary sector than any other group of population shown above. The proportion of workers of the Scheduled Castes in the secondary and tertiary sectors (17 per cent) is more than double of the corresponding proportion relating to the Scheduled Tribes (8.1 per cent).

65. The distribution of male workers in the three sectors does not indicate as great a variation among these sections of the population as the distribution of female workers does. Relatively, more females among the residuary population work in the secondary sector. Household industry of spinning would probably account for the bulk of them. On the other hand, the ratio of female workers among the Scheduled Castes is noticeable in the tertiary sector. Engagement in sanitary services may be the attributive factor.

Notwithstanding the roughly similar pattern of sector-wise distribution among workers of the different categories, it needs to be borne in mind that a general parity in the kind of economic pursuit is not at all implied, for, the secondary sector includes such divergent industries as basketry and production of steel, just as the tertiary sector encompasses both

the highest services under the State and scavenging.

66. The comparative extent of participation of males and females among the Scheduled Castes and the Scheduled Tribes in the different industrial categories may be studied with reference to the percentage of workers of Scheduled Castes/Tribes to the workers of the general population in each industrial category. This assumes significance in the light of the percentages of total members of the Scheduled Castes Tribes to the total general population. The figures are given in the statements below:

STATEMENT

Percentages of members belonging to the Scheduled Castes/Scheduled Tribes to the general population by categories of industrial classification

PART A

Categories and sexes in which the percentage of SC/ST is greater than the percentage of total Scheduled Castes/Tribes to the general population.

IX	16.79	38.02	..	10.02

SECTION 5

THE NON-WORKING POPULATION

67. For the first time in Census, the non-working population has been classified into the following eight categories :

- (1) Full time students or children attending school, and doing no other work.
- (2) House-wives or such other persons engaged in unpaid household duties and doing no other work.
- (3) Dependants such as infants, children not attending school, persons permanently disabled from work because of illness or old age.
- (4) Retired persons (not re-employed), rentiers, persons living on agricultural or non-

agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work.

- (5) Beggars, vagrants, or independent women without indication of source of income and others of unspecified source of existence.
- (6) Inmates of penal, mental or charitable institutions, and convicts in jail.
- (7) Persons not engaged before and seeking employment for the first time.
- (8) Persons employed before but now out of employment and seeking work.

The measure of students is related to the existing and expected literacy rates while the evaluation of

PART B

Categories and sexes in which the percentage of SC/ST is less than the percentage of total SC/ST to the general population.

Category	Scheduled Caste		Scheduled Tribe	
	Males	Females	Males	Females
Total population	13.81	14.33	8.96	9.14
Total workers	..	..	..	..
I	6.52	9.15	..	..
II	..	..	4.19	6.97
III	..	..	..	..
IV	13.44	10.78	5.53	5.71
V	10.28	..	5.43	..
VI	10.46	9.87	5.72	..
VII	3.58	10.95	0.73	4.76
VIII	10.15	..	3.33	..
IX	..	..	5.39	..

In categories I (Cultivation) and III (Mining, Quarrying, Livestock, Forestry, Fishing and Hunting) the proportion of both S. C. and S. T. is higher in either sex. On the other hand, the Scheduled Communities of both sexes are under-represented in Categories IV (Household Industry) and VII (Trade and Commerce). Even in Categories V (Manufacturing other than Household Industry), VI (Construction), and VIII (Transport, Storage and Communication) the proportion is higher only in case of females who have little compunction in working as labourers.

In category II (Agricultural labourer) the percentage of the Scheduled Castes is high but contrary is the case with the Scheduled Tribes. In Category IX (Other Services) all but the Scheduled Caste males are more than adequately represented, though as noted earlier, their work is generally different from that of the residuary population.

unemployed persons is of great economic significance. Categories (2) to (6) are, comparatively, not so important. It is for this reason that the non-working population among the Scheduled Castes and Scheduled Tribes has been classified into four categories only, viz.,

- A. Students ;
- B. Persons seeking employment for the first time ;
- C. Persons employed before but now out of employment and seeking work ; and
- D. Others (Categories 2,3,4,5 and 6 as above).

The tabulation has been done collectively for all Scheduled Castes (Table SC-I) but break-ups are provided by various literacy and educational standards. In the case of Scheduled Tribes, tribewise figures have been tabulated (Table ST-II) but without break-ups by literacy and educational standards.

68. The proportions of non-workers in the various categories of the population have been referred to in the section on the working population. The following statement shows the ratio of the sexes among non-workers :

STATEMENT

Proportions of males and females among non-workers

Population	Non-workers		
	Persons	Males	Females
General	1,000	380	620
Scheduled Castes	1,000	405	595
Scheduled Tribes	1,000	460	540
Residuary	1,000	370	630

Among non-workers, females preponderate to a less extent among the scheduled communities, so much so that the difference between the two-sexes is well-nigh removed in the case of the Scheduled Tribes.

69. The following Statement gives the distribution of 1,000 non-workers by type of activity separately for persons, males and females :

STATEMENT

Distribution of 1,000 persons not at work by sex and type of activity.

		Whole population	S.C. population	S. T. population	Residuary population
Total non-working population	Persons	1,000	1,000	1,000	1,000
	Males	1,000	1,000	1,000	1,000
	Females	1,000	1,000	1,000	1,000
Full time students	Persons	126	62	114	137
	Males	273	140	195	302
	Females	36	9	45	40
Persons seeking employment for the first time	Persons	2	1	1	2
	Males	4	3	2	5
	Females	N	N	N	N
Unemployed before but now out of employment and seeking work	Persons	1	1	1	1
	Males	3	2	1	3
	Females	N	N	N	N
Others	Persons	871	936	884	860
	Males	720	855	802	690
	Females	964	991	955	960

N = Negligible.

The proportion of full-time male students to male non-workers among Scheduled Castes (14.0 per cent) is less than half of the residuary population (30.2 per cent), and substantially lower than that in the case of the Scheduled Tribe population (19.5 per cent). Statistics relating to literacy and education reveal that the sections of population in descending order of literacy rates are (i) Residuary population (ii) Scheduled Tribe population and (iii) Scheduled Caste population. In view of the position with regard to the small proportion of full-time students in the non-working population, the low education and literacy rates will probably continue to exist as at present.

The differences between the percentages of female students to female non-workers among the Scheduled Castes (0.9 per cent) and the residuary population (4 per cent) are more pronounced. However, the percentage of the Scheduled Tribe female students (4.5 per cent) is even higher than similar percentage for the residuary population, because the bulk of tribal students are Christians, among whom the efforts of the missionaries have been concerted towards female education for some time.

So far as the assessment of the extent of unemployment is concerned, the statistics obviously fail to portray the real picture. It appears that the proportion of males seeking employment, either for the first time or after having been employed earlier, is only 7 per thousand among the general population, and, even less among the Scheduled Castes and the Scheduled Tribes. Thus, the under-enumeration of persons seeking work is apparently a general deficiency of enumeration and it is not restricted to the Scheduled communities only.

In view of the poor recording of figures of unemployment, their break-up by levels of literacy and education for the Scheduled Castes lacks much significance. But so far as full-time students are concerned, it is significant that the bulk of literates among non-workers are students. Thus more than 86 per cent of the literate non-working males are full-time students, from among all categories, i.e., literate without education level, primary, and matriculation and above. Similarly, more than 54 per cent of literate non-working females are also full-time students. This tends to show that the educational facilities available are effectively utilised by the members of the Scheduled Castes.

70. Taking individual Scheduled Tribes into consideration, the percentages of full-time students to the total non-workers for each tribe are given in the

statement below :

STATEMENT

Percentage of Full-time Students (Scheduled Tribes) to total non-working population separately for Males and Females

Sl. no.	Tribe	Percentage of Full-Time Students to total non-working population	
		Males	Females
1	2	3	4
	All Tribes	19.45	4.53
1	Asur	11.83	1.92
2	Baiga	5.13	1.61
3	Banjara	16.67	..
4	Bathudi	21.10	5.52
5	Bedia	13.27	0.70
6	Bhumij	29.06	1.58
7	Binjhia	21.82	3.04
8	Birhor	11.96	1.62
9	Birjia	12.05	5.58
10	Chero	20.30	1.62
11	Chik Baraik	24.21	4.44
12	Gond	24.49	3.21
13	Gorait	16.10	2.14
14	Ho	21.04	2.71
15	Karmali	13.86	0.70
16	Kharia	27.22	13.47
17	Kharwar	15.86	1.64
18	Khond	15.30	..
	Kisan	18.77	4.24
	Kora	8.63	0.96
	Korwa	11.94	0.90
	Lohara or Lohra	16.47	2.62
	Mahli	13.50	1.50
	Mal Paharia	9.62	0.90

STATEMENT

Percentage of Full-time Students (Scheduled Tribes) to total non-working population separately for Males and Females.

Sl. no.	Tribe	Percentage of Full-Time Students to total non-working population	
		Males	Females
1	2	3	4
25	Munda	25.88	8.70
26	Oraon	25.83	9.20
27	Parhaiya	6.98	0.54
28	Santal	13.65	1.91
29	Sauria Paharia	6.62	0.87
30	Savar	7.53	0.50
31	Unclassified	19.68	3.33

In no case is the percentage higher than among the residuary population, either for males or females. However, the percentage of male students to non-working males among Bhumij, Kharia, Munda and Oraon are over 25 as against 30 for the general population. Similarly, the percentage of female Students to non-working females among Kharia (13.47) is almost as high as in the residuary population (13.70).

Besides the tribes mentioned above, Chik Baraik, Gond, Ho, Binjhia and Bathudi have higher percentages of male students than the Scheduled Tribes as a whole (19.45 per cent). The proportions of female students are proportionately higher among Oraon, Munda, Birjia and Bathudi tribes than among the Scheduled Tribes as a whole (4.53 per cent).

SECTION 6

AGE AND MARITAL STATUS

Age

71. The classification of the population of each Scheduled Caste and Scheduled Tribe by broad age-groups has been recorded in detail for the first time in Census. The data given in Table SCT-II are based on a full count unlike in 1951 when the data for the general population was based only on a 10 per cent sample.

72. According to Sundburg the proportion of persons in the age-group 0-14 gives an indication of the trend of the population growth. Thus, the following proportions of the age-group 0-14 are indicative of trends noted against each :

Proportion of population in the age-group 0-14 to 1,000 persons of all ages.

400	Progressive
330	Stationary
200	Regressive

In Bihar the proportion is 425 for the Scheduled Castes, 421 for the Scheduled Tribes, and 423 for the

general population. The ratio for India is 402. It is clear, therefore, that the trend of population growth among the Scheduled Castes and the Scheduled Tribes as a whole is about the same as the general population and there need be no apprehensions of any immediate decay in their overall numbers. Among the Scheduled Tribes, the proportion per 1,000 falls below 400 only in the case of Banjara (214), Savar (375) and Gond (393). Among the Scheduled Castes it is lower than 400 only among Bhumij (392) and Bauri (393). It is thus clear that the difference is negligible except in the case of Banjaras, who are a nomadic tribe and whose small population precludes valid conclusions from the statistics relating to age structure.

Marital Status

73. In considering the marital status of persons in the age-group 0-14, it has to be noted that statistics for Table SCT-II were compiled from the Individual Slips on the basis of returns against the question on marital status. Thus, every person in the age-group 0-9 was treated as unmarried while preparing Table C-II (showing marital status for the general population), even if the returns indicated married status. On the other hand, for preparing Table SCT-II, no such

rule-of-the-thumb was applied and the entries were taken as they were made. A comparison of the proportion of married males and females in the age-group 0-14 among the Scheduled Castes and/or the Scheduled Tribes on the one hand and the general population on the other will not, therefore, be strictly proper because the methods of extraction of the data have not been uniform.

It is usually held that the incidence of child marriages is appreciable only among the lower Hindu castes. If this premise is correct the figures of marital status for the residuary population should not have been substantially affected by the decision to treat all persons of the age-group 0-9 as unmarried.

A statement giving the distribution of 1,000 persons of each sex by marital status in different age-groups separately for the various sections of the population follows later.

74. The proportion of married persons in the age-group 0-14 is the highest among the Scheduled Castes and the lowest among the Scheduled Tribes as the following statement will show:

STATEMENT AGE GROUP 0-14

	Proportion of married persons per 1,000	
	Males	Females
General population	35	82
Scheduled Caste	94	159
Scheduled Tribe	39	58
Residuary Population	24	70

The proportions of married females among the Scheduled Castes and the Residuary population are 174 and 21 per cent higher than among Scheduled Tribes. For males, the percentage variation is 20 and 10 respectively. It is somewhat peculiar that while the ratio of married females among the Scheduled Tribes is lower than in the Residuary population, that of married males is higher.

Remarkably, the number of divorcees among the Scheduled communities assumes significance even in the age-group 0-14, in which 1 per thousand of both Scheduled Caste and Scheduled Tribe population of either sex is divorced or separated. The relative position is maintained in the next age-group 15-44.

Thus the proportion of never married males and females is the lowest among the Scheduled Castes. Similar proportions for males are twice as high among the residuary population as compared to the Scheduled Castes, it is as much as four and a half times higher among the Scheduled Tribe females of the age-group 15-44.

The extent of divorce is appreciably high among the Scheduled Tribes but almost at par with the Residuary population in case of the Scheduled Castes.

STATEMENT Distribution of 1,000 persons of each sex of each age-group by marital Status.

All ages		General population	S. C. population	S. T. population	Residuary population
Total population	Males	1,000	1,000	1,000	1,000
	Females	1,000	1,000	1,000	1,000

SECTION 7 LITERACY AND EDUCATION

75. The place of literacy and education in assessing the backwardness of a section of the population is well recognised. Thus, the Backward Classes Commission (Report Vol. I, p. 46) mentions :

"After a consideration of social conditions in Indian society and the causes for the backwardness of a large section of the people we adopt the following criteria for general guidance :

- (1) Low Social position in the traditional caste hierarchy of Hindu society.
- (2) Lack of general education advancement among the major section of a caste or community.
- (3) Inadequate or no representation in Government service.
- (4) Inadequate representation in the field of trade, commerce and industry."

76. The welfare State is fully alive to its responsibilities in regard to the weaker sections of its citizens and schemes for raising the extent of literacy and education among the backward classes are receiving high priorities. Even so, the differences in levels of literacy between the scheduled communities on the one hand and the residuary population on the other are still rather marked, as the following statement will show.

STATEMENT Literacy Rates (number of literates per thousand) among various sections of the population separately for persons, males and females

Category of population	Literacy rate		
	Persons	Males	Females
General	..	184	298
Scheduled Caste	..	60	111
Scheduled Tribe	..	92	152
Residuary	..	218	349

The literacy rate among persons belonging to the Scheduled Castes is only 27 per cent of the rate among residuary population. Among the Scheduled Tribes, the corresponding proportion is 42 per cent. Female literacy is particularly low among the Scheduled Castes.

It is pertinent to note that no district in the State has a percentage of literacy below 12, even in rural areas which are less progressive in this respect. Yet the overall percentage of literacy is only 6 among the Scheduled Castes and 9.2 among the Scheduled Tribes.

77. The following statement shows the distribution of 1,000 persons males and females, by literacy and educational levels for different sections of the population.

STATEMENT

Distribution of 1,000 persons males and females by educational level in all areas for different sections of the population

	General population	Scheduled Caste population	Scheduled Tribe population	Residuary population
Total Population	Persons 1,000	1,000	1,000	1,000
	Males 1,000	1,000	1,000	1,000
	Females 1,000	1,000	1,000	1,000
Illiterate	Persons 816	940	908	782
	Males 702	889	848	651
	Females 931	991	968	915
Literate (without educational level)	Persons 136	49	67	160
	Males 214	91	112	248
	Females 58	8	23	72
Primary or Junior Basic	Persons 35	10	22	42
	Males 61	18	36	72
	Females 9	1	8	11
Matriculation and above	Persons 13	1	3	16
	Males 23	2	4	29
	Females 2	..	1	2

Generally speaking, the differences become more marked as the level of education increases, as, the following statement will show :

Level	Proportion (per cent) the percentage of population in level given in column 1 to the percentage of residuary population in the same level	
	Scheduled Caste	Scheduled Tribe
1	2	3
Literate	30.63	41.88
Primary or Junior basic	23.81	52.38
Matriculation and above	6.25	18.75

It is only among the Scheduled Tribes that the above percentage is greater for Primary or Junior Basic than for literates. In any case, the very low percentages under Matriculation and above are very suggestive. The proportion of Scheduled Caste females who have passed the Matriculation examination is negligible.

The variations in the rates of literacy and education in rural and urban areas have been indicated in the Flyleaf to Table SCT-III.

78. The gap in the rates of literacy and education is considerable. However, much lee-way has been made during the last decade and a half in bridging it. Earlier census figures, available only for 1931 and earlier Censuses for some of the presently Scheduled Castes and Tribes, are given in the Statement below :

STATEMENT

Castewise literacy rates (per 1,000) of total population in various censuses, 1901-1961

SCHEDULED CASTES

Caste	Census year					Percentage variation in literacy rate 1931-61

21 Bhuiya	4	8	6	7	13	171
Total S. C.	4	4	5	7	60	829

N. A.—Not available.

The literacy rate of the castes taken collectively has increased by as much as 829 per cent during 1931-61. The increase has been maximum (1260 per cent) among Chamars who are numerically predominant the largest Scheduled Caste. Among the numerically predominant castes only Dhobis have failed to make even as much progress as that made in the case of all the Scheduled castes taken together.

79. Earlier statistics for Scheduled Tribes are more limited. They are given in the following statement.

STATEMENT

Tribewise literacy rates per 1,000 of total population in various Censuses 1901-1961

SCHEDULED TRIBES

Tribe	Census year					Percentage variation in literacy rate 1931-61
	1901	1911	1921	1931	1961	
1	2	3	4	5	6	7

15 Bhumij	10	13	13	14	117	836
Total S. T.	7	6	6	13	92	708

N. A.—Not available

Tribal literacy has increased seven fold during the last thirty years, the most striking progress being registered by the Hos (1,200 per cent). Even the Santals, who are the most numerous Scheduled Tribe, show an increase of 871 per cent. In spite of this, their literacy rate in 1961 is only 6.1 per cent which is less than half that of the Mundas, the Oraons or the Kharias. It becomes evident that the literacy rate is related to the spread of Christianity among the Scheduled Tribes.

80. The following statement gives the more numerous tribes having comparatively higher literacy rates. The percentage of Christians in the tribe is also shown.

STATEMENT

Literacy rates and proportion of Christians for selected Tribes

Tribe	Literacy rate per thousand persons	Christians per thousand and members of tribe
Munda	138	263
Kharia	132	614
Oraon	127	238
Bhumij	117	1
Ho	96	5
Santal	71	18

Mundas, Kharias and Oraons have large numbers of Christians, and also much higher literacy rates than among Hos and Santals. The Bhumij is an exception, but they are largely Hinduised.

SECTION 8

RELIGION

Religion

81. Members of the Scheduled Castes can, by definition be only from among persons professing Hinduism or Sikhism. Such of the Scheduled Castes as have been converted to Christianity are treated as "backward classes" in Bihar. Actually all members of the Scheduled Castes returned themselves as Hindu with the exception of only 76 Sikhs. There were no cases in which a person belonging to a caste notified as a Scheduled Caste was not treated as such because of his having a religion other than Hinduism. In this connection it is noteworthy that in the State of Maharashtra, many members of the Scheduled Castes returned their religion as Buddhism or Neo-Buddhism in 1961, in consequence of which they were not enumerated as Scheduled Castes.

By and large, in spite of their low social position in the Hindu social hierarchy (on which a scarcely perceptible effect has been made by social legislation), the efforts of the Christian missionaries have either not been directed towards the proselytisation of the members of the Scheduled Castes or the efforts have yield insignificant results. Thus, out of a total of 502,195 Christians enumerated in Bihar in 1961, as many as 444,012 are members of the Scheduled Tribes. Thus there are only 58,183 Christians not belonging to the Scheduled Tribes. In other words, 6 out of 7 Christians in Bihar are members of the Scheduled Tribes.

82. The statement below gives the distribution of persons of each tribe by religion separately for Christian, Hindu and Tribal.

STATEMENT

Tribewise distribution of 1,000 persons by religion, 1961

Sl. no.	Name of Scheduled Tribe	Number of persons per 1,000 who are		
		Christian	Hindu	Tribal

31 Unclassified	..	34	919	47
All Tribes		105	721	174

The Hos stand out apart from the other Scheduled Tribes in returning the largest proportion of persons following tribal religions. Against 73.3 per cent of Hos adhering to tribal religions, the percentage never exceeds 20 in the other Scheduled Tribes among whom, as a whole, only 17.3 per cent yet profess tribal religion. Significantly only 5 Hos in a thousand are Christians. The process of Hinduisation seems to have been completed in the Chero, Khond, Parhaiya and Savar tribes. The Cheros of Palamau claim to be Rajput Hindus, and were classified as 'Hinduised Aborigines' by Dalton as far back as 1872. Khond and Savar are Orissa tribes found only in small numbers in Bihar. That Parhaiyas should all be returned as Hindus does not seem to afford a ready explanation. None of these four tribes (Chero, Khond, Parhaiya and Savar) have any Christians among them either.

Christianity is unknown only to 8 out of 30 tribes. Those in addition to the 4 given in the preceding paragraph are Baiga, Banjar, Birhor and Kharwar. The Kharwars, like the Cheros, are also found largely in Palamau district and are fully Hinduised. Tribal returns among them have been furnished by Kharwars of Bhagalpur and Santal Parganas, which further lends support to the view expressed earlier that they are really Santals and not Kharwars. Baiga is the name of the religious priest among the tribals of Palamau and north-west Ranchi, and it seems that priests of various tribes have been returned as Baigas. Naturally there is no Christian among them. Banjaras and Birhors are numerically insignificant and largely nomadic tribes which account for the absence of Christians among them.

The percentage of Christians to the total tribal population is 10.5 and only 3 tribes have higher percentages. It is only among the Kharias that Christians (61.4 per cent) outnumber the followers of all other religious beliefs. The Christian element is sizable among Mundas (26.3 per cent) and Oraons (23.8 per cent). Of the remaining tribes, only Asurs have more than 10 per cent Christians (10.4 per cent), the ratio among Santals being only 1.8 per cent.

Thus, it is only among the Hos and the Kharias that the Hindus are not in an absolute majority.

83. The variation in the distribution of persons by religious beliefs in the course of the last 50 years is given for 5 major tribes in the statement below. These tribes constitute 82 per cent of the total tribal population :

STATEMENT

Variations in the distribution of 1,000 persons belonging to selected Scheduled Tribes by religious beliefs, since 1911

Tribe	Year	Number per mille returned as		
		Tribal	Hindu	Christian
1	2	3	4	5
Ho	1911	854	143	3
	1921	885	112	3
	1931	747	248	4
	1961	733	262	5
Kharia	1911	505	283	212
	1921	362	364	274
	1931	211	353	436
	1961	119	267	614
Munda	1911	655	181	164
	1921	522	274	204
	1931	459	298	243
	1961	200	537	263
Oraon	1911	719	89	192
	1921	619	170	211
	1931	423	349	228
	1961	178	584	238
Santal	1911	801	193	6
	1921	617	377	6
	1931	650	342	8
	1961	67	915	18

It is seen that the bulk of the Hos have consistently returned their religion as 'tribal' and neither Hinduism nor Christianity has made any appreciable headway in the last thirty years. The proportion of Christians has been steadily increasing among the Kharias at the cost of 'tribal' religions, the proportion of Hindus remaining virtually constant. Among Munda, both Hinduism and Christianity are finding more adherents and causing vast depletion in those professing 'tribal' religions. But the relative proportions of Hindus and Christians were roughly equal in 1911. Fifty years later, there are twice as many Hindus as Christians. The situation is somewhat similar among Oraons only Hinduism seems to have made an even better headway. The sudden drop of 'tribal' from 65.0 per cent to 6.7 per cent among Santals (1931-61) is peculiar, especially when Christianity has increased only from 0.8 to 1.8 per cent.

84. The religions of individual Scheduled Tribes were not recorded in 1951 but the percentage of members of Scheduled Tribes following 'tribal' religions has decreased from 22.73 per cent to 17.37 per cent during 1951-61 as the following Statement will show :

STATEMENT

Tribal religions in 1951 and 1961

	1951	1961
1 Population of Scheduled Tribes	3,833,521	4,204,770
2 Number professing tribal religions	871,434	730,563
3 Percentage of 2 to 3	22.73	17.37

85. A word about the actual returns under 'tribal' religions. It has been seen above that Hos and Santals are among the larger tribes who have retained their traditional religions. Naturally both Ho and Santali account for a good number of 'tribal' returns. The largest number, however, is under Sarna, a term which connotes a primeval orchard which is the centre of congregational and ceremonial worship for most tribal communities. The only other denomination which accounts for sizeable returns is Sansar, a term used for distinguishing a person who follows his traditional religion from one who has been converted to Christianity.

The following statement gives the actual number of returns :

STATEMENT

Returns under tribal religions, 1961

Religion	Persons	Males	Females
Ho	187,313	91,656	95,657
Sansari	28,309	14,046	14,263
Sarnai	408,303	198,649	209,654
Santal	90,186	45,785	44,401
Other persuasions and beliefs	16,452	8,134	8,318
Total	730,563	358,270	372,293

86. Even some persons not belonging to the Scheduled Tribes have returned the above religions. The figures are given in the statement below :

STATEMENT

Persons not belonging to Scheduled Tribes Returning Tribal Religions, 1961

Religion	Persons	Males	Females
1 Ho	3,926	1,820	2,106
2 Sansari	37	30	7
3 Sarna	18,777	8,355	10,422
4 Santal	838	310	528
Total	23,578	10,515	13,063

This phenomenon may arise due to acculturation or influence of tribals on Hindus. It is also possible that the enumeration of Scheduled Tribes was deficient in some pockets which resulted in some of their slips having been mixed with the general population. What is more likely is that both the factors might have combined to bring about such results.

SECTION 9

MOTHER-TONGUE

Mother-Tongues of the Scheduled Tribes

Unlike the Scheduled Castes, who have no distinctive mother-tongues of their own, most of the Scheduled Tribes even now preserve their mother-tongues. This is rather suggestive, since language has been held to be an index no less valuable than religion of the extent to which a Scheduled Tribe has been able to retain its separate identity and its tribal characteristics. Census statistics reveal that the mother-tongues of the tribals have remained more immune from the onslaught of time and circumstance than their religions.

Language returns in census become somewhat complex due to the diffused nature of returns. Moreover, what the enumerators record sometimes undergo mutilations and distortions at the stage of tabulation in which the returns (almost wholly in Hindi) are transliterated into English characters. To enable a rational evaluation of the linguistic data, the mother-tongue returns were scrutinised by the Linguist of the Office of the Registrar-General, India. The Linguist was able to sift the returns by

- Rationalising variant forms of mother-tongues enumerated and tabulated ;
- Grouping mother-tongues which were dialects or other forms of certain languages ;
- Noting the place of the mother-tongues in Grierson's Classification in the "Linguistic Survey of India" ; and
- Reclassifying certain mother-tongues already classified in Grierson.

Members of the Scheduled Tribes returned 43 languages (including dialects) as their mother-tongues. These are given in Table ST-I in alphabetical order, separately for each Scheduled Tribe. The following statement shows the rationalized forms of names of such of the mother-tongues (listed in Table ST-I), for which variants were tabulated. Figures of speakers of languages mentioned in column 2 have been merged with speakers of languages in column 1 in Table ST-I.

STATEMENT

Rationalized form of names of mother-tongues as listed in Table ST-I	Variant forms of the names of mother-tongues recorded during enumeration and/or transcription
1	2
Anga	Angika, Angikar
Asuri	Assur
Bhili	Bhilboli
Birhor	Birhore
Chhattisgarhi	Chhatigarhi
Gawari	Gamari, Goari, Gauuari
Khortha/Khotta	Kharota, Khashta, Kothari
Koda/Kora	Kore, Korari, Korati
Kol	Koal, Kolaboli, Kole
Kurukh/Oraon	Kadukali
Malto	Malti
Panchpargania	Panchargania, Panchpargunia
Sadan/Sadri	Santri
Tamaria	Tamara, Tair, Temoral, Tumarriya

The returns which have been classified as dialects or other forms of specified languages by the Linguist are given in the statement below :

STATEMENT

Mother-tongues Classified as Dialects or other forms of languages

Language	Dialect or Other form
1	2
Ho	Lohara
Mundari	Parhaiya
Santali	Kamari, Karmali, Kisan, Lohari, Mahili
Malto	Sauria
Oraon	Dhangri
Bhojpuri	Chero
Gawari (Eastern Magahi)	Khottia, Nagpuri, Panchpargania, Tamaria
Malpaharia	Samaria.

The number of mother-tongues is thus effectively reduced by 15, i.e., from 43 to 28

It is to be noted, however, that Kamari, Kisan and Lohari cannot by themselves be grouped under any particular language. Since these languages as returned in Bihar, appeared to be related to Santali, the returns for these have been shown as Kisan-Santali, Lohari-Santali and Kamari-Santali in Table ST-I. Kamari and Kisan occur in the Grierson's classification so that Kamari-Santali and Kisan-Santali have been tentatively reclassified by the Linguist and Lohari-Santali tentatively classified.

Out of the remaining 28 mother-tongue returns Thar is a generic term indicating the Munda group of languages. Naiya has been held to be unclassifiable by the Linguist but it may be related to Mal Paharia among whom Naiyas are a priestly section.

The 26 remaining returns have been classified by Grierson as follows :—

TOTAL NON-TRIBAL		844,531

The following statement gives the number per mille of the Scheduled Tribe speaking tribal and non-tribal languages (*vide supra*) 1951 and 1961.

Language group	Speakers per 1,000 members of Scheduled tribes	
	1951	1961
Tribal	795	799
Munda	674	651
Dravidian	121	148
Non Tribal	205	201

Nearly four out of every five members belonging to the Scheduled Tribes speak some tribal language at present, the ratio being about the same as in 1951 (for 1951, ratios have been worked out for all speakers of tribal languages with reference to the total population of the Scheduled Tribes). However, the Munda languages seem to have lost some ground which has correspondingly and almost equally been gained by the Dravidian languages.

Against 2,729,323 speakers of Munda languages in 1951, there are only 2,736,908 speakers in 1961. The increase of 7,583 seems hardly in proportion to the rise in the population of speakers of these languages. The lack of tribe wise statistics for 1951 does not per-

mit of further analysis. However, the actual returns of different languages are quite revealing. The following statement gives the comparative figures for 1951 and 1961 for the major Munda languages.

STATEMENT

Speakers of major Munda languages, 1951 and 1961 with differences

Language	Speakers in 1951	Speakers in 1961	Increase(+) or decrease(—)
1	2	3	4
1 Santali	1,720,529	1,550,687	(—) 169,842
2 Mundari	500,342	550,778	(+) 50,436
3 Ho	418,223	443,562	(+) 25,339
4 Kharia	69,787	91,558	(+) 21,771
5 Bhumij	1,821	38,457	(+) 36,636
6 Karmali	100	22,111	(+) 22,011
7 Mahili	3,827	9,037	(+) 5,210
8 Koda/Kora	80	2,057	(+) 1,977
9 Korwa	10,757	3,759	(—) 6,998

The large decrease in the number of speakers of Santali may be attributed to over-enumeration in 1951 due to inclusion of non-tribal speaker of Santali, since the total number of Santals in 1961 is less than the number of tribals speaking Santali. However, in the case of Korwa the speakers of the languages comprise less than a fifth of the members of the Korwa tribe and the only conclusion seems to be that, during the decade, more than two-thirds of the speakers of 1951 have given up their own mother-tongue. Both in the case of Karmali and Kora the large increase is apparently in conformity with the strength of the tribes. Tribal speakers of Karmali are about the same as the number of members of Karmali tribe but peculiarly, Karmali has been returned as mother-tongue from districts containing small numbers of Karmalis. The number of Koras is more than six times the number of speakers of the language in 1961.

Of the Munda languages, Santali accounts for more than half (58.37 per cent) the speakers. Mundari (20.13 per cent) and Ho (16.21 per cent) are the other major Munda languages. Thus the remaining account for only 5.29 per cent of the speakers of Munda languages.

The following statement gives the comparative figures of 1951 and 1961 for the Dravidian languages.

STATEMENT

Speakers of Dravidian languages, 1951 and 1961 with differences

Language	Speaker in 1951	Speaker in 1961	Increase(+) or decrease(—)
1 Kurukh/Oraon	461,203	539,551	(+) 78,348
2 Malto	23,857	83,223	(+) 59,366
3 Gondi	3,319	410	(—) 2,909

The major difference is in the number of speakers of Malto, and appears to have been caused by under-enumeration in 1951, since the number of Sauria Paharias (whose mother-tongue Malto is), approximates to the returns of 1961. On the other hand speakers

of Gondi constitute a bare 1.5 per cent of the Gond population.

Among the Dravidian languages, Kurukh/Oraon accounts for the bulk of the speakers (86.58 per cent), the absolute number of speakers of Oraon being of the same order as the number of Mundari speakers. Malto, the language of Sauria Paharias of Santal Parganas, accounts for the rest, Gondi being returned by surprisingly few persons. Some of the mother-tongues returned by the Scheduled Tribes are spoken by them exclusively. These are Bhumij and Birjia and the dialects Chero, Lohara, Sauria and Thar. Others are spoken by some non-tribals also. More than 95 per cent of the speakers of the following are members of Scheduled Tribes : Korwa, Ho, Asuri, Samaria, Oraon, Santali, Birhor, Mahili, Mundari and Kharia.

The percentage is over 90 in case of Malto and Gondi, while it exceeds 50 for Kora, Parhaiya, Malpaharia, Kol and Lohari.

The tribal languages whose speakers among the Scheduled Tribes comprise less than 50 per cent are in Kisan (46 per cent), Karmali (33 per cent), Naiya (22 per cent), Dhangri (20 per cent), Tamaria (11 per cent), and Kamari (10 per cent).

Of these, Kisan and Naiya are spoken by less than 100 persons each and the returns are not high enough to indicate any trend. Karmali has been returned mostly from Singhbhum and mainly by the Scheduled Tribes in the latter. In Singhbhum, however, nearly 43,000 non-tribals have returned Karmali as their mother-tongue. This seems to show that Karmali (the language of Mahto-Kurmish of Chotanagpur) has been included under Karmali. The number of speakers of Karmali is insignificant in Hazaribagh and Santal Parganas, which are strongholds of members of the Karmali tribe. Tamaria, literally means the language of Tamar, a police station in Ranchi district. The low percentage of Scheduled Tribe speakers of this languages does not appear to be readily explicable. Kamari and Dhangri are minor tongues, with less than 1,000 speakers of each.

On the other hand, there are some non-tribal languages spoken by a larger number of members of the Scheduled Tribes rather than the non-tribals. Bhili is a mother-tongue, having only 116 speakers in all. Gawari and Sadri (both variants of Magahi) occur only in tribal areas, and so the preponderance of tribal speakers of these languages is not unexpected. So also with regard to Mal Paharia. Although classified by Grierson as a form of Eastern Bengali, the Mal Paharias speak a language rather akin to Malto. This perhaps accounts for large returns under Malto and negligible returns of Malpaharia.

The language affinities of the Scheduled Tribes of Bihar have been discussed (in Table No. 3 at pages 314-315) in the "Land and People of Tribal Bihar" (Bihar Tribal Research Institute : Ranchi : 1951). According to it, as many as 11 tribes speak Indo-

Of the above, the Linguist has reclassified some languages as follows :

Mother-tongue	Manner in which reclassified
Bilaspuri	Chhattisgarhi
Nagpuri	Eastern Magahi

It has been seen that there are twenty six main tongues (which include some dialects according to Grierson) returned by members of the Scheduled Tribes. The tribal languages constitute those finding place in the Austric and Dravidian Families of Grierson's Classification while the rest belong to the Indo-European Family. The following statement gives the numbers of speakers of each of the 26 main and 17 other mother-tongues :

STATEMENT

Mother-tongues of Scheduled Tribes Classified by Tribal/Non-Tribal with number of speakers in each

A—TRIBAL		Total Speakers
(i) Munda Languages		
1	Asuri	3,767
2	Bhumij	38,457
3	Birhor	263
4	Birjia/Brijia/Binjhia	1,506
5	Ho	443,562
	Ho	293
6	Kharia	91,558
7	Koda/Kora	2,057
8	Korwa	3,759
9	Mundari	551,086
	Mundari	550,778
	Pahaiya	308
10	Santali	1,597,573
	Santali	1,550,687
	Kamari	96
	Karmali	22,111
	Kisan	19
	Lohari	83
	Mahili	9,037
	Thar	15,540
11	Kol	3,027
Total Munda		2,736,908

Aryan languages, mostly Sadani, which is a form of Bhojpuri. The following statement shows the 11 tribes, along with the dialect scribed to each—Alongside is given the ratio per 1,000 speakers returning Munda, Dravidian and non-tribal languages respectively:

Tribe	Dialect as per BTRI	Speakers per 1,000 of		
		Munda languages	Dravidian languages	Non-tribal languages
1 Baiga	Sadani	..	..	1,000
2 Banjara	Sadani	..	..	1,000
3 Bathudi	Mixed	..	..	1,000
4 Bedia	Sadani	2	..	998
5 Binjhia	Sadani	3	..	997
6 Birjia	Sadani	375	..	625
7 Chik Baraik	Sadani	18	3	979
8 Gorait	Sadani	8	6	986
9 Kharwar	Sadani	7	10	983
10 Lohra	Sadani	132	5	863
11 Parhaiya	Sadani	15	..	985

Except for the Birjias and Lohras, in none of the tribes is the proportion of speakers of tribal languages more than a fifth. However, there are other tribes falling in the same category as regards the proportion of speakers of non-tribal languages. They are indicated in the following Statement :

Tribe	Speakers per 1,000 of		
	Munda languages	Dravidian languages	Non-tribal languages
1 Chero	..	..	1,000
2 Gond	14	13	973
3 Karmali	220	8	772
4 Khond	6	..	994
5 Kisan	..	3	997
6 Korwa	206	66	728
7 Savar	282	..	718

Thus 17 of the Scheduled Tribes now have less than 30 per cent speakers of the tribal languages (the Birjias being the exception in the above statements).

The tribes that have been most successful in preserving their mother-tongues are, generally, the numerically predominant ones. Thus Santals, who are the largest tribe, also have the maximum percentage (98.5) of persons speaking tribal tongues. The Hos come next (98.1 per cent). Significantly, these two tribes have also been the least affected by proselytisation. Both the Mundas and the Oraons still preserve their mother-tongues to a large extent, (the former more so than the latter), only about a fifth of them having taken to non-tribal tongues. The Kharias (83.9 per cent speaker of tribal tongues), however, speak a language which has been largely influenced by non-tribal languages of which numerous words find place in their vocabulary. The Sauria Paharias, by virtue of their isolated habitat, naturally continue to retain their language, and more pertinently the majority (52.5 per cent) of Mal Paharias have returned Malto rather than Malpaharias as their mother-tongues. Among the smaller tribes, only the Asurs (65.8 per cent) and the Birhors (53.9 per cent) have more speakers of tribal than non-tribal languages.

The relevant statistical proportion for the tribes (other than the 18 given earlier) are given in the statement below :

STATEMENT

Tribe	Speakers per 1,000 of		
	Munda languages	Dravidian languages	Non-tribal languages
1 Asur	658	2	340
2 Birhor	539	..	461
3 Ho	981	..	19
4 Kharia	839	..	161
5 Korwa	206	66	728
6 Mahli	425	7	568
7 Mal Paharia	7	525	468
8 Munda	792	5	203
9 Oraon	67	724	209
10 Santal	985	..	15
11 Sauria Paharia	3	922	75
12 Bhumij	588	..	412

Although several tribes have taken to non-tribal languages, as has been seen earlier, the bulk of them (79.9 per cent) still speak tribal tongues. The extent of prevalence of bilingualism, therefore, retains its importance in any assessment of the effects of wider contacts of the tribals with their non-tribal neighbours.

The enumeration of subsidiary languages was undertaken for the first time in the Census of 1931. The reasons for its introduction were two-fold. First, often the traditional language spoken by the tribes used to be enumerated as the mother-tongue of all the members of the tribe as a matter of routine, although in actual fact persons concerned may have had given up speaking their traditional languages. Secondly, there was the intrinsic value of an enquiry into the prevalence of bilingualism, which assumed greater significance in case of tribal communities, in assessing the extent to which they were being influenced by their neighbours.

Among the speakers of tribal languages, 30.7 per cent of the males and 23.8 per cent of the females have returned some subsidiary languages with which they are also conversant.

The following statement gives comparative figures of proportions of speakers of specified languages who returned some subsidiary languages, for 1931 and 1961 :

STATEMENT

Tribal language	Number per mille using some subsidiary languages	
	1961	1931
1 Asuri	..	578
2 Bhumij	..	520
3 Birhor	..	221
4 Birjia	..	448
5 Ho	..	140
6 Karmali	..	333
7 Kharia	..	441
8 Kora	..	484
9 Korwa	..	561
10 Mahili	..	424
11 Mundari	..	255
12 Santali	..	231
13 Gondi	..	273
14 Oraon	..	458
15 Malto	..	225

The large drop in the proportion of speakers of subsidiary languages is apparent in most cases. It is only in case of speakers of Karmali, Kora and Malto that the ratios have gone up. The phenomenon is hardly in conformity with the expected trends but the explanation is not far to seek. The subsidiary language was recorded in column 15 of the Individual Slip in 1931, for which the instructions were :

"In column 15 may be entered the language or languages (if any) which are commonly used by the speaker in addition to the genuine mother-tongue as first spoken from the cradle".

The instructions for 1961 were :

"After recording the mother-tongue enquire whether the person knows any other language (s) Indian or foreign, and write the language (s) reported by him against this question. In case he does not know any other language put 'X'".

The number of languages recorded against this question should not be more than two. These languages should be other than his mother-tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language".

The exclusion of "dialects of the same language" (as the mother-tongue) in 1961 actually gave the powers of arbitrary judgement to the enumerator in determining whether or not a particular tongue is a dialect of the mother-tongue. It appears that the *lingua franca* of the tribals, Sadani, was generally not recorded as subsidiary language on the assumption that it was but a dialect of the main tribal languages. Any such presumption can hardly be criticised in view of the fact that Sadani is such a composite amalgam of so many tongues.

TABLE SCT-I

INDUSTRIAL CLASSIFICATION
OF PERSONS AT WORK AND
NON-WORKERS BY SEX

Note : (1) UC & UF in 1901 indicate Unclean castes and Unclean feeders.
 (2) Figures under 1911 indicate the serial number (s) of the religious disabilities listed at page VII.
 (3) DC in 1931 indicates Depressed Classes.
 (4) SC in 1961 indicates Scheduled Castes.

TABLE SCT-I—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX

FLYLEAF

This table is in two parts—Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. It is an important table as it gives the population of each Scheduled Caste and Scheduled Tribe separately for rural and urban areas, and also shows in which sector or sectors of industry members of each Scheduled Caste and Scheduled Tribe are working, and how many. The classification is first into workers (columns 5 & 6) and non-workers (columns 25 & 26) and then, of workers into the nine categories of economic activity (columns 7-24). Similar tables for the general population have been published in the Primary Census Abstract in Part II-A of the Bihar Volume (Volume IV) up to the level of Anchals and towns, and will be presented in the Village Statistics portions of the District Census Handbooks for individual villages. A special feature of Table SCT-I Part A is the presentation of data on the unwholesome occupations of (i) tanning and currying of hides and skins, and (ii) scavenging, in which some members of Scheduled Castes are working.

2. The occupational classification of members of the major castes and tribes from among those presently scheduled has been recorded in earlier censuses as follows* :

(i) 1931—Table XI for—

(a) Chamar, Dhobi (Dhoba),

(b) Nil.

(ii) 1921—Table XXI for—

(a) Chamar, Dhobi, Dosadh,

(b) Nil.

(iii) 1911—Table XVI for—

(a) Bauri, Bhuiya, Chamar & Mochi, Dhoba, Dom, Dusadh, Hari, Musahar, Pan, Rajwar,

(b) Bhumij, Gond (for Orissa States only), Ho, Munda, Oraon, Santal.

(iv) 1901—Table XVI for—

(a) Bauri, Bhogta, Bhuiya, Chamar/ Muchi, Dhoba, Dom, Dosadh, Ghasi, Hari, Musahar, Pan, Pasi, Rajwar,

(b) Bhumij, Chik, Gond, Ho, Kharia, Kharwar, Malpaharia, Munda, Oraon, Santal.

* (a) gives details of castes presently scheduled.

(b) gives details of tribes presently scheduled.

Concepts and Definitions

3. The following definitions were adopted for the Census of 1961 for persons (a) working, and (b) non-working.

(a) *For Persons Working.*

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties, but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

(b) *For Persons Not Working.*

The following activities should be recorded in the case of persons NOT Working :

1. For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.....Write ST.
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even, part-time in family cultivation, industry, trade or business.....Write HW.
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.....Write D.
4. For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he

does not have to work and who does no other work.....Write R.

5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence..... Write B.
6. For a convict in jail (an under-trial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.....Write I.
7. For a person who has not been employed before but is seeking employment for the first time.....Write NE.
8. For a person employed before but now out of employment and seeking employmentWrite UN.

Explanation.—If a person, who does not work cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in item 7 or 8.

4. The definitions now adopted for workers have marked a departure from those of 1931 and 1951. In 1951 the entire population was divided into the following eight broad livelihood classes.

I Cultivators of land wholly or mainly owned and their dependants.

II Cultivators of land wholly or mainly unowned and their dependants.

III Cultivating labourers and their dependants.

IV Non-cultivating owners of land, agricultural rent receivers; and their dependants.

Persons (including dependants) who derive their principal means of livelihood from :

V Production (other than cultivation).

VI Commerce.

VII Transport.

VIII Other services and miscellaneous sources.

Each class was, in turn, classified into three categories based on the concept of self-sufficiency in terms of earning. The three categories were (i) self-supporting persons, (ii) earning dependants, and (iii) non-earning dependants.

5. Thus, according to present definition, the workers of 1951 comprised of :

(i) All self-supporting persons with productive principal means of livelihood, i.e., all self-supporting persons other than (a) agricultural rent-receivers belonging to Livelihood Class IV and (b) self-supporting persons deriving their means of livelihood from non-agricultural, non-productive occupations, like beggars, pensioners, etc., belonging to Livelihood Class VIII.

(ii) Self-supporting persons belonging to Livelihood Class IV (agricultural rent-receivers) but deriving secondary means of livelihood from productive occupations, i.e., other than Class IV.

(iii) All earning dependants in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from :

(a) receipt of agricultural rent under Class IV, and

(b) non-agricultural non-productive occupations (For calculating working force, no account has been made of the self-supporting persons whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood,

as unlike rent-receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood).

Non-workers of 1951 were equal to :

(i) All non-earning dependants ;

(ii) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood ;

(iii) The following groups of self-supporting persons included in non-agricultural Class VIII :

(a) Persons living principally on income from non-agricultural property ;

(b) Pensioners and remittance holders ;

(c) Inmates of jails, asylum, alms houses and recipients of doles, beggars and vagrants, and

(d) Other persons living principally on income derived from non-productive activity.

(iv) Earning dependants whose own means of livelihood (Secondary means of livelihood) was agricultural rent-receiving under Class IV, and

(v) Earning dependants whose secondary means of livelihood was non-agricultural non-productive*.

Comparison of data

6. During the decade 1951-61, there has been considerable increase in the percentage of workers (according to the 1961 definition). The following statement gives the percentage of workers for persons, males and females for the State of Bihar according to Censuses of 1951 and 1961 (The figures of 1951 have been recast according to 1961 concepts).

STATEMENT I

Percentage of workers, Bihar

Census year	Persons	Males	Females
1951	34.96	49.12	20.66
1961	41.40	55.60	27.12

While the increase in the percentage of workers among males may largely be attributed to the impact of development schemes being executed under the Five-Year Plans, the rise in the proportion of workers among females is probably more ascribable to the conceptual changes. A good number of females who may have been classed as non-earning dependants in the previous censuses now find place as workers, by virtue of their contribution to the gainful economic activities of the household. The observation applies more particularly to females belonging to Scheduled Castes and Scheduled Tribes among whom participation rates in work for females are comparatively much higher.

7. In the Census of 1961, the workers are classified into the following 9 categories of economic activities. The classification is based upon the Standard Industrial Classification adopted by the Government of India. The correspondence between the Divisions of the Standard Industrial Classification and the 9 categories adopted in the Census is indicated below :

Category of Census	Division of Standard Industrial Classification
I In Cultivation	Question 8 of the individual slip
II In Agricultural Labour	Question 9 of the individual slip
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchard and Allied activities	0—Agriculture, Livestock, Forestry, Fishing and Hunting (except minor groups 000 to 004) 1—Mining and Quarrying
IV In Household Industry	Question 10 of the individual slip
V In Manufacturing other than Household Industry	2 & 3—Manufacturing
VI In Construction	4—Construction
VII In Trade and Commerce	6—Trade & Commerce

Category of Census	Division of Standard Industrial Classification
VIII In Transport, Storage and Communication	7—Transport
IX Other Services	5—Electricity, Gas, Water and Sanitary Services 8—Services 9—Activities not adequately described elsewhere.

Since categories I, II and IV were classified from the questions themselves, no correlation with the I. S. I. C. was attempted in the tabulation stage. The instructions relating to Questions 8, 9 and 10 are given below:

Q. 8.—Working as Cultivator.

For a person working as cultivator write C.
For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institution for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow

*Extracted from 'A Note on Working Force Estimates, 1901-61' by Sri B. R. Kalra, Research Officer, printed as Appendix I to Final Population Totals, Census of India, Paper No. 1 of 1962.

and when or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9.—*Working as Agricultural Labourer.*

Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others, put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10 (a) & 10 (b)—*Household Industry.*

If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10 (a) and (2) the nature of the Household Industry against question 10 (b). Otherwise put X in both questions 10 (a) and 10 (b). A Household Industry is defined as an industry conducted by the Head of the Household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing

or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10 (a) and the nature of the Household Industry against 10 (b).

Q. 10 (c)—*If Employee in Household Industry.*

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E. E. For all others put X.

Rural-Urban classification

8. The economic pursuits of the people generally differ in rural and urban areas. Hence, the statistics in Table SCT-I Parts A and B are presented separately for rural and urban populations.

The combined population of all towns (including cities) constitutes the urban population, while the remaining population is referred to as the rural population. All the Municipalities, Notified Areas, Civil Lines and Cantonments are *ipso facto* treated as towns. In addition, certain places with urban characteristics have also been treated as towns. The selection of the latter was guided by the following general principles, viz., that each should have :

- population of not less than 5,000.
- density of not less than 1,000 persons per square mile,
- at least three-fourth of the adult male population engaged in non-agricultural occupations.

A 'city' is a town having population of 100,000 and above.

Statement IV below gives the list of towns in order of population, and the number of members of Scheduled Castes and Scheduled Tribes in each.

The classification of the population of these towns into industrial categories of workers and non-workers has been published in Volume IV, Part II-A.

The following statement gives the numbers and percentage of the total population, Scheduled Caste population and Scheduled Tribe population in the State in rural and urban areas.

STATEMENT II				
Population	Number in rural areas	Percentage in rural areas	Number in urban areas	Percentage in urban areas
Total	42,541,690	91.57	3,913,920	8.43
Scheduled Castes	6,174,654	94.46	362,221	5.54
Scheduled Tribes	4,094,825	97.39	109,945	2.61
Residuary	32,272,211	90.36	3,441,754	9.64

The following statement gives the distribution of 1,000 persons in rural and urban areas by sector of industrial activity.

Sector of Industry in which working	Number per 1,000 persons			
	Scheduled Caste		Scheduled Tribe	
	Rural	Urban	Rural	Urban
Primary (Categories I—III)	424	120	552	154
Secondary (Categories IV—VI)	26	84	20	105
Tertiary (Categories VII—IX)	46	201	22	146
TOTAL	496	405	594	405

The difference in the pattern of employment in the rural and urban areas is apparent, the primary sector assuming negligible proportions in urban areas.

STATEMENT IV
Cities, Town-Groups and Towns—Population, Scheduled Caste population and Scheduled Tribe population

City/Town-Group/Town	Total population			Scheduled Caste population			Scheduled Tribe population

TABLE SCT-II

AGE AND MARITAL STATUS

TABLE SCT-II—AGE AND MARITAL STATUS

FLYLEAF

This table provides, for the first time, the basic demographic data relating to the Scheduled Communities. It is presented in two parts, viz.,

- (i) Table SCT-II Part A for Scheduled Castes, and
- (ii) Table SCT-II Part B for Scheduled Tribes.

2. This table is similar to Table C-II for the general population, being presented in Part II-C, Vol. IV, Census of India, 1961. However, the classification into age-groups is not as detailed in Table SCT-II as in Table C-II, quinquennial periods being given in the latter.

Reference to earlier Censuses

3. Statistics relating to age and marital status have been recorded earlier for the members of the major castes and tribes among those presently scheduled. Details are given below* :

- (i) 1931—Table VIII, Page 50 (Unmarried, Married, Widowed—0-6, 7-13, 14-16, 17-23, 24-43, 44 and over) for—

- (a) Chamar, Musahar,
- (b) Munda, Oraon, Santal.

- (ii) 1921—Table XIV, Page 106 (Unmarried, Married, Widowed—0-5, 5-12, 12-15, 15-20, 20-40, 40 and over) for—

- (a) Bhuiya, Chamar, Musahar, Pan,
- (b) Munda, Oraon, Santal.

- (iii) 1911—Table XIV, Page 132 (Unmarried, Married, Widowed—0-5, 5-12, 12-15, 15-20, 20-40, 40 and over) for—

- (a) Bauri, Bhuiya, Chamar, Dhobi (Dhoba), Dom, Hari (for Orissa only), Musahar, Pan, Rajwar,
- (b) Bhumij, Gond, Kharia, Mal Paharia, Munda, Oraon, Santal.

- (iv) 1901—Table XIV, Page 292 (Unmarried, Married, Widowed—0-5, 5-12, 12-15, 15-20, 20-40, 40 and over) for—

- (a) Bauri, Bhogta, Bhuiya, Chamar, Dhoba (Dhobi), Dom, Dosadh, Ghasi, Hari, Muchi, Musahar, Pan, Pasi, Rajwar,
- (b) Bedca, Bhumij, Chero, Chik (Baraik), Gond, Ho, Kharia, Kharwar, Korwa, Mal Paharia, Munda, Oraon, Santal.

- * (a) gives details of castes presently scheduled.
- (b) gives details of tribes presently scheduled.

4. The ages of all individuals were recorded in Q. 2 of the Individual slip in completed years last birthday. An analysis of the age returns of 1961 has been published in Census of India Paper No. 2 of 1963. The preferences for returning ages ending in the digits 0 and 5 resulted in some anomalies in single-year age returns. However, the figures of the broad age-groups presented in this table (viz., 0 to 14, 15 to 44 and 45+), are automatically more accurate. The age-groups correspond roughly to the juvenile, adult and elderly persons in the population.

5. The marital status has been given for the total population of males and females of each Scheduled Caste and Scheduled Tribe for—

- (i) all ages (columns 6 to 15),
- (ii) age-group 0-14 (columns 18 to 27),
- (iii) age-group 15-44 (columns 30 to 39), and
- (iv) age-group 45+ (columns 42 to 51),

for the State, Divisions and Districts. The figures are for the total population, i.e., rural and urban combined.

6. The totals of the age-groups 0-14, 15-44 and 45+ are short by 439 males and 381 females in Part A and by 385 males and 371 females in Part B of the Table from the totals shown under 'All ages'. These figures represent males and females whose ages were not recorded in the Individual

Slips. The detailed communitywise break up of these according to marital status for the State, Divisions and Districts is given in the Appendix to each Part of the Table.

7. In preparing Table C-II for the general population, all persons in the age-group 0-9 were treated as 'Never Married' irrespective of the entry in the slip. But for Scheduled Castes and Scheduled Tribes, no such rule-of-thumb was applied. In effect, therefore, the marital status of the general population for the age-group 0-14 really reflects the number of married persons, widows and divorced or separated persons in the age-group 10-14. Thus the number of widowed persons in age-group 0-14 is higher among Scheduled Communities than among the general population.

8. The population has been grouped into four categories of marital status, viz.,

- (i) Never Married (Bachelor/Spinster),
- (ii) Married (with a living spouse),
- (iii) Widowed (married but spouse deceased),
- (iv) Divorced or Separated.

Till 1941 Census, there was no classification under marital status 'Divorced or Separated'. In 1951 Census also, widowed and divorced persons were clubbed together in the main table, but separate figures in respect of divorced persons were given in the flyleaf. In this Census, figures on full count are being presented separately for the first time for widowed and divorced or separated persons in the table.

TABLE SCT-III

LITERACY AND EDUCATION

TABLE SCT-III—LITERACY AND EDUCATION

FLYLEAF

The statistics pertaining to literacy and education among the Scheduled Castes and Scheduled Tribes are presented in two parts each, separately for rural and urban areas. The terms 'rural' and 'urban' have the same connotation as given in the Flyleaf to Table SCT-I.

The tables are—

(i) SCT-III—Part A(i)—Education in urban areas only for Scheduled Castes.

(ii) SCT-III—Part A(ii)—Education in urban areas only for Scheduled Tribes.

(iii) SCT-III—Part B(i)—Education in rural areas only for Scheduled Castes.

(iv) SCT-III—Part B(ii)—Education in rural areas only for Scheduled Tribes.

2. Table SCT-III Part A is similar to Table C-III Part B and Table SCT-III Part B to Table C-III Part C for the general population, which are being presented in Part II-C., Volume IV, Bihar, Census of India, 1961.

Reference to previous Censuses

3. Figures relating to literacy and education have been given in earlier Censuses for some of the Scheduled Communities as noted below :*

(i) 1931—Table XIV, Page 110 for—

(a) All Scheduled Castes (except Bantar, Dabgar and Musahar),

(b) Ho, Munda, Oraon, Santal, Savar (for Orissa State only).

(ii) 1921—Table IX, Page 56 for—

(a) Bauri, Bhuiya, Chamar, Dhobi (Dhoba) Dom, Dosadh, Musahar, Pan,

(b) Bhumij, Ho, Munda, Oraon, Santal.

(iii) 1911—Table IX, Page 52 for—

(a) Bauri, Bhuiya, Chamar, Dhobi (Dhoba), Dom, Dosadh, Hari, Musahar, Pan, Rajwar,

(b) Bhumij, Gond, Ho, Mal Paharia, Munda, Oraon, Sauria Paharia, Santal.

(iv) 1901—Table IX, Page 100 for—

(a) Bauri (Manbhum), Bhogta, Bhuiya, Chamar, Muchi, Dhobi (Dhoba), Dom, Dosadh, Ghasi, Hari, Lalbegi (Calcutta only), Musahar, Pan, Pasi, Rajwar,

(b) Bhumij, Chero, Chik (Baraik), Gond, Ho, Kharia, Kharwar, Malpaharia, Munda, Oraon, Santal.

*(a) gives details of castes presently scheduled.

(b) gives details of tribes presently scheduled.

Concepts and Definitions

4. The figures in the table have been compiled from answers to Question 6 of the Individual Slip which was filled in by the enumerators according to the following instructions :

"I. Illiterate or Literate

For a person

1. Who can neither read nor write or can merely read but cannot write in any language.....Write O

2. Who can both read and write.....Write L

The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L."

5. Literacy and education are usually higher in urban areas as compared to rural areas. Hence the literates are more elaborately classified in urban than in rural areas.

6. The following levels have been shown for rural areas :

(i) Literate without any educational level (This group includes all persons able to read

and write, but have not passed the Class V Examination of any School).

(ii) Primary or Junior Basic (This group includes all persons who have passed Upper Primary (Class V) but not passed the Matriculation Examination. Persons having passed Class VIII or X or even Matric failed, fall in this category).

(iii) Matriculation and above (This group includes persons having passed the Matriculation or Higher examinations).

7. For urban areas, additional classifications have been made for levels of education beyond Matriculation. These are :

(i) Technical diploma not equal to degree (This category includes persons who are licentiates in draughtmanship, civil or mechanical engineering, etc).

(ii) Non-technical diploma not equal to degree (This category includes persons with qualifications not equal to degrees).

(iii) University degree or post graduate degree other than technical degree (The equivalence of examinations of certain bodies with those of recognised Universities was taken into consideration for this category). The following table shows the equivalence adopted :

Statement showing the equivalence of certain diplomas or degrees with examinations of recognised universities.

Name of examinations of National Universities or other bodies	Name of examinations of recognised Universities.
1	2
1. Bihar Vidyapith (Patna) (1) Praveshika (2) Snatak	.. Matriculation .. B. A.

6. Hindi Vidyapith (Deoghar) (1) Praveshika (2) Sahitya Bhushan (3) Sahityalankar	.. Matriculation .. I. A. .. B. A.
7. Tilak Maharashtra Vidyapith (Bombay) (1) Pravesh (2) Visharad	.. Matriculation .. B. A.
8. The Prayag Mahila Vidyapith (Allahabad) (1) Vinodini (2) Vidushi (3) Saraswati	.. Matriculation .. I. A. .. B. A.
9. The Adya Diploma of the Vishwabharati (Santiniketan) (1) Adya (2) Madhya (3) Antya	.. Matriculation .. I. A. .. B. A.
10. Gurukul Kangri University (Hardwar) (1) Adhikari Examination (2) Vidyalkar and Vedalkar (3) Vidya Vachaspati	.. Matriculation .. B. A. .. M. A.
11. S. D. Thackersey Indian Women's University (Bombay) Entrance Examination	.. Matriculation
12. Indian Institute of Science (Bangalore) (1) Associateship (2) Fellowship	.. M. Sc. .. Ph. D.
13. Sarvodaya High School (recognised) Sarvodaya High School certificate	.. Matriculation
14. Cambridge Higher School Certificate	.. I. A.

(iv) Technical degree or diploma equal to degree or post graduate degree (Includes medical and engineering graduates).

8. The following statement shows the literacy rate (number of literates per thousand of the total population) for Scheduled Castes and Scheduled Tribes, separately for males/females and rural/urban:

STATEMENT

	Literacy Rate			
	Rural		Urban	
	Males	Females	Males	Females
Scheduled Castes	103	8	244	41
Scheduled Tribes	146	28	381	182

The difference in literacy rates in rural and urban areas among both sexes are apparent.

TABLE SCT-IV

RELIGION

TABLE SCT-IV—RELIGION

FLYLEAF

This table is presented in two parts—

(i) Table SCT-IV Part A gives the religion for Scheduled Castes.

(ii) Table SCT-IV Part B gives the religion for Scheduled Tribes.

3. The religions of the members of Scheduled Tribes have been given in Table SCT-IV Part B. The following religions have been shown in the main table :

- | | |
|--------------|----------------------------------|
| 1. Christian | 5. Sarna |
| 2. Hindu | 6. Santal |
| 3. Ho | 7. Other Persuasions and Beliefs |
| 4. Sansari | |

4. In 1951 districtwise figures were collectively given for 'tribal religions' in Table D-II. The tribal religions included the following :

Adibasi, Santali, Mundari, Sarna, Ho, Sarhul, Karmali, Bhut Puja, Jhakhra, Oraon, Singbonga, Jahir, Kol, Mahili, Kharwar, Gond, Marangburu.

Table SCT-IV Part A has, therefore, been prepared only for the aforesaid 7 districts, and the concerned revenue divisions, and the State. In the 10 remaining districts, all members of the Scheduled Castes have returned their religion as Hindu. Districtwise break up of members of each Scheduled Caste in rural and urban areas has been given in Table SCT-I Part A.

Thus figures have been separately provided in 1961 for three of the aforementioned religions viz., Santali, Sarna and Ho. Sansari was not returned as a religion in 1951 but many persons following this religion were returned in 1961. A break up of the religions grouped in 'Other Persuasions and Beliefs' in Table SCT-IV Part B is given in the Appendix to this table.

TABLE SCT-V

SAMPLE HOUSEHOLDS ENGAGED
IN CULTIVATION CLASSIFIED
BY INTEREST IN LAND AND
SIZE OF LAND CULTIVATED IN
RURAL AREAS ONLY

TABLE SCT-V.—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AREAS ONLY

FLYLEAF

The table is presented in two parts—

- (i) Table SCT-V Part A Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Castes (Households of members of Scheduled Castes in a 20 per cent Sample for All Households).
- (ii) Table SCT-V Part B Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Tribes (Households of members of Scheduled Tribes in a 20 per cent Sample of All Households).

2. Household economic tables are a new feature of the 1961 Census. Economic data were never collected or tabulated on household basis in previous Censuses. The figures in Table SCT-V are given for total Scheduled Caste/Tribe households in the sample and not for households of individual castes/tribes.

3. A Household Schedule was canvassed for every 'household' which term means "the entire group of persons who commonly live together in the same census house and take their meals from a common kitchen unless the exigencies of work prevent them from doing so". The main schedule was divided into three parts—

- A. Cultivation
- B. Household Industry
- C. Workers at cultivation or Household Industry :

The first part reproduced below elicited the information from which Table SCT-V has been compiled :

A. Cultivation	Local name of right on land	Area in acres
----------------	-----------------------------	---------------

1. Land under cultivation by Household
 - (i) Owned or held from Government
 - (ii) Held from private persons or institutions for payment in money, kind or share
 - (iii) Total of items (i) & (ii)
2. Land given to private persons for cultivation for payment in money, kind or share
4. The instruction relating to the filling up of Part A of the Household Schedule read as under :

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment,

(i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent, and heritable possession but without right of transfer ; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right) ;
- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period ;
- (d) tenants holding land on temporary leases who are liable to ejectment ; and
- (e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following :

- (a) land taken for a fixed amount of money,
- (b) land taken for a fixed amount of produce,
- (c) land taken for a share of the produce,
- (d) land for which money is paid partly in one and partly in any other form mentioned above, and
- (e) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. The area figures should be recorded in acres upto the first place of decimal, and not rounded upto the nearest acre. For example, if a household has $3\frac{1}{2}$ standard bighas of land, it will be entered as 2.2 acres (1 acre=1 bigha 12 kathas, where 1 katha=1,361 sq. ft. and 1 acre=4,840 sq. yards). The local bigha may, however, vary from place to place. Even if this is not possible write the areas in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

5. Cultivating households are classified according to the area of land cultivated and further cross-tabu-

lated with reference to three kinds of interest in land. The classification of land is in holdings of :

- (i) less than 1 acre
- (ii) 1.0 to 2.4 acres
- (iii) 2.5 to 4.9 acres
- (iv) 5.0 to 7.4 acres
- (v) 7.5 to 9.9 acres
- (vi) 10.0 to 12.4 acres
- (vii) 12.5 to 14.9 acres
- (viii) 15.0 to 29.9 acres
- (ix) 30.0 to 49.9 acres

(x) 50 acres or more.

Thus for holdings upto 15 acres (which comprise the bulk of cultivated land) the slab is for every 2.5 acres.

The three kinds of interest on land are :

- (i) Owned or held from government ;
- (ii) Held from private persons or institutions for payment in money, kind or share; and
- (iii) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

TABLE SC-I

PERSONS NOT AT WORK
CLASSIFIED BY SEX, TYPE
OF ACTIVITY AND EDU-
CATIONAL LEVELS

TABLE SC-I—PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY
AND EDUCATIONAL LEVELS

FLYLEAF

This table is presented for total Scheduled Castes and not for individual castes, separately for Total, Rural and Urban populations. It is similar to Table B-IX for the general population. Classification of the non-working population was not attempted in earlier Censuses.

(viii) Persons employed before but now out of employment and seeking work.

(Reference may also be made to the flyleaf to Table SCT-I).

2. The non-working population has been divided into the following eight categories :

3. Table SC-I gives separate figures for :

(i) Full-time students or children attending school ;

(i) Full-time students ;

(ii) Persons engaged only in Household duties ;

(ii) Persons seeking employment for the first time ; and

(iii) Dependants, infants and children not attending school and persons permanently disabled ;

(iii) Persons employed before, but now out of employment and seeking work.

(iv) Retired persons not employed again, rentiers, persons living on agricultural royalty, rent or dividend or other persons of independent means ;

The remaining categories mentioned above have been grouped under (iv) Others.

(v) Beggars, vagarants, independant women without indication of source of income and others of unspecified source of existence ;

4. The cross-tabulation is with reference to the following educational levels :

(vi) Inmates of penal, mental and charitable institutions ;

(i) Total

(ii) Illiterate

(iii) Literate (without educational level)

(iv) Primary or Junior Basic

(v) Matriculation or Higher Secondary

(vi) Above Matriculation or Higher Secondary

(vii) Persons not employed but seeking employment for the first time ; and

These have been discussed in the flyleaf to Table SCT-III.

TABLE ST-I

MOTHER-TONGUE
AND BILINGUALISM

TABLE ST—I MOTHER-TONGUE AND BILINGUALISM

FLYLEAF

This table shows the languages and dialects returned as mother-tongues by members of the Scheduled Tribes. It also gives data about subsidiary languages, if any. Figures have been presented sex wise for the total population.

The table corresponds to Table DI of 1951, Table XII of 1941 (Sample Table for State), Table XV Part I of 1931, Table X of 1921, Table X of 1911 and Table X of 1901 prepared for the general population.

Definition

Questions 7(a) and 7(b) of the Individual Slip were related to mother-tongue and bilingualism respectively. The instructions to enumerators for filling up these questions are reproduced below :

Q. 7 (a) Mother-Tongue—Write the mother-tongue in full including dialect as returned by the person enumerated. Mother-tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deafmutes give the language usually spoken by the mother.

Q. 7 (b) Any other Language (s)—After recording the mother-tongue enquire whether the person knows any other language (s), Indian or foreign, and write the language (s) reported by him against this question. In case he does not know any other language put 'X',

The number of languages recorded against this question should not be more than two. These languages should be other than his mother-tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Notes 1-4 below have been prepared by Shri R. C. Nigam, Linguist, Office of the Registrar General, India. These will elucidate the mother-tongues returned.

Note—1

(i) The following mother-tongues arranged in alphabetical order in Col. 1 of the table given below as per Table ST-I have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother-tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother-tongue of Col. 1 then it would mean that the name refers to either old or middle Indo Aryan Language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother-tongue is either a dialect or another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no Classification No. in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother-tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spellings according to Linguistic Survey of India have been given against each mother-tongue of Col. 1. Diacritical marks have, however, been omitted due to difficulty in printing.

Alphabetical order of mother-tongues classified by the Linguistic Survey of India	Classified name in the Linguistic Survey of India	Classification No. in the Linguistic Survey of India
1	2	3
Asuri	Asuri	22
Bengali	Bengali	529
Bhili	Bhili	677
Bhojpuri	Bhojpuri	519

Santali	Santali	15 Karmali, Mabili
Thar	Munda Branch	

Note—2

The following mother-tongues arranged in alphabetical order as per Table ST-I and indicated by an asterisk and dagger or dagger alone in that Table have been tentatively classified or reclassified by the Linguist in the manner stated below :

(T) against the mother-tongue in column 1 indicates that it has been tentatively classified, (TR) means that it has been tentatively reclassified by the Linguist.

Alphabetical order of the mother-tongues indicated by an asterisk and a dagger or dagger alone in Table ST-1

Manner in which tentatively classified or reclassified by the Linguist

1	2
Anga	(T) Maithili
Bilaspuri	(TR) Chhattisgarhi
Chero	(T) Bhojpuri
Gawari	(T) Eastern Magahi
Kamari-Santali	(TR) Santali
Kisan-Santali	(TR) Santali
Lohara	(T) Ho
Lohari-Santali	(T) Santali
Nagpuri-Eastern Magahi	(TR) Eastern Magahi
Parhaiya	(T) Munda
Samaria	(T) Malpaharia

Note—3

Mother-tongue Naiya which appears in the table has been found unclassifiable by the Linguist for want of any dependable information on it so far.

Note—4

Column 2 shows variant spellings or forms of mother-tongue returns which are rationalized to the names given against them in column 1.

Rationalized forms of names of mother-tongues as listed in Table ST-I

Variant forms of the names of mother-tongues recorded during enumeration and/or transcription

1	2
Anga	Angika, Angikar
Asuri	Assur
Bhili	Bhilboli
Birhor	Birhore
Chhattisgarhi	Chhatisgarhi
Gawari	Gamari, Goari, Gauuari
Khortha/Khotta	Kharota, Khastta, Kothari
Koda/Kora	Kore, Korari, Korati
Kol	Koal, Kolaboli, Kole
Kurukh/Oraon	Kadukali
Malto	Malti
Panchpargania	Panchargania, Panchpargunia
Sadan/Sadri	Santri
Tamaria	Tamara, Tair, Temoral, Tumariya.

TABLE ST-I—MOTHER-TONGUE AND BILINGUALISM FOR SCHEDULED TRIBES

NOTE : (i) Names occurring after hyphen (-) have been introduced by the Linguist to indicate groupings.

(ii) Asterisk(*) means that the mother-tongue is unclassified in Linguistic Survey of India.

(iii) Dagger (†) denotes that the mother-tongue though classified in Linguistic Survey of India is either tentatively reclassified or considered unclassifiable by the Linguist.

(iv) Asterisk and Dagger (*†) denote that the mother-tongue is unclassified by Grierson but is tentatively classified by the Linguist.
