STATE TABLE A—I — AREA, HOUSES AND POPULATION

FLY LEAF TO APPENDIX I TO TABLE A—I
APPENDIX I TO TABLE A—I — Statement showing the 1951 Territorial
Units constituting the present set-up of each district and taluk of
Andhra Pradesh and details of net area gain or loss in the changed
Territories during the decade 1951—1961
SUB-APPENDIX TO APPENDIX I — Statement showing the area for
1951 and 1961 of those Municipal Towns which have undergone chan-
ges in area since 1951

FLY LEAF TO APPENDIX II TO TABLE A—I
APPENDIX II TO TABLE A—I — Number of Villages with a Population
of 5,000 and over and Towns with a Population under 5,000
LIST A TO APPENDIX II — Places with a Population of under 5,000 trea-
ted as Towns for the first time in 1961
LIST B TO APPENDIX II — Places with a Population of under 5,000 in
1951 which were treated as Towns in 1951 but have been omitted
from the list of Towns in 1961

FLY LEAF TO APPENDIX III TO TABLE A—I
APPENDIX III TO TABLE A—I — Houseless and Institutional Population

TABLE A—II

FLY LEAF TO TABLE A—II
TABLE A—II — VARIATION IN POPULATION DURING SIXTY
YEARS (1901-1961)
APPENDIX TO TABLE A—II—Statement showing 1951 Population accord-
ing to their Territorial jurisdiction in 1951, changes in Area and
Population involved in those changes

STATE TABLE A—III — VILLAGES CLASSIFIED BY POPULATION

TABLE A-IV

FLY LEAF TO TABLE A-IV

TABLE A-IV — TOWNS (AND TOWN-GROUPS) CLASSIFIED BY
POPULATION IN 1961 WITH VARIATION SINCE 1901

APPENDIX I TO TABLE A-IV — *New Towns added in 1961 and Towns
in 1951 declassified in 1961*

EXPLANATORY NOTE A TO APPENDIX I — *Showing names of New
Towns treated as such for the first time in 1961 Census and the names
of their constituent villages*

EXPLANATORY NOTE B TO APPENDIX I — *Showing names of 1951
Census Towns that have been declassified in 1961 Census and the
names of the constituent villages into which they have relapsed*

APPENDIX II TO TABLE A-IV — *Statement showing the constituent
villages of each of the Towns at 1961 Census*

of religion, mother tongue, other languages spoken and literacy were gathered as usual. The other demographic details such as age, sex, marital status were of course incorporated.

2.6. The full scope of the various questions and the instructions for filling the schedules are explained in Annexures I, II and III at the end of this book.

3. Translation of Census Schedules :

3.1. These schedules and instructions once finalised were got translated into the local languages—Telugu, Urdu, Kannada and Marathi. There were English schedules as well. The translation was done very early, so that these were available during practice in the training classes.

4. The Census Dates :

4.1. The reference date for the Census was the Sunrise of 1 March 1961. The actual Census count was taken for nineteen days from 10 February 1961 to 28 February 1961 called the "Enumeration period". The enumeration of Houseless persons was conducted on the night of 28 February. In the urban areas, however, the enumeration of Houseless persons was carried on during the nights of 1 and 2 March as well besides the night of 28 February. The period from 1 March 1961 to 3 March 1961 was utilised for a quick revisit of the households called the "Revisional Round" to bring the figures up-to-date as on 1 March 1961, the Census reference date, by including births and excluding deaths, that might have occurred during the enumeration period after the last visit of the Enumerator to a household till the Sunrise of 1 March 1961.

5. Organisation of Census Operations :

5.1. After the finalisation of the Census programme the District Collectors were advised to make positive preparations with the help of ten elaborate Circulars, detailing each stage of preparation.

5.2. The Census Operations were organised in six stages viz.,

(i) Fixing of the boundaries of Census Charges with reference to Maps, taking into account boundary changes of the State, District, Taluk and other smaller units, including Villages, (ii) Building up of the Census hierarchy, (iii) Numbering and listing of houses, (iv) Training of the Census agency, (v) Actual Census count from 10 February 1961 to 28 February 1961 and (vi) Revisional round and reporting of the provisional Census figures.

The Indian Census Act of 1948 gave the necessary legal powers for conducting the Census.

5.3. The actual organisation of the Census Operations month by month has been given in the form of a Census Calendar in Annexure IV of this book. The six stages mentioned above are explained in the paragraphs to follow:—

6. Stage I - Fixing of the boundaries of Census Charges with reference to Maps :

6.1. A freeze order, an essential pre-requisite, was first obtained sufficiently in advance of the commencement of Census Operations from the State Government not to

change the jurisdiction of Districts, Taluks, Towns or Villages. All orders pertaining to changes in jurisdictions since the last Census (1951) including the States Reorganisation Act, and the Pataskar Award etc., were then collected from the State Government and with the help of the 1951 Census records, the District Census Hand Books etc., an up-to-date list of villages, taluk by taluk, for each district of the State was prepared. The proof copies of Taluk maps showing the village boundaries were then obtained from the State Survey Office. Unfortunately these maps were found to be out-dated as the Survey Office was not posted quite upto the minute with all the changes that had occurred from time to time. The maps were therefore sent to each Tahsildar concerned for physical verification on the ground and to indicate the correct location and boundaries of villages in case the boundaries marked in the proof maps did not tally and to mark any changes in maps that would be necessary. A great deal of care was taken to see that all boundary changes up to the village level were taken cognizance of in these maps. A certificate was also obtained from the Tahsildar of each taluk on the proof-map that changes up-to-date had been incorporated. In this process a correct and complete tally of all the villages and towns in the State was not only established, but errors of overlapping of areas or any chance of omission of any area were systematically eliminated thus ensuring a correct coverage of the territory.

6.2. This method of having the boundaries of every minute village well defined perhaps enhanced the accuracy of the Census count as it rendered omissions and overlapping difficult. These large scale maps also helped correct identification and satisfactory verification of the smallest territorial unit.

7. Stage II - Building up of the Census hierarchy :

7.1. Orders of the State Government were obtained sufficiently early in G.O.Ms. No. 670, General Administration (Elections-D) Department, dated 13 May 1960 notifying the Census Officers under Section 4(2) of the Census Act and delegating them with powers of appointment of Census personnel under them according to Sections 4(3) and 4(4) of the Act. Then the pyramid of jurisdictions was built up as below to organise the Census count :

7.2. While the Superintendent of Census Operations at the apex of the State Census Organisation generally guided the Census Operations in the State, the Collectors, who were designated as the District Census Officers, were, as the heads of the District Census Organisations, in over-all charge of the operations within their districts. They acted through their Personal Assistants who were designated Deputy District Census Officers and the Revenue Divisional Officers of the Revenue Divisions designated as the Divisional Census Officers.

7.3. Next came the Charges. Each District was subdivided into Census Charges—each under a Census Officer designated as the Charge Superintendent, who was fully responsible for all arrangements for taking the Census in the area constituting his Charge. Normally each Revenue Taluk or Independent Sub-Taluk constituted a Census Charge, with the Tahsildar or the Independent Deputy Tahsildar as the Charge Superintendent. However, major urban units such as Municipalities in Andhra Districts and City Municipalities in Telangana Districts were constituted into independent charges by themselves, the Municipal Commissioner or Executive Officer of the City Municipality being the Charge Superintendent. The Taluk Charge Superintendent had no jurisdiction over such urban units, as these had been constituted into independent charges by themselves. Some Major Panchayats and Town Municipalities, though recognised as towns were not constituted into independent charges but kept under the control of the Taluk Charge Superintendent, who was assisted by the Executive Officer in making all arrangements within such smaller units.

7.4. Some special areas, which had a large concentration of a particular type of population, and had separate administrations of their own, such as the Nagarjunasagar Dam Site Camp (Vijayapuri), Kothagudem Collieries area, Bellampalle Collieries area, Kagaznagar, and Strictly Military areas, Air Force and Naval Stations were constituted into special charges and were placed in charge of a suitable officer of the respective administrations. These were termed Special Charges, and the Officers-in-charge of these designated as Special Charge Superintendents. Obviously, the Taluk Charge Superintendent had nothing to do with these Special Charges.

7.5. In the case of Hyderabad District, a slightly different set up was adopted. The District Collector of Hyderabad looked after the Census Operations of all the other areas of the district, excepting those that fell within the limits of Hyderabad and Secunderabad Municipal Corporations, the Secunderabad Cantonment area, and the Strictly Military area. The Commissioners of Hyderabad Municipal Corporation and Secunderabad Municipal Corporation (the two Corporations were subsequently combined into one) and the Deputy Commissioner of Hyderabad Municipal Corporation were notified as the Census Officers for their respective City areas. The Executive Officer of the Cantonment Board for the Cantonment area, the Officer-in-charge of the Station or his nominee in respect of the Strictly Military area, the Commanding Officers of all units in respect of the body of men in their Charge, and the Officer Commanding Air Force Establishment, were also notified as Census Officers. There were a few areas adjoining the City Municipal Corporation boundaries, which were practically integral parts of the City but as they were not included within the limits of the Corporation, the Census arrangements in these cases were looked after by the District Revenue authorities under the control of the District Collector. The Officers of the various Charges were required to establish close liaison among themselves to avoid omissions of areas or overlapping. However, whenever there were disclaimed or disputed areas, the District Revenue authorities covered those residuary portions thus effecting complete coverage of the territory.

7.6. The Commissioners of the two City Corporations, who were designated as City Census Officers, divided their jurisdiction into convenient charges of two to four lakhs population, with clearly definable compact areas, having easily identifiable recognised boundaries. As regards the Cantonment areas, the Executive Officer of the Cantonment Board was the Cantonment Census Officer for all the areas constituting the Cantonment, except the Strictly Military areas. In respect of the Strictly Military areas, the various zones falling in Secunderabad Cantonment limits and Hyderabad Municipal area were put under the Charge of a Military Officer in these Zones, and he was notified as the Charge Superintendent by the Officer Commanding the Station, who was the Military Census Officer.

7.7. The Commissioners of Hyderabad Municipal Corporation and Secunderabad Municipal Corporation, the Executive Officer of the Secunderabad Cantonment, the Military and Air Force Census Officers of the City were directly responsible to the Superintendent of Census Operations who guided them in the operations from time to time.

7.8. In the case of the Naval Yard and Coastal Battery of Visakhapatnam, though they were designated as Special Charges, the Charge Superintendents were made responsible directly to the District Census Officer of Visakhapatnam.

7.9. After delimiting these Census Charges for the entire State, the District Census Officers, the City Census Officers, the Military and Air Force Census Officers etc., prepared a list of Charges indicating the name and designation of the Charge Superintendent and the Charges were duly demarcated on the District Census Maps. It was then the responsibility of each of the Charge Superintendents to conveniently demarcate his area into Enumerator Blocks with the aid of the Houselists and House-numbering plans, and allocate an Enumerator to each block. Each Enumerator's Block covered a population of about 750 persons in rural areas and about 600 persons in urban areas. The lists of Enumerators' Blocks were prepared for each Charge indicating the names of the particular Enumerator allotted to the block. These were marked out in the Taluk or Charge Census Maps. Five Enumerator Blocks normally comprised a Circle and a Supervisor was placed in charge of the Circle, this also being clearly demarcated in the Taluk or Charge Census Maps.

7.10. Thus the Census hierarchy from the District Census Officer down to the Enumerator was built up and each Census Officer earmarked by name and designation.

7.11. The Census Enumerators were recruited mainly from amongst the school teachers supplemented by Village Officers, Clerks or other employees of Government Offices as well as Local Bodies. Hospital staff, railway employees, Non-commissioned Officers of the Armed forces were also appointed as Census personnel in their respective areas having regard to their local status, and also as they knew the area they had to count. Lady Enumerators were also appointed especially in areas where there was a considerable section of gosha women population. Thus, all steps possible were taken to ensure complete coverage without omission or overlapping.

8. Stage III - Numbering and Listing of houses :

HOUSE-NUMBERING

8.1. It is an accepted pre-requisite of all Census Operations, that there should be a proper system of house-numbering by which the smallest Census unit namely a household could be easily identified and correctly located. Thus if anything went wrong with house-numbering, the Census edifice would to that extent be adversely affected. The Chief Electoral Officer and myself, therefore, inspected several rural and urban localities and found that the 1951 house-numbering had not been well maintained and in several cases, fallen into disuse. Many new houses had not at all been allotted house numbers. Comprehensive instructions in Census Circular No. 2 were, therefore, issued to all the District Officers, Revenue Divisional Officers, Tahsildars, Commissioners of Municipalities and Executive Officers of Panchayats to bring the house-numbering up-to-date. The house-numbering was taken up as early as April 1960, and in many urban areas even earlier, and the entire house-numbering was brought up-to-date by the time the actual Census enumeration started. Great care was taken not to leave out any house from numbering. Even odd structures existing in remote areas, like a forest rest house, a guard's quarters, railway gangman's shed, inaccessible temples, farm servants' huts in out of the way fields, were all covered, and it was the responsibility of the Village Officer or the Municipal Agent to see that all structures within his territorial limits, be it a village or ward fully accounted for and duly housenumbered and listed.

8.2. Housenumbers were normally painted in the centre of the lintel of the front door of the house or on the front door itself or on the portion of wall next to the door to catch the eye. In the case of huts or other shelters not having doors, the rafter or pillar was used for affixing the housenumber. In a few cases number plates were issued to be hung in the centre of the structure. Only the international form of numerals (the arabic numerals) were adopted and painted to a size half an inch thick and 2½ inches in height.

Rural Areas :

8.3. Before actual house-numbering, house-numbering plans were got prepared. These house-numbering plans and sketches were prepared for each village showing how the house-numbering was to be done. First, a small outline map indicating the general layout of the entire village was prepared. This was, in most cases, a rough sketch and not to scale. Then in the same sheet or on a separate sheet a more detailed sketch of the layout of the main residential portion of the village was prepared and some important land marks, clearly marked showing in detail how the houses had been numbered. Although this sketch was not to scale, yet it gave a clear picture of the location of the houses, layout of the streets etc., so that even a stranger could identify any house with the help of this detailed sketch. A specimen house-numbering plan is reproduced on the next page.

8.4. For bigger villages, and villages with hamlets, the area was split up into blocks with about 100 houses in each block. Each block consisted of adjoining streets or other

compact local area with well defined boundaries. The block was first assigned a serial number in convenient order. Within each block the houses were numbered in a separate series for each block. The numbering of houses in each block of all the sketches was done clockwise, and if the houses were scattered, by streets proceeding from North to South or East to West, numbering in each street being done in a convenient order with reference to the axis of the street. The preparation of house-numbering sketches in rural areas, including manuscripts, were done by the Village Officers under the supervision of the Firka Revenue Inspectors. In Major Panchayats of the Andhra areas and Town Municipalities of the Telangana areas, the Executive Officers were held responsible for preparation of the house-numbering plans. After the final sketches were prepared the local Tahsildars scrutinised the sketches and approved them.

8.5. After the sketches were approved by the Tahsildars, the actual house-numbering was carried out either by the Village Officers or the Executive Officers of the Major Panchayats or Town Municipalities under proper supervision on the basis of the house-numbering plans.

Urban Areas :

8.6. In urban areas, the Commissioners of Corporations of Hyderabad and Secunderabad, Commissioners of Municipalities, Executive Officers of the Cantonment Board in Cantonment areas, Garrison Engineers in the Strictly Military areas, the Executive Officers of Panchayats (declared as urban locality) and Town Municipalities etc., did the sketches and the general principles of house-numbering were the same, except that the system recommended was (1) that all streets should be named and, (2) the city or town should be divided into wards or localities or mohallas, which have well recognised and permanent physical boundaries. Such localities were to be numbered serially from North-West to South-East or in a clockwise direction, whichever was convenient. All the main streets within each locality would be numbered off serially and each street assigned a definite number. When there were slum areas, or a similar concentration of houses not served by definite streets, such a block was assigned a number, in the series comprising street numbers. In the alternative, this cluster was attached to the nearest street and the houses numbered conveniently along with the houses of the street. Even the lanes were correlated to the main street or road from which they branched off, by the allotment of sub-numbers, so that the compactness of the street was not disturbed in the street series.

8.7. As in the case of rural areas the house-numbering sketches were got ready indicating the boundary of the town, and the wards or blocks or constituencies or localities into which the town was sub-divided and adopted for house-numbering, also showing important topographical details. In addition there was also a detailed plan for each ward or locality indicating clearly the layout of all the streets and lanes, their numbers and exhibiting all important land marks and physical features to make identification easy. Though these urban sketches were not to scale, these were good enough to help positive identification.

8.8. I have set out above, the process of house-numbering at some length to explain how a system was evolved to

single out every structure, wherever it was located, whatever its shape and status and whichever purpose it served and give it a proper housenumber to satisfy the requirement of a correct coverage. The house-numbering was also meant to serve all other purposes such as providing a correct postal address and so on.

8.9. Despite all these precautions taken, and fool-proof instructions issued it cannot be claimed that the house-numbering was uniformly good and intelligible in all areas so as to serve the needs of the citizen well. A visitor to Hyderabad would realise that many streets have no names. While no doubt each house had a formidable code of Ward-block-house number marked, which suited the purpose of Census Officers all right to ensure coverage, it is somewhat confusing to other users of the housenumbers. Many of our towns are too ill-planned to consider introduction of systematic house-numbering. Several of our constructions particularly in slum and rural areas are such that hardly would the housenumber once painted or affixed on them stand for more than a couple of months. A religious festival would put an end to housenumbers with a covering of cowdung or colour wash! The house-numbering plans prepared at the present Census no doubt came handy to locate the houses even if the numbers once marked had been obliterated. These were some of the practical difficulties that the organisers of the Census had to face. The Municipal authorities and Panchayat authorities in the present set-up of democratic decentralisation will do well to introduce and maintain a permanent system of intelligible house-numbering instead of having to revise it once in ten years prior to each Census.

HOUSELISTING

8.10. Houselisting is an innovation introduced at the 1961 Census.

8.11. Houselisting was taken up at the same time as the numbering of the houses. This was also completed through the agency of Village Officers in the rural areas and Executive Officers and their staff in the Major Panchayat areas and the Municipal staff in the Towns. The Houselist form will be found in Annexure I at the end of this book.

8.12. To recapitulate, the Houselist helped us to have a complete list of all buildings, Census houses and Census households. The Houselist recorded the purpose for which each Census house was used. It also gave us an idea of the number of Census houses used as workshops and establishments engaged in productive processes, the articles produced, and the type of power used where machinery is employed. To meet the requirements of the National Buildings Organisation, useful information about the material of which the Census houses were constructed, the number of rooms in occupation of each household and whether the households lived in their own or rented houses was collected. Lastly the Houselists also gave us a preliminary idea of the approximate population as it existed at the time of house-listing, i.e., a few months in advance of our actual Census enumeration. Thus this useful record, helped the Census Organisation to allocate the jurisdiction of the Census Enumerators with facility so that each Enumerator covered a population of about 750, or 150 households in rural areas

and a population of about 600, or 120 households in urban areas. The relevant extracts pertaining to each enumeration block was given to each Enumerator during the actual enumeration.

9. Stage IV - Training of the Census Personnel :

9.1. The Census Enumerators drawn from different fields were made up of persons with no uniform qualifications and of varying levels of understanding. The need for training up the vast numbers of Enumerators as thoroughly as possible so that they themselves would fully understand the Census concepts and apply them uniformly and evoke proper response from the respondents was realised. A systematic scheme of training programme was drawn up under which the Superintendent of Census Operations and his deputies initially imparted training to the District Census Officers, Divisional Census Officers and the Charge Superintendents, who in turn intensively trained the Census Enumerators and Supervisors in their jurisdictions. Apart from theoretical training considerable emphasis was laid on practical training i.e., the Enumerators were required to enumerate a number of households on practice enumeration schedules specifically printed in red ink for the purpose. This helped to create confidence in the Enumerator both in regard to his understanding of instructions and ability to enumerate. Each Enumerator was required to attend a minimum of six training classes though in practice most of them attended a much larger number of classes.

10. Stage V - Census count 10 February 1961 to 28 February 1961 :

10.1. It is obvious that in spite of a fairly large army of well-trained Census Enumerators, it would be impossible to enumerate every one at the exact reference point of time, viz., the Sunrise of 1 March 1961. We had, therefore, to take recourse to a *de-jure* enumeration of population spread over a period of time immediately before the reference date. The enumeration was actually conducted from 10 February 1961 to 28 February 1961. During this enumeration period the Enumerator covered every household in his jurisdiction and enumerated every individual who normally resided in the household.

10.2. The Census Enumerator was clothed with legal authority to question the respondents in his jurisdiction for the purpose of collecting the information by notifying the Census questionnaire in the Official Gazette by the State Government under Section 8 of the Census Act sufficiently in advance.

10.3. During his rounds the Enumerator first carefully checked up all the houses in his jurisdiction with reference to the extract of the Houselist supplied to him and then visited every household and by enquiring some responsible member of the household he enumerated all members of the household (i) who were normal residents of the household during the enumeration period, (ii) who, though away from the household temporarily, resided with the household during any part of the enumeration period, (iii) visitors to the household, who would be away from their own households throughout the enumeration period, and (iv) domestic servants, provided they resided in their mas-

ter's household with boarding and lodging facilities. Even in respect of buildings ordinarily used as offices and commercial concerns and business houses etc., care was taken to see that persons like watchmen or members of the staff who may be living in any corner or the outhouses of the building were not missed out. A person is said to be normally resident in a household, if, except on exigencies of circumstances, which may entail brief periods of absence, he used the premises for boarding and lodging.

10.4. The Enumerator filled up both the Household Schedule for the household as the unit and the Individual Slip for each member of the household before he left any household and this aspect was scrupulously checked by the superior officers.

10.5. *Institutional Population* : People living in institutions such as hostels, boarding homes, in-patients of hospitals and nursing homes, inmates of beggar houses, orphanages, ashrams, convicts in jails etc., were enumerated at their respective institutions applying the four criteria indicated in the foregoing paragraphs. As far as possible the staff of the institutions concerned in respect of large institutions were appointed as Census Enumerators to cover the Institutional Population.

10.6. *Houseless Population* : Houseless Population such as beggars, sadhus, nomads, who had no fixed places of residence and population living in boats were enumerated at the places where they normally slept on the night before the Census reference date. A discussion regarding the enumeration of this category of people is set out in the fly leaf to Appendix III of Table A-I.

10.7. *Defence personnel* : As regards the Defence establishments, the Census Enumerators, Supervisors and Charge Superintendents were appointed from amongst the units concerned and enumeration conducted as in all other areas. In respect of units, which were likely to move out of the station after 10 February 1961 and before 1 March 1961 the enumeration was conducted at their station before the move. In respect of such units, the Military Census Officer of the Station also obtained from the officer immediately in charge of the unit, check lists of births and deaths, if any, that had occurred to complete the tally.

10.8. *Persons in floating vessels* : In respect of enumeration of persons on sea going vessels, a special Enumerator designated as Port Enumerator, was appointed by the Charge Superintendent of the concerned Port. Those quartered on board the ship were enumerated by the Port Enumerator when the ship was at its dock on or soon after 1 March 1961. As some vessels would be on sea even for more than 15 days before they touched any Port, the Port Enumerator was on duty for a period of fifteen days from 1 March 1961 to 15 March 1961 both days inclusive. As soon as a vessel docked in Port, during the period of his duty, the Port Enumerator checked up if the vessel had not already been enumerated and then proceeded to count. After his job was finished, he gave the master of the vessel a paper with the word "Enumerated" and the name of the Port, under his dated signature so that no overlapping of enumeration occurred.

10.9. During the enumeration period, the Supervisory Officers at all levels made intensive check to ensure accuracy and complete coverage.

11. Stage VI - Revisional Round and Reporting of Figures :

11.1. *Revisional round* : While the general enumeration lasted over nineteen days from 10 February 1961 to 28 February 1961, since our objective was to present the picture of the population as at Sunrise of 1 March 1961, it would be necessary to take into account any birth or death that might have occurred in a household after it was enumerated but prior to the Sunrise of 1 March 1961 or to enumerate any fresh visitor during the period who had missed enumeration elsewhere. For this purpose, the Enumerator went on a revisional round from 1 March 1961 to 3 March 1961 of all the households within his jurisdiction, to see if there had been any (i) new births and deaths in the household after his last visit, during the enumeration period but before the Sunrise of 1 March 1961 and (ii) to verify if any visitor, not elsewhere enumerated during the enumeration period had joined the household. In the case of births and the unenumerated visitor, a new slip was filled in and in the case of a death, the slip would be annulled writing the word "Dead" across the slip. Thus the entire Census count was made to synchronize with the appointed reference time for the Census count viz., the Sunrise of 1 March 1961.

11.2. *Reporting of figures* : The last item of the Census enumeration campaign was the communication of the crude totals called the "Provisional figures" from the Enumerator onwards to the Superintendent of Census Operations and thereon to the Registrar General, India by the quickest means possible.

11.3. Immediately after the revisional round was completed the Enumerator prepared an abstract and posted his "Provisional totals" in the prescribed form printed and given to him. He was expected to check and re-check his totals to ensure accuracy. He then marched on to his place of rendezvous fixed in prior agreement with his Circle Supervisor and approved by the Charge Superintendent (normally at about 7-30 a.m.) and delivered to his Supervisor the out-come of all his gallant labour, viz., the filled-in Household Schedules, the filled-in pads of enumeration slips, neatly bundled, with the abstract of his provisional totals. The Supervisor then did his own check to verify if the Household Schedules books had been duly accounted for and then scrutinised the correctness of the provisional totals by exchange of the bundles from one Enumerator to the other and when he was fully satisfied of the accuracy of the totals, so given, by the Enumerator, posted his own circle abstract in the prescribed form and bade good-bye to his colleagues. In the meanwhile the Charge Superintendent had made his own arrangements to collect all the Supervisors' abstracts within the shortest time possible. Messengers in jeeps and cycles kept up a round-the-clock relay to gather all the Supervisors' abstracts. The charge provisional totals were struck after considerable verification in the Office of the Charge Superintendent. These provisional totals of the charges were then rushed to the District Census Officers and the Superintendent of Census

Operations by telegram and if a telephone was available, through trunk telephone also. The District Census Officer also consolidated his figures for the district and communicated his figures for the district to the Registrar General, India and the Superintendent of Census Operations in the prescribed form both telegraphically and by phone. The Postal authorities had precise instructions to give priority to all the Census telegrams. The provisional figures of Andhra Pradesh were dialled to the Registrar General, India at Delhi on 7 March 1961 and it was a matter of gratification that Andhra Pradesh was the first amongst the States to communicate the provisional figures.

11.4. The provisional population of the State as announced at this rough count so quickly collected was 35,980,713. The final population figure after complete count and tabulation of Census slips was 35,983,447. The difference between these two figures works out to 0.008%. This by itself bears ample testimony to the care with which the enumeration staff performed their duties.

12. Enumeration of Non-synchronous Areas :

12.1. This State has areas, which are not easily accessible, and in these areas advance enumeration had to be undertaken as indicated below :—

1. Certain Agency areas of Srikakulam and Visakhapatnam Districts 1-11-60 to 31-12-60
2. Certain Agency areas of West Godavari, East Godavari and Khammam Districts 1-1-61 to 31-1-61
3. Chenchu areas of Kurnool District 1-2-61 to 28-2-61

12.2. For obvious reasons revisional rounds in these areas were not undertaken but the births and deaths in these areas would be so negligible as to cancel each other out and do not very much affect the count as such from the point of view of mere numbers. In the Agency areas of Visakhapatnam and Srikakulam Districts, specially paid enumeration staff recruited among the clerical staff of different offices as well as from the open market had to be engaged. In other areas no special staff was found necessary. However under the impact of the Third and Fourth Plans all these areas are bound to develop and made more accessible in future years and school teachers would be available in plenty and there would be, I expect, no need to engage special paid Enumerators for the Agency tracts in 1971. It should be possible to engage honorary Enumerators in these areas as in all other areas. I, however, think that the enumeration itself in these areas should precede the general enumeration period as now, at least a month in advance, and completed well in time to release the Supervisory Officers to take over the general enumeration in other areas.

13. Post Enumeration Check :

13.1. A Post Enumeration Check was conducted in the 1961 Census as in 1951, primarily to obtain and estimate the extent of errors in the Census count of persons—the term error including both over and under estimation. Out

of the total number of 266 Charges in the State, the Post Enumeration Check was conducted in 242 Charges, (180 rural and 62 urban) 524 Enumerators' Blocks, (392 rural and 132 urban) were selected from these charges, to form roughly 1% of the blocks in the rural areas and 2% of those in the urban areas. The Census houses were sampled from the selected blocks at the rate of 10% and 5% respectively for the rural and urban areas. Training was imparted as usual at District Centres to all the Charge Superintendents and Verification Officers so that even in Post Enumeration Check, the same attitudes of care and accuracy were brought to bear upon the subject.

13.2. Post Enumeration Check revealed the following :

I. *Under enumeration* : (a) The number of persons missed by the Census in all the districts of the State was 84 out of the population of 31,458 verified, giving a percentage of 0.267. The percentage of omission in the rural areas was 0.251 and that in urban areas 0.365.

(b) The number of persons reported extra whose enumeration was not known was 60 out of a total of 31,458 persons. This gives the percentage of 0.191 for the whole State, the percentage for rural areas being 0.188 and that for the urban areas 0.206.

If the number of persons missed by the Census and those reported extra, whose enumeration was not known, are taken together, the total cases of under enumeration works out to a percentage of 0.458 for the State with component percentages of 0.439 for rural and 0.572 for urban areas.

II. *Over enumeration* : 60 persons (47 persons in the rural areas and 13 persons in the urban areas) were found to have been over counted in the total population of 31,458. These figures place the percentage of over enumeration at 0.173 for rural areas and 0.297 for urban areas, giving an overall total percentage of 0.191 for the whole State.

13.3. The net percentage of error for the enumeration of persons as verified in sample houses worked out, therefore to -0.267 or to about -0.27 of under enumeration, and this percentage is the same for the rural as well as urban areas.

14. Census Publications :

14.1. The Census Publications series of this State will bear Volume II and will be made up of the following parts

Part I	...	General Report, Report on Vital Statistics, Subsidiary Tables.
(with sub-parts)	...	
Part II	...	General Population Tables, Economic Tables, Cultural and Migration Tables.
(with sub-parts)	...	
Part III	...	Household Economic Tables.
Part IV	...	Housing Report and Tables.
Part V	...	Special Tables for Scheduled Castes and Tribes.
Part VI	...	Village Survey Monographs.
Part VII-A	...	Handicraft Survey Reports and Tables.
Part VII-B	...	Fairs and Festivals Survey Reports.
Part VIII	...	Administration Report (Not for sale)
Part IX	...	Maps.
Part X	...	Special Report on Hyderabad City.

A. CHANDRA SEKHAR,
Superintendent of Census Operations

ANDHRA PRADESH — 1961 POPULATION

ANDHRA PRADESH — 1961 AREA

TABLE A-I

AREA, HOUSES AND POPULATION

TABLE A-I
AREA, HOUSES AND POPULATION

1. Introductory :

1.1. In this table, as in all other tables of the 1961 Census Reports, the districts have been arranged in the order of the location code numbers adopted at the Census, and not in an alphabetical

order. The district of Srikakulam on the North Eastern tip of the State has been allotted District Location Code No. 1 and the rest of the districts have been numbered off continuously in a clockwise order. The outline map below shows the location code numbers allotted to each of the districts.

ANDHRA PRADESH
LOCATION CODE NOS. OF DISTRICTS

2. Brief account of changes in area of State and Districts from 1901 to 1961 :

2.1. Andhra Pradesh was carved out of the territories of the composite Madras State and the former State of Hyderabad. On 1 October 1953 according to the Andhra State Act, the first ever Linguistic State of Andhra was formed comprising of eleven districts viz., Srikakulam, Visakhapatnam, East Godavari, West Godavari, Krishna, Guntur, Nellore, Chittoor, Cuddapah, Anantapur and Kurnool Districts out of the Telugu speaking areas of the composite Madras State. On 1 November 1956 again, in accordance with the provisions of the States Reorganisation Act, the present nine districts of the former Hyderabad State, viz., Mahbubnagar, Hyderabad, Medak, Nizamabad, Adilabad, Karimnagar, Warangal, Khammam and Nalgonda were added on to the State of Andhra, bringing into existence the enlarged State of Andhra Pradesh. Subsequently, the Pataskar Award made some territorial adjustments in the boundaries of the Chittoor District by a mutual transfer of villages with Madras State. A brief account of the changes from 1901 to 1961 in the area of what constitutes the present Andhra Pradesh State is set out below. For convenience of presentation the changes are set out separately for the eleven districts of the Andhra Region first followed by the nine districts of the Telangana Region by the Census decades. A Census decade commences generally on the 1st March of the first year of the decade and ends on the 28th February of the tenth year.

THE ANDHRA REGION:

2.2. 1901 to 1911 :—During this decade, the region was a part of the Madras Presidency and received a small addition by the transference from the Central Provinces of the Nugur Taluk and with the emergence of Guntur District from a shuffling of the boundaries of Krishna, Godavari and Nellore, consisted of the Ceded Districts of Anantapur, Cuddapah, Kurnool, Bellary (portion), Chittoor (portion), and Nellore, Guntur, Krishna, Godavari, Visakhapatnam (portion) and Ganjam (portion).

2.3. 1911 to 1921 :—The principal change was the separation of the Agency tracts of Ganjam, Visakhapatnam and Godavari from those districts and the formation of a separate administrative unit called the Agency division. There were no changes in the boundaries of other districts as they then existed.

2.4. 1921 to 1931 :—Two internal changes of some importance occurred, namely, the re-absorption of the Agency division formed in 1921 in the three districts on the East Coast, and the formation in 1925 from the Krishna District of two districts, viz., Krishna and West Godavari. Changes also occurred in the boundaries of Chittoor District by the transfer of Kuppam, an area of 305 square miles from North Arcot District to Chittoor.

2.5. 1931 to 1941 :—During this decade the district boundaries of all the districts of the Andhra Region other than Visakhapatnam and Ganjam Districts remained unaffected. In 1936 consequent on the formation of Orissa State, the following areas were transferred from Visakhapatnam and Ganjam Districts to the Orissa State :

- Entire Agency area of the Ganjam District and a major portion of the plains area of Ganjam District.
- Major portion of the Agency area of Visakhapatnam District.

The remaining portions of Ganjam District were merged in Visakhapatnam District and the district was realigned.

2.6. 1941 to 1951 : This decade can be termed as the Independence Decade. It had the distinction of conducting the first Census in the Republic of India in 1951. The merger of the Banganapalle State into the Kurnool District, forming a sub-taluk of Nandyal Revenue Division took place consequent on the integration of the Princely States. No other changes in area took place except for the exchange of minor enclave villages with Hyderabad State by an order of 1950. Visakhapatnam District was bifurcated into two districts, viz., Srikakulam and Visakhapatnam in 1950. The Polavaram Taluk which was mostly an Agency area and which lay to the west of Godavari River was transferred from East Godavari to West Godavari and included in the contiguous Revenue Division of Kovvur of the latter district. From Chingleput District about 11 square miles of area were transferred to Nellore District.

2.7. 1951 to 1961 :—This decade may be called the Reorganisation Decade. The Andhra State Act of 1953 brought into existence the Andhra State, the first Linguistic State of the country on 1 October 1953 by the transfer of the predominantly Telugu speaking eleven districts, viz., the northern coastal districts of Srikakulam, Visakhapatnam, East Godavari, West Godavari, Krishna, Guntur and Nellore and the four Ceded Districts of Chittoor, Cuddapah, Anantapur and Kurnool and Alur, Adoni and Rayadurg Taluks of Bellary District of the Composite Madras State to the new State.

2.8. The Andhra State expanded into the larger Andhra Pradesh State by the addition of nine Telangana districts of Hyderabad State as a result of the States Reorganisation on 1 November 1956.

2.9. By the Pataskar Award three villages of Krishnagiri Taluk of Salem District, seventy six villages of Tiruvallur Taluk and seventy two villages of Ponneri Taluk of Chingleput District were transferred to the Chittoor District on 1 April 1960. As against the inclusion of the above villages in the Andhra Pradesh State, twenty nine villages of Chittoor Taluk, one village of Puttur Taluk and two hundred and eighty eight villages of Tiruttani Taluk and a small forest area of Palmaner Taluk of Chittoor District were transferred to Madras State under the same Award.

TELANGANA REGION :

2.10. 1901 to 1911 :—During this decade, besides numerous other changes, the district of Lingsugur was abolished and its taluks were transferred to Gulbarga and Raichur Districts. The district of Adilabad was enlarged by the addition of certain taluks from its adjoining districts. The old districts of Elgundal, Sirpur-Tandur and Indur were renamed as Karimnagar, Adilabad and Nizamabad respectively. The Telangana Region thus consisted of the then districts of Atrai-i-Balda, Karimnagar, Adilabad, Warangal, Nizamabad, Medak, Mahbubnagar, Nalgonda and Hyderabad City of the Hyderabad State.

2.11. 1911 to 1921 :—In this period, besides some minor inter district changes, the taluks of Adilabad District were rearranged so as to allow the formation of the two new taluks of Utnoor and Boath. Patlur Taluk of Atrai-i-Balda District and Jamikunta Taluk of Karimnagar District were renamed as Dharur and Huzurabad respectively. Hatnura and Daulatabad Taluks

of Medak District were merged and renamed as Vicarabad. Cherial of Nalgonda District was renamed as Jangaon Taluk.

2.12. 1921 to 1931 :—There were no changes in area in this decade except the transfer of Amarchinta Samasthan from Raichur District to Mahbubnagar District. The two natural divisions, viz., Marathwara and Telangana, under two Directors-General of Revenue came to be regarded as convenient units of administration in 1925. Then came the four Subahs in 1929 as the two Divisions were found unwieldy. The two Subahs pertaining to the Telangana Region and the districts which comprised each of these two Subahs then are shown below :—

Subah	District
Medak :	Medak Nalgonda Mahbubnagar
Warangal :	Warangal Karimnagar Adilabad Nizamabad

Besides these seven Diwani districts, Atrai-i-Balda which belonged to the Nizam was also treated as a separate Census unit. The peculiarity of Atrai-i-Balda is that it did not form a compact contiguous unit but spread all over the State in bits.

2.13. 1931 to 1941 :—The jurisdiction of the area did not undergo any change. District Baghat, a taluk in Medak District in 1931, was constituted as a separate district. Banswada Taluk was newly constituted out of Yellareddy and Bodhan Taluks in the Nizamabad District. The remaining portion of Yellareddy Taluk was transferred to Medak District. The Subahs and the districts at the end of the decade were as follows in Telangana Region.

Subah	District
Medak (Gulshanabad) :	Atrai-i-Balda Nizamabad Medak Baghat Mahbubnagar Nalgonda
Warangal :	Warangal Karimnagar Adilabad

2.14. 1941 to 1951 :—This decade was one of intensive changes, shaping as it were the future pattern of things to come on the ushering in of the Republic of India. Hyderabad was brought under Central Administration in 1948 and Popular Government was installed. The realignment of district and tahsil boundaries was brought about on a very extensive scale.

The Sarf-e-Khas Illaques or territories, scattered all over the State, were taken over by the Hyderabad Government. These Illaques covered about 2,000 villages and were under the personal management of the Ruler. It was a State within a State. The Sarf-e-Khas district of Atrai-i-Balda and the district of Baghat were abolished and the new district of Hyderabad with 797 villages was created. The management of all Jagirs was taken over by the Hyderabad Government. On 23 January 1950 as a result of

an agreement between the Government of India and the Nizam, some mutual exchange of villages between the Hyderabad, Madras and Bombay States took place. (For details please refer to page 9 of Part II-A Tables, Hyderabad State Census Report, 1951).

2.15. 1951 to 1961 :—This is the decade of Reorganisation of States on an All India basis. On 1 November 1956 in accordance with the States Reorganisation Act of 1956 the erstwhile Hyderabad State was trifurcated into Karnataka, Maharashtra and Telangana portions. The last of these portions comprising of Mahbubnagar, Hyderabad, Medak, Nizamabad, Adilabad (except Rajura and Kinwat Taluks and Islapur Circle of Boath Taluk), Karimnagar, Warangal, Khammam (which had been formed earlier by bifurcating Warangal District), and Nalgonda Districts, Alampur and Gadwal Taluks of Raichur District, Kodanagal and Tandur Taluks of Gulbarga District, Narayankhed Taluk, Zahirabad Taluk (except Nirna Circle) and Nyalkal Circle of Bidar Taluk of Bidar District, Jukkal and Bichkonda Circles of Deglur Taluk and Mudhol, Bhainsa and Kuber Circles of Mudhol Taluk of Nanded District of the erstwhile Hyderabad State were added on to the Andhra State to form the present Andhra Pradesh in the scheme of the Reorganised States of India.

3. Area figures of Surveyor General of India and the Director of Settlement and Land Records of Andhra Pradesh :

3.1. A list of the districts showing the Survey of India figures and State Survey figures of the areas as now reconciled is given below :

Location Code Number	State/District	Area figures furnished by the Director, Survey of India, Southern Circle, Bangalore	Area according to the State Survey Department
1	2	3 Sq. miles	4 Sq. miles
ANDHRA PRADESH		106,286.2	106,052.4
1	Srikakulam	3,901.5	3,899.0
2	Visakhapatnam	5,199.9	5,179.0
3	East Godavari	4,181.2	4,178.0
4	West Godavari	2,980.1	3,009.8
5	Krishna	3,377.9	3,366.5
6	Guntur	5,802.3	5,780.0
7	Nellore	7,973.6	7,959.8
8	Chittoor	5,855.1	5,844.0
9	Cuddapah	5,923.6	5,935.5
10	Anantapur	7,384.8	7,388.0
11	Kurnool	9,276.9	9,208.9
12	Mahbubnagar	7,118.9	7,132.2
13	Hyderabad	2,987.5	2,997.1
14	Medak	3,711.2	3,675.3
15	Nizamabad	3,105.3	3,112.8
16	Adilabad	6,305.9	6,256.3
17	Karimnagar	4,582.4	4,588.8
18	Warangal	4,987.6	4,955.8
19	Khammam	6,147.2	6,104.0
20	Nalgonda	5,483.3	5,491.6

3.2. Thus, the latest area of Andhra Pradesh according to the Survey of India works out to 106,286.2 square miles and by the State Survey figures as reconciled 106,052.4 square miles, the difference being only 0.22% which is negligible. The impediments in reconciliation were as follows :—

- The different methods of computation of areas adopted by the Survey of India and the State Survey Department. The

State Survey Department conducts cadastral survey of individual fields in a village and the areas are totalled and made to agree with the traverse area of villages within the permissible margin of error and similarly the areas of all the villages are totalled up and made to agree with the traverse area of taluks within the permissible margin of error. The total of the areas of taluks is given as the area of the district. The Survey of India on the other hand takes the plotted boundary of a district on Survey of India sheets and the area is calculated with the help of a Planimeter which gives a vertical projection of the area and not the actual surface area. Thus the areas of the districts arrived at by the two different methods are bound to differ.

(ii) Several of the districts and taluks in Telangana had not been traversed by the State Survey Department so far and no attempt was made to make the fieldwork areas to agree with the total traverse area of a taluk. The poramboke (communal) lands and forest areas etc., had not been surveyed in the Telangana districts and only their approximate area was reckoned for calculating the total area of a taluk.

(iii) The Agency areas and several other areas had not yet been surveyed and therefore accurate area figures of each constituent unit was not available with the State Survey Department.

(iv) In the absence of complete survey of all the areas, the taluk and district boundaries located in the maps of the State Survey Department may not be absolutely accurate. The total area of villages may not thus actually correspond to the total area of a taluk or district as plotted on a map.

4. Critical Survey of changes in jurisdiction from 1951 to 1961 :

4.1. The district constitutes the unit of administration in the Andhra Pradesh State with the District Collector as the chief executive authority implementing the policies of the Government in the district. The 1951-61 changes in jurisdiction are therefore critically analysed below on the basis of the district.

4.2. Nos. 1 & 2 SRIKAKULAM AND VISAKHAPATNAM DISTRICTS:

There were no changes in the district boundaries of Srikakulam and Visakhapatnam Districts during this decade.

4.3. No. 3 EAST GODAVARI DISTRICT:

In East Godavari District, Bhadrachalam and Nugur Taluks comprising an area of 1,504 sq. miles were transferred to Khammam District in G. O. Ms. No. 2384, dated 17 November 1959 for convenience of administration. The territories transferred to Khammam District are geographically contiguous to it. The River Godavari and the River Sabari separate these two taluks en bloc from the East Godavari District and the people of this area would have to cross either of these two rivers to get to the old district headquarters. Though by long association, Rajahmundry at the head of the Godavari Delta in East Godavari District, still appears to attract the trade of the Nugur and Bhadrachalam areas, administratively, the proximity and greater accessibility of Khammam, the new district headquarters, seems to be a positive advantage.

4.4. No. 4 WEST GODAVARI DISTRICT :

There were no changes in the boundaries of this district during this decade.

4.5. No. 5 KRISHNA DISTRICT :

Twentythree enclave villages of Nandigama Taluk of Krishna District known as Munagala Paraganah comprising an area of 107.8 sq. miles were transferred to Huzurnagar Taluk of Nalgonda District as the area was geographically contiguous to it. The enclave was quite remote from Masulipatnam, the district headquarters of Krishna and the terrain was more akin to the surrounding areas of Nalgonda District.

4.6. No. 6 GUNTUR DISTRICT :

The Potharlanka and Gajullanka villages of Divi Taluk of Krishna District lying on the western side of the mouth of River Krishna adjacent to Guntur District were transferred to Repalle Taluk and Tenali Taluk respectively of Guntur District as they were geographically contiguous and easier of access from the Guntur side of the River Krishna, which greatly facilitated organising quick relief measures during flood season. A small area of 1.985 sq. miles of once forest area was transferred from Palnad Taluk of Guntur District to Miryalguda Taluk of Nalgonda District. This area is what is popularly known as Vijayapuri South. Vijayapuri North and Vijayapuri South lying on either side of the Krishna River, where the gigantic Nagarjunasagar Dam is under construction, had obviously to be under a unified control as the Head Works are located on either side and several problems on both sides of the river at the dam site had to be tackled in common by the district authorities. Since the main headquarters of the Nagarjunasagar administration is on the Northern side falling in Miryalguda Taluk of Nalgonda District, the transfer of the southern bit comprising of 1.985 sq. miles of the forest area to Miryalguda Taluk was but to be expected.

4.7. No. 7 NELLORE DISTRICT :

The minor mutual transfer of villages of Krishnapuram, Peddauyyalawada and Chinnauyyalawada of Guntur District to Darsi Taluk of Nellore District and Kotikalapudi village from Nellore District to Ongole Taluk of Guntur District were ordered for administrative reasons and the changes were small.

4.8. No. 8 CHITTOOR DISTRICT :

The jurisdiction of Chittoor District was affected during the decade by the adjustment of boundaries as a result of the Pataskar Award by which all contiguous villages having a majority of Tamil speaking population of Chittoor District were added to the North Arcot and Chingleput Districts of the Madras State and the predominantly Telugu speaking villages of adjoining Salem and Chingleput Districts were absorbed into the Chittoor District.

The following areas were transferred from Chingleput and Salem Districts to Chittoor District :

(i) Three villages of Krishnagiri Taluk of Salem District to Kuppam Independent Sub-Taluk measuring 0.2 sq. miles ;

(ii) Seventy six villages of Tiruvallur Taluk and seventy two villages of Ponneri Taluk of Chingleput District measuring 110.3 sq. miles and 110.9 sq. miles respectively to Satyavedu Taluk.

The following areas were transferred from Chittoor District to Madras State :

(i) Twentynine villages of Chittoor Taluk measuring 46.2 sq. miles, Gopalakrishnapuram of Puttur Taluk measuring 0.3 sq. miles, two hundred and eighty eight villages of Tiruttani Taluk measuring 363.5 sq. miles and a small forest area of Palmaner Taluk were transferred to North Arcot District and Chingleput District of Madras State.

Thus as a result of the above changes effected under the Pataskar Award, the Andhra Pradesh State gained an area of 221.4 sq. miles but lost 410.0 sq. miles, sustaining a net deficiency of 188.6 sq. miles of land.

4.9. No. 9 CUDDAPAH DISTRICT :

In Cuddapah District, two villages viz., Daddanala and Kallur were transferred from Allagadda Taluk of Kurnool District and added to Proddatur Taluk of Cuddapah District for administrative convenience and on the representation of the people that their associations with Proddatur Town were greater and would facilitate transaction of their business.

4.10. No. 10 ANANTAPUR DISTRICT :

Anantapur District gained one whole taluk of Rayadrug measuring 682.0 sq. miles from Bellary District as a result of the Andhra State Act on grounds of linguistic composition and cultural affinity, administrative convenience and economic well-being.

4.11. No. 11 KURNOOL DISTRICT :

On the same analogy of Rayadrug Taluk, the Telugu speaking taluks of Alur and Adoni of Bellary District measuring 1,379 sq. miles were added to the contiguous Kurnool District as a result of the Andhra State Act. Kurnool District thus became the largest district in the State in area (13 taluks covering 9,208.9 sq. miles).

4.12. No. 12 MAHBUBNAGAR DISTRICT :

Mahbubnagar District gained vastly in its area as a result of the States Reorganisation Act, as the predominantly Telugu speaking taluks of Alampur and Gadwal occupying an extent of 953.0 sq. miles and Kodangal Taluk covering an area of 460.8 sq. miles of Raichur and Gulbarga Districts respectively (which went to Mysore) were added to this district as these would be contiguous with and make the district compact. Mahbubnagar District with a total area of 7,132.2 sq. miles is however the largest of the Telangana districts. A further minor addition of nine villages with an area of 28.6 sq. miles were also made in 1959, to the Shadnagar Taluk of this district from Chevella Taluk of Hyderabad District to cater to the convenience of the people on their representation. This district, however, surrendered the whole of Pargi Taluk to Hyderabad District, comprising an area of 389.8 sq. miles due to its closer proximity to Hyderabad District and to suit administrative convenience. A very small extent of 2.0 sq. miles comprising Madnapur village was transferred from Kalvakurthi Taluk of Mahbubnagar District to Devarakonda Taluk of Nalgonda District for administrative convenience.

4.13. No. 13 HYDERABAD DISTRICT :

Hyderabad District gained considerably as a result of administrative reorganisation of the districts and the readjustment of taluks on account of the implementation of States Reorganisation Act in Hyderabad State, and also due to the provisions in the Act itself. In the former category fall Pargi Taluk, discussed above, and also the Vicarabad Taluk measuring 505.6 sq. miles

transferred from Medak District. The Tandur Taluk of Gulbarga District which has gone to Mysore, measuring 371.2 sq. miles was tagged on to Hyderabad District as a result of the States Reorganisation Act. Subsequently, on a representation from the residents of certain villages and for administrative reasons also, eleven villages of Sangareddy Taluk of Medak District and Hafeezpuram village of Ramannapet Taluk of Nalgonda District were absorbed on 24 July 1958 in Chevella and Ibrahimpatnam Taluks, respectively, of Hyderabad District.

4.14. No. 14 MEDAK DISTRICT :

Medak District did undergo a great deal of territorial change mainly as a result of States Reorganisation Act. But, before that, in the year 1954, Theegalanarasapuram village covering an extent of 4.4 sq. miles was absorbed in Gajwel Taluk of this district from Jangaon Taluk of the then Nalgonda District. The States Reorganisation Act gave an area of 752.4 sq. miles to this district by the inclusion of Nyalkal Circle of Bidar Taluk, one hundred and twentyfive villages of Zahirabad Taluk (excluding Nirna Circle) and the entire Narayankhed Taluk of Bidar District which went to Mysore.

Besides surrendering territories to Hyderabad District, already indicated, Sawargaon village, measuring 1.3 sq. miles from Medak District was transferred to Madnur Independent Sub-Taluk of Nizamabad District on 19 August 1958.

4.15. No. 15 NIZAMABAD DISTRICT :

Nizamabad District was enlarged considerably by the inclusion of 230.8 sq. miles on 1 November 1956 on the basis of the States Reorganisation Act by the tagging on of Bichkonda and Jukkal Circles from Deglur Taluk of Nanded District that went to Maharashtra. The addition of Sawargaon village from Medak has already been referred to above.

4.16. No. 16 ADILABAD DISTRICT :

Adilabad District lost a great deal to Maharashtra as a result of the States Reorganisation Act. Kinwat and Rajura Taluks and Islapur Circle of Boath Taluk measuring 1,538.5 sq. miles were transferred to Maharashtra but an addition of 402.8 sq. miles were, however, secured in Mudhol, Bhainsa and Kuber Circles of Mudhol Taluk of Nanded District, now constituted after the States Reorganisation Act as Mudhol Taluk of Adilabad District.

4.17. No. 17 KARIMNAGAR DISTRICT :

Karimnagar District got diminished to an extent of 556.2 sq. miles on 1 October 1953 as the whole of Parkal Taluk was transferred to Warangal District, when changes were undertaken by the constitution of Khammam District as a new entity on that date.

4.18. No. 18 WARANGAL DISTRICT :

Warangal District was reorganised when the Khammam District was newly formed on 1 October 1953. Jangaon Taluk covering 872.3 sq. miles was transferred to Warangal District from Nalgonda District, so also Parkal Taluk, discussed above, and the two villages of Siruvole and Kamepalle measuring 12.4 sq. miles of Khammam Taluk were retained in this district. All these additions took place on 1 October 1953. The deletions of Khammam etc., taluks from this district constituting an area of 3,970.1 sq. miles are discussed under Khammam District below.

4.19. No. 19 KHAMMAM DISTRICT :

Khammam District was constituted for the first time on 1 October 1953 with five taluks of Warangal District, as administratively it had been long felt that Warangal District was too extensive and unwieldy, being the largest district of Hyderabad State. It was felt that the bifurcation of this district would help the Law and Order situation also. There had always been considerable agitation for this bifurcation from the inhabitants of the eastern taluks which were far more backward than the western taluks and it was felt that a separate unit exclusively for the eastern taluks, would be conducive to the economic progress of these taluks. Accordingly, bifurcation took place on 1 October 1953 in accordance with the Notification No. 48/A4/193/53, dated 18 September 1953 and an area of 3,970.1 sq. miles comprising the following taluks were demarcated as Khammam District with headquarters in the ancient town of Khammam.

- (i) Khammam Taluk (minus Kamapalle and Siruvole villages)
- (ii) Yellandu Taluk
- (iii) Madhira Taluk
- (iv) Bhoorgampadu Taluk
- (v) Palvancha Taluk (Kothagudem Taluk)

Subsequently, in 1959, Bhadrachalam and Nugur Taluks were transferred to this district from East Godavari District as already discussed under East Godavari District.

4.20. No. 20 NALGONDA DISTRICT :

Nalgonda District gained an area of 107.8 sq. miles in the twentythree villages transferred from Nandigama Taluk of Krishna District, Madnapur village from Kalvakurthi Taluk of Mahbubnagar District, and an area of 1.985 sq. miles from Palnad Taluk of Guntur District, so done for administrative reasons and all these issues have already been discussed. The transfer of Jangaon Taluk and Hafeezpuram village from this district to Warangal and Hyderabad Districts respectively have already been discussed under the relevant district that acquired them.

5. Rural and Urban Population :

5.1. *Definition of an Urban area* :— For the first time in the 1961 Census, uniform and somewhat rigid tests were sought to be applied throughout the country for an area to be recognised as an Urban unit. The criteria prescribed are :

(1) All Municipalities, Cantonments, Notified areas and other places enjoying recognised local administration like civil lines will be treated automatically as towns ;

(2) For other areas the eligibility yard sticks applied are:

- (a) a population of not less than 5,000 ;
- (b) a density of not less than 1,000 persons per square mile ; and
- (c) at least three-fourths of the adult male population should be employed in pursuits other than agriculture.

5.2. All areas which are not urban have been automatically treated as rural.

5.3. From the year 1891 the Census definition of a town has been more or less the same till 1941 (with a slight modification in 1951, though not uniform for all the country) and comprised all Municipalities of whatever population and "every other continuous collection of houses, permanently inhabited by not less than 5,000 persons, which the Provincial Census Superintendents, having regard to the character and relative density of population, its importance as a centre of trade and historical association, may decide to treat as a town." From the past Census Reports of Madras, we find W. Francis in 1901, J. Chartres Molony in 1911, G.T. Boag in 1921 and M.W.M. Yeatts in 1931 as well as D.H. Elwin in 1941, all conformed to this approach to the urban area very faithfully, wherein the Superintendent of Census was the arbiter and also had the liberty to decide what was or was not an urban area.

5.4. It was not an altogether easy task to finalise the list of towns for the State at the present Census. Firstly, even in regard to the recognition of all Municipal towns in the State as Urban areas, there was some difficulty. There were two sets of Municipal laws in force in this State, one in Telangana districts and the other in Andhra districts. In Telangana there were in existence two categories of Municipalities namely, what were termed as the Town Municipalities and the City Municipalities. In the Andhra districts there was only one category of District Municipalities which correspond to City Municipalities of Telangana districts. The smaller places were constituted into Panchayats. In the Andhra districts, places with less than 20,000 population were treated as Class I or Class II Panchayats and not as Municipal Towns, whereas in the Telangana districts even small places with a minimum population of 5,000 were treated as Municipalities. Several panchayats in the Andhra area were far more Urban in character than the Town Municipalities of the Telangana districts. There was a legislation on the anvil to make Municipal towns uniform throughout the State and the Town Municipalities were proposed to be designated as Class I or Class II Panchayats in accordance with the standards prevailing in the Andhra area. It would therefore have been anomalous if all the Town Municipalities had been automatically treated as Census Towns for the 1961 Census and if several large Panchayats in the Andhra districts had been left out. For the sake of achieving uniformity throughout the State and for ensuring that only the deserving places were recognised as Urban areas, it was decided at this Census that only the Municipal Corporation areas, Cantonment Board areas, District Municipalities in Andhra districts and City Municipalities in Telangana districts would be automatically treated as Towns for Census purposes without the application of any other tests. In respect of all other areas, whether they be Town Municipalities or Class I or Class II Panchayats, it was decided to apply the other three tests prescribed.

5.5. The application of these other tests was also found to be somewhat difficult. The only test which was easy of application was the minimum population test of 5,000. But as regards the density and the proportion of non-agricultural adult population of a place, the District Census Handbooks of 1951 could not provide definite information. The area figures were not indicated in respect of some places and the computation of density became difficult. There was no clear picture of adult agricultural and non-agricultural workers. Therefore in respect of all places having a population exceeding 5,000 and especially where they

5.6. The urban towns are classified into six categories, viz.,

Class I ... With a population of 100,000 and over (generally referred to as Cities)

Class II ... With a population of 50,000 to 99,999

Class III ... With a population of 20,000 to 49,999

Class IV ... With a population of 10,000 to 19,999

Class V ... With a population of 5,000 to 9,999

Class VI ... With a population of less than 5,000

5.7. At the 1961 Census there are 212 Urban units (excluding the eleven individual units merged in the Hyderabad Town group) falling in the different categories as follows :

Class	Number of Towns
Class I ...	11
Class II ...	8
Class III ...	51
Class IV ...	71
Class V ...	70
Class VI ...	1
Total	212

5.8. By the application of the stricter tests prescribed for the 1961 Census, as many as 74 places which were recognised as towns at the 1951 Census became disqualified for recognition as Towns at the 1961 Census. 12 towns of Class IV involving a total population of 139,191 ; 35 towns of Class V involving a total population of 249,628 ; and 27 towns of Class VI involving a total population of 107,725 as per 1951 Census had to be deleted. The list below gives particulars of the Urban areas of 1951 which were eliminated in 1961 Census:

(2)

List of Urban areas of 1951 which have been eliminated as urban units in 1961 Census:

Name of the District	Name of the Town	Population 1951	Population 1961
1	2	3	4
CLASS IV TOWNS			
East Godavari	Gollaprolu	12,134	14,419

	Narayanpur ...	3,523	4,298
	Chandur ...	3,909	4,077
Total		107,725	137,733

5.9. Only ten Urban units which were not recognised as such in 1951 were added in the 1961 Census. Of these, one, viz., the new township of Vijayapuri is of Class II and one viz., Malkapuram in Visakhapatnam District which assumed importance with the establishment of Ship Building Yard and the Caltex Oil Refinery is of Class III, one of Class IV, six of Class V and one of Class VI. The following list gives particulars of these areas :

List of New Towns declared for the first time in 1961 Census

Class of Town	Name of the District	Name of the Town	Population in 1961
1	2	3	4
Class II	Nalgonda	Vijayapuri	55,300
Class III	Visakhapatnam	Malkapuram	29,186
Class IV	Krishna	Nandigama	10,244
Class V	Krishna	Tiruvur	9,299
		Kaikalur	7,051
		Gannavaram	6,702
	Chittoor	Tirumalai	5,561
	Adilabad	Kadam Damsite	6,235
	Khammam	Bhadrachalam	5,740
Class VI	Krishna	Mokhasa Muthyalampadu	3,963

6. Progress in the Number of Towns 1901-1961 :

6.1. It is but natural that with the economic progress of the country and the establishment of new industries, and new institutions, the number of Urban units generally tend to grow in number and size. But for the application of the different criteria in 1961 the total number of towns at this Census would have certainly been larger than in 1951 if merely the old principles had been applied. The changes in the number of towns that resulted on account of the change in the concept of a Census town has been already discussed in detail. The Statement below gives the districtwise progress in the number of towns from Census to Census in the present century.

STATEMENT 1
PROGRESS IN THE NUMBER OF TOWNS 1901-1961

L.C. No.	State/District	1901	1911	1921	1931	1941	1951	1961

20	Nalgonda	8	12	4	2	2	2	2

7. Village-Definition-A Historical Survey :

7.1. In composite Madras, at the 1951 Census, though basically the Revenue village formed the Rural unit, in several cases where groups of villages had been combined to form a Panchayat, or a village and its hamlets were split up into different Panchayats, each of these Panchayats were taken as separate units for the purpose of Census. At the 1961 Census, it was decided that the Revenue village alone should be taken as a unit and not the Panchayat, the reason being that there is no permanence in Panchayat boundaries. Oftentimes the Panchayat jurisdictions are changed on political considerations and such impermanent units are hardly suitable for recognition as Census units. The Revenue village on the other hand is a permanent unit with definite, surveyed and fixed boundaries. The Revenue villages were not, after all, constituted as arbitrarily as imagined. Tradition and cultural association of a group of habitations were taken into consideration while forming the Revenue village. Practically for all Governmental as well as Non-Governmental purposes, the Revenue village has come to be recognised as a distinct unit which has stood the test of time. Only in the old Proprietary Estate areas where Survey and Settlement were introduced for the first time, some groups of small villages were being constituted into Survey villages to form viable units. Wherever such surveys were finalised, the Survey villages were taken as units for the purposes of the 1961 Census. There have also been one or two rare exceptions where a Panchayat constituted of more than one village had to be taken as a unit for the 1961 Census, for, the inhabited area under such old Panchayats would have been so developed that it was hardly possible to demarcate the boundary

of each constituent Revenue village as it may cut through the heart of a street. Only in such well established units, where identity of the old Revenue village had almost been completely lost, was the Panchayat recognised as a unit for the 1961 Census and not each Revenue village. But, basically it may be taken that the Revenue village represents the Rural unit for the 1961 Census.

(Note:—Where an urban unit is constituted by parts of villages being combined together, the portions of each of the Revenue villages not falling within the limits of the Urban unit were independently recognised as separate units for the purpose of 1961 Census and shown accordingly in the village statistics under the name of the parent village with "Rural" added within brackets by its side).

7.2. There are a few Revenue villages with surveyed boundaries but may have no habitation at all within its boundaries, as a result of the inhabitants deserting their old village site and shifting elsewhere to another area. Even so, such units have also been taken as separate Rural units for the purpose of ensuring complete coverage of area at the Census, so that any odd habitation or houseless persons temporarily located may not be missed out. If in certain of these villages, no habitation is found at all, the villages are treated as uninhabited and shown accordingly in the village statistics.

7.3. A taluk is constituted by a number of villages being grouped together. All the Revenue villages within the taluk are demarcated and numbered from North-West to South-East so that each village has a distinct location code number. Wherever a group of villages or portions of villages together form an urban unit, the numbers allotted to those villages are accounted for as falling within an urban unit which has a separate distinct location code number and all the remaining units are shown as separate Rural units. Thus all the Revenue villages forming part of a taluk are accounted for, which is a way of ensuring full coverage at the Census.

8. Number of inhabited villages from 1901 to 1961:

8.1. The following statement gives a comparative idea of the number of inhabited villages recognised as such, districtwise from Census to Census for 1901 to 1961.

STATEMENT 2

PROGRESS IN THE NUMBER OF INHABITED VILLAGES 1901—1961

20	Nalgonda	1,124	1,084	1,163	1,163	1,147	1,120	972

(Figures for the earlier Censuses have been adjusted to the extent possible to the present jurisdiction of the district)

8.2. The reasons for the variations in the number of units from Census to Census may be as follows : The statement does not take into account in a few cases the changes in the boundaries of the districts from time to time, but represents the total number of villages recognised as such in each district as it was constituted at the time of each Census. The survey and settlement operations involved the examination of the sizes of villages and some grouping of villages was attempted to form compact and viable Revenue villages ; thus the number of villages recognised as Census units kept changing from time to time. At certain Censuses hamlets of villages were recognised as separate Rural units and at some Censuses each panchayat was taken as a unit independent of the Revenue village; therefore there is bound to be a difference in the number of Rural units recognised as Census villages from time to time. A big increase in the number of villages in Srikakulam and Visakhapatnam Districts is noticeable from 1951 Census. This is mainly due to the location of every habitation at the present Census by special staff in the Agency areas, where, in the absence of well-established Revenue villages, the smallest group of tribal habitations bearing a distinct name had to be taken as a separate Census village and accounted for. The large drop in the number of villages in Chittoor District is due to the transfer of considerable territory from this district to Madras State as a result of Pataskar Award.

9. Total Number of Villages and Towns in the State at the 1961 Census :

9.1. The following statement shows districtwise, the total number of villages and towns recognised as such at the 1961 Census :

STATEMENT 3

NUMBER OF VILLAGES AND TOWNS IN THE STATE AT 1961

L.C. No.	State/District	Total No. of Villages borne on the jurisdiction lists	No. of uninhabited Villages	No. of villages included in Towns	No. of inhabited Villages	No. of Towns
1	2	3	4	5	6	7

20	Nalgonda	1,170	42	4	9	1,124

10. Census House and Household:

10.1. The following are the definitions adopted for a "Census house" and a "Census Household" at the 1961 Census :

"A Census house is a structure or part of a structure, a dwelling, a shop, work-shop or a factory, place of business, a shop-cum-dwelling, giving on the road or a common stair case or a common court yard leading to a main gate, or enjoying a separate entrance."

Thus, if a big "Deodi" contains a series of rooms or suites each having separate entrance from a court yard, each portion is taken as a separate Census house. Supposing a single building is let out in different portions for use as residence or otherwise and if each portion has separate entrance from a common court yard or stair case, etc., each portion is reckoned as a separate Census house. If within a compound there is the main building, a separate garage, servants quarters etc., each one of these structures, having separate entrances, is taken as a separate Census house.

"A household means entire group of persons who commonly live together in the same Census house and take their food from a common mess unless the exigencies of life prevent them from

doing so. In some Census houses there may be more than one group of persons, each group with a separate common mess. In such case, each group with a common mess, is regarded as a separate household."

11. Occupied Residential Census House :

11.1. For the purpose of Table A-I, only the occupied Residential Census houses have been exhibited. Occupied Residential House is a Census house used wholly or partly for the purpose of residence by one or more households.

12. Density of persons per occupied Census house, Sex Ratio percentage of Rural/Urban population, Density of population per square mile :

12.1. Statement 4 below gives at a glance the number of persons per occupied residential house, the sex ratio, the percentage of rural/urban population to total population and density per square mile.

STATEMENT 4

PERSONS PER OCCUPIED CENSUS HOUSE, NUMBER OF FEMALES PER 1,000 MALES, PERCENTAGE OF RURAL AND URBAN POPULATION TO TOTAL POPULATION, DENSITY PER SQUARE MILE, 1961.

L.C. No.	State/District	(a) Persons per Occupied Census House			(b) Number of Females per 1,000 Males			(c) Percentage of Rural and Urban Population to Total Population			(d) Density per square mile

12.2. The four aspects presented in the above statement are discussed below :

(a) Persons per Occupied Census House :

12.3. The first aspect that the above table presents is the number of persons per Census house. Only the occupied residential Census houses have been taken into consideration and what an occupied residential Census house is, has been defined already. As columns 3 to 5 of the above statement represent, the average number of persons residing in a Census house, taking the State as a whole, is 5.16. Taking the State average there does not appear to be much disparity between the rural and urban population regarding the pressure for accommodation, though in Urban areas the size of the group occupying a Census house is

slightly larger. It is 5.10 persons per Census house in rural areas, and 5.46 persons per Census house in urban areas. Though on the face of it, it may appear as though there is not much pressure on housing as it would appear that each house is occupied by a family of about 5 persons, the problem can be fully appreciated only if it is studied in relation to the average number of rooms per Census house, the dimensions of rooms, the type of constructions, etc. The Housing Tables given in the E-series of the Census tables (please refer to Part IV in the series of the State Census Reports Volumes) which may give a more definite picture of congestion in housing. All the same, even the picture presented by the average number of persons per occupied residential house shows a gradual increase in pressure on housing.

The following statement gives the average number of persons per Census house from 1911 onwards.

Year	India	Andhra Pradesh
1911	4.9	5.12*
1921	4.9	4.61*
1931	5.0	4.69*
1941	5.1	4.79*
1951	5.3	5.36
1961	N.A.	5.16

N.A.—Not available.

* The figures are approximate.

It is well-known that the housing conditions of the middle classes, the lower middle classes and the poor who form the bulk of the population of our country have been far from satisfactory in the past. The above statement goes to show that the housing conditions have not kept pace with the increase in population. There is dire need to increase the number of Census houses if the living conditions are to improve.

12.4. In the districts of Hyderabad (5.96), West Godavari (5.78), Medak (5.56), East Godavari (5.54), Warangal (5.41), Anantapur (5.32), Khammam (5.28), Krishna (5.26) and Nizamabad (5.23) the number of persons per occupied Census house is slightly higher than the State average of 5.16. Hyderabad District for obvious reasons has recorded the highest density of 5.96 or nearly 6 persons per Census house.

12.5. Taking the urban population alone, East Godavari (5.78), Hyderabad (6.00), West Godavari (5.78), Warangal (5.67), Adilabad (5.54) Districts show a slightly higher figure than the State average of 5.46 per occupied residential Census house. As regards the rural population, the following districts have recorded higher congestion than the State average of 5.10 per Census house: Hyderabad (5.89), Medak (5.57), West Godavari (5.54), Warangal (5.37), Khammam (5.36), East Godavari (5.35), Anantapur (5.32), Nizamabad (5.29) and Krishna (5.24).

12.6. While the above figures may give an idea of the pressure on population actually living in residential Census houses there is also the section of population who are houseless and live on the streets in cities or as nomads in rural areas. The addition of their numbers accentuates the dearth of housing. Even in the case of the so called 'household population' living in Census houses, what are the types of Census houses in which it lives? For the purpose of Census a palatial house as well as a miserable hut are Census houses. But we know that a large number of our rural habitations is made up of single-roomed, mud-walled and thatched-roofed enclosures which are an apology for houses. The poverty of the masses has rendered good housing impossible as a profitable investment except for a few well-to-do dwellers. The housing problem has however, received due prominence in the State's Third Plan. It says "the fact that shelter is one of the prime necessities after food and clothing which no Welfare State can afford to ignore compels the most constructive approach possible with a view to alleviating the hardships" and has provided in all Rs. 535.00 lakhs. It is hoped that my successors would be able to give a happier picture in the coming decades with the advancing technological knowledge and increased money resources and the determined will of the people to improve their lot and the redoubled effort of the Government bearing fruit in the not too distant future.

(2 A)

(b) Sex Ratio:

12.7. The second aspect that the table represents is the sex ratio i.e., number of females per 1,000 males.

12.8. The paucity of women in our country's population is an established fact as revealed by successive Censuses. The same pattern of paucity is discernible though mildly in the Andhra Pradesh State also in all its districts except in the three districts of Srikakulam, Visakhapatnam and Nizamabad where the number of females per thousand males are respectively 1,037, 1,005 and 1,007.

State/Natural divisions	Females per thousand Males				
	1921	1931	1941	1951	1961
1	2	3	4	5	6
ANDHRA PRADESH	993	987	980	986	981
1 Agency tracts	N.A.	N.A.	987	979	978
2 Coastal Plains	1,016	1,011	1,006	1,001	995
3 Rayalaseema	960	961	959	959	960
4 Telangana	965	976	963	983	978

12.9. In the Agency tracts the number of females have steadily decreased from 1941 to 1961 and this may be due to preponderance of men migrating from the plains area to this tract and settling down in those areas. Moreover the mortality rate due to lack of adequate Hospital and Maternity facilities seem to take a heavier toll of life of women than of men.

12.10. In the seven coastal plains districts of Srikakulam, Visakhapatnam, East Godavari, West Godavari, Krishna, Guntur and Nellore, there has been a steady decline in sex ratio and in the last decade the decline has come down from 1,001 to 995. Even in 1951, the Census Superintendent had explained the falling sex ratio as due to the restriction on emigration to Burma from the Northern districts. In the last decade this emigration has completely stopped and the general prosperity of the area due to the far reaching developmental schemes in the Krishna and Godavari deltas has also stabilised the male population. There has been a gradual increase in industrial undertakings providing local employment opportunities and has drawn some immigrants and it can be averred that the effects of emigration from out of this area on its local population is negligible.

12.11. In the Rayalaseema area, the females have always been deficient, and in the present Census also this is reflected in the districts of Cuddapah, Kurnool, Anantapur and Chittoor.

12.12. In the Telangana districts the pattern is not quite uniform. Mahbubnagar and Nizamabad districts have shown a preponderance of women while in the remaining districts of the region the sex ratio is low.

12.13. Taking the State as a whole, Srikakulam District records the highest sex ratio of 1,037 females per 1,000 males and Anantapur District has recorded the lowest sex ratio of 946. Taking the State average the sex ratio of 981 females per 1,000 males reflects a stable condition of society as the unmarried strength of the sexes is almost equal.

12.14. It is a well-known fact that there is a lot of immobility among women in this State. The movement of females depends largely on marital obligations. At best the movement will be of a short distance but if we view this movement as rural-urban flow we find that it is the male population which is more mobile, leaving its Female counterpart to stay in the rural home. Excepting in Srikakulam District, the sex ratio among the urban population is generally low in all other districts.

12.15. The Urban areas of Adilabad District present the lowest sex ratio of 911 which may be mainly due to the proportionately large number of male migrants to this rather remote district amongst the forest workers and the Kadem Dam labour force etc. Hyderabad urban population consisting mainly of the city population has the next lowest sex ratio of 929 females per thousand males and it demonstrates the pull it exercises over the male migrants. For obvious reasons, in our country the migrants to the Urban areas is mostly made up of men and it is not till the male establishes himself in the new surroundings and finds a stable roof does he bring down his family.

12.16. Taking the urban population of the State as a whole, the sex ratio of 951 females per 1,000 males reflects a fairly settled pattern of the urban families as well.

12.17. The following statement gives a comparative picture of the sex ratios in the different states of India. The Northern Indian States generally show much lower sex ratios than the Southern States.

State	Sex ratio		
	Total	Rural	Urban
1	2	3	4
1 Andhra Pradesh	981	988	951
2 Assam	876	875	677
3 Bihar	994	1,012	811
4 Gujarat	940	956	876
5 Jammu & Kashmir	878	884	844
6 Kerala	1,022	1,027	991
7 Madhya Pradesh	953	970	856
8 Madras	992	1,003	963
9 Maharashtra	936	995	801
10 Mysore	959	973	913
11 Orissa	1,001	1,015	807
12 Punjab	864	878	814
13 Rajasthan	908	913	882
14 Uttar Pradesh	909	924	812
15 West Bengal	878	943	701

12.18. The lesser numbers of a sex in the population of a region is sometimes explained as purely due to biological reasons but in the absence of very accurate statistics of birth, it is not possible to establish this fact indelibly. One cannot altogether deny the statements attributed by recognised authorities that "Hindu parents, by and large, at least in rural areas put relatively a greater premium on male children; they are apt to treat female children with relative or sometimes with unconscious neglect." But it is doubtful if this charge still holds good to-day.

The small imbalance in sex ratio may most probably be due to a very heavy toll of female lives taken in the earlier period of the reproducing ages for want of adequate maternity care, coupled with other reasons.

(c) *Percentage of Rural and Urban Population to Total Population:*

12.19. The third aspect that the table presents is the percentage of rural and urban population to the total population, district-wise. Rural population is that population which has been enumerated in Rural areas of the State i.e., in the areas other than those treated as towns, according to the Census definition.

12

12.20. 12.20. The population of this State live in the Rural parts of 17.44% being 1,00,00,000. This shows that the population of the State is not predominantly rural. The heaviest recorded urban population is in Hyderabad District in which the population of Hyderabad is fixed and the percentage of urban population to the total population of the district is 62.18%.

12.21. In the 1931 Census, the percentage of urban population in each district in the State is as follows: Hyderabad (62.18%), Krishna (25.12%), Guntur (20.83%), Kurnool (19.23%), East Godavari (14.40%), Andhra Pradesh (18.03%).

12.22. All the above districts contain at least one city i.e., each having a population of over 100,000. All told 11 cities have returned a population of over 100,000. Hyderabad, Vijayawada, Bandra (Municipal), Guntur, Amalapuram, Eluru, Kakimunda, Rajamahendravaram, Kurnool and Warangal.

12.23. In the 1931 Census, the percentage of urban population is less than the rural population in all districts.

1. Anantapur (11.30%)	8. Chittoor (11.47%)
2. West Godavari (11.30%)	9. Nellore (11.00%)
3. Adilabad (11.30%)	10. Mahabubnagar (9.31%)
4. Nizamabad (11.30%)	11. Nalgonda (8.74%)
5. Warangal (11.30%)	12. Srikakulam (7.73%)
6. Cuddapah (11.30%)	13. Medak (7.06%)
7. Khammam (11.30%)	14. Karimnagar

12.24. The heaviest proportionate rural population has been recorded in Khammam, Medak and Srikakulam Districts, being respectively 92.94%, 92.27% and 91.26%, where the Urban units are neither large in number nor big in size. The population is almost entirely agricultural, those following the urban pursuits being few.

A more detailed discussion of the growth of the rural and urban population would be found in Part I-A General Report Volume of this State.

(d) *Density per Square mile:*

12.25. The last aspect presented in the table is the density of population per square mile, district-wise. It represents the density of total population as also the rural population and the urban population of each district separately.

12.26. The maps given at the beginning of this volume illustrate the distribution and growth of population.

12.27. The average density of population per square mile for the State as a whole is 439 persons, the urban being 4,340 and rural 284. Taking the districts, the density of general population is heaviest in Hyderabad District (688), closely followed by West Godavari (657), East Godavari (624), Krishna (617) and Srikakulam (602). The density has been worked out on the area figures furnished by the State Director of Survey Settlement and Land Records and not those given by the Surveyor General, India.

12.28. The urban density is naturally heaviest in Hyderabad District (12,774) with the large concentration of population in

Hyderabad City limits, but barring this, the density of urban population does not seem to correspond with the total urban population of each district. For example, in Krishna District having the second heaviest percentage of urban population of the State, shows a very much lower density of urban population taking only the seventh place.

12.29. The computation of density of urban population depends to a large extent on the area constituting the Urban units. In respect of certain Municipalities only the area used for the purpose of habitation or construction of buildings might have been constituted into a town whereas in a few others and particularly in Panchayats several of which have qualified to be recognised as Urban units, the entire village limits including the agricultural lands might have been included within the limits of the town. Even though the general congestion of population in the purely built up area of Panchayat Towns may be as high as in any other town, by virtue of inclusion of large extents of agricultural lands within the area of what is supposed to constitute the entire Urban unit, the density falls considerably.

12.30. Even in computing the density of Rural areas the same remarks may apply as it is not merely the land or village site actually settled upon that has been taken as the basis. The entire area of the village inclusive of cultivated lands, and mamul wastes etc., have been taken into account. If only the actually built up areas are taken into account it is quite possible that many rural villages may exhibit an almost equal closeness of settlement as some of our cities. In Census report of Madras 1931, it is stated "It is by no means sure however that the worst specimens of housing in the Presidency do not come from certain

rural areas, notably the wealthy delta tracts on the circars coast, and in Tanjore. Where land is dear, housing tends to be bad... Tanjore Taluk produces one village site of 0.36 acre on which 187 people are packed, equivalent to 517 persons per acre." Such areas can also exist in the deltaic districts of circars which are equally congested where 100 persons per acre means 64 thousand per square mile. Thus even in Rural areas, a comparative study in terms of, purely habitation sites may reveal a picture much worse than our Urban areas in regard to housing conditions. If at all it is a consolation, it may be stated that most of the day the rural folk have the advantage of staying in the open uncongested fields breathing fresher air than their brethren in the Urban areas!

12.31. From an overall point of view the Rayalaseema districts of Chittoor, Cuddapah, Anantapur and Kurnool, the Telangana districts, barring Hyderabad are the most thinly populated areas of the State. The density of population is correlated to the general economic development of the areas concerned, the more developed coastal districts showing a distinctly higher density of population per square mile than the other parts of the State.

The density per square mile of the three regions of Coastal Andhra, Telangana and Rayalaseema, are given below:

Regions	Total	Rural	Urban
1	2	3	4
Coastal Andhra Region	563	473	5,135
Telangana Region (excluding Hyderabad District)	258	231	3,286
Rayalaseema Region	247	214	2,603

(a) Denotes the area figures supplied by the Surveyor General of India.

(b) Denotes the area figures supplied by the State Survey Department.

£ The Sq. Kilometres and density figures of Urban areas of Taluk, District and State are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Kilometres are further adjusted to make the Taluk/District/State totals agree.

The population per square mile given under column (4) is calculated on the basis of the area figures furnished by the State Survey Department.

State/District	Total Rural Urban	Area in		Population per Sq. mile	No. of Villages		No. of Towns	No. of Occupied Residential Houses	Population

* Denotes Towns treated as such for the first time in 1951.

£ The Sq. Kilometres and density figures of Urban areas of Taluk, District and State are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Kilometres are further adjusted to make the Taluk/District/State totals agree.

The population per Square mile given under column (4) is calculated on the basis of the area figures furnished by the State Survey Department.

The following abbreviations have been used for the status of a City or a Town :—

M.C : Municipal Corporation, M : Municipality, C.M : City Municipality, T.M : Town Municipality, P : Panchayat.

The constituent parts of Hyderabad (Town Group) fall under Hyderabad West, Hyderabad East and Medchal Taluks and separate area figures for each of the constituent units are not available. The Rural area given against the above three taluks under columns 3a and 3b therefore includes the area of the Urban portions included in Hyderabad (Town Group). Since Hyderabad (Town Group) as such has been treated as a separate independent entity, the population of no portion of the (Town Group) has been included in the population of any of these taluks. Hence the density has not been worked out for T and R in case of Hyderabad East, Hyderabad West, and Medchal Taluks and N. A. has been given in those cases in col. 4.

† Medchal Taluk excludes an Urban population of 4,958 P, 2,539 M. and 2,419 F, which is included in Hyderabad (Town Group) under Macha Bolaram. It also excludes number of Town, and Occupied Residential Houses of Macha Bolaram Town.

† Hyderabad East Taluk excludes an Urban population of 13,910 P, 7,120 M, and 6,790 F, which is included in Hyderabad (Town Group) under Malkajigiri. It also excludes number of Town and Occupied Residential Houses of Malkajigiri Town.

Towns treated as such for the first time in 1961 are printed in italics.

APPENDIX I TO TABLE A-I

1. Appendix I to Table A-I gives all the 1951 Census territorial units which constitute the present area of the State. It lists out the names of the units and their areas that go to make up the present area of the State as a whole, and then District by District down to the Taluk level. All the changes that have taken place from 1951 are clearly set out.

2. It is common knowledge that the Re-organisation of the States during the present decade led to many territorial changes. The Andhra Pradesh State itself was newly constituted and there have been inter-district and inter-taluk transfers of territories within the State. This Appendix embodying all these changes, traces the growth of the State to the present area, since the last Census of 1951.

3. The Andhra Pradesh State, situated between latitudes 12° 38' N. and 19° 55' N. and longitudes 76° 45' E. and 84° 45' E., with a coast line of approximately 600 miles covers an area of 105,168.6 square miles as per 1951 area figures (but recomputed to 106,052.4 square miles by the State Survey Department in 1961; the Surveyor General of India has also given the area of the State as 106,286 square miles). Out of this, the area of the Andhra State which came into being in 1953 was 63,417.0 square miles and due to Re-organisation of States in 1956 the Andhra State acquired 41,940.2 square miles, i.e., a little more than half of the former Hyderabad State which had extended over an area of 82,168 square miles. In the mutual exchange of small extents of territories in Chittoor District between the Andhra Pradesh State and the Madras State due to the Pataskar's Award, the State incurred a net loss of 188.6 square miles. The above figures are on the basis of the area figures furnished in 1951. The present area of the State as computed in 1961 comes to 106,052.4 square miles which is more accurate and the difference of 883.8 square miles is the result of the revised computation undertaken by the State Survey Department at the instance of this office to reconcile the figures with those of the Survey of India. The old area figures were defective in the sense that the areas of certain reserved forests and unsurveyed blocks would appear to have been left out of computation.

4. Large number of changes have occurred in the Telangana amongst the former districts of the Hyderabad State which had to be trifurcated or otherwise adjusted to fit into the States of Maharashtra, Mysore and Andhra Pradesh. The intra-district transfers in Andhra State were negligible but as a result of the taking over of zamindari and other proprietary estates under the Madras Estates Abolition Act of 1948 and the introduction of the Ryotwari system and the consequent integration of those areas with the other administrative units in 1957 and 1958 the territorial demarcation of certain taluks within the districts of the Andhra region was affected.

5. The area of the territories involved in the transfers given in the Appendix is based on the area furnished by the State Survey Department and published in 1951 District Census Hand Book of the concerned districts. In respect of transfers involving entire taluk or district the area of the transferred territory as given in Table A-I in the 1951 District Census Hand Book has been adopted, while for transfers involving portions of taluks the area of the transferred territory has been worked out on the basis of the villagewise area figures given in Primary Census Abstract of the 1951 District Census Hand Book. In respect of portions of taluks transferred to Mysore and Maharashtra States the area of transferred territory as furnished by the Superintendent of Census Operations of those States has been adopted. These areas where only portions of taluks are involved can only be approximate as the total villagewise areas do not tally with the total area of taluk given in Table A-I, in the absence of a complete survey of the units involved in the transfers.

6. The details of changes and the authority therefor have been indicated in the footnote to Appendix to Table A-II which may please be referred to.

7. The small Sub-Appendix to Appendix I to Table A-I shows the areas for 1951 and 1961 of such of those Municipal towns as had undergone changes since the last Census. The changes are due to two reasons, namely, (1) on account of changes in the jurisdiction, and (2) on account of revised computation. The reason for the change in respect of each case is explained in the Sub-Appendix.

APPENDIX I TO TABLE A-I

Statement showing the 1951 Territorial Units constituting the present set-up of each district and taluk of Andhra Pradesh and details of net area gain or loss in the changed Territories during the decade 1951-1961

...which have undergone changes since 1951 have been shown in this Appendix. I

Ramannapet Taluk	...	...	...	...	...	...	...	...	+2.0		
											N.A.
											N.A.

1 The Location Code Number, Revenue Number, name and area of each village (wherever available) transferred from one taluk to another or incorporated in a taluk by transfer from another will be found in the respective District Census Hand Book for the Census of 1961.

* 2 The reasons for marked difference between 1951 and 1961 area figures have not yet been fully assigned.

3 As the transfer under Pataskar's Award was effected in terms of villages only the areas involved in transfer have been worked out on the basis of the village-wise area given in 1951 District Census Hand Books. The area of Tiruttani Taluk computed as 424.6 sq. miles on the basis of the village-wise area, includes the tentative areas of several unsurveyed villages and therefore will not tally with the actual total area of the taluk. The correct area of Tiruttani Taluk is however, 379.0 sq. miles as given in Table A-I of 1951 Census. The correct area of the territory transferred to Madras State and retained in Andhra Pradesh out of Tiruttani Taluk will have to be finalised in due course after the correct demarcation and finalisation of the survey.

4 The forest area lying to the North and South of the village Mahimandalam (Code No. 363) of Chittoor Taluk transferred to Walajahpet Taluk of Madras State and the forest area lying between Gudiyattam Taluk and the eight villages of Chittoor Taluk transferred to Gudiyattam Taluk of Madras State, are not shown in the Appendix; the area figures of this forest area are also not available.

5 The area particulars of the territories transferred from Mysore and Maharashtra States to Andhra Pradesh State at the time of States Reorganisation have been worked out by this office on the basis of village-wise area given in the Rural Primary Census Abstract of the concerned 1951 District Census Hand Books.

6 The area particulars of the territories transferred from Andhra Pradesh State to Mysore and Maharashtra States at the time of States Reorganisation have been worked out by the Superintendent of Census Operations of Mysore and Maharashtra States and they have been adopted in this Appendix.

7 Ramapur village (Code No. 217) of Deglur Taluk whose area is included in the area of Madnur Independent Sub-Taluk, formed part of Jukkai Circle as per the Notification No. 21, dated 23-4-1950 of the erstwhile Hyderabad Government but is now in Maharashtra State.

8 The area figures of the territories involved in the transfers are only approximate and may not tally with the total taluk areas given in Table A-I in the absence of the correct surveyed areas of the portions of territories affected by the transfers.

SUB-APPENDIX TO APPENDIX I

Statement showing the area for 1951 and 1961 of those Municipal Towns which have undergone changes in area since 1951

Name of Municipal Town	Area in Sq. miles		Remarks
	1951	1961

Bhongir	0.29	1.62	On account of changes in jurisdiction

APPENDIX II TO TABLE A-I

1. Appendix II to Table A--I gives the number of villages with a population of 5,000 and over and towns with a population under 5,000 for the whole State and then District by District for each Taluk. One of the standards of eligibility of a place to be treated as a town is that it should have a minimum population of 5,000. But there are several villages with more than 5,000 population which did not satisfy the other criteria for being treated as Urban units at present though at a future date they may. This Appendix focusses our attention on these larger villages. Similarly a few exceptional cases where places with less than 5,000 population had been treated as towns are also set out here.

2. There are altogether 486 Villages in Andhra Pradesh with a population of 5,000 and over. The greatest numbers are situated in the deltaic districts of the State with 91 in Guntur District, 89 in East Godavari District, 65 in West Godavari District and 41 in Krishna District. In the delta areas where cultivation is concentrated and the lands are valuable, obviously, the habitations are not scattered amongst hamlets but develop around a central villagesite which accounts for the conglomeration and development of the thickly populated village.

3. There is only one town with a population of only 3,963 persons that is less than 5,000 for the whole State, viz., Mokhasa Mutyalampadu in Krishna District, which has been treated as an independent town at the present Census.

As was already pointed out, this is a colony established recently on the outskirts of Vijayawada City by the Municipal authorities for housing the large number of canal bank encroachers who had been evicted from the city. Six other units of less than 5,000 population recognised as Urban units in Hyderabad District form part of Hyderabad Town Group. It may be of interest to note that as many as 27 places with a population of less than 5,000 had been treated as towns at the 1951 Census. Of these, only 3 were in the Andhra districts and the rest were all in Telangana districts. None of these places qualified to be recognised as towns at the present Census.

4. The existence of a fairly large number of places with a population of over 5,000 as Rural units at the 1961 Census is due to the somewhat rigid application of the criteria prescribed at this Census for the recognition of a place as an Urban unit. This has already been discussed in some detail under the fly leaf to main Table A--I which may please be referred to. 74 places which had been recognised as towns at the 1951 Census became disqualified for being treated as towns at the 1961 Census.

5. Places with a population of under 5,000 but treated as towns for the first time in the 1961 Census and also places with a population of under 5,000 and treated as towns at 1951 but treated as villages only at the 1961 Census are listed out in List A and List B to this Appendix.

APPENDIX II TO TABLE A-I

Number of Villages with a Population of 5,000 and over and Towns with a Population under 5,000

(NOTE: UNITS OF TERRITORY WHICH HAVE NOTHING TO SHOW FOR THIS STATEMENT HAVE BEEN EXCLUDED)

APPENDIX III TO TABLE A-I

This Appendix gives the figures for the Houseless Population and Institutional Population classified by sex for the entire as also for each district—talukwise, separately for Total, and Urban areas.

Houseless Population is comprised of that group of who have no fixed place of residence and no regular house in and include such persons as beggars, sadhus, nomads, cants, vagrants, vagabonds, tramps, etc., and also population its plying on rivers, canals or lakes. These were enumerated sial arrangements at the places where they normally slept night of 28 February 1961, i.e., just before the dawn of nsus reference date, 1 March 1961 in the Rural areas. an areas, however, in view of the possibility of existence of number of pavement dwellers or other types of Houseless is, the enumeration period was extended over the two of 1 and 2 of March as well, besides the night of ruary.

3. An Institutional Household for the purpose of Census, is a group of unrelated persons living and messing together under the management of the head of the Household appointed either by the rules regulating the Institution or by common consent of its members, like a Warden, Superintendent or Manager, etc. Institutional Population therefore, includes such persons as those living in hostels, boarding houses, hotels with lodging and boarding facilities, in-patients of hospitals, sanatoria, Leper asylums, nursing homes etc; inmates of jails, mental Institutions, borstal schools beggar homes, orphanages, residents of charitable Institutions,, ashrams, convents, etc. While showing the location code numbers of the Institutions in the Census Schedules, it was noted within brackets after the house numbers as (Inst.), to distinguish them from ordinary Households.

TABLE A-II

VARIATION IN POPULATION DURING SIXTY YEARS [1901—1961]

TABLE A-II
VARIATION IN POPULATION DURING SIXTY YEARS — [1901–1961]

1. Introduction :

1.1. Table A-II furnishes for the State as well as the Districts, the Total Population for the seven Censuses since the turn of the century from 1901 to 1961 and the variations of population as they took place from Census to Census adjusted according to the present jurisdiction of the State.

1.2. This is a very important Table as it gives the growth of population from decade to decade, and in the absence of reliable vital statistics, this data forms the source for estimation of population. One of the main changes in presentation of this Table since the last Census is that percentage of variation is also given from decade to decade.

1.3. Khammam District was newly constituted on 1 September 1953 after the 1951 Census and hence is given in italics.

2. Adjustment of population from 1901–1951 :

2.1. The adjustment of population of earlier Censuses from 1901 to 1951 for the State as well as for the districts and taluks to conform to the jurisdiction prevailing at 1961 Census was made as follows : The information relating to all the inter-State, inter-district and inter-taluk transfers that have taken place during the decade 1951–61 (i.e., after the 1951 Census till 1961 Census) was first collected. The population of the transferred territories according to the 1951 Census was then obtained from the concerned 1951 Census Reports. Where the entire districts were transferred from one State to another, the figures were taken from the State Tables of the State concerned. Where units smaller than the districts were transferred, i.e., when a taluk or Census tract adopted for the 1951 Census was transferred, the figures available in the District Census Hand Books of 1951 Census were taken. In cases, where units smaller than the districts, taluks or Census tracts, i.e., circles, firkas or villages were transferred, figures down to village level published in the Primary Census Abstract in the District Census Hand Books were taken. The sex break-up of the population was also collected from the same source. The population of the transferred areas according to the 1951 Census so obtained was subtracted from the 1951 Census population of the taluk or district from which the area was transferred and added to the 1951 Census population of the taluk or district to which the area was tagged on and thus the 1951 adjusted population of each taluk, district or State to conform to the present jurisdiction was obtained. The adjustment of the population for the Censuses earlier to 1951 was then taken up. In adjusting the figures for the Censuses earlier to 1951, i.e., for the 1941 Census and further back to 1901 Census there was some difficulty as village statistics were not readily available for all the districts and for all the Censuses. The same procedure adopted for adjusting the 1951 Census figures could not therefore, be wholly adopted for the adjustment of population for Censuses earlier to 1951. The population of the areas transferred for the earlier Censuses was collected as far as practicable from the concerned State Reports and the village statistics wherever available. Wherever the village statistics were not available, the population of the transferred areas for the Censuses prior to 1951 had to be obtained only by estimation. Assuming that the proportion of the population in the area transferred to the total

population of the district (taluk, etc.) in which it was situated at the time of the transfer was the same in the particular previous Census as it was in 1951, the population of an area transferred for any particular Census prior to 1951 was estimated by the following formula.

[Population according to the earlier Census, i.e., at 1941 (1931 etc.) of the district (taluk etc.), in which the area transferred was situated at the time of transfer]	X	(Population according to 1951 Census of the transferred area)
		[Population of the District (taluk etc.) according to 1951 Census in which the transferred area was situated at the time of transfer]

The sex break-up of the population so estimated for a previous Census was then worked out on the basis of the male/female distribution of population in that particular previous Census of the District (Taluk etc.) in which it was situated at the time of transfer. The population of the transferred area so estimated for the earlier Censuses was subtracted from the population of the concerned earlier Census given in the Table A-II of the 1951 Census of the District concerned from which the area was transferred and it was added to the population of the District (Taluk etc.) to which the area was tagged on. After adjusting the population of all the districts the population of the State was also similarly adjusted.

2.2. It may have to be noted in this connection that the totals of population of all the districts of Andhra Pradesh for 1901, 1911, 1921 and 1931 given in Table A-II do not tally with the total population of the State and the difference between the figures given for the State total and the totals of all the districts vary slightly, i.e., –21,599 for 1901 ; –70,744 for 1911 ; +16,456 for 1921 and +8,240 for 1931. This difference existed in the Table A-II given in the 1951 Census Report Part II-A of the Hyderabad State and it is due to an error that had occurred in the recasting of the Table A-II at 1941, when the population data of Medak and Nizamabad Districts were recast in accordance with certain inter-district transfers that had taken place between Medak and Nizamabad Districts of the erstwhile Hyderabad State during the decade 1931 to 1941.

3. Appendix to Table A-II :

3.1. The Appendix to Table A-II gives for the State and for each District in the State the area in sq. miles/sq. kms., for 1961 and 1951, the population in 1961, the population in 1951 according to jurisdiction prevailing in 1951, the population in 1951 adjusted to the jurisdiction of 1961 and then the variation by ~~set~~ increase or decrease.

3.2. The details of transfer of areas in each case with names, area in sq. miles of the territory transferred, with dates of notification are given in a foot-note to the Appendix.

3.3. The changes in population due to territorial changes is depicted in this Appendix. The large variations in some districts as East Godavari, Chittoor, Anantapur, Kurnool, Mahbubnagar,

Hyderabad, Karimnagar, Warangal, Khammam and Nalgonda occurred as a result of transfers of areas on the Re-organisation of some districts, e.g., the formation of new district of Khammam which affected the area of Warangal and Nalgonda or on the eve of the Re-organisation of States, when several territorial adjustments had to be made in the border district such as Chittoor, Kurnool, Mahbubnagar, Anantapur, etc., as also due to some intra-State transfers between district and district, such as, the transfer of two taluks from East Godavari to Khammam, expansion of Hyderabad District by acquisition from neighbouring districts,

etc. The full details of the areas affected are indicated in the list of inter-district transfers given as a foot-note to this Appendix.

4. Percentage of variation of population 1901-1961 :

4.1. The statement below gives percentage of variation of population from 1901 to 1961 for the State as a whole as well as for each district. The percentage of increase for each decade had been worked out correcting the population to the 1961 jurisdiction.

Note.—Districts newly constituted after 1951 Census are shown in italics.

5. Glaring changes in population :

5.1. Except for the decade ending 1921 when the great Influenza epidemic affected the population growth adversely, there has been a fairly rapid increase of population over the decades. In the last 60 years the State's population has almost doubled itself (88.73% increase). But for the check of 1921, it would have certainly crossed the 100% mark. It would be observed that during 1901-1911 there were large increases in population of Telangana districts. The reasons as given in the Census Report of 1911 are as follows :—

"It is probable that the enumeration at the present Census was somewhat more accurate than at previous ones. In the last Census Report of India, it was suggested that, in the case of Elgandal (the present Karimnagar) District the recorded decrease was not sufficiently accounted for by the reason advanced namely, a decrease of 4 square miles in area. The case of Elgandal was perhaps not exceptional in this respect, or it may be that there were other reasons not mentioned in the Hyderabad Census Report, to account for the deficiency. In any case, there is no means of ascertaining what proportion of the increased population should be assigned to improvement in enumeration and what to other causes. It will be seen, however, in the sequel, that there is no need and no room for the introduction of reasons which lie outside the statistics to account for the increase. The increase is a real increase."

The then Hyderabad State as a whole registered an increase of 20%. The progress in the decades ending 1931 and 1941 are respectively 12.99% and 12.75% being considered "extremely normal", but the next two decades are definitely periods of accelerated growth. Because of the massiveness of the State's population even a moderate percentage increase of 1.40% and 1.57% per year during the decades, ending 1951 and 1961 respectively meant a large absolute decennial increase in population of over 3.8 millions in 1951 and 4.9 millions in 1961. The post war period, with the increased amenities of life, improvement in Public Health and fall in death rate, seems to have been marked by a spurt

of increase in population. The 1921 "debacle", was of course the result of the great wave of Influenza of 1918 that spread all over the country. The worst affected areas were the Deccan Plateau districts i.e., the three districts of Rayalaseema, viz., Cuddapah, Anantapur and Kurnool and all the Telangana districts (except Adilabad and Khammam). It was recorded in the 1921 Census Report of Hyderabad State, that besides Influenza, Cholera and Plague denuded this decade of its population in the Telangana districts. During that decade, the deltaic districts of West Godavari, Krishna, Guntur and Nellore showed better resistance to the epidemic and consequently were not so heavily affected and they managed to show slight increase ranging from 4.34% to 6.92%.

5.2. After 1921, the districts have not exhibited any uniform pattern of growth in their recuperance. There was a gradual decline in the rate of growth of population in Mahbubnagar District from 18.84% in 1931 to 9.92% in 1961. The rate of increase of population in the following districts during the decade 1951-61 was higher than that recorded in the previous decade : Srikakulam, West Godavari, Guntur, Nellore, Chittoor, Cuddapah, Anantapur, Kurnool, Nizamabad, Adilabad, Khammam and Nalgonda. The rate of growth during the present decade fell short of the rate recorded in the previous decade (1941-51) in the following districts : Visakhapatnam, East Godavari, Krishna, Mahbubnagar, Hyderabad, Medak, Karimnagar and Warangal. The most peculiar situation is witnessed in Hyderabad District where, after showing a small increase of 5.63% in 1931, the population growth shot up to a meteoric rate of 37.81% and 33.64% in 1941 and 1951 decades and again a sudden fall to 13.24% in 1961. The population of Hyderabad District as such is greatly affected by the changes in population of Hyderabad City which accounts for more than 50% of the total population of the

district. With the control of floods of the Musi River and improved water supply to the City by the construction of the Osman-sagar and the allied reservoirs and the betterment of the communications, improved health conditions in the City and the establishment of new industries, the City saw a very rapid increase in the population from 1931. During the war days the City of Hyderabad certainly attracted a large population, both military and civil. During 1951, when the rural areas of certain districts of Hyderabad were badly affected by disturbed Law and Order conditions, Hyderabad City afforded shelter to a lot of population from the mofussil who thronged to the City for security. From 1931 onwards a conscious effort seems to have been made to attract the population and capital to the City and improve its trade and commerce. While the rate of growth of population of Hyderabad District during the decade 1921-31 was only 5.63%, it shot up to 37.81% during the next decade 1931-41; and in 1941-51 the rate of growth 33.64% though lower than that of the previous decade, was still very high. But in 1951-61 the rate of growth came down to the more normal figure of 13.24%. This decade saw the trifurcation of the State and the consequent dispersal of population. Though the formation of Andhra Pradesh brought in fresh people to the City from other parts of the State, the improved conditions in rural areas of the outlying districts took back the population who had flocked to the City in 1951 for security reasons. During the present decade there was no establishment of new industry of any considerable size or expansion of old industries as to have attracted many new migrants. Thus the net rate of growth of population of the Hyderabad City and the district during the decade 1951-61 fell from the dizzy heights of the previous two decades. The reorganised State of Andhra Pradesh having settled down, with the proposed rapid industrialisation of the area in the near future, the accelerated housing schemes now in execution and expansion of educational facilities, etc., it is hoped that the capital City and its environs will once again draw more people in the coming decades.

5.3. Khammam District with an increase of 30.88% in its population has recorded the highest rate of growth in the decade 1951-61 followed by Nalgonda and Nizamabad Districts each with an increase of 22.36%. It must be remembered that in 1951 the conditions in Khammam District were disturbed and the Census was taken under very difficult circumstances. There might have been a few who escaped enumeration and besides there must have been a large exodus to the more secure Urban areas in the neighbouring districts or possibly to Hyderabad City itself. Subsequently, as conditions returned to normalcy the population must have found its way back to the district. The

rapidly developing coal mining centre of Kothagudem should also have contributed to the large increase of population in the district. The chief factor contributing to the big growth of population in Nalgonda district is obviously the starting of the mammoth Nagarjunasagar project and the springing up of the Vijayapuri township at the Dam site which has itself contributed a population of 55,300 to the district. The labour camps at the canal excavation sites also should have contributed considerable additional population to the district. The increase in Nizamabad is understandable with the fast developing wet cultivation under the Nizamasagar canals, which has drawn considerable number of immigrants from amongst the experienced cultivating families of the delta districts of the State.

5.4. During the decade 1951-61, the districts which show an increase in population far below the State's average of 15.65% are :

Mahbubnagar	9.92%
Srikakulam	10.26%
Visakhapatnam	10.52%
Medak	10.60%

The reasons for the low rate of growth of population in these districts are not easily discernible. These districts may be contributing a large number, to the emigrant labour. It is of interest, as seen from Statement 1 above, that these districts, except perhaps Visakhapatnam District to some extent, have not shown signs of any rapid population growth in the previous decades as well.

5.5. Considering the State as a whole, the increase of 88.73% in 60 years may look abnormal but it accords with the All India pattern, as the country's population itself has increased by 85.69% during the same period.

5.6. The following ten districts in descending order have shown over 100% increase during the 60 years from the dawn of the present century, Khammam leading with 178.20% and Hyderabad standing second with 145.88%: [Khammam (178.20%), Hyderabad (145.88%), Krishna (141.21%), Warangal (136.41%), Adilabad (121.77%), Medak (120.71%), West Godavari (115.21%), Karimnagar (112.96%), Nalgonda (102.93%) and Guntur (101.04%)]

5.7. The district of Srikakulam has registered the lowest increase of only 46.42%.

6. Sex ratio—changes from 1901-1961:

6.1. The statement below gives the changes in the proportion of the sexes from 1901 to 1961 for the State as well as the districts.

	1951	776,087	...	...	410,178	365,909

Names of Districts formed after 1951 Census are printed in italics.

The totals of population of all the districts of Andhra Pradesh for 1901, 1911, 1921, and 1931 Censuses do not tally with the total population of the State. The difference between the figures given for the State total and the totals of all the districts is -21,599 for 1901, -70,744 for 1911, +16,456 for 1921 and +8,240 for 1931. This difference is due to an error that has occurred in the Table A-II of 1941, when the population data of Medak and Nizamabad Districts were recast in 1941 in accordance with certain inter-district transfers that had taken place between Medak and Nizamabad Districts of the erstwhile Hyderabad State during the decade 1931-41.

APPENDIX TO TABLE A-II

Statement showing 1951 Population according to their Territorial Jurisdiction in 1951, changes in Area and Population involved in those changes

THE STATE OF ANDHRA WAS CREATED ON 1 OCTOBER 1953 VIDE ANDHRA STATE ACT, 1953 FROM MADRAS STATE AND EXPANDED INTO ANDHRA PRADESH STATE BY THE ADDITION OF THE TELANGANA AREA OF FORMER HYDERABAD STATE ON 1 NOVEMBER 1956 VIDE THE STATES REORGANISATION ACT 1956

State/District	Area in 1961		1961 Population	Area in 1951		1951 Population according to jurisdiction prevailing in 1951	Population in 1951 adjusted to jurisdiction of 1961	Net increase or decrease between Cols. 7 & 8

* Cols 5 to 9 do not reflect changes in regard to the State as such, between 1951 and 1961 because the State did not exist as a separate unit in 1951. These entries against the State depict only the changes in the districts that constituted the State in 1961.

@ Though the district has not shown decrease in population since 1951 there is a decrease in its area due to computational error.

APPENDIX TO TABLE A-II—Contd.

Statement showing 1951 Population according to their Territorial Jurisdiction in 1951, changes in Area and Population involved in those changes

State/District	Area in 1961		1961 Population	Area in 1951		1951 Population according to jurisdiction prevailing in 1951	Population in 1951 adjusted to jurisdiction of 1961	Net increase or decrease between Cols. 7 & 8

Nalgonda (q)	5,491.6	14,223.4	1,574,946	6,252.2 (+ 760.6)	16,193.2 (+ 1,969.8)	1,543,975 (+ 256,806)	1,287,169	(-) 256,806

- (a) Bhadrachalam Taluk with an area 911.0 sq. miles and Nugur Independent Sub-Taluk with an area 593.0 sq. miles have been transferred from this district to newly constituted Khammam District vide G. O. Ms. No. 2384, Revenue, dated 17-11-1959.
- (b) (i) 23 villages with an area 107.8 sq. miles of Munagala Paraganah of Nandigama Taluk have been transferred to Huzurnagar Taluk of Nalgonda District vide G.O. Ms. No. 907, Revenue, dated 11-5-1959.
(ii) Gajullanka village with an area 2.5 sq. miles and Potharlanka village with an area 8.3 sq. miles of Divi Taluk were transferred to Tenali and Repalle Taluks of Guntur District respectively vide G. O. Ms. No. 1407, Revenue, dated 14-7-1959 and G. O. Ms. No. 2010, Revenue, dated 29-9-1959.
- (c) In addition to changes enumerated against symbol (b) (ii) above, the following more changes took place :—
(i) Kotikalapudi village with an area 3.3 sq. miles of Darsi Taluk of Nellore District merged in Ongole Taluk of this District vide G. O. Ms. No. 2388, Revenue, dated 31-10-1955.
(ii) 3 villages with an area 3.2 sq. miles of Ongole Taluk were transferred to Darsi Taluk of Nellore District vide G. O. Ms. No. 751, Revenue, dated 22-4-1959.
(iii) A small forest area of 1.985 sq. miles of Palnad Taluk was transferred to Miryalguda Taluk of Nalgonda District vide G. O. Ms. No. 606, Revenue, dated 2-4-1959.
- (d) Changes are as enumerated against symbol (c) (i) and (c) (ii).
- (e) (i) 3 villages with an area 0.2 sq. miles of Krishnagiri Taluk of Salem District of Madras State merged in newly constituted Kuppam Independent Sub-Taluk of this district.
(ii) 76 villages with an area 110.3 sq. miles of Tiruvallur Taluk of Chingleput District of Madras State merged in newly constituted Satyavedu Taluk of this district.
(iii) 72 villages with an area 110.9 sq. miles of Ponneri Taluk of Chingleput District of Madras State merged in newly constituted Satyavedu Taluk of this district.
(iv) 21 villages with an area 29.1 sq. miles and 8 villages with an area 17.1 sq. miles of Chittoor Taluk were transferred to Walajahpet and Gudiyattam Taluks of North Arcot District of Madras State respectively.
(v) 282 villages, 2 towns and some part of village Vyasapuram with a total area 355.7 sq. miles of former Tiruttani Taluk transferred to Chingleput District of Madras State.
(vi) 3 villages with an area 7.8 sq. miles of former Tiruttani Taluk have been merged in Arkonam Taluk of North Arcot District of Madras State.
(vii) Gopalakrishnapuram village with an area 0.3 sq. miles of Puttur Taluk transferred to Chingleput District of Madras State.
(viii) A small forest area (area not available) of Palmaner Taluk transferred to Tirupattur Taluk of North Arcot District of Madras State.
- All the above changes (i) to (viii) in the district boundaries were made on 1 April 1960 under Pataskar's Award [Andhra Pradesh and Madras (Alteration of Boundaries) Act, 1959.]
- (f) 2 villages with an area 6.5 sq. miles of Allagadda (Sirvel) Taluk of Kurnool District to Proddatur Taluk of this district vide G. O. Ms. No. 2114, Revenue, 11-8-1951.
- (g) Rayadurg Taluk with an area 682.0 sq. miles of Bellary District of Madras State transferred to this district under Andhra State Act, 1953.
- (h) In addition to changes shown against symbol (f) Alur Taluk with an area 613.0 sq. miles and Adoni Taluk with an area 766.0 sq. miles of Bellary District of Madras State were transferred to this district under Andhra State Act, 1953.
- (i) (i) Alampur Taluk with an area 435.2 sq. miles and Gadwal Taluk with an area 517.8 sq. miles of Raichur District and Kodangal Taluk with an area 460.8 sq. miles of Gulbarga District of former Hyderabad State were merged in this district under the States Reorganisation Act, 1956.
(ii) 9 villages with an area 28.6 sq. miles of Chevella (Shahabad) Taluk of Hyderabad District merged in Shadnagar Taluk of this district vide G. O. Ms. No. 2727 Revenue, dated 30-12-1959.
(iii) Pargi Taluk with an area 389.8 sq. miles transferred from this district to Hyderabad District vide Notification No. 55, dated 25-9-1956.
(iv) Madnapur village with an area 2.0 sq. miles of Katvakurthi Taluk transferred to Devarakonda Taluk of Nalgonda District vide G. O. Ms. No. 1501, Revenue, dated 12-8-1958.

(7)

APPENDIX TO TABLE A-II *Concl'd.*

Statement showing 1951 Population according to their Territorial Jurisdiction in 1951, changes in Area and Population involved in those changes

- (j) In addition to the changes enumerated against foot-notes (i) (ii) and (i) (iii) above, the following more changes took place :-
- (i) Tandur Taluk with an area 371.2 sq. miles of Gulbarga District of former Hyderabad State merged in this district under States Reorganisation Act, 1956.
 - (ii) Vicarabad Taluk with an area 505.6 sq. miles of Medak District transferred to this district *vide* Notification No. 55, dated 25-9-1956.
 - (iii) 11 villages with an area 38.7 sq. miles of Sangareddy Taluk of Medak District transferred to Chevella (Shahabad) Taluk of this district *vide* G. O. Ms. No. 1397, Revenue, dated 24-7-1958.
 - (iv) Hafeezpuram village (uninhabited) of which area is not available of Ramannapet Taluk of Nalgonda District transferred to Ibrahimpatnam Taluk of this district *vide* G. O. Ms. No. 1392, Revenue, dated 24-7-1958.
- (k) In addition to changes enumerated against symbol (j) (ii) and (j) (iii), the following more changes took place :-
- (i) Nyalkal Circle of Bidar Taluk, Zahirabad Taluk except Nirma Circle and Narayankhed Taluk with a total area 782.4 sq. miles of Bidar District of former Hyderabad State transferred to this district under States Reorganisation Act, 1956.
 - (ii) Theegalanarasapuram village with an area 4.4 sq. miles transferred from Jangaon Taluk of Warangal District (formerly of Nalgonda District) to Gajwel Taluk of this district in the year 1954 *vide* Notification No. 48/A4/158/53, dated 26-7-1954.
 - (iii) Sawargaon village with an area 1.3 sq. miles transferred from Narayankhed Taluk of Medak District (formerly of Bidar District) to newly constituted Madnur Independent Sub-Taluk (formerly part of Banswada Taluk) of Nizamabad District *vide* G. O. Ms. No. 1541, Revenue, dated 19-8-1958.
- (l) In addition to changes given against symbol (k) (iii) the following change also took place :-
- Jukkai and Bichkonda circles with an area 230.8 sq. miles of Deglur Taluk of Nanded District of former Hyderabad State transferred to this district under States Reorganisation Act, 1956 and constituted into Madnur Independent Sub-Taluk *vide* G. O. Ms. No. 1589, Revenue, dated 25-8-1958.
- (m) (i) Mudhol, Bhainsa and Kuber Circles with a total area of 402.8 sq. miles of Mudhol Taluk of Nanded District of former Hyderabad State transferred to this district under States Reorganisation Act, 1956.
- (ii) Kinwat and Rajura Taluks and Islapur Circle of Boath Taluk with an area 608.6 sq. miles, 776.3 sq. miles and 193.3 sq. miles respectively transferred from this district to Chanda and Nanded Districts of former Bombay State (now in Maharashtra State) under States Reorganisation Act, 1956.
- (n) Parkal Taluk with an area 556.2 sq. miles transferred from this district to Warangal District *vide* Notification No. 48/A4/193/52, dated 18-9-1953.
- (o) In addition to the changes enumerated against symbols (n) and (k) (ii), the following more changes took place :-
- (i) Jangaon Taluk with an area 872.3 sq. miles transferred from Nalgonda District to this district *vide* Notification No. 48/A4/193/52, dated 18-9-1953.
 - (ii) Yellandu, Madhira, Bhoorgampadu, Palvanha and Khammam Taluks with an area 754.9 sq. miles, 771.8 sq. miles, 569.0 sq. miles, 1,295.4 sq. miles and 591.4 sq. miles respectively have been transferred from this district to newly constituted Khammam District *vide* Notification No. 48/A4/193/52, dated 18-9-1953.
 - (iii) Sirvole and Kamepalle villages with an area 12.4 sq. miles of Khammam Taluk of Khammam District transferred to Mallulabad Taluk of this district *vide* Notification No. 42/A4/239/53, dated 18-9-1953.
- (p) This District was newly formed in 1953. The details are as given against symbols (a), (o) (ii) and (o) (iii).
- (q) The changes took place since 1951 as enumerated against symbols (b) (i), (c) (iii), (i) (iv), (j) (iv) and (o) (i).

NOTE : 1. The figures given in brackets in columns 5 and 6 represent the difference in area between 1951 and 1961 and the figures in brackets in column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

2. The difference of area in 1951-61 given under columns 5 and 6 of this Appendix does not agree with the area given in columns 9 and 10 of Appendix to Table A-I on account of revised computation.

3. The actual change in area as given against symbol in the footnotes in the district boundaries due to jurisdictional change does not agree with the net increase or decrease in the area figures given under columns 5 and 6 in brackets against each district. The difference is perhaps due to computational error.

TABLE A-III

VILLAGES CLASSIFIED BY POPULATION

TABLE A-III
VILLAGES CLASSIFIED BY POPULATION

- 1. Introduction :**

1.1. Table A-III gives the total number of inhabited villages classified by various population sizes of (i) less than 200, (ii) 200-499, (iii) 500-999, (iv) 1,000-1,999, (v) 2,000-4,999, (vi) 5,000-9,999 and (vii) 10,000 and above indicating therein the total rural population by persons, males and females for the whole State, as well as for each district.
- Revenue village with a definite name and boundaries which may contain the main village together with its hamlets.
- 3. Percentage of rural population living in villages of various population sizes:**

3.1. The statement below gives the percentage of population living in villages of various population sizes with reference to the total rural population of the State as well as each district as per the 1961 Census.
- 2. Village-- Definition :**

“ Village ” has been defined in detail in the fly leaf to Table A-I. To state briefly, the village for the purpose of Census is the

STATEMENT 1

STATEMENT OF PERCENTAGE OF POPULATION LIVING IN VILLAGES OF VARIOUS POPULATION SIZES WITH REFERENCE TO THE TOTAL RURAL POPULATION IN EACH DISTRICT IN 1961

State/District	Percentage of rural population living in villages of population size						
	Less than 200 (diminutive)	200-499 (very small)	500-999 (small)	1,000-1,999 (medium)	2,000-4,999 (large)	5,000-9,999 (very large)	10,000+ (special)
1	2	3	4	5	6	7	8
ANDHRA PRADESH .	1.75	5.62	14.33	28.90	38.45	9.81	1.14
Srikakulam .	4.65	13.23	23.70	30.81	24.58	3.03	...

Khammam .	3.52	9.09	15.88	30.21	31.71	9.59	...
Nalgonda .	0.44	4.15	17.36	35.91	38.17	3.97	...

4. Comments on Statement 1 above :

4.1. All the villages of the State have been broadly grouped into seven categories according to population sizes as indicated in the statement. For purpose of easy reference it appears convenient to give a suitable nomenclature for each of these categories of villages as indicated below :

1	Less than 200 population	Diminutive village
2	200 - 499	Very small village
3	500 - 999	Small village
4	1,000 - 1,999	Medium village
5	2,000 - 4,999	Large village
6	5,000 - 9,999	Very large village
7	10,000 +	Special village

Statement 1 above would reveal that 28.90% and 38.45% of the State's rural population, i.e., altogether just over two-thirds, live in medium and large villages, the latter category containing the largest proportion of the rural population, viz., 38.45%. Thus the gregariousness of the rural population in this State has a pronounced bias towards the medium and large sized villages.

4.2. The diminutive villages, i.e., with a population of less than 200 are 5,879 in number out of 27,084 inhabited villages of the State, and they are mostly distributed in the Agency tracts of Srikakulam, Visakhapatnam, East Godavari, West Godavari, and Khammam Districts inhabited to a large extent by the hill tribes of these districts and in the forest and hill tracts of Adilabad District which has also considerable tribal population. Though in total number of villages, the villages of diminutive size constitute as many as 21.71% of the total number of villages in the State, they account for only 1.75% of the State's rural population. But it should, however, be borne in mind that a single large village will be 25 times or even more times larger than this type of village. Because of the fact that these diminutive villages are widely dispersed in the Agency areas and located close to the very limited patches of land developed for agriculture, there is little possibility of these villages growing very much bigger and the development of this type of village is slow and presents greater difficulties. More often than not, these villages are also shifted easily. It will be observed that this category of villages tend to disappear in the well developed areas. For example, in Guntur District their total number is only 14, in Krishna 42 and in the plains areas of West Godavari and East Godavari Districts only 36 and 48 respectively. Visakhapatnam because of its large extent of tribal area has the largest number of 2,199; followed by Srikakulam with 1,003 villages.

4.3. The next higher category, viz., very small villages of population size 200-499, number in all 4,917 and they account for 5.62% of the State's rural population. They are to be found in considerable numbers in Srikakulam (856), Adilabad (478), Nellore (380) and Mahbubnagar (314) districts. As these are to be found generally adjoining the forest areas and the hilly tracts, they are naturally not many in the plains and delta areas. Guntur has the least number of this category of villages with only 42 containing only 0.65% of the rural population of the district.

4.4. The next higher category, viz., small villages, i.e., of population size 500-999 account for 14.33% of the rural population of the State, and the total number of villages falling in this category is 5,834. They are found in considerable number in Srikakulam

(709), Mahbubnagar (516), Medak (440), Nellore (407), Adilabad (358), Visakhapatnam (350) and Nalgonda (332) districts. In terms of percentage of population to the district rural population, Adilabad, Medak, Mahbubnagar, Hyderabad and Srikakulam arrange themselves in descending order of percentages ranging from 29.36% to 23.70%.

4.5. As already indicated, the category of medium villages with a population size 1,000-1,999 account for 28.90% the State's rural population, comprising of 6,050 villages, the highest number of any group in the State. Barring the deltaic districts of West Godavari, East Godavari, Krishna and Guntur which show a preference for larger villages and tribal tracts of Adilabad and Khammam Districts which show a bias for smaller villages, in so far as the numbers of villages is concerned, though not in the proportion of the rural population contained, villages of medium size appear to be in largest number in almost all other districts of the State and account for large percentage of rural population ranging from 27.83% in Cuddapah District to 37.58% the highest, in Medak District. The medium size village with a population size of 1,000-1,999 may be taken as representing a typical village of the dry tracts of the State. In the districts of Mahbubnagar, Hyderabad, Medak, Nizamabad and Adilabad, the largest proportion of rural population of these districts live in villages of this category. In most other districts this category comes next only to the "large size villages" in the proportion of rural population contained. In the well developed areas of East Godavari, West Godavari and Guntur Districts this category occupies only the third place.

4.6. The large villages of population size 2,000-4,999, though numbering only 3,918 in the State, account for the largest percentage of the rural population of the State 38.45%. They are heaviest both in absolute number (418), and percentage of rural population contained (54.03%) in Guntur District. In the deltaic districts and also in the Rayalaseema districts and in Karimnagar, Warangal, Khammam and Nalgonda among Telangana districts this category accounts for the largest proportion of rural population. It contains the lowest percentage of population in Adilabad, viz., 12.33%.

4.7. The next category with a population size of 5,000-9,999 which we have termed "very large village" number only 458 for the State and account only for 9.81% of the rural population. In this category, it is the deltaic districts that show high percentage of rural population ranging from 15.56% in Krishna to the highest of 24.06% in East Godavari.

4.8. The "Special" category of villages having a population of 10,000 and more are only 28 in number in the entire State, and account for a very small percentage of 1.14% of the rural population. East Godavari with 9 and West Godavari with 7 of this category account for the largest proportion of these villages in the State. In the districts of Srikakulam, Anantapur, Kurnool, Mahbubnagar, Hyderabad, Medak, Nizamabad, Adilabad, Warangal, Khammam, and Nalgonda there is not even a single village of this category. It has already been pointed out elsewhere, how in view of the highly developed agriculture in the deltas and the high cost of land the people are prone to congregate more and more around a central village site which soon grows into a thickly populated village. These special villages are the potential towns which may soon be developing into urban areas with civic bodies being constituted. Even at present these are constituted into large Panchayats but are predominantly agricultural in the composition of their population and hence considered rural.

4.9. Generally speaking, in terms of percentages of rural population housed, the deltaic districts favour the medium, large and very large villages while Rayalaseema favours the small, the medium and the large villages, and the Telangana districts, while incorporating the small, medium and large villages, show more inclination towards the medium villages and show considerable fall when it comes to large villages. The better developed rural areas of the districts show a propensity for a steep rise from small to the very large villages.

4.10. Statement 2 to follow gives at a glance the break up of the inhabited villages classified by population into four broad groups, viz., less than 499; 500 - 1,999; 2,000 - 4,999; 5,000; and above.

5. Comparative picture of percentages of number of villages and population by class of village at 1951 and 1961:

5.1. Statement 3 to follow gives a comparative picture of the percentages of the number of villages of different population sizes to the total number of villages in 1951 and 1961, as also the relative percentages of population to total population contributed by each group of villages in 1951 and 1961 which would reveal the general trend of the growth of villages of different classes in the decade.

6. An analysis of Statement 3 :

6.1. Maintaining the nomenclature we gave for the various classes of villages already, it will be observed that for the purpose of the statement above, the percentages have been grouped together for the "diminutive" and the "very small" villages under the common class "less than 500". We could still call this class very small villages.

6.2. Taking the State as a whole, it would be interesting to note that in both percentage of the number of villages in the class to the total number of villages, as well as in percentage of population in the class to the total population, there has been a significant, if slight, decrease from 1951 to 1961 in the "very small" (less than 500) and "small villages" (500 to 999). In the very small villages 1.58% less of rural population, lived in 2.88% less number of villages during 1961 than in 1951. Similarly in the small villages, 2.16% less of population lived in 0.66% less in the number of villages in 1951 than in 1961. Though the percentages are small, the trends are evident. The very small and small villages seem to be gradually loosening their hold on the rural folk. In the medium villages (1,000 to 1,999), though there is an imperceptible increase of 0.77% in the number, there is a small decrease of 2.37% in population by 1961, indicating that the decreasing trends of population in smaller villages extend to this class of villages also. Thereafter there are positive gains in percentages both in number of villages, and the living population in the "large" (2,000 to 4,999), "very large", (5,000 to 9,999) and "special" (10,000 +) villages. In the large villages, 1.71% more of population lived during 1961 in 2.01% more in number of villages than in 1951. So also in the very large and special villages, 3.46% and 0.94% respectively more of population lived in 0.68% and 0.08% more in number of villages during 1961 than 10 years ago. Though the overall percentages of villages as also the percentage of the population contained in the

larger villages to the total population may be small, it may be seen from Statement 3 that the very large villages of 5,000-9,999 population size and the special villages of 10,000 + population size have recorded an increase of over 1½ times and 5 times respectively from the 1951 to 1961. One of the reasons for the very sharp rise in these groups may be the declassification of a number of urban units of 1951 as rural in 1961. Even otherwise, the above table clearly reveals a tendency for the larger and larger concentration of population in the bigger villages.

6.3. Coming down to the districts, the pattern of decrease of percentages is evident from 1951 to 1961 in all "very small" villages for almost all the districts of the State except Visakhapatnam. The increase in the proportion of the very small villages and their population in Visakhapatnam District may be due to better coverage of the Agency areas by special enumerators in 1961. In Warangal District also the percentage of a number of very small villages has shown an increase in 1961 though the percentage of population contributed by this group of villages has recorded a fall in keeping with general trend in the State.

6.4. While there has been decrease in percentages of number of villages as well as population contributed by the "small" villages in all the districts, there has been a somewhat partial opposite tilt in the percentages pertaining to the number of villages in the case of Srikakulam, Nellore, Cuddapah, Mahbubnagar, Medak, Nizamabad and Adilabad Districts.

6.5. In the case of "medium" villages, the pattern of decrease in the percentage of number and population is noticed from 1951-1961 in the deltaic districts of East Godavari, West Godavari, Krishna and Guntur and also Visakhapatnam, Kurnool and Warangal Districts. In the districts of Cuddapah, Anantapur, Chittoor, Nellore, Mahbubnagar, Nizamabad, Karimnagar, Khammam and Nalgonda Districts, while the percentage in the number of villages is slightly on the increase in 1961, the percentage of population contributed by this group of villages decreases from 1951 to 1961. The districts of Srikakulam and Hyderabad show increase in the percentage of numbers of villages as well as the population covered by medium villages in the decade.

6.6. There are throughout gains in 1961 in the percentages of increase in number of villages as well as the population covered by the "large" villages in all districts of the State except East Godavari and West Godavari, where there are decreases in the percentages of population contributed by this class of villages.

6.7. In the "very large" and "special" villages there have been wholesale gains in the percentages of the number of villages as well as population contributed in all the districts of the State from 1951 to 1961 wherever these classes of villages are present.

6.8. These patterns of increases and decreases can be both due to a natural increase in population in that class of villages as also due to inter-rural migration. This table clearly reveals a tendency for the larger units to develop faster exerting a greater pull on the population leading to a gradual decline of the smaller units.

STATE
VILLAGES CLASSIFIED BY

State/Division	No. of inhabited villages	Total Rural Population			No.	Population	
		Persons	Males	Females		Population	
						Males	Females

TABLE A-IV

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961
WITH VARIATION SINCE 1901

3. Classification of Cities and Towns into Six Groups :

3.1. The towns are divided into the following six classes :—

Class	Limits of Population
I	100,000 and over
II	50,000 to 99,999
III	20,000 to 49,999
IV	10,000 to 19,999
V	5,000 to 9,999
VI	Less than 5,000

Class I towns with a population of over 100,000 are also termed as Cities.

3.2. In Table A-IV all the cities, towns and town-groups have been presented in the order of the above six classes and the particulars of civic status, area, population and variation in population from Census to Census of each town from 1901 are given.

3.3. In the case of Malkapuram Panchayat and Mokhasa Mutyalampadu the area figures could not be given as they are not available.

3.4. While the civic status of all the towns has been indicated within brackets by abbreviations against each of the towns as (M.C. for Municipal Corporation ; M. for Municipality ; C.M. for City Municipality ; T.M. for Town Municipality ; P. for Panchayat), in the case of the following towns their civic status has not yet been statutorily determined and hence not given ;

- (1) Bellampalli of Asifabad Taluk, Adilabad District.
- (2) Kadam Damsite of Khanapur Independent Sub-Taluk, Adilabad District.
- (3) Kagaznagar of Sirpur Taluk, Adilabad District.
- (4) Vijayapuri of Miryalguda Taluk of Nalgonda District.
- (5) Kothagudem of Kothagudem Taluk of Khammam District.
- (6) Mokhasa Mutyalampadu of Vijayawada Taluk of Krishna District.

4. Town-Groups :

4.1. Hyderabad City is the only Town-Group recognised for the 1961 Census. If two or more Urban units adjacent to each other, form a compact Urban unit, this whole compact area with its constituent Urban units, is called a Town-Group. Since Hyderabad City is made up of different adjacent Urban units all forming one compact area of greater Hyderabad City, it has been taken as a Town-Group for this Census. The total population of the Town-Group along with the population of individual Urban units within the Town-Group is given in this Table under that class. For ready reference here, it may be stated that Hyderabad Town-Group consists of the following 12 individual constituent units :

- 1 Hyderabad Municipal Corporation (including strictly Military area)
 - (a) Hyderabad Division
 - (b) Secunderabad Division
- 2 Secunderabad Cantonment (including strictly Military area)
- 3 Macha Bolaram
- 4 Malkajgiri
- 5 Osmania University
- 6 Alwal
- 7 Zamistanpur
- 8 Kandikal
- 9 Bowenpalle
- 10 Lalaguda
- 11 Attapur
- 12 Fatehnagar

Hyderabad Town-Group falls mostly in Hyderabad West Taluk of the district. Of the constituent units of the Town-Group, Macha Bolaram falls in Medchal Taluk, Malkajgiri in Hyderabad East Taluk, and the rest in Hyderabad West Taluk. Since the Town-Group itself has been recognised as an independent unit, these constituent units are excluded from the taluks concerned in exhibiting the figures in the tables.

4.2. Hyderabad City alone in this State lies above the million mark in 1961 in respect of population and is the 5th largest City in India.

5. Changes in Classification of Towns 1901 to 1961 :

5.1. The following statement gives the changes in the classification of each City, Town-Group or Town from 1901 to 1961.

STATEMENT I
CHANGES IN CLASSIFICATION OF TOWNS 1901 TO 1961

Town/ Town-Group 1	Class of Town						
	1961	1951	1941	1931	1921	1911	1901

Note:—Towns treated as such for the first time in 1961 are printed in italics.

Towns treated as such for the first time in 1951 and continue as towns in 1961 are printed with asterisk (*) on the left side.

6. Number of towns of each Class from 1901 to 1961 :

6.1. The statement below gives the number of towns of each class during 1901-1961.

STATEMENT 2
NUMBER OF TOWNS OF EACH CLASS DURING 1901-1961

Class	Number of Towns						
	1961	1951	1941	1931	1921	1911	1901
Class I (Cities)	11	6	1	1	1	1	1
Class II	8	10	10	8	2	1	...
Class III	51	34	21	11	13	12	11
Class IV	71	82	55	57	46	45	44
Class V	70	116	121	78	76	70	60
Class VI	1	43	4	21	15	4	...
Total	212	291	212	176	153	133	116

Out of the 223 towns at 1961 twelve towns have been included under Hyderabad Town-Group which has been classified as one Class I town. Chadargat Municipality and Residency Bazar which though had separate entity had not been counted individually as towns during 1901-1941 as they were not independent Urban units but were treated as part of Hyderabad City. Similarly Secunderabad Municipality and Secunderabad Cantonment which, though were separate units, were treated as part of Hyderabad City and therefore were not counted as individual towns during 1931-1951 for the same reason.

6.2. It will at once be observed from this statement that there has been a noticeable decrease in the total number of towns during the 1961 Census from 1951. The decrease is a result of the changed definition of town adopted at the 1961 Census by which many areas of a pronounced Rural nature which had previously passed muster as towns were eliminated.

6.3. It can also be seen from this Table that there is a noticeable increase in Cities during 1961 to 11 from 6 in 1951. This is due to the promotion of the following 5 class II towns of 1951 to the status of Cities in 1961.

- 1 Kakinada
- 2 Eluru
- 3 Bandar (Masulipatnam)
- 4 Nellore ; and
- 5 Kurnool.

6.4. In the case of Class II towns, out of the 10 Class II towns of 1951 the 5 towns named above, got promoted as cities at 1961 and two Class III towns of 1951 were declared as Class II towns at 1961 and the new town of Vijayapuri sprang up as a Class II town thus accounting for 8 Class II towns for 1961. The net result was that there was a loss of two towns in Class II from the 1951 figure of 10.

6.5. In respect of Class III towns, however, the number went up to 51 at this Census as against 34 in 1951. The net gain of 17 was mostly by promotion of Class IV towns of 1951 to Class III in 1961. Only 1 new town, Malkapuram added as a town in 1961 fell under Class III.

6.6. In Class IV, there was a loss of 11 towns from 1951 to 1961, the number falling from 82 to 71. A good number of

towns (18) of that class of 1951 was promoted to Class III in 1961 and also a large number of towns (12) was declassified into rural at this Census. 2 Class IV towns of 1951 were demoted to Class V, 1 Class IV town was merged in Hyderabad Town-Group in 1961. Thus 33 towns included under this class at 1951 were eliminated. On the plus side 20 towns of Class V, 1 town of Class VI of 1951 were promoted to Class IV in 1961 and 1 new town, Nandigama, was recognised under this class at the present Census. Thus 22 were added to this class in 1961, resulting in a net fall of 11 towns under this class from the 1951 figure.

6.7. In Class V, there were altogether 70 towns in this Census as against 116 at 1951. The big fall is due to the elimination of as many as 35 towns under this class from the list of towns in 1961. 20 towns were promoted to Class IV, 2 towns were merged in Hyderabad Town-Group thus accounting for a deletion of 57 towns of this Class from 1951. As against this, 6 new towns were added under this class; 3 towns were promoted from Class VI; and 2 were demoted from Class IV to this class,

making a total addition of 11 towns to this class in 1961. The net deficit from the 1951 figure is 46.

6.8. All the 43 Class VI towns of 1951 disappeared from this class at the 1961 Census. 27 towns were declassified into rural at the 1961 Census. 1 town went up two places to Class IV and 3 towns were promoted to Class V. 12 towns were merged in Hyderabad Town-Group. Only one town added as a new town viz., Mokhasa Mutyalampadu was recognised as a Class VI town at the 1961 Census.

7. Percentage of Towns in each class to total number of Towns and percentage of Population in each class to total Urban Population:

7.1. The statement below gives the percentages of towns in each class to total number of towns and percentage of population in each class to total Urban population from 1901 to 1961.

STATEMENT 3

PERCENTAGE OF TOWNS IN EACH CLASS TO TOTAL NUMBER OF TOWNS AND PERCENTAGE OF POPULATION IN EACH CLASS TO TOTAL URBAN POPULATION FROM 1901 TO 1961

Class	1961		1951		1941		1931		1921		1911		1901	
	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population	Percentage of No. of towns	Percentage of population
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Class I	5.19	42.66	2.06	31.71	0.47	20.16	0.57	17.33	0.65	19.47	0.75	23.12	0.86	24.38
Class II	3.77	8.48	3.44	12.75	4.72	19.49	4.54	18.14	1.31	4.90	0.75	2.50	...	...
Class III	24.06	24.24	11.68	16.73	9.91	15.16	6.25	12.15	8.50	20.47	9.02	19.86	9.48	20.58
Class IV	33.49	15.82	28.18	20.54	25.94	20.82	32.39	28.77	30.07	27.99	33.83	29.23	37.93	31.41
Class V	33.02	8.74	39.86	15.63	57.07	23.91	44.32	20.59	49.67	25.47	52.64	24.58	51.73	23.63
Class VI	0.47	0.06	14.78	2.64	1.89	0.46	11.93	3.02	9.80	2.70	3.01	0.71	...	...

Note: The above Statement is based on the actual class under which each individual town fell at the concerned Censuses.

7.2. The statement would straightaway establish that cities with population of 100,000 and above are still dominating and account for 42.66% of the total Urban population. Though the total number of cities and also the total population in the cities has gone up considerably the net absolute increase of population in the cities in the present decade is smaller than what was recorded in the previous decade. While the variation in population in the cities from 1941 to 1951 was as high as 132.5%, an all time record, it was only 55.76% from 1951 to 1961. In 1951 the population in the cities accounted for 31.71% of the total Urban population. Class II towns contribute only a very low percentage of the total Urban population, the highest recorded was only at the 1941 Census being only 19.49%. This class of towns seems to represent a purely transitory stage in the development of towns in their rapid growth into cities. Some stabilisation of the Urban population is observed in the next lower categories of towns, viz., Class III and Class IV towns. Class III towns account for 24.24% of the Urban population at the 1961 Census. Class IV towns contribute 15.82% of the total Urban population at the present Census, though it was considerably higher at previous Censuses. The fall in the percentage of population under this class at the present Census may be due to the fairly heavy axing of the towns in this category from being recognised as urban units. Class V

and Class VI towns represent towns in a promotion stage quickly developing into larger towns. Hence the percentage of population contributed by these two classes of towns is smaller. Here again the considerably low proportion under these two classes of towns as compared to previous Censuses shows the heavy pruning that had to be done on the application of the new concept of an Urban unit at the 1961 Census. The above table illustrates the progressive increase of the large sized towns each decade and the interesting way the towns develop quickly from the initial stages to Class IV or Class III towns and after a period of consolidation at this stage, enter into a second phase of development into the final stage of cities, after a short sojourn as Class II towns.

8. Percentage of Towns in each class to total Urban area of the State and density of Population per Urban square mile in each class:

8.1. The statement below gives percentages of towns in each class to total urban area of the State and density of population per urban square mile in each class for 1961 and 1951.

STATEMENT 4
PERCENTAGES OF TOWNS IN EACH CLASS TO TOTAL URBAN AREA OF THE STATE AND DENSITY OF POPULATION PER URBAN SQUARE MILE IN EACH CLASS

Class	1961		1951	
	Percentage of area to total urban area	Density per sq. mile	Percentage of area to total urban area	Density per sq. mile
1	2	3	4	5
Class I	12.46	14,862	9.82	13,196
Class II	4.48	8,211	4.06	12,835
Class III	20.74	5,071	16.44	4,160
Class IV	34.49	1,990	35.45	2,368
Class V	27.83	1,363	32.84	1,943
Class VI	†	†	1.39	7,769

† There is only one Class VI town in 1961 and its area is not available. Hence particulars could not be furnished under cols. 2 and 3.

8.2. It is obvious from the above table that the largest congestion of population is felt in the cities. It is interesting how the density of population increases progressively with each higher class of town. This has to be expected because while the population of a town keeps increasing by fresh immigration and so on and the town gets promoted to a higher category, the area of the town itself does not alter much, if at all it alters. Hence the obvious increase in the density of population in towns from the lower to the higher category. As regards the percentage of total urban area, Class IV towns by virtue of their larger numbers seem to occupy the largest proportion (34.49%). Class VI for obvious reasons occupy the least percentage of area. The percentages of area occupied by the towns of different classes have a correlation to the percentage of number of towns in each class.

9. Appendix I to Table A-IV :

9.1. By the stricter application of the definition of town in the 1961 Census, 74 places treated as towns in 1951 had to be

omitted from the list of towns of 1961 Census. Had these 74 places, treated as towns in 1951 but declassified in 1961, not been so declassified in 1961 the urban population of the State would have been as follows :

(1) Total Urban population of 1961	...	6,274,508
(2) Population of 74 declassified towns of 1951 in 1961	...	580,302
Total	...	6,854,810

This means that the difference in urban definition in 1961 has declassified a population of 580,302 in 1961 to rural, in its process, of "elimination of many areas of a pronounced rural nature which had previously passed muster as towns."

9.2. Ten places have been treated as new towns in 1961 Census. The urban population of 1951 would have been as follows if these ten places treated as new towns in 1961 had been treated as towns in 1951 also and those 74 places treated as towns in 1951 but declassified in 1961, had been treated as declassified in 1951 itself.

(i) Total Urban Population in 1951	...	5,420,325
(ii) Pre-population of new towns of 1961 in 1951	...	(+)63,355
(iii) Pre-population of 74 declassified towns of 1961 in 1951	...	(-)496,544
Total	...	4,987,136

This again indicates that the concept of the 1961 urban definition, if it had been applied in 1951 would have decreased the then urban population of 1951 by 433,189 persons. If only the difference in definition of urban areas had not been applied 433,189 persons of 1951 population, increased to 580,302 at rate of 3.40% increase per year, would not have been declassified into rural.

TABLE A-IV—Contd.

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

Name of Town-Group/Town	Status of Town	Name of District	Year	Area in			Persons	Decade variation	Percentage decade variation	Males	Females

CLASS—II (50,000—99,999) 8 Towns

† In 1931 Census the following towns were merged to form Warangal City:—

- (i) Hanamkonda with population 14,782 (7,624 M; 7,158 F) in 1921; 35,627 (18,324 M; 17,303 F) in 1911 and 10,487 (5,241 M; 5,246 F) in 1901.
(ii) Ura Karimabad with population 5,589 (2,879 M; 2,710 F) in 1921 and 7,173 (3,586 M; 3,587 F) in 1911.
(iii) Warangal Fort with population 5,422 (2,731 M; 2,691 F) in 1921 and 5,542 (2,754 M; 2,788 F) in 1911.
(iv) Mathwada with population 20,998 (10,754 M; 10,244 F) in 1921.

Mokhasa Mutyalampadu		KRISHNA	1961	@	@	3,963	...	...	2,005	1,958	

@ The area of Mokhasa Mutyalampadu has been included in Rural of Vijayawada taluk and is not separately available.

[illegible]

N.A.: Not available.

All the Towns printed in italics under column 2 are treated as such for the first time in 1961 Census.

* These towns have been merged with Hyderabad City in 1961 Census.

† In case of declassified towns of Visakhapatnam District, 1951 area in Columns 8 and 9 includes undifferentiated Rural area in the Urban areas, which cannot be separated. These figures have been taken from District Census Hand Book of 1951 Census.

‡ The 1951 Population of Malkajpuram Town (Visakhapatnam District) and Kadam Damstie Township (Adilabad District) given under Column 6 has been arrived by adding the 1951 population of the constituent villages.

† The 1961 population of these declassified towns given under column 10 has been arrived by adding the 1961 population of all the independent Rural Revenue villages into which they have relapsed at the present Census and not merely of the single village that went by the name of the original town.

[illegible]

Town in 1951 which has been declassified as Rural in 1961

EXPLANATORY NOTE A TO APPENDIX I

Showing names of new towns treated as such for the first time in 1961 Census and the names of their constituent villages

District	Name of New Town	Constituent Villages			
		Name	Survey Number	1951	
				Area in Sq. miles	Population

NOTE ;—The Location Code Numbers given in cols. 4 and 7 represent the Taluk No./Village No.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

1. Introduction:

1.1. The Primary Census Abstract presents basic data on the following aspects, namely, (1) Area in square miles of the unit for which the figures are presented, (2) The number of occupied residential houses and the number of households, (3) The total population and its sex break up, (4) The population of Scheduled Castes and Scheduled Tribes by sex, (5) Literate and educated persons by sex, (6) The total workers and the break up of the workers by nine categories and also the total non-workers. The sex-wise distribution of the workers as well as the non-workers is also given. All the above particulars are furnished for the Total as well as the Rural and Urban population separately of each unit. In the areas where there are special Agency tracts the figures for those tracts are presented separately from those of the Plains.

1.2. In the State Volume, the Primary Census Abstract gives figures for the State as a whole and then district by district for each taluk and also for each town. (In the District Census Hand Books which are published separately as State Government publications, the Primary Census Abstract will furnish figures for each village in the rural areas and for each Census Enumerator's block consisting of about 125 to 150 houses in each town).

1.3. The figures furnished in the Primary Census Abstract relate to all persons who were alive at sunrise on 1 March 1961, and were present within the territory (including territorial waters) of the State of Andhra Pradesh whether they lived in normal residential houses, or in institutions, such as, hospitals, jails, asylums, boarding houses, etc., or they were merely houseless persons like the wandering tribes, tramps, pavement dwellers or those living in boats, etc. They were all enumerated at the 1961 Census and their basic characteristics have been statistically presented in the Primary Census Abstract.

1.4. The total population of Andhra Pradesh State as revealed by the Primary Census Abstract is as follows :—

Persons	.	.	.	35,983,447
Males	.	.	.	18,161,671
Females	.	.	.	17,821,776

1.5. Columns 1 and 2 of the Primary Census Abstract indicate the unit for which the figures are presented. Column 1 gives the location code number of the district, taluk, village or town, as the case may be, and in column 2 the name of the unit is given. For convenience of reference, as had already been explained in the introductory fly leaf to Table A-I, each district in the State had been allotted a separate code number serially numbering the districts in a clockwise order. The map given herein may be referred to. The figures in the Primary Census Abstract have also been presented in the order of the location code numbers of the districts. Within each district the taluks

had similarly been allotted separate location code numbers, the taluk in which the district headquarters lies being allotted location code number 1 and the other taluks being numbered off in a clockwise order. The towns within each taluk had been allotted a distinct code number which is indicated by a Roman figure. Column 1 of the Primary Census Abstract shows the location code number of the district, taluk or town, as the case may be. In column 2, the name of the unit, namely, of the district or taluk or town has been shown. (In the villagewise Primary Census Abstract found in the District Census Hand Books, the code number of the village and the name of each village would have been listed out under each taluk).

2. Area:

2.1. Column 3 of the Primary Census Abstract furnishes the area of each of the units given in columns 1 and 2 for which the figures are presented in the subsequent columns. The area figures furnished in column 3 are those supplied by the State Director of Survey and Land Records. The areas of the urban units are furnished by the concerned Municipal authorities or the local Revenue authorities as the case may be. The rural area of the district or taluk is arrived at by deducting the total urban area of the unit from the total area.

3. Occupied Residential Census Houses and Households:

3.1. Columns 4 and 5 of the Primary Census Abstract present the figures of the total number of residential Census houses as also the number of households. The definitions of a "Census house" and a "Census household" as adopted at the 1961 Census had already been explained in the fly leaf to Table A-I. To recapitulate, a house represents a structure while the household is the human group. An occupied residential Census house, for the purpose of the Primary Census Abstract, is a structure or part of a structure with a separate entry used for the purpose of habitation by one or more households. A household means a group of persons who live together and have a common mess. An occupied residential Census house may be used wholly as a dwelling or it may be put to other uses also besides being used as a dwelling. An occupied Census house may be a shop-cum-dwelling which means a Census house which is used both as a shop, i.e., a place where all kinds of articles are sold for cash or for credit, as well as for purposes of human habitation. Similarly, it can be a workshop-cum-dwelling, i.e., a Census house used both as a workshop where some kind of production, repair, or servicing goes on or certain articles are made and sold, as also used as a human habitation. All these categories of Census houses are taken as occupied residential Census houses for the purpose of this Table.

4. Percentage of Households to Census Houses:

4.1. The statement below gives the percentage of households to number of houses in the rural and urban areas for the State as a whole and for each district.

STATEMENT 1

PERCENTAGE OF HOUSEHOLDS TO NUMBER OF HOUSES IN RURAL AND URBAN AREAS DISTRICT BY DISTRICT

State/District	Percentage of households to number of houses		
	Total	Rural	Urban
1	2	3	4
ANDHRA PRADESH	103.13	107.28	112.46
1 Srikakulam	101.45	101.46	101.35
2 Visakhapatnam	103.84	103.29	106.64
3 East Godavari	121.97	118.28	141.89
4 West Godavari	123.16	122.78	125.26
5 Krishna	113.02	112.70	114.07
6 Guntur	109.08	107.64	114.93
7 Nellore	101.84	101.53	104.25
8 Chittoor	102.25	101.37	109.44
9 Cuddapah	103.44	102.74	108.49
10 Anantapur	101.92	101.94	101.83
11 Kurnool	101.99	101.18	105.66
12 Mahbubnagar	104.41	104.02	108.24
13 Hyderabad	112.66	113.00	112.44
14 Medak	110.19	110.27	109.19
15 Nizamabad	112.84	113.71	108.06
16 Adilabad	106.80	106.06	110.73
17 Karimnagar	108.95	109.09	107.26
18 Warangal	110.94	110.07	116.59
19 Khammam	106.91	106.78	107.76
20 Nalgonda	105.66	105.55	103.36

4.2. The above table would show that the number of households in relation to the number of Census houses is heaviest in West Godavari and East Godavari Districts, being 123.16% and 121.97% respectively, i.e., 100 Census houses were shared by 123 households in West Godavari District and 122 households in East Godavari District. This congestion is felt both in rural and urban areas of the two districts, being a little more pronounced in the urban areas. The urban areas of East Godavari District show a higher proportion of Census households to Census houses, i.e., 141.89% as against 125.26% of West Godavari District. Such congestion has to be expected in the thickly populated and the highly developed deltaic regions of the State where land is valuable and there is a great pressure on house sites and housing. The other delta district Krishna also shows a similar tendency, though the congestion appears to be less than in the two Godavari delta districts. Surprisingly enough the Telangana districts show a higher percentage of Census households to Census houses than the Rayalaseema districts. This may be perhaps due to the peculiar type of house construction popularly prevailing in several areas of Telangana where a structure in the form of an enclosed square has only one common entrance from outside but within the structure there will be a number of households living with partitions separating one household from the other within the house. Often, this will be an ancestral house which had been partitioned amongst the present occupants, who prefer to live separately in different portions of the same structure. Srikakulam shows the lowest percentage of Census households to the number of Census houses.

4.3. The following statement gives a list of 7 taluks which show a higher percentage of households to houses than the highest average recorded for a district (123.16%).

District	Taluk	Percentage of households to houses
1	2	3
1 East Godavari	Rajahmundry	133.57
2 Do.	Kakinada	132.88
3 West Godavari	Kovvur	131.69
4 Do.	Tanuku	129.23
5 Do.	Tadepalligudem	128.45
6 Do.	Bheemavaram	125.84
7 East Godavari	Razole	123.98

It will be seen that all the above taluks belong to the delta districts.

5. Density of Households per square mile :

5.1. The statement below gives the density of households per square mile for total and for rural and urban areas separately for the State and for each district.

STATEMENT 2

DENSITY OF HOUSEHOLDS PER SQUARE MILE IN RURAL AND URBAN AREAS DISTRICT BY DISTRICT

L.C. No.	State/District	Density of households per Sq. mile		
		Total	Rural	Urban
1	2	3	4	5
	ANDHRA PRADESH	71.18	59.78	894.76
1	Srikakulam	131.32	121.47	1,069.65
2	Visakhapatnam	97.71	82.09	1,566.65
3	East Godavari	137.47	114.63	1,341.83
4	West Godavari	145.21	124.94	1,198.54
5	Krishna	132.62	104.47	1,064.90
6	Guntur	114.31	93.23	833.6
7	Nellore	53.62	47.80	1,087.7
8	Chittoor	65.35	58.20	778.2
9	Cuddapah	45.92	40.54	507.1
10	Anantapur	45.83	38.72	349.1
11	Kurnool	41.44	34.26	452.1
12	Mahbubnagar	45.83	41.90	400.1
13	Hyderabad	130.18	51.72	2,393.62
14	Medak	66.22	61.69	488.56
15	Nizamabad	70.81	61.28	700.43
16	Adilabad	34.56	29.12	648.41
17	Karimnagar	76.02	71.06	828.39
18	Warangal	63.92	55.45	885.47
19	Khammam	35.06	30.45	966.28
20	Nalgonda	60.76	54.84	1,307.49

5.2. It will be observed from the above statement that the average density of households per square mile in the State is 71.18 and it is by far the heaviest in West Godavari District being 145.21

followed closely by East Godavari (137.47) and Krishna (132.62) Districts. Taking the rural areas alone West Godavari again leads with 124.94 as against the State's average of 59.78, and amongst the urban areas, obviously, Hyderabad District leads with 2,393.62 households per square mile which is head and shoulders above the other districts. Visakhapatnam District has a fairly high urban density of 1,566.65 households per square mile, the State average of the density of households per square mile in urban areas being 894.76.

5.3. The pattern of density of households per square mile in a way reflects the general economic condition of the area as well. The better developed deltaic districts, show a higher density and the less developed districts with vast areas of uninhabited areas obviously showing a lower density. In the delta districts where every inch of the land is brought under the plough and whatever area that could be spared as house sites had been built upon and inhabited by the large number of households, there is a congestion and in Adilabad District with vast extent of forest land and which is perhaps the least developed of the districts shows the lowest density of 34.56 households per square mile. It is, however, surprising that Srikakulam District which has shown the lowest percentage of Census households to Census houses shows a high density of households per square mile. It may be a peculiar feature that almost each household in that district may live in a Census house of its own or it may be that in indicating the location code number of a household, the enumerator had failed to properly distinguish a household number from the Census house number and each household might have, therefore, been taken as presenting a separate Census house in compiling the figures for this district which led to lesser number of households per Census house, both being almost on a par.

5.4. The following are a few of the taluks which have recorded the highest and the lowest densities of households per square mile in rural areas :

A		B	
Taluk with highest density		Taluk with lowest density	
Kothapeta	316.00	Chintapalle	10.78
Tanuku	311.69	Nugur	13.62
Ramachandrapuram	266.11	Utnur	14.76
Pithapuram	234.84	Achampet	15.39
Razole	231.95	Rampachodavaram	15.71
Narsapur	231.77	Rajampet	16.33

5.5. The following are some of the towns that have shown the highest and the lowest densities of urban households per square mile :

A		B	
Towns with highest density		Towns with lowest density	
Kodangal	7,283.33	Maddikera	61.14
Alampur	7,068.18	Addanki	63.29
Rajahmundry	7,007.33	Yadiki	76.92
Kavali	6,743.08	Kalvakurthi	97.82
Tenali	6,440.67	Pattikonda	100.00
Cherial	5,995.00	Gurazala	104.28

Note: The comparability of the urban density is rendered somewhat unrealistic as there are no uniform standards in reckoning the actual urban area of each unit. While in surveyed Municipal towns mostly the built up area comprises the urban unit, in respect of several towns which are merely panchayats and where no town survey had been conducted the entire area falling within the village boundaries including the agricultural lands constitutes the area of the urban unit.

6. Scheduled Castes and Scheduled Tribes :

6.1. Columns 9 and 10 of the State Primary Census Abstract give the population of the Scheduled Castes sex-wise and columns 11 and 12 similarly give population of the Scheduled Tribes by sex for each of the units indicated in columns 1 and 2.

6.2. The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) published in the Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Castes in Andhra Pradesh is given below :

Note: Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions as Christianity or Islam or Buddhism cease to belong to any caste.

(1) Throughout the State :

- 1 Chalavadi
- 2 Chamar, Mochi or Muchi
- 3 Madiga
- 4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda Districts :

- 1 Adi Andhra
- 2 Adi Dravida
- 3 Arundhatiya
- 4 Bariki
- 5 Bavuri
- 6 Chachati
- 7 Chandala
- 8 Dandasi
- 9 Dom, Dombara, Paidi or Pano
- 10 Ghasi, Haddi or Relli Chachandi
- 11 Godagali
- 12 Godari
- 13 Gosangi
- 14 Jaggali
- 15 Jambuvulu
- 16 Madasi Kuruva or Madari Kuruva
- 17 Mala Dasu
- 18 Madiga Dasu and Mashteen
- 19 Matangi
- 20 Mundala
- 21 Paky or Moti

- 22 Pambada or Pambanda
- 23 Pamidi
- 24 Panchama or Pariah
- 25 Relli
- 26 Samban
- 27 Sapru
- 28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

- 1 Anamuk
- 2 Aray (Mala)
- 3 Arwa Mala
- 4 Beda (Budga) Jangam
- 5 Bindla
- 6 Byagara
- 7 Chambhar
- 8 Dakkal (Dokkalwar)
- 9 Dhor
- 10 Ellamalwar (Yellamalawandi)
- 11 Holeya
- 12 Holeya Dasari
- 13 Kolupulvandlu
- 14 Mahar
- 15 Mala Dasari
- 16 Mala Hannai
- 17 Malajangam
- 18 Mala Masti
- 19 Mala Sale (Netkani)
- 20 Mala Sanyasi
- 21 Mang
- 22 Mang Garodi
- 23 Manne
- 24 Mashti
- 25 Mehtar
- 26 Mitha Ayyalvar
- 27 Samagara
- 28 Sindholu (Chindollu)

6.3. The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule II of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below :—

Note:—Members of Scheduled Tribes may belong to any religion.

(1) Throughout the State :

1. Chenchu or Chenchwar
2. Koya or Goud with its sub-sects Rajah or Rasha Koyas, Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya.

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda Districts:

- 1 Bagata
- 2 Gadabas
- 3 Jatapus
- 4 Kammara
- 5 Kattunayakan
- 6 Konda Dhoras
- 7 Konda Kapus
- 8 Kondareddis
- 9 Kondhs (Kodi and Kodhu) Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yeniy Kondhs
- 10 Kotia-Bentho Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
- 11 Kulia
- 12 Malis
- 13 Manna Dhora
- 14 Mukha Dhora or Nooka Dhora
- 15 Porja (Parangiperja)
- 16 Roddi Dhoras
- 17 Rona, Rena
- 18 Savaras—Kapu Savaras, Maliya Savaras or Khutto Savaras
- 19 Sugalis (Lambadis)
- 20 Yenadis
- 21 Yerukulas

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

- 1 Andh
- 2 Bhil
- 3 Gond (including Naikpod and Rajgond)
- 4 Hill Reddis
- 5 Kolam (including Mannervaru)
- 6 Pardhan
- 7 Thoti

(4) In the Agency Tracts :

- 1 Gowdu (Goud)
- 2 Nayaks
- 3 Valmiki

Note: It may be observed that Yerukulas, Yenadis, Sugalis (Lambadis) who are recognised as Scheduled Tribes in the Andhra districts are not recognised as such in the Telangana districts and hence not enumerated as Scheduled Tribes in those districts, though they were enumerated as Scheduled Tribes in the Andhra districts. These particular tribes live mostly in plains area and this accounts for the Scheduled Tribes being recorded in good numbers against almost all the districts of the Andhra area whereas in Telangana districts the Scheduled Tribes are confined mostly to the districts having recognised belts of tribal area, the number recorded in other districts being negligible.

6.4. The following statement shows the percentage of Scheduled Castes and Scheduled Tribes population by males and females for rural and urban areas for the State as a whole and for each district as also the percentage of Scheduled Castes population by sex in each of the cities and towns having a population of 50,000 and above.

STATEMENT 3

PERCENTAGE OF SCHEDULED CASTES AND OF SCHEDULED TRIBES SEVERALLY TO TOTAL MALES AND FEMALES BY RURAL AND URBAN AREAS OF EACH DISTRICT AND IN CITIES AND TOWNS OF POPULATION 50,000 AND OVER

State/District/City/Town	% SCHEDULED CASTES				% SCHEDULED TRIBES			
	Males		Females		Males		Females	
	Rural	Urban	Rural	Urban	Rural	Urban	Rural	Urban
1	2	3	4	5	6	7	8	9

6.5. The total population of Scheduled Castes and Scheduled Tribes in the State is as follows :—

Scheduled Castes :	Total	4,973,616
	Males	2,512,325
	Females	2,461,291
Scheduled Tribes :	Total	1,324,368
	Males	670,368
	Females	654,000

6.6. The Scheduled Castes form 13.82 % of the total population and the Scheduled Tribes 3.68 %. Thus both together constitute 17.50% of the total population, i.e., almost every sixth person is a member of Scheduled Caste or Scheduled Tribe.

7. Scheduled Castes :

7.1. The following districts arranged in order of the percentage of Scheduled Castes show a higher percentage than the State average :—

Karimnagar	19.44%
Adilabad	18.54%
Mahbubnagar	18.35%
Chittoor	17.76%
East Godavari	17.62%
Nalgonda	17.11%
Medak	17.06%
Warangal	16.86%
Nellore	16.49%
Nizamabad	15.96%
Hyderabad	15.82%
West Godavari	15.40%

7.2. Guntur District has the least percentage of 5.24%. Probably a large proportion of the old Scheduled Caste population had been converted into Christianity in this district and hence were disqualified to be enumerated as Scheduled Castes.

7.3. As regards the distribution of these Scheduled Castes and Scheduled Tribes population, true to their backwardness and traditional occupations, there is a greater concentration of the Scheduled Castes and Scheduled Tribes in the rural areas than in urban areas. The Scheduled Castes constitute 14.88% of the rural population and in urban areas they constitute only about 8.80% of the urban population taking the State as a whole.

7.4. In the following districts the percentage of Scheduled Castes population in rural areas is higher than the State's average of 14.94 amongst male population and 14.82 amongst female population.

	Males	Females
Hyderabad	22.07	22.06
Karimnagar	20.23	20.06
East Godavari	19.63	19.29
Mahbubnagar	19.32	19.35
Adilabad	19.21	19.29
Chittoor	19.05	19.28
Nalgonda	17.94	17.61
Medak	17.86	17.52
Warangal	17.75	17.35
Nellore	17.68	17.47
Nizamabad	17.02	17.12
West Godavari	17.01	16.59

7.5. Amongst the urban units, Kothagudem town seems to have attracted the largest proportion of Scheduled Castes population—22.44% of the population of the town has been recorded as belonging to Scheduled Castes. A large proportion of the coal mining labour seems to have been drawn from these people. Next in order comes Hyderabad City in which the Scheduled Castes constitute 12.05% of the population. Warangal shows Scheduled Castes population of 11.11% and Kurnool 10.22%. The lowest percentage of Scheduled Castes amongst larger towns is in Proddatur being only 2.47% of general population; this town is a noted commercial town into the pattern of which apparently not many Scheduled Caste persons seem to fit in. In the following towns the proportion of Scheduled Castes is either higher than or very near to the average for the State.

District	Town	Percentage of Scheduled Castes to total population in the town
1 Srikakulam	Srikakulam	9.02
	Bobbili	8.47
	Salur	10.05

8. Scheduled Tribes :

8.1. The Scheduled Tribes population is obviously concentrated in the more remote areas where there are recognised tribal belts like the Agency tracts of Srikakulam, Visakhapatnam, East Godavari, West Godavari and Khammam Districts as also the forest districts of Adilabad and Warangal. Khammam District has the largest percentage of Scheduled Tribes population 16.20%; Adilabad District comes next with 13.08%; Visakhapatnam District 9.33%; Srikakulam District 8.21%; East Godavari 3.85%; West Godavari 2.23%; Warangal 2.13%. By virtue of the Yerukulas, Yenadis and Sugalis being enumerated as Scheduled Tribes in the Andhra area, a sizeable proportion of the population had been recorded as belonging to Scheduled Tribes in the districts of Nellore 6.47%, Guntur 3.17%, Anantapur 2.74% and Chittoor 2.66%. The Scheduled Tribes form 4.27% of the rural population of the State as a whole and only 0.91% of the urban population. Amongst the cities and towns, 7.73% amongst the male population and 7.81% amongst female population of Nellore City have been recorded as Scheduled Tribes. As is well known, this city is an important centre of Yanadi labour. Tenali town shows 3.01% amongst males and 2.89% amongst females as belonging to Scheduled Tribes. Guntur City similarly shows 1.75% of the male population and 1.66% of the female population as belonging to Scheduled Tribes. Kothagudem town which attracts a good number of Koya tribals as mining labourers has recorded 1.59% of both male and female population as belonging to Scheduled Tribes. In other towns the percentage of Scheduled Tribes is negligible.

9. Houseless and Institutional Population:

Houseless and Institutional population has not been separately shown in the Primary Census Abstract. The houseless persons and institutional population have already been defined in the fly leaf to Appendix III to Table A-I. To state briefly, the Houseless population is comprised of all those who had no house to live in, such as, the

pavement dwellers, nomads, vagrants etc., who were specially enumerated on the night of 28 February, 1961 at the place where they were found to be sleeping. People who normally lived on boats were also reckoned as houseless persons and enumerated accordingly on the night of 28th February. The Institutional population is that which lives in institutional households, i. e., Census households of unrelated persons living and messing together, such as in boarding houses, messes, hostels, hotels, hospitals, penal, charitable or mental institutions, etc. Fly leaf to Appendix III to Table A-I may be referred to under which the percentages of Houseless and Institutional population have been discussed in some detail.

10. Literacy and Education:

10.1. Columns 13 and 14 of the State Primary Census Abstract give the number of literate and educated persons sex-wise for each unit.

10.2. The test for literacy as laid down in the instructions to enumerators for the 1961 Census was as follows: A person who can both read and write any language is to be taken as literate.

A person who can merely read but cannot write is not to be treated as a literate.

"The test for reading is ability to read any simple letter either in print or manuscript i.e., if the person can read one of the examples in the Enumerator's Handbook with facility he may be taken to have passed the test of reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write."

Children aged 4 and below were automatically treated as illiterate.

10.3. The test for education was that the person should have passed a recognised written examination or examinations as proof of an educational level attained. The highest examination passed was taken as the level for education.

10.4. Statements 4A and 4B below show the percentage of literate and educated persons to total population, males and females by rural and urban areas of each district and in cities and towns of population 50,000 and above:—

STATEMENT 4 A

PERCENTAGE OF LITERATE AND EDUCATED PERSONS TO TOTAL POPULATION, MALES AND FEMALES BY RURAL AND URBAN AREAS OF EACH DISTRICT

State/District	Percentage of Literate and Educated					
	Rural			Urban		
	Persons	Males	Females	Persons	Males	Females

STATEMENT 4 B

PERCENTAGE OF LITERATE AND EDUCATED PERSONS IN CITIES AND TOWNS OF POPULATION 50,000 AND ABOVE

City/Town	Percentage literate and educated		
	Persons	Males	Females
1	2	3	4
1 Hyderabad	47.88	59.29	35.60
2 Vijayawada	50.46	60.31	40.06
3 Guntur	44.83	55.93	33.49
4 Visakhapatnam	47.60	58.59	35.65
5 Warangal	38.92	53.66	23.06
6 Rajahmundry	45.96	55.95	35.82
7 Kakinada	44.54	53.88	34.92
8 Eluru	48.13	58.06	38.23
9 Nellore	51.49	60.73	41.58
10 Bandar (Masulipatnam)	50.30	58.51	41.62
11 Kurnool	41.88	52.92	30.12
12 Nizamabad	35.32	48.30	21.10
13 Tenali	44.33	54.07	34.45
14 Vizianagaram	48.10	60.48	35.46
15 Adoni	31.39	44.75	17.55
16 Kothagudem	30.82	43.02	17.52
17 Vijayapuri	28.36	39.06	13.90
18 Anantapur	53.54	66.95	38.29
19 Proddatur	39.31	53.94	23.94

10.5. Taking the State as a whole only 21.19% of the whole population represents the literate and educated persons. Andhra Pradesh occupies only the 15th rank in literacy amongst the States of India. The literacy rates of the various States of India are given below:—

Rank in 1961	Name of the State	Literates per 1,000 population
1	2	3
1	Delhi	527
2	Kerala	468
3	Pondicherry	374
4	Andaman & Nicobar Islands	336
5	Madras	314
6	Gujarat	305
7	Manipur	304
8	Maharashtra	298
9	West Bengal	293
10	Assam	274
11	Mysore	254
12	Punjab	242
13	Laccadive, Minicoy & Amindivi Islands	233
14	Orissa	217
15	Andhra Pradesh	212
16	Tripura	202
17	Bihar	184
18	Nagaland	179
19	Uttar Pradesh	176
20	Himachal Pradesh	171
21	Madhya Pradesh	171
22	Rajasthan	152
23	Sikkim	123
24	Jammu & Kashmir	110
25	Dadra & Nagar Haveli	95
26	North East Frontier Agency	72

10.6. Among the districts of the State, Hyderabad District records the highest percentage of literacy of 35.05%, quite obviously due to the large number of literates in the State's Capital, whose population form a major portion of the population of the district. The other districts showing fairly high percentage of literacy in the descending order of percentage of literates are— (1) Krishna 31.15%, (2) West Godavari 30.76%, (3) Guntur 27.66%, and (4) East Godavari 26.00%. Three of the Rayalaseema districts have uniformly recorded percentage of literacy exceeding the State's average as follows:

Cuddapah	21.75%
Kurnool	21.41%
Chittoor	20.94%

Srikakulam and Visakhapatnam Districts have recorded a fairly low percentage of literacy, 15.71% in the former and 17.15% in the latter. With the exception of Hyderabad District all other Telangana districts have recorded very low percentages of literate population. The highest recorded is 15.37% in Warangal District followed by Khammam 15.23%. Adilabad with 11.72% has shown itself to be the least literate in the State.

10.7. The urban population, because of the need for literates in urban occupations and the availability of greater facilities for education in urban centres, is obviously more literate than rural population. Taking the State as a whole 41.78% of the urban population is literate whereas only 16.85% of the rural population is literate. The urban population of Hyderabad District records the highest literacy of 47.61% closely followed by that of Krishna District with 47.04% and the least literate urban population is again found in Adilabad District 30.59%. The urban population of the more developed delta districts generally shows higher percentage of literacy followed by that of the Rayalaseema districts and then the Telangana districts, which conforms to the same patterns noticed when we studied the literacy of population as a whole, urban and rural put together.

10.8. Taking the rural population also it is found that the more advanced delta areas show a distinctly higher percentage of literates. West Godavari records the highest percentage of 27.77% followed by Krishna with 26.27%. The Rayalaseema region where percentage of literates amongst rural population ranges from 16.44% in Anantapur District to 19.11% in Cuddapah District comes next and the literacy figures of the Telangana region where it ranges from 8.26% in Adilabad District to 14.39% in Hyderabad District present the lowest stage of development of the rural areas.

11. Literacy amongst Females:

11.1. The literacy amongst the female population of the State has been quite poor. Only 8.45% of the female population in rural areas and 29.33% of female population in urban areas in the State is found to be literate. The highest recorded literacy amongst the female rural population is in West Godavari District 20.75% and the least in Adilabad District 2.39%. Visakhapatnam and Srikakulam also show very low percentages of literacy. As regards the literate female urban population, West Godavari with 37.13% again leads and Adilabad District keeps to the last place with only 16.87% of the urban female population being literate.

12. Literacy in larger Towns:

12.1. Taking the larger towns and cities, more than 50% of the population is literate in the following places :

Anantapur . . .	53.54%
Nellore . . .	51.49%
Vijayawada . . .	50.46%
Bandar (Masulipatnam) . . .	50.30%

Hyderabad City shows that only 47.88% of its population is literate. The least literate of the larger towns is Vijayapuri town with only 28.36% being literate which is understandable due to the large concentration of illiterate labour.

13. Workers and Non-workers:

13.1. At the present Census the population has been divided broadly into two sections, viz., (1) Workers, i.e., all those engaged in some productive work; and (2) Non-workers. The emphasis at this Census is not income or dependence for livelihood but the actual work that a person does. Therefore the working population irrespective of whether all the workers actually derive income or not, is classified according to the primary economic activity of the workers. The Census enumerator mainly examined what work the person enumerated was doing during the 15 days preceding the day on which the person was enumerated. In respect of seasonal work like cultivation, livestock, dairy, household industry, etc., if the person had some regular work for more than one hour a day, throughout the greater part of the working season, he is recorded as a worker. If a person is temporarily incapacitated from work at the time of Census enumeration due to illness or other cause he is treated as a worker depending on what he normally did. An under-trial prisoner though in prison during Census enumeration is also treated as a worker if he did some productive work before he was apprehended. But a convict in a prison or long term inmates of hospitals, or mental institutions are not treated as workers. A person who has merely been offered work but has not actually joined the work is also not treated as a worker. Persons under training as apprentices with or without wages are recorded as workers. Family workers, i.e., who do not directly derive any income but attend to work along with other members of the family are treated as workers. An adult woman who is engaged merely in household duties and does no other productive work is not treated as a worker. Work includes not only actual work but effective supervision and direction of work. A public or social service worker who is actually engaged in public service activity or political activity is taken as a worker. Thus all workers in any branch of productive work are netted as workers. These are all broadly classified under nine basic categories namely (i) working as Cultivators; (ii) working as Agricultural Labourers; (iii) working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations and Orchards and other Allied activities; (iv) working at Household Industry; (v) working in Manufacturing other than Household Industry; (vi) working in Construction; (vii) working in Trade and Commerce; (viii) working in Transport, Storage and Communications; and (ix) working in Other Services. All others who did not do any productive work irrespective of whether they derived some income such as through pensions, rents, etc., or did not derive any income were classified under category X — "Non-Workers". These Non-Workers cover (1) full time students, (2) a person engaged in unpaid home duties (housewife), (3) a dependent, i.e., an infant

or child not attending school, a person permanently disabled from working due to illness or old age, (4) a retired person not employed again, a rentier or royalty receiver, or any other person of independent means for securing which he does not have to work and who does no other work, (5) a beggar, a vagrant or an independent woman without indication of source of income, (6) a convict in jail or an inmate of penal, mental or charitable institution, (7) an unemployed person seeking employment for the first time, (8) a person employed before but now out of employment.

13.2. Amongst workers, an important type of worker that has been taken cognizance of and given separate recognition for the first time at this Census is constituted of all those working in household industries. This is necessitated by the peculiar set up of the rural crafts and the economy of the Indian Craftsman families, who form an important part of the Indian community. Amongst them, the industry is carried on a household basis in which one or more members of the family together participate and produce the goods or articles. Their set up is entirely different from that of an organised large scale industry. Most of our traditional handicrafts such as pottery, weaving, lace work, toy-making, bangle making etc., are carried on as household industries. A worker in a household industry will have an entirely different background and his skill is also of an entirely different nature from that of a factory worker.

Household industry is defined as an industry conducted by the head of the household himself and or mainly members of the household at home or within the village in rural areas, and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a household industry is the participation of one or more members of household in rural areas. In the urban areas the industry should be confined to the house. A household industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions, such as, pleader, doctor, barber, washerman or astrologer.

13.3. A brief resume of the economic classification of the population adopted at some of the previous Censuses may be given here. At the 1931 Census a detailed classification of the economic characteristics of the people was done and tabulated on an All India basis. The occupation of the working population was divided into four classes, viz., (1) Production of Raw Materials; (2) Preparation and Supply of Material Substances; (3) Public Administration and Liberal Arts; and (4) Miscellaneous; and sub-divided into 12 sub-classes and various orders and occupation groups. Under each class the sub-totals for members following the occupations as "principal occupation" or as "working dependent" or as "subsidiary to other occupations" was given. At the 1941 Census though the economic characteristics were ascertained on the Census schedules, due to the limitations of tabulation during the war period, no detailed classification was done. Though the Indian Census Economic Classification Scheme of 1951 was based on the 1931 (Classification) scheme of occupations, some departures were made and comprehensive economic classification of the people as a whole and not merely of the persons who are gainfully occupied was made. At the 1951 Census the population was divided into two broad categories viz., Agricultural and Non-Agricultural and they were all divided into eight broad livelihood classes as follows :—

Agricultural :

- I Cultivators of land, wholly or mainly owned
- II Cultivators of land, wholly or mainly unowned
- III Cultivating labourers
- IV Non-cultivating owners of land; Agricultural rent-receivers

Non-Agricultural :

- V Production (other than cultivation)
- VI Commerce
- VII Transport
- VIII Other services and miscellaneous sources

Under the 1951 scheme both the economically active as well as inactive persons were lumped together under the main livelihood class on which they depended. The sub-classification of the eight livelihood classes into self-supporting persons, non-earning dependents and earning dependents to a certain extent helped to distinguish the economically active and inactive persons. At the 1961 Census the economically active persons, i.e., all persons engaged in activities which result in the production of useful commodities or the performance of useful services, but not including the performance of purely domestic services by members of families within their households, are separated from the non-workers. The working population is divided according to the nine broad categories of the Industrial Classification which go by the type of commodities produced or services performed which have already been described and the non-workers are also classified according to their activity. The Primary Census Abstract presents this broad "Industrial" categorisation of the workers. The figures of the total non-workers are also shown separately. The

working population will be classified separately according to the returns for occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was found to be neither a purely Industrial nor Occupational classification of the population but was a combination of both. There were only 10 divisions and 88 sub-divisions of industries and services. At the 1961 Census the National Classification of Industries and Occupations adopted by the Government has been followed. There are more than 300 Industrial Minor Groups and Occupational Families. The break up of the workers now classified under the basic nine broad categories, will be presented according to the Industrial Minor Groups as well as the Occupational Families, in the detailed Economic Tables (B Series of Tables) which are given in Part II-B volume of the Census series of publications. The break up of the non-workers also according to their activity will also be given in the concerned Tables.

Columns 18, 19 and 20 of the Union Primary Census Abstract and Columns 15 and 16 of the State Primary Census Abstract give for each sex the total number of Workers and the succeeding columns, give the distribution of these Workers sex-wise into the nine categories of Workers. Columns 48, 49 and 50 of the Union Primary Census Abstract and columns 35 and 36 of the State Primary Census Abstract give total number of Non-Workers of each sex.

14. Proportionate distribution of population amongst different categories of Workers and Non-Workers:

14.1. The following statement gives the distribution of 1,000 persons, males and females of total, rural and urban population of each district and in cities and town groups of population 100,000 and over, among the Workers and Non-Workers and for each category of Workers.

15.2. The sex ratio of the general population has already been discussed in the fly leaf to Table A-1. Among the working population of the State, the female workers form a ratio of 652 per 1,000 male workers; in rural working population their proportion is higher being 706 and in the urban working population it is considerably lower being only 340. In category II, i.e., Agricultural Labourer alone the sex ratio exceeds 1,000, i.e., there are more female workers than male workers in this category. In category I, i.e., Cultivator, taking the total workers in this class, the number of female workers per 1,000 male workers is 609. In category IV, i.e., Household Industry there are 579 female workers per 1,000 male workers. In all other categories the proportion of female workers is very much less. In Category VIII "Transport and Communications" the female workers are least represented there being only 18 female workers per 1,000 male workers. The females form the bulk of non-working population there being 1,524 females per 1,000 male non-workers. This pattern of sex ratio amongst the different categories of workers as also the non-workers generally prevails in all the districts though the proportion varies a little from district to district. In Category IV, i.e., "Household Industry," the sex ratio of workers exceeds 1,000 amongst the urban workers under this category of Kurnool, Mahabubnagar and Nizamabad.

15.3. More detailed account of the actual work and the occupation of workers in the different categories as also the details of the non-workers can be obtained from the Economic Tables which are presented in Part II-B of the Census series of publications.

Towns treated as such for the first time in 1951 Census and which continue as Towns in 1961 Census are printed with an asterisk (*) on the left side.

Towns treated as such for the first time in 1961 Census are printed in italics.

The Following abbreviations have been used for the status of a City or Town :—

M.C. : Municipal Corporation, M. : Municipality, C.M. : City Municipality, T.M. : Town Municipality, P. : Panchayat.

† Civic status of these towns not yet determined.

The area figures given under col. 3 are furnished by the State Survey Department and Local Authorities concerned.

@ Areas of these towns are not separately available.

‡ The constituent parts of Hyderabad (Town-Group) fall under Hyderabad West, Hyderabad East and Medchal Taluks and separate area figures for each of the constituent units are not available. The Rural area given against the above three Taluks under column 3, therefore, includes the area of the Urban portions included in Hyderabad (Town-Group). Since Hyderabad (Town-Group) as such has been treated as a separate independent entity, the population of no portion of the (Town-Group) has been included in the population of any of these Taluks.

‡‡ Medchal Taluk excludes an Urban population of 4,958 P., 2,539 M. and 2,419 F. which is included in Hyderabad (Town-Group) under Macha Bolaram. It also excludes the particulars like Occupied Residential Houses, etc., of Macha Bolaram Town.

§ Hyderabad East Taluk excludes an urban population of 13,910 P., 7,120 M. and 6,790 F. which is included in Hyderabad (Town-Group) under Malkajgiri. It also excludes the particulars like Occupied Residential Houses, etc., of Malkajgiri Town.

§§ Hyderabad West Taluk excludes an Urban population of 1,232,251 P., 638,916 M. and 593,335 F. which is included in Hyderabad (Town-Group) under Hyderabad (M.C.), Secunderabad Cantonment, Osmania University, Alwal, Zamistanpur, Kandikal, Bowenpalle, Lalaguda, Attapur and Fatehnagar. It also excludes the other particulars like Occupied Residential Houses, etc., of respective towns.

LIST

Date _____
(19)

INSTRUCTIONS FOR FILLING UP THE HOUSELIST

Column 1—Line Number.

Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building Number (Municipal or Local Authority or Census Number, if any).

This refers to the entire structure on the ground. There are, however, high, large or long buildings along a street or lane which have been partitioned or portions of which have been sold, which have distinct, separate main exit on the road and which belong to separate owners or occupiers or alternatively there are a series of different houses joined each to each by common walls on either side to make the whole look like one building but parts of which have been built at different times and belong to separate owners. Such distinguishable structures, although not separate from each other, should be regarded as separate buildings and given separate numbers. Each building should have a separate number. If in big cities a large mansion or building containing several census houses has a well known name by which it is generally known then the name of the building should also be recorded for convenient reference. If there are more than one structure within an enclosed or open compound belonging to the same person e.g., the main house, the servants' quarters, the garage, etc., only one building number should be given. If the locality consists of a number of streets in a village, the buildings in the various streets should be numbered continuously and the streets should be taken in uniform order, from North-West to South-East. Experience suggests that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first numbering began. In a city enumeration block, the numbering will have to respect the axis of the street and not any preconceived geographical direction like North-West. A building under construction should also be given a number in the serial. If a new hut or building is constructed between the time when the house-numbering and houselisting have been completed and the census count it should be given a new number beyond the last number of the serial for the village. Arabic numerals should be used for building numbers.

This will facilitate verification by supervisors. In areas e.g., urban, where the buildings are already numbered by the Municipal or other authorities, the enumerator may adopt the existing numbers in the Houselist. In such cases, column 2 will carry the established Municipal or local authority number which will facilitate identification. Where there are Municipal or local authority numbers but there are reasons to believe that the number is incomplete or unsatisfactory, the Municipal or local authority number may still be entered in column 2, but at the same time it will be necessary to serially number those buildings afresh for the purposes of census houselist. In that case, the new census serial for buildings will be entered in column 3 and the new census numbers for the buildings will have to be painted

on the buildings themselves. In those cases where there are no Municipal or local authority numbers in existence, all buildings will have to be serially numbered for the census and column 2 will contain entries of this census serial. This number will have to be repeated in column 3 with sub-numbers for census houses, if any.

Column 3—Building Number (Column 2) with sub-numbers for each Census House.

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling of a place of business, workshop, school etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers, e.g., the number of the building and the sub-number of the census house. The census house number should be written after the building number in arabic numerals in brackets such as 2(2), 3(2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—Purpose for which census house used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.

The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the India Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place e.g., bank, etc. But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also

used for place of worship or congregation or if unoccupied, 'vacant'. If the census house is a shop, business house, etc., but is not a factory or workshop as defined above, name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—"If this census house is used as an establishment, workshop or factory".

These columns apply only in cases where the census house is a factory or a workshop i.e., where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of establishment or proprietor.

Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like confectioneries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken.

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if any).

The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used.

If the factory or workshop uses steam or diesel engine or fuel, e.g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Columns 9 & 10—Description of Census House.

Column 9—Material of wall.

Under this column the material out of which most of the walls of the house are made i.e., grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement

(19A)

concrete or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—Material of roof.

The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete etc., should be written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor.

Column 11—Sub-number of each Census Household with Census House number (Column 3).

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (A), (B), (C), etc. For example, if building No. 2 is also a census house and has three households, the household numbers will be 2(A), 2(B) and 2(C). If building No. 4 has two census houses, the houses will be numbered as 4(1) and 4(2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4(1A), 4(1B), 4(1C) and 4(2A) and 4(2B).

Column 12—Name of Head of Household.

The name of the Head of each household given in column 11 should be written here. The Head of a household, for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

If the census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of the owner).

Column 13—Number of rooms in Census Household.

If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at least 6 ft. long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14—Does the household live in own or rented house?

If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—Number of persons residing in census household on day of visit.

Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—Remarks.

In this column should be entered any useful or significant information about the building or the census house or the census household that has not been entered in any other column. For example, if the census house is a shop, the name of the proprietor or owner should be recorded in this column. If a census house is vacant at the time of house-listing but there is reason to believe that the house will be occupied in the course of the next few days and almost certainly before the census enumeration period, then the word 'Vacant' should be entered in column 4 and a remark should be entered in column 18 to the effect 'likely to be occupied shortly'. Thus, the Remarks column should be utilised for recording all significant information relating to the building or census house or census household.

In case the Census house is occupied by a household of Scheduled Caste or Scheduled Tribe, write also in the remarks column the words "S.C." or "S.T." as the case may be.

Each person engaged in house-numbering of one block will have to make out an abstract at the conclusion of house-listing and house-numbering. This abstract will be in the form shown below.

Houselist Abstract

Name and number of District.....
Name and number of Tehsil, etc.....
Name and number of Village/Ward/
Enumerator's Block, etc.....
Total number of sheets used.....
Census Household Numbers From.....to.....
Total number of Census Households.....

ANNEXURE II

Household Schedule and Instructions for Filling up the Household Schedule

CONFIDENTIAL
CENSUS OF INDIA 1961.
(To be filled up during Enumeration)
PART I - HOUSEHOLD SCHEDULE

LOCATION CODE : _____ S. C. _____
Full Name of Head of Household _____ S. T. _____
Is this an institution? _____

A. Cultivation		Local name of right on land	Area in acres			
1. Land under cultivation by Household						
(i) owned or held from Government						
(ii) held from private persons or institutions for payment in money, kind or share						
(iii) Total of items (i) and (ii)						
2. Land given to private persons for cultivation for payment in money, kind or share						
B. Household Industry		Nature of Industry	Number of months in the year during which conducted			
Household industry (not on the scale of a registered factory) conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas.						
(a)						
(b)						
C. Workers at Cultivation or Household Industry		Members of family working:				
Members including Head of family working and hired workers, if any kept wholetime during current or last working season.		Head	Other males	Other females	Total	Hired workers
1. Household Cultivation only						
2. Household Industry only						
3. Both in Household Cultivation and Household Industry						

Dated Signature of Supervisor
Dated Signature of Enumerator

Note : Part II—Census Population Record overleaf should be filled up during the first round of enumeration (10 February to 28 February) from the enumeration slips relating to the household and brought up-to-date with correction, if any, after the second visit during checkperiod 1 March to 3 March, 1961.

Dated Signature of Supervisor

Dated Signature of Enumerator

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an Institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'unrelated persons living together'. In such a Household the manager' or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the week-days in town and spends the week-ends at home, he should be recorded as Head of Household and entered (19B)

for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full name of the Head of the household marked "S. C./S. T.". If the Head of the Household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the Household belongs within the parallelogram. If the Head of the Household does not belong to Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines have been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in

some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);

- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
 - (d) tenants holding land on temporary leases who are liable to ejectment; and
 - (e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and
- (iv) the following :—
- (a) land taken for a fixed amount of money,
 - (b) land taken for a fixed amount of produce,
 - (c) land taken for a share of the produce,
 - (d) land for which money is paid partly in one and partly in any other form mentioned above, and
 - (e) land held free of consideration.

Category 2 Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should *not* be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write I under the column 'Head', and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the head of the household is working write I in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write I under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry

and write the number in the appropriate column. In a Household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry.'

Similarly, in the case of Households engaged in Household Industry only, put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only.' If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

—:O:—

INSTRUCTIONS FOR FILLING UP THE INDIVIDUAL SLIP

ANNEXURE III

Individual Slip and Instructions for Filling up the Slip

INDIVIDUAL SLIP

CONFIDENTIAL CENSUS 1961

Location Code _____

1(a) Name: _____

Relationship to Head _____ Age last birthday

Marital Status _____ 4(a) Birth-place _____

4(b) Born R/U ☐ 4(c) Duration of residence if born elsewhere

5(a) Nationality _____ 5(b) Religion _____

5(c) S.C./S.T. _____ 6 Literacy & Education _____

7(a) Mother tongue _____ 7(b) Any other language(s) _____

8 Working as Cultivator _____ 9 Working as Agricultural labourer _____

Working at 10 Household Industry { (a) Nature of Work _____
(b) Nature of Household Industry _____ (c) If Employee ☐

Doing Work 11 Other than 8, 9 or 10 { (a) Nature of Work _____
(b) Nature of Industry, Profession, Trade or Service _____ (c) Class of Worker ☐
(d) Name of Establishment _____

12 Activity if Not Working ☐ 13 Sex ☐

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household are left out. Please make repeated enquiries about infants and very young children, for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grand-children, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

LOCATION CODE Write the Location Code of the household in each slip. For instructions please see Annexure II.

Q. 1 (a) NAME Write the name of the person enumerated. If a woman's name is not given out describe her as 'so-and-so's mother, wife or daughter'. If a woman does not take the name of a person's husband and that husband's particulars have to be recorded write 'so-and-so's husband'.

For newly born infants who have not yet been given a name write 'Baby' and write 'father's or mother's name'.

Q. 1 (b) RELATIONSHIP TO THE HEAD OF THE HOUSEHOLD In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the Household' has been fully explained in Annexure II. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

If on the check or revisional round between the 1st and 3rd March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

In the case of places like messes, boarding houses, chumeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household. Other members should be recorded as 'unrelated' in this question.

Q. 2 AGE IN YEARS LAST BIRTHDAY Write age in years completed last birthday. For infants below one year of age, write 'O'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age.

If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents (19C)

or religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 MARITAL STATUS For never married ... write NM
Married ... write M
Widowed ... write W
Separated or Divorced ... write S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4 (a) BIRTHPLACE 1. If born in village or town in which enumerated write PL
2. If born in another village or town of district in which enumerated write D
3. If born in another district in the State of enumeration write name of district.
4. If born in another State in India write name of district and State if name of district is known; otherwise write name of State.

5. If born in a country outside India write name of country, e.g., Pakistan or any other country.

6. Persons born at sea or in air or in railway carriages or on road transport e.g., buses etc., should be entered as such

Q. 4 (b) WHETHER BORN IN VILLAGE OR TOWN 1. If born in a village ... write R
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth ... write U

Q. 4 (c) DURATION OF RESIDENCE 1. For a person born in village or town or city in which enumerated write X

2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration

write the number of completed years this person has been in the village/town/city of enumeration.

(Do not take into account periods of temporary absence on leave or holiday or tour or business).

If the duration of residence is less than one year

write O

If the duration of residence is one year or over

write the actual number of completed years of residence.

- Q. 5 (a) NATIONALITY 1. For Indian nationals write I
2. For other nationals write the nationality in full

- Q. 5 (b) RELIGION For Hindu write H
Muslim write M
Christian write C
Jain write J
Buddhist write B
Sikh write S

For others write the answers actually returned.

- Q. 5 (c) SCHEDULED CASTES AND SCHEDULED TRIBES The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given to you separately.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan'

tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 LITERACY & EDUCATION

For a person

1. Who can neither read nor write or can merely read but cannot write in any language write O

2. Who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education.

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L.

- Q. 7 (a) MOTHER TONGUE Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

- Q. 7 (b) ANY OTHER LANGUAGE(S) After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

- Qs. 8 to 11 WORKING These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in questions 8, 9, 10 and 11

according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q.8 and Q.9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q.8 and Q.10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work.

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

- Q. 8 WORKING AS CULTIVATOR For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruitgrowing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other Medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q.10 or Q.11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another persons' land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q.9 WORKING Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

- Qs. 10 (a) & 10 (b) If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10(a) and (2) the nature of the Household Industry against question 10(b).

Otherwise put X in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10 (c) If This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E.E. For all others put X.

The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons at Household Industry:

Q. 10—WORKING AT HOUSEHOLD INDUSTRY		
(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1. Spinning yarn	Spinning yarn in Ambar Charkha	X
2. Dyeing and printing yarn	Handloom weaving	X
3. Threshing and cleaning grain	Flour making <i>chakki</i>	X
4. Labourer employed for crushing oil	Oil ghani	E.E.
5. Tempering and polishing implements	Blacksmithy making agricultural implements	X
6. Labourer employed for making and firing kiln	Earthenware pottery	E.E.
7. Throwing and Turning pottery	Earthenware pottery	X
8. Making wooden doors and windows	Carpentry	X
9. Filling gold ornaments with lac	Goldsmithy	X
10. Labourer working hosiery machine	Hosiery	E.E.
11. Keeping accounts	Hosiery	X
12. Polishing and Scraping metal	Electroplating	X
13. Labourer employed for putting iron hoop on cartwheels	Cartwheelwright	E.E.
14. Repairing of guns	Gunsmithy	X
15. Bee Keeping	Production of honey	X
16. Tending cattle	Livestock raising	X

Q. 11 DOING If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11 (a) In the case of persons not working or who work *only* as cultivator or as agricultural labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11 (b) In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11(a), put an X in this question also.

Important points to remember in Questions 11(a) and 11(b).

1. Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. **In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.**

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves:

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5. **Labourers**—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, brick-layer's labourer. If accustomed to work on various jobs, write general labourer.

6. **Machine Operators**—Always state the kind of machine giving its recognized name, if any.

7. **Shop-keepers, Retail Dealers, Shop Assistants**—If wholly or mainly engaged in selling write, 'Dealer' (if principal) or, 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. **Transport Workers**—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. **Services**—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name, use that name. Managers, Foreman, etc., should be given the department/branch wherever applicable e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:—

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. **Domestic services**—In the case of any private servant e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. **Commerce**—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

For a person who is:

Q. 11 (c) CLASS OF WORKER 1. an **Employer**, that is who hires one or more persons in his work described in Q. 11(a) ... write MR

2. an **Employee**, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind ... write EE

3. a **Single Worker**, that is, who is doing his work described in Q. 11(a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives. ... write SW

4. a **Family Worker**, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind ... write FW

For a person for whom an 'X' is put in Qs. 11(a) and 11(b) put an 'X' in this question also.

Explanation:—

(i) An **Employer** is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An **Employee** is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A **Single Worker** for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a **Single Worker** will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A **Family Worker** is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11 (d) Describe in detail the name of the factory, NAME OF workshop, business house, company, shop, etc. ESTABLISH- If a person has no fixed place of work, write MENT 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in this question also.

Q. 12 ACTI- This question will apply to a person VITY, IF NOT NOT Working. WORKING.

Write 'X' in this question for a person who is working, that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :

1. For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business ... write ST
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age ... write D
4. For a retired person who is not employed again, rentier, person living on

agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work ...

write R

5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence ...

write B

6. For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution ...

write I

7. For a person who has not been employed before but is seeking employment for the first time ...

write NE

8. For a person employed before but now out of employment and seeking employment ...

write UN

Explanation:—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

Q. 13 Sex Write 'M' for Males; and 'F' for Females.

For eunuchs and hermaphrodites write 'M'

—:o:—

ANNEXURE IV

Census Calendar from March 1959 to April 1961

The following statement gives month to month a calendar of Census Operations in this State :

March 1959 :

1. Assumption of Charge by the Superintendent of Census Operations and starting of Office with skeleton staff.
2. Preliminary arrangements for securing of office accommodation and Census records and publications of 1951 Census.
3. Preliminary discussions with the former Superintendent of Census Operations of the erstwhile Hyderabad State to acquaint with the procedure adopted in 1951 Census.
4. Preliminary discussions with certain important Heads of Departments and Secretaries to Government of Andhra Pradesh regarding the arrangements for the 1961 Census Operations.

April 1959 :

1. Preliminary discussions with the State Government regarding the appointment of Census Officers.
2. Arrangements with the State Survey Department for the preparation of Taluk and District maps.

May and June 1959 :

1. Preparations for pretesting the draft Houselists and schedules.
2. Finalisation of places and dates for the 2nd pretest.

July 1959 :

1. Conduct of Training classes for the staff appointed for the 2nd pretest.
2. Conduct of pretest of the 2nd draft questionnaire in the districts of Krishna, East Godavari and Visakhapatnam.

August 1959 :

Conduct of 2nd pretest in the districts of Kurnool, Nellore and Chittoor during the first fortnight and in the districts of Hyderabad, Nalgonda, Adilabad and the Military area in Secunderabad during the 2nd fortnight of August.

September 1959 :

1. Tabulation of the results of the 2nd pretest.
2. First conference of the Census Superintendents convened by Registrar General of India, New Delhi.

October 1959 :

Census Conference, New Delhi concludes. Programme and Census questionnaire finalised.

November 1959 :

Issuing of General instructions in the form of a circular letter (Circular No. 1) explaining the various stages of the 1961 Census Operations.

December 1959 :

1. Issue of Census Circular No. 2 to all District authorities explaining the method of House-numbering to be adopted for the 1961 Census Operations.
2. Checking up of the taluk maps prepared by the State Survey Department with village lists in consultation with the Tahsildars concerned.
3. Preliminary arrangements for the translation of the Census questionnaires in Telugu and preparation of blocks for printing the Census questionnaires in Telugu. (i.e. Household Schedule, Individual Slip).
4. Selection of villages for Socio-Economic Survey.

January 1960 :

1. Issue of Census Circular No. 3 to all District authorities explaining the Houselisting operations.
2. Finalisation of list of towns in consultation with State Government.
3. Appointment of special clerical staff in the Collectorates, Taluk Offices and certain selected Municipal Offices for attending to the work of 1961 Census Operations.

February 1960 :

1. Conduct of training classes to the District Officers for House-numbering and Houselisting operations.
2. Issue of Census Circular No. 4 fixing the Urban units of the State.
3. Assignment of Location Code Numbers for the Districts and Taluks and issue of Census Circular No. 5 to the District Collectors and Tahsildars to prepare location code statement for each taluk assigning location code numbers to each of the towns and villages located in their jurisdiction and to send the location code statement to the Superintendent of Census Operations for approval.
4. Receipt of the first consignment of Houselist forms from the Government of India press at Nasik.

March 1960 :

1. Conduct of training classes for the District Officers about House-numbering and Houselisting operations in some more centres.
2. Despatch of Houselist forms (Telugu forms) to all the District Census Officers by lorries.

April and May 1960 :

1. Starting of House-numbering and Houselisting operations in the State.
2. Arrangements for the selection of places that have to be treated as special charges and the appointment of Census Officers to such areas.

3. Receipt of the final consignment of the Houselisting forms and the Individual slips and Household schedules for practice enumeration from Nasik Press.
4. Chalking out programme for House-numbering, Houselisting and Enumeration in the Agency areas and other inaccessible areas (non-synchronous tracts) in consultation with the local authorities.
5. Receipt of printed Household Schedules and Individual Slips from Nasik Press for final enumeration.
6. Issue of Census Circular No. 6, (important circular) regarding the forming of Census divisions and the appointment of Charge Superintendents, Supervisors and Enumerators thereto.

June and July 1960 :

1. Scrutiny of the Location Code Statements and taluk maps furnished by the Tahsildars and their approval by Superintendent of Census Operations.
2. Distribution of the Individual slips and Household Schedules to the various districts.
3. Publicity measures to explain the scope of 1961 Census Operations.
4. Preliminary arrangements for the selection of suitable buildings for the location of Tabulation Offices.

August 1960 :

1. Issue of Census Circular No. 7 (important circular) to the district authorities as to how the training programme of the Census Enumeration staff should be arranged.

September 1960 :

1. Selection and appointment of Regional Deputy Superintendents of Census Operations.
2. Conduct of training classes by the Superintendent of Census Operations for the District Census Officers, Charge Superintendents etc.
3. Receipt of the filled in Houselist forms from Districts and starting of their tabulation.
4. Issue of Census Circulars Nos. 8 and 9 on enumeration work and mode of despatch of provisional totals.
5. Final despatch of all the Census schedules (English and Telugu) to the district authorities.

October 1960 :

1. Arrangements for the enumeration work in the Agency areas of Srikakulam and Visakhapatnam Districts including the appointment of Paid Enumerators and Supervisors in the above agency areas.
2. Completion of training classes for the District Census Officers and Charge Superintendents.

November and December 1960 :

1. Enumeration in the Agency areas of Srikakulam and Visakhapatnam Districts.
2. Training of Census Enumerators and Supervisors by the District Census Officers, Sub-divisional Census Officers and Charge Superintendents.

3. Finalisation of chargelists by the Charge Superintendents and their approval by Superintendent of Census Operations.

4. Publicity.

January 1961 :

1. Enumeration in Agency areas of East Godavari, West Godavari and Khammam Districts.
2. Intensive training programme for the Census Enumerators and Supervisors.
3. Intensive publicity through All India Radio, News Papers, Cinema slides etc.
4. Issue of formal appointment orders to Supervisors and Enumerators by the Charge Superintendents.
5. Registrar General's tour of the State.

February 1961 :

1. CENSUS ENUMERATION (10-2-61 to 28-2-61).
2. Advance Enumeration in the special tracts in Kurnool District from 1-2-1961 to 28-2-1961.
3. Intensive tours by the Superintendent of Census Operations and Deputy Superintendents of Census Operations to supervise enumeration.

March 1961 :

1. 1-3-1961 to 5-3-1961 Revisional rounds to take into account the additions and deletions.
2. 5-3-61—Enumerator to deliver the enumeration pads etc., to his Census Supervisor together with the provisional totals of his block.
 - 5-3-61 Thorough checking of enumerator's provisional total figures and the posting of Supervisor's Abstract of provisional totals in the prescribed form and delivery of the Statement to the Charge Superintendent together with the Census Schedules.
 - 6-3-61 Compilation of the provisional totals received from the various supervisors by the Charge Superintendent and their communication to the District Census Officer and the Superintendent of Census Operations.
 - 6-3-61 Consolidation of the provisional totals received from the various Charge Superintendents by the District Census Officer and their communication to the Superintendent of Census Operations and the Registrar General, India.
 - 7-3-61 Communication of the provisional totals to the Registrar General, India by Superintendent of Census Operations.
3. Receipt of the Census Schedules (i.e. filled up Census Household Schedules and Individual slips) from the Charge Superintendents and District Census Officers by the various Regional Tabulation Offices.

April 1961 :

1. Post Enumeration check.
2. Establishment of Regional Tabulation Offices and appointment of staff thereto.

ANNEXURE V

Other Special Features of 1961 Census

RECORDS :

The permanent records that this Census has produced are (1) the block maps, (2) the houselists and (3) the household schedules.

All these have been stored for the entire State in the record room of the Census Office located at present in "Khusro Manzil", A.C. Guards, Hyderabad-4. The Block Maps have been put in tin containers and have been stored talukwise for each district. Similarly the houselists and the household schedules have also been deposited on wooden racks, with a clear record index system, in charge of a full-time Record Keeper. These would be available for any one interested to peruse them for statistical purposes. (It may be pointed out that under the provisions of the Census Act, these Census records can be used only for statistical purposes and cannot be used as evidence even in a Court of Law).

This Census has also produced village house-numbering plans, though not to scale, but very useful as a key to all the villages of Andhra Pradesh. They would be useful for rebuilding or maintaining house numbers for sample surveys etc. They have also been stored in the record rooms of the Census Office, on wooden racks, taluk-wise.

(1) **Block Maps** :—As already indicated, the preparation of Census maps undertaken at this Census to cover the entire territory showing the Census charges undertaken at this Census will provide a valuable document of reference.

(2) (i) **Uniform Houselists** :—A uniform houselist covering several aspects of housing as already discussed is yet another valuable document produced at this Census.

(ii) **Housing Tables** :—The information from the houselists has been tabulated and five tables on housing have been prepared as indicated below for the State as well as for each district.

Table E I. giving Census houses, and the uses to which they were put.

Table E II. indicating Census households classified by tenure status.

Table E III. depicting Census houses used as workshops and factories, classified by industry, power used and size of employment.

Table E IV. showing distribution of Census houses used wholly or partly as dwelling by wall and roof material.

Table E V. representing households classified by number of members and by number of rooms occupied.

A housing report incorporating the above tables will be published as Part IV of the Census series of publica-

tions. This covers a new ground that had not been adequately dealt with at the previous Censuses.

(3) Household Schedules and Census Population

Record :—The household schedule which supplements the data collected on the basis of individual slip by information on the economic activities of the household as an entity introduced for the first time at the present Census and the population record on the back of the household schedules replacing the National Register of Citizens produced at the 1951 Census mark yet another new feature of the Census 1961.

TABULATION :

An ambitious tabulation plan was undertaken at the present Census. The stress laid on concept of workers and non-workers had already been explained. The tables prepared at the 1961 Census while establishing comparison with those of the past censuses, open up new vistas of study. The tables prepared are classified under broad heads as follows :

A Series: General Population Tables, Primary Census Abstract.

B Series: Economic Tables

C Series: Social & Cultural Tables

D Series: Migration Tables

E Series: Housing Tables.

Special Tables:

S.C.T. Series: Special Tables for Scheduled Castes and Scheduled Tribes

S.C. : Special Table for Scheduled Castes only.

S.T. : Special Table for Scheduled Tribes only.

While several basic tables follow the pattern of the tables of the previous Censuses, which is obviously necessary to maintain comparison, a variety of new tables have also been evolved.

It is well known that till 1941 the Census data was presented on the basis of the religious break up of population. In 1951, economic classification substituted the classification based on religion. The economic classification was based on eight livelihood classes which were subdivided into self supporting persons and dependents. At the 1961 Census the Industrial classification of workers was adopted for the primary economic classification of the population divided into the following categories of workers, non-workers being shown as a separate category.

I: Working as Cultivators

II: Working as Agricultural labourers

III: Working in Mining, Quarrying Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV: Working at Household Industry

- V: Working in Manufacturing other than Household Industry
- VI: Working in Construction
- VII: Working in Trade and Commerce
- VIII: Working in Transport, Storage and Communications
- IX: Working in Other Services
- X: Non-Workers.

The stress was on concept of work and not income or dependency. The non-workers were separately categorised into:—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business ... S.T.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business H.W.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age ... D.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work ... R.
5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence ... B.
6. A convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution. ... I.
7. A person who has not been employed before but is seeking employment for the first time NE.
8. A person employed before but now out of employment and seeking employment ... UN.

The economic tables proposed at the present Census are very comprehensive, covering 16 in number as against 7 at the 1951 Census.

A two way classification of all workers according to the industry in which engaged and the occupation of the workers will also be presented.

The cultural and migration tables adopted at the present Census also mark several departures. The age tables are proposed on the basis of full count and not on the basis of sample slips as was done in 1951. In the data on migrants, the statistics according to not merely the place of birth but also according to duration of residence is given. Information about whether the place from which migrated was rural or urban has also been collected. Special migration tables for cities have been prepared showing the broad age groups, educational level and occupation as also whether the migration is from rural or urban areas. All these tables provide a large field of study relating to migration.

Preparation of separate tables for Scheduled Castes and Scheduled Tribes is yet another new feature of the present Census.

At the 1951 Census there were no tables for Scheduled Castes and Scheduled Tribes except the table giving total number of persons belonging to Scheduled Castes and Scheduled Tribes and the distribution among the livelihood classes adopted for the Census. The Constitution has provided special safeguards for these communities and the Government through the Five-Year Plans, are taking ameliorative measures for the improvement of these communities. It is, therefore, possible with the help of the present Census data to have more detailed information of the progress that has so far been made by the members of the Scheduled Castes and Scheduled Tribes through the schemes undertaken in the First and Second Five-Year Plans.

Further, population figures for individual Scheduled Castes and Scheduled Tribes are often required and they are available only for some of them in the 1931 and previous Census Tables. These special tables, therefore, give the population figures for each Scheduled Caste and Scheduled Tribe, further cross classified by religion, age, and marital status, education and distributed by industrial categories adopted for the Primary Census Abstract.

In this Census, educational qualifications have been divided into the following levels, quite elaborate as compared to the 1951 Census.

For Rural areas :

- I. Illiterate.
- II. Total literate and educated persons.
 1. Literate (without educational levels)
 2. Primary or Junior Basic
 3. Matriculation and above

For Urban areas :

- I. Illiterate
- II. Total literate and educated persons
 1. Literate (without educational levels)
 2. Primary or Junior basic
 3. Matriculation or Higher Secondary
 4. Technical diploma not equal to degree

5. Non-Technical diploma not equal to degree
6. University degree or post-graduate degree other than technical degree
7. Technical degree or diploma equal to degree or post-graduate degree.
 - (i) Engineering
 - (ii) Medicine
 - (iii) Agriculture
 - (iv) Veterinary and Dairying
 - (v) Technology
 - (vi) Teaching
 - (vii) Others

These educational levels are available for the Economic Tables as well as Migration Tables and Scheduled Castes and Scheduled Tribes. In the Economic Tables industrial classification of workers is available by educational levels and again classification by occupational divisions of persons at work, other than at cultivation is also available for urban areas by educational levels. Similarly the migrants to cities are also available by these education levels.

CENSUS PUBLICATIONS :

The various tables which are adopted for the 1961 Census, throwing up a wealth of new information will be published as different parts of the present Census series of publications as follows :—

- A series of tables (General Population Tables) and the Primary Census Abstract down to taluk level and all towns in Part II-A, (the present volume). The Pri-

mary Census Abstract down to village level will be published in the District Census Handbooks.

B series of tables (Economic Tables B I to B IX) down to the district and all cities and town groups of above 100,000 population in Part II-B.

B series of tables (Household Economic Tables B X to B XVI) in Part III.

C & D series of tables (Cultural and Migration Tables) down to districts and all cities and town groups of over 100,000 population in Part II C.

E series of tables (Housing and Establishment Tables) together with the report on housing in Part IV.

SCT, SC & ST Tables (Special tables for Scheduled Castes and Scheduled Tribes) in Part V.

Besides the presentation of the Census tables in the various parts as indicated above, the general Census Report will form Part I and the several special Surveys undertaken at the present Census such as the Village Survey, Rural Craft Survey, Fairs and Festivals Survey will also be covered in the different parts of the Census Reports. The District Census Hand Books in an enlarged and standardised form will be issued as State Government publications.

In the All India Series of Census Publications, the Volumes relating to the Indian Union are designated as Volume I series and the volumes pertaining to each of the States given a serial volume number in the Alphabetical order. Thus all the volumes pertaining to Andhra Pradesh will be referred to as Volume II and the individual parts of the volume will be designated as detailed above. The reader is referred to the relevant publication for a study of any particular set of tables.
