ACKNOWLEDGMENT

In the preparation of this Volume, I have been guided by the suggestions and instructions given from time to time by Shri A. Mitra, I. C. S., Registrar General India, Shri D. Natarajan, Deputy Registrar General India and Shri K. D. Ballal, I.A.S., Central Tabulation Officer. I am also grateful to Shri D. Natarajan, Deputy Registrar General India for very kindly arranging to get this Volume printed. It is also my pleasant duty to place on record the strenuous and conscientious work put in by Shri M. Karuppaswamy, Head Clerk and Kumari Saramma Samuel Lower Division Clerk in preparing this Volume.

**GENERAL POPULATION TABLES
AND
PRIMARY CENSUS ABSTRACT**

PRELIMINARY NOTE

I Introduction

The tenth (ninth in so far as this Territory is concerned) decennial census and the second after the Independence was taken in February-March, 1961. The reference date for the census was the sunrise of 1 March, 1961. The details of the process concerning the Census Organisation and its accomplishments will be set forth in the Administration Reports as well as in the General Report Volume.

In the present census there were three important documents prepared, *i.e.*, the Houselist, Individual Slip and Household Schedule-cum-Census Population Record. Housenumbering and the houselisting formed the first stage. In the second stage the Individual Slip and the Household Schedule-cum-Census Population Record was filled in which was conducted in February, 1961.

This Part of the Report forms Part II-A of the 1961 Census publication series. The following are the tables included in this Part:

- 1 A-I Area, Houses and Population
- 2 A-II Variation in Population during sixty years
- 3 A-III Villages classified by population
- 4 A-IV Towns (and Town-groups) classified by Population in 1961 with variation since 1901
- 5 Union Primary Census Abstract

All the tables in the A-series correspond to the similar tables in the 1951 Census excepting a few variations. The variation in Table A-I is that the area figures are shown in both Sq. miles and Sq. km. and the figures of both inhabited and uninhabited villages separately. Tables A-II and A-IV show percentage variation for 60 years as against 50 years in 1951 Census tables. Additionally Table A-IV gives area of individual town. Table A-III relates to only villages while in the former census it classified villages and towns together into different ranges of population. In addition to the State Tables there are separate Union Tables for A-I and A-III.

At the present census the concept of dependency has been abandoned for economic classification of the population. The industrial classification was, therefore, adopted for the primary economic classification of the population and divided into the following categories of workers. Non-workers were shown as a separate category whereas they were included in the eight livelihood classes adopted at the 1951 Census.

- I Working as Cultivator
- II Working as Agricultural labourer
- III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
- IV Working at Household Industry
- V Working in Manufacturing other than Household Industry
- VI Working in Construction
- VII Working in Trade and Commerce
- VIII Working in Transport, Storage and Communications
- IX Working in Other Services
- X Non-workers

II Census Organisation

In this Territory the Census Organisation for the 1961 Census started functioning from 2 January, 1960 with a nucleus staff. The Deputy Commissioner, Andaman and Nicobar Islands had, however, formerly taken over the post of *Ex-officio* Superintendent of Census Operations from 3 November, 1959. Necessary preliminary arrangements for the conduct of the census were then planned and work started. Some of the various preliminary arrangements made for conducting the census will be set forth, in brief, in the following paragraphs.

III Location Code and Census Divisions

This Territory is constituted of only one district. The 3 digit code numbers were, therefore, adopted. The first number represented the district, the second number represented the Assistant

Commissioner's Division/Forest Division/Town and the third number represented the village/forest camps and bush police camps. As was done in the 1951 Census separate code numbers were allotted to the forest inhabited areas as these areas are not easily accessible by persons other than the workers of the Forest Department.

The Territory was divided into 7 separate charges *i.e.*, 3 Assistant Commissioner's rural charges, 3 forest rural charges and 1 urban charge. Separate charge superintendents, supervisors and enumerators for each charge were also appointed for conducting the enumeration.

IV Rural-Urban Classification

The entire area of this Territory has been treated as rural area excepting the area covered by the Port Blair Municipal Board. The Islands are sparsely populated and no place other than Port Blair qualifies to be recognized as urban. It may be added that even Port Blair was recognized as urban for the first time in the 1951 Census.

V Housenumbering and Houselisting

The housenumbering is the basis for the location of the census houses and the households. At the 1951 Census there was a proposal to have permanent housenumbering system. Since this proposal was not implemented it was necessary to undertake the housenumbering afresh. All the houses in each village were numbered serially from north to south according to the system of housenumbering prescribed for the purpose. The unit for housenumbering was a building. A Census House has been defined as a structure or part of a structure used for dwelling, shop, shop-cum-dwelling, workshop, factory, workshop-cum-dwelling or place of business, *etc.*, with a separate entrance. Thus the definition of the census houses was fairly comprehensive covering both residential and non-residential structures having independent access. The houselisting was undertaken after the housenumbering through the agency of the Revenue Officials in respect of the revenue area, Forest Officials in respect of the area covered by the forests and the enumerators in respect of the urban area.

VI Training

The success of Census Operations depends to a large extent, on the training of the personnel. The training of a large organisation made up of enumerators, supervisors and charge superintendents spread over the whole of Andaman and Nicobar

Islands was a great task. Though the instructions in the form of a booklet were distributed among enumerators, supervisors and charge superintendents it was too much to expect them to understand the concepts on their own. A number of training classes were, therefore, held under the direct supervision of the Superintendent of Census Operations. At these classes the instructions were fully read out and explained and the enumeration was practically demonstrated. The enumerators and supervisors were given instructions on items such as the method of locating house numbers, the communication of progress reports, the compilation of provisional figures, *etc.* It was found that apart from theoretical instructions, it was of immense help if some sample enumeration schedules with answers for a few typical cases were shown to the enumerators.

VII Enumeration

While the reference date was the 1 March, 1961 the actual enumeration started from the 10 February, 1961 and lasted upto the night of the 28 February, 1961. During the revisional rounds from 1 to 5 March, 1961 all births and deaths and the entries of the visitors not enumerated elsewhere were checked and entered with reference to the sunrise of the 1 March, 1961.

Almost all the persons employed on enumeration work were Government Officials. Special enumeration staff was deputed to enumerate the inhabitants of Little Andaman Island and the Southern and Central Group of Nicobar Islands. The enumeration of all the Onges of Little Andaman Island and the Shompens of the Great Nicobar Island was made for the first time in the history of census of this Territory. Special arrangements for transport of the personnel engaged in the enumeration of Onges and the Nicobarese and Shompens in the Central and Southern Group of Nicobar Islands was also made. For obvious reasons the Jarawas of South and Middle Andamans and Sentinelese of North Sentinel Island, which was hostile aboriginal tribes, could not be brought under enumeration.

So far as the coverage goes, except for the hostile Jarawa and Sentinelese tribes, the enumeration in this Territory was comprehensive and complete and case of omission through oversight or absence of proper care on the part of enumerators were rare. There was not a single case of default or unwillingness on the part of the population to give correct and complete replies to the questions.

VIII Census Schedules

(i) *Houselist*—The object of filling up the houselist form is to gather particulars and conditions of houses, factories, workshops, *etc.*, in the Union Territory, the products made or serviced, number of persons employed, kind of fuel or power used in

the factory or workshop and the material used in the construction of the house (walls and roofs). The number of persons living in the household as well as the rooms occupied by them will also be collected. The houselist form is reproduced in the following pages.

INSTRUCTIONS FOR FILLING UP THE HOUSELIST

Column 1—Line Number

Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building Number (Municipal or Local Authority or Census Number, if any)

This refers to the entire structure on the ground. There are, however, high, large or long buildings along a street or lane which have been partitioned or portions of which have been sold, which have distinct, separate main exit on the road and which belong to separate owners or occupiers or alternatively there are a series of different houses joined each to each by common walls on either side to make the whole look like one building but parts of which have been built at different times and belong to separate owners. Such distinguishable structures, although not separate from each other, should be regarded as separate buildings and given separate numbers. Each building should have a separate number. If in big cities a large mansion or building containing several census houses has a well known name by which it is generally known then the name of the building should also be recorded for convenient reference. If there are more than one structure within an enclosed or open compound belonging to the same person, e.g., the main house, the servants' quarters, the garage, etc., only one building number should be given. If the locality consists of a number of streets in a village, the buildings in the various streets should be numbered continuously and the streets should be taken in uniform order, from north-west to south-east. Experience suggests that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first numbering began. In a city enumeration block, the numbering will have to respect the axis of the street and not any preconceived geographical direction like North-West. A building under construction should also be given a number in the serial. If a new hut or building is constructed between the time when the housenumbering and houselisting have been completed and the census count it should

be given a new number beyond the last number of the serial for the village. Arabic numerals should be used for building numbers.

This will facilitate verification by supervisors. In areas, e.g., urban, where the buildings are already numbered by the municipal or other authorities, the enumerator may adopt the existing numbers in the houselist. In such cases, column 2 will carry the established municipal or local authority number which will facilitate identification. Where there are municipal or local authority numbers but there are reasons to believe that the number is incomplete or unsatisfactory, the municipal or local authority number may still be entered in column 2, but at the same time it will be necessary to serially number the buildings afresh for the purposes of census houselist. In that case, the new census serial for buildings will be entered in column 3 and the new census numbers for the buildings will have to be painted on the buildings themselves. In those cases where there are no municipal or local authority numbers in existence, all buildings will have to be serially numbered for the census and column 2 will contain entries of this census serial. This number will have to be repeated in column 3 with sub-numbers for census houses, if any.

Column 3—Building Number (Column 2) with sub-numbers for each Census House

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within

a building there are a number of census houses, then each census house will have two sets of numbers e.g., the number of the building and the sub-number of the census house. The census house number should be written after the building number in Arabic numerals in brackets such as 2(2), 3(2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—Purpose for which census house used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.

The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place, e.g., bank, etc. But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for place of worship or congregation or if unoccupied, 'vacant'. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—If this census house is used as an establishment, workshop or factory

These columns apply only in cases where the census house is a factory or workshop, i.e., where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of establishment or proprietor

Write the name of the establishment in the case of factories or large manufacturing concerns and

A. & N—2

write the name of the proprietor in the case of small workshops and establishments like confectioneries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if working)

The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used

If the factory or workshop uses steam or diesel engine or fuel, e.g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Columns 9 & 10—Description of Census House

Column 9—Material of wall

Under this column the material out of which most of the walls of the house are made, i.e., grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—Material of roof

The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, etc., should be

written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor.

Column 11—Sub-number of each Census Household with Census House number (Column 3)

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (A), (B), (C), etc. For example, if building No. 2 is also a census house and has three households, the household numbers will be 2(A), 2(B) and 2(C). If building No. 4 has two census houses, the houses will be numbered as 4(1) and 4(2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4(1A), 4(1B), 4(1C) and 4(2A) and 4(2B).

Column 12—Name of Head of Household

The name of the Head of each household given in column 11 should be written here. The Head of a household, for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

If the census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of the owner).

Column 13—Number of rooms in Census Household

If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14—Does the household live in own or rented house?

If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—Number of persons residing in census household on day of visit

Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—Remarks

In this column should be entered any useful or significant information about the building or the census house or the census household that has not been entered in any other column. For example, if the census house is a shop, the name of the proprietor or owner should be recorded in this column. If the census house is occupied by members of Scheduled Castes or Scheduled Tribes, it should be indicated by writing 'S.C.' or 'S.T.'. If a census house is vacant at the time of house-listing but there is a reason to believe that the house will be occupied in the course of the next few days and almost certainly before the census enumeration period, then the word 'Vacant' should be entered in column 4 and a remark should be entered in column 18 to the effect 'likely to be occupied shortly'. Thus, the Remarks column should be utilised for recording all significant information relating to the building or census house or census household.

Each person engaged in housenumbering of one block will have to make out an abstract at the conclusion of houselisting and housenumbering. This abstract will be in the form shown in the following page.

GENERAL INSTRUCTIONS TO ENUMERATORS

1. Enumerate all persons who are normally resident in the household, *i.e.*, those who live in the household and also those who have recently become members of the household through marriage or birth or other vital social or domestic ties and are present at the time of your visit.

2. Enumerate also all persons who are normal residents in the household even if they are absent at the time of your visit, provided they left the household on or after the 10 February, 1961 or if they had left earlier than 10 February, 1961, are likely to return before the sunrise of 1 March, 1961.

3. Enumerate a visitor, a boarder, or a guest found in the household at the time of your visit, *if he had not been enumerated before and if he will be away from his household between the 10 and 28 February, 1961*, and warn him not to permit any other enumerator to enumerate him even if he goes back by 1 March, 1961.

4. Do not enumerate pavement dwellers or others who do not form part of the household, when you are enumerating the households. These along with persons who do not normally reside in houses, *i.e.*, members of wandering tribes, tramps, *sadhus*, *etc.*, would be separately enumerated on the night of the 28 February and on the 1 and 2 March, 1961.

5. Each individual has to be enumerated in one slip. Before commencing enumeration of an individual make sure to fill the Location Code in each case. The Location Code in the slips will be the same as in the household schedule to which the individuals relate.

6. The questions have been briefly printed in the slips, *but only briefly*, and you should study the detailed question forms and instructions for answering them without which you will be liable to miss some of the range and implications of the questions. You should ask the questions *in the order in which they are given in the slips* and proceed to record the answers in their given order. You should make use of the abbreviations recommended in these instructions for recording the answers to the various questions. All abbreviations required to be entered within the geometric designs should be written well within the designs.

7. Make repeated enquiries about new born babies and very young children for they are liable to be missed because they neither talk nor walk and no meals are usually cooked for them.

8. Before leaving one household for the next make doubly sure that all the persons that are to be

enumerated in the household have been enumerated. As soon as you have completed the enumeration of the household fill up the Population Record at the back of the Household schedule for that household before you proceed to the next household. Strike the total for the number of males and females in the household and check it with the number of enumeration slips used before you sign the Population Record.

9. You should re-visit every household in your block during the period of final check (1 to 5 March) when you should enumerate every birth that has taken place in the household since your visit but before sunrise of 1 March. You should cancel the slip for any death that might have taken place since your last visit but before sunrise of 1 March by drawing a bold line diagonally across the slip and write DEATH along the diagonal line. You should enumerate any visitor who may have arrived to stay since your last visit and who says he has not been enumerated anywhere else. But you should not take notice of any birth or death or visit occurring after sunrise of 1 March, 1961. After your re-visit if you have added any new slip or cancelled any slip already prepared you should make corresponding changes in the Census Population Record at the back of the Household Schedule.

10. As soon as you have completed a pad, you should fill up the enumerator's abstract on the cover of the pad. After you have completed the enumeration of your block and filled up all the abstracts in the pads, you should total up your figures and prepare your abstract for your entire block and hand it over to your supervisor along with your pads.

11. Under the Census Act, every person is legally bound to furnish you with the information you need for recording your answers. You must not ask information on any matters not necessary for the purposes of the census, for example, the amount of any person's income. Nor must you disclose to any unauthorised person any information given to you or the results of the enumeration. All census entries are confidential and cannot be admitted as evidence in any civil proceeding whatever or in any criminal proceeding other than a prosecution for a census offence.

(ii) *Individual Slip*—In this form the details about each individual living were recorded from the 10 to 28 February, 1961. There were 24 questions grouped into 13 main questions for which the answers were recorded. The facsimile of the Individual Slip is reproduced below.

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP INDIVIDUAL SLIP

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household is left out. Please make repeated enquiries about infants and very young children, for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grand-children, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

Location Code

Write the Location Code of the household in each slip. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique & stroke in between on every slip.

Q. 1(a) Name

Write the name of the person enumerated. If a woman's name is not given out describe her as "so-and-so's mother, wife or daughter". If a woman does not take the name of her husband and that husband's particulars have to be recorded write "so-and-so's husband".

For newly born infants who have not yet been given a name write "Baby" and write "father's or mother's name".

Q. 1(b) Relationship to the Head of the household

In the case of the Head of the household write 'Head'. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. In the case of institutions like boarding houses, messes or chummeries which should be regarded as houses of 'unrelated persons living together', the manager or the superintendent or the person who has administrative responsibility or who by common consent is regarded as the Head should be recorded as Head of the household. All relationships in this question should be recorded in respect of Head of the household. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's

brother (uncle). 'Son' will include 'adopted son' or 'step-son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be. In the case of institutions, the member should be recorded as unrelated.

If on the check or revisional round between 1 and 5 March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

Q. 2 Age in completed years last birthday

Write age in years completed last birthday. For infants below one year, of age, write '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital Status

For Never Married	write	NM
Married	write	M
Widowed	write	W
Separated or Divorced	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4(a) Birthplace

- 1 If born in village or town in which enumerated write PL
- 2 If born in another village or town of district in which enumerated write D
- 3 If born in another district in the State of enumeration write name of district
- 4 If born in another State in India write name of district and State if name of district is known; otherwise write name of State.
- 5 If born in a country outside India, e.g., Pakistan or any other country write name of country
- 6 Persons born at sea or in air or in railway carriages or on road transport, e.g., buses, etc., should be entered as such.

Q. 4(b) Whether born in village or town

- 1 If born in a village write R
- 2 If born in a town which is considered a town at the present time even if it was not so considered at the time of birth write U
- 3 If the person enumerated is not in a position to say whether the place of birth is a village or town write the name of the place of birth as returned by him.

Q. 4(c) Duration of Residence

- 1 For a person born in village or town or city in which enumerated write X
- 2 For a person born in another village or town or city of district of enumeration or who was not born in district of enumeration write the number of completed years this person has been in the village/town/city of enumeration. (Do not take into account periods of temporary absence on leave or holiday or tour or business.)

- 3 If the duration of residence is less than one year write 0
- If the duration of residence is one year or over write the actual number of completed years of residence.

Q. 5(a) Nationality

- 1 For Indian nationals write I
- 2 For other nationals write the nationality in full.

Q. 5(b) Religion

For Hindu	write	H
Muslim	write	M
Christian	write	C
Jain	write	J
Buddhist	write	B
Sikh	write	S

For others write the answers actually returned.

Q. 5(c) Scheduled Castes and Scheduled Tribes

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district will be found in the 'instructions' given to you.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as *Harijan*, *Achhut*. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely *Harijan* tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H', or 'S', in the answer to Q. 5(b). Scheduled Tribes may belong to any religion. There are no Scheduled Castes in this Territory.

Q. 6 Literacy and Education

I. ILLITERATE OR LITERATE

For a person

- 1 Who can neither read nor write or can merely read but cannot write in any language write 0
- 2 Who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript, *i.e.*, if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. STANDARD OF EDUCATION

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of 'L'.

Q. 7(a) Mother Tongue

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7(b) Any other Language(s)

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Qs. 8 to 11 Working

These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You

have to record the answer in Qs. 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Qs. 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, *etc.*, if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, *etc.*, or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

After you have filled up the answers to Qs. 8 to 11 if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the Q. 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the Q. 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in Q. 8 to 11, *i.e.*, more than two of the Qs. 8 to 11 would have been filled up by some work. In such cases you should first ascertain the principal work, *i.e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.*, the work after his principal work which occupies the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

A & N-3

The following classification illustrates as to which answers should be entered under Q. 8 and which others under Q. 11.

Under Q. 8 : Cultivation involving ploughing, sowing and harvesting

- 1 Production of cereal crops (including Bengal gram), such as rice, wheat, *jowar*, *bajra*, maize; roots and tubers like potato, yam, beet, *etc.*; sugarcane, *etc.*
- 2 Production of pulses, such as *arhar*, *moong*, *masur*, *urd*, *khesari*, other gram
- 3 Production of raw jute and kindred fibre crops
- 4 Production of raw cotton and kindred fibre crops

Under Q. 11 : Other Field Produce, Plantation Crops

A—Other Field Produce

- 1 Production of other crops including vegetables not covered in Q. 8
- 2 Production of fruits and nuts in plantations, vines and orchards (like cocoanut, arecanut, *etc.*)
- 3 Production of wood, bamboo, cane reeds, thatching grass, *etc.*
- 4 Production of juice by tapping palms
- 5 Production of other agricultural produce (including fruits and nuts not covered by Sl. No. 2 and flowers) not covered above.

B—Plantation Crops

- 1 Production of tea in plantation
- 2 Production of coffee in plantation
- 3 Production of rubber in plantation
- 4 Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation)
- 5 Production of *ganja*, cinchona, opium, poppy, saffron, *etc.*
- 6 Production of other plantation crops not covered above

Q. 8 Working as Cultivator

For a person working as cultivator write 'C'. For a person not working as cultivator and for a person not working at all put 'X'.

For purposes of the census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as Cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid for wages in cash, kind or share such as share of the produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9 Working as Agricultural Labourer

Write 'AL' for a person working as Agricultural Labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put 'X'. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(a) & 10(b) Household Industry

If a person is working in a Household Industry write (i) the nature of work done by him in the Household Industry against Q. 10(a) and (ii) the nature of the Household Industry against Q. 10(b). Otherwise put 'X' in both Qs. 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house.

You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include profession such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against Q. 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c) If Employee in Household Industry

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write 'EE'. For all others put 'X'.

The following examples will illustrate how Qs. 10(a) to 10(c) should be filled up for persons working at Household Industry.

Q. 10—Working at Household Industry

(a) Nature of Work	(b) Nature of Household Industry	(c) If Employee
1 Spinning yarn	Spinning yarn in <i>Ambar Charkha</i>	X
2 Dyeing and printing yarn	Handloom weaving	X
3 Threshing and cleaning grain	Flour making <i>chakki</i>	X
4 Labourer employed for crushing oil	Oil <i>ghani</i>	EE
5 Tempering and polishing implements	Blacksmithy making agricultural implements	X
6 Labourer employed for making and firing kiln	Earthenware pottery	EE
7 Throwing and Turning pottery	Earthenware pottery	X
8 Making wooden doors and windows	Carpentry	X

Q. 10—Working at Household Industry—concl'd.

(a) Nature of Work	(b) Nature of Household Industry	(c) If Employee
9 Filling gold ornaments with lac	Goldsmithy	X
10 Labourer working on hosiery machine	Hosiery	EE
11 Keeping accounts	Hosiery	X
12 Polishing and scraping metal	Electroplating	X
13 Labourer employed for putting iron hoop on cartwheels	Cartwheelwright	EE
14 Repairing of guns	Gunsmithy	X
15 Bee Keeping	Production of honey	X
16 Tending cattle	Livestock raising	X

Q. 11 Doing Work other than 8, 9 or 10

If a worker is not working as a Cultivator or as an Agricultural Labourer or at any Household Industry write the actual work he is doing. If a person is working as a Cultivator or as an Agricultural Labourer or at Household Industry and also does some other work (including dairying or live stock raising, orchard or plantation, etc., a distinct from cultivation of crops), which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a) Nature of Work

In the case of persons not working or who work only as Cultivator or as Agricultural Labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b) Industry, Profession, Trade or Service

In the case of a person who is working and the nature of whose own work has been recorded in Q. 11(a), you should write here the nature of industry, profession, trade or service in which the person works.

As in the case of Q. 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired, should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom 'X' is put in Q. 11(a) put 'X' in this question also.

Important points to remember in Qs. 11(a) & 11(b)

1 Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and 'HW' written in brackets after the full description.

2 If a person makes the articles he sells, he should be entered as maker and seller of them.

3 Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4 The following are too vague and must not be used by themselves:

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5 Labourers—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6 **Machine Operators**—Always state the kind of machine giving its recognized name, if any.

7 **Shop-keepers, Retail Dealers, Shop Assistants**—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, Shop Assistant or Salesmen (if assisting) and state whether the business is whole-sale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8 **Transport Workers**—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9 **Services**—For a person engaged in the Defence Services write 'Service of Central Government'.

10 If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., 'Sales Manager' or a 'Manager' of Hardware Department, 'Machine Shop Foreman' or 'Boiler Room Foreman', etc. The following terms are insufficient by themselves:

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11 **Domestic Services**—In the case of any private servant, e.g., a cook or domestic servant; write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hostels, restaurants, boarding, houses, institutions, etc., the words hostel, restaurant, etc., should be added.

For persons in the employ of firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12 **Commerce**—Special care should be taken to see that the distinction between retail and whole-sale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c) Class of Worker

For a person who is

- 1 an **Employer**, that is, who hires one or more persons in his work described in Q. 11(a) write MR

- 2 an **Employee**, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind write EE

- 3 a **Single Worker**, that is, who is doing his work described in Q. 11(a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives write SW

- 4 a **Family Worker**, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind write FW

For a person for whom 'X' is put in Qs. 11(a) and 11(b) put 'X' in this question also.

Explanation :—

(i) An **Employer** is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An **Employee** is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A **Single Worker** for the purpose of Q. 11 (c) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a **Single Worker** will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A **Family Worker** is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working

season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d) Name of Establishment

Describe in detail the name of the factory, work-shop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom 'X' is put in Qs. 11(a), 11(b) and 11(c) put 'X' in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

Q. 12 Activity, if not Working

This question will apply to a person NOT WORKING.

Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the Qs. 8 to 11 above.

The following activities should be recorded in the case of persons NOT WORKING.

- 1 For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business write ST
- 2 For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW
- 3 For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age write D
- 4 For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work write R
- 5 For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence write B
- 6 For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution write I
- 7 For a person who has not been employed before but is seeking employment for the first time write NE
- 8 For a person employed before but now out of employment and seeking employment write UN

Explanation—If a person, who does not work, cannot be readily classified in any of the above categories, put him in Category 5 and write 'B' in the question. A retired person who has taken up

regular work again should not be entered in this question as he would have been entered for his new work in the Qs. 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

Q. 13 Sex

Write 'M' for Males; and 'F' for Females.
For eunuchs and hermaphrodites, write 'M'.
(iii) *Household Schedule*—The information about

Household Cultivation and Household Industry will be recorded in the Household Schedule. The Household Schedule should be filled in immediately after the individuals of a household are enumerated during the period 10 to 28 February, 1961 and before the enumerator leaves the household for visiting the next household. There are three sub-parts in the Household Schedule—Sub-part 'A' relating to Cultivation, sub-part 'B' relating to Household Industry and sub-part 'C' relating to Workers at Cultivation or Household Industry. The Household form is reproduced below.

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE HOUSEHOLD SCHEDULE

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every Household Schedule.

When you are visiting each household for enumeration you should write the Code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A *household* is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate Household Schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, *etc.*, you should write the nature of the institution within the rectangle like jail, hospital, *etc.*

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chumneries should also be regarded as census

households but of 'unrelated persons living together'. In such a household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate Household Schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the weekdays in town and spend sthe week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the Head of the household marked 'S.C./S.T.'. If the Head of the household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your district, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the household belongs within the parallelogram.

You should then fill up the part of the Household Schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land (land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for

cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);
- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
- (d) tenants holding land on temporary leases who are liable to ejectment; and
- (e) areas held on condition of rendering service either to a village community or to Government (this also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and
- (iv) the following:
 - (a) land taken for a fixed amount of money,
 - (b) land taken for a fixed amount of produce,
 - (c) land taken for a share of the produce,
 - (d) land for which money is paid partly in one and partly in any other form mentioned above, and
 - (e) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in Category 1 (ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by

the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry, or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold:

- (a) Household Industry should embrace manufacture, processing or servicing and may

include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.
- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. *Biri*-makers who either alone or with help of members of the family roll *biris* at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head', and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in whole time employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of households engaged in Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household

Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part. The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

IX Enumeration of Technically Qualified Personnel

A special census of technically qualified persons holding degrees or diplomas equivalent to degrees has also been undertaken alongwith the 1961 Census. A special enumeration card was left in each household if there is any technically qualified person found at the time of enumeration for being filled in by him and collected by the enumerator during his revisional rounds or later posted by the person concerned. The card is reproduced below :

TABLE A-I AREA, HOUSES AND POPULATION

FLY-LEAF

The Union Territory of Andaman and Nicobar Islands comprises the group of Islands situated between 6th and 14th degrees of north latitude and 92nd and 94th degrees of east longitude in the Bay of Bengal.

The Territory was not affected by the reorganisation of the States in 1956 and the area of this Territory according to the Surveyor General is 3,215 sq. miles. The Survey and Land Records Department of the Local Adiministration has not yet completed survey of all the Islands.

2 In Andaman and Nicobar Islands there is only one town and it was for the first time treated as urban in 1951. It has a Municipal Board and so the place has been treated as urban without applying any other criteria prescribed for the classification of places into towns for the purpose of 1961 Census. In 1951 Census, however, two localities called Police Line and Dudh Line were included within the limits of the town. But since these areas are outside the Municipal limits, they have been excluded from the urban area in 1961 Census. According to the 1961 Census Classification, this town has been classed as Class IV in 1961 and Class V in 1951.

3 For the purposes of enumeration, the forest camps, the Bush police camps and ships and boats have been treated as separate villages, besides the revenue villages.

4 The following statement shows the number of inhabited villages in the Territroy from 1901 to 1961:

	1961	1951	1941	1931	1921	1911	1901
ANDAMAN AND NICOBAR ISLANDS	399	210	182	239	212	224	63

5 The variation in the number of villages has been mainly in the Andaman Group of Islands, the number of villages in the Nicobar Group having remained practically constant. Andamans was a penal settlement till 1945 and the total population, the number of villages, the sex ratio, etc., were primarily determined by the number and sex of the convicts who arrived here to serve out their sentences. The sudden increase in the number of villages during the decade 1951-61 is due to the fact that during this period a large number of families from mainland were settled here under the Scheme for Colonisation of these Islands. The number of villages and towns in this Territory in 1961 is as follows:

Union Territory	Total No. of mauzas born on the jurisdiction list	No. of uninhabited mauzas	No. of mauzas included in the town		No. of inhabited mauzas	No. of towns
			Fully	Partially		
1 ANDAMAN AND NICOBAR ISLANDS	2 421	3 13	4 9	5 ..	6 399	7 1

6 For the purposes of 1961 Census, a Census house was defined as a structure or part of a structure, inhabited or vacant, or dwelling or shop or shop-cum-dwelling or place of business or workshop or school, etc., with a separate main entrance. A Census house used for living at the time of enumeration

has been treated as an occupied residential house.

7 The following table shows the density per Sq. mile, persons per occupied Census house, number of females per thousand males, percentage of rural and urban population to total population as in 1961 :

Union Territory/Islands	Persons per occupied Census house			No. of females per 1,000 males			Percentage of rural and urban population to total population		Density per Sq. mile		
	T	R	U	T	R	U	R	U	T	R	U
1 ANDAMAN AND NICOBAR ISLANDS	2 5	3 5	4 5	5 617	6 630	7 573	8 77.85	9 22.15	10 20	11 15	12 4,630
Andaman Islands	5	5	5	554	546	573	71.27	28.73	20	14	4,630
North Andaman Islands	5	5	..	689	689	..	100.00	..	12	12	..
Middle Andaman Islands	5	5	..	438	438	..	100.00	..	18	18	..
South Andaman Islands	5	5	5	569	565	573	54.10	45.90	45	25	4,630
Nicobar Islands	6	6	..	872	872	..	100.00	..	19	19	..

8 It is interesting to note that the number of persons per occupied Census house is the same in the urban area as well as in the rural areas of the Andaman group of Islands. The slightly higher number of persons per occupied Census house in the Nicobar Islands is due to the fact that the joint family system is still prevalent among the Nicobarese.

9 The number of females per thousand males is significantly lower than the all-India average both in the urban as well as the rural areas. The labourers employed in the various Government departments constitute over 20 per cent of the population of this Territory. Majority of these are recruited from the mainland for an initial contract period of two years and they are furnished only with bachelor

accommodation. Consequently most of the labourers come here alone leaving behind their families on the mainland. This is the main reason for the remarkably low sex ratio.

10 77.8 per cent of the area of this Territory is still covered by forests and no major industries have yet been established in this Territory. The density of population is consequently very low. The only town in this Territory is situated in the South Andaman Tahsil and it was the headquarters of the Administration even during the period of penal settlement. Consequently the growth of village in its neighbourhood was faster and that accounts for the slightly higher density of population in the South Andaman Tahsil, as compared to other rural areas.

NOTES:

* This includes area of uninhabited Islands also. The density has been calculated by including the area of uninhabited Islands.

1 The area in cols. 3(a) and 3(b) for 'Total' is as supplied by the Surveyor General of India. The urban area figures are those supplied by the Local Authorities and rural area has been derived by subtracting urban area from the figures of the Surveyor General.

2 The Sq. kilometre figures in col. 3(b) and the density figures in col. 4 in respect of urban area have been worked out by using the Sq. mile area figures correct to two decimal places (the area of Port Blair Town), and not by using the area figures upto one decimal place indicated in this table.

Statement showing 1951 territorial units constituting the present set up of Andaman and Nicobar Islands

There has been no change in territorial set up of this Territory. This Appendix has, therefore, not been prepared.

APPENDIX II

Number of villages with a population of 5,000 and over and towns with a population under 5,000

There is no village with a population of above 5,000 and no town with a population of less than 5,000. This Appendix has, therefore, not been prepared.

APPENDIX III

Houseless and institutional population

The houseless population in the Territory is nominal (76) and is confined almost exclusively to the urban area. Only one houseless person was enumerated in the rural area. The houseless population in urban area represents mostly the bazar porters. The institutional population represents the inmates

of hospitals, jail and labour barracks accommodating the labour force employees by the various departments of the Local Administration. All these are governmental institutions and there is no doubt at all about the accuracy of the census count.

VARIATION IN POPULATION DURING SIXTY YEARS

TABLE A-II VARIATION IN POPULATION DURING SIXTY YEARS

FLY-LEAF

This table furnishes data on the population and variation of population and also gives the growth of population from decade to decade from 1901 to 1961. In the absence of reliable vital statistics data, it

forms the main source for estimation of population. 2 In Andaman and Nicobar Islands the percentage variation of population from 1901 to 1961 has been as follows :

Union Territory		1901-61	1951-61	1941-51	1931-41	1921-31	1911-21	1901-11
ANDAMAN AND NICOBAR ISLANDS	Total	+157.81	+105.19	-8.28	+14.61	+8.78	+2.37	+7.34
	Rural	+100.71	+115.50	-32.02	+14.61	+8.78	+2.37	+7.34
	Urban	..	+ 75.63	..	..	..	..	..

3 Andaman and Nicobar Islands were under Japanese occupation for over three years from 1942 to 1945. After the reoccupation of this Territory by the British in 1945, the penal settlement was abolished and convicts and their descendants, who had settled down here, were offered repatriation to mainland at Government cost. Over 4,000 persons availed of the offer. This is the main reason for the decrease in population during the decade 1941-51. The number of deaths which resulted from the paucity of food and the rigours of life during the period of Japanese occupation also contributed

to the decline of population during that decade. Though families from the mainland are being settled in these Islands from 1949, the bulk of the settlement under the Colonisation Scheme has been from 1952 onwards. This Settlement together with the recruitment of large number of labourers from the mainland for execution of developmental works mainly account for the population more than doubling itself during 1951-61. 4 The ratio of number of females per thousand males has varied from 1901 to 1961 as shown in the following tables :

Union Territory		1961	1951	1941	1931	1921	1911	1901
ANDAMAN AND NICOBAR ISLANDS	Total	617	625	574	495	303	352	318
	Rural	630	662	574	495	303	352	318
	Urban	573	529	..	..	..	..	..

The abnormally low sex ratio both in urban and rural areas is due to the fact that the labourers recruited from the mainland by the Local Administration, who constitute over 20 per cent of the

population of these Islands, arrive here generally singly since they are recruited on contract only for a specified period and are generally provided with only bachelor accommodation.

VILLAGES CLASSIFIED BY POPULATION

TABLE A-III VILLAGES CLASSIFIED BY POPULATION

FLY-LEAF

The connotation of the term 'village' as adopted for the 1961 Census has been explained in the flyleaf to Table A-I.

2 A statement showing the percentage of population living in villages of the various population sizes with reference to total population is as follows :

Union Territory	Less than 200	200 to 499	500 to 999	1,000 to 1,999	2,000 to 4,999	5,000 to 9,999	10,000 and above
ANDAMAN AND NICOBAR ISLANDS	33.99	33.69	28.10	4.22	..	..	..

3 The main occupation of the rural population is cultivation and size of the villages established has naturally been determined by the area of the cultivable lands available. Besides there are a large number of labour camps established for extraction of timber, execution of public works, etc. and the population of each of these forest camps is also less than 500. All the villages in Nicobar Islands excepting in Car Nicobar also have a population of

less than 500. The population is primarily dependent on coconuts and other fruits available in the area and as such is scattered all over the Islands in small numbers according to the availability of coconuts and other fruits. These factors account for the major portion of the population of this Territory living in villages with a population less than 500.

4 A statement showing the percentage of villages and population by class of villages is as follows :

Union Territory	Year	Less than 500		500 to 999		1,000 to 1,999		2,000 to 4,999

	1961	94.49	67.68	5.01	28.10	0.50	4.22	..	..

5 The villages with a population of 2,000-4,999 indicated in 1951 have been included in the urban

area. As such there is no village of the above population size in the 1961 Census.

TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

TABLE A-IV TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

FLY-LEAF

The definition of 'town' adopted in this Territory for 1961 Census has been indicated in the fly-leaf to Table A-I.

2 There is only one town in this Territory. The place has been classified for the first time in 1951 as urban area. According to the Census Classification this town is Class IV in 1961 and Class V in 1951. The density per Sq. mile in this town is 4,630 in 1961 as against only 2,226 in 1951.

3 The urban area comprises the villages as under :

Name of town	Name of villages included in the town area
Port Blair	1 Chatham Island 2 Haddo village

Name of town	Name of villages included in the town area
Port Blair-concl'd.	3 Buniadabad village 4 Phoenix Bay village 5 Junglighat village 6 Aberdeen village 7 Aberdeen Bazar 8 South Point village 9 Shadipur village

The area of the town is 3.04 Sq. miles. The area figures for the constituent villages are not separately available.

NOTE :

Port Blair was classified as an urban for the first time in 1951. The figures for 1951, however, include figures for the localities 'Police line and Dudh line' persons 225 (Males 199, Females 26) which are outside the Port Blair Municipality.

M. stands for Municipality.

APPENDIX

New towns added in 1961 and towns in 1951 declassified in 1961

No new town was added in 1961 nor a town of 1951 has been declassified in 1961.

This Appendix has, therefore, not been prepared.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

FLY-LEAF

1.1 The Primary Census Abstract presents the basic data on the following aspects, namely, (i) area in sq. miles, (ii) the number of residential houses and the number of households, (iii) the total population and its sex break-up, (iv) the population of Scheduled Castes and Scheduled Tribes by sex, (v) literates and educated persons by sex and (vi) the total workers and non-workers also the break-up of workers by nine categories. The sex-wise distribution of the workers as well as the non-workers is also given. All the above particulars are furnished for the total as well as the rural and urban population separately for each unit.

1.2 The Primary Census Abstract gives figures for the Union Territory as a whole and then Island by Island for each inhabited Island and also for the town. In the District Census Handbook, the Primary Census Abstract will furnish figures for each village.

1.3 The figures furnished in the Primary Census Abstract relate to all persons who were alive at sunrise on the 1 March, 1961 and were present within the Territory (including territorial waters) of the Union Territory of Andaman and Nicobar Islands whether they lived in their normal residential houses or in institutions, such as hospitals, jails, labour barracks, etc., or were merely houseless persons like pavement dwellers or lived in boats, etc. They were all enumerated at the 1961 Census and their basic characteristics have been statistically presented in the Primary Census Abstract.

1.4 The total population of Andaman and Nicobar Islands as revealed by the Primary Census Abstract is as follows:

Persons	.	.	.	63,548
Males	.	.	.	39,304
Females	.	.	.	24,244

1.5 Columns 1 and 2 of the Primary Census Abstract indicate the unit for which the figures are presented. Column 1 gives the serial number of inhabited Islands, village or town as the case may be and in col. 2 the name of the unit is given. For convenience of enumeration the Territory has

been divided into 7 separate charges, i.e., 3 Assistant Commissioner's charges, 3 Forest Division charges and one Urban charge. However, for tabulation Tahsil (group of Islands) was taken as the lowest unit for rural slips and town for urban slips. The entire 6 rural charges constitute the 4 tahsils or group of Islands and the slips have thus been combined accordingly. It has, therefore, not been possible to give the serial number according to the location code numbers in col. 1 of the Primary Census Abstract. In col. 2 the name of the unit, namely, the tahsils or inhabited group of islands or town or villages have been shown (in the village-wise Primary Census Abstract found in the District Census Handbook the serial number of the villages would have been listed out under each tahsil or group of Islands and inhabited islands).

2 AREA

2.1 Column 3 of the Primary Census Abstract is to furnish the area of each of the units given in col. 1 and 2 for which figures have been presented in the subsequent columns. The area figures of this Territory for each village could not be furnished as the area of this Territory has not been surveyed by the Survey Department of the Local Administration. As such the area figures of the inhabited Islands as furnished by the Surveyor General have only been furnished in this column. The area of the urban unit is based on the figures furnished by the Survey Department of the Local Administration. The rural area of the South Andaman Islands has been arrived at by deducting the urban area figures from the total area of the Island.

3 OCCUPIED RESIDENTIAL CENSUS HOUSES AND HOUSEHOLDS

3.1 Columns 4 and 5 of the Primary Census Abstract present the figures of the total number of residential Census houses as also the number of households. The definition of a 'Census House' as adopted at the 1961 Census had already been explained in the fly-leaf to Table A-I. To recapitulate, a house represents

a structure while the household is the human group. An occupied residential Census house is a structure or a part of a structure with a separate main entrance used for the purpose of habitation by one or more households. A household means a group of persons who live together and take their meal from a common kitchen unless the exigencies of work prevented them from doing so. An occupied residential Census house may be used wholly as a dwelling or it may in addition be put to other use also. An occupied Census house is used for both as a shop, i.e., a place where all kinds of articles are sold either for cash or for credit, as well as for purpose of human habitation. Similarly it can be a workshop-cum-dwelling, i.e., a Census house used both as a workshop where some kind of production, repair or servicing goes on or certain articles are made out and sold as also used as a human habitation. All these categories of Census houses are taken as occupied residential Census houses for the purpose of the Primary Census Abstract.

4 PERCENTAGE OF CENSUS HOUSEHOLDS TO CENSUS HOUSES

4.1 The statement below gives the percentage of households to number of houses in the rural and urban areas for the Territory as a whole, Andaman group of Islands and Nicobar group of Islands and for each smaller groups of Islands separately.

Statement showing the percentage of households to number of houses in rural and urban areas

Union Territory/Islands	Percentage of households to number of houses		
	Total	Rural	Urban
1	2	3	4
ANDAMAN AND NICOBAR ISLANDS	105.07	103.58	109.58
A—Andaman Islands	102.24	99.04	109.58
(i) North Andaman Islands	98.13	98.13	..
(ii) Middle Andaman Islands	102.56	102.56	..
(iii) South Andaman Islands	104.73	100.09	109.58
(iv) Little Andaman Islands	100.00	100.00	..
B—Nicobar Islands	113.18	113.18	..

4.2 The above table would show the number of households in relation to the number of Census houses is the heaviest in Nicobars and South Andaman Islands being 113.18 per cent and 104.73 per cent respectively, i.e., every 100 Census houses were shared by 113.18 households in Nicobar Islands and 104.73 households in South Andaman Islands. The area of the entire Nicobar group of Islands

is rural and that of the South Andaman Islands is both rural and urban. In Car Nicobar Island alone which accounts for about 68 per cent of the total population of Nicobar Islands there are 120 households to every 100 residential Census houses. It will thus be seen that the congestion in the number of households to the number of houses in the Nicobar Islands is mainly felt in Car Nicobar Island. The slightly high percentage in the number of households to the number of residential houses in South Andaman Islands is due to the fact that certain houses have been partitioned amongst the present occupants who prefer to live separately in different portions of the same structure. The low percentage of the number of households to the number of residential houses in the North and Middle Andaman Islands is due to the fact that the place has been recently cleared for colonisation by the settlers and also the working of the Forest Divisions for extraction, etc., of forest wealth. In certain places in these Islands there are more residential houses than the number of households which is due to the fact that the house constructed for new arrivals have been temporarily occupied by the households from the neighbourhood.

5 DENSITY OF HOUSEHOLDS PER SQUARE MILE

5.1 The statement below gives the density of households per Sq. mile for total and for rural and urban areas for the Union Territory as a whole and for each group of Islands separately.

Statement showing the density of households per Sq. mile in rural and urban areas

Union Territory/Islands	Density of household per Sq. mile		
	Total	Rural	Urban
1	2	3	4
ANDAMAN AND NICOBAR ISLANDS	4.50	3.34	1,128.33
A—Andaman Islands	4.79	3.24	1,128.33
(i) North Andaman Islands	2.56	2.56	..
(ii) Middle Andaman Islands	3.79	3.79	..
(iii) South Andaman Islands	9.74	4.78	1,128.33
(iv) Little Andaman Islands	0.09	0.09	..
B—Nicobar Islands	3.51	3.51	..

NOTE:

For calculating density of households area figures of uninhabited villages have been excluded.

5.2 It will be observed from the above statement that the average density of household per Sq. mile in the Union Territory is 4.50. The highest percentage of household, i.e., 97.4 per cent in the South Andaman Islands is due to the existence of the urban area in this group of Islands

and also due to the fact that about 51 per cent of the total households and more than 48 per cent of the total population is living in this group of Islands. The headquarters of the Administration, trade, port facilities, etc., of this Territory are also situated in this group of Islands.

5.3 About 77.8 per cent of the area of this Territory is covered by forests and no major industries have yet been established in this Territory. The density of household is consequently very low.

6 SCHEDULED CASTES AND SCHEDULED TRIBES

6.1 Columns 9, 10 and 11 of the Primary Census Abstract give the population of Scheduled Castes sex-wise and cols. 12, 13 and 14 of the Primary Census Abstract similarly give population of Scheduled Tribes by sex for each unit indicated in cols. 1 and 2.

7 SCHEDULED CASTES

7.1 There are no Scheduled Castes in the Union Territory of Andaman and Nicobar Islands.

8 SCHEDULED TRIBES

8.1 The following statement shows the percentage of Scheduled Tribes population by males and females for rural and urban areas of this Territory as a whole to total population, for each group of Islands.

8.2 The population of Scheduled Tribes in this Territory is as follows:

Total	14,122
Males	7,318
Females	6,804

8.3 The following are the Scheduled Tribes of this Territory. The area restrictions of the Scheduled

Tribes according to the President's orders are noted against each.

1 Andamanese including

Chariar or Chari,	
Kora, Tabo or Bo,	
Yere, Kede, Bea,	
Balawa, Bojigiyab,	
Juwai and Kol	In Andaman Islands
2 Jarawas	In Andaman Islands
3 Onges	In Andaman Islands
4 Sentinelese	In Andaman Islands
5 Nicobarese	In Nicobar Islands
6 Shom Pens	In Nicobar Islands

8.4 Among the Scheduled Tribes, the Andamanese are found in both North and Middle Andaman Islands. The Jarawas in South and Middle Andaman Islands, the Onges in Little Andaman Islands, the Sentinelese in North Sentinel Island, the Nicobarese in the Nicobar group of Islands and the Shom Pens in Great Nicobar Island. The enumeration of the Jarawas and Sentinelese has not been possible as these tribes are hostile and will shoot arrows at sight of others. The enumeration of Onges and Shom Pens has been undertaken for the first time in 1961.

8.5 The population of Nicobarese, Onges, Andamanese and Shom Pens as enumerated in the 1961 Census is as follows:

1 Nicobarese	13,903
2 Onges	129
3 Shom Pens	71
4 Andamanese	19

8.6 There are no Scheduled Tribes in the urban area of this Territory.

9 LITERACY AND EDUCATION

9.1 Columns 15, 16 and 17 of the Primary Census Abstract give the number of literates and educated persons sex-wise for each unit.

9.2 The test for literacy as laid down in the Instructions to Enumerators for the 1961 Census was that a person who can both read and write any language is to be taken as literate. A person who can merely read but cannot write is not to be treated as a literate. "The test for reading is ability to read any simple letter either in print or manuscript, i.e., if the persons can read one of the examples in the enumeration handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a

simple letter. The test for literacy is satisfied if the person can with understanding both read and write." Children of ages 4 and below were automatically treated as illiterate.

9.3 The test for education was that the person should have passed a recognised written examination or examinations as proof of an education level

B—Nicobar Islands	13.76	19.96	6.66	..	..	..

9.5 33.63 per cent of the total population of the Territory represents the literate and educated persons. Andaman and Nicobar Islands occupy the 4th rank in literacy amongst the States and Union Territories of India as will be seen from the Literacy rates of various States and Union Territories of India given below:

Rank in 1961	State/Union Territory	Rate per 1,000 persons

attained. The highest examination passed was taken as the level for education.

9.4 The statement below shows the percentage of literate and educated persons to total population of males and females by rural and urban areas of this Territory as a whole and for each group of Islands separately.

9.6 Among the Islands of the Territory South Andaman records the highest percentage of literacy of 42.57 per cent. This is due to the fact that the urban area falls within this Island where the literacy rate is 50.16 per cent. The headquarters of the Administration and all other facilities exist in this group of Island. The other Islands showing the high percentage of literacy is Middle Andaman with 39.09 per cent. Little Andaman Island which is predominantly populated by the tribals, has shown itself to be the least literate in the Territory.

9.7 Because of the need for literacy in most of the urban occupations and the availability of greater facilities for education in urban centre the urban population is naturally more literate than the rural population. There are 50.16 per cent literates among the urban population as against 28.93 per cent literates among the rural population.

10 LITERACY AMONG FEMALES

10.1 The literacy rate among the female population of this Territory as a whole is 19.37 per cent, the percentage of literates among the females in the rural population being 15 per cent and among the urban population 35.66 per cent. The highest literacy among the females of rural population is in South Andaman Islands with 22.20 per cent and the lowest in the Nicobar Islands with 6.65 per cent.

11 WORKERS AND NON-WORKERS

11.1 At the present census the population has been divided broadly into two sections, namely, (i) workers, i.e., all those engaged in some productive

work; and (ii) non-workers. The emphasis at this census is not on income or dependence for livelihood but the actual work that a person does. Therefore, the working population irrespective of whether all the workers actually derive income or not, is classified according to the primary economic activity of the workers. The census enumerator mainly examined what work the person enumerated was doing during the 15 days preceding the day on which the person was enumerated. In respect of seasonal work like cultivation, if the person had some regular work for more than one hour a day, throughout the greater part of the working season, he is recorded as worker. If a person is temporarily incapacitated from work at the time of census enumeration due to illness or other cause he is treated as a worker depending on what he normally did. An undertrial prisoner though in prison during census enumeration is also treated as a worker if he did some productive work before he was apprehended. But a convict in a prison or long term inmates of hospitals or mental institutions are not treated as workers. A person who has merely been offered work but has not actually joined the work is also not treated as a worker. Persons under training as apprentices with or without wages are recorded as workers. Family workers, i.e., who do not directly derive any income but attend to work along with other members of the family are treated as workers. An adult woman who is engaged merely in household duties and does no other productive work is not treated as a worker. Work includes not only actual work but effective supervision and direction of work. A public or social service worker who is actually engaged in public service activity or political activity is taken as a worker. Thus all workers in any branch of productive work are netted as workers. These are all broadly classified under nine broad categories, namely, I—Working as Cultivators; II—Working as Agricultural labourers; III—Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations and Orchards and Allied activities; IV—Working at Household Industry; V—Working in Manufacturing other than Household Industry; VI—Working in Construction; VII—Working in Trade and Commerce; VIII—Working in Transport, Storage and Communications; and IX—Working in Other Services. All others who did not do any productive work irrespective of whether they derived some income such as through pensions, rents, etc., or did not derive any income were classified under Category X 'Non-workers'. These non-workers may cover (i) full-time students, (ii) a person engaged in unpaid home duties (housewife), (iii) a dependent,

i.e., infant or child not attending school, a person permanently disabled from working due to illness or old age, (iv) a retired person not employed again, a rentier or royalty receiver, or any other person of independent means of securing which he does not have to work and who does no other work, (v) a beggar, vagrant or independent woman without indication of source of income, (vi) a convict in jail or an inmate of penal, mental or charitable institutions, (vii) an unemployed person seeking employment for the first time and (viii) a person employed before but now out of employment and seeking employment.

11.2 Amongst workers, an important type of worker that has been taken cognizance and given separate recognition for the first time at this census, is those working in Household Industries. This is necessitated by the peculiar setup of the rural crafts and the economy of the Indian Craftsmen families, who form an important part of the Indian community. Amongst them, the industry is carried on a Household basis in which one or more members of the family together participate and produce the goods or articles. Their set-up is entirely different from that of an organised large scale industry. Most of the traditional handicrafts are carried on as household industries. A worker in a household industry will have an entirely different background and his skill is also of an entirely different nature from that of a factory worker.

Household Industry is defined as an Industry conducted by the Head of the household himself and or mainly members of the household at home or within the village in rural areas, and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a household industry is the participation of one or more members of household in rural areas. In the urban areas the industry should be confined to the house. A household industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions, such as, doctor, pleader, barber, washerman or astrologer.

11.3 Columns 18, 19 and 20 of the Primary Census Abstract give for each sex the total number of workers and succeeding columns the distribution of these workers sex-wise into the nine categories of workers. Columns 48, 49 and 50 of the Primary Census Abstract give total number of non-workers of each sex.

12 PROPORTIONATE DISTRIBUTION OF POPULATION

12.2 Out of the total population of the Territory 49.09 per cent are found to be economically active, i.e., 41.93 per cent males and 7.16 per cent females are working. If 1,000 persons of each sex are taken, their proportionate distribution amongst the different categories is as follows:

Category of workers	Males	Females
I Cultivators	133	51
II Agricultural Labourers	9	N
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	178	13
IV At Household Industry	52	108
V In Manufacturing other than Household Industry	29	2
VI In Construction	138	1
VII In Trade and Commerce	27	1
VIII In Transport, Storage and Communications	10	..
IX Other Services	102	12
Total I to IX	678	188
X Non-workers	322	812
Total	1,000	1,000
N=Negligible		

It will be seen from the above that the largest proportion of male workers are in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities. This mainly represents the forest workers engaged in the exploitation of forest wealth 'Construction' engages the next largest proportion of workers. 'Cultivators' takes the third place and 'Other Services' the fourth. As regards females, there are 108 workers for every 1,000 female population engaged in Household Industry. The next largest proportion of 51 females is found in, 'Cultivators'. Out of the 108 female workers engaged in Household Industry 107 are found in the Nicobar Islands mainly engaged in the making of copra in all Islands and earthen pots in Chowra Island. Putting Categories I and II together there are 142 workers among every 1,000 male population and 51 workers among every 1,000 female population engaged in cultivation. This does not represent the total proportion of population dependent on agriculture for livelihood as all the non-workers even in agricultural families have been separated from workers and included amongst all other non-workers engaged in agricultural pursuits excluding the non-working rent receivers. The next important items of work are construction and Household Industry. There are 138 males

and 1 female in every 1,000 of male and 1,000 of female population in construction and 52 males and 108 females workers in Household Industry. The large proportion of population engaged in the construction is due to increased and far-flung activities of the Public Works Department. As regards Household Industry the major portion of the proportionate population is in the Nicobar Islands engaged in making copra, etc.

12.3 As regards the urban population of the Territory the proportion of workers is as follows:

Persons	439	per thousand of total population
Males	662	per thousand males
Females	51	per thousand females

There is a fall in the proportion of workers amongst the urban population and particularly marked fall amongst the females. This is due to the larger proportion of students, etc., being concentrated in the urban area and amongst the females the urban female is generally a housewife who hardly engaged herself in any other economic activity, whereas a larger number of their counterparts in rural areas participate in various activities.

12.4 Taking the group of Islands, it is an interesting feature that the most advanced group of Islands of South Andaman has a lesser proportion of workers than the less advanced group of Islands of Middle Andaman and Nicobars, where there are 559 and 547 workers as against 458 of South Andaman. The large proportion of female workers are also noticed in the less advanced group of Nicobar Islands, i.e., 510 for every 1,000 of female population. A clearer picture will be presented in the concerned Census Publication containing the detailed economic tables.

12.5 Examining the proportion of workers in each industrial category in the Islands, the largest proportion of workers in Cultivators (Category I) seems to be in the North Andaman (393 males and 30 females). The least proportion in cultivators is found in Nicobar Islands (68 males and 89 females). Among the Agricultural Labourers (Category II) the largest proportion of workers is found in Middle Andaman (11 males and 2 females). Next comes South Andaman (11 males and 1 female). The least proportion in Agricultural labourers is found in the Nicobars

(1 male-females). In Category III, i. e., in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities the largest proportion of workers is found in Middle Andaman with 275 males and 7 females, followed next by South Andaman with 173 males and 6 females. The North Andaman Islands comes last with 102 males and female workers are negligible in proportion. In respect of Household Industry (Category IV) Nicobar shows the largest proportion with 247 males and 384 females. The next is South Andaman with 6 males and 1 female. The proportionate figures of workers in the North Andaman are negligible among both male and female workers. In Category V, i.e., Manufacturing other than Household Industry, the largest proportion of workers is found in South Andaman (50 males and 4 females), the next being Middle Andaman with 12 males, female workers under this category in this group of Islands are negligible. In Category VI, i.e., Construction, the largest proportion of workers is found in Middle Andaman with 211 males and 1 female. Next comes South Andaman with 152 males and 1 female. The least proportion of workers engaged in construction is found in Nicobar where there are only 44 male workers for every 1,000 male population. In Category VII, i.e., in Trade and Commerce, the largest proportion of workers

is found in Nicobar with 39 males but the proportionate figures of female workers are negligible. The next is in South Andaman with 30 males and 2 females. The least proportion of workers under this category of workers is found in North Andaman with 10 males. There is no female worker under this category in this group of Islands. In Category VIII, i.e., Transport, Storage and Communications the largest proportion of workers is found in South Andaman with 20 males. The next is Middle Andaman with 1 male. The figures of Nicobars are negligible and that there is no worker in North Andaman. In this category there is no female worker is found in this Territory. Amongst Other Services (Category IX) the largest proportion of workers is found in South Andaman with 153 males and 20 females. The next is Middle Andaman with 75 males and 7 females. The least proportion of workers is found in North Andaman with 25 males and 2 females

13 SEX RATIO AMONG WORKERS AND NON-WORKERS

13.1 The following statement gives the sex ratio (females per 1,000 males) among the total population of the Territory as a whole, each group of Islands under each category of workers and non-workers in rural and urban areas.

13.2 The sex ratio of general population has already been discussed in fly-leaf to Table A-II. Among the working population of the Territory, the female workers account for 171 for 1,000 workers in the total working population. 211 in rural working population and 44 in the urban working population. In rural area the sex ratio of working population is higher being 211 as against 44 in urban. In Category IV the sex ratio being 1,276 which is the highest. This is due to the large number of womenfolk engaged in the making of copra and pottery, *etc.*, in the Nicobar Islands. The sex ratio under this category in the Nicobar Islands is 1,352 for every 1,000 male workers. The next highest sex ratio is noticed in Cultivators, *i.e.*, Category I which is 235. Other Services follow with 71. In all other categories the sex

ratio is very low. In Category VIII, *etc.*, Transport, Storage and Communications there is no female workers. The highest sex ratio of workers of 769 is found in Nicobar Islands. In all other Islands the sex ratio of workers is very low. The high sex ratio among the non-working population prevails in all the Islands. The lowest sex ratio under this category is found in the Nicobar Islands which is due to the fact that the entire area is occupied by the Scheduled Tribe population of Nicobarese among them both men and women work in their plantations and also participate in all other activities.

13.3 More detailed account of the actual work and the occupation of workers in the different categories as also the details of the non-workers can be obtained from the economic tables.

* Denotes area excluding the non-censused portion of Jammu and Kashmir. The total area of Indian Union including the non-censused portion of Jammu and Kashmir is 1,264,341 Sq. miles.

† Survey or General's figures, as State Survey figures are not available.

NOTES

- Under col. 3 (a) represents the area figures furnished by Surveyor General of India, (b) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for State is obtained by subtracting the urban area from the State Survey area.
- The density figures of urban areas of State/Zone/India are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of individual towns in the respective units. For total and rural the density figures are worked out on area figures corrected upto 1 place of decimal.
- Population per Sq. mile has been calculated on area figures supplied by State Survey Department, except in the case of Jammu and Kashmir, Andaman and Nicobar Islands and North-East Frontier Agency for 'total' and 'rural' where these have been calculated on the figures supplied by Surveyor General of India.
- Area figures of some suburban units and Port Areas included as urban in Gujarat are not separately available. Population of these units is ignored for working out urban density. Rural density is based on the rural population only but the area figures also include the area of the urban units of which separate area is not available. The same procedure has been followed in the case of eight towns of Goa, Daman and Diu for which area is not available.

- 7 B-VII Part A—Persons Working Principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by Sex and by Secondary Work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural Labourer

Part B—Industrial Classification by Sex of Persons working in Non-household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry

- 8 B-VIII Part A—Persons unemployed aged 15 and above by Sex, Broad Age-groups and Educational Levels in *Urban Areas only*

Part B—Persons unemployed aged 15 and above by Sex and Educational Levels in *Rural Areas only*

- 9 B-IX Persons not at Work classified by Sex, Broad Age-groups and Type of Activity

The Economic Tables of the present census cover a very large field of data, more elaborate and more comprehensive than any of the previous censuses. The working population in each of the nine categories of workers adopted for the Primary Census Abstract and non-working population have been divided into broad age-groups, *i.e.*, 0-14, 15-34, 35-59 and 60 & above. This data have also been produced for the town separately. The working population has also been classified separately according to the occupation and industry as returned. The 1951 Census tabulation covered only the distribution of population by eight livelihood classes and their subdivisions into self-supporting persons, earning dependents and non-earning dependents. The self-supporting persons of non-agricultural classes were further classified by Divisions and subdivisions of the Indian Census Economic Classification Scheme.

The National Classification of Industries and Occupations as adopted by the Government of India have been adopted by the present census which classifies the economic data into 9 Divisions, 45 Major Groups and 343 Minor Groups of Industries and 11 Divisions, 75 Groups and 331 Families of Occupation as against the Indian Census Economic Classification where there were 10 Divisions and 88 subdivisions of industries services adopted for the last

census. The description of Divisions, Major Groups and Minor Groups of Industries and Divisions, Groups and Families of Occupations have been reproduced as an Annexure to Tables B-IV and B-V respectively.

All the Economic Tables have been prepared on the basis of the principal work of the working population. As already stated the principal work was indicated in the case of persons who are engaged in more than one work and the secondary work in the case of persons who are engaged in more than two productive activities. In the case of persons whose principal work is given as Cultivator, Agricultural labourer, or working at Household Industry and whose secondary work is any one of those, a cross-tabulation between the principal work and the secondary work was also made. Similarly a cross-tabulation of the workers engaged in non-household industry, trade, business, profession or service by Household Industry in the case of persons whose principal work is non-household Industry and who also work in Household

*Categories of Workers and Non-workers
of 1961 Census*

Workers

- II As Agricultural Labourers
- III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
- IV At Household Industry
- V In Manufacturing other than Household Industry
- VI In Construction
- VII In Trade and Commerce
- VIII In Transport, Storage and Communications
- IX In Other Services

Non-workers

- X Non-workers

In the 1951 Census the non-workers were known as non-working dependents and were classified according to the occupation of the person on whom they were dependent. In the present census, however, this population was distributed separately for the first time according to the types of

Industry was done. In addition there was also a cross-tabulation of population of occupational divisions and broad industrial categories by educational levels. In the case of occupational divisions there was a further cross-tabulation by broad age-groups. The non-working population was also classified according to eightfold activity under which they were enumerated. As against the above, in the 1951 Census there was a cross-tabulation of self-supporting persons and earning dependents with reference to the secondary means of livelihood which was confined to the eight livelihood classes. The self-supporting persons not engaged in cultivation were classified by divisions and subdivisions of industries and services according to the Indian Census Economic Classification. There was also a cross-tabulation of eight livelihood classes by age-groups and by literacy and educational standards.

The following are the categories of workers adopted in the present census and the eight livelihood classes adopted in the 1951 Census :

Livelihood Classes of 1951 Census

Agricultural Classes

- I Cultivators of land wholly or mainly owned and their dependents
- II Cultivators of land wholly or mainly unowned and their dependents
- III Cultivating labourers and their dependents
- IV Non-cultivating owners of land, agricultural rent receivers and their dependents

Non-agricultural Classes (Persons including dependents who derive their principal means of livelihood from

- V Production other than cultivation
- VI Commerce
- VII Transport
- VIII Other Services and Miscellaneous sources

activities, i.e., (i) Full-time students or children attending school who do no other work, (ii) Housewives and persons engaged in unpaid household duties, (iii) Infants and dependents including permanently disabled and old persons, (iv) Retired persons, rentiers and others who are

in receipt of income without doing any work, (v) Beggars, vagrants and others of unspecified source of existence, (vi) Inmates of penal, mental and charitable institutions, (vii) Persons not employed before but seeking employment for the first time and (viii) Persons employed before but now out of employment and seeking employment.

Broadly speaking the workers of the 1961 Census represent self-supporting and earning dependents of the 1951 Census taken together minus those in receipt of income without work such as rentiers, pensioners, beggars, etc. The groups of Divisions of the previous Censuses which are equivalent to the workers and non-workers of the present Census according to the broad Industrial categories are shown in the Annexure. The economic activities of workers and non-workers were recorded in answers to questions 8, 9, 10, 11 and 12. The instructions issued to the enumerators for recording answers to those questions are reproduced in the Introductory Note.

The correspondence between the nine industrial

categories mentioned above and the industrial classification (Indian Standard Industrial Classification) adopted for Table B-IV is given below :

TABLE B-I WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

FLY-LEAF

This table has been prepared separately for total, rural and urban population of the Union Territory as a whole and for the various smaller groups of Islands. This is a basic economic table prepared from the Primary Census Abstract showing the total population and the nine industrial categories of workers and non-workers.

Each category of workers and non-workers has been divided into four age-groups, viz.,

0-14, 15-34, 35-59 and 60+. The age-groups correspond to the different stages of life which have special significance with reference to the capacity to work, viz., children, young persons, middle aged persons and elderly persons.

This table corresponds to Table B-I of the 1951 Census and affords comparison of economic data of 1951 and 1961 Censuses.

In this Territory there is only one town *i.e.*, Port Blair and the data presented in the table relate to that town. A town with a population 100,000+ has been designated as a city in 1961 Census. Similarly an agglomerate growth of two or

more towns has been termed as town-group. There is no city or town-group in this Territory.
In this table economic data furnished in Table B-J including the age-groups is given for the town.

B-III PARTS A & B

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

**TABLE B-III INDUSTRIAL CLASSIFICATION OF WORKERS AND
NON-WORKERS BY EDUCATIONAL LEVELS**

FLY-LEAF

This table has been prepared in 2 Parts, Part-A relates to the urban population and Part-B relates to the rural population. In this table, the figures of each of the nine industrial categories of workers and non-workers have been cross-tabulated by literacy and educational levels. The data are presented besides the following educational levels in Part-A of the table for 'Illiterate and Literate (without educational levels)'.

The following are the educational levels shown in Part-A of the table :

- 1 Primary or Junior Basic
- 2 Matriculation or Higher Secondary
- 3 Technical diploma not equal to degree
- 4 Non-technical diploma not equal to degree
- 5 University degree or post-graduate degree other than technical degree
- 6 Technical degree or diploma equal to degree or post-graduate degree :
 - (i) Engineering
 - (ii) Medicine
 - (iii) Agriculture

- (iv) Veterinary and dairying
- (v) Technology
- (vi) Teaching
- (vii) Others

In regard to the educational levels in Part-B of the table it has been confined to :

- 1 Illiterate
- 2 Literate (without educational level)
- 3 Primary or Junior Basic
- 4 Matriculation and above

This is an important table as it shows the employment of persons of different educational levels among the various categories of workers and non-workers. This information will be useful for assessing the educational qualification of available man-power.

This table corresponds to Table D-VII of the 1951 Census when the literate and educated population was classified into the educational standard and eight livelihood classes for 'total' only whereas Table B-III A & B presented in this volume are for rural and urban respectively.

B-IV PARTS A, B & C

**TABLE B-IV INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS
AT WORK OTHER THAN CULTIVATION**

FLY-LEAF

This table has been prepared in three Parts. Part A relates to persons at work in Household Industry classified by branch of industry (Divisions and Major groups) and class of workers (Employee and others). In this table the figures are given for total, rural and urban. Part-B relates to persons at work in Non-household Industry, trade, business, profession or services classified by branch of industry (Divisions and Major groups) and class of workers, i.e., Employer, Employee, Single worker and Family worker. In this table the figures have been shown for total and urban. Part C of the table relates to persons at work in both Household Industry and Non-household industry classified by branch of industry, Divisions, Major groups and Minor groups. This part thus shows figures of Industrial classification of workers in industries upto Minor group without class to which the workers are engaged. The figures in this table are shown for total and urban. These tables have been compiled from the particulars collected in replies to questions 10(b), Nature of Household Industry, 10(c) If employee, 11(b) Nature of Industry other than Household Industry and 11(c) Class of worker. The terms Household Industry and Class of worker have already been defined in the Introductory Note.

These tables correspond to Table B-III of the 1961 Census and show the employment position

in the various sectors of economy. In 1951 Census the economic tables covered only the distribution of population into eight livelihood classes and their sub-divisions into self-supporting persons, earning dependents and non-earning dependents classified according to their economic status, viz., Employer, Employee and Independent worker according to the Indian Census Economic Classification.

In Table B-IV, Part C Minor groups having less than 1 per cent of workers of the respective divisions (less than 0.5 per cent in case of Division 2&3) have not been shown in the table. The Divisions thus affected are marked with an asterisk (*). All such Minor groups have been shown separately in run on lines in an Appendix to this table. All lines with nil entries have also been omitted in this table.

The Standard Industrial Classification and the list of common household Industries adopted for Classification of industries have been reproduced in Annexures I and II respectively. The Minor groups 000 to 004 and 005 partly) embracing Category I (Cultivators) and Category II (Agricultural labourers) and Minor group 999 relating to fresh entrants to the labour market have been excluded from code structure applied to this table. The first mentioned three groups constitute Categories I & II as indicated above and the last covers non-workers.

APPENDIX

Minor Groups having less than 1 per cent of workers of the respective division and less than 0.5 per cent in case of Minor Groups of division 2&3 only have been shown in this Appendix. The following abbreviations have been used:-

HI = Household Industry
NHI = Non-household Industry

M = Males
F = Females

TABLE B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK
OTHER THAN CULTIVATION

FLY-LEAF

This table has been prepared for total and urban population. It gives the occupational classification of persons who are working in non-agricultural occupations. For this purpose the National Occupational Classification has been followed with certain modifications given below. In this table data have been shown for Divisions, Groups and Families. Separate data have also been furnished for persons working in the household industry and the main industrial categories. This table has been compiled from the particulars collected in replies to questions 10(a) Nature of work and 11(a) Nature of work.

- (i) The occupational family 0X4 Geographers has been renumbered as 073 and the occupation of actuaries shown under 073 has been assigned 072, the last occupational family now embraces Statisticians and Actuaries.
- (ii) Occupational families 400, 401 and 414 relating to workers in categories I and II respectively have not been used as their categories were not coded for occupations.
- (iii) Occupational group X0 and its families X00, X08 and X09—Persons without occupations—relate to 'non-workers' and therefore, do not occur in the table.
- (iv) The code no. 063 has been renumbered as 069.
- (v) Occupational family 673—Teleprinter operators has been added to the original code structure.

In this table some of the occupations assigned to certain categories of workers seem to be incom-

patible. All such occupations are shown below with the appropriate category for these workers.

The above workers included in categories shown in column 2 could not be classified and included

in their most appropriate category indicated in column 7 for the reasons that the industrial category of each worker has been classified considering the principal activities of the departments/establishments where the worker was actually engaged. In this Territory there are certain departments/establishments where a large number of activities are under taken. For example the Forest Department is engaged in the extraction and regeneration of Forest produce. This department owns a large number of land and sea transport for transportation and sale of the produce, undertakes construction and maintenance of both residential and office buildings required for the workers, etc., maintains rest houses in remote areas and carries out repairs and construction of water crafts. Though there are persons engaged in the various activities other than Category III the principal activity of the department is

forestry. The workers of the Forest Department have, therefore, been classified and included in the category III irrespective of the nature of work done by each individual worker. Similar treatment has been given to persons of other departments/establishments engaged in various activities.

In this table certain families having less than 1 per cent of the workers of the respective division and less than 0.5 per cent in the case of families of division 7-8 only have been omitted and shown separately in run on lines in an appendix. The divisions thus affected are marked with an asterisk(*). All lines with nil entries have also been omitted in the table.

The National Occupational Classification adopted for classification of occupations has been reproduced in the annexure.

FLY-LEAF

As already stated in the fly-leaf to Table B-II there is only one town in this Territory and the figures that are presented in the tables pertaining to urban area relate to that town only.

This table has been prepared only upto the Divisions of the National Classification of Occupations. The figures of population under each occupational Division have been divided into four age-groups, *i.e.*, 0—14, 15—34, 35—59 and 60+. Figures for cols. 3 to 5 under each Occupational division for the different age-groups are not presented as the same were not tabulated. The figures under each age-group have further been sub-divided according to the broad educational levels as shown in Table B-III Part A. This table is likely to give useful data about those occupations which attract educated persons.

FLY-LEAF

This table has been prepared for total, rural and urban population. The data presented is a cross-tabulation in the case of persons whose principal and secondary works are any of the two (i) Cultivation, (ii) Agricultural Labourer and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household Industry or *vice versa*.

In this table the branch of industry, Division and Major Group according to the Indian Standard Industrial Classification of industry of workers engaged in Household Industry as Principal work has been shown. All lines with nil entries have been omitted in the table.

TABLE B-VIII PART B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

FLY-LEAF

This table has been prepared in two Parts. Part A relates to urban population. In the table of urban population there is a classification of unemployed persons by their sex, educational levels as in Table B-III Part A and broad age-groups of those who are seeking employment for the first time and also for those who were employed before but are now out of employment and seeking work. In the first case the age-groups which have been adopted are 15—19, 20—24, 25—29, 30—34, and 35+ and in the second case 15—19, 20—24, 25—34, 35—44, 45—59 and 60+.

The data presented in Part B of the table which relates to the rural population shows the educational levels for total unemployed persons. The educational levels for this table have been limited to Primary or Junior basic and Matriculation and above as in Table B-III Part B.

These tables will throw light on the educated unemployed which will be useful for the purposes of planning for employment and also assessing the available man-power.

B-IX

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

FLY-LEAF

This table has been prepared for total, rural and urban non-working population separately. The population has been divided into eight categories according to their activities. The eight categories are important and are based on the recommendations of the United Nations. In this table data are available separately for those who are earning without working. Separate data are also available in respect of house-wives, who though do domestic work are not classified as econmically active. Similarly data are also available in respect of school-attending children. There is a residuary category which consists of all other dependents including children and disabled persons. All these groups have further been classified by age-groups 0-14, 15-34, 35-59 and 60+. The data presented in this table if studited with reference to the age tables may throw light on

the school-going children who do not attend school and also persons in the working age-groups who are not working.

This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

In this table, however, there are 52 males in household duties (HW) which appear to be high. All these persons were actually resturned as House-wives and do no other work. Of them 27 are Shompens, a nomadic tribe, from the Great Nicobar and the remaining in various other places. The entire population of Shompens has been returned as non-workers though they actually have to do a certain amount of work in collecting their daily food.

SECTION III

PART II-C

CULTURAL AND MIGRATION TABLES

PART II-C—CULTURAL AND MIGRATION TABLES

Part II-C is presented in this Section which is devoted to the C (Social and Cultural) and D (Migration) Series of the 1961 Census tables.

According to the 1961 Census Tabulation Plan the following tables comprise C and D Series:

(i) C-Series Tables

- C-I—Composition of Sample Households by Relationship to Head of Family classified by Size of Land cultivated
- C-II—Age and Marital Status
- C-III—Part A—Age, Sex and Education in All Areas
- C-III—Part B—Age, Sex and Education in Urban Areas
- C-III—Part C—Age, Sex and Education in Rural Areas
- C-IV—Single Year Age Returns
- C-V—Mother-tongue
- C-VI—Bilingualism
- C-VII—Religion
- C-VIII—Scheduled Castes and Scheduled Tribes:
 - Part A—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes
 - Part B—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Tribes

(ii) D-Series Tables

- D-I—Non-Indian Nationals
- D-II—Place of Birth
- D-III—Migrants classified by Place of Birth and Duration of Residence in Place of Enumeration
- D-IV—Migrants to Cities classified by Sex, Broad Age-groups, Educational Levels and in case of Workers also by Occupational Divisions and Groups
- D-V—Cities showing Population born Locally, Migrants from Rural Areas and Migrants from Other Towns and Cities
- D-VI—Distribution of Industrial Categories of Workers and Non-workers by Place of Birth

All the above mentioned tables are published in this section for Andaman and Nicobar Islands except Part A of Table C-VIII and Tables D-IV and D-V.

Part A of Table C-VIII relates to Scheduled Castes and as no castes are Scheduled in this Union Territory, this part of the table is not applicable.

Similarly, Tables D-IV and D-V relate to cities only (a city is defined as a town with a population of 100,000 and over) and since there is no city in this Union Territory, these two tables have not been compiled.

Table C-I which is based on 20% sample according to the Tabulation Plan, is prepared for this Territory on full count. Data for this table were abstracted from Part II—Census Population Record—on the back of the Household Schedule—filled up during 1961 Census enumeration. The Household Schedule has been described in the Introductory Note of Part II-A in this volume.

All the other tables of C-Series have been tabulated from the answers recorded against the following questions in the Individual Slips at the 1961 Census enumeration.

Q. No.	Description
2	Age in completed years last birthday
3	Marital status
5(b)	Religion
5(c)	Scheduled Castes and Scheduled Tribes
6	Literacy and Education
7(a)	Mother-tongue
7(b)	Any other language(s)
13	Sex

In addition to Q. Nos. 2, 6 and 13 mentioned above and the economic questions 8, 9, 10 and 11, data for D-Series tables were collected from answers recorded against the following questions:

Q. No.	Description
4(a)	Birthplace
4(b)	Whether born in village or town
4(c)	Duration of residence
5(a)	Nationality

The form and content of the Individual Slip and the Instructions to Enumerators for recording the answers to the questions in the Individual Slip are given in the Introductory Note, Part II-A in this volume.

Each table presents statistics for the Union Territory of Andaman and Nicobar Islands, North Andaman Islands, Middle Andaman Islands, South Andaman Islands and Nicobar Islands.

Every table is preceded by a fly-leaf which gives the nature of statistics presented in the table.

C-I

COMPOSITION OF HOUSEHOLDS

TABLE C-I—COMPOSITION OF HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY

FLY-LEAF

This table has been prepared on full count instead of 20% sample.

The table gives the total household population, number of heads of households, spouses of heads of households, married relations, other relations and unrelated persons with sex break-up separately for rural and urban areas. For rural areas distribution for (i) households engaged neither in cultivation

nor in household industry (ii) households engaged in household industry only and households engaged in cultivation according to size of land have been presented.

Household population in cols. 4-6 differs from the household population derived from Table A-I and its Appendix III due mainly to the inclusion of institutional population.

[illegible]

C-II

AGE AND MARITAL STATUS

TABLE C-II—AGE AND MARITAL STATUS

FLY-LEAF

This table corresponds to Table C-III—Age and Civil Condition of 1951. While the data of marital status were tabulated on a 10% sample in 1951, this table is based on full count.

Answers to Q. 3—Marital status, yielded data for this table. The form of the question and the Instructions to the Enumerators on the mode of recording the answers have already been reproduced in the Introductory Note of Part II-A in this volume.

The table gives data for 'persons', 'males' and 'females' classified by 'total', 'rural' and 'urban' in the age-groups 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59,

60-64, 65-69, 70+ and age not stated, separately for 'never married', 'married', 'widowed', 'divorced or separated' and 'unspecified status'. There are, however, no figures under 'age not stated' and 'unspecified status' in this Territory.

Data are presented in the table for the Union Territory, North Andaman Islands, Middle Andaman Islands, South Andaman Islands and Nicobar Islands.

As North Andaman Islands, Middle Andaman Islands and Nicobar Islands are wholly rural (there being no urban area in them), figures for these two Islands are given for total only which are the same for rural.

PART B—AGE, SEX AND EDUCATION IN URBAN AREAS ONLY
PART C—AGE, SEX AND EDUCATION IN RURAL AREAS ONLY

TABLE C-III—AGE, SEX AND EDUCATION

FLY-LEAF

Table C-III has three parts. Part A relates to *all areas*, Part B to *urban areas* and Part C to *rural areas*. It corresponds to Table C-IV—Age and Literacy of 1951. The present table covers the entire population while in 1951 the table was based on a 10% sample. Another distinguishing feature is a variation in the adoption of age brackets; in 1951 the statistics were presented by age-groups 0-4, 5-9, 10-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75 and above. The age-groups adopted for this table are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59 and 60+. Another important feature of this table is the tabulation by number of educational levels attained besides the classification of 'illiterate' and 'literate' to which 1951 was limited. Different educational levels, however, have been adopted for presentation for rural and urban areas in 1961.

Answers to Q. 6—Literacy and Education yielded material for this table. The form of the question on the Individual Slip and the Instructions to Enumerators for filling up the answers have already been reproduced in the Introductory Note of Part II-A in this volume.

In Parts A and C of this table data are presented by (1) Illiterate, (2) Literate (without educational level), (3) Primary or Junior Basic and (4) Matriculation and above. In Part B which is for urban areas only, in addition to the above mentioned first three characteristics, figures are also given for the following educational levels:

- 1 Matriculation or Higher Secondary;
- 2 Technical diploma not equal to degree;
- 3 Non-technical diploma not equal to degree;
- 4 University degree or post-graduate degree other than technical degree;
- 5 Technical degree or diploma equal to degree or post-graduate degree in
 - (a) Engineering
 - (b) Medicine
 - (c) Agriculture
 - (d) Veterinary and dairying
 - (e) Technology
 - (f) Teaching
 - (g) Others

In all the three parts, literacy and educational levels have been cross-tabulated by 'males' and 'females' in the various age-groups mentioned earlier for the Union Territory, North Andaman Islands, Middle Andaman Islands, South Andaman Islands and Nicobar Islands. As North Andaman Islands, Middle Andaman Islands and Nicobar are wholly rural, Part B of the table has not been compiled for them. Similarly there is only one town in the whole of Union Territory which is located in South Andaman Islands. Figures for urban areas have not been shown in Part B separately for South Andaman Islands because figures of this part for the Union Territory as a whole and for South Andaman Islands are the same.

All children aged 4 or below have been treated as illiterate.

In addition to the data relating to the scientific and technical degrees and diplomas collected through the Individual Slips, it was found desirable to undertake a more detailed investigation not only into the full spectrum of scientific and technical disciplines but also into certain conditions of work and services obtaining among scientific and technically trained personnel. This was accomplished through a specially designed Business Reply post-card called as the "S & T Card". During his visit to each household between 10 and 28 February 1961, a census enumerator was required to leave these special cards, one for each of the members of such household which contained person or persons trained in science or technology with a request that the card should be completed by the person himself and kept ready for collection by him when he visited the household again during the revisional round on 1-5 March 1961. Cards which had been filled in in the meantime were collected by the enumerator during the revisional round for onward transmission to the Registrar General. In case of those which had not been filled in, the enumerator was instructed to request the person to fill it in carefully and post the card in the post office as early as practicable.

Based on the information received through these cards, eight tables have been prepared and are presented in the Appendix to Table C-III.

APPENDIX

TECHNICALLY QUALIFIED PERSONNEL

TECHNICALLY QUALIFIED PERSONNEL

NOTE

As already stated in fly-leaf of Table C—III, a special census of Scientifically and Technically qualified persons holding degrees or recognised diplomas was conducted at the present census. The filled-in cards received through enumerators or directly posted by the respondents were scrutinised and those having either of the following qualifications were selected for processing.

- 1 *Science*—Anybody holding B.A. or B.Sc., M.A. or M.Sc. or higher degrees (Ph.D., etc.) in Science subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geophysics, Geography, etc.
- 2 *Engineering*—Anyone holding recognised degree or diploma in Engineering
- 3 *Technology*—Anyone holding Degree or Diploma in technical subjects like Chemical Technology, Leather Technology, Textile Technology, Glass Technology, Ceramic Technology, Food Technology, etc.
- 4 *Medicine*—Persons holding Degree or Diploma in Medicine and/or Surgery. The undergraduates/scientists, i.e., those who have not got any Bachelor's Degree, or Mechanics and Technicians even though holding certificates will not come under the enumeration.

The results after processing have been presented in the following eight State tables:—

Table I—Classification by each Branch and Sub-branch of Science or Technology

Table II—Type of Activity and Marital Status of Persons in each Branch of Science or Technology

Table III—Year of obtaining Post-graduate Degrees in Physical Sciences and Graduates and Doctorates in Engineering, Technology and Selected Branches of Medicine

Table IV—Persons holding Degrees in Engineering, Technology and Selected Branches of Medicine, and also Degrees in Selected Branches of Physical Sciences

Table V—Nature and Sector of Employment of Persons in each Branch of Science or Technology

Table VI—Total Monthly Income of Persons employed in each Branch of Science or Technology classified by Sector of Employment

Table VII—Tenure and Sector of Employment of Persons in each Branch of Science or Technology

Table VIII—Age and Period of Unemployment of Unemployed Persons qualified in any Branch of Science or Technology

The enumeration of these personnel was conducted throughout the Union Territory.

SINGLE YEAR AGE RETURNS

TABLE C-IV—SINGLE YEAR AGE RETURNS

FLY-LEAF

This table corresponds to Table C-V of 1951 with a difference that while the 1951 table was based on a 10% sample of population, this table gives the single year distribution of the entire population. The question of age in 1961 Census was : Q. 2—Age on last birthday. The Instructions to Enumerators on the mode of eliciting an answer and recording it on the Individual Slip have already been reproduced in the Introductory Note of Part II-A in this volume.

This table gives the figures for total/rural/urban for each sex for single year age from 0-100 years. Figures of age above 100 years have been clubbed together and shown under 'above 100'. Details of persons aged above 100 years are given at the end of this fly-leaf in a statement.

Statistics presented in this table relate to un-smoothed age data, i.e., age as obtained for each person enumerated in the Individual Slip.

Smoothed age data are given in Census of India Paper No. 2 of 1963.

Union Territory/Islands	Single Year Age	Total	
		Males	Females
1	2	3	4
Andaman and Nicobar Islands	105	1	..
	107	..	1
	110	1	..
	112	1	..
North Andaman Islands	107	..	1

Middle Andaman Islands	112	1	..
South Andaman Islands	105	1	..

NOTE :

There are no figures for Nicobar Islands.

There are no figures in urban area and so total figures are the same as rural. Hence figures for total alone have been presented.

MOTHER-TONGUE

TABLE C-V—MOTHER-TONGUE

FLY-LEAF

This table has been prepared separately for total, rural and urban population. This is an important table for our country where a large number of languages and dialects are spoken. A study of the languages returned as mother-tongues has been undertaken and the table has been presented in a rational manner. Fly-leaf prepared by the Linguist is reproduced below :

(v) In column 2 standardized spellings according to the Linguistic Survey of India have been given against each mother-tongue of column 1.

Note 1

- (i) The following mother-tongues arranged in alphabetical order in column 1 of the table given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother-tongue in column 3.
- (ii) If in column 3, no Classification No. is given against any mother-tongue of column 1 then it would mean that the name refers to either old or middle Indo-Aryan language or a language group or branch or family name from the Linguistic Survey of India.
- (iii) Wherever a tongue is mentioned in column 3 it is to be understood that the mother-tongue is either a dialect or another name or form of the tongue mentioned against it in column 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.
- (iv) If in column 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in column 2 the name of the classified language or group will be given of which the mother-tongue of column 1 is either a dialect or another name or form. In such a case the number of classified language of column 2 has been given in column 3.

BILINGUALISM

TABLE C-VI—BILINGUALISM

FLY-LEAF

This table has been prepared for total only and gives statistics of the speakers of subsidiary languages spoken by persons in addition to their mother-tongue. Question 7(b)—Any other language(s) of the Individual Slip gave the data for this table. The Instructions to Enumerators for eliciting answers for recording have already been given in

the Introductory Note to Part II-A in this volume. Although, in the case of respondents who spoke and understood more than one language in addition to their mother-tongues, two languages were recorded by the census enumerators, the tabulation was based only on the language recorded first in the Individual Slip.

RELIGION

TABLE C-VII—RELIGION

FLY-LEAF

This table is analogous to Table D-II—Religion of 1951 and gives data for rural and urban areas by sex break-up. The question of religion asked in the 1961 Census enumeration and the Instructions to Enumerators for recording answers on the Individual Slips have been given in the Introductory Note of Part II-A in this Volume.

Figures are presented separately for each of the six numerically important religions, viz., Buddhism, Christianity, Hinduism, Islam, Jainism and Sikhism.

For other religions, which are numerically less important, the figures have been lumped together and shown in the column "Other Religions and Persuasions". Details of these lumped figures appear in the Supplement to this table.

As there is no urban area in North Andaman Islands, Middle Andaman Islands and Nicobar Islands, these are wholly 'rural' and so figures are presented only for 'total' against these units, which are the same for rural.

SCHEDULED CASTES AND SCHEDULED TRIBES

**Part A—Classification by Literacy and Industrial Category of Workers and
Non-Workers Among Scheduled Castes**

**Part B—Classification by Literacy and Industrial Category of Workers and
Non-Workers Among Scheduled Tribes**

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

FLY-LEAF

Part A—(Not applicable).

Part B—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Tribes

As there are no castes Scheduled in the Union Territory of Andaman and Nicobar Islands, Part A of the table has not been compiled and so presentation of data are limited to Part B relating to Scheduled Tribes only.

Although there was a corresponding table in 1951 Census, viz., Table D-III, no statistics were presented in that census for this Territory as scheduling of Tribes had not been notified at that time. Under the Constitution (Andaman and Nicobar Islands) Scheduled Tribes Order, 1959 the following Tribes were notified as Scheduled Tribes :

In the Andaman Islands—

(1) Andamanese including Chariar or Chari, Kora, Tabo or Bo, Yere, Kede, Bea, Balwana, Bojigiyab, Juwai and Kol

(2) Jarwans

(3) Onges

(4) Sentinelese

In the Nicobar Islands—

(1) Nicobarese

(2) Shom Pens

The 1961 Census enumeration of Scheduled Tribes was made in pursuance of the above Order. The question adopted in 1961 Census to elicit information about members of Scheduled Tribes was Q. 5(c) of the Individual Slip, which has been already reproduced along with the Instructions to Enumerators to record answers to this question in the Introductory Note of Part II-A in this Volume.

Data relating to this table have been obtained by a cross-tabulation of the above question with the following questions which relate to the economic and social characteristics of the respondents.

Q. 6 Literacy and Education

Q. 8 Working as Cultivator

Q. 9 Working as Agricultural labourer

Q. 10 Working at Household Industry

Q. 11 Doing work other than 8, 9 or 10

Q. 13 Sex

Statistics are presented in the table for total, rural and urban separately by sex break-up giving the distribution of the members of Scheduled Tribes by literacy and workers and non-workers; workers further classified in the broad nine industrial categories.

The broad nine industrial categories of workers adopted in the 1961 Census are :—

I Working as Cultivator

II Working as Agricultural labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, etc.

IV Working at Household Industry

V Working in Manufacturing other than Household industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

So far as literacy is concerned, the distribution is given under 'Illiterate' and 'Literate and educated persons'. Both these concepts have been spelt out in the Introductory Note mentioned above.

Figures are separately given for the Union Territory as a whole and for the smaller administrative units, viz., North Andaman Islands, Middle Andaman Islands, South Andaman Islands and Nicobar Islands. Except for South Andaman, Islands, other units are entirely rural and so figures are presented for total only against these units which are the same as rural.

NON-INDIAN NATIONALS

TABLE D-I—NON-INDIAN NATIONALS

FLY-LEAF

This table which recalls Table D-VI of 1951, gives the distribution of foreign nationals resident in the Territory of Andaman and Nicobar Islands at the time of 1961 Census by their nationalities and by sex break-up.

Statistics are presented in this table for the Union Territory as a whole and also for the smaller administrative units, viz., North Andaman Islands, Middle

Andaman Islands, South Andaman Islands and Nicobar Islands, separately. As the non-Indian nationals resident in this Territory belong to four countries in Asia, viz., Burma, China, Nepal and Pakistan, all these have been shown in the table itself and the Appendix prescribed in the tabulation plan of 1961 Census which was meant to give details of countries included 'elsewhere' in the table, has been dispensed with.

PLACE OF BIRTH

TABLE D-II—PLACE OF BIRTH

FLY-LEAF

This table gives the distribution of population by birth-place. It is prepared for total, rural and urban populations separately by sex break-up. Against the Union Territory as a whole and against South Andaman Islands figures appear for total, rural and urban but against the remaining three administrative units, viz., North Andaman Islands, Middle Andaman Islands and Nicobar Islands, figures are given for total only, as these units are entirely rural and so the figures for total and rural are identical.

This table corresponds to Table D-IV of 1951. An additional feature of the present table is that birth-places of persons born in India are classified by rural and urban areas. The same classification obtains in respect of the place of enumeration which will indicate the nature of migration.

Rural and urban classification in column 2 of the table relates to the birth-place and similar classification in the horizontal spread of the table refers to place of enumeration.

MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE
IN PALACE OF ENUMERATION

TABLE D-III—MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE
IN PLACE OF ENUMERATION

FLY-LEAF

This is a new table introduced in 1961 Census on migration, which will supplement the information contained in Table D-II for a detailed study of in-migration.

In this table data are presented by rural/urban birth-places cross-classified by duration of residence in the place of enumeration, the periods of duration of residence being :

Less than 1 year;	11-15 years;
1-5 years;	16 years and over; and
6-10 years;	Period not stated.

Rural/urban classification in column 1 of the table relates to birth-place, whereas in column 2 it refers to place of enumeration.

Figures for total, rural and urban (denoting place of enumeration) are given against the Union Territory as a whole and against South Andaman Islands; they appear only for rural against North Andaman Islands, Middle Andaman Islands and Nicobar Islands as these are entirely rural.

The term 'district' occurring in the opening entry of the table in column 1, denotes the entire Union Territory of Andaman and Nicobar Islands.

**DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND
NON-WORKERS BY PLACE OF BIRTH**

**TABLE D-VI—DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND
NON-WORKERS BY PLACE OF BIRTH**

FLY-LEAF

This table gives the distribution of population by birth-place (rural or urban in the case of persons born in India) cross-classified by workers and non-workers and workers being further classified into broad nine industrial categories. Statistics are presented for total, rural and urban separately in the case of the Union Territory of Andaman and Nicobar Islands and South Andaman Islands. For the three remaining administrative units, viz., North Andaman Islands, Middle Andaman Islands and Nicobar Islands, statistics are given for total

alone, as these areas are wholly rural, there being no town situated in them and so the rural figures are the same as those of total.

Rural/urban in column 2 of the table denotes the birth-place whether it is rural or urban.

The term 'district' occurring in Section A item I(b) in column 1 refers to the entire Union Territory of Andaman and Nicobar Islands.

The concepts of 'worker' and 'non-worker' and the description of the broad nine industrial categories have already been spelt out elsewhere in this Volume.

SECTION IV

PART III

HOUSEHOLD ECONOMIC TABLES

HOUSEHOLD ECONOMIC TABLES

The Household Economic Tables are a special feature of the 1961 Census. In these tables the economic data for the first time have been collected and presented on the basis of Households. Considering the small population of this Territory the tabulation of data for these tables were made on full count as against 20% sample count prescribed in the Tabulation Plan. These tables form Part III of the 1961 Census publications. The following are the eight tables included in this Volume.

- (i) B-X—Households (i) engaged neither in Cultivation nor Household Industry, (ii) engaged either in Cultivation or Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry for *All Areas*.
- (ii) B-XI—Households engaged in Cultivation classified by Interest in Land and Size of Land cultivated in *Rural and Urban Areas* separately.
- (iii) B-XII—Households engaged in Cultivation only classified by Size of Land cultivated and Number of Family Workers and Hired Workers in *Rural and Urban Areas* separately.
- (iv) B-XIII—Households engaged both in Cultivation and Household Industry Showing Size of Land cultivated classified by Principal Household Industry in *Rural and Urban Areas* separately.
- (v) B-XIV—Households engaged only in Household Industry classified by Principal Household Industry in *All Areas*.
Part A—Households classified by Major Groups of Principal Household Industry and Number of Persons engaged.
Part B—Households classified by Minor Groups of Principal Household Industry.
- (vi) B-XV—Households engaged both in Cultivation and Household Industry classified by Size of Land in *Rural and Urban Areas* separately.

(vii) B-XVI—Principal Household Industry classified by Period of Working and Total Number of Workers engaged in Household Industry in *All Areas*.

(viii) B-XVII—Households classified by (i) Number of Male and Female Members by Size of Households and (ii) engagement (a) neither in Cultivation nor in Industry (b) in Household Industry only and (c) in Cultivation sub-classified by Size of Land cultivated.

The above tables present data relating to the extent of land under cultivation by households with various rights on land, nature of Household Industry, period of working of the Household Industry, etc. The various terms used and the meaning attached to them are explained in the 'Instructions to the Enumerators' for filling up the Household Schedules which have been given in the Introductory Note of Part II-A in this Volume.

Further Cultivation for purposes of sub-part A of the Household Schedule involves ploughing, sowing and harvesting and consists of the following :—

- 1 Production of cereal crops (including Bengal gram) such as rice, wheat, *jowar*, *bajra*, maize, roots and tubers like potato, yam, beet, etc., sugarcane, etc.
- 2 Production of pulses, such as *arhar*, *moong*, *masur*, *urd*, *khesari*, other gram.
- 3 Production of raw jute and kindered fibre crops.
- 4 Production of raw cotton and kindered fibre crops.

It is not possible for the household to supervise the cultivation of land situated at a great distance from the household. But at the same time if the head of the household insists that he is cultivating the land it would not be feasible to question his statement. In such a case the position should be explained to the head of the household as per the instruction explained in the Introductory Note Part II-A in this Volume. Even after explaining the position if the head of the household insists that the land is cultivated by the household it should be recorded as such.

Out of the ten tables prepared from the Household Schedules 8 tables have been presented in this Volume, one table in Part II-C—Cultural and Migration Tables and one table in Part V-B—Scheduled Castes and Scheduled Tribes.

FLY-LEAF

This table has been prepared on full count for total, rural and urban households for the Union Territory as a whole and for the various smaller groups of Islands. All the households have been divided into four categories, viz., (i) Households engaged neither in Cultivation nor Household Industry, (ii) Households engaged in Cultivation only, (iii) Households engaged in Household Industry only and (iv) Households engaged both in Cultivation and Household Industry. This table thus divides all the households in three important sectors of economic

activity of the Union Territory. Similar economic data were never collected or tabulated on a household basis in the past censuses.

Cultivation includes ownership, tenancy cultivation and agricultural labour. Household Industry for the present census has been defined as Industry (not on the scale of registered factory) conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas.

TABLE B-XI—HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN *RURAL AND URBAN AREAS* SEPARATELY

FLY-LEAF

This table has been prepared for rural and urban areas separately on full count basis. A more detailed examination of cultivating households is made in this table. Cultivating households are classified in this table according to the size of land cultivated. The following are the sizes of land adopted for this table :

- (i) Less than 1 acre
- (ii) 1.0- 2.4 acres
- (iii) 2.5- 4.9 „
- (iv) 5.0- 7.4 „
- (v) 7.5- 9.9 „
- (vi) 10.0-12.4 „
- (vii) 12.5-14.9 „
- (viii) 15.0-29.9 „
- (ix) 30.0-49.9 „
- (x) 50+ „
- and (xi) Unspecified.

The data have been further cross-tabulated by the following interest in land :

- (a) Owned or held from Government,
- (b) Held from private persons or institutions for payment in money, kind or share and
- (c) Partly held from Government and partly from private persons for payment in money, kind or share.

This classification thus gives an indication of the number of holdings likely to be (i) deficit, (ii) self-sufficient and (iii) surplus for self-consumption.

This table has been prepared separately for rural and urban areas on full count. A further study of households engaged only in cultivation has been made in this table as each household having a particular size of land holding mentioned in Table B-XI. The data have been cross-tabulated with

reference to the number of persons working in cultivation. In the case of households where more than one person is working the number of family workers and hired workers have also been shown separately. This table will yield surmises on the size and scale of agricultural enterprise.

This table has been prepared for rural and urban areas separately on full count. It has been presented for the Union Territory as a whole. The nature of industry in which the cultivating households with a particular size of holding are engaged is also given. This table will throw light on Household Industry which is carried on as ancillary to cultivation in different parts of the Union Territory.

The Household Industries classified according to the code number of Division and their Major Groups of the Indian Standard Industrial Classification have been given with their description. The Major Groups of Household Industry having less than 10 per cent of the figures of the respective Divisions have not been shown in the table. All the major groups which have not been shown in this table are shown separately in an Appendix to this table.

This table has been prepared in two parts for total, rural and urban areas separately for this Territory as a whole on full count. Part A relates to households classified by Major Groups of Principal Household Industry and according to the code number of Division, and Major Group of Indian Standard Industrial Classification. Data for households have also been presented by nature of Household Industry and the number of persons

engaged in each group, viz., under 1 person, 2 persons, 3-5 persons, 6-10 persons and more than 10 persons. Part B of the table relates to households classified by Minor Groups of Principal Household Industry.

The Major Groups of Household Industry having less than 10 per cent of the figures of the respective Divisions are not shown in the table but are shown in an Appendix separately.

HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY
CLASSIFIED BY SIZE OF LAND IN *RURAL AND URBAN AREAS* SEPARATELY

**TABLE B-XV—HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY
CLASSIFIED BY SIZE OF LAND IN *RURAL AND URBAN AREAS* SEPARATELY**

FLY-LEAF

This table has been prepared for rural and urban areas separately for the Union Territory as a whole and for the various smaller groups of Islands on full count. In this table, a cross-tabulation has been made between the size of the holding and the nature of Household Industry in which the household is engaged as a support to cultivation. In this table, a further analysis has been made of persons working in these households with reference to the size of

holdings. In cases where more than one person is engaged, the number of family workers and hired workers are given separately. Similar data in respect of households engaged in cultivation only has been presented in Table B-XII, and a comparison between this table and Table B-XII will show how the combination of Household Industry with cultivation affects the employment position. This table will also help to establish a relationship between the scale of Household Industry and the scale of cultivation.

**TABLE B-XVI—PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING
AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY
IN ALL AREAS**

FLY-LEAF

This table has been prepared for total, rural and urban areas separately for the Union Territory as a whole on full count. This table furnishes important data on the seasonality of various Household Industries and will yield inferences on the seasonality of Household Industry with seasonality of cultivation. In this table the data in respect of Households engaged in Household Industry only or both in Household Industry and cultivation have been given separately. Household Industry has been classified according to the

period of working of the industry. The period of working has been grouped under 1 to 3 months, 4 to 6 months, 7 to 9 months and 10 months to one year and under each category the number of Households, the number of family workers and the number of hired workers have been given.

The Major Groups of Household Industry having less than 10 per cent of the figures of the respective Divisions have been omitted from the table and shown separately in the Appendix.

TABLE B-XVI
APPENDIX

The Major Groups of Household Industry which are less than 10 per cent of the respective Divisions have been omitted in the main table. The figures of Major Groups thus omitted are shown in run on lines in this Appendix. The figures preceding the bracket respresent code number of the Major Groups omitted from the table. The alphabets shown
