HOUSEHOLD ECONOMIC TABLES

M. AHMED, I.A.S.
Superintendent of Census Operations
Orissa

ACKNOWLEDGMENT

Household Economic Tables presented in this volume have been centrally tabulated at New Delhi on the basis of 20 per cent sample household schedules which were despatched by the Deputy Superintendents in charge of Zonal Tabulation Offices. The method of sampling and coding of the household schedules are explained in detail in the Introductory Note.

2. Excepting the addition of Introductory Note and brief notes explaining each Table, which work was done in this office, all the contents of this volume were worked out by the Mechanical Tabulation Unit, New Delhi. The entire credit for production of the Tables, as they appear in the following pages, goes to that Unit.

3. I am thankful to Shri D. Natarajan, Deputy Registrar General, India, under whose able guidance these Tables were planned and prepared. Thanks are also due to Shri S. C. Sharma, Mechanical Tabulation Officer for the trouble taken in compiling the Tables with meticulous care and in scheduled time, a task by no means easy particularly on account of novelty of character of the assignment.

INTRODUCTORY NOTE

The Household Economic Tables are introduced for the first time in the Census of 1961. The criterion of enquiry relating to economic activities of the people has undergone remarkable change at present. In the previous censuses, income or economic independence was the criterion for measuring the economy of the country. A count was made of all persons who were economically independent and of those who were not. But the intermediate category of economic semi-independence was introduced from 1931. This category continued under some name or other up to the Census of 1951. The element of income was always the basis of such category. But in the present Census, stress has been laid on actual work and not income, so that all people who work, including family workers who are not in receipt of any income, or working children who cannot earn enough for their maintenance, have been included as workers. In the past such category of persons were missed from the class of economically active persons. It was felt that the strict application of the criterion of income or economic independence suppressed those who participated in economic activities but did not actually earn any income. The departure from income to work as the basis in the present Census is considered an improvement in obtaining the economic characteristics of the country.

2. Every family or household has been treated as an entity for purpose of certain specific information. In the past, the Census enquiry was confined to the individual. The practice was to collect various items of information with regard to the individual and to account for them in the shape of a number of statistical Tables. Now for the first time, a family or a household has been taken as one unit of enumeration in addition to an individual being also treated as a similar unit. It was considered that in a country where not all the goods produced in a household entered the money market and where much of the goods produced was consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information were supplemented by some more concerning the economic activities of the household as an entity. With regard to cultivation, for example, it is possible to get a more accurate picture by enquiring about the family as one economic unit rather than enquiring separately about

each single member of that family. Under local conditions the cultivating operations are generally attended to by many members of a family. Such members lend a helping hand in different cultivating operations beginning from preliminary ploughing of the land to harvesting and disposal of the crop. Similarly with regard to Household Industries, such as, preparation of fried rice for sale, making of clay toys and other varieties of dolls, manufacture of ornaments made of lac, etc., it is seen that several members of the family from an old woman to a young boy, give assistance to the principal worker. The product of such household industry is really the outcome of the labour of all members of the family who took part in it. Thus a correct picture of the family economy can be built up more satisfactorily by treating the family as one unit. This is expected to give a more reliable account of the economic and social structure of the country than what was obtained in the censuses of past decades. Cultivation and household industry being the chief economic activities of households in the country, the Household Schedule was designed to collect data on these two aspects in particular.

3. The form of Household Schedule consists of two parts, namely, Part I—Household Schedule and Part II—Census Population Record. It is intended to record consolidated information regarding the household as a unit. Among the important items of information contained therein, one is cultivation of the family holding with details of acreage, nature of tenure and ownership, and another, household industry conducted by the head of the household or by a member thereof, based on manufacture, processing or servicing in a small-scale not falling under the scope of registered factories. The second part of the Schedule, the Census Population Record, is a complete list of the members of the household indicating the name, sex, relationship, age, marital status and description of work, if any.

4. Household cultivation relates to the extent of land under cultivation, either owned or held from Government, or held from private persons or institutions for payment in money, kind or share, or both. The land was classified according to the local name of right of ownership or of cultivation. Household cultivation also included land not actually cultivated by a household, but given to a private person for cultivation for payment in money, kind or share.

5. Under Household Industry, the nature of the industry and the number of months in the year during which it was conducted was given. A simple definition acceptable to all levels of intelligence and application was adopted for Household Industry. The emphasis was laid on participation of the head of the household or of one or more members of the household in conducting the industry.

6. At the back of the Household Schedule, there is the 'Census Population Record'. It is a list of the persons as counted at the Census in each household giving essential

information for each individual enumerated, viz., name, relationship to the head of the household, age, marital status and description of work, if working. This will serve as a valuable document that can be used as a sampling frame after the 1961 Census in any enquiry based on households.

7. The specimen form of Part I—Household Schedule together with the elaborate instructions issued to enumerators is reproduced below from the Manual of Instructions for Census Personnel, Part II.

Household Schedule Form

CONFIDENTIAL

CENSUS OF INDIA, 1961

[To be filled up during Enumeration]

Is this an institution

PART I—HOUSEHOLD SCHEDULE

LOCATION CODE: _____

Full Name of Head of Household _____ S.C. S.T.

A. Cultivation		Local name of right on land		Area in acres	
1. Land under cultivation by Household					
(i) owned or held from Government					
(ii) held from private persons or institutions for payment in money, kind or share					
(iii) Total of items (i) and (ii)					
2. Land given to private persons for cultivation for Payment in money, kind or share					
B. Household Industry		Nature of Industry		Number of months in the year during which conducted	
Household industry (not on the scale of a registered factory) conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas					
(a)					
(b)					
C. Workers at Cultivation or Household Industry		Members of family working:			
Members including Head of family working and/or hired workers kept wholetime during current or last working season		Head	Other males	Other females	Total
1. Household Cultivation only					
2. Household Industry only					
3. Both in Household Cultivation & Household Industry					
					Hired workers

Dated Signature of Supervisor

Dated Signature of Enumerator

Note—Part II—Census Population Record should be filled up during the first round of enumeration (10 February to 28 February) from the enumeration slips relating to the household and brought up-to-date with corrections, if any, after the second visit during check period from 1st March to 4th March, 1961.

FILLING UP HOUSEHOLD SCHEDULE

8. The definition of household has been given in Part I of the Instruction Manual as follows—

"A household is a group of persons who commonly live together and take their meals from a common kitchen, unless the exigencies of work prevent any of them from doing so."

9. Every household in your area has already been given a number during the house-numbering operation. First check up if this house number is written in a prominent place. If the number has faded out or disappeared, it must be written again at once. Thereafter, one piece of Household Schedule should be filled up for each household in the following manner.

Location Code

10. The first entry to be made relates to the Location Code. Write the location code of the household according to the instructions given earlier.

Is this an Institution

11. At the right hand corner of the form this question has been mentioned together with a rectangle below it. If the house under enumeration is a hostel, hotel, hospital, boarding house or any penal, charitable or mental institution, write the nature of the institution within the rectangle, viz., jail, hostel, etc.

Full name of Head of Household

12. Below the location code, there is a column for recording the full name of the Head of the Household. The Head of the Household for Census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the Household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of Household the name of the person who is actually acknowledged as such.

13. Institutions like boarding houses, messes, etc., should also be regarded as Census households. They are, however, to be regarded as households of "unrelated persons living together". In such a household, the Manager or Superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded

as Head of the Household. If in an Institution, separate families are also living, each such family should be treated as a Census household and a separate Household Schedule should be filled. In such cases the full name of the recognized Head of the Household should be written.

14. If the Head of the Household is a person who spends the week-days in town and spends the week-end at home, he should be recorded as Head of Household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period, then the person who is in charge in his absence should be recorded as the Head of the Household.

Scheduled Caste or Scheduled Tribe

15. On the right hand side there is a parallelogram with the letters S.C. written outside it. If the Head of the Household is a member of Scheduled Caste, find out the name of the caste in the list of Scheduled Castes. If the name of the caste as given by the Head of the Household tallies with or is considered to be equivalent to the name of the caste as given in the list then the name of the caste as it appears in the list should be recorded within the parallelogram and then the letters (S.C.) should be written after the name of the caste. Similarly, if the Head of the Household claims to be a member of any Scheduled Tribe, verify the name of the tribe from the list and then record the name of the tribe in the parallelogram and write (S.T.) after the name of the tribe. The name of a caste or tribe which does not appear in the list or which is not considered locally as equivalent to one of the names of the castes or tribes should not be entered. If the Head of the Household does not belong to a Scheduled Caste or a Scheduled Tribe, you should put 'X' within the parallelogram.

A. Cultivation

16. You should then fill up the part of the Household Schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation, sub-part 'B' to Household Industry and sub-part 'C' to workers at Cultivation or Household Industry.

17. Sub-part 'A' relating to Cultivation will have to be filled in only where the Household actually cultivates the land. (Land includes all land normally used

for cultivation purposes including temporary fallows). Three categories of land are given in the schedule, namely, in items 1(i), 1(ii) and 2.

18. Items 1(i) and 1(ii) relate to land actually cultivated by one or more members of the household. Item 2 relates to the land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases, the total area of separate plots or parcels of land in different places should be entered up to one place of decimal. A number of lines has been provided for this purpose 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognized local rights. If the household cultivates land owned or held from Government or taken from private persons or institutions or if the household has given land to private persons for cultivation purposes, you should ascertain the local name of the right on such land and record in the column relating to "local name of right on land."

19. Category 1(i), namely, land owned or held from Government will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment,

- (i) with rights of permanent, heritable and transferable possession,
- (ii) with rights of permanent and heritable possession, but without the right of transfer and
- (iii) temporary or conditional leases of any kind with the Government.

20. Category 1(ii) namely, land taken from private persons or institutions for payment in money, kind or share, will include land,

- (i) with rights of permanent, heritable and transferable possession,
- (ii) with rights of permanent and heritable possession but without right of transfer, and
- (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also),
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area, in other cases he does not possess the right),
- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period,
- (d) tenants holding land on temporary lease who are liable to ejectment, and
- (e) areas held on condition of rendering service either to a village community or to Government. (This also includes cases where labourers on plantation are given some land for cultivation with permanent rights).

21. Category 1 (ii) will also include the following:

- (a) land taken for a fixed amount of money,
- (b) land taken for a fixed amount of produce,
- (c) land taken for a share of the produce,
- (d) land for which money is paid partly in one and partly in any other form mentioned above, and
- (e) land held free of consideration.

22. Category 2, namely, land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1 (ii)

23. Categories I (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, land which lies within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself

is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to "Area in acres." You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of and in acres you should, if possible, make a conversion from the local measure into acre. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted. Areas should be filled up to one place of decimal, such as, 5.2 acres.

24. This sub-part will not apply to households which do not possess any land. Thus it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

25. Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under "right" enter "Co-operative farm". Labour hired by such a co-operative farm should not be entered for this household.

B. Household Industry

26. Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself or by any or all members of the household either at home or within the village in rural areas. In case of urban areas, it should be at home only and not outside. The industry should not be on the scale of a registered factory. The participation of the Head of the household or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A household industry should relate to production, processing servicing or repairing and includes makers and sellers of goods.

27. The test for a Household Industry is mainly threefold:

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least a part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the house, hold scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside bring of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.
- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organization is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

28. The following activities should also be regarded as illustrative of Household Industry. Bidi-makers

29. Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry (s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

30. Sub-part 'C' relates to Workers in Cultivation or Household Industry.

31. In the case of households which are engaged only in cultivation, if the Head of the household is working, write 'I' under the column "Head". Then ascertain how many other male and female members of the family are working, and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to "Total". Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholtime employment during last working season or should be in wholtime employment during current working season.

32. Similarly in the case of households engaged in Household Industry only, if the Head of the household is working, write 'I' in the column relating to the 'Head' and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total

number of family workers including the Head, if he is working, in the column relating to "Total" and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

33. If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write '1' under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to "Total". Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

34. Even if any of the working members of the family or any hired labourer is absent during the period of the Census count, he should be counted for the purposes of the Household Schedule.

35. In the case of hons holds engaged in Cultivation only, put 'X' in the columns relating to "Household Industry only" and "Both in Household Cultivation and Household Industry". Similarly, in the case of Households engaged in Household Industry put 'X' in the columns relating to "Household Cultivation only, and "Both in Household Cultivation and Household Industry." If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to "Household Cultivation only" and "Household Industry only". If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

36. A person should be regarded as a "Worker", if he does one or more than one of the following type of work:

- (i) if he is actually working
- (ii) if he is only supervising the work
- (iii) if he is only giving directions for the work

37. The specimen form of Part II—Census Population Record together with the instructions for filling it up, is reproduced below from the Manual of Instructions for Census Personnel, Part II.

PART II—CENSUS POPULATION RECORD

(To be compiled from Individual Census Slips)

[illegible]

Dated Signature of Supervisor

Dated Signature of Enumerator

FILLING UP CENSUS POPULATION RECORD

38. The Census Population Record is a small register for noting down the names and some particulars of all the persons enumerated in one particular household.

39. For each household within your Block, one copy of the Household Schedule has to be filled up. On the back side of the Household Schedule form, there is the form of Census Population Record. Immediately after preparing enumeration slips of all the members of a particular household, you should begin to fill up the Census Population Record at the back of the Household Schedule for that household, before you proceed to the next household for enumeration work.

40. The Census Population Record is meant for recording six items of information only, in respect of every individual of the particular household. These six items are—

(i) *Name*—The name of the person enumerated as you have recorded against question 1 (a) of the enumeration slip, should be recorded here.

(ii) *Sex*—It should be noted down whether the person is a male or a female as recorded by you in question 13 of the enumeration slip.

(iii) *Relationship to Head*—Whatever entry you have made in question 1 (b), should be entered here to show the relationship of the enumerated person to the Head of the household.

(iv) *Age*—Note down the age as recorded in question 2 of the enumeration slip.

(v) *Marital status*—Similarly record the marital status of the person enumerated as noted in question 3 of the slip.

(vi) *Description of work*—This column will be filled up in respect of a person who has been treated as a worker (that is to say, for whom a certain entry has been made in question 8 or 9 or 10 or 11). Whatever entry has been made with regard to his work should be repeated here. This column should not be filled up in respect of a person who is treated as not working (that is to say, for whom an entry has been made in question 12). Put 'X' in this column in respect of a person not working. This is how six entries should be made with regard to one person.

41. If there are 3, 4 or more persons in that household, similar entries should be made in respect of each such person in the Census Population Record.

42. You will find that there are only 14 lines for making entries in the Census Population Record. In other words, if a household contains 14 members, the form will be completely filled up. If it contains lesser number of members, a few lines will be left blank. Put an underline below the last entry in this form to show that this is the end of the record relating to that household. Supposing there are five members in the household, five lines should be filled up, and below the 5th entry one bold underline in ink should be put.

43. In the lower part of the form there are columns for recording the total number of persons—male and female, in that household. Strike the total for the males and another for the females and lastly a grand total of all the male and females in that household. After completing the Census Population Record in this manner, you should proceed to the next household for enumeration.

44. In case there is addition of members to the household by birth, marriage, etc., or in case of death of a member of the household after the date of enumeration and before the sunrise of 1st of March, the Census Population Record will have to be amended according to the instruction given separately.

45. Thus the Household Schedule filled up for each household provides for the collection of data on the chief economic activities of all the households in the State, namely, cultivation and household industry as well as the family composition of the household.

46. *Sampling of Household Schedules*—The Household Economic Tables are compiled on the basis of data collected from the 20 per cent sample Household Schedules. Each Census Charge is taken as a unit for the purpose of collection of samples. The Household Schedules are first arranged in the serial order of the households in the village, and of villages in the Charge. A random sample is taken from the first five Household Schedules. Every fifth Household Schedule from this random sample is stamped with the letter **(S)** indicating the sample. All these samples which work out at 20 per cent of the total Household Schedules in the Charge, are taken out and carefully stitched into bundles of 100 schedules each. They are handed over to a team of trained Codists for coding.

47. *Method of Coding*—Coding is an important item of responsibility as the mechanical tabulation is entirely dependent on it. Special care had to be taken in

selecting and training the Codists. The prescribed instructions issued by the Registrar General, which are reproduced below, were followed.

INSTRUCTIONS FOR CODERS

Card Column	Description	Column in Household Schedule	Code Numbers	Where to code
1	2	3	4	5

48. After completion of coding for each district, the Household Schedules were despatched to the Mechanical Tabulation Unit, New Delhi, where they were mechanically tabulated and the Household Economic Tables were prepared. There are altogether eight Household Economic Tables which are listed below:

B-X ... Sample Households (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry for *all areas*

B-XI ... Sample Households engaged in cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately

B-XII ... Sample households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately

B-XIII ... Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately

B-XIV ... Sample Households engaged only in Household Industry classified by Principal Household Industry in *all areas*
Part A—Households classified by major groups of Principal Household Industry and number of persons engaged

Part B—Households classified by minor groups of Principal Household Industry

B-XV ... Sample Households engaged both in Cultivation and Household Industry classified by size of land in Rural and Urban areas, separately

B-XVI . . Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in *all areas*

B-XVII . . Sample Households classified by (i) number of male and female members by size of households and (ii) engagement (a) neither in Cultivation nor in Industry, (b) in Household Industry only and (c) in Cultivation sub-classified by size of land cultivated

49. *Comprehensiveness of the Household Schedule*—Although the form apparently looks simple, the right and ownership of the lands held by individuals have to be diligently distinguished by the enumerator for correct recording of the answers. Elementary knowledge of the local tenancy system is also essential for applying the correct terminology in filling up the Household Schedule. In spite of the elaborate instructions given, all the enumerators did not appear to have become conversant with appropriate local terminologies of the land tenure system. The illiteracy of a large percentage of cultivators combined with the ignorance of many of the enumerators has resulted in the inadequate description of different rights over the land held by them.

(ii) Not much difficulty was experienced in computing the given area into acres though the acreage given by the Heads of households indicated in many cases only the approximate idea. In some cases, the scare of the proposed land ceilings by the Land Reforms Legislation and the consequent private partitions contributed

to the concealment of the correct acreage held by the household. As cross checking of this information with Settlement records is not envisaged in the scheme, it is not possible to estimate the extent of error. Moreover, the Settlement records themselves are not complete or up-to-date in most part of the State.

(iii) The distinction between the household industry and non-household industry needed proper understanding. Similarly the workers in the household industry needed careful classification into family workers and hired workers. Considering the intricacy of the work the over-all performance may be regarded as satisfactory.

50. *Conclusion*—In spite of the limitations in the collection of data for each household, these Tables provide the basic information regarding the economic activities of each household in the urban and rural areas. Households engaged in cultivation and the size of the land held by them is essential for planning consolidation of holdings and to preclude further fragmentation as a measure to step up agricultural production. Development of rural industries as secondary means of livelihood for the agriculturists is already engaging the attention of the Government. These Tables which give the relevant basic data might help in formulating plans for the growth and development of rural economy.

51. Brief notes explaining the contents of each Table and the abbreviations used in them are given at the beginning of each Table.

TABLE B-X

**HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY
(ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH
AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY
FOR ALL AREAS**

TABLE B-X
HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY
(ii) ENGAGED EITHER IN CULTIVATION OR IN HOUSEHOLD INDUSTRY BUT NOT IN BOTH
AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY
FOR ALL AREAS

(Based on 20 per cent sample)

This Table is prepared on a 20 per cent sample of households and for Total, Rural and Urban households. All the households are divided into four categories :

- (i) Households engaged neither in Cultivation nor Household Industry
- (ii) Households engaged in Cultivation only
- (iii) Households engaged in Household Industry only
- (iv) Households engaged both in Cultivation and Household Industry

2. Similar economic data on the basis of households were not collected in any previous Census.

3. *Household*—A household means the entire group of persons who commonly live together and take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

4. This Table is important as it divides all the households into three main sectors of economic activity in the State.

5. The data are presented for the State, District and for each Police Station within the district. Information relating to all Urban areas in the district is given separately.

**TABLE B-X—HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD
INDUSTRY (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY
BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND
HOUSEHOLD INDUSTRY FOR ALL AREAS**
(Based on 20 per cent sample)

TABLE B-XI

**SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY
INTEREST IN LAND AND SIZE OF LAND CULTIVATED
IN RURAL AND URBAN AREAS SEPARATELY**

TABLE B-XI
SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND
AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20 per cent sample)

This Table, which is prepared on a 20 per cent sample of households for Rural and Urban areas separately, presents a more detailed analysis of the Cultivating Households which have been separated in the previous Table. Households engaged in Cultivation are classified according to the size of land cultivated. The holding sizes in acres are less than 1 acre, 1·0 to 2·4 acres, 2·5 to 4·9 acres, 5·0 to 7·4 acres, 7·5 to 9·9 acres, 10·0 to 12·4 acres, 12·5 to 14·9 acres, 15·0 to 29·9 acres, 30·0 to 49·9 acres and 50+ acres. It is further cross-tabulated by the interest in land, namely, (i) Land owned or held from Government, (ii) held from private persons or institutions for payment in money, kind or share and (iii) partly held from Government and partly from private persons for payment in money, kind or share.

2. The statement below shows the number of Cultivating Households according to the size of the holdings in the Rural and Urban areas together with their percentages.

Size of the holding	Rural		Urban	
	No. of Sample Households	Percentage	No. of Sample Households	Percentage
	2	3	4	5
1				
Total	477,341	100·0	6,074	100·0
Less than 1 acre	39,140	8·2	385	6·3
1·0— 2·4 acres	147,016	30·8	1,817	29·9
2·5— 4·9 acres	130,452	27·3	1,509	24·9
5·0— 7·4 acres	75,686	15·9	1,002	16·5
7·5— 9·9 acres	26,642	5·6	306	5·0
10·0—12·4 acres	22,316	4·7	344	5·7
12·5—14·9 acres	7,976	1·7	102	1·7
15·0—29·9 acres	20,260	4·2	393	6·5
30·0— 49·9 acres	4,140	0·9	118	1·9
50+ acres	1,658	0·3	91	1·5
Unspecified	2,055	0·4	7	0·1

3. This Table gives useful information on the size of the holdings which may be of interest to the administration. It gives an indication of the number of holdings likely to be (i) deficit, (ii) self-sufficient and (iii) surplus with regard to the needs of consumption of the household concerned.

TABLE B-XH

**SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF
LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS
IN RURAL AND URBAN AREAS SEPARATELY**

TABLE B-XII

**SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF
LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND
HIRED WORKERS IN RURAL AND URBAN
AREAS SEPARATELY**

(Based on 20 per cent sample)

This Table like the previous ones is prepared on a 20 per cent sample of households separately for Rural and Urban areas. A further study of households engaged in cultivation is made in it. Each household having a particular size of holding mentioned in Table B-XI has been cross-tabulated with reference to number of persons working in cultivation. Cultivating households according to number of persons of either sex engaged in cultivation are classified into five groups, namely, 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons.

2. This Table shows male and female family workers separately. In the case of households where more than one person is working, the number of hired workers has been separated from the family workers. The sex-composition of hired workers, however, is not given.

3. This Table is important as it furnishes information on the extent of rural under-employment and yields surmises on the size and scale of agricultural enterprise.

TABLE B-XII—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20 per cent sample)

TABLE B-XIII

**SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY
SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD
INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY**

(Based on 20 per cent sample)

This Table, which is prepared on a 20 per cent sample of households for Rural and Urban areas, deals with households engaged both in Cultivation and in Household Industry. The nature of Household Industry in which cultivating households with a particular size of holding are engaged, are presented in this table. The type of the Household Industry is indicated by Divisions and Major Groups of I. S. I. C. This Table throws light on Household Industries which are carried on as ancillary to cultivation. It endeavours to establish correlation between size and scale of cultivations and size and scale of Household Industry.

2. The description of code numbers of Divisions and Major Groups used in this Table is given below:

Code	digit	No.	Description
Division	0	..	AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING
Major Group	00	..	Field Produce and Plantation Crops
	01	..	Plantation Crops
	02	..	Forestry and Logging
	03	..	Fishing
	04	..	Livestock and Hunting
Division	1	..	MINING AND QUARRYING
Major Group	10	..	Mining and Quarrying
Division	2 & 3	..	MANUFACTURING
Major Group	20	..	Foodstuffs
	21	..	Beverage
	22	..	Tobacco Products
	23	..	Textile—Cotton
	24	..	Textile—Jute
	25	..	Textile—Wool
	26	..	Textile—Silk
	27	..	Textile—Miscellaneous
	28	..	Manufacture of Wood and Wooden Products
	29	..	Paper and Paper Products
	30	..	Printing and Publishing
	31	..	Leather and Leather Products
	32	..	Rubber, Petroleum and Coal Products
	33	..	Chemicals and Chemical Products
	34-35	..	Non-metallic Mineral Products other than Petroleum and Coal
	36	..	Basic Metals and their Products except Machinery and Transport Equipment
	37	..	Machinery (all kinds other than Transport) and Electrical equipment
	38	..	Transport Equipment
	39	..	Miscellaneous Manufacturing Industries

3. *Appendix*—Major Groups of Household Industry having less than 10 per cent of the figures of their respective divisions are omitted from this Table and are shown in the Appendix. The divisions which are so affected are marked with asterisk in the table.

TABLE B-XIV

SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY
CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY *IN ALL AREAS*

Part A—Households classified by major groups of Principal Household Industry and number of persons engaged

Part B— Households classified by minor groups of Principal Household Industry

TABLE B-XIV

**SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED
BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS**

Part A—Households classified by major groups of Principal Household Industry and number of persons engaged

Part B—Households classified by minor groups of Principal Household Industry

(Based on 20 per cent sample)

This Table which relates to households engaged in Household Industry only is prepared on a 20 per cent sample of households for Total Rural and Urban separately. It is presented in two parts :

Part A deals with Households classified by major groups of Principal Household Industry and number of persons engaged. The number of persons engaged in each industry are grouped under 1, 2, 3—5, 6—10 and more than 10 persons. This information is supplied for Divisions and Major groups of the I. S. I. C. Scheme.

Part B deals with Households classified by minor groups of Household Industry. Number of Households engaged in Household Industry under each minor group are shown in it. Description of the minor groups are given in the table.

2. The code description of the Divisions and major groups appearing in Part A of this Table are given below

Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting

Major group 00—Field Produce and Plantation Crops

Major group 01—Plantation Crops

Major group 02—Forestry and Logging

Major group 03—Fishing

Major group 04—Livestock and Hunting

Division 1—Mining and Quarrying

Major group 10—Mining and Quarrying

Division 2 & 3 —Manufacturing

Major group 20—Foodstuffs

Major group 21—Beverages

Major group 22—Tobacco Products

Major group 23—Textile—Cotton

Major group 24—Textile—Jute

Major group 25—Textile—Wool

Major group 26—Textile—Silk

Major group 27—Textile—Miscellaneous

Major group 28—Manufacture of Wood and Wooden Products

Major group 29—Paper and Paper Products

Major group 30—Printing and Publishing

Major group 31—Leather and Leather Products

Major group 32—Rubber, Petroleum and Coal Products

Major group 33—Chemicals and Chemical Products

Major group 34-35—Non-Metallic Mineral Products other than Petroleum and Coal

Major group 36—Basic Metals and their Products except Machinery and Transport Equipment

Major group 37—Machinery (all kinds other than Transport) and Electrical Equipment

Major group 38—Transport Equipment

Major group 39—Miscellaneous Manufacturing Industries

3. *Appendix* —Major groups of Household Industry having less than 10 per cent of the figure of the respective divisions are omitted from Part A of this Table and are shown in the Appendix. Divisions thus affected are marked with asterisk*.

APPENDIX TO TABLE B-XIV—PART A

Major groups of Household Industry having less than 10 per cent of the figures of their respective Divisions, which are omitted from the main Table, are shown in this Appendix. The major groups having the number of Households and number of persons engaged in each Household Industry are shown within brackets and are presented in run-on lines.

The following abbreviations are used in this Appendix:

1 Person—A
2 Persons—B
3—5 Persons—C
6—10 Persons—D
More than 10 Persons—E
Unspecified—F
ORISSA STATE

TABLE B-XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

TABLE B-XV
SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND
HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND
IN RURAL AND URBAN AREAS SEPARATELY.

(Based on 20 per cent sample)

This Table which is prepared on a 20 per cent sample of households, shows the households engaged both in Cultivation and Household Industry by size of holdings in Rural as well as Urban areas. An analysis has been made of persons working in these households with reference to the size of the holdings. In cases where more than one person is employed, the number of family workers and hired workers is separately given.

2. A comparison between this Table and Table B-XII will show how the combination of Household Industry with cultivation affects the employment position. It establishes correlation between the scale of Household Industry and the scale of Cultivation.

3. It may be interesting to note that the number of hired workers is the lowest in cultivating households with less than 1 acre and their proportion compared to family workers is negligible in cultivating households with less than 2.4 acres. The gradual increase in the proportion of hired workers coincides with the larger size of the cultivated area from which it can be deduced that larger the size of the cultivable holding, greater is the participation of hired workers.

TABLE B-XV—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD

(Based on

INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY—contd.

20 per cent sample)

Table B-XV[illegible]

TABLE B-XVI

**SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY
PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS
ENGAGED IN HOUSEHOLD INDUSTRY *IN ALL AREAS***

TABLE B-XVI

**SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND
TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY *IN ALL AREAS***

(Based on 20 per cent sample)

This Table is confined to Principal Household Industry only and is prepared separately for Total, Rural and Urban areas on the basis of 20 per cent sample of Households. It gives data in respect of Households engaged both in household industry and cultivation or in Household Industry only without cultivation.

2. As many of the Household Industries are seasonal, this Table indicates the number of households engaged in industrial occupations for different periods in the year ranging from 1—3 months, 4—6 months, 7—9 months and 10 months to 1 year. The number of male and female family workers participating in the industrial activities together with the number of hired workers are shown in separate columns.

3. Household Industries dealt in this Table are shown by Divisions and Major groups. The description of the Divisions and Major groups are already given in Notes to Table B-XIII and B-XIV Part A.

4. Appendix : Major groups of Household Industry having less than 10 per cent of the figures of their respective divisions are omitted from this Table and are shown in the Appendix. A mark of asterisk is given against the divisions thus affected.

5. This Table furnishes important data on the seasonability of Household Industry with seasonability of cultivation. The analysis of the data for households with cultivation and for households without cultivation may throw some light on relative employment.

TABLE B-XVI—SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN ALL AREAS

APPENDIX TO TABLE B-XVI

Major groups of Household Industry having less than 10 per cent of the figures of their respective divisions which are omitted from the main Table are shown in this Appendix. These major groups followed by number of Households together with the period of working within brackets, are given in run on lines. It is prepared separately for Total, Rural and Urban areas.
The following abbreviations have been used :—

With Cultivation			Without Cultivation		
1—3 months	..	A	1—3 months	..	B
4—6 months	..	B	4—6 months	..	F
7—9 months	..	C	7—9 months	..	G
10—12 months	..	D	10—12 months	..	H
Months not stated	..	X	Months not stated	..	Y

TABLE B-XVII

SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY, (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUBCLASSIFIED BY SIZE OF LAND CULTIVATED

TABLE B-XVII

TABLE B-XVII—SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY, (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED
(Based on 20 per cent sample)

This Table is compiled on a 20 per cent sample of Households and gives data for Total, Rural and Urban areas separately. It is intended to show family sizes distributed according to one member, small, medium, large and very large families. By definition, a 'Census Household' is not the same as a 'Family'. The Household includes persons who are not members of the family but were staying with the family during the Census enumeration. Therefore, this Table gives a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

2. The sizes of Households are grouped under single member household, 2—3 members, 4—6 members, 7—9 members and 10 members and over. This is cross-tabulated by Households of rural areas engaged (i) neither in Cultivation nor in Household Industry, (ii) in Household Industry only and (iii) in Cultivation. Households of rural areas engaged in cultivation are further classified according to the size of the holdings i.e., less than 1 acre, 1.0—2.4, 2.5—4.9, 5.0—7.4, 7.5—9.9, 10.0—12.4, 12.5—14.9, 15.0—29.9, 30.0—49.9 and 50+ acres.

3. This Table is important as it endeavours to correlate the size of the Household with the economic activity of the household, particularly in Rural areas. The analytical data of the size of the Household and the size of the holding is very useful for studying the agricultural problems in the countryside.

4. The total number of Households and their sexwise population for the State and all the 13 districts are given below for Total, Rural and Urban areas separately.
