NOTE

The Census of 1961 was taken between the 10th February and 28th February, 1961, followed by a revisional round between the 1st and 5th March, 1961. The point of time with reference to which the data were collected was the sunrise of 1st March, 1961. The main results of this Census are being presented in a series called the 1961 Census Publications (described elsewhere). The present book Part IIB(ii) contains four of the General Economic Tables, viz., Tables B-V, B-VI, B-VIII and B-IX.

Scheme of Presentation

The tables have been presented for 22 units, viz., the State, 4 Administrative Divisions and 17 Districts. The arrangement of the units is uniform and based upon the code numbers allotted to districts at the time of census.

Each table is preceded by a flyleaf which indicates the lay-out and method of presentation of the table. The flyleaf also elaborates the concepts and definitions on the basis of which the table has been prepared. It also gives proportional figures highlighting the statistical aspects of the table.

Mode of Preparation

The General Economic Tables have been prepared from answers recorded against Questions 8 to 12 of the Individual Slip. A facsimile of the Individual Slip is given in Appendix I to this Note. The Instructions to Enumerators relating to these questions are given in Appendix II.

Rural and Urban Classification

For the 1961 Census, a town included all places having a municipality, notified area, cantonment or civil lines. Certain other places were also treated as towns if they had (a) a population of not less than 5,000, (b) density not less than 1,000 person per sq. mile, and (c) at least 3/4th of the adult male population engaged in non-agricultural livelihood. A complete list of places treated as towns in 1961 can be seen in Table A-IV given in Part II-A (General Population Tables) volume of the 1961 Census Publications for Bihar. All places, which were not urban, were treated as rural.

Subsidiary Tables

A number of subsidiary tables have been prepared to highlight and summarise the salient features of the main tables. These are presented in Part I-C of the 1961 Census Publications for Bihar. The subsidiary tables to the tables given in this volume are:

B-V.1—Distribution of 10,000 workers other than those working as Cultivators or as Agricultural labourers by Occupational Division, Group and Family of National Classification of Occupations.

B-VI.1—Distribution of 1,000 workers in each Occupational Division and in each sex by educational levels in urban areas only.

B-VIII Part A.1—Distribution of 1,000 males and females who are unemployed in each age-group according to educational levels in urban areas only.

B-VIII Part B.1—Distribution of 1,000 males and females who are unemployed by educational levels in rural areas only.

B-IX.1—Number per 1,000 of population aged 15+ and of population of each age-group 15—34, 35—59, 60+ and age not stated who are unemployed, separately for persons, males and females.

B-IX.2—Distribution of 1,000 persons not at work by age-groups.

B-IX.3—Distribution of 1,000 persons not at work by sex and 1,000 non-workers of each sex by type of activity.

Workers and Non-workers

The main basis of economic classification in the 1961 Census implied a broad division of the entire population into two sectors, viz., workers and non-workers. The working population was determined on consideration of actual work rather than income as was the practice in previous censuses since 1931. Work included not only actual work but also effective supervision and direction of work.

The working population consists of those engaged in production of economic goods or rendering of services either for consumption or sale or exchange. Persons engaged in seasonal activities (e.g., cultivation, livestock-rearing or

PREFACE

Part II-B(i), published already, contains five General Economic Tables (Tables B-I to B-IV and B-VII). The remaining four tables (Tables B-V, B-VI, B-VIII and B-IX) are being presented in this volume. The Household Economic Tables (Tables B-X to B-XVII) have been published separately in Part III, Sub-parts (i) and (ii).

The Introductory Note in Part II-B(i) gives a general outline of the concepts and definitions used in the General Economic Tables. A brief Note is given in this book also, but the reader may refer to the Note in Sub-part (i) for a more detailed discussion. The relevant concepts and definitions have also been briefly explained, along with proportional figures, in the flyleaf to each table.

My grateful thanks are due to Sri K.D. Ballal, I.A.S., Central Tabulation Officer, Office of the Registrar General, India and his staff for a careful and thorough checking of the tables.

I am also indebted to Sri S. N. Chatterjee, Superintendent, Secretariat Press, Bihar and his staff for the care and interest taken in the printing of this volume.

Household Industry) were deemed to be workers if they had regular work for more than an hour every day for the greater part of the working season. Persons engaged in trade, profession, business or service were treated as workers if they were employed on any of the fifteen days just preceding the date of enumeration. A regularly employed person, if absent from work for 15 days or more prior to enumeration on account of illness or any other cause, was also treated as a worker. Apprentices were treated as workers whether or not they were in receipt of stipend or wages.

Industrial Classification of Workers

Workers have been classified into nine industrial categories depending on the sector of economy in which they worked. In the case of persons doing more than one kind of work, such classification was done on the basis of his principal work which was determined by that which consumed the greater part of his working time. The nine industrial categories are briefly described below:

Category I : Cultivator

Persons working in cultivation of land owned or held by them as tenants. Thus, both owner-cultivators and tenant-cultivators are included in this category. Those engaged in active supervision or direction of their cultivation also figure as cultivators.

Category II : Agricultural labourer

Persons working in cultivation purely as labourers for wages in cash, kind or share without having any rights on the land cultivated by them or the produce derived therefrom are categorized as Agricultural labourers.

Category III : Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations and Orchards and Allied activities

Workers engaged in (i) mining and quarrying of coal, iron, gold and silver ores, manganese, mica, limestone, sand, clay, etc., (ii) production and rearing of livestock such as cows, buffaloes, goats, sheep, pigs, and poultry, (iii) felling and cutting of trees, production of fuel, fodder, gums, resins and lac, (iv) fishing, (v) hunting, (vi) production of plantation crops like tea, coffee, rubber and tobacco, and (vii) production of fruits and nuts in orchards, come in Category III.

Category IV : Working at Household Industry

Workers in this category are engaged in manufacture of goods but on a small scale. A Household Industry, by definition, must be conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the households and/or members of the household is an essential feature of the Household Industry. Hired labourers can also be engaged, but their role must be of secondary importance. A Household Industry, in essence, relates to manufacture, processing, repair or servicing of goods on a small scale through the participation of members of the household.

Category V : Working in Manufacturing other than Household Industry

Persons working in the production, manufacture, processing, repair or servicing of goods, except those on the scale of Household Industry, are included in this category.

Category VI : Working in Construction

Workers in construction and maintenance of buildings, roads, railways, bridges, tunnels, telegraph and telephone lines, waterways, bunds, embankments, dams, canals, tanks, tube-wells and wells, etc., belong to this category.

Category VII : Working in Trade and Commerce

Persons working in wholesale or retail trade in any kind of goods and in activities such as import and export, real estate and properties, stocks and shares, money lending, banking and auctioneering, etc., are accounted for here.

Category VIII : Working in Transport, Storage and Communications

Persons working in transportation by rail, road, air, or water, and in services incidental to transport, such as packing, carting and running a travel agency; in storage and warehousing such as in warehouses and cold storages; and in postal, telegraph wireless, signal and telephone communications come within this category.

Category IX : Working in Other Services

This category comprises of workers in the following services :

- (i) Electricity, Gas, Water and Sanitary Services ;
- (ii) Public Services under Central, State, Quasi-Government and Municipal institutions ;
- (iii) Educational and Scientific Services ;
- (iv) Medical and Health Services ;
- (v) Religious and Welfare Services ;
- (vi) Legal Services ;
- (vii) Business Services ;
- (viii) Community Services ;
- (ix) Recreation Services ; and
- (x) Personal Services.

Non-workers

Category X relates to non-workers. They have been classified into eight categories (vide flyleaf to Table B-IX). Full statistics in regard to them will be found in Union Table B-IX. Figures in respect of unemployed persons, who

constitute the last two categories among non-workers, are given in Union Table B-VIII.

Occupational Classification

Union Tables B-V and B-VI cross-tabulate the workers in Industrial Categories III to IX by their occupations classified according to the National Classification of Occupations. A complete list of Occupational Divisions, Groups and Families may be seen at pages 398—405. The concept of 'industry' is quite distinct from that of 'occupation'. For a proper appreciation of the two concepts, reference may be made to the flyleaf to Table B-V (pages 3-4).

Questions 10(a) and 11(a) of the Individual Slip aimed at eliciting information about the occupation of workers other than those engaged in cultivation or agricultural labour. Questions 10(b) and 11(b) were intended to collect details about the nature of Household Industry and nature of non-household industry, profession, trade or service respectively. Thus, while questions 10(a) and 11(a) provided the materials for occupational classification of the person enumerated, questions 10(b) and 11(b) formed the basis of his industrial classification.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations, should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as cultivator in this question.

Q. 9. Working as Agricultural Labourer—Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a Labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(a) and 10(b). Household Industry—If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10(a) and (2) the nature of the Household Industry against question 10(b). Otherwise put X in both questions 10(a) and 10(b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house.

You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10(a) and the nature of the Household Industry against 10(b).

Q. 10(c). If Employee in Household Industry—This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E.E. For all others put X.

The following examples will illustrate how questions 10(a) to 10(c) should be filled up for persons working at Household Industry :

14. Repairing of guns ..	Gunsmithy	X
15. Bee Keeping ..	Production of honey	X
16. Tending cattle ..	Livestock raising ..	X

Q. 11. Doing Work other than 8, 9 or 10—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11(a). Nature of Work—In the case of persons not working or who work only as cultivator or as agricultural labourer or at Household Industry, put X.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b). Industry, Business, Trade, Profession or Service—In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business,

trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11(a) put an X in this question also.

Important points to remember in Questions 11(a) and 11(b)—(1) Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.

(2) If a person makes the articles he sells, he should be entered as maker and seller of them.

(3) Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

(4) The following are too vague and must not be used by themselves.

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

(5) **Labourers—**For an unskilled labourer usually employed on one sort of work alone,

give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

(6) *Machine Operators*—Always state the kind of machine giving its recognized name, if any.

(7) *Shop-keepers, Retail Dealers, Shop Assistants*—If wholly or mainly engaged in selling, write 'Dealer' (if principal) or 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

(8) *Transport Workers*—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicle drawn by horse, etc.

(9) *Services*—For a person engaged in the Defence Services write 'Service of Central Government'.

(10) If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves:

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

(11) *Domestic Services*—In the case of any private servant, e.g., a cook or domestic servant write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hotels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have

separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

(12) *Commerce*—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c) *Class of Worker*—For a person who is:

(1) An *Employer*, that is, who hires one or more persons in his work described in Q. 11(a) ... Write MR

(2) An *Employee*, that is, who does his work described in Q. 11(a) under others for wages or salary in cash or kind ... Write EE

(3) A *Single Worker*, that is, who is doing his work described in Q. 11(a) without employing others except casually, and without the help of other members of the family except casually. This will include workers working as members of co-operatives ... Write SW

(4) A *Family Worker*, that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind ... Write FW

For a person for whom an 'X' is put in Qs. 11(a) and 11(b) put an X in this question also.

Explanation—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control

other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of Household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether

at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11 (d). *Name of Establishment*—Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work write 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in this question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for persons doing work other than 8, 9 or 10.

Extract from the Instructions for Enumeration

Qs. 8 to 11. Working—These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work.

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Person like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

Q. 8. Working as Cultivator—For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry

OCCUPATIONAL CLASSIFICATION
BY SEX OF PERSONS AT WORK
OTHER THAN CULTIVATION

The following activities should be recorded in the case of persons NOT Working :

- (1) For a full time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business Write

ST
- (2) For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business .. Write

HW
- (3) For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age .. Write

D
- (4) For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work .. Write

R
- (5) For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence Write

B
- (6) For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution Write

I
- (7) For a person who has not been employed before but is seeking employment for the first time .. Write

NE
- (8) For a person employed before but now out of employment and seeking employment Write

UN
- Explanation—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in item 7 or 8.

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, i.e., more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, i.e., more than two of the questions 8 to 11, would have been

filled up by some work. In such cases you should first ascertain the principal work, i.e., the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, i.e., the work after his principal work which occupies most time. You should put a tick against the question number of that work on the right hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Q. 12. Activity, if Not Working—This question will apply to a person NOT Working.

Write 'X' in this question for a person who is working, that is for whom you have recorded the work in any of the questions 8 to 11 above.

TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

FLYLEAF

This table gives the occupational classification by sex of persons at work other than in cultivation. Figures have been given for the State, Divisions and Districts, separately for total and urban population. The occupational classification in terms of the National Classification of Occupations is presented for each Division, Group and Family, separately for each of the Census Industrial Categories III to IX. The Census Industrial Categories III—IX are briefly described below :

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities;

IV Working at Household Industry ;

V Working in Manufacturing other than Household Industry ;

VI Working in Construction ;

VII Working in Trade and Commerce ;

VIII Working in Transport, Storage and Communications ; and

IX Working in Other Services.

Families having less than one per cent of the workers of the respective Division (less than 0.5 per cent in case of families of Division 7-8) have not been shown in the table, but are given in the Appendix to the Table. Divisions thus affected have been marked with an asterisk (*). Lines with nil entries have been omitted.

A complete list of Divisions, Groups and Families of the National Classification of Occupations is given in the Annexure to this Table. However, the following additions and deletions in the list of the National Classification of Occupations have been made :

- (a) The Occupational Family 0X4 has been deleted from the National Classification of Occupations.
- (b) The Occupational Family 063 has been changed to 069.
- (c) The Occupational Family 673—Teleprinter operators is a new addition in the family of occupations for Census Tables.

(d) Besides these, there have been changes in the description of some occupational families.

The Occupational Families 400-401 relating to Category I (Cultivators) and 414 relating to Category II (Agricultural labourers) do not find place in Table B-V.

Similarly Occupational Group X0 and its Families X00, X08 and X09 relating to Non-workers (persons without occupations) have been excluded from Table B-V.

Industry and Occupation

Full details regarding the economic concepts used, distinction between industry and occupation, and the instructions given to enumerators on these points are contained in the Note to Sub-part (i) of Part II-B. The following excerpt is, however, reproduced here for ready reference :

It will have been noted that the basic economic classification adopted in Census is by the kind of industry in which the worker is engaged. The concept of 'industry' should not be confused with that of 'occupation'. 'Industry' means that sector of economic activity in which the earner is engaged, *e.g.*, textile industry, automobile industry, steel industry, cement industry, etc., whereas 'occupation' describes the exact function that an individual performs in that sector, *e.g.*, fitter, carpenter, accounts clerk, office peon, etc. Thus, occupation is eventually related to the nature of function or duties performed, while industry is related to the kind of product(s) manufactured or service(s) performed.

The Census Industrial Category was derived from Questions 8, 9 and 10 of the Individual Slip for such persons as returned their principal work under any of these questions. For the remaining persons, who returned their principal work under Question 11, the information contained in part (b) of the question provided the basis for classification into Industrial Category. Information regarding the actual occupa-

tions of the person engaged in any industry was elicited under Questions 10(a) and 11(a). The instructions relating to these questions have been reproduced earlier.

The distinction between the occupation of a person and the industry in which he is working may be brought out further by citing a few illustrative examples. A doctor or a civil engineer, or an accounts clerk or an unskilled labourer may be working in a steel factory or a paper mill. The industrial classification of such persons, viz., doctor, engineer, clerk, or labourer working in a steel

factory will be the Industrial Category relating to production of steel. However, so far as the occupational classification is concerned, the doctor, engineer or clerk is classified differently according to the occupation he actually follows.

In the sorting and tabulation stage, the slips for each Industrial Category were separated first and subsequently classified by occupation. In a few cases misclassification in the Industrial Category *vis-a-vis* the Occupational Family become apparent. Such cases are listed below, the appropriate Industrial Categories also being shown therein :

9	Service, sports and recreation workers.	9.70	8.50	13.20
X	Workers not classifiable by occupation.	1.08	1.03	1.21

The occupational Division 7-8 (Craftsmen, Production Process Workers and Labourers not elsewhere classified) preponderates both in rural and urban areas. This group accounts for 48.70 per cent of non-agricultural workers in rural areas and 38.99 per cent in urban areas. For all areas also, this Occupational Division has the highest percentage (46.21). Casual labourers in rural areas and daily wage labourers in urban areas seem to explain the high percentages in this Division. This Division is followed by the Occupational Division 4 (Farmers, fishermen, hunters, loggers and related workers) which accounts for 12.38 per cent of

workers. It may be noted that workers in cultivation are excluded from this Division. The number of workers in this Division in rural areas is actually about 15 times larger than in urban areas. In rural areas, 1 out of every 6 non-agricultural workers belongs to this Occupational Division. The Occupational Division 3 (Sales workers) comprises 11.41 per cent of the non-agricultural workers and ranks third. Their percentage in urban areas is naturally higher than in rural areas. Division 9 (Service, sports and recreation workers) follows with 9.70 per cent of non-agricultural workers.

The distribution of non-agricultural workers amongst Occupational Divisions in rural and total areas is more or less similar. As 91.57 per cent of the population is rural, the distribution in rural areas influences the percentages in all areas. In urban areas, the Occupational Division 7-8 is followed by Division 3 (Sales workers), Division 9 (Service, sports

and recreation workers) and Division 2 (Clerical and related workers) in the same order.

The following statement gives the distribution of workers (Industrial Categories III-IX) in each Division of the National Classification of Occupations in rural and urban areas :

X Workers not classifiable by occupation.	34,258 (71.19)	13,801 (28.81)

Only 8.43 per cent of the population in the State is urban. Bearing this in mind, the large concentration in urban areas of sales, clerical and administrative workers as also those in transport and communication occupations becomes evident.

ANNEXURE TO TABLE B-V

NATIONAL CLASSIFICATION OF OCCUPATIONS

(CODE STRUCTURE)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

NOTE: I The Classification does not provide separate code numbers for *Apprentices, Foremen and Instructors* (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C", respectively before the code number of the occupation which is being learned, supervised or instructed.

NOTE: II n.e.c.—not elsewhere classified.

DIVISIONS

- 0 Professional, Technical and Related Workers
- 1 Administrative, Executive and Managerial Workers
- 2 Clerical and Related Workers
- 3 Sales Workers
- 4 Farmers, Fishermen, Hunters, Loggers and Related Workers
- 5 Miners, Quarrymen and Related Workers
- 6 Workers in Transport and Communication Occupations
- 7-8 Craftsmen, Production Process Workers, and Labourers, elsewhere classified
- 9 Service, Sport and Recreation Workers
- X Workers not Classifiable by Occupation

DIVISIONS AND GROUPS

- 0 Professional, Technical and Related Workers
 - 00 Architects, Engineers and Surveyors
 - 01 Chemists, Physicists, Geologists and Other Physical Scientists
 - 02 Biologists, Veterinarians, Agronomists and Related Scientists
 - 03 Physicians, Surgeons and Dentists
 - 04 Nurses, Pharmacists and Other Medical and Health Technicians
 - 05 Teachers
 - 06 Jurists
 - 07 Social Scientists and Related Workers
 - 08 Artists, Writers and Related Workers
 - 09 Draughtsmen, and Science and Engineering Technicians, n.e.c.

TABLE B-VI—OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

FLYLEAF

Table B-VI has been prepared only for urban areas and up to the Division of the National Occupational Classification. It gives the occupational classification of literate workers in non-agricultural activities by sex, broad age-groups : 0—14, 15—34, 35—59 and 60+, and the following educational levels :

- (1) Primary or Junior Basic,
- (2) Matriculation or Higher Secondary,
- (3) Technical diploma not equal to degree,
- (4) Non-technical diploma not equal to degree,
- (5) University degree or post-graduate degree other than technical degree, and
- (6) Technical degree or diploma equal to degree or post-graduate degree :
 - Engineering
 - Medicine
 - Agriculture
 - Veterinary and dairying
 - Technology
 - Teaching
 - Others.

The test for literacy was ability to read and write a simple letter. If a worker would both read and write and had also passed written examination or examinations as an educational standard attained, the highest examination passed was recorded in Question 6 of the Individual Slip which related to 'literacy and education'. The classification by educational levels in the table is based on the return in Question 6 of the Individual Slip, which indicates the educational level actually attained by the worker.

A description of each Division of the National Classification of Occupations is given below :

- 0 Professional, Technical and Related Workers.
- 1 Administrative, Executive and Managerial Workers.
- 2 Clerical and Related Workers.
- 3 Sales Workers.
- 4 Farmers, Fishermen, Hunters, Loggers and Related Workers.
- 5 Miners, Quarrymen and Related Workers.
- 6 Workers in Transport and Communication Occupations.

7-8 Craftsmen, Production Process Workers, and Labourers, not elsewhere classified.

9 Service, Sport and Recreation Workers.

X Workers not Classifiable by Occupation.

For comparison, figures of total workers, i.e., literate plus illiterate workers, have been given in columns 3—5. These figures for each Division of the N. C. O. have been brought forward from Table B-V. The classification of total workers into broad age-groups has been given only for all Divisions, as the figures are available from Table B-I [vide Census of India, 1961 Volume IV, Part II-B(i)]. Figures of total workers under each Division classified into broad age-groups have not been given as such data were not tabulated.

Occupational Division 4 in this table excludes occupational families 400, 401 and 414 as these families relate to Cultivators and Agricultural labourers while this Table presents figures for persons at work other than in Cultivation.

The following statement gives the percentage of literate and educated workers to total workers in each Division of the National Classification of Occupations:

TABLE B-VI—OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

FLYLEAF

Table B-VI has been prepared only for urban areas and up to the Division of the National Occupational Classification. It gives the occupational classification of literate workers in non-agricultural activities by sex, broad age-groups : 0—14, 15—34, 35—59 and 60+, and the following educational levels :

- (1) Primary or Junior Basic,
- (2) Matriculation or Higher Secondary,
- (3) Technical diploma not equal to degree,
- (4) Non-technical diploma not equal to degree,
- (5) University degree or post-graduate degree other than technical degree, and
- (6) Technical degree or diploma equal to degree or post-graduate degree :
Engineering
Medicine
Agriculture
Veterinary and dairying
Technology
Teaching
Others.

The test for literacy was ability to read and write a simple letter. If a worker would both read and write and had also passed written examination or examinations as an educational standard attained, the highest examination passed was recorded in Question 6 of the Individual Slip which related to 'literacy and education'. The classification by educational levels in the table is based on the return in Question 6 of the Individual Slip, which indicates the educational level actually attained by the worker.

A description of each Division of the National Classification of Occupations is given below :

- 0 Professional, Technical and Related Workers.
- 1 Administrative, Executive and Managerial Workers.
- 2 Clerical and Related Workers.
- 3 Sales Workers.
- 4 Farmers, Fishermen, Hunters, Loggers and Related Workers.
- 5 Miners, Quarrymen and Related Workers.
- 6 Workers in Transport and Communication Occupations.

- 7-8 Craftsmen, Production Process Workers, and Labourers, not elsewhere classified.
- 9 Service, Sport and Recreation Workers.
- X Workers not Classifiable by Occupation.

For comparison, figures of total workers, i.e., literate plus illiterate workers, have been given in columns 3—5. These figures for each Division of the N. C. O. have been brought forward from Table B-V. The classification of total workers into broad age-groups has been given only for all Divisions, as the figures are available from Table B-I [*vide* Census of India, 1961 Volume IV, Part II-B(i)]. Figures of total workers under each Division classified into broad age-groups have not been given as such data were not tabulated.

Occupational Division 4 in this table excludes occupational families 400, 401 and 414 as these families relate to Cultivators and Agricultural labourers while this Table presents figures for persons at work other than in Cultivation.

The following statement gives the percentage of literate and educated workers to total workers in each Division of the National Classification of Occupations:

Divisions 0, 1 and 2 have the highest literacy rates while those in Divisions 4 and 5 have the lowest. These call for no particular comments. The following statement gives the distribution of total literate workers by occupational Division and age-group:

The above figures indicate the proportional strength of literate workers, which hardly corresponds to the proportional strength of all workers in the various occupational Divisions. The impact of educational development is

apparent from the fact that more than half of the literate workers are in the age-group 15-34.

TABLE B-VIII

Part A—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *Urban Areas only*

Part B—Persons unemployed aged 15 and above by sex and educational levels in *Rural Areas only*

FLYLEAF

The non-working population has, for the first time, been classified into 8 categories according to the nature of activities returned. These are outlined in the flyleaf to Table B-IX which follows.

Table B-VIII is restricted to statistics of unemployed persons aged 15 and above, who comprise two categories of non-workers, *viz.*,

(i) those seeking employment for the first time, and

(ii) those employed before but now out of employment and seeking work.

The table is presented in two parts. Table B-VIII Part A relates to urban areas only and gives the classification of unemployed persons by sex, age-groups and educational levels. The broad age-groups are 15-19, 20-24, 25-34 and 35+. Persons seeking employment for the first time have been further categorised under the age-groups 25-29 and 30-34 while those employed before but now out of employment have also been categorised under the age-groups 35-44, 45-59 and 60+.

Educational levels are the same as those adopted in Table B-VI, and detailed in the flyleaf thereof.

Table B-VIII Part B is confined to rural areas. The statistics are given for the two kinds of unemployed persons classified by sex and broad educational levels, *viz.*, (a) Primary or Junior Basic, and (b) Matriculation and above. There is no classification by age-groups.

Proportion of unemployed persons to non-workers

The following statement gives the number of non-workers and unemployed persons aged 15 and above and the percentage of unemployed persons to total non-workers separately for persons, males and females as well as for total, rural and urban areas :

STATEMENT 1

	Persons	Males	Females
TOTAL			
Non-workers ..	9,109,297	1,297,825	7,901,472
Unemployed ..	69,469 (0.76)	66,246 (5.48)	3,223 (0.04)
RURAL			
Non-workers ..	8,014,505	952,246	7,062,259
Unemployed ..	40,530 (0.51)	38,549 (4.05)	1,981 (0.03)
URBAN			
Non-workers ..	1,094,792	255,579	839,213
Unemployed ..	28,939 (2.64)	27,697 (10.84)	1,242 (0.15)

NOTE : Figures under brackets give the percentages of unemployed persons to total non-workers aged 15 and above.

The total number of unemployed persons may appear to be surprisingly low—a mere 69,469 in a total population of over 46 millions. The reason for this will become evident if the basis of economic classification at the 1961 census is kept in mind. Thousands of people who are actually under-employed or surplus to the requirement of land would still have returned themselves as cultivators or agricultural labourers and got classed as ‘workers’, for the definition of what constitutes ‘work’ was rather generous. Even among non-workers a large number of unemployed persons would have come within the categories of full-time students, housewives, rent-receivers, etc. It is not without significance that the number of unemployed females is still smaller (3,223) and less than one-twentieth of the figure for males. The urban proportion of unemployed persons to total non-workers is also more than five times higher than in the rural proportion.

Distribution of unemployed persons by educational levels

The statement below gives the distribution

of unemployed persons aged 15 and above by educational levels, separately for total, rural and urban areas.

STATEMENT 2

Distribution of 1,000 Unemployed persons aged 15 and above by sex and by educational levels in Total, Rural and Urban areas

Matriculation and above	256	264	72	263	275	20	245	249	155

Literacy rate among the unemployed is rather high (73.6 per cent). This observation, however, does not hold good for the female unemployed. It may be noted that the rural and urban areas do not disclose much difference in literacy pattern among the unemployed. One out of every four unemployed persons is at least a matriculate.

The total number of unemployed females is so small that no significant conclusions can be made on their distribution per 1,000. A further break-up of the unemployed males in urban areas who have passed the Matriculation or higher examinations is given in the following statement :

Of the educated unemployed (matriculation and above) the largest share is that of matriculates. The graduates come next with a considerably lower proportion. In other categories the figures are almost insignificant. It is, however, somewhat revealing to find that engineering and medical graduates have a higher proportion of unemployed than other technical graduates. This is perhaps accounted for by the fact that the former have comparatively larger figures and there must always be some cases of temporary unemployment.

Distribution of unemployed persons by age-groups in urban areas

The following statement gives the distribution of unemployed persons in urban areas by age-groups :

STATEMENT 4

Distribution of 1,000 persons, males and females aged 15 and above who are unemployed in each age-group in urban areas of Bihar, 1961

The age-group 20-24 contains just about one-third of the total unemployed. The other two age-groups 15-19 and 25-34 comprise one-fourth each. These three age-groups taken together account for nearly 84 per cent of the total unemployed. Those seeking employment for the first time are far more numerous (63.1 per cent) than those employed before but now out of employment and seeking work.

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

FLYLEAF

This table also relates to the non-working population. Figures have been prepared separately for total, rural and urban population. A break-up of the information by sex and broad age-groups (0-14, 15-34, 35-59, and 60+) is also available in the table.

Definitions

Question 12 of the Individual Slip was captioned, "Activity if Not Working". Against it the activity of a person who was not 'working' was to be recorded. Non-workers were divided into eight categories depending on the nature of their activities. These categories, based on the recommendations of the United Nations, are indicated below:

- (1) Full time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time in their own family cultivation, industry, trade, or business.
- (2) Persons engaged in unpaid home duties (like housewives or other adult females) but doing no other work, such as making articles at home for sale or wages, nor helping regularly even part-time in family cultivation, industry, trade, or business.
- (3) Dependants, including infants or children not attending school, persons permanently disabled from work because of illness or old age.
- (4) Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work.
- (5) Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.
- (6) Convicts in jail (undertrial prisoners were treated as workers if they used to work before being apprehended) or inmates of penal, mental or charitable institutions.

- (7) Persons who had not been employed before but were seeking employment for the first time during enumeration.
- (8) Persons employed before but now out of employment and seeking employment at the time of enumeration.

If a person, who did not work, could not be readily classified in any of the above categories, he was put in category (5). A retired person, who had taken up regular work again, was not treated as a non-worker. A person, who was not working but had been offered work which he had not joined, was included in category (3).

Nature of returns: certain apparent anomalies explained

A larger number of "full time students" in the age-group 35-59 have been returned from Dhanarua, Bikram, Rajgir and Hiles Anchals of the Patna district, Nawada and Rajauli Anchals of the Gaya district, Murhu Anchal of the Shahabad district, Tundi Anchal of the Ranchi district, Golmuri Anchal of the Dhanbad district and among rural areas, and the Singhbhum district among rural areas, and the Patna Municipal Corporation, Gaya, Bodh Gaya, Arrah, Muzaffarpur, Monghyr, Bhagalpur, Katihar, and Ranchi towns among urban areas. This may appear to be somewhat incongruous. It is, however, possible that many of the persons so described were engaged in private studies or in adult literacy centres and did not qualify, for some reason or another, to be treated as workers.

In the Sherghati Anchal of Gaya district, Bhagwanpur Anchal of Shahabad district, Jalalpur Anchal of Saran district, Harlakhi Anchal of Darbhanga district, Mahishi Anchal of Saharsa district and Jokihat, Rupauli, Aiamnagar and Pranpur Anchals of Purnea district among rural areas and in Muzaffarpur city, a large number of males have been returned as engaged in 'household duties'. Though not very common, such returns are not altogether improbable because sometimes male members such as relatives of the head of the household or idlers or other persons with certain physical or mental deficiencies or incapacities are employed for doing household

uties such as feeding the cattle, making owdung cakes, *scalping*, cleaning utensils, rawing water and so on. A mere reading of the description of category (2) will reveal that the possibility of males being included in it was not altogether excluded.

In the rural areas of Purnea and Palamau districts, male student population in the age-group 0-14 is more than the literate population in the age-group 5-14. This may be so because of the fact that the student population includes persons who are in the first stage of Primary, Nursery and Kindergarten classes but have not qualified themselves to be treated as literates.

In the female figures relating to the districts of Patna (Rural and Urban), Gaya (Rural and Urban), Shahabad (Rural), Saran (Rural), Champaran (Rural), Muzaffarpur (Rural), Darbhanga (Rural), Monghyr (Rural), and

Bhagalpur (Rural), the student population in age-group 0-14 is less than the population of literates in the age-group 5-14. This may be explained by the possibility that schooling was given up after attaining literacy.

General distribution of non-workers

58.6 per cent of the population in Bihar consists of non-workers. In broad terms, it means that out of every five persons, as many as 3 are non-workers. Among males the proportion of non-workers is naturally less (44.4 per cent). The corresponding proportion for females is 72.9 per cent of the female population. As between rural and urban populations, 58 per cent of the former and 67 per cent of the latter are non-working. The statement below shows the distribution of non-workers by sex and type of activity in total, rural and urban areas:

The first three groups, viz., (i) Full time students, (ii) Persons engaged in household duties, and (iii) Dependants, infants and disabled, comprise 99.2 per cent of the non-working population. In rural areas these three groups have a slightly higher percentage (99.5) as against 97.2 per cent in urban areas. Among males, the group relating to dependants, infants, etc., accounts for nearly 71 per cent and full time students contribute another 27 per cent. Among females, the corresponding two groups are (i) Dependants, etc.,—52.6 per cent,

66.5 per cent of the non-workers fall in the age-group 0-14. Among males the percentage of non-workers in the age-group 0-14 is as high as 88.3. The corresponding proportion among females is only 53.2 per cent. This is so because the vast bulk of non-working females are housewives who generally belong to the age-group 15-59. In the remaining three age-groups, viz., 15-34, 35-59 and 60+, the percentage of female non-workers is less than that of males. This is explained by the fact that housewives occur in all these age-groups.

In the age-group 0-14 four out of every five non-workers belong to the category of dependants. The proportion of students is 1 in 4 among males; for females the figure is very low. In the next age-group 15-34, however, full-time students comprise the main bulk (69 per cent) among males while housewives do so (91 per cent) among females. The position does not change much for females even in the age-group 35-59, though male non-workers in this age-group or the last one are mostly dependants. Nearly two-third of the females in the age-group 60+ are dependants and a little over one-third housewives.
