PREFACE

This volume, actually a part of the General Report on 1961 Census, presents all the subsidiary tables except those relating to housing and establishments. In previous censuses, these tables formed part of the volume containing the main census report. Such a course was clearly impracticable this time for the simple reason that the 1961 Census embarked upon a hitherto unprecedented scale of tabulation and presentation of data whose magnitude was determined, and justified, largely by the growing needs of all round economic planning and diverse activities of a Welfare State.

The chief object of a subsidiary table lies in its giving proportionate figures for the main table which only presents absolute figures for various administrative units. Thus, a subsidiary table is a kind of summary table which shows, at a glance, the salient features of the main table—not always easy to comprehend in totality because of the sheer bulk of individual figures—and, in doing so, highlights its chief characteristics. The usefulness of subsidiary tables in providing the gist and substance of the main census results is, therefore, great. This consideration, coupled with the necessity of bringing out a separate volume for subsidiary tables in any case, has led to the presentation of this book earlier than the main report.

The Introductory Note that follows, gives an outline of the lay out of tables and also acquaints the readers with some of the terms and concepts used in them. It is supplemented further by explanatory notes at the beginning of each series of subsidiary tables. If further elucidation or clarification becomes necessary, reference may be made to the volumes containing the main tables.

The preparation of these tables has no doubt involved much hard work, great skill and infinite patience, both at the State Census Office and the Office of the Registrar General of India which was entrusted with the task of their checking and scrutiny. So far as the State Office is concerned, an acknowledgement appears on the reverse. It needs only to be added here that Prof. Jagdish Sharan of the Statistics Department, Patna University with a selected batch of eleven Post-Graduate students working under him, very kindly undertook and successfully completed the compilation of 11 out of 13 subsidiary tables to Household Economic Tables by foregoing their summer vacation in 1964. But for this timely help and co-operation, which incidentally had the advantage of enabling us the use of a large number of calculating machines belonging to the Patna University (for which Prof. D. Mishra, Head of the Department of Statistics is to be thanked), these tables would have been considerably delayed. In the Office of the Registrar General, I am greatly indebted to Shri K. D. Ballal, I.A.S., Central Tabulation Officer and his staff for a very careful and thorough checking of most tables, and to Shri S. C. Sharma, Mechanical Tabulation Officer and Shri B. R. Kalra, Research Officer for similar work in respect of some tables. Lastly, but far from the least, my thanks are due also to Shri S. N. Chatterjee, Superintendent, Secretariat Press, Bihar and his staff for the care and interest taken in the printing of this volume.

INTRODUCTORY NOTE

In previous censuses, subsidiary tables showing proportional figures were printed in the volume containing the General Report. In this Census, however, because of their large number and size, they are being presented in an independent volume. The main tables, containing absolute figures relating to the 1961 Census have been published in various parts of the Census of India, 1961 Publications relating to Bihar (Vol. IV) as indicated below:

General description	Tables	Part
1. General Population Tables	A-Series	Part II-A
2. General Economic Tables	B-Series (B-I—B-IX)	Parts II-B(i) and II-B(ii)
3. Social and Cultural Tables	C-Series	Part II-C
4. Migration Tables	D-Series	Part II-D
5. Household Economic Tables	B-Series (B-X—B-XVII)	Parts III(i) and III(ii)
6. Housing and Establishment Tables	E-Series	Part IV-B
7. Special Tables for Scheduled Castes and Scheduled Tribes	SCT, SC & ST-Series	Part V-A

This volume contains, in all, 77 subsidiary tables on A, B, C and D-Series Tables. The subsidiary tables on Housing and Establishment Tables (E-Series) have been printed separately in Part IV-A containing the General Report on Housing and Establishments. No subsidiary table has been prepared from the SCT, SC and ST-Series Tables.

The Household Economic Tables printed in Part III and Table C-I in Part II-C have been prepared on 20 per cent sample of households. The other main tables have been prepared on full count.

Scheme of Presentation

The subsidiary tables relating to each series have been presented separately. Brief notes explaining the main features, sources of materials, presentation and lay out of the tables as well as the methods used in working out the figures have been provided in the beginning of each series.

Speaking generally, the subsidiary tables on A, B and C-Series have been presented for the State, its four administrative divisions and seventeen districts while those on D-Series for the State and seventeen districts only. Some of the subsidiary tables relate to urban areas or cities only.

The 1961 Census

The Census of 1961 was conducted by non-synchronous method between the 10th and 28th February, 1961. During this period an enumerator visited each household in the area allotted to him and canvassed a Household Schedule for the household and an Individual Slip for each member of the household. The enumerator revisited the household between the 1st and 5th March, 1961 for incorporating changes, if any, between his last visit and the reference period, viz., sunrise of 1st March, 1961 due to deaths and births during the intervening period. The figures presented in this table, therefore, relate to sunrise of 1st March, 1961. No changes in the revisional round were, however, made on account of changes in a person's economic activity during the intervening period. The Household Schedule, the Census Population Record (on the reverse of the Household Schedule) and the Individual Slip are reproduced in Annexure I to this Note.

Rural and Urban Classification

According to the 1961 Census, all places having a municipality, notified area, cantonment or civil lines were *ipso facto* treated as towns. Other places were also included in the urban list if they had (a) a population of not less than 5,000, (b) density not less than 1,000 persons per square mile, and (c) at least three-fourth of the adult male population engaged in non-agricultural livelihood. Exceptions were made in a few cases because of their historical, tourist or administrative importance. A complete list of towns of 1961 will be found in Table A-IV printed in Part II-A of the 1961 Census Publications relating to Bihar. Places which were not urban have been treated as rural.

Workers and Non-workers

In the past censuses, economic data used to be collected according to what is generally known as the 'dependency approach'. The main basis of economic classification was 'income'. This mode of classification was not found to be satisfactory for several reasons. For example, a large number of women who help in cultivation, household industry or such other work as family workers were liable to be placed in the category of dependents or 'economically inactive' section of the population, for the simple reason that they had no separate income of their own. On the other hand, persons like pensioners, beggars, agricultural or non-agricultural royalty, rent or dividend receivers who earned an income but did not participate in any kind of productive activity were classed as 'self-supporting' or 'economically active'. In 1961, it was felt that a 'strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income, like men other than the Head of the household and women of the family or children working at cultivation or cottage industries of the household'. The basis of determining economic characteristics, therefore, underwent a basic change at the 1961 Census. The concept of dependency or income was replaced by one of work.

The economic classification of 1961 envisages a broad division of the entire population into two categories, Workers and Non-workers. The working population consists of those engaged in production of economic goods or rendering of services either for consumption or sale or exchange. Work includes not only actual work but also effective supervision and direction of work. Persons engaged in seasonal work like cultivation, livestock, dairying, household industry, etc., were deemed to be workers if they had regular work for more than an hour every day for the greater part of the working season. Persons engaged in trade, profession, business or service were treated as workers if they were employed during any of the 15 days just preceding the date of enumeration. A regularly employed person, if absent from work for 15 days or more prior to the date of enumeration, on account of illness or any other cause, was also treated as a worker. A person who had been offered work but had not actually joined, was treated as a non-worker. Apprentices were treated as workers whether or not in receipt of stipend or wages.

Industrial Categories of Workers

Workers have been classified into nine industrial categories depending on the sector of economic activity in which they were engaged. In the case of a person doing more than one kind of work, such classification was done on the basis of principal work determined by the one which consumed the greater part of his working time. The nine industrial categories are briefly described below :

Category I : Cultivator

Persons working in cultivation of land owned or held by them as tenants are included in this category. Thus, both owner and tenant-cultivators are included in this category. These engaged in active supervision or direction of their cultivation also figure as cultivators. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantation.

Category II : Agricultural labourer

Persons working in cultivation purely as labourers for wages in cash, kind or share in another person's land without having any rights on the land cultivated by them or the produce derived therefrom are classed as Agricultural labourers.

Category III : Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

Workers engaged in (i) mining and quarrying of coal, iron, gold and silver ores, manganese, mica, limestone, sand, clay, etc., (ii) production and rearing of livestock such as cows, buffaloes, goats, sheep, pigs and poultry, (iii) felling and cutting of trees, production of fuel, fodder, gums, resins and lac, (iv) fishing, (v) hunting, (vi) production of plantation crops like tea, coffee, rubber and tobacco, and (vii) production of fruits and nuts in orchards, come in this category.

Category IV : Working at Household Industry

Workers in this category are engaged in manufacture, processing, servicing or

repairing of goods but on a small scale. A Household Industry, by definition, must be conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. Hired labourers can also be engaged, but their role must be of secondary importance.

Category V : Working in Manufacturing other than Household Industry

Persons working in the production, manufacture, processing, repair or servicing of goods, except those on the scale of Household Industry, are included in this category.

Category VI : Working in Construction

Workers in construction and maintenance of buildings, roads, railways, bridges, tunnels, telegraph and telephone lines, waterways, bunds, embankments, dams, canals, tanks, tube-wells and wells, etc., belong to this category.

Category VII : Working in Trade and Commerce

Persons working in wholesale or retail trade in any kind of goods and in commercial transactions relating to import and export, real estate and properties, stocks and shares, money-lending, banking and auctioneering, etc., come in this category.

Category VIII : Working in Transport, Storage and Communications

Persons working in transportation by rail, road, air, or water, and in services incidental to transport, such as packing, carting and running a travel agency; in storage and warehousing such as in warehouses and cold storages; and in postal, telegraph, wireless, signal and telephone communications come within this category.

Category IX : Working in Other Services

This category includes workers in the following services :

- (i) Electricity, Gas, Water Supply and Sanitary Services ;

- (ii) Public Services under Central, State, Quasi-Government and Municipal institutions ;
- (iii) Educational and Scientific Services ;
- (iv) Medical and Health Services ;
- (v) Religious and Welfare Services ;
- (vi) Legal Services ;
- (vii) Business Services ;
- (viii) Community Services ;
- (ix) Recreation Services ; and
- (x) Personal Services.

Non-Workers

Category X relates to non-workers. They have been classified into eight categories detailed in the Explanatory Note to Subsidiary Table B-IX.3.

Industrial Classification

Over and above the classification of workers into nine broad industrial categories described earlier, workers other than cultivators and agricultural labourers have also been classified by Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification vide Subsidiary Tables B-IV.9, B-XIV.1, B-XIVB.1, B-XVI.1, B-XVI.2 and B-XVI.3. A complete list of Divisions, Major Groups and Minor Groups of the I. S. I. C. together with their description is given in Annexure II to this Note.

Correspondence between Industrial Categories of Workers and Divisions of I. S. I. C.

The industrial categories of workers of this Census correspond to the Divisions of the Indian Standard Industrial Classification in the following manner :

Census Industrial Category	Divisions of the I. S. I. C.
I and II	Minor Groups 000 to 004 and part of 005 of Industrial Division 0.
III	Industrial Divisions 0 (excluding Minor Groups 000 to 004 and part of 005) and 1, in case the industry is not household industry.

industry, steel industry, cement industry, etc. while occupation describes the exact function that an individual performs in that sector, e.g., fitter, carpenter, accounts clerk, office peon, etc. Thus, occupation is related to the nature of function performed while industry is related to the kind of product(s) manufactured or service(s) performed. A doctor, accounts clerk or an unskilled labourer may be working in a sugar mill. The industrial classification of such persons, viz., doctor, accounts clerk or unskilled labourer will relate to production of sugar while for occupational classification they will be classified differently according to the actual function performed by them.

Occupational Classification

For further elucidation of concepts and definitions used in the subsidiary tables, reference may be made to explanatory notes preceding the tables.

A-SERIES

SUBSIDIARY TABLES ON
GENERAL POPULATION TABLES

EXPLANATORY NOTE

The A-Series main tables, also known as 'General Population Tables', have been published in Part II-A of the 1961 Census Publications relating to this State. There are, in all nine subsidiary tables prepared from the A-Series tables—five from Table A-I, one each from Tables A-II and A-III, and two from Table A-IV.

A-I.1—Area and population (actual and percentage) by anchal density

This subsidiary table shows the area and population (actual and percentage) of the State, its four administrative divisions and seventeen districts in different ranges of anchal density. The anchals have been classified into 8 density ranges, viz., under 100, 100—150, 150—200, 200—300, 300—450, 450—600, 600—750 and 750 and over. The five cities of 1951, viz., Patna, Gaya, Bhagalpur, Ranchi (including Doranda) and Jamshedpur (including Jugsalai) have been treated as separate units lying outside the jurisdiction of any anchal and the figures relating to them have been taken into account separately in this table.

The area and population figures respectively of the anchals/cities falling in a particular density range have been added to arrive at the area and population figures of the districts, administrative divisions or State in that density range. The area, density and population figures have been taken from columns 3(a), 4 and 9 respectively of the State Table A-I. In the State Table A-I the areas of anchals have been worked out by adding up the areas of constituent villages as given in the Thana Jurisdiction List, while the areas of districts and higher units have been supplied by the State Survey Office. The area figures in columns 2, 4, 6, 8, 10, 12, 14 and 16 of this subsidiary table will not, therefore, add up to the areas of the respective units as shown in Table A-I.

Two sets of figures have been printed in this table. The figures against 'A' represent the actual area and population figures, while those in the second line against 'P' show the percentages to total area and total population figures in respect of each unit.

This subsidiary table corresponds to Table 1.1 of 1951 in which figures have been presented by revenue thana densities.

A-I.2—Distribution of 1,000 occupied residential houses and 10,000 persons by rural and urban and comparison with 1951 and 1941 Censuses

This subsidiary table shows the distribution of 1,000 occupied residential houses and 10,000 population by rural and urban areas with corresponding figures for 1951 and 1941 Censuses. Figures have been presented for the State, its four administrative divisions and seventeen districts.

The sources of data relating to rural and urban occupied houses and number of persons are indicated below:

Census year	Occupied houses	Population
1961	Column 8 of Table A-I	Column 9 of Table A-I
1951	Columns 5, 6 and 7 of Table A-I.	Columns 8, 9 and 10 of Table A-I.
1941	Columns 5, 6 and 7 of Table I.	Columns 8, 9 and 10 of Table I.

Two sets of figures have been given in respect of 1951 and 1941 Censuses. The second set has been shown within brackets below the first set.

The rural and urban break-up of population of the district, according to the first set of figures, has been worked out by adjusting the urban population of the 1951 and 1941 Censuses according to the list of towns of the 1961 Census, in addition to the territorial changes. In other words, towns of the 1941 and 1951 Censuses, which were declassified in 1961, have not been treated as urban units in those Censuses ; at the same time, no addition has been made in the urban population of 1941 or 1951 for new places treated as towns in 1961. In 1941, Maudhaneshpur in Darbhanga district and Manoharpur in Singhbhum district were treated as towns but in 1961 they were dropped from the urban list. These two towns, therefore, have not been treated as urban units in 1941 while working out the first set of figures. Likewise, Rajauli in Gaya district,

Kesaria Bazar in Champaran district, Mow in Darbhanga district, Chas in Dhanbad district and Manoharpur in Singhbhum district were treated as towns in 1951 but were declassified in 1961. These five towns have also not been treated as urban in 1951 for working out the first set of figures. In the second set of figures, only the territorial changes in districts have been taken into account; that is to say, the urban population for each census has been arrived at by taking into account the list of towns for that census and no adjustment has been made except for territorial changes, if any.

The rural population has been obtained by deducting the urban population as worked out by either of the aforesaid two methods, from the total population relating to 1941 and 1951 Censuses as printed in Table A-II (vide Part II-A of 1961 of this State). The population figures in Table A-II, it may be noted, represent the population of the units adjusted according to the jurisdiction of 1961.

For the first set of figures relating to occupied houses, adjustment has been made on account of towns of 1941 and 1951 Censuses declassified in 1961, in addition to the adjustments on account of territorial changes. The figures of urban occupied houses on account of deletion of towns have been adjusted in the same proportion as their population. The figures of total houses of the respective censuses have also been adjusted according to the jurisdiction of 1961 in the same proportion as population. The number of occupied houses for rural areas for the first set of figures has been worked out by deducting the adjusted urban houses from the total adjusted occupied houses. For the second set of figures, no adjustment has been made for towns of 1941 or 1951 declassified in 1961.

A-I.3—Persons per 1,000 houses and houses
(i) per 100 square miles in rural areas and
(ii) per square mile in urban areas and comparison with past censuses

This subsidiary table shows persons per 1,000 houses in total, rural and urban areas, houses per 100 square miles in rural areas and houses per square mile in urban areas with comparable figures for Censuses 1921 to 1951. Figures have been presented for the State, its four administrative divisions and seventeen districts.

The sources of materials for this subsidiary table are indicated below:

Census year	Occupied houses	Population	Area
1961	Column 8 of Table A-I	Column 9 of Table A-I.	Column 3(a) of State Table A-I
1951	Columns 5, 6 and 7 of Table A-I.	Columns 8, 9 and 10 of Table A-I.	Appendix A.
1941	Columns 5, 6 and 7 of Table I.	Columns 8, 9 and 10 of Table I.	Not available
1931	Columns 5, 6 and 7 of Table I.	Columns 8, 9 and 10 of Table I.	Not available
1921	Columns 5, 6 and 7 of Table I.	Columns 8, 9 and 10 of Table I.	Not available

The break-up of figures of houses and population for total, rural and urban areas for censuses 1921 to 1951 has been worked out in the same manner as in Subsidiary Table A-I.2. In this subsidiary table also, two sets, of figures have been presented for censuses 1921 to 1951. The first set has taken into account the new definition of towns in the 1961 Census, in addition to territorial changes; while the second set below the first set has taken into account only the territorial changes in the district.

Comparable figures relating to houses per 100 square miles in rural areas and houses per square mile in urban areas have been given in respect of 1951 Census only, because rural and urban break-up of district areas is not available for censuses prior to 1951. Columns relating to these for the Censuses 1921, 1931 and 1941 have, therefore, been omitted.

The area figures of districts for the 1961 Censuses have been supplied by the State Survey office. Since the jurisdiction of districts for earlier Censuses has been adjusted according to the 1961 jurisdiction, the total area of a district for 1961 has been adopted for 1951 also.

Two sets of area figures have been given in respect of the 1951 Census. In the first set, the towns of 1951 declassified in 1961 have not been treated as urban units in 1951, while in the second set all the towns of 1951 have been treated as urban units. The urban area of the district for the 1951 Census has been worked out by adding the areas of towns as printed in Part II-A (Appendix A) of 1951. The rural area has been worked out by deducting the urban area from the total area.

For 1961 Census, the figures relating to occupied residential houses have been taken into account for this table. For earlier censuses, the figures of houses are according to the definitions adopted in those censuses.

This subsidiary table corresponds to Table 6.1 of the 1951 Census.

A-I.4—Females per 1,000 males total/rural/urban population and comparison with previous censuses

This subsidiary table shows females per 1,000 males in total, rural and urban areas of the State, its four administrative divisions and seventeen districts for censuses 1921 to 1951. Materials relating to this subsidiary table have been taken from the sources indicated below:

Census year	Population
1961	Columns 10 and 11 of Table A-I
1951	Columns 11 to 16 of Table A-I
1941	Columns 11 to 16 of Table I
1931	Columns 11 to 16 of Table I
1921	Columns 11 to 16 of Table I

For rural and urban populations two sets of figures have been presented for censuses 1921 to 1951. The rural and urban break-up according to the first set of figures takes into account the new definition of towns in 1961, in addition to the territorial changes in a district, while the second set below the first set takes into account only the territorial changes as in Subsidiary Table A-I.2.

This subsidiary table corresponds to Table 6.4 of 1951.

A-I.5—Variation and density

This subsidiary table shows the percentage variation in population during each decade since 1921, and the density of population (persons per square mile) for 1951 and 1961 Censuses, separately for total, rural and urban areas. Figures have been presented for the State, its four administrative divisions and seventeen districts.

Materials for this subsidiary table have been obtained from the sources noted below:

Census year	Population	Area
1961	Column 9 of Table A-I	Column 3(a) of State Table A-I.
1951	Columns 8, 9 and 10 of Table A-I.	Appendix A
1941	Columns 8, 9 and 10 of Table I.	Not available
1931	Columns 8, 9 and 10 of Table I.	Not available
1921	Columns 8, 9 and 10 of Table I.	Not available

Two sets of figures have been presented against rural and urban areas under columns 2 to 5 relating to percentage increase/decrease in population. Two sets of figures have also been presented under column 7 relating to density of 1951 in respect of rural and urban areas of each unit. The first set of figures has been prepared by taking into account 1961 list of towns over and above territorial changes in a district, while the second set within brackets has been worked out by taking into account the territorial changes only. The total, rural and urban break-up of the population figures for censuses 1921—1951 and the rural and urban break-up of area figures for 1951 Census have been worked out in the same manner as in Subsidiary Tables A-I.2 and A-I.3.

Plus (+) sign has been given before the percentage variation when the population of any census is higher than that of the preceding census, and minus(—) sign when reverse is the case.

This subsidiary table corresponds to Tables 1.2 (for total areas), 2.2 (for rural areas) and 3.2 (for urban areas) of 1951.

A-II.1—Mean decennial growth rates during four decades total/rural/urban

This subsidiary table shows mean decennial growth rates during the last four decades, viz., 1921—30, 1931—40, 1941—50 and 1951—60. Separate tables have been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts.

Columns 2—5 of the table represent the geometric mean population of the decade. The figures have been calculated by the method indicated below:

If a_1 represents the population enumerated in one census and a_2 in another census after 'n' years, Mean population over 'n' years:

$$\frac{(r-1) a_1}{\log_e r} \text{ where } r = \frac{a_2}{a_1}$$

a_1 and a_2 have been taken from Table A-II published in Part II-A of 1961 of this State.

Cols. 6—9 represent geometric mean population of the decade in respect of the area under registration of births and deaths. The method of calculation is the same as that of cols. 2—5.

Prior to 1948 there was no registration of births and deaths in Seraikela and Kharsawan States which now form part of the Singhbhum district. Figures in columns 7—9 will not, therefore, agree with those in columns 3—5 in respect of Singhbhum district, Chotanagpur division and Bihar State.

The figures of columns 10—13 for the total part of the table have been taken from Table A-II. In the urban part, the urban population of only those areas which were recognised as towns or urban units for purposes of registration have been taken into account. In the rural part, the rural population has been worked out by deducting the urban population as mentioned above from the total population as printed in Table A-II.

Figures for columns 14—17 have been worked out by the method indicated below :

$$\text{Column 14} = \frac{\text{Column 10}}{\text{Column 2}} \times 100$$

$$\text{Column 15} = \frac{\text{Column 11}}{\text{Column 3}} \times 100$$

$$\text{Column 16} = \frac{\text{Column 12}}{\text{Column 4}} \times 100$$

$$\text{Column 17} = \frac{\text{Column 13}}{\text{Column 5}} \times 100$$

Figures in columns 18—21 and 26—29 have been obtained from the Directorate of Statistics, Bihar, Patna and have been adjusted according to the jurisdiction of 1961.

Figures in columns 22—25 and 30—41 have been worked out in the following manner :

$$\text{Column 22} = \frac{\text{Column 18}}{\text{Column 6}} \times 100$$

$$\text{Column 23} = \frac{\text{Column 19}}{\text{Column 7}} \times 100$$

$$\text{Column 24} = \frac{\text{Column 20}}{\text{Column 8}} \times 100$$

$$\text{Column 25} = \frac{\text{Column 21}}{\text{Column 9}} \times 100$$

$$\text{Column 30} = \frac{\text{Column 26}}{\text{Column 6}} \times 100$$

$$\text{Column 31} = \frac{\text{Column 27}}{\text{Column 7}} \times 100$$

$$\text{Column 32} = \frac{\text{Column 28}}{\text{Column 8}} \times 100$$

$$\text{Column 33} = \frac{\text{Column 29}}{\text{Column 9}} \times 100$$

$$\begin{aligned} \text{Column 34} &= \text{Column 22} - \text{Column 30} \\ \text{Column 35} &= \text{Column 23} - \text{Column 31} \\ \text{Column 36} &= \text{Column 24} - \text{Column 32} \\ \text{Column 37} &= \text{Column 25} - \text{Column 33} \\ \text{Column 38} &= \text{Column 14} - \text{Column 34} \\ \text{Column 39} &= \text{Column 15} - \text{Column 35} \\ \text{Column 40} &= \text{Column 16} - \text{Column 36} \\ \text{Column 41} &= \text{Column 17} - \text{Column 37} \end{aligned}$$

A-III.1—Distribution of rural population between villages of different sizes

This subsidiary table shows the average population per village (column 2), rural population per 1,000 of total population (column 3), and distribution of 1,000 rural population in villages by size classes of population (columns 4 to 9). Figures have been presented for the State its four administrative divisions and seventeen districts.

The source of figures in columns 2 and 4 to 9 is Table A-III, and that for column 3 is column 9 of Table A-I. The size classes in this subsidiary table are similar to those in Table A-III with the only difference that in Table A-III, size class '5,000 and above' has been split up into two groups, namely, 5,000—9,999 and 10,000 and above.

This subsidiary table corresponds to Table 2.1 of 1951.

A-IV.1—Distribution of urban population between cities/town groups/towns

This subsidiary table shows (i) the number of cities, town-groups and towns, (ii) average population per city, town-group and town, (iii) proportion per 1,000 of total population in city, town-group and town, and (iv) distribution of 1,000 urban population in cities,

town-groups and towns in six size classes of population. The six size classes correspond to the population ranges of the six classes of towns as given below:

Class I—Those with a population of one lakh and above;

Class II—Those with a population of 50,000 to 99,999;

Class III—Those with a population of 20,000 to 49,999;

Class IV—Those with a population of 10,000 to 19,999;

Class V—Those with a population of 5,000 to 9,999; and

Class VI—Those with a population of less than 5,000.

Figures have been presented for the State, its four administrative divisions and seventeen districts.

Jamshedpur city and Ranchi city are both independent cities as well as constituents of Jamshedpur town-group and Ranchi town-group respectively. The figures relating to Jamshedpur city and Ranchi city have, therefore, been duplicated both against city and town-group.

This subsidiary table corresponds to Table 3.1 of 1951.

A-IV.2—Number of females per 1,000 males and density for each city/town-group/town

This subsidiary table shows the sex-ratio (females per 1,000 males) and density (population per square mile) for each city, town-group and town for 1951 and 1961 Censuses. Figures have been shown for constituents of town-groups also.

Out of 153 towns, 48 were treated as towns for the first time in 1961 and have been printed in *italics*. One more town, Doranda, in Ranchi district, has also, been printed in *italics* for the purely technical reason that it is being treated as an independent urban unit for the first time in this census. The sex-ratio and density figures relating to these 49 towns for the 1951 Census have not been shown because they have been treated as towns for the first time in this census. These figures for Dinapur cantonment and Jugsalai have also not been printed for 1951 Census, because they were not treated as independent urban units in that Census.

Towns treated as such for the first time in 1951 which continue to be towns in 1961 Census bear an asterisk mark (*) to their left. Phulwaria town of 1951 has merged with Barauni town of 1961, and so the 1951 figures of Barauni town and Barauni railway colony relate to Phulwaria town of 1951.

The sources of materials for this table are columns 5, 7, 10 and 11 of Table A-IV of 1961.

- NOTES: (1) Towns treated as such for the first time in 1961 are printed in italics.
- (2) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.
- (3) No figures have been shown in columns 4 and 6 relating to Jugsalai and Dinapur Cantonment, because Jugsalai was treated as a part of Jamshedpur town and Dinapur Cantonment as part of Dinapur town in 1951 Census.
- (4) Phulwaria town of 1951 has been merged with Barauni town and so the 1951 figures against the town Barauni and Barauni Railway Colony relate to Phulwaria town of 1951.
- (5) Includes Dinapur Cantonment which was a part of Dinapur Nizamat in 1951.

Total	33

Two of the above 33 tables, viz., Tables B-I.6 and B-II.3 have been prepared in the office of the Registrar General, India.

In all the tables, figures have been rounded off to the nearest integers. Some salient features of each subsidiary table are described below :

Table B-I.1—Distribution of 1,000 persons by each industrial category of worker and by non-worker and by sex

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons, males and females respectively amongst the nine industrial categories of workers and non-workers.

In this Census, the population has been divided into two broad categories, viz., workers and non-workers. The workers have been further classified into the following nine industrial cate-

gories according to the sector of economic activity in which they are engaged :

I	Working as Cultivator.
II	Working as Agricultural labourer.
III	Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
IV	Working at Household Industry.
V	Working in Manufacturing other than Household Industry.
VI	Working in Construction.
VII	Working in Trade and Commerce.
VIII	Working in Transport, Storage and Communications.
IX	Working in Other Services.

The concepts of workers and non-workers have been explained in the Introductory Note.

Source of materials for this table is Table B-I of 1961.

B-I.2—Number of female workers per 1,000 male workers in each industrial category

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the sex ratio (female workers per 1,000 male workers) among total workers and workers in each of the industrial categories I to IX

Source of materials for this table is Table B-I of 1961.

B-I.3—Distribution of 1,000 of total workers of each sex into age groups and industrial category

This table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 working persons, males and females separately by broad age groups and nine industrial categories of workers. The broad age groups are, 0—14, 15—34, 35—59 and 60+ corresponding to different stages of life, viz., children, young persons, middle-aged persons and elderly persons. Figures relating to those whose age was not recorded, are given in the last line against 'age not stated' in each administrative unit.

The distribution into nine categories of workers has been shown by horizontal spread, while

the break up age groupwise has been shown by vertical spread.

Materials for this table have been obtained from Table B-I of 1961.

B-I.4—Distribution of 1,000 workers in each sex and each industrial category by age group

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 working persons, males and females separately in each industrial category as well as all categories taken together by broad age groups. The age groups are : 0—14, 15—34, 35—59 and 60+. Column 'age not stated' relates to those whose age was not recorded.

Materials for this table have been obtained from Table B-I of 1961.

B-I.5—Workers per 1,000 population in each age group

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the number of working persons, males and females respectively per 1,000 of total population in the broad age groups 0—14, 15—34, 35—59 and 60+. Column 'age not stated' relates to those whose age was not recorded.

The source of materials for this table is Table B-I of 1961.

B-I.6—Workers per 1,000 population in each of the Censuses 1901 to 1961.

This subsidiary table has been presented for total area of the State, its four administrative divisions and seventeen districts. It shows the proportion of workers per 1,000 persons, males and females for each Census from 1901 to 1961, except 1941 for which such figures are not available. The sources from which the data have been worked out are indicated below :—

3 Cen—4

The figures of workers for 1951 and earlier censuses have been recast according to the definition of worker in 1961. The method used for the recasting of figures for previous censuses is the same as explained in Sri B. R. Kalra's 'A note on working force estimates, 1901—61*'. The figures of earlier censuses have also been adjusted according to the jurisdiction of 1961 Census.

B-II.1—Distribution of 1,000 workers in each class of town by age, sex and industrial categories

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It shows, for each class of town, the distribution of 1,000 working persons, males and females in each of the broad age groups 0—14, 15—34, 35—59 and 60+ among the nine industrial categories of workers. Similar distribution of 1,000 persons, males and females at work whose age was not recorded, has been shown in the last line in each administrative unit.

In this table the towns have been classified according to their respective population unlike Table A-IV, where the constituents of town-group have been classified according to total population of town-group and not by the population of the individual town.

All the towns have been classified into the following six size classes according to their population.

Class I ..	Population one lakh and above.
Class II ..	Population between 50,000 and 99,999
Class III ..	Population between 20,000 and 49,999
Class IV ..	Population between 10,000 and 19,999
Class V ..	Population between 5,000 and 9,999
Class VI ..	Population below 5,000

For each unit, figures relating to 'All classes' have been presented in the beginning followed by figures for classes of towns I—VI. If in any unit there is no town in a particular class, that class has not been shown in the table.

The source of materials for this table is Table B-II of 1961.

B-II.2—Distribution of 1,000 workers in each city or town-group with a population of one lakh and over by age, sex and industrial categories

This subsidiary table is similar to Subsidiary Table B-II.1 but presents data for the seven cities and four town-groups, each having a population of over one lakh.

'City' is a town with a population of 1 lakh or above. Where two or more urban units, contiguous to one another are so constituted that they form together a compact urban block, the entire area has been treated as a 'town-group'.

Ranchi and Jamshedpur cities are constituent towns of Ranchi town-group and Jamshedpur town-group respectively. Separate figures for Ranchi city and Jamshedpur city have, therefore, been shown below the respective town-groups in the table.

The source of materials for this table is Table B-II of 1961.

B-II.3—Workers per 1,000 population in each city and comparison of workers in industrial categories from 1901—1961

This subsidiary table has been presented only for four units, viz., Patna, Jamshedpur (including Jugsalai), Gaya and Bhagalpur. Figures relating to the three other units, Ranchi (including Doranda), Muzaffarpur and Darbhanga have not been presented, because Muzaffarpur and Darbhanga became cities for the first time in 1961 and figures for Ranchi (including Doranda) are not available for the 1931 Census. Figures for the 1941 Census and censuses prior to 1931 are not available for any city.

It shows workers per 1,000 population and distribution per 1,000 workers in each industrial category, for each city, separately for persons, males and females with comparable figures for 1931 and 1951 Censuses. The number of workers under 'Livelihood classes' of 1951 and 'Occupational groups' of 1931 have been estimated to conform to the nine industrial categories of workers of the 1961 Census. Figures relating to industrial categories IV and V have been combined.

Materials for this table have been obtained from Table B-II of 1961, Tables A-V, B-I,

B-II and B-III of 1951, and Table X (Part II) of 1931.

B-III Part A.1—Distribution of 1,000 workers in each sex by educational levels in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 workers of each sex by the following educational levels :

1. Illiterate ;
2. Literate (without educational level) ;
3. Primary or Junior Basic ;
4. Matriculation or Higher Secondary ;
5. Technical diploma not equal to degree ;
6. Non-technical diploma not equal to degree ;
7. University degree or post graduate degree other than technical degree ; and
8. Technical degree or diploma equal to degree or post graduate degree :

Engineering,
Medicine,
Agriculture,
Veterinary and Dairying,
Technology,
Teaching, and
Others.

In 1961 Census, the test of literacy was ability to read and write a simple letter. If a person could both read and write and had also passed a written examination or examinations as proof of educational standard attained, the highest examination passed was recorded in question 6 relating to literacy and education in the Individual slip.

Materials for this table have been obtained from Table B-III Part A of 1961.

B-III Part A.2—Distribution of 1,000 workers in each industrial category and in each sex by educational levels in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It

shows the distribution of 1,000 workers of each sex in industrial categories I to IX by the same educational levels as in Subsidiary Table B-III Part A.1. Similar distribution for total workers has also been shown in the first line of each unit.

The source of materials for this table is Table B-III Part A of 1961.

B-III Part A.3—Distribution of 1,000 persons not at work by educational levels in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 non-workers of each sex by the same educational levels as in Subsidiary Table B-III Part A.1.

The source of materials for this table is Table B-III Part A of 1961.

B-III Part B.1—Distribution of 1,000 workers in each industrial category and in each sex by educational levels in rural areas only

This subsidiary table has been presented for the rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 working males and females respectively in each of the industrial categories I to IX by four educational levels, viz., illiterate, literate (without educational level), primary or junior basic, and matriculation and above. Similar distribution for total workers has been shown in the beginning in each unit.

Source of materials for this table is Table B-III Part B of 1961.

B-III Part B.2—Distribution of 1,000 persons not at work by educational levels in rural areas only

This subsidiary table has been presented for the rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 non-working males and females separately by the same educational levels as in Subsidiary Table B-III Part B.1.

The source of materials for this table is Table B-III Part B of 1961.

B-IV.1—Number per 1,000 workers in non-household industry, trade, business, profession or service, who are employers, employees, single workers and family workers

This subsidiary table has been presented separately for total and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 workers in non-household industry, trade, business, profession or service by their employment status. The employment status has been classified into 4 categories, viz., employer, employee, single worker and family worker.

An 'employer' is a person who has to employ other persons to assist him in his work. He is, therefore, not only responsible for his own work but also for giving work to others in the business or establishment. However, a person who employs domestic servants for household duties or employs subordinates under him in an office or establishment where he is himself employed by others, does not come within the category of 'employer'.

An 'employee' is a person who usually works under some other person for salary or wages in cash or kind. There are persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are, however, only employees, and have been regarded as such.

A 'single worker' is a person who works by himself. He is not employed by any one nor does he employ anybody else, not even members of his household except casually. A person who works in joint partnership with one or several persons without hiring any employee is also a 'single worker'.

A 'family worker' is a member who works without receiving wages in cash or kind in an industry, business or trade conducted mainly by members of the family and does at least one hour of work every day during the working season. Members of the household who help only in household duties are non-workers and, therefore, not entitled to be treated as 'family workers'. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage.

In each unit, the number of workers under 'All Divisions' of I.S.I.C. as printed in Table B-IV Part B, 1961 has been taken as 1,000

and its distribution has been shown into the four categories of employment status. The list of Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification with their description is given in Annexure II to the Introductory Note.

This table corresponds to Subsidiary Table 5.1 of 1951 Census (columns 10-13).

B-IV.2—Number per 1,000 workers in Industrial Category III-Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities, who, are employers, employees, single workers and family workers

This subsidiary table is similar to subsidiary Table B-IV.1, except that it shows the distribution of 1,000 workers in the Industrial Category III (Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities) only. Taking the combined figures of total workers in Industrial Divisions, 0 and 1 as printed in Table B-IV Part B, of 1961 as 1,000 in each unit, its distribution has been shown in the four categories of employment status.

B-IV.3—Number per 1,000 workers at Industrial Category IV-Household Industry who are employees and others

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 workers (persons, males and females separately) by class of workers, 'employees' and 'others'.

In each unit, the number of workers (persons, males and females separately) relating to 'All Divisions' (total of Industrial Divisions 0, 1, 2 & 3) in Table B-IV Part A has been treated as 1,000 and its distribution has been shown by the class of workers, 'employees' and 'others'.

'Employees' are persons working for salary or wages in cash or kind in a household industry belonging to a household of which they are not members.

'Others' are workers in household industries other than 'employees'. In other words, this category includes the head of the household himself and/or other members of the household who participate in the household industry.

B-IV.4—Number per 1,000 workers in Industrial Category V-Manufacturing other than Household Industry who are employers, employees, single workers and family workers

This subsidiary table is similar to Subsidiary Table B-IV.1, except that it shows the distribution of 1,000 workers in the Industrial Category V (Manufacturing other than household industry) only. In each unit, the number of workers in Industrial Division 2 & 3 as printed in table B-IV Part B, has been taken as 1,000 and its distribution has been shown by the four categories of employment status.

B-IV.5—Number per 1,000 workers in Industrial Category VI Construction who are employers, employees, single workers and family workers

This subsidiary table is similar to Subsidiary Table B-IV.1 with the difference that it shows the distribution of 1,000 workers in Industrial Category VI (Construction) only. In each unit, the number of workers relating to Industrial Division 4 in Table B-IV Part B has been taken as 1,000 and its distribution has been shown by the four categories of employment status.

B-IV.6—Number per 1,000 workers in Industrial Category VII-Trade and Commerce who are employers, employees, single workers and family workers

This subsidiary table is similar to Subsidiary Table B-IV.1 with the difference that it shows the distribution of 1,000 workers in Industrial Category VII (Trade and Commerce) only. In each unit, the number of workers in Industrial Division 6 as printed in table B-IV part B has been treated as 1,000 and its distribution has been shown by the four categories of employment status.

This subsidiary table corresponds to table 5.3 of 1951 Census (columns 5-7).

B-IV.7—Number per 1,000 workers in Industrial Category VIII-Transport, Storage and Communications who are employers, employees, single workers and family workers

This subsidiary table is similar to Subsidiary Table B-IV.1 except that it shows the distribution of 1,000 workers in Industrial Category VIII (Transport, Storage and Communications) only. In each unit, the number of workers in Industrial Division 7, as printed in table B-IV Part B has been treated as 1,000 and

its distribution has been shown by the four categories of employment status.

This subsidiary table corresponds to table 5.4 of 1951 Census (columns 5-7).

B-IV.8—Number per 1,000 workers in Industrial Category IX-Other Services who are employers, employees, single workers and family workers

This subsidiary table is similar to Subsidiary Table B-IV.1, with the difference that it shows the distribution of 1,000 workers in Industrial Category IX (Other Services) only. In each unit, the figures of workers in the Industrial Divisions, 5, 8 and 9, as printed in Table B-IV Part B of 1961, have been added. The number so arrived at after adding has been treated as 1,000 and its distribution has been shown into the four categories of employment status.

This subsidiary table corresponds to table 5.5 of 1951 Census (columns 5-7).

B-IV.9—Distribution of 10,000 workers other than those working as cultivators or as agricultural labourers by Division, Major Group and Minor Group of Indian Standard Industrial Classification

This subsidiary table has been presented for the State, its four administrative divisions and seventeen districts. Separate figures have been given for total and urban areas. It shows the distribution of workers other than those working as cultivators or agricultural labourers by Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification.

In each unit, figures against 'All Divisions' relating to persons, males and females in table B-IV Part C have each been treated as 10,000 and distributed among Divisions 0-9. Figures under each Division have been further distributed among the Major groups in it, and those under each Major group have again been distributed among the Minor groups in it.

Minor groups, which account for less than one per cent of workers of the respective division (less than 0.5 per cent in case of minor groups of Division 2 & 3), have not been shown in the table. The figures relating to all the minor groups under a major group may not, therefore, in all cases add up to the figure relating to that major group, as shown in the table.

B-V.1—Distribution of 10,000 workers other than those working as Cultivators or as Agricultural labourers by Occupational Division, Group and Family of National Classification of Occupations

This subsidiary table has been presented for the State, its four administrative divisions and seventeen districts. Separate figures have been shown for the total and urban areas. It shows the distribution of 10,000 workers (persons, males and females separately) other than those engaged in Industrial Categories I (Cultivators) and II (Agricultural labourers) by Divisions, Groups and Families of the National Classification of Occupations.

For each unit, figures against 'All Divisions Total' relating to persons, males and females separately in Table B-V have each been taken as 10,000 and distributed into Divisions 0-X. The figures under each Division have been distributed into the Groups in it and those under each Group into Families in it.

Since occupational families which account for less than one per cent of workers of the respective division (less than 0.5 per cent in case of families of Divisions 7-8) have not been shown in the table, the figures relating to families of a group may not always add up to the figure of that group, as shown in the table.

The Occupational Group 40 excludes Families 400 and 401 relating to Industrial Category I (Cultivators), and Group 41 excludes Family 414 relating to Industrial Category II (Agricultural labourers). Occupational Division X excludes Occupational Group XO (workers without occupations).

Materials for this table have been taken from Table B-V of 1961.

B-VI.1—Distribution of 1,000 workers in each Occupational Division and in each sex by educational levels in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts and relates to workers other than those engaged in Industrial Categories I (Cultivators) and II (Agricultural labourers). It shows the distribution of 1,000 such literate workers in each occupational division by the same educational levels as in Subsidiary Table B-III Part A.1. The distribution relating to 'All

Divisions' has been given in the top line for each unit.

Occupational Division 4 excludes Families 400 and 401 relating to Industrial Category I (Cultivators) and Family 414 relating to Industrial Category II (Agricultural labourers). Occupational Division X excludes Occupational Group X0 (workers without occupation).

Materials for this table are contained in Table B-VI of 1961.

B-VII Part A.1—Number per 1,000 persons working principally as Cultivators, who are working (1) as Cultivators and Agricultural labourers, (2) as Cultivators and at Household Industry in rural areas only

This subsidiary table has been presented for rural areas of the State, its four administrative divisions and seventeen districts. It shows the proportions of cultivators of each sex having agricultural labour or household industry as secondary work per 1,000 persons working principally as cultivators.

The figures in the table have been worked out in the following manner:

Column 2 ..	Male cultivators working principally as cultivators and secondarily as agricultural labourers	
	Total persons working principally as cultivators	× 1,000
Column 3 ..	Female cultivators working principally as cultivators and secondarily as agricultural labourers	
	Total persons working principally as cultivators	× 1,000
Column 4 ..	Male cultivators having household industry as secondary work	
	Total persons working principally as cultivators	× 1,000
Column 5 ..	Female cultivators having household industry as secondary work	
	Total persons working principally as cultivators	× 1,000

Materials for this table have been obtained from Tables B-I and B-VII Part A of 1961.

B-VII Part A.2—Number per 1,000 persons working principally as Agricultural labourers, who are working (1) as Agricultural labourers and Cultivators, (2) as Agricultural labourers and at Household Industry in rural areas only

This subsidiary table has been presented for rural areas of the State, its four administrative

divisions and seventeen districts. It shows the proportions of agricultural labourers of each sex having cultivation or household industry as secondary work per 1,000 persons working principally as agricultural labourers.

Materials for this table have been taken from Tables B-I and B-VII Part A of 1961.

B-VII Part A.3—Number per 1,000 persons working principally at Household Industry who are working (1) at Household Industry and as Cultivators, (2) at Household Industry and as Agricultural labourers

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the proportions of workers of each sex at household industry having cultivation or agricultural labour as secondary work per 1,000 persons having household industry as principal work.

Data for this table have been collected from Tables B-I and B-VII Part A of 1961.

B-VIII Part A.1—Distribution of 1,000 males and females who are unemployed in each age group according to educational levels in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It relates to unemployed males and females aged 15 and above.

Non-workers have been classified into eight categories described in the notes (*et seq.*) to Subsidiary Table B-IX.3. This subsidiary table, however, relates to two categories of non-workers only, viz., (i) persons seeking employment for the first time, and (ii) persons employed before but now out of employment and seeking work.

Figures against alphabetical symbol (a) represent the data relating to the former category while those against alphabetical symbol (b) give figures relating to the latter category of non-workers.

This subsidiary table shows the distribution of 1,000 males and females relating to the two categories of non-workers in the age groups 15—19, 20—24, 25—29, 30—34 and 35+ by the same educational levels as in Subsidiary Table B-III Part A.1. Similar distribution for total of age 15+ is given in the top line against (a) and (b). Figures against 'age not stated'

relate to those whose age was not recorded. In the second category of non-workers, 'Employed before but now out of employment and seeking work', however, the age-groups 25—29 and 30—34 have been combined and the age-group 35+ has been split up into three age-groups, viz., 35—44, 45—59 and 60+.

Materials for this table have been taken from Table B-VIII Part A of 1961.

B-VIII Part B.1—Distribution of 1,000 males and females who are unemployed by educational levels in rural areas only

This subsidiary table has been presented for the rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 unemployed males and females aged 15+ by educational levels. The educational levels are the same as in Subsidiary Table B-III Part B.1. Unemployed males and females in this table are the total of males and females respectively falling in two categories of non-workers, viz., (i) seeking employment for the first time, and (ii) employed before but now out of employment and seeking work.

Materials for this table are contained in Table B-VIII Part B of 1961.

B-IX.1—Number per 1,000 of population aged 15+ and of population of each age group 15—34, 35—59, 60+ and age not stated who are unemployed separately for persons, males and females

This subsidiary table has been presented separately for the rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the proportions of unemployed persons, males and females, per 1,000 persons, males and females in three broad age groups, 15—34, 35—59 and 60+ and also in 'all ages 15+'. Column 'age not stated' relates to those whose age was not recorded.

Materials for this table are given in Tables B-I and B-IX of 1961.

B-IX.2—Distribution of 1,000 persons not at work by age groups

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 non-workers of each sex by broad age groups 0—14, 15—34, 35—59 and 60+. Column 'age not stated' relates to those whose age was not recorded.

Materials for this table are contained in Table B-IX of 1961.

B-IX.3—Distribution of 1,000 persons not at work by sex and 1,000 non-workers of each sex by type of activity

This subsidiary table has been presented separately for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons not at work by sex (columns 3-4). It also shows the distribution of 1,000 non-workers of each sex by the following eight categories of non-workers (columns 7—22) :

- (i) Full time students.
- (ii) Household duties.
- (iii) Dependents, infants and disabled.
- (iv) Retired, rentier, or independent means.
- (v) Beggars, vagrants, etc.
- (vi) Inmates of penal, mental and charitable institutions.
- (vii) Persons seeking employment for the first time.
- (viii) Persons employed before, but now out of employment and seeking work.

Materials for this table have been obtained from Table B-IX of 1961.

SUBSIDIARY TABLES ON
HOUSEHOLD ECONOMIC TABLES

EXPLANATORY NOTE

Tables B-X to B-XVII of the B-Series Tables, also known as Household Economic Tables (prepared on 20 per cent sample), have been printed in Part III, sub-parts (i) and (ii) of the 1961 Census Publications relating to this State. The total number of subsidiary tables on Household Economic Tables are 12, as shown below :

Main Table	Number of Subsidiary Tables

districts. It shows the extent of participation of households in the two most important sectors of economic activity in this country, viz., cultivation and household industry. In this table, 1,000 sample households have been distributed into the following four categories :

- (i) Households engaged neither in cultivation nor household industry;
- (ii) Households engaged in cultivation only;
- (iii) Households engaged in household industry only; and
- (iv) Households engaged both in cultivation and household industry.

Figures in columns 4 to 7 have been rounded off to the nearest integers so that they add up to 1,000 separately for total, rural and urban areas of each unit.

The source is Table B-X.

B-XI.1—Distribution of 1,000 sample households engaged in cultivation by interest in land and size of land cultivated in rural areas only.

This subsidiary table has been presented for rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households engaged in cultivation by size of land cultivated and interest in land. The distribution by size classes of land cultivated has been shown in horizontal spread and that by interest in land in vertical spread. The size classes are :

- (i) Less than 1 acre,
- (ii) 1.0—2.4 acres,
- (iii) 2.5—4.9 acres,
- (iv) 5.0—7.4 acres,
- (v) 7.5—9.9 acres,
- (vi) 10.0—12.4 acres,
- (vii) 12.5—14.9 acres,
- (viii) 15.0—29.9 acres,
- (ix) 30.0—49.9 acres,
- (x) 50+ acres, and
- (xi) unspecified relating to the households in respect of which the size of land cultivated was not recorded in the household schedule.

A 'household' is a group of persons living together in the same census house and taking their meals from a common kitchen unless the exigencies of work prevented them from doing so.

The concepts of 'cultivation' and 'household industry' have been explained earlier in the Introductory Note under 'Industrial categories of workers'.

'0' in these tables stands for 'nil' figures, and 'N' for 'negligible'.

Some salient features of each table are described below :

B-X.1—Distribution of 1,000 sample households, (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both, and (iii) engaged both in cultivation and household industry for all areas.

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen

The types of interest in land shown in the table are :

- (i) Owned or held from Government,
- (ii) Held from private persons or institutions for payment in money, kind or share, and
- (iii) Partly held from Government and partly from private persons for payment in money, kind or share.

The three types of interest in land are indicated in column 2 by abbreviations (a), (b) and (c) respectively.

Figures in columns 4—14 have been rounded off to two places of decimal so that in each line they add up to the figure in column 3, and in each column vertically to the figure shown against 'All rights in land'.

The source is Table B-XI.

B-XII.1—Distribution of 1,000 sample households engaged in cultivation by size of land cultivated in rural areas only.

This subsidiary table has been presented for rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households engaged in cultivation by size classes of land cultivated. The size classes are the same as in Subsidiary Table B-XI.1. The table also shows the distribution of 1,000 sample cultivating households of all size classes by those engaged in cultivation only and those engaged both in cultivation and household industry in each size class of land.

The figures for various size classes have been worked out in the following manner :

$$\text{Column 2} = \frac{a_1 + b_1}{a + b} \times 1,000$$

$$\text{Column 3} = \frac{a_1}{a + b} \times 1,000$$

$$\text{Column 4} = \frac{b_1}{a + b} \times 1,000$$

Where a_1 = Sample households with cultivation only in the size class.

b_1 = Sample households with cultivation and household industry in that size class.

a = Total sample households with cultivation only.

b = Total sample households with cultivation and household industry.

Materials for this table have been obtained from Tables B-XII and B-XV.

B-XII.2—Distribution of 1,000 sample households engaged in cultivation by size of land cultivated and working strength in rural areas only.

This subsidiary table has been presented for the rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households of each of the two categories, viz., (i) households engaged in cultivation only, (ii) households engaged both in cultivation and household industry, by working strength and size of land cultivated.

The distribution by working strength is in six categories, viz., 1 person, 2 persons, 3—5 persons, 6—10 persons, more than 10 persons and 'unspecified' relating to households in respect of which working strength was not recorded. In calculating the working strength, both family workers and hired workers have been taken into account. The size classes of land in this table are the same as in Subsidiary Table B-XI.1.

Figures for each size class of land have been calculated in the following manner :

$$\text{Column 4} = \frac{a_1}{a} \times 1,000$$

$$\text{Column 5} = \frac{b_1}{b} \times 1,000$$

where a_1 = Sample households engaged in cultivation only employing 1 person in that size class of land.

a = Total sample households engaged in cultivation only.

b_1 = Sample households engaged both in cultivation and household industry employing 1 person in that size class of land.

b = Total sample households engaged both in cultivation and household industry.

And so on for other employment sizes.

Materials for this table have been obtained from Tables B-XII and B-XV.

B-XII.3—Distribution of 1,000 sample household workers (family/hired) engaged in cultivation with and without household industry by each size of land cultivated and size of employment by family and hired workers in rural areas only.

This subsidiary table has been prepared for rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample household workers engaged in cultivation with and without household industry in each size class of land cultivated and each size group of employment by family workers and hired workers classified further by participation in cultivation only, and both in cultivation and household industry. The size classes of land and the size groups of employment are the same as in Subsidiary Table B-XII.2.

For the size group of employment, 'All persons', classification by sex has also been shown in respect of family workers. In the employment size, 'One person', there is no classification by hired worker because this employment size must relate to a family worker.

Figures have been rounded off upto two places of decimal.

Materials for this table have been taken from Tables B-XII and B-XV.

B-XII.4—Average number of family and hired workers per cultivating household by each size of cultivated holding in rural areas only.

This subsidiary table has been presented for rural areas of the State, its four administrative divisions and seventeen districts. It shows the average number of family workers and hired workers per cultivating household and number of family workers per hired worker separately for total cultivating households, households with cultivation only and households both in cultivation and household industry for each size class of land cultivated. The size classes are the same as in Subsidiary Table B-XI.1.

Figures have been rounded off upto two places of decimal.

Materials for this table have been obtained from Tables B-XII and B-XV.

3 Cen—20

B-XIV Part A.1—Distribution of 1,000 sample households engaged in household industry only by principal household industry and working strength in all areas.

This subsidiary table has been presented for the State, its four administrative divisions and seventeen districts. Figures have been presented separately for total, rural and urban areas. It shows the distribution of 1,000 sample households engaged in household industry only by principal household industry and working strength. The size groups of working strength are the same as in Subsidiary Table B-XII.2. Major Groups of household industry having less than 10 per cent of the figures of respective divisions have been omitted.

The total number of households separately for 'Total', 'Rural' and 'Urban' for each Division and Major Group has been treated as 1,000 and the same has been further distributed among the above mentioned size groups of working strength.

In a household engaged in more than one household industry, the one which was conducted by it for a larger number of months in a year has been treated as its principal household industry.

Figures in columns 5 to 10 have been rounded off upto two places of decimal so that they add up to 1,000 in each line.

The source is Table B-XIV Part A.

B-XIV Part B.1—Distribution of 1,000 sample households engaged in household industry only by principal household industry (Division/Major/Minor Groups) in all areas.

This subsidiary table has been presented for the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households engaged in household industry only, by type of household industry with further classification by rural and urban areas. The total number of households for each Industrial Division has been treated as 1,000 and it has been further distributed among the Major and Minor Groups of that Division.

The distribution by rural and urban areas is shown in horizontal spread and that by Major Groups and Minor Groups in vertical spread.

Figures have been rounded off upto two places of decimal so that figures relating to Minor

Groups in a Major Group add upto the figure of that Major Group and those relating to Major Groups in a Division add upto the figure of that Division.

The source is Table B-XIV Part B.

B-XVI.1—Distribution of 1,000 sample households engaged in household industry (with and without cultivation) by principal household industry in each duration.

This subsidiary table has been presented for the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households engaged in household industry (with and without cultivation) by period of working of the household industry classified by rural and urban areas. The period of working has been divided into five classes, viz., 1—3 months, 4—6 months, 7—9 months, 10 months—1 year and 'unspecified' relating to those households for which period of working of the household industry was not recorded. Major Groups of household industry having less than 10 per cent of the figures of respective divisions have been omitted.

Figures against abbreviation (a) in column 2 relate to sample households engaged in household industry with cultivation, and those against (b) to sample households engaged in household industry without cultivation.

In each unit, the number of total sample households of each of the two categories, viz., households engaged in household industry with cultivation, and households engaged in household industry without cultivation in each Industrial Major Group of the principal Household Industry, has been taken as 1,000 and distributed into the five duration classes by rural and urban areas.

Figures in columns 4 to 15 have been rounded off upto two places of decimal so that in each line figures in columns 4 and 5 add upto 1,000 and the rural and urban figures in columns 6—15 add up respectively to the rural and urban figures in columns 4 and 5.

Materials for this table have been obtained from Table B-XVI.

B-XVI.2—Distribution of 1,000 sample household workers engaged in principal household industry (with and without cultivation) by family and hired workers in each duration.

This subsidiary table has been presented for the State, its four administrative divisions and

seventeen districts. It shows the distribution of 1,000 sample household workers (engaged in principal household industry with and without cultivation) in each Industrial Major Group relating to principal household industry by duration classes and family and hired workers with rural and urban break up, by horizontal spread. The vertical spread shows the break up for (a) with cultivation and (b) without cultivation.

Abbreviations (a) and (b) denote the same categories of households as in Subsidiary Table B-XVI.1.

Major Groups of household industry having less than 10 per cent of the figures of respective divisions have been omitted.

Figures have been rounded off upto two places of decimal.

Materials for this table have been obtained from Table B-XVI.

B-XVI.3—Average number of family and hired workers per household engaged in principal household industry (with and without cultivation) by the duration of household industry in rural and urban areas.

This subsidiary table has been presented for rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows for each Industrial Major Group of principal household industry, the average number of family and hired workers per household engaged in principal household industry (with and without cultivation) and number of family workers per hired worker in each duration class of household industry. The duration classes are the same as in Subsidiary Table B-XVI.1. Major Groups of household industry having less than 10 per cent of the figures of respective divisions have been omitted.

Abbreviations (a) and (b) denote the same categories of households as in Subsidiary Table B-XVI.1.

Figures have been rounded off upto two places of decimal.

Materials for this table have been obtained from Table B-XVI.

B-XVII.1—Distribution of 1,000 sample households by size of households.

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 sample households by five size classes of households, viz., single member, 2-3 members, 4-6 members, 7-9 members, 10 members and over.

It also shows the distribution of male and female population of 1,000 sample households in the above size classes of households.

Figures have been worked out in the following manner :

$$\text{Column 7} = \frac{\text{Number of males in size group single member}}{\text{Total number of sample households}} \times 1,000$$

$$\text{Column 8} = \frac{\text{Number of females in size group single member}}{\text{Total number of sample households}} \times 1,000$$

and so on for other size classes.

Figures have been rounded off upto two places of decimal so that the figures of sample households in various size classes add upto 1,000 and the figures of males and females under various size classes of households add upto the figures of males and females respectively in columns 4 and 5 in each line.

The source is Table B-XVII.

Census. The following adjustments have been made for 1941 Census :

- (i) Figures of the Chotanagpur States, viz., Seraikela and Kharsawan, have been added to the figures of Singhbhum district.
- (ii) Figures of the erstwhile Manbhum district have been adopted for Dhanbad district.

Figures for Saharsa district have not been shown for 1941 Census, as they are not available.

C-III Part B.1—Distribution of 1,000 persons in each age group and sex by educational level in urban areas only

This subsidiary table has been presented for the urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of each sex in each of the age groups 5—14, 15—34, 35—59 and 60+ as well as of total population (5+) by literacy and educational levels. Similar distribution for persons of each sex whose age was not recorded, is shown in the last line against 'age not stated' in each unit. The educational levels are similar to those in the Subsidiary Table B-III Part A.1. Persons in the age group 0—4 have been treated as illiterate irrespective of the actual returns in individual slips.

The sources of materials for this table are columns 3 to 32 of Table C-III Part B of 1961.

Figures of males and females in columns 5—20 have been rounded off to the nearest integers so that they add up separately to 1,000 in each age group.

C-III Part C.1—Distribution of 1,000 persons in each age group and sex by educational levels in rural areas only

This subsidiary table has been presented for rural areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of each sex in each of the age groups 5—14, 15—34, 35—59 and 60+ as well as of total population (5+) by literacy and educational levels, similar to those in the Subsidiary Table B-III Part B.1. Persons in the age group 0—4 have been treated as illiterate, irrespective of

the actual returns in individual slips. Similar distribution for persons of each sex whose ages were not recorded has been shown in the last line in each unit.

Figures of males and females have been rounded off to the nearest integers so that they add up separately to 1,000 for each age group.

The sources of materials for this subsidiary table are columns 3 to 12 of Table C-III Part C of 1961.

C-IV.1—Females per 1,000 males by age group and comparison with 1951 Census

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the sex ratio (females per 1,000 males) by age groups with comparable figures for 1951 Census. The age groups are : less than 1 year, 1—4, 5—14, 15—34, 35—54, 55—59 and 60+. Figures relating to persons whose age was not recorded, have been shown in column 'age not stated'.

The sources of materials for this subsidiary table are :

1961—Tables C-III and C-IV.

1951—Tables C-III and C-V.

For 1961 Census, population figures relating to age groups, less than 1 year, 1—4, 35—54 and 55—59 have been worked out from Table C-IV and those relating to age groups 5—14, 15—34 and 60+ have been obtained from Table C-III. For 1951 Census, corresponding figures for the age groups less than 1 year, 1—4, 5—14, 15—34, and 35—54 have been worked out from Table C-III of 1951 and those for age groups 55—59 and 60+ from Table C-V of 1951.

Three districts of the State, viz., Purnea, Dhanbad and Singhbhum have been affected by the Bihar and West Bengal (Transfer of Territories) Act, 1956. For these districts, population figures in all the age groups other than 55—59 and 60+ for 1951 Census, have been taken from the recast Table C-III printed in the Census of India Paper No. 2 of 1957. Figures in the age group 55—59 have been worked out by distributing the figures in the age group 55—64 (vide Table C-III of Paper No. 2 of 1957) into the age groups 55—59 and

60—64. Adjustments in 1951 population figures have also been made for transfer of 39 villages of Ranchi to Singhbhum district in the year 1954.

C-IV.2—Distribution of 1,000 persons of each sex by age group and comparison with 1951 Census

This subsidiary table shows the distribution of 1,000 persons of each sex by age groups with comparable figures for 1951 Census. The age groups are: less than 1 year, 1—4, 5—14, 15—34, 35—54 and 55+. The column 'age not stated' shows figures relating to those whose age was not recorded.

Figures have been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts.

The sources of data for this table are :

1961—Tables C-III and C-IV.

1951—Table C-III.

For 1961 Census, population figures under age groups 5—14 and 15—34 have been taken from Table C-III and those in the age groups, less than 1 year, 1—4, 35—54 and 55+ have been worked out from Table C-IV. Purnea, Dhanbad and Singhbhum districts have been affected by the Bihar and West Bengal (Transfer of Territories) Act, 1956. The 1951 population figures for these districts under each age group have been taken from Table C-III printed in the Census of India Paper No. 2 of 1957. For other districts, population figures for all the age groups have been taken from Table C-III of 1951. Adjustments have also been made on account of transfer of 39 villages from Ranchi to Singhbhum district in the year 1954.

Figures of males and females have been rounded off to the nearest integers so that for each census they add up separately to 1,000 for total, rural and urban areas of each unit.

C-V.1—Distribution of 1,000 persons by mother-tongue

This subsidiary table has been presented for the total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons by mother-tongue. The mother-tongues have been arranged in alphabetical order.

3 Cen.—37

'Mother-tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy, the language mostly spoken in the person's home in childhood was treated as mother-tongue. In the case of infants and deaf-mutes, the language usually spoken by the mother was entered as mother tongue.

Only those mother-tongues, speakers of which are at least 1 in 1,000 in any of the districts, have been shown in the table. Figures have been rounded off to the nearest integers so that they add upto 1,000 separately for total, rural and urban areas.

Materials for this subsidiary table have been taken from Table C-V of 1961.

C-VII.1—Distribution of 1,000 persons by religion

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons by religion. The religions are: Hindus, Muslims, Christians, Sikhs, Jains, Buddhists and 'Other religions and persuasions'. The last category relates to persons professing religions other than the six main religions shown in the table. The column 'Religion not stated' shows figures relating to persons for whom no religion was recorded or who did not return any religion. Figures in the table have been rounded off to the nearest integers so that they add upto 1,000 in each line.

The source of this table is Table C-VII of 1961.

C-VIII Part A.1—Distribution of 1,000 persons of all Scheduled Castes by sex and literacy

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of all Scheduled Castes by sex and literacy. Figures under columns 4—7 have been rounded off to the nearest integers so that they add upto 1,000 separately for total, rural and urban areas. Materials for this table have been obtained from columns 3 to 9 of Table C-VIII Part A of 1961. The list of Scheduled Castes is given in the Note to Part V-A of the 1961 Census Publications relating to the State.

C-VIII Part A.2—Distribution of 1,000 persons of all Scheduled Castes by categories of workers and non-workers

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of all Scheduled Castes by nine industrial categories of workers, and non-workers. Figures in cols. 4 and 14 have first been rounded off to the nearest integers so that they add upto 1,000 in each line. Figures in cols. 5—13 have then been rounded off to the nearest integers so that they add upto the figures in col. 4 of each line. The nine industrial categories of workers are detailed in the Note relating to Subsidiary Table B-I.1.

The sources of materials for this subsidiary table are columns 10 to 31 of Table C-VIII Part A of 1961.

C-VIII Part B.1—Distribution of 1,000 persons of all Scheduled Tribes by sex and literacy

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of all Scheduled Tribes by sex and

literacy. Figures in cols. 4—7 have been rounded off to the nearest integers so that they add up to 1,000 in each line. The list of Scheduled Tribes has been given in the Note to Part V-A of the 1961 Census Publications for Bihar.

The sources of materials for this subsidiary table are columns 3—9 of Table C-VIII Part B of 1961.

C-VIII Part B.2—Distribution of 1,000 persons of all Scheduled Tribes by categories of workers and non-workers

This subsidiary table has been presented for total, rural and urban areas of the State, its four administrative divisions and seventeen districts. It shows the distribution of 1,000 persons of all Scheduled Tribes by nine industrial categories of workers, and non-workers. Figures in cols. 4 and 14 have first been rounded off to the nearest integers so that they add upto 1,000 in each line. Figures in cols. 5—13 have then been rounded off to the nearest integers so that they add upto the figures in col. 4 of each line. The nine industrial categories of workers have been spelt out in the Note to Table B-I.1.

The sources of materials for this table are columns 10 to 31 of Table C-VIII Part B of 1961.

D-SERIES

SUBSIDIARY TABLES
ON MIGRATION TABLES

EXPLANATORY NOTE

The D-Series Tables, also known as 'Migration Tables', have been printed in Part II-D of the 1961 Census Publications relating to this State. The data are based on information collected in the Individual Slip. Three subsidiary tables each have been prepared from Tables D-II and D-IV and one each from Tables D-I, D-III and D-V. The salient features of each table are given below :

D-I.1—Distribution of 1,000 non-Indian nationals by countries of nationality

This subsidiary table shows the distribution of 1,000 non-Indian nationals by countries of which they are nationals. Non-Indian nationals and their families employed in foreign embassies, missions, etc. in India are excluded from this table as they were not enumerated in the Census. Figures have been presented for the State and seventeen districts under the following five broad groups :

- (i) Nationals of countries in Asia beyond India (including U.S.S.R.) ;
- (ii) Nationals of countries in Europe (excluding U.S.S.R.) ;
- (iii) Nationals of countries in Africa ;
- (iv) Nationals of countries in two Americas ; and
- (v) Nationals of countries in Oceania.

Proportional figures with sexwise break-up for countries contributing more than 1 in 1,000 non-Indian nationals in different administrative units have been shown in Small Tables.

Materials for this subsidiary table have been taken from Table D-I of 1961.

D-II.1—Variation in natural population

This subsidiary table has been presented for total area of the State only. It shows the variation in natural population between 1951 and 1961. The figures in respect of immigrants relate to persons born outside the State. The figures of emigrants, however, relate only to persons born in this State but enumerated in other States and Union Territories of India, as figures of persons born in this State but enumerated

outside India are not available. Figures in cols. 6—9 relating to 1951 Census have not been adjusted according to the jurisdiction of 1961. As figures in col. 5 relating to natural population of 1961, and in column 9 relating to natural population in 1951 are not comparable, percentage decade variation in natural population in column 10 has been shown as N. A. (not available).

The sources for this table are column 3 of Table D-II of 1961 and column 2 of Table D-IV of 1951.

D-II.2—Migration between the State and other parts of India

This subsidiary table has been presented for total area of the State only. It shows the trend of in-migration to and out-migration from Bihar in 1951 and 1961. Figures of immigrants in columns 2 and 3 relate to persons born outside the State but within India, and enumerated in this State. Figures in columns 5-6 relate to persons born in this State but enumerated in other parts of India. Figures for 1951 Census have not been adjusted according to the jurisdiction of the State in 1961 and, therefore, they are not strictly comparable. This explains the entry 'N.A.' in columns 4 and 7.

Migrants in Group H—Unclassifiable of Table D-II of 1961 have been treated as immigrants born outside the State but within the country.

Materials for this subsidiary table have been taken from column 3 of Table D-II of 1961 and column 2 of Table D-IV of 1951.

D-II.3—Distribution of 10,000 persons enumerated in each State/District by place of birth, rural/urban characteristics and sex

This subsidiary table has been presented separately for total, rural and urban areas of the State and seventeen districts. It shows the distribution of 10,000 persons by sex and following categories of birth place :

- (i) Born in place of enumeration ;
- (ii) Born in the district of enumeration other than the place of enumeration ;
- (iii) Born in other districts of the State ;

- (iv) Born in other States in India ;
- (v) Born outside India ;
- (vi) Born at sea ; and
- (vii) Birth place 'unclassifiable'.

Figures relating to persons whose place of birth was not recorded, have been shown in the column 'unclassifiable'. Proportional figures relating to categories (ii), (iii) and (iv) have been further classified by birth place rural, urban and unclassifiable. In other categories, there is no such classification.

If a person was born in a place which has been treated as 'urban' in this Census, his place of birth has been treated as 'urban'. Likewise, if a person was born in a place which has been treated as 'rural' in this Census, his place of birth has been treated as 'rural'. Persons whose place of birth could not be classified either as 'rural' or 'urban' because of inadequate entries in the Individual Slip, have been put under 'unclassifiable'.

In the column 'Beyond India', figures relating to the neighbouring countries of Nepal and Pakistan have been shown separately, while those for other countries have been lumped together under the rubric, 'other countries'.

Figures in columns 2 to 31 have been rounded off to the nearest integers so that they add upto 10,000 for each administrative unit.

Materials for this subsidiary table have been obtained from Table D-II of 1961.

D-III.1—Distribution of 10,000 persons born outside the place of enumeration by place of birth, duration of residence at the place of enumeration and sex

This subsidiary table has been presented separately for rural and urban areas of the State and seventeen districts. It shows the proportions of migrants of each sex born in rural/urban areas of (i) the district of enumeration and (ii) other districts of the State, classified by five categories of periods of stay at the place of enumeration, viz, (i) less than 1 year, (ii) 1—5 years, (iii) 6—10 years, (iv) 11—15 years, and (v) 16+. Figures against 'period not stated' relate to those whose period of stay at the place of enumeration was not

recorded. The proportions have been worked out per 10,000 of total migrants of both sexes taken together.

For economy of space, figures relating to the category of migrants whose birth place whether rural/urban was not ascertainable, have not been shown in the table.

Similar proportions relating to migrants from other States and Union Territories of India have been presented in the inset table. To save space, only those States have been exhibited which contributed 1 or more in 1,000 of total migrants to a particular unit. The selection of States for the inset table has been done separately for the rural and urban parts of each unit.

This subsidiary table is based on Table D-III of 1961.

D-IV.1—Distribution of 1,000 migrants to cities by age groups

This subsidiary table has been presented for the seven cities of Bihar, viz., Patna, Jamshedpur, Gaya, Bhagalpur, Ranchi, Muzaffarpur and Darbhanga.

It shows the distribution of 1,000 migrants to each city by sex and broad age groups. The age groups are 0—14, 15—34, 35—59 and 60+. The column 'age not stated' relates to persons whose age was not recorded. Figures in columns 3 to 12 have been rounded off to the nearest integers so that they add upto 1,000 for each city.

Materials for this subsidiary table have been taken from Table D-IV of 1961.

D-IV.2—Distribution of 1,000 migrants to cities by sex and educational level

This subsidiary table has also been presented for the seven cities of the State. It shows the distribution of 1,000 migrants to each city by sex and educational level. The educational levels are the same as in Subsidiary Table B-III Part A.1. The figures in columns 4 to 19 have been rounded off to the nearest integers so that they add upto 1,000 for each city.

Materials for this subsidiary table are contained in Table D-IV of 1961.

D-IV.3—Distribution of 1,000 workers among migrants to cities by sex and occupation

This subsidiary table has also been presented for the seven cities of this State. It shows the distribution of 1,000 migrant workers of each sex by Industrial Categories I and II and by occupational groups of the National Classification of Occupations in cases of workers under Industrial Categories III—IX.

The Occupational Group 40 excludes Families 400-401 relating to Category I (Cultivators) and Group 41 excludes Family 414 relating to Category II (Agricultural labourers). A complete list of groups of the National Classification of Occupations with their description is given in Annexure III to the Introductory Note.

Figures relating to males and females in columns 4—153 have been rounded off to the nearest integers so that they add up separately to 1,000 for each city.

The source of figures for this subsidiary table is Table D-IV of 1961.

D-V.1—Distribution of 1,000 migrants (born in India) to cities by place of birth

This subsidiary table has been presented for the seven cities of this State. It shows the distribution of 1,000 migrants (born in India) to cities by sex and birth place rural and urban

classified further by the following categories of birth places according to periods of residence less than 3 years and 3 years and more :

- (i) born elsewhere in the district of enumeration ;
- (ii) born outside the district of enumeration but within the State ; and
- (iii) born outside the State but within India.

Migrants belonging to the following categories have been excluded from this table :

- (i) migrants whose place of birth was outside India ;
- (ii) migrants whose place of birth was unascertainable i.e. whose place of birth was not properly indicated in the Individual Slip ;
- (iii) migrants whose place of birth whether rural or urban was not ascertainable ; and
- (iv) migrants whose duration of residence at the place of enumeration was not recorded.

Figures in columns 3 to 26 have been rounded off to the nearest integers so that they add up to 1,000 in case of each city.

The source for this subsidiary table is Table D-V of 1961.
