CENSUS ZONES CONSTITUTING STATES, UNION TERRITORIES AND OTHER AREAS

The following zones differ from those politically constituted under the States Re-organisation Act of 1956 and the Bombay Re-organisation Act of 1960 in as much as North-East Frontier Agency, Nagaland, Sikkim, Dadra and Nagar Haveli, Pondicherry, Laccadive, Minicoy and Amindivi Islands, Andaman and Nicobar Islands and Goa, Daman and Diu have not yet been notified under any of them. For convenience of regional study these territories have been informally included in the various zones as indicated below except Andaman and Nicobar Islands and Goa, Daman and Diu which have not been included in any of the zones :

Zone		State/Union Territory and Other Area
I	Northern Zone	Jammu and Kashmir
		Punjab
		Rajasthan
		Delhi
		Himachal Pradesh
II	Central Zone	Uttar Pradesh
		Madhya Pradesh
III	Eastern Zone	Bihar
		Orissa
		West Bengal
		Assam
		Manipur
		Tripura
		North-East Frontier Agency
		Nagaland
		SIKKIM
IV	Western Zone	Gujarat
		Maharashtra
		Dadra and Nagar Haveli
V	Southern Zone	Andhra Pradesh
		Mysore
		Kerala
		Madras
		Pondicherry
		Laccadive, Minicoy and Amindivi Islands
Areas which have not been included in any zone		Andaman and Nicobar Islands
		Goa, Daman and Diu

The figures for the five zones will not total to India as Andaman and Nicobar Islands and Goa, Daman and Diu have not been shown along with zones. These have only been shown at their proper places.

NOTE

With the concurrence of important users of census data both in Government and outside, the Census Commission decided to canvass a special Household Schedule, in addition to the usual Census Schedules for personal information. This Household Schedule was a unique experiment in the history of modern censuses for any country.

The *raison d'etre* of this Household Schedule was that in India where the bulk of the population lives in rural areas and agriculture is the occupation of 70% of the population and cultivation is conducted by members of a household, with, in many cases, household industry as a compulsive adjunct, the household itself, and not the individual, acts as an integral economic unit of production. This was felt to be particularly valid for those households which produce mainly for self-consumption and additionally for the market. This sector of the economy for various obvious reasons is the most resistant to displacement or transfer of population from what they are engaged in, because the population engaged in such activity finds that all of its effort, however, seasonal, is really wanted, and it is difficult to leave it in preference to any other. On the other hand it is not easy to bring work from elsewhere to this population to fill its period of unemployment or under-employment. Before one makes facile assumptions about marginal productivity of labour being negative it was thought worthwhile to investigate this sector with the help of such a schedule. A Household Schedule was, therefore, framed for this purpose which provided for area of land cultivated by a household on ownership, or on tenancy basis or on both and household industry, if any, conducted by the household and the number of family workers and hired workers employed in these activities.

Household industry for the purposes of 1961 Census was defined as "an industry conducted by the Head of the Household himself and/or mainly members of the household at home or within the village in rural areas and at home in urban areas."

The test for a household industry is mainly threefold *viz.*,

(*a*) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Household Industry should be on the household scale where the workers mainly will be the head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation by members is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where however, part of the work is done outside the house, *e. g.*, preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The Household Economic Tables (Tables B-X to B-XVII) based on the data collected in the Household Schedule have been published separately in Part III. The Household Schedule and the instructions have been reproduced in that part.

In the Household Schedule information was also collected on the various systems of land tenures existing in different States. It is proposed to compile these results and publish them in a separate volume, which again will be a unique and very comprehensive compendium of land rights all over the country.

The collection of data on the individual slip came in for reappraisal too. The main economic questions in the Censuses of 1891-1921 were related to livelihood or occupation or means of subsistence of each worker. In actual practice however, even persons who were not working but were receiving income from land, property etc. were considered as economically active. The concept of income was specifically introduced in 1931, 1941 and 1951. Thus in 1931 population was divided into three classes *viz.*, 'earner', 'working dependent' and 'non-working dependent'. An 'earner' was defined as a person with permanent and regular work for which return was obtained in cash or in kind which helped to augment the family income. A 'working dependent' was classified as a person who assisted in the work of the family and contributed to its support without actually earning any wages. In 1941 the classifications were 'wholly dependent', 'partly dependent' and 'others'. A person who had no income in cash or in kind was treated as

'wholly dependent' and one who contributed in cash or in kind towards the sustenance of the household without being definitely capable of supporting himself was classified as 'partly dependent'. In 1951 there was a further change and the classification was 'self-supporting person', 'earning dependent' and 'non-earning dependent'. A 'self-supporting person' was one who was in receipt of an income and that income was sufficient at least for his own maintenance. A person who earned income but which was not sufficient for his own maintenance was classified as an 'earning dependent'. It was felt that by the introduction of income persons who worked in family enterprises without wages in cash or in kind but who shared the profits were likely to be omitted. This was so especially in the case of families who partake in household cultivation. It was, therefore, decided as a result of exploratory conferences and pre-tests etc. in 1958 and 1959 that the economic data in 1961 should be collected on the basis of work *i. e.*, the population should be divided into two classes, 'workers' and 'non-workers'.

The following was adopted as the basis of work :

In the case of seasonal work like cultivation, livestock, dairying, household industry, etc. if a person had had some regular work of more than one hour a day throughout the greater part of the working season he was to be regarded as a 'worker'. In the case of regular employment in any trade, profession, service, business or commerce the basis for work would be satisfied if the person was employed during any of the fifteen days preceding the day on which he was enumerated. A person who was working but was absent from his work during the fifteen days preceding the day of enumeration due to illness or other causes was a worker. A person who was offered work but had not actually joined was treated as a non-worker.

A person under training as apprentice with or without stipend or wages was regarded as a 'worker'. An adult woman who was engaged in household duties but doing no other productive work to augment the family resources was treated as a 'non-worker'. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earned an income but did not participate in any productive work were not treated as 'workers' unless they also worked in cultivation, industry, trade, profession, business or commerce. A public or social service worker who was actively engaged in public service activity or a political worker who was actively engaged in furthering the political activity of his party was regarded as a 'worker'.

The following economic questions were asked in the 1961 Census in the order they are presented. All the four questions were to be compulsorily asked in respect of every human being in the order they are presented. It was only in the case of those to whom none of the questions 8 to 11 would apply that question 12 would be asked.

8 Working as Cultivator

9 Working as Agricultural Labourer

10 Working at Household Industry

12 Activity, if not working

A comparative chart of economic questions, concepts, definitions and instructions adopted in 1872-1961 Censuses of India is presented in Appendix I.

A person might be engaged in two or more kinds of work. For example, he might be cultivating a small holding and at the same time working as an agricultural labourer. In such cases, both or all the work he did were to be recorded. The principal work which would be the work, on which most time was spent, was to be recorded by putting a circle around the appropriate question number and the second one which would be the one on which next most time was spent by putting a tick against the appropriate question number. In the case of persons who were not working in cultivation either as a cultivator or as an agricultural labourer, both occupation and industry were required to be recorded. Part (a) of question 10 or 11 relates to occupation and part (b) to industry. Question 10 relates to Household Industry. The same definition of Household Industry as was applied in the case of Household Schedule was applied in this case also. In the case of Household Industry it was to be recorded in question 10(c) whether a person is employed in any other person's Household Industry or whether he is working in his own Household Industry. In the case of non-Household Industry etc., the following economic status was to be recorded *viz.*, employer, employee, family worker or single worker in question 11(c).

As regards non-workers the following activities were prescribed :

(1) A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.

(2) A person engaged in unpaid home duties (like house-wife or other adult female) who does no other work such as make articles at home for sale or, wages, nor help regularly even part-time in family cultivation industry, trade or business.

(3) Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.

(4) A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.

(5) A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.

(6) A convict in jail (an undertrial prisioner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.

(7) A person who has not been employed before but is seeking employment for the first time.

(8) A person employed before but now out of employment and seeking employment.

Nine General Economic Tables and four with more than one part each have been produced in the 1961 Census against 7 tables in all for 1951. At the outset the population of each village and enumerator's block of a town was divided into workers and non-workers and workers into the nine broad industrial categories given below :

(1) As cultivator

(2) As agricultural labourer

(3) In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities

(4) At household industry

(5) In manufacturing other than household industry

(6) In construction

(7) In trade and commerce

(8) In transport, storage and communications

(9) In other services

The Significance of these categories is given below :

Category I : This category covers both owner and tenant cultivators. Cultivation includes ploughing, sowing and harvesting *but* does *not* include fruit growing or keeping orchards or groves or working for plantation like coffee, tea, rubber, chinchona and other medical plantations. These activities are either covered in category III or IV ; in the latter if the work is done as a household industry.

Besides actual cultivation involving manual work, persons engaged in active supervision or direction of cultivation are included in this category.

Category II : Persons who work in another person's land without exercising any supervision or direction in cultivation for wages in money, kind or share of produce but have no right or lease or contract on land on which they work are included in this category as Agricultural Labourers.

Category III : Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are classified in this category.

Category IV : Workers in household industry either of their own household or persons working in the household industry of others are included in this category.

Category V : 'Manufacturing' includes all types of production, processing, servicing or repairing of goods, which is not done in household industry.

Category VI : This category embraces workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs etc.

Category VII : This category includes workers engaged in any capacity in wholesale or retail trade and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, money lending, banking etc.

Category VIII : Workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading unloading etc. and workers engaged in storage, warehousing and communication, services such as posts, telegraph, telephone, wireless, information and broadcasting.

Category IX : This category includes (*i*) Public utility services like electricity, gas, water supply and sanitary services, (*ii*) Public services—Central, State, quasi-Government and Municipal employees in administrative departments and offices, (*iii*) Professional services, (*iv*) Personal services, (*v*) Services rendered by Trade and Labour associations and (*vi*) Recreation services etc.

The correspondence between the nine industrial categories mentioned above and the industrial classification (Indian Standard Industrial Classification) adopted for Table B-IV is given below :

Category	*Industrial Division of I.S.I.C.*
I, II	These have not been separately coded for industrial classificiation, as they formed distinct categories in themselves (Minor Groups 000 to 004 and 005 partly)

III	Industrial divisions 0 [except minor groups 000 to 004 and 005 (Partly)] and 1, if the industry is not a household industry
IV	Industrial division 0 [except minor groups 000 to 004 and 005 (partly)], 1 and 2-3, if the industry is a household industry
V	Industrial division 2-3, if the industry is not a household industry
VI	Industrial division 4
VII	Industrial division 6
VIII	Industrial division 7
IX	Industrial divisions 5, 8 and 9 (excluding minor group 999)

The following General Economic Tables were tabulated from questions canvassed in the Individual Slip in the 1961 Census :

B-I	Workers and non-workers classified by sex and broad age-groups
B-II	Workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups
B-III Part A	Industrial classification of workers and non-workers by eductional levels in *urban areas only*
B-III Part B	Industrial classification of workers and non-workers by educational levels in *rural areas only*
B-IV Part A	Industrial classification by sex and class of worker of persons at work at household industry
B-IV Part B	Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service
B-IV Part C	Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation
B-V	Occupational classification by sex of persons at work other than cultivation
B-VI	Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in *urban areas only*
B-VII Part A	Persons working principally (*i*) As Cultivators (*ii*) As Agricultural Labourers or (*iii*) At Household Industry classified by sex and by secondary work (*i*) At Household Industry (*ii*) As Cultivator or (*iii*) As Agricultural Labourer
B-VII Part B	Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry
B-VIII Part A	Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *urban areas only*
B-VIII Part B	Persons unemployed aged 15 and above by sex and eduational levels in *rural areas only*
B-IX	Persons not at work classified by sex, broad age-groups and type of activity

The tabulation of economic data for the 1961 Census was more elaborate than the earlier Censuses and there was more detailed cross tabulation of economic data with other characteristics. Thus the workers were classified separately according to their occupation as well as according to the nature of the industry in which they were employed. For this purpose two specific questions were asked in the case of each worker, one on nature of work (occupation) and the other on nature of industry (industry). In the case of occupation, tabulation was done according to the three-digit code in the National Classification of Occupations and in the case of industry according to the three-digit code of the Indian Standard Industrial Classification. The workers in each occupational division other than those engaged in cultivation were cross classified by age-group and educational level for urban areas only. The population returned as unemployed was classified by sex, broad age-groups and educational levels for urban areas and by sex and educational levels for rural areas while the population not at work was classified by sex, broad age-groups and types of activity.

Owing to the volume of statistics compiled in the above mentioned tables, these have been presented in three different books. This book *i.e.*, Part II-B(iii) contains Tables B-VI, B-VII, B-VIII and B-IX ; Part II-B (i) contains Tables B-I, B-II, B-III and B-IV and Part II-B (ii), Table B-V.

Each table presented in this volume is preceded by a flyleaf which explains in brief the broad features of the table and the mode of presentation of data in that table.

II Whether any priority is implied or actually indicated in the arrangement :—							
No priority was implied or actually indicated in the way the questions have been ordered: cultivation (Q.8), agricultural labour (Q.9), household industry (Q.10) and non-household industry etc. (Q. 11). All the four questions were to be severally asked of every person and the four questions had to be traversed first before a person was entered as a non-worker in Q.12. This was the order decided upon in the 1958 and 1959 Conferences as more than 75% of the population would be covered in Qs.8, 9 and 10. After positive answers to two or more questions had been obtained, the principal work, decided on the basis of time spent, would receive a ring round the question and the secondary work would receive a tick.	No priority laid down between one particular type of occupation and another. The occupation which fetches higher income will be principal and the one which fetches less income will be secondary.	No priority implied or actually indicated in the arrangement.	No priority implied or actually indicated in the arrangement.	No priority implied or actually indicated in the arrangement. 1961	1951	1941	1931	1921	1911	1901	Remarks
I Concept of Participation :—							
"These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in questions 8,9,10 and 11 according as the person is working as a Cultivator or as an Agriculutral Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q.8 and Q.9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q.8 and Q.10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.	Every person is labelled as a "self-supporting" person, or an "earning dependant" or a "non-earning dependant". Where a person is in receipt of an income, and that income is sufficient at least for his own maintenance, then he (or she as the case may be) should be recorded as a "self-supporting person". Such income may be in cash or kind. Anyone who is not a "self-supporting person" in this sense, is a "dependant". A dependent may be either an "earning dependant" or a "non-earning dependant", the test is whether or not he secures a regular income, even though it may be small. Where the income he secures is not sufficient to support him, that person is an "earning dependant". A person who does not secure any income either in cash or kind is a "non-earning dependant."	A person who has no income in cash or kind is "wholly dependent." A person who contributes in cash or kind towards the support of the household without being definitely capable of supporting himself is "partly dependent." A person who is not dependent on any other person is an "independent worker."	Here the distinction is between "earners", "working dependants" and "non-working dependants." An "earner" is one who does work or carries on business whether personally or by means of servants for which a return is obtained in cash or kind or who lives on house-rent, pension etc. A "working dependant" is one who works and has an occupation but does not receive any income in cash or kind or does not control the means of subsistence gained. A "non-working dependant" is one who does not work or has no occupation.	In 1921 there was dichotomy of population into "actual workers" and "dependants". The term "actual worker" included all persons "who actually do work or carry on business whether personally or by means of servants or who live on house-rent, pension etc." The persons who were not "actual workers" were "dependants."	As in 1921	As in 1921	Thus, up to 1951, the classification was based upon what is generally termed the "dependency approach" through the enumeration of the "gainfully occupied" as against the "work approach", resulting in production of economic goods and services adopted in 1961.
Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q.12 below.							
The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work will be satisfied if the person was employed during

any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*			
Persons under training as apprentices with or without stipend or wages will be regarded as working.			
An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work she should be treated as a worker.			
Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.			
A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q.11."

2. *Partici*

1961	1951	1941	1931
II Analysis :—			
1 Work constitutes participation.	Participation is determined by dependency and income.	Same as in 1951	The concepts were essentially the same as in 1941 and 1951. In fact, 1931 was the precursor. The analysis of 1951 applies to 1931.
2 Work implies production of economic goods or services either for consumption or for sale or exchange.	1 To qualify for participation a person must first have income, even if he does not work. Secondly, a person must be self-supporting. Thirdly, a person gets less than full credit for participation if "earning dependent."		
3 Basis of work :	2 Two main classes : self-supporting persons and dependents.		
(a) In seasonal work like cultivation, livestock, dairying, household industry etc.—some regular work of more than one hour a day throughout the greater part of the working season.	3 For self support: (i) a person must be in receipt of income which must be sufficient for own maintenance, and (ii) may be in cash or kind.		
(b) In regular employment in any trade, profession, service, business or commerce—should have been employed during any of the fifteen days preceding the day of enumeration.	4 Dependents may be of two kinds: (i) earning dependents and (ii) non-earning dependents. Test of earning dependent here is a regular income, even though it may be small.		
(c) If same person found unemployed during revisional round, no correction to be made in original record.	5(a) Earning dependent: Where income secured is not sufficient to support the person. (b) Non-earning dependant. Where person does not secure any income either in cash or kind.		
(d) Person who was working but was absent due to illness or other causes from work during fifteen days preceding the day of enumeration or even exceeding the period of fifteen days to be treated as worker.	Objections taken in 1958 to these concepts :		
(e) Person who has been offered work but not actually joined is non-worker.	1 Income, self support, individual earning or income are not suitable criteria in subsistence economy.		
(f) Work includes not only actual work but effective supervision and direction of work.	2 In most cases income or self-support would necessarily be hypothetical, arbitrary, subjective or dependent on particular social values or milieu.		
(g) Persons under training as apprentices with or without stipend or wages will be regarded as working.	3 Since head of household mostly answers enumerator on behalf of all members of the household, there would be tendency to play down the role of unpaid family worker and even equal participants.		
(h) Adult woman, in addition to household work, engaged in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling fire-wood or making and selling cow-dung cakes or grass etc. to be treated as worker.	4 It was suspected that unpaid family workers, both male and female, were under-enumerated in 1951.		
(i) Public or social service worker actively engaged in public service activity or political worker actively engaged in furthering	5 It was feared that self support and earning dependency would not add up

Primary distinction between 'actual workers' and 'dependants'.	Same as in 1921	Same as in 1921	
1 "Actual workers" included all persons who actually do work or carry on business whether personally or by means of servants or who live on house-rent, pension etc. That is, actual workers included both (i) those who worked and (ii) those who had income even if they did not work.			
2 Dependants: those who were not "actual workers".			
3 Reference period: Usual status.			
4 *Choice of Return of work* : only two in the case of "actual worker": (a) his own principal occupation (b) his own subsidiary occupation			
5 Regarding choice of principal or subsidiary occupation, see page 27 under 8 below.			
Inference : Concepts would have the effect of enumerating unpaid family workers better than in 1931-51.

the political activity of his party to be regarded as worker.	to all persons who 'worked' for production of economic goods and services.		
4 What is not work.	6 Apportionment was difficult in national income.		
(a) Adult woman engaged in household duties but doing no other productive work.	7 Principal means of livelihood is that which fetches more income or earning and secondary means of livelihood is that which fetches less income or earning than the principal. In the case of a dependent (earning or non-earning), principal means of livelihood of person on whom dependent is also dependant's principal means of livelihood and dependent's (earning) own means of livelihood (i.e. source of income) is his secondary means of livelihood.		
(b) Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who may be earning an income but not participating in productive work, unless they also work in cultivation, industry, trade, profession, business or commerce.			
Background explanation from August-September 1958 Conferences of important users of census data as to why these concepts were adopted.	8 *Choice of return of work*: only two could be returned, test being income. Secondary means of livelihood was difficult of assessment in many cases.		
1 Dependency concept of previous censuses found unsatisfactory in the era of Five Year Plans. Decided that emphasis should be on work or non-work of individuals to provide better information for National Income computation.	9 Reference period: Usual status, which was usually a calendar year or might be the position at time of enumeration.		
	10 Usual status is synonymous with self support and dependency.		
2 Earner, self-supporting, earning dependent, dependent etc. of previous censuses regarded as too subjective, too gregarious and too vulnerable to particular social milieus and values and, therefore, unreliable and not always useable. These concepts had led to complications in apportionment.	11 A man's status was determined first and then his own particular work. This may have led to underestimation.		
	12 The concepts made for sectoral neatness but at some price.		
3 Definition of work, when classified by age, sex, marital status, extent of land or nature of industry and number of months engaged in household industry will give measure of (a) child and old age participation, (b) trivial family help, (c) effective participation of family workers, (d) avoidable under-employment and (e) unavoidable under-employment. It was with these ends in view that a separate household schedule was introduced which was

intended to yield information on (a) subsistence enterprises, (b) capitalist enterprises, (c) input of family and hired labour by duration of engagement and (d) extent of under-employment, avoidable and unavoidable.			
4 It was decided that distinction between working and non-working should be ensuredin as clear cut a manner as practicable. Non-workers might even have incomes of their own. This is why 'Persons seeking work for the first time but not employed before', and 'Persons out of employment but seeking work' were put in Non-working category, the understanding being that these two categories could always be taken out and added to labour force.			
5 Basis of work was defined to secure as much as possible of correspondence to 'usual status' of previous censuses in the interest of comparability. At the same time, it was thought essential that some 'reference period' should be fixed to sharpen and narrow down the concept of 'usual status' which in past censuses was left undefined. In a population of 76% agriculture and household industry and about 50% of national income from agriculture, agriculture and household industry must loom large over other activities. Much of this activity is subsistence and seasonal. Owing to diversity of conditions and vastness of country, what is current active season in one part may be fallow season in another at any point of time.			
It was also universally agreed that 1951 had failed to net much significant family labour, particularly in the South, on account of 1951 insistence on (1) personal earning and personal income and (2) dependency. It was important to get a fuller measure of family labour in 1961 for national income and labour force projections.			
6 It was, therefore, decided to adopt a two-pronged reference period;

(i) For agriculture and allied activities and household industry: a working season (current or last) because anything less than a working season might leave out some of the regularly employed and might enumerate the very casual helper.							
(ii) For regular employment in trade, profession, service, business or commerce: employment during any of the fifteen days preceding the day of enumeration. A shorter period might inflate the population at work, while a longer period than a fortnight might lead to a vague 'usual status'. It was decided that a fortnight would be safe, as it was also recommended in the U.N. Handbook for certain types of economies corresponding to India's.							
7 'Regular work of more than one hour a day' was inserted to cut out trivial help. The intention was to net, among others, the unpaid adult female family workers who, from an examination of past trends, were suspected to have been seriously under-enumerated, particularly in the South, in 1951. The U.N. suggestion of 'one third of one full day' presupposed a wage day of 8 hours, which in cultivation or household industry in India would be meaningless. Except in peak seasons, ordinarily work during agricultural season for any adult does not exceed 4 to 5 hours. The concept of 'more than one hour a day' was decided upon as the point where a woman would have to leave aside her household chores or leave home for a substantial period, avowedly with the intention of participating in economic activity, when she would not permit her domestic obligations to interfere with her work: that is, in her reckoning, work at this time would take precedence over domestic duties. 'More than an hour' in rural parlance usually means 'a long time' or substantial period, which would cut out 'work of trivial nature' or lending a casual hand in between two domestic chores. It cannot

be said that this liberalized previous census definitions. If anything, it underscored *usual status* concept but might be interpreted to have led to some over estimation in actual count. This so-called ' overestimation' can only be measured against a long term trend, as there is no set of figures in our possession which can be regarded as a true measure of correct estimate.			
8 *Choice of return of work*: Four choices between (i) cultivation, (ii) agricultural labour, (iii) one household industry, (iv) one non-household industry, etc. Could be only one or two or three or all four. But more than one household industry or non-household industry could not be entered.			
9 Principal and secondary work: Principal work is that on which more time is spent. Principal work was to be marked by enumerator with a ring and secondary work with a tick.

1961	1951	1941	1931
1. ***Definition:—***			
(*i*) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.	*Employer :*— A person who has necessarily to employ other persons in order to carry on the business from which he secures his livelihood. (Thus if a person employed a cook or other person for domestic service, he was not to be recorded as an employer merely for that reason).	No question was asked	No question was asked
(*ii*) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.	*Employee*—A person who ordinarily worked under some other person for a salary or wage in cash or kind as a means of earning a livelihood.		
(*iii*) A *Single Worker* for the purpose of Q.11(c) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.	*Independent Worker :*—A person who was no employed by any one else and who did not also employ any one else in order to earn his livelihood.		
(*iv*) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative. Members of the household who help solely in household duties should not be treated as family workers.			
2. ***Who were asked these questions :—***			
1. In the case of cultivators (Q. 8), status as employer, single worker or family worker was not asked in Individual Slip. But in household schedule, a question was asked about head of household, family worker and hired worker in cultivation.	Only self-supporting persons were classified according to their status as employers, employees and independent workers. This was further restricted to non-agricultural classes according to principal occupation (other than agriculture proper). Persons following no productive occupations in non-agriculture such as non-agricultural rent-receivers, pensioners, beggars, vagrants etc., were also not recorded according to their status. Self-supporting persons in agricultural classes were not tabulated according to status.	No question was asked	No question was asked
2. In the case of agricultural labourers (Q. 9), no status was asked. The assumption was that all would be employees.			
3. In the case of household industry (Q.10), the question asked was whether employee or not, the implication being that if a person was not an employee, his further classification in this section into (*a*) single worker or (*b*) family worker would be unnecessary. The further implication was that within the household, so far as a household industry was concerned, there was no question of any one being earmarked as an employer, because the industry belonged to the household and not to any particular person, and any person employed from outside would be an 'employee' of the household enterprise and not of any particular person in the household. In the household schedule, however, the head of the household, the family worker and the hired worker could be severally spelled out. The status of 'employee' or 'family worker' could naturally be in it either as principal or secondary work.			
4. In the case of non-household industry etc. (Q. 11) a person could be either (*i*) employer, (*ii*) employee, (*iii*) single worker or (*iv*) family worker and this could be his status in either his principal work or secondary work. The status was, however, tabulated for principal work only.

In 1921, unpaid family workers were enumerated separately as "working dependants". (Family workers paid in cash or kind were treated as earners). Conceptually, in 1951 a self-supporting person or earning dependant could belong to any of the four classes of employer, employee, independent worker and family worker. However, self-supporting persons were classifiable as employers employees and independent workers only.

1961	1951	1941
1. *Tests Applied :* (Earning or Time Method of reckoning) As compared to the secondary work, principal work is one on which more time is spent during the reference period. Where the principal and secondary works are either more than one type of household industry or of non-household industry [that is, where they would have required more than one set of entries in (Q. 10) or in (Q.11) while there was space for only one set of entries for either question], no secondary work was recorded; only the principal work, on which more time was spent, was recorded.	Principal means of livelihood or occupation was one which fetched more income as compared to the secondary occupation. In this way, an unproductive occupation like rent-receiving could be a principal occupation and the income obtained from productive work could be a secondary occupation. A self-supporting person may or may not have a secondary occupation; if he has one, both the occupations should be his own occupations. Conceptually, an earning dependant must have two occupations, otherwise he is a non-earning dependant. In his case, his principal occupation is that for which he depends upon a self-supporting person while his own occupation is reckoned as his secondary occupation, even though the income derived from his own occupation may be more than from his principal source of livelihood. Thus in actual terms, an earning dependant has neither less nor more than one occupation of his own which, by definition, is his secondary means of livelihood, while, again by definition, his principal means of livelihood is that of the person on whom he is dependent. A non-earning dependant has only principal occupation and no secondary occupation. His principal occupation is the same as that of the person (as self-supporting person) on whom he is dependent. In actual terms, he has no occupation of his own.	Same as in 1951

Secondary work

1931	1921	1911	1901	Remarks
In 1931, the criterion adopted was income so that an occupation from which more income accrued, was the principal occupation. However, the question of secondary occupation was restricted to only "earners" just as, in actual practice, it was restricted to "self-supporting persons" in 1951. The occupation of a working dependant was his own occupation—the occupation by which he or she augmented the income of his or her family. Thus, there was no conceptual or real difference in the occupation followed by a "working dependant". He could have more than one occupation of his own, but only the principal occupation (the occupation which fetched more income to the family) was recorded. If a person was engaged in two occupations—one from which he obtained income in cash or kind and the other being family occupation—he was "earner" by virtue of his former occupation and the latter was his secondary occupation irrespective of the income derived from the two occupations.	Question No. 10 provided for recording the subsidiary occupation (secondary), if any, of all "actual workers." The basis was income so that the income obtained from the secondary occupation was less than that from the principal occupation. However, the secondary occupation was tabulated only for "partially agriculturists," that is, where the secondary occupation was agriculture (deriving income from agriculture). "Dependents" were classified (under Q.No.11) according to the occupation of the "actual workers" on whom they were dependent. There was no secondary occupation of "dependents".	Same as in 1921	Same as in 1921	Up to 1931, the instructions provided that in cases where a person with private means followed some occupation, that occupation should be entered in column 9 (principal occupation) and the source of his private income in column 10 (subsidiary occupation). It is difficult to interpret this instruction. Does it mean that all unproductive means of income were to be regarded as secondary occupations? If this were so, rent-receivers, pensioners, beggars etc., would not have been recorded in column 9 (principal occupation). This perhaps only means a private source of income such as the income not always relatable to any particular occupation.

lation which does not work

1921	1911	1901	Remarks
Dependents *plus* all "actual workers" in non-productive occupations as stated in case of 1931 Census.	Dependents *plus* all "actual workers" in non-productive occupations as stated in case of 1931 Census.	(*a*) Dependents; (*b*) rent-receivers; (*c*) prostitutes, procurers, pimps etc.; (*d*) receivers of stolen goods; (*e*) witches, wizards, cow-poisoners etc.; (*f*) house-rent, shares and other property not being land ; (*g*) allowances from patrons or relatives; (*h*) educational or other endowments, scholarships etc.; (*i*) mendicancy (not in connection with a religious order); (*j*) pensioners inmates of asylums, prisoners etc.	The position of persons who jointly carry on the economic operations *i.e.*, unpaid family workers, was thus: Up to 1921 unpaid family helpers were to be adjudged as 'actual workers' and the instructions provided that "women and children who work at any occupation which helps to augment the family income must be entered in column 9 (as principal occupation of actual workers) and not column 11 (as dependants)". In 1931, unpaid family workers or helpers were included among 'dependants' but they were given a separate sub-category of 'working dependants' so as to distinguish them from 'non-working dependants' who did not take part in any productive activity. In 1951, such persons were by hypothesis classifiable as self-supporting persons or earning dependants according to the share of income attributable to them. In 1961, unpaid family helpers engaged in productive work are included among workers.

APPENDIX IV

INSTRUCTIONS PERTAINING TO ECONOMIC QUESTIONS ISSUED AT EACH CENSUS FROM 1872—1961

1961

The economic questions relate to items 8 to 12 of the Individual Slip.

Qs. 8 to 11 Working :

These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q.8 and Q.10. Or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in question 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in question 11.

After you have filled up the answers to questions 8 to 11 if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, *i.e.*, more than two of the questions, 8 to 11 would have been filled up by some work. In such cases you should first ascertain the principal work, *i.e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

The following classification illustrates as to which answers should be entered under Q.8 and which others under Q.11.

Under Q. 8: Cultivation involving ploughing, sowing and harvesting.

1 Production of cereal crops (including Bengal gram), such as rice, wheat, *jowar, bajra*, maize; roots and tubers like potato; yam, beet etc.; sugarcane etc.

2 Production of pulses, such as *arhar, moong, masur, urd, khesari*, other gram.

3 Production of raw jute and kindred fibre crops.

4 Production of raw cotton and kindred fibre crops.

Under Q.11 : Other Field Produce, Plantation Crops.

A. *Other Field Produce :*

1 Production of other crops including vegetables not covered in Q. 8.

2 Production of fruits and nuts in plantations, vines and orchards (like cocoanut, arecanut etc.).

3 Production of wood, bamboo, cane reeds, thatching grass etc.

4 Productuon of juice by tapping palms.

5 Production of other agricultural produce (including fruit and nuts not covered by sl. no. 2 and flowers) not covered above.

B. *Plantation Crops :*

1 Production of tea in plantation.

2 Production of coffee in plantation.

3 Production of rubber in plantation.

4 Production of tobacco in plantation (does not include tobacco which is cultivated in rotation with other cereal crops, in which case it would go under cultivation).

5 Production of *ganja*, cinchona, opium, poppy, saffron etc.

6 Production of other plantation crops not covered above.

Q. 8 Working as Cultivator

For a person working as Cultivator write 'C'. For a person not working as Cultivalor and for a person not working at all put 'X'.

For purposes of the census a person is working as cultivator the or she is engaged either as employer, single worker or family worker in (*a*) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (*b*) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q.11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivtion of land, will not be treated as working as Cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9 Working as Agricultural Labourer

Write 'AL' for a person working as Agricultural Labourer, *i.e.*, a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put 'X'. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10(*a*) and 10(*b*) *Household Industry*

If a person is working in a Household Industry write (*i*) the nature of work done by him in the Household Industry against question 10(*a*) and (*ii*) the nature of the Household Industry against question 10(*b*). Otherwise, put 'X' in both questions 10(*a*) and 10(*b*). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home urban areas. The industry should not be run on the scale of registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Hosehold Industry and if so, write the nature of the work done by him against question 10(*a*) and the nature of the Household Industry against 10(*b*).

Q. 10(c) If Employee in Household Industry

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write 'E.E.' For all others put 'X.'

The following examples will illustrate how questions 10(*a*) to10(*c*) should be filled up for persons working at Household ndustry :

Q. 10 Working at Household Industry

(*a*) Nature of Work	(*b*) Nature of Household Industry	(*c*) If Employee
1 Spinning yarn . . .	Spinning yarn on *Ambar Charkha.*	X
2 Dyeing and printing yarn .	Handloom weaving	X
3 Threshing and cleaning grain	Flour making *chakki*	X
4 Labourer employed for crushing oil	Oil *ghani*	EE
5 Tempering and polishing implements	Blacksmithy making agricultural implements	X
6 Labourer employed for making and firing kiln	Earthenware pottery	EE
7 Throwing and Turning pottery	Earthenware pottery	X
8 Making wooden doors and windows	Carpentry	X
9 Filling gold ornaments with lac	Goldsmithy	X
10 Labourer working on hosiery machine	Hosiery	EE
11 Keeping accounts . .	Hosiery	X
12 Polishing and Scraping metal	Electroplating	X
13 Labourer employed for putting iron hoop on cartwheels	Cartwheelwright	EE
14 Repairing of guns . .	Gunsmithy	X
15 Bee Keeping . . .	Production of honey	X
16 Tending cattle . . .	Livestock raising	X

Q. 11 Doing Work other than 8, 9 *or* 10

If a worker is not working as a Cultivator or as an Agricultural Labourer or at any Household Industry write the actual work he is doing. If a person is working as a Cultivator or as an Agricultural Labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more ime.

Q. 11(a) Nature of Work

In the case of persons not working or who work *only* as Cultivator or as Agricultural Labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11(b) Nature of Industry, Prosession, Trade or Service

In the case of a person who is working and the nature of whose own work has been recorded in question 11(*a*), you should write here the nature of industry, profession, trade or service in which the person works.

As in the case of question 11(*a*), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired, should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom 'X' is put in question11(*a*), put 'X' in this question also.

Important points to remember in Questions 11 (*a*) *and* 11 (*b*)

1 Women or children who help with work, such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the work mentionad above in addition to the usual household duties such work should be fully described and 'HW' written in brackets after the full description.*

2 If a person makes the articles he sells, he should be entered as maker and seller of them.

3 Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4 The following are too vague and must not be used by themselves :

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5 *Labourers*—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, *e.g.*, railway porter, market or bazar porter, labourer employed on road digging, bricklayer's labourer. If accustomed to work on various jobs, write general labourer.

6 *Machine Operators*—Always state the kind of machine giving its recognized name, if any.

7 *Shop-keepers, Retail Dealers, Shop Assistants*—If wholly or mainly engaged in selling, write 'Dealer' (if principal) or, 'Shop Assistant' or Salesman' (if assisting) and state whether the business is wholesale or retail or both. For Shop Assistants and Salesmen in stores with several departments, state the particular department in which engaged (*e.g.*, Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8 *Transport Workers*—Describe fully the nature of the transport, *e.g.*, air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9 *Services*—For a person engaged in the Defence Services write 'Service of Central Government'.

10 If the job is known in the trade or industry by a special name, use that name. Manager, Foreman, etc., should be given the department/branch wherever applicable *e.g.*, 'Sales Manager' or a 'Manager' of Hardware Department, 'Machine Shop Foreman' or 'Boiler Room Foreman' etc. The following terms are insufficient by themselves:

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11 *Domestic Services*—In the case of any private servant *e.g.*, a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hostel, restaurant, etc., should be added.

For persons in the employ of firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (*i.e.*, they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12 *Commerce*—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11(c) Class of Worker

For a person who is :

1 an *Employer*, that is, who hires one or more persons in his work described in Q. 11 (a)	write MR
2 an *Employee*, that is, who does his work described in Q. 11 (a) under others for wages or salary in cash or kind	write EE
3 a *Single Worker*, that is, who is doing his work described in Q. 11 (a) without employing others, except casually and without the help of other members of the family except casually. This will include workers working as members of co-operatives . .	write SW
4 a *Family Worker*, that is, who is doing his work described in Q. 11 (*a*) in own family without wages or salary in cash or kind . .	write FW

For, a person for whom 'X' is put in questions 11 (*a*) and 11(*b*) put 'X' in this question also.

Explanation:—

(*i*) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q.11(a) But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(*ii*) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(*iii*) A *Single Worker* for the purpose of Q. 11 (c) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(*iv*) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11(*d*) *Name of Establishment*

Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom 'X' is put in Qs. 11(*a*), 11(*b*) and 11(*c*) put 'X' in this question also.

The following examples will illustrate how Qs. 11 (*a*) to 11(*d*) should be filled up for person doing work other than 8, 9 or 10 :

Q. 12 *Activity, if Not Working*

This question will apply to a person NOT WORKING.

Write 'X' in this question for a person who is working that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following acitivities should be recorded in the case of persons NOT WORKING :

1	For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business	write ST
2	For a person engaged in unpaid home duties (like house wife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business	write HW
3	For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age	write D
4	For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work	write R
5	For a beggar, a vagrant or an independent woman without indication of source of income and others of unspecified source of existence	write B
6	For a convict in jail (an under trial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution	write I
7	For a person who has not been employed before but is seeking employment for the first time	write NE
8	For a person employed before but now out of employment and seeking employment	write UN

Explanation :—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write 'B' in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8.

1951

(1) The Census is concerned with two economic characteristics of every individual—his (or her) economic status and his (or her) means of livelihood. The scope and meaning of these expressions will appear from an explanation of three census questions, *viz.*:—

Question 9—Economic status;

Question 10—Principal means of livelihood; and

Question 11—Secondary means of livelihood.

(2) FORM OF QUESTIONS :

Question 9—Economic status :

Part One—Dependency—Write '1' for a self-supporting person '2' for a non-earning dependant, and '3' for an earning dependant. Write the answer in the first compartment.

Part Two—Employment—If a self-supporting person earns his principal means of livelihood as an employer write '1'; as an employee write '2'; as an independent worker write '3'. Write 'o' in other cases. Write the answer in the second compartment.

Question 10—Principal means of livelihood: An answer to this question should be recorded on every slip. If the slip relates to a self-supporting person record his principal means of livelihood. If the slip relates to a dependant (whether earning or non-earning) record here the principal means of livelihood of the self-supporting person on whom he is dependant. The means of livelihood which provides the largest income is the 'principal means of livelihood' for a self-supporting person who has more than one means of livelihood. In the case of other self-supporting persons it is the only means of livelihood.

Use the following contractions: Write '1' for a person who cultivates land owned by him; '2' for a person who cultivates land owned by another person; '3' for a person who is employed as a labourer by another person who cultivates land; '4' for a person who receives rent in cash or kind in respect of land which is cultivated by another person.

For all other means of livelihood write fully and clearly what the person does in order to earn his livelihood and where he does it.

Question 11—Secondary means of livelihood: For a self-supporting person who has more than one means of livelihood, write the means of livelihood next in importance to his principal means of livelihood. For an earning dependant write the means of livelihood which provides the earning. Use contractions given in question 10.

For a self-supporting person who has only one means of livelihood write '0'. In the case of a non-earning dependant also, write '0'.

(3) *Question* 9—Economic Status:—This question is in two parts. The first part requires the labelling of every person as a 'self-supporting person', or an 'earning dependant' or a 'non-earning dependant'. Every single human being must be allotted one of these labels and not more than one of them and this may be referred to as his *household economic status.*

The second part of the question has no application to non-earning dependants or to earning dependants. It relates only to self-supporting persons; and even among them, those exceptional cases of self-supporting persons who support themselves without gainful occupation or economic activity (*e.g.*, rentiers and pensioners) are not covered. All others (that is, all those self-supporting persons who are both economically active and gainfully occupied) are to be allotted one or other of the three labels, *viz.*, 'Employer'; 'Employee'; or 'Independent Worker'; and this may be referred to as his *employment status.*

The following extracts from the model instructions to enumerators explain the criteria to be applied and the treatment of border-line cases :

Where a person is in receipt of an income, and that income is sufficient at least for his own maintenance then he (or she as the case may be) should be regarded as a 'self-supporting person'. Such income may be in cash or kind.

Anyone who is not a 'self-supporting person'; in this sense, is a'dependant'. A dependant may be either an 'earning dependant' or a 'non-earning dependant'; the test is whether or not he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is an 'earning dependant'. *A person who does not secure any income either in cash or in kind, is a 'non-earning dependant'.*

Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning a part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed as either a self-supporting person or an earning dependant according to the share of income attributable to him (or her). *The same applies to any other business carried on jointly.*

This does not mean that anyone who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant if she does not also secure an income.

(An) Employer (is) only that person who has necessarily to employ other persons *in order to carry on the business from which he secures his livelihood.* A person (who) employs a cook or other person for domestic service should not be recorded as an employer merely for that reason.

Persons employed as managers, superintendents, agents, etc. (who) control other workers are also employees only and should not be recorded as employers.

An independent worker means a person who is not employed by any one else and who does not also employ anybody else in order to earn his livelihood.

(4) *Question* 10—Principal Means of Livelihood : 'Means of Livelihood' of any individual ordinarily means the gainful occupation which forms the source from which that income which is utilised for his maintenance is normally derived ; but it is more comprehensive, in as much as in exceptional cases, income may be secured without gainful occupation. 'Principal means of livelihood' means the same thing as 'Means of livelihood' for every person who has only one means of livelihood. Where a person has more than one, that which gives him the greater part of his income is his 'Principal means of livelihood'. *In the sense thus defined, every human being, without any exception, has a Principal Means of Livelihood—whether or not he is a self-supporting person. Every non-earning dependant is maintained exclusively by the income of some self-supporting person on whom he is dependent. Consequently, the Principal Means of Livelihood of the latter is required to be recorded as the Principal Means of Livelihood of the former. The same rule applies to earning dependants also (no attempt being made to assess the degree of sufficiency of his own income or the extent of his dependence on others).*

Agricultural and non-agricultural means of livelihood are distinguished by the manner in which enumerators are required to record the answers to this question. This is important for purposes of subsequent classification of the answers. The following extracts from instructions are relevant:

"Four simple contractions have been provided which will cover most cases where the livelihood is dependent on agriculture—Write '1' for a person who cultivates land owned by him ; '2' for a person who cultivates land owned by another person ; '3' for a person who is employed as a labourer by another person who cultivates land; '4' for a person who receives rent in cash or kind in respect of land which is cultivated by another person. If you find that a person falls under two of these categories, note that category which provides the largest income against question 10 and the second against question 11. No note need be taken of more than two such categories in any case.

[Note:—The word 'owned', used in relation to land includes every tenure which involves the right of permanent occupancy of land for purposes of cultivation. Such right should be heritable; it may be, but need not necessarily be, also transferable.]

In all other cases.... Write fully and clearly what the person does in order to earn his livelihood and where he does it. There are three lines on the slip provided for answering this question Use them fully. Avoid vague and general terms. Do not write 'service' or 'labour'. If you are enumerating a trader, describe the articles in which he is carrying on trade and state clearly whether he is a wholesale trader or a retail trader. A retail trader sells to the public. A wholesale trader does not. If you are enumerating a factory worker, give the name of the factory or the product it makes, *e.g.*, coal mine, jute factory, cotton mill, etc.

(5) *Question* 11—Secondary means of livelihood: A self-supporting person may or may not have more than one means of livelihood. If he has more than one, that which provides the greatest income is recorded under question 10 as the 'principal means of livelihood' and the next under question 11 as the 'Secondary Means of Livelihood'. It has been laid down that no note should be taken of more than two such means of livelihood in any case.

The answer to this question is invariably 'nil' for non-earning dependants. *Ex-hypothesi* they secure no income ; they are supported by the Principal Means of Livelihood of the persons on whom they are dependent which alone is taken to be their only means of livelihood.

In the case of every earning dependant, there are two means of livelihood which are combined in order to support him. One is the Principal Means of Livelihood of the person on whom he is dependent. The other is the source wherefrom he secures his own income. The former is always to be treated as the 'Pricinpal Means of Livelihood' of the 'earning dependant' and the latter as his 'Secondary Means of Livelihood'.

Further elucidation of the scope and implications of these questions was provided in supplementary instructions in the form of question and answer. These are extracted below:—

(6) CENSUS QUESTION 9(1):

Question—In the instruction the words are "the test is whether he secures a regular income, even though it may be small." Does the use of the word 'regular' rule out persons who earn an income by seasonal employment?

Answer—No. The word 'regular' is used in the sense of 'non-casual'. It is not intended to be confined only to income derived from continuous employment. It also includes income derived from seasonal employment. What it does exclude is individual income accruing casually and not constituting a source of income which is regularly depended upon.

Question—The word 'self-supporting', as defined in the instructions, means any person whose income is sufficient at least for his own maintenance. *Does this mean that an income sufficient for one man is self-supporting income ? What about his direct dependents—wife, children etc. ?*

Answer—Yes. The instructions mean what they say. A person must be deemed to be self-supporting if his income (such as it is) is sufficient to support him individually at his present level of living (such as it is). He does not cease to be self-supporting merely for the reason that he, his wife and children taken together are not maintained by his own income.

If the wife and children have no income of their own, they are non-earning dependants. The instructions provide that their principal means of livelihood should be deemed in every case to be the same as that of the person on whom they are dependent. This would in most cases be the husband or father who will also be the head of the household. In those exceptional cases where the husband or father is not the head of the household, and is also not able to support anyone but himself, then the head of the household in which the non-earning dependant is living is the person on whom he (or she) is dependent.

Remember—every 'family household' is (collectively) self-supporting ; otherwise it would not exist. The surplus of self-supporting persons within a family household is in every case sufficient to meet the deficit on the earning and non-earning dependants in that family household.

Question—In the instructions it is provided that if two or more members of the family household jointly cultivate land they would be classed as self-supporting or earning dependant *"according to the share of income attributable to him or her". How are these shares to be assigned ? What about females who, in some cases, take an active part in agricultural operations ?*

Answer—The share of the income atiributable to a person is what the head of the household (or whoever is the managing member) deems it to be. No attempt should be made to make a detailed calculation of this share. All that has to be ascertained is whether (in the opinion of the head of the household or managing member) the member concerned is entitled to a share which would be sufficient to cover the cost of his own maintenance.

If the answer is 'yes', he is' self-supporting'; if the answer is 'no', he is an 'earning dependant'.

The considerations are exactly the same whether the individual is a male or a female, an adult or a non-adult.

(7) CENSUS QUESTION 9(2) :

Question—Are doctors and lawyers, who employ compounders and clerks, independent workers or employers?

Answer—They are employers. A doctor employs a compounder in order to relieve him of part of the work connected with the business on which he is engaged and by which he secures his livelihood. A lawyer employs a clerk for a like purpose.

Question—A money-lender employs four persons to realise interest. Is he an employer or independent worker ?

Answer—He is an employer. He would be an employer even if he employed only one person provided that person was regularly employed and derived his principal means of livelihood by such employment. Casual employment, or part-time employment which does not provide the principal means of livelihood of the person employed, should not be taken into account.

Question—What is the status of tenants or zamindars who do not cultivate (land) themselves, but employ labourers ?

Answer—If they employ others they are 'employers'—provided the purpose of the employed and the nature of the employment are as stated in the answers to the two preceding questions.

Question—What is the status of beggars; orphans in orphanages; convicts in jails ?

Answer—They fall in none of the three categories. Record '0' for them.

(8) CENSUS QUESTION 10:

Question —What is the category of a minor, a blind person or a lady who has land in his or her name but gets it cultivated by labourers. Category I or Category IV ?

Answer—Learn to distinguish between 'cultivation of the land', and 'performance of labour necessary for cultivating the land'. There are, of course, millions of persons who perform both functions—but the functions are distinguishable and should be distinguished. *The man who takes the responsible decisions which constitute the direction of the process of cultivation (e.g., when and where to plough, when and what to sow, where and when to reap and so on); it is this person who should be referred to as the cultivator, even though he does not perform any manual labour whatever. The man who ploughs, or sows, or reaps, under the directions of someone else is not the cultivator—but a cultivating labourer, a different thing altogether.*

The cultivator may be the owner of the land cultivated. In that case he is category I, whether or not he also combines in himself the functions of a cultivating labourer.

Alternatively, the cultivator may be a lessee, an agent or manager (paid or unpaid). Even in this case it is immaterial whether this lessee or agent or manager also combines in himself the functions of a cultivating labourer ; he (the cultivator) is Category II, and the other person (the owner) is Category IV.

Applying these principles, *the answer to the question put depends on whether, the minor, blind person, or lady does or does not actually direct the process of cultivation. If the person does this, the answer is Category I otherwise the answer is Category IV.*

1941

Question No. 9—(Wholly or partly dependent). A person who has no income in cash or kind is wholly dependent. For such persons put a √. A person who contributes in cash or kind towards the support of the household without being definitely capable of supporting himself is partly dependent. For such persons write P (or the first* letter of the word for "partly"). For a person who is not dependent on any other person put a 'X.

Question No. 10—(Means of livelihood of person on whom dependent). In the case of persons who are wholly or partly dependent on another person enter the principal means of livelihood of the person on whom dependent. In the case of persons who are not dependent on others put X.

Question No. 11—(Paid assistant employed, etc.). If the person employs any assistants paid regularly in cash or kind ask how many and show the number against (a). If none, put a '0'. Ask how many members of the household regularly assist in the person's occupation and enter the number against (b).

Question No. 12—(In employment or not). If the person is in employment now, put a √. If he is not in employment now, put a X.

Question No. 13—(Search of employment). For those who are in search of employment enter the periods in months for which they have been in search of it. For all others put a X.

N.B.–Questions 12 and 13 need not be asked in respect of any person below 16.

Question No. 14—(Means of livelihood). Enter the various means of livelihood in the order in which they contribute to the

*This will be prescribed by the respective superintendents.

livelihood of a person. In the case of a person who is wholly dependent put a X. Enter the exact occupation and avoid vague terms such as 'service', or 'writing' or 'labour'. For example in the case of labour, say whether in the fields or in a coal mine or jute factory, or cotton mill or lac factory or earth work, etc. In the case of agriculture distinguish between persons who do not cultivate personally, who cultivate their own land, who cultivate rented land and who are hired labourers. Distinguish also persons who work land on *batai* (share-croppers). If a person makes the articles he sells, he should be shown as "maker and seller" of such articles.

Question No. 15—(Proportion of year in which means of livelihood is exercised). This question is only to be asked in regard to means of livelihood of a person shown as partly dependent against question No. 9 or any subsidiary means of livelihood returned by other persons in question No. 14. If the means of livelihood is exercised throughout the year put a √, otherwise state the period in each year during which it is exercised. In the case of wholly dependents and those for whom the question is not intended put a X. Agricultural means of livelihood should be treated as regular.

Question No. 16—(Nature of employer's business). Only those persons are to be entered in this question who are employed by others and who receive cash remuneration. The word "employer" covers a company, etc. This question should not be put to those who have given their principal means of livelihood as domestic service or agriculture. For persons not employed by others and for dependents and for those persons whose principal means of livelihood is domestic service or agriculture put a X.

1931

Column 9. (*Worker or Dependant*)—Enter "earner" or "dependant". A woman who does house work is a dependant, so is a son who works in the fields but does not earn separate wages. A cultivator cultivating as a principal occupation is an earner.

Column 10. (*Principal occupation of actual workers*)—Enter the principal means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants, or who live on house-rent, pension, etc. Enter the exact occupation and avoid vague terms such as "service" or "writing" or "labour". Replies such as are given to a Magistrate in court are not enough. For example, in the case of labour, say whether in the fields, or in a coal mine, or jute factory, or cotton mill or lac factory, or earthwork etc., In the case of agriculture distinguish between persons who do not cultivate personally, who cultivate their own land, who cultivate rented land and who are hired labourers. If a person makes the articles he sells he should be entered as "maker and seller" of them. Women and children who work at any occupation which helps to augment the family income must be entered in column 9, and in column 11. For dependants make a X only in column 10.

Column 11—(*Subsidiary occupation of actual workers*) Enter here any occupation which actual workers pursue at any time of the year in addition to their principal occupation. Thus if a person lives principally by his earnings as a boatman, but partly also by fishing, the word "boatman" will be entered in column 10 and "fisherman" in column 11. If an actual worker has no additional occupation a cross (X) will be put. Dependants who help to support the family by subsidiary work, *e.g.*, a woman who helps in the fields as well as doing house work will be shown in this column.

Column 12—(*Industry in which employed*))—For managers, clerks, operatives or workmen employed in a factory or by any person employing industry fill up the name of the industry, *i.e.*, biscuit making, coal mining. For individual workers not employed by others put a X.

The following were the supplementary instructions printed in the Code :—

Columns (9, 10, 11 and 12)—The entry of occupation in columns 9 to 12 of the schedule is another matter requiring special care.

Column 13 (9)—Only those women and children will be shown as earners who help to augment the family income by permanent and regular work for which a return is obtained in cash or kind. A woman who looks after her house and cooks the food is not an earner but a dependant. But a woman who habitually collects and sells firewood or cowdung is thereby adding to the family income and should be shown as an earner. A woman, who regularly assists her husband in his work (*e.g.*, the wife of a potter who fetches the clay from which he makes his pots), as an all-time assistant, is an earner but one who merely renders a little occasional help is not. A boy who sometimes looks after his father's cattle is a dependant, but one who is a regular cowherd and earns pay as such in cash or kind should be recorded as such in Column 10. It may be assumed, as a rough and ready rule, that boys and girls over the age of 10 who actually do fiield labour or tend cattle are adding to the income of their family and should, therefore, be entered in Column 10 or 11 according to whether they earn pay or not. Boys in school or college, should be entered as dependants. Dependants who assist in the work of the family and contribute to its support without actually earning wages should be shown as dependants in Column 9 and under subsidiary occupation in Column 11. Thus a woman who keeps house for her husband is a dependant and entered as such in Column 9, but has the subsidiary occupation, Column 11 of house-keeping. Similarly weaving is often an important subsidiary occupation for women dependants in some places and should be entered in Column 11, where it may or may not, have to take the place of housekeeping. Only the most important subsidiary occupation should be given. Prisoners in jail who are likely to be released before the 26th February, 1931, should not be entered. In Column 11 of the Schedule, prisoners should be classed as convicts, rigorous imprisonment or simple imprisonment as the case may be or civil prisoners. Their previous occupation should not be shown and they should be shown in Column 9 as dependants.

Column 14 (10)—Domestic servants must be entered as cook bhisti, etc., in Column 10 and not in Column 9 as dependants. Persons temporarily out of employment should be shown as following their previous occupation.

Stress must be laid on the importance of avoiding vague words like labour or service or shop keeping. The enumerator must enter the exact kind of labour or service and the nature of the goods sold. In the case of service it is necessary, not merely to distinguish Government service, Indian State service, Railway service, Municipal service, Village service, service in a shop or office, and domestic service, etc., but also to show the exact occupation followed, *t. g.*, in the case of Government service, whether collector, or army officer, or civil court clerk, or police, excise inspector etc. In the case of clerks the occupation of their employer must be shown, *e. g.*, lawyer's clerk. Persons living on an income derived from agriculture must be distinguished as owners (*i. e.*, non-cultivating), cultivating owners, cultivating tenants (whether the rent is paid in kind or in cash) or agricultural labourers. Where a person cultivates part of his land and sublets part, he should be shown in Column 10, as a cultivator and in Column 11 as a landlord but if he gets the greater part of his income from land which he cultivates himself then he should be shown as cultivating owner in Column 10. Gardeners and growers of special products, such as pan etc. must be clearly described as pan grower etc. Persons whose income is derived from the rent of houses or land in towns should be distinguished from those who derive it from agricultural land.

Wherever large gangs of coolies are employed on earth-work of any kind, special instructions should be given to the Census staff to enter not only the word 'earth-work' but also the nature of the undertaking (railway, road and canal, etc.) in connection with which it is being done.

Column 15 (11)—Where a man has two occupations, the principal one is that on which he relies mainly for his support and from which he gets the major part of his income. A subsidiary occupation should be entered if followed at any time of the year. Only one subsidiary occupation (the most important one) should be entered in column 11.

NOTE:—In cases where a person with private means follows some occupation, the occupation should be entered in Column 10 and the source of this private income in Column 11. It should also be explained to the enumerating staff that replies such as are given to a Magistrate in court by a witness when asked for his profession are not enough.

At this Census, principal occupation of 'earners' was shown in Column 9 and that of the dependents, if any, in Column 11. An entry 'dependent' in Column 9 and an entry in Column 11 or some specified occupation showed occupation of working dependent. An entry in Column 10 showing principal business followed by an entry in Column 11 showed subsidiary occupation of the principal earner. An entry as dependant in Column 9 with no entries in Columns 10 and 11 signified non-working dependant. At the last census, Column 9 showed the occupation of actual earners as their principal means of livelihood. Column 10 was for showing the subsidiary occupation of actual workers. The working dependants were virtually shown as workers with actual earners. Column 11 was intended for showing the means of livelihood of persons on whom the dependants—non-working dependants as they are now called—depended for their livelihood. There was no means of knowing the particular occupation or occupations to which 1931 non-working dependants looked for their maintenance.

The figure of non-working dependants is, therefore, the difference between the total population and principal workers with working dependants of a unit

The innovation at the present census is that now only workers are shown for each occupation and workers are taken as consisting of three great classes (a) principal earners (b) working dependants (c) subsidiary earners. The enumeration of non-working dependants for each group of occupations has been dispensed with altogether.

1921

Column 9 (*Principal occupation of actual workers*)—Enter the principal means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants or who live on *house-rent, pension,* etc. Enter the exact occupation and avoid vague terms such as "service" or "writing" or "labour". For example in the case of labour, say whether in the fields, or in a coal mine or jute factory, or cotton mill or lac factory, or earthwork etc. In the case of agriculture distinguish between persons who receive rent and those who pay rent.* If a person makes the articles he sells he should be entered as "maker and seller" of them. Women and children who work at any occupation which helps to augment the family income must be entered in column 9 under that occupation and not in column 11. Column 9 will be blank for dependants.

Column 10 (*Subsidiary occupation af actual workers*)—Enter here any occupation which actual workers pursue at any time of the year in addition to their principal occupation. Thus if a person lives principally by his earnings as a boatman, but partly also by fishing, the word "boatman" will be entered in column 9 and "fisherman" in column 10. If an actual worker has no additional occupation, the column will be left blank. This column will be blank for dependants.

Column 11 (*Means of subsistence of dependants*)—For children and women and old or infirm persons who do not work either personally or by means of servants, enter the *principal* occupation of the person who supports them. This column will be blank for actual workers.

In the instructions to the superior census staff, these rules were thus amplified:—

"The entry of occupation in columns 9 to 11 is another matter requiring special care. Only those women and children will be shown as workers who help to augment the family income. A woman who looks after her house and cooks the food is not a worker but a dependant. But a woman who collects and sells fire-wood or cowdung is thereby adding to the family income, and should be shown as a worker. So also a woman who regularly assists her husband in his work (*e. g.*, the wife of a potter who fetches the clay from which he makes his pots), but not one who merely renders a little occasional help. A boy who sometimes looks after his father's cattle is a dependant, but one who is a regular cowherd should be recorded as such in column 9. Boys at school or college should be entered as dependants. Dependants of a joint family, the members of which follow different avocations, should be entered in column 11 under the occupation of the member who contributes most largely to the family income".

"Domestic servants must be entered in column 9, as cook, bhisti, etc., and not in column 11 as dependant on their master's occupation. Persons temporarily out of employ should be shown as following their previous occupation".

"Whenever large gangs of coolies are employed on earthwork of any kind, special instructions should be given to the census staff to enter not only the word 'earthwork' but also the nature of the undertaking (railway, road, canal, etc.) in connection with which it is being done".

"Where a man has two occupations, the principal one is that on which he relies mainly for his support and from which he gets the major part of his income. A subsidiary occupation should be entered *if followed at any time of the year.* Only one subsidiary occupation (the most important one) should be entered in column 10".

NOTE:—In cases where a person with private means follows some occupation that occupation should be entered in column 9 and the source of his private income in column 10.

"Stress must be laid on the importance of avoiding vague words like 'labour' or 'service' or 'shopkeeping'. The enumerator must enter the exact kind of labour or service, and the nature of the goods sold. In the case of service it is necessary, not merely to distinguish government service, railway service, municipal service, village service, service in a shop or office, and domestic service, etc., but also to show the exact occupation followed, *e. g.*, in the case of Government service, whether Collector, or Army Officer, or Civil Court clerk, or Police Inspector, etc. In the case of clerks, the occupation of their employer must be shown, *e. g.*, lawyer's clerk. Persons living on agriculture must be distinguished as landlords or rent receivers, and actual cultivators or rent payers. Where a person cultivates part of his land and sublets part, he should be shown in column 9 as a cultivator and in column 10 as a landlord, if he gets the greater part of his income from the land which he cultivates himself, and *vice versa.* Gardeners and growers of special products, such as betel, cocoanut, etc., must be shown as such. Persons whose income is derived from the rent of houses or land in towns should be distinguished from those who derive it from agricultural land".

1911

Column 9 (*Principal occupation of actual workers*)—Enter the principal means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants, or who live on house rent, pension etc. Enter the exact occupation and avoid vague terms such as 'service', or 'writing' or 'labour'. For example, in the case, of labour say whether in the fields or in a coal mine, or jute factory or cotton mill or lac factory or earth-work, etc. In the case of agriculture. distinguish between persons who receive rent and those who pay rent. If a person makes the articles he sells, he should be entered as 'maker and seller' of them. Women and children who work at any occupation which helps to augment the family income must be entered in Column 9 under that occupation and not in Column 11. Column 9 will be blank for dependants.

Column 10 (*Subsidairy occupation of actual workers*)—Enter here any occupation which actual workers pursue at any time of the year in addition to their principal occupation. Thus if a person lives principally by his earnings as a boatman, but partly also by fishing, the word 'boatman' will be entered in Column 9 and 'fisherman' in Column 10. If an actual worker has no additional occupation, enter in Column 10 the word 'none'. This column, will be blank for dependants.

Column 11—For children and women and old or infirm persons who do not work, either personally or by means of servants, enter the principal occupation of the person who supports them. This column will be blank for actual workers".

*If any further sub-division of agriculturists is contemplated in any province, provision will have to be made for it in this rule.

The supplementary instructions to the superior staff as issued in 1921 were also issued in 1911.

1901

At the present census three columns were provided, as noted in the margin, two for the principal and subsidiary occupations, respectively, of actual workers, and the third for the means of subsistence of dependants, or persons supported by the labour of others. The instructions for filling in these three columns were as follows:—

Occupation or means of subsistence of actual workers		Means of subsistence of dependants of actual workers
Principal	Subsidiary	
9	10	11

"*Column* 9 (*Principal occupation of actual workers*)—Enter the principal occupation or means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants, or who live on private property such as house-rent, pension, etc. The column will be blank for dependants."

"*Column* 10 (*Subsidiary occupation of actual workers*)—Enter here any occupation which actual workers pursue in addition to their principal occupation. If they have no such additional occupation, enter in this column the word 'none'. The column will be blank for dependants."

" *Column* 11 (*Means of subsistence of dependants*).—For those who do not work or carry on business, either personally or by means of servants, and who own no private property, enter the *principal* occupation of the head of the family or of the person who supports them. The column will be blank for actual workers".

In the instructions to supervisors these rules were thus amplified:—

"In column 9 general or indefinite terms such as 'service', 'shop-keeping', 'writing', 'labour' etc., must be avoided. The enumerator should find out and state the exact kind of service, the goods sold, the class of writing or labour".

"If a man says his occupation is service, it is necessary to distinguish:—

(1) Government service, (2) Railway service, (3) Municipal service, and (4) Village service, stating his rank and the nature of his work."

"In the case of domestic service the enumerator must state precisely the kind of service rendered. Pensioners should be shown as military or civil, as the case may be. Persons who live on the rent of lands or buildings in towns should be entered as landlords. Persons who live on money lent at interest or on stock, bonds, or other securities, should be shown as capitalists".

"In the case of agriculture distinguish—(1) Rent receivers, (2) actual cultivators, including sharers, and (3) field labourers, separating those regularly employed from those who work by the day or by the job. Gardeners and growers of special products such as tea, betel, etc., should be entered separately. In the case of labourers, not being agricultural labourers, distinguish earth-workers, labourers in mines, and operatives in mills, etc., stating the kind of mill or factory, such as jute mills, silk factories, etc. In the case of clerks the occupation of the clerk's employer should be noted. Accountants, cashiers, salesmen in shops, etc., should be shown separately. In the case of traders the kind of trade should be carefully specified, and it should be stated whether they make what they deal in. In the case of large manufactures show the proprietor as a manufacturer, and specify the branch of manufacture, as cotton manufacturer, etc. For minor industries state precisely the nature of the work done, for example, whether a weaver weaves cotton, silk, carpets, etc., whether a bangle-maker makes bangles of glass or lac, and so on."

"Persons engaged in home industries must be carefully distinguished from those employed in mills, whether large or small, and whether under European or native management."

"Women and children who work at any occupation, of whatever kind not being an amusement or of a purely domestic character, such as cooking, must be entered in this column, whether they earn wages or not. If a man has several subsidiary occupations, the enumerator should enter in column 10, only that on which he spends the most time. In the case of dependdants of a joint family, several members of which earn money, he should enter in column 11 the principal occupation of the eldest. Servants should not be shown as dependent on the occupation of their master".

Apart from the arrangement of columns, the main point of difference between the two sets of instructions is that in 1891 dual occupations were entered only where one of them was connected with agriculture, whereas at the present census, the entry of all dual occupations was provided for.

1891

Column 11 (*Occupation or means of subsistence*)—Enter in this column the occupation, as below prescribed, of all who do work, and, in the case of persons who do no regular work, enter the means whereby they subsist, such as house-rent, pension, & c. For young children, and women who do no work, enter the occupation of those by whom they are supported, but do not leave this column blank for any one. If a person has two or more occupa tions, enter the chief one only, except in the case of a person who owns or cultivates land in addition to another occupation, when both occupations should be entered, as....., &c. In the case of occupations connected with the land, the nature of the connection with the land must always be entered, as ....., &c. and it should be stated in the case of a landowner whether he cultivates himself or rents all his land to tenants. When a person is entered as an agricultural labourer, you should specify whether he is engaged by the year or month, or is a daily field labourer. Women who earn money by independent occupations from their husbands, as by spinning, ricepounding, selling grass, firewood, or cowdung cakes, or who do house work for wages should be entered under those occupations. If a person makes the articles which he also sells, you should enter him as 'making and selling such and such goods.' You must not enter general terms, such as servant, labourer, writer, munshi, &c., but must in each case specify the exact service, class of labour and of writing in which the person is engaged, as .....&c. If a person be a shopkeeper, you must mention the class of goods he sells. If a person lives by alms, you should put down whether he is a religious mandicant or an ordinary beggar. When a person is in Government, or other service, you should write the word 'Government' 'Municipal', &c., after and not before the special service; as, *Clerk Government*; *Signallers Railway*; *Sweeper Municipal*; &c. When a person is temporarily out of employ, his last or usual occupation should be entered.

1881

Column 10—Only such persons are to be shown in this column as actually do work contributing to the family income. Mere employment in such domestic occupations as spinning will not entitle women to be shown in this column unless the produce of their labour is regularly brought to market. When a person has two or more occupations, he should be entered as following the occupation whence his income is chiefly derived (*but if he combines agriculture with any other profession or trade, such as that of vakeel or money-lander, carpenter or smith, both occupations should be hown.*)*

General terms, such as servant, workman, dealer, must not be employed. In each case the specific service or trade in which the person is engaged must be named; e.g., watchman, officer messenger, digger, ploughman, cloth-seller. General expressions, such as *pesha-i-khud*, must not be employed. In every case the occupation must be indicated by the common vernacular term by which it is known, and not by the persian name; thus, *Kumhar* for potter, not *Kasgar*.

*NOTE:—This addition was made after the issue of the general instructions.

1872

It is throughout to be understood that, where there is a *special* class or sub-division in which an individual may properly be placed, he is to be reckoned as belonging to that class in preference to any more general class. Thus *all* Government servants will be enumerated under Class I. whatever be their particular calling.

When a person has two or more callings, that should be selected for him which is the most important.

Persons should not be entered in Class VII., Miscellaneous, excepting those who clearly fall within its recognized sub-divisions.

All clerks and accountants of merchants, and commercial or trading establishments of all sorts are intended to be placed in Class V, Sub-division L-4. The superior and directing officers in such establishments, and persons employed in the actual active operations of the business, as distinguished from the clerical and accounting duties, would be placed in the class or sub-division assigned to each special business.

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

B-VI

B-VI OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

FLY-LEAF

This is one of the two lables on occupational distribution of workers introduced in 1961 Census; other being Table B-V-Occupational Classification by sex of persons at work other than cultivation, which will be found in India Volume I Part II-B (ii).

It was for the first time that economic data have been collected and tabulated separately under, 'Industrial' and 'Occupational' Classifications in respect of workers other than those engaged in Cultivation. The term 'industry' denotes the sector of economic activity, in which the worker is engaged; while 'Occupation' connotes the exact function or work that an individual performs in that sector.

Table B-V gives the occupational distribution of workers according to the three-digit code structure of the National Classification of Occupations (N. C. O). According to this code structure all occupations are classified into Occupational Divisions (one-digit code numbers), Occupational groups (two-digit code numbers) and occupational families (three-digit code numbers). This table (Table B-VI) presents occupations cross-classified with educational levels and broad age groups: occupational classification is, however, confined to one-digit code, *i.e.*, Division in the N. C. O. This table relates to *urban areas only*.

The ten occupational Divisions of N. C. O. are spelt out below:

Division (code number)	Description
0	Professional, Technical and Related workers
1	Administrative, Executive and Managerial workers
2	Clerical and Related workers
3	Sales workers
4	Farmers, Fishermen, Hunters, Loggers and Related workers
5	Miners, Quarrymen and Related workers
6	Workers in Transport and Communication Occupations
7—8	Craftsmen, Production Process workers and Labourers not elsewhere classified
9	Service, Sport and Recreation workers
X	Workers not clasified by occupations

[Families 400—Cultivators (owners), 401-Cultivators (tenants) and 414-Agricultural Labourers are excluded from Division 4 and Group 'XO-workers without occupation' is excluded from Division X. The first mentioned three families relate to Industrial categories I and II adopted for the 1961 Census. These categories relate to cultivation and stand excluded from this Table, as it covers workers other than those in cultivation. The last mentioned group, *viz.*, 'XO', is excluded from the table since it relates to non-workers].

The data presented in the table relate to economic questions 10 and 11, Q. 2 on Age and Q. 6 on literacy and education of the individual slips. The economic questions are given in the Note and the instructions for recording answers to these questions have been reproduced in Appendix IV to the Note. Questions 2 and 6 with the relevant instructions are given below :

Question : "*Q.* 2 *Age last birthday*"

Instructions: "Write age in years completed last birthday. For infants below one year of age, write, 'O'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or religious events. You may use any local calendar of such events that may have been prepared for the purpose."

Question : "*Q.* 6—*Literacy and Education*"

Instructions:—I Illiterate or literate

For a person

1 who can neither read nor write or can merely read but cannot write in any language write O

2 who can both read and write write 1.

The test for reading is ability to read any simple letter either in print or in manuscript *i.e.*, if the person can read one of the examples in the Enumerator's Handbook with felicity, he maybe taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II Standard of Education

If a person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of 'L'.

Persons with 'O' returns were treated as illiterate and those with 'L' returns as 'literate' (without educational level); other returns of standard of education were tabulated according to the following educational levels:

(*i*) Primary or Junior Basic

(*ii*) Matriculation or Higher Secondary

(*iii*) Technical diploma not equal to degree

(*iv*) Non-technical diploma not equal to degree

(*v*) University degree or post-graduate degree other than technical degree

(*vi*) Technical degree or diploma equal to degree or post-graduate degree:—

Engineering

Medicine

Agriculture

Veterinary and Dairying

Technology

Teaching

Others

Data are presented in this table for India, each Zone, State and Union Territory for males and females distributed by literate (without educational level) and the educational levels enumerated above, further cross-classified by age groups, 0—14, 15—34, 35—59, 60+ and Age not stated.

Age distribution of "Total workers" (cols. 3—5), in each 'Occupational Division' is not available, as age tabulation was not done for "illiterate workers."

Statistics for lower administrative units such as, 'Division' and 'District', will be found in the corresponding table published in the Census volume of each State and Union Territory.

As this table covers *urban areas only* Dadra & Nagar Haveli, Laccadive, Minicoy and Amindivi Islands and North-East Frontier Agency which are entirely 'Rural', do not find a place in it.

'Urban area or a town' was defined as a place which was either a Municipal Corporation or a Municipal Area, or a Town Committee, or a Notified Area Committee or a Cantonment Board. Besides, places which did not have any of the above mentioned local bodies but possessed the following characteristics were treated as urban areas or towns :

(*a*) (*i*) A density of not less than 1,000 per square mile; (*ii*) a population of 5,000+ and (*iii*) three-fourths of the occupations of the working population should be outside of agriculture; or

(*b*) any other place which according to the Superintendent of Census Operations of the State, possessed pronounced urban characteristics and amenities.

A word by way of elucidation is indicated in regard to the figures appearing under 'Others' in the educational level, "Technical degree or diploma equal to degree or post-graduate degree" (cols. 32-33), which are rather in high proportion in the States of Maharashtra, Gujarat, Kerala, Punjab and Orissa and in the Union Territory of Tripura. In Maharashtra, Gujarat and Kerala, degree holders in general science subjects like Chemistry, Physics, Mathematics, Botany, Zoology, Meteorology, Geology, Geophysics etc. have been included under Others. Persons holding degree in law, commerce etc., or diplomas in library science and journalism have been classified under Others, in Punjab. In Orissa, in addition to the figures of degree holders in various disciplines mentioned in the case of Maharashtra, Gujarat and Kerala, persons in whose returns the 'degrees' were not clearly described, were also assigned to 'Others'.

Holders of 'B. L.' and 'LL.B.' degrees were assigned to this category in Tripura. The following two statements give the distribution of 1,000 literate workers (including those with educational levels) in urban areas in each occupational division (*i*) by broad age-groups and (*ii*) by educational levels :

B-VII PART A—PERSONS WORKING PRINCIPALLY (*i*) AS CULTIVATORS (*ii*) AS AGRICULTURAL LABOURERS OR (*iii*) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (*i*) AT HOUSEHOLD INDUSTRY (*ii*) AS CULTIVATOR OR (*iii*) AS AGRICULTURAL LABOURER

B-VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

FLY-LEAF

This table relates to persons who are engaged in more than one productive activity. In such cases an indication was given in the enumeration slip about principal and secondary work. The principal is the most important and the secondary is the next important work. The relevant instructions in regard to principal and secondary work are reproduced below:

> ".....After you have filled up the answers to Qs. 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, *i. e.*, more than one of the questions 8, 9, 10 or 11, has been filled up by some work, you should ask him which one of the activities that has been recorded for him is his principal work. The principal is the one on which the person spends most time. Put a ring round the number of the questions 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.
>
> "It may be that in a few cases you have recorded more than two productive activities in questions 8 to 11 *i. e.*, more than two of the questions 8 to 11 would have been filled up by some work. In such cases you should first ascertain the principal work, *i. e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work *i. e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put neatly so that no difficulty will be felt to recognise them clearly."

In Part A, the principal work as household industry is shown down to division and major group of the Indian Standard Industrial Classification. Similarly in Part B, the principal work *viz.*, non-household industry, etc., and the additional work *viz.*, household industry, are both given by divisions and major groups.

Part A relates to persons working principally (*i*) as cultivators, (*ii*) as agricultural labourers or (*iii*) at household industry, and are, at the same time engaged in any one of the other two categories as their secondary work; while Part B relates to persons whose principal work is in non-household industry, trade, business, profession or service and are engaged in household industry as their additional work.

The terms/concepts like 'household industry', 'worker', 'basis of work', etc., which have a relevance to the data presented in this table, have been elaborated in the Introductory Note.

Code numbers of the 'Divisions' and 'Major Groups' have been used in Part B of the table, while their detailed description is spelt out in the Annexure to this fly-leaf.

The economic questions 8 to 11 of the individual slip which provided data for this table and the instructions to the enumerators to fill in their answers are given in the Note and its Appendix II respectively.

Data are presented in this table for India, each Zone, State and Union Territory for total, rural and urban areas by sex break-up; similar information for lower administrative units such as 'Division' and 'District' will be had in the corresponding table published in the Census volume of each State/Union Territory.

Statistics do not appear against the Union Territory of Goa, Daman and Diu in both parts of the Table, as data were not collected for Household Industry (Category IV) as such, not for 'Principal' or 'Secondary' work separately, in the Census taken by the Portuguese Authorities in 1960 for this territory.

Similarly, relevant data for workers among 297,853 persons (Males 147,100, Females 150,753) from N. E. F. A. for whom an abridged family schedule was canvassed instead of all-India Census schedule, is not available.

Three statements below, based on the data presented in the table give at a glance for India as a whole, the distribution of workers as follows:

(*i*) Statement I gives the total workers working as cultivators, as agricultural labourers or at household industry having no secondary work along with their percentage to the total workers and the number of workers principally working as cultivators, as agricultural labourers or at household industry engaged in secondary work in any one of the other two categories along with their percentage to total workers engaged in secondary work separately for total, rural and urban areas;

(*ii*) Statement II gives distribution of 1,000 persons with secondary work, engaged as cultivators or as agricultural labourers or at household industry, as their principal work, according to their secondary work in either of the other two activities; and

(*iii*) Statement III gives distribution of workers engaged in non-household industry, trade, business, profession or service, in (*a*) principally engaged in non-household industry, trade, business, profession or service, with no secondary work at household industry and (*b*) principally engaged in non-household industry etc. with additional work at household industry for each industrial division (I. S. I. C.); and their proportion to total workers in non-household industry etc.

INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.)

This classification groups the industries into

9 Divisions

45 Major Groups

The divisions and major groups with their Code numbers are listed below:

DIVISIONS

0	Agriculture, Livestock, Forestry, Fishing and Hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not Adequately Described

MAJOR GROUPS

Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting

00	Field produce and plantation crops
01	Plantation crops
02	Forestry and logging
03	Fishing
04	Livestock and hunting

Division 1—Mining and Quarrying

10	Mining and quarrying

Division 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wood products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, petroleum and coal products
33	Chemicals and chemical products
34—35	Non-metallic mineral products other than petroleum and coal
36	Basic metals and their products except machinery and transport equipment
37	Machinery (all kinds other than transport) and Electrical equipment
38	Transport equipment
39	Miscellaneous manufacturing industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and gas
51	Water supply and sanitary services

Division 6—Trade and Commerce

60—63	Wholesale trade
64—68	Retail trade
69	Trade and commerce miscellaneous

Division 7—Transport, Storage and Communication

70—71	Transport

B-VIII PART B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

FLY-LEAF

This table relates to unemployed persons. The following two categories of unemployed persons are recorded in the Census : (1) Persons seeking employment for the first time and (2) Persons employed before but now out of employment and seeking work.

This table was compiled mainly from the answers to question 12, Activity if not working, and questions 2, Age and 6, Literacy and Education. The form of the questions and the instructions to the enumerators have been reproduced in Appendices III and IV to the Note and the fly-leaf to Table B-VI respectively. The two categories of unemployed persons referred to above are recorded in the Census as activities of non-workers. Only those persons who are not workers according to the 1961 Census definition and have returned themselves as seeking work have been recorded as unemployed persons.

The table is in two parts. Part A relates to urban areas and Part B to rural areas. Part A gives the figures of the two categories of unemployed persons separately. The unemployed persons in each category are classified by broad age-groups and these are further classified by educational levels. The age-groups adopted are as follows:

(*i*) Persons seeking employment for first time
- 15—19
- 20—24
- 25—29
- 30—34
- 35+
- Age not stated

(*ii*) Persons employed before but now out of employment and seeking work
- 15—19
- 20—24
- 25—34
- 35—44
- 45—59
- 60+
- Age not stated

The following educational levels have been adopted:

(1) Illiterate
(2) Literate (without educational level)
(3) Primary or Junior Basic
(4) Matriculation or Higher Secondary
(5) Technical diploma not equal to degree
(6) Non-technical diploma not equal to degree
(7) University degree or post-graduate degree other than technical degree
(8) Technical degree or diploma equal to degree or post-graduate degree
- Engineering
- Medicine
- Agriculture
- Veterinary and dairying
- Technology
- Teaching
- Others

Part B of the table does not give the figures separately for each of the two categories of unemployed persons given above. The two categories are clubbed together. The table presents data for unemployed persons aged 15 years and above. The educational qualifications are also restricted in that, data are given only for rural areas for the following qualifications:

(1) Illiterate
(2) Literate (without educational level)
(3) Primary or Junior Basic
(4) Matriculation and above

Data are presented in this table for India, each Zone, State and Union Territory; corresponding figures for lower administrative units such as 'Division' and 'District' will be found in the same table published in the Census volume of each State/Union Territory.

The following two statements give (*i*) distribution of 1,000 unemployed persons, males and females by educational levels in rural areas and (*ii*) distribution of 1,000 unemployed persons aged 15+ in broad age-groups and educational levels in urban areas :

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

B-IX

B-IX PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

FLY-LEAF

This is a table on non-working population giving their distribution according to each one of the eight types of activities recorded at the Census cross-classified by the age-groups 0—14, 15—34, 35—59, 60+ and 'Age not stated' and separately by sex and Rural/Urban areas. The earlier table, Table B-VIII, relates to unemployed persons among the non-working population and gives their distribution by age and educational qualifications.

The eight types of activities recorded at the Census in the case of non-workers are :

(*i*) Full time students

(*ii*) Household duties

(*iii*) Dependents, infants and disabled

(*iv*) Retired , rentier or independent means

(*v*) Beggars, vagrants etc.

(*vi*) Inmates of penal, mental and charitable institutions

(*vii*) Persons seeking employment for the first time

(*viii*) Persons employed before but now out of employment and seeking work

The relevant question and the excerpt from the instructions pertaining to that question reproduced below will bring out the significance of the various activities listed above:

Question : "*Q.*12 *Activity if not working*"

Instructions : "This question will apply to a person NOT WORKING.

Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the Questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT WORKING:

1 For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business . write ST

2 For a person engaged in unpaid home duties (like house wife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business . write HW

3 For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age . write D

4 For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work . . . . . write R

5 For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence . . write B

6 For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution . . . write I

7 For a person who has not been employed before but is seeking employment for the first time . write NE

8 For a person employed before but now out of employment and seeking employment . . write UN

Explanation : If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write 'B' in the question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in the Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in item 7 or 8.

As regards the activities 7 and 8, those persons who were non-workers according to the 1961 Census definition and who have returned themselves as *seeking work* have been recorded as unemployed persons.

Another question which supplied data for this table related to age: the form of the question along with instruction to record the answer is given in the fly-leaf to Table B-VI.

The term 'non-workers' (or persons not at work) and the ramifications of the concept of "basis of work" have been discussed in detail in the 'Note'.

Data are presented in this table for India, each Zone, State and Union Territory: figures for lower administrative units such as 'Division' and 'District' will be found in the corresponding table published in the Census volume of each State/Union Territory.

This table excludes population of non-workers from among 297,853 persons (Males 147,100, Females 150,753) of North-East Frontier Agency for whom an abridged family schedule was canvassed instead of

general all-India individual slip and so these characteristics of the data are not available for them.

A word by way of elaboration of the total absence of males in 'Household duties' in Kerala and West Bengal seems to be called for. In these two States 'Household duties (HW)' was not recorded in the case of males, under the impression that the activity applies only to females.

In a few cases 'domestic servants' were classified as 'HW' (Household duties) in Madras and Mysore. It happened owing to the erroneous classification of the returns of *Vittu Velai* (Tamil), which is 'domestic work' as household duties in the former State. In Mysore, the distinction between 'domestic work' or household duties performed by a member of a household does not seem to have been recognised by a few enumerators and hence recorded as 'HW'. This happened only in very few cases.

The following table gives the distribution of 10,000 male and female non-workers separately in age-groups and type of activities for Total, Rural and Urban areas:
