PART III

HOUSEHOLD ECONOMIC TABLES

NOTE

The necessity and usefulness of presenting data relating to economic characteristics of the population was recognised quite early in 1881. No set pattern was adopted in their presentation. A look into the previous census reports shows that there has been a continuous and unrelenting effort to improve economic data at each successive census so as to make them more purposeful. The living conditions prevailing at the time the census was taken and the problems which the administration was required to face in consequence are seen to have played a significant role in determining the scope and range of the data collected and processed. In the earlier censuses, the economic data of the population were presented on the basis of information collected in individual census slips. The unpaid family labour which makes a significant contribution to the economic activity remained unaccounted. The picture of the economic activity presented solely on the basis of data collected on individual slips omitting to take into account the unpaid family labour was patently distorted. It was therefore considered desirable at the 1961 census to study the working of the household also as an economic entity in addition to the collection of economic data as usual on individual slips. Thus two sets of economic tables, *viz.*, tables prepared on the basis of data collected on individual slips and tables prepared on the basis of data collected on household schedules are separately presented at this census in two different volumes.

This part is the companion volume to Part II-B which contains the General Economic Tables. In this volume are presented the eight Household Economic Tables showing the distribution of households classified by the nature of their participation in the two most important household economic activities in the country, *viz.*, cultivation and household industry. For the first time in the Indian Census an attempt was made in 1961 to collect economic data on the basis of households. These eight tables together present a clear picture of the household economy. This is a great improvement over the previous censuses, as is brought out in the following extract from a note recorded by Shri A. Mitra, Registrar General, India :

" In a predominantly agricultural country where most of the population is in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as an entity. A decision was therefore taken that the information relating to the economic activities of the majority of the Indian households *viz.*, cultivation and household industry, should be collected at the census."

For collecting economic data relating to the entire household, a household schedule was used at the census. The household schedule is a unique document for any census in the world. This schedule was based on the recognition that all enterprises in the subsistence sector, particularly in cultivation and household industry, is centred not on the individual but the household as a whole. This was filled up by the enumerator along with the individual slips during the period of enumeration. In this schedule information about the extent of land cultivated by the household either owned or held from Government or held from private persons or institutions for payment in money, kind or crop share ; land given to private persons for cultivation for payment in money, kind or crop share ; nature of household industry conducted by the household and the duration of the industry in a year along with number of family workers and hired workers engaged in cultivation or household industry or in both were collected. The Household Schedule form is reproduced in Annexure I along with the instructions issued to the enumerators for filling up the Household Schedule.

All the eight household economic tables presented in this volume have been prepared from a 20 per cent sample of households drawn from the household schedule pads for rural and urban areas separately.

The data collected on Household Schedules were tabulated on machines at the Gokhale Institute of Economics and Politics, Poona. The instructions issued to the Divisional Deputy Superintendents for the selection of sample schedules and sending them to Poona for Mechanical Tabulation are reproduced in Annexure II.

The following Household Economic Tables have been prepared on the basis of the data collected on the Household Schedule :

Table B-X : Sample Households (i) Engaged neither in Cultivation nor Household Industry, (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas.

Table B-XI : Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately.

Table B-XII : Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately.

Table B-XIII : Sample Households engaged both in Cultivation and Household industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately.

Table B-XIV : Sample Households engaged only in Household Industry classified by Principal Household Industry in all areas.

Part A : Households classified by Major Groups of Principal Household Industry and number of persons engaged.

Part B : Households classified by Minor Groups of Principal Household Industry.

Table B-XV : Sample Households engaged both in Cultivation and Household Industry classified by size of land in Rural and Urban areas separately.

Table B-XVI : Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in all areas.

Table B-XVII : Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (*a*) neither in Cultivation nor in Industry, (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated.

Table C-I : Composition of Sample Households by relationship to head of family classified by size of land cultivated.

Table SCT-V : Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only (Households of members of Scheduled Castes/Tribes in a 20 per cent sample of all Households).

Part A for members of Scheduled Castes.

Part B for members of Scheduled Tribes.

Out of a Total of ten tables mentioned above, Tables B-X to B-XVII are presented in this volume. The Table C-I relates to the composition of households and is presented in Part II-C of Mysore. The Table SCT-V presents distribution of sample households engaged in Cultivation classified by interest in land and size of land cultivated only for members of S. C. and S. T. This Table is presented in Part V-A of Mysore.

Household Industries presented in Tables B-XIV—Part A, and B-XVI are classified into divisions and majo groups according to the Standard Industrial Classification. The Classification of household industries in Tabl B-XIV—Part B is, however, much more elaborate and presents their distribution by four digit code number Therefore a list of common household industries is given in Annexure III to this note.

PART II—CENSUS POPULATION RECORD

(To be compiled from Individual Census Slips)

Name	Sex		Relationship to Head	Age	Marital Status	Description of work in the case of worker
	Male M	Female F				

(*c*) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period ;

(*d*) tenants holding land on temporary leases who are liable to ejectment ; and

(*e*) areas held on condition of rendering service either to village community or to Government. (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights) ; and

(iv) the following :—

(*a*) land taken for a fixed amount of money ;

(*b*) land taken for a fixed amount of produce ;

(*c*) land taken for a share of the produce ;

(*d*) land for which money is paid partly in one and partly in any other form mentioned above ; and

(*e*) land held free of consideration.

Category 2, *i.e.*, Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1 (ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to ' Area in acres '. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres, you should if possible make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

In the case of lands situated at a distance from a household, some heads of households may return as actual cultivators arguing that they are actually engaged in cultivation, as it is done under their supervision and direction. It is not possible for the household to supervise the cultivation of land situated at a great distance from the household. But at the same time, if the head of the household insists that he is cultivating the land, it would not be feasible to question his statement. In such cases, the position that it is not possible for the household to supervise cultivation of land situated at a great distance from the household should be explained to the head of the household. If the head of the household insists even after such explanation that the land is cultivated by the household, it should be recorded as such.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an ' X ' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part ' A ' includes rentfree land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter ' co-operative farm'. Labour hired by such a co-operative farm should *not* be entered for this household.

Sub-part ' B ' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold :—

(*a*) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil-engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and wool or clean-in metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Beedi-makers who either alone or with help of members of the family roll beedis at home, for wages at piece-rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at ' place of work ' or where womenfolk of the household fill in at home with a lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(ies) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write ' 12 '. If there is no Household Industry of any sort put an ' X ' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part ' C ' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column ' head ' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to ' Total '. Then ascertain whether any hired workers are employed and if so, write the numbers of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of household engaged in Houschold Industry only, if the head of the household is working write 1 in the column relating to the ' Head ' and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head. If he is working in the column relating to ' Total ' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a Household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count, they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put ' X ' in the columns relating to ' Household Industry only ' and ' Both in Household Cultivation and Household Industry '. Similarly, in the case of households engaged in Household Industry put ' X ' in the columns relating to, ' Household Cultivation only ' and ' Both in Household Cultivation and Household Industry '. If a household is engaged both in Household Cultivation and Household Industry put ' X ' in the columns relating to ' Household Cultivation only ' and ' Household Industry only '. If a household is not engaged in either Household Cultivation or Household Industry or both put ' X ' in all the columns and a bold ' X ' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

ANNEXURE II

Mechanical Tabulation

All the Schedules of a Tahsil will be numbered serially in the order of the location codes except the Household number. Mark out as sample every fifth schedule.

While numbering the schedules, schedules pertaining to Institutions will be excluded, *i. e.*, if after numbering the first three schedules as 1, 2 and 3, the 4th schedule pertains to an Institution, it should not be numbered. However, if the 5th schedule happens to be a non-institutional household then it should be numbered as 4 and so on.

If in a household more than 14 persons are enumerated, there will be a supplement to the Household Schedule. In such a case the same serial number as that given to the schedule should be given to the supplement also.

The Sample Schedules should then be selected by the method of random sampling.

The Sample Schedules should be marked with a rubber stamp of the pattern "SAMPLE" at the right-hand top corner of the schedules. Each sample schedule should again be serially numbered in a continuous series for the Tahsil and the numbers may be split up into groups of 1—1,000, labelling each group as A, B, C, D, etc. It is however, not necessary to number the Sample Schedules as A-100, B-200, etc. It is, enough to label the bundles of each one thousand schedules as :

A 1—1,000

B 1—1,000

C 1—1,000

D 1— 850

i.e., the bundle D consists of only 850 sample schedules.

It is presumed that the entries in the schedules have been scrutinised with the entries in the individual census slips with respect to item (*c*) of Part I and the last column of Part II of the Household Schedule, before the pads of the Individual Slips were broken up for sorting. However, the entries pertaining to labour force in part (*c*) may again be checked with the entries in the last column of Part II before the Sample Schedules are removed from the pads and tied into bundles.

The Sample Schedules from the pads may conveniently be removed by keeping a metal strip below the Sample Schedule and cutting it away by a sharp blade. Alternately, the ends of the pins fastening the schedules may be opened and the Sample Schedule removed. The remaining schedules can be fastened again with the same pins. However, cutting the schedule with a blade as near the fastened end of the schedules as possible is preferable.

The Sample Schedules after being removed from the pads should be tied for a suitable unit of Tahsil. The Sample Schedules need not be stitched or pinned together.

ANNEXURE III

(To Note of Part III)

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 00	**Field Produce and Plantation Crops**
005.1	Production of Vegetables
005.2	Production of roots, etc., not included above
006.1	Production of fruits and nuts in plantation, vines and orchards
006.2	Production of copra (from coconuts)
007.1	Production of thatching grass
007.2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008.1	Production of juice (Neera) by tapping coconut trees
008.2	Production of juice by tapping other palms like date, palmyra, n.e.c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01	**Plantation Crops**
013	Production of tobacco in plantation
015.1	Pan Cultivation
015.2	Plantation Crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02	**Forestry and Logging**
023.1	Production of charcoal
023.2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025.1	Production of Kathha
025.2	Production of Lac
025.3	Production of gum
025.4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n.e.c.
026	Production and gathering of other forest products not covered above
Major Group 03	**Fishing**
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch, shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04	**Livestock and Hunting**
040.1	Rearing of goat for milk and animal power
040.2	Rearing of buffalo for milk and animal power
040.3	Rearing of cows for milk and animal power

Industrial Code Number	Household Industry
Major Group 04—concld.	**Livestock and Hunting—*concld.***
040.4	Rearing of camels and other big domestic animals
040.5	Production and rearing of livestock mainly for milk and animal power, n.e.c.
041.1	Sheep breeding and rearing
041.2	Production of wool
042.1	Rearing and production of pigs and goats (mainly for slaughter)
042.2	Rearing and production of other animals (mainly for slaughter), n.e.c.
043.1	Poultry keeping and production of eggs
043.2	Rearing and production of ducks, hens, etc., and other small birds, *e. g.*, pigeons, parrots, peacock, maina, etc.
044.1	Bee-keeping for production of honey and wax
044.2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046.1	Dog breeding, rearing of rabbits and guinea-pigs
046.2	Rearing of other small animals and insects, n. e. c.
048.1	Collection of bones
048.2	Manufacture of glue from animal carcasses
048.3	Manufacture of gut
048.4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.
Major Group 10	**Mining and Quarrying**
107.1	Extraction of chalk
107.2	Quarrying of lime-stone
107.3	Stone and slate quarrying
107.4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20	**Foodstuffs**
200.1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200.2	Hand pounding of rice by Dhekhi or Ukhal
200.3	Production of rice by milling, dehusking and processing of paddy by rice mill
200.4	Grinding of chillies, turmeric, etc.
200.5	Production of pulses
200.6	Parching of grains
200.7	Production and processing of other crops and food grains n.e.c.
202.1	Gur and Khandsari making from sugarcane and palm
202.2	Production of bhoora and candy
202.3	Production of jaggery from coconut and palmyra juice (neera)

Industrial Code Number	Household Industry
Major Group 20—concld.	**Foodstuffs**—*concld.*
202.4	Production of other indigenous products from sugar and jaggery, n.e.c.
203.1	Manufacture of achar, pickles, chutney and murabba
203.2	Production of sauce, jam and jelly
203.3	Processing of cashew nut
203.4	Manufacture of kokam products
203.5	Fruit preservation (canning of fruits)
203.6	Making dried vegetables
203.7	Production of other fruit products and preservation of fruits, n.e.c.
204.1	Slaughtering, preservation of meat and fish and canning of fish
204.2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209.1	Confectionery
209.2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209.3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209.4	Making of chura or chira, muri, murki, khoi
209.5	Making of chat
209.6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209.7	Making of other food products for residuary snacks
209.8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21	**Beverages**
210.1	Manufacture of vinegar from coconut juice (neera)
210.2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212.1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212.2	Production of other indigenous liquors from other materials from trees and shrubs
214.1	Production of mineral water
214.2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219.1	Preparation of sharabats and squashes
219.2	Preparation of jeerapani
219.3	Production of other beverages, n.e.c.

Industrial Code Number	Household Industry
Major Group 22	**Tobacco Products**
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products, n.e.c.
Major Group 23	**Textile—Cotton**
230	Cotton ginning, cleaning, carding, pressing and baling

TABLE—B-XI

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table is prepared separately for rural and urban areas. It presents data down to district for all areas and by taluk for rural areas only. In this table, cultivating households are classified according to the size of land cultivated and cross tabulated against the interest in land. Ten ranges of extent in acres, *viz.*, less than 1, 1.0–2.4, 2.5–4.9, 5.0–7.4, 7.5–9.9, 10.0–12.4, 12.5–14.9, 15.0–29.9, 30.0–49.9 and 50+ and a residuary item unspecified have been adopted for preparing this table.

The interest in land cultivated has been classified into the following categories :—

(1) Owned or held from Government, (2) Held from private persons or institutions for payment in money, kind or share and (3) Partly held from Government, partly from private persons for payment in money, kind or share.

This table thus gives an idea of the distribution of operational holdings by size and also the tenure of the holdings in each size range.

Abbreviations (1), (2) and (3) are given in place of legends for interest in land under Column 1 of the table and the same have been spelt as under :

(1) = Owned or held from Government

(2) = Held from private persons or institutions for payment in money, kind or share and

(3) = Partly held from Government and partly from private persons for payment in money, kind or share.

TABLE B-XII

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table is prepared separately for rural and urban areas and is presented down to the district. The figures for each taluk are given for rural areas also. This table will facilitate a further study of households engaged only in cultivation, as the households having a particular size of holding mentioned in Table B-XI have been further classified into five groups with reference to the number of persons working in cultivation. In case of households with more than one person engaged in cultivation, the particulars of family workers and hired workers have been shown separately.

The columns 25 to 28 relating to unspecified workers have been omitted as there are no figures thereunder.

TABLE B-XIII

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

The table is prepared for rural and urban areas and is presented down to the district. It throws light on Household Industries which are carried on along with cultivation in different parts of the State.

The Household Industries have been classified according to the Indian Standard Industrial Classification and the Table gives information about these Industries down to the level of a major group. The totals for each Division are also given.

Major groups of Household Industry having less than 10% of the figures of the respective divisions are not given in the table but are shown in the Appendix. The divisions thus affected are marked with an asterisk (*).

TABLE B-XIV

B-XIV—SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN *ALL AREAS*.

(Based on 20% Sample)

This table is prepared in two Parts—A and B. Part A shows the households classified by major groups of principal Household Industry and number of persons engaged. It is presented down to District for all areas—Total/Rural/Urban. The Household Industries have been shown by the Divisions and their major groups of Indian Standard Industrial Classification. The Household Industries in each Division and Major Group are further classified according to the number of persons engaged, five ranges, *viz.*, 1, 2, 3–5, 6–10 and more than 10 persons, being adopted for such classification.

The major groups of Household Industry having less than 10% of the figures of the respective division are not given in the table but are shown in the Appendix. The Divisions thus affected are marked with an asterisk (*).

The Table B-XIV, Part B shows the Households classified according to the actual activity constituting the principal Household Industry. The four digit classification of the Industries has been employed in this Table to indicate the Industrial activity and the Table shows the total number of Households in each district having such activity as Principal Household Industry, along with the distribution of these Households between the rural and urban areas of the district.

The Household Economic Tables for Mysore State have been prepared by the Gokhale Institute of Economics and Politics, Poona. Hence it is likely that there are some inconsistencies between the figures of Table B-XIV, Part (B) and B-IV, Part (C) due to the coding being done for these tables by two different agencies. A comparison of the two sets of figures shows that there are several instances where the Industry assigned to a specific minor group in one of these tables has been assigned to a residuary group in the other table. Thus the discrepancy occurs only in the minor groups and the two sets of figures show better agreement at the level of major groups and divisions except in Major Group 10. It appears that Households in Minor Group 107 in B-XIV are shown under Minor Group 343 in B-IV.

TABLE B-XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table is prepared for households engaged both in cultivation and household industry and the information is given separately for rural and urban areas of each district and for rural areas only of each taluk.

In Table B-XIII, which also relates to these households, the households having household industry coming in a division or major group of the Indian Standard Industrial Classification were classified on the basis of the size of the holding. In this table, the households having holdings in each size group are classified according to the number of workers, family workers and hired workers being shown separately, if the household has more than one worker. The number of households shown against each size group of the holdings is the number of households with holdings in such size group and any type of household industry (*i.e.*, household industry coming under all divisions and major groups of the I. S. I. C.).

TABLE B-XVI

SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN *ALL AREAS*

(Based on 20% Sample)

The table is presented down to the district with total/rural/urban break-up. It furnishes important data on the extent to which the various household industries afford full employment. The households carrying on household industries coming under each Division and major group of the I.S.I.C. have been classified according to the period of working of the industry. Four periods of working have been adopted for preparing this table *viz.*, under 1-3 months, 4-6 months, 7-9 months and 10 months to 1 year. There is a residuary class where period of working is unspecified. In addition to the number of households in each Division and Major group for each duration the table gives the number of family workers and number of hired workers in the Household Industry. The households with each household industry have been further divided into those (*a*) with cultivation and (*b*) without cultivation.

Major groups of Household Industry having less than 10% of the figures of the respective divisions have not been given in the table, but are given in the Appendix. The divisions thus affected are marked with an asterisk (*).

FLY LEAF TO TABLE B-XVII

SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY, (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% Sample)

The table is presented down to the district and gives data for total/rural/urban. It is intended to give family sizes distributed according to single member, small, medium, large and very large families. Though a 'Census House-hold' is not the same as a "family" and also includes unrelated persons living with the family during the census count, the table will give a general idea of the sizes of the families as the proportion of families having outsiders is quite insignificant.

This table shows the distribution of (i) households engaged neither in cultivation nor household industry, (ii) households engaged in household industry only and (iii) households engaged in cultivation of various sizes of holdings according to the size of the household, the size being shown in five ranges, *viz.*, (*a*) single member, (*b*) 2-3 members, (*c*) 4-6 members, (*d*) 7-9 members and (*e*) 10 members and over.

Total number of households and household population are given in the following statement as this table is based on 20% sample.
