- X Special Report on Kanpur

State Government Publications

Volumes of District Census Handbooks

In conformity with the past Indian Census tradition, the demographic questions or relationship to the head of the household, sex, age, marital status, religion, Scheduled Caste, literacy and education, mother-tongue, and bilingualism were included in the Enumeration Slip. Information for each individual in the household was also collected in the Household Schedule, Part II of which, i.e., the Census Population Record in respect of demographic and social information comprising the name, sex, relationship to head, age, marital status, and description of work.

2. It will be profitable to give a resume of instructions in regard to the collection of information on which these Tables are based. Relevant questions and instructions to the enumerators are reproduced below:—

- (i) *Age last birthday*: "Write age in years completed last birthday. For infants below one year of age, write '0'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents, religious events, etc."
- (ii) *Marital Status*: "For a person who has never been married write 'NM'. For a person married, whether for the first time or another time, write 'M'. Write 'M' also for persons who are recognized by custom or society as married and for persons in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom, but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'."
- (iii) *Religion*: "Write 'H' for Hindu, 'M' for Muslim, 'C' for Christian, 'J' for Jain, 'B' for Buddhist and 'S' for Sikh. For others, write the religion in full."
- (iv) *Scheduled Caste*: "If a person belongs to a Scheduled Caste obtaining in your State or in your district, write the name of the Caste to which he belongs."

Clear instructions to write the specific name of the Scheduled Caste, if it was returned by a synonym or a generic name were also given. It was emphasised that general entries, such as 'Scheduled Caste', 'Harijan' or 'Achhut' should not be made.

- (v) *Literacy and Education*: "For a person (i) who can neither read nor write or can merely read, but cannot write in any language, write '0'

and (ii) who can both read and write, give 'L'. The test for reading is ability to read any simple letter either in print or in manuscript. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write. If a person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed." Persons of age-group 0-4 have been excluded from literates notwithstanding their return to the contrary.

- (vi) *Mother-tongue*: "Mother-tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy, write the language mostly spoken in the person's home in childhood. In the case of infants and deaf-mutes give the language usually spoken by the mother."
- (vii) *Any Other Language*: "The number of languages recorded against this question should not be more than two. These languages should be other than his mother-tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language."
- (viii) *Sex*: "Write 'M' for Males, and 'F' for Females."

3. On the basis of the information collected, a series of Tables depicting the demographic variables and the social and cultural aspects of the population are presented in this volume. The chief deviation since 1951 is in the naming of this series. At the 1951 Census, this series was called *Age and Social Tables*. Now it is termed as *Social and Cultural Tables* in order to give a more comprehensive and complete heading. *The Age Tables* in 1951 were based on a 4 per cent sample whereas at this Census they are on full count. *The Household Composition Table* in 1951 was on 10 per cent sample, while it is now based on 20 per cent sample.

A *household* means an entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. The mode of drawing out 20 per cent sample household schedules is given as under:

The Household Schedule pads were arranged in the order of location code no. of villages in a tahsil in the case of rural areas and in the order of location code no. of towns in a district for urban areas. The first sample schedule was chosen randomly among the first five households in the first Household Schedule pad and stamped (S) as selected. This random no. (random start) was chosen for rural area of each tahsil and for urban areas of the district each time. From the first random house-

hold every fifth household was continuously stamped as selected. The samples were continuously marked for all pads of villages in tahsils or urban areas in a district. If in a particular Household Schedule pad at the end, some households (four or less) had been left after marking sample households, the households left over were carried over to the next Household Schedule pad and the appropriate household in that pad was marked as sample household. Schedules of institutional population were not considered in the selection. The selected household schedules were sent to Mechanical Tabulation Unit of Registrar General's Office for preparing the Tables.

Table C-I serves as an introduction to C Series Tables by providing information relating to composition of sample households by relationship to head of family and civil condition of members of the household.

4. This series comprises the following Tables :—

(i) Table C—I Composition of Sample Households by relationship to Head of Family Classified by Size of Land Cultivated

(ii) Table C—II Age and Marital Status

- (iii) Table C—III Part A Age, Sex and Education in *All Areas*
 (iv) Table C—III Part B Age, Sex and Education in *Urban Areas only*
 (v) Table C—III Part C Age, Sex and Education in *Rural Areas only*
 (vi) Table C—IV Single Year Age Returns
 (vii) Table C—V Mother-tongue
 (viii) Table C—VI Bilingualism
 (ix) Table C—VII Religion
 (x) Table C—VIII Part A Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes

5. As there are no Scheduled Tribes in Uttar Pradesh, Table C—VIII Part B has not been prepared.

6. Owing to the volume of statistics compiled for presentation in Part II C, the Tables are presented in two separate books. The first book contains Tables C-I to C-III Part C, and the second book contains Tables C-IV to C-VIII Part A.

CENSUS OF INDIA 1961 : SCIENTIFIC & TECHNICAL PERSONNEL

(Actual Size of the card used 5½"×3½")

Only a person with a recognised Degree or Diploma in Science, Engineering, Technology or Medicine should fill in this card.

READ CAREFULLY BEFORE FILLING IN. TICK (☒)
 WITHIN BRACKETS PROVIDED WHERE APPLICABLE.

TABLE C-I
COMPOSITION OF SAMPLE HOUSE-
HOLDS BY RELATIONSHIP TO HEAD
OF FAMILY CLASSIFIED BY
SIZE OF LAND CULTIVATED

C-1 COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY
CLASSIFIED BY SIZE OF LAND CULTIVATED

This is the first Table of the series. It gives the composition of households based on a 20 per cent sample basis. There are columns for total number of sample households, total sample household population, and the number of (i) heads of households, (ii) spouses of heads of households, (iii) married relations, (iv) never-married, widowed and divorced or separated relations, and (v) unrelated persons. The information is presented by total, rural and urban for the State, Divisions and Districts. In respect of rural households, breakdown by (a) households engaged neither in household industry nor cultivation, (b) households engaged in household industry, and (c) households engaged in cultivation has also been provided. Information regarding households engaged in cultivation has further been classified by size of land owned or held under sizes (i) less than one acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0-12.4 acres, (vii) 12.5-14.9 acres, (viii) 15.0-29.9 acres, (ix) 30.0-49.9 acres and (x) 50 and above acres.

2. The panoramic insight into the family composition provided by this Table is expected to be of immense interest to the sociologists, more so in the context of the smooth and silent revolution taking place in the structure of the society with the impact of changing economic conditions and far-reaching legal enactments and reforms, viz., Zamin-dari Abolition, Consolidation of Holdings, etc. It is hoped that it will help in the assessment of the extent of the changes brought about in the joint family system still deeply rooted in this country.

3. The basic information for this Table was collected from Parts I and II of 20 per cent sample Household

Schedule filled for each household enumerated. In the case of rural areas the households were separated under the three types (i) engaged neither in cultivation nor household industry, (ii) engaged in household industry, and (iii) engaged in cultivation. The Household Schedules of the last category were further subdivided under the ten groups of size of land owned or held. The information regarding sex, relationship to head of the household and marital status of each member of the household contained in all urban schedules together, and the different groups and sub-groups of rural schedules was processed for constructing this Table.

4. It is on the lines of Table C-I of the 1951 Census except for the following differences:—

- (i) The sample size is 5 times that of 1951,
- (ii) That instead of presenting data for (a) All Classes, (b) Agricultural Classes, and (c) Non-Agricultural Classes, it has been presented by total, rural and urban areas of each district with detailed distribution for rural as described in para 1 above, and
- (iii) Some details regarding size of household, viz., small, medium, large and very large, breakdown of relations by infants (less than one year), non-adults (1-20 years), and adults (21 years and above), and separate figures for unmarried and widowed or divorced have been left out in the present Table. However, provision for unrelated persons has been made in the 1961 Table.

5. The following Table gives the family composition of 1,000 sample households by total, rural and urban :

Family Composition of 1,000 Sample Households by Total/Rural/Urban Population

Total Rural Urban	Sample House- hold population		Heads of Households		Spouses of head of households		Married relations			Never married, widowed, divorced, or separated relations		Unrelated persons		
							Sons	Other males	Other females					
	M	F	M	F	M	F				M	F	M	F	
Total	..	1,000	1,000	338	31	1	278	116	59	234	476	453	10	4
Rural	..	1,000	1,000	336	31	N	274	123	61	247	472	445	8	3
Urban	..	1,000	1,000	350	27	1	309	69	44	142	509	514	27	8

The above Table shows that usually males are the heads of households, both in the rural and urban areas—greater in the urban (350) than in the rural (336). The proportion of females is, however, greater in the rural (31) than in the urban (27). Thus, out of 100 males in total, the percentage of heads of households is 33.8, of their married relations 17.5 (sons and other males combined), of never-married relations 47.6 and of the remaining unrelated persons only 1.0. Similar is the case in rural areas where

the percentage of the heads of households is 33.6, of married relations 18.4 (sons and other males combined), of never-married relations 47.2 and of unrelated persons only 0.8. The corresponding figures for urban areas are 35.0, 11.3, 50.9 and 2.7 respectively. The higher percentage of married sons in rural areas indicates the existence of the prevalence of the joint family system to a greater extent there than in the urban.

TABLE C-II
AGE AND MARITAL STATUS

C-II AGE AND MARITAL STATUS

This is the basic demographic Table presenting the distribution of population sexwise by different marital status for detailed age-groups separately by total, rural and urban components of population. It has been prepared for the State, Divisions and Districts.

2. It provides an elaborate base for comparing regional variations of marital status conditions in different age-groups since the last Census. It is also useful in estimating the trend of age of marriage. Further, it will indicate mortality in different marital status conditions within each age-group. Apart from indicating the above trends which may help in formulating hypothesis for population projections, the data on married females by age-groups can also be utilised for forecasting future births with the help of age-specific birth rates in order to improve or correct the population projections. Thus, this Table is of extreme utility for demographic studies and extrapolating future trends of various demographic variables.

3. Due to the basic deviations, it is feared, that it may not be fully comparable with the comparative Table C-III of 1951. The deviations are as follows :—

(a) The age-groups in 1951 Table were 0, 1-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74 and 75 and over, while in the present Table are 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, and 70 and over. Thus instead of 10 age-groups in 1951, it has been prepared for 14 age-groups. The groups in 1951 had been those recommended by the United Nations Population Commission because of the advantage that groups after 1-4 include the number 10 or multiples thereof at the centre so as to encompass the effect of the most favoured digit '0' in age reporting. The age-groups of the present Table have,

however, been adopted inspite of a somewhat detrimental departure from 1951, because they are more suitable to international comparability and have been recommended finally by the United Nations for Population Censuses.

(b) In the 1951 Table only three marital status conditions, viz., married, unmarried and widowed or divorced had been given, while in the present Table they have been increased to 5, viz., never-married, married, widowed, divorced or separated and unspecified status. It is a clear improvement over 1951. Firstly the status 'unmarried' has been made more exact by being termed as 'never-married' so as to exclude those who had been 'married' before, but were unmarried at the time of enumeration. Secondly, the status 'widowed' and 'divorced' have now been shown separately and the status 'divorced' has been modified to 'divorced or separated' because both are demographically same.

(c) The 1951 Census Table was based on a 10 per cent sample, while the present Table is for the total count. It thus presents the absolute figures which can be further analysed by reducing to proportion.

4. During the preparation of this Table, no one in the age-group 0-9 was treated as 'married' even if one was reported so in the Enumeration Slip. This was done to relate marriage closely with 'effective marriage' rather than 'ritual marriage'.

5. The following Table gives the distribution of 1,000 persons of each sex by marital status in the total, rural and urban areas of the State :

Distribution of 1,000 persons of each sex by Marital Status in Total/Rural/Urban

Total Rural Urban	MALES						FEMALES					
	Total	Never married	Married	Widowed	Divorced/ Separated	Unspecified	Total	Never married	Married	Widowed	Divorced/ Separated	Unspecified
Total	1,000	492	450	54	3	1	1,000	388	515	95	1	1
Rural	1,000	486	454	56	4	N	1,000	378	522	98	1	1
Urban	1,000	529	425	42	3	1	1,000	463	458	76	2	1

The above Table shows that out of 1,000 males each in the total and rural, less than 500 males are in the never-married group, whereas in the urban they are above 500. This difference in the rural and urban figures points to early marriage of males in the rural than in the urban sector where they are 454 out of 1,000. Out of 1,000 females in the total, 515 are in the married status. In the rural area there are 522 females in married group as opposed to 458 in the urban showing that females in the rural areas are married earlier than in the urban. There is almost universality of marriage among females after a comparatively low age. The proportion of never-married females is greater in urban areas than in rural. Contrary to the general practice in urban areas, in districts Uttar Kashi,

Bulandshahr, Etah, Mainpuri, Farrukhabad, Etawah, Kanpur, Fatehpur, Jhansi, Jalaun, Hamirpur, Banda, Kheri, Sitapur, Hardoi, Rae Bareli, Bahraich, Gonda, Bara Banki, Faizabad, Sultanpur, Pratapgarh, Basti, Deoria, Azamgarh, Jaunpur, Ballia, Ghazipur, Varanasi and Mirzapur the proportion of married females is higher than of never-married females. In districts Aligarh and Unnao both are equal. Males in the urban areas of only districts Kheri, Sultanpur, Pratapgarh, Basti, and Gorakhpur are more in the married state than in never-married. Thus, in the urban areas of districts Kheri, Sultanpur, Pratapgarh and Basti the proportion of both married males and females is greater than of never-married.

TABLE C III PARTS A, B AND C

AGE, SEX AND EDUCATION

A nation's progress in the modern world is increasingly dependent on education and as such it is very essential that adequate data on literacy and level of education are made available. These data are needed for evaluating the needs of education and planning specific measures to meet those needs. Besides this, they are also equally useful for chalking out and executing programmes in other fields such as industrial and agricultural development projects, measures to improve productivity, public health programmes, community development programmes, etc.

2. This Table is being presented in three parts. Compared with the 1951 Tables it will furnish a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. It will be of special interest to the Ministry of Education in the Centre and the Department of Education in the State for educational planning.

3. At the outset it seems necessary to give the definition of 'literate' adopted at the past Censuses so that an idea about the interdecade comparability may be formed. In 1881 and 1891 there were three sub-divisions, namely, 'learning', 'literate' and 'illiterate'. People who were 'under instruction whether at home, school or college' were classified under the head 'learning', those able to read and write any language but not at the moment under instruction as 'literate', and those not under instruction and not able to read and write any language as 'illiterate'. The degree of proficiency in reading and writing required to satisfy the test of literacy was not defined till 1911 when it was clearly laid down that only those were to be considered as 'literate' who could 'write a letter to a friend and read the answer to it'. Also, the three-way classification of 1881 and 1891 was abandoned in favour of a two-way grouping into 'literate' and 'illiterate' only, as the group 'learning' was vague at both ends of the age-grouping, namely, the younger pupils who had recently joined schools and not yet having a claim to 'literacy', and the more advanced students who were legitimately 'literate'. In 1941 and 1951 the same definition of literacy was retained, but the question was expanded in the latter year to provide for a record of partial literacy, namely, ability to read only. But apart from the question on literacy in 1941 and 1951, there was also a question on level of education represented by the highest examination passed. But agewise data by educational levels were not presented. This shortcoming has now been made up. In the past Censuses from 1901 to 1941 a question on literacy in English language was also prescribed which has been abandoned since 1951.

4. The Table of 1961 marks improvement on the comparative Table C-IV of 1951 in many ways. First, it is based on total count, while in 1951 the corresponding Table was based on a 10 per cent sample. Secondly, it provides separate figures for broad educational levels for total and rural areas and detailed educational levels for

urban area, while in 1951 only figures for 'illiterate' and 'literate' had been provided. Thirdly, the age-groups adopted this time are more detailed up to age 34 and less detailed after 44 *viz.*, 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59, 60 + against age-groups 0-4, 5-9, 10-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75 + of 1951. This change is obviously desirable, because the educational programmes are basically for the young. The comparative figures will be available only for the age-groups 0-4, 5-9, 10-14 and 35-44. For others, they will have to be estimated.

5. Part A is for all areas, Part B for urban areas, and Part C for rural areas of the State, each administrative division and district. Parts A and C have the same proforma and the information on illiterates, literates (without educational level), persons with education up to Primary and Junior Basic standard, and persons with education up to Matriculation and above by age-groups and sex has been presented. Part B which relates to urban areas gives detailed information relating to educational levels. These data for the urban areas indicate the available manpower possessing technical qualifications needed to man the country's development projects. Information on the following educational levels has been presented in it :

- (i) Primary or Junior Basic
- (ii) Matriculation or Higher Secondary
- (iii) Technical diploma not equal to degree
- (iv) Non-technical diploma not equal to degree
- (v) University degree or post-graduate degree other than technical degree
- (vi) Technical degree or diploma equal to degree or post-graduate degree in :
 - (a) Engineering
 - (b) Medicine
 - (c) Agriculture
 - (d) Veterinary and dairying
 - (e) Technology
 - (f) Teaching
 - (g) Others

6. In this State, Matriculation Examination is called High School Examination and there is no Higher Secondary Course. Therefore, persons with High School and Intermediate qualifications have been tabulated under 'Matriculation and above' in Parts A and C and under 'Matriculation or Higher Secondary' in Part B.

7. In Table C-III Part B, some figures are shown against the age-group 10-14 under 'Technical and Non-technical diplomas not equal to degree'. This is due to misstatement of ages by respondents and understatement by enumerators.

Note—A. N. S. stands for Age Not Stated.

APPENDIX

NOTE ON SCIENTIFIC AND TECHNICAL PERSONNEL

A new feature of the 1961 Census was a special enquiry relating to Technically Qualified Personnel undertaken at the instance of the Council of Scientific and Industrial Research. Its aim was to know the availability of existing manpower in the field of science, engineering, technology and medicine for manning the country's various development projects and industries, etc. The information was collected *only* in respect of those holding degrees in Science and Diplomas equal to degree. The following categories were considered to be technically qualified for this purpose :

Science :—A recognised Bachelor's or Master's Degree or Doctorate in subjects like Physics, Chemistry, Mathematics, Agriculture, Geology, Geo-Physics, Geography, etc.

Engineering :—Any recognised Degree or Diploma in Engineering

Technology :—Any recognised Diploma or Degree in technical subjects like Chemicals, Leather, Textiles, Glass, Ceramics, Food, etc.

Medicine :—Any recognised Diploma or Degree in Medicine or Surgery

Under-graduates in Science and mechanics or technicians, holding certificates not equivalent to a degree were not considered.

Data were collected on specially devised cards received from the Registrar General's office. Before a card was handed over to an eligible person details of the location code were filled up by the enumerator. These cards were collected by him from the persons concerned on his revisional round. At the same time they had the option to send the cards by post address of the Registrar General, India. After a preliminary check the Charge Officers despatched these cards to the Registrar General's Office through the District Census Officer. Despite these instructions, some of the cards were found mixed with other Census records in the Regional Tabulation Offices, and were thereupon sent to the Registrar General's Office.

The cards received in the Registrar General's Office were processed and 8 State Tables and 2 Union Tables were prepared as noted below :

State Tables :

- I Classification by each Branch and Sub-Branch of Science or Technology.
- II Type of Activity and Marital Status of Persons in each Branch of Science or Technology.
- III Year of obtaining Post-Graduate Degrees in Physical Sciences and Graduates and Doctorate Degrees in Engineering and Technology and Selected Branches of Medicine.
- IV Persons holding Degrees in Engineering and Technology and Selected Branches of Medicine and also holding Degrees in Selected Branches of Physical Sciences.
- V Nature and Sector of Employment of Persons in each Branch of Science or Technology.
- VI Total Monthly Income of Persons employed in each Branch of Science or Technology classified by Sector of Employment.
- VII Tenure and Sector of Employment of Persons in each Branch of Science or Technology.
- VIII Age and Period of Unemployed of Persons qualified in each Branch of Science or Technology.

Union Tables:

- I Age Composition of Persons in each Branch of Science or Technology.
- II Classification by State of Permanent Address and by State of Enumeration of Persons in each Branch of Science or Technology.

Out of these Tables, only eight State Tables are being printed as Appendix to Table C-III

The drawback in the information collected is that some persons were left out from this enquiry either because the persons to whom cards were issued did not return or post the same. The above procedure did not ensure complete coverage and consequently the Tables should be studied keeping this limitation in mind. Though the number of persons having such Degrees or Diplomas shown in these Tables is smaller than shown in Census Tables, the information so collected will go a long way in meeting a fet need.

STATE TABLE I—CLASSIFICATION BY EACH BRANCH AND SUB-BRANCH OF SCIENCE OR TECHNOLOGY

Classification No. of Branch/ Sub-Branch of Science or Technology	Description of Branch/Sub-Branch of Science or Technology	Persons	Males	Females
