PREFACE

This is a companion volume to Part-II B--(I) containing General Economic Tables in which B—Series Tables B-I to B-IV have been presented to the reader. In this volume will be found the remaining Tables B-V to B-IX. A preliminary note has also been added to the previous volume in which the concepts and principles of classification have been explained. The discussion based on these Tables will be found in my General Report on Madras State Part I-A.

I wish to acknowledge the guidance given by Sri. Asok Mitra, Registrar-General, India, Sri. D. Natarajan, Deputy Registrar-General, India, Sri K. D. Ballal, Central Tabulation Officer, New Delhi and the able assistance given by Sri. M. K. S. Mani, Tabulation Officer and his staff Sri. K. Damodharan and Sri. A. Babu, Lower Division Clerks in preparing and presenting this volume. It is also my duty to record my gratitude to the K. M. S. Press who has printed it in record time.

TABLE B-V

Occupational Classification by Sex of
Persons at Work other than Cultivation

FLY LEAF

This Table gives the occupational classification of persons working in non-agricultural sectors, namely, the workers belonging to the industrial category III to IX. This Table is prepared on the basis of National Occupational Classification. Figures have been given for both sexes and also for total and urban areas separately for the State and for each district.

The distribution of population by occupations is one economic data which has been presented in all the Censuses, though its form and basis of classification has undergone changes from Census to Census. The system of classification of occupations adopted in 1881 is a close adaptation of the English system known in England as Dr. Farr's. This system was followed by Baine. "The leading characteristics of the system and the thread on which the whole classification is hung, is the definition of a product and the object which the product is intended to serve. The product is not necessarily material object. Even a Government is a product according to this system as is the scientific knowledge of engineer and medical practitioner." According to this system, occupations were classified into classes and each of these into groups. The object of such classification was to group the various occupations according to the distribution of population. In 1881, there were 6 classes, 18 orders, 81 sub-orders and 459 groups. This system was followed in 1891 also, though the number of classes and orders were increased to provide for additional occupations. The Census Commissioner of 1891 has stated as follows: "The classification now published is not altogether scientifically correct, but it will serve its purpose if it collects under one head occupations known to be akin to each and keep apart others which are nominally related". 7 classes, 24 orders, 77 sub-orders and 465 groups were adopted in 1891. In 1901, the number of classes increased to 8, the sub-orders to 79, groups to 520, but there was no increase in the number of orders. In 1911, Dr. Jacques Bertillon, a French Statistician devised a new occupational scheme to facilitate international comparison. In this scheme, all occupations are divided into 4 classes and 12 sub-classes, the number of minor divisions varying according to local requirements. This system was adopted in Census of 1911. In Madras State the occupations were divided into 4 classes, 12 sub-classes, 55 orders and 169 groups. In 1921 and 1931 the same system was followed, though the number of groups varied. The number of classes, orders, sub-orders and groups in the Censuses from 1881 to 1931 and the number of Divisions and groups in 1951 and 1961 are given in a tabular form as Appendix I to this Fly leaf. In 1941 also, the basis of classification was the same, but no Table was actually prepared.

In 1951, this classification was given up. The population was divided into livelihood classes and classified under the Indian Census Economic Classification Scheme described in the Fly leaf to Table B-IV. The occupations were divided into 10 Divisions and 88 sub-divisions. The object was to improve the classification and facilitate comparability with the International Standard Industrial Classifications Scheme evolved by the United Nations Organisation. This classification can be said to be based more on industrial classification than on occupational classification. In the 1961 Census, occupational classification has been based on the National classification of occupations with a code

structure which classified various occupations into occupational Divisions, Groups and Families. In this 3 digit code system, the Division is represented by the first digit of the code number, the occupational Groups by the second digit and the occupational Family by the third digit. 11 occupational Divisions, 75 occupational Groups and 331 occupational Families have been adopted in this Census. This system based on the International Standard Classification of Occupations modified to suit the Indian conditions was approved in 1958 by the working group represented by the major users of occupational data in India. The classification is based on the basic tasks involved in each occupation.

Thus it can be seen that this Table is different from that of the Imperial Tables XII of 1881 and 1891 Censuses, Imperial Tables XV of 1901 and 1911, Imperial Tables XVII of 1921 and Imperial Tables X of 1931. A tabular statement indicating the Classes or Divisions which form the major classification is given as Appendix II to this fly leaf.

A complete list of the National Classification of Occupations adopted in this Census is given as Appendix III. It indicates the occupations which the various Divisions, Groups and Families denote. A brief summary of the occupations falling under each Division is also given at the top of each Division in this Appendix. This will help the reader to have a clear idea of the basis of classification of occupational data.

- 443 Charcoal Burners and Forest Product Processers
- 449 Loggers and Other Forestry Workers, n. e. c.

5 MINERS, QUARRYMEN AND RELATED WORKERS

Workers in this Division extract mineral products from underground or by surface excavations, refine and treat them to obtain desired grade and quality.

50 MINERS AND QUARRYMEN

- 500 Miners
- 501 Quarrymen
- 502 Drillers, Mines and Quarries
- 503 Shot Firers
- 509 Miners, Quarrymen, n. e. c.

51 WELL DRILLERS AND RELATED WORKERS

- 510 Well Drillers, Petroleum and Gas
- 511 Well Drillers, other than Petroleum and Gas

52 MINERAL TREATERS

- 520 Mineral Treaters

- 59 MINERS, QUARRYMEN AND RELATED WORKERS, n. e. c.
590 Miners, Quarrymen and Related Workers, n. e. c.
- 6 WORKERS IN TRANSPORT AND COMMUNICATION OCCUPATIONS
Workers in this Division supervise, control and operate transport services for transporting passengers and freight; and supervise and maintain communication services on land, water or in air.
- 60 DECK OFFICERS, ENGINEER OFFICERS AND PILOTS, SHIP
600 Deck Officers and Pilots, Ship
601 Ship Engineers
- 61 DECK AND ENGINE-ROOM RATINGS (SHIP), BARGE CREWS AND BOATMEN
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-room Ratings, Firemen and Oilers, Ship
- 62 AIRCRAFT PILOTS, NAVIGATORS AND FLIGHT ENGINEERS
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators
- 63 DRIVERS AND FIREMEN, RAILWAY ENGINE
630 Drivers
631 Firemen
- 64 DRIVERS, ROAD TRANSPORT
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n. e. c. (including Palki and Doli Bearers)
- 65 CONDUCTORS, GUARDS AND BRAKESMEN (RAILWAY)
650 Conductors
651 Guards
652 Brakesmen
- 66 INSPECTORS, SUPERVISORS, TRAFFIC CONTROLLERS AND DESPATCHERS, TRANSPORT

TABLE B-VI

**Occupational Divisions of Persons at Work Other Than Cultivation
Classified by Sex, Broad Age-Groups and Educational Levels
in Urban Areas Only**

FLY LEAF

This Table relates to the urban sector only. In this are presented the occupational data of workers belonging to category III to IX, i.e. workers other than those engaged in agricultural occupations. The data are given only for the various Divisions of National Occupational classification and not for the Groups and Families. But the data have been furnished according to the broad age-groups and educational levels and as such this Table is more detailed than B-V. Age-groups adopted are the same as in Table B-I and B-II, i.e. 0—14, 15—34, 35—59 and 60+. Again educational levels are the same as those adopted in Table B-III—Part—A which deals with the industrial classification of workers and non-workers in urban area by educational levels. No column has been provided for illiterate workers.

The classification of the literates are as follows :

- Literates without educational standard
- Literates who have passed Primary or Junior Basic
- Literates who have passed Matric or Higher Secondary
- Literates who possess Technical Diploma not equal to Degree
- Literates having Non-Technical Diploma not equal to Degree
- Literates with Non-Technical University Degree or Post-Graduate Degree
- Literates who have Technical Degree or Diploma equal to Degree or Post-Graduate Degree

As in B-III-Part—A, Technical Degree holders have been further classified into 6 important branches of science, viz. Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology and Teaching. A further column has been provided under the heading 'Technical Degree holders' to classify those who have technical Degree in subjects other than the above mentioned 6 branches.

In no earlier Census, any table furnishing data of occupation classified by educational level has been prepared. In 1881 and 1891 occupational data for each occupation classified by age were presented. 1881 Imperial Table XII—Part—B presented the occupations by age for the total male urban population only. The age-groups adopted then were 0—10, 10—15, 15—20, 20—30, 30—40, 40—50, 50—60 and 60+. 1891 Imperial Table XVII—Part—A furnished occupational data for both rural and urban population and for both males and females separately with age periods of three broad age-groups, viz. 0—4, 5—14 and 15+. In 1881 figures were given for each city, but in 1891 only the total of the urban area and of the rural area were given separately. In other Censuses from 1901 to 1951 occupational data were furnished for each city separately along with each District figures and State figures, but no additional classification of the occupational data relating to urban area workers was made. No Table was prepared in 1941. For the first time in the Census history the educational standards of urban area workers are now presented in a Table under each category of workers. This Table will give an idea of the educational standard of the working force in urban areas. Important occupations which attract well qualified persons to the urban area can be found out from this Table.

TABLE B-VII

PARTS A & B

PART-A— Persons Working Principally

- (i) As Cultivators
- (ii) As Agricultural Labourers or
- (iii) At Household Industry

Classified By Sex and Secondary work

- (i) At Household Industry
- (ii) As Cultivator or
- (iii) As Agricultural Labourer

PART-B— Industrial Classification By Sex of Persons Working in Non-household Industry, Trade, Business, Profession or Service Who Are Also Engaged In Household Industry

FLY LEAF

This is prepared in two parts—Part-A and B. It presents the cross tabulated data of persons having primary work and subsidiary work. In both parts, information has been given for both rural and urban areas and for males and females separately. Part-A of the Table is a cross-tabulation in the case of persons whose principal and subsidiary work are any two of the following:

1. Cultivation
2. Agricultural labour
3. Household industry

The principal work relating to household industry alone has been classified by industrial Divisions and Major groups. In Part-B, data of persons who have primary occupation in non-household industry, trade, business, profession or service, i.e. persons belonging to the workers category of III and V to IX who are also engaged in household industry have been presented. Both for the principal work and for the additional work of household industry, figures have been given for each industrial Division and for each Major group. The classification of industrial Division has been explained in detail in Fly leaf to Table B-IV.

A list of industrial classification containing information as to what each Division and Group denotes will also be found in the Appendix to Fly Leaf to Table B-IV. As already explained in the preliminary note to this series, the determining factor in deciding the primary work of a person is the time he spends on his work. It does not depend on the income derived from it. In earlier Censuses the chief occupation was decided on the basis of income. As agriculture is the mainstay of the Indian population, an additional Table dealing with secondary work was prepared in the past only to present data of occupation followed by the agricultural population. In 1881 and 1891 Imperial Table XII-C presented these data. In 1901 information relating to partially agriculturists working in each occupation was given in Table XV itself. In 1911, Table XV-B presented the subsidiary occupations of agriculturists only. In 1921 Imperial Table XIX presenting the subsidiary occupation of workers having non-agricultural occupation as principal work was prepared in addition to the Imperial Table XVIII which presented the subsidiary occupations of agriculturists only. In 1931, in Imperial Table X relating to occupations, females and males engaged in each occupation as subsidiary to other occupation were also included. No separate Table was prepared. In 1951, a new Table (Table B-II) presented the data relating to secondary means of livelihood cross-classifying the 8 livelihood classes. This Table of 1961 restricts itself to the cross-tabulation of data relating to persons having secondary work in two important sectors of economy, viz. household industry and agriculture, either as cultivator or as agricultural labourer. B-VII—Part-A will show the extent to which cultivation is supplemented by household industry and vice versa.

B-VII—PART-A—Persons working principally (i) as Cultivators (ii) as Agricultural Labourers or (iii) at Household Industry classified by Sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer

Note: Major groups of Household Industry were persons having secondary work as Cultivator or Agricultural labourer are less than 5% of the persons of the Major group as principal work have been shown in this table. Divisions thus affected are marked with an asterisk. (*)

TABLE B-VIII

PARTS A & B

PART-A—

Persons Unemployed Aged 15 and Above classified by Sex, Broad
Age-Groups and Educational Levels in Urban Areas Only

PART-B—

Persons Unemployed Aged 15 and Above Classified by Sex and
Educational Levels in Rural Areas Only

FLY LEAF

This Table relates only to unemployed persons in the category of non-workers. This is a new Table. The division of population into broad categories of workers and non-workers has been adopted for the first time in 1961 Census. This Table has been prepared in two parts—Part-A dealing with urban areas and Part-B with the rural areas. Part-A is more detailed than Part-B. In both parts, data relating to unemployed persons aged 15 and above have been presented for males and females separately classified by educational levels. In Part-A it is further classified by age-groups. Educational levels adopted in Part-A are the same as those adopted in Table B-III—Part-A and those adopted in Part B of this Table are the same as those adopted in Table B-III—Part-B. Thus in Part-A literates have been classified into 7 major educational groups and in Part-B into 3 major educational groups (Refer Fly leaf to Table B-III).

As stated in the Fly leaf to Table B-1 the non-workers are divided into 8 groups. The data relating to two groups, viz. persons who were never employed before but are seeking employment for the first time and persons employed before but now out of employment and seeking employment, have been furnished separately in Part-A for urban sector and totally in Part-B dealing with rural areas. In Part-A these data have been furnished for broad age-groups also, in addition to classification by educational standards. In the case of persons once employed who are now unemployed and seeking jobs, data have been presented for smaller divisions of age-groups beyond 35 also. Six groups have been presented—15—19, 20—24, 25—34, 35—44, 45—59 and 60+. In the case of persons seeking employment for the first time, the data have been furnished only for five age groups—15—19, 20—24, 25—29, 30—34 and 35+. Part-A of this Table will throw light on the educated unemployed in different age-groups in urban area. Part-B will throw light on educated unemployed in all the age-groups as a whole in the rural areas.

TABLE B-IX

Persons Not at Work Classified by Sex, Broad Age-groups
and Type of Activity

FLY LEAF

This Table presents data on Non-workers classified by the nature of their activity. Particulars have been furnished for males and females and for total, rural and urban areas separately. They have been tabulated under different age-groups. The age-groups adopted are the same as in Table B-I, B-II and B-VI viz., 0-14, 15-34, 35-59, and 60+. Data relating to persons who have not given their ages have also been furnished under a separate column 'age not stated'. No attempt has been made in any previous Census to classify non-earning dependents who have been brought under the category of non-workers in this Census.

Non-workers are those persons who are not workers as defined in Fly leaf to Table B-I. They have been classified into 8 groups according to the type of their activity or rather inactivity. Persons belonging to these groups are inactive only in the limited sense that they are not engaged in any productive work, which Census definition has classified as work.

The first group consists of Full time students provided they are not engaged in any household industry or do not help the family members in any productive work. It will be seen from the Table that even in the age-group of 35-59, figures have been recorded in all the districts under Full time students, both in rural areas and in urban areas. This tendency is more pronounced in urban than in rural. 682 persons-505 males and 177 females have been recorded under Full time students in the age-group 35-59. In the rural areas, 124 persons-75 males and 49 females fall under this category, while in the urban 558 persons-430 males and 128 females fall under this category. Figures of Full time students in the age-group of 35-59 recorded for each district are given below :

Most of them may be persons who are under-going Secondary Grade Teachers' training. No age restriction is imposed for this course. Many untrained teachers join this course after getting experience as teachers. Every district has a Secondary Grade Teachers training school. Again, there may be Research Scholars in this age-group doing full time research work who have been recorded as Full time students. The highest figures are recorded in the urban areas of Tirunelveli and North Arcot Districts and in Madras. In Madras and in Vellore of North Arcot District, many medicalmen and social workers are engaged in research or post-graduate studies and they come within the age-group 35-59.

The second group of non-workers recorded under Household duties in the Table includes persons engaged in unpaid household work and housewives and adult women who do no other work such as making articles at home for sale or wages or who do not even help in family cultivation, household industry, trade or business. Presently 42,646 males have been recorded in all age-groups put together under this category. The figures recorded in rural areas are more than three times than those recorded in urban areas. Whereas in the rural area the number of males recorded under this category falling in the age group 0—14 accounts for 63.7% of the total number of persons, in the urban areas the figures recorded are almost equal in all the age-groups.

In three districts, both in rural and urban areas males are recorded under this group. In 5 districts only in urban areas and in three districts only in rural areas, males are recorded under this group. The number of males recorded under Household duties in the various districts in rural and urban areas separately are given below in the descending order of the number recorded.

District	Rural	District	Urban
Coimbatore	11,566	Thanjavur	1,867

It is probable that in rural areas children who neither attend school nor assist their parents in field work and remain at home and attend to household duties like, getting water from the well, getting things from the shop and doing such duties as are prescribed by their parents might have been reported by the Enumerators as 'HW' which was the abbreviation authorised to be used for persons engaged in household duties. Even older persons who do some odd job or other for the family like going to market or to workspot for taking lunch to the members of their household might have been returned as doing household duties. Again, both in rural and urban areas persons engaged as servants in the landlord's or employer's house, i.e. domestic servants, describe their work as 'veetu velai'. It seems probable that some of the Enumerators might have included all persons answering in the above manner under this category. In the definition of Household duties no specific mention has been made about the sex of the individuals. It has also been stated that any person engaged in unpaid household work will come under the group 'HW'. By a strict application of this definition, even males have been brought under this classification.

The third group of non-workers are the Dependants, infants and disabled which was denoted by the abbreviation 'D'. Any dependent who has to depend on others for his food, clothing and shelter including infant or a child not attending school, any person permanently disabled from work because of illness, accident or old age is included in this group. This does not include the unemployed persons who are in search of employment.

Retired persons who are not employed; persons living on agricultural or non-agricultural royalty; rent, or dividend receivers, persons of independent means who do not have to work and who do no other work come under the fourth group of non-workers titled as 'Retired, rentier or independent means' denoted by the abbreviation 'R'. Beggars, vagrants or independent women who do not give any definite source of income and others who have unmentioned sources of income constitute the fifth group of non-workers, viz., Beggars, vagrants etc. They were denoted by the abbreviation 'B' in the individual slip.

Convicts in jail who are undergoing sentence and inmates of penal institution like the Boston school, mental institution like the mental hospital or charitable institution like poor home will fall under the sixth group 'Inmates of institutions'. Enumerators used the abbreviation 'I' in the case of persons falling under this group. An under-trial prisoner who is in jail and who is awaiting trial will not come under this group if he did any work before he was arrested. Such a person will be treated as a worker. If, however, the under-trial prisoner is a non-worker, he will be entered in that particular group and not under the group of Inmates of institutions.

Unemployed persons who are in search of employment have been divided into two groups—persons seeking employment for the first time and persons once employed and now unemployed but seeking work. They constitute the other two groups of non-workers as already stated in Fly leaf to Table B-VIII. In the group of persons seeking employment for the first time, the persons who have not worked anywhere and who are now in search of employment have been included. The other group consists of persons who were employed previously but were at the time of Census enumeration unemployed and are in search of employment.
