It is not necessary to mention again the persons to whom I am grateful for their cooperation in the preparation of these Tables. Acknowledgement needs, however, to be made to Shri N. Das Gupta who took over from Shri Ganga Ram as the Manager of the Government of India Press, Nilokheri, when the book was being composed. Its neat and expeditious printing is in no small way due to the personal interest he took in this job.

TABLE B-V

## OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table has been prepared for the first time in the history of census, when a clear-cut distinction has been made between 'industry' and 'occupation', using the former term for the type of economic activity and the latter for the function or exact work performed by a person in any branch of economic activity.

The Table shows the occupational classification of workers other than those engaged in cultivation (as cultivators or cultivating owners, tenants and agricultural labourers) cross-tabulated by sex and broad industrial categories listed below.

- (i) Cultivator ;
- (ii) Agricultural Labourer ;
- (iii) Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities ;
- (iv) Household Industry ;
- (v) Manufacturing other than Household Industry ;
- (vi) Construction ;
- (vii) Trade & Commerce ;
- (viii) Transport, Storage and Communications ; and
- (ix) Other Services.

Occupational classification is according to the "National Classification of Occupations" : this system is based on the "International Standard Classification of Occupations" modified to suit Indian conditions. The list on pages 4 to 11 shows 11 Occupational Divisions, 75 Groups and 331 Families under which the workers have been distributed. Since persons engaged in agriculture have been excluded from this

Table, no entries have been made against Occupational Families 400—Cultivators (Owners), 401—Cultivators (Tenants) and 414—Agricultural Labourers. Nor have any entries been made against Occupational Group X0 and its Families because they relate to non-workers.

The figures for workers are presented according to total and urban areas for the State, each Administrative Division and each District. The figures for rural areas would be the difference between the figures for the total and the urban areas.

Some occupations may appear improbable for rural areas. The explanation for such entries is that the census was taken with reference to the place of residence and not to the place of work. Some workers in towns reside in the surrounding villages. Besides, some workers recorded in villages were those who had come home on leave.

Some differences will also be found in the number of technical personnel such as, engineers and doctors, appearing in this Table and those shown in Table B-III appearing in Part II-B(i). This is due to the presence of some unqualified persons in such professions.

Occupational Families having less than one per cent of the total workers of the respective Division (and less than 0.5 per cent in the case of Families of Division 7-8) have not been shown in the body of the Table but are given in the Appendix appearing after it. Divisions thus affected are marked in the Table with an asterisk (\*).

This Table deals with literate workers engaged in various occupations except cultivation, distributing them according to sex, broad age groups and educational levels. This information is given collectively for all urban areas in each District and for the ten Occupational Divisions under the National Classification of Occupations on pages 4 to 11. For ready reference these Divisions are listed below.

Illiterate persons have not been shown separately, but can be found by deducting the figures of literates from those of total workers. Age distribution of total workers was not compiled for each Occupational Division separately.

Literacy was defined as ability to read and write a simple letter. Such a person as could both read and write had in addition passed one or more examinations, the person has been shown under the highest examination passed. The various examinations grouped under each Educational Level have been listed at pages 110-111 of the Part II-B (i).

The Table gives a broad indication of the occupations which attract educated personnel.

**PART A:** PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY, CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Here the number has been given of such persons who were primarily engaged in cultivation (cultivating owners and tenants) but also followed as secondary work agricultural labour or some household industry. The test of primary work is that it consumes most of the working time and not necessarily the income earned therefrom. In case a person did two types of additional work, he was shown only in the activity which absorbed a major portion of his time next to the primary work.

Similarly the number is given of such persons whose principal work was agricultural labour or household industry, but had as their subsidiary work either of the two remaining activities.

Persons whose principal work is cultivation, agricultural labour or household industry very rarely take to a subsidiary work outside this group of activities, and they have been ignored in this Table. Even within this group subsidiary work is taken up to a very limited extent. If the primary work is big enough to absorb full time, and provides a living wage, it is followed exclusively as the following figures show.

| Principal Work                  |                      | Subsidiary Work  |                 |                          |                |                       |                  |

Among household industries, it is only the wool-weavers in hill areas who reported themselves to be supplementing their earnings by cultivation in substantial numbers. It is, however, felt that the particulars about secondary occupations were not fully recorded at the time of enumeration, because the poorer sections supplement their earnings by diverse means to a larger extent than the above figures bring out.

**A Household Industry** is defined as an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas, and only at home in urban areas.

The major groups of household industry shown by code numbers in column 1 are explained in the Annexure† to this note. Such major groups where persons having secondary work as cultivation or agricultural labourer are less than 5 per cent of persons having the major group as the principal work have been shown not in the body of the Table, but in the Appendix to this Table. The Divisions thus affected have been marked with asterisks (\*) in the Table.

**PART B:** INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION, OR SERVICE, WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This part presents information similar to what has been given in Part A, except that the principal work comprises of categories other than cultivation, agricultural labour and household industry, and the secondary work ranges within the field of household industry.

The Divisions and Major Groups, indicated by code numbers in col. 1 are explained in the Annexure† to this note. The term household industry has been defined earlier while explaining Part A.

The Table has been arranged according to the principal work in each Division and Major Group. After showing the total number of workers in that Division or Major Group, details are given of persons engaged in different types of household industries as

secondary work. Major Groups with nil entries have been omitted.

The Table is in three sets, dealing with (i) all areas, (ii) rural areas, and (iii) urban areas.

It will be noticed from the figures given in the opposite column that if the practice of pursuing secondary work is uncommon in the case of persons whose principal work is cultivation or household industry, it is rarer among persons following other activities. This is because the latter activities generally provide full-day work, and except in Division 0, are not influenced to a marked extent by seasonal variations, inducing people to take to secondary work during lean periods.
