ACKNOWLEDGEMENTS

This report has only extracted and compiled the data collected in the enumeration for the 1961 Census of the Laccadive, Minicoy and Amindivi Islands. Shri C. K. Balakrishnan Nair, former Superintendent of Census Operations, Laccadive, Minicoy and Amindivi Islands under whose able guidance the enumeration was organised is the very first person to whom my acknowledgement is due. I express my deep debt of gratitude to him and his worthy colleagues for the efficient enumeration of the population of the Islands.

I wish to place on record my grateful appreciation of the able services rendered by the following members of the staff of my office in the preparation of the tables and flyleaves included in this report.

Shri B. T. Pillai	.	.	.	Deputy Superintendent of Census Operations
Shri S. Jayashanker	.	.	.	Statistical Assistant
Shri K. Gopinathan	.	.	.	-do.-
Shri M. Peethambaran	.	.	.	-do.-
Shri E. C. Varghese	.	.	.	-do.-
Shri A. N. Ramakrishnan	.	.	.	-do.-
Shri M. Ravindranatha Kurup	.	.	.	-do.-
Smt. G. Rajalekshmi	.	.	.	Tabulation Assistant
Smt. T. Saraswathi Amma	.	.	.	-do.-
Shri Josey Joseph	.	.	.	Supervisor
Smt. P. M. Rugmini Amma	.	.	.	-do.-
Shri N. G. Krishna Kurukkal	.	.	.	Compiler
Shri K. Balakrishnan Nair	.	.	.	-do.-

I cannot too fully acknowledge my deep sense of gratefulness to Shri K. D. Ballal, I.A.S., Central Tabulation Officer, Office of the Registrar General, India, for a thorough checking of the tables for arithmetical accuracy and internal consistency and to Shri R. C. Nigam, Linguist of the Registrar General's Office for the finalisation of language tables and the preparation of an exhaustive note on the classification of languages.

I am also grateful to Shri S. C. Sharma, Mechanical Tabulation Officer, Office of the Registrar General, India, for preparing the tables based on Household Schedules and the tables on Scientific and Technical Personnel.

I would not have been able to bring out this report so soon but for the facilities provided and the interest taken by my esteemed colleague Shri R. K. Trivedi, Superintendent of Census Operations, Gujarat for its printing. I am grateful to him and his colleagues.

The Nayan Press, Ahmedabad, which printed this report with remarkable speed has executed the work neatly and well.

Trivandrum,

NOTE

This report presents the tables prepared from the data collected in the Census of 1961 in respect of the Laccadive, Minicoy and Aminidivi Islands. Two schedules, viz., Individual slip and Household schedule were used in 1961 Census for the collection of data. Besides these another schedule was used for the houselisting operations which was conducted prior to the actual Census. Several tables have been prepared out of these. Almost all tables except those based on household schedules are presented down to the individual islands. The tables presented here are grouped as follows:

- 1 General Population Tables (A series)
- 2 Economic Tables (B series)
- 3 Social and Cultural Tables (C series)
- 4 Migration Tables (D series)
- 5 Housing and Establishment Tables (E series)
- 6 Special Tables for Scheduled Castes and Scheduled Tribes (SCT series)
- 7 Special Tables for Scheduled Tribes only (ST series) and
- 8 Subsidiary Tables

General Population Tables contain the tables A I to A III, their appendices and the Primary Census Abstract. The A I Table is the basic population table giving the area in sq. miles and sq. kilometres, population per sq. mile, number of islands both inhabited and uninhabited, number of occupied residential houses and population by sex. The second table A II gives the variation in population during the 60 years from 1901 to 1961. Table A III gives the islands classified by population in different population size groups. The Primary Census Abstract gives the area in acres, the number of occupied census houses and households, total population, population of Scheduled Tribes, the number of literates and educated persons, the number of workers classified under the nine industrial categories and also the number of non-workers by sex.

General Economic Tables relate to the economic data collected in the Individual slips. Economic Tables of 1961 Census cover a very large field of data and are more elaborate and comprehensive than those of any of the previous ones. During the past censuses, income or economic independence was the sole criterion for measuring the economic activity of the people of the country. But a significant departure has been made in the Census of 1961 by laying more emphasis on work than on income so that all people who work, including family workers who are not in receipt of any income have also been included as workers. Non-workers have been distributed into several categories according to the type of activities pursued by them. The General Economic Tables give the classification of workers and non-workers by age-groups, educational levels, industry, occupation, etc.

In earlier censuses, the only information available for households was their total number, size and composition and the entire information on economic activity was based on individual (and not on household) participation in different sectors. The household schedule was included as one of the three schedules for the 1961 Census and designed specially to collect comprehensive material on household cultivation and household industry. The Household Economic Tables have been prepared from the Household Schedules by mechanical tabulation on the basis of 20% sample of the family households.

They give data relating to the extent of land owned or held by a cultivating household, nature of household industry, period of working of household industry, persons employed in cultivation or household industry, the size of land cultivated, number of hired workers and family workers engaged in cultivation and household industry, households among Scheduled Tribes by tenure status and size of land cultivated, etc. The entire process of preparation of these tables consisted of sampling of Household Schedules, coding of the information contained therein, punching the information on cards, verification of the punched cards and finally sorting and tabulation of punched cards on machines. The sampling and part of the coding of the Household Schedules were done in the Office of the Superintendent of Census Operations, Kerala and the remaining work in the Office of the Registrar General, India, New Delhi.

The data relating to the social and cultural characteristics like family composition, age, sex, marital status, literacy levels, language, religion, etc., and the migration of population are presented under Social and Cultural Tables and Migration Tables. As in the case of the tables relating to the economic characteristics of the population presented under 'Economic Tables', the tables relating to social, cultural and migration aspects of the population prepared in 1961 Census are more in number and detailed in contents compared to the corresponding tables of previous censuses. Social and Cultural Tables are numbered from C I to C VIII and migration tables are numbered from D I to D VI. All these tables except Table C I have been prepared from individual slips on full count. Table C I showing the family composition has been prepared from a 20% sample of Household Schedules. Besides the above mentioned tables prepared from individual slips and household schedules a few tables showing details of Scientific and Technical Personnel prepared from special cards used for the enumeration of Scientific and Technical Personnel also have been included as appendix tables to Table C III.

The need for an exhaustive survey of the housing conditions with reference to the number, pattern and building materials of the houses in India is a long felt one. The history of Census would show that a list of houses is the basis on which a census count is organised. While this has been so throughout the decennial censuses in India, there was neither uniformity nor exhaustiveness in respect of the contents prescribed for the houselists prepared in each Census. Even in respect of details collected, no proper use of the data is seen made in the reports. There is no portion in any Census report giving details in respect of the houses except the number of occupied houses. Whatever data were collected in the previous censuses did not survive the Census for which it was collected and hence failed to be of any lasting use to the country, the only purpose served being to enable the conduct of the particular census count. In the 1961 Census an attempt has been made both to ensure uniformity in respect of the contents of the houselist throughout India as also to collect, tabulate and publish as many details as possible about the housing conditions in the country. The Housing Tables presented in this volume are a result of this endeavour. These Tables E I to E V are prepared from the houselists which were filled up before the actual population Census. Three of these tables, viz., E II, E IV and E V are based on 20% sample of households. The Housing Tables show the classification of the Census houses according to the various uses to which they are put, tenure status of census households living in census houses used wholly or partly as dwelling, census houses used as factories and workshops classified by industry, power used and size of employment, distribution of households living in census houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof and classification of households by number of members and by number of rooms occupied.

In the 1961 Census the name of the caste or tribe was recorded in the individual slips in the case of all persons who belonged to any of the Scheduled Caste or Scheduled Tribe as defined in the notification

issued by the President of India in 1956. According to the President's order the whole inhabitants of Laccadive, Minicoy and Amindivi Islands are Scheduled Tribes. From the data relating to Scheduled Castes and Scheduled Tribes collected in the Census a set of tables showing their age and sex composition, marital status, economic activity, literacy, etc., was prepared and presented in this report as Special Tables for Scheduled Castes and Scheduled Tribes. As no Scheduled Caste has been returned from any of the islands, tables relating to Scheduled Tribes only have been presented here. Table SCT V Part B is prepared from household schedules on a 20% sample basis. All other tables are prepared from the individual slips.

A number of subsidiary tables have been prepared from all the main tables mentioned above except SCT and ST tables. These tables are presented under the title "Subsidiary Tables" and they give various proportions useful for the better analysis of the data.

The salient features of the tables presented under each of the above mentioned groups are explained in the respective flyleaves given before the tables.

The instructions to the enumerators for filling up the houselist, individual slips and household schedules and the schedules are given in the appendix to this note.

APPENDIX IV

Instructions for filling up the houselist

Column 1—Line Number

Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building Number (Municipal or Local Authority or Census Number, if any)

This refers to the entire structure on the ground. There are, however, high, large or long buildings along a street or lane which have been partitioned or portions of which have been sold, which have distinct, separate main exit on the road and which belong to separate owners or occupiers or alternatively there are a series of different houses joined each to each by common walls on either side to make the whole look like one building but parts of which have been built at different times and belong to separate owners. Such distinguishable structures, although not separate from each other, should be regarded as separate buildings and given separate numbers. Each building should have a separate number. If in big cities a large mansion or building containing several census houses has a well known name by which it is generally known then the name of the building should also be recorded for convenient reference. If there are more than one structure within an enclosed or open compound belonging to the same person, e.g., the main house, the servants' quarters, the garage, etc., only one building number should be given. If the locality consists of a number of streets in a village, the buildings in the various streets should be numbered continuously and the streets should be taken in uniform order, from North-West to South-East. Experience suggests that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first numbering began. In a city enumeration block, the numbering will have to respect the axis of the street and not any preconceived

geographical direction like North-West. A building under construction should also be given a number in the serial. If a new hut or building is constructed between the time when the housenumbering and houselisting have been completed and the census count it should be given a new number beyond the last number of the serial for the village. Arabic numerals should be used for building numbers.

Column 3—Building Number (Column 2) with sub-numbers for each Census House

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers, e.g., the number of the building and the sub-number of the census house. The census house number should be written after the building number in Arabic numerals in brackets such as 2(2), 3(2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—*Purpose for which census house used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.*

The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place, e.g., bank, etc. But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a 'dispensary'. Write also if used for place of worship or congregation or if unoccupied, 'vacant'. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—*If this census house is used as an establishment, workshop or factory*

These columns apply only in cases where the census house is a factory or a workshop, i.e., where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—*Name of establishment or proprietor*

Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like confectionaries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—*Name of product(s), repair or servicing undertaken*

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—*Average number of persons employed daily last week (including proprietor or household members, if working)*

The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—*Kind of fuel or power, if machinery is used*

If the factory or workshop uses steam or diesel engine or fuel, e.g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Columns 9 & 10—*Description of Census House*

Column 9—*Material of wall*

Under this column the material out of which most of the walls of the house are made, i.e., grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—*Material of roof*

The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, etc., should be written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor.

Column 11—*Sub-number of each Census Household with Census House number (Column 3)*

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (A), (B), (C), etc. For example, if building No. 2 is also a census house and has three households, the household numbers will be 2(A), 2(B) and 2(C). If building No. 4 has two census houses, the houses will be numbered as 4(1) and 4(2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4(1A), 4(1B), 4(1C) and 4(2A) and 4(2B).

Column 12—*Name of Head of Household*

The name of the Head of each household given in column 11 should be written here. The Head of a household, for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chumneries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

If the census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of the owner).

Column 13—*Number of rooms in Census Household*

If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at least 6 ft. long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14—*Does the household live in own or rented house?*

If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—*Number of persons residing in Census Household on day of visit*

Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—*Remarks*

In this column should be entered any useful or significant information about the building or the census house or the census household that has not been entered in any other column. For example, if the census house is a shop, the name of the proprietor or owner should be recorded in this column. If the census house is occupied by members of Scheduled Castes or Scheduled Tribes, it should be indicated by writing words 'S.C.' or 'S.T.'. If a census house is vacant at the time of houselisting but there is reason to believe that the house will be occupied in the course of the next few days and almost certainly before the census enumeration period, then the word 'Vacant' should be entered in column 4 and a remark should be entered in column 18 to the effect 'likely to be occupied shortly'. Thus, the Remarks column should be utilised for recording all significant information relating to the building or census house or census household.

Each person engaged in housenumbering of one block will have to make out an abstract at the conclusion of houselisting and housenumbering. This abstract will be in the form shown in the next page.

APPENDIX V

INSTRUCTIONS TO ENUMERATORS

The 1961 Census count will relate to the sunrise of 1st March, 1961. The count will be spread over a period of 19 days, beginning on the 10th February and ending on the 28th February, 1961. During this period you should visit every household in your block for enumeration. On the night of 28 February you will have to go round your enumeration block and enumerate all persons who are houseless. (In large cities the enumeration of houseless persons will have to be undertaken in a different manner for which more elaborate arrangements will be made.) During the period 1st March to 5th March you will have to pay a revisional round to every household and verify that your earlier work of enumeration has been completed in every respect. If during this revisional round you find that a birth has taken place in any household between the time of your first visit and the sunrise of 1st March, 1961, you will have to fill up a new slip for this birth; if there has been a death in any household during the same period you will have to cancel the slip of the dead person; if there is a visitor in any household who has come to stay during the same period and has not been enumerated elsewhere, you will have to fill up a new slip for this visitor. But you will not have to take notice of any birth or death or visit occurring after sunrise of 1st March, 1961.

You will have been supplied by your Supervisor household schedule forms in books of 50 or 25 each for recording information relating to the household as a whole and enumeration pads consisting of 100 or 25 slips each to record information of individuals living in the household. Instructions for filling up the household schedule and the individual slips are given in this booklet. You should carefully observe them when filling each household. You can fill up the household schedule first or the enumeration slips first but for every household you should fill up both before you leave the household and also fill up the Census Population Record at the back of the household schedule.

A. INSTRUCTIONS FOR FILLING UP THE HOUSEHOLD SCHEDULE

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head

of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'un-related persons living together'. In such a Household the manager or the superintendent or the persons who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the weekdays in town and spends the week-ends at home, he should be recorded as Head of Household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is in charge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the Head of the household marked 'S.C./S.T.'. If the Head of the household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your district, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the household belongs within the parallelogram. If the Head of the household does not belong to Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, *e.g.*, land held directly from Government under a grant, lease or assignment (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession; (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption

by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);

- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
- (d) tenants holding land on temporary leases who are liable to ejectment; and
- (e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and
- (iv) the following:
 - (a) land taken for a fixed amount of money,
 - (b) land taken for a fixed amount of produce,
 - (c) land taken for a share of the produce,
 - (d) land for which money is paid partly in one and partly in any other form mentioned above, and
 - (e) land held free of consideration.

Category 2 Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should *not* be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold:

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the

household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. *Biri*-makers who either alone or with the help of members of the family roll *biris* at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where women-folk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry (s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are

conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in whole time employment during last working season or should be in whole time employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain

how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of Households engaged in Household Industry only, put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

B. INSTRUCTIONS FOR ENUMERATING INDIVIDUAL MEMBERS OF HOUSEHOLDS

I. GENERAL

1 Enumerate all persons who are normally resident in the household, *i.e.*, those who live in the household and also those who have recently become members of the household through marriage or birth or other vital social or domestic ties and are present at the time of your visit.

2 Enumerate also all persons who are normal residents in the household even if they are absent at the time of your visit, provided they left the household on or after the 10th February, 1961, or if they had left earlier than 10th February, 1961, are likely to return before the sunrise of 1st March, 1961.

3 Enumerate a visitor, a boarder, or a guest found in the household at the time of your visit, *if he had not been enumerated before and if he will be away from his household between the 10th and 28th February, 1961*, and warn him not to permit any other enumerator to enumerate him even if he goes back by 1st March, 1961.

4 Do not enumerate pavement dwellers or others who do not form part of the household,

when you are enumerating the households. These along with persons who do not normally reside in houses, *i.e.*, members of wandering tribes, tramps, *sadhus*, etc., would be separately enumerated on the night of the 28th February and on the 1st and 2nd March, 1961.

5 Each individual has to be enumerated in one slip. Before commencing enumeration of an individual make sure to fill the Location Code in each case. The Location Code in the slips will be the same as in the Household Schedule to which the individuals relate.

6 The questions have been briefly printed in the slips, *but only briefly*, and you should study the detailed question forms and instructions for answering them without which you will be liable to miss some of the range and implications of the questions. You should ask the questions *in the order in which they are given in the slips* and proceed to record the answers in their given order. You should make use of the abbreviations recommended in these instructions for recording the answers to the various questions. All abbreviations required to be entered within the geometric designs should be written well within the designs.

7 Make repeated enquiries about new born babies and very young children for they are liable to be missed because they neither talk nor walk and no meals are usually cooked for them.

8 Before leaving one household for the next make doubly sure that all the persons that are to be enumerated in the household have been enumerated. As soon as you have completed the enumeration of the household fill up the Census Population Record at the back of the Household Schedule for that household before you proceed to the next household. Strike the total for the number of males and females in the household and check it with the number of enumeration slips used before you sign the Census Population Record.

9 You should revisit every household in your block during the period of final check (1st to 5th March) when you should enumerate every birth that has taken place in the household since your visit but before sunrise of 1st March. You should cancel the slip for any death that might have taken place since your last visit but before sunrise of 1st March by drawing a bold line diagonally across the slip and write DEATH along the diagonal line. You should enumerate any visitor

who may have arrived to stay since your last visit and who says he has not been enumerated anywhere else. But you should not take notice of any birth or death or visit occurring after sunrise of 1st March, 1961. After your revisit if you have added any new slip or cancelled any slip already prepared you should make corresponding changes in the Census Population Record at the back of the Household Schedule.

10 As soon as you have completed a pad, you should fill up the enumerator's abstract on the cover of the pad. After you have completed the enumeration of your block and filled up all the abstracts in the pads, you should total up your figures and prepare your abstract for your entire block and hand it over to your supervisor along with your pads.

11 Under the Census Act, every person is legally bound to furnish you with the information you need for recording your answers. You must not ask information on any matters not necessary for the purposes of the census, for example, the amount of any person's income. Nor must you disclose to any unauthorised person any information given to you or the results of the enumeration. All census entries are confidential and cannot be admitted as evidence in any civil proceeding whatever or in any criminal proceeding other than a prosecution for a census offence.

II. INSTRUCTIONS FOR FILLING UP THE SLIPS

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household are left out. Please make repeated enquiries about infants and very young children, for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grand-children, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

Location Code

Write the Location Code of the household in each slip. For instructions please see Section A above.

Q. 1(a) Name

Write the name of the person enumerated. If a woman's name is not given out describe her

as "so-and-so's mother, wife or daughter". If a woman does not take the name of a person's husband and that husband's particulars have to be recorded write "so-and-so's husband".

For newly born infants who have not yet been given a name write 'Baby' and write "father's or mother's name".

Q. 1(b) Relationship to the Head of the household

In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the Household' has been fully explained in Part A. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

If on the check or revisional round between the 1st and 5th March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled

In the case of places like messes, boarding houses, chummeries, etc. where people live together with no ties of relationship, the manager or the superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household. Other members should be recorded as 'unrelated' in this question.

Q. 2 Age in completed years last birthday

Write age in years completed last birthday. For infants below one year of age, write '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital Status

For never married	write	NM
Married	write	M
Widowed	write	W
Separated or Divorced	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4(a) Birthplace

1 If born in village or town in which enumerated	write	PL
2 If born in another village or town of district in which enumerated	write	D
3 If born in another district in the State of enumeration	write name of district	
4 If born in another State in India	write name of district and State if name of district is known; otherwise write name of State	
5 If born in a country outside India, e.g., Pakistan or any other country	write name of country	
6 Persons born at sea or in air or in railway carriages or on road transport, e.g., buses, etc., should be entered as such		

Q. 4(b) Whether born in Village or Town

1 If born in a village	write	R
2 If born in a town which is considered a town at the present time even if it was not so considered at the time of birth	write	U
3 If the person enumerated is not in a position to say whether the place of birth is a village or town	write the name of the place of birth as returned by him	

Q. 4(c) Duration of Residence

1 For a person born in village or town or city in which enumerated	write	X
2 For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration	write the number of completed years this person has been in the village/town/city of enumeration. (Do not take into account periods of temporary absence on leave or holiday or tour or business.)	
3 If the duration of residence is less than one year	write	0
If the duration of residence is one year or over	write the actual number of completed years of residence.	

Q. 5(a) Nationality

1 For Indian nationals	write	I
2 For other nationals	write the nationality in full	

Q. 5 (b) Religion

For Hindu	write	H
Muslim	write	M
Christian	write	C
Jain	write	J
Buddhist	write	B
Sikh	write	S

For others write the answers actually returned.

Q. 5(c) Scheduled Castes & Scheduled Tribes

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by

a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as *Harijan*, *Achhut*. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely *Harijan* tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 Literacy & Education

I. ILLITERATE OR LITERATE

For a person

- | | | |
|--|-------|---|
| 1 Who can neither read nor write or can merely read but cannot write in any language | write | 0 |
| 2 Who can both read and write | write | L |

The test for reading is ability to read any simple letter either in print or in manuscript, *i.e.*, if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. STANDARD OF EDUCATION

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L.

Q. 7(a) Mother Tongue

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants

and deaf mutes give the language usually spoken by the mother.

Q. 7(b) Any other Language (s)

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language (s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Qs. 8 to 11 Working

These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a

convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in

furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

After you have filled up the answers to Qs. 8 to 11 if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the Qs. 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the Qs. 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, *i.e.*, more than two of the questions, 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, *i.e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

The following classification illustrates as to which answers should be entered under Q. 8 and which others under Q. 11.

Under Q. 8 : Cultivation involving ploughing, sowing and harvesting

- 1 Production of cereal crops (including Bengal gram), such as rice, wheat, *jowar*, *bajra*, maize; roots and tubers like potato, yam, beet, etc.; sugarcane, etc.
- 2 Production of pulses, such as *arhar*, *moong*, *masur*, *urd*, *khesari*, other gram.
- 3 Production of raw jute and kindred fibre crops.
- 4 Production of raw cotton and kindred fibre crops.

APPENDIX V

*Under Q. 11 : Other Field Produce, Plantation Crops**A—Other Field Produce*

- 1 Production of other crops including vegetables not covered in Q. 8
- 2 Production of fruits and nuts in plantations, vines and orchards (like cocoanut, arecanut, etc.)
- 3 Production of wood, bamboo, cane, reeds, thatching grass, etc.
- 4 Production of juice by tapping palms
- 5 Production of other agricultural produce (including fruits and nuts not covered by Sl. No. 2 and flowers) not covered above

B—Plantation Crops

- 1 Production of tea in plantation
- 2 Production of coffee in plantation
- 3 Production of rubber in plantation
- 4 Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation)
- 5 Production of *ganja*, cinchona, opium, poppy, saffron, etc.
- 6 Production of other plantation crops not covered above

Q. 8 Working as Cultivator

For a person working as Cultivator write 'C'. For a person not working as Cultivator and for a person not working at all put 'X'.

For purposes of the census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as Cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9 Working as Agricultural Labourer

Write AL for a person working as Agricultural Labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(a) & 10(b) Household Industry

If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10(a) and (2) the nature of the Household Industry against question 10(b). Otherwise put X in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c) If Employee in Household Industry

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write EE. For all others put X.

The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons working at Household Industry :

Q. 10 Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1 Spinning yarn	Spinning yarn in <i>Ambar Charkha</i>	X
2 Dyeing and pirning yarn	Handloom weaving	X
3 Threshing and cleaning grain	Flour making <i>chakki</i>	X
4 Labourer employed for crushing oil	Oil <i>ghani</i>	EE
5 Tempering and polishing implements	Blacksmithy making agricultural implements	X
6 Labourer employed for making and firing kiln	Earthenware pottery	EE
7 Throwing and Turning pottery	Earthenware pottery	X
8 Making wooden doors and windows	Carpentry	X
9 Filling gold ornaments with lac	Goldsmithy	X
10 Labourer working on hosiery machine	Hosiery	EE
11 Keeping accounts	Hosiery	X
12 Polishing and Scraping metal	Electroplating	X
13 Labourer employed for putting iron hoop on cartwheels	Cartwheelwright	EE
14 Repairing of guns	Gunsmithy	X
15 Bee Keeping	Production of honey	X
16 Tending cattle	Livestock raising	X

Q. 11 Doing Work other than 8, 9 or 10

If a worker is not working as a Cultivator or as an Agricultural Labourer or at any Household Industry write the actual work he is doing. If a person is working as a Cultivator or as an Agricultural Labourer or at Household Industry and also does some other work (including dairying or live-stock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a) Nature of Work

In the case of persons not working or who work *only* as Cultivator or as Agricultural Labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b) Industry, Business, Trade, Profession or Service

In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the

person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom 'X' is put in Question 11(a), put 'X' in this question also.

Important points to remember in Questions 11(a) and 11(b)

1 Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and 'HW' written in brackets after the full description.

2 If a person makes the articles he sells, he should be entered as maker and seller of them.

3 Whenever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4 The following are too vague and must not be used by themselves :

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5 Labourers—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6 Machine Operators—Always state the kind of machine giving its recognized name, if any.

7 Shop-keepers, Retail Dealers, Shop Assistants—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For Shop Assistants and Salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts,

Fans and Sewing Machines, Grocers and Confectioners).

8 Transport Workers—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9 Services—For a person engaged in the Defence Services write 'Service of Central Government'.

10 If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves :

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11 Domestic services—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hotels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12 Commerce—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c) Class of Worker

- For a person who is :
- 1 an Employer, that is, who hires one or more persons in his work described in Q. 11(a) write MR
- 2 an Employee, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind write EB

3 a Single Worker, that is, who is doing his work described in Q. 11(a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives write SW

4 a Family Worker, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind write FW

For a person for whom 'X' is put in Qs. 11(a) and 11(b) put 'X' in this question also.

Explanation :

(i) An Employer is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A Single Worker for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This

definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A Family Worker is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d) Name of Establishment

Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom 'X' is put in Qs. 11(a), 11(b) and 11(c) put 'X' in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

Q. 11 Doing Work other than 8, 9 or 10

Q. 12 Activity, if Not Working

This question will apply to a person NOT Working.

Write 'X' in this question for a person who is working, that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :

- For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business write ST
- For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW
- For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age write D
- For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work write R

5 For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence write B

A I-AREA, HOUSES AND POPULATION

Fly-leaf

Brief Account of the Changes of the Area from 1901 to 1961

1. The Laccadive, Minicoy and Amindivi Islands are a group of coral islands, lying in the Arabian Sea off the coast of Kerala State. These islands formed part of Madras State till the date of re-organisation of States on 1st November, 1956. The northern islands of the above group of islands were attached to the district of South Kanara and the remaining islands to the Malabar District. The details of these islands are furnished below.

District	Island	Dependent islet
Malabar	1 Minicoy	
	2 Kalpeni	i Thilakkam ii Pitty iii Cheriam
	3 Androth	
	4 Agathy	i Kalpitty ii Bangaram iii Tinnakara iv Parli
	5 Kavarathy	i Suheli consisting of 'Valiakara' and 'Che- riyakara' ii Pitti (Birds Island)
	6 Ameni	
	7 Kadamath	
	8 Kiltan	
	9 Chetlat	
	10 Bitra	

There is an islet of less than an acre in extent attached to the Minicoy Island known as Viringilly. This being a continuation of the Minicoy Island is not treated as a separate islet.

The area of Laccadive and Minicoy Islands has been recorded in the Census Reports of 1901 to 1951 as 7 sq. miles while that of Amindivi Islands has been given as 3 sq. miles in the Census Reports from 1901 to 1941 except that of 1951 which records it as 3.21 sq. miles. Thus, according to the 1951 District Census Handbooks the total area of the Union Territory of Laccadive, Minicoy and Amindivi Islands is 10.21 sq. miles.

Effect of States Reorganisation in 1956

2. The Union Territory of Laccadive, Minicoy and Amindivi Islands was constituted with effect

from 1st November, 1956 as per the States Reorganisation Act 1956 (Central Act 37 of 1956).

Section 6 of the Act fixing the constituent parts of this new Union Territory is extracted below.

“6. As from the appointed day, there shall be formed a new Part C State to be known as the Laccadive, Minicoy and Amindivi Islands comprising the Laccadive and Minicoy islands in the Malabar District and the Amindivi islands in the South Kanara District; and thereupon shall cease to form part of the existing State of Madras”.

Figures of Surveyor General and Director of Survey and Land Records

3. According to the Surveyor General of India the area of the Union Territory of Laccadive, Minicoy and Amindivi Islands is 11 sq. miles while the Administrator of the Laccadive, Minicoy and Amindivi Islands has given the area as 10.76 sq. miles both of which include the area of uninhabited islands also. The survey of the islands is reported to be incomplete. Area figures of the inhabited islands furnished by the Administrator is given below.

Inhabited Island	Area in acres
1 Minicoy	1,120.00
2 Kalpeni	494.00
3 Androth	1,067.00
4 Agathy	688.00
5 Kavarathy	865.50
6 Ameni	622.00
7 Kadamath	748.28
8 Kiltan	397.00
9 Chetlat	255.00
10 Bitra	26.00

Full Account of Changes in Jurisdiction between 1951 and 1961

4. Except the formation of a new Part C State on 1st November, 1956 no other change has taken place between 1951 and 1961.

5. The islands have all along been treated as entirely rural for the purpose of census.

Census Village

6. Each of the ten inhabited islands is taken as the ultimate unit for purposes of census *in lieu* of villages.

7. There are ten inhabited and nine uninhabited islands in this Union Territory. The subjoined table gives the number of inhabited islands from 1901 to 1961.

Union Territory	1961	1951	1941	1931	1921	1911	1901
Laccadive, Minicoy and Amindivi Islands	10	10	10	9	9	10	9

8. There is difference in the number of inhabited islands in the census years 1901, 1921 and 1931. No explanation is given in the concerned Census Reports for this variation.

Definitions

9. A 'census house' is a structure or part of a structure, inhabited or vacant, giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school etc.

10. An 'occupied residential house' is a census house occupied by one or more census households and includes a shop-cum-dwelling, a workshop-cum-dwelling and a dwelling with other uses. Even where more than one household occupy one census house, it is considered as only one occupied residential house.

11. The subjoined table gives the number of persons per occupied residential house, number of females per 1,000 males and density per sq. mile for each island.

Union Territory/ Island	Persons per occupied residential house	No. of females per 1,000 males	Density per sq. mile
Laccadive, Minicoy and Amindivi Islands	6.35	1,020	2,241
1 Minicoy	5.96	1,307	2,365
2 Kalpeni	6.72	974	3,394
3 Androth	6.20	1,045	2,505
4 Agathy	6.68	903	2,232
5 Kavarathy	7.03	954	2,095
6 Ameni	7.22	870	3,639
7 Kadamath	6.63	1,030	1,582
8 Kiltan	5.33	995	2,452
9 Chetlat	4.69	1,122	2,383
10 Bitra	4.44	702	2,000

12. The number of persons per occupied residential house taking all the islands together comes to 6.35. Among the islands Ameni has the highest number of persons per occupied residential house with 7.22 and Bitra has the lowest with 4.44 persons.

The overall sex-ratio defined as the number of females per 1,000 males for the Union Territory comes to 1,020, the highest being in Minicoy Island with 1,307 and the lowest in Bitra with 702.

Out of the ten islands Kalpeni, Agathy, Kavarathy, Ameni, Kiltan and Bitra have sex-ratio falling below 1,000.

The number of persons per sq. mile in the Union Territory of Laccadive, Minicoy and Amindivi Islands is 2,241. All the islands except the islands of Agathy, Kavarathy, Kadamath and Bitra have a higher population density than the Union Territory as a whole. Ameni Island has the highest density of 3,639 while Kadamath has the lowest with 1,582 persons per sq. mile.

Appendices

The following three appendices are given to Table AI.

Appendix I

This gives details of the constituent parts forming the present Union Territory of Laccadive, Minicoy and Amindivi Islands.

Appendix II

All the islands have a population of less than 5,000. Hence the statement is left blank.

Appendix III

An institution is a place where unrelated persons are living together. The total of institutional population comes to 80 persons for the whole of the Union Territory of Laccadive, Minicoy and Amindivi Islands. Of this, 18 persons are in Androth being inmates of the Leper Colony, 16 in Kavarathy living in private hostels, 24 in Ameni being students in the Government hostel for islanders and 22 in Kadamath being inmates of the Leper Colony.

A II—VARIATION IN POPULATION DURING SIXTY YEARS

Fly-leaf

1. Table A II furnishes the data on the population for seven censuses from 1901 to 1961 as well as the variation of population. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistics this data forms the main source for estimation of population. One of the main changes in this table since the last census is that percentage variation is also given from decade to decade. Appendix to this table gives details of island-wise area and population for 1951 and 1961.

2. The population for the Union Territory of Laccadive, Minicoy and Amindivi Islands as a whole for the previous census years is worked out by adding the population figures given separately for Laccadive Islands of the former Malabar District and Amindivi Islands of the South Kanara District in the concerned census reports. Island-wise figures are furnished only in 1951 Census.

3. The statement given below gives the percentage variation of population from 1901 to 1961.

APPENDIX

Statement showing 1951 Population according to their Territorial Jurisdiction in 1951, changes in Area and Population involved in those changes

The Union Territory of Laccadive, Minicoy and Amindivi Islands was created on the 1st day of November, 1956 by Central Act No. 37 of 1956 comprising the Laccadive and Minicoy Islands (referred to as Laccadive Islands) of former Malabar District and the Amindivi Islands of South Kanara District (now in Mysore State) of Madras State.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

Fly-leaf

1. The Primary Census Abstract gives figures down to island level.

Occupied Census House

A census house is a structure or part of a structure, inhabited or vacant giving on the road a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a shop-cum-dwelling, a workshop-cum-dwelling, or a place of business, workshop, school etc. A census house that is inhabited is an occupied census house.

Dwelling

A dwelling is a census house used exclusively for residential purposes.

Shop-cum-dwelling

A shop-cum-dwelling is a census house used both as a shop and as a residence.

Workshop-cum-dwelling

A census house used both as a workshop and as a residence is a workshop-cum-dwelling.

Household

A household is a group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so.

2. The following table gives the percentage of households to number of houses in each island. There is no urban area in this territory.

PERCENTAGE OF HOUSEHOLDS TO NUMBER OF HOUSES IN ALL THE ISLANDS TOGETHER AND EACH OF THE ISLANDS

Union Territory/Island	Percentage of households to No. of houses
Laccadive, Minicoy and Amindivi Islands	107.51
1 Minicoy	103.31
2 Kalpeni	112.85
3 Androth	116.30
4 Agathy	103.32

Scheduled Castes and Scheduled Tribes

4. There is no Scheduled Caste in this territory. Extract of the "Scheduled Castes and Scheduled Tribes lists (Modification) Order 1956" pertaining to the Scheduled Tribes of the Union Territory of Laccadive, Minicoy and Amindivi Islands is furnished below.

"Part IV—The Laccadive, Minicoy and Amindivi Islands. Throughout the Union Territory:—

Inhabitants of the Laccadive, Minicoy and Amindivi Islands who, and both of whose parents, were born in those islands."

Houseless Population

5. Houseless population consists of persons having no place of residence either of their own or held from anybody else and also persons who having a residence have been enumerated while in transit.

Institutional Population

6. Institutional population consists of unrelated persons living together. Details of such types of persons are furnished in the fly-leaf to Table AI-Appendix III.

Literacy and Education

7. For purpose of enumeration the ability to read and write was recognised as the test of literacy. The test applied for reading was the ability to read any simple letter either in print or in manuscript and for writing was ability to write a simple letter.

Persons who could both read and write and have also passed a written examination or examinations as a proof of educational standard attained were taken as educated persons.

Workers and Non-workers

8. A worker was defined for the purposes of this census as a person working as a cultivator, or an agricultural labourer, or working at household industry, or may be doing any other productive work, or working in any possible combination of the above four categories of work. The basis of work was deemed to be satisfied in the case of seasonal work like cultivation, live-stock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work was deemed to be satisfied if the person was employed during any of the fifteen days preceding the day of enumeration. A person who was working but absent from his work during the fifteen days preceding the day on which enumerated, or even exceeding the period of fifteen days due to illness or other causes was treated as worker. Work includes not only actual work but also effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages were also regarded as workers. An adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources was not considered as a worker. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages or in domestic services for wages for others or minding cattle or selling firewood etc., or any such work, she was treated as a worker. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who might have been earning an income but were not participating in any productive work, were not treated as workers unless they also worked in cultivation, industry, trade, profession, business or commerce. A public or social service worker who was actively engaged in public service activity or a political worker who was also actually engaged in furthering the political activity of his party was regarded as a worker. A person was considered to be working as cultivator, if, he or she, was engaged either as employer, single worker or family worker in cultivation of land or supervision or direction of cultivation of land owned or held from Government or institutions. A person was considered agricultural labourer if he was working

in another person's land only as labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share such as a share of produce. He should be having no right or lease or contract on land on which he works. Nor should he have been responsible for taking decisions as to which crop to sow and when or taking the risks of cultivation. A person was considered as working in household industry if the industry comes within the definition of the household industry. A worker may be an employer, i.e., a person who hires one or more persons in his work, or an employee i.e., who does his work under others for wages or salary in cash or kind, or a single worker i.e., who is doing his work without employing others except casually and without the help of other members of the family except casually, or a family worker, i.e., a member who works without receiving wages, in cash or kind, in an industry, business or trade, conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. The following explanations of these categories of workers were accepted for census enumeration.

(i) An employer is not only responsible for his own personal work but also for giving work to others in the business run by him. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees as explained above, and should not be regarded as employers.

(iii) A single worker is not employed by any one else and in his turn, does not employ anybody else, not even members of his household except casually. The definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives is a 'single worker'.

(iv) An industry in which a family worker is engaged, should be on the scale of a factory, whether run at home or away from home, in town or village, and even away from village in rural areas, and should ordinarily be in the nature of a recognised partnership, joint stock company

or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives. For purposes of enumeration, non-workers were persons who were not engaged in any productive work. Thus a person who had been offered work but had not actually joined or, an adult woman who was engaged in household duties but was doing no other productive work to augment the family's resources, or persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who were earning an income but were not participating in any productive work were all treated as non-workers.

The non-workers are sub-grouped into eight according to the nature of their activity as given below.

- 1 Full-time students or children attending school who do no other work
- 2 Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly, even part time, in family cultivation, industry, trade or business
- 3 Dependents including infants and children not attending schools and persons permanently disabled from work because of illness or old age
- 4 Retired persons not employed again, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work
- 5 Beggars, vagrants, independent women without indication of source of income or others of unspecified source or existence
- 6 Inmates of penal, mental and charitable institutions
- 7 Persons seeking employment for the first time
- 8 Persons employed before, but were out of employment and were seeking work during the reference period.

The following industrial classification has been adopted for the primary economic classification of population.

I Working as Cultivator

- II Working as Agricultural Labourer
- III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
- IV Working at Household Industry
- V Working in Manufacturing other than Household Industry
- VI Working in Construction
- VII Working in Trade and Commerce
- VIII Working in Transport, Storage and Communications
- IX Working in Other Services
- X Non-workers.

A departure has been made in the concept for the collection of economic data from the previous censuses. "In the earlier Indian censuses or at least, at the last few censuses income or economic independence was made a criterion for measuring the economy of the country. Account was made of all persons who were economically independent and of all those who were economically dependent. An intermediate category of economic semi dependence was also introduced from the 1931 Census. This category was called 'working dependent' in the 1931 Census, 'partly dependent' in 1941 and 'earning dependent' in 1951, and even here an element of income was introduced. It was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activities, but did not actually earn an income like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household. Stress has, therefore, been laid in this census on work so that all people who work, including family workers, who are not in receipt of any income or working children who cannot earn enough for their maintenance, are also reckoned as workers".

Household Industry

9. For purposes of enumeration an industry was considered to be a household industry if it was below the scale of a registered factory conducted by the head of the household himself and/or mainly by members of the household at home or within a village in rural areas and only at home in urban areas. The industry should have embraced production, processing, servicing or repairing and included making and selling of goods. The following three tests were laid down to determine whether an industry is a household industry or not.

(a) Household industry should embrace manufacturing, processing or servicing or repairing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household industry should be on a household scale where the workers mainly will be the head of the household himself and members of the household, the role of hired worker from outside being of secondary importance. Thus, in any household industry, members of the household should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location is also important for proximity besides participation by members of the household. In a village this participation is possible if the household industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, in urban areas, only those industries which are located at home can be considered for purposes of household industry. Where, however, the part of the work is done outside the house e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a household industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and

only one or two operations are conducted outside.

ECONOMIC TABLES

B (i)—GENERAL ECONOMIC TABLES

Tables B II, B III Part A, B VI and B VIII
Part A are not presented as they relate to
urban areas

B I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

B I-WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

Fly-leaf

Table B I given down to the island level is a basic table showing the total population, the total number of workers, the classification of workers into nine industrial categories and non-workers by sex and broad age-groups. The age-groups adopted for the tables are 0-14, 15-34, 35-59, 60+ and 'age not stated'. The age-groups correspond to the different stages of life which have special significance with reference to capacity of work, viz., children, young persons, middle aged persons and elderly persons. The corresponding table in the 1951 Census gives the distribution of population by eight Livelihood classes and their further sub-divisions into self-supporting persons, earning dependants and non-earning dependants. There was no classification by age-groups in that table. The Livelihood classes under which the population was grouped in 1951 were the following:-

- (i) Cultivators of land wholly or mainly owned and their dependants
- (ii) Cultivators of land wholly or mainly unowned and their dependants
- (iii) Cultivating labourers and their dependants
- (iv) Non-cultivating owners of land, agricultural rent receivers and their dependants
- (v) Persons engaged in production other than cultivation and their dependants
- (vi) Persons engaged in commerce and their dependants
- (vii) Persons engaged in transport and their dependants
- (viii) Persons engaged in other services and miscellaneous sources and their dependants

As it was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activity but did not actually earn an income like men other than the head of the household and women of the family or children working in cultivation or cottage industries of the household, the classification of the population into self-supporting persons and earning and non-earning dependants has been given up in the table for 1961. All persons who work including family workers who are not in receipt of any income or working children

who cannot earn enough for their maintenance are treated as workers and grouped under the following industrial categories instead of the eight Livelihood classes in 1951 referred to above:-

- I Working as Cultivator
- II Working as Agricultural Labourer
- III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
- IV Working at Household Industry
- V Working in Manufacturing other than Household Industry
- VI Working in Construction
- VII Working in Trade and Commerce
- VIII Working in Transport, Storage and Communications
- IX Working in Other Services

The non-workers have been classified under the following categories and dealt with in Table B IX:-

- (i) Full-time students or children attending school who do no other work
- (ii) Persons engaged in unpaid home duties who do no other work such as make articles at home for sale, or wages, nor help regularly even part-time in family cultivation, industry, trade or business
- (iii) Dependants including infants and children not attending schools and persons permanently disabled from work because of illness or old age
- (iv) Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work
- (v) Beggars, vagrants, independent women without indication of source of income or others of unspecified source of existence
- (vi) Convicts in jails, inmates of penal, mental and charitable institutions
- (vii) Persons seeking employment for the first time
- (viii) Persons employed before, but were out of employment and were seeking work during the reference period

The concepts of workers and non-workers have been explained in the Fly-leaf to the Primary Census Abstract.

B III PART B
INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS
IN RURAL AREAS ONLY

**B III PART B-INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS
BY EDUCATIONAL LEVELS *IN RURAL AREAS ONLY***

Fly-leaf

Table B III Part B gives the data relating to literacy and educational levels of the working population under the nine industrial categories and of the non-working population. It enables to assess the literacy and educational levels of the workers as well as the non-workers. The table is presented down to island level.

Besides giving the number of illiterates and literates (without educational level) the remaining literates are classified as follows:-

1. Primary or Junior Basic
2. Matriculation and above

All persons who have ability to read and write with understanding *i.e.*, to read any simple letter with felicity and write a simple letter with understanding, are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Primary or Junior Basic and all those who have passed Matriculation, Higher Secondary, S.S.L.C. or E.S.L.C. come under the category of Matriculation or Higher Secondary.

B IV PARTS A, B & C

B IV PART A-INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK AT HOUSEHOLD INDUSTRY

B IV PART B-INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE

B IV PART C-INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

Fly-leaf

This table contains the sex-wise distribution of non-agricultural workers according to their principal work by divisions, major groups and minor groups of Indian Standard Industrial Classification (I.S.I.C.) issued by the Ministry of Labour and Employment, Government of India, following the International Standard Industrial Classification recommended by the U.N.O. The minor groups 000 to 004 and 999 of the I.S.I.C. do not appear in this table because of the exclusion of cultivators, agricultural labourers and non-workers in this table. Industrial minor groups 000 to 004 relate to agriculture and the minor group 999 to fresh entrants to the labour market who are treated as non-workers. The table is prepared in three parts, parts A and B containing figures up to divisions and major groups only and part C giving figures for minor groups also for each island of the Union Territory.

In Table B IV Part A the workers principally engaged in household industry are divided into "Employees" and "Others" for each of the divisions 0, 1 and 2 & 3 and their major groups. The study of household industry is a special feature of the 1961 Census.

In Table B IV Part B non-agricultural workers engaged in non-household industries are classified into "Employer", "Employee", "Single worker" and "Family worker" according to their participation in work. This distribution is available for each of the divisions and major groups of I.S.I.C. The concepts of "Employer", "Employee", "Single worker" and

"Family worker" have been defined in the Fly-leaf to the Primary Census Abstract.

Table B IV Part C shows the combined as well as separate sex-wise figures of persons working in household industry and non-household industry by divisions, major groups and minor groups of I.S.I.C. In this table those minor groups the figures of which are less than 1% of the respective divisions (less than 0.5% in the case of division 2 & 3) have been omitted. The figures of such minor groups are shown in the Appendix at the end of the table.

The corresponding table of 1951 Census viz., Table B III gives the number of self-supporting persons in non-agricultural livelihood classes by 10 divisions and 88 sub-divisions according to the Indian Census Economic Classification (I.C.E.C.) classified into "Employers", "Employees" and "Independent workers" according to the economic status. Under the I.C.E.C. scheme the unit of classification was in every case the individual. This scheme bears more resemblance to the occupational classification given in table B V of 1961 than to the I.S.I.C. scheme followed in table B IV of 1961. Under the I.S.I.C. scheme the unit of classification is the organised establishment, the classification of every member of the establishment being according to the classification of the establishment based on the commodity produced the service performed as a result of the work of the establishment.

B V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Fly-leaf

This table gives the distribution of non-agricultural workers by sex according to the 'National Classification of Occupation' issued by the Ministry of Labour and Employment, Government of India, which classifies occupations into 331 families, 75 groups and 11 divisions.

A few modifications as mentioned below have been made in the N. C. O. while classifying the economic data in this table.

(i) The family OX4 relating to Geographers has been deleted and code 073 assigned to them. Actuaries coming under the family 073 according to N. C. O. have been brought under 072 Statisticians.

(ii) The families 400—Owner cultivators, 401—Cultivating tenants, 414—Agricultural labourers and the major group XO—Workers without occupations of the N.C.O. have been omitted because of the exclusion of Cultivators, Agricultural labourers and non-workers for the purpose of classification in this table.

(iii) The code number 063 given to Jurists and Legal technicians n. e. c. (including petition writers) in the N. C. O. has been changed as 069.

(iv) The family 673—Teleprinter operators has been newly added.

Under this scheme each individual is classified on the basis of the nature of his (or her) work irrespective of the nature of establishment where he (or she) works. Each of these divisions, groups and families is cross-classified with the 7 non-agricultural industrial categories (categories III to IX). The cross classification of occupation with industry is a peculiarity of the 1961 Census and this being the first time that such an attempt is made there are some occupational families which appear incongruous *vis-à-vis* the industrial category in which they have been placed.

In spite of the limitations pointed out above, this table will be of much use in giving an idea about the variety of occupations and the employment opportunities under different industries.

In this table those occupational families the figures of which are less than 1% of the respective divisions (less than 0.5% in the case of division 7-8) have been omitted giving the figures of these families in the Appendix at the end of the table. The National Occupational Classification adopted for classification of occupations is reproduced below.

B VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

Fly-leaf

This table which is prepared in two parts gives information about secondary work. Part A of the table is prepared in the case of workers who are principally engaged

(i) as Cultivators
(ii) as Agricultural Labourers or
(iii) at Household Industry
and who are also additionally engaged in any of the above 3 categories of work. Workers who are principally engaged at Household Industry are also given by divisions and major groups of I.S.I.C.

Part B of the table gives sex-wise data on the basis of cross tabulation of principal and secondary work in the case of persons who are principally engaged in non-household industry, trade, business,

profession or service and also additionally working at Household Industry. The Household Industries and Non-household Industries are further classified according to divisions and major groups of I.S.I.C.

Table B VII Part A is important as it shows the extent to which cultivation is supplemented by Household Industry or *vice versa*. From B VII Part B the extent of influence of principal work on the nature of secondary work can be studied. This table roughly corresponds to table B II of 1951 which shows secondary means of livelihood of the self-supporting persons and earning dependants under the eight livelihood classes.

Workers who have no secondary work are excluded from this table.

B VII PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR (iii) AS AGRICULTURAL LABOURER

**B VIII PART B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL

Fly-leaf

This is a very important table which provides information about persons aged 15 and above who are unemployed by sex and educational levels in the Union Territory by islands.
The table shows the distribution of unemployed

persons aged 15 and above by the same educational levels as given in Table B III Part B.
The table will be useful for purposes of planning for employment and also for assessing the available man power.

**B IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND

**B IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND
TYPE OF ACTIVITY**

Fly-leaf

This table gives details about the activities of non-workers. Non-workers are divided into eight Categories which are given in fly-leaf to Table B I. It is the first time in the history of Indian Census that information about the activities of non-workers are given. Any study of workers and non-workers is likely to be incomplete without getting detailed information about the activities of non-workers.

The excess of student population in the age-group 0-14 of this table over the literates in the age-group 5-14 of Table C III is due to the following :-

- (i) There are several instances where the children attending to religious classes were considered as students. But these children are not considered as literates.
- (ii) Several students of primary classes were not treated as literates.

B (ii)—HOUSEHOLD ECONOMIC TABLES

HOUSEHOLD ECONOMIC TABLES

Fly-leaf

All the Household Economic Tables presented in this volume are prepared from 20% sample of household schedules.

Table B X

This table shows the number of households in the 4 categories, viz., (i) Households engaged neither in cultivation nor in household industry (ii) Households engaged in cultivation only (iii) Households engaged in household industry only and (iv) Households engaged in both cultivation and household industry.

Table BXI

This table gives a cross classification of the cultivating households consisting of households engaged in cultivation only and households engaged in both cultivation and household industry by the interest in land and the size of land cultivated. The interest in land is classified into (a) owned or held from Government (b) held from private persons or institutions for payment in money, kind or share or (c) partly held from Government and partly from private persons for payment in money, kind or share. The size of holdings is grouped under less than 1 acre, 1.0-2.4 acres, 2.5-4.9 acres, 5.0-7.4 acres, 7.5-9.9 acres, 10.0-12.4 acres, 12.5-14.9 acres, 15.0-29.9 acres, 30.0-49.9 acres and 50 or more acres.

Table B XII

This table shows the classification of households engaged in cultivation only according to the number of persons engaged in cultivation by the size of holding groups in acres. The number of persons engaged in cultivation are grouped under 1 person, 2 persons, 3-5 persons, 6-10 persons and more than 10 persons. In the case of households where more than 1 person is working, the number of family workers and hired workers have been shown separately.

Table B XIII

This table shows the distribution of households engaged in both cultivation and household industry by the size of land cultivated. The household industries are classified according to divisions and major groups of Indian Standard Industrial Classification (I. S. I. C.).

Table B XIV

This table prepared in two parts gives the classification of households engaged only in household industry by divisions, major groups and minor groups of I.S.I.C. Part A of the table shows for each division and major group of I.S.I.C. the number of households according to the number of persons engaged in household industry. The number of persons engaged in household industry are grouped under 1 person, 2 persons, 3-5 persons, 6-10 persons and more than 10 persons.

Part B of the table gives the number of households engaged only in household industry by each minor group of I.S.I.C.

Table B XV

This table shows the classification of households engaged in both cultivation and household industry by the size of land cultivated and the number of persons engaged in household industry. In the case of households where more than 1 person is engaged in household industry the number of family workers and hired workers have been given separately.

This table shows the relationship between the scale of household industry and the scale of cultivation.

Table B XVI

This table shows the classification of households engaged in household industry by the period of working grouped under 1-3 months, 4-6 months, 7-9 months and 10 months to 1 year and unspecified. Under each of these groups the number of households, the number of family workers by sex and the number of hired workers are given. The information is available for each of the divisions and major groups of principal household industry. Households engaged in household industry have been divided into those 'with cultivation' and 'without cultivation.'

This table furnishes valuable data on the seasonality of various household industries.

Table B XVII

This table shows the classification of households in the three groups, viz., (i) Households engaged neither in cultivation nor in household industry (ii) Households engaged in household industry only and (iii) Households engaged in cultivation, by the size of households having single member, 2-3 members, 4-6 members, 7-9 members and 10 or more members. The number of male and female members of the households in each of these groups are also given. The households engaged in cultivation are further classified by the size of land cultivated.

The total number of households and the total household population of the Union Territory are given below. The total number of households is the

same as that given in the Primary Census Abstract (P. C. A.) and the total household population is the total population as per P. C. A. excluding houseless and institutional population.

Union Territory	Total Rural Urban	No. of households	Household Population		
			P	M	F
1	2	3	4	5	6

**C I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY
CLASSIFIED BY SIZE OF LAND CULTIVATED**

**C I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY
CLASSIFIED BY SIZE OF LAND CULTIVATED**

Fly-leaf

Table C I gives the family composition of households which has been prepared on a 20 per cent sample basis from the household schedules. The members in a household have been divided into two groups viz., family members and non-family members. Among the family members, heads of households and their spouses have been given by sex. Married relations have been classified into married sons, other married males and other married females. Never married, widowed and divorced or separated relations also have been given by sex. Similarly sex-wise figures of non-family members or unrelated members are given. This

table will be of sociological interest indicating the strength of the joint family system.

Though the above table gives only the composition of households, the corresponding table C I of 1951 Census gives both the size and composition of households which was based on a 0.1 per cent sample of households prepared from the National Register of citizens.

The size of the households has been given separately in this Census in Table B XVII under 'Household Economic Tables' which is also based on a 20 per cent sample of Household Schedules.

C II—AGE AND MARITAL STATUS

C II—AGE AND MARITAL STATUS

Fly-leaf

Table C II gives the sex-wise distribution of population by age-groups and marital status. The age-groups followed in this table are 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and age not stated which conform to international standards.

The corresponding table at the 1951 Census (Table C III—Age and civil condition) was prepared on a 10 per cent sample unlike the present one done on full count.

The marital status groupings in the 1961 Census and the civil condition groupings in the 1951 Census are given below :—

Marital status (1961)	Civil condition (1951)
1 Never married	1 Unmarried
2 Married	2 Married
3 Widowed	3 Widowed or divorced
4 Divorced or separated	
5 Unspecified status	

There are no figures under unspecified status in this Territory.

There is no urban area in L. M. & A. Islands. Hence the figures for 'Total' are the same as those for 'Rural'.

C III--AGE, SEX AND EDUCATION

C III—AGE, SEX AND EDUCATION
PART A – Age, Sex and Education *in all areas*

Fly-leaf

Table C III gives the sex-wise distribution of population by age-groups and educational levels. The age-groups followed are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59, 60+ and age not stated.

Table C III has three parts; Part A relates to 'all areas', Part B to 'urban areas' and Part C to 'Rural areas'. As the Union Territory of L. M. & A. Islands is wholly rural (there being not a single town situated in it), Parts A and C are identical and so not repeated. This is Part 'A' which relates to 'all areas'. Part B is, however, discarded for the reason stated above.

Besides giving the number of illiterates and literates (without educational level), the remaining literates are classified as follows:—

1. Primary or Junior Basic

2. Matriculation and above

All persons who have ability to read and write with understanding *i. e.*, to read any simple letter with facility and write a simple letter with understanding, are considered literates. Those who have passed Lower Primary or Junior Basic but have not passed Matriculation, Higher Secondary, S. S. L. C. or E. S. L. C. come under the category of Primary or Junior Basic and all those who have passed Matriculation, Higher Secondary, S.S.L.C or E.S.L.C. come under the category of Matriculation and above.

Persons in the age-group of 0-4 have been treated as illiterate.

Tables relating to technical personnel are given as Appendix to this table.

During the period of enumeration, an attempt was also made to collect information about technical personnel who possess either a degree or a diploma equivalent to a degree. Special postage prepaid cards were handed over to the heads of households having members who possess the above qualification when the enumerator visited each household, requesting that the cards may be filled up by such members carefully and handed over to the enumerator during his revisional round. If these cards were not duly filled up and handed over to

the enumerators during their revisional round it was instructed that the cards may be duly filled up and sent by post without affixing any stamp. Since the cards were self-addressed, they reached the Registrar General. But, most of the cards were collected by the enumerators and sent to the Registrar General through the Superintendent of Census Operations. As no one was compelled to fill up this card, the returns do not ensure complete coverage.

The card is reproduced below:—

The qualifications for those to whom the cards were issued are as follows :—

1 Science

Anybody holding B.A., or B.Sc., M.A., or M.Sc., or higher degrees (Ph. D etc.) in science subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geo-Physics, Geography etc.

2 Engineering

Any one holding recognised degree or diploma in Engineering

3 Technology

Any one holding degree or diploma in technical subjects like Chemical Technology, Health Technology, Glass and Ceramic Technology, Food-technology etc.

4 Medicine

Persons holding degree or Diploma in Medicine/
and or Surgery

Under-graduate scientists (*i.e.*, those who have not got any Bachelor's degree) or mechanics and technicians even though holding certificates were not included under the enumeration.

The following eight tables prepared based on the cards relating to technical personnel are given as Appendix Tables.

Appendix Table I Classification by each branch and sub-branch of science or technology

Appendix Table II Type of activity and marital status of persons in each branch of science or technology

Appendix Table III Year of obtaining post-graduate degree in Physical sciences and graduate and doctorate degrees in science or technology and selected branches of medicine

Appendix Table IV Persons holding degrees in engineering and technology and selected branches of medicine and also holding degrees in selected branches of Physical Science

Appendix Table V Nature and sector of employment of persons in each branch of science or technology

Appendix Table VI Total monthly income of persons employed in each branch of science or technology classified by sector of employment

Appendix Table VII Tenure and sector of employment of persons in each branch of science or technology

Appendix Table VIII Age and period of unemployment of unemployed persons qualified in each branch of science or technology

Appendix Tables IV & VIII are not presented as the returns are nil for this Union Territory.

C IV—SINGLE YEAR AGE RETURNS

C IV—SINGLE YEAR AGE RETURNS

Fly-Leaf

Table C IV gives sex-wise single year age returns of the population. This is a very important demographic table which will be used for computing the mortality rates and for the preparation of life tables. This table will also afford useful study on bias in age returns at the census.

In previous censuses these tables were prepared

based on samples and not on the entire population. In the censuses earlier than 1951, the single year age distribution of a limited number ranging from 25,000 to 100,000 selected at random from representative tracts were prepared in some provinces. In the census of 1951 the corresponding table (C V table) was prepared on a 10 per cent sample.

C V—MOTHER TONGUE

C V—MOTHER TONGUE

Fly-leaf

This table which corresponds to table D I (1)– Mother tongue of 1951 Census gives the sex-wise distribution of the population under different mother tongues. This is finalised in consultation with the Linguist of Registrar General's Office. The Appendix

to this table and the following notes have also been prepared by the Linguist.

A copy of Grierson's classified list of languages is given as Appendix I of this volume.

- NOTE 1. (i) The following mother tongues arranged in alphabetical order in Col. 1 of the table given below as per Table C V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother tongue in Col. 3.
- (ii) If in Col. 3 no Classification No. is given against any mother tongue of Col. 1 then it would mean that the name refers to either old or middle Indo-Aryan Language or a language group or branch or family name from the Linguistic Survey of India.
- (iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a dialect or another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.
- (iv) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.
- (v) In Col. 2 standardized spellings according to Linguistic Survey of India have been given against each mother tongue of Col. 1.

C VI—BILINGUALISM

C VI—BILINGUALISM

Fly-leaf

This table gives the sex-wise distribution of speakers of various mother tongues and of the persons speaking different subsidiary languages under each mother tongue. Those mother tongues where all of its speakers are unilingual are not given in the table as its figures can be obtained from C V table. The scheme of classification of the languages is the same as that followed in C V table.

This table corresponds to table D I (ii) Bilingualism of 1951 Census.

In the case of respondents who spoke and understood more than one language in addition to their mother tongue two languages were recorded in the enumeration slips. But the data abstracted from them for this table was based on the first recorded language.

Fly-leaf

The distribution of population by sex under different religions is given in this table. In the table the figures of only three major religions in India

have been shown, others being absent in the Territory.

This table corresponds to table D II (Religion) of 1951 Census.

CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS
AND NON-WORKERS AMONG SCHEDULED TRIBES

**C VIII PART B—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS
AND NON-WORKERS AMONG SCHEDULED TRIBES**

Fly-leaf

As there are no castes Scheduled in the Union Territory of L. M. & A. Islands, Part A of the Table has not been compiled and so presentation of data is limited to Part B relating to Scheduled Tribes only.

This Table gives the distribution of the members of the Scheduled Tribes by literacy and workers and non-workers; workers further being classified in the broad nine industrial categories. The distribution

of literacy is given by two levels viz., "Illiterate" and "Literate & educated persons." These concepts as well as those of workers and non-workers have been spelt out elsewhere in this volume.

As the entire Territory is rural, figures for the Union Territory as a whole and for each of the ten islands have been given for Total only which are the same for rural.

D I—NON-INDIAN NATIONALS

This table gives the number of persons of each sex belonging to different foreign nationalities who were enumerated in the Laccadive, Minicoy and

Amindivi Islands during the census of 1961. Table D VI—Non-Indian Nationals of 1951 Census corresponds to this table.

D II—PLACE OF BIRTH

D II—PLACE OF BIRTH

Fly-leaf

This table gives the distribution of population of each sex according to their places of birth. The places of birth are broadly grouped as follows:—

- A. Born in India
- B. Born in countries in Asia beyond India (including U.S.S.R.)
- C. Born in countries in Europe(excluding U.S.S.R)
- D. Born in countries in Africa
- E. Born in countries in Two Americas
- F. Born in countries in Oceania
- G. Born at sea and
- H. Unclassifiable

In the case of Laccadive, Minicoy and Amindivi Islands as there are persons coming under items A and B only the remaining items are not shown in the table.

Persons born in India are further classified as (i) within the State/Union Territory of enumeration

with three sub-classifications viz., (a) born in the place of enumeration (b) born elsewhere in the district of enumeration and (c) born in other districts of the State and (ii) States in India beyond the State of enumeration for each of the States and Union Territories. In Laccadive, Minicoy and Amindivi Islands there is no district. Hence item (c) is omitted. A person is considered as born in the place of enumeration of his birth-place is somewhere in the village (island) where he is enumerated. An important deviation has been made in this table from the corresponding tables of previous censuses by showing the classification of the place of birth as rural or urban in the case of persons born in India. In the case of persons born outside India the data are given in respect of individual countries under each continent.

Table D IV of 1951 gives similar data on place of birth.

D III—MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE
IN PLACE OF ENUMERATION

Fly-leaf

This new table of 1961 Census gives the classification of persons of each sex born outside the place of enumeration according to their duration of residence in the place of enumeration. The period of residence is grouped as 'less than 1 year', '1-5 years', '6-10 years,' '11-15 years,' '16 years and over' and 'period not stated'. Persons born in India are classified as born elsewhere in the district

of enumeration, born outside the district but within the State of enumeration and born in each of the other States and Union Territories. In the case of Laccadive, Minicoy and Amindivi Islands there is no district and hence the item 'born outside the district but within the State of enumeration' is not shown. The classification of the place of birth as rural or urban is also given in respect of persons born in India.

HOUSING AND ESTABLISHMENT TABLES

E 1—CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

E I— CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

Fly-leaf

Table E I is based on full count and gives the distribution of census houses according to the uses to which they are put. It is presented separately for the Union Territory and for each island. A 'Census House' has been defined as a structure or part of a structure, inhabited or vacant, giving on the road a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It may be a dwelling, a shop, a *shop-cum-dwelling*, a *workshop-cum-dwelling* or a place of business, workshop, school etc. A census house that is inhabited is an occupied census house. The census houses have been classified broadly into two groups *viz.*, 'vacant' and 'occupied'. Places of worship or congregation have been shown under vacant houses. The occupied census houses have been further classified into twelve categories as shown below according to the uses to which they are put.

- 1 Dwellings
- 2 *Shop-cum-dwellings*

- 3 *Workshop-cum-dwellings*
 - 4 Hotels, sarais, dharmashalas, tourist homes and inspection houses
 - 5 Shops excluding eating houses
 - 6 Business houses and offices
 - 7 Factories, workshops and worksheds
 - 8 Schools and other educational institutions including training classes, coaching and shop classes
 - 9 Restaurants, sweetmeat shops and eating places
 - 10 Places of entertainment and community gathering (Panchayat Ghar)
 - 11 Public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries etc.
 - 12 Others
- Cocoanut stores, rice godowns, coir depots, fish storage centres etc. are some of the census houses included in the category of 'others'.

**E III CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY,
POWER AND NO POWER USED AND SIZE OF EMPLOYMENT**

Fly-leaf

Table E III has been prepared on the basis of full count and gives the distribution of census houses used as factories, workshops and worksheds classified by industry, type of power used and size of employment. These establishments pertain both to small scale manufacturing, repairing or processing and large scale factories. Details of the product manufactured, processed or repaired have been classified under 3 digit code of Indian Standard Industrial Classification. This table is restricted to Divisions 2 and 3 and establishments relating to all minor groups except 047 under major group 04 of Division 0 of the Industrial Classification.

These establishments were further classified by kind of fuel or power used and size of employment as shown below.

Kind of fuel or power used	Size of employment
(i) Electricity	(i) 1 person
(ii) Liquid fuel	(ii) 2-5 persons
(iii) Coal, wood and Bagasse	(iii) 6-9 "
(iv) Other power	(iv) 10-19 "
(v) No power	(v) 20-49 "
	(vi) 50-99 "
	(vii) 100 persons and above

So far as the Union Territory of Laccadive, Minicoy and Amindivi Islands is concerned there are only three industries and they relate to code number 369 viz., blacksmithy.

Table E IV has been prepared on a 20 per cent sample of households. As in table E II the households living in census houses used as dwellings, shop-cum-dwellings, workshop-cum-dwellings and dwellings with other uses have been considered for taking the sample. This table gives the different types of wall and roof material used for the dwellings for the Union Territory as a whole and for each island. The wall and roof materials have been classified into the following categories.

Wall materials	Roof materials
(i) Grass, leaves, reeds or bamboo	(i) Grass, leaves, reeds, thatch wood or bamboo
(ii) Timber	(ii) Tiles, slate, shingle

SUBSIDIARY TABLES ON GENERAL POPULATION TABLES (A SERIES TABLES)

Fly-leaf

There are nine subsidiary tables in this series. But the subsidiary tables A-IV.1 and A-IV.2 have not been prepared since there is no urban area in Laccadive, Minicoy and Amindivi Islands.

Note :-

- (i) The Union Territory of Laccadive, Minicoy and Amindivi Islands has no urban area. Hence the figures for 'Rural' are the same as those for 'Total'.
- (ii) 'N'-stands for negligible entry
- (iii) 'O'-stands for nil entry
- (iv) 'N.A.'-stands for 'not available'

GENERAL AND HOUSEHOLD ECONOMIC TABLES

(B SERIES TABLES)

**SUBSIDIARY TABLES ON GENERAL AND HOUSEHOLD ECONOMIC TABLES
(B SERIES TABLES)**

Fly-leaf

There are 45 tables in this series of which only 35 have been prepared for the Leccadive, Minicoy and Amindivi Islands. Of these, 23 tables have been prepared from the General Economic Tables and the rest from the Household Economic Tables. Subsidiary Table B I.6 has not been prepared since data for the previous census years are not available. Subsidiary tables B II.1, B II.2, B II.3, B III

Part A.1, B III Part A.2, B III Part A.3, B VI.1 and B VIII Part A.1 relate to urban population only and hence these tables have not been prepared as there is no urban area in the Union Territory. Subsidiary table B VII Part A.2 has not been prepared since there are no Agricultural Labourers in Laccadive, Minicoy and Amindivi Islands.
