| Part V-A     | Special Tables for Scheduled Castes and Scheduled Tribes |

The main Census tables furnish the absolute figures (actual numbers) in respect of the relevant characteristics presented in them. The subsidiary tables give the percentage or proportionate distribution according to the important characteristics considered in the main tables and thereby facilitate an analytical study of the different aspects of the State's population. A discussion on these subsidiary tables will be found at the appropriate places in Part I-A—the General Report.

The Subsidiary Tables pertaining to the Housing Tables (E-Series) are printed in Part IV-A—Report on Housing and Establishments. Subsidiary Tables have not been prepared in respect of the Special Tables for Scheduled Castes and Scheduled Tribes printed in Part V-A.

NOTE: 1 The rural and urban break-up according to the first set of figures takes into account the new definition of towns of 1961 Census in addition to the territorial changes in the district; while the second set, within brackets takes into account only the territorial changes in the district

2 While working out the 1951 houses per sq. mile in urban areas for A.P. State and Guntur district for the second set of figures, the houses of those deleted towns for which the 1951 area figures were not available, were excluded from Urban and subsequently added in Rural

\*Figures for the Census years 1941, 1931 and 1921 are not shown as the required data are not available

NOTE: 1. The rural and urban break-up according to the first set of figures takes into account the new definition of towns of 1961 Census in addition to the territorial changes in the district; while the second set relates only to the territorial changes in the district.

2. While working out the 1951 rural and urban density figures for Andhra Pradesh State and Guntur district, for the second set of figures the population of those deleted towns for which the 1951 area figures are not available was excluded from Urban and added in Rural.
