PREFACE

The present volume contains subsidiary tables of A, B, C and D series, giving proportionate figures worked out from the main Census tables. The subsidiary tables on E-series viz., Housing and Establishment Tables have been printed in Volume VIII, Part IV-A.

The objective in presenting the subsidiary tables is to facilitate the data-users to observe, at a glance, the salient features of the figures in the main tables. An Explanatory Note has been given at the beginning of each series of subsidiary tables to make the tables more understandable. For ready reference of the list of Standard Industrial Classification, it has been reproduced as Annexure that follows.

I am thankful to Shri K. K. Chakravorty, Central Tabulation Officer and his staff for taking considerable pains in scrutinising these tables and pointing out the discrepancies noticed in them.

I am also thankful to my staff members for the hard labour put in by them in the compilation and computations involved in preparing these tables. Lastly, I am thankful to Shri S. K. Mishra, Proof Reader, on whom was the main burden of proof reading.

Bhopal,
Dec. 18, 1967.

Uma Kant Trivedi
Deputy Superintendent of Census Operations,

SECTION—I

SUBSIDIARY TABLES TO GENERAL
POPULATION TABLES

[A—SERIES]

EXPLANATORY NOTE

The General Population Tables (A Series) on the basis of which the eight Subsidiary Tables contained in this Section are prepared, have been published in Part II-A of 1961 Census Publications Madhya Pradesh. Out of eight Tables five are based on Table A-I, one on Table A-III and two on Table A-IV.

A-I. 1 : Area and population (actual and percentage) by Tahsil density.

In this Table area and population (actual and percentage) are given for 51 units, viz., the State of Madhya Pradesh, its 7 divisions and 43 districts in different ranges of Tahsil density. The Tahsils have been distributed into 8 ranges of density, viz., under 100, 100-150, 150-200, 200-300, 300-450, 450-600, 600-750 and 750 and over. For each of the administrative units two sets of figures have been presented, viz., the actual figures and below it the percentage values in brackets. The area, density and population figures are taken from columns 3 (a), 4 and 9 respectively of State Table A-I. The percentages of area and population are rounded off to one place of decimal.

A-I. 2 : Distribution of 1,000 occupied residential houses and 10,000 persons by rural and urban and comparison with the 1951 and 1941 Censuses.

In this Table the figures have been shown for the State, its 7 divisions and 43 districts with rural and urban break-up with comparable figures for 1951 and 1941 Censuses.

The relevant data have been compiled from Table I of 1941 and Table A-I of 1951 and 1961 Censuses.

Two sets of figures have been given for 1951 and 1941 Censuses in respect of State, Divisions and some of the districts. The first set of figures are those in which the new definition of the town of 1961 has been taken into account and also the territorial

changes occurring in the previous decades, while the second set of figures (given in brackets) takes into account the territorial changes only. Only one set of figures has been presented where there is no difference in the figures of both the sets. The figures for rural population of the districts have been obtained by deducting the urban population worked out as above from the total population shown in Table A-II.

A-I. 3 : Persons per 1,000 houses and houses (i) per 100 square miles in rural areas and (ii) per square mile in urban areas and comparison with past Censuses.

This Subsidiary Table presents the distribution of persons per 1,000 houses in total, rural and urban areas, with houses per 100 square miles in rural areas and per square mile in urban areas with comparable figures for the past four Censuses. The break-up of figures of houses and population for total, rural and urban areas for earlier Censuses has been worked out in the same manner as used in Subsidiary Table A-I. 2. In this Subsidiary Table also two sets of figures have been presented similar to those of Subsidiary Table A-I. 2.

Columns relating to houses per 100 square miles in rural areas and houses per square mile in urban areas for the years 1921-1941 have been omitted as separate area figures for rural and urban areas for Censuses prior to 1951 are not available.

While working out the number of houses per square mile in urban areas in 1951, the houses of those towns for which 1951 area figures are not available have been excluded from urban areas and consequently added in 'rural areas' of the respective districts. In case of deleted town the figures have been excluded in the 2nd set of figures and in case of existing towns the figures have been excluded from both the sets.

Comparable figures of houses with rural urban break-up for 1921 and 1931 Censuses could not be

worked out with a fair degree of precision and accuracy for 1961 Census districts and divisions, as the present State of Madhya Pradesh was then composed of part of British India and a large number of princely and feudatory states; figures involved in the territorial changes of which are not available in all cases.

A-I. 4 : Females per 1,000 males, total/rural/urban population and comparison with previous Censuses.

In this Table figures are presented for total, rural, and urban areas of the State of Madhya Pradesh its 7 divisions and 43 districts. Two sets of figures for the Censuses 1921 to 1951 have been presented as in Subsidiary Table A-I. 2.

The rural and urban break-up according to the first set of figures takes into account the new definition of towns of 1961 Census in addition to the territorial changes in the district; while the second set (given in brackets) shows only the territorial changes in the district.

A-I. 5 : Variation and density.

In this Table percentage variation in population during each Census decade since 1921 to 1951 and the density of population for 1951 and 1961 Censuses, separately for total, rural and urban areas have been presented.

Two sets of figures have been presented against rural and urban areas under columns 2 to 5 relating to percentage variation in population and under column 7 relating to density of 1951. The first set of figures takes into account the 1961 list of towns in addition to the territorial changes in a district, while the second set (within brackets) of figures takes into account the territorial changes only. The total, rural and urban break-up of population figures for Censuses 1921-1951 and rural and urban break-up of area figures for 1951 Census have been worked out in the same manner as in Subsidiary Tables A-I. 2 and A-I. 3.

Plus (+) sign has been given before the percentage variation when the population of any Census is higher than that of the preceding Census and minus (—) sign when reverse is the case.

A-III. 1 : Distribution of rural population between Villages of different sizes.

In this Table average population per Village (column 2), rural population per 1,000 of total population (column 3) and distribution of 1,000 rural population in Villages by size classes of population (columns 4 to 9) are given for the State, its 7 divisions and 43 districts.

The figures in columns 2 and 4 to 9 are taken from State Table A-III and those in column 3 from column 9 of State Table A-I. The six size classes of population are the same as shown in State Table A-III.

A-IV. 1 : Distribution of urban population between cities, town-groups/towns.

In this Table (i) the number of cities, town-groups and towns, (ii) average population per city, town-group and town, (iii) proportion per 1,000 of total population in city, town-group and town, and (iv) distribution of 1,000 urban population in cities, town-groups and towns in six size classes of population are given for the State, its 7 divisions and 43 districts.

Six size classes of towns are the same as in Table A-IV--viz., (i) those with a population of 100,000 and above; (ii) those between 50,000 and 99,999; (iii) between 20,000 and 49,999; (iv) between 10,000 and 19,999; (v) between 5,000 and 9,999; and (vi) those less than 5,000.

A-IV. 2 : Number of females per 1,000 males and density for each city/town-group/town.

This Subsidiary Table shows the sex-ratios (number of females per 1,000 males) and density (population per square mile) for each city, town-group and town for 1961 and 1951. In all 210 urban places have been treated as towns in 1961 which include 6 town groups (including 2 cities as constituents) and 4 independent cities.

Nil entries in columns 4 and 6 indicate that the place was not treated as a town in 1951.

Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census also are shown with asterisk (*) on the left.

Towns treated as such for the first time in 1961 are printed in italics.

The first set of figures are those in which the new definition of the town of 1961 has been taken into account and also the territorial changes occurring in the previous decades. While the figures given in brackets below the first set of figures are those in which only territorial changes have been taken into account and not the new definition. In the district where no second set of the figures is given there is no difference between the two sets.

Note : 1 The rural and urban break up according to the first set of figures takes into account the new definition of Towns of 1961 Census in addition to the territorial changes in the State, Divisions and Districts ; while the second set wherever given (in brackets) shows only the territorial changes in the State, Divisions and Districts

2 Columns relating to houses per 100 sq. miles in rural area and houses per sq. mile in urban area for the years 1921-1941 have been omitted, because the separate area figures for rural and urban areas for Censuses prior to 1951 are not available.

3 While working out the number of houses per sq. mile in urban area in 1951, the houses of those towns for which 1951 area figures are not available have been excluded from urban area and consequently added in "rural area" of the respective district. In case of deleted town the figures have been excluded in the 2nd set of figures and in case of existing towns the figures have been excluded from both the sets.

4 Comparable figures of houses with rural/urban break up for 1921 and 1931 Censuses could not be worked out with a fair degree of precision and accuracy for 1961 Census districts and divisions as the present state of M.P. was then composed of part of British India and a large number of princely and feudatory states ; figures involved in the territorial changes of which are not available in all cases.

AND (ii) PER SQUARE MILE IN URBAN AREAS AND COMPARISON WITH PAST CENSUSES—concl'd.

Note : 1 The rural and urban break-up according to the first set of figures takes into account the new definition of towns of 1961 Census in addition to the territorial changes in the State, Divisions and Districts, while the second set (in brackets) shows only the territorial changes in the State, Divisions and Districts.

2 While working out the 1951 density figures, the population of those towns for which 1951 area is not available, has been excluded from urban area and included in "rural area." In case of deleted towns the figures have been excluded in the second set of figures and in case of existing towns the figures have been excluded from both the sets of figures.

No Subsidiary Table is prepared from Table B-XIII. The Subsidiary Tables presented are based on the data collected in the Household Schedules of 20 percent of the Sample of households in rural and urban areas.

A 'Household' is a group of persons living together in the same Census house and taking their meals from a common kitchen unless the exigencies of work prevented them from doing so. The concepts of 'Cultivation' and 'Household Industry' have been explained in the Introductory Note. Some salient features of each table are described below:—

B-X. 1—Distribution of 1,000 Sample households, (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry for all areas.

The data are presented separately for total, rural and urban areas of the State, its 7 divisions and 43 districts. This Table shows the extent of participation of Sample households in the two most important economic activities in the country, viz. Cultivation and Household Industry with the distribution of 1,000 Sample households into the following four categories:—

- (i) Households engaged neither in cultivation nor household industry;

- (ii) Households engaged in cultivation only;
- (iii) Households engaged in household industry only; and
- (iv) Households engaged both in cultivation and household industry.

The figures in each line under columns 4, 5, 6 & 7 have been rounded off to the nearest integers so that they add up to 1,000 in case of each unit.

B-XI. 1—Distribution of 1,000 Sample households engaged in cultivation by interest in land and size of land cultivated in rural areas only.

This Table presents the distribution of 1,000 Sample households engaged in cultivation by interest in land and size of land cultivated for rural areas of the State, its 7 divisions and 43 districts. 11 size-classes of land cultivated in acres viz. less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9, 50+ and unspecified have been shown in horizontal spread and the interest in land, viz. (a) Land under cultivation entirely owned or held from Government, (b) Land under cultivation held from private persons or institutions for payment in money, kind or share and (c) Land partly held from Government and partly held from private persons and institutions for payment in money, kind or share has been shown in vertical spread under column 2 only by abbreviations (a), (b) and (c).

Figures in columns 4-14 have been rounded off to two places of decimal so that in each line they add up to the figures in column 3 and in each column vertically to the figures shown against Total.

B-XII.1—Distribution of 1,000 Sample households engaged in cultivation by size of land cultivated in rural areas only.

This Table presents the distribution of 1,000 Sample households engaged in cultivation by size of land cultivated for rural areas of the State, its 7 divisions and 43 districts. The size-classes are the same as in Subsidiary Table B-XI.1.

For each size-class of cultivated land, 1,000 Sample cultivating households for all size-classes are shown classified into those engaged in cultivation only and those engaged both in cultivation and household industry.

B-XII.2—Distribution of 1,000 Sample households engaged in cultivation by size of land cultivated and working strength in rural areas only.

In this Table data are presented for rural areas of the State, its 7 divisions and 43 districts. The table shows the distribution of 1,000 Sample households of each of the two categories, viz., (i) households engaged in cultivation only and (ii) households engaged both in cultivation and household industry by working strength and same sizes of land cultivated as in Table B-XI.1. The distribution of households by working strength is in 6 categories viz. 1 person, 2 persons, 3-5 persons, 6-10 persons, more than 10 persons and persons un-specified. The persons engaged include family workers as well as hired workers.

B-XII.3—Distribution of 1,000 Sample household workers (family/hired) engaged in cultivation with and without household industry by each size of land cultivated and size of employment by family and hired workers in rural areas only.

This table presents the distribution of 1,000 workers engaged in cultivation with or without household industry and in each size-class of cultivated holding and size of employment by family and hired workers in rural areas of the State, its 7 divisions, and 43 districts. The size-classes of cultivated holding and the size groups of employment are the same as in Table B-XI.1 & B-XII.2 respectively.

For the size-group of employment 'All persons' classification by sex has also been shown in respect of family workers. In the employment size 'One person', there is no classification by hired worker because this employment size must relate to a family worker.

Figures are rounded off to two decimal places.

B-XII.4—Average number of family and hired workers per cultivating household by each size of cultivated holding in rural areas only.

This Subsidiary Table presents the average number of family and hired workers per cultivating household and number of family workers per hired worker separately for total cultivating households, households with cultivation only and households both in cultivation and household industry for each size-class of land cultivated as in Table B-XI.1.

The data are presented for rural areas of the State, its 7 divisions and 43 districts.

B-XIV Part A.1—Distribution of 1,000 Sample households engaged in household industry only by principal household industry and working strength in all areas.

The Subsidiary Table presents the distribution of 1,000 Sample households engaged in household industry only by principal household industry and working strength separately for total, rural and urban areas of the State, its 7 divisions and 43 districts. The size-groups of the working strength are the same as in Subsidiary Table B-XII.2.

In a household engaged in more than one household industry, the one which was conducted by it for a longer period in the year has been treated as its principal household industry.

Figures in columns 5 to 10 have been rounded off to two places of decimal so that they add upto 1,000 in each line.

B-XIV Part B. 1—Distribution of 1,000 Sample households engaged in household industry only by principal household industry (division/major groups/minor groups) in all areas.

The Table shows the distribution of 1,000 sample households engaged in household industry only by nature of household industry.

Material is presented separately for total, rural and urban areas of the State and its 43 districts. The total number of households for each industrial division has been treated as 1,000 and it has been further distributed among the major and minor groups of that division. The minor groups here are shown by 4 digit code numbers according to the list of common household industries presented with such four digit classification. Each industrial division, major group and minor group is also briefly described in column 2.

The distribution by rural and urban areas appears in horizontal spread and that by major groups and minor groups in vertical spread.

B-XVI.1—Distribution of 1,000 Sample households engaged in household industry (with and without cultivation) by principal household industry in each duration.

This Table shows the distribution of 1,000 Sample households engaged in household industry (with and without cultivation) by period of working of

the household industry classified by rural and urban areas. The classification by duration or period of working of the industry is by five groups viz. 1—3 months, 4—6 months, 7—9 months, 10 months—1 year and unspecified.

Figures against abbreviation (a) in column 2 relate to with cultivation and those against (b) without cultivation.

Material is presented separately for rural and urban areas of the state, its 7 divisions and 43 districts.

The figures are rounded off to two decimal places. Figures in columns 4 and 5, and 6 to 15 respectively add up to 1,000 shown in column 3.

B-XVI.2—Distribution of 1,000 Sample household workers engaged in principal household industry (with and without cultivation) by family and hired workers in each duration.

Data are presented for the State, its 7 divisions and 43 districts with rural and urban break-up. The Table gives the distribution of 1,000 Sample household workers (engaged in principal household industry with and without cultivation) in each working period (as shown in Table B-XVI.1) by family and hired workers separately.

Abbreviations (a) and (b) in column 2 denote the same categories of households as in Subsidiary Table B-XVI.1.

The Figures are rounded off to two decimal places. The figures in columns 3 and 4 for (a) and (b) and columns 11 to 35 for (a) and (b) add upto 1,000 respectively.

B-XVI.3—Average number of family and hired workers per household engaged in principal household industry (with and without cultivation) by the duration of household industry in rural and urban areas

For each principal household industry, the table shows by a horizontal spread, first the average of total workers, family workers, hired workers and the number of family workers per hired worker for the total households engaged in household industry, then similar averages and ratios for households under each duration of household industry. Similar averages and ratios are provided vertically under each household industry for households engaged 'with or without cultivation.'

The figures are rounded off to two decimal places. Asterisk sign (*) in columns 6, 10, 14, 18, 22 and 26 denotes that it has not been possible to calculate the required entries because of 'nil' entries for hired workers in the main table B-XVI.

B-XVII.1—Distribution of 1,000 Sample households by size of households.

This Subsidiary Table shows the distribution of 1,000 Sample households by five size-classes viz. single member, 2—3 members, 4—6 members, 7—9 members and 10 members and over.

Material has been presented for total, rural and urban areas of the state, its 7 divisions and 43 districts.

For each size-group sexwise population are also shown horizontally along with the number of households.

The figures are rounded off to two decimal places. Figures in columns 6, 9, 12, 15, and 18 add upto 1,000 Sample households shown in column 2. Similarly figures of males and females for different size-groups add up to total male and female population of 1,000 Sample households.

B-X. 1—DISTRIBUTION OF 1,000 SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY FOR ALL AREAS

Note—"The State figures for 1951 have been adjusted to 1961 territorial jurisdiction in view of the changes due to the State's Reorganisation in 1956 on the basis of paper No. 2 of 1957 (1951 Census—livelihood civil condition and literacy tables by age groups of sample population of Reorganised States). Adjustments on these lines could not be made in the figures of Mandasaur and Vidisha districts affected by the State's reorganisation. In the case of former the details of 77 villages and sunel town which were formerly part of Bhanpura tahsil but now form part of Jhalawar district of Rajasthan, were not available. Regarding Vidisha district the unit involved in the transfer is the Sironj sub-division of Kotah district of Rajasthan State where actual figures have been adopted in so far as its rural area is concerned. For Sironj town, whose actual figures were not available, figures proportionate to that of Kotah district Non-city urban area have been worked out."

SECTION V

**SUBSIDIARY TABLES TO
MIGRATION TABLES**

(D-SERIES)

EXPLANATORY NOTE

The Migration Tables, also known as D-Series Tables, have been printed in Part IIC (ii-A & B) of the 1961 Census Publications for this State. In all nine Subsidiary Tables in this section have been prepared from D Series Tables published in Part IIC (ii-A) of this State. Three Subsidiary Tables each are prepared from Tables D-II and D-IV and one each from D-I, D-III and D-V. There is no Subsidiary Table to Table D-VI.

D-I.1- Distribution of 1,000 non-Indian nationals by Countries of nationality.

The data presented in this Subsidiary Table have been taken from the main Table D-I.

This Subsidiary Table presents the distribution of 1,000 non-Indian Nationals by Countries to which they belong. Persons employed in Foreign embassies and Missions and their families have been excluded from this table as they were not enumerated in the Census.

Material is presented for the State, its 7 divisions and 43 districts under the following 5 broad groups by horizontal spread in columns 3 to 8:—

- (i) Nationals of countries in Asia beyond India (including U.S.S.R.)
- (ii) Nationals of countries in Europe (excluding U.S.S.R.)
- (iii) Nationals of countries in Africa
- (iv) Nationals of countries in Two Americas
- (v) Nationals of countries in Australia

Proportional figures with sexwise break-up for countries contributing more than 1 in 1,000 non-Indian Nationals in different administrative units have been presented in small Tables following the Subsidiary Table.

D-II.1-Variation in Natural Population

This table seeks to show as to what would have been the population of Madhya Pradesh in 1961 and in 1951 had there been no migration, inward or outward. This population is known as Natural population of the State. In this Table variation in natural population between 1951 and 1961 has been shown. Since Madhya Pradesh is a new state constituted after the 1951 Census, birth place data for 1951 had to be recast for the reorganised States to arrive at the figure of natural population in 1951. This has presented some difficulties and hence full data have been presented for 1961 only and not for 1951.

The recorded population of 1961 shown in col.2 of the Table is the enumerated population in Madhya Pradesh and in the case of 1951 it is the adjusted population according to territorial changes that have taken place after 1951. The figures in respect of immigrants relate to persons born outside the State. The figures of emigrants, however, relate only to persons born in this State but enumerated in other States and Union territories of India as figures of persons born in this State but enumerated outside India are not available. As natural population in 1951 is not available, percentage decade variation in natural population in col. 10 has been shown as N.A. (not available).

D-II.2-Migration between the State and other parts of India

This Subsidiary Table presents the migratory movement between Madhya Pradesh and other parts of India for 1961 and 1951. Details in respect of Immigration and Emigration are given in the note of Subsidiary Table D-II.1.

The reorganisation of State and consequential territorial adjustments presented difficulties in recasting data regarding birth place for 1951 Census. The data regarding migration movement for 1951 have not therefore been presented.

D-II.3- Distribution of 10,000 persons enumerated in each State/District by place of birth, rural/urban characteristics and sex.

The source of the data is the main Table D-II.

This Subsidiary Table presents the distribution of 10,000 persons enumerated by place of birth, rural and urban characteristics of place of birth and sex. The data are presented separately for total, rural and urban areas of the State, its 7 division and 43 districts with their sex break-up. The distribution by place of birth is shown by horizontal spread into seven categories, viz., (i) Born in place of enumeration, (ii) born in district of enumeration other than place of enumeration, (iii) born in other districts within the State, (iv) born in other States in India, (v) born outside India, (A) Nepal, (B) Pakistan and (C) other countries, (vi) born at Sea and (vii) Unclassifiable.

D-III.1-Proportion of 10,000 persons born outside the place of enumeration by place of birth, duration of residence at the place of enumeration and sex.

The data presented in this Subsidiary Table have been taken from the main Table D-III. This Subsidiary Table presents proportion of 10,000 persons of each sex born in rural/urban areas of (i) the district of enumeration and (ii) other districts of the State, classified by six categories of periods of stay at the place of enumeration viz. (i) less than 1 year (ii) 1-5 years, (iii) 6-10 years (iv) 11-15 years, (v) 16+ and (vi) period not stated.

Material is presented separately for rural and urban areas of the state and its 43 districts only.

Similar proportion relating to migrants from other States and Union territories of India have been presented in the inset Tables. To save space, only those States have been exhibited which contributed 1 or more in 1,000 of total migrants in a particular administrative unit. These inset Tables are not prepared for persons born outside the country.

D-IV.1-Distribution of 1,000 migrants to Cities/Town-groups by age-groups.

The material presented in Subsidiary Tables D-IV.1; D-IV.2, and D-IV.3 is based on the main Table D-IV.

This Subsidiary Table shows the distribution of 1,000 migrants in each City/Town-groups classified by sex and five broad age-groups, viz. 0-14, 15-34, 35-59, 60+ and Age not stated.

Material is presented separately for 8 Cities/town-groups in State, viz. (1) Indore City, (2) Jabalpur town-group, (3) Gwalior City, (4) Bhopal town-group (5) Ujjain City, (6) Raipur City, (7) Durg town-group and (8) Sagar town-group. Figures in columns 3 to 12 add up to 1,000 for each city/town-group.

D-IV.2-Distribution of 1,000 migrants to Cities/Town-groups by sex and educational Level.

In this Subsidiary Table data have been presented for all the 8 Cities/Town-groups shown in the Explanatory Note of D-IV.1. The table shows the distribution of 1,000 migrants to each city/town-group by sex and educational level. The educational levels are the same as in Subsidiary Table B-III Part A.1. Figures in col. 4 to 19 have been rounded off to the nearest integers so that they add upto 1,000 for each unit.

D-IV.3-Distribution of 1,000 workers among migrants to Cities/Town-groups by sex and Occupation.

This Subsidiary Table has also been presented for the eight Cities/Town-groups of this State. Distribution of 1,000 migrant workers in these Cities/Town-groups by cultivators and agricultural labourers in addition to other occupational groups and sex has been shown. The occupational groups (two digits) are shown according to the National classification of occupations (See Annexure II). Figures relating to male and females in columns 4 to 149 have been rounded off to the nearest integers so that they add up to 1,000 separately for each unit.

D-V.1-Distribution of 1,000 migrants (Born in India) to Cities/Town-groups by place of Birth.

The source for this Subsidiary Table is main Table D-V of 1961.

This Subsidiary Table has been presented for the eight Cities/Town-groups of this State. It shows the distribution of 1,000 migrants (born in India) in these cities/town-groups by sex and birth place rural and urban classified further by the following categories of birth places according to periods of residence i.e. less than 3 years and more.

- (i) Born elsewhere in the district of enumeration.

- (ii) Born outside the district of enumeration but within the State; and

- (iii) Born outside the State but within India.

The Figures of migrants shown in this Subsidiary Table are exclusive of migrants (i) whose place of birth was outside India, (ii) whose place of birth was unascertainable i.e. whose place of birth was not properly indicated in the Individual Slip. (iii) whose place of birth whether rural or urban was not ascertainable and (iv) whose duration of residence at the place of enumeration was not recorded.

Figures in columns 3 to 26 add up to 1,000 in case of each unit.
