Extract from an address to the Superintendents of Census Operations on the 27th September, 1959 by the late Shri Govind Ballabh Pant, Home Minister.

"In view of the changes that are taking place in our economic pattern and the objectives that we have laid before ourselves you have to give thought to other matters which have been ignored in the past and which now call for close study. We have decided to build our economy in a planned manner. Your last census of 1951 might be regarded as a landmark because the First Five Year Plan started in 1951. Now we would have completed two Five Year Plans by 1961. So the material that you will now collect may not be fully available by the time that we have to prepare the draft of our Third Five Year Plan but I hope we will have such material as you may be able to collect by the end of 1961."

PREFACE

My grateful thanks are due to Shri K. D. Ballal, I.A.S., Central Tabulation Officer, Office of the Registrar General, India and his staff for a careful and thorough checking of the tables. I am also indebted to Sri S. N. Chatterjee, Superintendent, Secretariat Press, Bihar and his staff for the care and interest taken in the printing of this volume.

I should also like to place on record my grateful appreciation of the useful services rendered by the following members of my staff in the preparation of this volume :

Sri R. N. Misra	..	} Deputy Superintendent of Census Operations
Sri U. P. Shrivastava	..	
Sri R. B. Singh	..	} Tabulation Officer
Sri R. B. Pandey	..	
Sri Indrajit Singh	..	Tabulation Assistant
Sri H. N. Banerjee	..	Section Holder
Sri Sheo Prasad	..	Proof Reader

The Census of 1961 provided a landmark in the country's march towards progress, as it coincided with the completion of the Second Five Year Plan and the beginning of the Third Five Year Plan. It was natural, therefore, that the Census should try to fulfil its role and undertake a very detailed and comprehensive tabulation of economic data. For, the great importance of census lies "in assessing trends—the past can be appraised, the present accurately described, and the future estimated".

Thus, the Economic Tables (B-series) prepared for the 1961 Census are more elaborate and exhaustive than before. As against seven Economic Tables (A-V, E, B-I, B-II, B-III, C-II and D-VII) at the 1951 Census, eighteen Tables have been prepared this time. They can be broadly divided into two categories—(i) General Economic Tables consisting of the Primary Census Abstract and Tables B-I to B-IX, and (ii) Household Economic Tables consisting of Tables B-X to B-XVII. The former are based on data collected in the Individual Enumeration Slips, and latter on the Household Schedules.

The Primary Census Abstract gives the basic economic classification of the population into nine industrial categories of workers and non-workers. It has been published for the State, Divisions, Districts, Subdivisions, Anchals, Cities and Towns in Part II-A Volume of the State. Similar data for each village and enumerator's block (wherever desirable), classified under wards in the case of cities and towns, will be published in the District Census Handbooks for each district.

The following General Economic Tables are being presented in Part II-B :

B-I	..	Workers and non-workers classified by sex and broad age-groups.
B-II	..	Workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups.
B-III—Part A	..	Industrial classification of workers and non-workers by educational levels in <i>urban areas only</i> .
B-III—Part B	..	Industrial classification of workers and non-workers by educational levels in <i>rural areas only</i> .
B-IV—Part A	..	Industrial classification by sex and class of worker of persons at work at household industry.
B-IV—Part B	..	Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.
B-IV—Part C	..	Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.
B-V	..	Occupational classification by sex of persons at work other than cultivation.
B-VI	..	Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in <i>urban areas only</i> .

B-VII—Part A.. Persons working principally (i) as cultivators, (ii) as agricultural labourers or (iii) at household industry classified by sex and by secondary work (i) at household industry, (ii) as cultivator or (iii) as agricultural labourer.

B-VII—Part B.. Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.

B-VIII—Part A.. Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *urban areas only*.

B-VIII—Part B.. Persons unemployed aged 15 and above by sex and educational levels in *rural areas only*.

B-IX .. Persons not at work classified by sex, broad age-groups and type of activity.

To avoid bulkiness, however, Part II-B has been printed in two sub-parts. Part II-B (i) (the present book) contains tables B-I to B-IV and B-VII. Tables B-V, B-VI, B-VIII and B-IX are contained in Part II-B (ii).

The Household Economic Tables (B-X to B-XVII) are a special feature of this Census. They are intended to give an idea of the working of the household as an economic entity, and relate to extent of land under cultivation; nature of household industry, period of its working and the number of persons employed therein as family workers or as hired labourers, etc. These tables are contained in Part III Volume which is being brought out separately in two sub-parts.

A detailed analysis and interpretation of the economic data, as of others, will be done in the General Report (Part I-A). An introductory note has, however, been provided at the beginning of this volume so as to give a general idea of the essential concepts and definitions. It is necessary to emphasise that the statements made and conclusions drawn in the note are wholly the responsibility of the author alone in his personal capacity and do not necessarily represent the views of Government.

NOTE

Preliminary Remarks

The scope of this part of the Census Publications for Bihar has been indicated in the Preface.

The tables presented in this book have been prepared on the basis of data collected in the Individual Slips. These slips were canvassed by enumerators during 10th and 28th February, 1961, followed by a revisional round between 1st and 5th March, 1961. The reference date for the data is the sunrise of 1st March, 1961.

Of the several enquiries made during a population census, those relating to economic aspects of the life of the community are easily the most important, and indeed the most challenging—particularly in a country like ours where not all the goods produced or services rendered enter the money-market and much of the economy is still in an under-developed state.

In the past censuses, though data relating to occupation or means of livelihood were collected, the main interest seemed to lie in demographic and social studies. With the advent of independence in 1947 and the launching of a series of Five Year Plans, the country has entered into an era of large-scale economic development and all-round economic planning. This has naturally shown the wide gaps in the field of economic data in our country, and never before did we experience their absence as keenly as in the last decade. Several organisations such as the National Sample Survey, the Central Statistical Organisation, the Indian Statistical Institute and the National Council of Applied Economic Research, are engaged in filling these gaps. The Census of 1961 afforded a unique opportunity for making certain basic contributions in this direction. It is not surprising, therefore, that out of 24 questions asked of each individual in the Individual Slip designed for the last Census, as many as 10 related to economic aspects. In addition to these, a Household Schedule was prepared separately for each household in order to study the functioning of a 'household' as an economic entity. The main items covered in this Schedule were cultivation and household industry. In regard to the former, information was obtained

about—(a) Size of land under cultivation, (b) nature of right or interest in land, and (c) number of family workers and hired labourers working. In regard to household industry, the items were—(a) nature of industry, (b) number of months during which conducted, and (c) number of family members and hired labourers working. Data collected and compiled from the household schedules are being presented in the two sub-parts of Part III, Vol. IV of the 1961 Census publications relating to Bihar, which will contain eight Economic Tables B-X to B-XVII.

Approach to economic data in the past

Before 1961, economic data used to be collected in Indian censuses according to what is generally known as the 'dependency approach'. It meant the enumeration of 'gainfully employed' persons. In other words, the main basis of economic classification was 'income'. This approach was found to be unsatisfactory for a number of reasons. For one thing, the concepts of earning, self-supporting, earning dependent, dependent etc. adopted in 1931, 1941 and 1951 were 'too subjective, too gregarious, and too vulnerable to particular social milieus and values; therefore, unreliable and not always usable'.

Undue insistence on 'income' also led to the anomaly that while on the one hand, family labour (unpaid help in family economic activities by family members, particularly women and children) got relegated to the 'economically inactive' section of the population, persons like pensioners, beggars, agricultural or non-agricultural, royalty, rent or dividned receivers (who earn an income but do not participate in any kind of productive work or service) were, on the other hand, classed among 'self-supporting' persons, and treated as economically active. It was felt that 'the strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income, like men other than the head of the household and women of the family or children working at cultivation or cottage industries of the household'. It was generally agreed that the 1951 Census had failed to net much of the 'family labour'. By and large,

ours is a backward economy, dependent on agriculture and household industry. 82 per cent of the working population of the State is dependent upon agriculture and household industry for its living, and more than 50 per cent of the State income is derived from these sectors in which family labour is common. It is evident, therefore, that family labour plays a very significant role in our national economy. A fuller measure of family labour is, therefore, essential for national income computations and labour force projections.

Change in 1961—'work' the main basis

It was in this background that on the eve of the 1961 Census, conferences of important users of census data (e.g., the Planning Commission, the Central Statistical Organisation and Ministries of the Central Government) were held in August-September, 1958. It was decided that in the 1961 Census, emphasis should be on work or non-work of individuals rather than on their income. This marked a major and significant change in the approach to economic studies. According to the revised concept all persons who are engaged in some economic activity for personal or family gain are treated as workers. Thus, workers include family workers who work without receiving wages in cash or kind and are not in receipt of any separate income. These may be children as well. Contrarily, even persons in receipt of income are treated as non-workers if they are not actively participating in any economic activity of production or service. Thus pensioners, beggars and rentiers are classed as non-workers.

Economic Questions in 1961

The following questions relating to economic aspects were asked of each individual at the 1961 Census :

8 Working as Cultivator _____

9 Working as Agricultural Labourer _____

10 Working at Household Industry—

(a) Nature of work _____

(b) Nature of Household Industry _____

(c) If Employee _____

11 Doing Work Other than 8, 9 or 10—

(a) Nature of work _____

(b) Nature of Industry, Profession, Trade or Service _____

(c) Class of Worker _____

(d) Name of Establishment _____

12 Activity if not working: _____

Who are 'workers' ?

Broadly speaking, the entire population consists of two types of people—workers and non-workers. Workers are persons engaged in some form of economic activity which is productive as well as gainful. 'Production', relates not only to goods, but also to repairs and services. The following excerpt from the 'Instructions to Enumerators' show how the concept of 'workers' was brought home to the enumeration agency :

"These questions (8—11) apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9 or he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10 or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places, or, he may be doing just one kind of work in which case he will be entered in only one of the four questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual

questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long-term inmates of penal or charitable or mental institutions, the persons' previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work

such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass etc, or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11."

What is work ?

It will be evident from the above that no attempt was made in the "Instructions to Enumerators" to define the terms 'work' or 'worker' in a formal manner. It was felt that no such definition could really be comprehensive enough to meet all kinds of eventualities. At the same time, a formal definition would inevitably tend to enter into complex, and often abstruse, economic concepts which would be much beyond the understanding of an average enumerator. Besides, a rigid application of the definition could also lead to several difficulties and unintended results. The concept was, therefore, sought to be explained more by elaboration and illustrations rather than in terms of terse, technical phrases. However, an analysis of the idea contained in the foregoing instructions would reveal that—

(i) Work constitutes participation and

(ii) Work implies production of economic goods or rendering of services either for consumption or for sale or exchange.

Basis of work

The basis of work is laid down separately for (i) seasonal work like cultivation, livestock, dairying, household industry, etc. and (ii) regular employment in trade, profession, service, business or commerce.

(i) In the former case, i.e., seasonal work, the basis of work is deemed to be satisfied if the person has had some regular work of more than one hour a day through the greater part of the working season.

(ii) In the latter case, i.e., regular employment, a person to be a 'worker' should have been employed during any of the fifteen days preceding the day of enumeration.

What is not work ?

In the following cases, by definition, the persons were not to be treated as 'workers':

(a) Adult women engaged in household duties but doing no other productive work.

(b) Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who may be earning an income but not participating in productive work, unless they work in cultivation, industry, trade, profession, business or commerce. The main reason behind the exclusion of 'housewives' from the category of 'workers' was that such activity is not production of goods or exchangeable services, and cannot therefore be deemed to be 'economic' in the strict sense of the term.

Some points to remember

It will be well to remember the following points in this connection :

(i) Work includes not only actual work but effective supervision and direction of work.

(ii) Persons under training as apprentices with or without stipend or wages have been recorded as working.

(iii) An adult woman, who engages herself in work such as rice-pounding for sale or for wages, or in domestic services for wages for others, or minding cattle or selling firewood or making and selling cowdung cakes or grass etc., or any such work, is a worker.

(iv) A public or social worker actively engaged in public service activity or a political worker actively engaged in furthering the political activity of his party, even in an honorary capacity, is a worker.

(v) A person, who was working but was absent from work due to illness or

other causes during fifteen days preceding the day of enumeration or even exceeding the period of fifteen days, is a worker.

(vi) An undertrial prisoner enumerated in a jail is a worker if he was working before being apprehended. In this case as well as in the above the previous work of the person concerned was noted.

(vii) Convicts in prison or long-term inmates or penal, charitable, or mental institutions, however, are non-workers.

(viii) A person, who has been offered work but not actually joined, is a non-worker.

(ix) For a person, who was treated as employed on the day of enumeration but was found unemployed subsequently during the revisional round, no correction was made in the original record.

Economic Questions in previous census

Appendix I at the end of this Note gives a complete list of the economic question asked at successive censuses since 1881. These will give some idea of the approach to economic classification of population in the past.

Economic classification at various censuses since 1901

1961 Census

The entire population is divided into 'workers' and 'non-workers'. 'Workers' are further classified into the following nine industrial categories :

I Working as Cultivators.

II Working as Agricultural labourers.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX. Working in Other Services.

Category X relates to non-workers.

The industrial categories of Census correspond to the Divisions of the Standard Industrial Classification as follows :

Census Industrial Category 1961	Division of the Standard Industrial Classification
I Cultivator	.. Part of 0
II Agricultural labourer	.. Part of 0
III Forestry, Fishing, Livestock, Orchard, Mining, Quarrying etc.	Part of 0 and 1
IV Household Industry	.. Part of 0, 1, 2 & 3
V Manufacturing other than Household Industry	2 & 3
VI Construction	.. 4
VII Trade and Commerce	.. 6
VIII Transport, Storage and Communications	and 7
IX Other Services	.. 5, 8 and 9

It is usual to consider the economy as comprising three broad sectors, viz.,

Primary—Production of goods not involving manufacture, as in cultivation, forestry, fishing, hunting and plantation.

Secondary—Production of goods by manufacture, as in household and non-household industry, mining and quarrying, construction, gas and electricity supply.

Tertiary—Professional services as in trade and commerce, transport, storage, communications and other services.

The three sectors are represented by the industrial categories as follows:

Sector	Industrial Category of workers of 1961 Census
Primary	I II III (excluding Mining and Quarrying)

Secondary	III (Mining and Quarrying only) IV V VI IX (Gas and Electricity supply only)
Tertiary	VII VIII IX (Excluding Gas and Electricity supply)

Keeping the Industrial Categories intact, the correspondence is more roughly as follows:

Sector	Industrial Category of Workers of 1961 Census
Primary	I II III
Secondary	IV V VI
Tertiary	VII VIII IX

1951 Census

In 1951, the entire population was divided into two broad livelihood classes, viz., Agricultural and Non-agricultural. Each class was further divided into 4 categories as below :

Agricultural Classes—

- Cultivators of land, wholly or mainly owned; and their dependants.
- Cultivators of land, wholly or mainly unowned; and their dependants.
- Cultivating labourers; and their dependants.
- Non-cultivating owners of land; agricultural rent receivers; and their dependants.

Non-agricultural Classes—

Persons, including dependants, who derive their means of livelihood from—

- Production (Other than cultivation).
- Commerce.

VII Transport.

VIII Other services and miscellaneous sources.

NOTE—Land was deemed to be 'Owned' if it was held on any tenure which carried with it the right of permanent occupancy for purposes of cultivation.

Each of the eight livelihood classes was divided into three sub-classes as below:

- (i) Self-supporting persons;
- (ii) Non-earning dependants;
- (iii) Earning dependants.

A person, who was in receipt of an income, whether in cash or kind, which was sufficient at least for his own maintenance, was regarded as a self-supporting person.

A non-earning dependant was one, who did not secure any income, in cash or kind and was wholly dependant on the earning of someone else.

An earning dependant was a person, who secured a regular income, but whose income was not sufficient to support him.

1941 Census

No economic tables were prepared for the 1941 Census on account of the Second World War. However, the approach to economic questions in the Census also was 'income-oriented' and, more or less similar to 1951.

A person who had no income in cash or kind was treated as "wholly dependant".

A person who contributed in cash or kind towards the support of the household without being definitely capable of supporting himself was treated as "partly dependant".

A person who was not dependant on any other person was treated as an "independent worker".

1931 Census

The concepts were essentially the same as in 1941 and 1951. The entire population was divided into "earners", "working dependants" and "non-working dependants".

An "earner" was one who did work or carried on business whether principally or by means of servants for which a return was obtained in cash or kind or who lived on house rent, pension, etc.

A "working dependant" was one who worked and had an occupation but did not receive any income in cash or did not control the means of subsistence gained.

A "non-working dependant" was one who did not work and had no occupation.

There were two economic tables for this Census. Table X dealt with the occupation or means of livelihood of the total population, while Table XI gave occupations of selected castes, tribes or races.

All occupations were classified according to a scheme which comprised 4 main classes, 12 sub-classes, 55 orders and 195 groups. The main classes and sub-classes were as follows:

A.—Production of Raw Materials.

I Exploitation of animals and vegetation.

II Exploitation of minerals.

B.—Preparation and supply of material substances.

III Industry.

IV Transport.

V Trade.

C.—Public administration and liberal arts.

VI Public force.

VII Public administration.

VIII Professions and liberal arts.

D.—Miscellaneous.

IX Persons living on their income.

X Domestic service.

XI Insufficiently described occupations.

XII Unproductive.

1921 Census

The total population was divided into two categories, "actual workers" and "dependants".

The term "actual worker" included all persons "who actually did work or carried on business whether principally or by means of servants or who live on house rent, pension, etc." The persons who were not "actual workers" were "dependant".

Table XVII of 1921 deals with occupation or means of livelihood. The scheme of presentation of data was precisely the same as the one followed in 1931.

1911 Census } Same as in 1921.
1901 Census }

Reference period

In previous censuses, the economic studies were related to the 'usual status' with reference to a time-period extending upto a year. It is well-known that in our economy, agriculture and household industry loom large over other activities. Much of the activity in these sectors is on subsistence level and of seasonal character. Owing to the diversity of conditions and vastness of the country, what is current active season in one part may be fallow season in another at any point of time.

It was, therefore, decided to adopt a two-pronged reference period :

- (i) For agriculture and allied activities and household industry : a working season (current or last) because anything less than a working season might leave out some of the regularly employed and might enumerate the very casual helper.
- (ii) For regular employment in trade, profession, service, business or commerce : employment during any of the fifteen days preceding the day of enumeration. A shorter period might inflate the population at work, while a longer period than a fortnight might lead to a vague 'usual status'. It was decided that a fortnight would be safe, as it was recommended in the U. N. Handbook for certain types of economy corresponding to India's.

In case of seasonal work, 'regular work of more than one hour a day' was inserted in order to cut out trivial help. The intention was to net, among others, the unpaid adult female family worker who, from an examination

of past trends, was suspected to have been seriously under-enumerated, particularly in the south, in 1951. The U. N. suggestion of 'one-third of one full pay' presupposed a wage day of 8 hours, which in cultivation or household industry in India would be meaningless. Except in the peak season, ordinary work during agricultural season for any adult does not exceed 4 to 5 hours. The concept of 'more than one hour a day' was decided upon as the point where a woman would have to leave aside her household chores or leave home for substantial period, avowedly with the intention of participating in economic activity, when she would not permit her domestic obligations to interfere with her work ; i.e. in her reckoning, work at this time would take precedence over domestic duties. 'More than a hour' in rural parlance usually means 'a long time' or substantial period, which would cut out work of trivial nature or lending a casual hand in between two domestic chores. It cannot be said that this liberalised previous census definitions. If anything it underscored *usual status* concept but may have led to some over-estimation in actual count. This so-called 'over-estimation' can only be measured against a long-term trend, as there is no set of figures in our possession which can be regarded as a true measure or correct estimate.

Conversion of previous data to 1961 Census

For certain studies, it may be necessary to convert the economic data presented at previous censuses to those of 1961. Extracts from 'A Note on Working Force Estimates, 1901—61' by Shri B. R. Kalra, printed as Appendix I to Final Population Totals 1961 Census (Census of India Paper no. 1 of 1962) indicate the basis on which this can be done. This is given in Appendix II to this Note.

Appendix III to this Note gives the details of each minor group of the Indian Standard Industrial Classification, the numbers of persons returned against each and also the correspondence of these minor groups of the Indian Standard Industrial Classification with the subdivisions of the Indian Census Economic Classification scheme of 1951 Census and the persons returned against these subdivisions of the I. C. E. C. in 1951. The figures for 1951 relate only to self-supporting persons with regard to their principal means of livelihood and hence they are not strictly comparable with those of 1961 Census. Figures have been recast according to the jurisdiction of the State and districts in 1961.

Working as Cultivator

This related to question 8 of the Individual Slip. The following extract from the "Instructions to Enumerators" will explain the meaning and significance of the term—

"For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit-growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantation like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of the produce (Agricultural Labourer) will not be treated as cultivator in this question".

It is to be noted that according to the above instructions even *bataidars* or share croppers have been treated as cultivators. Cultivation involves ploughing, sowing and harvesting, and a person who supervises or directs the work of cultivation is also a cultivator. Plantation workers, fruit growers or orchard-keepers were, however, not treated as cultivators.

Working as Agricultural Labourer

An agricultural labourer is a person "who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce." This concept is related to Question 9 of the Individual Slip, and the instructions required that "the labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as agricultural labourer in the last or current cultivating season". Thus, an agricultural labourer is a pure wage-earner in the field who participates in agricultural work without having any kind of right or interest in land or even any stake in the success or failure of crops.

Working at Household Industry

A household industry is defined as an industry "conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory". The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. "A Household Industry should relate to production, processing, servicing or repairing and includes making and selling of goods."

In this connection it may be noted that the term "industry" relates to any kind of production, processing, servicing and repairing of goods and includes making and selling of goods. A household industry being only a special kind of industry, must possess these attributes. In addition, the following conditions must be fulfilled by a household industry.

- (1) *Scale of operations*—A household industry must not be on the scale of a registered factory (i.e., not employing more than 20 workers if using power, or more than 50 workers if without power).

- (2) *Participation*—In a household industry, the workers will be the head of the household himself and/or mainly members of the household, the role of hired workers from outside being of secondary importance.

- (3) *Location*—This is also important, because proximity decides participation by members of the household. In rural areas, household Industry can be located either at home or within the village. But in an urban area, the household industry or at least the major part of its work must be located only at home. It must, however, be noted that the production, processing or servicing of goods must be mainly for sale or commercial benefit, and not simply for home consumption, though a part of the goods produced may be used for home consumption also.

The following excerpt from the "Instructions to Enumerators" will explain the position:

"The test for a Household Industry is mainly three fold :

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and hand-sewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

× × ×

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You

should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10 (a) and the nature of the Household Industry against 10(b)".

A list of common Household Industries in the country and with their industrial code numbers prepared by the Registrar-General, India, is given in Appendix IV.

Examples of entries relating to household industry are given below :

Doing work other than cultivation, agricultural labour or household industry

This related to Question 11 of the Individual Slip, and was meant to cover persons working in mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities (Category III), in manufacturing other than household industry (Category V), in construction (Category VI), in trade and commerce (Category VII), in transport storage and communication (Category VIII) and in other services (Category IX). The instructions to enumerators read as under :

Q. 11 Doing work other than 8, 9, or 10

"If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person

Q. 11(a) Nature of work

In the case of persons not working or who work *only* as cultivator or as agricultural labourer or at Household Industry, put X.

is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchards or plantation, etc. as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11 (b) Industry, Business, Trade, Profession or Service

In the case of a person who is working and the nature of whose own work has been recorded in Question 11 (a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an X is put in Question 11 (a), put an X in this question also.

Important points to remember in questions 11 (a) and 11 (b)

1. Women or children who help with work such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the work*

mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.

2. If a person makes the articles he sells, he should be entered as maker and seller of them.
3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.
4. The following are too vague and must not be used by themselves:—
Scientist, Technician, Civil servant, Clerk, Engineer, Inspector, Checker, Foreman, Overseer, Supervisor, Labourer, Machinist, Assistant, Contractor, Polisher.
5. *Labourers*—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazaar porter, labourer employed on road digging, brick-layer's labourer. If accustomed to work on various jobs, write general labourer.
6. *Machine operators*—Always state the kind of machine giving its recognised name, if any.
7. *Shop-keepers, Retail Dealers, Shop Assistants*—If wholly or mainly engaged in selling, write, 'Dealer' (if principal) or, 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway parts, Fans and Sewing Machines, Grocers and Confectioners).
8. *Transport Workers*—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle or vehicles drawn by horse, etc.
9. *Services*—For a person engaged in the Defence Services write 'Service of Central Government'.
10. If the job is known in the trade or industry by a special name use that name. Managers, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman,

etc. The following terms are insufficient by themselves :

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. *Domestic services*—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in this case but in the case of person employed in hostels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at

the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then major activity of the firm or establishment should be given.

12. *Commerce*—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated."

Distinction between Industry and Occupation

It will have been noted that the basic economic classification adopted in Census is by the kind of industry in which the worker is engaged. The concept of 'industry' should not be confused with that of 'occupation'. 'Industry' means that sector of economic activity in which the earner is engaged e.g., textile industry, automobile industry, steel industry, cement industry, etc., whereas 'occupation' describe the exact function that an individual performs in that sector: e.g., fitter, carpenter, accounts clerk, office peon, etc. Thus occupation is eventually related to the nature of function or duties performed while industry is related to the kind of product(s) manufactured or service(s) performed.

The Census Industrial Category was derived from Qs. 8,9 and 10 of the Individual Slip for such persons as returned their principal work under any of these questions. For the remaining persons who returned their principal work under Question 11, the information contained in part (b) of the Question provided the basis for classification into industrial category. Information regarding the

actual occupations of the person engaged in any industry was elicited under Questions 10 (a) and 11(a). The instructions relating to these Questions have been reproduced earlier.

The distinction between the occupation of a person and the industry in which he is working may be brought out further by citing a few illustrative example. A doctor or a civil engineer or an accounts clerk or an unskilled labourer may be working in a steel factory or a paper mill. The industrial classification of such persons viz., doctor, engineer, clerk or labourer working in a steel factory will be the industrial category relating to production of steel. However, so far as the occupational classification is concerned, the doctor, engineer or clerk are classified differently according to the occupations they actually follow.

The National Classification of Occupations used by the Ministry of Labour and Employment, Government of India has been utilised for classifying the occupations in the statistics pertaining to occupation. These are presented in Tables B-V and B-VI [being published in a separate Sub-part (ii) of Part II-B].

APPENDIX II

Extract from A Note on Working Force Estimates, 1901—61 by Sri B. R. Kalra

As the tripartite division of the economic status has been done away with in 1961, the changes in 1951 and 1931 data have been made in order to conform to the new division of the population into workers and non-workers. For earlier censuses,

while 'actual workers' have been generally treated as workers, the 'dependants' have been shown among non-workers. Among 'actual workers', those pursuing unproductive occupations have been transferred to non-working population.

1951 Census :

Workers in 1951 Comprised of :

(i) All self-supporting persons with productive principal means of livelihood, i.e., all self-supporting persons other than (a) agricultural rent-receivers belonging to livelihood Class IV and (b) self-supporting persons deriving their means to livelihood from non-agricultural, non-productive occupations, like beggars, pensioners, etc. belonging to livelihood Class VIII.

(ii) Self-supporting persons belonging to livelihood Class IV (agricultural rent receivers) but deriving secondary means of livelihood from productive occupations, i.e., other than Class IV.

(iii) All earning dependants in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from :

(a) receipt of agricultural rent under Class IV, and

(b) non-agricultural non-productive occupations. (For calculating working force, no account has been made of the self-supporting persons whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood, as unlike rent receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood).

Non-workers of 1951 were equal to :

(i) All non-earning dependants ;

(ii) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood;

(iii) The following groups of self-supporting persons included in non-agricultural Class VIII :

(a) Persons living principally on income from non-agricultural property ;

(b) Pensioners and remittance holders;

(c) Inmates of jails, asylums, alms houses and recipients of doles, beggars and vagrants, and

(d) Other persons living principally on income derived from non-productive activity.

(iv) Earning dependants whose own means of livelihood (Secondary means of livelihood) was agricultural rent-receiving under Class IV, and

(v) Earning dependants whose secondary means of livelihood was non-agricultural non-productive. The number of this group have been estimated at 455,792 (106,771 males and 349,021 females). This estimate has been worked out on the basis of proportion of non-productive self-supporting persons to all self-supporting persons in the non-agricultural classes. These earning dependants were deducted from Class VIII and placed among non-workers.

NOTE.—Figures in the sub-paragraph relate to All-India.

1931 Census :

I. Workers :

(i) All earners following productive occupations ; and

(ii) All working dependants following productive occupations.

II. Non-workers :

(i) All Non-working dependants ;

(ii) Earners and working dependants following non-productive occupations :

(a) Non-cultivating proprietors taking rent in money or kind ;

(b) Proprietors (other than agricultural land), fund, scholarship holders and pensioners ;

(c) Inmates of jails, asylums and alm-houses ;

(d) Beggars and vagrants ;

(e) Procurers and prostitutes ;

(f) Other unclassified non-productive industries.

1921 and 1911 Censuses :

I. Workers :

All "Actual Workers" having productive occupations ;

II. Non-workers :

(i) "All dependants" ; and

(ii) All "Actual workers" in non-productive occupations as stated in case of 1931 Census.

1901 Census :

I. Workers :

(i) All "actual workers" having productive occupations ;

II. Non-workers :

(i) All "dependants" ; and

(ii) "Actual workers" in non-productive occupations ;

(a) Rent-receivers ;

(b) Prostitutes procurers, pimps etc. ;

(c) Receivers of stolen goods ;

(d) Witches, wizards, cow-poisoners etc.,

(e) House-rent, share and other property not being land ;

(f) Allowances for patrons or relatives ;

(g) Educational or other endowments, Scholarships, etc. ;

(h) Mendicancy (not in connection with a religious order) ;

(i) Pensioners, inmates of asylums, prisoners, etc.

No sex-wise break-up of dependants was available in the Censuses of 1921, 1911 and 1901. After subtracting from the male population all male workers of productive and unproductive occupations the remainder gave an estimate of the male component of dependants. Similar procedure was adopted in the case of female dependants.

Industrial Classification of Workers

Table-I indicates the reclassification of groups and sub-divisions in earlier censuses on the basis of 1961 broad industrial classification. For this purpose, the groups in earlier censuses were first related to the groups

in the Indian Standard Industrial Classification (I.S.I.C.), adopted in 1961 and then consolidated into nine broad industrial categories of workers. The following have been the main readjustments.

Owner cultivators, tenant cultivators, estate agents and managers and shifting cultivators have been shown against category I of 1961 (Cultivators). Toddy drawers who were included under food industries in previous censuses have been included in industrial category III. This could not be done in the case of 1951 since toddy drawers were included with other workers in processing and manufacture of beverages. No estimate could be made for persons working in industrial category IV (Household Industry). Persons working in Household Industry are included in industrial categories III and V.

Workers in generation and transmission of electric energy and gas works have been included in category V 1961 (Manufacturing other than Household Industry). In the case of 1901 Census "makers and sellers" have in all cases been listed under category V. wherever possible, persons employed on construction and maintenance of roads, railways, bridges, harbours, canals, rivers, aerodromes etc., have been shown under category VI (Construction). Workers who operated such transport works were shown under category VIII (Transport Storage and Communications).

Rent Collectors, clerks etc., of ex-zamindars and jagirdars have been transferred to category IX (Other Services). This category also includes washing, cleaning and dyeing, barbers, hair-dressers, and scavenging which were listed in earlier censuses in industry and hotel-keeping which was shown in earlier censuses under Trade. Private motor-drivers and cleaners have been included in category IX and not under Transport.

In 1951 Census, classification of population into divisions and sub-divisions was done only in respect of self-supporting persons and that also with regard to their principal means of livelihood. Thus, no divisionwise break-up of earning dependants and self-supporting persons with regard to their secondary means of livelihood was available. In these Tables earning dependants have been divided into their respective divisions and sub-divisions of the livelihood class to which they belonged in the proportion of self-supporting persons in those

divisions and subdivisions as available in Economic Table III. Self-supporting persons belonging to livelihood Class IV who had a productive secondary means of livelihood have also been distributed in similar manner. However, while distributing earning dependants, it was assumed that their number in the following subdivisions was insignificant as observed in the States of West Bengal and Uttar Pradesh where detailed classification of earning dependants into divisions and subdivisions was made.

- 7.4 Railway Transport
- 7.6 Postal Services
- 7.7 Telegraph Services
- 7.8 Telephone Services
- 7.9 Wireless Services
- 8.1 Medical and other Health Services

- 8.4 Police (other than village watchman)
 - 8.6 Employees of local Boards and Municipalities (but not including persons classifiable under any other division or subdivision).
 - 8.7 Employees of State Governments (but not including persons classifiable under any other division or subdivision).
 - 8.8 Employees of Union Government (but not including persons classifiable under any other division or subdivision).
 - 8.9 Employees of non-Indian Governments.
- No allocation of earning dependants was, therefore, made in respect of these subdivisions.

ANNEXURE

While a detailed analysis of the statistics thrown up in the Census Tables will be undertaken in the General Report (Part I-A) some salient features of the tables presented in this volume are indicated below. The discussion is brief and restricted to an examination of proportionate figures based on the tables up to the State level only.

Table B-I—The classification of the population into workers and non-workers per 1,000 persons, males and females by rural and urban areas severally of each district and in cities and town-groups of population one lakh and over has already been given at pages 360—365 of Part II-A. An abstract for the State is given below :

STATEMENT I

Distribution of 1,000 persons into workers and non-workers by sex and for total, rural and urban areas in Bihar

	Persons	Males	Females
1	2	3	4
TOTAL			
Total	1,000	1,000	1,000

Non-workers	578	440	715
URBAN			
Total	1,000	1,000	1,000
Workers	332	517	104
Non-workers	668	483	896

The working population is only 41.4 per cent of the total. It is seen that the percentage of workers is higher in rural areas (42.2 per cent) than urban areas (33.2 per cent). While the picture holds good for both the sexes, the extent of variation is larger in the case of females. The existence of a good number of persons in educational institutions in the urban areas probably accounts for the low percentage

of workers among males in them. While this factor may also weigh in the case of females, the main reason in their case appears to be that the urban professions are more skilled and, therefore, draw a lesser number of women. The relative position of different categories of workers among the total workers for persons, males and females is indicated in the following statement :

STATEMENT II

The heavy preponderance of agriculturists (cultivators and agricultural labourers) in the working population is at once evident. They account for nearly 77 per cent of the total working population. The next important group is Category IX (Other Services). One out of every 13 workers comes from this group. Category IV (Household Industry) has no more than one out of every 18 workers. The other categories contribute small percentages, the lowest being that of Category VI (Construction). As between males and females, there are marked differences. The males have greater diversification. Among females, Categories I, II, IV and IX

account for more than 96 per cent of the workers. While the proportion of cultivators is almost the same among workers of both sexes, more females per 100 female workers are drawn towards agricultural labour and household industry.

The main significance of Table B-I lies in the presentation of data relating to industrial classification by broad age-groups. The distribution of 1,000 workers for persons, males and females in the total working population and each industrial category by broad age-groups is given in the following statement :

Strictly speaking, according to views of some economists, persons below 15 years of age should not be considered as constituting the working population at all. However, it is seen that 8 per cent of the total working population of the State falls in this age-group. That the proportion of child workers should be highest (31.6 per cent) in Dairying, etc., (Category III) and quite high (13.5 per cent) in Household Industry (Category IV), only underlines the usefulness of young children in attending to cattle and other animal wealth and provides statistical confirmation of the reluctance on the part of many to send their children to schools. It is pertinent that the ratio of child workers is higher among females for the entire working population as well as most industrial categories individually. As is to be expected, the bulk

of the working population in all categories comes from the age-groups 15—34 and 35—59.

Table B-III—This table correlates the workers in the different industrial categories with the extent of literacy and education. An abstract is given below. Column 2 shows the total number of workers and their distribution in different industrial categories. Column 3 gives alongside the numbers of literate and educated workers. In column 4, the percentage of literate and educated workers is given, the latter figures also being expressed as percentages to total workers and workers in each industrial category. Column 5 shows the distribution of 100 literate and educated workers by different industrial categories.

STATEMENT IV

It is evident that industries of the secondary and tertiary sectors have higher overall literacy rates than those of the primary sector. The only exception is Category IV (Household Industry) which, in fact, is more akin to the primary sector. Notwithstanding this, however, by force of sheer numbers, the literate cultivators comprise more than half of the total literate workers.

A more elaborate classification of the literate population by different educational levels is given in Table B-III Part A which is for urban areas only. The distribution of 1,000 workers, in urban areas of the State, in each industrial category by different educational levels is given in the following statement :

NOTE—N Denotes negligible, i.e., figures less than 0.5.

The general picture of literacy being lower in the primary and secondary sectors remain unchanged even in urban areas. However it is important to note that these sectors are numerically not so important here. The extent of literacy is highest in Category VII (Trade and Commerce) followed by Categories V and VIII. If matriculates are considered, the proportion is highest in Transport and Communications followed by 'Other Services' and 'Manufacturing other than in household industry'. While

University degree-holders have the highest proportion in 'Other Services', it is peculiar that even technical degree holders disclose similar features in this category, though they are not quite insignificant even in Categories III, V and VI.

Table B-IV Part B—This is an important table which gives the detailed breakup of persons engaged in non-household industry, trade, business, profession or service. It should serve as an index to

the extent of the population engaged in these activities. The following statement gives the ratios of status of employment for each Division of the I.S.I.C. separately for the total, rural and urban working populations of this category.

Employees constitute the largest single element among the workers. Their proportion is the highest (97.7 per cent) among workers in the urban areas under Division 1, (Mining and Quarrying) and Division 5 (Electricity, Gas, Water and Sanitary Services). It is over 70 per cent in Division 7 (Transport, Storage and Communications) and less than 50 per cent in others except Division 8 (Services), for urban areas and in Division 2 & 3 (Manufacturing) in which it is 60 per cent. Family workers and single workers are uncommon except in

Division 6 (Trade and Commerce) in the rural areas, Division 8 (Services) and Division 4 (Construction). It is evident that persons such as barbers, *dhobis* and others engaged in personal services have figured in Division 8 (Services) and petty masons have similarly occurred in Division 4 (Construction).

The following statement gives the distribution per 1,000 workers of categories III to IX classified by total and urban separately for persons, males and females into each Division of the I.S.I.C. :

It is peculiar that the proportion for Division 2 & 3 is higher in the total working population than in the urban. Services account for the largest bulk of the working population both in rural and urban areas. While construction, water and sanitary services, trade and commerce, and transport have proportionately larger number

of adherents in urban areas, the opposite holds good in the case of Industrial Divisions 0 and 1. The following statement gives the breakup of industrial participation in Divisions 0, 1, and 2 & 3 by the extent of household and non-household industry.

STATEMENT VIII.

Number of workers in each of the Divisions 0, 1 and 2 & 3 in Bihar and their Distribution by Household and non-Household Industry

2 & 3 Manufacturing	.. 1,327,369 (1,000)	425,896 (321)	901,473 (679)

It is clear that manufacturing is still mining and quarrying are hardly carried out on essentially a household proposition whereas a household basis.

The following Statement gives the sex-ratios for each Industry Division in non-household and household industry for total and urban.

STATEMENT IX

Sex ratios, i.e. the number of female workers per 1,000 of male workers for each industry division in household industry and in non-household industry, trade, profession, etc.

The participation rates of females are much higher in household industries than in non-household industries. In urban areas, however, these rates come down considerably. Comparatively speaking, females find greater employment in Divisions 8, 5 and 0, and are rather poorly represented in Divisions 7 and 4. The sex ratio in household industry workers in Division 2 & 3 is not so adverse as in other cases.

The following Statement gives the distribution of workers in manufacturing industries.

Males comprise the bulk of persons having secondary work, there being roughly 2 males for every female.

Among persons having cultivation as principal work, as many as 81.8 per cent have agricultural labour as their secondary work. Similarly, among those having agricultural labour or

household industry as their principal work, as many as 92.9 and 78.1 per cent respectively have cultivation as secondary work. Thus, while the bulk of cultivators find secondary occupation in agricultural labour, cultivation itself is the main secondary pursuit of those principally engaged in agricultural labour or household industry.

The following Statement gives the percentage of workers in cultivation or in agricultural labour or at household industry having secondary work in either of the two categories.

Only 1 out of every 5 cultivators or agricultural labourers has secondary work in either of the two categories or at household industry. In the case of workers engaged principally at household industry the proportion of those having secondary work is higher (1 in 4).

The relative importance of different kinds of secondary work is essentially a rural characteristic, secondary work has been indicated earlier. It Urban areas have comparatively smaller may be noted here that the prevalence of proportions of those engaged in secondary work.

It is evident that a very small fraction of workers in non-household industry actually have some household industry an additional work. Among them the highest numbers are of workers in Divisions 8 and 6. Division 2 & 3 accounts for the bulk of those having additional work at household industry.

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

TABLE B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

FLYLEAF

This is the basic economic table. It gives for the State, and for each Division and District, the primary economic classification of the population. In this respect, this table is similar to the Primary Census Abstract which has been presented in Part II-A of the State Volume (Volume IV) up to the level of Anchals and towns, and will be reproduced in the Village Statistics portion of the District Census Handbooks for individual villages and wards of towns and cities.

Figures have been given in this table separately, for total, rural and urban population. For the definition of a 'town', a reference may be made to the flyleaf of Table B-II. Whatever area is not urban, is rural. The significance of presenting economic classification of the population separately for rural and urban areas lies in the fact that they are, by definition supposed to have different patterns. Barring certain exceptions, which only show how 'rural' certain urban areas actually are in our State, this observation will be borne out by figures in the table.

The entire population consists of two main sections—workers and non-workers. A 'worker' is a person who participates in the production of economic goods or services either for consumption or for sale or exchange. Apart from actual work, 'participation' includes effective supervision and direction of work.

Workers have been classified into nine categories according to the sectors of economy in which they are engaged. These sectors relate to persons working—

- I As Cultivator;
- II As Agricultural labourer;
- III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities;
- IV At Household Industry;

- V In Manufacturing other than Household Industry;
- VI In Construction;
- VII In Trade and Commerce;
- VIII In Transport, Storage and Communications; and
- IX In Other Services.

Category X relates to non-workers. A break-up of non-workers by sex, broad age-groups and type of activity is given in Table B-IX appearing in Part II-B (ii).

For a fuller understanding of the concepts and implications of the terms 'Work', 'Workers', 'Working as Cultivator', etc., a reference may be made to the Introductory Note.

A special feature of this table is the break-up of workers and non-workers into four age-groups, viz., 0—14, 15—34, 35—59 and 60+. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons.

Comparison with previous censuses—The Census of 1961 marks a vital and significant change from previous censuses in the approach to economic enquiries. A reference may be made to the Introductory Note for understanding its full implications. It may, however, be noted here that the concept is now 'work-oriented' instead of 'income-oriented' as in the censuses of 1951, 1941 and 1931. While comparing the 1961 data with earlier censuses, this point must, therefore, be borne in mind.

Table B-I corresponds, though only in part, to Table B-I of 1951 (Livelihood Classes and Sub-classes), Table X of 1931 (Occupation or means of livelihood), Table XVII of 1921, Table XV of 1911 and 1901.

**TABLE B-II—WORKERS AND NON-WORKERS IN CITIES, TOWN-GROUPS AND TOWNS
ARRANGED TERRITORIALY CLASSIFIED BY SEX AND BROAD AGE-GROUPS**

FLYLEAF

This table is similar to Table B-I, and gives basic economic data for each city, town-group and town classified by sex and broad age-groups.

It is for the first time that the economic classification of urban population for each city, town-group and town is being made available at this Census, and in such great detail. It should be useful to local bodies as it furnishes the figures of employment in different industrial sectors by age-groups.

Definitions—

Town—A 'town' includes—

- (i) every municipality or notified area ;
- (ii) all civil lines not included within municipal limits ;
- (iii) every cantonment ; and
- (iv) every other place which ordinarily
 - (a) has a population of not less than 5,000 persons,
 - (b) density not less than 1,000 persons per sq. mile,
 - (c) at least three-fourths of the adult male population engaged in non-agricultural livelihood, and
 - (d) which has been declared by the Superintendent of Census Operations to be a town for census purposes in 1961.

Town-group—If two or more towns are contiguous to one another and so constituted that they form together a compact urban block, the entire area is treated as one town-group. The concept of town-group is new and has been introduced for the first time at this Census. It is hoped that the adoption of this concept will enable a better appreciation of the needs of such units which, though technically separate, actually form part of one urban complex and should be treated as such for planning and development of urban amenities such as transport, sanitation, water supply, drainage, electricity, etc.

City—A 'city' means a town containing not less than 100,000 inhabitants.

Comparison with previous censuses—This table corresponds to Table A-V of 1951 in which the distribution of population of each town was shown by six livelihood classes, the classes I—III (Cultivators, Cultivating labourers and their dependants) having been combined together into one group for the sake of economy and because of the less significant role played by them in urban areas. In 1941, no economic tables were prepared. Table X (Part II) of 1931 gave information regarding occupation or means of livelihood of the urban population in cities only. In Part A of Table XVII of 1921, and of Table XV of 1911 and 1901, summary figures can be found for all the cities taken together.

TABLE B-III PART A—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS
BY EDUCATIONAL LEVELS IN URBAN AREAS ONLY

FLYLEAF

This is an important table. It shows the employment pattern of persons in different industrial categories by their educational levels. Each of the nine categories of workers and also the non-workers have been cross-tabulated by literacy and educational levels. Such information should be of much use in assessment of educational qualification of available man-power.

Table B-III Part A relates to urban areas only. The range of information furnished in this table by different educational levels is naturally elaborate, and relates to the following:

- (i) Total
- (ii) Illiterate
- (iii) Literate (without educational level)
(This group includes all persons able to read and write, but who have not passed the Class V Examination of any school)
- (iv) Primary or Junior Basic [This group includes all persons who have passed Upper Primary (Class V) but not passed the Matriculation Examination. Persons who have passed Class VIII or X or even those who are Matric failed, fall in this category]
- (v) Matriculation or Higher Secondary
(This group includes persons who have passed the Matriculation or Higher Examinations)
- (vi) Technical diploma not equal to degree
(This category includes persons who are licentiates in draughtsmanship, civil or mechanical engineering, etc.)
- (vii) Non-technical diploma not equal to degree
(This category includes persons with qualifications not equal to degrees)
- (viii) University degree or post-graduate degree other than technical degree.
(The equivalence of examinations of certain bodies with those of recognized Universities was taken into consideration for this category)

The following table shows the equivalence adopted :

Definitions

Illiterate—A person who can neither read nor write, or can merely read but cannot write in any language, is illiterate. Persons aged 0—4 years are treated as illiterate.

Literate—A person who can both read and write is literate. The test for reading was ability to read a simple letter either in print or in manuscript. If the person enumerated could read one of the examples in the "Enumerator's Handbook" with felicity, he was taken to have passed the test for reading. The test for writing was ability to write a simple letter. The test for literacy was satisfied if the person could with understanding both read and write.

Educational level—If the person could both read and write and had also passed a written examination or examinations as proof of the educational standard attained, the highest examination passed by him was noted in the Individual Slip instead of 'literate'.

The figures of persons appertaining to particular educational levels in Table B-III Part A would ordinarily be expected to correspond with the figures of persons under the professional occupations which are associated with the possession of requisite educational qualifications. The occupational classification of persons engaged in different Industrial Categories is given in Table B-V [being published as Sub-part (ii) of Part II-B]. Some cases in which the correspondence is not marked are discussed below :

(a) In Bihar State 2,766 males have been returned as possessing degree (or diploma equivalent to degree) in Engineering. On the other hand 5,187 persons have been returned as engaged in families 000 to 006 of the National Classification of Occupations which comprise :

000—Architects
001—Civil Engineers including Overseers
002—Mechanical Engineers
003—Electrical Engineers
004—Chemical Engineers
005—Metallurgical Engineers
006—Mining Engineers

Thus the number of persons occupied as engineers (as outlined above) is roughly twice the number returned as holding degrees (or diploma equal to degree) in Engineering. It appears that the difference arises due to inclusion of 'overseers' in the occupational classification, although they do not possess degree (or diploma equal to degree) in Engineering. Moreover, according to departmental procedure, overseers (who are only diploma holders) sometimes get promoted as engineers. Such persons would obviously find place in families 000 to 006 of the National Classification of Occupations.

Disparities are also observed in comparing the figures of persons holding degree (or diploma equivalent to degree) in Engineering in Industrial Category VII (Trade and Commerce) with figures of families 000 to 006 in the same category. In Bihar State against 24 persons holding Engineering degrees, only 8 have been returned in Table B-V as following the occupations of engineers. This may be explained by the fact that holders of Engineering degrees sometimes prefer to work in commercial establishments in lucrative jobs such as those of managers and salesmen. Pertinently, it is only in Industrial Category VII (Trade and Commerce) that the number of persons in Engineering occupations

is less than the number of persons holding engineering degrees. In all other industrial categories it is the other way about.

(b) Some disparities in figures relating to degree holders in Medicine and persons who are working as doctors (occupation families : 030, physicians and surgeons; 033, physicians, others; and 034, physiologists) are also observed. Thus under Industrial Category VI in Saharsa district, there is one person holding degree in Medicine, but there is no person working as doctor in the same industrial category. The explanation seems to lie in the fact that although holding degree in Medicine the person may be working as director or manager or working proprietor (occupational family 131) in a constructional industry.

On the other hand, 5 persons in Dhanbad district have been returned as working as doctors in Industrial Category VI but no person has been returned as possessing degree

(or diploma equal to degree) in Medicine. As in the case of overseers, the explanation may lie in the fact that some persons may be practising as doctors although holding only a diploma in Medicine. There is also the possibility that some of the unqualified practitioners (quacks) may have been enumerated as doctors, although not holding the requisite medical qualifications.

(c) Finally, a comparison of figures of persons holding degrees in Veterinary and dairying with those working as veterinarians (occupational family 021) in this State reveals that there are 2 persons holding degrees in Veterinary and dairying in Industrial Category VIII whilst there are no veterinarians in the same industrial category in Table B-V. It appears that the two persons, although holding degrees in Veterinary and dairying, may have started their own industrial ventures, which would bring them in Industrial Category VIII, and have occupations different from that of veterinarians.

INDUSTRIAL CLASSIFICATION OF
WORKERS AND NON-WORKERS
BY EDUCATIONAL LEVELS
IN *RURAL AREAS ONLY*

**TABLE B-III PART B—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS
BY EDUCATIONAL LEVELS IN RURAL AREAS ONLY**

FLYLEAF

This is a corresponding table to Table B-III Part A, and relates to rural areas only. For understanding the scope and significance of certain terms occurring in the table, a reference may be made to the flyleaf to Table B-III Part A.

As this table relates to rural areas only, where there is less diversification of the economy and occupations, the educational levels are confined to (i) Primary or Junior Basic, and (ii) Matriculation and above. Figures of illiterate and literate (without educational level) have been given separately.

TABLE B-IV—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION BY SEX AND CLASS OF WORKER

FLYLEAF

This table is presented in three parts, viz.—

B-IV Part A—Industrial classification by sex and class of worker of persons at work at household industry.

B-IV Part B—Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.

B-IV Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.

Explanatory notes to each part are given in the flyleaf relating to that part.

This series of tables gives the detailed Industrial Classification of persons at work other than cultivation, by sex and class of worker.

Detailed classifications of the workers in Census Industrial Categories III to IX have been given in terms of the Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification adopted by the Government of India for use by the Employment Exchanges and "its various fact finding agencies".

A complete list of the Divisions, Major Groups and Minor Groups together with their code numbers is given in Appendix III to the Note at the beginning of the Volume. The appendix also shows the correspondence of the Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification scheme adopted in 1961 Census with the Divisions and Subdivisions of the Indian Census Economic Classification scheme of the 1951 Census.

**TABLE B-IV PART A—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF
WORKER OF PERSONS AT WORK AT HOUSEHOLD INDUSTRY**

FLYLEAF

The classification of persons at work at Household Industry (Category IV of the Census Industrial Classification) is presented for each branch of Industry as represented by the Divisions and Major Groups of the Indian Standard Industrial Classification (Column 1). Figures are given separately for total, rural and urban populations. The workers in each Division and Major Group are classified into two categories, viz., Employee (Columns 5 & 6) and others (Columns 7&8). Columns 3 and 4 give the figures of total persons working in the industry indicated by the Division and Major Group.

Household Industry is defined as an industry "conducted by the Head of the household himself

and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory."

By definition, a Household Industry is run mainly by the members of the household, but paid employees may also be working. The status of worker, if employee, was enumerated in Question 10 (c), according to the following instructions :—

"This question will be filled up only for a person who is working as a paid employee in another person's Household Industry."

TABLE B-IV PART B—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE

FLYLEAF

This table gives the industrial classification by sex and class of worker for persons at work in Non-household Industry, Trade, Business, Profession or Service (Categories III and V to IX of the Census Industrial Classification). Figures have been given separately for each branch of Industry classified according to Division and Major Group of the Indian Standard Industrial Classification (Column 1), for total and urban. While the total number of working males and females is given in columns 3 and 4, its break up into status or class of worker is given in columns 5 to 12. The status or class of worker was defined as follows:

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q.11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by

himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint-stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers."

TABLE B-IV PART C—INDUSTRIAL CLASSIFICATION BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS OF PERSONS AT WORK OTHER THAN CULTIVATION

FLYLEAF

This table gives the Industrial Classification by sex and Divisions, Major Groups and Minor Groups (of I.S.I.C.) of persons at work other than cultivation (i.e., Categories III to IX of the Census Industrial Classification). Unlike Parts A and B figures are given in more detail for each branch of Industry as indicated by Minor Group of the Indian Standard Industrial Classification. Figures are given for total workers in columns 2 to 7, Workers at Household Industry in columns 8 to 11 and Workers in Non-household Industry (i.e., remaining workers) in columns 12 to 15. Figures have been

given separately for total and urban populations. Since the classification of workers by status or class of employment has been given in Parts A and B, it is dispensed with in this table.

Minor Groups having less than 1 per cent of workers of the respective Division (less than 0.5 per cent in case of Minor Groups of Division 2 & 3), have not been shown in this table. Divisions thus affected are marked with an asterisk(*). These Minor Groups have been shown in the Appendix.

APPENDIX TO TABLE B-IV PART C.

Minor Groups having less than 1% of workers of the respective division (Less than 0.5% in case of Minor Groups of Division 2 & 3), have been shown in this Appendix. The following abbreviations have been used:

HI—Household Industry
NHI—Non-household Industry

M—Males
F—Females

principal source of livelihood. Thus in actual terms, an earning dependant has neither less nor more than one occupation of his own which by definition is his secondary means of livelihood, while, again by definition, his principal means of livelihood is that of the person on whom he is dependent. A non-earning dependant has only principal occupation and no secondary occupation. His principal occupation is the same as that of the person (as self-supporting person) on whom he is dependent. In actual terms, he has no occupation of his own.

1941 Census Same as in 1951.

1951 Census

In 1951 the criterion adopted was income so that an occupation from which more income accrued was the principal occupation. However, the question of secondary occupation was restricted to only "earners" just as, in actual practice, it was restricted to "self-supporting persons" in 1951. The occupation of a working dependant was his own occupation—the occupation by which he or she augmented the income of his or her family. Thus, there was no conceptual or real difference in the occupation followed by a "working dependant". He could have more than one occupation of his

own, but only the principal occupation (the occupation which fetched more income to the family) was recorded. If a person was engaged in two occupations—one from which he obtained income in cash or kind and the other being family occupation—he was "earner" by virtue of his former occupation and the latter was his secondary occupation irrespective of the income derived from the two occupations.

1921 Census

Question no. 10 provided for recording the subsidiary occupation (secondary), if any, of all "actual workers". The basis was income so that the income obtained from the secondary occupation was less than that from the principal occupation. However, the secondary occupation was tabulated only for "partial agriculturists," that is, where the secondary occupation was agriculture (deriving income from agriculture). "Dependants" were classified according to the occupation of the "actual workers" on whom they were dependent. There was no secondary occupation of "dependants".

FLYLEAF

This table deals with principal work and secondary work. It furnishes figures separately for total, rural and urban population. It gives sex-wise figures in respect of persons whose principal work and secondary work are any two of (i) as cultivator, (ii) as agricultural labourer or (iii) at household industry. In other words, this table is confined to the principal and secondary work of workers belonging to industrial categories I, II and IV. The figures relate only to workers having secondary work.

Major groups of household industry, where persons having secondary work as cultivation or agricultural labour, are less than 5 per cent of the persons having the major group as principal work, have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk(*).

A complete list of the Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification is given in Appendix III to the Note at the beginning of the Volume.

Definitions

Principal work is that on which more time is spent. The following excerpt from the "Instructions to Enumerators" explains how such information was collected.

"After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, i.e., more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, i.e., more than two of the questions 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, i.e., the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next to importance to his principal work, i.e., the work after his principal work which occupies most time. You should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly".

Previous Censuses

Table B-II of 1951, Table X of 1931, Table XVII and XVIII of 1921, Table XV Part A and Part B of 1911, and Table XV Parts A, B and D of 1901 give figures relating to principal and secondary means of livelihood. In the past, however, the principal means of livelihood was generally determined on the basis of 'income'. A gist of the concepts relating to principal and secondary (or subsidiary) occupation at previous Censuses is given below.

1951 Census

Principal means of livelihood was one which fetched more income as compared to the secondary means of livelihood. In this way, unproductive occupation like rent-receiving could be a principal occupation and the income obtained from productive work could be a secondary occupation. A self-supporting person may or may not have a secondary occupation; if he has one, both the occupations should be his own occupations. Conceptually, an earning dependant must have two occupations, otherwise he is a non-earning dependant. In his case, his principal occupation is that for which he depends upon a self-supporting person while his own occupation is reckoned as his secondary means of livelihood, even though the income derived from his own occupation may be more substantial than his

**TABLE B-VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN
NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE
ALSO ENGAGED IN HOUSEHOLD INDUSTRY**

FLYLEAF

This table has also been prepared separately for total, rural and urban population. It relates to persons whose principal work is non-household industry, trade, business, profession or service (Categories III, V, VI, VII, VIII or IX) and additional work, household industry (Category IV). Figures for principal work have been tabulated with reference to additional work, both being spelled out for each Division

and Major Group of the Standard Industrial Classification.

A complete list of the Divisions, Major Groups and Minor Groups of the Indian Standard Industrial Classification is given in Appendix III to the Note at the beginning of the Volume.

The table corresponds in part to Table B-II of 1951.
