WEST BENGAL CENSUS

MGIPC—S8—6 Census (PB)/65—18-11-65—1,525.

NOTE

This part of the Census Report on West Bengal and Sikkim contains eight Household Economic Tables. The Tables present the distribution of households classified by the nature of their participation in the two major household economic activities of the country, *viz.*, Family Cultivation and Household Industry. The scope of each table has been explained in a Fly-leaf preceding the table. This note will therefore confine itself to the explanation of the subject matter generally.

Household Schedule

Collection of economic information treating the household as the basic unit is a unique feature of the 1961 Census. In earlier Censuses, the only information available for households was their total number and size, and the entire information on economic activity related to individual persons. At the 1961 Census the information on the individual was sought to be supplemented by information on the economic activity of the household as a whole because it was thought that in a predominantly agricultural economy where a large part of the goods produced was not offered in the market but was used up by the producing household for its own subsistence, and where the only economic activity of a large number of persons was to lend a helping hand to family cultivation or household industry, collection of economic information on the basis of the individual alone could be a little misleading. A new document, the ' Household Schedule', was therefore introduced in the 1961 Census which was designed specially to collect comprehensive material on family cultivation and household industry. On the back of the Household Schedule', a Census Population Record was prepared. The form of the Household Schedule and the Population Record and the Instructions on their filling up have been reproduced in Appendix I to this Note.

Household

In the 1961 Census, a household was defined as a group of persons who commonly lived together and took their meals from a common mess unless the exigencies of circumstances prevented them from doing so.

" Household " is thus slightly different from " family ". A guest or a domestic servant residing and eating at the employer's house is a member of the household. On the other hand, a son or daughter staying away in hostels etc., is not a member of the household.

This definition of household applies to the inmates of hotels, hostels, hospitals, prisons etc. They were, however, treated as ' institutional ' households. Institutional Households were *excluded* at the time of drawing the 20 per cent sample on which the tables presented in this volume were prepared.

Household Cultivation

The definition of cultivation adopted in the 1961 Census differs from that of the earlier Censuses. Cultivation according to the 1961 Census definition, involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantation. A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, has not been treated as a cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce has not been treated as a cultivator.

When the Head of a household himself and/or any other member of a household is engaged (even as a secondary work) in cultivation of land, the household is said to be engaged in Household Cultivation. The land in this case may be owned or held by any person in the household and may be owned or held under different local rights. But to satisfy the definition of Household Cultivation, the land cultivated should be within the limits of the village or in adjacent village(s) or within such a distance as would enable the household to work on the land or to actively supervise the work.

Interests in Land

The classification of households engaged in Cultivation by interests in land is into the following three types, *viz.*,

(*a*) Those engaged in cultivation of land entirely owned or held from Government

(*b*) Those engaged in cultivation of land entirely held from private persons or institutions for payment in money, kind or share ; and

(*c*) Those engaged in cultivation of land partly owned or held from Government and partly from private persons or institutions for payment in money, kind or share.

Size of Land under Household Cultivation

The classification of cultivating households by size of land cultivated is in ten size groups ; *viz.*,

(1) Less than 1 acre
(2) 1·0 to 2·4 acres
(3) 2·5 to 4·9 ,,
(4) 5·0 to 7·4 ,,

(5) 7·5 to 9·9 acres
(6) 10·0 to 12·4 ,,
(7) 12·5 to 14·9 ,,
(8) 15·0 to 29·9 ,,
(9) 30·0 to 49·9 ,,
(10) 50·0 acres and above.

A last group of " unspecified " size has also been shown.

It is important to note that the tables presented in this volume do not give size classification of the holding of *individuals*. The size classification given classifies the cultivating *households* by size of land under Household Cultivation.

Household Industry

Household Industry is a new concept introduced in the 1961 Census. A Household Industry was defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry, to be classified as a Household Industry, was not to be run on the scale of a registered factory. Thus the main criterion for a Household Industry was the participation of one or more members of a household. In rural areas the industry should be situated in the same village in which the household lives, while in urban areas the industry was to be confined to the house. A Household Industry was to be related to production, processing, servicing, preparing or making and selling of goods.

The Household Schedule has a provision for recording two Household Industries. If a household conducted more than one Household Industry, the one conducted for the longer period in the year has been treated as the principal Household Industry and the tables have been based on that industry.

Appendix II to the Note gives a list of Common Household Industries with their Industrial Code Numbers.

Tabulation

All the eight Household Economic Tables presented in this volume have been prepared from a 20 per cent sample of households drawn from the Household Schedule pads for Rural and Urban areas separately. Extracts from the Instructions issued by the Registrar General, India, on the selection of Sample Household Schedules are reproduced below :

> For the purpose of tabulation every fifth household from the starting random household will be selected to make a 20 per cent sample. The sample household will be marked continuously for rural areas of a police station and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.
>
> Before marking the sample households the household schedule pads should be arranged in the order of location code-numbers of villages in a police station in the case of a rural area and in the order of the location code numbers of towns in the district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped(s) as selected. This random number (random start) should be chosen separately for rural areas of each police station and for the urban area of the district. From the first random household every fifth household should be continuously stamped as selected. A rubber stamp will have to be specially prepared for that purpose. The sample should be continuously marked for all the pads of villages in a police station and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after the marking of the sample household, the household left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household.
>
> In short the following points should be strictly followed while selecting the sample households.
>
> (i) All pads of household schedules of rural areas of one police station should be arranged in order of ascending number of location codes of villages. If a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.
>
> Similarly all pads of urban areas in a district should be arranged in ascending order of location code numbers. Within an urban area these pads will be arranged in the order of block numbers.
>
> (ii) After selection of the first sample schedule the sample will be continuously picked up without a break until the last pad of the police station is exhausted in the rual areas and the district in urban areas.
>
> (iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner w th a rubber stamp(s).
>
> * * * *
>
> (vi) In case two or more household schedules are utilised for a household on account of large size of the household all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.
>
> * * * *
>
> (viii) We are not concerned with institutions and, therefore, in taking out sample we should discard institutions and confine the samples only to family household. In counting every fifth household schedule, therefore, the schedule for institutional household should be left out, the order of the sample being confined only to the schedules of households.

The operations of coding, punching and machine processing of the Sample Household Schedules as well as the construction of the tables were done by the Central Mechanical Tabulation Unit of the Registrar General's Office.

Scheme of Presentation

Each of the eight tables included in this volume is preceded by a Fly-leaf which briefly explains its scope and method of presentation.

The administrative units refer to their territorial content as on the 1st March, 1961 except in the case of the police stations of the 24-Parganas District where adjustments were made for jurisdictional changes brought about under Notification No. 3490 P1, dated the 25th August, 1962.

The spelling of police station names follows that generally adopted by the Home (Police) Department of the Government of West Bengal.

Reference Date

The schedules were canvassed between the 10th and 28th February 1961. In a Revisional Round between the 1st and 5th March 1961 the Enumerator made necessary corrections in the enumeration in regard to new births, deaths and arrival of persons not counted elsewhere, so as to relate the result of the count to the sunrise of the 1st March 1961. But no corrections were made for the change of economic activity of the household or any of its members during the intervening period. Material presented in these tables should thus be relevant approximately to the 1st of March 1961.

Coverage

The 20 per cent sample of households was drawn separately from Rural and Urban households but institutional households were excluded in each case. The enclaves of the Cooch Behar District locked in Pakistan territory are not represented in the tables, because no Census could be taken there.

Limitations of the Data

In the Household Schedule the question on areas of land held under different interest was operationally very difficult to canvass. Some of the respondents did not know the exact areas of the land they owned, cultivated or leased out and could not describe them even in local measures. Some others were hesitant to give out the area of the land owned, cultivated, or leased out under apprehensions in the context of land reforms legislations.

The restriction of excluding certain activities relating to growing of fruits, orchards, plantations etc., could not be rigidly applied in all cases. The areas of cultivated lands recorded in the Household Schedules are the areas of cultivated lands as returned by the responding households who might not be aware of the finer distinction made by the definition.

Acknowledgments

As the State Census Office was not equipped for mechanical tabulation, the extracted Samples of Household Schedules were sent for tabulation to the Mechanical Tabulation Unit of the Registrar General's Office. I am grateful to Shri S. C. Sharma, Mechanical Tabulation Officer and his staff for the care with which they processed the data and prepared the tables. I would like to take the opportunity of expressing my appreciation of the work done by Shri R. C. Bhar, Printing Inspector, and Shri S. Niyogi, Tabulation Assistant of my office and their teams in connection with the scrutiny of the proofs. I freely availed myself of the advice and assistance given by my colleagues Shri S. Sinha, Officer on Special Duty and Shri B. Ray, Deputy Superintendent in the drafting of the Notes and Fly-leaves and in the general supervision of the printing.

For the Household Economic series of tables, as for the other unique features introduced in the 1961 Census, acknowledgement is specially due to the pioneering lead of Shri A. Mitra, Registrar General of India. To him I personally owe more than I can adequately express for constant encouragement, stimulus and guidance.

Instructions for filling up the Household Schedule

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tehsil/thana/town, village/ward/block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but on 'un-related persons living together'. In such a Household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spend the weekdays in town and spends the week-ends at home, he should be recorded as Head of Household and entered for enumeration at this home. If he should be away for a fairly long time which covers the entire enumeration period than the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the head of the household marked "S.C./S.T.". If the Head of the household is a member of a Scheduled Caste or a Scheduled Tribe obtaining in your state or in your district you should write S.C. or S.T. as the case may be within the parallelogram. If the Head of the Household does not belong to Scheduled Caste or Scheduled Tribe you should put 'X' within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(*i*), 1(*ii*) and 2. Items 1(*i*) and 1(*ii*) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(*i*) and 1(*ii*) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household(*a*) cultivates land owned or held from Government or taken from private persons or institutions or (*b*) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(*i*) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, *e.g.*, land held directly from Government under a grant, lease or assignment, (*i*) with rights of permanent, heritable and transferable possession, (*ii*) with rights of permanent and heritable possession, but without the right of transfer and (*iii*) temporary or conditional leases of any kind with the Government. Category 1(*ii*) land taken from private persons or institutions for payment in money, kind or share, will include land (*i*) with rights of permanent, heritable and transferable possession, (*ii*) with rights of permanent and heritable possession but without right or transfer, (*iii*) held in a variety of tenancies or tenures which may be broadly classified as follows:—

(*a*) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);

(*b*) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire owne ship of the non-resumable area. In other cases he does not possess the right) ;

(*c*) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period ;

(*d*) tenants holding land on temporary leases who are liable to ejectment ; and

(*e*) areas held on conditions of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permament rights) ; and

(*iv*) the following :—

(*a*) land taken for a fixed amount of money,

(*b*) land taken for a fixed amount of produce,

(*c*) land taken for a share of the produce,

(*d*) land for which money is paid partly in one and partly in any other form mentioned above, and

(*e*) land held free of consideration.

Category 2 Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(*ii*).

Categories 1(*i*) and (*ii*) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constan supervision or direction. But Category 2 will include and in any part of the country whatsoever. You should ascertain the extent of land in each category of local right i n acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent-free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of 3 co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold :—

(*a*) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(*c*) Location also is important, for proximity decides participation by members of the Household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dying the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with help of members of the family roll biris at home,

for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and hand-sewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(ies) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers, in Cultivation or Household Industry.

In the case of households which are egaged only in Cultivation, if the Head of the household is working write I under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the head of the household is working write I in the column relating to the 'Head', and also ascertain how any male members and female members of the family are working and write the numbers in the respotive columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write I under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a Household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of housholds engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of Households engaged in Household Industry put 'X' in the columns relating to, Household Cultivation only, and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY FOR ALL AREAS

TABLE B-X—SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY FOR ALL AREAS

(Based on 20% Sample)

This is the basic Household Economic Table which classifies the Sample Households with reference to their participation or otherwise in the two most important household economic activities, *viz.*, Household Cultivation and Household Industry. The classification is in the following four categories :

(i) households engaged neither in Cultivation nor Household Industry;

(ii) households engaged in Cultivation only (*i.e.*, not in Household Industry);

(iii) households engaged in Household Industry only (*i.e.*, not in Cultivation) ; and

(iv) households engaged both in Cultivation and Household Industry.

2. The concepts of Household, Household Cultivation and Household Industry have been explained in the Preliminary Note.

3. The data are presented separately for Total, Rural and Urban areas of West Bengal, its administrative divisions and districts. Police station-wise break up is also presented under each district but to the extent of rural areas alone. Similarly, for Sikkim, tehsil-wise break-up for rural areas has been given.

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

TABLE B-XI—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table relates to such of the Sample Households as are engaged in Household Cultivation (either exclusively or along with Household Industry). It classifies the cultivating households by interest in the land cultivated and size of the land cultivated.

2. The interest in land is divided as follows :

(i) owned or held from Government ;

(ii) held from private persons or institutions for payment in money, kind or share ; and

(iii) partly held from Government and partly from private persons for payment in money, kind or share.

3. The size classification of land under Household Cultivation is in the following categories :

(i) Less than 1 acre
(ii) 1·0 to 2·4 acres
(iii) 2·5 to 4·9 ,,
(iv) 5·0 to 7·4 acres
(v) 7·5 to 9·9 ,,
(vi) 10·0 to 12·4 ,,
(vii) 12·5 to 14·9 ,,
(viii) 15·0 to 29·9 ,,
(ix) 30·0 to 49·9 ,,
(x) 50 acres and above.

A last group of " unspecified" size has also been shown.

4. The table starts with the figures for Rural areas of West Bengal followed by the division, district and police station and of Sikkim and its three tehsils. After the end of the last tehsil of Sikkim, the figures for the Urban areas of West Bengal, its divisions, districts and of Sikkim have been given.

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

TABLE B-XII—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND UABAN AREAS SEPARATELY

(Based on 20% Sample)

This table relates to such of the Sample Households as are engaged in Cultivation only (*i.e.*, not in association with Household Industry). Each household having a particular size of holding mentioned against Table B-XI has been cross-tabulated with reference to the number of persons engaged in cultivation. Family workers and hired workers have been shown separately. Family workers have been further classified by sex. The classification of the cultivating households according to number of persons engaged in cultivation has been made into the following categories :

(i) 1 person

(ii) 2 persons

(iii) 3-5 persons

(iv) 6-10 persons

(v) More than 10 persons

(vi) Unspecified

2. According to enumeration instructions the hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

3. The data are presented separately for Rural and Urban areas. The table starts with the figures for the Rural areas of West Bengal followed by division, district and police station and of Sikkim and its three tehsils. After the end of the last tehsil of Sikkim the figures for the Urban areas of West Bengal, its divisions, districts and of Sikkim have been given.

TABLE B-XIII—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table is prepared for such of the Sample Households as are engaged both in Cultivation and in Household Industry. The households have been cross-classified by size of land cultivated and the nature of Household Industry conducted. The holding size classes are the same as mentioned in Table B-XI. The Household Industries are classified down to Major Groups of Standard Industrial Classification.

2. The table gives figures for Rural and Urban areas separately. The table starts with the figures for the Rural areas of West Bengal followed by those of the Division and Districts and of Sikkim. Then the figures for the Urban areas of West Bengal, of its Divisions and Districts are given.

3. The main table gives figures only for those Major Groups of Household Industry where the number of households is 10 per cent or more of the total number of households in the respective Division. For economy in space Major Groups of Household Industry having less than 10 per cent of the figures of the respective Division have been shown in an Appendix at the end of the table.

HOUSEHOLDS CLASSIFIED BY MAJOR GROUPS OF PRINCIPAL HOUSEHOLD INDUSTRY

TABLE B-XIV—SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

(Based on 20% Sample)

Part A—Households classified by Major Groups of Principal Household Industry and number of persons engaged

This table relates to those Sample Households which are engaged only in Household Industry. This part of the table classifies the Household Industries by their nature, *i.e.*, by Major Groups and also by their size, *i.e.*, by the numbers of persons engaged. The Major Group numbers correspond to the Indian Standard Industrial Cassification. The size classifications are as follows:

(i) 1 person,
(ii) 2 persons,
(iii) 3 to 5 persons,
(iv) 6 to 10 persons,
(v) more than 10 persons and
(vi) unspecified.

2. Whenever a household conducts more than one Household Industry, the table has taken into account the Principal Industry. The Industry which is conducted for the longer period of the year is considered the principal one.

3. Figures have been given for Total, Rural and Urban population, down to the district level.

4. For economy in space Major Groups of Household Industry where the number of households is less than 10 per cent of the total number of households in the respective Division are given in run on lines in an Appendix to the table.

TABLE B-XIV—SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

(Based on 20% Sample)

Part B—Households classified by Minor Groups of Principal Household Industry

This part of the table classifies the households engaged only in Household Industry by Minor Groups of Household Industry. A list of Common Household Industries under each Major Group was drawn up for this purpose. The list has been reproduced at Appendix II to the preparatory Note of this volume. Each Household Industry has been given a Minor Group number (three digit code). If in a Minor Group there are more than one Household Industry, they are represented by Sub-groups as 005·1, 005·2 etc.

2. For definition of Principal Household Industry, Fly-leaf to Part A of the table may be referred to.

3. Figures are given for State. Divisions and Districts, separately for the Total, Rural and Urban population.

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

TABLE B-XV—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

This table deals with such of the sample housholds as are engaged both in Cultivation and Household Industry. This table, in effect, supplements the information given in Table, B-XII, which relates to the sample households engaged only in Cultivation whereas the present table relates to the sample households engaged both in Cultivation and Household Industry. In Table B-XIII which also relates to the latter category of households, a cross tubulation has been made between the size of the holding and the nature of the Household Industry in which the household is engaged as a support to Cultivation. In table B-XV an analysis has been made of persons working in these households with referance to the size of holdings. In cases where more than one person are employed the number of family workers and hired workers have been shown separately. A comparison of this table and B-XII will show how the combination of Household Industry with Cultivation affect the employment position. This table has established a co-relationship between the scale of household Industry and the scale of Cultivation.

2. Data are given separately for the rural and urban areas. The table commences with the figures for the rural areas of West Bengal followed by those for the rural areas of the Divisions, Districts, Police Stations etc. After the figures for the last rural Tehsil of Sikkim, the figures for the urban areas of West Bengal, the Divisions, the Districts and of Sikkim have been given.

3. Police stations with nil entries have been omitted.

B-XVI

SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN ALL AREAS

TABLE B-XVI—SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY IN ALL AREAS

(Based on 20% Sample)

This table relates to such of the Sample Households as are engaged in Household Industry. Data are given separately for households engaged in (a) Household Industry with Cultivation and (b) Household Industry without Cultivation. The principal Household Industries practised by households are classified according to the period of working of the industry. The period of working is grouped under the following categories:

(i) 1–3 months
(ii) 4–6 months
(iii) 7–9 months
(iv) 10 months–1 year
(v) Months not stated.

2. Under each category number of households, number of family workers divided by sex and the number of hired workers are shown separately. The principal Household Industry is also classified by the Division and Major Group of the Indian Standard Industrial Classification.

3. The table takes into account only the principal Household Industry, that is to say, where a household practises more than one Household Industry the one which is run for the longer period of the year has been taken into account.

4. The main table gives figures only for Major Groups of Household Industries where the number of of households is 10 per cent or more of the total number of households in the respective Division. For economy of space, Major Groups of Household Industry where the number is less than the total number of households in the respective Division are given in the Appendix to the table.

5. The table gives data for Total, Rural and Urban areas separately down to the district level.

SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

TABLE B-XVII—SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHER IN CULTIVATION NOR IN INDUSTRY (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% Sample)

This table has been prepared for Total, Rural and Urban areas. For rural areas all the Sample Households have been divided into three categories *viz.*, (i) households engaged neither in Cultivation nor Household Industry; (ii) households engaged in Household Industry only and (iii) households engaged in Cultivation. All the households under category (iii) have been further classified according to the size of land cultivated. Each of the above categories and sub-categories has then been classified by the size of the households. The sizes are (a) single member households, (b) households with 2-3 members, (c) households with 4-6 members, (d) households with 7-9 members and households with 10 or more members. In the case of total and urban areas the households have been divided only according to the sizes.

2. Data are presented down to the district level.

3. Columns 3 to 5 of the table show the Sample Household Population classified by sex in each class of Sample Households. The following Statement at pages 688 and 689 shows the total number of Households and Household Population in the State and districts. For the purpose of this Statement the number of households includes institutional households but household population excludes institutional and houseless population.
