ACKNOWLEDGEMENTS

We are deeply indebted to Shri Asok Mitra, I.C.S., Registrar General and Census Commissioner, India, who initiated the 1961 plan for publishing independent Census Volumes on Cities and guided us at all stages of the two special studies and publication of these four Volumes on Greater Bombay.

I take this opportunity to thank Dr. R. B. Fondekar, Executive Health Officer, Greater Bombay Municipal Corporation, who worked as the Chief Census Officer for Greater Bombay and his colleagues in the Municipal Health Department who worked for the Census in 1961 in addition to their already pressing normal duties.

In the Maharashtra Census Office, I may specially mention Shri D. V. Rangrekar, Deputy Superintendent, Shri J. G. Deshmukh, Tabulation Officer and Shri S. D. Bhatwadekar, Statistical Assistant, for rendering valuable assistance in compilation of the tables and notes. Maps were prepared by Shri S. Y. Pradhan and Shri B. K. Waval, Draughtsmen in the Census Office. Shri K. H. Shevade and Shri V. G. Surve looked after the printing. I am obliged to them all for their very painstaking work.

I am also grateful to Shri S. A. Sapre, Manager of the Government Central Press, Bombay, and his colleagues for neat and expeditious printing of the Volume.

INTRODUCTION

THIS is one of the four 1961 Census volumes published on Greater Bombay. It presents 55 Tables compiled for the City from the material obtained at that Census. Of the other three volumes, Part X (1-A) contains an analysis of the material presented here; Part X (1-C) contains the reports and tables prepared from a special study of migration to Greater Bombay; and Part X (1-D) contains report and tables compiled from a special study of Parsees of Greater Bombay.

2. Census statistics for Bombay City had been published along with other cities of the Bombay Presidency in earlier Censuses up to 1931. There was no publication in 1941 because of the War. The 1951 Census statistics had been published in a separate District Census Handbook for Greater Bombay.

3. Bombay is India's premier city now. It is the biggest seat of commercial finance in the country and a great centre of industry, trade, transport and communications. The city particularly dominates every aspect of political, social and economic life in Maharashtra. Along with its rapidly growing population and predominance in the economy of the State the city's problems of health, housing, employment, transport and expansion have also assumed huge dimensions. They are all worthy of deep research. The need for statistics covering a very wide range of topics on the city is, therefore, greater today than ever before. The four 1961 Census volumes will partly fill in that gap. Such exhaustive material has not been published on any city in India so far.

Scheme of Presentation

4. The present volume contains two Sections. Section I contains the following 55 Census Tables :—

	No. of Census Tables
General Population Tables—A Series ..	3
General Economic Tables—B (i) Series.	11
Household Economic Tables—B (ii) Series.	9
Social and Cultural Tables—C Series ..	9
Migration Tables—D Series ..	6
Housing Tables—E Series ..	6
Special Tables on Scheduled Castes and Scheduled Tribes—SCT Series ..	11

Section II contains an elaborate spread of the first of the General Economic Tables, viz., the Primary Census Abstract and presents the basic Census statistics for minute administrative units down to the level of circles and enumeration blocks.

5. This Introductory Note describes the 1961 Census procedure and concepts or definitions used as well as the style of presentation of material common to all the tables. The tables are presented in seven groups as shown above. Each group is preceded by a note explaining the layout of the tables and concepts or

definitions used in their compilation. A similar note at the beginning of Section II describes how the enumeration blocks were carved out at the 1961 Census and explains the manner in which primary statistics are presented for those minute administrative units. None of these notes, however, attempts any analysis of the material presented in the Tables. That is reserved for Part X (1-A) of the Maharashtra Census Report on Greater Bombay.

6. Greater Bombay is an entirely urban area. A few 1961 Census tables or parts of certain tables pertaining exclusively to rural areas are, therefore, not applicable to it. Tables A-III, B-III-Part B, etc., are such examples. For facility of comparison, the serial numbers assigned to the remaining tables presented here have, however, been retained according to the Census Tabulation Plan.

Wardwise Tables

7. Greater Bombay is also one of the 26 districts of Maharashtra. All the Maharashtra Census Report volumes, therefore, contain the 1961 Census tables on Greater Bombay along with those of the other districts. The tables appearing in the present volume are not, however, mere reproductions of Greater Bombay tables from those volumes. Thirty-two of them present material separately for nine sub-units of Greater Bombay, viz., Wards A, B, C, D, E, F and G out of the Bombay Island, C Zone (Western Suburbs) consisting of H, K, P and R Wards and the D Zone (Eastern Suburbs) consisting of L, M, N and T Wards. Two tables present material for even smaller units, viz., the 88 Sections. As described earlier, the table in Section II presents material separately for 444 circles and 7,101 enumeration blocks. The remaining tables present material only for Greater Bombay as a whole. Most of them are voluminous tables and presentation for smaller sub-units was not possible within the compass of this volume.

8. For the purposes of Municipal administration including elections, the Greater Bombay area has been divided into 15 Wards. The Municipal Health Department, however, maintains statistics by 88 smaller administrative units known as sections. Previous Census statistics were presented in some decades by Wards and in some other decades by Sections. In 1961, we have shown basic Census statistics not only for both the sets but also for very small units known as circles and blocks. An alphabetical list of 15 Wards and 88 Sections is given in Appendix I and description of their boundaries is given in Appendix II to this Introductory Note. All Wards and Sections are also shown in the two frontispiece maps of Greater Bombay. [Boundaries of Census units down to the level of circles are shown in the four sheet maps of Greater Bombay inserted between pages 2 and 3 in Section II.]

Census Procedure

9. The Census was taken on the 'cavasser method' which had been used in all previous Censuses. The enumerators called on each household in their assigned areas between 10th and 28th February, 1961,

and filled in Census Schedules by interviewing one or more responsible members of the household. They revisited all these households between 1st and 5th March, and corrected schedules for changes owing to births and deaths occurring between their first visit and the Census reference date, viz., sunrise of 1st March, 1961. The material presented in this part thus relates to 1st March, 1961, which closely approximates to the end of the Second Five-Year Plan and beginning of the Third Five-Year Plan.

10. The Executive Health Officer of the Bombay Municipal Corporation worked as the Charge Officer of the Census. The staff employed at various stages of Census work was drawn from the Municipal employees and/or State or Central Government employees residing in the City.

11. Numbering and listing of houses was carried out at the first stage of Census work between April and middle of October 1960, by the staff of the Health Department of the Municipal Corporation. Preparation for enumeration work began almost simultaneously with the completion of the first stage. The average population size for each enumeration block was fixed as 600. The enumerators working in the first stage prepared separate houselist sets for areas approximately covering this population and having some natural boundaries for demarcation.

12. Two booklets were issued in English and Marathi for use as self-contained manuals of instructions for the two stages of Census work. The forms and the standard instructions issued at the Census are reproduced as Appendices III and IV to this note at pages 12 to 28. Training for enumerators and supervisors was organised separately for the two stages of work. Training for enumeration was very intensive and was imparted in three rounds which also included field practice of enumeration.

13. A supervisor was appointed to supervise Census work of six enumerators. He was instructed to inspect the entire work of each of his enumerators in the first two days. The supervisors who worked under the Section Officers were made responsible both for timely completion and quality of Census work of all their enumerators.

14. Enumerators and supervisors were paid honorarium for Census work. This was done to meet out-of-pocket expenses incurred by them on travelling and stationery articles and also as an incentive for good work.

Census Questionnaire

15. There were three Census Questionnaire forms:—

- the Houselist to collect information in respect of houses and households;
- the Individual Slip to collect information in respect of each individual; and
- the Household Schedule to collect information in respect of each household.

16. The information regarding houses and households obtained through the Houselists included the following items:—

Houses—

(i) Purpose for which the house was used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, etc.

(ii) Material of walls.

(iii) Material of roof.

Households—

(iv) Name of the head of the household.

(v) Number of rooms in use by the household.

(vi) Whether the household was living in an owned house or a rented house.

(vii) Persons living in the household—

(a) males,

(b) females,

(c) total.

Factory or Workshop—

If a house was being used as a workshop or a factory the following additional information was obtained for that house:—

(viii) Name of the firm or proprietor.

(ix) Name of the product, repair or servicing undertaken.

(x) Average number of persons employed daily.

(xi) Kind of fuel or power used.

The information collected on houses, households and factories and workshops was used for preparation of E Series tables on housing and establishments.

17. The information collected in respect of each individual included the following demographic, social and economic items:—

For Identification—Location Code—

1 (a) Name.

1 (b) Relationship to the Head of the Household.

Demographic Questions—

2 Age.

3 Marital status.

4 (a) Birth place.

4 (b) Born, rural or urban.

4 (c) Duration of residence if born elsewhere.

13 Sex.

Social Questions—

5 (a) Nationality.

5 (b) Religion.

5 (c) Scheduled Caste or Scheduled Tribe.

6 Literacy and Education.

7 (a) Mother-tongue.

7 (b) Any other language(s).

Economic Questions—

8 Working as Cultivator.

9 Working as Agricultural Labourer.

10 Working at Household Industry—

(a) Nature of work;

(b) Nature of Household Industry;

(c) If Employee.

11 Doing work other than 8, 9 or 10—

(a) Nature of work;

(b) Nature of industry, profession, trade or service;

(c) Class of worker;

(d) Name of Establishment.

12 Activity, if not working.

18. The two demographic questions 4 (b) and 4 (c) had been added in the 1961 Census to study migration in greater detail.

19. There were five economic questions (8 to 12) in the Individual Slip. A departure was made in the concept for collection of economic data. At the last few Indian Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependants. An intermediate category of economic semi-dependence was introduced in 1931, 1941 and 1951. They were called working dependants in 1931, partly dependants in 1941 and earning dependants in 1951. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of the criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income. The 1961 Census, therefore, laid stress on "work" so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers.

20. The following information in respect of economic activities of each household was collected through the 'Household Schedule':—

A. Cultivation—

		Local name of right on land	Area in acres
1. Land under cultivation by Household—			
	(i) owned or held from Government.	...	...
	(ii) held from private persons or institutions for payment in money, kind or share.	...	...
	(iii) Total of items (i) and (ii)	...	...
2. Land given to private persons for cultivation for payment in money, kind or share.		...	...

B. Household Industry—

	Nature of Industry	Number of months in the year during which conducted
(a)		
(b)		

C. Workers at Cultivation or Household Industry—

		Members of Family working				Hired workers
		Head	Other Males	Other Females	Total	
1. Household Cultivation only.	...	...	...	...	...	...
2. Household Industry only.	...	...	...	...	...	...
3. Both in Household Cultivation and Household Industry.	...	...	...	...	...	...

21. The 'Household Schedule' was a new feature of the 1961 Census. It was thought that in the case of countries of such economic status as ours, where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information was supplemented by information relating to economic activities of the household as an entity. The 'Household Schedule' was, therefore, designed to collect data on the two chief economic activities of the households, namely, cultivation and household industry. The information collected in this Schedule was used for preparation of Household Economic Tables.

22. Material obtained in the Census was subsequently processed in temporarily established Tabulation Office. Results are presented in the various tables included in this volume.

APPENDIX III—contd.

INSTRUCTIONS FOR FILLING UP THE HOUSELIST

Column 1—Line Number.

Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building Number (Municipal or Local Authority or Census Number, if any).

This refers to the entire structure on the ground. There are however, high, large or long buildings along a street or lane which have been partitioned or portions of which have been sold, which have distinct, separate main exit on the road and which belong to separate owners or occupiers or alternatively there are a series of different houses joined each to each by common walls on either side to make the whole look like one building but parts of which have been built at different times and belong to separate owners. Such distinguishable structures, although not separate from each other, should be regarded as separate buildings and given separate numbers. Each building should have a separate number. If in big cities a large mansion or building containing several census houses has a well known name by which it is generally known then the name of the building should also be recorded for convenient reference. If there are more than one structure within an enclosed or open compound belonging to the same person, e.g., the main house, the servants' quarters, the garage, etc., only one building number should be given. If the locality consists of a number of streets in a village, the buildings in the various streets should be numbered continuously and the streets should be taken in uniform order, from North-West to South-East. Experience suggests that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first numbering began. In a city enumeration block, the numbering will have to respect the axis of the street and not any preconceived geographical direction like North-West. A building under construction should also be given a number in the serial. If a new hut or building is constructed between the time when the housenumbering and houselisting have been completed and the census count it should be given a new number beyond the last number of the serial for the village. Arabic numerals should be used for building numbers.

This will facilitate verification by supervisors. In areas, e.g., urban, where the buildings are already numbered by the municipal or other authorities, the enumerator may adopt the existing numbers in the houselist. In such cases, column 2 will carry the established municipal or local authority number which will facilitate identification. Where there are municipal or local authority numbers but there are reasons to believe that the number is incomplete or unsatisfactory, the municipal or local authority number may still be entered in column 2, but at the same time it will be necessary to serially number that building afresh for the purposes of census houselist. In that case, the new census serial for buildings will be entered in column 3 and the new census numbers for the buildings will have to be painted on the buildings themselves. In those cases where there are no municipal or local authority numbers in existence, all buildings will have to be serially numbered for the census and column 2 will contain entries of this census serial. This number will have to be repeated in column 3 with sub-numbers for census houses, if any.

Column 3—Building Number (Column 2) with sub-numbers for each Census House.

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

Ya 3664—I—3a

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers, e.g., the number of the building and the sub-number of the census house. The census house number should be written after the building number in Arabic numerals in brackets such as 2(2), 3(2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—Purpose for which census house used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.

The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place, e.g., bank, etc. But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for place of worship or congregation or if unoccupied, 'vacant'. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—"If this census house is used as an establishment, workshop or factory".

These columns apply only in cases where the census house is a factory or a workshop, i.e. where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of establishment or proprietor.

Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like confectioneries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken.

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if any).

The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used.

If the factory or workshop uses steam or diesel engine or fuel, e.g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

APPENDIX IV—contd.

INSTRUCTIONS TO ENUMERATORS—TECHNICAL

The 1961 Census count will relate to the sunrise of 1st March, 1961. The count will be spread over a period of 19 days, beginning on the 10th February and ending on the 28th February, 1961. During this period you should visit every household in your block for enumeration. On the night of 28th February you will have to go round your enumeration block and enumerate all persons who are houseless. (In large cities the enumeration of houseless persons will have to be undertaken in a different manner for which more elaborate arrangements will be made.) During the period 1st March to 3rd March you will have to pay a revisional round to every household and verify that your earlier work of enumeration has been completed in every respect. If during this revisional round you find that a birth has taken place in any household between the time of your first visit and the sunrise of 1st March, 1961, you will have to fill up a new slip for this birth ; if there has been a death in any household during the same period you will have to cancel the slip of the dead person ; if there is a visitor in any household who has come to stay during the same period and has not been enumerated elsewhere, you will have to fill up a new slip for this visitor. But you will not have to take notice of any birth or death or visit occurring after sunrise of 1st March, 1961.

You will have been supplied by your Supervisor household schedule forms in books of 50 or 25 each for recording information relating to the household as a whole and enumeration pads consisting of 100 or 25 slips each to record information of individuals living in the household. Instructions for filling up the household schedule and the individual slips are given in this booklet. You should carefully observe them when filling each household. You can fill up the household schedule first or the enumeration slips first but for every household you should fill up both before you leave the household and also fill up the Census Population Record at the back of the household schedule.

A. Instructions for filling up the Household Schedule

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless

the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus, the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chum-meries should also be regarded as census households but of 'un-related persons living together'. In such a household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the week-days in town and spends the week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right-hand side against the full name of the Head of the household marked "S.C./S.T.". If the Head of the household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the household belongs within the parallelogram. If the

Head of the household does not belong to Scheduled Caste or Scheduled Tribe you should put "X" within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation, sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1 (i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1 (ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession; (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :—

(a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);

(b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);

(c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;

(d) tenants holding land on temporary leases who are liable to ejectment; and

(e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following :—

- (a) land taken for a fixed amount of money,
- (b) land taken for a fixed amount of produce,
- (c) land taken for a share of the produce,
- (d) land for which money is paid partly in one and partly in any other form mentioned above, and
- (e) land held free of consideration.

Category 2 land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1 (ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record it in acres corrected up to the first place of decimal in the column relating to 'Area in acres'. In case it is not possible to record the area in decimal, the figures of acres and gunthas may be recorded. It is not however necessary to write fractions of a guntha. A fraction being less than $\frac{1}{4}$ guntha should be overlooked and a fraction of $\frac{1}{4}$ guntha or more should be taken as one guntha. Figures for acres and gunthas should be written with a dash between them and not with ' & ' written in between. Write 15-22 and not 15 & 22. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess or cultivate any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should *not* be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold:

(a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home

by members of the household both at residence and at 'place of work' or where women-folk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head', and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in whole-time employment during last working season or should be in whole-time employment during current working season.

Similarly, in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of Households engaged in Household Industry only, put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

B. Instructions for enumerating individual members of households

I. GENERAL

1. Enumerate all persons who are normally resident in the household, i.e., those who live in the household and also those who have recently become members of the household through marriage or birth or other vital social or domestic ties and are present at the time of your visit.

2. Enumerate also all persons who are normal residents in the household even if they are absent at the time of your visit, provided they left the household on or after the 10th February, 1961, or if they had left earlier than 10th February, 1961, are likely to return before the sunrise of 1st March, 1961.

3. Enumerate a visitor, a boarder, or a guest found in the household at the time of your visit, *if he had not been enumerated before and if he will be away from his household between the 10th and 28th February, 1961*, and warn him not to permit any other enumerator to enumerate him even if he goes back by 1st March, 1961.

4. Do not enumerate pavement-dwellers or others who do not form part of the household, when you are enumerating the households. These along with persons who do not normally reside in houses, i.e., members of wandering tribes, tramps, sadhus, etc., would be separately enumerated on the night of the 28th February and on the 1st and 2nd March, 1961.

5. Each individual has to be enumerated in one slip. Before commencing enumeration of an individual make sure to fill the Location Code in each case. The Location Code in the slips will be the same as in the household schedule to which the individuals relate.

6. The questions have been briefly printed in the slips, *but only briefly*, and you should study the detailed question forms and instructions for answering them without which you will be liable to miss some of the range and implications of the questions. You should ask the questions *in the order in which they are given in the slips* and proceed to record the answers in their given order. You should make use of the

abbreviations recommended in these instructions for recording the answers to the various questions. All abbreviations required to be entered within the geometric designs should be written well within the designs.

7. Make repeated enquiries about new born babies and very young children for they are liable to be missed because they neither talk nor walk and no meals are usually cooked for them.

8. Before leaving one household for the next make doubly sure that all the persons that are to be enumerated in the household have been enumerated. As soon as you have completed the enumeration of the household fill up the Census Population Record at the back of the Household Schedule for that household before you proceed to the next household. Strike the total for number of males and females in the household and check it with the number of enumeration slips used before you sign the Census Population Record.

9. You should revisit every household in your block during the period of final check (1st to 3rd March) when you should enumerate every birth that has taken place in the household since your visit but before sunrise of 1st March. You should cancel the slip for any death that might have taken place since your last visit but before sunrise of 1st March by drawing a bold line diagonally across the slip and write DEATH along the diagonal line. You should enumerate any visitor who may have arrived to stay since your last visit and who says he has not been enumerated anywhere else. But you should not take notice of any birth or death or visit occurring after sunrise of 1st March, 1961. After your revisit if you have added any new slip or cancelled any slip already prepared you should make corresponding changes in the Census Population Record at the back of the Household Schedule.

10. As soon as you have completed a pad, you should fill up the enumerator's abstract on the cover of the pad. After you have completed the enumeration of your block and filled up all the abstracts in the pads, you should total up your figures and prepare your abstract for your entire block and hand it over to your supervisor along with your pads.

11. Under the Census Act, every person is legally bound to furnish you with the information you need for recording your answers. You must not ask information on any matters not necessary for the purposes of the census, for example, the amount of any person's income. Nor must you disclose to any unauthorised person any information given to you or the results of the enumeration. All census entries are confidential and cannot be admitted as evidence in any civil proceeding whatever or in any criminal proceeding other than a prosecution for a census offence.

II. INSTRUCTIONS FOR FILLING UP THE SLIPS

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household are left out. Please make repeated enquiries about infants and very

young children, for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grand-children, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

Location Code.—Write the Location Code of the household in each slip. For instructions please see Section A above.

Q. 1(a) Name.—Write the name of the person enumerated. If a woman's name is not given out describe her as "so-and-so's mother, wife or daughter". If a woman does not take the name of a person's husband and that husband's particulars have to be recorded write "so-and-so's husband".

For newly born infants who have not yet been given a name write "Baby" and write "father's or mother's name".

Q. 1(b) Relationship to the Head of the household.—In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the Household' has been fully explained in Part A. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

If on the check or revisional round between the 1st and 3rd March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

In the case of places like messes, boarding houses, chummeries, etc. where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household. Other members should be recorded as 'unrelated' in this question.

Q. 2 Age in completed years last birthday.—Write age in years completed last birthday. For infants below one year of age, write 'O'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital Status—

For never married	..	..	..	write	NM
Married	..	..	..	write	M
Widowed	..	..	..	write	W
Separated or Divorced	..	..	..	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4(a) Birth place—

1. If born in village or town in which enumerated. write PL
2. If born in another village or town of district in which enumerated .. write D
3. If born in another district in the State of enumeration .. write name of district.
4. If born in another State in India. .. write name of district and State if name of district is known; otherwise write name of State.
5. If born in a country outside India e.g., Pakistan or any other country .. write name of country.
6. Persons born at sea or in air or in railway carriages or on road transport e.g., buses etc., should be entered as such.

Q. 4(b) Whether born in Village or Town—

1. If born in a village .. write R
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth .. write U
3. If the person enumerated is not in a position to say whether the place of birth is a village or town .. write the name of the place of birth as returned by him.

Q. 4(c) Duration of Residence—

1. For a person born in village or town or city in which enumerated .. write X
 2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration .. write the number of completed years this person has been in the village/town/city of enumeration.
(Do not take into account periods of temporary absence on leave or holiday or tour or business.)
 3. If the duration of residence is less than one year .. write O
- If the duration of residence is one year or over .. write the actual number of completed years of residence.

Q. 5(a) Nationality—

1. For Indian nationals .. write I
2. For other nationals .. write the nationality in full.

Q. 5(b) Religion—

For Hindu	..	..	..	..	..	write	H
Muslim	..	..	..	..	..	write	M
Christian	..	..	..	..	..	write	C
Jain	..	..	..	..	..	write	J
Buddhist	..	..	..	..	..	write	B
Sikh	..	..	..	..	..	write	S

For others write the answers actually returned.

Q. 5(c) Scheduled Castes and Scheduled Tribes.—The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district, write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to Question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 Literacy and Education—**I. ILLITERATE OR LITERATE**

For a person—

- | | | | | |
|---|----|----|-------|---|
| 1. Who can neither read nor write or can merely read but cannot write in any language | .. | .. | write | O |
| 2. Who can both read and write | .. | .. | write | L |

The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. STANDARD OF EDUCATION

If the person can both read and write and has also passed a written examination or examinations as proof

of an educational standard attained, write the highest examination passed instead of L.

Q. 7(a) Mother Tongue.—Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7(b) Any other Language(s).—After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Qs. 8 to 11 Working.—These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus, a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some

regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness to other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc. or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

Q. 8 Working as Cultivator.—For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations, should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as cultivator in this question.

Q. 9 Working as Agricultural labourer.—Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a Labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(a) and 10(b) Household Industry.—If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10(a) and (2) the nature of the Household Industry against question 10(b). Otherwise put X in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry, is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c) If Employee in Household Industry.—This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write EE. For all others put X.

The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons working at Household Industry :—

Q. 10 Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1. Spinning yarn ...	... Spinning yarn in Ambar Charkha.	X
2. Dyeing and pirning yarn ...	... Handloom weaving	X
3. Threshing and cleaning grain.	Flour making <i>chakki</i>	X
4. Labourer employed for crushing oil.	Oil ghani	EE
5. Tempering and polishing implements.	Blacksmithy making agricultural implements.	X
6. Labourer employed for making and firing kiln.	Earthenware pottery	EE
7. Throwing and Turning pottery	Earthenware pottery	X
8. Making wooden doors and windows.	Carpentry	X
9. Filling gold ornaments with lac.	Goldsmithy	X
10. Labourer working hosiery machine.	Hosiery	EE
11. Keeping accounts ...	... Hosiery	X
12. Polishing and Scraping metal.	Electroplating	X
13. Labourer employed for putting iron hoop on cartwheels.	Cartwheelwright	EE
14. Repairing of guns	Gunsmithy	X
15. Bee Keeping ...	... Production of honey	X
16. Tending cattle ...	... Livestock raising	X

Q. 11 Doing Work other than 8, 9 or 10.—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a) Nature of Work.—In the case of persons not working or who work only as cultivator or as agricultural labourer or at Household Industry, put X.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b) Industry, Business, Trade, Profession or Service.—In the case of a person who is working and the nature of whose own work has been recorded in question 11(a) you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced, the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11(a) put an X in this question also.

Important points to remember in Questions 11(a) and 11(b)

1. Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.*

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves :

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5. **Labourers.**—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6. **Machine Operators.**—Always state the kind of machine giving its recognized name, if any.

7. **Shop-keepers, Retail Dealers, Shop Assistants.**—If wholly or mainly engaged in selling, write 'Dealer' (if principal) or 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. **Transport Workers.**—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. **Services.**—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves :—

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. **Domestic Services.**—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hotels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. **Commerce.**—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q 11(c) Class of Worker—

For a person who is :

1. an *Employer*, that is, who hires one or more persons in his work described in Q. 11(a) ... write MR
2. an *Employee*, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind ... write EE
3. a *Single Worker*, that is, who is doing his work described in Q. 11(a) without employing others except casually, and without the help of other members of the family except casually. This will include workers working as members of co-operatives ... write SW
4. a *Family Worker*, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind ... write FW

For a person for whom an 'X' is put in Qs. 11(a) and 11(b) put an X in this question also.

Explanation.—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered

in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(d) Name of Establishment.—Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10 :—

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him in his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the questions 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, *i.e.* more than two of the questions 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, *i.e.* the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.* the work after his principal work which occupies most time. You should put a tick against the question number of that work on the right hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Q. 12 Activity, if Not Working.—This question will apply to a person NOT Working.

Write 'X' in this question for a person who is working, that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :—

1. For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business .. write ST
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business .. write HW
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age .. write D
4. For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work .. write R
5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence .. write B
6. For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution .. write I
7. For a person who has not been employed before but is seeking employment for the first time .. write NE
8. For a person employed before but now out of employment and seeking employment .. write UN

Explanation.—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

Q. 13. Sex.—Write 'M' for Males ; and 'F' for Females.

For eunuchs and hermaphrodites, write 'M'.

GENERAL POPULATION TABLES

(A SERIES)

EXPLANATORY NOTE

GENERAL POPULATION TABLES

This Series contains three Tables (A-I, A-II and A-IV) presenting area, density, occupied residential houses, population and its growth during the last six decades.

Table A-I (Sectionwise)

2. This table presents area, density (population per acre), occupied residential houses and population (persons, males and females) in 1961 for the City, each Ward and Section separately. Area figures have been obtained from the Municipal office. Some of the Sections have very small areas and, therefore, the area figures for the Sections and Wards are shown in acres. The density of population is, however, shown for each Ward and Section per acre.

Column 5 of the table shows occupied residential houses for each administrative unit. A house is a structure or part of a structure having a separate entrance, whether that entrance leads directly to the street, or to a common staircase, a courtyard or a gate.

3. Houses are classified by their uses, e.g. as dwellings, shops, workshops, temples, schools, offices, etc. Some houses are partly used for residential purposes and partly as shops, workshops, offices, etc. They are classified as shop-cum-dwellings, workshop-cum-dwellings, etc. Every house where one or more persons were found to be residing (irrespective of the house being used only as a residence or partly as a residence and partly for some other purpose), is classified as an occupied residential house. The number of occupied houses shown here includes apart from residential houses, garages, depots or shops, school premises where one or more persons (may be drivers, watchmen, servants, etc.) were found to be residing at the time of the Census. It does not, however, include houses which are residential houses but which at the time of the Census, were either vacant or where no person was found to be residing.

4. Population shown in this or any other table in this volume for the City, Ward or a Section is the night-time population normally residing within its limits. It does not include persons who come from other places for work during the day.

5. Enumeration of a person was done at the place of his normal residence. Every person was enumerated at the place of his normal residence though he may not be actually present at the time of the enumerator's visit. Persons likely to be absent from the place of normal residence throughout the enumeration period, i.e., from 10th February to sunrise of 1st of March 1961 were, however, not enumerated at those places. On the other hand, guests found in any house at the time of enumeration were enumerated at places of their temporary residence when they were likely to be absent from the places of their normal residence during the whole of the enumeration period. In either case, the instructions were to ask the person if he has been

enumerated anywhere else and to enumerate him only if he had not been enumerated elsewhere. Once enumerated he was advised not to allow himself to be enumerated again.

Table A-II

6. This table furnishes data on population for the seven Censuses 1901 to 1961 for Greater Bombay District. For previous Censuses the population is inclusive of the population of villages and towns which were not then a part of Bombay but have been merged with it subsequently. The population figures for all previous Censuses presented in the table are adjusted to the 1961 boundaries of Greater Bombay. The table, therefore, contains comparable figures for a study of growth of population during the last 60 years.

7. The following is a brief account of changes occurring in the boundaries of the district over a period of sixty years.

Bombay City covering the entire Bombay Island has always been administered as a separate Collectorate. The area lying beyond the Island of Bombay had been a part of Thana District and its portions have, from time to time, been added first by creation of the Bombay Suburban District and later by extension of its boundaries as well as those of the Greater Bombay Municipal Corporation.

The process of extension started in 1917 when to cope with the work related to the development of suburbs a separate Mahal with headquarters at Bandra consisting of fifty villages situated on the west of the B. B. & C. I. (Western) Railway line was created in Thana District.

In 1920, the Salsette taluka (including the Bandra Mahal) was divided into North and South Salsette talukas. North Salsette taluka continued in Thana District, while a new district called Bombay Suburban District consisting only of the South Salsette taluka was created for effective implementation of Suburban Development Schemes.

In 1921, seven villages from Kalyan taluka were separated from Thana District to make a separate taluka of Ambarnath which was included in the Bombay Suburban District.

Ambarnath taluka was abolished and its seven villages were re-transferred to Kalyan taluka of Thana District in 1936.

Thirty-three villages from South Salsette taluka of Bombay Suburban District were transferred to Thana District in 1945. Fourteen of these villages required for development of Aarey Milk Colony were again brought back to Bombay Suburban District in 1946.

In 1950, the boundaries of Bombay Municipal area were extended to include for the first time the entire area of Bombay Suburban District for municipal purposes. The enlarged Municipal Corporation was called Greater Bombay Municipal Corporation.

The boundaries of the Bombay Suburban District and Greater Bombay Municipal Corporation were further extended in 1956 to include 26 more villages from Thana District.

The areas added to the Municipal Corporation in 1950 for Municipal administration are called "Suburbs". Those added in 1956 are called "extended suburbs".

With the Reorganisation of States in 1956, Greater Bombay District was included in Bombay State. Since 1960, it forms a part of Maharashtra.

For Revenue administration, Greater Bombay consists of two districts : (i) Bombay and (ii) Bombay Suburban District. For the 1961 Census, the entire area included in the Greater Bombay Municipal Corporation limits has been treated as one Greater Bombay District.

8. In 1951, Bombay City had an area of 90.8 sq. miles (235.2 sq. kilometres) and a population of 2,839,270. Borivali taluka (excluding Bhayandar town and Dongari, Kashi, Ghodbandar, Mira, Uttan and Rai Murda villages) with an area of 63.9 sq. miles and Mulund town and Nahur village with a combined area of 7.4 sq. miles from Thana taluka of Thana District were merged in Greater Bombay under Bombay Act No. LVIII of 1956. This extension in the boundaries added 78.2 sq. miles or 202.5 sq. kilometres area and 155,174 population to Greater Bombay according to the 1951 Census. The adjusted 1951 population shown in

Table A-II is thus different from the figure reported in the 1951 Census Tables. This will illustrate how the figures of previous Censuses have been recast for 1961 boundaries.

9. Total population figures for the previous Censuses including the population of these erstwhile villages are shown in Table A-II. These are as follows:—

1901	..	..	927,994
1911	..	..	1,148,757
1921	..	..	1,380,448
1931	..	..	1,397,812
1941	..	..	1,801,356
1951	..	..	2,994,444
1961	..	..	4,152,056

Table A-IV

10. This table shows the growth of urban population since 1901. Population shown here for any previous Census is only urban population and does not include the population in that Census of villages which were not then a part of the City and have subsequently been included in Municipal limits.

Greater Bombay is formed by merging of a number of towns and therefore the figures of Greater Bombay for previous Censuses are inclusive of populations of those merged towns. Those towns are shown with their population figures in the footnotes on page 35.

(iii) Pahadi with a population of P. 16,360 (M. 10,105, F. 6,255) in 1951.

(iv) Kanheri with a population of P. 13,575 (M. 7,806, F. 5,769) in 1951.

(v) Eksar with a population of P. 8,253 (M. 4,705, F. 3,548) in 1951.

(vi) Dahisar with a population of P. 5,749 (M. 3,159, F. 2,590) in 1951.

(vii) Borivali with a population of P. 4,111 (M. 2,350, F. 1,761) in 1951.

(viii) Poisar with a population of P. 3,906 (M. 2,352, F. 1,554) in 1951.

(ix) Kandivali with a population of P. 3,396 (M. 1,903, F. 1,493) in 1951.

GENERAL ECONOMIC TABLES

(B SERIES)

EXPLANATORY NOTE

GENERAL ECONOMIC TABLES

There are 12 Tables in this series, showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified into nine broad categories of economic activity in the first three tables (P.C.A., B-II and B-III-Part A). A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Table B-IV-Parts A, B and C and by occupation under the National Occupational Classification Scheme in Tables B-V and B-VI. Two Tables B-VII-Part A and B-VII-Part B show the classification of workers by secondary work. The last two Tables B-VIII and B-IX present distribution of non-workers by sex, age and eight broad types.

2. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

- (i) self-supporting persons;
- (ii) earning dependants; and
- (iii) non-earning dependants.

3. The 1961 Census laid stress on 'work' so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers. The concept of dependency used in the previous censuses has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on earning or economic dependence.

4. A person is classified as worker if—

- (a) in case of seasonal work like cultivation, live-stock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and
- (b) in the case of regular (non-seasonal) employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the Enumerator's visit to the household.

5. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

6. 'Work' includes not only actual work but effective supervision and direction of work also.

7. Persons under training as apprentices with or without stipend or wages are regarded as workers.

8. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cow-dung cakes, or grass, etc., or any such work she has been treated as a worker.

9. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession or service.

10. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

11. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

12. The Census Questionnaire did not ask any question to determine the extent of full employment or under-employment.

13. Classification of workers doing two or more different types of work has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns a larger portion of their income.

14. The period of reference for regular (non-seasonal) work in any industry, trade, profession or service was 15 days preceding the date of Enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., some regular work of more than one hour a day throughout the greater part of the last working season was the criterion. Entries in regard to industry and occupation were not corrected in the second round visits of the Enumerators with reference to the reference date of 1st March, 1961. The material on economic activity presented in these tables relates to the reference period approximating to the conditions as on 1st March, 1961.

Primary Census Abstract

15. This table shows summary figures for the 1961 Census. It shows for the city and each of its wards and sections, area, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers for males and females separately. The workers are shown further classified into nine broad categories of economic activity.

16. Because of its importance the Primary Census Abstract is presented in Section II of the volume with similar details for each ward, section, census circle and enumerator's block separately. The Census statistics are presented for such small units for the first time. (See Section II—Explanatory note and the Table.)

17. Economy of nearby towns and villages in Thana and Kolaba districts is dependent on Greater Bombay in numerous ways. Housing congestion in the island has resulted in the increasing population overflowing beyond the Municipal Corporation limits into neighbouring rural and urban areas. Census summary figures for the adjoining rural areas and towns are, therefore, presented in this table to facilitate study of the directions of the city's influence or in determining the degree of dependence of those places upon the city and the nature of services they are rendering to it.

18. Column 4 shows the number of households for each unit. 'Household' is slightly different from 'Family'. It is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

19. The total population shown in the table is inclusive of 'houseless population and institutional population' shown separately in the table.

20. Population of the Scheduled Castes and Scheduled Tribes is shown separately for males and females. The figures relate only to the group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I. Limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all Backward Castes or Tribes living in the city. They include only the castes or tribes notified as Scheduled Castes or Scheduled Tribes for the city area.

21. Columns 12 to 15 show the figures for the houseless and institutional population.

22. *Houseless population.*—Some persons do not have any fixed place of residence. They go on moving from place to place, camp at night or just live on streets, pavements, in gardens or open spaces without erecting huts or similar structures. All such houseless persons were specially enumerated on the night of 28th February, 1961. These include—

(i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets;

(ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts, just on the open grounds; and

(iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the foot-paths, streets and in places like parks, gardens, seashore, railway yards, etc.

23. *Institutional population.*—Includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

24. A 'literate' is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross-tabulated with age-groups is presented in Table C-III-Part B.

Broad Categories of Economic Activity

25. The workers are shown classified by sex and in the following nine broad categories of economic activity:—

- I Cultivator.
- II Agricultural labourer.
- III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV Household Industry.
- V Manufacturing other than Household Industry.
- VI Construction.
- VII Trade and Commerce.
- VIII Transport, Storage and Communications.
- IX Other Services.

CATEGORY I

26. This category includes both the owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

CATEGORY II

27. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

CATEGORY III

28. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

CATEGORY IV

29. 'Household Industry' is defined as an industry conducted at home by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to making and selling of goods. Thus, the main criteria for household industry are its smaller scale, its being run at home and the participation of the head of the household and/or one or more members of the household. A person working as an employee in another person's household industry has also been treated as working at household industry.

CATEGORY V

30. 'Manufacturing' includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

CATEGORY VI

31. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

CATEGORY VII

32. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, money-lending, banking, etc.

CATEGORY VIII

33. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

CATEGORY IX

34. This category includes (i) Public utility services like electricity or gas or water supply and sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; and (iv) Trade or Labour associations, Recreation services, etc.

Table B-II (Wardwise)

35. This table gives a break-up of the distribution of workers in nine broad industrial categories and one of non-workers for the city shown in the Primary Census Abstract by four broad age-groups. The four age-groups, viz., 0—14, 15—34, 35—59 and 60 years and over, used in the table correspond to the different stages of life which have special significance with reference to the capacity to work, viz., children, young, middle aged and elderly persons. A line 'Age not stated' is added to show figures of persons who had not returned their ages.

Table B-III-Part A (Wardwise)

36. This table gives a break-up of the Primary Census Abstract, distribution of workers in nine industrial categories and one of non-workers by educational levels. Distribution of population classified by age-groups and educational levels will be found in Table C-III-Part B.

37. Literacy as defined in the Census is ability to read and write a simple letter.

38. Educational levels shown here are those which have already been attained and not those which are being studied. A person who has completed 'primary level' is included in the group 'Primary or Junior Basic' though he may be studying in a higher standard.

A person who is studying or had studied in Intermediate class is included in the group 'Matriculation or Higher Secondary' and so on. The figures of literates (without educational level) presented in the table are exclusive of persons with educational levels. Similarly, the figures for any educational level are exclusive of persons who have attained higher educational levels.

39. Persons who have studied upto the 4th standard but have not passed the Primary stage are included in the group of literates (without educational level). Pupils studying in the 1st and 2nd standards who could not read and write a simple letter are included in the group of illiterate persons.

Industrial Classification

40. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-Part A, B-IV-Part B, B-IV-Part C, B-VII-Part A and B-VII-Part B of the present Series show the distribution of workers other than 'cultivators' and 'agricultural labourers' by industry according to the Standard Industrial Classification Scheme which is reproduced as Appendix I at page 45. For want of space it has not been possible to provide description of each group of industry in the tables. They are shown only by industry division, major group or minor group codes in one, two or three digits respectively, as the case may be.

41. The nine broad categories of workers shown in the Primary Census Abstract and Tables B-II and B-III-Part A conform to the industry divisions as follows:—

Category	Industry Division
I Cultivator	Minor Groups 000, 001, 002, 003 and 004 from Division 0.
II Agricultural Labourer	..
III Mining, Quarrying, etc.	.. Division 0 (except minor groups 000 to 004) and Division 1.
IV Household Industry	.. Division 0 (except minor groups 000 to 004), Divisions 1, 2 & 3.
V Manufacturing	.. Division 2 & 3
VI Construction	.. Division 4.
VII Trade and Commerce	.. Division 6.
VIII Transport, Storage and Communications.	.. Division 7.
IX Other Services	.. Divisions 5, 8 and 9 (except minor group 999).

Table B-IV-Part A (Wardwise)

42. This table gives the distribution of workers engaged in household industry by status of employment and by each industry division and major group of household industry separately. Major groups of household industry which do not have any workers in the City are not shown here. Columns 6 and 7 show the workers who work at their own household industry (i.e. who are either employers, single workers or family workers in these household industries). Columns 4 and 5 on the other hand show the workers who are working as employees in household industries not of their own.

43. Since the distribution by industry presented here is exclusively of workers engaged in household industry the break-up under column 1 is restricted to Industry division '0' with its major groups '00' to '04', Industry division '1' with its only major group '10' and Industry division '2 & 3' with its major groups '20 to 39'.

Table B-IV-Part B (Wardwise)

44. This table presents the distribution of all workers (other than those working in Categories I, II and IV) by industry divisions and major groups (Appendix I at page 45) and by employment status. The classification by employment status is in four classes, viz., 'employer', 'employee', 'single worker' and 'family worker':—

An 'employer' is a person who employs other persons in order to perform economic activity in which he is engaged.

An 'employee' is a person who usually works under some other person for salary or wages in cash or kind.

A 'single worker' is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A 'family worker' is a member who works without receiving wages in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in household duties are non-workers and are not, therefore, treated as family workers.

Table B-IV-Part C (Wardwise)

45. This is a very important table as it gives the employment position in all sectors of economy except agriculture in the city. It shows the distribution of all workers (other than those in Categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification Scheme (Appendix I at page 45). The number of workers against each industry division, major group or minor group is further split up and shown separately for household industry and non-household industry, trade, profession, services etc. By definition of the household industry, the break-up for household industry is restricted to industry division 0, 1, 2 & 3 and their relevant major and minor groups only. Major and minor groups which do not have any workers in the city are not shown here.

Occupational Classification

46. Occupation of a worker is the function which he performs by engaging himself in work in any branch of economic activity (which is called his industry).

47. Tables B-V and B-VI show the distribution of workers by occupation according to the National Classification of Occupations Scheme which is reproduced as Appendix II at page 51.

48. The concept of occupation is distinct from that of 'Industry'. The latter is defined as the sector of economic activity in which a worker is engaged. A worker no doubt follows his occupation within a certain industry but the basis for classification of the latter is the character of the establishment or the field of activity in which he is working, while that for the classification of the former is the work performed personally by the individual concerned. Thus, for a clerk working in a cotton textile mill, the industry is manufacture of cotton textiles; while occupation is that of clerk. A clerk working in a bank is engaged in an identical occupation but his industry is banking. The industry of a spinner working in a cotton textile mill is identical with that of the former clerk, but he engages himself in a different 'occupation', viz., Spinner.

49. For the first time in the 1961 Census the two concepts of 'Industry' and 'Occupation' have been used with specific meanings distinct from each other and tables have been prepared separately with an elaborate classification of the working population both by Industry and Occupation.

Table B-V

50. This table presents the distribution of workers (other than those falling under Occupational families 400, 401 and 414) by occupational divisions, groups and families (Appendix II at page 51). For each occupational division, group or family, the workers are shown further classified by a categorywise break-up of their industry. Occupational groups or families which do not have any workers in the City are not shown here. For an occupational group or family which has all the workers in only one category of industry only one line shows the total workers for that group or family as well as for the category of industry. The occupational group X0 and its families X00, X08 and X09 are not applicable to this table, since this group relates to non-workers.

Table B-VI

51. This table presents the occupational distribution of persons at work other than cultivation by sex, broad age-groups and educational levels.

52. Occupational break-up is limited to the ten Occupational Divisions (one digit codes) of the National Classification of Occupations Scheme.

53. Age-groups used are 0—14, 15—34, 35—59 and 60+. A line is added to show those who had not stated their age.

54. Occupational and age-group break-up of illiterate workers is not shown here.

55. For definition of 'Literacy' please see paragraph 37.

Table B-VII-Part A (Wardwise)

56. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes the largest portion of his time (not necessarily earning the largest portion of his income) is treated as his principal work, the next consuming the second largest portion of his time is his secondary work. The secondary work is shown in the table classified only

by three broad categories, viz., I—Cultivators, II—Agricultural Labourers and IV—Household Industry. Workers who may be engaged in the above secondary work, but who work principally in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. Similarly, the distribution of workers engaged in categories other than I, II or IV as secondary work and engaged in any one of categories I to IX as principal work is not shown here.

57. This table will also enable analysis of workers engaged in secondary work by major groups of their principal work at household industry. The number of secondary workers is shown by category numbers I, II and IV standing respectively for work as cultivator, as agricultural labourer and at household industry. Number of workers for each category of secondary work is shown in brackets 'M' standing for males and 'F' for females.

58. The principal work at household industry (Category IV) is further classified into Industry Divisions and Major Groups according to the Standard Industrial Classification Scheme. The relevant Divisions and Major Groups are Division 0 with its major groups 00, 01, 02, 03 and 04, Division 1 with its only one major group 10, and Division 2 & 3 with its major groups 20 to 39.

Table B-VII-Part B (Wardwise)

59. This table presents the distribution of workers engaged in household industry as additional or secondary work who are working principally in Categories III, V, VI, VII, VIII or IX. Both the principal and additional work have been classified into Industry Division and Major Groups according to the Standard Industrial Classification Scheme (Appendix I at page 45).

60. The nature of principal work of workers doing additional work is shown by a description of the branch of industry under column 1. Similarly, the nature of household industry in which additional work is performed is described by the branch of that household industry under column 2. The number of workers for males and females are shown in brackets.

Table B-VIII-Part A (Wardwise)

61. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

62. The break-up by age for the first type of unemployed persons is into age-groups 15—19, 20—24, 25—29, 30—34 and 35 and above and that for the other group is 15—19, 20—24, 25—34, 35—44, 45—59 and 60 and above. For both the types the age-group 'Age not stated' is shown for persons who had not returned their ages. The educational levels are the same as those shown in Table B-III-Part A.

Table B-IX (Wardwise)

63. This table presents the distribution of non-workers by the following eight types cross-tabulated by sex and four broad age-groups :—

(1) Full-time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time in their own family cultivation, industry, trade or business ;

(2) Persons engaged in unpaid home duties (like housewives or other adult females) who do no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business ;

(3) Dependants, including infants and children not attending school, persons permanently disabled from work because of old age, etc. ;

(4) Retired persons who are not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend and other persons of independent means for securing which they do not have to work and who do no other work ;

(5) Beggars, vagrants, independent women without indication of source of income and others of unspecified source of existence ;

(6) Convicts in jail, inmates of penal, mental or charitable institutions (Under-trial prisoners are shown as workers if they used to work before they were apprehended) ;

(7) Persons who have not been employed before but are seeking employment for the first time ; and

(8) Persons employed before but now out of employment and seeking employment.

64. The above classification of non-workers is based on the answers recorded against Question 12 of the Individual Slip in respect of non-workers at the 1961 Census.

65. The broad age-groups used in the table are the same as those used in Tables B-I and B-II, viz., 0—14, 15—34, 35—59 and 60 and over. The figures in respect of persons who did not return their ages have been shown separately under 'age not stated'.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0 Agriculture, livestock, forestry, fishing and hunting
1 Mining and Quarrying
2 & 3 Manufacturing
4 Construction

HOUSEHOLD ECONOMIC TABLES

(B SERIES)

EXPLANATORY NOTE

HOUSEHOLD ECONOMIC TABLES

This series contains eight Household Economic Tables presenting the distribution of sample households classified by the nature of their participation in the two most important household economic activities in the country, *viz.*, Cultivation and Household Industry.

2. The distribution of households is first shown classified on the basis of no participation in either of the two economic activities or participation in only one or in both of them (Table B-X). The distribution of households participating in cultivation is then shown classified by the size of land cultivated and further sub-classified by the type of interest in land (Table B-XI), by the number of persons engaged in cultivation (Tables B-XII and B-XV), the type of household industry combined with households engaged in cultivation (Table B-XIII) and the size of the household (Table B-XVII). The households participating in household industry are similarly classified by industry minor groups (Table B-XIV-B). These households are then classified according to the number of persons engaged in household industry and further sub-classified with industry division and major groups of the household industry (Table B-XIV-A) and by the period of working of the household industry (Table B-XVI).

3. A household is defined as a group of persons living in the same house and eating from the same kitchen unless the exigencies of work prevented any of them from doing so.

“Household” is thus slightly different from “Family”. A domestic servant residing and eating at the employer’s house is under the above definition a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

4. The definition of the household also applies to the group of inmates of hotels, hostels, prisons, hospitals, etc. They are, however, treated as “non-family” or “institutional” households. Others are family type households as in spite of the slight differences in composition they are largely based on families.

5. In the 1961 Census, household schedules had been filled in for the institutional households also. These schedules were, however, excluded at the time of drawing the sample of households. The material presented in the tables, therefore, relates only to the family type households.

Cultivation of Land

6. Cultivated land includes all land normally used for cultivation including temporary fallows. It includes only those plots or parcels of land which are cultivated by the household itself. Owned land which is leased out to others is not included. Naturally, it will be the land which lies within the village or in adjacent villages or within such distances as enables the household to work on the land or actively supervise the cultivation.

It does not include the land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction.

7. Cultivation includes ploughing, sowing and harvesting of land but does not include operations treated as industry such as fruit-growing, keeping of orchards or groves and working for plantations like coffee, tea, rubber, cinchona and other medicinal plantations. This restriction of excluding certain activities relating to growing of fruits, orchards, plantations, etc., was not, however, rigidly applied in Maharashtra at the time of 1961 Census enumeration and the areas of cultivated lands recorded in the household schedules are the areas of cultivated lands as returned by the responding households who might not be aware of the finer distinction made by that definition.

Households engaged in Cultivation

8. A household having land under cultivation is called a cultivating household. When a head of the household himself and/or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken (on lease) from private persons, the household is said to be engaged in household cultivation. It will be seen that owner cultivators and tenant cultivators are both included in this category. The agricultural labourers working on land which is not either of their own or taken from others on lease are not treated as cultivators. The households engaged in cultivation do not, therefore, include the households whose members work only as agricultural labourers.

Interests in Land

9. The classification of households engaged in cultivation by interests in land is into the following three types :—

- (a) Those engaged in cultivation of land entirely owned or held from Government;
- (b) Those engaged in cultivation of land held from private persons or institutions for payment in money, kind or share; and
- (c) Those engaged in cultivation of land partly owned or held from Government and partly from private persons for payment in money, kind or share.

10. The first type includes all pure owner cultivators such as proprietors, occupants or tenure holders with or without a right to transfer land. The second type includes pure tenancy cultivators with a variety of tenancy rights. The third type is in fact a combination of the first two types.

Household Industry

11. Household Industry is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered

factory and relates to production, processing, servicing or repairing of goods. This may include sale of goods but should not be confined to buying and selling only. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the essential factor of participation of the head of the household and/or one or more members of the household.

Principal Household Industry

12. The form of the Household Schedule had a provision for recording more than one household industries conducted by the household. In such cases, the household industry conducted by the household for a longer period in the year has been treated as its principal household industry. The classification by the nature of industry is, in all cases, based upon the principal industry.

Family Workers and Hired Workers

13. Definition of workers is given in paragraphs 4-10 of the Explanatory Note on General Economic Tables on page 39.

14. A "family worker" is a member of the household who works without receiving wages in cash or kind in any industry, business or trade (cultivation or household industry only as far as the material presented here is concerned) conducted mainly by the members of the household and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in domestic duties are non-workers and are not, therefore, treated as family workers.

15. A "hired worker" is an outsider who has been in wholtime employment of the household during the last working season or is in wholtime employment during the current working season. This category does not include those agricultural labourers who are casually employed for short periods for harvesting of crops or other operations.

Industrial Classification

16. The classification of Household Industries presented in Table B-XIV-Part A and B-XVI is into industry divisions and major groups according to the Standard Industrial Classification Scheme reproduced as Appendix I at page 45.

17. Though the classification presented in Table B-XIV-Part A and B-XVI is only upto the major groups (two digits), the minor groups (three digits) included under them and presented in Appendix I at page 45 show their coverage.

18. The classification of household industries in Table B-XIV-Part B is, however, much more elaborate and presents their distribution by four digit code numbers. The description of the code numbers occurring in the table is given in column 2.

19. All the eight Household Economic Tables presented here have been prepared from a 20 per cent sample of households selected separately for rural and

urban areas. The household schedule pads for all villages in a taluka, each city and non-city urban areas of a district were first arranged in the order of their code numbers and beginning from a separate random start for each taluka (rural), city and non-city urban areas in a district every fifth household schedule was selected as a sample for tabulation processes.

Table B-X

20. This table presents the distribution of sample households classified by participation or otherwise in the two most important household economic activities in the country, viz., Cultivation and Household Industry. The classification of sample households is in the following four categories :—

- (i) Households engaged neither in Cultivation nor Household Industry;
- (ii) Households engaged in Cultivation only ;
- (iii) Households engaged in Household Industry only ; and
- (iv) Households engaged both in Cultivation and Household Industry.

21. Definitions of household cultivation and household industry are given in paragraphs 8 to 12.

22. The table is prepared on a 20 per cent sample of households.

Table B-XI

23. This table presents the distribution of sample households engaged in cultivation classified by their interest in land and size of land cultivated.

24. The definitions of various terms used in the table are given in paragraphs 8 to 12.

25. The sample households engaged in cultivation for which the table presents the classification by interest and size of land cultivated include both the households engaged in cultivation alone and those engaged both in cultivation and household industry. Their figures represent the sum of the figures of households shown in lines 3 and 5 of Table B-X.

26. The classification by size of land cultivated is in ten size groups, viz.—

- (1) Less than one acre ;
- (2) 1.0 to 2.4 acres ;
- (3) 2.5 to 4.9 acres ;
- (4) 5.0 to 7.4 acres ;
- (5) 7.5 to 9.9 acres ;
- (6) 10.0 to 12.4 acres ;
- (7) 12.5 to 14.9 acres ;
- (8) 15.0 to 29.9 acres ;
- (9) 30.0 to 49.9 acres ;
- (10) 50.0 and above.

27. The last group of "unspecified" size consists of the sample households for whom the area of land cultivated had not been recorded at the Census.

28. The interests in land are classified in the following three types and are shown by a horizontal spread under columns 3 to 5 :—

- (a) Entirely owned or held from Government ;
- (b) Entirely held from private persons or institutions for payment in money, kind or share ;
- (c) Partly held from Government and partly from private persons' or institutions for payment in money, kind or share.

29. The table is based on a 20 per cent sample of households.

Table B-XII

30. This table presents the distribution of sample households engaged in cultivation only classified by size of land cultivated and the number of family workers and hired workers engaged in cultivation.

31. The definitions of various terms used in the table are given in paragraphs 13 to 15.

32. The sample households engaged in cultivation only for which the table presents the classification by size of land and number of workers, etc., represent the figures in Table B-X in line 3 only and do not include those engaged both in cultivation and household industry shown in line 5 of Table B-X.

33. The classification of households by the number of persons (family workers and hired workers) engaged in cultivation is in five types, viz., the households with 1 person, 2 persons, 3 to 5 persons, 6 to 10 persons and more than 10 persons. The number of family workers is shown separately for males and females under each of the five types of households.

34. Classification by size of land cultivated is in ten size groups as shown in paragraph 26 above.

35. The table is based on a 20 per cent sample of households.

Table B-XIII

36. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry. The table thus shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees.

37. The classification by size of land cultivated is in ten size groups as shown in paragraph 26 above.

38. Industry divisions and major groups of household industry are shown by a vertical spread under column 1. Each industry division and major group of the Standard Industrial Classification Scheme (reproduced as Appendix I at page 45) used in column 1 is briefly described in column 2.

39. The table is based on a 20 per cent sample of households.

Table B-XIV

40. This table presents in two parts the distribution of sample households engaged only in household industry classified by the nature of household industry. Part A of

the table presents the classification of sample households by industry divisions and major groups of household industry according to the Standard Industrial Classification Scheme (Appendix I at page 45) as well as by the number of persons engaged. Part B of the table simply presents the number of households engaged in household industry classified into industrial minor groups.

41. The classification of households by the number of persons engaged in Part A of the table is in five types, viz., households with one person engaged, two persons engaged, 3 to 5 persons engaged, 6 to 10 persons engaged and more than 10 persons engaged. These household types are shown by a horizontal spread under columns 4 to 8.

42. The classification by industry divisions and major groups is shown by a vertical spread under column 1. Each division and major group of household industry is briefly described in column 2. Households engaged in more than one household industry are classified on the basis of their principal household industry.

43. The classification of household industries into minor groups in Part B of the table is shown vertically under column 1 by code numbers in four digits. The description of the code numbers shown is given in the table itself in column 2.

44. Both the Parts of the table are based on a 20 per cent sample of households drawn for rural and urban areas separately.

Table B-XV

45. This table presents the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of persons engaged.

46. The classification of households by the number of persons engaged is in five types, viz., one person engaged, two persons engaged, 3 to 5 persons engaged, 6 to 10 persons engaged and more than 10 persons engaged. This classification is shown by a horizontal spread in columns 6 to 24. The number of family workers and hired workers are shown separately in addition to the number of households for each type of households. The number of family workers is also shown for males and females separately.

47. The classification of households by size of land cultivated is in ten size groups, as shown in paragraph 26 above.

48. The table is based on a 20 per cent sample of households.

Table B-XVI

49. This table shows the distribution of sample households engaged in household industry classified by the nature of principal household industry and the period of working of that industry.

50. The classification by the nature of principal household industry is in industry divisions and industry major groups according to the Standard Industrial Classification Scheme (Appendix I at page 45) and is shown by a vertical spread under columns 1 and 2.

51. The number of households for whom the table presents the classification by nature and the period of working of the household industry is inclusive of both the households engaged in household industry (a) with cultivation and (b) without cultivation, shown in column 3. Entries in the table are presented not only for the total of the two types of households but for each type (a) and (b) separately by a vertical spread under column 3.

52. The classification by the period of working of the household industry is into four periods, viz., 1 to 3 months, 4 to 6 months, 7 to 9 months and 10 months to one year. One more type of unspecified period is added. This classification is shown by a horizontal spread in columns 8 to 27. Under each of these categories, the number of households, number of family workers males and females and number of hired wokers are shown separately.

53. The table is based on a 20 per cent sample of households.

Table B-XVII

54. This table shows the distribution of sample households classified by their size.

55. The classification of households by size is into five size groups and is shown by a vertical spread. The size groups are:—

- (1) Single member;
- (2) Two to three members (small);
- (3) Four to six members (medium);
- (4) Seven to nine members (large); and
- (5) Ten members or over (very large).

56. The table is based on a 20 per cent sample of households.

SOCIAL AND CULTURAL TABLES

(C SERIES)

EXPLANATORY NOTE

SOCIAL AND CULTURAL TABLES

There are nine Tables in this Series dealing with social or cultural aspects like age, marital status, literacy and education, language and religion. All the tables are prepared from individual slips and on a total count. Table C-I is, however, prepared from Household Schedules on a 20 per cent sample of households.

Table C-I

2. This table presents the distribution of household population by relationships to heads of households. The classification of the household population by relationships to heads of households is shown by 5 categories, viz. —

- (i) Heads of households ;
- (ii) Spouses of heads of households ;
- (iii) Married relations ;
- (iv) Never married, widowed and divorced or separated relations ; and
- (v) Unrelated persons.

A break-up for males and females is presented under each category. The number of sons is also shown separately under the third category of married relations.

3. A household is defined as a group of persons commonly living together in the same house and eating from the same kitchen unless the exigencies of work prevented any of them from doing so.

4. "Household" is thus slightly different from "Family". A domestic servant residing and eating at the employer's house is according to the above definition a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the household during the Census enumeration period has been treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

5. The above definition of the household also applies to the groups of inmates of hotels, hostels, prisons, hospitals, etc. They are, however, treated as "non-family" or "institutional" households. Others are family type households as inspite of the slight differences in composition they are largely based on families.

6. The 1961 Census Household Schedules had been filled in for institutional households also. These schedules were, however, excluded at the time of drawing the sample of households. The material presented in the table, thus, relates only to family type households.

7. The "head of household" was defined as the person on whom fell the chief responsibility for the maintenance of the household. No elaborate enquiry was, however, made about this and the person who was actually acknowledged in the household as the head was recorded as such. If the head of household was away throughout the enumeration period from the 10th to 28th February 1961, the person who was in charge in

his absence was recorded as the head of the household and the actual head was not even included as a member of his legitimate household. The intention was, of course, to avoid double counting.

Table C-II (Wardwise)

8. This table presents the distribution of population by sex and marital status cross-classified by five-year age-groups. Classification of age between 10 and 70 years is by consecutive five-year age-groups. The other three groups are 0—9 years, 70 and over and age not stated. The entire population in 0—9 years age-group has been treated as 'never married' irrespective of the answers recorded against the question on marital status in the Census slip and no further classification by marital status is shown against them. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

9. The classification of population by marital status is into four groups, viz. :—

- (i) "Never married" are persons who have never been married ;
- (ii) "Married" are those persons who are currently married whether for the first or another time. These include those recognised as married by custom or society and those in stable *de facto* union ;
- (iii) "Widowed" are those persons whose husbands or wives are dead and who have not married again ;
- (iv) "Divorced" are those persons who have been divorced in a lawful manner, either by a decree of a law court or by a regular social or religious custom but who have not remarried. "Separated" are those who have been separated from wives or husbands and are staying away with no apparent intention of living together again. The table shows only combined figures for "divorced and separated" persons.

10. Under "Unspecified status" are included persons whose marital status could not be decided for want of correct or adequate answers at the 1961 Census.

Table C-III-Part B (Wardwise)

11. This table presents the distribution of population by age, sex and educational levels. Classification by age is by five-year age-groups upto 34 years and ten-year groups up to 59 years. Classification by educational levels is the same as in Table B-III-Part A.

12. This table provides a measure for the growth of literacy in the total population as well as in the different age-groups since the last Census. It also furnishes information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-IV

13. This table shows the distribution of population by single year ages both for males and females, separately.

14. The presentation is for each single year from '0' (i.e. less than one year) to 99 years and for all ages above 100 combined together. The last group of "Age not stated" represents those whose ages had not been recorded in the Census slips at the 1961 Census.

15. The age recorded at the 1961 Census and presented here is in years completed at the last birthday. For infants below one year the age had been recorded as '0'.

16. The figures presented in the table are compiled from the answers recorded at the Census against Question 2 on 'age' in the Individual Slip, and relate to a full count. The corresponding tables in the previous Censuses had been prepared on a sample basis.

17. The material presented here is in its crude form, i.e. as actually returned in the Census. It has not been smoothed or graduated to eliminate the preferences for digits ending with '0', '5', etc.

Table C-V (Wardwise)

18. This table presents the distribution of population by mother-tongue. Mother-tongues and dialects are arranged in alphabetical order by a vertical spread in column 1. The material is presented separately for Wards A to G and Western and Eastern Suburbs in respect of 25 mother-tongues which have more than one thousand speakers in Greater Bombay. The speakers of the remaining mother-tongues have been clubbed together under a residual group 'Others'. The break up of the group 'Others' is presented on page 186 in run-on lines with number of speakers, males and females in brackets only for Greater Bombay as a whole.

19. Mother-tongue is defined as the language spoken in the childhood by the person's mother to the person or mainly spoken in the person's home in the childhood. In the case of infants and deaf and mutes the language usually spoken by the mother or if the mother had died while the person was still a child, the language mostly spoken in the person's home in childhood was recorded as the mother-tongue. Thus, for each and every person the mother-tongue was recorded irrespective of whether or not he was able to speak.

Table C-VI

20. This table presents distribution of population by mother-tongue and bilingualism. For each mother-tongue shown in column 3, total number of speakers—males and females—are shown and in addition males and females returned as speaking a language subsidiary to the mother-tongue are shown along with the names of subsidiary languages spoken and the number of speakers, males and females shown in brackets in run-on lines.

21. Subsidiary language was defined as the language, if any, other than his mother-tongue, which a person is able to speak, understand and use with felicity in communicating with others. When two or more subsidiary languages had been returned only the first of them was taken into consideration for compiling this table.

Table C-VII (Wardwise)

22. This table presents the distribution of population by religion. The material is separately presented for Greater Bombay, Wards A to G and Western and Eastern Suburbs. The main religions are shown in their alphabetical order by a horizontal spread, viz., Buddhists, Christians, Hindus, Jains, Jews, Muslims, Sikhs, Zoroastrians. The followers of remaining religions are grouped together and shown under 'Others'. Figures for sects returned as religions during the Census have been combined in a few cases, with the main religions concerned.

Table C-VIII-Part A and Part B

23. This table presents the distribution of population of Scheduled Castes and Scheduled Tribes classified by literacy and economic activity. The table is presented in two parts. Part A presents material for the Scheduled Castes and Part B for the Scheduled Tribes.

24. As has been described in the note on Table B-III, the Census definition of literacy is ability to read and write a simple letter. If a person could both read and write and had passed one or more written examinations as proof of educational level attained, the higher examination he has passed was recorded in the enumeration slip. The literates, i.e. those who are able to read and write a simple letter and those who are educated have been grouped together and their figures are shown under heading literates and educated persons in columns 7 and 8. The figures for illiterates, i.e. those who cannot read and write are shown in columns 5 and 6.

25. Classification by economic activity is into workers and non-workers and of workers into nine broad industrial categories. This classification is the same as in the Primary Census Abstract and in Table B-II. The 1961 Census Scheme of economic classification and the definitions of workers, non-workers and each of the nine broad industrial categories are described in paragraphs 4 to 11 and 25 to 34 at pages 39 to 41.

MIGRATION TABLES

(D SERIES)

EXPLANATORY NOTE

MIGRATION TABLES

There are six Tables included in this Series. The aspect of movement of population has been studied in the 1961 Census in greater detail. For this purpose in addition to the usual question of place of birth, every migrant (person born outside the place of enumeration) was asked two more questions. One was about the period of his residence at the place of enumeration and the other was whether his place of birth is rural or urban. These characteristics of migration have been cross-tabulated by sex, age, educational levels and occupation. Results are presented in this set of six Migration Tables. Another much more elaborate study of migrants to Greater Bombay has been done as one of the projects of social studies taken up in the 1961 Census. Results of that study are presented in Part X (I-C) of the Maharashtra Census Report on Greater Bombay.

2. A place is treated as urban in the 1961 Census if it has a Municipality, Cantonment or Civil Lines or if it has a population of over 5,000 and three-fourths of its male workers are engaged in non-agricultural pursuits. All areas which are not urban are treated as rural.

3. The question asked about the place of birth was whether it is now rural or urban and not what it was when the person (interviewed) left it. In case where the person did not give definite answer the characteristics was treated as unspecified. Rural/Urban differentiation was, however, not possible in the case of migrants from foreign countries.

4. The definition of migrants includes persons migrated for all reasons and not only for economic reasons. Women migrating after marriage, and children going to urban areas for education are two of such other types. The custom of women going to their parents' places for confinement also inflates the number of migrants.

5. The migration tables do not include any item pertaining to out-migration. The name of the district in which the migrant was born was asked for all migrants from areas within the State. For people coming from outside the State, only the name of the State had been asked. It was thus not possible to get any table upon out-migration from the City from the 1961 Census material.

Table D-I (Wardwise)

6. This table shows the distribution of non-Indian nationals of each sex residing in Greater Bombay at the time of the 1961 Census by the foreign countries to which they belong.

7. The countries are first classified into five broad groups, viz., (i) countries in Asia beyond India including U.S.S.R., (ii) countries in Europe excluding U.S.S.R., (iii) countries in Africa, (iv) countries in America and (v) countries in Oceania. Each group is then sub-classified by major countries of nationality. In each group smaller countries are grouped together under 'Elsewhere'.

8. The figures of non-Indian nationals shown here are exclusive of those who were employed in Foreign Consulates or Missions and their families because they were not enumerated in the Census. Nationals of Goa, Daman and Diu have been treated as Indian nationals and, therefore, their numbers are not included here.

Table D-II (Wardwise)

9. This table presents the distribution of population classified by birthplace and sex.

10. The classification by places of birth is shown under column 1. The sub-classification for each type of place of birth by rural, urban or unclassifiable is shown under column 2.

11. The classification of places of birth is first into six broad groups, viz. :—

- A. Born in India.
- B. Born in countries in Asia beyond India (including U.S.S.R.).
- C. Born in countries in Europe (excluding U.S.S.R.).
- D. Born in countries in Africa.
- E. Born in countries in two Americas.
- F. Born in countries in Oceania.
- G. Born at sea.
- H. Unclassifiable.

12. The first broad group "A" is further classified into two groups, viz., (I) 'Born in Maharashtra' and (II) 'Born in States in India beyond Maharashtra'. The former group (I) is further sub-classified into two sub-groups, viz., (a) Born in Greater Bombay and (b) Born in other districts of Maharashtra. The latter group (II) is further sub-classified into 14 States (Andhra Pradesh, Assam, Bihar, Gujarat, Jammu & Kashmir, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal) and 11 Union Territories and other areas presented in the following order :—

- (1) Andaman and Nicobar Islands.
- (2) Delhi.
- (3) Himachal Pradesh.
- (4) Laccadive, Minicoy and Amindivi Islands.
- (5) Manipur.
- (6) Tripura.
- (7) Dadra and Nagar Haveli.
- (8) Goa, Daman and Diu.
- (9) Pondicherry.
- (10) North-East Frontier Agency.
- (11) Sikkim.

13. Naga Land does not appear in this classification as there are no migrants from that State.

14. Further break-up of birthplaces grouped under each of the broad groups "B", "C", "D", "E" and "F" is shown by a few main countries. Combined totals for all the other countries in each group are presented under the heading 'Elsewhere'.

5. Classification of birthplaces by "Rural", "Urban" and "Unclassifiable" is presented here for the first time. It is, however, restricted to birthplaces within India only and is not shown for birthplaces outside India. That classification is also not available in the case of Goa, Daman and Diu.

Table D-III (Wardwise)

16. This table shows the distribution of migrants classified by place of birth and duration of residence in place of enumeration (period after the migration). It shows the volume of immigration for different periods and from different areas and is, therefore, valuable in studying the trends of movement of population.

17. The period of residence is grouped under six categories, viz., (i) less than 1 year, (ii) 1—5 years, (iii) 6—10 years (iv) 11—15 years. (v) 16 years and over and (vi) period not stated. Classification of migrants by these categories is shown in columns 5 to 16.

18. The classification by birthplaces is shown under column 1. It is on the same lines as followed in Table D-II. Broad Group "A" is presented with all its groups and sub-groups excepting A-(I) (a) born in Greater Bombay. In addition further break-up of sub-group A-I (b) is given by different districts in Maharashtra State. Out of Group "B", entries are presented separately for Nepal and Pakistan only. A combined total of the remainder of Group "B" and Groups "C", "D", "E" and "F" is presented in a single entry with the heading 'Born in other countries outside India'. The last broad group is the same as in Table D-II.

19. The sub-classification for rural, urban and unclassifiable is presented for all groups and sub-groups but not for Nepal, Pakistan and other countries outside India.

20. Figures for migrants from Goa, Daman and Diu are not separately available. They are included in the group 'Born in other countries outside India'.

Table D-IV

21. This table presents the distribution of migrants by sex cross-tabulated by broad age-groups and educational levels and in case of workers by Occupational Divisions and Groups. Occupational break-up is the same as in Tables B-V and B-VI or as described in Appendix II at pages 51 to 55. This table will show the occupations which attract migrants to the City. Educational levels will show the skilled and unskilled workers.

Table D-V (Wardwise)

22. This table shows composition of population according to those born locally and those born in rural and urban areas outside the City. It gives the extent of immigration from rural and other urban areas to the City. Migration from rural and urban areas is separately classified by the period of residence, i.e., less than 3 years and 3 years or more. Material is presented for immigration within the district, within the State and outside the State both for rural and urban birthplaces separately.

23. The table does not include persons born outside India, persons whose birthplaces are unclassifiable, persons whose birthplaces have not been recorded as rural or urban and persons in whose cases the duration of residence at the place of enumeration has not been stated. The total population shown in columns 2, 3 and 4, therefore, differs from the actual population of the City and Wards which is shown in brackets in those columns.

Table D-VI (Wardwise)

24. This table shows the distribution of population by nine broad industrial categories of workers and one of non-workers, cross-classified by place of birth. It thus shows the sectors of economic activity which attract or absorb the migrants and the places of origin from where those migrants are so attracted.

25. The classification by workers and non-workers and by nine industrial categories of workers is shown in columns 8 to 27. This classification is the same as described in the Tables B-II and C-VIII.

26. The classification by places of birth is shown under column I. It is exactly the same as is used in Table D-II.

27. The material is presented for all broad groups, groups and sub-groups of birthplaces as in Table D-II.

28. The break-up of countries of each of the broad groups "B", "C", "D", "E" and "F" is shown only for important countries and the remaining countries are combined together and presented under 'Elsewhere' as in Table D-II.

29. Sub-classification of birthplaces by " Rural ", " Urban " and " Unclassifiable " is shown by a vertical spread under column 2. It is restricted to places in India only. It is not shown for places of births outside India. That classification is not shown for Goa, Daman and Diu also as those areas were considered outside the Indian Union at the time of tabulation.

HOUSING TABLES

(E SERIES)

EXPLANATORY NOTE

HOUSING TABLES

There are six Tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The remaining two tables relate to industrial establishments. Table E-III on industrial establishments prepared from the houselists gives for the City a break-up by nature of industry and the fuel used cross-tabulated by the size of establishments. The other table shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups according to the Standard Industrial Classification Scheme (Appendix I at page 45).

2. All the six tables of this Series are based on the houselists which were prepared at the time of numbering of houses in April–October of 1960. Such data on housing conditions have been obtained in the Census for the first time.

3. A “House” has been defined for purposes of this Census as a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with separate entrance, whether that entrance leads to the road, street or lane, or to a common staircase, courtyard or a gate.

Table E-I (Wardwise)

4. This table presents the distribution of Census houses classified by uses to which they are put. The various uses are shown in columns 4 to 15. Houses which were not being used for any purpose at the time of houselisting were treated as vacant.

5. The classification of uses of occupied houses is in the following twelve groups :—

(i) *Dwellings* (Column 4 of the Table).—Houses used exclusively for residential purposes.

(ii) *Shop-cum-dwellings* (Column 5 of the Table).—Houses used partly for residential purposes and partly for sale of goods both portions having common main entrance. Examples : grocery shop-cum-dwelling, stationery shop-cum-dwelling, pan-bidi shop-cum-dwelling, vegetable stall-cum-dwelling, etc.

(iii) *Workshop-cum-dwellings* (Column 6 of the Table).—Houses used partly for residential purposes and partly for manufacture of articles and/or repair work or servicing both portions having a common main entrance. Examples: goldsmithy-cum-dwelling, tailoring establishment-cum-dwelling, weaving-cum-dwelling, carpenter's establishment-cum-dwelling, shoemaking-cum-dwelling, etc.

(iv) *Hotels, Sarais, Dharamshalas, Tourist Homes and Inspection Houses* (Column 7 of the Table).—Houses used as places of halt or temporary stay by travellers and pilgrims. Examples : Dharamshalas, lodging houses, rest houses, etc.

(v) *Shops excluding Eating Houses* (Column 8 of the Table).—Houses used exclusively for purchasing and selling of goods, without any manufacturing process being carried on in them. This category excludes restaurants, cafes, tea-shops, sweetmeat shops and eating places which have been classified separately. It includes grocers' shops, coal and fuel depots, cloth shops, stationery stores, newspaper stalls, fruit and vegetable stalls, etc. A few shops are also shown in column 6 because of the combined use of these houses.

(vi) *Business houses and Offices* (Column 9 of the Table).—Places used for housing offices of Government or quasi-Government institutions, commercial establishments, etc. Examples : Banks, Solicitors' firms, Offices of political parties and office of a Government official, Railway Station, Police Station, Fire Brigade Station, etc.

(vii) *Factories, Workshops and Worksheds* (Column 10 of the Table).—Houses where one or more kinds of goods are produced or manufactured for being put on the market or where some kind of processing, servicing or repairing is undertaken. Places where goods are merely bought and sold and are not manufactured or processed have been classified as shops and are excluded from this category. The term “workshop” or “workshed” applies to a small unregistered manufacturing establishment. Manufacturing establishments registered under the Indian Factories Act are termed “Factories”. “Workshops” cover flour mills, rice mills, blacksmith's establishment, carpenter's establishment, printing press, furniture mart, etc. Under “Factories” are included textile mills, Railway or State Transport workshops and all registered factories.

(viii) *Schools and other Educational Institutions including Training Classes, Coaching Classes, etc.* (Column 11 of the Table).—Houses where any type of instruction is imparted, whether recognised or unrecognised, technical or non-technical. This category covers all types of schools, colleges, tutorial classes, typewriting institutes, commercial diploma institutes, music and dance classes and other educational institutions.

(ix) *Restaurants, Sweetmeat Shops and Eating Places* (Column 12 of the Table).—Places where foods and/or beverages are sold or served. Canteens, milk bars, tea stalls, etc., fall in this category. Places where food articles (biscuits, beverages, etc.) are produced and sold are included in the category “workshops”. Halwai shops where sweetmeats are prepared for sale are also included under “workshops”.

(x) *Places of Entertainment and Community Gathering* (Column 13 of the Table).—This category includes theatres, libraries, reading rooms, gymnasias, *akhadas*, museums, art galleries, temples, mosques, churches, marriage halls, town halls, etc.

(xi) *Public Health and Medical Institutions* (Column 14 of the Table).—Houses where medical facilities are provided or consulting rooms where medical advice is given fall under this category. These include public health centres, hospitals, dispensaries of all kinds, clinics and consulting chambers of doctors, vaidas, hakims, homoeopaths, family planning centres, maternity homes, leper asylums, mental hospitals, etc.

(xii) *Others* (Column 15 of the Table).—This is the residual group which includes types of uses other than those mentioned above. The types of uses included in this category are garage, car-shed, cattle-shed, electric pump room, meter room, outhouse, cemeteries, places where personal services are provided, e.g., laundries, hair cutting saloons, photo studios, etc. Houses found locked during the stage of house-numbering have been included in this category after getting it confirmed that they were used by some person or the other for purposes which could not be classified for want of further information.

The material is presented for City and each Ward separately.

Table E-II (Wardwise)

6. This table presents the tenure status of Sample Census Households living in Census Houses used wholly or partly as dwelling. Occupancy tenure, i.e., the nature of right on which a house is occupied by a household has been shown only under two broad categories, viz., "Owned" and "Rented". All dwellings which are not "owned" have been treated as "rented" and thus 'Rent-free' or 'Caretaker' occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-cum-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

7. This table is prepared from the houselists and on a 20 per cent sample. The material is presented for the City and each Ward separately.

Table E-III

8. This table shows the distribution of houses used as factories and workshops classified by "Industry", "Power and Fuel used" and "Size of Employment". The table has been compiled on a total count from the material collected through columns 5 to 8 of the houselist.

9. Industries are classified according to the Standard Industrial Classification Scheme adopted by the Government of India in major groups (two digits) and minor groups (three digits) (see Appendix I at pages 45).

10. The classification by power or fuels used is first by power or no-power used and then for those using power or fuels by three categories of power or fuels, viz., (a) electricity; (b) liquid fuel; and (c) coal, wood or bagasse.

11. The classification by size of employment is in seven groups, viz., (i) one person; (ii) 2—5 persons; (iii) 6—9 persons; (iv) 10—19 persons; (v) 20—49 persons; (vi) 50—99 persons; and (vii) 100 persons and more.

12. The number of workers used for this classification is the figure reported by the employers or responsible persons on their behalf as average per day working during the week preceding the date of enumerator's visit. The material thus very nearly relates to conditions as obtaining on 1st October, 1960. The number of workers reported here is inclusive of persons working in the industry as their secondary work, i.e., in addition to their primary or principal work in some other industrial sector.

13. The words "Factory" and "Workshop" together denote places where some kind of production, processing, repair or servicing is undertaken on a commercial scale, i.e., where goods are produced and sold or are processed, repaired or serviced for payment.

14. Material presented in this table is limited only to Industry Division 2 & 3 which covers all manufacturing industries. Processes of agriculture, livestock, forestry, fishing, hunting, mining and quarrying and of generation of gas, kerosene, or petrol and operations of cold or other kinds of storage are not included here.

15. In a few cases, servicing and repairing establishments have been shown separately from the manufacturing establishments through the three-digit classification in minor groups (see 384 against 382 and 383 or 388 against 385). But, in some other cases, such separate classification has not been made and the presentation is combined for the two types of establishments.

16. In cases where two or more articles are manufactured, the classification of industry is by the main product. In cases where an establishment is manufacturing and also repairing or servicing the same goods, the classification is on the basis of its manufacturing processes.

Table on Industrial Establishments and Workers

17. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification Scheme (Appendix I at page 45). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

18. The material presented here relates to April-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members and outsiders, if any, were working in the industry during the week preceding the enumerator's visit.

19. The list of industries presented here does not include some seasonal industries which were not actually working during the period when houselists were prepared viz., April-October, 1960.

20. The table is prepared from the houselists on a full count. Material is presented here for the City as a whole and for each Ward separately. The presentation is in the run-on style. Industries are shown by their digit codes, i.e., minor groups (see Appendix I at page 45). Minor groups for which there are no establishments are not shown for the City or Wards as the case may be.

Table E-IV

21. This table presents distribution of Sample Households living in Census houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the wall for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

22. The number of houses classified by materials of wall and roof is the same as that of Table E-II which includes houses used exclusively as dwellings as well as dwellings with other uses, viz., shop-cum-dwellings, workshop-cum-dwellings, etc.

23. Material is presented here for the City as a whole and for each Ward separately. The table is prepared from the houselists on a 20 per cent sample.

Table E-V

24. This table presents the distribution of sample households classified by number of members and by number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or overcrowding.

25. The table relates only to the family type households, Institutional households like hostels, boardings, prisons, etc. are not shown here.

26. A "room" has four walls with a door and a roof overhead and is not less than 6' × 6'. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns 6 to 8 as having no regular room.

27. A household is a group of persons who commonly live together in the same house and take their meals from a common mess unless exigencies of work prevent any of them from doing so. Material presented here is restricted only to the family type of households. Institutional households, i.e., groups of persons residing in hostels, boardings, prisons, hospitals, etc., who otherwise satisfy the definition of household, are not included here.

28. The table is prepared from the houselists on a 20 per cent sample. Material is presented for the City and each Ward separately.

**SPECIAL TABLES FOR
SCHEDULED CASTES
AND
SCHEDULED TRIBES**

(SCT SERIES)

EXPLANATORY NOTE

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

There are seven Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes. These classes of people are declared by President's Orders issued under Articles 341 and 342 respectively of the Constitution of India as Scheduled Castes and Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the Lok Sabha, State Legislative Assemblies and other elective bodies.

2. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied, not only as a combined group as in 1951, but also for each Scheduled Caste and Scheduled Tribe separately.

3. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for the total of all Scheduled Castes or Scheduled Tribes and for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

4. Classification by Scheduled Castes and Tribes is on the basis of answers recorded in response to Question 5(c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for Greater Bombay district and in case he belonged to one of them he was asked the name of his caste or tribe. The population of Scheduled Castes shown here is much less than that for the City in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Bauddha, and under the Constitution Order there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

Table SCT-I-Part A

5. This table presents the distribution of Scheduled Caste population by sex and economic activity. Material is presented for all Scheduled Castes as a group as well as for each Scheduled Caste separately. Scheduled Castes are arranged in alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract, Tables B-II and C-VIII-Part A. The last group 'Unclassified' is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

6. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) is given in paragraphs 25 to 34 on pages 40-41.

In a way this table presents castewise break-up of the material relating to economic classification presented in Table C-VIII-Part A.

7. Columns 27 to 30 present castewise figures of persons engaged in certain occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying of hides or scavenging as secondary work are not included in the figures of columns 27 to 30.

8. There are some more castes declared as Scheduled Castes for the City area. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the City.

Table SCT-I-Part B

9. This table presents the distribution of Scheduled Tribe population by sex and economic activity. Material is presented for all Scheduled Tribes as a group as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract, Tables B-II and C-VIII-Part B. The last group 'Unclassified' is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

10. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) is given in paragraphs 25 to 34 on pages 40-41. In a way this table presents tribewise break-up of the material relating to economic classification presented in Table C-VIII-Part B.

11. There are some more tribes declared as Scheduled Tribes for the City area. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the City.

Table SCT-II-Part A

12. This table gives the distribution of Scheduled Caste population by sex, broad age-groups and marital status. The presentation is for all Scheduled Castes as a group as well as for each Scheduled Caste separately.

13. The three age-groups adopted in this table are 0-14, 15-44 and 45 and above. The last group 'age not stated' includes persons in whose case age had not been returned. The break-up by age-groups is by a horizontal spread in the common heading. The classification by marital status is into four categories, viz., 'Never Married', 'Married', 'Widowed' and 'Divorced or Separated'. The description of these terms is given in paragraph 9 on page 169.

14. While compiling a similar Table (C-II) for the general population all persons in the age-group 0—9 have been treated as 'Never Married' irrespective of the answer to Question 3 of the Individual Census Slip. Such assumption was not made while compiling the present Table (SCT-II) for Scheduled Castes and the classification for all persons including those in the age-group 0—14 has been made with reference to the marital status actually returned during the Census. These figures of marital status for the total and the age-group 0—14 shown in this table may not, therefore, be strictly consistent with the corresponding figures shown in Table C-II.

Table SCT-II-Part B

15. This table gives the distribution of Scheduled Tribe population by sex, broad age-groups and marital status. The presentation is for all Scheduled Tribes as a group as well as for each Scheduled Tribe separately.

16. The three age-groups adopted in this table are 0—14, 15—44 and 45 and above. The last group "age not stated" includes persons in whose case age had not been returned. The break-up by age-groups is by a horizontal spread in the common heading. The classification by marital status is into four categories viz. 'Never Married', 'Married', 'Widowed' and 'Divorced or Separated'. The description of these terms is given in paragraph 9 on page 169.

17. While compiling a similar Table (C-II) for the general population all persons in the age-group 0—9 have been treated as 'Never Married' irrespective of the answer to Question 3 of the Individual Census Slip. Such assumption was not made while compiling the present Table (SCT-II) for Scheduled Tribes and the classification for all persons including those in the age-group 0—14 has been made with reference to the marital status actually returned during the Census. These figures of marital status for the total and the age-group 0—14 shown in this table may not, therefore, be strictly consistent with the corresponding figures shown in Table C-II.

Table SCT-III-Part A(i)

18. This table presents the distribution of population of each Scheduled Caste by sex and educational levels. The classification of educational levels is the same as in Tables B-III-Part A and C-III-Part B except that the break-up of technical degrees in different branches like engineering, medicine, etc., is not provided.

Table SCT-III-Part A(ii)

19. This table presents the distribution of population of each Scheduled Tribe by sex and educational levels. The classification of educational levels is the same as in Tables B-III-Part A and C-III-Part B.

Table SCT-IV-Part A

20. This table shows the distribution of Scheduled Caste population by sex and religion. Material is presented for all the Scheduled Castes as a group as well as for each Scheduled Caste separately.

21. Members of Scheduled Castes can belong either to the Hindu or Sikh religion. In Bombay only four persons (3 males and 1 female) belonging to the Scheduled Castes have returned themselves as Sikhs.

Table SCT-IV-Part B

22. This table shows the distribution of Scheduled Tribe population by religion. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately. Unlike Scheduled Castes, Scheduled Tribes may belong to any religion. The classification of tribes by religion is based on the answers returned to Question 5 (b)—Religion and to Question 5 (c)—Scheduled Caste/Scheduled Tribe in the Census slip. In Bombay City, Scheduled Tribes have been returned as belonging to two religions, Christian and Hindu.

Table SC-I

23. This table presents the total non-working population of all the Scheduled Castes as a group classified by four types of non-workers, viz. :—

- (i) Full time students ;
- (ii) Persons seeking employment for the first time ;
- (iii) Persons employed before but now out of employment and seeking work ; and
- (iv) Others.

Each type is further classified by educational levels.

Table ST-I

24. This table presents material on mother-tongue^s and bilingualism of Scheduled Tribes.

25. The material is presented by mother-tongues, that is, under each mother-tongue caption the number of persons (males and females) from among all the Scheduled Tribes who have returned that language as mother-tongue are shown in the first line and the break-up of figures for the various Scheduled Tribes is shown immediately below. For each Scheduled Tribe, besides the number of speakers of mother-tongue, number of persons from among the tribe speaking some other language in addition to the mother-tongue is presented along with the names of subsidiary languages spoken in run-on lines and number of speakers of the respective subsidiary languages shown in brackets. The mother-tongues, names of Scheduled Tribes and subsidiary languages are arranged in alphabetical order.

26. Definitions of mother-tongue and subsidiary language are the same as those shown in the notes on Tables C-V and C-VI of the C Series (see page 170).

Table ST-II

27. This table presents the distribution of non-working population among the Scheduled Tribes by sex and type of activity. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately.

28. The classification of non-workers by type of activity is into the following four groups and is shown by a horizontal spread under columns 5 to 12 :—

- (i) Full time students ;
- (ii) Persons seeking employment for the first time ;
- (iii) Persons employed before but now out of employment and seeking work ; and
- (iv) Others.

The second and the third groups together show the total number of unemployed persons among the Scheduled Tribes.

29. The last group 'Others' includes the following five types. Separate figures under each of those types as in Table B-IX for the general population were not compiled for non-workers among the Scheduled Tribes :

- (a) Housewives and others engaged in unpaid home duties only ;
- (b) Dependants including infants, children not attending school, permanently disabled, etc. ;
- (c) Rentiers, pensioners and others getting unearned income ;
- (d) Beggars, vagrants, etc. ; and
- (e) Convicts in jails, inmates of penal, mental and charitable institutions.

SECTION II

**CIRCLEWISE AND BLOCKWISE
PRIMARY CENSUS ABSTRACT**

EXPLANATORY NOTE

In Section I the first Table in the group of General Economic Tables at pages 56 to 61 is the Primary Census Abstract which presents basic 1961 Census statistics for Greater Bombay, its 15 Wards and 88 Sections. This Section II presents an elaborate spread of that Primary Census Abstract for 7,545 minute enumeration units known as Circles and Enumeration Blocks. For each unit the table is spread over two pages and shows—

- (i) number of occupied houses ;
- (ii) number of households ;
- (iii) total population ;
- (iv) & (v) population of Scheduled Castes and Scheduled Tribes ;
- (vi) & (vii) houseless and institutional population ;
- (viii) number of literate and educated persons ;
- (ix) workers ; and
- (x) non-workers.

Items (iii) to (x) are shown for males and females separately. A further break-up for item (ix) workers, shows their distribution by sex and nine broad categories of economic activity. Comprehensive statistics covering such a wide range as above are being published here for such small area units for the first time in India.

The Scheme of Presentation

2. For facility of reference, the material for Wards and Sections presented at pages 56 to 61 is also reproduced here at appropriate places. The Table starts with an entry for the whole of Greater Bombay followed by entries for Ward A and the first of its five Sections, viz., Upper Colaba. Entries for the first Circle in that Section and nine enumeration blocks for that Circle are then presented in their numerical order. Then follow the entries for the second Circle and its 24 enumeration blocks which complete the Upper Colaba Section. Then appears the set of entries for the second Section in Ward A, viz., Middle and Lower Colaba with its Circles 1 to 7 and each Circle followed by entries for its enumeration blocks. Then the set of entries for the third Section and so on till Ward A is covered. Similar sets of entries for Wards B, C, D, etc. are presented till the entire area of Greater Bombay is completely covered. To facilitate reference a list of Wards, Sections and Circles showing the number of enumeration blocks and the corresponding pages of the Table is given as an Appendix to this note (pages 3 to 9). An alphabetical list of Wards and Sections will be found as Appendix I to the Introductory Note at pages 4-5 of Section I.

Description of Boundaries

3. The procedure followed in carving out the small area units at the 1961 Census is described in the following paragraphs. It had been decided that the Circles should have permanent natural boundaries on all sides, either a road or street, railway or sea coast. A brief description of such boundaries is given for each Circle just before its entry in the Table. It will facilitate location of the Circle areas on the spot. It was, however, not possible to similarly describe the boundaries for the enumeration blocks because the criterion in making the blocks was an approximate population of 600 and in numerous cases the blocks covered two or three buildings only.

Ya 3664—II—1

Delimitation of Circles and Blocks

4. The 88 Sections used by the Municipal Health Department for registration of births and deaths were adopted as administrative units for the 1961 Census. Each Section was divided into Circles. The Circles were used as Stage I units for housenumbering and house-listing. Each Circle, therefore, had a separate series of building numbers. These Circles were delimited with permanent natural boundaries on all sides.

5. At the time of preparing the Houselists, the enumerators were asked to close a houselist set as soon as it covered about 120 households or 600 population and also reached some definite boundary or landmark such as a lane or an end of a building, etc. The areas covered by those houselist sets were called enumeration blocks and were used as area units for the Census count, each being assigned to an enumerator separately. The spread of the Primary Census Abstract shown in this Section is with reference to the same enumeration blocks.

6. The houselist sets prepared for the enumeration blocks have been preserved in the Maharashtra Census Office. The first two columns contain references to Census house numbers and the Municipal building numbers. Even where the Census house numbers might have been obliterated, it may be possible to locate the starting and closing points for the sets and identify the blocks on the spot by reference to the Municipal building numbers and/or the names of the heads of households shown in Column 5 or 12 of the Houselist set.

7. These circles and enumeration blocks will be extremely useful as a base for selecting sample areas for various surveys organised by different official and non-official agencies from time to time. They have already been so used for about a dozen surveys during the last two years. This voluminous blockwise material is being published in this volume primarily for the benefit of such surveys and scholars doing research on specific areas in Greater Bombay.

Concepts and Abbreviations

8. The layout of the table and the various concepts used in it have been described in paragraphs 15 to 24 of the Explanatory Note on pages 39-40.

9. The following abbreviations have been used in the column headings for economy of space :—

- I Working as Cultivator.
- II Working as Agricultural Labourer.
- III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV Working at Household Industry.
- V Working in Manufacturing other than Household industry.
- VI Working in Construction.
- VII Working in Trade and Commerce.
- VIII Working in Transport, Storage and Communications.
- IX Working in Other Services.
- X Non-workers.

ps showing Circle Boundaries

0. The four map sheets between pages 2 and 3 show the boundaries of wards, sections and circles. Circle boundaries are described just before its entry in the Table.
