ACKNOWLEDGEMENTS

By bringing out this Part of the Census Report we have revived the practice of publishing a separate and independent Census Report on Cities after a lapse of two decades.

We are very much indebted to Shri K. D. Ballal, Central Tabulation Officer, New Delhi, and his staff for having carefully scrutinised the contents of the tables and for valuable suggestions for improvement.

In the Maharashtra Census Office, Sarvashri D. V. Rangnekar, Deputy Superintendent of Census Operations, N. Y. Gore, J. G. Deshmukh, Tabulation Officers, and S. D. Bhatvadekar, Statistical Assistant rendered valuable assistance in the preparation of the tables and the Explanatory Notes. Sarvashri C. M. Kane, N. B. Thakur and S. V. Deorukhkar looked after the printing arrangements of the report.

We also take this opportunity to thank Shri T. N. Ninan, Manager Government of India Press, Nasik, and his staff for excellent printing and bringing out the report expeditiously in spite of their various commitments.

EXPLANATORY NOTE

This part contains following thirty-nine tables presenting the 1961 Census data separately for each of eleven cities in Maharashtra (excluding Greater Bombay). Seven of these tables also present material separately for each Ward of the City. The Census tables for Greater Bombay have been published in a separate part (Vol- X Maharashtra Part X (1-B) Greater Bombay Census Tables).

Series of tables	No. of tables
A	2
B	13
C	6
D	6
E	5

Total	39

For Sholapur city however, 37 tables are presented as tables B XVII and C I were not prepared.

No rigid definition of 'city' has been prescribed but all urban areas of one lakh or more inhabitants (i.e., all Class I Towns of 1961 Census) have been "ipso facto" classed as cities. According to the original plan the Census tables for each city were intended to be published separately with suitable Introductory Note. Accordingly, the Census tables for Sholapur City have been printed. On account of time taken in printing of various Census publications and the necessity of observing austerity measures during emergency period it was decided to publish the Census Tables for all cities together in one volume. The Census tables for Sholapur City which were already printed have been, therefore, incorporated in this publication at the end as Annexure.

Census Procedure

2. The Census was taken on the 'canvasser method', which had been used in all previous Censuses. The enumerators called on each household in their assigned areas between 10th and 28th February, 1961, and filled in Census forms by interviewing one or more responsible members of the household. They re-visited all these households between 1st and 5th March, and corrected their forms for changes owing to births and deaths occurring between their first visit and the Census reference date, viz., Sunrise of 1st March, 1961. The material presented in this part thus relates to 1st March, 1961, which closely approximates the completion of the Second Five-Year Plan and beginning of the Third.

3. The Census work in each city was generally entrusted to the Chief Officer (also known as Executive Officer or Secretary of the Municipality) and was designated as Charge Officer. The following arrangement was done in respect of 11 cities of Maharashtra for which data are presented in this publication.

Sl. No.	Name of City	Officer in charge of Census work (i. e., Charge Officer).
1	Thana	The Chief Officer, Thana Municipality.
2	Ulhasnagar	The Administrator, Ulhasnagar Municipality.
3	Nasik	The Senior Executive Officer, Nasik Municipality.
4	Malegaon	The Chief Officer, Malegaon Municipality.
5	Ahmadnagar	The Chief Officer, Ahmadnagar Municipality.
6	Poona	The Medical Officer of Health, Poona Municipal Corporation.
7	Sholapur	The Chief Officer, Sholapur Municipality.
8	Kolhapur	The Chief Officer, Kolhapur Municipality.
9	Akola	The Secretary, Akola Municipal Committee.
10	Amravati	The Secretary, Amravati Municipal Committee.
11	Nagpur	The Deputy Municipal Commissioner, Nagpur Municipal Corporation.

4. Numbering and listing of houses was carried out as the first stage of Census work between April, October, of 1960 mainly by the Municipal staff. Preparations for enumeration work began almost simultaneously with the completion of the first stage. The average population size for each enumeration block was fixed as 600. The enumerator working in the first stage prepared separate houselist sets (see paragraph 9) for areas approximately covering this population and having some natural boundaries for demarcation.

5. Two booklets were issued in English and Marathi for use as self-contained manual of instructions for the two stages of Census work. Training for enumerators and supervisors was organised separately for the two stages of work. Training for enumeration was very intensive and was imparted in three rounds which also included field practice of enumeration.

6. A supervisor was appointed to supervise Census work of six enumerators. He was instructed to inspect the entire work of each of his enumerators in the first two days. The supervisors were made responsible both for timely completion and quality of Census work of all their enumerators.

7. Enumerators and supervisors were paid honorarium for Census work. This was done to meet out of pocket expenditure incurred by them on travelling and stationery articles and also as an incentive for good work.

Census Questionnaire

8. There were three Census Questionnaire forms :—

- The Houselist to collect information in respect of houses and households ;
- The Individual Slip to collect information in respect of each individual ; and
- The Household Schedule to collect information in respect of each household.

9. The information regarding houses and households obtained through the houselists included the following items :—

Houses—

(i) Purpose for which the house was used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, etc.

(ii) Material of wall.

(iii) Material of roof.

Households—

(iv) Name of the head of the household.

(v) Number of rooms in use by the household.

(vi) Whether the household was living in an owned house or a rented house.

(vii) Persons living in the household—

(a) males,

(b) females,

(c) total.

Factory or Workshop—

If a house was being used as a workshop or a factory the following additional information was obtained for that house :—

(viii) Name of the firm or proprietor.

(ix) Name of the product, repair or servicing under taken.

(x) Average number of persons employed daily.

(xi) Kind of fuel or power used.

The information collected on houses, households and factories and workshop was used for preparation of E Series Tables on housing and establishments.

10. The information collected in respect of each individual included the following demographic, social and economic items :—

For identification—Location Code—

1 (a) Name.

1 (b) Relation-ship to the Head of the Household.

Demographic Questions—

2 Age.

3 Marital status.

4 (a) Birth place.

4 (b) Born, rural or urban.

4 (c) Duration of residence, if born elsewhere.

13 Sex.

Social Questions—

5 (a) Nationality.

5 (b) Religion.

5 (c) Scheduled Caste or Scheduled Tribe.

6 Literacy and Education.

7 (a) Mother-tongue.

7 (b) Any other language(s).

Economic Questions—

8 Working as cultivator.

9 Working as agricultural labourer.

10 Working at household industry—

(a) Nature of work;

(b) Nature of Household Industry;

(c) If Employee.

11 Doing work other than 8, 9 or 10—

(a) Nature of work ;

(b) Nature of industry, profession, trade or service ;

(c) Class of worker ;

(d) Name of Establishment.

12 Activity, if not working.

11. The two demographic questions 4(b) and 4(c) had been added in 1961 Census to study migration in greater detail.

12. There were five economic questions (8 to 12) in the Individual slip. A departure was made in the concept for collection of economic data. At the last few Indian Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependants. An intermediate category of economic semi-dependence was introduced in 1931, 1941 and 1951. They were called working dependants in 1931, partly dependants in 1941 and earning dependants in 1951. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income. The 1961 Census, therefore, laid stress on 'work' so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers.

13. The following information in respect of economic activities of each household was collected through the "Household Schedule" :—

A. Cultivation

	Local name of right on land	Area in acres
1. Land under cultivation by Household—		
(i) Owned or held from Government—		
(ii) Held from private persons or institutions for payment in money, kind or share		
(iii) Total of items (i) and (ii)		
2. Land given to private persons for cultivation for payment in money, kind or share		

B. Household Industry—

Nature of Industry	Number of months in the year during which conducted
(a)	
(b)	

C. Workers at Cultivation or Household Industry—

	Members of Family working			Hired workers
	Head	Other Males	Other Females	
1. Household Cultivation only.				
2. Household Industry only				
3. Both in Household Cultivation and Household Industry.				

14. The "Household Schedule" was a new feature of 1961 Census. It was thought that in the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information was supplemented by information relating to economic activities of the household as an entity. The "Household Schedule" was, therefore, designed to collect data on the two chief economic activities of the household. The information collected in this schedule was used for preparation of Household Economic Tables of which only one table viz. C-I is given for cities.

Compilation and Coverage

15. Material obtained in the Census was subsequently processed in temporarily established Tabulation Offices. Results are presented in the various tables included here. A few Census tables do not apply to the City area. They are not included here. The numbers given to the different tables in the 1961 Census scheme have, however, been retained to facilitate comparison with other cities in India, non-city urban areas or rural areas of the district or the State.

16. The material presented in the tables relates only to the area included in the Municipal limits. The suburban areas situated outside the Municipal limits are not covered. Except in the case of Ahmednagar, material for the adjoining Municipal (or Cantonment) areas has not been included in any table excepting the summary figures shown in the Primary Census Abstract.

Notes on Tables

17. The following paragraphs contain brief notes on the tables. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series :—

General Population Tables

18. This Series contains two Tables for cities (A-I and A-IV) presenting area, density, occupied residential houses, population and growth of population during the last six decades.

Table A-I (Wardwise)

19. This table presents area, density (population per square mile), occupied residential houses and population (persons, males and females) in 1961 for the City and each Ward separately. Area and density figures for wards are, however, not given. Area figures have been obtained from the Municipal offices.

20. Column 5 of the table shows occupied residential houses for each territorial unit. A house is a structure or part of a structure having a separate entrance, whether that entrance leads directly to the street, or to a common staircase, a courtyard or a gate.

21. Houses are classified by their uses, e.g. as dwellings, shops, workshops, temples, schools, offices, etc. Some houses are partly used for residential purposes and partly as shops, workshops, offices, etc. They are classified as shop-cum-dwellings, workshop-cum-dwellings, etc. Every house where one or more persons were found to be residing (irrespective of the house being used only as a residence or partly as a residence and partly for some other purpose), is classified as an occupied residential house. The number of occupied houses shown here includes apart from residential houses, garages, depots or shops, school premises, where one or more persons (may be drivers, watchmen, servants, etc.) were found to be residing at the time of the Census. It does not, however, include houses which are residential houses but which at the time of the Census, were either vacant or where no person was found to be residing.

22. Population shown in this or any other table in this publication for the City or a Ward is the night-time population normally residing within its limits. It does not include persons who come from other places for work during the day.

23. Enumeration of a person was done at the place of his normal residence. Every person was enumerated at the place of his normal residence though he may not be actually present at the time of the enumerator's visit. Persons likely to be absent from the place of normal residence throughout the enumeration period, i.e., from 10th February to Sunrise of 1st March 1961 were, however, not enumerated at those places. On the other hand, guests found in any house at the time of enumeration were enumerated at places of their temporary residence when they were likely to be absent from the places of their normal residence during the whole of the enumeration period. In either case, the instructions were to ask the person if he has been enumerated anywhere else and to enumerate him only if he had not been enumerated elsewhere. Once enumerated he was advised not to allow himself to be enumerated again.

Table A-IV

24. This table shows the growth of city's population since 1901. Population shown here for any previous Census is only urban population and does not include the population in that Census of villages which were not then a part of the City and have subsequently been included in Municipal limits.

GENERAL ECONOMIC TABLES

25. There are 13 Tables in this series, showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified into nine broad categories of economic activity in the first three tables (P.C.A., B-II and B-III-Part A). A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-Part A, Part B and Part C and by occupation under the National Occupational Classification Scheme in Tables B-V and B-VI. Two Tables B-VII-Part A and B-VII-Part B show the classification of workers by secondary work. The last two Tables B-VIII and B-IX present distribution of non-workers by sex, age, literary and eight broad types.

26. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

- (i) self-supporting persons;
- (ii) earning dependants; and
- (iii) non-earning dependants.

27. The 1961 Census laid stress on 'work' so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers. The concept of dependency used in the previous censuses has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on earning or economic dependence.

28. A person is classified as worker if—

- (a) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and
- (b) in the case of regular (non-seasonal) employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the Enumerator's visit to the household.

29. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

30. 'Work' includes not only actual work but effective supervision and direction of work also.

31. Persons under training as apprentices with or without stipend or wages are regarded as workers.

32. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cow-dung cakes, or grass, etc., or any such work she has been treated as a worker.

33. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession or service.

34. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

35. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

36. The Census Questionnaire did not ask any question to determine the extent of full employment or under-employment.

37. Classification of workers doing two or more different types of work has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns a larger portion of their income.

38. The period of reference for regular (non-seasonal) work in any industry, trade, profession or service was 15 days preceding the date of Enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., some regular work of more than one hour a day throughout the greater part of the last working season was the criterion. Entries in regard to industry and occupation were not corrected in the second round visits of the Enumerators with reference to the reference date of 1st March, 1961. The material on economic activity presented in these tables relates to the reference period approximating to the conditions as on 1st March, 1961.

Primary Census Abstract (Wardwise)

39. This table shows summary figures for the 1961 Census. It shows for the city and each of its wards number of occupied houses, number of households total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers for males and females separately. The workers are further classified into nine broad categories of economic activity.

40. The economy of adjoining towns and villages is always dependant upon that of the city. Housing shortage also leads to an overflow of the city population to nearby towns and villages. Census statistics of nearby places are, therefore, included in this table

as they will be useful in locating the direction of the city's influence or in determining the degree of dependence of those places upon the city and the nature of services rendered by them.

41. Column 4 shows the number of households for each unit. 'Household' is slightly different from 'Family'. It is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

42. The total population shown in the Primary Census Abstract is inclusive of 'houseless population and institutional population'.

43. Population of the Scheduled Castes and Scheduled Tribes is shown separately for males and females. The figures relate only to the group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I. Limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all Backward Castes or Tribes even in the city. They include only the castes or tribes notified as Scheduled Castes or Scheduled Tribes for the city area.

44. Columns 12 to 15 show the figures for the houseless and institutional population.

45. *Houseless population*.—Some persons do not have any fixed place of residence. They go on moving, from place to place, camp at night or just live on streets, pavements, in gardens or open spaces without erecting huts or similar structures. All such houseless persons were specially enumerated on the night of 28th February, 1961. These include—

(i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets;

(ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts, just on the open grounds; and

(iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the foot-paths, streets and in places like parks, gardens, seashore, railway yards, etc.

46. *Institutional population*.—Includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

47. A 'literate' is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross-tabulated with age-groups is presented in Table C-III—Part B.

Broad Categories of Economic Activity

48. The workers are classified by sex and in the following nine broad categories of economic activity:—

- I Cultivator.
- II Agricultural labourer.
- III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV Household Industry.
- V Manufacturing other than Household Industry.
- VI Construction.
- VII Trade and Commerce.
- VIII Transport, Storage and Communications.
- IX Other Services.

CATEGORY I

49. This category includes both the owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

CATEGORY II

50. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

CATEGORY III

51. Workers in mining, quarrying, livestock, forestry, fishing, hunting, and plantations, orchards and allied activities are included in this category.

CATEGORY IV

52. 'Household Industry' is defined as an industry conducted at home by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to making and selling of goods. Thus, the main criteria for household industry are its smaller scale, its being run at home and the participation of the head of the household and/or one or more members of the household. A person working as an employee in another person's household industry has also been treated as working at household industry.

CATEGORY V

53. 'Manufacturing' includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

CATEGORY VI

54. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraphs, telephones, waterways, reservoirs, etc.

CATEGORY VII

55. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, money-lending, banking, etc.

CATEGORY VIII

56. This category includes workers engaged in transport activities by air, rail, road or water and in service incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraphs, telephones, wireless signalling, information and broadcasting are also included in this category.

CATEGORY IX

57. This category includes: (i) public utility services like electricity or gas or water supply and sanitary services; (ii) Central, State or Municipal employees; (iii) professional services; and (iv) trade or labour associations, recreation services, etc.

Table B-II

58. This table gives a break-up of the distribution of workers in nine broad industrial categories and one of non-workers for the city shown in the Primary Census Abstract by four broad age-groups. The four age-groups, viz., 0-14, 15-34, 35-59 and 60 years and over, used in the table correspond to the different stages of life which have special significance with reference to the capacity to work, viz., children, young, middle aged and elderly persons. A line 'Age not stated' is added to show figures of persons who had not returned their ages.

Table B-III—Part A

59. This table gives distribution of workers in nine industrial categories and one of non-workers by educational levels. Distribution of population classified by age-groups and educational levels will be found in Table C-III—Part B.

60. Literacy as defined in the Census is ability to read and write a simple letter.

61. Educational levels shown here are those which have already been attained and not those which are being studied. A person who has completed 'primary level' is included in the group 'Primary or Junior Basic' though he may be studying in a higher standard. A person who is studying or had studied in Intermediate class is included in the group 'Matriculation or Higher Secondary' and so on. The figures of literates (without

educational level) presented in the table are exclusive of persons with educational levels. Similarly, the figures for any educational level are exclusive of persons who have attained higher educational levels.

62. Persons who have studied upto the 4th standard but have not passed the Primary stage are included in the group of literates (without educational level). Pupils studying in the 1st and 2nd standard who could not read and write a simple letter are included in the group of illiterate persons.

Industrial Classification

63. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV—Part A, B-IV—Part B, B-IV—Part C, B-VII—Part A and B-VII—Part B of the present Series show the distribution of workers other than 'cultivators', and 'agricultural labourers' by industry according to the Standard Industrial Classification which is reproduced as Appendix I at page 17. For want of space it has not been possible to provide description of each group of industry in the tables. They are shown only by industry division, major group or minor group codes in one, two or three digits respectively, as the case may be.

64. The nine broad categories of workers shown in the Primary Census Abstract and Tables B-II and B-III—Part A conform to the industry divisions as follows:—

Category	Industry Division
I Cultivator	.. } Minor Groups 000, 001, 002, 003, and 004 from Division 0
II Agricultural Labourer	.. }
III Mining, Quarrying, etc.	.. Division 0 (except minor groups 000 to 004) and Division 1.
IV Household Industry	.. Division 0 (except minor groups 000 to 004), Divisions 1, 2 & 3.
V Manufacturing	.. Division 2 & 3
VI Construction	.. Division 4.
VII Trade and Commerce	.. Division 6.
VIII Transport, Storage and Communications.	.. Division 7.
IX Other Services	.. Divisions 5, 8 and 9 (except minor group 999).

Table B-IV—Part A

65. This table gives the distribution of workers engaged in household industry by status of employment and by each industry division and major group of household industry separately. Major groups of household industry which do not have any workers in the City are not shown here. Columns 6 and 7 show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in these household industries). Columns 4 and 5 on the other hand show the workers who are working as employees in household industries not of their own.

66. Since the distribution by industry presented here is exclusively of workers engaged in household industry the break-up under column 1 is restricted to Industry division '0' with its major groups '00' to '04', Industry division '1' with its only major group '10', and Industry division '2 & 3' with its major groups '20 to 39'.

Table B-IV—Part B

67. This table presents the distribution of all workers (other than those working in Categories I, II and IV) by industry divisions and major groups (Appendix I at page 17) and by employment status. The classification by employment status is in four classes, viz., 'employer', 'employee', 'single worker' and 'family worker':—

An 'employer' is a person who employs other persons in order to perform economic activity in which he is engaged.

An 'employee' is a person who usually works under some other person for salary or wages in cash or kind.

A 'single worker' is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A 'family worker' is a member who works without receiving wages in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in household duties are non-workers and are not, therefore, treated as family workers.

Table B-IV—Part C

68. This is a very important table as it gives the employment position in all sectors of economy except agriculture in the city. It shows the distribution of all workers (other than those in Categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I at page 17). The number of workers against each industry division, major group or minor group is further split up and shown separately for household industry and non-household industry, trade, profession, service, etc. By definition of the household industry, the breakup for household industry is restricted to industry division 0, 1, 2 & 3 and their relevant major and minor groups only. Major and minor groups which do not have any workers in the city are not shown here.

Occupational Classification

69. Occupation of a worker is the function which he performs by engaging himself in work in any branch of economic activity which is called his industry.

70. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II at page 24.

71. The concept of occupation is distinct from that of 'Industry'. The latter is defined as the sector of economic activity in which a worker is engaged. A worker no doubt follows his occupation within a certain industry but the basis for classification of the latter is the character of the establishment or the field of activity in which he is working, while that for the classification of the former is the work performed personally by the individual concerned. Thus, for a clerk working in a cotton textile mill, the industry is manufacture of cotton textiles; while occupation is that of clerk. A clerk working in a bank is engaged in an identical occupation but his industry is banking. The industry of a spinner working in a cotton textile mill is identical with that of the former clerk, but he engages himself in a different 'occupation', viz., Spinner.

72. For the first time in the 1961 Census the two concepts of 'Industry' and 'Occupation' have been used with specific meanings distinct from each other and tables have been prepared separately with an elaborate classification of the working population both by Industry and Occupation.

Table B-V

73. This table presents the distribution of workers (other than those falling under Occupational families 400, 401 and 414) by occupational divisions, groups and families (Appendix II). For each occupational division, group or family, the workers are further classified by a categorywise break-up of their industry. Occupational groups or families which do not have any workers in the City are not shown here. For an occupational group or family which has all the workers in only one category of industry only one line shows the total workers for that group or family as well as for the category of industry. The occupational group X0 and its families X00, X08 and X09 are not applicable to this table, since this group relates to non-workers.

Table B-VI

74. This table presents the occupational distribution of persons at work other than cultivation by sex, broad age-groups and educational levels.

75. Occupational break-up is limited to the ten Occupational Divisions (one digit codes) of the National Occupational Classification Scheme.

76. Age-groups used are 0-14, 15-34, 35-59 and 60+. A line is added to show those who had not stated their ages.

77. Occupational and age-group break-up of illiterate workers is not shown here.

78. For definition of 'Literacy' please see paragraph 47.

Table B-VII-Part A

79. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In

case a worker is engaged in two or more kinds of work the one which consumes the largest portion of his time (not necessarily earning the largest portion of his income) is treated as his principal work, the next consuming the second largest portion of his time is his secondary work. The secondary work is shown in the table classified only by three broad categories, viz., I—Cultivators, II—Agricultural Labourers and IV—Household Industry. Workers who may be engaged in the above secondary work, and work principally in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. Similarly, the distribution of workers engaged in categories other than I, II or IV as secondary work and engaged in any one of categories I to IX as principal work is not shown here.

80. This table will also enable analysis of workers engaged in secondary work by major groups of their principal work at household industry. The number of secondary workers is shown by category numbers I, II and IV standing respectively for work as cultivator, as agricultural labourer and at household industry. Number of workers for each category of secondary work is shown in brackets 'M' standing for males and 'F' for females.

81. The principal work at household industry (Category IV) is further classified into Industry Divisions and Major Groups according to the Standard Industrial Classification Scheme. The relevant Divisions and Major Groups are Division 0 with its major groups 00, 01, 02, 03 and 04, Division 1 with its only one major group 10, and Divisions 2 & 3 with its major groups 20 to 39.

Table B-VII-Part B

82. This table presents the distribution of workers engaged in household industry as secondary work who are working principally in Categories III, V, VI, VII, VIII or IX. Both the principal and secondary work have been classified into Industry Division and Major Groups according to the Standard Industrial Classification Scheme.

83. The nature of principal work of workers doing secondary work is shown by a description of the branch of industry under column 1. Similarly, the nature of household industry in which additional work is performed is described by the branch of that household industry under column 2. The number of workers for males and females are shown in brackets.

Table B-VIII-Part A

84. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

85. The break-up by age for the first type of unemployed persons is into age-groups 15-19, 20-24, 25-29, 30-34 and 35 and above and that for the other group is 15-19, 20-24, 25-34, 35-44, 45-59, and

60 and above. For both the types the age-group 'Age not stated' is shown for persons who had not returned their ages. The educational levels are the same as those shown in Table B—III-Part A.

Table B-IX

86. This table presents the distribution of non-workers by the following eight types cross-tabulated by sex and four broad age groups:—

(1) Full-time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time in their own family cultivation, industry, trade or business;

(2) Persons engaged in unpaid home duties (like housewives or other adult females) who do no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business;

(3) Dependants, including infants and children not attending school, persons permanently disabled from work because of old age, etc.;

(4) Retired persons who are not employed again rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend and other persons of independent means for securing which they do not have to work and who do no other work;

(5) Beggars, vagrants, independent women without indication of source of income and others of unspecified source of existence;

(6) Convicts in jail, inmates of penal, mental or charitable institutions (under-trial prisoners are shown as workers if they used to work before they were apprehended);

(7) Persons who have not been employed before but are seeking employment for the first time; and

(8) Persons employed before but now out of employment and seeking employment.

*87. The above classification of non-workers is based on the answers recorded against Question 12 of the Individual Slip in respect of non-workers at the 1961 Census.

88. The broad age-groups used in the table are the same as those used in Table B-II, viz., 0-14, 15-34, 35-59 and 60 and over. The figures in respect of persons who did not return their ages have been shown separately under 'age not stated'.

Table B-XVII

89. This table shows the distribution of sample households (20 per cent) by their size and number of members (males and females separately) under each household size. The classification of households by size is into five size groups. The size groups are:—

3-1 Census Maha/65

- (i) Single member;
- (ii) two to three members (small);
- (iii) four to six members (medium);
- (iv) seven to nine members (large); and
- (v) ten members and over (very large).

SOCIAL AND CULTURAL TABLES

90. There are six Tables in this Series dealing with social or cultural aspects like age, marital status, literacy and education, language and religion. All the tables are prepared from individual slips and on a total count. Table C-I is, however, prepared from Household Schedules on a 20 per cent sample of households.

Table C-I

91. This table presents the distribution of household population by relationships to heads of households. The classification of the household population by relationships to heads of households is shown by 5 categories, viz. :—

- (i) Heads of households;
- (ii) Spouses of heads of households;
- (iii) Married relations;
- (iv) Never married, widowed and divorced or separated relations; and
- (v) Unrelated persons.

A break-up for males and females is presented under each category. The number of sons is also shown separately under the third category of married relations.

92. A household is defined as a group of persons commonly living together in the same house and eating from the same kitchen unless the exigencies of work prevented any of them from doing so.

93. "Household" is thus, slightly different from "Family". A domestic servant residing and eating at the employer's house is according to the above definition a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the household during the Census enumeration period has been treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

94. The above definition of the household also applies to the group of inmates of hotels, hostels, prisons, hospitals, etc. They are, however, treated as "non-family" or "institutional" households. Others are family type households as in spite of the slight differences in composition they are largely based on families.

95. The 1961 Census Household Schedules had been filled in for institutional households also. These schedules were, however, excluded at the time of drawing the sample of households. The material presented in the table, thus, relates only to family type households.

96. The "head of household" was defined as the person on whom fell the chief responsibility for the maintenance of the household. No elaborate enquiry

was, however, made about this and the person who was actually acknowledged in the household as the head was recorded as such. If the head of household was away throughout the enumeration period from the 10th to 28th February 1961, the person who was in charge in his absence, was recorded as the head of the household and the actual head was not even included as a member of his legitimate household. The intention was, of course, to avoid double counting.

Table C-II

97. This table presents the distribution of population by sex and marital status cross-classified by five-year age-groups. Classification of age between 10 and 70 years is by consecutive five-year age-groups. The other three groups are 0-9 years, 70 and over and age not stated. The entire population in 0-9 years age-group has been treated as 'never married' irrespective of the answers recorded against question on marital status in the Census slip and no further classification by marital status is shown against them. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age at marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

98. The classification of population by marital status is into four groups viz. :-

- (i) "Never married" are persons who have never been married ;
- (ii) "Married" are those persons who are currently married whether for the first or another time. These include those recognised as married by custom or society and those in stable *de facto* union ;
- (iii) "Widowed" are those persons whose husbands or wives are dead and who have not married again ;
- (iv) "Divorced" are those persons who have been divorced in a lawful manner, either by a decree of a law court or by a regular social or religious custom but who have not remarried. "Separated" are those who have been separated from wives or husbands and are staying away with no apparent intention of living together again. The table shows only combined figures for "divorced and separated" persons.

99. Under "Unspecified status" are included persons whose marital status could not be decided for want of correct or adequate answers at the 1961 Census.

Table C-III—Part B

100. This table presents the distribution of population by age, sex and educational levels. Classification by age is by five-year age-groups upto 34 years. Classification by educational levels is the same as in Table B-III part A.

101. This table provides a measure for the growth of literacy in the total population as well as in the different age-groups since the last Census. It also furnishes information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-IV

102. This table shows the distribution of population by single year ages both for males and females, separately.

103. The presentation is for each single year from '0' (i.e. less than one year) to 99 years and for all ages 100 and above combined together. The last group of "Age not stated" represents those whose ages had not been recorded in the Census slips at the 1961 Census.

104. The age recorded at the 1961 Census and presented here is in years completed at the last birthday. For infants below one year the age had been recorded as '0'.

105. The figures presented in the table are compiled from the answers recorded at the Census against Question 2 on 'age' in the Individual Slip, and relate to a full count. The corresponding tables in the previous Censuses had been prepared on a sample basis.

106. The material presented here is in its crude form, i.e. as actually returned in the Census. It has not been smoothed or graduated to eliminate the preferences for digits ending with '0', '5', etc.

Table C-V

107. This table presents the distribution of population by mother-tongue. Mother-tongues and dialects are arranged in alphabetical order by vertical spread in column 1.

108. Mother-tongue is defined as the language spoken in the childhood by the person's mother to the person or mainly spoken in the person's home in the childhood. In the case of infants and deaf and mutes the language usually spoken by the mother or if the mother had died while the person was still a child, the language mostly spoken in the person's home in childhood was recorded as the mother-tongue. Thus, for each and every person the mother-tongue was recorded irrespective of whether or not he was able to speak.

Table C-VII

109. This table presents the distribution of population by religion. The main religions are shown in their alphabetical order by vertical spread, viz., Buddhists, Christians, Hindus, Jains, Jews, Muslims, Sikhs, Zoroastrians. The followers of remaining religions are grouped together and shown under 'Others.'

Figures for sects returned as religions during the Census have been combined in a few cases, with the main religions concerned.

MIGRATION TABLES

110. There are six Tables included in this Series. The aspect of movement of population has been studied in the 1961 Census in greater detail. For this purpose in addition to the usual question of place of birth, every migrant (person born outside the place of enumeration) was asked two more questions. One was about the period of his residence at the place of enumeration and the other was whether his place of birth is rural or urban. These characteristics of migration have been cross-tabulated by sex, age, educational levels and occupation. Results are presented in this set of six Migration Tables.

111. A place is treated as urban in the 1961 Census if it has a Municipality, Cantonment or Civil Lines or if it has a population of over 5,000 and three-fourths of its male workers are engaged in non-agricultural pursuits. All areas which are not urban are treated as rural.

112. The question asked about the place of birth was whether it is now rural or urban and not what it was when the person (interviewed) left it. In case where the person did not give definite answer the characteristics was treated as unspecified. Rural/Urban differentiation was, however, not possible in the case of migrants from foreign countries.

113. The definition of migrants includes persons migrated for all reasons and not only for economic reasons. Women migrating after marriage, and children going to urban areas for education are two of such other reasons. The custom of women going to their parents' places for confinement also inflates the number of migrants.

114. The migration tables do not include any item pertaining to out-migration. The name of the district in which the migrant was born was asked for all migrants from areas within the State. For people coming from outside the State, only the name of the State had been asked. It was thus not possible to get any table upon out-migration from the City from the 1961 Census material.

Table D-I

115. This table shows the distribution of non-Indian nationals of each sex residing in the City at the time of the 1961 Census by the foreign countries to which they belong.

116. The countries are first classified into five broad groups, viz., (i) countries in Asia beyond India including U.S.S.R., (ii) countries in Europe excluding U.S.S.R., (iii) countries in Africa, (iv) countries in two Americas and (v) countries in Oceania. Each group is then sub-classified by major countries of nationality. In each group smaller countries are grouped together under 'Elsewhere'.

117. The figures of non-Indian nationals shown here are exclusive of those who were employed in Foreign Consulates or Missions and their families because they were not enumerated in the Census. Nationals of Goa, Daman and Diu have been treated as Indian nationals and, therefore, their numbers are not included here.

Table D-II

118. This table presents the distribution of population classified by birth-place and sex.

119. The classification by places of birth is shown under column 1. The sub-classification for each type of place of birth by rural, urban or unclassifiable is shown under column 2.

120. The classification of places of birth is first into the following broad groups, viz. :-

- A. Born in India.
- B. Born in Countries in Asia beyond India (including U.S.S.R.)
- C. Born in countries in Europe (excluding U.S.S.R.)
- D. Born in countries in Africa.
- E. Born in countries in two Americas.
- F. Born in countries in Oceania.
- G. Born at Sea.
- H. Unclassifiable.

121. The first broad group "A" is further classified into two groups, viz., (I) 'Born in Maharashtra', and (II) 'Born in States in India beyond Maharashtra. The former group (I) is further sub-classified into three sub-groups, viz., (a) Born in place of enumeration (b) Born in the district of enumeration and (c) Born in other districts of Maharashtra. The latter group (II) is further sub-classified into 14 States (Andhra Pradesh, Assam, Bihar, Gujarat, Jammu & Kashmir, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal) and 11 Union Territories and other areas presented in the following order :-

- (1) Andaman and Nicobar Islands.
- (2) Delhi.
- (3) Himachal Pradesh.
- (4) Laccadive, Minicoy and Amindivi Islands.
- (5) Manipur.
- (6) Tripura.
- (7) Dadra and Nagar Haveli.
- (8) Goa, Daman and Diu.
- (9) North-East Frontier Agency.
- (10) Pondicherry.
- (11) Sikkim.

122. Naga Land does not appear in this classification as there are no migrants from that State.

123. Further break-up of birthplaces grouped under each of the broad groups "B", "C", "D", "E" and "F" is shown by a few main countries. Combined totals for all the other countries in each group are presented under the heading 'Elsewhere'.

124. Classification of birthplaces by "Rural", "Urban" and "Unclassifiable" is presented here for the first time. It is, however, restricted to birthplaces within India only and is not shown for birthplaces outside India. The classification is not available in the case of Goa, Daman and Diu.

Table D-III

125. This table shows the distribution of migrants classified by place of birth and duration of residence in place of enumeration (period after the migration). It shows the volume of immigration for different periods and from different areas and is, therefore, valuable in studying the trends of movement of population.

126. The period of residence is grouped under six categories, viz., (i) less than 1 year, (ii) 1—5 years, (iii) 6—10 years, (iv) 11—15 years, (v) 16 years and over, and (vi) period not stated. Classification of migrants by these categories is shown in columns 5 to 16.

127. The classification by birthplaces is shown under column 1. It is on the same lines as followed in Table D-II. "A" is presented with all its groups and sub-groups excepting A-I (a) born in place of enumeration. In addition further break-up of sub-groups A-I(c) is given by different districts in Maharashtra State. Out of Group "B", entries are presented separately for Nepal and Pakistan only. A combined total of the remainder of Group "B" and Groups "C", "D", "E" and "F" is presented in a single entry with the heading 'Born in other countries outside India.' The last broad group is the same as in Table D-II.

128. The sub-classification for rural, urban and unclassifiable is presented for all groups and sub-groups but not for Nepal, Pakistan and other countries outside India.

129. Figures for migrants from Goa, Daman and Diu are not separately available. They are included in the group 'Born in other countries outside India'.

Table D-IV

130. This table presents the distribution of migrants by sex cross-tabulated by broad age-groups and educational levels and in case of workers by occupational Divisions and Groups. Occupational break-up is the same as in Tables B-V and B-VI or as described in Appendix II. This table will show the occupations which attract migrants to the City. Educational levels will show the skilled and unskilled workers.

Table D-V

131. This table shows composition of population according to those born locally and those born in rural and/urban areas outside the City. It gives the extent

of immigration from rural and other urban areas to the City. Migration from rural and urban areas is separately classified by the period of residence, i.e., less than 3 years and 3 years or more. Material is presented for immigration within the district, within the State and outside the State both for rural and urban birthplaces separately.

132. The table does not include persons born outside India, persons whose birth places are unclassifiable, persons whose birthplaces have not been recorded as rural or urban and persons in whose cases the duration of residence at the place of enumeration has not been stated. The total population shown in columns 2, 3 and 4 therefore, differs from the actual population of the City.

Table D-VI

133. This table shows the distribution of population by nine broad industrial categories of workers and one of non-workers, cross-classified by place of birth. It thus shows the sectors of economic activity which attract or absorb the migrants and the places of origin from where those migrants are so attracted.

134. The classification by workers and non-workers and by nine industrial categories of workers is shown in columns 8 to 27. This classification is the same as described in the Table B-II.

135. The classification by places of birth is shown under column 1. It is exactly the same as is used in Table D-II.

136. The material is presented for all broad groups and sub-groups of birthplaces as in Table D-II.

137. The break-up of countries the broad groups "B", "C", "D", "E" and "F" is shown only for important countries as in Table D-II.

138. Sub-classification of birthplaces by "Rural", "Urban" and "Unclassifiable" is shown by a vertical spread under column 2. It is restricted to places in India only. It is not shown for places of births outside India. That classification is not shown for Goa, Daman and Diu also as those areas were considered outside the Indian Union at the time of tabulation.

HOUSING TABLES

139. There are six tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The remaining two tables relate to industrial establishments. Table E-III on industrial establishments prepared from the houselists gives for the City a break-up by nature of industry and the fuel used cross-tabulated by the size of

establishments. However this table is not included in the publication on account of restriction on space. The other table shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups according to the Standard Industrial classification Scheme.

140. All the six tables of this Series are based on the houselists which were prepared at the time of numbering of houses in April-October of 1960. Such data on housing conditions have been obtained in the Census for the first time.

141. A "House" has been defined for purposes of this Census as a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance, whether that entrance leads to the road, street or lane, or to a common staircase, courtyard or a gate.

Table E-I (Wardwise)

142. This table presents the distribution of Census houses classified by uses to which they are put. The various uses are shown in columns 4 to 15. Houses which were not being used for any purpose at the time of house-listing were treated as vacant.

143. The classification of uses of occupied houses is in the following twelve groups:—

(i) *Dwellings* (Column 4 of the Table).—Houses used exclusively for residential purposes.

(ii) *Shop-cum-dwellings* (Column 5 of the Table).—Houses used partly for residential purposes and partly for sale of goods both portions having common main entrance. Examples: grocery shop-cum-dwelling, stationery shop-cum-dwelling, pan-bidi shop-cum-dwelling, vegetable stall-cum-dwelling, etc.

(iii) *Workshop-cum-dwellings* (Column 6 of the Table).—Houses used partly for residential purposes and partly for manufacture of articles and/or repair work or servicing both portions having a common main entrance. Examples: goldsmithy establishment cum-dwelling, tailoring establishment-cum-dwelling, weaving establishment-cum-dwelling, carpenter's establishment-cum-dwelling, shoemaking establishment-cum-dwelling, etc.

(iv) *Hotels, Sarais, Dharamshalas, Tourist Homes and Inspection Houses* (Column 7 of the Table).—Houses used as places of halt or temporary stay by travellers and pilgrims. Examples: Dharamshalas, lodging houses, rest houses, etc.

(v) *Shops excluding Eating Houses* (Column 8 of the Table).—Houses used exclusively for purchasing and selling of goods, without any manufacturing process being carried on in them. This category excludes restaurants, cafes, tea-shops, sweetmeat shops and eating places which have been classified separately. It includes grocers' shops, coal and fuel depots, cloth shops,

stationery stores, newspaper stalls, fruit and vegetable stalls etc. A few shops may also be included in column 5 because of the combined use of these houses.

(vi) *Business houses and Offices* (Column 9 of the Table).—Places used for housing offices of Government or quasi-Government institutions, commercial establishments etc. Examples: Banks, Solicitors' firms, Offices of political parties and office of a Government official, Railway Station, Police Station, Fire Brigade Station, etc.

(vii) *Factories, Workshops and Worksheds* (Column 10 of the Table).—Houses where one or more kinds of goods are produced or manufactured for being put on the market or where some kind of processing, servicing or repairing is undertaken. Places where goods are merely bought and sold and are not manufactured or processed have been classified as shops and are excluded from this category. The term "workshop" or "workshed" applies to a small unregistered manufacturing establishment. Manufacturing establishments registered under the Indian Factories Act are termed "Factories". "Workshops" cover flour mills, rice mills, blacksmith's establishment, carpenter's establishment, printing press, furniture mart, etc. Under "Factories" are included textile mills, Railway or State Transport Workshops and all registered factories.

(viii) *Schools and other Educational Institutions including Training Classes, Coaching Classes, etc.* (Column 11 of the Table).—Houses where any type of instruction is imparted, whether recognised or unrecognised, technical or non-technical. This category covers all types of schools, colleges, tutorial classes, typewriting institutes, commercial diploma institutes, music and dance classes and other educational institutions.

(ix) *Restaurants, Sweetmeat shops and Eating Places* (Column 12 of the Table).—Places where foods and/or beverages are sold or served. Canteens, milk bars, tea-stalls, etc., fall in this category. Places where food articles (biscuits, beverages, etc.) are produced and sold are included in the category "workshops". Halwai shops where sweetmeats are prepared for sale are also included under "workshops".

(x) *Places of Entertainment and Community Gathering* (Column 13 of the Table).—This category includes theatres, libraries, reading rooms, gymnasias, akhadas, museums, art galleries, temples, mosques, churches, marriage halls, town halls, etc.

(xi) *Public Health and Medical Institutions* (Column 14 of the Table).—Houses where medical facilities are provided or consulting rooms where medical advice is given fall under this category. These include public health centres, hospitals, dispensaries of all kinds, clinics and consulting chambers of doctors, vaidas, hakims, homoeopaths, family planning centres, maternity homes, leper asylums, mental hospitals, etc.

(xii) *Others* (Column 15 of the Table).—This is the residual group which includes types of uses other than those mentioned above. The types of uses included

in this category are garage, car-shed, cattle-shed, electric pump room, meter room, out-house, cemetries, places where personal services are provided e.g., laundries, hair cutting saloons, photo studios, etc. Houses found locked during the stage of house-numbering have been included in this category after getting it confirmed that they were used by some person or the other for purposes which could not be classified for want of further information. The material is presented for city and each ward separately.

Table E-II (Wardwise)

144. This table presents the tenure status of Sample Census Households living in Census Houses used wholly or partly as dwelling. Occupancy tenure, i.e., the nature of right on which a house is occupied by a household has been shown only under two broad categories, viz., "Owned" and "Rented". All dwellings which are not "owned" have been treated as "rented" and thus "Rent-free" or 'Care-taker' occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-cum dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

145. This table is prepared from the houselists and on a 20 per cent sample. The material is presented for the City and each Ward separately.

Table E-III

This table is not included in this publication.

Table E-IV

146. This table presents distribution of Sample Households living in Census houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the wall for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to whether is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

147. The number of houses classified by materials of wall and roof is the same as that of Table E-II which includes houses used exclusively as dwellings as well as dwellings with other uses, viz., shop-cum-dwellings, workshop-cum-dwellings, etc.

148. Material is presented here for the City as a whole and for each Ward separately. The table is prepared from the houselists on a 20 per cent sample.

Table E-V

149. This table presents the distribution of sample households classified by number of members and by number of rooms occupied. For each class of house-

holds the total number of members of the households is shown by males and females separately. This will help measure congestion or overcrowding.

150. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc. are not shown here.

151. A "room" has four walls with a door and a roof overhead and is not less than 6' x 6'. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns 6 to 8 as having no regular room.

152. A household is a group of persons who commonly live together in the same house and take their meals from a common mess unless exigencies of work prevent any of them from doing so. Material presented here is restricted only to the family type of households. Institutional households, i.e., groups of persons residing in hostels, boardings, prisons, hospitals, etc., who otherwise satisfy the definition of household, are not included here.

153. The table is prepared from the houselists on a 20 per cent sample. Material is presented for the City and each Ward separately.

Table on Industrial Establishments and Workers

154. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I at pages 17-23). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

155. The material presented here relates to April-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members and if any outsiders were working in the industry during the week preceding the enumerator's visit.

156. The list of industries presented here does not include some seasonal industries which were not actually working during the period when houselists were prepared viz., April-October, 1960.

157. The table is prepared from the houselists on a full count. Material is presented here for the City as a whole and for each Ward separately. The presentation is in the run-on style. Industries are shown by three digit codes, i.e., minor groups (see Appendix I). Minor groups for which there are no establishments are not shown for the City or Wards as the case may be.

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

158. There are seven tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes. These classes of people are declared

by President's Orders issued under Articles 341 and 342 respectively of the Constitution of India as Scheduled Castes and Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the Lok Sabha, State Legislative Assemblies and other elective bodies.

159. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied, not only as a combined group as in 1951, but also for each Scheduled Caste and Scheduled Tribe separately.

160. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for the total of all Scheduled Castes or Scheduled Tribes and for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

161. Classification by Scheduled Castes and Scheduled Tribes is on the basis of answers recorded in response to Question 5 (c) of the 1961 Census individual slip. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. The population of Scheduled Castes shown here is much less than that for the City in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Bauddha, and under the Constitution Order there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

As there is no Scheduled Tribe population in the cities of Akola, Amravati and Nagpur, the tables meant for Scheduled Tribes are not prepared for these 3 cities.

Table SCT-I—Part A

162. This table presents the distribution of Scheduled Caste population by sex and economic activity. Material is presented for all Scheduled Castes as a group as well as for each Scheduled Caste separately. Scheduled Castes are arranged in alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Table B-II. The last group 'Unclassified' is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

163. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) is given in paragraphs 49 to 57.

164. Columns 27 to 30 present castewise figures of persons engaged in certain occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying of hides or scavenging as secondary work are not included in the figures of columns 27 to 30.

165. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the City.

Table SCT-I—Part B

166. This table presents the distribution of Scheduled Tribe population by sex and economic activity. Material is presented for all Scheduled Tribes as a group as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Table B-II. The last group 'Unclassified' is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

167. The description of the concept of workers and non-workers and the nine industrial categories (I to IX) is given in paragraphs 49 to 57.

168. There are some more tribes declared as Scheduled Tribes for the District. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the City.

Table SCT-III—Part A(i)

169. This table presents the distribution of population of each Scheduled Caste by sex and educational levels. The classification of educational levels is the same as in Tables B-III—Part A and C-III—Part B except that the break-up of technical degrees in different branches like engineering, medicine, etc., is not provided.

Table SCT-III—Part A(ii)

170. This table presents the distribution of population of each Scheduled Tribe by sex and educational levels. The classification of educational levels is the same as in Tables B-III—Part A and C-III—Part B except that the break-up of technical degrees in different branches like engineering, medicine, etc., is not provided.

Table SC-I

171. This table presents the total non-working population of all the Scheduled Castes as a group classified by four types of non-workers, viz.,

- (i) Full time students ;
- (ii) Persons seeking employment for the first time ;
- (iii) Persons employed before but now out of employment and seeking work ; and
- (iv) Others.

Each type is further classified by educational levels.

Table ST-I

172. This table presents material on mother-tongues and bilingualism of Scheduled Tribes.

173. The material is presented by mother-tongues, that is, under each mother-tongue caption the number of persons (males and females) from among all the Scheduled Tribes who have returned that language as mother-tongue are shown in the first line and the break-up of figures for the various Scheduled Tribes is shown immediately below. For each Scheduled Tribe, besides the number of speakers of mother-tongue, number of persons from among the tribe speaking some other language in addition to the mother-tongue is presented along with the names of subsidiary languages spoken, in run-on lines and number of speakers of the respective subsidiary languages shown in brackets. The mother-tongues, names of Scheduled Tribes and subsidiary languages are arranged in alphabetical order.

174. Definitions of mother-tongue are the same as those shown in the notes on Table C-V (para 108).

Table ST-II

175. This table presents the distribution of non-working population among the Scheduled Tribes by sex and type of activity. Material is presented for all the Scheduled Tribes as a group as well as for each Scheduled Tribe separately.

176. The classification of non-workers by type of activity is into the following four groups and is shown by a horizontal spread under columns 5 to 12:—

- (i) Full time students ;
- (ii) Persons seeking employment for the first time;
- (iii) Persons employed before but now out of employment and seeking work; and
- (iv) Others.

The second and third group together show the total number of unemployed persons among the Scheduled Tribes.

177. The last group 'Others' of this table as well as table SC-I includes the following five types. Separate figures under each of those types as in Table B-IX for the general population were not compiled for non-workers.

- (a) Housewives and others engaged in unpaid home duties only;
- (b) Dependants including infants, children not attending school, permanently disabled, etc.;
- (c) Rentiers, pensioners and others getting unearned income;
- (d) Beggars, vagrants, etc., and
- (e) Convicts in jails, inmates of penal, mental and charitable institutions.

APPENDIX I**STANDARD INDUSTRIAL CLASSIFICATION**

This classification groups the industries into—

- 9 Divisions
- 45 Major Groups
- 343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

- 0 Agriculture, livestock, forestry, fishing and hunting
- 1 Mining and Quarrying
- 2 & 3 Manufacturing
- 4 Construction
- 5 Electricity, Gas, Water and Sanitary services
- 6 Trade and Commerce
- 7 Transport, Storage and Communication
- 8 Services
- 9 Activities not adequately described

MAJOR GROUPS**Division 0—Agriculture, livestock, forestry, fishing and hunting**

- 00 Field produce and Plantation crops
- 01 Plantation crops
- 02 Forestry and Logging
- 03 Fishing
- 04 Livestock and Hunting

Division 1—Mining and Quarrying

- 10 Mining and quarrying

Divisions 2 & 3—Manufacturing

- 20 Foodstuffs
- 21 Beverages
- 22 Tobacco Products
- 23 Textile—cotton
- 24 Textile—jute
- 25 Textile—wool
- 26 Textile—silk
- 27 Textile—miscellaneous
- 28 Manufacture of wood and wooden products
- 29 Paper and paper products
- 30 Printing and publishing
- 31 Leather and leather products
- 32 Rubber, Petroleum and coal products
- 33 Chemicals and chemical products
- 34—35 Non-Metallic Mineral Products other than petroleum and coal
- 36 Basic Metals and their products except machinery and transport equipment
- 37 Machinery (all kinds other than Transport) and Electrical equipment
- 38 Transport equipment
- 39 Miscellaneous Manufacturing Industries

Divisions 4—Construction

- 40 Construction

- 85 Business Services
- 86 Community Services and Trade and Labour Associations
- 87 Recreation Services
- 88 Personal Services
- 89 Services (not elsewhere classified)

Division 9—Activities not adequately described

- 90 Activities unspecified and not adequately described (This includes new entrants to the labour market).

MINOR GROUPS

Major Group Code (1)	Description (2)	Minor Group Code (3)
----------------------	-----------------	----------------------

Division 0—Agriculture, Livestock, forestry, fishing and hunting

00 Field Produce and Plantation Crops—		
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bafla, maize.	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01 Plantation Crops—		
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above.	015
02 Forestry and Logging—		
	Planting, replanting and conservation of forests.	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests.	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026

	Production of fish by fishing in sea	030		Production of other food products such as sweetmeat and condiments, muri, murki, chira, kholi, cocoa, chocolate, toffee, lozenge.	209
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031		Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032		Production of country liquor	211
04	Livestock and Hunting—			Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040		Production of other liquors not covered above.	213
	Rearing of sheep and production of wool	041		Production of aerated and mineral water	214
	Rearing and production of other animals (mainly for slaughter) such as pig.	042		Production of ice	215
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043		Production of ice-cream	216
	Rearing of bees for the production of honey, wax and collection of honey.	044		Processing of tea in factories	217
	Rearing of silk worms and production of cocoons and raw silk.	045		Processing of coffee in curing works	218
	Rearing of other small animals and insects	046		Production of other beverages	219
	Trapping of animals or games propagation	047	22	Tobacco Products—	
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048		Manufacture of bidi	220
Division 1—Mining and Quarrying				Manufacture of cigars and cheroots	221
10	Mining and Quarrying—			Manufacture of cigarette and cigarette tobacco	222
	Mining of coal	100		Manufacture of hookah tobacco	223
	Mining of iron ores	101		Manufacture of snuff	224
	Mining of gold and silver ores	102		Manufacture of jerda and other chewing tobacco.	225
	Mining of manganese	103		Manufacture of other tobacco products	226
	Mining of mica	104	23	Textile—Cotton—	
	Mining of other non-ferrous metallic ores	105		Cotton ginning, cleaning, pressing and baling	230
	Mining of crude petroleum and natural gas	106		Cotton spinning (other than in mills)	231
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107		Cotton spinning and weaving in mills	232
	Mining of chemical earth such as soda ash	108		Cotton dyeing, bleaching	233
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109		Cotton weaving in power looms	234
Division 2 & 3—Manufacturing				Cotton weaving in handlooms	235
20	Foodstuffs—			Manufacturing of khadi textile in handlooms	236
	Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and food-grains.	200		Printing of cotton textile	237
	Production of sugar and syrup from sugarcane in mills.	201		Manufacturing of cotton nets	238
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202		Manufacturing of cotton, cordage, rope and twine.	239
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203	24	Textile—Jute—	
	Slaughtering, preservation of meat and fish and canning of fish.	204		Jute pressing and baling	240
	Production of bread, biscuits, cake and other bakery products.	205		Jute spinning and weaving	241
	Production of butter, ghee, cheese and other dairy products.	206		Dyeing and bleaching of jute	242
	Production of edible fats & oils (other than hydrogenated oil).	207		Printing of jute textile	243
	Production of hydrogenated oils (Vanaspati)	208		Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
			25	Textile—Wool—	
				Wool baling and pressing	250
				Wool cleaning and processing (scouring)	251
				Wool spinning and weaving in mill	252
				Wool spinning other than in mills	253
				Wool weaving in power loom	254
				Wool weaving in handloom	255
				Embroidery and art work in woollen textile	256
			26	Textile—Silk—	
				Spinning and weaving of silk textile in mill	260
				Dyeing and bleaching of silk	261
				Spinning of silk other than in mills	262
				Weaving of silk textile by power loom	263
				Weaving of silk textile by handloom	264

27	Textile—Miscellaneous—		31	Leather and Leather Products—	
	Manufacture of carpet and all other similar type of textile products.	270		Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of hosiery and other knitted fabrics and garments.	271		Manufacture of shoes and other leather footwear.	311
	Embroidery and making of crepe lace and fringes.	272		Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Making of textile garments including raincoats and headgear.	273		Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274		Repair of shoes and other leather footwear	314
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275		Repair of all other leather products except footwear.	315
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276	32	Rubber, Petroleum and Coal Products—	
	Manufacture of coir and coir products	277		Manufacture of tyres and tubes	320
	Manufacture of umbrellas	278		Manufacture of rubber footwear	321
	Processing and manufacture of textile products not covered above.	279		Manufacture of rubber goods used for industrial purpose.	322
28	Manufacture of Wood and Wooden Products—			Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Sawing and planing of wood	280		Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Manufacture of wooden furniture and fixtures	281		Production of coal tar and coke in coke oven	325
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282		Manufacture of other coal and coal tar products not covered elsewhere.	326
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283	Chemicals and Chemical Products—		
	Manufacture of other wooden products such as utensils, toys, artwares.	284		Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of veneer and plywood	285		Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of plywood products such as tea chest.	286		Manufacture of fertilizers	332
	Manufacture of boxes and packing cases other than plywood.	287		Manufacture of ammunition, explosives and fire works.	333
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288		Manufacture of matches	334
	Manufacture of other wood and allied products not covered above.	289		Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
29	Paper and Paper Products—			Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290		Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291		Manufacture of common salt	338
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292		Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
30	Printing and Publishing—		34-35	Non-metallic Mineral Products other than Petroleum and Coal—	
	Printing and publishing of newspapers and periodicals.	300		Manufacture of structural clay products such as bricks, tiles.	340
	Printing and publishing of books	301		Manufacture of cement and cement products	341
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302		Manufacture of lime	342
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303		Manufacture of structural stone goods, stone dressing and stone crushing.	343
				Manufacture of stonewares, other than images.	344
				Manufacture of stone images	345
				Manufacture of plaster of paris and its products.	346
				Manufacture of asbestos products	347
				Manufacture of mica products	348

	Manufacture of aluminium products .	366		Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen.	395
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367		Manufacture of sports goods .	396
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368		Manufacture and repair work of goods not assignable to any other group.	399
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369	Division 4—Construction		
37 <i>Machinery (All kinds other than Transport) and Electrical equipment—</i>			40 <i>Construction—</i>		
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370		Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371		Construction and maintenance of roads, railways, bridges, tunnels.	401
	Manufacture of machine tools .	372		Construction and maintenance of telegraph and telephone lines.	402
	Manufacture of textile machinery and accessories.	373		Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374	Division 5—Electricity, Gas, Water and Sanitary Services		
	Manufacture of electric lamps and fans .	375	50 <i>Electricity and Gas—</i>		
	Manufacture of insulated wires and cables .	376		Generation and transmission of electric energy.	500
	Manufacture of all kinds of battery .	377		Distribution of electric energy .	501
	Manufacture of electronic equipment such as radio, microphone.	378		Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
	Manufacture of electric machinery and apparatus, appliances not specified above.	379			
38 <i>Transport Equipment—</i>					
	Manufacture, assembly and repairing of locomotives.	380

EXPLANATORY NOTE

THIS PART contains thirty-seven Tables presenting 1961 Census data for the City. Seven of these Tables also present material separately for each Ward.

Census Procedure

2. The Census was taken on the 'cavasser method' which had been used in all previous Censuses. The enumerators called on each household in their assigned areas between 10th and 28th February, 1961, and filled in Census forms by interviewing one or more responsible members of the household. They re-visited all these households between 1st and 5th March, and corrected their forms for changes owing to births and deaths occurring between their first visit and the Census reference date, viz., sunrise of 1st March, 1961. The material presented in this part thus relates to 1st March, 1961, which closely approximates the end of the Second Five-Year Plan and beginning of the Third.

3. The Chief Officer of the Sholapur Municipality worked as the Charge Officer for the Census. The staff employed at various stages of Census work was drawn from the Municipal employees and/or State or Central Government employees residing in the City.

4. Numbering and listing of houses was carried out as the first stage of Census work between 16th September and 15th October, 1960, mainly by the Municipal staff. Preparations for enumeration work began almost simultaneously with the completion of the first stage. The average population size for each enumeration block was fixed as 600. The enumerators working in the first stage prepared separate houselist sets (see paragraph 9) for areas approximately covering this population and having some natural boundaries for demarcation.

5. Two booklets were issued in English and Marathi for use as self-contained manuals of instructions for the two stages of Census work. Training for enumerators and supervisors was organised separately for the two stages of work. Training for enumeration was very intensive and was imparted in three rounds which also included field practice of enumeration.

6. A supervisor was appointed to supervise Census work of six enumerators. He was instructed to inspect the entire work of each of his enumerators in the first two days. The supervisors were made responsible both for timely completion and quality of Census work of all their enumerators.

7. Enumerators and supervisors were paid honorarium for Census work. This was done to meet out-of-pocket expenditure incurred by them on travelling and stationery articles and also as an incentive for good work.

Census Questionnaire

8. There were three Census Questionnaire forms :

- (i) The Houselist to collect information in respect of houses and households ;
- (ii) The Individual Slip to collect information in respect of each individual ; and
- (iii) The Household Schedule to collect information in respect of each household.

Vd 2847-1a

9. The information regarding houses and households obtained through the houselists included the following items :—

Houses

(i) Purpose for which the house was used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, etc.

(ii) Material of walls.

(iii) Material of roof.

Households

(iv) Name of the head of the household.

(v) Number of rooms in use by the household.

(vi) Whether the household was living in an owned house or a rented house.

(vii) Persons living in the household—

(a) males,

(b) females,

(c) total.

Factory or Workshop

If a house was being used as a workshop or a factory the following additional information was obtained for that house :—

(viii) Name of the firm or proprietor.

(ix) Name of the product, repair or servicing undertaken.

(x) Average number of persons employed daily.

(xi) Kind of fuel or power used.

The information collected on houses, households and factories and workshops was used for preparation of E Series Tables on housing and establishments.

10. The information collected in respect of each individual included the following demographic, social and economic items :

For identification—Location Code :

1 (a) Name.

1 (b) Relationship to the Head of the Household.

Demographic Questions—

2 Age last birthday.

3 Marital status.

4 (a) Birth place.

4 (b) Born, rural or urban.

4 (c) Duration of residence if born elsewhere.

13 Sex.

Social Questions—

5 (a) Nationality.

5 (b) Religion.

5 (c) Scheduled Caste or Scheduled Tribe.

6 Literacy and Education.

7 (a) Mother-tongue.

7 (b) Any other language(s).

Economic Questions—

- 8 Working as cultivator.
- 9 Working as agricultural labourer.
- 10 Working at household industry—
 - (a) Nature of work ;
 - (b) Nature of Household Industry ;
 - (c) If Employee.
- 11 Doing work other than 8, 9 or 10—
 - (a) Nature of work ;
 - (b) Nature of industry, profession, trade or service ;
 - (c) Class of worker ;
 - (d) Name of Establishment.
- 12 Activity, if not working.

11. The two demographic questions 4(b) and 4(c) had been added in 1961 Census to study migration in greater detail.

12. There were five economic questions (8 to 12) in the Individual Slip. A departure was made in the concept for collection of economic data. At the last few Indian Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependents. An intermediate category of economic semi-dependence was introduced in 1931, 1941 and 1951. They were called working dependents in 1931, partly dependents in 1941 and earning dependents in 1951. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income. The 1961 Census, therefore, laid stress on 'work' so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers.

13. The following information in respect of economic activities of each household was collected through the "Household Schedule" :—

A. Cultivation	Local name of right on land	Area in acres
1. Land under cultivation by Household—		
(i) Owned or held from Government		
(ii) Held from private persons or institutions for payment in money, kind or share		
(iii) Total of items (i) and (ii)		
2. Land given to private persons for cultivation for payment in money, kind or share		

B. Household Industry—

Nature of Industry	Number of months in the year during which conducted
(a)	
(b)	

C. Workers at Cultivation or Household Industry—

		Members of Family working			Hired workers
		Head	Other Males	Other Females	
1. Household only.	Cultivation				
2. Household Industry only					
3. Both in Household Cultivation and Household Industry.					

14. The "Household Schedule" was a new feature of 1961 Census. It was thought that in the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information was supplemented by information relating to economic activities of the household as an entity. The "Household Schedule" was, therefore, designed to collect data on the two chief economic activities of the household industry. The information collected in this schedule was used for preparation of Household Economic Tables. These tables are, however, not prepared for cities.

Compilation and Coverage

15. Material obtained in the Census was subsequently processed in temporarily established Tabulation Offices. Results are presented in the various tables included here. A few Census tables do not apply to the City area. They are not included here. The numbers given to the different tables in the 1961 Census scheme have however been retained to facilitate comparison with other cities in India, non-city urban areas or rural areas of the district or the State. ~~An analysis of this material will be found in the Introductory Note.~~

16. The material presented in the tables relates only to the area included in the Municipal limits. The suburban areas situated outside the Municipal limits are not covered. Nor is material for the adjoining Municipal (or Cantonment) areas included in any table excepting the summary figures shown in the Primary Census Abstract.

Notes on Tables

17. The following paragraphs contain brief notes on the tables. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series.

GENERAL POPULATION TABLES

Table A-I (Wardwise)

18. This Table presents area, density, occupied residential houses and population (persons, males and females) for the City in 1961. Material is presented for the City and each Ward separately. Area figures have been obtained from the Municipal office. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shops, workshop, factory etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

19. Population shown in this or any other Table in this part for the City or a Ward is the night-time population normally residing within its limits. It does not include persons who come from other places for work during the day.

20. Enumeration of a person was done at the place of his normal residence. Every person was enumerated at the place of his normal residence though he may not be actually present at the time of the enumerator's visit. Persons likely to be absent from the place of normal residence throughout the enumeration period, i.e., from 10th February to sunrise of 1st of March, were, however, not enumerated at those places. On the other hand, guests found in any house at the time of enumeration were enumerated at places of their temporary residence when they were likely to be absent from the places of their normal residence during the whole of the enumeration period. In either case, the instructions were to ask the person if he has been enumerated anywhere else and to enumerate him only if he had not been enumerated elsewhere. Once enumerated he was advised not to allow himself to be enumerated again.

Table A-IV

21. This Table shows the growth of urban population since 1901. ~~The changes in the area or Municipal boundaries have been described in the Introductory Note.~~ Population shown here for any previous Census is only urban population and does not include the population in that Census of villages which were not then a part of the City and have subsequently been included in Municipal limits.

GENERAL ECONOMIC TABLES

22. There are 12 Tables in this Series, showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified into nine broad categories of economic activity in the first two tables (B-II and B-III—Part A). A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under

the National Occupational Classification in Tables B-V and B-VI. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last two Tables B-VIII and B-IX present distribution of non-workers by sex, age and eight broad classes.

23. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

- (i) self-supporting persons ;
- (ii) earning dependants ; and
- (iii) non-earning dependants.

24. The concept of dependency used in the previous censuses has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on earning or economic dependence.

25. A person is classified as worker if—

- (a) in case of seasonal work like cultivation, live-stock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and
- (b) in the case of regular (non-seasonal) employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

26. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

27. "Work" includes not only actual work but effective supervision and direction of work also.

28. Persons under training as apprentices with or without stipend or wages are regarded as workers.

29. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

30. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

31. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

32. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

33. The Census Questionnaire did not ask any question to determine the extent of full employment or under-employment.

34. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

35. This Table shows 1961 summary figures for the City and each Ward separately.

36. The economy of adjoining towns and villages is always dependent upon that of the City. Housing shortages also lead to an overflow of the city population to nearby towns and villages. Census statistics of nearby places are, therefore, included in this table as they will be useful in locating the directions of the city's influence or in determining the degree of dependence of those places upon the city and the nature of services rendered by them.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are further classified by nine broad industrial categories.

38. Column 5 shows the number of households for each unit. "Household" is slightly different from "family". It is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns 9 to 12 of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I. Limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all Backward Castes or Tribes even in the City. They include only the Castes or Tribes notified as Scheduled Castes or Scheduled Tribes for the City area. (Also see paragraphs 106 to 109).

40. Columns 13 to 16 show the figures for the houseless and institutional population.

41. *Houseless Population*.—Houseless persons were enumerated in all areas on the night of 28th February, 1961. These include—

(i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets;

(ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts, just on the open grounds; and

(iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets and in places like parks, gardens, seashore, railway yards, etc.

42. *Institutional Population*.—Includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

43. Columns 17 and 18 show figures for literates and educated persons. A "literate" is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross-tabulated with age-groups is presented in Table C-III—Part B.

44. The workers are shown in columns 19 to 38 classified by sex and in the following nine broad categories of economic activity:—

- I. Cultivator.
- II. Agricultural labourer.
- III. Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV. Household Industry.
- V. Manufacturing other than Household Industry.
- VI. Construction.
- VII. Trade and Commerce.
- VIII. Transport, Storage and Communications.
- IX. Other Services.

Category I

45. This category includes both the owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

46. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

47. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

48. "Household Industry" is defined as an industry conducted at home by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to making and selling of goods. Thus, the main criteria for household industry are its smaller scale, its being run at home and the participation of the head of the household and/or one or more members of the household. A person working as an employee in another person's household industry has also been treated as working at household industry.

Category V

49. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

50. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

51. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

52. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

53. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Table B-II

54. This table gives a break-up of the Primary Census Abstract distribution of workers in industrial categories and non-workers for the city by four broad age-groups.

Table B-III-A

55. This table gives a break-up of the Primary Census Abstract distribution of workers in nine industrial categories and of non-workers by educational levels. Distribution of population classified by age-groups and educational levels will be found in Table C-III-B.

Industrial Classification

56. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to provide description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

57. The nine categories of workers shown in the Primary Census Abstract and Tables B-II and B-III-A conform to the industry divisions as follows:—

Category	Industry Division
I. Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II. Agricultural Labourer	Division 0 except minor groups 000 to 004 and Division 1.
III. Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004, Divisions 1, 2 and 3.
IV. Household Industry	Division 0 except minor groups 000 to 004, Divisions 1, 2 and 3.
V. Manufacturing	Division 2 & 3.
VI. Construction	Division 4.
VII. Trade and Commerce	Division 6.
VIII. Transport, Storage and Communications.	Division 7.
IX. Other Services	Divisions 5, 8 and 9 (except minor group 999).

Table B-IV-A

58. This table gives the distribution of workers engaged in household industry by status of employment and by each industry division and major group (Appendix I) of household industry separately. Major groups of household industry which do not have any workers in the City are not shown here. Columns 6 and 7 show the workers who work at their own household industry (i.e. who are either employers, single workers or family workers in these household industries). Columns 4 and 5 on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

59. This table presents the distribution of all workers (other than those working in Categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. The classification by employment status is in four classes, viz., "employer", "employee", "single worker" and "family worker":—

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

60. This is a very important table as it gives the employment position in all sectors of economy in the City. It shows the distribution of all workers (other than those in Categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group is further split up and shown separately for household industry and non-household industry. Major and minor groups which do not have any workers in the City are not shown here.

Occupational Classification

61. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's motor vehicle, the industry is banking and occupation is motor vehicle driver.

62. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

63. This table presents the distribution of workers (other than those engaged in Categories I and II and occupational families 400 and 401) by occupational divisions, groups and families (Appendix II). For each occupational division, group or family, the workers are shown further classified by a categorywise break-up of their industry. Occupational groups or families which do not have any workers in the City are not shown here. For an occupational group or family which has all the workers in only one category of industry only one line shows the total workers for that group or family as well as for the category of industry. The occupational group X0 and its families X00, X08 and X09 are not applicable to this table.

Table B-VI

64. This table presents the distribution of workers (other than Categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and educational levels.

Table B-VII-A

65. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income)

is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., I-Cultivation, II-Agricultural Labourer and IV-Household Industry. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table.

66. This table will also enable analysis of workers engaged in secondary work by major groups of their principal work at household industry. The number of secondary workers is shown by category numbers I, II and IV standing respectively for work as cultivator, as agricultural labourer and at household industry. Number of workers for each category of secondary work is shown in brackets 'M' standing for males and 'F' for females.

Table B-VII-B

67. This table shows workers engaged in non-household industries, i.e., Categories III and V to IX as principal work and doing some additional or secondary work in household industry. The nature of principal work of workers doing secondary work is shown by a description of the branch of industry under column 1. Similarly, the nature of household industry in which additional secondary work is performed, is described by the branch of that household industry under column 2. The number of workers for males and females are shown in brackets.

Table B-VIII-A

68. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-IX

69. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before.

SOCIAL AND CULTURAL TABLES

70. There are five Tables in this Series dealing with social or cultural aspects like age, marital status, literacy and education, language and religion. All the tables are prepared from individual slips and on a total count.

Table C-II

71. This table presents the distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other three groups are 0-9 years, 70 and over and age not stated. The entire population in 0-9 years

age-group has been treated as never married and no further classification by marital status is shown against them. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent. sample. This table is, however, prepared on a full count.

Table C-III-B

72. This table presents the distribution of population by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 34 years. Classification by educational levels is the same as in Table B-III-A.

73. This table provides a measure for the growth of literacy in the total population as well as in the different age-groups since the last Census. It also furnishes information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent. sample. This table has been prepared on a full count.

Table C-IV

74. This table presents the distribution of the City population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc.

Table C-V

75. This table presents the distribution of population by mother-tongues. Mother-tongues are arranged in alphabetical order. A mother-tongue is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages. Another table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume for want of space.

Table C-VII

76. This table presents the distribution of population by religion. Eight main religions have been shown in their alphabetical order. Figures for various sects returned as religions during the Census have been combined with the main religions concerned.

MIGRATION TABLES

77. There are six Tables included in this Series. The aspect of movement of population has been studied in the 1961 Census in greater detail. For this purpose in addition to the usual question of place of birth, every migrant (person born outside the place of enumeration) was asked two more questions. One was about the period of residence at the place of enumeration and the other was whether his place of birth is rural

or urban. These characteristics of migration have been cross-tabulated by sex, age, educational levels and occupation. Results are presented in this set of Migration Tables.

78. A place is treated as urban in the 1961 Census if it has a Municipality, Cantonment or Civil Lines or if it has a population of over five thousand and three-fourths of its male workers engaged in non-agricultural occupations. All areas which are not urban are treated as rural.

79. The question asked about the place of birth was whether it is now rural or urban and not what it was when the person (interviewed) left it. In case where the person did not give definite answer the characteristics was treated as unspecified. Rural/Urban differentiation was, however, not possible in the case of migrants from foreign countries.

80. The definition of migrants includes persons migrated for all reasons and not only for economic reasons. Women migrating after marriage, and children going to urban areas for education are two of such other reasons. The custom of women going to their parents' places for delivery also inflates the number of migrants.

81. The migration tables do not include any item pertaining to out-migration. The name of the district in which the migrant was born was asked for all migrants from areas within the State. For people coming from outside the State, only the name of the State had been asked. It was thus not possible to get any table upon out-migration from the City from the 1961 Census material.

Table D-I

82. This table gives the number of persons belonging to different foreign nationalities who are residents in the City. It excludes non-Indian nationals who are employed in Foreign Embassies or Consulates.

Table D-II

83. This table presents the distribution of population by birth-place. In the case of migrants within India, the place of birth has been further classified by Rural and Urban. Place of birth is also classified by States of origin and within Maharashtra by districts of origin.

Table D-III

84. This table presents the distribution of migrants classified by place of birth and duration of residence at the place of enumeration or in other words the period after migration. The period of residence is grouped under six categories, viz., (1) Less than one year; (2) 1 to 5 years; (3) 6 to 10 years; (4) 11 to 15 years; (5) 16 years and over; and (6) period not stated. This table will show the volume of immigration for different periods and from different areas and will, therefore, be useful in studying the trends of the movement of population.

Table D-IV

85. This table presents the distribution of migrants who are workers cross-tabulated by broad age-groups, educational levels and occupations. Occupational break-up is the same as in Tables B-V and B-VI or as described in Appendix II. This table will show the occupations which attract migrants to the City. Educational levels will show the skilled and unskilled workers.

Table D-V

86. This table gives the extent of immigration from rural and other urban areas to the City. Migration from rural and urban areas is separately classified by the period of residence, i.e., less than 3 years and three years or more. Material is presented for immigration within the district, within the State and outside the State both for rural and urban birth-places separately.

Table D-VI

87. This table shows the distribution of migrants by place of birth. The migrants who are workers are further classified by industrial categories (see paragraph 44). This table will show the sectors of economic activity which attract or absorb the migrants to the City.

HOUSING TABLES

88. There are five Tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives for the City a break-up by industry and the fuel used cross-tabulated by the size of establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

89. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions have been obtained in the Census for the first time.

90. A "house" was defined for purposes of the Census as a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street or lane, or to a common staircase, court-yard or a gate.

Table E-I (Wardwise)

91. This table presents the distribution of Census houses classified by uses to which they are put to. The various uses are shown in columns 4 to 15. Houses which were not being used for any purpose at the time of

houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as shop-cum-dwelling or workshop-cum-dwelling. The houses which were used as schools, offices, factories or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices or restaurants and not as school-cum-dwelling, office-cum-dwelling and so on.

92. The last category of "Others" includes all purposes not included in columns 4 to 14 prominent among them being cattle-sheds, garages, godowns, stores, etc. The table is prepared from the houselists on a full count.

93. The material is presented in this table for the City as a whole and for each Ward separately.

Table E-II (Wardwise)

94. This table presents the tenure status of Sample Census Households living in Census Houses used wholly or partly as dwelling. Tenure here is of only two kinds, owned or rented. "Rent-free" or "Care-taker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-cum-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

95. This table is prepared from the houselists and on a 20 per cent. sample. The material is presented for the City and each Ward separately.

Table E-IV (Wardwise)

96. This table presents distribution of Sample Households living in Census Houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the wall for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

97. Material is presented here for the City as a whole and for each Ward separately. The table is prepared from the houselists on a 20 per cent. sample.

Table E-V (Wardwise)

98. This table presents the distribution of sample households classified by number of members and by number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or overcrowding.

99. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

100. A "room" has four walls with a door and a roof overhead and is not less than 6' x 6'. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns 6 to 8 as having no regular room.

101. The table is prepared from the houselists on a 20 per cent. sample. Material is presented for the City and each Ward separately.

Table on Industrial Establishments and Workers

102. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

103. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

104. The list of industries presented here does not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October, 1960.

105. The table is prepared from the houselists on a full count. Material is presented here for the City as a whole and for each Ward separately. The presentation is in the run-on-style. Industries are shown by their digit codes i.e., minor groups (see Appendix I). Minor groups for which there are no establishments are not shown for the City or Wards as the case may be.

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

106. There are seven Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes. These classes of people are declared by President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation

to these classes, seats are also reserved for them in the Lok Sabha, State Legislature and other elective bodies.

107. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

108. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for the total of all Scheduled Castes or Scheduled Tribes and for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

109. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5(c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 39 above from the note on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the City in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution order there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

Table SCT-I-A

110. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Table B-II. The last group of "Castes not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

111. Columns 27 to 30 present Scheduled Caste-wise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns 27 to 30.

112. There are some more castes declared as Scheduled Castes for the City area. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the City.

Table SCT-I-B

113. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Table B-II. The last group of "Tribes not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

114. There are some more Tribes declared as Scheduled Tribes for the City area. They are not shown in this table because no one belonging to these Tribes was enumerated in 1961 Census in the City.

Table SCT-III-A(i)

115. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The classification of educational levels is the same as in Tables B-III-A and C-III-B except that the break-up of technical degrees in different branches like engineering, medicine, etc. is not provided.

Table SCT-III-A(ii)

116. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The classification of educational levels is the same as in Tables B-III-A and C-III-B.

Table SC-I

117. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

- (i) full-time students ;
- (ii) persons seeking employment for the first time ;
- (iii) persons employed before but now out of employment and seeking work ; and
- (iv) others.

The non-working population is further classified by educational levels.

Table ST-I

118. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Scheduled Tribes are arranged in their alphabetical order and mother-tongues (when there are more than one for any Scheduled Tribe) are also shown in their alphabetical order.

Table ST-II

119. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

- (i) full-time students ;
- (ii) persons seeking employment for the first time ;
- (iii) persons employed before but now out of employment and seeking work ; and
- (iv) others.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

Division 1—Mining and Quarrying

10	Mining and quarrying
----	----------------------

Division 2 & 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34—35	Non-Metallic Mineral Products other than petroleum and coal
36	Basic Metals and their products except machinery and transport equipment
