P R E F A C E

The present volume contains the social and cultural tables compiled on the basis of the 1961 Census data. These are also known as the C-series tables. They are eight in number. In the Note that follows, an attempt has been made to describe the tables as well as the scheme of their presentation, and also explain the various terms and concepts used therein. Each table is preceded by a flyleaf containing further elucidation of relevant points.

A special feature lies in the Appendix to Table C-III which presents a number of Special Tables on Scientific and Technical Personnel. These are based on an ancillary enquiry conducted along with the 1961 Census enumeration. Though the coverage was not as adequate as it should have been, these tables have a significance of their own.

I am greatly indebted to Sri K. D. Ballal, I. A. S., Central Tabulation Officer, Office of the Registrar General, India, New Delhi and his staff for a careful and thorough checking of the tables, and to Sri R. C. Nigam, Linguist (in the same organisation) for having scrutinised the language tables and helped in rationalising the entries therein. My thanks are also due to the Mohan Press, Patna which undertook and accomplished the task of printing the volume in the face of great difficulties and severe handicaps.

NOTE

The Census of 1961 was taken between the 10th February and 28th February 1961, followed by a revisional round between the 1st and 5th March, 1961. The point of time with reference to which the data were collected was the sunrise of 1st March, 1961. The main results of this Census are being presented in a series called the 1961 Census Publications (described elsewhere). The present book—Part II-C—contains the C-series or the Social and Cultural tables.

C-series Tables

The following eight tables constitute the C-series:

C-I—Composition of sample households by relationship to head of family classified by size of land cultivated.

C-II—Age and Marital Status.

C-III Part A—Age, Sex and Education in all areas.

Part B—Age, Sex and Education in urban areas only.

Part C—Age, Sex and Education in rural areas only.

C-IV—Single year age returns.

C-V—Mother-tongue.

C-VI—Bilingualism.

C-VII—Religion.

C-VIII Part A—Classification by literacy and industrial category of workers and non-workers among Scheduled Castes.

Part B—Classification by literacy and industrial category of workers and non-workers among Scheduled Tribes.

Scheme of Presentation

The tables have been presented for 22 units, viz., the State, 4 administrative divisions and 17 districts. The arrangement of the units is uniform and based upon the code numbers allotted to the districts at the time of Census.

Each table is preceded by a flyleaf which indicates the lay-out and method of presentation of the table. The flyleaf also elaborates the concepts and

definitions on which the table has been prepared. It gives in some cases proportional figures highlighting the statistical tables.

Mode of Preparation

Table C-I has been prepared from the Household Schedule and the Census Population Record (on the reverse of the Household Schedule) on the basis of a 20 per cent sample. However, the entries in the Census Population Record were based upon details collected in the Individual Slip. The remaining tables of this series have all been prepared on the basis of information collected in the Individual Slip. The Household Schedule, the Census Population Record and the Individual Slip (reproduced in the annexures I, II and III to this Note) were filled in at the time of actual enumeration during the period indicated in the opening paragraph.

Relevant questions and instructions to enumerators

Out of 13 main questions contained in the Individual Slip, Question 1(b) pertained to the relationship of the person enumerated to the head of the household. This information has been used in the preparation of Table C-I. Informations collected under Questions 2, 3, 5(b), 5(c), 6, 7(a) and 7(b) have been utilised in preparing the remaining tables presented in this volume. The Census enumerators were required to fill up answer to these questions according to certain instructions issued to them. The instructions relating to the filling up of questions of the Individual Slip are reproduced below :

“Q. 1(b) Relationship to the Head of the household—

In the case of the Head of the household write ‘Head’. The person who should be treated as the ‘Head of the Household’ has been fully explained in part A. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother’s or sister’s son or daughter (for nephew or niece) or father’s or mother’s brother (uncle). ‘Son’ will include

ANNEXURE II

PART II—CENSUS POPULATION RECORD
(To be compiled from individual Census Slips)

[illegible]

Dated Signature of Supervisor

Dated Signature of Enumerator

'adopted son' or 'step son'; similarly for daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

Q. 2 Age in completed years last birthday—

Write age in years completed last birthday. For infants below one year of age, write '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital Status—

For Never Married	..	write	NM
Married	..	write	M
Widowed	..	write	W
Separated or Divorced	..	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 5 (b) Religion—

For Hindu	..	write	H
Muslim	..	write	M
Christian	..	write	C
Jain	..	write	J
Buddhist	..	write	B
Sikh	..	write	S

For others write the answers actually returned.

Q. 5 (c) Scheduled Castes & Scheduled Tribes—

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 Literacy & Education—

I. Illiterate or Literate—

For a person

1. who can neither read nor write or can merely read but cannot write in any language write O
2. who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript, i. e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be

taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education—

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L.

Q. 7 (a) Mother Tongue—

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7 (b) Any other language(s)—

After recording the mother tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) reported by him against this question. In case he does not know any other language put 'X'.

Rural and urban classification

For the 1961 Census, a town included all places having a municipality, notified area, cantonment or civil lines. Certain other places were also treated as towns if they had (a) a population of not less than 5,000, (b) density not less than 1,000 person per sq. mile, and (c) at least 3/4th of the adult male population engaged in non-agricultural livelihood. A complete list of places treated as towns in 1961 can be seen in Table A-IV given in Part II-A (General Population Tables) volume of the 1961 Census Publications for Bihar. All places, which were not urban, were treated as rural.

Subsidiary Tables

A number of subsidiary tables have been prepared to highlight and summarise the salient features of the main tables. These are presented in

Part I-C of the 1961 Census Publications for Bihar. The subsidiary tables to C-series are—

C-I. 1—Family Composition of 1,000 sample households/Total/Rural/Urban Population.

C-II. 1—Distribution of 1,000 persons of each sex by marital status.

C-II. 2—Marital status of 1,000 persons of each sex in General Population and comparison with previous censuses.

C-II. 3—Distribution of 1,000 married persons by age-groups in each sex and comparison with previous censuses.

C-III Part I. 1—Distribution of 1,000 persons in each age-group and sex by educational levels in urban areas only.

C-III Part C. 1—Distribution of 1,000 persons in each age-group and sex by educational levels in rural areas only.

C-IV. 1—Females per 1,000 males by age-group and comparison with 1951 Census.

C-IV. 2—Distribution of 1,000 persons of each sex by age-group and comparison with 1951 Census.

C-V. 1—Distribution of 1,000 persons by mother-tongue.

C-VII. 1—Distribution of 1,000 persons by religion.

C-VIII Part A. 1—Distribution of 1,000 persons of all scheduled castes by sex and literacy.

C-VIII Part A. 2—Distribution of 1,000 persons of all scheduled castes by categories of workers and non-workers.

C-VIII Part B. 1—Distribution of 1,000 persons of all scheduled tribes by sex and literacy.

C-VIII Part B. 2—Distribution of 1,000 persons of all scheduled tribes by categories of workers and non-workers.

**TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD
OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED**

FLYLEAF

This table has been prepared on a twenty per cent sample from the Household Schedules. It gives the composition of the members in a Household, separately for total, rural and urban population. Households have been divided into three categories, viz., (a) Households engaged neither in Cultivation nor in Household industry, (b) Households engaged in Household industry only, and (c) Households engaged in Cultivation. The data relating to category (c) have been classified further into ten groups by the size of holding. Family and non-family members of the household are separated. Among the family members Heads of households and their spouses are given. Both can be males or females. Married sons and other married relations are also given separately by sex. The other relations—never married, widowed, divorced or separated—are given separately.

By definition, a 'Census Household' is not the same as a 'Family'. A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a

common mess unless the exigencies of work prevent them from doing so. A *family* is a group of persons bound together by some sort of relationship either by birth or by marriage. They may not all be living together or eating from a common mess. Thus, a household includes persons who may not be members of the family but were residing with the family during the census period. However, in most households the majority of the members are related to one another, and outsiders are either few in number or altogether non-existent. The table is of great sociological interest indicating the strength of the joint family system.

This table resembles, to a limited extent, Table C-I of 1951 which was prepared on a 0.1 per cent sample of households. In 1951, however, the data relating to the family composition of households were not classified by the nature of household or size of holding. Table C-I of 1951, however, furnished data relating to the size of households which information is contained this time in Table B-XVII [*vide* Part III(ii), Vol. IV, Census of India, 1961].

TABLE C-II—AGE AND MARITAL STATUS

FLYLEAF

This has been prepared separately for total, rural and urban population. It gives information about marital status by sex and quinquennial age-groups. Marital status has been shown under four heads, viz., (i) Never married, (ii) Married (with a living spouse), (iii) Widowed (married with spouse deceased), and (iv) Divorced or separated.

Concepts and Definitions

A person married, whether for the first or another time, has been treated as 'married'. So are persons recognised by custom or society as married, and persons in stable *de facto* union. Even if a marriage was disputed in the locality, the entry was made as 'married' if the person concerned said that he or she was married or in stable *de facto* union.

A 'widowed' person is one whose husband or wife is dead, and who has not married again.

The last category relates to a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not re-married, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again. The marital status of a prostitute was entered as returned by her.

At the stage of sorting, a general decision was taken on all-India basis to treat all persons in

the age-group 0—9 as 'Never married' irrespective of the actual entries in the individual slips relating to them.

'Age' means number of completed years on the 1st March, 1961.

Previous Censuses

This table corresponds to Table C-III of 1951 (prepared on 10 per cent sample), Table VII of 1941 (prepared on 2 per cent sample for certain selected Subdivisions), and Table VII of 1931, 1921, 1911 and 1901 Censuses, all on full count. Upto 1941, no separate classification of 'divorced or separated' persons was done. In 1951 also, widowed and divorced persons were clubbed together in the main table, but separate figures were given in respect of divorced persons in the flyleaf. In this Census for the first time, figures on full count are being presented separately for widowed and 'divorced or separated' persons.

Data relating to age and marital status for Scheduled Castes and Scheduled Tribes are being presented separately in Table SCT-II (*vide* Part V-A, Vol. IV, Census of India, 1961).

Age and Marital Status

The following statement gives the percentages of age-groups in different marital status separately for total, rural and urban population.

TABLE C-III—AGE, SEX AND EDUCATION

This table has been prepared in three parts. Part A relates to all areas, Part B to urban areas only and Part C to rural areas only. The table furnishes information about literacy and education in different age-groups separately for males and females. The age-groups are five-yearly up to 34, one group from 35-44, another from 45-59 and still another for 60+. All the three parts give figures separately for illiterates and literates (without educational levels). For literates (with educational levels), the classification for all areas and rural areas is limited to two categories, viz., (i) Primary or Junior Basic, and (ii) Matriculation and above. A more detailed classification has, however, been adopted for urban areas, where separate figures are presented for (i) Primary or Junior Basic, (ii) Matriculation or Higher Secondary, (iii) Technical diploma not equal to degree, (iv) Non-technical diploma not equal to degree, (v) University degree or post-graduate degree other than technical degree, and (vi) Technical degree or diploma equal to degree or post-graduate degree in (a) Engineering, (b) Medicine, (c) Agriculture, (d) Veterinary and dairying, (e) Technology, (f) Teaching and (g) Others.

In Table C-III Part B in the age-group 10-14, 1 male has been returned under the educational level 'Non-technical diploma not equal to degree' in Saran district (Urban) and 1 male under the educational level 'Technical diploma not equal to degree' in Darbhanga district (Urban). In both these cases,

it seems that there has been an under-statement or mis-statement of age-returns.

Concepts and Definitions

Illiterate—A person who can neither read nor write or can merely read but cannot write in any language is 'illiterate'.

Literate—A person who can both read and write is 'literate'. The test for reading is ability to read any simple letter either in print or in manuscript, i. e., if the person can read one of the examples in the 'Enumerator's Handbook' with felicity he may be taken to have passed the test of reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

Age—'Age' means number of completed years on the sun rise of 1st March, 1961.

Educational levels—If a person could both read and write and had also passed a written examination or examinations as proof of an educational level attained, the highest examination passed by him was noted in the Individual Slip instead of mere 'literate'. A large variety of entries relating to educational levels were found in the Individual Slips. These had to be fitted in against the broad educational levels adopted for the preparation of this table. The statement below shows the equivalence of certain Diplomas or Degrees with examinations of recognised Universities.

Previous Censuses

This table corresponds in part to Table C-IV of 1951 (based on 10 per cent sample), Table XI of 1941 (based on 2 per cent sample in 14 selected subdivisions only), Table XIII of 1931, and Table VIII of 1921, 1911 and 1901. The table at this Census has, however, been prepared on the full count. The information about educational levels

is also in greater detail, and the age-groups are smaller.

Summary of data

The following table gives the distribution of 100 persons in each of the age-groups 5—14, 15—34, 35—59, 60+ and the total population (aged 5 years and above) and sex by literacy and educational levels for the State as a whole.

APPENDIX TO TABLE C-III- SPECIAL ENUMERATION OF SCIENTIFIC AND TECHNICAL PERSONNEL

NOTE

A special enumeration of technically qualified persons was attempted along with the population census of 1961. This was done on a recommendation of the Council of Scientific and Industrial Research. The main idea was to obtain detailed information about persons having qualifications in science and technology. The agency employed for this work was precisely the same as the one used for

the census enumeration.

A special enumeration card was designed for this purpose. It was in the form of a business reply card to be filled in separately for every person with a recognised Degree or Diploma in Science, Engineering, Technology or Medicine. A facsimile of the obverse and reverse of the card is given below:

Area of the operation

In Bihar, the special enumeration of technically qualified persons was conducted in all urban areas, all headquarters of Community Development Blocks, and selected rural areas. It was felt that in most rural areas, there would be a mere sprinkling of technically qualified persons here and there. For this reason, an enquiry of the proposed nature could be hardly worth the trouble. The cards were received rather late (towards the end of December, 1960) and it was feared that if the entire rural area was to be covered, there might be confusion and dislocation of the arrangements. In rural areas, therefore, only a few places likely to have some concentration of technically qualified personnel were selected in consultation with the District Officers. A district-wise list of the selected places is given below:

Distribution of cards

Special cards were sent to the Subdivisional Officers through the District Census Officers, with the Census Circular No. 38 (En-125/60/51), dated 6th January 1961, at the rate of 20 for each enumerator in urban areas, 20 for each C. D. Block or Anchal, and 20 for each selected rural area. The Charge Superintendents were specially enjoined to fill in the Code Number of the State (III for Bihar) before distributing the cards to enumerators. The enumerators were similarly required to write the location code of the household before leaving a card with any person qualified to fill it.

in technical cards received from Bihar. The table headings are indicated below:

- I Classification by each branch and sub-branch of Science or Technology.
- II Type of activity and marital status of persons in each branch of Science or Technology.
- III Year of obtaining Post-graduate Degrees in Physical Sciences and Graduate and Doctorate Degrees in Engineering and Technology and in selected branches of Medicine.
- IV Persons holding Degrees in Engineering, Technology and selected branches of Medicine

- V Nature and sector of employment of persons in each branch of Science or Technology.
- VI Total monthly income of persons employed in each branch of Science or Technology.
- VII Tenure and sector of employment of persons in each branch of Science or Technology.
- VIII Age and period of unemployment of unemployed persons qualified in each branch of Science or Technology.

Instructions to Enumerators

The following is an English rendering of the instructions, originally in Hindi, given to enumerators for this purpose :

A special enumeration of persons holding Degrees or Diplomas in scientific and technical subjects will be conducted in each town, Block headquarters and selected rural areas in Bihar. The enumerators in these areas will be supplied special enumeration cards for this purpose. The Charge Superintendent is required to get the Roman numeral III signifying the code number of Bihar State written on the right hand top corner of each card before supplying it to the enumerator. Every enumerator will be visiting each household in his block at least once during the period of enumeration between the 10th February and 28th February, 1961 when he will fill up an individual slip in respect of each member of the household. While doing so, he will naturally collect information about the educational attainment of each person in reply to Question 6 (Literacy and Education) of the Individual Slip. If the enumerator finds that any person in the household possesses scientific or technical qualification as detailed below, he will leave a technical card for each such person with him or the head of that household, with the request that the person concerned should fill up the card. Before handing over the card, the enumerator will write the location code of the household within the rectangle provided for this purpose. The entries against all other columns of the card will be made by the individual concerned. Such individuals will return these cards to the enumerator during his revisional round between the 1st March and 5th March, 1961. The enumerator will collect these filled in cards and make them over to his supervisor who, in his turn, will deposit them with the Charge Superintendent along with other papers.

No person should be compelled to fill in the technical card. If necessary, the enumerator should explain that the information called for in the technical card will provide essential details about scientific and technical personnel in the country, which information is required for plan-

ned development. If, in the revisional round, the enumerator finds that the card has not been filled in, the individual concerned should be requested to fill and mail it direct to the Registrar General, India, New Delhi, for which no postage will be necessary.

The qualifications of those for whom the cards may be distributed are as follows:

1. *Science*—Anybody holding B. A. or B. Sc., M. A. or M.Sc., or higher degrees (Ph. D., etc.) in Science subjects like Physics, Chemistry, Mathematics, Agriculture, Geology, Geo-Physics, Geography, etc.

2. *Engineering*—Anyone holding recognised Degree or Diploma in Engineering.

3. *Technology*—Anyone holding Degree or Diploma in technical subjects like Chemical Technology, Leather Technology, Textile Technology, Glass and Ceramic Technology, Food Technology, etc.

4. *Medicine*—Persons holding Degree or Diploma in Medicine and/or Surgery.

Thus, under-graduate scientists (i.e., those who have not got any Bachelor's Degree) or mechanics and technicians, even though holding certificates will not come under the enumeration.

Any person who has only passed I. Sc. and is, reading in B. Sc. will not be given a card. Persons holding Degrees or Diplomas in veterinary and Animal Husbandry will be given cards.

Response and coverage

The total number of cards sent out to the Charge Superintendents all over the State was 138,864, out of which 124,157 cards were actually given to enumerators. The actual number of cards collected by the enumerators in their revisional round was, however, 4,840 only. These were received by the eight Regional Tabulation offices set up for the compilation of the 1961 Census data. The cards thus received were eventually sent to the Registrar General, India, New Delhi for further processing. A districtwise break-up of the cards received and sent to the Registrar General, India is given on the next page.

16. Dhanbad	64	396	460
17. Singhbhum	141	142	283
Total	2,600	2,240	4,840

At first it was thought that most of the qualified respondents had not taken care to fill in their cards by the time of the revisional round and had, therefore, preferred to exercise the option of despatching them by mail. The number of cards actually received by the Registrar General direct from the respondents in Bihar, however, belied this expectation as it was only 6,164. Though this was considerably more than the number of cards collected by the enumerators, the two taken together (11,004) did not constitute even one-tenth of the cards distributed to the enumerators. A reference was, of course, received from the Registrar General, India saying that a large number of cards received in his office by post did not bear the State location code, making their identification difficult. This showed that the instruction about the filling in of the State Code number on the cards before giving them to the enumerators had not been observed in many cases and might have resulted in some cards relating to Bihar going unidentified. Even so, the total number of cards actually received back is so disappointingly small in comparison to the total number distributed that there can be little doubt that the enquiry failed in the main to achieve full coverage. In retrospect, it may be worthwhile mentioning the reasons why this enquiry misfired. Firstly, the finalisation of the card design

and its distribution to the field staff was considerably delayed with the result that adequate emphasis could not be given on this part of the work during the several training classes that were held at the 1961 census for the enumerators and other staff. Secondly, not enough care was taken to see that the cards left by the enumerators with the individuals during the initial round were actually returned to them during the revisional round. For this, a part of the blame lies at the door of the option left with the respondents to mail the cards direct to the Registrar General's Office. This provided an easy excuse to the enumerators for forgetting all about collecting the cards and no action could be taken against them for their failure. And, lastly, the absence of an element of compulsion (as is present in the case of census questionnaires) on the respondent to fill in the card and deliver it to the enumerator resulted in a certain amount of laxity on both sides. Notwithstanding these limitations and inadequacies, the data thrown up by this enquiry are quite interesting and revealing in their own way. It has, therefore, been considered desirable to present them for whatever worth they are.

TABLE C-V—MOTHER-TONGUE

FLYLEAF

This table shows the language and dialects returned as mother-tongue and their speakers classified by sex. Figures have been presented separately for Total, Rural and Urban population for Bihar State and for Total population only for lower units.

The table corresponds to Table DI (i) of 1951, Table XII (i) of 1941 (Sample Table for State), Table XV Part I of 1931, Table X of 1921, Table X of 1911 and Table X of 1901.

Definition

Question 7 (a) of the Individual Slip was related to mother-tongue. The instructions to enu-

merators in regard to this question read as under : "Write the mother-tongue in full including dialect as returned by the person enumerated. Mother-tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deafmutes give the language usually spoken by the mother".

Notes 1—5 below have been prepared by Sri R. C. Nigam, Linguist, Office of the Registrar General, India. These will elucidate the mother-tongues returned.

Note—1

(i) The following mother-tongues arranged in alphabetical order in Col. 1 of the table given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother-tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother-tongue of Col. 1 then it would mean that the name refers to either old or middle Indo Aryan Language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother-tongue is either a dialect or another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no Classification No. in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother-tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spelling according to the Linguistic Survey of India has been given against each mother-tongue of Col. 1. Diacritical marks have, however, been omitted due to difficulty in printing.

Note: (1) X—Indicates that total population of all languages, if derived, would be slightly less than the population given in table A-II of 1961, because adjustment of minor portions has not been done. Calculations are based on actual population and not on A-II population.

(2) XX—Indicates that total population of all languages, if derived, would be slightly more than the population given in table A-II of 1961. The reasons are the same as are given above.

(3) *—Includes dialects.

(4) @—Includes Urdu also.

TABLE C-VI
BILINGUALISM

TABLE C-VI—BILINGUALISM

FLY LEAF

This table shows the number of speakers classified by sex speaking a language or dialect subsidiary to their mother-tongue. The mother-tongue/mother-tongues, speakers of which do not speak any subsidiary language in any part of the State, have been excluded from this Table. Columns 2 & 3 give the male and female population having a particular language or dialect as mother-tongue and cols. 4 & 5 give the male and female population speaking a language or dialect subsidiary to that mother-tongue. Col. 6 gives the details of the subsidiary languages and their speakers classified by sex. The table has been prepared for total population only. Mother-tongues have been presented in alphabetical order and subsidiary languages in descending order of the number of speakers.

If the speakers of a mother-tongue speak subsidiary language at the State level, the mother-tongue has been shown in all the lower units of territory irrespective of the fact whether the speakers of that mother-tongue are bilingual or not in those units. In the case of respondents who spoke and understood more than one language in addition to their mother-tongues, two languages were recorded by the enumerators but for the purpose of tabulation only the first recorded return was taken into account. The bilingual statistics in this table are, therefore, based on the first recorded return.

This table corresponds to Table D-I(ii) of 1951 and Table XII(ii) (prepared on 2 percent sample from selected Subdivisions) of 1941 and Table XV, Part II of 1931.

Concept

The information relating to bilingualism was obtained through Question 7(b) of the Individual slip, which read as "Any other language (s)". The instructions to enumerators about filling up this question were as under :

—"After recording the mother-tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) reported by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his

mother-tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language."

In accordance with the general instructions quoted above, it was elaborated at the enumeration stage that if, for example, Hindi or Bhojpuri was returned as mother-tongue under Q. 7(a), Magahi or Maithili should not be recorded as subsidiary language under Q. 7(b), because Bhojpuri, Magahi and Maithili were but local forms of Hindi. These instructions were based on the groupings of 1951 language returns for the State. Notwithstanding these instructions and elaborations, a few enumerators unwittingly recorded dialects or main languages of the mother-tongues returned in Q. 7(a) as subsidiary languages in Q. 7(b). It was of course possible to rectify these errors at the tabulation stage, but that was not considered to be proper. So it was decided that all such entries should be tabulated in Table C-VI as returned. Thus, it will be found that persons having Bhojpuri or Maithili as their mother-tongue have returned Hindi as their subsidiary language, and so on. But the small number of such returns clearly indicates that the instruction given earlier at the stage of enumeration were generally followed by most of the enumerators. This fact also explains the small number of such returns. It also needs to be stated that such returns hardly signify anything more than what has been explained above; for, it is common knowledge that there is hardly a Maithili, Magahi or Bhojpuri speaker who cannot speak and understand simple Hindi, and would consequently be justified in returning Hindi as his subsidiary language but for the restriction supposed to have been imposed by the enumeration instruction discussed above.

Even with reference to the classification of mother-tongues as given in Table C-V (mainly based on Grierson's Classification) it is observed that some of the subsidiary languages in Table C-VI are but dialects or other forms of the mother-tongues. The statement overleaf gives the languages and dialects involved and the actual returns against the specified mother-tongues and subsidiary languages.

TABLE C-VII—RELIGION
FLYLEAF

This table gives the distribution of population according to religion. It has been prepared separately for total, rural and urban population. Separate figures have been given for the followers of the six main religions of India, viz., Hindus, Muslims, Christians, Sikhs, Jains and Buddhists. Others have been shown collectively under "Other religions and persuasions". The details of figures under this head have been given in the Supplement to the table.

The figures for the following religions have been merged with those under 'Hindus' in the main table.

Previous Censuses

This table corresponds to Table D-II of 1951, Table XIII of 1941, Table XVI of 1931, and Table VI of 1921, 1911, and 1901. In Censuses before 1951 it was the practice to show the distribution of population by religion down to the smallest unit

but since the last Census this practice has been discontinued.

TABLE C-VIII—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS AMONG SCHEDULED CASTES AND SCHEDULED TRIBES

323

FLY LEAF

This table consists of two parts. Part A relates to Scheduled Castes and Part B to Scheduled Tribes. It has been prepared separately for total, rural and urban population. It gives sex-wise the total population of Scheduled Castes and Scheduled Tribes (cols. 3-5), their distribution by literacy (cols. 6-9), and classification of workers into different industrial categories (cols. 10-25) and the total number of non-workers (cols. 30-31). Workers have been classified into the following nine categories of economic activity:

- I As cultivator.
- II As Agricultural labourer.
- III In Mining, Quarrying, Live Stock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
- IV At Household Industry.
- V In Manufacturing other than Household Industry.
- VI In Construction.
- VII In Trade & Commerce.
- VIII In Transport, Storage & Communications.
- IX In Other Services.

Concepts and Definitions

Worker—A 'worker' is a person who participates in the production of economic goods or services either for consumption or for sale or for exchange. The following extract from the instructions to enumerators appears to be relevant in this connection:

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unem-

ployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. *Work includes not only actual work but off-duty preparation and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or milking cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work she should be treated as worker.

Persons like beggars, pensioners, agricultural, or non-agricultural, royalty, rent or dividend receiver, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce."

Scheduled Castes and Scheduled Tribes—Under Articles 341 (1) and 342 (1) of the Constitution of India the President is empowered to specify, by public notification, the Castes or Tribes which will be Scheduled in any area. According to the Government of India, Ministry of Home Affairs Notification No. SRO—2177A, dated the 29th October 1956, issued under these provisions, the following Castes and Tribes were treated as Scheduled Castes and Scheduled Tribes in the State of Bihar at the 1961 Census:

Scheduled Castes (I) Throughout the State	Scheduled Tribes (I) Throughout the State
1. Bantar	1. Asur
2. Pauri	2. Baiga
3. Bhogta	3. Banjara
4. Chamar or Mochi	4. Bathudi
5. Chaupal	5. Bedia
6. Tabgar	6. Binjhia
7. Dhobi	7. Birhor
8. Dom or Dhangad	8. Birjia
9. Dusadh, including Dharl or Dharhi	9. Chero
10. Ghasi	10. Chik Baraik
11. Halalkhor	11. Gond
12. Hari, Mehtar or Bhangi	12. Gorait
13. Kanjar	13. Ho
14. Kurariar	14. Karmali
15. Lalbegi	15. Kharla
16. Musahar	16. Kharwar
17. Nat	17. Khond
18. Pan or Sawasi	18. Kisan
19. Pasi	19. Kora
20. Rajwar	20. Korwa
21. Turi	21. Lohara or Lohra
	22. Mahli
	23. Mal Paharia
	24. Munda

Scheduled Castes (II) In Patna and Tirhut Divisions, and the districts of Monghyr, Bhagalpur, Purnea and Palamau-Bhumij	Scheduled Tribes (II) In the districts of Ranchi, Singhbhum, Hazaribagh, Santal Parganas and Dhanbad Bhumij
	25. Oraon
	26. Parhaiya
	27. Santal
	28. Sauria Paharia
	29. Savar.

During the sorting of individual slips it was found that a number of slips had entries such as 'Harijan', 'Adivasi', 'Scheduled Caste', 'Scheduled Tribe'. The specific name of the Caste or Tribe to which the person belonged was not mentioned. All such slips were treated as those of Scheduled Castes or Scheduled Tribes under the heading 'Caste or Tribe unclassified'.

The classification of each individual Scheduled Caste or Scheduled Tribe by industrial categories of workers (nine categories of economic activities) and non-workers is given in Table SCT I which is being printed in Part V—A of Vol. IV, Census of India, 1961 publications relating to Bihar.
