ACKNOWLEDGEMENTS

I am thankful to Shri K. D. Ballal, Central Tabulation Officer, and Shri S. C. Sharma, Mechanical Tabulation Officer, Delhi, and their staff who very kindly checked the notes and tables for accuracy and made useful suggestions for improvement. Shri B. R. Kalra, Research Officer in the Census Commissioner's Office, kindly compiled two Subsidiary Tables (B-I.6 and B-II.3) for inclusion in this volume.

In the Maharashtra Census Office, Shri D. V. Rangnekar, Deputy Superintendent of Census Operations, rendered valuable assistance in compilation of the tables and notes. I should also specially mention Sarvashri G. S. Gokarn and J. G. Deshmukh, Tabulation Officers, and B. R. Karkhanis and R. N. Pongurlekar, Statistical Assistants, for their very hard and sincere work for the volume.

I am also grateful to the Manager and the staff of the Government of India Press, Nasik, for the excellent printing.

INTRODUCTORY NOTE

This Part of the Maharashtra Census Report contains 76 Subsidiary Tables based on the A, B, C and D Series of the 1961 Census Tables. The main Census Tables present absolute figures for the State, administrative divisions and districts on various demographic, social and economic characteristics of the population. The subsidiary tables included in this volume present the same figures in terms of percentages or distribution per 1,000 or 10,000. They have been specially prepared to facilitate study of composition or distribution of population and comparison or correlation of various characteristics from one administrative unit to another or from one Census to another. In the past Censuses fewer subsidiary tables were prepared and were presented at the end of each relevant chapter of the descriptive report. In view of their large numbers and volume in the 1961 Census, they are being published as an independent volume.

2. The 1961 Census Tables have been compiled and presented in the following Series:—

- (1) A Series . . . General Population Tables published in Part II-A.
- (2) B(i) Series . . . General Economic Tables published in Part II-B(i) and Part II-B(ii).
- (3) B(ii) Series . . . Household Economic Tables published in Part III.
- (4) C Series . . . Social and Cultural Tables published in Part II-C(i).
- (5) D Series . . . Migration Tables published in Part II-C(ii).
- (6) E Series . . . Housing and Establishments Tables published in Part IV.
- (7) SCT/SC/ST Series. . . Special Tables on Scheduled Caste and Scheduled Tribes published in Part V-A.

3. The subsidiary tables on the 6th (E) Series have been published along with the report in Part IV of the Maharashtra Census volume. No subsidiary tables have been prepared on the 7th (SCT/SC/ST) Series. The subsidiary tables based on the remaining 5 series are included in this volume.

Scheme of Presentation

4. The subsidiary tables are presented in five sections of the volume, each representing one of the five series of the 1961 Census Tables. Explanatory notes on the subsidiary tables included in each section are added at the beginning of the section. They briefly describe the layout and contents of each table and the method used in calculating the figures wherever necessary. For economy of space and to save duplication, the terms, definitions and concepts of the 1961 Census applicable

to more than one table are explained in this Introductory Note. This note and the sectional explanatory notes do not, however, contain any analysis or review of the material presented. That is reserved for Part I-A & B of the Maharashtra Census Report.

5. The distribution of the 76 subsidiary tables by each of the Series and individual Census Tables is as follows:—

SECTION I

A Series—General Population Tables

8 Subsidiary Tables . . . A-I—(5), A-III—(1) and A-IV—(2).

SECTION II

SECTION III

B(ii) Series—Household Economic Tables

12 Subsidiary Tables . . . B-X—(1), B-XI—(1), B-XII—(4), B-XIV-A—(1), B-XIV-B—(1), B-XVI—(3) and B-XVII—(1).

SECTION IV

C Series—Social and Cultural Tables

14 Subsidiary Tables . . . C-I—(1), C-II—(3), C-III-B—(1), C-III-C—(1), C-IV—(2), C-V—(1), C-VII—(1), C-VIII-A—(2) and C-VIII-B—(2).

SECTION V

D Series—Migration Tables

9 Subsidiary Tables . . . D-I—(1), D-II—(3), D-III—(1), D-IV—(3) and D-V—(1)

6. The following paragraphs briefly describe how the 1961 Census was taken and the terms, definitions and concepts used at that Census.

1961 Census

7. The Census was taken on the 'canvasser method' which had been used in all previous Censuses. The enumerators called on each household in their assigned areas between 10th and 28th February, 1961 and filled in Census forms by interviewing one or more responsible members of the household. They revisited all these households between 1st and 5th March, and corrected their forms for changes owing to births and deaths occurring between their first visit and the Census reference date, viz., sunrise of 1st March, 1961. The material presented in this Part, thus, relates to 1st March, 1961, which closely approximates the end of the Second Five-Year Plan and beginning of the Third.

8. There were three Census Questionnaire Forms:—

- (i) The Houselist to collect information in respect of houses and households;
- (ii) The Individual Slip to collect information in respect of each individual; and
- (iii) The Household Schedule to collect information in respect of each household.

9. The information regarding houses and households obtained through the houselists included the following items:—

Houses

- (i) Purpose for which the house was used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, etc.;
- (ii) Material of walls;
- (iii) Material of roof;

Households

- (iv) Name of the head of the household;
- (v) Number of rooms in use by the household;
- (vi) Whether the household was living in an owned house or a rented house;
- (vii) Persons living in the household—
 - (a) males,
 - (b) females,
 - (c) total;

Factory or Workshop

If a house was being used as a workshop or a factory the following additional information was obtained for that house:—

- (viii) Name of the Firm or Proprietor;
- (ix) Name of product, repair or servicing undertaken;
- (x) Average number of persons employed daily;
- (xi) Kind of fuel or power used.

The information collected on houses, households, factories and workshops was used for preparation of E Series tables on Housing. Subsidiary tables to this series are published in Part IV of the Census Report.

10. The information collected in respect of each individual included the following demographic, social and economic items:—

For identification—Location Code :

- 1(a) Name
- 1(b) Relationship to the Head of Household

Demographic Questions

- 2 Age
- 3 Marital status
- 4(a) Birth place
- (b) Born, rural or urban
- (c) Duration of residence if born elsewhere

Social Questions

- 5(a) Nationality
- (b) Religion
- (c) Scheduled Caste or Scheduled Tribe

6 Literacy and Education

- 7(a) Mother-tongue
- (b) Any other language(s)

Economic Questions

- 8 Working at Cultivation
- 9 Working as Agricultural Labourer
- 10 Working at Household Industry—
 - (a) Nature of work
 - (b) Nature of Household Industry
 - (c) If employee
- 11 Doing work other than 8, 9 or 10—
 - (a) Nature of work
 - (b) Nature of industry, profession, trade or service
 - (c) Class of worker
 - (d) Name of Establishment
- 12 Activity, if not working
- 13 Sex.

11. The two demographic questions 4(b) and 4(c) had been added in 1961 Census to study migration in greater detail.

12. There were five economic questions (8 to 12) in the Individual Slip. A departure was made in the concept for collection of economic data. At the last few Indian Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependents. An intermediate category of economic semi-dependence was introduced in 1931, 1941 and 1951. They were called working dependents in 1931, partly dependents in 1941 and earning dependents in 1951. In practice, however,

this intermediate category did not seem to have worked well. It was felt that the strict application of criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income. The 1961 Census, therefore, laid stress on 'work' so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers.

13. The following information in respect of economic activities of each household was collected through the "Household Schedule":—

A. CULTIVATION

	Local name of right on land	Area in acres
1. Land under cultivation by Household—		
(i) Owned or held from Government		
(ii) Held from private persons or institutions for payment in money, kind or share		
(iii) Total of items (i) and (ii)		
2. Land given to private persons for cultivation for payment in money, kind or share		

B. HOUSEHOLD INDUSTRY

	Nature of Industry	Number of months in the year during which conducted
(a)		
(b)		

C. WORKERS AT CULTIVATION OR HOUSEHOLD INDUSTRY

	Members of family working				Hired workers
	Head	Other males	Other females	Total	
(1) Household Cultivation only					
(2) Household Industry only					
(3) Both in Household Cultivation and Household Industry					

14. The "Household Schedule" was a new feature of 1961 Census. It was thought that in the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals tended to be slightly misleading unless such information was supplemented by information relating to economic activities of the household as an entity. The "Household Schedule" was, therefore, designed to collect data on the two chief economic activities

of the households, namely, household cultivation and household industry. The information collected in this schedule was used for preparation of Household Economic Tables.

15. Material obtained in the Census was subsequently processed in temporarily established Regional Tabulation Offices. Results are presented in the various tables published in different parts of the Maharashtra Census Report. 74 out of the 76 Subsidiary Tables presented in this volume are prepared from the main tables in the Census Tabulation Office, Bombay. The remaining two, viz., Subsidiary Tables B-I.6 and B-II.3 have been prepared in the Registrar General's Office.

16. The Subsidiary Tables to A, B (General Economic Tables B-I to B-IX), C and D Series are based on the information collected on a full count from the Census Individual Slips. Those prepared from B Series (Household Economic Tables B-X to B-XVII) and Table C-I are based on the information collected in the Household Schedules for 20 per cent of sample households drawn for rural and urban areas separately.

Scheme of Presentation

17. Generally the subsidiary tables present the material for 31 territorial units, i.e., the State, its four administrative divisions and twenty-six districts. For purposes of the 1961 Census, the districts had been given a serial (code) number running from north-west to south-east. The order of presentation uniformly followed in tables is based on these code numbers and is shown below:—

MAHARASHTRA STATE

BOMBAY DIVISION

1. Greater Bombay
2. Thana
3. Kolaba
4. Ratnagiri
5. Nasik
6. Dhulia
7. Jalgaon

AURANGABAD DIVISION

14. Aurangabad
15. Parbhani
16. Bhir
17. Nanded
18. Osmanabad

NAGPUR DIVISION

POONA DIVISION

8. Ahmadnagar
9. Poona
10. Satara
11. Sangli
12. Sholapur
13. Kolhapur
19. Buldhana
20. Akola
21. Amravati
22. Yeotmal
23. Wardha
24. Nagpur
25. Bhandara
26. Chanda

18. The tables which present material for all administrative units start with entries for the State; then follow entries for Bombay Division and its districts; then Poona Division and its districts and so on. On account of economy of space material for four administrative divisions has not been presented in Subsidiary Tables B-XIV A.1, B-XIV-B.1, and B-XVI.1, B-XVI.2 and B-XVI.3.

Definitions and Description of certain terms used in the Subsidiary Tables

Urban Area

19. Many subsidiary tables present material for total, rural and urban areas separately. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of its male population dependent on non-agricultural pursuits. A population enumerated in urban area is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas. A town having a population of one lakh or above is termed as a 'City'. Where two or more urban units are adjacent or form a compact urban unit they have been grouped together and that group is called a town-group. The following are treated as town-groups in Maharashtra :—

Town-Group	Constituent Towns
THANA DISTRICT	
(1) Dahanu Town-Group	(a) Dahanu (b) Malyan
(2) Bassein Town-Group	(a) Bassein (M) (b) Sandor

Economic Classification

20. The 1961 Census scheme of economic classification is altogether different from that used in 1951 or earlier Censuses. In those former Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependents. An intermediate category of economic semi-dependence was introduced in 1931, and continued in 1941 and 1951. They were called working dependents in 1931, partly dependents in 1941 and earning dependents in 1951.

21. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of the criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income.

22. The 1961 Census, therefore, laid stress on "work" so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers. The concept of dependency has now been completely abandoned for economic classification of the population. Instead, the classification is into workers and non-workers.

Workers and Non-workers

23. A person is classified as a worker if—

(a) in the case of seasonal work like cultivation, livestock, dairying, household industry etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(b) in the case of regular (non-seasonal) employment in any industry, trade, profession or service, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

24. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

25. "Work" includes not only actual work but effective supervision and direction of work also.

26. Persons under training as apprentices with or without stipend or wages are regarded as workers.

27. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice-pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work, she has been treated as a worker.

28. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession or service.

29. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

30. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

31. The Census Questionnaire did not ask any question to determine the extent of full employment or under employment.

32. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income. The occupational classification figures presented in these tables relate to their principal work only.

33. As described earlier, the period of reference for regular (non-seasonal) work in any industry, trade, profession or service was 15 days preceding the day of the enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., it was the greater part of the last or current working season. Entries in regard to industry and occupation were not corrected in the second round visits with reference to the date of reference, viz. the 1st March, 1961. The material presented here, therefore, relates to the reference period approximating to the conditions as on 1st March, 1961.

Broad Industrial Categories

34. In the 1951 Census, the entire population was divided into eight livelihood classes. Economically semi-active people known as earning dependents were divided according to their secondary means of livelihood and the economically inactive people or dependents were divided on the basis of livelihood classes of persons on whom they were dependent.

35. In the 1961 Census, non-workers are not classified by their dependence on one or the other sector of economy. The working population alone is classified in the following nine broad industrial categories:—

- I Cultivator
- II Agricultural labourer
- III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
- IV Household Industry
- V Manufacturing other than Household Industry
- VI Construction
- VII Trade and Commerce
- VIII Transport, Storage and Communications
- IX Other Services

Category I

36. This category includes both owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

37. All other persons working on land as labourers on wages without holding any right upon the lands are classified as agricultural labourers and included in this category.

Category III

38. Workers in mining, quarrying, livestock, forestry fishing, hunting and plantations, orchards and allied activities are included in this category.

Category IV

39. "Household Industry" is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to processing, servicing, repairing or making of goods. This may include sale of goods, but should not be confined merely to buying and selling. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the participation of the head of the household and/or one or more members of the household. Professional, personal and such other "Services" are not covered by this definition, although they may be run at home. A person working as an employee in another person's household industry has also been treated as working at household industry.

Category V

40. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing, etc., which may be classified as household industry.

Category VI

41. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

Category VII

42. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

43. This category includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

44. This category includes (i) Public Utility Services like electricity, gas or water supply and sanitary services, (ii) Central, State, Quasi-Governments or Municipal employees in administrative departments or offices, (iii) Professional services, and (iv) Trade or labour associations, recreational services, etc.

Industrial Classification

45. In addition to the primary classification of the nine broad categories mentioned above, the 1961 Census has also classified the workers according to the Indian Standard Industrial Classification Scheme into divisions, major groups and minor groups of industry. The Industrial Classification Scheme is reproduced as Appendix II to this Note. The subsidiary tables in which this Industrial Classification is used are B-IV.9, B-XIV-A.1, B-XIV-B.1, B-XVI.1, B-XVI.2 and B-XVI.3.

Occupational Classification

46. Three subsidiary tables B-V.1, B-VI.1 and D-IV.3 presented in this volume show the distribution of workers by their occupation classified according to the National Classification of Occupations Scheme which is reproduced as Appendix III to this Note.

47. "Occupation" of a worker is the function which he personally performs by engaging himself in work in any branch of economic activity which is called his industry. The concept of 'Occupation' is, thus, distinct from that of 'Industry'. The latter is defined as the sector of economic activity in which a worker is engaged. A worker, no doubt, follows his 'Occupation' within a certain 'industry' but the basis for classification of the latter is the character of the establishment or the field of activity in which he is working, while that for classification of the former is the work performed personally by the individual concerned. Thus, for a clerk working in a cotton textile mill, the industry is 'manufacture of cotton textiles', while the occupation is that of a 'clerk'. A clerk working in a bank is engaged in an identical occupation but his industry is 'banking'. The 'industry' of a spinner working in a cotton textile mill is identical with that of the former clerk, but he engages himself in a different 'Occupation', viz., spinner.

48. Although the concepts of 'occupation' and 'industry' are different, certain occupations are normally found to exist in only one industry. For example, the occupation 'fisherman' will be confined only to the 'fishing' industry, and the occupation 'mining' only to the 'mining' industry. But a great number of occupations are found to exist in several industries. Occupations falling in Divisions 3, 4 and 5 of the National Classification of Occupations Scheme, will be found confined mainly to particular industrial categories, although a few of these may be found returned in small numbers in other industrial categories also. Division 3 'Sales workers' will be found confined mainly to industrial Category VII mentioned above and Division 4 'Farmers, Fishermen, Loggers, etc.' and Division 5 'Miners, Quarrymen, etc.' to Category III if the industry is a non-household industry and to Category IV if it is a household industry.

49. A question about a person's occupation had been asked in the Indian Censuses right from the earliest Census in 1872. But the word had been used more to indicate the means of subsistence or livelihood or the supporting sector of economy. It had never

been used to mean the exact function performed by the individual in any branch of economic activity. Only in the Census of 1931, there were two separate economic questions regarding the principal occupation of earners and dependents and the industry in which they were employed (for organised employees only). Unfortunately, no separate tables of industries had been prepared even at that Census and the entire Census classification of occupations from 1872 to 1951 has, therefore, been into the means of livelihood which at best was a combination of both industry and occupation.

50. For the first time in the 1961 Census, the two concepts of 'industry' and 'occupation' have been used with specific meaning distinct from each other and tables have been prepared separately with very elaborate classification of the working population both by Industry and Occupation.

Literacy and Educational Level

51. 'Literacy' as defined in the Census is ability to read and write a simple letter either in print or in manuscript. If a person could both read and write and had also passed one or more written examinations as proof of educational level attained, the highest examination he had passed was recorded in the enumeration slip.

52. Educational levels shown here are those which have already been attained and not those which are being studied. A person who has completed primary level is included in the group 'Primary or Junior Basic' though he may be studying in a higher standard. A person who is studying or had studied in Intermediate class is included in the group 'Matriculation or Higher Secondary' and so on.

53. The figures for literates (without educational level) presented in the table are exclusive of persons with educational levels. Similarly, the figures for any educational level are exclusive of persons who have attained higher educational levels.

54. Persons who have studied up to the 4th standard but have not passed the primary stage are included in the group of literates (without educational level). Pupils studying in the 1st or 2nd standard who could neither read nor write a simple letter are included in the group of illiterate persons.

Household

55. A household is defined as a group of persons living in the same house and eating from the same kitchen unless the exigencies of work prevented any of them from doing so.

56. 'Household' is thus slightly different from 'family'. A domestic servant residing and eating at the employer's house is under the above definition a member of the household. Similarly, a friend or a guest (related or

unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

57. The definition of the household also applies to the group of inmates of hotels, hostels, prisons, hospitals, etc. They are, however, treated as 'non-family' or 'institutional' households. Others are family type households as in spite of the slight differences in composition they are largely based on families.

58. In the 1961 Census, Household Schedules had been filled in for the institutional households also. These Schedules were, however, excluded at the time of drawing the sample of households. The material presented in the household economic tables, therefore, relates only to the family type households.

Cultivation of Land

59. Cultivated land includes all land normally used for cultivation including temporary fallows. It includes only those plots or parcels of land which are cultivated by the household itself. Owned land which is leased out to others is not included. Naturally, it will be the land which lies within the village or in adjacent villages or within such distances as enables the household to work on the land or actively supervise the cultivation. It does not include the land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction.

60. Cultivation includes ploughing, sowing and harvesting of land but does not include operations treated as industry such as fruit-growing, keeping of orchards or groves and working for plantations like coffee, tea, rubber, cinchona and other medicinal plantations. This restriction of excluding certain activities relating to growing of fruits, orchards, plantations, etc., was not, however, rigidly applied in Maharashtra at the time of 1961 Census enumeration and the areas of cultivated lands recorded in the household schedules are the areas of cultivated lands as returned by the responding households who might not be aware of the finer distinction made by the definition.

Households engaged in Cultivation

61. A household having land under cultivation is called a cultivating household. When a head of the household himself and/or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken (on lease) from private persons, the household is said to be engaged in household cultivation. It will be seen that owner cultivators and tenant cultivators are both included in this category. The agricultural labourers working on land which is not either of their own or taken from others on lease are not treated as cultivators. The households engaged in cultivation do not, therefore, include the households whose members work only as agricultural labourers.

Interests in Land

62. The classification of households engaged in cultivation by interests in land is into the following three types :—

- (i) Those engaged in cultivation of land entirely owned or held from Government;
- (ii) Those engaged in cultivation of land held from private persons or institutions for payment in money, kind or share; and
- (iii) Those engaged in cultivation of land partly owned or held from Government and partly from private persons for payment in money, kind or share.

63. The first type includes all pure owner cultivators such as proprietors, occupants or tenure holders with or without right to transfer land. The second type includes pure tenancy cultivators with a variety of tenancy rights. The third type is in fact a combination of the first two types.

Household Industry

64. Household Industry is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and related to production, processing, servicing or repairing of goods. This may include sale of goods but should not be confined to buying and selling only. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within

the village in rural areas and the essential factor of participation of the head of the household and/or one or more members of the household.

Principal Household Industry

65. The form of the Household Schedule had a provision for recording more than one household industries conducted by the household. In such cases, the household industry conducted by the household for a longer period in the year has been treated as its principal household industry. The classification by the nature of industry is, in all cases, based on the principal industry.

Family workers and Hired workers

66. Definition of workers is given in paragraphs 23 to 33 of this Note.

67. A 'family worker' is a member of the household who works without receiving wages in cash or kind in any industry, business or trade (cultivation or household industry only as far as the material presented here is concerned) conducted mainly by the members of the household and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in domestic duties are non-workers and are not, therefore, treated as family workers.

68. A 'hired worker' is an outsider who has been in wholtime employment of the household during the last working season or is in the wholtime employment during the current working season. This category does not include those agricultural labourers who are casually employed for short periods for harvesting of crops or other operations.

APPENDIX I

Methodology of Groupings of Workers and Non-workers 1901-1951 according to 1961 Census Categories

The methodology used for working out figures of workers and non-workers in 1901-1951 (except 1941) and their distribution in nine broad industrial categories according to 1961 Census is given below. The figures in Subsidiary Tables B-I.6 and B-II.3 are worked out on this methodology.

1951 Census :

Workers in 1951 comprised—

- (i) All self-supporting persons with productive principal means of livelihood, i. e., all self-supporting persons other than (a) agricultural rent receivers belonging to livelihood Class IV and (b) self-supporting persons deriving their means of livelihood from non-agricultural, non-productive occupations, like beggars, pensioners, etc., belonging to livelihood Class VIII.
- (ii) Self-supporting persons belonging to livelihood Class IV (agricultural rent receivers) but deriving secondary means of livelihood from productive occupations, i. e., other than Class IV.
- (iii) All earning dependents in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from—
 - (a) receipt of agricultural rent under Class IV, and
 - (b) non-agricultural non-productive occupations. (For calculating working force, no account has been made of the self-supporting persons whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood, as unlike rent receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood.)

Earning dependents, however, were classified only into 8 livelihood classes and there was no further break-up of them into divisions and subdivisions or groups.

On the experience of 1961 it was presumed that the earning dependents in 1951 also generally belonged to the household sector and were mostly family workers in the non-household sector. This is of course a big assumption to make but seems warranted by 1961 experience. Livelihood Class V

2—1 Cen, Maha/64

corresponds with Division 0-3 of ISIC. Workers in household industry at two digit level in 1961 covering Divisions 0-3 of ISIC, were added to family workers at non-household industry and their proportions at two digit level were worked out for livelihood Class V of 1951. The earning dependents of livelihood Class V of 1951 were allocated to major groups of ISIC on the basis of the proportions so worked out. Earning dependents in livelihood Class VI, VII and VIII of 1951 were allocated to major groups of 1961 on the basis of the distribution of the family workers of 1961. For this purpose, family workers of major groups for 1961 were first recast into livelihood classes of 1951 and their proportions for each livelihood class were worked out. The earning dependents belonging to each livelihood class were then distributed on the basis of the proportions so worked out. The figures so obtained at major group level were consolidated into nine industrial categories of 1961.

Non-workers of 1951 were equal to—

- (i) All non-earning dependents ;
- (ii) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood ;
- (iii) The following groups of self-supporting persons were included in non-agricultural Class VIII :—
 - (a) Persons living principally on income from non-agricultural property,
 - (b) Pensioners and remittance holders,
 - (c) Inmates of jails, asylums, alms houses and recipients of doles, beggars and vagrants, and
 - (d) Other persons living principally on income derived from non-productive activity;
- (iv) Earning dependents whose own means of livelihood (secondary means of livelihood) was agricultural rent receiving under Class IV; and
- (v) Earning dependents whose secondary means of livelihood was non-agricultural non-productive.

1931 Census :

I. Workers :

- (i) All earners following productive occupations ; and
- (ii) All working dependents following productive occupations.

II. Non-workers :

- (i) All non-working dependents;
- (ii) Earners and working dependents following non-productive occupations :
 - (a) Non-cultivating proprietors taking rent in money or kind;
 - (b) Proprietors (other than agricultural land), fund, scholarship holders and pensioners;
 - (c) Inmates of jails, asylums and alm-houses ;
 - (d) Beggars and vagrants;
 - (e) Procurers and prostitutes;
 - (f) Other unclassified non-productive industries.

1921 and 1911 Censuses :

I. Workers :

All “ Actual workers ” having productive occupations.

II. Non-workers :

- (i) All “ dependents ” ; and
- (ii) All “ Actual workers ” in non-productive occupations as stated in case of 1931 Census.

1901 Census :

I. Workers :

All “ Actual workers ” having productive occupations.

II. Non-workers :

- (i) All “ dependents ” ; and
- (ii) “ Actual workers ” in non-productive occupations :
 - (a) Rent receivers;
 - (b) Prostitutes, procurers, pimps; etc.
 - (c) Receivers of stolen goods;
 - (d) Witches, wizards, cow-poisoners; etc.;
 - (e) House-rent, share and other property not being land;
 - (f) Allowances for patrons or relatives;
 - (g) Educational or other endowments, scholarships, etc.;
 - (h) Mendicancy (not in connection with a religious order);
 - (i) Pensioners, inmates of asylums, prisoners, etc.

The statement on pages 11—12 indicates the reclassification of groups and sub-divisions in earlier Censuses on the lines of 1961 broad industrial classification.

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

Division 0—Agriculture, livestock, forestry, fishing and hunting

00 Field Produce and Plantation Crops—

Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
Production of raw jute and kindred fibre crops	002
Production of raw cotton and kindred fibre crops.	003
Production of oilseeds, sugarcane and other cash crops.	004
Production of other crops (including vegetables) not covered above.	005
Production of fruits and nuts in plantation, vines and orchards.	006
Production of wood, bamboo, cane reeds, thatching grass, etc.	007
Production of juice by tapping palms	008
Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009

01 Plantation Crops—

Production of tea in plantation	010
Production of coffee in plantation	011
Production of rubber in plantation	012
Production of tobacco in plantation	013
Production of ganja, cinchona, opium	014
Production of other plantation crops not covered above.	015

Division 0—Agriculture, livestock, forestry, fishing and hunting—concl'd.			Division 2 & 3—Manufacturing		
02	Forestry and Logging—		20	Foodstuffs—	
	Planting, replanting and conservation of forests	020		Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Felling and cutting of trees and transportation of logs.	021		Production of sugar and syrup from sugarcane in mills.	201
	Preparation of timber	022		Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fuel including charcoal by exploitation of forests.	023		Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Production of fodder by exploitation of forests	024		Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025		Production of bread, biscuits, cake and other bakery products.	205
	Production and gathering of other forest products not covered above.	026		Production of butter, ghee, cheese and other dairy products.	206
03	Fishing—			Production of edible fats and oils (other than hydrogenated oil).	207
	Production of fish by fishing in sea.	030		Production of hydrogenated oils (Vanaspati).	208
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031		Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032			
04	Livestock and Hunting—		21	Beverages—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040		Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Rearing of sheep and production of wool	041		Production of country liquor	211
	Rearing and production of other animals (mainly for slaughter) such as pig.	042		Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043		Production of other liquors not covered above	213
	Rearing of bees for the production of honey, wax and collection of honey.	044		Production of aerated and mineral water	214
	Rearing of silk worms and production of cocoons and raw silk.	045		Production of ice	215
	Rearing of other small animals and insects	046		Production of ice-cream	216
	Trapping of animals or games propagation	047		Processing of tea in factories	217
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048		Processing of coffee in curing works	218
				Production of other beverages	219
Division 1—Mining and Quarrying			22	Tobacco Products—	
10	Mining and Quarrying—			Manufacture of bidi	220
	Mining of coal	100		Manufacture of cigars and cheroots	221
	Mining of iron ores	101		Manufacture of cigarette and cigarette tobacco	222
	Mining of gold and silver ores	102		Manufacture of hookah tobacco	223
	Mining of manganese	103		Manufacture of snuff	224
	Mining of mica	104		Manufacture of jerda and other chewing tobacco.	225
	Mining of other non-ferrous metallic ores	105		Manufacture of other tobacco products	226
	Mining of crude petroleum and natural gas	106			
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107	23	Textile—Cotton	
	Mining of chemical earth such as soda ash	108		Cotton ginning, cleaning, pressing and baling	230
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109		Cotton spinning (other than in mills)	231
				Cotton spinning and weaving in mills	232
				Cotton dyeing, bleaching	233
				Cotton weaving in powerlooms	234
				Cotton weaving in handlooms	235
				Manufacturing of khadi textile in handlooms	236
				Printing of cotton textile	237
				Manufacturing of cotton nets	238
				Manufacturing of cotton, cordage, rope and twine.	239

24	Textile—Jute		29	Paper and Paper Products—	
	Jute pressing and baling	240		Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Jute spinning and weaving	241		Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Dyeing and bleaching of jute	242		Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
	Printing of jute textile	243			
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244	30	Printing and Publishing—	
25	Textile—Wool			Printing and publishing of newspapers and periodicals.	300
	Wool baling and pressing	250		Printing and publishing of books	301
	Wool cleaning and processing (scouring)	251		All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302
	Wool spinning and weaving in mill	252		All types of binding, stitching, sizing and other allied work connected with binding industry.	303
	Wool spinning other than in mills	253			
	Wool weaving in powerloom	254	31	Leather and Leather Products—	
	Wool weaving in handloom	255		Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Embroidery and art work in woollen textile	256		Manufacture of shoes and other leather footwear.	311
26	Textile—Silk			Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Spinning and weaving of silk textile in mill	260		Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Dyeing and bleaching of silk	261		Repair of shoes and other leather footwear	314
	Spinning of silk other than in mills	262		Repair of all other leather products except footwear.	315
	Weaving of silk textile by powerloom	263	32	Rubber, Petroleum and Coal Products—	
	Weaving of silk textile by handloom	264		Manufacture of tyres and tubes	320
	Printing of silk textile	265		Manufacture of rubber footwear	321
	Manufacture of silk cordage, rope and twine	266		Manufacture of rubber goods used for industrial purpose.	322
27	Textile—Miscellaneous			Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Manufacture of carpet and all other similar type of textile products.	270		Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Manufacture of hosiery and other knitted fabrics and garments.	271		Production of coal tar and coke in coke oven	325
	Embroidery and making of crepe lace and fringes.	272		Manufacture of other coal and coal tar products not covered elsewhere.	326
	Making of textile garments including raincoats and headgear.	273	28	Manufacture of Wood and Wooden Products—	
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274		Sawing and planing of wood	280
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275		Manufacture of wooden furniture and fixtures	281
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276		Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of coir and coir products	277		Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of umbrellas	278		Manufacture of other wooden products such as utensils, toys, artwares.	284
	Processing and manufacture of textile products not covered above.	279		Manufacture of veneer and plywood	285
				Manufacture of plywood products such as tea chest.	286
				Manufacture of boxes and packing cases other than plywood.	287
				Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
				Manufacture of other wood and allied products not covered above.	289
			33	Chemicals and Chemical Products—	
				Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
				Manufacture of dyes, paints, colours and varnishes.	331
				Manufacture of fertilizers	332
				Manufacture of ammunition, explosives and fireworks.	333
				Manufacture of matches	334
				Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335

Division 2 & 3—Manufacturing—contd.			Division 2 & 3—Manufacturing—concl'd.		
33—Chemicals and Chemical Products—concl'd.			37 Machinery (All kinds other than Transport) and Electrical equipment—		
	Manufacture of soap and other washing and cleaning compounds.	336		Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337		Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of common salt.	338		Manufacture of machine tools.	372
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339		Manufacture of textile machinery and accessories.	373
34-35 Non-metallic Mineral Products other than Petroleum and Coal—				Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of structural clay products such as bricks, tiles.	340		Manufacture of electric lamps and fans.	375
	Manufacture of cement and cement products.	341		Manufacture of insulated wires and cables.	376
	Manufacture of lime.	342		Manufacture of all kinds of battery.	377
	Manufacture of structural stone goods, stone dressing and stone crushing.	343		Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of earthenware, other than images.	344		Manufacture of electric machinery and apparatus, appliances not specified above.	379
	Manufacture of stone images.	345	38 Transport Equipment—		
	Manufacture of plaster of paris and its products.	346		Manufacture, assembly and repairing of locomotives.	380
	Manufacture of asbestos products.	347		Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture of mica products.	348		Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of earthenware and earthen pottery.	350		Manufacture of motor vehicles engines parts and accessories.	383
	Manufacture of chinaware and crockery.	351		Repairing and servicing of motor vehicles.	384
	Manufacture of porcelain and its products.	352		Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Manufacture of glass bangles and beads.	353		Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture of glass apparatus.	354		Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Manufacture of earthen image, busts and statues.	355		Repairing of bicycles and tricycles.	388
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356		Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357	39 Miscellaneous Manufacturing Industries—		
	Manufacture of other non-metallic mineral products not elsewhere specified.	359		Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies.	390
36 Basic Metals and their Products except Machinery and Transport Equipment—				Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360		Assembling and repairing of watches and clocks.	392
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361		Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture of armaments.	362		Manufacture and tuning of musical instruments.	394
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363		Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain-pen.	395
	Manufacture of iron and steel furniture.	364		Manufacture of sports goods.	396
	Manufacture of brass and bell metal products.	365		Manufacture and repair work of goods not assignable to any other group.	399
	Manufacture of aluminium products.	366			
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367			
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368			
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

EXPLANATORY NOTE

There are eight Subsidiary Tables in this section, all prepared from the General Population Tables (A Series) published in Part II-A of the Maharashtra Census Report. Five Tables are based on Table A-I, one on Table A-III and two on Table A-IV. Five out of the eight subsidiary tables (except Subsidiary Tables A-I.1, A-III.1 and A-IV.1) present material for earlier Censuses.

Subsidiary Table A-I.1

2. This table shows area and population (actual and percentage) of Talukas and Mahals classified by ranges of talukawise density of population.

3. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts. For each of these territorial units shown in column 1, two sets of figures are presented, viz., one relating to actual figures and below it the percentage figures in brackets.

4. The area, density and population figures are taken respectively from columns 3(a), 4 and 9 of Table A-I.

5. The Talukas (or Mahals) in each district have been first distributed into 8 ranges of density per square mile, viz., under 100, 100—150, 150—200, 200—300, 300—450, 450—600, 600—750 and 750 and over. The total area and population of the Talukas or Mahals in each density range were worked out and are shown in the table. The names and numbers of talukas falling in each range are not, however, shown here. The percentages of area and population are rounded off to one place of decimal. The percentages to the total area and population respectively of all density ranges are shown under each density range in brackets in the second line.

Subsidiary Table A-I.2

6. This subsidiary table shows the distribution of 1,000 occupied residential houses and 10,000 persons by rural and urban areas with comparable figures for 1951 and 1941 Censuses.

7. Material is presented separately for Maharashtra, its four administrative divisions and twenty-six districts.

8. The definitions of “Urban and Rural areas” and “occupied houses” are given in paragraph 19 of the Introductory Note.

9. The source of material for rural and urban ‘occupied houses’ and number of persons are as shown below:—

Census	Occupied house	Nuber of persons
1961 ..	Col. 8 of Table A-I ..	Col. 9 of Table A-I
1951 ..	Cols. 5—7 of Table A-I ..	Cols. 8—10 of Table A-I
1941 ..	Cols. 5—7 of Table I ..	Cols. 8—10 of Table I

10. Two sets of figures are presented for earlier Censuses 1921 to 1951. The rural-urban break-up according to the first set of figures has been prepared by using the 1961 list of towns in each district with their 1921, 1931, 1941 or 1951 Census figures for houses and population duly adjusted to 1961 jurisdiction of the district. The second set is prepared by using the list of places which had actually been treated as towns in the respective Censuses but adjusted to the territorial changes in jurisdiction of the district in 1961.

11. Comparable urban population figures of the districts (1st set) for the 1951 and 1941 Censuses have been obtained by deducting the population of towns which have been declassified in 1961 from the total urban population at the Censuses of 1941 and 1951 but not by adding the populations of new towns treated as such for the first time in 1961. Rural population figures of the districts have been obtained by deducting the urban population of the district worked out as above from the total populations shown in Table A-II. The latter sets of figures are the populations of the districts for earlier Censuses adjusted for their jurisdictions as existing in 1961.

12. As regards the figures of “occupied houses” in 1941 and 1951 adjustments have been carried out with the help of figures in Table A-I or Imperial Table I of previous Censuses. Adjustments in the number of houses in Urban and Rural areas in 1951 and 1941 consequential upon the declassification of towns in 1961, have been made on the basis of the proportions of the respective populations in the districts.

Subsidiary Table A-I.3

13. This subsidiary table presents the distribution of persons per 1,000 houses and houses (i) per 100 square miles in rural areas and (ii) per square mile in urban areas and comparable data for past four Censuses.

14. The sources of data on various items presented in the table are as follows:—

Census	Houses T/R/U	Population T/R/U	Area R/U
1961 ..	Col. 8 of Table A-I	Col. 9 of Table A-I	Col. 3(a) of Table A-I
1951 ..	Cols. 5—7 ..	Cols. 8—10 ..	Col. 2 of Table B
1941 ..	Cols. 5—7 ..	Cols. 8—10 ..	Not Available
1931 ..	Cols. 5—7 ..	Cols. 8—10 ..	Not Available
1921 ..	Cols. 5—7 ..	Cols. 8—10 ..	Not Available

15. The break-ups of figures of houses and population for Total, Rural and Urban areas for earlier Censuses (1921 to 1951) have been worked out in the same manner as used in Subsidiary Table A-I.2.

16. The area figures for 1951 have been taken from Table E for Talukas and from 1951 Primary Census Abstract for all towns. Separate figures for Rural and Urban areas are not available for 1941, 1931 and 1921 Censuses.

17. The 1961 figures of houses used in the table are of occupied residential houses. They include houses used exclusively as dwellings and those used combined as dwelling and some other purposes, viz., shop-cum-dwellings, workshop-cum-dwellings etc. The figures of houses for past Censuses are according to the respective definitions of houses adopted at those Censuses. They have not been adjusted to the definition of houses used at the 1961 Census.

18. The definitions of "Rural" and "Urban" areas have been given in paragraph 19 of the Introductory Note.

Subsidiary Table A-I.4

19. This table presents sex ratio (females per 1,000 males) for Total, Rural and Urban population and comparison with four previous Censuses since 1921.

20. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

21. The sources for the rural and urban population figures are as follows:—

Census	Population
1961	Cols. 10—11 of Table A-I
1951	Cols. 11—16 of Table A-I
1941	Cols. 11—16 of Table I
1931	Cols. 11—16 of Table I
1921	Cols. 11—16 of Table I

22. The break-ups of population figures for rural and urban areas for 1921—1951 have been worked out as described in the note on Subsidiary Tables A-I.2 and A-I.3.

Subsidiary Table A-I.5

23. This table presents percentage variation in population during each Census decade since 1921 and density of population in 1961 and 1951.

24. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

25. The sources of data on various items presented in the table are as follows:—

Census	Population T/R/U	Area T/R/U
1961 ..	Col. 9 of Table A-I	Col. 3(a) of Table A-I
1951 ..	Cols. 8—10 of Table A-I	Col. 2 of Table E
1941 ..	Cols. 8—10 of Table I	
1931 ..	Cols. 8—10 of Table I	
1921 ..	Cols. 8—10 of Table I	

26. The break-ups of figures for total, rural and urban areas for Censuses 1921 to 1951 and area figures for 1951 have been worked out by the method used in Subsidiary Tables A-I.2 and A-I.3.

27. The percentage variation has been calculated on the following basis:—

$$\frac{\text{Difference between population of particular Census and that of the preceding Census}}{\text{Population of the preceding Census}} \times 100$$

The density figures represent division of population of a particular Census by area for that Census year.

28. The signs of increase (+) or decrease (—) in percentage variation are shown when the population of any Census is respectively more or less than that of the preceding Census.

29. The figures of percentage variation in columns 2 to 5 have been rounded off to one place of decimal and those of density shown in columns 6 and 7 are rounded off to integers.

Subsidiary Table A-III.1

30. This table shows (i) the average population per village, (ii) the proportion of rural population per 1,000 of total population and (iii) the distribution of population per 1,000 rural population in villages by size class of population.

31. The material is presented separately for Maharashtra, its four administrative divisions and twenty-six districts.

32. The figures in columns 2 and 4 to 9 are based on the material from Table A-III and those in column 3 on column 9 of Table A-I.

33. The six size classes of population of villages shown in columns 4 to 9 are 5,000 and over, 2,000—4,999; 1,000—1,999; 500—999; 200—499 and less than 200. These classes are the same as in the main Table A-III except that in the latter the size class of 5,000 and over is further divided into two size groups of 5,000—9,999 and 10,000 and above. Proportions of population of villages falling in each size class in each territorial unit have been worked out per 1,000 rural population of that unit and rounded off to integers so that the proportions of all size classes add up to 1,000.

Subsidiary Table A-IV.1

34. This table presents the number of cities, town-groups and towns, the average population per city, town-group and town and the proportion of population in city, town-group and town to total urban population. The table further shows the distribution of 1,000 urban population into six size classes of cities, town-groups and towns.

35. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts. The source of material for this table is the main Table A-IV.

36. For each territorial unit, the number of cities (towns with 1 lakh or more population), town-groups and towns is shown in column 2(b). For each of these three categories, their average population and proportion of their population to 1,000 urban population of all the categories of territorial units are shown in columns 2(c) and 3 respectively.

37. The proportions of population of towns falling in each size class of towns to total urban population are shown by horizontal spread in columns 4 to 9. The six size classes of towns used here are the same as in Table A-IV. They are (i) population 100,000 or above; (ii) between 50,000 to 99,999; (iii) between 20,000 to 49,999; (iv) 10,000 to 19,999; (v) 5,000 to 9,999 and (vi) less than 5,000.

38. All figures are rounded off to integers and in case of columns 4—9 the rounding is such that the figures add up to 1,000. The definition of town (urban area) has been explained in paragraph 19 of the Introductory Note.

39. When two or more towns (urban units) are adjacent or form a compact urban unit they have been grouped together and that group is called a town-group.

Subsidiary Table A-IV.2

40. This table shows sex ratios (number of females per 1,000 males) and densities (population per square mile) for each city, town-group and town for 1961 and 1951.

41. Material is presented for 241 units which include 16 town-groups (including 6 cities as constituents), 6 independent cities and 219 other towns.

42. The sources of material for this Table are columns 5, 7, 10 and 11 of Table A-IV.

Total ...			33

2. Two of these 33 subsidiary tables, viz., Tables B-I.6 and B-II.3 have been prepared in the Registrar General's Office, Delhi. They alone present material recast for earlier Censuses.

Subsidiary Table B-I.1

3. The source of the data for Subsidiary Tables B-I.1 to B-I.5 is the main Table B-I.

4. This table shows the distribution of 1,000 persons of each sex by nine industrial categories of workers and one of non-workers.

5. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

6. The distribution of total workers and non-workers and of workers in each category are per 1,000 of total population for both sexes together and for males and females separately. The break-up for workers into the following nine categories is shown by horizontal spread in columns 8 to 34 :—

Categories of Workers

- I Working as Cultivator.
- II Working as Agricultural Labourer.
- III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
- IV Working at Household Industry.
- V Working in Manufacturing other than Household Industry.
- VI Working in Construction.
- VII Working in Trade and Commerce.
- VIII Working in Transport, Storage and Communications.
- IX Working in Other Services.

7. The concepts of workers and non-workers and the nine broad industrial categories of workers have been explained in paragraphs 23 to 44 of the Introductory Note.

8. All proportions shown in the table are rounded off to integers, so that they add up to the figures of 1,000 shown in columns 2, 3 and 4, respectively.

Subsidiary Table B-I.2

9. This table shows the number of female workers per 1,000 male workers in each industrial category.

10. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

11. The ratio of female workers to 1,000 male workers is shown in column 2. Similar ratios for each of the nine industrial categories of workers are shown by horizontal spread in columns 3 to 11.

12. The concepts of workers and non-workers and the nine broad industrial categories of workers are explained in paragraphs 23 to 44 of the Introductory Note.

Subsidiary Table B-I.3

13. This table presents the distribution of 1,000 total workers of each sex into age-groups and nine industrial categories.

14. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

15. The distribution of 1,000 workers of each sex by nine categories of workers is shown by a horizontal spread in columns 6 to 32. Its further break-up by four broad age-groups, viz., 0—14, 15—34, 35—59 and 60+ is shown by vertical spread.

16. All figures of persons, males and females have been rounded off to integers, so that they respectively add to the figures of 1,000 in the top line of columns 3, 4 and 5 against each unit.

17. The concepts of workers and non-workers and the nine broad industrial categories of workers are described in paragraphs 23 to 44 of the Introductory Note.

Subsidiary Table B-I.4

18. This table shows the distribution of 1,000 workers of each sex and each of the nine industrial categories of workers into broad age-groups.

19. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

20. The distribution of 1,000 workers (persons, males and females) in each industrial category as shown under columns 3 to 5 into four broad age-groups, viz. 0—14, 15—34, 35—59 and 60+ is shown by a horizontal spread in columns 6 to 17. Figures for "Age not stated" are shown in the footnote to the table.

21. All figures of total, male and female workers shown in the table have been rounded off to integers, so that they add up to 1,000 shown in columns 3, 4 and 5, respectively.

Subsidiary Table B-I.5

22. This table shows the number of workers of each sex per 1,000 population in each age-group.

23. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

24. The proportions of workers of both sexes together, males and females separately per 1,000 of total population in each of the four broad age-groups have been presented by horizontal spread. The broad age-groups shown are 0—14, 15—34, 35—59 and 60+. Similar proportions of workers for whom age had not been recorded, to the total persons are shown under column 'Age not stated'.

Subsidiary Table B-I.6

25. This table shows workers per 1,000 population in each of the Censuses 1901 to 1961.

26. The source of the data is as follows :—

Census Year		
1961	..	Table B-I
1951	..	Tables B-I—B-III
1931	..	Table X Occupation or means of livelihood
1921	..	Table XVII Occupation or means of livelihood
1911	..	Table XV Occupation or means of livelihood
1901	..	Table XV Occupations

27. The classification of workers has been done for the first time in 1961.

28. Since the recasting of data prior to 1961 has been confined to the State level only the data are presented in this table for Maharashtra State only.

29. The methodology used for working out figures of workers and non-workers in 1901—1951 (except 1941) and their distribution in nine broad industrial categories according to 1961 Census is given in Appendix I to the Introductory Note.

Subsidiary Table B-II.1

30. The source of Subsidiary Tables B-II.1 and B-II.2 is the main Table B-II.

31. This table presents for each class of town-groups and towns the distribution of 1,000 workers of each sex and in each broad age-group into nine broad industrial categories of workers.

32. The material is presented in two sets. The first set presents material separately for the six classes of towns in Maharashtra, its four administrative divisions and twenty-six districts, according to the class totals derived by treating the town-group as a single unit. The other set presents the same material for the State only but treating the constituents of town-groups separately to arrive at the class totals.

33. The six size classes of towns and town-groups are as follows :—

Class	Population
Class I	100,000 or above
Class II	50,000 to 99,999
Class III	20,000 to 49,999
Class IV	10,000 to 19,999
Class V	5,000 to 9,999
Class VI	Less than 5,000

34. The distribution of 1,000 total workers, male workers and female workers in each age-group into nine industrial categories of workers is shown by horizontal spread in columns 7 to 33. All figures are rounded off to integers so that they separately add to 1,000 total for persons, males and females under columns 4, 5 and 6.

35. The nil entries resulting from the absence of towns of particular size classes in a few districts have been omitted from the table for economy of space. The size classes of towns for which such entries have been omitted are shown below :—

Subsidiary Table B-II.2

36. This table shows the distribution of 1,000 workers in each city or town-group with a population of 100,000 and over in each broad age-group into nine broad industrial categories of workers.

37. Material is presented for the cities and town-groups with a population of 1 lakh and over. Wherever town-group includes a city as a constituent unit, separate figures for that city are also presented.

38. The broad age-groups shown are 0—14, 15—34, 35—59 and 60+. The figures against 'Age not stated' line are of workers who have not returned their ages.

39. The concepts of workers and the nine industrial categories of workers are described in paragraphs 23 to 44 of the Introductory Note. City is a town with a population of one lakh and more. Where two or more towns (urban units) are adjacent and form a compact urban unit, they have been grouped together and that group is called a 'town-group'.

40. Most of the town-groups shown in the table comprise a city. There is only one town-group, viz. Sangli town-group which has a population of over one lakh but does not include a city.

Subsidiary Table B-II.3

41. This table presents workers per 1,000 population in each city with comparable figures of workers in broad industrial categories for earlier Censuses 1901—1951. Towns with a lakh or more population are termed as cities. There are twelve such cities in Maharashtra.

42. The source of the data is as shown in the Explanatory note on the Subsidiary Table B-I.6.

43. The methodology used for working out figures of workers in earlier Censuses 1901 to 1951 is explained in Appendix I to the Introductory Note.

Subsidiary Table B-III—Part A.1

44. This table presents the distribution of 1,000 workers of each sex by educational levels in urban areas only.

45. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts.

46. The source of the data is Table B-III—Part A. As the figures of total workers of each sex for various educational levels are not directly shown in the main Table B-III—Part A, they are first worked out from that table by subtracting the figures of columns 23 and 24 for non-workers from those of columns 3 and 4 for total population for different educational levels.

47. The distribution of 1,000 each of male and female workers by educational levels is shown by horizontal spread in columns 4 to 33.

48. The data for educational levels are presented in eight categories, viz., (i) illiterate, (ii) literate (without educational level), (iii) primary or junior basic, (iv) matriculation or higher secondary, (v) technical diploma not equal to degree, (vi) non-technical diploma

not equal to degree, (vii) university degree or post graduate degree other than technical degree and (viii) technical degree or diploma equal to degree or post graduate degree. An elaborate spread of the last category is shown into special branches of science and technology as (a) Engineering, (b) Medicine, (c) Agriculture, (d) Veterinary and Dairying, (e) Technology, (f) Teaching and (g) Others.

49. The concepts of literacy and educational levels are explained in paragraphs 51 to 54 of the Introductory Note.

Subsidiary Table B-III—Part A.2

50. The preceding subsidiary table shows the distribution of total workers of each sex by educational levels. This table shows the distribution for 1,000 workers in each sex and in each of the nine broad industrial categories of workers.

51. Material is presented for urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

52. The source of the data is the main Table B-III—Part A.

53. The concepts of workers and of nine broad industrial categories of workers and those of literacy and educational levels are described in paragraphs 23 to 44 and 51 to 54 of the Introductory Note.

Subsidiary Table B-III—Part A.3

54. The above two subsidiary tables show distribution of workers by educational levels. This table presents similar distribution for 1,000 persons not at work.

55. Material is presented only for urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

56. The source of the material is columns 23 and 24 for males and females respectively of the main Table B-III—Part A.

57. Break-up for educational levels is the same as in two preceding tables.

Subsidiary Table B-III—Part B.1

58. This table shows the distribution of 1,000 male and female workers in each of the nine broad industrial categories of workers by educational levels for rural areas only.

59. Material is presented for rural areas only of Maharashtra, its four administrative divisions and twenty-five districts i.e. excluding Greater Bombay which is entirely urban.

60. The source of the data for this subsidiary table is the main Table B-III—Part B.

61. The distribution of 1,000 males and females in each category of workers, is shown by four broad educational levels, viz., (1) Illiterate, (2) Literate without educational level, (3) Primary or Junior Basic and (4) Matriculation and above.

62. The calculations are worked out on the following basis :—

$$\frac{\text{Male workers in each category and each educational level}}{\text{Total male workers in each category}} \times 1,000$$

$$\frac{\text{Female workers in each category and each educational level}}{\text{Total female workers in each category}} \times 1,000$$

Subsidiary Table B-III—Part B.2

63. This table shows the distribution of 1,000 persons not at work by educational levels in rural areas only.

64. The material is presented only for rural areas of Maharashtra, its four administrative divisions and twenty-five districts i.e., excluding Greater Bombay which is entirely urban.

65. The source of the data is the main Table B-III—Part B.

66. The distribution of 1,000 male and female non-workers each is shown by four broad educational levels, viz., (1) Illiterate, (2) Literate without educational level, (3) Primary or Junior Basic and (4) Matriculation and above.

Subsidiary Table B-IV.1

67. This table presents the distribution of 1,000 workers in non-household industry, trade, business, profession or service by their employment status or 'class of worker'. The figures of workers shown do not include those working as cultivators, as agricultural labourers and at household industry.

68. Material is presented only for 'total and urban' areas of Maharashtra, its four administrative divisions and twenty-six districts.

69. Material for preparation of this table has been drawn entirely from the main Table B-IV—Part B. 1,000 workers shown against the total of all Divisions of the Indian Standard Industrial Classification Scheme in column 3 are classified by employment status in columns 4 to 7. The classification by employment status is into four classes of workers, viz., (i) Employer, (ii) Employee, (iii) Single worker and (iv) Family worker.

70. An "employer" is a person who hires other persons to help him in the economic activity in which he is engaged.

71. An "employee" is a person who usually works under some other person for salary or wages in cash or kind.

72. A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually. A person who works in joint partnership with one or several persons without hiring any employee is also a single worker.

73. A "family worker" is a member who works without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the

family and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in household duties are non-workers and are not, therefore, treated as family workers.

Subsidiary Table B-IV.2

74. This table shows the distribution of 1,000 workers in Industrial Category III 'Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities' by employment status or class of worker. The 1,000 workers here do not include the workers engaged in any of these industries as a household industry.

75. The source of the data is the main Table B-IV—Part B. Industrial Classification Divisions 0 and 1 shown in column 1 of the main table form Industrial Category III of workers. The figures of Divisions 0 and 1 have been added in all columns for the preparation of this subsidiary table.

76. Data are presented only for total and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

77. 1,000 workers engaged in Divisions 0 and 1 are classified according to the employment status, i.e. into four classes of workers mentioned in the note on Subsidiary Table B-IV.1.

Subsidiary Table B-IV.3

78. This table presents the distribution of 1,000 workers of each sex engaged in household industry, i.e. Industrial Category IV of workers by employment status or class of worker.

79. The material for preparation of this table has been drawn entirely from the main Table B-IV—Part A which shows the industrial classification of workers engaged in household industry classified according to the Standard Industrial Classification Scheme and cross-classified by employment status.

80. Industry Division '0' with its major groups 00 to 04, Industry Division 1 with its only major group 10 and Industry Division '2 & 3' with its major groups '20 to 39' are the only Divisions relevant to Category IV 'Household Industry'. In this subsidiary table, 1,000 workers of these Divisions in household industry are shown classified by employment status or class of worker into only two groups, viz., 'Employees' and 'Others'. Employees are hired persons working for salary or wages in cash or kind in some one else's household industry. 'Others' are workers who are not employees, i.e. who are either employers, single worker or family workers in their own household industry.

81. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

Subsidiary Table B-IV.4

82. This table shows the distribution of 1,000 workers in Industrial Category V, 'Manufacturing other than Household Industry', by employment status or class of worker.

83. The source of the data is the main Table B-IV—Part B relating to non-household industry. Category V corresponds to the Industrial Division 2 & 3.

84. Data are presented only for total and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

85. The table shows 1,000 workers engaged in Industrial Division 2 & 3 classified into four employment statuses or classes of worker, viz., (i) Employer, (ii) Employee, (iii) Single worker and (iv) Family worker. The class of worker has been described in the note on Subsidiary Table B-IV.1 above.

Subsidiary Table B-IV.5

86. This table shows the distribution of 1,000 workers in Industrial Category VI 'Construction' by employment status or class of worker.

87. Material is presented only for total and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

88. The material for this table is drawn from the main Table B-IV—Part B. Industrial Division 4 of the Standard Industrial Classification Scheme forms Industrial Category VI. In this subsidiary table, 1,000 workers in Industrial Division 4 are shown classified by employment status or class of worker into four groups, viz., (i) Employer, (ii) Employee, (iii) Single worker and (iv) Family worker as in the preceding table.

Subsidiary Table B-IV.6

89. This table shows the distribution of 1,000 workers in Industrial Category VII 'Trade and Commerce' by employment status or class of worker.

90. The material for this table is drawn from the main Table B-IV—Part B. Industrial Division 6 of the Standard Industrial Classification Scheme forms Industrial Category VII. The presentation for total and urban areas and the distribution by employment status or class of worker are the same as in the preceding subsidiary table.

Subsidiary Table B-IV.7

91. This table shows the distribution of 1,000 workers in Industrial Category VIII 'Transport, Storage and Communications' by employment status or class of worker.

92. The material for this table is drawn from the main Table B-IV—Part B. Industrial Division 7 of the Standard Industrial Classification Scheme forms Industrial Category VIII. The presentation for total and urban areas and the distribution by employment status or class of worker are the same as in the preceding table.

Subsidiary Table B-IV.8

93. This table shows the distribution of 1,000 workers in Industrial Category IX 'Other Services' by employment status or class of worker.

94. The material for this table is drawn from the main Table B-IV—Part B. Industrial Divisions 5, 8 and 9 of the Standard Industrial Classification Scheme form Industrial Category IX. In this subsidiary table, 1,000 workers in the Industrial Divisions 5, 8 and 9 are shown classified by employment status or class of worker. The presentation for total and urban areas and the distribution by employment statuses are the same as in the preceding table.

Subsidiary Table B-IV.9

95. This table shows the distribution of 10,000 workers other than those engaged in Industrial Category I 'Cultivator' and Category II 'Agricultural Labourer' by Industrial Divisions, Major and Minor Groups according to the Standard Industrial Classification Scheme.

96. Material is presented only for total and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

97. The material for this table has been drawn entirely from the main Table B-IV—Part C. For each of the columns 2 to 7, the figure of the total of all Industry Divisions has been taken as 10,000 and first distributed into the ten Divisions (0 to 9) and then further distributed into Major Groups and Minor Groups under each Division.

98. The figures have been rounded off to integers so that for each column of the subsidiary table—

- (i) the total of all Industry Divisions adds up to 10,000,
- (ii) the total of all the Major Groups under a Division adds up to figure of that Division, and
- (iii) the total of all Minor Groups under a Major Group adds up to the figure shown for that Major Group.

The minor groups which account for less than 1 per cent (0.5 per cent in case of minor groups of Industry Division 2 & 3) of the respective division are not shown in the table.

Subsidiary Table B-V.1

99. This table presents the distribution of 10,000 workers other than those engaged in Industrial Category I 'Cultivator' and Category II 'Agricultural Labourer' by Occupational Divisions, groups and families according to the National Classification of Occupations Scheme.

100. The source of the data are columns 1 to 7 of the main Table B-V. For each of the columns 2 to 7 of this table the total figures of all Occupational Divisions have been taken as 10,000 and first distributed into the Divisions 0 to 9 and X and then further distributed in occupational groups and families.

101. The figures have been rounded off to integers so that for each column of the subsidiary table—

- (i) the total of all Occupational Divisions adds up to 10,000,

SECTION III

SUBSIDIARY TABLES TO HOUSEHOLD
ECONOMIC TABLES

(B SERIES)

EXPLANATORY NOTE

This section includes 12 subsidiary tables to Household Economic Tables (B Series) published in Part III of the Maharashtra Census Report. They are prepared from the main tables as follows:—

Main Tables		Subsidiary Tables
B-X	..	B-X.1
B-XI	..	B-XI.1
B-XII and B-XV	..	B-XII.1, B-XII.2, B-XII.3, B-XII.4,
B-XIV-A	..	B-XIV-A.1
B-XIV-A and B	..	B-XIV-B.1
B-XVI	..	B-XVI.1, B-XVI.2, B-XVI.3
B-XVII	..	B-XVII.1

2. No subsidiary table is prepared from Table B-XIII.

3. The material presented in these subsidiary tables is based on the data collected in the household schedules of 20 per cent of the sample of households in rural and urban areas.

4. All the twelve subsidiary tables are prepared entirely from the household economic tables. They neither contain any material obtained from other sources nor do they present any comparable material from the earlier Censuses.

Subsidiary Table B-X.1

5. This table shows the distribution of 1,000 sample households classified by participation or otherwise in the two most important household economic activities in the country, *viz.*, Cultivation and Household Industry. The classification of sample households in the following four categories is the same as in the main Table B-X :—

- households engaged neither in cultivation nor household industry (column 4);
- households engaged in cultivation only (column 5);
- households engaged in household industry only (column 6); and
- households engaged both in cultivation and household industry (column 7).

6. Definitions of 'household', 'household cultivation' and 'household industry' are given in the Introductory Note (at pages 7 and 8).

7. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts. In the main table, talukawise break-up is also shown only to the extent of rural areas.

8. The figures in each line under columns 4, 5, 6 and 7 have been rounded off to integers so that they add up to the figure of 1,000 sample households shown in column 3.

Subsidiary Table B-XI.1

9. This table presents the distribution of 1,000 sample households engaged in cultivation by interest in land and size of land cultivated in rural areas only. The classification of 1,000 sample households worked out as above is the same as is shown for the sample households in the main Table B-XI.

10. Material is presented for only rural areas of Maharashtra, its four administrative divisions and twenty-five districts, *i.e.* excluding Greater Bombay which is entirely urban.

11. The definitions of various terms used in the table are given in the Introductory Note on pages 4 to 8.

12. The classification by size of land cultivated is in ten size groups and is shown by horizontal spread in columns 4 to 14. The size groups are (1) less than 1 acre, (2) 1.0 to 2.4 acres, (3) 2.5 to 4.9 acres, (4) 5.0 to 7.4 acres, (5) 7.5 to 9.9 acres, (6) 10.0 to 12.4 acres, (7) 12.5 to 14.9 acres, (8) 15.0 to 29.9 acres, (9) 30.0 to 49.9 acres, and (10) 50.0 acres and above. A group of unspecified size shown in column 14 consists of sample cultivating households for whom the area of land cultivated was not recorded at the Census.

13. The interests in the cultivated land are classified into the following three types and are shown by a vertical spread under column 2 only by abbreviations (a), (b) and (c) :—

- Entirely owned or held from Government;
- Entirely held from private persons or institutions for payment in money, kind or share;
- Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

14. The figures shown in columns 4 to 14 are rounded off to two decimal places and add up to the respective totals in column 3 and vertically to the figures shown in each column for the 'Total' against all rights in land.

Subsidiary Table B-XII.1

15. This table shows the distribution of 1,000 cultivating households by size class of cultivated holding in rural areas only.

16. Material is presented only for rural areas of Maharashtra, its four administrative divisions and twenty-five districts, *i.e.* excluding Greater Bombay which is entirely urban.

17. The source of the data is the main Tables B-XII and B-XV which respectively show the distribution of sample households engaged in cultivation only and engaged in both cultivation and household industry classified by size of land cultivated.

18. For each size class of cultivated land, 1,000 sample cultivating households for all size classes are shown classified into those engaged in cultivation only and those engaged both in cultivation and household industry.

19. The ten size classes used for classification of households are (1) less than 1 acre, (2) 1.0 to 2.4 acres, (3) 2.5 to 4.9 acres, (4) 5.0 to 7.4 acres, (5) 7.5 to 9.9 acres, (6) 10.0 to 12.4 acres, (7) 12.5 to 14.9 acres, (8) 15.0 to 29.9 acres, (9) 30.0 to 49.9 acres, and (10) 50.0 acres and above. The last class of 'unspecified size' represents the households for whom the area of land cultivated had not been recorded at the Census. The figures are worked out on the following basis :—

$$\begin{array}{l} \text{For each class} \left\{ \begin{array}{l} \text{Households with cultivation only.} \\ \text{Households with cultivation and household industry.} \end{array} \right\} + \left\{ \begin{array}{l} \text{Households with cultivation only.} \\ \text{Households with cultivation and household industry.} \end{array} \right\} \times 1,000 \\ \hline \text{Total for all size classes} \left\{ \begin{array}{l} \text{Households with cultivation only.} \\ \text{Households with cultivation and household industry.} \end{array} \right\} + \left\{ \begin{array}{l} \text{Households with cultivation only.} \\ \text{Households with cultivation and household industry.} \end{array} \right\} \times 1,000 \end{array}$$

Subsidiary Table B-XII.2

20. This table presents the distribution of 1,000 sample households engaged in cultivation only and those in both cultivation and household industry by size of land cultivated and working strength in rural areas only.

21. The material is presented only for rural areas of Maharashtra, its four administrative divisions and twenty-five districts, i.e. excluding Greater Bombay which is entirely an urban area.

22. The source of the data is the main Tables B-XI and B-XV which respectively provide distribution of households engaged in cultivation only and those engaged both in cultivation and household industry by size of land cultivated and working strength.

23. 1,000 sample households engaged in cultivation only and both in cultivation and household industry for each size class of land cultivated are shown classified by the working strength by horizontal spread in columns 4 to 13. The vertical spread shows the ten size classes of land cultivated.

24. The classification of households by working strength is into five groups, viz., 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons. The persons engaged include family workers as well as hired workers.

25. The ten size classes of land cultivated are the same as those described in the note on Subsidiary Table B-XII.1.

Subsidiary Table B-XII.3

26. This table presents the distribution of 1,000 workers engaged in cultivation with or without household industry and in each size class of cultivated holding and size of employment by family and hired workers in rural areas only.

27. The material is presented only for the rural areas of Maharashtra, its four administrative divisions and twenty-five districts, i.e. excluding Greater Bombay which is entirely an urban area.

28. The source of the data is the main Tables B-XII and B-XV.

29. For each of the ten size classes of land cultivated 1,000 of all workers are first classified into family workers and hired workers, cross-classified by those engaged in cultivation only and in both cultivation and household industry. Similar classification into family workers and hired workers and cross-classification by cultivation only or with both cultivation and household industry is shown for 1,000 workers in each size of employment, i.e. 1 worker, 2 workers, 3—5 workers, 6—10 workers and more than 10 workers. The break-up for hired workers is not shown against the employment size of one worker as they are all family workers.

30. The figures are rounded off to two decimal places.

Subsidiary Table B-XII.4

31. This table shows the average number of family and hired workers per cultivating household by each size class of cultivated holding in rural areas only.

32. The material is presented only for the rural areas of Maharashtra, its four administrative divisions and twenty-five districts, i.e. excluding Greater Bombay which is entirely an urban area.

33. The source of the data is the main Tables B-XII and B-XV.

34. For each of the ten size classes of land cultivated, data in respect of (i) average of total workers, (ii) average of family workers, (iii) average of hired workers and (iv) the number of family workers per hired worker are shown by a horizontal spread cross-classified separately for total cultivating households, households engaged in cultivation only, and households engaged in both cultivation and household industry.

35. In cases where there are no figures 'Zero' has been shown. Where the figure is less than 0.005, it has been treated as negligible and indicated by the letter 'N'. An asterisk sign (*) is shown in columns 5, 9 and 13 wherever it was not possible to calculate the required entry because of 'nil' entries for 'hired workers'. The figures of average workers (family/hired) in the table are rounded off to two decimal places.

Subsidiary Table B-XIV-Part A.1

36. This table shows the distribution of 1,000 sample households engaged in household industry only by principal household industry and working strength in all areas.

37. Material is presented separately for 'total, rural and urban' areas of Maharashtra and its twenty-six districts. Material for administrative divisions has not been presented for economy of space. Similarly, Major Groups of Household Industry having figures less than 10 per cent of the respective industry division are not exhibited.

38. The source of data is the main Table B-XIV-A.

39. The distribution of 1,000 sample households engaged in household industry only classified by the working strength is shown by a horizontal spread against each principal industry shown in column 2 classified by industry division (1 digit code) and major groups (two digit code) according to the Standard Industrial Classification Scheme (Appendix II on pages 13 to 19). Each industry is also briefly described in column 2.

40. Classification by working strength is into five groups, viz., engaging 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons.

41. Definition of household industry is given in the Introductory Note (at page 8).

42. The 1961 Census household schedule had a provision for recording more than one household industry conducted by the household. In such cases the household industry conducted by the household for a longer period in the year has been treated as its principal household industry.

43. The figures in columns 5 to 9 are rounded off to two decimal places and add up to 1,000 sample households shown in column 4 in each line.

Subsidiary Table B-XIV-Part B.1

44. This table shows the distribution of 1,000 sample households engaged in household industry only by nature of household industry.

45. Material is presented separately for total, rural and urban areas of Maharashtra and its twenty-six districts. It is not presented for administrative divisions for economy of space.

46. The source of data is the main Tables B-XIV-A & B.

47. The classification of household industries into industry divisions, major groups and minor groups is shown in column 1 by code numbers according to the Standard Industrial Classification Scheme. The minor groups are shown by 4 digit code numbers according to the list of common household industries presented with such four digit classification. Each industry division, major group and minor group is also briefly described in column 2.

48. The distribution of 1,000 sample households engaged in household industries falling in each industry division is shown by rural and urban areas by horizontal spread in columns 4 and 5 and is followed by a similar break-up by major groups and minor groups shown by vertical spread.

49. The figures are rounded off to two decimal places. Wherever the figure is less than 0.005, it is shown as 'N'.

Subsidiary Table B-XVI.1

50. This table presents the distribution of 1,000 sample households engaged in household industry (with and without cultivation) classified by nature of household industry and the period of working of the industry.

51. The source of the data is the main Table B-XVI.

52. Material is presented separately for rural and urban areas of Maharashtra and its twenty-six districts. It is not presented for the administrative divisions for economy of space. Similarly, Major Groups of Household Industry having figures less than 10 per cent of the respective industry division are not exhibited in this table.

53. The classification by nature of industry is by major groups according to the Standard Industrial Classification Scheme and is shown in column 1 with brief description given in column 2 for major groups. The distribution of 1,000 households engaged in each household industry with and without cultivation is shown by the duration of that industry with rural and urban break-up. The classification by duration or period of working of the industry is by four groups, viz., 1—3 months, 4—6 months, 7—9 months and 10 months—1 year. The 'Unspecified' group includes figures of households in respect of which period of working of the household industry was not recorded.

54. The figures are rounded off to two decimal places. Those in columns 4 and 5, and 6 to 15 respectively add up to the figure of 1,000 shown in column 3. In case the proportion of households is less than 0.005 in any column it is shown as 'N'.

Subsidiary Table B-XVI.2

55. This table shows the distribution of 1,000 workers engaged in principal household industry (with or without cultivation) in each working period by family and hired workers separately for rural and urban areas.

56. The material is separately presented for Maharashtra and its twenty-six districts. It is not presented for the administrative divisions for economy of space.

57. The source of the material is the main Household Economic Table B-XVI.

58. The classification of household industry is according to the major industry groups of the Standard Industrial Classification Scheme and is shown in column 1. The description is shown in column 2.

59. For each major group, the distribution of 1,000 sample households is first shown for total workers classified into family workers and hired workers and cross-classified for rural and urban areas. For family workers a further cross-classification by sex is also shown both under rural and urban areas. Similar distribution of 1,000 households is shown by a horizontal spread for each duration of household industry, viz., working for 1—3 months, 4—6 months, 7—9 months, 10 months—1 year. A vertical spread under each major group shows a break-up for (a) 'with cultivation' or (b) 'without cultivation'.

60. The figures are rounded off to two decimal places. Wherever the proportion of households in any column is less than 0.005, it is shown as 'N'. The figures in columns 3 and 4 for (a) and (b) and in columns 11 to 35 for (a) and (b) add up to 1,000 respectively.

Subsidiary Table B-XVI.3

61. This table shows the average number of family and hired workers per household engaged in household industry (with and without cultivation) by the duration of household industry.

62. The material is presented separately for rural and urban areas of Maharashtra and its twenty-six districts. It is not presented for the administrative divisions for economy of space. Similarly Major Groups of Household Industry having figures less than 10 per cent of respective Industry Division are not shown.

63. The source of data is the main Table B-XVI.

64. For each principal household industry, the table shows by a horizontal spread, first the average of total workers, average of family workers, average of hired workers and the number of family workers per hired worker for the total households engaged in household industry and then similar averages and ratios for households under each duration of household industry. A vertical spread under each household industry provides similar averages and ratios for households engaged with cultivation and without cultivation.

65. The figures are rounded off to two decimal places. Asterisk sign (*) has been used in columns 6, 10, 14, 18, 22 and 26, wherever it has not been possible

to calculate the required entries because of 'nil' entries for hired workers in the main Table B-XVI.

Subsidiary Table B-XVII.1

66. This table presents the distribution of 1,000 sample households by size of households.

67. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

68. The classification of 1,000 households by size is shown by a horizontal spread into five size groups, viz., (small)—(i) single member and (ii) two to three members; (medium)—(iii) four to six members; (large)—(iv) seven to nine members; and (very large)—(v) ten members and over. For each size group the male and female populations are also shown along with the number of households. The proportions are worked out on the following basis :—

$$\frac{\text{Number of males/females in each size group}}{\text{Total male/female sample household population}} \times 1,000$$

69. The figures are rounded off to two decimal places. Those of households in columns 6, 9, 12, 15 and 18 add up to 1,000 sample households shown in column 2. Similarly figures of males and females for different size groups add up to total male and female population of 1,000 sample households.

EXPLANATORY NOTE

There are 14 Subsidiary Tables included in this Section based on the Social and Cultural Tables (C Series) published in Part II-C(i) of the Maharashtra Census Report. One subsidiary table each is on Tables C-I, C-III—Part B, C-III—Part C, C-V and C-VII and two subsidiary tables each are on Tables C-IV, C-VIII—Part A and C-VIII—Part B. Three subsidiary tables are on Table C-II. There is no subsidiary table on Table C-VI.

2. Four Subsidiary Tables C-II.2, C-II.3, C-IV.1 and C-IV.2 present comparable data for previous Censuses.

3. Material presented in these tables except C-I.1 is based on a full count and on the information collected in the Individual Slips. Subsidiary Table C-I.1 is prepared from the material collected in Household Schedules and is based on 20 per cent sample of households.

Subsidiary Table C-I.1

4. This table presents the distribution of household population by relationship to the heads of households.

5. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

6. The table is prepared from Table C-I and has the same column headings. The distribution of household population of 1,000 sample households is into related persons and unrelated persons with a break-up of the former into heads of households, spouses of heads of households, married sons, other married male relations, other married female relations and never married, widowed and divorced or separated relations.

7. The population of 1,000 sample households has been worked out as follows:—

$$\frac{\text{Total sample household population}}{\text{Total number of sample households}} \times 1,000$$

The break-up of the population of 1,000 sample households into related and unrelated members, males and females has been worked out in the same proportion as in the main Table C-I. The figures of males and females shown in columns 5 to 15 of the Subsidiary Table add up to the total sample household population shown in column 2. Since there can be only one head of household per household the total of male and female heads of households is the same as the number of sample households, i.e. 1,000. The figures are worked out for 1,000 sample households each in total, rural and urban areas.

Subsidiary Table C-II.1

8. This table presents the distribution of 1,000 persons of each sex by marital status. It is prepared from Table C-II.

9. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

10. The distribution by marital status is into the following four categories:—

“Never Married” are persons who have never been married. Persons in the age-group 0—9 have been treated as never married irrespective of the answers recorded for them against question on marital status.

“Married” persons are those who are currently married, whether for the first or another time. These include those recognised as married by custom or society and those in stable *de facto* union.

“Widowed” persons include those whose husbands or wives are dead and who have not married again.

“Divorced or separated”—Persons who have been divorced, either by a decree of a law court or by a regular social or religious custom but who have not remarried are considered as ‘divorced’. Those who have been separated from wives or husbands and are staying apart with no apparent intention of living together again are treated as ‘separated’.

The table shows only the combined figures for ‘separated’ and ‘divorced’. Persons for whom ‘marital status’ has not been recorded are shown under column ‘unspecified’. The proportion of persons under this category is mostly negligible.

11. The figures in columns 4 to 8 for males and columns 10 to 14 for females have been rounded off to integers so that they add respectively to 1,000 males and females separately for total, rural and urban areas.

Subsidiary Table C-II.2

12. Subsidiary Table C-II.1 shows the distribution of 1,000 persons of each sex by marital status. This table presents the same distribution along with comparable figures for four previous Censuses of 1921 to 1951.

13. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts. For the year 1941 material is not available for Sangli and Kolhapur districts. The calculations for that year for Poona Division are based on the data excluding Sangli and Kolhapur districts. Similarly calculations for Maharashtra are based on data for areas excluding Sangli and Kolhapur districts.

14. The source of material for 1961 is the main Table C-II. Material for earlier Censuses has been obtained from the following:—

Census Year	Source
1951 ..	Cols. 5 to 10 of Table C-III
1941 ..	Y Sample age tables
1931 ..	Table VII (Age, sex and civil conditions by Religion).
1921 ..	Table VII (Age, sex and civil conditions by Religion).

15. The figures of ‘Widowed’ and ‘Divorced or Separated’ are available separately only in 1961. In the earlier Censuses the figures for the two were combined together and are given under ‘widowed’. Similarly the figures for ‘unspecified’ status are available only in the 1961 Census. The figures for ‘divorced or separated’ and those of ‘unspecified’ marital status have been shown in the table for 1961 Census only.

Subsidiary Table C-II.3

16. This table shows the distribution of 1,000 married persons of each sex by broad age-groups and comparison with two previous Censuses 1951 and 1941.

17. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts.

18. The source of material for 1961 is columns 8 and 9 of Table C-II. For 1951 and 1941 the material has been drawn from columns 7 and 8 of Table C-III and columns 9 and 10 of Y Sample Age Table 1.

19. The broad age-groups used are 0—14, 15—34, 35—54, and 55 and above. A separate column, ‘Age not stated’, shows the proportion of persons for whom age has not been recorded during the Census.

20. The figures have been rounded off to integers for males and females in all age-groups so that they add up to 1,000 each.

Subsidiary Table C-III—Part B.1

21. This table presents the distribution of 1,000 persons of each sex in each age-group by literacy and educational levels.

22. Material is presented only for urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

23. Material for this subsidiary table is drawn from columns 3 to 32 of Table C-III—Part B. The main Table C-III—Part B shows classification into 10 age-groups. The subsidiary table, however, presents it only into four broad age-groups, viz., 5—14, 15—34, 35—59, and 60 and above. The line ‘Age not stated’ shows the figures of persons whose age had not been recorded.

24. Concepts of literacy and educational level are explained in paragraphs 51 to 54 of the Introductory Note.

25. The figures in columns 5, 7, 9, 11, 13, 15, 17 and 19 have been rounded off to integers so that they add up

to 1,000 shown in column 3. The figures in columns 6, 8, 10, 12, 14, 16, 18 and 20 are similarly rounded off and add up to 1,000 shown in column 4.

Subsidiary Table C-III—Part C.1

26. This subsidiary table shows the distribution of 1,000 persons of each sex in each age-group by educational level.

27. Material is presented for rural areas of Maharashtra, its four administrative divisions and twenty-five districts, i.e. excluding Greater Bombay which is entirely urban.

28. The subsidiary table is based on the material drawn from columns 3 to 12 of Table C-III—Part C. In the main Table C-III—Part C the distribution by age-groups is more elaborate and is into 10 age-groups. The subsidiary table however, presents it into only four broad age-groups, viz., 5—14, 15—34, 35—59 and 60 and above. The figures shown against ‘Age not stated’ are of those whose age had not been recorded. The concepts of literacy and educational levels are explained in paragraphs 51 to 54 of the Introductory Note.

29. In calculating distribution of 1,000 persons the figures in columns 5, 7, 9 and 11 have been rounded off to integers so that they add up to 1,000 shown in column 3. The figures in columns 6, 8, 10 and 12 are similarly rounded off and add up to 1,000 shown in column 4.

Subsidiary Table C-IV.1

30. This subsidiary table shows sex ratio (females per 1,000 males) by different age-groups with comparable figures for the 1951 Census.

31. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

32. Material for preparation of this table has been drawn in case of 1961 from columns 2 to 7 of Table C-IV for age-groups less than 1 year, 1—4, 5—14, 15—34, 35—59 and 60+ and from columns 3 and 4 of Table C-III for age-groups 5—14 and 15—34. For 1951 the figures for age-groups less than 1 year, 1—4, 5—14, 15—34 and 35—54 have been worked out from Table C-III and for age-groups 55—59 and 60+ from Table C-V.

33. The eight age-groups are shown by horizontal spread in columns 3 to 18. The age-groups are: less than 1 year, 1—4, 5—14, 15—34, 35—54, 55—59, 60 and above and ‘Age not stated’.

Subsidiary Table C-IV.2

34. This subsidiary table shows the distribution of 1,000 persons of each sex by age-groups with comparable figures for the 1951 Census.

35. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

36. The distribution of 1,000 males and 1,000 females by age-groups is shown by horizontal spread in columns 7 to 34. The age-groups used are the same as in the Subsidiary Table C-IV.1 except that the age-groups 55 to 59 and 60 and above are combined. Additional columns are provided for 'age not stated' for males and females.

37. For 1961, the figures for age-groups less than 1 year, 1-4, 5-14, 15-34, 35-54, 55-59, 60+ and 'age not stated' have been worked out from material in columns 2 to 7 of Table C-IV and figures for age-groups 5-14 and 15-34 have, for the sake of convenience, been worked out from Table C-III although they could have also been worked out from single year age returns shown in Table C-IV. For 1951, the figures for age-groups less than 1 year, 1-4, 5-14, 15-34 and 35-54 have been worked out from Table C-III and those for age-groups 55-59 and 60+ from Table C-V.

38. The figures in columns 7 to 34 have been rounded off to integers so that (i) those in columns 7, 11, 15, 19, 23, 27 and 31 add up to 1,000 in column 3; (ii) those in columns 8, 12, 16, 20, 24, 28 and 32 add up to 1,000 in column 4; (iii) those in columns 9, 13, 17, 21, 25, 29 and 33 add up to 1,000 shown in column 5 and (iv) those in columns 10, 14, 18, 22, 26, 30 and 34 add up to 1,000 shown in column 6.

Subsidiary Table C-V.1

39. This table presents the distribution of 1,000 persons by their mother-tongue.

40. Material is presented for Maharashtra, its four administrative divisions and twenty-six districts. The source of the data is the main Table C-V.

41. Mother-tongues as returned in 1961 Census are arranged in an alphabetical order and the proportions of speakers of each mother-tongue have been shown separately to 1,000 persons for total, rural and urban areas. The data is presented only for those mother-tongues which have at least one speaker in one thousand population in any of the districts.

42. Mother-tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood is considered as mother-tongue. In the case of infants and deaf mutes, mother-tongue will be the language usually spoken by the mother.

43. The figures of proportion of speakers of different mother-tongues have been rounded off to integers so that they add up to 1,000 shown in column 2.

44. Details regarding classification of mother-tongues and their dialects may be found in the flyleaves to Table C-V published in Part II-C(i) of the Maharashtra Census Report.

Subsidiary Table C-VII.1

45. This subsidiary table shows the distribution of 1,000 persons by Religion.

46. Material is presented separately for total, rural and urban areas of Maharashtra, its four adminis-

trative divisions and twenty-six districts. The source of the data is the main Table C-VII.

47. The distribution of 1,000 persons by religion is shown by horizontal spread for Hindus, Muslims, Christians, Sikhs, Jains and Buddhists and "Other religions and persuasions". The religions have been arranged in the order of their numerical strength in India. The break-up of "other religions and persuasions" may be seen in Appendix to Table C-VII in Part II-C(i) of the Maharashtra Census Report. The column for "Religion not stated" shows the figures of persons for whom no religion was recorded.

48. The proportions of different religions are rounded off to integers so that they add up to the figure of 1,000 shown in column 3.

Subsidiary Table C-VIII—Part A.1

49. This subsidiary table is prepared from the main Table C-VIII—Part A and shows the distribution of 1,000 persons of all Scheduled Castes by sex and literacy.

50. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

51. The table is prepared from the data presented in columns 3 to 9 of Table C-VIII—Part A. The proportions of illiterate and literate and educated males and females have been worked out per 1,000 of total persons belonging to Scheduled Castes. The figures in columns 4 to 7 have been rounded off to integers so that they add up to 1,000 shown in column 3.

52. The concept of literacy has been explained in paragraphs 51 to 54 of the Introductory Note.

Subsidiary Table C-VIII—Part A.2

53. This subsidiary table presents the distribution of 1,000 persons belonging to Scheduled Castes by nine broad categories of workers and non-workers.

54. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

55. The table is prepared from the material presented in columns 10 to 31 of Table C-VIII—Part A.

56. The proportion of Scheduled Caste persons in each industrial category of workers and non-workers to 1,000 persons of Scheduled Castes are shown by horizontal spread in columns 5 to 14.

57. The proportions are rounded off to integers so that they add up to 1,000 shown in column 3.

58. The concepts of workers and non-workers and nine categories of workers are explained in paragraphs 23 to 44 of the Introductory Note.

Subsidiary Table C-VIII—Part B.1

59. This subsidiary table shows the distribution of 1,000 persons of all Scheduled Tribes by sex and literacy.

60. Material is presented separately for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-one districts as in districts of Buldhana, Akola, Wardha, Nagpur and Bhandara, there are no Scheduled Tribes.

61. The table is prepared from the data presented in columns 3 to 9 of Table C-VIII—Part B. The proportions of illiterate and literate and educated males and females have been worked out per 1,000 persons belonging to Scheduled Tribes. The figures in columns 4 to 7 have been rounded off to integers so that they add up to 1,000 shown in column 3.

62. The concept of literacy is explained in paragraphs 51 to 54 of the Introductory Note.

Subsidiary Table C-VIII—Part B.2

SECTION V

SUBSIDIARY TABLES TO
MIGRATION TABLES
(D SERIES)

EXPLANATORY NOTE

There are nine subsidiary tables in this Section prepared from the 1961 Census Migration Tables (D Series) published in Part II-C(ii) of the Maharashtra Census Report. Three subsidiary tables each are prepared from Tables D-II and D-IV and one each from Tables D-I, D-III and D-V. There is no subsidiary table to Table D-VI.

2. The material in the Subsidiary Tables D-IV.1, D-IV.2 and D-IV.3 has been presented for each of the 12 cities in the State. Subsidiary Tables D-II.1 and D-II.2 present material only for the State as a whole. The remaining three subsidiary tables viz., D-I.1, D-II.3 and D-III.1, present material for Maharashtra, its four administrative divisions and twenty-six districts. Subsidiary Table D-II.3 presents material separately for total, rural and urban areas while Subsidiary Table D-III.1 presents it for rural and urban areas only.

Subsidiary Table D-I.1

3. This subsidiary table shows the distribution of 1,000 non-Indian Nationals by continents to which they belong.

4. The source of the data is the main Table D-I.

5. Figures of non-Indian Nationals shown here are exclusive of those who were employed in Foreign Consulates or Missions and their families because they were not enumerated in the Census. Further, Nationals of Goa, Daman and Diu have been treated as Indian Nationals and therefore, their numbers are not included here.

6. Material is presented separately in small tables for each country for non-Indian Nationals above 1 in 1,000 non-Indian Nationals with break-up by sex. The data are presented for the State and those divisions or districts which have returned non-Indian Nationals.

7. Figures of males and females are rounded off so that their total for all the countries adds up to 1,000.

Subsidiary Table D-II.1

8. This table seeks to show as to what would have been the population of Maharashtra in 1961 and in 1951 if there had been no migration, inward or outward. This population is termed 'Natural population' of the State. The intention in presenting such a table is to facilitate a study of variation in natural population of Maharashtra from 1951 to 1961. However, since Maharashtra is a new State constituted after the 1951 Census, birth place data for 1951 have to be recast for the reorganised States to arrive at the figure of natural population in 1951. This has presented some difficulties and hence full data have been presented for 1961 only and not for 1951.

9. The recorded population of 1961 shown in Col. 2 of the table is the enumerated population in Maharashtra and in the case of 1951 it is the population

adjusted for the present territorial jurisdiction of Maharashtra State and shown in Table A-II published in Part II-A of the Maharashtra Census Report. The immigrants of 1961 are all persons enumerated in the State *minus* the persons born within the State. These include persons born outside India. The emigrants shown are persons born in Maharashtra, who were enumerated in the Indian Union outside Maharashtra State. Emigrants from Maharashtra, who have gone outside India, are not accounted for. The natural population of Maharashtra shown in this table is thus deficient to the extent of the number of Maharashtra emigrants outside India.

Subsidiary Table D-II.2

10. This table presents migratory movements between Maharashtra State and other parts of India for 1961 and 1951.

11. The source of the data is Table D-II for 1961 and Table D-IV for 1951. The immigrants are the persons born in Indian Union outside Maharashtra and enumerated in Maharashtra. The Emigrants are the persons born in Maharashtra but enumerated in other States and Union Territories. The reorganisation of State and consequential territorial adjustments presented difficulties in recasting data regarding birth place for 1951 Census. The data regarding migration movement for 1951 have not been therefore presented.

Subsidiary Table D-II.3

12. This table shows the distribution of 10,000 persons enumerated by place of birth, rural and urban characteristics of place of birth and sex.

13. The material is presented separately in three lines for total, rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts. Greater Bombay district being entirely an urban area its figures which are the same for total and urban areas are presented in two lines. The source of the data is the main Table D-II.

14. The distribution by place of birth is shown by horizontal spread into five categories, viz. (i) born in place of enumeration, (ii) born in district of enumeration other than the place of enumeration, (iii) born in other districts within the State, (iv) born in other States in India, and (v) born beyond India. Except in the case of birth places outside India, breakdown of figures according to characteristics of birth place, viz., rural, urban or unclassifiable is also shown.

Subsidiary Table D-III.1

15. This table shows the distribution of 10,000 migrants (persons born outside the place of enumeration) classified by place of birth, duration of residence at the place of enumeration (period after migration) and sex.

16. Material is presented separately for rural and urban areas of Maharashtra, its four administrative divisions and twenty-six districts.

17. The source of the data is the main Table D-III.

18. The distributions of 10,000 migrants from within the State of enumeration (Maharashtra) and from other States in India have been presented in different formats.

19. The data have been presented fully for migrants from within the State, i.e. (i) persons born within the district of enumeration, and (ii) persons born in other districts but within the State. As regards migrants from other States in India, material is presented in small Inset Tables for States having at least 1 in 1,000 of total migrants at the State level.

20. The distribution of migrants from within the State is shown classified into 6 periods of residence at the place of enumeration, viz., (i) less than 1 year, (ii) 1—5 years, (iii) 6—10 years, (iv) 11—15 years, (v) 16 years and more and (vi) period not stated. The last category includes migrants for whom period of residence had not been recorded in the Census slips. The migrants are shown sub-classified into (i) born elsewhere in the district of enumeration and (ii) born in other districts but within the State. For each of these classifications the break-up for sex and rural and urban birth places is also provided. The figures of migrants from 'unclassifiable' birth places are not included in the table.

21. The Inset Tables for Maharashtra, its four administrative divisions and twenty-six districts show separately for each duration of residence, the number of migrants for each State and Union Territories by rural and urban places of birth and sex.

22. These inset tables are not prepared for persons born outside the country and 'unclassifiable' birth place. 'Goa, Daman and Diu' does not appear in the inset tables as its figures in the main Table D-III are included in other countries outside India.

Subsidiary Table D-IV.1

23. This subsidiary table shows the distribution of 1,000 migrants in each city classified by sex and four broad age-groups.

24. Material is presented separately for 12 cities in the State, viz., (1) Greater Bombay, (2) Nagpur, (3) Poona, (4) Sholapur, (5) Kolhapur, (6) Amravati, (7) Nasik, (8) Malegaon, (9) Ahmadnagar, (10) Akola, (11) Ulhasnagar, and (12) Thana. A city is a town with 1 lakh or more population.

25. The broad age-groups are 0—14, 15—34, 35—59 and 60 years and over.

26. The figures in columns 3 to 10 are rounded off to integers and add up to 1,000 migrants shown against each city in column 2.

Subsidiary Table D-IV.2

27. This table presents the distribution of 1,000 migrants to each city in the State by sex and educational level.

28. Material is presented separately for each of the 12 cities in Maharashtra.

29. The distribution by educational levels is shown in a horizontal spread in columns 4 to 33. The educational levels shown in the table are the same as in the Subsidiary Table B-III—Part A.1. Concepts of literacy and educational levels have been explained in paragraphs 51 to 54 of the Introductory Note.

Subsidiary Table D-IV.3

30. This table shows the distribution of 1,000 migrant workers in each city by cultivators and agricultural labourers in addition to other occupational groups and sex.

31. Material is presented separately for 12 cities in Maharashtra.

32. The classification by cultivators, agricultural labourers and other occupational groups is shown by a horizontal spread. The occupational groups (two digits) are shown according to the National Classification of Occupations Scheme reproduced as Appendix III (pages 20-24).

33. The figures of male and female migrant workers are rounded off to integers and add up respectively to 1,000 both in columns 2 and 3.

Subsidiary Table D-V.1

34. This table presents the distribution of 1,000 migrants (born in India) in the cities classified by rural or urban birth places further cross-classified by duration of residence in the city.

35. Material is presented separately for each of the twelve cities in Maharashtra.

36. The distribution of 1,000 migrants is shown first by those born in rural areas sub-classified by (a) born in the district; (b) born outside the district but within the State; and (c) born outside the State. Similar entries for migrants born in urban areas follow with the same sub-classification under (a), (b) and (c) groups. For each of these categories a break-up by duration of residence in the city is shown into (i) residing for less than 3 years and (ii) residing for 3 years and more.

37. The figures of migrants shown in this subsidiary table are exclusive of migrants (i) who are born outside India, (ii) whose birth places are either unclassifiable or have not been recorded as rural or urban and (iii) in whose cases duration of residence at the place of enumeration has not been recorded. The figures of migrants born in India exclude those born in Goa, Daman and Diu as rural urban classification of birth place of these persons was not available.
