ACKNOWLEDGEMENTS

The success of the 1961 Census depends upon the thousands of people who worked very hard during the operations and in the compilation of its results. A great share of the credit goes to the Deputy Commissioners and Subdivisional Officers who, in their capacities as District Census Officers and Subdivisional Census Officers, had been largely responsible for the smooth taking of the Census in spite of the many difficulties that we encountered. The Deputy District Census Officers (who were all Additional Deputy Commissioners except in three districts), the Principal Census Officers (who were either Extra Assistant Commissioners or Election Officers) and a whole host of gazetted and non-gazetted officers in every district and subdivision have thrown in their whole weight to bring the Census Operations to a successful close. But the greatest share of the credit goes to the enumerators who had to go from door to door to beg of the informations required by the Census questionnaire. The Supervisors and Charge Superintendents did their best to instruct and inspire the enumerators to carry out their duties faithfully.

My sincere obligations are due to Shri S. K. Datta, I.C.S., Chief Secretary to the Government of Assam, but for whose support the Census could not have been taken so smoothly. The Chief Secretary, the then Inspector General of Police (Shri Haidar Hussain, I.P.S.) and the District Magistrates rendered most valuable help in the maintenance of law and order before and during the operations.

I am greatly indebted to Shri Asok Mitra, I.C.S., Registrar General, whose guidance and experienced handling of the 1961 Census Operations made our task much easier. Shri D. Natarajan, Deputy Registrar General, was always helpful in administrative and technical matters ; while Shri K. D. Ballal greatly helped us by checking the accuracy of our tables.

My Tabulation Officers, Sarvashri J. C. Bhuyan and K. S. Dey, have been with me from the very beginning and greatly helped me during all phases of the Census Operations by imparting training to the field staff. During the tabulation and compilation of the results, they have been mainly responsible for all the tables. They also helped me in the final analysis of the Census data, and I seldom could dictate my write-ups without their assistance in supplying me with the necessary materials. All my office staff have also worked round the clock to enable me to carry out the arduous task of the operations and the compilations. My two Stenographers, Sarvashri G. Raghuram and J. Ramsden, have greatly helped me to complete the publications because I found it rather difficult to write in my own hand, whereas by dictation, I could do three to four times the work which I could have done had the whole thing been written in my own hand.

E. H. PAKYNTIN.

INTRODUCTION

In the earlier Indian Censuses, income or economic independence was made a criterion for measuring the economy of the country. Account was made of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-dependence was also introduced from the 1931 Census. This category was called 'working dependent' in the 1931 Census, 'partly dependent' in 1941, and 'earning dependent' in 1951, and even here an element of income was introduced. According to the concepts and definitions adopted in the 1951 Census for the collection of data on the economic characteristics of an individual, every person is labelled as a (i) 'self-supporting' person or (ii) an 'earning dependent' or (iii) a 'non-earning dependent'. Where a person is in receipt of an income, and that income is sufficient at least for his/her own maintenance, he/she is a self-supporting person. Such income may be in cash or kind. Anyone who is not a self-supporting person in this sense is a dependent may be either an earning dependent or a non-earning dependent; the test is whether he secures a regular income, even though it may be small. Where the income which he secures is not sufficient to support him, that person is termed as earning dependent. A person who does not secure any income either in cash or kind is a non-earning dependent.

It was felt that the strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income, like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household.

A departure has, therefore, been made in the concept for the collection of economic data in the 1961 Census and stress has been laid on WORK so that all people who work including family workers who are not in receipt of any income, or working children who cannot earn enough for their own maintenance, are included in the category of workers.

The concept of work for the 1961 Census is described below :—

1. Work constitutes participation.
2. Work implies production of economic goods or services either for consumption or for sale or exchange.
3. Basis of work :
 - (1) In seasonal work like cultivation, livestock, dairying, household industry, etc. some regular work of more than one hour a day throughout the greater part of the working season is considered as work.
 - (2) In case of regular employment in trade, profession, service, business or commerce, a worker should have been employed during any of the fifteen days preceding the day of enumeration.
 - (a) If the same person was found unemployed during the revisional round, no correction was made in the original record.
 - (b) A person who was working but was absent due to illness or other causes from work during the fifteen days preceding the day of enumeration or even exceeding the period of 15 days was treated as worker.
 - (c) A person who had been offered work, but did not actually join was considered a non-worker.

- (d) Work includes not only work but actual supervision and direction of work.
- (e) Persons under training as apprentices with or without stipend or wages had been regarded as working.
- (f) An adult woman who, in addition to household work, was engaged in other work such as rice pounding for sale or wages, or in domestic service for wages for others or minding cattle or selling fire-wood or making or selling cowdung cakes or grass, etc. is considered a worker.
- (g) A public or social worker actively engaged in public service activity or a political worker actively engaged in furthering the political activity of his party is considered a worker.
- (h) In the case of an under-trial prisoner enumerated in jail or in the case of a person who is temporarily in hospital or similar institution and enumerated in such institution, the previous work done by him before he went to such institution is regarded as his work.

A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or he may be doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer or he may be working both as a Cultivator and at Household Industry or he may be working in any possible combination of the above four categories of work.

Who are not Workers :

- (a) An adult woman engaged in household duties but doing no other productive work.
- (b) Persons like beggars, pensioners, agricultural or non-agricultural royalty-holders, rent or dividend receivers, who may be earning an income but did not participate in productive work, unless they also work in cultivation, industry, trade, profession, business or commerce.

One of the unique features of the 1961 Census is that all the Economic Tables are prepared on the basis of the principal work of a person. Each of the tables presented in this volume is preceded by a brief explanatory note where the utility or otherwise of a particular table is explained.

B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table corresponds, to elaborates and improves Union Table B-I of 1951 and presents the statistics in a more scientific and readily understandable form.

The table differs fundamentally in respect of distribution of population into different classes from that of 1951 where the entire population was divided into eight livelihood classes and each class was again subdivided into three economic-statuses namely, self supporting persons, earning dependents and non-earning dependents. In 1961, the table divides the entire population into two broad categories as workers and non-workers.

A person who does some work in any capacity and is in receipt of an income in cash or kind is a worker according to the 1961 Census. Where two or more members of a household jointly cultivate land and secure an income therefrom, each of them is regarded as a worker. The same applies to any other business carried on jointly.

Again, a person who is in receipt of an income but does not have to work and does no work such as a retired person, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not work is not regarded as a worker. Thus, the 'workers' include all economically active and semi-active persons of 1951 other than those who do not work. The status of non-working population is one with non-earning dependents of the 1951 Census. The non-working population is also sub-divided into eight different categories, but their classification is given in table B-IX.

The working population is again divided into nine categories, viz :—

I.—*Working as Cultivator*—a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land or supervision or direction of cultivation of land owned or held from Government and cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

II.—*Working as Agricultural Labourer*—is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share, such as share of produce. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decision as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages.

III.—*Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.*

IV.—*Working at Household Industry*—A Household Industry is defined as an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods.

VII—*Working in Trade and Commerce :*

VIII—*Working in Transport, Storage and Communications :*

IX—*Working in Other Services.*

This table accommodates Union table " C-II Livelihood Classes by age groups for sample populations " of 1951 and makes a significant improvement by dividing the population into four broad age groups on full count. The classification of workers and non-workers by age-groups is a special feature of the 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work , viz., children, young persons, middle aged persons and elderly persons.

This table therefore presents a picture of the economic status of the population classified by sex and broad age-groups separately for total, rural and urban.

**B-III—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY
EDUCATIONAL LEVELS**

This table corresponds to Union Table D-VII of 1951, but presents the statistics in a modified and improved form. It has two parts. Part A of the table relates to urban areas. Each of the nine categories of workers and also the non-workers are classified by literacy and educational levels. The term 'literate' stands for a person who is able to read and write but has not passed any written examination.

The following are recognised educational levels :—

- Primary or Junior Basic ;
- Matriculation or Higher Secondary ;
- Technical diploma not equal to degree ;
- Non-technical diploma not equal to degree ;
- University degree or post-graduate degree other than technical degree ;
- Technical degree or diploma equal to degree or post-graduate degree in
 - Engineering ;
 - Medicine ;
 - Agriculture ;
 - Veterinary or Dairying ;
 - Technology ;
 - Teaching ;
 - Others

This is an important table as it shows the employment of persons of different educational levels among the various categories of workers and assesses the educational qualification of available man power.

Part B of the table relates to rural areas. This part of the table confines the educational levels only to Primary or Junior basic, and Matriculation and above, and thereby it misses the classification of educational qualification into higher levels of Union Table D-VII of 1951.

The figures under different educational qualifications shown in Table B-III—Part A and the occupational data given in Table B-V show some minor inconsistencies. When such inconsistencies were detected at the tabulation stage, slips of the urban areas were checked again and it was found that in many cases, the detailed educational qualifications were not shown in the slips and only the word 'L' *i.e.* Literate (without educational level) was written. We can therefore conclude that the figures of different educational levels shown in the Table B-III—Part A are deflated while the figures under Literate (without educational level) have been inflated. Similarly, some figures of different educational levels have been shown under Literate (without educational level) in Table B-III—Part B also.

TABLE B-IV—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION BY SEX AND CLASS OF WORKER

This table corresponds to and elaborates and improves Union Table B-III of 1951.

It divides the working population other than persons at work at cultivation industrially into nine Divisions, fortyfive Major Groups and three hundred fortythree Minor Groups and into four statuses of employment. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only 10 Divisions and 88 Sub-divisions of industries and services. The present classification follows the National Classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers are classified by four employment statuses *viz* :—Employer, Employee, Single worker and Family worker as against Employer, Employee and Independent worker in 1951. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers, are only employees.

A Single Worker is a person who works by himself but not as head of a household in a Household-Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a Single Worker includes a person who works in joint partnership with one or several persons hiring no employees and also a member of a producers Co-operative. Each one of the partners or members of such producers' Co-operatives is treated as single worker.

A Family Worker is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative. These explanations seem necessary for a study of this table.

This table has three parts. Part-A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part-B deals with persons at work in non-household industry, trade, business professions or service by the four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part-C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy of our country.

The following is a statement showing the distribution of 10,000 workers other than those working as cultivators or as agricultural labourers by industrial division of the Indian Standard Industrial Classification in the State.

Industrial Division of I. S. I. C.	Total			Urban		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total	10,000	10,000	10,000	10,000	10,000	10,000
Division 0	3,146	2,654	4,106	149	134	279
Division 1	42	57	13	3	3	2
Division 2 & 3	2,358	1,109	4,796	2,013	1,639	5,124
Division 4	245	355	29	204	226	19
Division 5	5	7	N	21	23	7
Division 6	1,136	1,626	179	2,123	2,287	758
Division 7	465	694	18	1,377	1,517	210
Division 8	2,495	3,355	818	4,039	4,111	3,441
Division 9	108	143	41	71	60	160

The above Table shows that among non-agricultural workers in the State, maximum number of workers are in Division 0 (Agriculture, Livestock, Forestry, Fishing and Hunting). The higher percentage is due to the fact that the workers in Tea Plantation which is the foremost industry in the State, have come under this division.

Division 8 relates to Services including Public Service, educational and medical service, religious service personal service etc. and therefore the percentage of worker is as much as 24.95.

Due to large number of female workers in household industry, figures under Division 2 & 3 (Manufacturing) appear to be quite big although Assam is not industrially developed.

Trade and Commerce which falls under Division 6 contributes 11.36 per cent of the total workers in non-agricultural categories.

As regards the female workers, it is seen from the above table that 8,902 women out of 10,000 are in Divisions 0 and 2 & 3. We have stated earlier that sufficient number of women are engaged in Household Industry and Tea Industry in Assam and these two industries fall in Divisions 2 & 3 and 0 respectively.

The Indian Standard Industrial Classification is reproduced below which will explain how a particular industry is classified in this Census. The code numbers for Divisions and Major Groups given in Col. 1 of the Tables B-IV Part A and B-IV Part B and for Divisions, Major Groups and Minor Groups mentioned in column 1 of the Table B-IV Part C are explained in this Industrial Classification.
