Delimitation of the Calcutta Industrial Region

'Greater Calcutta' is a term which has wide currency but no precise definition. The city of Calcutta itself, for that matter, remains a jurisdictional complex. The Calcutta municipal area, for example, is not conterminous with the Calcutta police area and within the latter two categories of areas have been distinguished, namely, the Calcutta town police area or the Presidency town over which the Calcutta High Court exercises original jurisdiction and the Calcutta suburban police area, over which, in many matters, the District officials of the 24-Parganas district and the Police Commissioner of Calcutta have concurrent authorities. For Census purpose, Calcutta has meant the Calcutta municipal area and the Fort, Port and Canal areas.

At the 1951 Census, the tables for the Calcutta Industrial Region were produced separately (Volume VI, Part IV) as it was "intended to recognise a fact that the Calcutta Industrial Region on the Hooghly side is one demographic unit". But the Region as it was then defined was different from that demarcated in 1961. In 1951, only urban areas which were considered to represent "the extent of conurbation of Calcutta city" were taken into account, while this time all interstitial spaces (with a few exceptions) have been included. The basic criterion has been a large proportion of non-agricultural workers in the population.

VII

The following is a comparative statement of the areas regarded as the Calcutta Industrial Region in 1951 and 1961.

Area and Population

The area of the Calcutta Industrial Region is 648.4 square miles which is 1.90 per cent of the total area of West Bengal (34,194.1 square miles). In these 648.4 square miles, the 24-Parganas district contributes 267.4 square miles or 41.24 per cent of the total area. Area contributed by the Howrah district is 230.0 square miles which is 35.47 per cent of the total area of the Region. Contribution of the Hooghly district is 96.0 square miles or 14.81 per cent of the total area. Calcutta

IX

and Nadia districts have contributed 39.8 and 15.2 square miles respectively, which are 6.14 and 2.34 per cent respectively of the total area of the Calcutta Industrial Region. About 61 per cent of the area of the Region is in the rural sector and 39 per cent in the urban sector.

The 1961 Census count shows a population of 7,155,655 persons in the Calcutta Industrial Region out of the total population of 34,926,279 persons in West Bengal. That is to say, 20.49 per cent of the total population of the State live in this Region.

The statement below shows the percentage of population for persons, males and females and also for total, rural and urban areas of the State residing in the Calcutta Industrial Region.

STATEMENT II

Percentage of State Population living in the Calcutta Industrial Region, 1961

Area	Persons	Males	Females
1	2	3	4
Total	20.49	22.78	17.79
Rural	3.94	4.05	3.79
Urban	71.62	73.45	69.02

It is interesting to note that about 72 per cent of the total urban population of the State is represented by the cities and towns in the Calcutta Industrial Region. The corresponding rural proportion is much lower. Although the rural sector represents 61 per cent of the total area of the Calcutta Industrial Region, it accounts for only 14.51 per cent of its total population.

The city of Calcutta (2,927,289) which forms the nucleus of the Region disposes of about 48 per cent of its total urban population. The next largest city in the Region, as well as in the State, is Howrah with a population of 512,598 persons. Next comes the South Suburban town group with a population 341,712 persons. The fourth and fifth positions are held by the towns of Bhatpara (147,630) and Kamarhati (125,457) respectively.

The average density of population in the Calcutta Industrial Region is 11,036 persons per square mile against 1,021 persons per square mile in the State as a whole. In the urban areas of the Calcutta Industrial Region the average density is 24,064 persons per square mile. In the rural areas the average is 2,634 persons per square mile. Pockets of very high density within the Calcutta Industrial Region are the city of Calcutta (73,642) and the police stations of Baranagar (30,536), Chandernagore (17,991), Noapara (16,516), Titagarh (13,751) and Dum Dum (12,214).

After Calcutta, Titagar is the next most thickly populated town with 61,143 persons per square mile. The following other towns in the Region have very high densities of population; viz., Kataganj and Gokulpur Government Colony (47,150); Howrah (46,056); Serampore (40,318); Baranagar (39,213); Naihati (34,796); Bhatpara (31,955); and Rishra (30,828).

Sex Ratio

In the Calcutta Industrial Region there are 689 females per 1,000 males compared to 878 females per 1,000 males in West Bengal. In the rural and urban areas

of the Region the sex ratio (i.e., females per thousand males) are 888 and 659 respectively. The figures for rural and urban areas of the State as a whole are 943 and 701 respectively. The marked predominance of males over females, particularly in the urban areas of the Calcutta Industrial Region is largely due to the immigration of males who have come to this Region for employment, business etc., leaving their families at home.

In the city of Calcutta there are 612 females per 1,000 males. In Howrah there are 630 females per 1,000 males.

Houses

A house was defined at this Census as a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, work-shop, school etc., with a separate entrance. An occupied Census house meant a house where people lived. An occupied residential house meant the same thing as an occupied Census house.

Of the total number of 8,377,402 occupied residential houses in West Bengal, 1,431,206 (or 17.08 per cent) are in the Calcutta Industrial Region. The 668 inhabited villages of the Calcutta Industrial Region account for 196,507 occupied residential houses which form only 2.96 per cent of the total rural occupied residential houses of the State.

In the urban areas of the Region, 81 cities and towns have in all 1,234,699 occupied residential houses, or 71.45 per cent of the total occupied residential houses of the urban areas of the whole State.

There are on an average 5 persons in an occupied Census house in the Calcutta Industrial Region, whereas in the State as a whole this average is 4.2 persons per occupied Census house. In the rural areas of the Calcutta Industrial Region there are 5.3 persons per occupied Census house. In the urban areas this average is approximately 5. The corresponding figures at the State level are 4.0 and 4.9, respectively. The Batanagar town in the Batanagar and Nangi town group of the 24-Parganas district has the highest number persons (8.23) per occupied census house amongst the cities and towns in Calcutta Industrial Region. The other towns having more than 7 persons per occupied Census house in this Region are Sarenga (7.26) and Kasba (7.24).

Houseless and Institutional Population

The Appendix to Table A-I furnishes data for the houseless and institutional population separately. The term 'houseless population' applies to persons who live in the open and not in any house. 'Institutional population' refers to the population enumerated in institutions like a penal, charitable or mental institutions, hostel, hotel, hospital, boarding house etc. In the Calcutta Industrial Region 27,508 houseless persons and 381,309 institutional persons were enumerated. The State level figures are 69,187 houseless and 551,140 institutional persons. That is to say, 39.76 per cent of the houseless and 69.19 per cent of the institutional population of West Bengal reside in the Calcutta Industrial Region. For urban areas these percentages are 70.78 and 83.05, and for rural areas 11.52 and 3.86.

By far the largest concentration of both these categories of population is to be found in Calcutta. Two-thirds of the total houseless population and three-

fourths of the total institutional population of the Calcutta Industrial Region live in the city of Calcutta.

Villages and Towns

A village for the census purpose corresponds to a revenue survey *mauza*, provided it is not or does not form part of a town. Where part of a revenue survey *mauza* is included in a town, the rural part of the *mauza* is counted as one village. A town is an area the civic affairs of which are administered by a Municipality, Town Committee, Station Committee, Union Committee or Cantonment Board. Some other areas which have generally satisfied the following tests have also been treated as towns at the Census : (a) it has a population of not less than 5,000, (b) its density of population is not less than 1,000 per square mile, and (c) three quarters of its adult male population are chiefly engaged in pursuits other than agriculture. A city is a town with a population of one lakh or more.

In the Calcutta Industrial Region there are 677 villages including 9 uninhabited villages. There are 38,465 inhabited villages in West Bengal. That is to say, only 1.74 per cent of the total inhabited villages of the State are situated in the Calcutta Industrial Region.

Of the 184 cities and towns in West Bengal 81 are accounted for by the Calcutta Industrial Region. The districtwise break down of these 81 towns is : 24-Parganas 40, Howrah 22, Hooghly 14, Nadia 4 and Calcutta, which is itself regarded as one district.

Villages classified by Population

Of the 668 inhabited villages included in the Calcutta Industrial Region, 266 villages are in the 24-Parganas district, 298 villages are in the Howrah district and 104 villages are in the Hooghly district. The average population of an inhabited village in the Calcutta Industrial Region is 1,554. The range of fluctuation is very wide. The smallest village is Kumarpur (J.L. No. 60) with a population of 33 persons only in the police station of Jagatballavpur in the Howrah district. The largest village is Uttar Baksara (J.L. No. 7) with a population of 12,845 persons, in the police station of Jagacha in the same district.

There are 27 (or 4.04 per cent of the total) villages in the Calcutta Industrial Region in each of which less than 200 persons reside. The districtwise distribution of these 27 villages is: 12 in 24-Parganas, 7 in Howrah and 8 in Hooghly district. To the population range of 200 to 499 belongs 100 (or 14.97 per cent of the total) villages of the Calcutta Industrial Region. Of these 100, 24-Parganas accounts for 47, Howrah 32 and Hooghly 21. The next larger population size, viz., 500 to 999 represents 182 (or 27.25 per cent of the total) villages of the Calcutta Industrial Region.

The largest number (196 or 29.34 per cent of the total) is to be found in the population group 1,000 to 1,999. In the population group 2,000 to 4,999 there are 139 (or 20.81 per cent of the total) villages, only 22 (or 3.29 per cent of the total) villages have population ranging from 5,000 to 9,999, and 2 villages have population of more than 10,000. Of these two, one, as already stated is Uttar Baksara in the Jagacha police station. The other is Sultanpur, J.L. No. 10 of the Dum Dum police station. This village has a population of 12,771 persons.

XII

Size class of Towns

It is the practice of the census to classify towns into six classes according to population. These classes are : I—100,000 and above, II—50,000 to 99,999, III—20,000 to 49,999, IV—10,000 to 19,999, V—5,000 to 9,999 and VI—less than 5,000. The following statement shows the classification of the 81 towns of the Calcutta Industrial Region by these classes.

Town Groups

Grouping of certain contiguous or adjacent towns as 'town groups' is a special feature of the 1961 Census. Urban statistics at this Census have been presented by town groups which denote clusters of towns which are, by and large, linked together by continuity of urban characteristics, communications, satisfactory means of com-

XIII

mutations and interdependence of functions. These town groups have been marked off to focus attention to areas of conglomerate growth and to the desirability of treating the whole groups, instead of their components, as units for planning and development.

In the absence of full information about commutation and functional interdependence, the grouping is prone to be a little arbitrary. One may as well wonder if, according to the principle laid down, all the towns of the Calcutta Industrial Region should be considered to form a single town group. This, in any case, is a field of special enquiry and only the following tentative grouping has been made in the census tables :

- South Suburban Town Group, consisting of the towns of
 - South Suburban
 - Garden Reach
 - Panchur
- Uluberia Town Group, consisting of the towns of

 - (c) Kalyani
9. Jagachha Town Group, consisting of the towns of
 - (a) Santragachhi
 - (b) Unsani
 - (c) Jagachha

For the purpose of Table A-IV, a town group has been classed according to the total population of its constituent units. The following statement shows the percentage distribution of urban population by size classes of towns and town groups.

WB—West Bengal

CIR—Calcutta Industrial Region

As most of the Class I towns and town groups of the State are in the Calcutta Industrial Region it is no wonder that they represent a much larger proportion of the urban population in this Region than in the State as a whole.

Changes in the Size classification of Towns

The statement printed at pages 19 to 21 of this volume shows the change in size classification that the towns and town groups of the Calcutta Industrial Region had undergone since 1901. The towns that had not undergone any change in size classification in these sixty years are only two, viz., the cities of Calcutta and Howrah. They have been Class I towns all along. Four towns which were in Class III in 1901, reached Class I status by 1961. These are: South Suburban, Garden Reach, Bhatpara and Baranagar. Three got lifts from Class IV to Class I. They are: Baly, Kamarhati and South Dum-Dum. The four cases of promotion from Class III to Class II are of Serampore, Hooghly-Chinsura, Chandannagar and Naihati. The passage to Class II status in 1961 was secured by the following three Class IV towns of 1901, viz., Panihati, Titagar and North Barrackpur. Four Class IV towns of 1901, viz., Baidyabati, Budge-Budge, Bhadreswar and Rajpur, had reached Class III by 1961. Still greater advances were recorded by Barasat, Bansbaria, North Dum-Dum, Chakdaha, Kotrang, Garulia and Uttarpara which climbed from Class V in 1901 to Class III in 1961. The two Class IV towns of Jaynagar-Majilpur and Baruipur of 1961 were Class V and Class VI towns, respectively, in 1901.

New Towns of 1961

It is significant that in a total of 66 new towns of 1961 for the whole State, 39 are in the Calcutta Industrial Region.

The following is a list of places in the Calcutta Industrial Region which were declared as urban for the first time in 1961. For information on composition of these towns reference is invited to the Explanatory Notes of Appendix to Table A-IV printed at pp. 244-249 of Part II-A—General Population Tables Volume.

XVII

A special mention may be made here of the non-municipal area of Baly which was treated as urban for the first time in the 1961 Census. This area has, however not been counted as a separate town, but has been considered as an extended enclave of the municipal town of Baly.

Growth of Urban Population

The following statement compares the urban growth rates of the Calcutta Industrial Region with those of the State as a whole.

It would appear that upto 1941 the urban areas of the Calcutta Industrial Region had generally grown faster than the average urban area of the State. It was after 1941 that the Calcutta Industrial Region started losing the race, due, mainly to the emergence and development of the Asansol-Durgapur industrial complex.

We have already noted that out of the 81 towns in the Calcutta Industrial Region, 39 were treated as urban for the first time in 1961. The following statement classifies the remaining 42 towns by their rate of growth between 1951-1961.

The Ichhapur Defence Estate had a population of 14,600 in 1951. In 1961 it declined to 12,382. The population consists almost entirely of employees of the defence establishments and their families. The small decrease is mainly due to fluctuation of the staff strength of these establishments and movement of the members of their families.

The population of the Bhadreswar municipal town declined from 36,292 in 1951 to 35,489 in 1961. About a half of the male population of the town are workers in jute mills. It is reported that during 1951-61 a number of mill workers were retrenched due to rationalisation and this resulted in some outmigration.

XIX

Functional classification of Towns

Beginning from 1881, Indian Censuses have classified cities and towns into six classes according to the size of population. In 1931 and 1951 attempts were made in Bengal to classify towns according to their predominant function. But these attempts were on the main empiric relying on the personal appraisal of the Superintendent himself. At the 1961 Census, an impersonal statistical test has been sought to be applied for investigating the function of a town. The broad industrial classification of all workers into nine categories has provided a basis for this functional grouping which has taken into account the percentage distribution of all workers in seven non-agricultural categories, i.e., Categories III to IX.

All but 26 of the 81 towns of the Calcutta Industrial Region have been classified as industrial and manufacturing towns. The classification of these 26 towns is shown in the statement below :

Calcutta has been placed in the category of ports, although the majority of the workers of the city are not engaged in river or ocean transport. The city's special feature as a port is the dominant one around which the other characteristics have slowly evolved over the years. These characteristics owe their origin primarily to the life of the city as a port which still continues, even as the ancillary

XX

features have outgrown their progenitor and overshadowed the function of the city as a port. It is chiefly in recognition of the prime importance of the port to the life of the city that it has been thought fit to classify Calcutta as a port.

Among the service towns, i.e., the towns where the predominant function is under Industrial Category IX—Other Services, those which are the headquarters of district or subdivisional administration have been subclassified as administrative and the remainders have been shown as residential.

Rate of Participation

At the 1961 Census the entire population was classified into workers and non-workers. For the primary industrial classification of the population the workers were further divided into the following nine industrial categories:

- I Cultivator;
- II Agricultural Labourer;
- III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities;
- IV Working at Household Industry;
- V Working in Manufacturing other than Household Industry;
- VI Working in Construction;
- VII Working in Trade and Commerce;
- VIII Working in Transport, Storage and Communications;
- IX Working in Other Services.

The non-workers were treated as the tenth category.

The population of the Calcutta Industrial Region consists of 2,530,646 workers and 4,625,009 non-workers. That is to say, in every 1,000 population, 354 are workers and 646 are non-workers. For the State as a whole, the proportion of workers per thousand population is only 332. Categorywise participation rates for the State and the Calcutta Industrial Region are shown in the Statement below.

XXI

The rates of participation in the total and urban sectors of the population of the Calcutta Industrial Region are appreciably higher than the corresponding rates for the State. But in the rural population of the Calcutta Industrial Region the proportion of workers is much less than that in the rural population of the whole State. This is mainly due to the limited scope of employment that agriculture and ancillary activities offer in the rural areas of the Calcutta Industrial Region where, unlike the rural areas of the rest of the State, the largest single source of employment is the manufacturing industry. The categorywise participation rates indicate how much developed are the Categories V to IX in the Calcutta Industrial Region, both in its rural and urban sector, in comparison with the corresponding sectors of the population of the State as a whole.

Separate figures for the Class I towns of the Calcutta Industrial Region are given in the Statement below.

Category III

In the Calcutta Industrial Region 13,306 workers are engaged in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities. Of them 9,870 live in urban areas. Their distribution per 1,000 workers in Category III by Major Groups of Industry is shown in the statement below.

Division 1	Mining and Quarrying	67	60
Major Group 10	Mining and Quarrying	67	60

Since the mining and plantation areas of the State fall outside the Calcutta Industrial Region, it is no wonder that very small returns have been received against Divisions 0 and 1. The Calcutta Industrial Region represents only 2.3 per cent of the State's workers under Category III, but 45.2 per cent of her total non-agricultural workers.

Category IV

Household Industry as a separate sector of economic activity was introduced for the first time in the Census classification scheme of 1961. A Household Industry was defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory. It should relate to production, processing, servicing, repairing or making and selling of goods. It should not include professions such as those of pleaders, doctors, barbers, watermen or astrologers.

Threefold tests for determining the household nature of an industry were :

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the Household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.
- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities were also regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies raw materials. Certain processes like buttoning and hand sewing of tailored clothes, dyeing and

printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household. A "List of Common Household Industries with their Industrial Code Numbers" was circulated by the Office of the Registrar General. According to this list, Household Industry could include some of the activities ancillary to agriculture such as rearing of cattle and other animals for milk and other purposes, production of wool, production of charcoal, poultry keeping etc. These activities are generally covered by Industrial Category III—Mining, Quarrying, Livestock etc., but are included in Category IV—Household Industry, if undertaken at Household level.

Household Industry, as already stated, offers very little scope for employment in the Calcutta Industrial Region. Altogether 37,244 persons living in the Calcutta Industrial Region are engaged in Household Industry, of them 25,162 were enumerated in the urban areas. Only 7.6 per cent of the State's workers at Household Industry live in the Calcutta Industrial Region. The following statement shows the Major Groupwise distribution of every 1,000 workers engaged at Household Industry in the Calcutta Industrial Region.

It is observed that the Household Industries which are most important at the State level from the employment point of view, viz., Handloom (Major Group 23), Cork and Timber (Major Group 28), Foodstuffs (Major Group 24), Tobacco Products (Major Group 22) etc., are relatively of lesser importance in the Calcutta Industrial Region where the Household Industry that employs the largest number of workers is Manufacture of Miscellaneous Textile Garments (Major Group 27) which is a thriving industry particularly in the Garden Reach-Metiabruz area of the 24-Parganas district and the Domejur area of the Howrah district.

Category V

The population returned under Category V, i.e., working in Manufacture other than Household Industry is 933,530 of whom 841,432 live in urban area. It is important to note that 70.8 per cent of the State's total workers under Category V are represented by the Calcutta Industrial Region. The following statement shows the distribution of 1,000 workers employed in Category V in the Calcutta Industrial Region by Major Groups of Industry.

Jute Textile (Major Group 24) which is by far the most important industrial activity of the Calcutta Industrial Region gives employment to 218,135 persons of whom 194,522 are engaged in Jute Spinning and Weaving (Minor Group 241). Next in importance from the employment point of view are the industries covered by Major Group 36 i.e., Basic Metals and their products (except Machinery and Transport Equipment). Altogether 133,702 workers have been classified under this Major Group, of whom 62,716 are engaged in Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket and cutlery (Minor Group 369); 25,551 in Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods (Minor Group 360) and 11,999 in Manufacture of armaments (Minor Group 362). In Miscellaneous Manufacturing Industries (Major Group 39) 76,580 workers are employed of whom 52,726 have been classified against Minor Group 399 i.e., Manufacture and Repair of goods not assignable to any other group; 13,448 against Minor Group 393, i.e., Manufacture of jewellery, silverware and wares using gold and other precious metals. Manufacture of transport equipment (Major Group 38) employs the next largest group of 54,119 workers of whom 15,223 are accounted for by Manufacture of wagons, coaches, tramways and other rail road equipment (Minor Group 381); 10,605 by Manufacture, Assembly and Repairing of locomotives and 9,694 by Repairing and Servicing of motor vehicles (Minor Group 384).

The following statement shows the percentage that the workers at each Major Group under Category V in the Calcutta Industrial Region bear to the total workers of the State of the corresponding Major Group.

It is evident that much of the industrial activity of the State is localized in the Calcutta Industrial Region. The few industries which show some dispersal are those which are usually run on small scale, viz., foodstuffs, tobacco, pottery, carpentry, etc.

Category VI

Construction activities employ 69,079 persons, i.e., less than 1 per cent of the total population of the Calcutta Industrial Region. Activities assigned to Construction (Division 4) in the Standard Industrial Classification include Construction and Maintenance of buildings and of means of transport, communication and water supply.

Of the 69,079 Construction workers, 60,045 are engaged in Construction and Maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installation (Minor Group 400). Construction and Maintenance

of waterways and water reservoirs (Minor Group 403) employ 3,961 and another 3,736 are accounted for by Construction and Maintenance of roads, railways, bridges and tunnels (Minor Group 401). The remaining 1,337 workers are engaged in Construction and Maintenance of telegraph and telephone lines (Minor Group 402).

Category VII

Trade and Commerce give employment to 468,073 persons in the Calcutta Industrial Region. They constitute 53.7 per cent of the Trade and Commerce workers of the whole State.

Of the 468,073 Trade and Commerce workers, 68,472 are in Wholesale Trade (Major Group 60-63), 339,663 in Retail Trade (Major Group 64-68) and 59,938 in Trade and Commerce Miscellaneous (Major Group 69).

Category VIII

Against Category VIII, which represents workers in Transport, Storage and Communications, 234,855 workers have been returned in the Calcutta Industrial Region. They constitute 59.9 per cent of similar workers in the whole State.

Of the 234,855 workers, 210,136 are in Transport, 1,655 in Storage and Warehousing and 23,064 in Communications. Further classification of the 210,136 Transport workers is as follows : 115,636 in Road Transport ; 66,901 in Railways ; 20,156 in Water Transport and 7,443 in Transport not elsewhere classified.

Category IX

The term 'Other Services' covers a heterogeneous collection of activities. Apart from Personal and Public Services, it includes Educational, Medical, Religious and Legal Services, Business Services, Community Services and Recreation Services. Altogether 661,013 persons have been returned in the Calcutta Industrial Region as engaged in Other Services. They form 42.7 per cent of the total 'Other Services' workers of the State.

The following statement shows the distribution of 1,000 workers in Other Services in the Calcutta Industrial Region by different branches of services.

† In case of police stations Noapara, Barrackpore, Titagarh, and Baranagar, the totals of the area figures of the individual towns shown under them do not agree with the police station area figures because of the following:

(1) Municipal area figures have been adopted as furnished by the municipal authorities, while police station area figures are based on last published Jurisdiction Lists,

(2) River areas appertaining to police stations have not always been included in municipal area figures,

(3) Some of the municipalities fall in the jurisdiction of more than one police station.

† The area of Dum-Dum Aerodrome actually extends to three police stations, viz., Dum Dum, Rajarhat and Barasat, but its exact area falling under each could not be ascertained. For the purpose of dividing the area of each of these police stations into rural and urban, the urban portion has been computed without taking into account the Dum-Dum Aerodrome area. Part of the Dum-Dum Aerodrome Area has been accounted for under Dum Dum area of the two remaining police stations of Rajarhat and Barasat.

† Behala police station excludes an urban population of 185,811 (102,674 Males and 83,137 Females) which is included in South Suburban Town Group under South Suburban (M) town. It also excludes area, number of towns and occupied residential houses of South Suburban (M) town.

† Metiabruz police station excludes an urban population of 25,131 (14,433 Males and 10,698 Females) which is included in South Suburban Town Group under Panchur (N.M.) town. It also excludes area, number of towns and occupied residential houses of Panchur (N.M.) town.

NOTES:

- Area figures under columns 3a and 3b represent computed area figures.
- The Sq. Km. and density figures of urban areas of police stations are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of towns of respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the police station totals tally.
- Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.
- Towns treated as such for the first time in 1961 are printed in italics.
- The following abbreviations have been used for the status of a town:

M.C.	Municipal Corporation
M	Municipality
N.M.	Non-municipal Town
Cantt.	Cantonment

NOTES:

1. Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.
 2. Towns treated as such for the first time in 1961 are printed in italics.
 3. The area figures represent the 1961 area of the town/town groups. For a description of the sources and methods of computation of the area figures attention is invited to the fly-leaf to Union Table A-I (Part II-A—General Population Tables Volume).
 4. The area of Dum-Dum Aerodrome actually extends to three police stations, viz., Dum Dum, Rajarhat and Barasat, but its exact area falling under each could not be ascertained. For the purpose of dividing the area each of these police stations into Rural and Urban, the urban portion has been computed without taking into account the Dum-Dum Aerodrome Area. Part of the Dum-Dum Aerodrome Area has been accounted for under Dum-Dum P.S. because it is in North Dum-Dum and Dum-Dum municipal towns but the remainder which is the major portion is included in the rural area of the two remaining police stations of Rajarhat and Barasat. There is thus a difference in the total urban area as given in Tables A-I and A-IV.
- In case of police stations Naopara, Barrackpore, Baranagar and Titagarh the totals of the area figures of the individual towns shown under them do not agree with the P. S. area figures because of the following:
- (i) Municipal area figures have been adopted as furnished by the municipal authorities, while police station area figures are based on the last published Jurisdiction List.
 - (ii) River areas appertaining to the police stations have not always been included in municipal area figures.
 - (iii) Some of the municipalities fall in the jurisdiction of more than one police station.
- Apart from the above reasons, there has also been difference between total urban area of the State as per Tables A-I and A-IV on account of the fact that for Table A-I, urban area figures have been rounded off to one place of decimal at the police station level, whereas in Table A-IV, all area figures have been given correct to the second place of decimal.

* In the case of Noapara, Barrackpore, Baranagar and Titagarh police stations the urban areas of the police stations are greater than the total area of all towns of these police stations (0.66 Sq. miles if the figures are rounded off upto two decimal places) for the following reasons:

(a) Municipal area figures have been adopted as furnished by the municipal authorities while police station area figures are based on last published jurisdiction lists.

(b) River areas appertaining to the police stations have not always been included in municipal area figures.

(c) Several municipalities fall in the jurisdiction of more than one police station.

† See footnote at page 43.

‡ Includes a very small area of Dum-Dum Aerodrome Area (N.M.).

* Dum-Dum Aerodrome area actually extends over three police stations viz., Dum Dum, Rajarhat (which does not appear in Calcutta Industrial Region) and Barasat, but its exact area falling under each could not be ascertained. For the purpose of classifying the area of each of these police stations into rural and urban, the urban portion has been computed without taking into account the Dum-Dum Aerodrome Area. Part of Dum-Dum Aerodrome area has been accounted for under Dum Dum police station because it is in North Dum-Dum and Dum-Dum municipal towns but the remainder which is the major portion is included in the rural area of the two remaining police stations of Rajarhat and Barasat. The area of Dum-Dum Aerodrome Area (2.75 Sq. miles) has however been included in the total of Calcutta Industrial Region.
