State Government Publications

54 Volumes of District Census Handbooks.

NOTE

This Report is being published in two books—Part IV A and Part IV B. Part IV A contains the Report, Subsidiary Tables and Housing Tables E-I, E-II, E-IV and E-V, and Part IV B contains Table E-III. Table E-III of this State is very lengthy and the Report and all Housing and Subsidiary Tables could not be published in one book.

PREFACE

The Report on Housing and Establishments, is Part IV A of the 1961 Census publications. This part is based on information collected during the House listing operation concluded in November, 1960.

2. Data collected in Houselists were made available to three Tabulation Offices set up for this purpose at Lucknow, Rampur and Allahabad in December, 1960. Scrutiny of Houselists and processing of data were commenced in January, 1961. The preparation of Housing Tables in these offices took about a year. In the meantime a State Housing Tabulation Unit was set up at Lucknow in October, 1961. Data required for this Report could, therefore, be had much earlier than those for other Parts, which has enabled the publication of this Part earlier than Part IA—General Report.

3. Housenumbering and Houselisting are both cumbersome operations. These duties were performed by more than one lakh enumerators and over sixteen thousand supervisors, in addition to their normal work, quite often at great personal inconvenience. Most of them were drawn from the ranks of school-teachers, lower orders of Government servants, and employees of local bodies, and to them I

owe a great debt. I am also beholden to all District Officers, Presidents of Antarim Zila Parishads (erstwhile District Boards), Mukhya Nagar Adhikaris of Nagar Mahapalikas (Municipal Corporations), Presidents of Municipal Boards and other local bodies for their willing co-operation in this difficult task.

4. The work of preparing Housing Tables requires enormous patience and labour. For this I owe a debt of gratitude to a large body of compilers and tabulation assistants and statistical assistants, and also to Sarvashri Daya Shanker Misra, Raj Indra Verma and Balbir Saran Das of the Uttar Pradesh Civil Service, who were working as Deputy Superintendents of Census Operations at Lucknow, Rampur and Allahabad, respectively.

5. I am extremely grateful to Shri A. Mitra, Registrar General, India for his detailed suggestions in regard to chapter headings and topics dealt with in each chapter, which have enriched the Report beyond measures. I am also thankful to my Statistician, Shri Fateh Bahadur Nigam of the Directorate of Economic Intelligence and Statistics, who examined the typescript of the Report at great pains and offered valuable advice.

LUCKNOW :
March 1, 1963.

P. P. BHATNAGAR,
*Superintendent of Census Operations,
Uttar Pradesh.*

UTTAR PRADESH ADMINISTRATIVE DIVISIONS

CONTENTS

(The figures within brackets indicate the number of the paragraphs of the Chapter in which the subject has been treated)

INTRODUCTION

First time in Indian Census History that a comprehensive Housing Census has been taken (1)—Conferences of September and October, 1958 (2)—First and Second Pretests of Houselist Schedule; final form of the Houselist and the Houselist Abstract (3)—Perhaps no other country has made such an attempt; Efforts commended by ECAFE (4)

Period of Housenumbering and Houselisting (5)

Concepts and Definitions : Building ; Census Houses ; Census Household ; Relationship between Building, Houses and Census Household (6-7)

Training to Staff in Housenumbering and Houselisting and Issue of Instructions (8)

Housenumbering and Houselisting (9-11)—Difficulties in Housenumbering (12)

Despatch of Houselists to Tabulation Offices (13)—Scrutiny and References to Tahsils and Towns for Reconciliation (14)

Preparation of Housing Tables ; Innovations on Instructions laid down by R.G.'s office—Performance of Tabulation—Incongruities and their Removal (15-17)

Housing Tables and Subsidiary Tables—Full count and sample basis (18)
Column Headings of the Houselists

CHAPTER I

USES OF OCCUPIED CENSUS HOUSES

(Housing Table E-I and Subsidiary Tables)

Definitions : Dwellings—Shop-cum-Dwellings—Workshops-cum-Dwellings—Hotels, Sarais, Dharmashalas, Tourist Houses or Inspection Houses—Shops excluding Eating Houses—Business Houses and Offices—Factories, Workshops and Worksheds—Schools and other Educational Institutions—Restaurants, Sweetmeat Shops and Eating Places—Places of Entertainment and Community Gathering—Public Health and Medical Institutions (1)

Distribution of Census Houses by Kinds of Uses (2)—Subsidiary Tables E-I. 1 and E-I.2 (3)—Distribution of 1,000 Total, Rural and Urban Census Houses by Kinds of Uses (4-5)

Vacant Houses (6-7)

Dwellings (8-10)

Shops and Shop-cum-Dwellings (except Eating Houses) (11-12)

Workshops and Factories and Workshop-cum-Dwellings (13-15)

Business Houses and Offices and Teaching Institutions (16-17)

Places of Halt, Eating, Entertainment and Community Gathering (18-22)

Public Health, Medicines, etc. (23-26)

Census Houses in Cities and Towns having 50,000 Population and Above (General) (27)—Vacant Houses (28)—Dwellings (29)—Shops, including Shop-cum-Dwellings (30)—Workshops and Factories including Workshop-cum-Dwellings (31)—Business Houses and Offices (32)—Teaching Institutions (33)—Places of Halt (34)—Eating Places (35)—Places of Entertainment and Community Gathering (36)—Public Health and Medical Institutions (37)

Classification of Cities and Towns having 50,000 Population and Above as Industrial, Commercial and Residential (38-42)

TENURE STATUS OF CENSUS HOUSEHOLDS

(Housing Table E-II and Subsidiary Tables)

Pages

21—32

Definitions : Owned—Rented—Dwellings with other Uses (1)

21

Subsidiary Tables E-II.1 and E-II.2 (2)

21

Distribution of Census Households by the Type of Uses of Census Houses (General) (3-4)

21-22

Distribution of Households by the Type of Use of Census Houses in Rural Areas (5)—Dwellings (6)—Shop-cum-Dwellings (7)—Workshop-cum-Dwellings (8)—Dwellings with other Uses (9)—Shop-cum-Dwelling and Workshop-cum-Dwelling a rarity (10)—Distribution of Households by Type of Use in Urban Areas (11)—Dwellings (12—15)—Shop-cum-Dwellings (16—18)—Workshop-cum-Dwellings (19—21)—Dwellings with other Uses (22-23)

22—31

Distribution of Households by the Type of Use of Census Houses and by Tenure Status in Cities and Towns having 50,000 Population and Above—Dwellings (24)—Shop-cum-Dwellings (25)—Workshop-cum-Dwellings (26)—Tenure Status in Dwellings (27)—Tenure Status in Shop-cum-Dwellings (28)—Tenure Status in Workshop-cum-Dwellings (29)—Tenure Status in Dwellings with other Uses (30)—Limitations (31)

31-32

CHAPTER III

WORKSHOPS AND FACTORIES

(Housing Table E-III and Subsidiary Tables)

33—72

Explanation of the data collected in the Table—Definition of Workshop or Factory—Subsidiary Tables E-III.1, E-III.2 and E-III.3—Limitations (1—5)

33-34

Registered Factories (General) (6—11)—Basic Metals and their Products except Machinery and Transport Equipment (12)—Machinery and Electrical Equipment other than Transport (13)—Transport Equipment (14)—Miscellaneous Manufacturing Industries (15)—Non metallic Mineral Products (16)—Chemicals, Chemical and Rubber Products (17)—Leather and Leather Products, Wood, Paper, Printing and Publishing (18)—Textiles (19)—Wines, Spirits, Industrial Alcohol, Soft Drinks, Tea and Ice (20)—Tobacco Products (21)—Sugar and Gur (22)—Foodstuffs other than Sugar (23)—Industries giving largest employment (24)—Important Industries in seven districts (25)—General Remarks (26)

34—51

All Workshops and Factories (General) (27—29)

51—53

All Workshops and Factories (Rural-Urban Distribution) (30—33)

53-54

Distribution of Workshops and Factories by Power and Fuel used (34—37)

54-55

Distribution of Workshops and Factories by Size of Employment (38—43)

55—57

Distribution of Workshops and Factories in each kind of Fuel and Power by Size of Employment (44—49)

57—59

Distribution of Workshops and Factories by Major and Minor Groups of Industry (General) (50—53)—Major Group 20 : Foodstuffs (54)—Major Group 21 : Beverages (55)—Major Group 22 : Tobacco Products (56)—Major Groups 23 to 27 : Textiles (57)—Major Group 28 : Wood and Wooden Products (58)—Major Group 29 : Paper and Paper Products (59)—Major Group 30 : Printing and Publishing (60)—Major Group 31 : Leather and Leather Products (61)—Major Group 32 : Rubber, Petroleum and Coal Products (62)—Major Group 33 : Chemicals and Chemical Products (63)—Major Groups 34 and 35 : Non-Metallic Mineral Products, other than Petroleum and Coal (64)—Major Group 36 : Basic Metals and their Products (65)—Major Group 37 : Machinery and Electrical Equipment, other than Transport (66)—Major Group 38 : Transport Equipment (67)—Major Group 39 : Miscellaneous Manufacturing Industries (68)

59—69

Relationship between Industry and Power (69)

69-70

Workshops and Factories in Cities and Towns having 50,000 Population and Above (70—74)

70—72

Conclusion (75)

72

CHAPTER IV

MATERIAL OF WALL AND ROOF

(Housing Table E-IV and Subsidiary Tables)

Pages

73—94

Explanation of data collected in the Table—Subsidiary Tables E-IV.1 and E-IV.2 (1-2)

73

A. Material of Wall

Material of Wall (3—5)—Wall Material in Rural Areas (General) (6)—Mud (7—9)—Unburnt Brick (10-11)—Burnt Brick (12-13)—Stone (14)—Grass, Leaf, Reed or Bamboo (15-16)—Timber, Cement Concrete, C.I. and other Metal Sheets and All Other Material (17-18)

73—78

Wall Material in Urban Areas (General) (19)—Burnt Brick (20)—Mud (21-22)—Unburnt Brick (23)—Stone (24-25)—Cement Concrete (26)—Grass, Leaf, Reed or Bamboo (27)—Timber, C.I. Sheets, Other Material (28—30)

78—81

Wall Material in Cities and Towns having 50,000 Population and Above (General) (31)—Burnt Brick (32)—Mud (33)—Unburnt Brick (34)—Grass, Leaf, Reed or Bamboo (35)—Stone (36)—Remaining Wall Material (37)

81-82

B. Material of Roof

Material of Roof (38—40)—Roof Material in Rural Areas (General) (41-42)—Clay and Miscellaneous Material (All Other Material) (43-44)—Tiles, Slate and Shingle (45-46)—Grass, Leaf, Reed, Thatch, Wood or Bamboo (47)—Concrete and Stone Slab (48)—Brick and Lime (49)—Corrugated Iron, Zinc or Other Metal Sheet (50)—Asbestos Cement Sheet (51)

82—87

Roof Material in Urban Areas (General) (52)—Concrete and Stone Slab (53)—Brick and Lime (54-55)—All Other Material (56-57)—Tiles, Slate and Shingle (58-59)—C.I., Zinc or Other Metal Sheet (60-61)—Grass, Leaf, Reed, Thatch, Wood or Bamboo (62-63)—Asbestos Cement Sheet (64)

88—92

Roof Material in Cities and Towns having 50,000 Population and Above (General) (65)—Brick and Lime (66)—Concrete and Stone Slab (67)—Clay and Miscellaneous Material (68)—Tiles, Slate and Shingle (69)—Grass, Leaf, Reed, Thatch, Wood or Bamboo (70)—C.I., Zinc or Other Metal Sheet (71)—Asbestos Cement Sheet (72)—Conclusion (73)

92—94

CHAPTER V

HOUSEHOLD POPULATION

(Housing Table E-V and Subsidiary Tables)

95—109

Explanation of data collected in the Table—Subsidiary Tables E-V.1 and E-V.2 (1—3)

95

Distribution of Households by the number of Rooms Occupied (General) (4-5)—Households with no Regular Rooms (6)—Households with One Room (7-8)—Households with Two Rooms (9-10)—Households with Three Rooms (11-12)—Households with Four Rooms (13-14)—Households with Five Rooms and More (15-16)

95—100

Households according to Rooms Occupied in Cities and Towns with Population of 50,000 and Above (General) (17)—Households with no Regular Rooms (18)—Households with One Room (19)—Households with Two Rooms (20)—Households with Three Rooms (21)—Households with Four Rooms (22)—Households with Five Rooms and Above (23)

100-101

Number of Persons per Room and per Household in each category of Household (General) (24—26)—Persons per Room in Rural Areas (27)—Persons per Room in Urban Areas (28)—Persons per Room in Cities and Towns with Population of 50,000 and Above (29-32)

101—104

Size of Households (General) (33—36)—Size of Household in Rural Areas (37)—Size of Household in Urban Areas (38)—Size of Household in Cities and Towns with Population of 50,000 and Above (39)

104—107

Size of Households in Rural Areas according to the Number of Rooms—Households with One Room (40)—Households with Two Rooms (41)—Households with Three Rooms (42)—Households with Four Rooms (43)—Households with Five Rooms and Above (44)

107

Size of Households in Urban Areas according to the Number of Rooms—Households with One Room (45)—Households with Two Rooms (46)—Households with Three Rooms (47)—Households with Four Rooms (48)—Households with Five Rooms and Above (49)	Pages 107-108
--	------------------

Size of Households in Cities and Towns with Population of 50,000 and Above according to Number of Rooms—Households with One Room (50)—Households with Two Rooms (51)—Households with Three Rooms (52)—Households with Four Rooms (53)—Households with Five Rooms and Above (54)	108-109

LIST OF INSET TABLES

CHAPTER I

Tables	Para
1.1 Distribution of Census Houses among various Categories in Uttar Pradesh	2
1.2 Distribution of 1,000 Total, 1,000 Rural and 1,000 Urban Census Houses by various Kinds of Use	4
1.3 Proportion of Vacant Census Houses in States and certain Union Territories	6
1.4 Distribution of Districts by Proportion of Vacant Census Houses	7
1.5 Tahsils having less than 10 or more than 200 Vacant Census Houses per 1,000 Census Houses	7
1.6 Proportion of Census Houses used as Dwellings, Wholly or Partly, in States and certain Union Territories	8
1.7 Distribution of Districts by Proportion of Census Houses used as Dwellings, Wholly or Partly	9
1.8 Tahsils having less than 400 or more than 800 Census Houses used as Dwellings, Wholly or Partly, per 1,000 Census Houses	9
1.9 Proportion of Census Houses used as Dwellings, Wholly or Partly, in the Urban and Rural Areas of certain Districts	10
1.10 Proportion of Census Houses used as Shops (excluding Eating Places) and Shop-cum-Dwellings in States and certain Union Territories	11
1.11 Distribution of Districts by Proportion of Shops (excluding Eating Places) and Shop-cum-Dwellings	12
1.12 Tahsils having less than eight or more than 50 Census Houses used as Shops (excluding Eating Places) and Shop-cum-Dwellings per 1,000 Census Houses	12
1.13 Proportion of Census Houses used as Workshops and Factories and Workshops-cum-Dwellings in States and certain Union Territories	13
1.14 Distribution of Districts by Proportion of Workshops and Factories and Workshop-cum-Dwellings	14
1.15 Proportion of Census Houses used as Business Houses and Offices and as Teaching Institutions in States and certain Union Territories	16
1.16 Distribution of Districts by Proportion of Teaching Institutions	17
1.17 Tahsils having one or above three Census Houses used as Teaching Institutions per 1,000 Census Houses	17
1.18 Proportion of Census Houses used as Places of Halt, Eating, Entertainment and Community Gathering in States and certain Union Territories	18
1.19 Proportion of Census Houses used as Public Health and Medical Institutions and Centres and of those used for other purposes in States and certain Union Territories	23
1.20 Distribution of Districts by Proportion of Public Health, Medical Institutions, etc.	24
1.21 Tahsils having negligible proportion of Census Houses used as Public Health and Medical Institutions, Health Centres, Hospitals, Dispensaries, Clinics, etc.	26
1.22 Distribution of Class I and II Towns by Proportion of Vacant Census Houses	28
1.23 Distribution of Class I and II Towns by Proportion of Census Houses used as Dwellings, Wholly or Partly	29
1.24 Distribution of Class I and II Towns by Proportion of Shops and Shop-cum-Dwellings	30
1.25 Distribution of Class I and II Towns by Proportion of Workshops and Factories and Workshop-cum-Dwellings	31
1.26 Distribution of Class I and II Towns by Proportion of Teaching Institutions	33
1.27 Class I and II Towns having more than 4 per 1,000 Census Houses as Eating Places	35
1.28 Distribution of Class I and II Towns by Proportion of Public Health and Medical Institutions, Centres, etc.	37

1.29 Industrial Towns of Classes I and II	Para 39
1.30 Commercial Towns of Classes I and II	40
1.31 Residential and Administrative Towns of Classes I and II	41
CHAPTER II	
2.1 Distribution of 1,000 Rural and 1,000 Urban Households in States and certain Union Territories, by Types of Use of Census Houses	3
2.2 Distribution of Districts by Proportion of Households occupying Shop-cum-Dwellings (Rural)	7
2.3 Tahsils having 7 or more per 1,000 Households occupying Shop-cum-Dwellings (Rural)	7
2.4 Distribution of Districts by Proportion of Households occupying Workshop-cum-Dwellings (Rural)	8
2.5 Tahsils having 5 or more per 1,000 Households occupying Workshop-cum-Dwellings (Rural)	9
2.6 Distribution of Districts by Proportion of Households occupying Dwellings with Other Uses (Rural)	9
2.7 Tahsils having 5 or more per 1,000 Households occupying Dwellings with Other Uses (Rural)	9
2.8 Distribution of 1,000 Households living in Census Houses used exclusively as Dwellings in States and certain Union Territories by Tenure Status (Urban)	12
2.9 Tahsils having less than 900 Households occupying Census Houses used exclusively as Dwellings (Urban)	13
2.10 Distribution of Districts by Proportion of Households occupying rented Census Houses used exclusively as Dwellings (Urban)	14
2.11 Tahsils having more Households occupying rented Census Houses used exclusively as Dwellings than owned (Urban)	15
2.12 Proportion of Households living in Shop-cum-Dwellings in States and certain Union Territories by Tenure Status (Urban)	16
2.13 Distribution of Districts by Proportion of Households occupying Shop-cum-Dwellings (Urban)	17
2.14 Tahsils (situated in the plains) having 25 or more per 1,000 Households occupying Shop-cum-Dwellings (Urban)	17
2.15 Proportion of Households living in Workshop-cum-Dwellings in States and certain Union Territories by Tenure Status (Urban)	19
2.16 Distribution of Districts by Proportion of Households occupying Workshop-cum-Dwellings (Urban)	20
2.17 Tahsils having more than 40 per 1,000 Households occupying Workshop-cum-Dwellings (Urban)	20
2.18 Tahsils having more Households occupying Rented Workshop-cum-Dwellings than Owned (Urban)	21
2.19 Tahsils having all or almost all Households occupying owned Workshop-cum-Dwellings (Urban)	21
2.20 Proportion of Households living in Dwellings with Other Uses in States and certain Union Territories by Tenure Status (Urban)	22
2.21 Distribution of Districts by Proportion of Households occupying Dwellings with Other Uses (Urban)	23
CHAPTER III	
3.1 Distribution of Registered Factories by Size of Employment	7
3.2 Industrial Workers in Registered Factories per 1,000 Population in certain States	8
3.3 Industrial Workers in Registered Factories in certain Districts	9

3.4 Districts having 50 or more Registered Factories	Para 10
3.5 Districtwise Distribution of Registered Factories manufacturing Basic Metals and their Products, except Machinery and Transport Equipment	12
3.6 Districtwise Distribution of Registered Factories manufacturing Machinery and Electrical Equipment, other than Transport	13
3.7 Districtwise Distribution of Registered Workshops and Factories manufacturing Transport Equipment	14
3.8 Districtwise Distribution of Registered Factories engaged in Miscellaneous Industries	15
3.9 Districtwise Distribution of Registered Factories manufacturing Non-Metallic Mineral Products	16
3.10 Districtwise Distribution of Registered Factories manufacturing Chemicals, Chemical Products and Rubber Goods	17
3.11 Districtwise Distribution of Registered Factories manufacturing Leather and Leather Products	18(1)
3.12 Districtwise Distribution of Registered Factories manufacturing Wood and Wooden Products, Pulp, Paper and Paper products, Printing and Publishing	18(2)
3.13 Districtwise Distribution of Registered Factories manufacturing Textiles	19
3.14 Districtwise Distribution of Registered Factories manufacturing Beverages and Ice	20
3.15 Districtwise Distribution of Registered Factories manufacturing Tobacco and Tobacco Products	21
3.16 Districtwise Distribution of Registered Factories manufacturing Sugar, Indigenous Sugar and Gur	22
3.17 Districtwise Distribution of Registered Factories manufacturing Foodstuffs other than Sugar	23
3.18 Distribution of Registered Factories in 7 Districts having highest Factory Employment	25
3.19 Number of Workshops and Factories and Density per Lakh Population in States and certain Union Territories	27
3.20 Distribution of Districts by number of Workshops and Factories	28
3.21 Distribution of Districts by Density of Workshops and Factories per Lakh Population	29
3.22 Districts having more than half Workshops and Factories in Urban Areas	30
3.23 Proportion of Urban Workshops and Factories in other Industrial Districts	31
3.24 Districts having less than one-tenth Workshops and Factories in Urban Areas	32
3.25 Districts having more than 4,000 Workshops and Factories in Urban Areas or more than 6,000 in Rural	33
3.26 Distribution of Districts by number of Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel	35
3.27 Proportion of Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel to all Workshops and Factories in nine Districts	36
3.28 Proportion of Urban Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel in certain Districts	37
3.29 Distribution of Workshops and Factories by Size of Employment	38
3.30 Distribution of Districts by Proportion of One-Worker Industrial Establishments	39
3.31 Districts having more than 300 Workshops and Factories in the Working Group 6—9 or more than 100 in the Working Group 10—19 in Rural and Urban areas Separately	41
3.32 Districts having more than 30 Workshops and Factories in the Working Group 20—49 or more than 10 in the Working Group 50—99 in Rural and Urban areas Separately	42

3.33	Dominant Working Group in Workshops and Factories in each kind of Fuel and Power in States and certain Union Territories	44
3.34	Proportion of Workshops and Factories employing 50 workers and above in each kind of Fuel or Power	47
3.35	Districts not having a majority of 2—5 Worker Establishments among Workshops and Factories run on Electricity and Liquid Fuel	48
3.36	Districts not having a majority of One-Worker Establishments in Rural Areas and of 2—5 in Urban Areas, for the remaining Workshops and Factories	49
3.37	Distribution of 1,000 Workshops and Factories of all kinds by Major Groups of Division 2 in States and certain Union Territories	50
3.38	Distribution of 1,000 Workshops and Factories of all kinds by Major Groups of Division 3 in all States and certain Union Territories	52
3.39	Proportion of Workshops and Factories in selected Major Groups of Industry	53
3.40	Districts having more than 1,500 Rural or more than 500 Urban Workshops and Factories in Foodstuff Industries	54
3.41	Districts having more than 1,000 Rural or more than 500 Urban Workshops and Factories in Textile Industries	57
3.42	Districts having more than 200 Rural or more than 100 Urban Workshops and Factories in Wood Industries	58
3.43	Districts having more than 50 Urban Workshops and Factories in Printing Industry	60
3.44	Districts having more than 300 Rural or 200 Urban Workshops and Factories in Leather Industry	61
3.45	Districts having more than 25 Rural or 25 Urban Workshops and Factories in Glass Bangle Industry	64
3.46	Districts having more than 12 Brick Kilns	64
3.47	Districts having more than four Basic Ferrous or more than two Basic Non-ferrous Metal Workshops and Factories	65
3.48	Districts having more than 100 Brass and Bell Metal Workshops and Factories	65
3.49	Districts having more than 400 Rural or 200 Urban Workshops and Factories in Sundry Hardware	65
3.50	Districts having more than 600 Rural or 300 Urban Workshops and Factories in Basic Metals and their Products (except Machinery and Transport Equipment)	65
3.51	Districts having more than 25 Workshops and Factories in Industries connected with Machinery and Electrical Equipment (other than Transport)	66
3.52	Districts having more than 20 Workshops and Factories for Repairs and Servicing of Motor Vehicles	67
3.53	Districts having more than 150 Rural or 200 Urban Workshops and Factories for Bicycle Repairs	67
3.54	Districts having more than 600 Rural or 300 Urban Workshops and Factories in Miscellaneous Manufacturing Industries	68
3.55	Rural Industries having more than one-fifth Workshops and Factories worked by Power or Fuel	69
3.56	Urban Industries having more than one-fifth Workshops and Factories worked by Power or Fuel	69
3.57	Distribution of Class I and II Towns by number of Workshops and Factories	70
3.58	Distribution of Class I and II Towns by number of Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel	71
3.59	Distribution of Class I and II Towns by number of Workshops and Factories in the Working Group 50 and Above	72

CHAPTER IV

4.1	Distribution of 1,000 Rural and 1,000 Urban Households in States and certain Union Territories, by Wall Material of the Census Houses occupied	3
4.2	Distribution of Districts by Proportion of Mud-Wall Dwellings (Rural)	7
4.3	Distribution of Tahsils by Proportion of Mud-Wall Dwellings (Rural)	8
4.4	Distribution of Districts by Proportion of Unburnt-Brick-Wall Dwellings (Rural)	10
4.5	Distribution of Tahsils by Proportion of Unburnt-Brick-Wall Dwellings (Rural)	11
4.6	Distribution of Districts by Proportion of Burnt-Brick-Wall Dwellings (Rural)	12
4.7	Distribution of Tahsils by Proportion of Burnt-Brick-Wall Dwellings (Rural)	13
4.8	Distribution of Districts by Proportion of Stone-Wall Dwellings (Rural)	14
4.9	Distribution of Districts by Proportion of Grass, Leaf, Reed or Bamboo Wall Dwellings (Rural)	15
4.10	Tahsils having 50 or more Dwellings with Walls of Grass, Leaf, Reed or Bamboo per 1,000 Dwellings (Rural)	16
4.11	Tahsils having 10 or more Dwellings per 1,000 Dwellings with Walls of Timber and other Material (Rural)	17
4.12	Distribution of Districts by Proportion of Brick-Wall Dwellings (Urban)	20
4.13	Distribution of Districts by Proportion of Mud-Wall Dwellings (Urban)	21
4.14	Tahsils having more than three-fourths Mud-Wall Dwellings (Urban)	22
4.15	Tahsils having more than one-fifth Unburnt-Brick-Wall Dwellings (Urban)	23
4.16	Tahsils (other than those in Himalayan Hills) having more than one-tenth Stone-Wall Dwellings (Urban)	25
4.17	Tahsils having more than one-tenth Grass, Leaf, Reed or Bamboo Wall Dwellings (Urban)	27
4.18	Distribution of Class I and II Towns by Proportion of Burnt-Brick-Wall Dwellings	32
4.19	Distribution of Class I and II Towns by Proportion of Mud-Wall Dwellings	33
4.20	Distribution of Class I and II Towns by Proportion of Unburnt-Brick-Wall Dwellings	34
4.21	Distribution of Class I and II Towns by Proportion of Grass, Leaf, Reed or Bamboo Wall Dwellings	35
4.22	Distribution of 1,000 Rural and 1,000 Urban Households in States and certain Union Territories, by Roof Material of Census Houses occupied	38
4.23	Distribution of Districts by Proportion of Clay and Miscellaneous Material-Roof-Dwellings (Rural)	43
4.24	Distribution of Tahsils by Proportion of Miscellaneous Material-Roof Dwellings (Rural)	44
4.25	Tahsils having negligible Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Rural)	44
4.26	Tahsils having a very high Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Rural)	44
4.27	Distribution of Districts by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Rural)	45
4.28	Distribution of Tahsils by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Rural)	46
4.29	Tahsils having more than 950 per 1,000 Dwellings with Roofs of Tile, Slate or Shingle (Rural)	46
4.30	Distribution of Districts by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Rural)	47
4.31	Distribution of Districts by Proportion of Dwellings with Roofs of Brick-and-Lime (Rural)	49
4.32	Distribution of Districts by Proportion of Dwellings with Roofs of Concrete-and-Stone Slab (Urban)	53

	<i>Para</i>
4.33 Tahsils having more than 40 per cent Dwellings with Roofs of Concrete-and-Cement Slab (Urban)	53
4.34 Distribution of Districts by Proportion of Dwellings with Roofs of Brick-and-Lime (Urban)	54
4.35 Tahsils having more than one-half Dwellings with Roofs of Brick-and-Lime (Urban)	55
4.36 Distribution of Districts by Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Urban)	56
4.37 Tahsils having more than three-fourth Dwellings with Roofs of Clay and Miscellaneous Material (Urban)	57
4.38 Distribution of Districts by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Urban)	58
4.39 Tahsils having more than four-fifth Dwellings with Roofs of Tile, Slate and Shingle (Urban)	59
4.40 Distribution of Districts by Proportion of Dwellings with Roofs of C.I., Zinc or other Metal sheet (Urban)	60
4.41 Tahsils having Dwellings with Roofs of more than two-fifth C. I., Zinc or other Metal sheet (Urban)	61
4.42 Distribution of Districts by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Urban)	62
4.43 Tahsils having more than one-fourth Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Urban)	63
4.44 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Brick-and-Lime	66
4.45 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Concrete-and-Stone Slab	67
4.46 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Clay and Miscellaneous Material	68
4.47 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Tile	69
4.48 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch or Bamboo	70
4.49 Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of C.I., Zinc or other Metal sheet	71

CHAPTER V

5.1 Distribution of 1,000 Census Households, according to number of Rooms occupied, in States and certain Union Territories	4
5.2 Distribution of Districts by Proportion of Households living in One Room	7
5.3 Tahsils having more than half Households living in One Room	8
5.4 Distribution of Districts by Proportion of Households living in Two Rooms	9
5.5 Tahsils having more than two-fifth Households living in Two Rooms	10
5.6 Distribution of Districts by Proportion of Households living in Three Rooms	11
5.7 Tahsils having more than one-fourth Households living in Three Rooms	12
5.8 Distribution of Districts by Proportion of Households living in Four Rooms	13
5.9 Tahsils having more than one-fifth Households living in Four Rooms	14
5.10 Tahsils having less than one-twentieth Households living in Four Rooms	14
5.11 Distribution of Districts by Proportion of Households living in Five Rooms and More	15
5.12 Tahsils having more than one-fourth Households living in Five and more Rooms	16
5.13 Distribution of Class I and II Towns by Proportion of Households living in One-Room	19
5.14 Distribution of Class I and II Towns by Proportion of Households living in Two Rooms	20

	<i>Para</i>
5.15 Distribution of Class I and II Towns by Proportion of Households living in Three Rooms	21
5.16 Distribution of Class I and II Towns by Proportion of Households living in Four Rooms	22
5.17 Distribution of Class I and II Towns by Proportion of Households living in Five Rooms and More	23
5.18 Average Number of Persons per Room in States and certain Union Territories	25
5.19 Distribution of Districts by Density of Persons per Room	26
5.20 Distribution of Districts by Density of Persons per Room (Rural)	27
5.21 Distribution of Districts by Density of Persons per Room (Urban)	28
5.22 Distribution of Class I and II Towns by Density of Persons per Room	29
5.23 Households by Number of Rooms and Number of Persons in selected Blocks of Kanpur Municipal Corporation	30
5.24 Wards in KAVAI Cities having Highest and Lowest Density of Persons per Room	31
5.25 Wards in Other Cities having Highest and Lowest Density of Persons per Room	32
5.26 Number of Persons per Household in States and certain Union Territories	33
5.27 Average Size of Households in Uttar Pradesh from 1911 to 1961	35
5.28 Distribution of Districts by average Size of Household (Rural)	37
5.29 Distribution of Districts by average Size of Household (Urban)	38
5.30 Distribution of Class I and II Towns by average Size of Household	39
5.31 Distribution of Class I and II Towns by average Number of Persons per Household occupying One-Room	50
5.32 Distribution of Class I and II Towns by average Number of Persons per Household occupying Two Rooms	51
5.33 Distribution of Class I and II Towns by average Number of Persons per Household occupying Three Rooms	52
5.34 Distribution of Class I and II Towns by average Number of Persons per Household occupying Four Rooms	53
5.35 Distribution of Class I and II Towns by average Number of Persons per Household occupying Five Rooms and More	54

LIST OF MAPS

Map No.		Facing page
CHAPTER I		
I/A	Proportion of Census Houses used wholly or partly as Dwellings (by Tahsils)	10
I/B	Proportion of Census Houses used as Teaching Institutions (by Tahsils)	14
I/C	Proportion of Census Houses used as Health and Medical Institutions (by Tahsils)	17
CHAPTER II		
II	Proportion of Households living in Workshop-cum-Dwellings (by Tahsils)	23
CHAPTER III		
III/A	Districtwise Distribution of Registered Factories (excluding Defence Installations)	35
III/B	Districtwise Distribution of Workshops and Factories	51
III/C	Districtwise Distribution of Workshops and Factories per Lakh Population	52
III/D	Districtwise Distribution of Workshops and Factories run on Electricity, Liquid Fuel and Solid Fuel	54
III/E	Districtwise Proportions of One Worker Workshops and Factories	56
CHAPTER IV		
IV/A	Predominant Wall Material in Rural Areas (by Tahsils)	75
IV/B	Proportion of Mud-Wall Dwellings in Rural Areas (by Tahsils)	76

(ii) Photographs and linedrawings of House types.	

INTRODUCTION

For the first time in the Indian Census history a comprehensive Housing Census was taken on the eve of the 1961 Census. No uniformity had been observed at the earlier Censuses in the Houselist form, but in view of the importance of Housing data for the Planning Commission, the National Buildings Organisation and the Ministry of Commerce and Industry a uniform and detailed Houselist form was adopted at this Census for the whole country. The new form was devised not only to record the purpose to which each Census house was put, but also in the case of workshops and factories to record the name of product(s), repairs or servicing undertaken, average number of persons employed daily, kind of fuel and power used—information so very useful for Industry. It was also meant to record for each Census house the material of walls and roofs, and for each household its tenure status and the number of rooms occupied—information so very valuable for Housing. In addition, the usual information about the inmates of each household was also to be recorded for making administrative arrangements in connexion with Enumeration.

2. The drafts of the Houselist and of other schedules were drawn up by the Registrar General, India, in consultation with the representatives of the various Ministries of the Government of India and the Planning Commission in September, 1958. They were later on discussed at a conference of Directors of Statistical Bureaux in October, 1958. The State Directors of Statistics kindly agreed to undertake the pretest of the forms, through their own staff, in order to assess the suitability of the questions, the quality of response and the period of coverage.

3. The draft schedule of the Houselist was put to test in this State by the Director of Economic Intelligence and Statistics in January-February, 1959. The office of the Superintendent of Census Operations, Uttar Pradesh came

into existence in the last week of March, 1959. The Superintendent discussed the results with the officer-in-charge of the pretest operations and submitted his report to the Registrar General, India, on the 18th April, 1959. The detailed comments of the Director of Economic Intelligence and Statistics soon followed. After considering the various reports and suggestions made by the State Census Superintendents and the Directors of Statistics, a second draft of the Houselist was prepared which differed from the original in details. The second draft was put to pretest by the State Census Superintendent in August, 1959, and this pretest was conducted by the agency which eventually managed the Census Operations. The report and comments on the second pretest were sent to the Registrar General, India, on the 10th September, 1959 and were discussed in the Conference of the State Census Superintendents held in New Delhi from the 24th of September to the 1st October, 1959. The Conference reviewed the second draft of the Houselist and other schedules, and made some changes in the light of the experience gained. Some columns were rearranged, and a Houselist Abstract was also prescribed. The Houselist form adopted at the Conference had 18 columns and was printed on both sides of a sheet of 51 cms×33 cms (20"×13"). Column 1 was for line numbers, columns 2 and 3 for code numbers of buildings and Census houses, column 4 for recording the purpose to which the Census house was put, and columns 5 to 8 related to establishments, workshops and factories. Column 5 stood for the name of the establishment or proprietor, column 6 for the name of product(s), repairing and servicing undertaken, column 7 for the average number of persons employed daily and column 8 for the kind of fuel or power used in case of machinery. Columns 9 and 10 were meant for recording the chief materials of walls and roofs. Column 11 and onwards stood for individual households. Column 11 was for code number,

column 12 for the name of the household, column 13 for the number of rooms occupied by the household and column 14 for recording whether it lived in its own or rented house. For recording the number of inmates of the household with sex details columns 15 to 17 were provided. Column 18 was for remarks. The column headings of the Houselist (English version) are given at the end.

4. The Houselist of 1961 Census not merely involved an enumeration of Census houses and Census households, as used to be the case in the past, but also aimed at providing useful data on Industry and Housing. Prior to this, data on industrial establishments, workshops and factories were not available except for registered factories. The data now collected will fill up a big void in the industrial statistics, and will provide useful information on the structure of industrial segments. Perhaps, no other country has made such an attempt. The third session of the Conference of Asian Statisticians of the E. C. A. F. E. Region held in April, 1960 commended the efforts made at this Census to procure data on industrial establishments.

5. The 1961 Census was a series of large-scale operations, each of which required phasing and adherence to time-schedule. One of these was Housenumbering. This work was taken up in the urban areas generally from the 1st September, 1960 and was completed by the 15th October, 1960. In large cities and towns it was taken up even earlier on account of the magnitude of the task. In the rural areas this operation was conducted in the second fortnight of October. Houselisting was taken up simultaneously in all areas from the 1st November to 21st November, 1960. The work was completed according to schedule everywhere except in those areas which had been badly affected by October floods. In the flood-hit areas Housenumbering and Houselisting were done simultaneously and completed by the end of November, 1960. Housenumbering in the urban areas was done by the local bodies' staff, wardwise or mohallawise, according to the system in vogue in the local body concerned, and Houselisting by the enumerators

in their blocks. In the rural areas both operations were conducted by the enumerators in their respective blocks.

6. The terms *Building*, *Census House* and *Census Household* occur again and again in the Houselist. It is necessary to define these concepts.

Building : It ordinarily means a separate structure on the ground. There are, however, large buildings along a street or lane which have been partitioned or portions of which have been sold, having separate main exits on the road and belonging to separate owners. Sometimes there is a series of inter-connected constructions owned by different persons and looking like one building. Such distinguishable structures were treated as separate buildings. On the other hand, multiple structures e.g. main house, servants' quarters, motor garage etc. belonging to one and the same person were treated as one building and given one number. The concept of building was introduced solely for the sake of convenience in housenumbering. It has no other significance.

Census House—A Census house is a structure or part of a structure, inhabited or vacant, which can be a dwelling, a shop, a shop-cum-dwelling, a business house, a workshop or factory, a workshop-cum-dwelling, an institution, etc. with a separate main exit opening on the road, a common staircase, or common courtyard, verandah or gallery. A building can, therefore, consist of one or more Census houses.

Census Household—A group of persons who commonly live together and take their meals from a common kitchen constitute a Census Household, unless the exigencies of work prevent any of them from doing so. A hostel, a mess, an ashram, etc. were treated as one household of unrelated persons. While a Census house is a structural unit, a Census household is a social unit. A Census house may contain one or more Census households.

7. There is a close relationship between the Building, the Census House and the Census Household. At the apex is the Building

which may consist of one or more Census Houses. If the whole building is occupied by one party, it is treated as one Census house irrespective of the number of exits. Every Census house, if used as a dwelling accommodates one or more Census households. Each building was given a separate number in a continuous serial. If it contained more than one Census house, they were indicated by sub-numbers within brackets. Similarly, if a Census house accommodated several households, they were indicated by further sub-numbers in Roman or Devanagari character. For example, 24 (1-C) meant the third household in the first Census house in Building no. 24.

8. Success of all Census Operations depends largely on the training imparted to the staff associated with Census work. An elaborate and comprehensive programme of training was, therefore, drawn up for imparting theoretical and practical training to the staff in Housenumbering and Houselisting, in suitable batches, and was meticulously followed. The training was imparted at convenient and suitable centres which were selected with a view to ensuring that, as far as possible, no supervisor or enumerator should have to travel more than five miles from his normal place of work to attend the training. In order to make training of staff in Housenumbering and Houselisting detailed and comprehensive several circulars were issued. Three booklets in Hindi containing detailed instructions were brought out, and sufficient copies thereof were made available to the districts for the use of the Census staff.

9. As the Housenumbering for the Census was entirely temporary, it was realised that it would be difficult to preserve house numbers once the Census Operations were over. It was, therefore, decided to prepare sketch map(s) of the blocks delineating the sequence of house numbers, showing from where they started, and where they ended. With the help of these sketch maps and Houselists it will be possible to restore an obliterated number at any time.

10. Houselists, Houselist Abstracts and Sketch Maps were all prepared in duplicate. The work of enumerators was checked by supervisors and

superior officers throughout the period of Housenumbering and Houselisting.

11. In this State, Housenumbering is done just after the rains and is followed by Houselisting. The same practice was adopted this time also. Both operations concluded by the end of November, 1960 without any hitch. In 21 villages of Pithoragarh district which get snowbound during winter both operations were completed in October, 1960.

12. Some of the difficulties encountered during the Housenumbering and Houselisting operations are enumerated below :

(i) *Geru* used for painting house numbers was not available in hill districts in most places. It had to be procured from distance. Similar difficulty was faced in tahsil Nighasan of Kheri district and at some places in Mirzapur district.

(ii) At many places house numbers were obliterated by whitewashing or washed away by October rains, and had to be restored.

(iii) At some places occupiers of houses resented and resisted the painting of numbers. Intervention generally settled the matter amicably. Only in a very few cases recourse to law was resorted to.

13. The work of preparation of Houselists in the districts was completed by the end of November, 1960. Three Tabulation Offices were set up in December, 1960 at Rampur, Allahabad and Lucknow for the preparation of Housing Tables. The districts noted below were attached to these Tabulation Offices :

(1) *Rampur*—Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal, Almora, Naini Tal, Bijnor, Moradabad, Budaun, Rampur, Bareilly, Pilibhit, Dehra Dun, Saharanpur, Muzaffarnagar, Meerut, Bulandshahr and Aligarh (19 districts).

(2) *Allahabad*—Farrukhabad, Kanpur, Fatehpur, Allahabad, Jhansi, Jalaun, Hamirpur, Banda, Faizabad, Sultanpur, Pratapgarh, Basti, Gorakhpur, Deoria, Azamgarh, Jaunpur, Ballia, Ghazipur, Varanasi and Mirzapur (20 districts).

(3) *Lucknow*—Shahjahanpur, Mathura, Agra, Etah, Mainpuri, Etawah, Kheri, Sitapur, Hardoi, Unnao, Lucknow, Rae Bareli, Bahraich, Gonda and Bara Banki (15 districts).

The District Officers sent the Houselist records direct to the Tabulation Offices concerned. They were carefully checked there in order to ensure that complete records had been received. The missing records were traced by referring to the districts and tahsils concerned.

14. The Houselists were scrutinised in the Tabulation Offices. The scrutiny revealed mistakes of the following kind:

(i) Names and code numbers of villages and enumeration blocks were in some cases either omitted or incorrectly recorded.

(ii) The alphabetical sub-numbers which denoted the households were quite often also noted in the column for Building No.

(iii) Entries regarding the purpose to which Census houses were put were sometimes missing, and in many cases ambiguous. They had to be determined with reference to other columns of the Houselist.

(iv) Entries in respect of workshops and factories were haphazardly made in many cases. Shops which merely bought and sold goods were sometimes entered, and workshops and factories engaged in manufacture were omitted. In some cases full description of the articles produced was not given, number of workers was omitted, and power and fuel used were entered in a careless manner.

(v) In many cases the material of walls and roofs was not carefully recorded.

(vi) Entries of the sub-numbers of the Census households, the number of rooms occupied, and whether the house was owned or rented were made in some cases even for non-dwellings.

(vii) Sometimes the entries in columns meant for recording the number of male, female and total inmates of a household were missing.

It was found possible to supply omissions and to correct most of the mistakes by common-sense and by reference to entries in other columns. But in some instances the matter had to be referred to Charge Officers, and sometimes officials had to be summoned from Charge Offices with the relevant registers. In some cases the incorrect Houselist had to be returned for reconciliation.

15. Housing Tables were prepared by Compilers under the supervision of Supervisors. The work started in January, 1961 with two teams of one Supervisor and six Compilers each. The strength of the staff was increased gradually according to work-load. Preparation of Housing Tables was completed in the three Tabulation Offices in about six months' time. Records were arranged by enumeration blocks instead of by villages, as this did not involve any breaking of the Houselists. This was a departure from the instructions received from the Registrar General. Housing Tables were prepared from the Houselists by the process of abstraction. Tables II, IV and V were prepared on a 20 per cent sample basis. The sampling was done by Supervisors who marked with a rubber stamp every fifth entry in the columns concerned. Coding in columns 4, 6, 7, 8, 9, 10 and 14 was done by Compilers with pencils of different shades. The Compilers also prepared frequency tables. The method of posting in the frequency tables by tally marks was abandoned. Instead, the number of Census houses of different categories was noted at the bottom of each page of the Houselist, and total figures for each block were obtained by adding up the different page totals. This method was found to be more convenient and quicker and was also a departure from the instructions received from the Registrar General.

16. The Housing Tables were prepared with reasonable efficiency and despatch. Speed was secured by prescribing daily out-turn for coding and preparation of abstracts. An average Compiler could code 1,800 to 2,000 lines per day and also prepare abstracts. Supervisors checked about 15 per cent of the entries coded by Compilers and prepared the Tables,

17. Some incongruities came to light when the data were put to analysis necessitating the consultation of original records. Some mistakes were found to have been caused by wrong coding in the Tabulation Offices, while others were due to ambiguous entries made by enumerators. They could have been avoided by giving enumerators, for each column of the Houselist, a list of alternatives to make choice from. Comparison of the Housing Table relating to workshops and factories with the list of registered factories, prepared by the Chief Inspector of Factories, also revealed some omissions and mistakes which were supplied or corrected. However, considering the magnitude of the task and taking into account that the collection of the Houselist data was a pioneer effort the work was, on the whole, remarkably well done. It is hoped that the experience gained at this Census will enable better collection and processing of the material at the next Census.

18. There are five Housing Tables in all. They give data separately for the rural and the urban areas of each tahsil and district and also

for every town with a population of 50,000 and over. Tables I and III were prepared on full count and the remaining three Tables II, IV and V on 20 per cent sample basis, as already stated before. Table E-I gives the data of all Census Houses and the uses to which they are put and Table E-II of sample Census Households classified by tenure status. Table E-III is the industrial table of all Census Houses used as workshops and factories, classified by industry, power used and size of employment. This is the bulkiest Table of the whole lot. Table E-IV gives distribution of sample Census Houses used wholly or partly as dwellings, by wall and roof materials, and Table E-V of sample households classified by number of inmates and by number of rooms occupied. From these Housing Tables Subsidiary Tables have been prepared, 2 each from E-I, E-II, E-IV and E-V and 3 from E-III. They are Proportion Tables and give the distribution of 1,000 Census Houses or Census Households or Workshops and Factories except the Subsidiary Table E-V. 2 which gives the number of persons per room and per household.

Column Headings of the Houselist

Name of District.....(Code No.....)
Name of Island/Taluk/Tahsil/Thana/Anchal/Town.....(Code No.....) Name of Village/Ward/Mohalla/
Enumerator's Block.....(Code No.....)

Line no.	Building number (Municipal, or local authority or Census number, if any)	Building number (column 2) with sub-numbers for each Census house	Purpose for which Census house used, e.g. dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.	If the Census house is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product(s), repair or servicing undertaken	Average no. of persons employed daily last week (including proprietor, or household members, if working)	Kind of fuel or power, if machinery is used

CHAPTER I

USES OF OCCUPIED CENSUS HOUSES

(Housing Table E-I and Subsidiary Tables)

Housing Table E-I has been prepared from column 4 of the Houselist, and gives the number of vacant Census houses and of Census houses used as dwelling, shop-cum-dwelling, workshop-cum-dwelling, stopping place, shop, business house or office, workshop or factory, educational institution, eating place, place of entertainment or community gathering, medical or public health centre, etc. The Table gives data for each district and tahsil, with rural and urban breakdown, and for each town with a population of 50,000 and over. *Census House* has already been defined in the previous chapter. The remaining terms used in the Table are explained below:

Dwellings—Used exclusively for residence.

Shop-cum-Dwellings—Used partly for residence and partly for sale of goods, both portions having a common main exit.

Workshop-cum-Dwellings—Used partly for residence and partly for manufacture of articles, both portions having a common main exit.

Hotels, Sarais, Dharmashalas, Tourist Homes or Inspection Houses—Used as places of halt or temporary stay by travellers and pilgrims.

Shops excluding Eating Houses—Places where goods are bought or sold, but not manufactured, excluding restaurants, cafes, *dhabas*, tea shops, etc.

Business Houses and Offices—Offices of Government, local bodies, institutions, commercial firms, etc.

Factories, Workshops and Worksheds—Places where some kind of production, processing, fabrication, servicing or repairing is undertaken; places where goods are merely bought or sold but not manufactured being excluded.

Schools and other Educational Institutions—Places where any kind of teaching or instruction is given, whether recognised or unrecognised, technical or non-technical.

Restaurants, Sweetmeat Shops and Eating Places—Places where food is sold or served. *Halwai* shops where sweetmeats are prepared are included in workshops and factories.

Places of Entertainment and Community Gathering—These include cinemas, theatres, circuses and other places of entertainment and also places of assembly such as *panchayatghars*.

Public Health and Medical Institutions—These include public health centres, hospitals and dispensaries of all kinds, clinics and consulting rooms of doctors, homoeopaths, *vaids* and *hakims*.

2. The total number of Census houses in the State according to the Houselist is 19,730,436 with the following breakdown:

	Total	Rural	Urban
1. All Census Houses			
2. Vacant Houses	19,730,436	17,550,837	2,179,599
Occupied Houses (1—2)	652,773	508,501	144,272
3. Dwellings	19,077,663	17,042,336	2,035,327
4. Shop-cum-Dwellings	12,524,287	10,998,600	1,525,687
5. Workshop-cum-Dwellings	68,120	46,451	21,669
	65,415	41,907	23,508
Dwellings wholly or partly (3+4+5)	12,657,822	11,086,958	1,570,864

6. Hotels, Sarais, Dharmashalas, Tourist Homes and Inspection Houses	24,023	15,629	8,394
7. Shops excluding Eating Places	411,442	211,035	200,407
8. Business Houses and Offices	29,478	14,147	15,331
9. Workshops and Factories	175,417	116,614	58,803
All Shops excluding Eating Places (4+7)	479,562	257,486	222,076
All Workshops and Factories (5+9)	240,832	158,521	82,311

10. Educational Institutions and Training Classes	46,056	37,673	8,383
11. Restaurants and Eating Places	8,333	3,559	4,774
12. Places of Entertainment and Community Gathering	70,802	60,541	10,261
13. Public Health and Medical Institutions, Hospitals, Dispensaries and Clinics, etc.	15,814	8,043	7,771
14. Others	5,638,476	5,488,137	150,339

3. From this Housing Table two Subsidiary Tables E-I.1 and E-I.2 have been prepared. Subsidiary Table E-I.1 gives the distribution of 1,000 Census houses by different types of occupation in each district and tahsil and each town with a population of 50,000 and over. Subsidiary Table E-I.2 gives the distribution of

1,000 Census houses in each type of use among rural and urban areas.

4. There are 17,550,837 Census houses in the rural areas and 2,179,599 in the urban areas of the State. The distribution of 1,000 total, 1,000 rural and 1,000 urban Census houses by different kinds of use is given in the following Table:

TABLE 1.2—Distribution of 1,000 Total, 1,000 Rural and 1,000 Urban Census Houses by various kinds of use

Kind of Use	Total	Rural	Urban
1. All Census Houses	1,000	1,000	1,000
2. Vacant	33	29	66
Occupied (1—2)	967	971	934
3. Dwellings	635	627	700
4. Shop-cum-Dwellings	4	3	10
5. Workshop-cum-Dwellings	3	2	11
All Dwellings (3+4+5)	642	632	721
6. Hotels, Sarais, Dharmashalas, Tourist Homes and Inspection Houses	1	1	4
7. Shops excluding Eating Places	21	12	92
8. Business Houses and Offices	1	1	7
9. Workshops and Factories	9	7	27
All Shops excluding Eating Places (4+7)	25	15	102
All Workshops and Factories (5+9)	12	9	38

10. Educational Institutions and Training Classes	2	2	4
11. Restaurants and Eating Places	N	N	2
12. Places of Entertainment and Community Gathering	4	3	5
13. Public Health, Medical Institutions, Hospitals, Dispensaries, Clinics, etc.	1	N	3
14. Others	286	313	69

'N' stands for less than 0.5 per thousand,

5. The above Table reveals that there is a striking difference in the rural and urban patterns. Vacant houses have a higher ratio in urban areas, one house out of every 15 being vacant. At the same time, there is a higher proportion of Census houses in every kind of occupation in the urban areas than in the rural, except in the case of 'Others', e.g. there are proportionately more dwellings, places of halt, commercial establishments, business houses and offices, industrial establishments, educational institutions, eating places, places of entertainment and public health and medical units.

TABLE 1.3—Proportion of Vacant Census Houses in States and certain Union Territories

States	Proportion to 1,000	States	Proportion to 1,000
1. Andhra Pradesh	59	10. Mysore	81
2. Assam	20	11. Orissa	35
3. Bihar	30	12. Punjab	77
4. Gujarat	110	13. Rajasthan	113
5. Jammu and Kashmir	105	14. Uttar Pradesh	33
6. Kerala	85	15. West Bengal	35
7. Madhya Pradesh	49	<i>Union Territories</i>	
8. Madras	68	1. Delhi	32
9. Maharashtra	72	2. Himachal Pradesh	129

It is apparent that Uttar Pradesh is among those States which have a low proportion of vacant Census houses.

7. The proportion of vacant Census houses in the State to 1,000 Census houses is 33, of which

TABLE 1.4—Distribution of Districts by proportion of Vacant Census Houses

Range	Number of Districts	Range	Number of Districts
0—24	22	100—149	2
25—49	21	150—199	3
50—99	5	200 and Above	1

All these extra proportions are met from the 'Other' kind of use. In the rural areas one out of every 3 Census houses is in the 'other' kind of use, while in the urban only one out of every 15. In the rural areas a large number of structures is required for miscellaneous agricultural and pastoral pursuits.

Vacant Houses

6. They include ruins, deserted houses and other unoccupied structures. The proportion of vacant Census houses in the States of India and in the Union Territories adjoining U. P. is given in the following Table :

26 are situated in the rural area and 7 in the urban. The highest proportion is in Uttar Kashi district (245) and the lowest in Gonda (9). The following Table gives the number of districts in various ranges :

The largest number lies in the lowest range 0—24. The names of the districts are Budaun (20), Bareilly (23), Shahjahanpur (17), Allahabad (21), Kheri (20), Sitapur (20), Hardoi (16), Rae Bareilly (24), Bahraich (15), Gonda (9), Bara Banki (24), Faizabad (22), Sultanpur (14), Pratapgarh (18), Basti (10), Gorakhpur (11), Deoria (11), Azamgarh (16), Jaunpur

(14), Ballia (16), Ghazipur (16) and Varanasi (18). The district in the highest range is Uttar Kashi (245). Chamoli (151), Tehri Garhwal (186) and Almora (169) are in the next. Considering smaller units, 11 tahsils have a proportion of less than 10 and 7 of above 200, as the following Table will show :

TABLE 1.5—Tahsils having less than 10 or more than 200 Vacant Census Houses per 1,000 Census Houses

Below 10		Above 200	
(District) Tahsil	Proportion to 1,000	(District) Tahsil	Proportion to 1,000
(Mainpuri)		(Uttar Kashi)	
1. Jasrana	9	1. Rajgarhi	218
(Gonda)			
2. Utraula	8	2. Dunda	407
3. Tarabganj	7	(Chamoli)	
(Basti)		3. Joshimath	407
4. Domariaganj	8	(Pithoragarh)	
5. Naugarh	6	4. Munsiri	344
6. Bansi	6	(Tehri Garhwal)	
7. Harraiya	9	5. Devaprayag	210
(Gorakhpur)		(Almora)	
8. Maharajganj	5	6. Champawat	247
(Deoria)		(Naini Tal)	
9. Hata	6	7. Naini Tal	248
10. Padrauna	6		
(Jaunpur)			
11. Kerakat	9		

Tahsils having high proportion of vacant Census houses are in the Himalayan hills. At the time of Houselisting in November 1960, quite many houses had fallen vacant owing to migration. On the other hand, tahsils which have a low proportion of vacant houses, with the solitary exception of Jasrana, lie in the eastern districts of the State which are very densely populated. The number of vacant Census houses in a locality is by no means an indication of the availability of accommodation, as quite many of them are uninhabitable.

Dwellings

8. Uttar Pradesh has a lower proportion of Census houses used as dwellings, wholly or partly, than most of the other States as the following Table will show :

TABLE 1.6—Proportion of Census Houses used as Dwellings, Wholly or Partly, in States and certain Union Territories

States	Proportion to 1,000			
	Total Dwellings	Shop-cum-Dwellings	Workshop-cum-Dwellings	
1. Andhra Pradesh	802	787	4	11
2. Assam	931	908	21	2
3. Bihar	798	765	13	20
4. Gujarat	712	704	4	4
5. Jammu & Kashmir	486	472	3	11
6. Kerala	815	811	3	1
7. Madhya Pradesh	711	668	7	36
8. Madras	862	841	7	14
9. Maharashtra	674	652	7	15
10. Mysore	738	725	4	9
11. Orissa	889	826	5	58
12. Punjab	664	657	5	2
13. Rajasthan	728	721	4	3
14. Uttar Pradesh	642	635	4	3
15. West Bengal	749	738	8	3
<i>Union Territories</i>				
1. Delhi	783	763	17	3
2. Himachal Pradesh	533	488	7	38

9. The average number of Census houses used as dwellings, in some form or the other, for the State is 642 per 1,000. Within the State Rae Bareilly (795) has the highest proportion of dwellings, and Chamoli (375) the lowest. The following Table shows the distribution of districts in various ranges :

TABLE 1.7—Distribution of Districts by Proportion of Census Houses used as Dwellings, Wholly or Partly

Range	No. of Districts
0—499	2
500—599	13
600—699	27
700 and Above	12

The range 600—699 accounts for the largest number of districts. The 2 districts in the lowest range are Uttar Kashi (452) and Chamoli (375), and those in the highest range are Rampur (758), Bareilly (719), Farrukhabad (701), Etawah (714), Kanpur (769), Kheri (745), Sitapur (741), Hardoi (703), Unnao (771), Lucknow (787), Rae Bareilly (795) and Bara Banki (765). Considering tahsils as units, 5 tahsils have less than 400 dwellings per 1,000 Census houses, and 12 have 800 and above, as the following table will show :

TABLE 1.8—Tahsils having less than 400 or more than 800 Census Houses used as Dwellings, Wholly or Partly, per 1,000 Census Houses

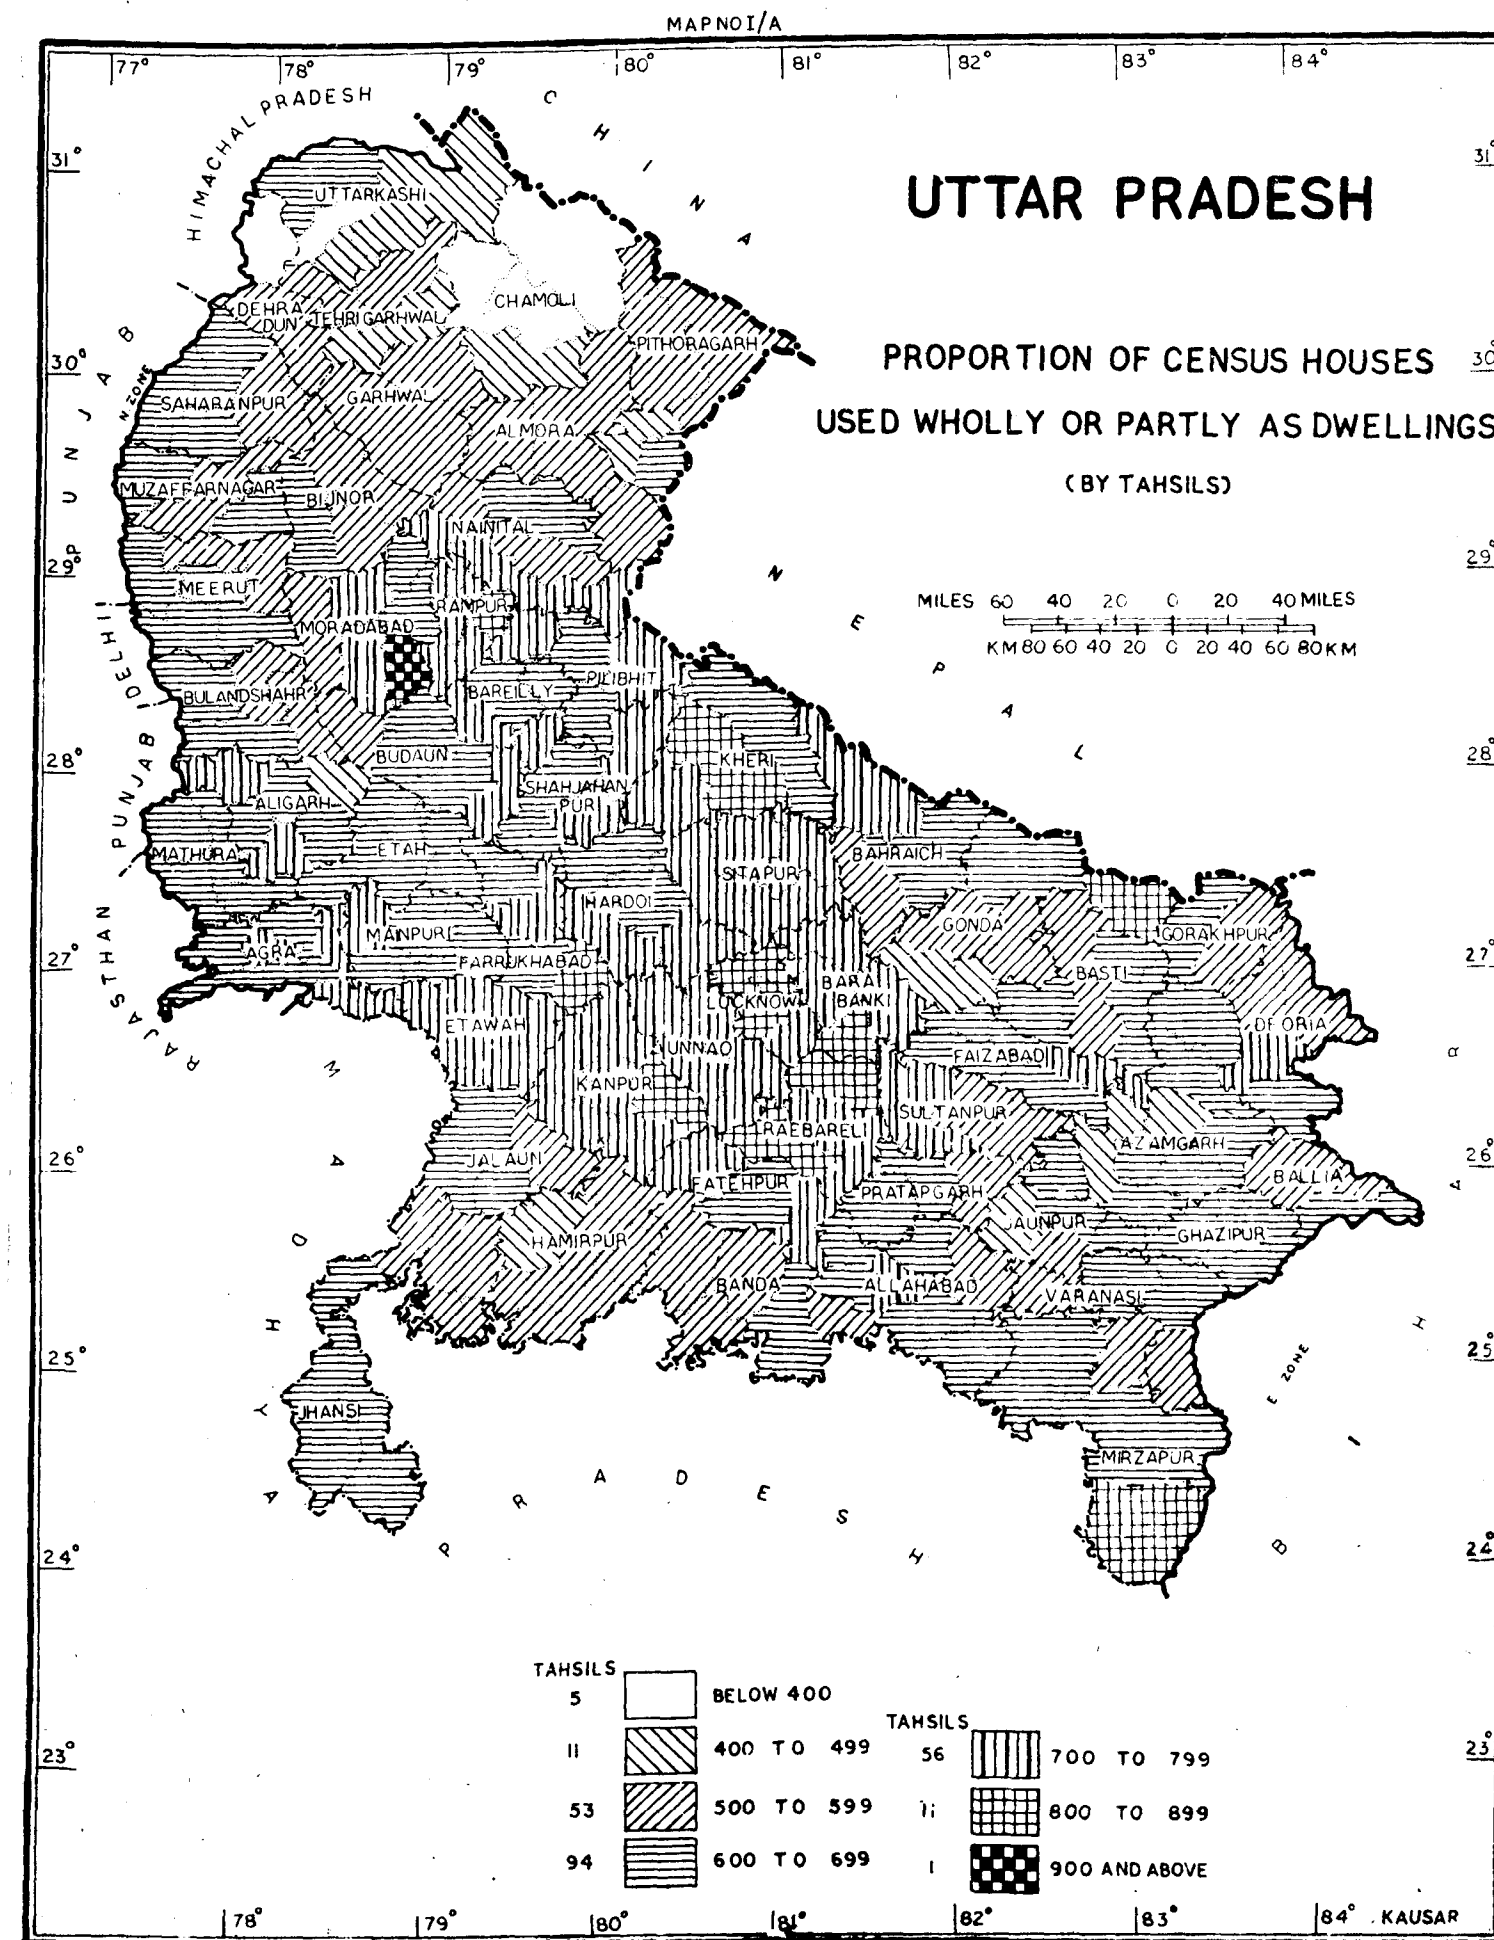

(District) Tahsil	Proportion to 1,000
<i>Below 400</i>	
(Uttar Kashi)	
1. Rajgarhi	347
(Chamoli)	
2. Joshimath	316
3. Chamoli	360
4. Ukhi Math	358
(Dehra Dun)	
5. Chakrata	356

800 and above

(District) Tahsil	Proportion to 1,000
(Moradabad)	
1. Bilari	937
(Rampur)	
2. Bilaspur	811
(Farrukhabad)	
3. Kannauj	803
(Kanpur)	
4. Kanpur	821
(Kheri)	
5. Lakhimpur	804
(Lucknow)	
6. Malihabad	809
7. Lucknow	800
(Rae Bareilly)	
8. Maharajganj	831
9. Dalmau	824
(Bara Banki)	
10. Haidergarh	800
(Basti)	
11. Naugarh	849
(Mirzapur)	
12. Dudhi	829

Tahsils having the lowest proportion of dwellings are situated in the Himalayan hills, because of a comparatively large number of vacant houses. Those with the highest proportions are not confined to any tract, but it is significant that the two tahsils having the largest cities are included in this list. Map No. 1/A gives the proportion of Census houses used wholly or partly as dwellings (by tahsils).

10. As regards the proportion of dwellings in urban areas, Kanpur district (829) is at the top followed by Lucknow (823), Allahabad (799) and Gorakhpur (772). All of them have class I cities. The districts at the tail end are Garhwal (598), Hamirpur (589) and Almora (500). The proportion of dwellings in the urban areas is higher than in the rural. This fact is particularly noticeable in the districts which are

important for their district towns. The following Table gives the rural and urban proportion of dwellings in certain districts of the State :

TABLE 1.9—Proportion of Census Houses used as Dwellings, Wholly or Partly, in the Urban and Rural Areas of certain Districts

Districts	Proportion to 1,000	
	Urban	Rural
1. Kanpur	829	731
2. Lucknow	823	756
3. Allahabad	799	618
4. Gorakhpur	772	648
5. Varanasi	725	559

Shops and Shop cum-Dwellings (except Eating Places)

11. Next in order of numerical importance are the commercial establishments. The proportion of shops and shop-cum-dwellings, excluding eating places, in the States of India and the Union Territories adjoining U. P. is given in the following Table :

TABLE 1.10—Proportion of Census Houses used as Shops (excluding Eating Places) and Shop-cum-Dwellings in States and certain Union Territories

States	Proportion to 1,000		
	Total	Shops excluding Eating Houses	Shop-cum-Dwellings
1. Andhra Pradesh	17	13	4
2. Assam	29	8	21
3. Bihar	28	15	13
4. Gujarat	36	32	4
5. Jammu and Kashmir	28	25	3
6. Kerala	45	42	3
7. Madhya Pradesh	18	11	7
8. Madras	27	20	7
9. Maharashtra	25	18	7
10. Mysore	28	24	4
11. Orissa	16	11	5
12. Punjab	42	37	5
13. Rajasthan	38	34	4
14. Uttar Pradesh	25	21	4
15. West Bengal	32	24	8

Union Territories

1. Delhi	97	80	17
2. Himachal Pradesh	14	7	7

The above Table reveals that most of the States have a much higher proportion of shops and shop-cum-dwellings than Uttar Pradesh.

12. The average proportion of shops and shop-cum-dwellings to 1,000 Census houses for this State is 25. The following Table gives the distribution of districts in various ranges :

TABLE 1.11—Distribution of Districts by Proportion of Shops (excluding Eating Places) and Shop-cum-Dwellings

Range	Number of Districts
0—9	1
10—19	24
20—29	11
30—39	11
40—49	6
50 and Above	1

Range 10—19 accounts for the largest number of districts. The district in the lowest range is Uttar Kashi (5) and in the highest Agra (57). Among the tahsils, 14 have a proportion of less than 8, and 14 of more than 50, as the following Table will show :

TABLE 1.12—Tahsils having less than 8 or more than 50 Census Houses used as Shops (excluding Eating Places) and Shop-cum-Dwellings per 1,000 Census Houses

		Proportion to 1,000
Tahsil		
1. Puraula	}	5
2. Rajgarhi		(Uttar Kashi)
3. Dunda		
4. Karanaprayag	(Chamoli)	
5. Chamoli		
6. Munsiri (Pithoragarh)		7
7. Handia (Allahabad)		6
8. Musafirkhana (Sultanpur)		7
9. Naugarh (Basti)		7
10. Bansi (Basti)		7
11. Pharenda (Gorakhpur)		7
12. Maharajganj (Gorakhpur)		6
13. Hata (Deoria)		5
14. Sagri (Azamgarh)		7

Above 50

Tahsil	Proportion to 1,000
1. Kashipur (Naini Tal)	54
2. Moradabad	61
3. Rampur	76
4. Dehra Dun	55
5. Saharanpur	53
6. Nakur (Saharanpur)	51
7. Meerut	64
8. Koil (Aligarh)	56
9. Mathura	63
10. Agra	99
11. Kanpur	65
12. Chail (Allahabad)	51
13. Lucknow	55
14. Varanasi	61

Tahsils having low proportion are either situated in the Himalayan hills, or are mostly outlying tahsils of eastern districts. Those having high proportions are all sadar tahsils (with the exception of Kashipur and Nakur) having a large urban area which increases their commercial importance.

Workshops and Factories and Workshop-cum-Dwellings

13. The following Table gives the proportion of workshops, factories and workshop-cum-dwellings in all States and adjoining Union Territories:

TABLE 1.13—Proportion of Census Houses used as Workshops and Factories and Workshop-cum-Dwellings in States and certain Union Territories

States	Proportion to 1,000		
	Total	Workshops and Factories	Workshop-cum-Dwellings
1. Andhra Pradesh	17	6	11
2. Assam	4	2	2
3. Bihar	28	8	20
4. Gujarat	15	11	4
5. Jammu and Kashmir	32	21	11
6. Kerala	17	16	1
7. Madhya Pradesh	45	9	36
8. Madras	24	10	14
9. Maharashtra	29	14	15
10. Mysore	17	8	9
11. Orissa	61	3	58
12. Punjab	13	11	2
13. Rajasthan	8	5	3
14. Uttar Pradesh	12	9	3
15. West Bengal	16	14	3
<i>Union Territories</i>			
1. Delhi	17	14	3
2. Himachal Pradesh	78	40	38

The above Table reveals that in Uttar Pradesh the proportion of Census houses used as workshops and factories, wholly or partly, is on the low side. There are two kinds of industrial patterns. About half of the States and Union Territories have a predominance of workshop-cum-dwellings, and the remaining half have most of the workshops and factories separate from dwellings. In Uttar Pradesh workshop-cum-dwellings are an exception rather than the rule.

14. The average proportion of Census houses used for the above purpose to 1,000 Census houses is 12 for the State. The distribution of districts among various ranges is given in the following Table:

TABLE 1.14—Distribution of Districts by Proportion of Workshops and Factories and Workshop-cum-Dwellings

Range	Number of Districts
0—4	3
5—9	15
10—14	20
15—19	9
20 and Above	7

The largest number of districts is in the range 10—14. Garhwal (4), Bijnor (4) and Deoria (2) are in the lowest range and Almora (22) Agra (22), Jhansi (21), Faizabad (24), Azamgarh (22), Varanasi (24) and Mirzapur (23) are in the highest range.

15. The proportion of Census houses used as Workshops and Factories, by itself, is no indication of industrialization of a district. Absolute numbers are equally important, as also the size of employment which they offer. Detailed discussion will be found in Chapter III.

Business Houses and Offices and Teaching Institutions

16. The proportion of Census houses used as business houses and offices, schools and other educational institutions including training classes.

coaching and shop classes in the States of India and the adjoining Union Territories is given in the following Table:

TABLE 1.15—Proportion of Census Houses used as Business Houses and Offices and as Teaching Institutions in States and certain Union Territories

States	Proportion to 1,000	
	Business Houses and Offices	Teaching Institutions
1. Andhra Pradesh	2	4
2. Assam	4	9
3. Bihar	4	5
4. Gujarat	5	5
5. Jammu and Kashmir	4	5
6. Kerala	6	5
7. Madhya Pradesh	1	3
8. Madras	4	4
9. Maharashtra	5	5
10. Mysore	5	5
11. Orissa	3	6
12. Punjab	3	3
13. Rajasthan	2	3
14. Uttar Pradesh	1	2
15. West Bengal	5	5
<i>Union Territories</i>		
1. Delhi	9	3
2. Himachal Pradesh	3	3

It is obvious from the above Table that Uttar Pradesh has the lowest proportion of business houses and offices and of teaching institutions among the States of India.

17. In Uttar Pradesh the average proportion of teaching institutions to 1,000 Census houses is 2.3. The distribution of districts by proportion of these institutions is given in the following Table:

TABLE 1.16—Distribution of Districts by Proportion of Teaching Institutions

Proportion to 1,000	No. of Districts
1	1
2	30
3	18
4	3
5	2

The largest number of districts has a proportion of 2 teaching institutions to 1,000 Census houses. Basti has the lowest proportion, and Naini Tal and Dehra Dun the highest. The next highest are Pithoragarh, Garhwal and Jalaun districts. Among the tahsils 19 have a proportion of 1, and 22 of 4 and above, as the following Table will show:

TABLE 1.17—Tahsils having one or above three Census Houses used as Teaching Institutions per 1,000 Census Houses

One	Above 3	Proportion to 1,000
(District) Tahsil	(District) Tahsil	
(Budaun)	(Chamoli)	
1. Gunnaur	1. Joshimath	4
2. Sahaswan	(Pithoragarh)	
(Rampur)	2. Munsiri	5
3. Shahabad	3. Dharchula	5
	4. Pithoragarh	4
(Bareilly)	(Tehri Garhwal)	
4. Baheri	5. Tehri	4
	(Garhwal)	
	6. Pauri	4
(Bulandshahr)	7. Lansdowne	4
5. Anupshahr	(Almora)	
(Aligarh)	8. Almora	4
6. Atrauli	(Naini Tal)	
	9. Naini Tal	9
(Allahabad)		
7. Manjhanpur	(Dehra Dun)	
(Banda)	10. Dehra Dun	5
8. Baberu	(Agra)	
(Rae Bareilly)	11. Agra	4
9. Salon	12. Bah	4

One (District) Tahsil	Above 3 (District) Tahsil	Proportion to 1,000
(Bahraich)	(Mainpuri)	
10. Nanpara	13. Mainpuri	4
(Gonda)	(Farrukhabad)	
11. Gonda	14. Chhibramau	4
(Bara Banki)	(Etawah)	
12. Haidergarh	15. Bharthana	4
(Basti)	16. Bidhuna	4
13. Domariaganj		
	(Kanpur)	
14. Naugarh	17. Akbarpur	4
15. Bansi	(Allahabad)	
	18. Chail	4
16. Harraiya	19. Phulpur	6
17. Basti	(Jalaun)	
	20. Jalaun	4
(Gorakhpur)		
18. Maharajganj	21. Orai	4
(Deoria)	(Azamgarh)	
19. Hata	22. Phulpur	4

Naini Tal has a good number of institutions compared to its population. Other tahsils having a high proportion of teaching institutions are Munsiri and Dharchula of Pithoragarh district, Dehra Dun of Dehra Dun district and Phulpur of Allahabad district. In all the remaining tahsils of the State, not covered in the above list, the proportion is only 2 or 3. The proportion of Census houses used as teaching institutions (by tahsils) is given in Map No. 1/B opposite.

Places of Halt, Eating Entertainment and Community Gathering

18. The following Table gives the proportion of Census houses used as hotels, *sarais*, *dharmashalas*, tourist homes and inspection houses; restaurants and eating places; and places of entertainment and community gathering in the

States of Indian Union and the adjoining Union Territories :

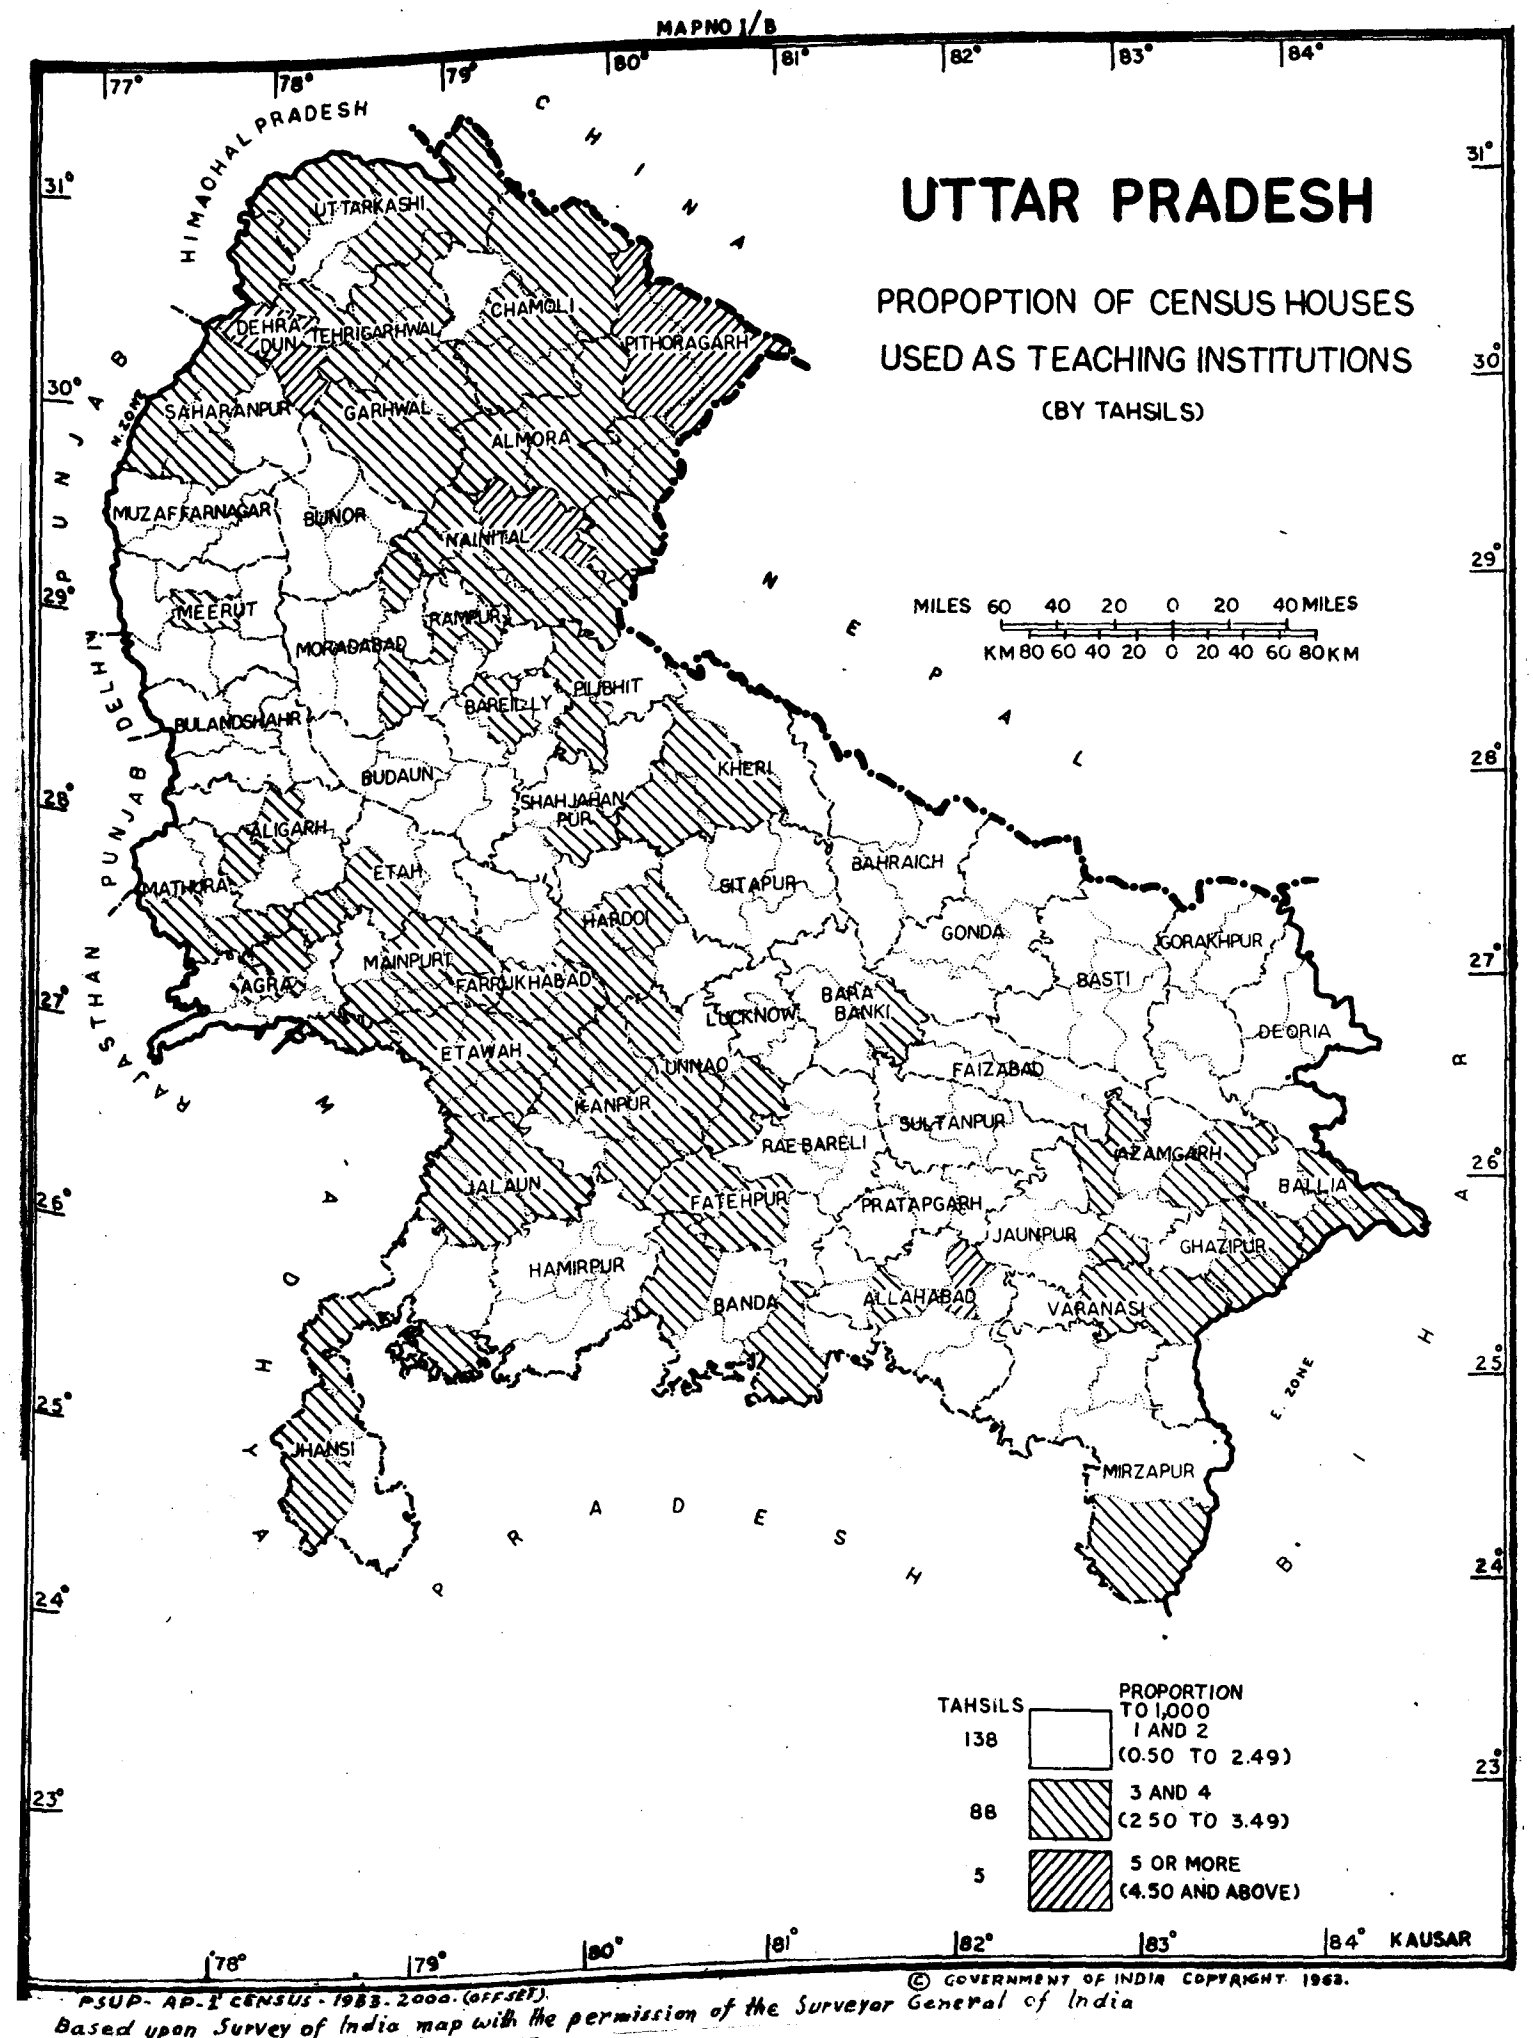

TABLE 1.18—Proportion of Census Houses used as Places of Halt, Eating, Entertainment and Community Gathering in States and certain Union Territories

States	Proportion to 1,000		
	Places of Halt	Places of Eating	Places of Entertainment and Community Gathering
1. Andhra Pradesh	1	2	11
2. Assam	2	1	1
3. Bihar	1	1	10
4. Gujarat	2	3	2
5. Jammu and Kashmir	1	2	15
6. Kerala	1	18	1
7. Madhya Pradesh	2	N	12
8. Madras	2	4	1
9. Maharashtra	1	2	18
10. Mysore	2	3	1
11. Orissa	3	N	3
12. Punjab	3	2	1
13. Rajasthan	2	1	1
14. Uttar Pradesh	1	N	4
15. West Bengal	1	2	1
Union Territories			
1. Delhi	3	3	2
2. Himachal Pradesh	4	1	13

'N' as already explained before, stands for less than 0.5 per thousand.

19. The above data are not of any numerical significance, and a detailed discussion is not called for. Uttar Kashi, Pithoragarh, Tehri Garhwal, Garhwal, Almora, Naini Tal, Dehra Dun, Aligarh and Mathura districts have 3 or more per 1,000 Census houses used as places of halt. Most of these have numerous places of pilgrimage and tourist interest.

20. Eating places have some slight numerical significance in Chamoli, Tehri Garhwal,

Garhwal, Almora, Naini Tal, Bijnor, Moradabad, Budaun, Rampur, Bareilly, Pilibhit, Dehra Dun, Saharanpur, Muzaffarnagar, Meerut, Bulandshahr, Aligarh, Mathura, Agra, Lucknow and Ghazipur districts. All of these, except Lucknow and Ghazipur, are northern and western districts. It is not common in the eastern districts, particularly in the rural areas, to eat in public places. When people are not staying with relations or friends, they mostly do their own cooking, and usually carry their provisions.

21. In one Tabulation Office places of worship were treated as places of community gathering, while in the other two they were included among 'Others'. The proportions worked out for places of entertainment and community gathering are, therefore, not comparable for the districts, and hence no conclusions can be drawn.

22. Though large hotels, restaurants and cinema houses are included in the above, their number is not of any statistical importance. The bulk consists of *dharmashalas, sarais, dhabas, bhojnalayas, mandalis, and panchayatghars*.

Public Health, Medicine, Etc.

23. Public health and medical institutions, health centres, hospitals, dispensaries, clinics of doctors, homoeopaths, *vaids* and *hakims* occupy an important place in a nation's welfare. The following Table gives the proportion of Census houses used as such and for miscellaneous purposes in the States and in the adjoining Union Territories of Delhi and Himachal Pradesh :

TABLE 1.19—Proportion of Census Houses used as Public Health and Medical Institutions and Centres and of those used for other purposes in States and certain Union Territories.

States	Proportion to 1,000	
	Public Health, Medical etc.	Others
1. Andhra Pradesh	1	99
2. Assam	2	20
3. Bihar	1	127

States	Proportion to 1,000	
	Public Health, Medical etc.	Others
4. Gujarat	1	117
5. Jammu and Kashmir	1	335
6. Kerala	2	9
7. Madhya Pradesh	1	201
8. Madras	1	24
9. Maharashtra	2	189
10. Mysore	1	132
11. Orissa	1	46
12. Punjab	1	198
13. Rajasthan	1	110
14. Uttar Pradesh	1	286
15. West Bengal	2	162
Union Territories		
1. Delhi	2	69
2. Himachal Pradesh	1	266

The above Table reveals that the proportion of public health and medical institutions, health centres, hospitals, dispensaries, clinics, etc. is almost the same throughout the country except in some States and Union Territories which provide better facilities. The proportion of Census houses used for miscellaneous purposes varies widely from State to State, the figure for Uttar Pradesh being comparatively on the high side.

24. The average proportion of public health and medical centres, etc. to 1,000 Census houses in Uttar Pradesh is one only. The distribution of districts by the proportion of Census houses used as such is given in the following Table :

TABLE 1.20—Distribution of Districts by Proportion of Public Health, Medical Institutions, etc.

Proportion to 1,000	No. of Districts
Negligible	12
1	35
2	7

Most of the districts have one Census house per thousand for the above purpose. Districts which have a negligible proportion are Tehri Garhwal, Rae Bareilly, Bahraich, Gonda, Sultanpur, Partapgarh, Basti, Gorakhpur, Deoria, Azamgarh, Ballia and Ghazipur. Those which have a proportion of 2 to 1,000 are Naini Tal, Bareilly, Dehra Dun, Meerut, Etawah, Kanpur and Lucknow. Many of these possess large urban areas.

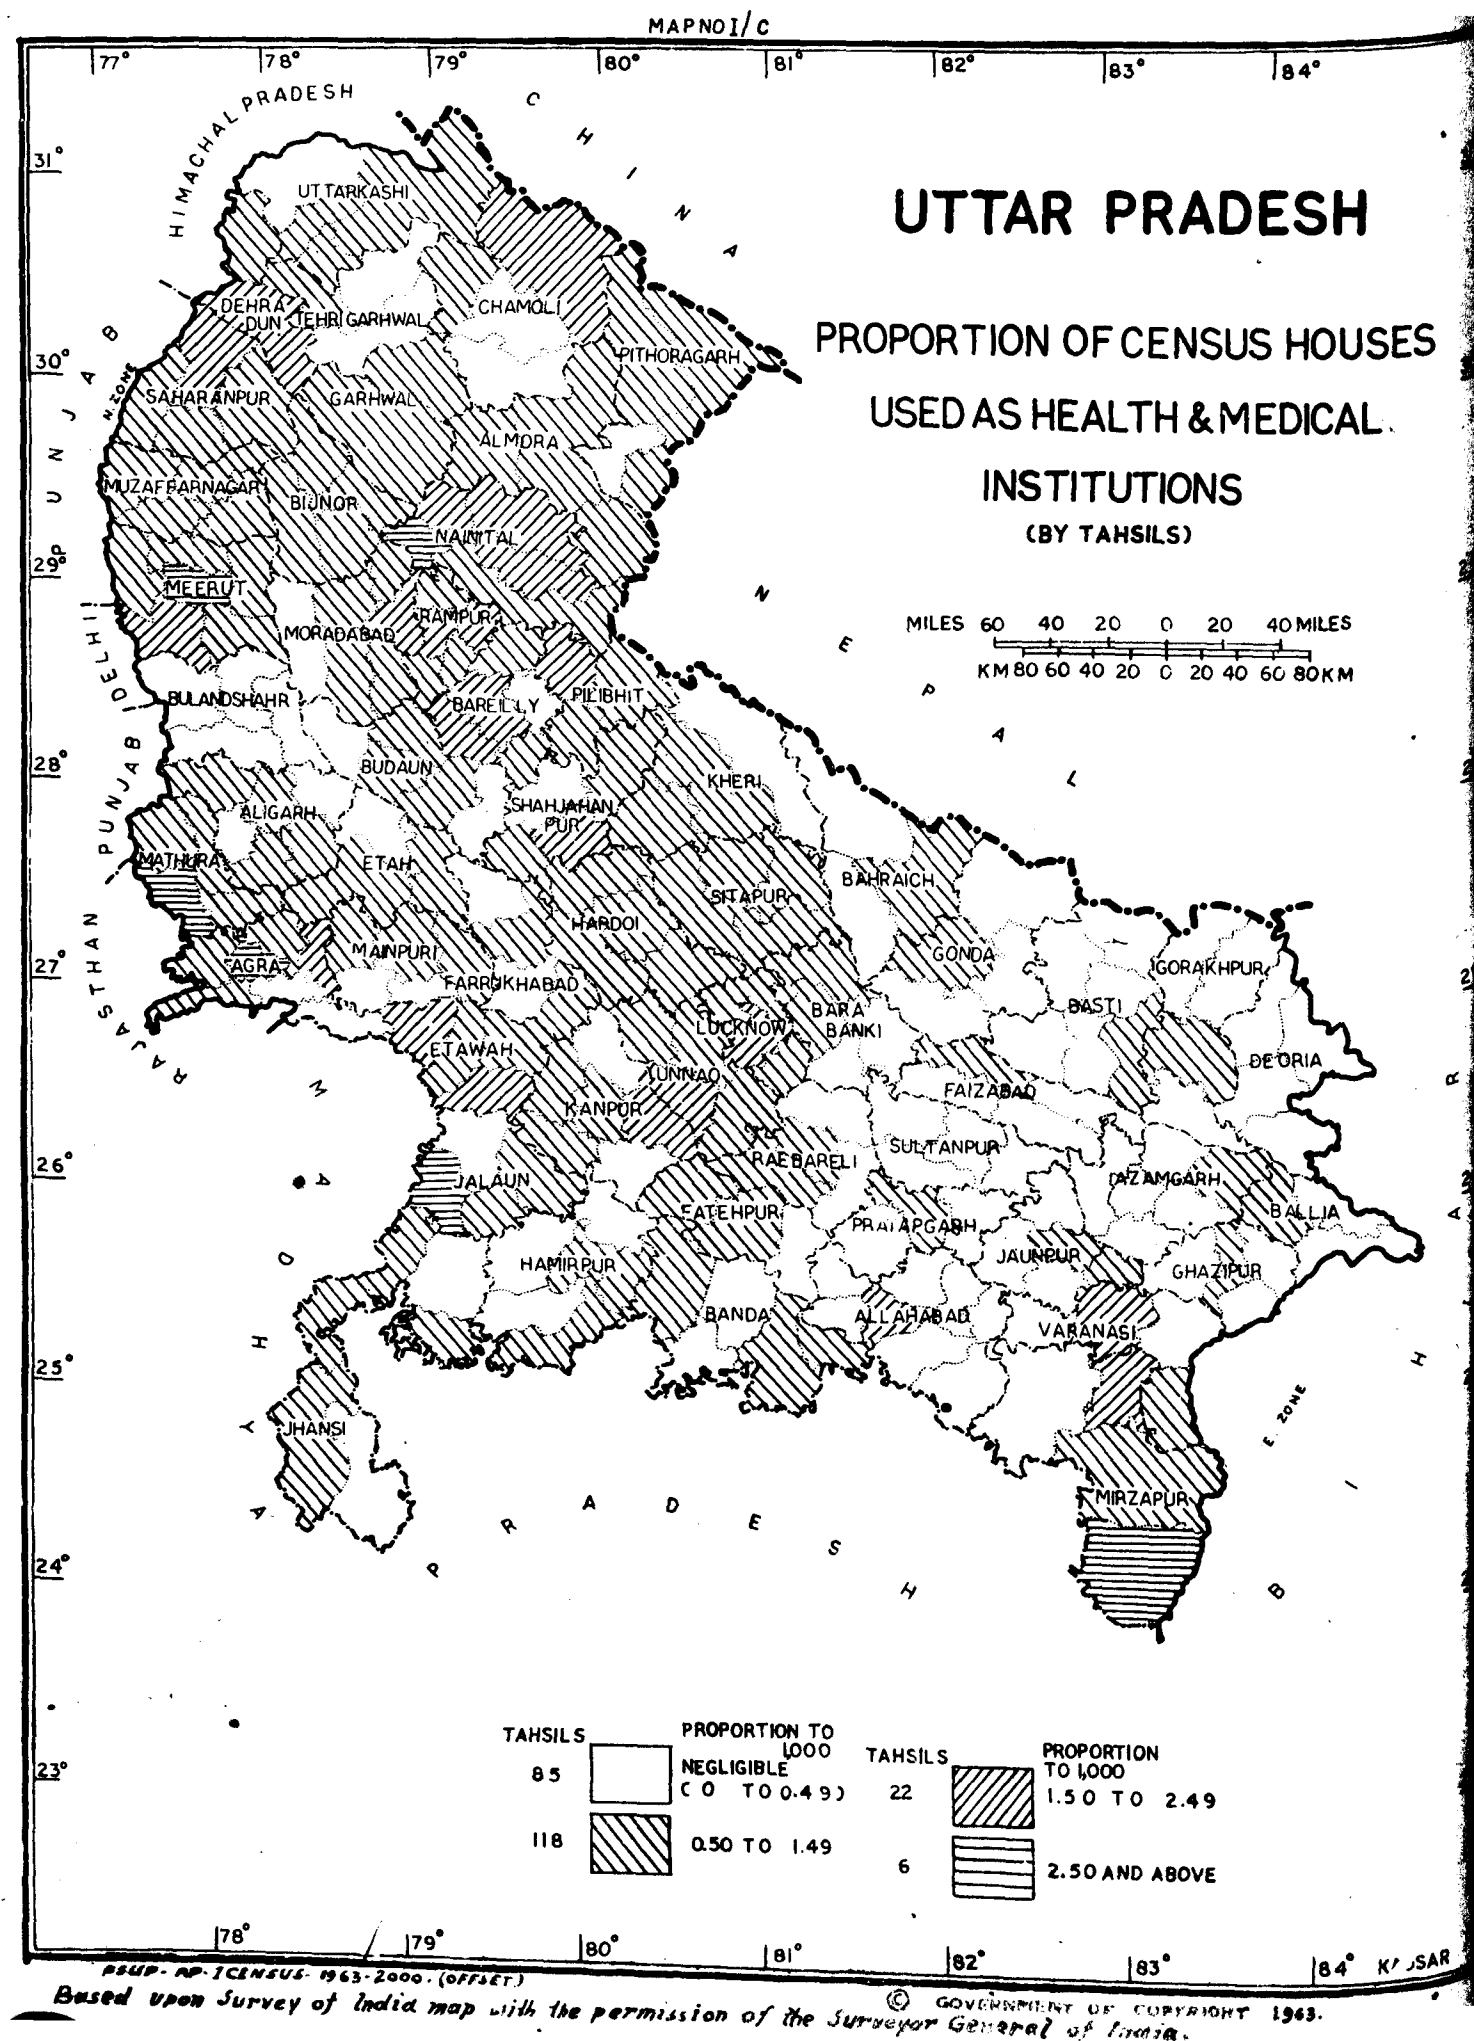

25. Tahsil Joshimath of Chamoli, tahsils Bhabar and Naini Tal of Naini Tal, tahsil Moradabad, tahsils Bilaspur and Rampur of Rampur, tahsils Aonla and Bareilly of Bareilly, tahsils Pilibhit, Shahjahanpur, Dehra Dun and Saharan-

pur, tahsil Ghaziabad of Meerut, tahsil Firozabad of Agra, tahsils Etawah and Auraiya of Etawah, tahsil Kanpur, tahsil Chail of Allahabad, tahsils Unnao, Lucknow and Varanasi and tahsil Chunar of Mirzapur have a proportion of 2. Tahsil Kashipur of Naini Tal, tahsils Meerut, Mathura and Agra, tahsil Konch of Jalaun and Dudhi of Mirzapur have a proportion of 3. Most of these 28 tahsils are either sadar tahsils or have other large urban areas.

26. There are numerous areas in the State which have a negligible proportion of the above and they are shown in the following Table :

TABLE 1.21—*Tahsils having negligible proportion of Census Houses used as Public Health and Medical Institutions, Health Centres, Hospitals, Dispensaries, Clinics, etc.*

(District) Tahsil	(District) Tahsil	(District) Tahsil	(District) Tahsil
(Uttar Kashi)	(Farrukhabad)	(Rae Bareilly)	(Gorakhpur)
1. Puraula	19. Kaimganj	40. Maharajganj	63. Pharenda
(Chamoli)	20. Chhibramau	41. Salon	64. Maharajganj
2. Karnaprayag	(Kanpur)	(Bahraich)	65. Bangsaon
3. Chamoli	21. Bilhaur	42. Nanpara	(Deoria)
(Pithoragarh)	22. Ghatampur	43. Kaiserganj	66. Hata
4. Didihat	(Fatehpur)	(Gonda)	67. Padrauna
(Tehri Garhwal)	23. Khaga	44. Balrampur	68. Deoria
5. Pratapnagar	(Allahabad)	45. Utraula	69. Salempur
6. Devaprayag	24. Sirathu	46. Tarabganj	(Azamgarh)
(Moradabad)	25. Manjhanpur	(Bara Banki)	70. Sagri
7. Hasanpur	26. Soraon	47. Ramsanehighat	71. Azamgarh
(Budaun)	27. Phulpur	48. Haidergarh	72. Muhammadabad
8. Gunnaur	28. Handia	(Faizabad)	73. Phulpur
9. Dataganj	29. Karchhana	49. Bikapur	74. Lalganj
(Bareilly)	30. Meja	50. Akbarpur	(Jaunpur)
10. Nawabganj	(Jhansi)	51. Tanda	75. Shahganj
(Shahjahanpur)	31. Garautha	(Sultanpur)	76. Machhlishahr

(Aligarh)	(Jalaun)	53. Amethi	(Ballia)
12. Iglas	33. Jalaun	54. Sultanpur	78. Bansdih
13. Atrauli	(Hamirpur)	55. Kadipur	79. Ballia
(Agra)	34. Rath	(Pratapgarh)	(Ghazipur)
14. Fatehabad	35. Hamirpur	56. Kunda	80. Saidpur
15. Bah	36. Charkhari	57. Patti	81. Muhammadabad
(Etah)	(Banda)	(Basti)	82. Zamania
16. Kasganj	37. Naraini	58. Domariaganj	(Varanasi)
(Mainpuri)	38. Baberu	59. Naugarh	83. Bhadohi
17. Jasrana	(Kheri)	60. Bansi	84. Chandauli
18. Kerhal	39. Nighasan	61. Harraiya	(Mirzapur)
		62. Basti	85. Mirzapur

The above Table reveals the extent to which the rural areas of the State have to exist without adequate public health and medical facilities.

Map No. I/C gives the proportion of Census houses used as health and medical institutions (by tahsils).

Census Houses in Cities and Towns Having 50,000 Population and Above

27. Separate study of large towns is useful as they possess special features. There are 35 towns having a population of 50,000 and above, considering Meerut Cantonment and Kanpur Cantonment as separate from Meerut Municipal Board and Kanpur Municipal Corporation respectively. Except these 2 cantonments, all the towns are municipalities.

28. *Vacant Houses*—The number of vacant Census houses varies from 24 in Varanasi to 111 in Sitapur per 1,000, the average proportion of vacancy in urban areas being 66. The following Table gives the number of houses according to proportion of vacant houses :

TABLE 1.22—Distribution of Class I and II Towns by Proportion of Vacant Census Houses

Range	No. of Towns
0—29	5
30—59	14
60—89	14
90 and Above	2

Names of towns in the lowest range are Dehra Dun (29), Agra (29), Kanpur Cantt. (26), Gorakhpur (28) and Varanasi (24), and of those in the highest are Sitapur (111) and Faizabad-cum-Ayodhya (98).

29. *Dwellings*—The average number of dwellings, including part dwellings, per 1,000 Census houses in the urban areas of the State is 721. The proportion of dwellings in these 35 towns varies from 653 in Mirzapur-cum-Vindhyachal to 885 in Kanpur Cantonment. The distribution of towns according to the proportion of dwellings is given in the following Table :

17

TABLE 1.23—Distribution of Class I and II Towns by Proportion of Census Houses used as Dwellings, Wholly or Partly

Range	No. of Towns
Below 700	9
700—749	17
750—799	5
800 and Above	4

The largest number of towns is in the range 700—749. The lowest range includes Moradabad (691), Pilibhit (684), Muzaffarnagar (690), Hapur (684), Hathras (687), Mathura (674), Etawah (675), Jaunpur (665) and Mirzapur-cum-Vindhyachal (653). Only 2 out of these are of Class I having population exceeding one lakh. The towns in the highest range are Kanpur Municipal Corporation (825), Kanpur Cantt. (885), Allahabad (805) and Lucknow (824), all of which are Class I cities, except Kanpur Cantonment which is a Class II town and forms part of Kanpur Town-Group.

30. *Shops, including Shop-cum-Dwellings*—The average proportion for the urban areas of the State is 102 to 1,000. The following Table gives the distribution of these 35 towns by the proportion of shops and shop-cum-dwellings :

TABLE 1.24—Distribution of Class I and II Towns by Proportion of Shops and Shop-cum-Dwellings

Range	No. of Towns
0—49	2
50—74	3
75—99	11
100—124	13
125—149	4
150 and Above	2

The largest number is in the range 100—124. The 2 towns in the lowest range are Budaun (45) and Kanpur Cantonment (29), and those in the highest are Moradabad (158) and Varanasi (154). The towns in the next range are

Rampur (146), Saharanpur (137), Mathura (126) and Agra (139). All of these 6 towns are important from the point of view of commerce.

31. *Workshops and Factories including Workshop-cum-Dwellings*—The average proportion for all urban areas is 38 to 1,000. The proportion of workshops and factories in Class I and II towns differs very widely, Pilibhit (2) being at the bottom and Varanasi (103) at the top. The distribution of these towns by proportion of workshops and factories and workshop-cum-dwellings is given in the following Table:

TABLE 1.25—Distribution of Class I and II Towns by Proportion of Workshops and Factories and Workshop-cum-Dwellings

Range	No. of Towns
0—19	8
20—39	16
40—59	7
60—79	2
80—99	1
100 and Above	1

The range 20—39 accounts for the largest number of towns. The 8 towns in the lowest range are Pilibhit (2), Dehra Dun (6), Saharanpur (9), Hardwar (7), Muzaffarnagar (11), Ghaziabad (9), Meerut Cantt. (16) and Kanpur Cantt. (20). These north-western towns cannot be called industrial. Meerut Municipal Board, however, has a high proportion of 68. The town in the highest range is Varanasi (103). In Varanasi an overwhelming majority of industrial establishments consist of workshop-cum-dwellings, the work mostly being done at home. Sambhal (82) is in the next highest range, and Meerut M. B. (68) and Etawah (62) in the third highest. As already stated before, industrialization of an area or a town does not only depend on the proportion of houses used as workshops and factories, but also on their absolute number and the sizes of industrial establishments. The subject of workshops and factories will be taken up in detail in Chapter III.

32. *Business Houses and Offices*—This category includes commercial and administrative

offices. The proportion to 1,000 varies from 3 to 14 in these towns, the average proportion for urban areas being 7. Towns having the lowest proportion are Kanpur Cantt. (3) and Mirzapur-cum-Vindhyachal (3), and those with the highest are Sitapur (14) and Faizabad-cum-Ayodhya (13).

33. *Teaching Institutions*—Teaching Institutions naturally exist in a greater proportion in urban areas, the average being 4 to 1,000. The following Table gives the distribution of these towns according to the proportion of teaching institutions in each of them:

TABLE 1.26—Distribution of Class I and II Towns by Proportion of Teaching Institutions

No. of Towns	Proportion to 1,000	No. of Towns	Proportion to 1,000
5	2	15	4
8	3	7	5

15 out of 35 towns have a proportion of 4 teaching institutions to 1,000 Census houses. The 5 towns having the lowest proportion are Sambhal, Hathras, Firozabad, Farrukhabad-cum-Fatehgarh and Kanpur Municipal Corporation, and the 7 towns having the highest proportion of 5 are Bareilly, Dehra Dun, Meerut Municipal Board, Hapur, Aligarh, Mathura and Allahabad. Considering that these teaching institutions include all institutions where any kind of teaching is imparted the proportion even in these 7 towns cannot be said to be high.

34. *Places of Halt*—Every town has some places of halt for visitors, and the average number of such places per 1,000 Census houses is 4 for urban areas. The proportion of halting places to 1,000 Census houses is 1—2 in the case of 7 towns, 3—4 for 21, 5—6 for 6, and more than 6 in the case of one. Towns of the first category are Sambhal, Rampur, Saharanpur, Farrukhabad-cum-Fatehgarh, Kanpur Municipal Corporation, Lucknow and Mirzapur-cum-Vindhyachal, and of the last Mathura.

35. *Eating Places*—The average proportion for the urban areas is 2 to 1,000 Census houses. Firozabad, Farrukhabad-cum-Fatehgarh, Etawah, Kanpur M. C., Jhansi, Bahraich,

Jaunpur and Varanasi have them in negligible proportion. The following towns have a considerable proportion of eating places:

TABLE 1.27—Class I and II Towns having more than 4 per 1,000 Census Houses as Eating Places

Town	Proportion to 1,000
1. Budaun	5
2. Rampur	5
3. Bareilly	7
4. Pilibhit	6
5. Dehra Dun	8
6. Hardwar	5
7. Ghaziabad	6
8. Hapur	10
9. Aligarh	5

All of these towns are situated in the western U. P. for reasons already stated.

36. *Places of Entertainment and Community Gathering*—For reasons given in para 21, no comparison of data is possible.

37. *Public Health and Medical Institutions and Centres, Hospitals, Dispensaries and Clinics*—The proportion of these institutions, centres, etc. is much higher in the urban areas of the State for obvious reasons, the average proportion for urban areas being 3 to 1,000 Census houses. The following Table gives the distribution of 35 towns according to the proportion of these institutions and centres:

TABLE 1.28—Distribution of Class I and II Towns by Proportion of Public Health and Medical Institutions, Centres, etc.

Range	No. of Towns	Range	No. of Towns
1—2	6	5—6	9
3—4	20		

The largest number of towns lies in the range 3—4. Names of towns in the lowest range are

Muzaffarnagar (2), Hathras (1), Kanpur Cantt. (2), Jhansi (1), Jaunpur (2), and Mirzapur-cum-Vindhyachal (1). The 9 towns in the highest range are Moradabad (5), Bareilly (5), Pilibhit (5), Dehra Dun (6), Hardwar (5), Mathura (6), Etawah (6), Sitapur (5) and Bahraich (5). With the exception of Sitapur and Bahraich, all these towns lie in the western Uttar Pradesh. Only 4 of these are Class I cities. The proportions in KAVAI cities are as follows:

Kanpur	3	Varanasi	4
Allahabad	3	Agra	3
Lucknow	4		

Among these cities Lucknow and Varanasi offer public health and medical facilities to a larger extent in proportion to their size.

Classification of Cities and Towns having 50,000 Population and Above as Industrial, Commercial and Residential

38. At the outset, it must be confessed that such a classification is very difficult. Every town is residential, as its inhabitants have to dwell therein. Food, provisions, cloth and other consumer goods are absolutely essential to the subsistence of the population, and hence shops must exist for buying and selling goods. Every town has, therefore, to be commercial to a greater or smaller extent. The case of industry is slightly different. Though every town possesses some industry, yet its presence is not an essential pre-requisite for its existence. However, a town without industry is of a parasitic nature, and is not able to survive for long.

39. As already stated before, the proportion of Census houses used as workshops and factories is in no way indicative of its industrial progress. For this reason, it becomes necessary to refer to other data for treating a town as industrial. The said data are available in the Primary Census Abstract and B-II Table. Taking a minimum of 30 per cent of the total number of workers in manufacturing industries (including household industry) as the criterion of

an industrial town, the following 14 towns qualify for being treated as industrial:

TABLE 1.29—*Industrial Towns of Classes I and II*

Percentage	Class	Percentage	Class
Name of Town		Name of Town	
<i>Over 50</i>			
1. Firozabad	II	8. Aligarh	I
<i>40—50</i>			
2. Varanasi	I	9. Rampur	I
<i>35—40</i>			
3. Kanpur M. C.	I	10. Mirzapur-cum-Vindhyachal	I
4. Moradabad	I	11. Farrukhabad-cum-Fatehgarh	II
<i>30—35</i>			
5. Agra	I	12. Amroha	II
6. Meerut M. B.	I	13. Sambhal	II
7. Saharanpur	I	14. Ghaziabad	II

Firozabad, which has the highest percentage, is a Class II town though it is on the verge of being in Class I. In each range the towns have been arranged in order of their population.

40. The criterion of percentage of workers in trade and commerce is not satisfactory for the classification of a town as commercial, because as many as 21 towns out of 35 lie in the small percentage range of 20–24. Only Hathras has a comparatively high percentage of 32. Therefore, the criterion of proportion of shops will also have to be applied in addition to the percentage of workers. The average proportion of Census houses used as shops in the urban areas is 102 to 1,000. Towns which have a proportion exceeding 120 can be deemed to be commercial, and similarly those in which the percentage of workers in trade and commerce is 24 and above.

TABLE 1.30—*Commercial Towns of Classes I and II*

Proportion of Shops			
Towns	Class	Towns	Class
<i>150 and Above</i>		<i>130—139</i>	
1. Varanasi	I	4. Agra	I
2. Moradabad	I	5. Saharanpur	I
<i>140—149</i>		<i>120—129</i>	
3. Rampur	I	6. Bareilly	I

Towns
120—129

7. Aligarh I
8. Mathura I

Proportion of Workers in
Trade and Commerce

Towns Class

24 And Above

9. Muzaffarnagar II

10. Hathras II

11. Hapur II

12. Sitapur II

Towns in each range have been arranged in order of their population. All towns which have been selected as commercial on the basis of high proportion of shops belong to Class I, and those selected on account of high percentage of workers in trade and commerce are of Class II. Agra, Varanasi, Moradabad, Saharanpur, Aligarh and Rampur which are all Class I cities are both on the list of industrial towns and of commercial towns. These six cities can be deemed to be both industrial and commercial.

41. The remaining 15 towns may be treated as residential and administrative. Their names are given in the following Table:

TABLE 1.31—*Residential and Administrative Towns of Classes I and II*

Name of Town	Class	Name of Town	Class
1. Lucknow	I	9. Etawah	II
2. Allahabad	I	10. Jaunpur	II
3. Gorakhpur	I	11. Budaun	II
4. Jhansi	I	12. Hardwar	II
5. Dehra Dun	I	13. Pilibhit	II
6. Shahjahanpur	I	14. Kanpur Cantt.	II
7. Faizabad	II	15. Bahraich	II
8. Meerut Cantt.	II		

42. To sum up, Agra, Varanasi, Moradabad, Saharanpur, Aligarh and Rampur cities are both industrial and commercial. Kanpur M. C., Meerut M. B., Mirzapur-cum-Vindhyachal, Firozabad, Farrukhabad-cum-Fatehgarh, Amroha, Sambhal and Ghaziabad are industrial. Bareilly, Mathura, Muzaffarnagar, Hathras, Hapur and Sitapur are commercial, and the remaining 15, namely, Lucknow, Allahabad, Gorakhpur, Jhansi, Dehra Dun, Shahjahanpur, Faizabad, Meerut Cantt., Etawah, Jaunpur, Budaun, Hardwar, Pilibhit, Kanpur Cantt., and Bahraich are of residential and administrative nature.

CHAPTER II

TENURE STATUS OF CENSUS HOUSEHOLDS

(Housing Table E-II and Subsidiary Tables)

Housing Table E-II has been prepared for sample households from columns 4, 11 and 14 of the Houselist, and gives the tenure status of sample Census houses used as dwellings. All households, except those which are houseless live in Census houses most of which are exclusively dwellings, but some of them are in part dwellings and in part shops, workshops, etc. It is instructive to study how many households live in one kind of Census house or the other. For preparing the sample the first household was chosen at random from among the first five households of the first Houselist, and thereafter every fifth household was marked for selection. This Table, like the previous Tables, gives data for each district and tahsil with rural/urban breakdown, and for each town having a population of 50,000 and above. The definitions of the *Census House*, *Census Household*, *Dwelling*, *Shop-cum-Dwelling* and *Workshop-cum-Dwelling* have already been given before. Other terms used in this Table are explained below:

Owned—denotes ownership of the Census house by the occupying household.

Rented—denotes that the Census house is not owned by the occupying household and rent is either paid or is payable.

Dwellings with Other Uses—these include Census houses which are partly used as dwellings and partly put to some use other than shop or workshop.

2. From Table E-II two Subsidiary Tables E-II.1 and E-II.2 have been prepared. Subsidiary Table E-II.1 gives the distribution of 1,000 Census households in rural areas living in dwellings, shop-cum-dwellings, workshop-cum-dwellings and dwellings with other uses. Subsidiary Table E-II.2 gives similar data for urban areas classified by tenure status, viz. owned and rented.

3. The following Table gives the proportion of 1,000 Census households by types of uses of occupied Census houses in the rural and urban areas of States and the adjoining Union Territories of Delhi and Himachal Pradesh:

TABLE 2.1—*Distribution of 1,000 Rural and 1,000 Urban Households in States and certain Union Territories, by Types of Use of Census Houses*

States	Rural/ Urban	Dwel- lings	Shop- cum- Dwel- lings	Work- shop- cum- Dwel- lings	Dwel- lings with Other Uses
1. Andhra Pradesh	R U	984 983	3 7	12 8	1 2
2. Assam	R U	983 912	14 72	2 10	1 6
3. Bihar	R U	975 947	7 27	17 20	1 6
4. Gujarat	R U	987 978	5 5	4 9	4 8
5. Jammu and Kashmir	R U	969 966	5 11	23 13	3 10
6. Kerala	R U	995 994	4 3	1 3	N N
7. Madhya Pradesh	R U	948 946	6 17	44 36	2 1
8. Madras	R U	981 955	6 9	10 30	3 6
9. Maharashtra	R U	975 964	5 11	18 17	2 8
10. Mysore	R U	988 976	2 5	9 16	1 3
11. Orissa	R U	996 973	1 16	2 2	1 9
12. Punjab	R U	990 981	5 10	2 5	3 4
13. Rajasthan	R U	996 991	2 4	2 4	N 1
14. Uttar Pradesh	R U	997 986	1 4	1 8	1 2
15. West Bengal	R U	990 953	5 29	2 8	3 10
<i>Union Territories</i>					
1. Delhi	R U	984 983	8 11	2 1	6 5
2. Himachal Pradesh	R U	925 856	10 35	61 93	4 16

4. The above Table reveals that an overwhelming majority of households lives in Census houses used exclusively as dwellings. In the rural areas the proportion everywhere is above 900, the minimum being in the case of Himachal Pradesh (925) and the maximum in that of Uttar Pradesh (997). Households living in shop-cum-dwellings are noticeable in Assam (14) and Himachal Pradesh (10) only and those living in workshop-cum-dwellings in Andhra Pradesh (12), Bihar (17), Jammu and Kashmir (23), Madhya Pradesh (44), Madras (10), Maharashtra (18), and Himachal Pradesh (61). The proportion of households living in workshop-cum-dwellings is significant in Himachal Pradesh and Madhya Pradesh only. Households living in dwellings with other uses call for no attention. In the case of urban areas also, an overwhelming majority of households lives in Census houses used exclusively as dwellings. Assam (912) and Himachal Pradesh (856), however, have comparatively fewer households of this type. Shop-cum-dwellings are noticeable in the urban areas of Assam (72), Bihar (27), Jammu and Kashmir (11), Madhya Pradesh (17), Maharashtra (11), Orissa (16), Punjab (10), West Bengal (29), Delhi (11) and Himachal Pradesh (35). The proportion in Assam, Himachal Pradesh, West Bengal and Bihar is comparatively high. As regards households living in workshop-cum-dwellings, their proportion is noticeable in Bihar (20), Jammu and Kashmir (13), Madhya Pradesh (36), Madras (30), Maharashtra (17), Mysore (16) and Himachal Pradesh (93). The proportion is comparatively high in Himachal Pradesh, the workshop-cum-dwelling being quite a common feature there. Dwellings with other uses have a noticeable proportion only in Jammu and Kashmir (10), West Bengal (10) and Himachal Pradesh (16). Elsewhere it is very small. In Uttar Pradesh the proportion of households living in each kind of Census house not used exclusively as dwelling is less than 10 both in the rural and the urban areas. The data on owned and rented structures are of significance only in urban areas particularly in big towns. It is, therefore, desirable to make

a study of the rural and the urban areas separately.

Distribution of Households by the Type of Use of Census Houses in Rural Areas

5. In the rural areas out of every 1,000 households, 997 live in dwellings, one each in shop-cum-dwelling, workshop-cum-dwelling and dwelling with other uses. The Census house used exclusively as dwelling is obviously of the greatest importance.

Dwellings

6. The proportion of households living in Census houses used exclusively as dwellings is so high in every district that no detailed discussion is called for. The average proportion is 997 to 1,000. Only 4 districts, namely, Chamoli (984), Almora (985), Dehra Dun (989) and Faizabad (989) have a proportion of less than 990. Districts which have a proportion of 1,000 or almost 1,000 are Budaun, Shahjahanpur, Agra, Etah, Mainpuri, Kanpur, Sitapur, Bahraich, Deoria and Ballia.

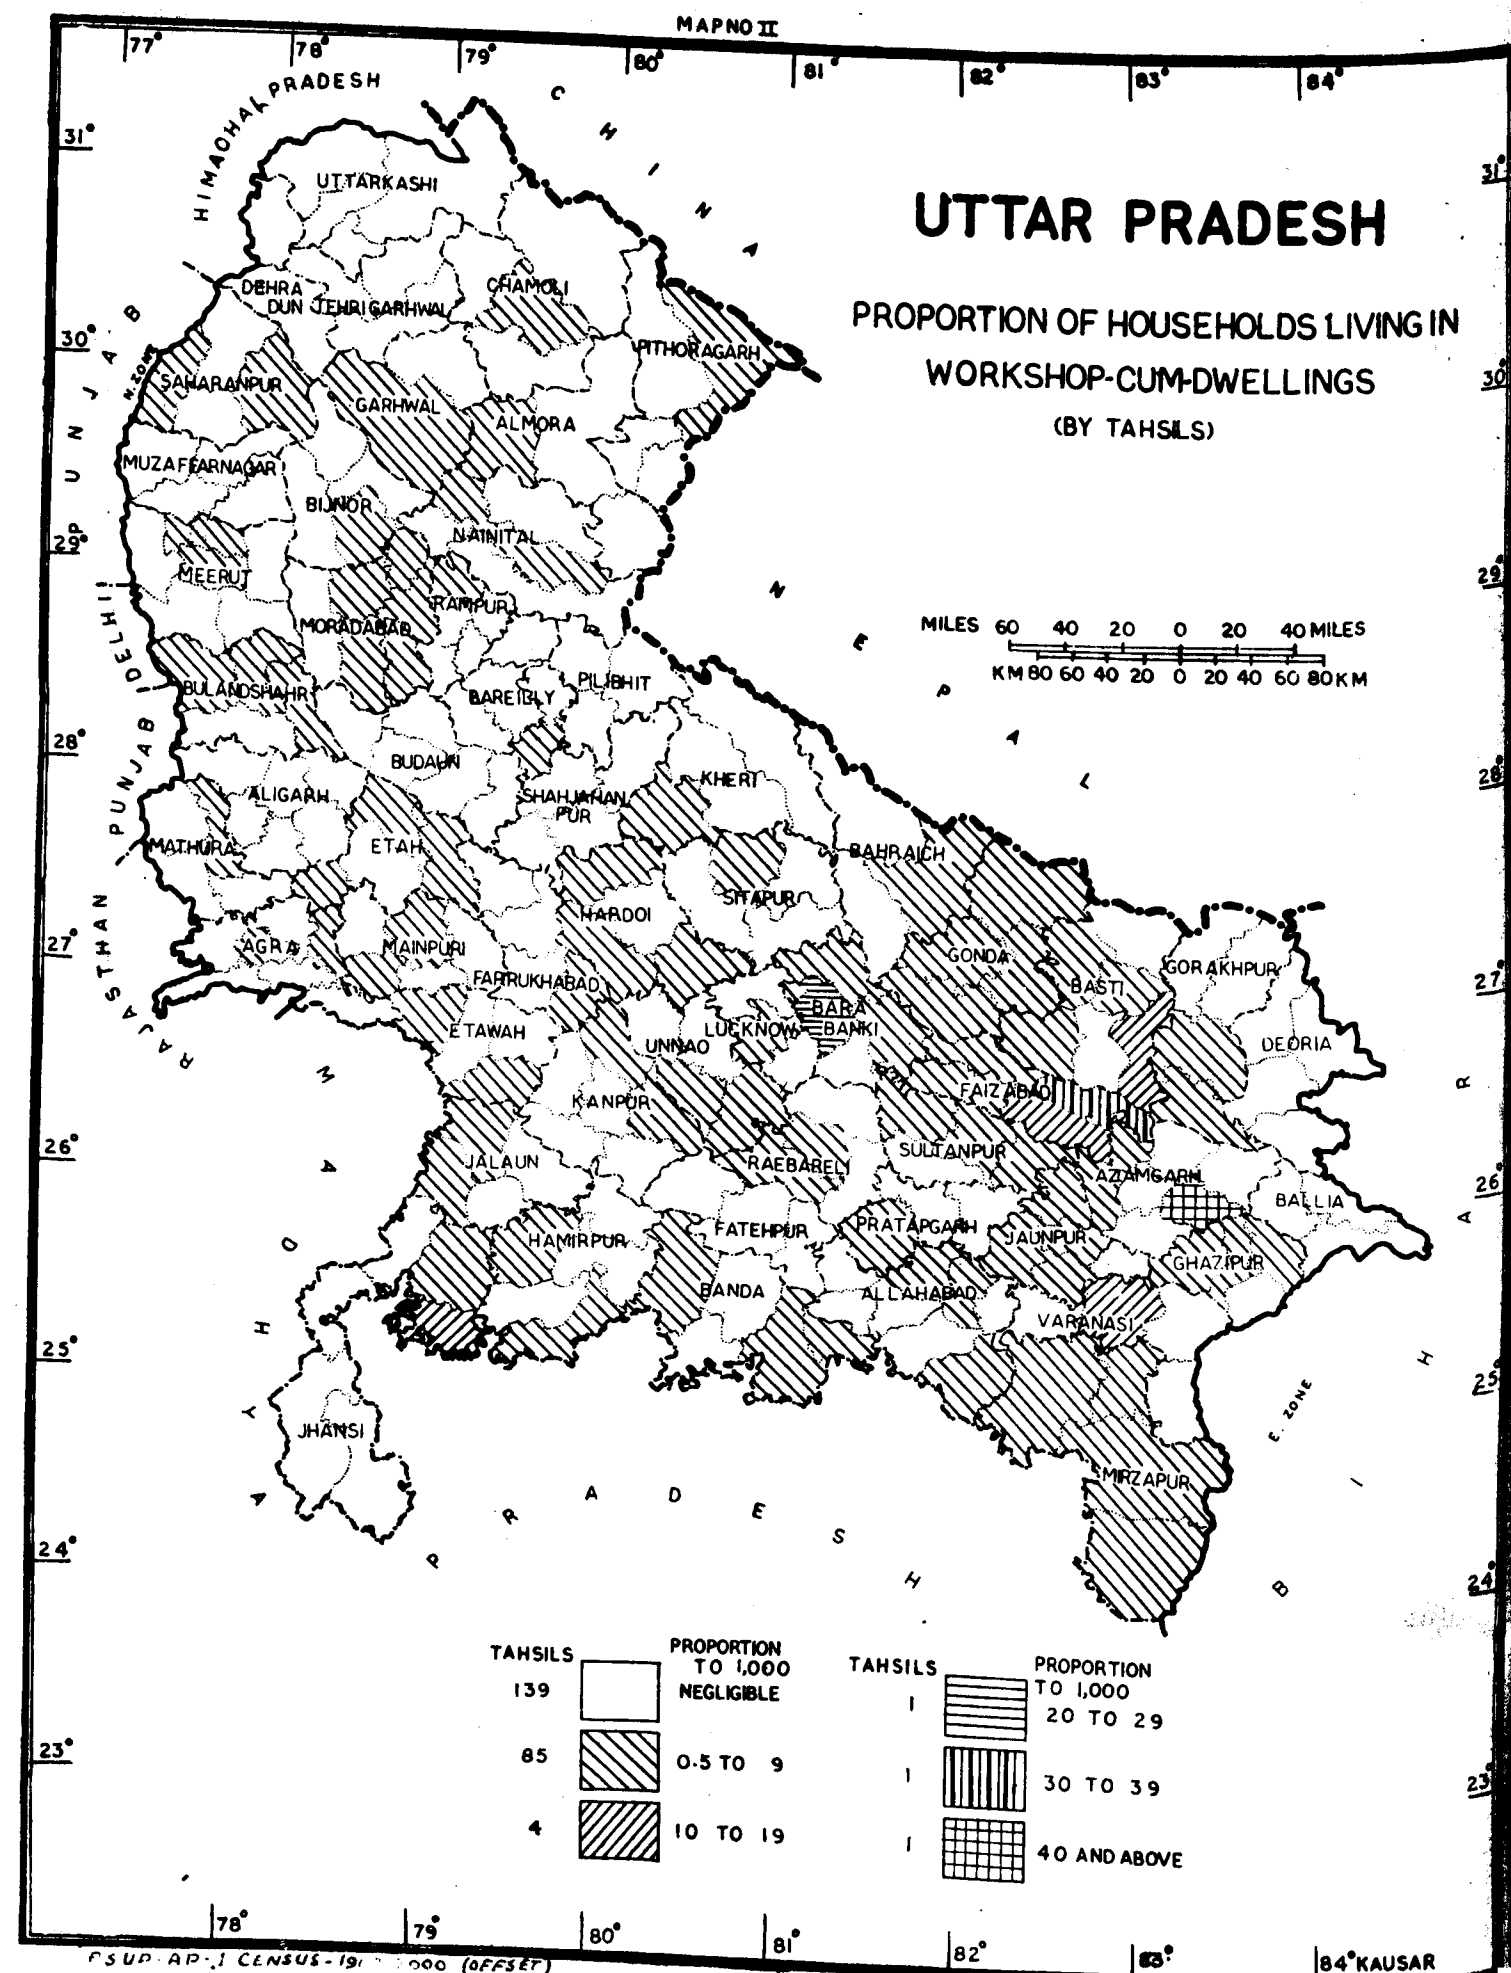

Shop-cum-Dwellings

7. The average proportion for the State is 1 to 1,000. The following Table gives the distribution of districts by the proportion of shop-cum-dwellings :

TABLE 2.2—*Distribution of Districts by Proportion of Households occupying Shop-cum-Dwellings (Rural)*

Range	No. of Districts	Range	No. of Districts
Nil or Negligible	27	5—6	1
1—2	21	7 and Above	3
3—4	2		

The largest number of districts is in the lowest range N. The 3 districts in the highest range are Chamoli (10), Almora (11) and Dehra Dun (9), and the district in the next range is Faizabad (5). Among the tahsils 158 have a proportion of 3 or less and 10 of 7 or more. The following Table gives the names of tahsils

having 7 or more per 1,000 households occupying shop-cum-dwellings :

TABLE 2.3—Tahsils having 7 or more per 1,000 Households occupying Shop-cum-Dwellings (Rural)

(District) Tahsil	Proportion to 1,000
(Chamoli)	
1. Joshimath	14
2. Karnaprayag	12
3. Chamoli	7
4. Ukhi math	8
(Almora)	
5. Almora	13
6. Ranikhet	8
7. Champawat	15
(Naini Tal)	
8. Haldwani	8
(Dehra Dun)	
9. Dehra Dun	10
(Faizabad)	
10. Faizabad	7

Most of the tahsils having a noticeable proportion of shop-cum-dwellings are situated in the Himalayan hills.

Workshop-cum-Dwellings

8. The average proportion for the State is 1 to 1,000. Distribution of districts by the proportion of workshop-cum-dwellings is given in the following Table :

TABLE 2.4—Distribution of Districts by Proportion of Households occupying Workshop-cum-Dwellings (Rural)

Range	No. of Districts	Range	No. of Districts
Nil or Negligible	28	3—4	1
1—2	22	5	3

The largest number of districts is in the lowest range. Bara Banki (5), Faizabad (5) and Basti (5) are in the highest range. Next is Azamgarh (3). Among the tahsils 124 have a proportion of 2 or less and 11 have a proportion of 5 and more. Eighty-two tahsils have no workshop-cum-dwellings. The table given below shows tahsils having 5 or more households liv-

ing in workshop-cum-dwellings out of 1,000 households :

TABLE 2.5—Tahsils having 5 or more per 1,000 Households occupying Workshop-cum-Dwellings (Rural)

(District) Tahsil	Proportion to 1,000
(Moradabad)	
1. Amroha	7
2. Thakurdwara	5
(Jhansi)	
3. Mauranipur	9
(Hamirpur)	
4. Mahoba	7
(Bara Banki)	
5. Nawabganj	12
6. Ramsanehighat	5
(Faizabad)	
7. Akbarpur	7
8. Tanda	12
(Basti)	
9. Khalilabad	18
(Azamgarh)	
10. Muhammadabad	16
(Mirzapur)	
11. Robertsganj	6

Tahsils which have a proportion exceeding 10 are Nawabganj of Bara Banki, Tanda of Faizabad, Khalilabad of Basti and Muhammadabad of Azamgarh districts. These three districts are contiguous and known for their handloom products. Map No. II gives the proportion of households living in workshop-cum-dwellings (by tahsils).

Dwellings with Other Uses

9. The average proportion for the State is 1 to 1,000. Distribution of districts according to the proportion of dwellings with other uses is given in the following Table :

TABLE 2.6—Distribution of Districts by Proportion of Households occupying Dwellings with Other Uses (Rural)

Range	Number of Districts	Range	Number of Districts
Nil or Negligible	31	3—4	1
1—2	20	5	2

The largest number of districts is in the lowest range. Chamoli (5) and Bijnor (5) are in the highest range and the next district is Uttar Kashi (3). Among the tahsils 95 have no dwellings with other uses. 120 tahsils have a proportion of 2 or less. 7 tahsils have a proportion of 5 and more as the following Table will show :

TABLE 2.7—Tahsils having 5 or more per 1,000 Households occupying Dwellings with Other Uses (Rural)

(District) Tahsil	Proportion to 1,000
(Uttar Kashi)	
1. Bhatwari	6
(Chamoli)	
2. Karnaprayag	6
3. Chamoli	6
(Almora)	
4. Ranikhet	5
(Bijnor)	
5. Nagina	9
6. Dhampur	7
(Dehra Dun)	
7. Chakrata	6

The proportion everywhere is so low that no comments are required.

10. The shop-cum-dwelling or workshop-cum-dwelling in Uttar Pradesh is a rarity. People like to have their dwellings and working places separate. Even when both are in the same premises, separate exits are provided.

Distribution of Households by the Type of Use of Census Houses in Urban Areas

11. Table 2.1 gives the distribution of rural and urban households in all States and the adjoining Union Territories by types of uses of Census houses. Except in the urban areas of Himachal Pradesh (856), the proportion of households living in Census houses used exclusively as dwellings is well over 900. The proportion living in shop-cum-dwellings is material only in the case of Bihar (27) West Bengal (29) and Himachal Pradesh (35), and the proportion living in workshop-cum-dwellings only in the case of Himachal

Pradesh (93). In Uttar Pradesh the proportion for exclusive dwellings is 986, for shop-cum-dwellings 4, for workshop-cum-dwellings 8, and for others 2. Classification of households into those living in owned and rented Census houses has not been considered so far, but since this subject is important for urban areas it will be taken up now.

Dwellings

12. The following Table gives the proportion of dwellings by tenure status in urban areas in the States and the adjoining Union Territories :

TABLE 2.8—Distribution of 1,000 Households living in Census Houses used exclusively as Dwellings in States and certain Union Territories by Tenure Status (Urban)

States	1,000 Households living in Dwellings	
	Owned	Rented
1. Andhra Pradesh	595	388
2. Assam	419	493
3. Bihar	534	413
4. Gujarat	384	594
5. Jammu and Kashmir	695	271
6. Kerala	715	279
7. Madhya Pradesh	405	541
8. Madras	455	496
	(4 'not stated')	
9. Maharashtra	290	674
10. Mysore	459	517
11. Orissa	605	368
12. Punjab	527	454
13. Rajasthan	592	399
14. Uttar Pradesh	516	470
15. West Bengal	332	621
Union Territories		
1. Delhi	300	683
2. Himachal Pradesh	450	406

It will be observed from the above Table that rented houses in urban areas exceed owned houses in Assam, Gujarat, Madhya Pradesh, Madras, Maharashtra, Mysore, West Bengal and Delhi. In Uttar Pradesh owned dwellings exceed rented dwellings, as in the case of Andhra Pradesh, Bihar, Jammu and Kashmir, Kerala, Orissa, Punjab, Rajasthan and Himachal Pradesh. In Kerala the proportion is very high, the rented house being an exception.

13. For Uttar Pradesh the average proportion of urban households living in Census houses used exclusively as dwellings is 986. 30 districts have a proportion of 990 and over, 16 between 950 and 989 and only 6 below 950. The names of these 6 districts are Tehri Garhwal (895), Garhwal (947), Almora (943), Bara Banki (928), Faizabad (858) and Azamgarh (824). Tahsils in which this proportion is less than 900 are given in the following Table :

TABLE 2.9—Tahsils having less than 900 Households occupying Census Houses used exclusively as Dwellings (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town (s)
(Tehri Garhwal)		
1. Tehri	860	Tehri N. A.
2. Aliganj	867	Gunj Dundwara M. B. and Ali- ganj T. A.
(Faizabad)		
3. Akbarpur	703	Akbarpur T. A. and Jalalpur T. A.
4. Tanda	745	Tanda M.B.
(Azamgarh)		
5. Muhammadabad	723	Maunath Bhanjan M. B., Mubarak- pur T. A. and Muhammadabad T.A.

In Tehri N. A. of Tehri Garhwal, 89 households per 1,000 are living in shop-cum-dwellings and 51 in dwellings with miscellaneous uses. In the towns of tahsil Aliganj of Etah, Akbarpur and Tanda of Faizabad, and Muhammadabad of Azamgarh districts, a very large proportion of households is living in workshop-cum-dwellings. These towns are famous for their textile products.

14. Regarding owned and rented Census houses used exclusively as dwellings the Table given below shows the distribution of districts

by the proportion of households living in rented dwellings. The proportions have been worked out from the Subsidiary Table E-II.2. There are no urban areas in Chamoli and Pithoragarh districts.

TABLE 2.10—Distribution of Districts by Proportion of Households occupying rented Census Houses used exclusively as Dwellings (Urban)

Range	Number of Districts	Range	Number of Districts
0—199	2	600—799	4
200—399	28	800 and Above	1
400—599	17		

The range 200—399 has the highest number of districts. Budaun (192) and Mirzapur (196) are in the lowest range. They have the highest proportion of households living in owned dwellings. The district in the highest range is Kanpur (870) on account of Kanpur City, which is the largest city in the State. Names of districts in which the number of households living in rented dwellings exceeds the number living in owned dwellings are Tehri Garhwal (573), Garhwal (672), Almora (718), Naini Tal (581), Dehra Dun (726), Meerut (510), Mathura (500), Agra (520), Kanpur (870), Allahabad (558), Lucknow (633), Sultanpur (521), Pratapgarh (511) and Gorakhpur (568). Four of these are hill districts and eight have cities of 1 lakh and over population. The only two districts of the plains, which do not have cities and are included in this list, are Sultanpur and Pratapgarh.

15. Names of tahsils, where more households live in rented dwellings than in owned, are given in the following Table :

TABLE 2.11—Tahsils having more Households occupying rented Census Houses used exclusively as Dwellings than owned (Urban)

(District) Tahsil	Proportion of Rented Dwellings to all Dwellings	Name of Town(s)
(Tehri Garhwal)		
1. Tehri	621	Tehri N. A.
2. Devaprayag	511	Narendranagar N. A. and Deva- prayag N. A.

(District) Tahsil	Proportion of Rented Dwellings to all Dwellings	Name of Town (s)	(District) Tahsil	Proportion of Rented Dwellings to all Dwellings	Name of Town(s)
(Garhwal)			(Allahabad)		
3. Pauri	564	Pauri M. B. and Srinagar N. A.	22. Chail	573	Allahabad Town Group
4. Lansdowne	764	Kotdwara M. B., Dogadda N. A. and Lansdowne Cantt.	(Jhansi)		
(Almora)			23. Jhansi	535	Jhansi Town Group and Babina Cantt
5. Almora	632	Almora Town Group	(Hardoi)		
6. Ranikhet	890	Ranikhet Cantt.	24. Hardoi	502	Hardoi M. B.
(Naini Tal)			(Lucknow)		
7. Haldwani	590	Haldwani-cum- Kathgodam M. B. and Ramnagar M. B.	25. Lucknow	640	Lucknow Town Group
8. Naini Tal	897	Naini Tal Town Group and Bhowali N. A.	(Sultanpur)		
(Dehra Dun)			26. Sultanpur	521	Sultanpur M. B.
9. Chakrata	975	Chakrata Cantt.	(Pratapgarh)		
10. Dehra Dun	722	Dehra Dun Town Group	27. Pratapgarh	511	Bela (Pratap- garh) M. B.
(Saharanpur)			(Gorakhpur)		
11. Saharanpur	512	Saharanpur M. B.	28. Gorakhpur	585	Gorakhpur M. B.
12. Roorkee	565	Roorkee Town Group, Manglaur M. B. and Hardwar M. B.	(Deoria)		
(Muzaffarnagar)			29. Deoria	526	Deoria M. B.
13. Muzaffarnagar	527	Muzaffarnagar M. B.	(Varanasi)		
(Meerut)			30. Chandauli	826	Mughalsarai Town Group
14. Ghaziabad	576	Ghaziabad M. B. and Railway Colony, Modinagar T. A., Murad- nagar T. A., Pilkhuwa M.B., and Faridnagar T. A.	The above Table shows that, besides the towns situated in the hills or at the foot of the hills, Ghaziabad, Etmadpur and Tundla, Kanpur, Lucknow and Mughalsarai have more than 600 households in occupation of rented dwellings and less than 400 in that of owned dwellings. Ghaziabad, Tundla and Mughalsarai are im- portant Railway centres possessing large Rail- way colonies. Kanpur and Lucknow are the two largest cities of the State, where numerous persons live in rented dwellings in connexion with industry, trade, profession and service.		
15. Meerut	571	Meerut Town Group, Kankar Khera T. A.			
(Mathura)					
16. Mathura	521	Mathura Town Group, Vrinda- van M. B. and Goverdhan T. A.			
(Agra)					
17. Agra	510	Agra Town Group			
18. Etmadpur	820	Etmadpur T. A., Tundla T. A. and Railway Colony			
19. Firozabad	569	Firozabad M. B.			
(Etawah)					
20. Bharthana	530	Bharthana T. A.			
(Kanpur)					
21. Kanpur	870	Kanpur Town Group			

Shop-cum-Dwellings

16. The proportion of households occupy-
ing shop-cum-dwellings in the urban areas of the
State and the Union Territories of Delhi and

Himachal Pradesh with tenure status is given in the following Table :

TABLE 2.12—Proportion of Households living in shop-cum-Dwellings in States and certain Union Territories by Tenure Status (Urban)

States	Owned	Rented
1. Andhra Pradesh	4	3
2. Assam	26	46
3. Bihar	15	12
4. Gujarat	2	3
5. Jammu and Kashmir	5	6
6. Kerala	1	2
7. Madhya Pradesh	10	7
8. Madras	4	5
9. Maharashtra	3	8
10. Mysore	2	3
11. Orissa	7	9
12. Punjab	3	7
13. Rajasthan	2	2
14. Uttar Pradesh	2	2
15. West Bengal	4	25
Union Territories		
1. Delhi	3	8
2. Himachal Pradesh	14	21

The proportion of rented shop-cum-dwellings is generally higher than of owned. In Rajasthan and Uttar Pradesh both are equal, and none is of any importance.

17. The following Table gives the distribution of districts by the proportion of urban households living in shop-cum-dwellings:

TABLE 2.13—Distribution of Districts by Proportion of Households occupying Shop-cum-Dwellings (Urban)

Range	Number of Districts	Range	Number of Districts
Nil or Negligible	10	20—39	3
1—9	31	40—59	2
10—19	5	60 and Above	1

The largest number of districts is in the range 1—9. The districts in the lowest range are Uttar Kashi, Budaun, Shahjahanpur, Meerut, Farrukhabad, Jalaun, Hamirpur, Pratapgarh, Deoria and Ballia. The district in the highest range is Tehri Garhwal and two in the next are Garhwal and Almora—all situated in the Himalayan hills. In the hills all tahsils of Tehri Garhwal, Garhwal, tahsils Almora and Ranikhet of Almora, tahsil Kichha of Naini Tal and tahsil Chakrata of Dehra Dun have a proportion exceeding 25. Here a shop-cum-dwelling is quite a common feature. In the plains the tahsils given in the following Table have a proportion of 25 and above :

TABLE 2.14—Tahsils (situated in the plains) having 25 or more per 1,000 Households occupying Shop-cum-Dwellings (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Moradabad)		
1. Thakurdwara	26	Thakurdwara T. A.
(Bareilly)		
2. Nawabganj	84	Nawabganj T. A.
(Banda)		
3. Karwi	43	Chitrakut Dham M. B. and Manikpur
(Rae Bareli)		
4. Salon	34	Jais T. A.
(Gonda)		
5. Balrampur	25	Balrampur M. B.
6. Utraula	46	Utraula N. A.
7. Tarabganj	34	Colonelganj M. B. and Nawabganj M. B.
(Faizabad)		
8. Faizabad	35	Faizabad Town Group
9. Akbarpur	44	Akbarpur T. A. and Jalalpur T. A.
(Jaunpur)		
10. Shahganj	41	Shahganj N. A.
11. Machhlishahr	69	Machhlishahr T. A. and Badshahpur N. A.

None of these places is a large town except Faizabad-cum-Ayodhya. Ayodhya is an important

pilgrim centre, and there are numerous shops to cater for the needs of pilgrims, many of which are also used by shopkeepers as dwellings.

18. As regards classification of shop-cum-dwellings into rented and owned, households occupying rented ones are in a majority in Tehri Garhwal, Garhwal, Almora, Naini Tal, Bijnor, Budaun, Pilibhit, Dehra Dun, Saharanpur, Bulandshahr, Aligarh, Agra, Mainpuri, Etawah, Kanpur, Fatehpur, Jhansi, Unnao, Lucknow, Faizabad, Basti and Azamgarh districts. All hill districts where such structures exist are included in this list. There the rented shop-cum-dwelling is the rule, and the owned an exception. Of the districts in the plains only Unnao, Faizabad and Basti have more than 10 households per 1,000 occupying shop-cum-dwellings. The remaining districts of this list are not important from this point of view. In Bijnor, Saharanpur, Bulandshahr, Aligarh, Agra, Kanpur, Fatehpur, Jhansi and Lucknow almost all shop-cum-dwellings are rented, but again this type of structure is not important for these districts. Tahsils where all or almost all such structures are rented are Pauri of Garhwal district, Kashipur and Naini Tal of Naini Tal district, Najibabad and Dhampur of Bijnor district, Aonla of Bareilly district, Chakrata of Dehra Dun district, Nakur of Saharanpur district, Ghaziabad of Meerut district, Bulandshahr and Khurja of Bulandshahr district, Koil, Hathras and Sikandara Rao of Aligarh district, Agra and Etmadpur of Agra district, Etawah, Kanpur, Fatehpur, Jhansi, Lakhimpur of Kheri district, Lucknow, Nanpara of Bahraich district and Dudhi of Mirzapur district. Except in the case of Pauri (Pauri M. B., Srinagar N. A. and Bah Bazar), tahsils Naini Tal (Naini Tal Town-Group) and Bhowali N. A.), Dhampur (Dhampur M. B., Nehtaur T. A. and Tajpur), Aonla (Aonla M. B.) and Sikandara Rao (Sikandara Rao M. B.), Chakrata (Chakrata Cantt.), Nakur (Gangoh M. B. and Nakur T. A.), and Fatehpur (Fatehpur M. B.), the proportion of households occupying shop-cum-dwellings to 1,000 households is only 1 or 2.

Workshop-cum-Dwellings

19. The following Table gives the proportion of households occupying workshop-cum-

dwellings in the urban areas of the State and the adjoining Union Territories of Delhi and Himachal Pradesh:

TABLE 2.15—Proportion of Households living in Workshop-cum-Dwellings in States and certain Union Territories by Tenure Status (Urban)

States	Owned	Rented
1. Andhra Pradesh	6	2
2. Assam	4	6
3. Bihar	14	6
4. Gujarat	5	4
5. Jammu and Kashmir	10	3
6. Kerala	2	1
7. Madhya Pradesh	26	10
8. Madras	19	11
9. Maharashtra	9	8
10. Mysore	9	7
11. Orissa	1	1
12. Punjab	2	3
13. Rajasthan	3	1
14. Uttar Pradesh	7	1
15. West Bengal	1	7
Union Territories—		
1. Delhi	N	1
2. Himachal Pradesh	62	31

The above Table shows that an owned workshop cum-dwellings is more common than the rented, and the ratio between them is highest in Uttar Pradesh followed by Jammu and Kashmir. Rented workshop-cum-dwellings exceed owned only in Assam, the Punjab, West Bengal and Delhi.

20. The following Table gives the distribution of districts by the proportion of urban households living in workshop-cum-dwellings:

TABLE 2.16—Distribution of Districts by Proportion of Households occupying workshop-cum-Dwellings (Urban)

Range	No. of Districts	Range	No. of Districts
Nil or Negligible	17	20—29	2
1—9	23	30—39	1
10—19	6	40 and Above	3

The above Table shows that 17 districts have almost no workshop-cum-dwellings in their urban areas, and the largest number of districts is in the range 1—9. Districts having a proportion exceeding 20 are Etah (25), Sitapur (28), Bara Banki (68), Faizabad (84), Azamgarh (166) and Varanasi (30). Tahsils which have a proportion exceeding 40 are given in the following Table:

TABLE 2.17—Tahsils having more than 40 per 1,000 Households occupying Workshop-cum-Dwellings (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Bulandshahr)		
1. Sikandarabad	41	Sikandarabad M.B., Dadri T. A. and Dankaur T. A.
(Etah)		
2. Aliganj	131	Ganj Dundwara M. B. and Aliganj T. A.
(Jhansi)		
3. Mauranipur	69	Mauranipur M. B. and Ranipur T. A.
(Banda)		
4. Karwi	53	Chitrakut Dham M. B. and Manikpur
(Gonda)		
5. Utraula	45	Utraula N. A.
(Bara Banki)		
6. Fatehpur	53	Fatehpur T. A.
7. Nawabganj	93	Bara Banki Town Group and Zaidpur T. A.
(Faizabad)		
8. Akbarpur	244	Akbarpur T. A. and Jalalpur T. A.
9. Tanda	230	Tanda M. B.
(Azamgarh)		
10. Muhammadabad	271	Maunath Bhanjan M. B., Muhammadabad T. A. and Mubarakpur T. A.

None of these are large towns. Those having a very high proportion are handloom-textile

towns, noted for their textile products. Quite often, the outer portion of the house is used for handlooms and the inner portion for dwelling.

21. Most of the workshop-cum-dwellings are owned. Rented structures abound in Garhwal, Almora, Bareilly, Agra, Kanpur, Lucknow and Sultanpur districts only, but none of these districts is important from this point of view. Names of tahsils, where most of these structures are rented, are given in the following Table:

TABLE 2.18—Tahsils having more Households occupying Rented Workshop-cum-Dwellings than Owned (Urban)

(District) Tahsil	Proportion of 1,000 rented Workshop-cum-Dwellings	Name of Town(s)
(Garhwal)		
1. Lansdowne	1,000	Kotdwara M. B., Dogadda N. A. and Lansdowne Cantt.
(Almora)		
2. Ranikhet	1,000	Ranikhet Cantt.
(Naini Tal)		
3. Haldwani	667	Haldwani-cum-Kathgodam M. B. and Ramnagar M. B.
(Moradabad)		
4. Thakurdwara	1,000	Thakurdwara T. A.
(Bareilly)		
5. Faridpur	882	Faridpur M. B.
(Aligarh)		
6. Koil	1,000	Aligarh M. B.
7. Hathras	1,000	Hathras M. B. and Sasni T. A.
(Agra)		
8. Etmadpur	1,000	Etmadpur T. A., Tundla T. A. and Railway Colony
9. Firozabad	1,000	Firozabad M. B.
10. Fatehabad	1,000	Fatehabad T. A. and Shamshabad T. A.
(Mainpuri)		
11. Mainpuri	750	Mainpuri M. B. and Kuraoli T. A.

(District) Tahsil	Proportion of 1,000 rented Work- shop-cum- Dwellings	Name of Town(s)	(District) Tahsil	Name of Town(s)
(Etawah)			(Jhansi)	
12. Bharthana	1,000	Bharthana T. A.	8. Moth	Samthar N. A. and Chirgaon T. A.
13. Auraiya	1,000	Auraiya M. B.	(Jalaun)	
(Kanpur)			9. Jalaun	Jalaun M. B.
14. Kanpur	1,000	Kanpur Town Group	10. Konch	Konch M. B.
(Lucknow)			(Hardoi)	
15. Lucknow	1,000	Lucknow Town Group	11. Shahabad	Shahabad M. B. and Pihani M. B.
(Sultanpur)			12. Bilgram	Bilgram M. B. and Sandi M. B.
16. Sultanpur	636	Sultanpur M. B.	(Bahraich)	
(Jaunpur)			13. Bahraich	Bahraich M. B. and Bhinga N. A.
17. Shahganj	1,000	Shahganj N. A.	(Basti)	
(Mirzapur)			14. Basti	Basti M. B.
18. Dudhi	1,000	Pipri N. A.	(Azamgarh)	
None of these tahsils has a large number of workshop-cum-dwellings except Faridpur of Bareilly district, where the proportion of households living in workshop-cum-dwellings is 34. Tahsils in which all or almost all workshop-cum-dwellings are owned are given in the following Table :				
			15. Ghosi	Kopaganj T. A.
			(Ghazipur)	
			16. Saidpur	Saidpur T. A.
			(Mirzapur)	
			17. Chunar	Chunar M. B. and Ahraura N. A.

TABLE 2.19—Tahsils having all or almost all Households occupying owned Workshop-cum-Dwellings (Urban)

(District) Tahsil	Name of Town(s)
(Bijnor)	
1. Nagina	Nagina M. B. and Afzalgarh T. A.
(Moradabad)	
2. Moradabad	Moradabad Town Group
(Rampur)	
3. Suar	Tanda T. A.
(Muzaffarnagar)	
4. Jansath	Khatauli M. B., Miranpur T. A. and Jansath T. A.
(Bulandshahr)	
5. Khurja	Khurja M. B. and Pahasu T. A.
(Agra)	
6. Kiraoli	Fatehpur Sikri M. B. and Achhnera T. A.
(Etah)	
7. Etah	Etah M. B. and Marchra M. B.

In all tahsils where workshop-cum-dwellings exist in urban areas, except those mentioned in Table 2.18, owned structures far exceed the rented.

Dwellings with Other Uses

22. The following Table gives the proportion of owned and rented dwellings with other uses in all States and the adjoining Union Territories of Delhi and Himachal Pradesh:

TABLE 2.20—Proportion of Households living in Dwellings with Other Uses in States and certain Union Territories by Tenure Status (Urban)

States	Owned	Rented
1. Andhra Pradesh	1	1
2. Assam	2	4
3. Bihar	2	4
4. Gujarat	2	6

States	Owned	Rented

Union Territories		

The above Table reveals that the proportion of both owned and rented dwellings with other uses is highest in Himachal Pradesh.

23. For Uttar Pradesh the proportion of households occupying such dwellings to 1,000 households is one. Distribution of districts by the proportion of households living in dwellings with other uses is given in the following table:

TABLE 2.21—Distribution of Districts by Proportion of Households occupying Dwellings with Other Uses (Urban)

Range	Number of Districts
Negligible	25
1—9	24
10 and Above	3

As many as 25 districts have a negligible proportion. Districts having a proportion exceeding 10 are Tehri Garhwal (32). Bijnor (11), and Faizabad (27). However, the number of such dwellings is not appreciable, and no detailed comments are required. Suffice it to say that 4/5ths of them are rented and 1/5th owned.

Distribution of Households by the Type of use of Census Houses and by Tenure Status in Cities and Towns having 50,000 population and Above

GENERAL

24. Dwellings—The 33 municipal towns and 2 cantonments which have a population exceeding 50,000 will now be taken up for study. The proportion of households living in Census houses used exclusively as dwellings is 990 and over in 26 towns. Eight towns have a proportion between 950 and 989. They are Sambhal (976), Budaun (989), Hardwar (986), Meerut M. B. (989), Etawah (981), Sitapur (983), Varanasi (964) and Mirzapur-cum-Vindhyachal (989). One town, namely, Faizabad-cum-Ayodhya (918) has a proportion of less than 950. It has a good proportion of shop-cum-dwellings, and the next lowest Varanasi, has a large proportion of workshop-cum-dwellings.

25. Shop-cum-Dwellings—In 9 towns, namely, Sambhal, Amroha, Budaun, Pilibhit, Shahjahanpur, Saharanpur, Hardwar, Meerut Cantt. and Farrukhabad-cum-Fatehgarh shop-cum-dwellings are non-existent. They are below 10 per 1,000 in 24 towns. The proportion of households living in shop-cum-dwellings exceeds 10 in Sitapur (12) and Faizabad-cum-Ayodhya (36) only. Ayodhya is a place of pilgrimage where small shops exist to cater for pilgrims on bathing days and the shopkeepers live in their shops.

26. Workshop-cum-Dwellings—They are non-existent in 10 towns, namely, Budaun, Rampur, Pilibhit, Shahjahanpur, Dehra Dun, Saharanpur, Ghaziabad, Mathura, Kanpur Cantt. and Jhansi, and are negligible in 6 towns, namely, Amroha, Bareilly, Muzaffarnagar, Hapur, Farrukhabad-cum-Fatehgarh and Allahabad. In 14 towns less than 10 households per 1,000 live in such dwellings. The proportion is 10 or more in 5 towns, namely, Sambhal (24), Hardwar (14), Etawah (15), Faizabad-cum-Ayodhya (10) and Varanasi (33). Varanasi and Sambhal have the highest proportion. They and to some extent Etawah are industrial towns, and quite a good proportion of industry is household industry.

TENURE STATUS

27. *Dwellings*—Rented Census houses used exclusively as dwellings are less in number than owned in 21 towns, namely, Sambhal, Amroha, Moradabad, Budaun, Rampur, Bareilly, Pilibhit, Shahjahanpur, Meerut M.B., Hapur, Aligarh, Hathras, Agra, Farrukhabad-cum-Fatehgarh, Etawah, Sitapur, Bahraich, Faizabad-cum-Ayodhya, Jaunpur, Varanasi and Mirzapur-cum-Vindhyachal. In Sambhal the percentage of rented dwellings is only 7.4 and in Amroha 17.3. Both of these towns are in Moradabad district. Two of the KAVAI cities, namely, Agra and Varanasi are also in this list. Names of towns and cities in which the number of households living in rented dwellings is larger than the number living in owned dwellings are Dehra Dun (737), Saharanpur (512), Hardwar (569), Muzaffarnagar (527), Ghaziabad (615), Meerut Cantt. (718), Mathura (529), Firozabad (569), Kanpur M. C. (871), Kanpur Cantt. (798), Allahabad (572), Jhansi (514), Lucknow (617) and Gorakhpur (581). Towns which have a high proportion of rented dwellings are Kanpur M. C., Kanpur Cantt., Dehra Dun and Meerut Cantt.

28. *Shop-cum Dwellings*—Out of the 26 towns having such structures 5 have a higher number of owned shop-cum-dwellings than rented. These towns are Rampur, Meerut M. B., Gorakhpur, Varanasi, and Mirzapur-cum-Vindhyachal. At Moradabad, Mathura, Bahraich and Jaunpur they are equal. In the remaining 17 towns rented shop-cum-dwellings exceed owned. These are Bareilly, Dehra Dun, Muzaffarnagar, Ghaziabad, Hapur, Aligarh, Hathras, Agra, Firozabad, Etawah, Kanpur M. C., Kanpur Cantt., Allahabad, Jhansi, Sitapur, Lucknow and Faizabad-cum-Ayodhya. At Bareilly, Ghaziabad, Aligarh, Hathras, Agra, Etawah, Kanpur M. C., Kanpur Cantt., Allahabad, Jhansi and Lucknow almost all shop-cum-dwellings are rented.

29. *Workshop-cum-Dwellings*—Out of the 19 towns having such dwellings 10 have a higher number of owned workshop-cum-dwellings.

They are Sambhal, Moradabad, Hardwar, Meerut M.B., Etawah, Bahraich, Faizabad-cum-Ayodhya, Gorakhpur, Varanasi and Mirzapur-cum-Vindhyachal. At Sambhal, Hardwar, Etawah, Gorakhpur and Varanasi more than 80 per cent workshop-cum-dwellings are owned, which shows that most of the household industry exists in owned premises. This can be taken to be a sign of prosperity. The remaining 9 towns are Meerut Cantt., Aligarh, Hathras, Agra, Firozabad, Kanpur M.C., Sitapur, Lucknow and Jaunpur. At Aligarh, Hathras, Firozabad, Kanpur M. C. and Lucknow almost all workshop-cum-dwellings are rented.

30. *Dwellings with Other Uses*—Out of the 35 towns under study 18 either do not have any dwelling of this type, or have a negligible proportion. Eleven have a proportion of one or two, and three of 3 or 4 to 1,000. Only 3 towns have a noticeable proportion. These are Budaun (11), Hapur (6) and Faizabad-cum-Ayodhya (36). Ayodhya is visited by a large number of pilgrims on festival days and quite many persons use part of their dwellings for accommodating the pilgrims and for miscellaneous purposes.

Limitations

31. The discussion about shop-cum-dwellings and workshop-cum-dwellings in districts, tahsils and towns is subject to certain limitations. A shop-cum-dwelling or a workshop-cum-dwelling in the strict sense means a Census house, part of which is used as a shop or a workshop and part as dwelling, with only one entrance or exit. If the two have separate exits, then instead of a shop-cum-dwelling or a workshop-cum-dwelling, there is one shop or workshop and one dwelling. The accuracy of returns of shop-cum-dwellings or workshop-cum-dwellings depends on how strictly the definition has been followed by the house numbering staff and the enumerators. Wherever they have departed from the strict definition and have loosely treated structures as shop-cum-dwelling or workshop-cum-dwelling, even though separate exits are in existence, their number has increased.

CHAPTER III

WORKSHOPS AND FACTORIES

(Housing Table E-III and Subsidiary Tables)

Housing Table E-III gives distribution of Census houses used as establishments, workshops or factories recorded in columns 5 to 8 of the Houselist classified by industry, power used and size of employment. This is a very important statistical record for all sizes of industrial establishments, large, medium or small. The industrial establishment data so far available related to workshops and factories governed by the Indian Factories Act, which are numerically insignificant, being less than one per cent of the total number of establishments. No information was available about the vast number of small establishments run by one or two persons because of the magnitude of the task involved which could be tackled only at a population Census. The data collected at the 1961 Census will be of great advantage to the industrial development of the country.

2. A workshop or a factory has been defined as a place where some kind of production, fabrication, processing, servicing or repairs is undertaken, irrespective of the number of persons working. The stress is on manufacture, servicing or repairs. Places where articles are merely bought or sold, but not manufactured, serviced or repaired, have not been included in workshops or factories. They have been treated as commercial establishments.

3. The vast data compiled in the Housing Table E-III have been processed into three subsidiary tables to facilitate statistical analysis and interpretation. Subsidiary Table E-III.1 gives the distribution of 1,000 workshops and factories by Industrial Divisions, Major Groups and selected Minor Groups of the Standard Industrial Classification for the State, and also for each district with rural/urban breakdown. Subsidiary Table E-III.2 gives the distribution of 1,000 workshops and factories by the five kinds of power used, viz., electricity, liquid fuel, coal, wood and bagasse, other power and no

power, and by seven sizes of employment, viz., 1 person, 2–5 persons, 6–9 persons, 10–19 persons, 20–49 persons, 50–99 persons, and 100 persons and above. Subsidiary Table E-III.3 gives the distribution of 1,000 workshops and factories in each Division, Major Group and numerically significant Minor Groups by kind of fuel or power used.

4. In analysing the Housing Table E-III and its Subsidiary Tables three limitations require to be kept in view. Firstly, these Tables deal with manufacture and give establishments falling in Divisions 2 and 3 only and in Major Group 04 excepting Minor Group 047 of the Standard Industrial Classification. Mining and quarrying, generation of electricity and gas, kerosene, petrol and cold storages which fall in Divisions 1, 5 and 7 have been excluded. Secondly, despite all care taken in the collection of data, omissions in Houselisting did occur. The chances of omission in the case of workshops and factories are higher than in the case of population Census. The danger is all the greater in localities where industrial establishments and dwellings exist side by side, particularly when the work is done at home. A detached worker, such as a lone potter working on his wheel in the open, or a fireworks man having his place of manufacture outside the village habitation, is quite likely to be missed. In the enumeration of workshops and factories there is also a greater tendency towards concealment or withholding of information than in the enumeration of the population, for obvious reasons, which results in omission or falsification of details. Census enumerators were mostly laymen and were, therefore, unable to elicit industrial information like technical experts. Thirdly, some mistakes were committed in Tabulation Offices by compilers in classification and coding in spite of the supervision exercised. Still the information collected, compiled and processed is undoubtedly of much value.

5. The total number of industrial establishments listed in November, 1960 at the time of Houselisting comes to 240,832 including both registered and unregistered. The industrial progress of a country, in the usual sense, is judged by large-scale factories engaged in various kinds of manufacture. It would, therefore, be profitable to digress a little and discuss registered factories first and take up general discussion afterwards.

Registered Factories

6. The data of registered factories for 1960 have become available through the courtesy of the Chief Inspector of Factories, Uttar Pradesh, which have been processed and analysed in the Census office for the registered factories engaged in manufacture, servicing and repairs. The number of factories working in that year, excluding Defence installations, works out to be 2,369.

7. Every factory run on power employing 10 persons or more and every other factory employing 20 persons or more is required to be registered. A registered factory is, therefore, not necessarily big. 40.2 per cent of the factories in the State are quite small employing less than 20 persons each, 33.2 per cent of them employ 20–49 persons each, 10.7 per cent employ 50–99 persons each, and 15.9 per cent 100 or more persons each, as would appear from the following Table :

TABLE 3.1—*Distribution of Registered Factories by Size of Employment*

Less than 20	952
20—49	788
50—99	253
100—499	255
500—999	72
1,000—4,999	45
5,000 and Above	4
Total	2,369

8. In view of their small size, the number of registered factories in the State cannot be said to be at all large, the average per district being only 44. In the matter of factory employment, Uttar Pradesh occupies fifth position in India after Maharashtra, West Bengal, Gujarat and

Madras. Considering the proportion of the population employed as factory workers, Uttar Pradesh ranks eleventh among the States of the Indian Union, excluding Jammu and Kashmir, as would appear from the following Table :

TABLE 3.2—*Industrial Workers in Registered Factories per 1,000 Population in certain States*

States	Industrial Workers per 1,000 Population
1. West Bengal	19.9
2. Maharashtra	19.1
3. Gujarat	16.5
4. Madras	9.6
5. Kerala	9.1
6. Andhra Pradesh	6.9
7. Mysore	6.3
8. Punjab	5.6
9. Assam	5.2
10. Madhya Pradesh	4.6
11. Uttar Pradesh	4.2
12. Bihar	3.9
13. Rajasthan	2.3
14. Orissa	1.7

These figures have been worked out from the data of industrial workers for the half year ending June 30, 1960 published in the Indian Labour Journal.

9. Within the State only 13 districts have more than 5,000 persons working in registered factories of Divisions 2 and 3 as shown in the Table below :

TABLE 3.3—*Industrial Workers in Registered Factories in certain Districts*

(a) 50,000 and above (1 district)			
Kanpur	70,661		
(b) 20,000—49,999 (2 districts)			
Meerut	23,303	Lucknow	21,413
(c) 10,000—19,999 (4 districts)			
Agra	16,791	Saharanpur	12,059
Gorakhpur	14,619	Deoria	10,287
(d) 5,000—9,999 (6 districts)			
Aligarh	9,035	Bareilly	8,327
Allahabad	8,564	Muzaffar-nagar	8,415
Varanasi	8,322	Rampur	5,045

Other districts are unimportant.

10. The number of registered factories falling in these Divisions in each district is given in Map No. III/A. Fifteen districts, namely, Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal, Almora, Etah, Jalaun, Hamirpur, Hardoi, Rae Bareilly, Sultanpur, Pratapgarh, Ballia and Ghazipur do not have even 5 factories each. Only the following 12 districts have 50 or more factories:

TABLE 3.4—Districts having 50 or more Registered Factories

(a) 300 and above (2 districts)		
Kanpur	354	Agra 344
(b) 200—299 (1 district)		
Meerut	219	
(c) 100—199 (4 districts)		
Lucknow	156	Allahabad 116
Aligarh	135	Varanasi 106
(d) 50—99 (5 districts)		
Muzaffarnagar	95	Saharanpur 71
Moradabad	73	Bareilly 65
Bijnor	50	

The number of factories in Gorakhpur, Deoria and Rampur, names of which do not find mention in this list, is 40, 19 and 17 respectively. Factory employment is highest in Kanpur. The next two districts, Meerut and Lucknow, have less than one-third workers. The fourth district Agra has almost an equal number of factories as Kanpur, but the number of workers is less than one-fourth. The average size of employment per factory varies considerably. The averages for the seven districts where the number of workers exceeds 10,000 are as follows:

Kanpur	200	Agra	49
Meerut	106	Gorakhpur	365
Lucknow	137	Saharanpur	170
Deoria	541		

The average for the State is 115. The numerous factories of Agra are of a small size, while the few factories of Deoria are big, most of them being sugar mills. The biggest factories

of the State are, however, located at Kanpur which is the industrial capital.

11. Uttar Pradesh is deficient in important fuels, like coal and petroleum. No petroleum is found and there is very little coal. The small coal-field of Singhrauli in Mirzapur district has not been worked so far. Even electricity is in short supply. There is also little iron ore. Absence of coal, petroleum and iron has put the State under a great industrial handicap. Those industries which consume iron and steel in large quantities either do not exist, or are very few; and for these also the State has to depend on outside supplies.

It will be fruitful to examine in some detail the number of factories engaged in different branches of industry. The production of food-stuffs from agricultural crops which is the most extensive branch of industry in this State, will be taken up at the end. As the treatment is statistical, names of factories have been purposely avoided.

12. *Basic Metals and their Products except Machinery and Transport Equipment*—As iron ore deposits do not occur anywhere significantly, there are no steel works of the type of Tata-nagar, Durgapur, Rourkela or Bhilai. Iron and most of the steel are obtained from outside. Some steel is produced in a few factories, the State's share in production being 4.2 per cent of the total production in India. 104 factories are engaged in ferrous metal industries—3 in the manufacture of iron and steel, 23 in rolling them into basic forms, 4 in tube-making and wire-drawing, 63 in rough casting and 11 in allied activities. Thirteen of these factories employ 100 workers and above and 2 over 500 workers each. Both of these are located at Kanpur. Smelting and refining of non-ferrous metals and alloys, such as copper, bronze and brass are not undertaken. Thirty-seven factories are engaged in rolling the metals into basic forms, tube-making, wire-drawing, rough-casting etc. Twenty-six factories are doing galvanising, plating and welding, out of which one employs above 100 workers. One hundred and thirteen factories are manufacturing metal products except

transport equipment and machinery. Seven of these employ above 100 workers. The distribution of 280 factories by districts is given in the following Table :

TABLE 3.5—Districtwise Distribution of Registered Factories manufacturing Basic Metals and their Products, except Machinery and Transport Equipment

District	Basic Metal Industries (Ferrous)	Basic Metal Industries (Non-Ferrous)	Galvanising, Plating and Welding	Products other than Machinery and Transport Equipment	Total
1. Agra	25	8	..	25	58
2. Kanpur	28	..	1	23	52
3. Aligarh	10	4	5	29	48
4. Meerut	20	3	5	9	37
5. Moradabad	2	7	12	6	27
6. Varanasi	3	1	..	7	11
7. Lucknow	1	1	..	5	7
8. Mathura	2	2	..	2	6
9. Mirzapur	2	3	..	1	6
10. Saharanpur	1	..	2	1	4
11. Allahabad	1	..	1	2	4
12. Jhansi	3	1	..	..	4
13. Farrukhabad	1	2	..	..	3
14. Gorakhpur	1	2	..	..	3
15. Muzaffarnagar	2	..	..	..	2
16. Bulandshahr	..	..	..	2	2
17. Sultanpur	1	1	..	..	2
18. Bijnor	..	..	..	1	1
19. Etawah	..	1	..	..	1
20. Bahraich	..	1	..	..	1
21. Jaunpur	1	..	..	..	1
Total	104	37	26	113	280

The remaining 33 districts do not have even one factory doing any of these jobs. Kanpur, Agra and Meerut are advanced in iron and steel industries. The largest number of factories engaged in manufacturing metal products (except machinery and transport equipment) is in Aligarh which has 22 lock factories for which it is famous. Next come Agra and Kanpur, both of which are industrially progressive.

The distribution of metal industries is in no way connected with the local availability of the metals concerned, because metallic ores are not worked in Uttar Pradesh. The ferrous-metal industry owes its existence to the industrial enterprise of Kanpur and of late, of Meerut and Agra. Brass-and-copper industry has been traditionally associated with certain places, such as Morada-

bad, Varanasi and Mirzapur where the people have come to acquire the necessary craft skill.

13. *Machinery and Electrical Equipment other than Transport*—There is no hydraulic, ventilating or pneumatic engineering in the State, nor any manufacture of prime movers and boilers, such as diesel engines, road rollers and tractors, or of heavy electrical equipment such as motors, generators, transformers or storage batteries. For making light non-electrical machinery there are, however, 263 factories in 28 districts, out of which 12 make machine tools, 7 textile machinery, 93 agricultural implements, 123 do general and jobbing engineering and the remaining 28 are of a miscellaneous nature. 7 factories of agricultural implements, one of textile machinery and 18 doing general and jobbing engineering employ more than 100

workers each ; one of these employs even more than 1,000. Manufacture of electrical equipments is done in 18 factories located in 10 districts, and 2 of these employ more than 100

workers each. The districtwise distribution of these 263 factories making non-electrical machinery, and of 18 factories engaged in electrical equipment is given in the following Table :

TABLE 3.6—Districtwise Distribution of Registered Factories manufacturing Machinery and Electrical Equipment, other than Transport

District	Non-Electrical			Total	Electrical				Total
	372 Machine Tools	373 Textile Machines	370 Other Machines		375 Lamps and Fans	376 Wires and Cables	378 Radio, Micro-phones etc.	379 Misc. Equipment	
1. Kanpur	3	1	71	75	1	1	..	1	3
2. Meerut	1	3	66	70	1	1	1	..	3
3. Lucknow	..	..	20	20	..	..	..	1	1
4. Varanasi	1	1	10	12	2	..	..	2	4
5. Agra	7	1	3	11	..	2	..	..	2
6. Saharanpur	..	..	10	10	..	..	..	..	..
7. Bareilly	..	..	9	9	..	..	..	..	..
8. Bulandshahr	..	..	7	7	..	..	..	1	1
9. Allahabad	..	..	6	6	..	..	..	1	1
10. Moradabad	..	1	4	5	..	..	..	..	..
11. Muzaffarnagar	..	..	5	5	..	..	..	..	..
12. Aligarh	..	..	5	5	..	..	..	1	1
13. Gorakhpur	..	..	5	5	..	..	..	..	..
14. Naini Tal	..	..	4	4	..	..	..	..	..
15. Jhansi	..	..	3	3	..	..	..	..	..
16. Rampur	..	..	2	2	..	..	1	..	1
17. Mathura	..	..	2	2	..	1	..	..	1
18. Etawah	..	..	2	2	..	..	..	..	..
19. Garhwal	..	..	1	1	..	..	..	..	..
20. Shahjahanpur	..	..	1	1	..	..	..	..	..
21. Dehra Dun	..	..	1	1	..	..	..	..	..
22. Sitapur	..	..	1	1	..	..	..	..	..
23. Unnao	..	..	1	1	..	..	..	..	..
24. Gonda	..	..	1	1	..	..	..	..	..
25. Faizabad	..	..	1	1	..	..	..	..	..
26. Azamgarh	..	..	1	1	..	..	..	..	..
27. Jaunpur	..	..	1	1	..	..	..	..	..
28. Mirzapur	..	..	1	1	..	..	..	..	..
Total	12	7	244	263	4	5	2	7	18

It is obvious from the above that in 26 districts there is no factory for manufacturing machines, and in 10 there is only one each. Kanpur and Meerut hold a high position. Lucknow, Varanasi and Agra have also made good headway. In the domain of electrical equipment only 18 districts are in the picture. The two largest factories are in Allahabad and Lucknow both employing more than 100 persons each.

14. *Transport Equipment*—There are no factories for the manufacture of locomotives, wagons, coaches, tramways, other rail-road equipment, motor vehicles or aeroplanes. For the manufacture of bicycles, however, there are 15 factories only one of which employs more than 100 persons. Animal and hand-drawn vehicles are made in 3 factories. For the repairs of

rail-road equipment and tramways there are 21 workshops, 13 of which employ more than 100 persons each; some of them are quite big and employ several thousand workers. Road transport is very important and almost the whole State is covered with a network of the Uttar Pradesh Government Roadways. Besides, there are numerous private buses, trucks and cars. All these require occasional repairs for which there are 101 workshops, 15 of which employ more than 100 persons each and one over 1,000. For the repairs of aircrafts there are 2 factories one of which employs over 100 persons. Repairs of bicycles is done in 16 factories, 2 of which employ more than 100 workers each. District-wise distribution of 158 factories engaged in manufacture and repairs of transport equipment is given in the following Table:

TABLE 3.7—Districtwise Distribution of Registered Workshops and Factories manufacturing Transport Equipment

District	Repairs of rail-road equipment and Tramway	Repairs of Aero-planes	Repairs of Motor vehicles	Manufacture of Bicycles	Repairs of Bicycles	Manufacture of Animal and hand-drawn vehicles	Total

Total	21	2	101	15	16	3	158

For the manufacture of bicycles Kanpur, Meerut and Lucknow are important. From the point of view of size of factories Meerut is most important. Repairs of rail-road equipment are carried on mostly in Government workshops only 2 of them being private. Fifty-five of the motor vehicle workshops belong to the State Government. Lucknow is the largest centre of motor vehicle repairs. Being the State capital it has got a larger number of motor vehicles. Besides, numerous vehicles visit Lucknow every day.

Kanpur is a great industrial centre. Consequently, a large industry for repairs has grown up at these places.

15. *Miscellaneous Manufacturing Industries*—For miscellaneous manufacturing industries there are 100 factories in the State, 21 of which are engaged in the manufacture of scientific instruments, 3 in the repairs of watches and clocks, 3 in jewellery, 1 in making of musical instruments, 4 in that of pens and pencils, 7 in sports goods

and 61 in miscellaneous articles. 3 factories making scientific instruments and 16 other articles employ 100 workers and above each, and 2 of them employing more than 500. Though Saharanpur has the largest number of factories

making scientific instruments, Lucknow has the biggest ones. Meerut, Lucknow and Kanpur are the most important districts for these industries. Their distribution is given in the following Table:

TABLE 3.8—Districtwise Distribution of Registered Factories engaged in Miscellaneous Industries

District	Scientific Instruments	Assembly and repairs of Watches	Jewellery	Musical Instruments	Pens and Pencils	Sports Goods	Miscellaneous	Total
1. Meerut	1	1	..	1	1	2	11	17

Total	21	3	3	1	4	7	61	100

16. *Non-Metallic Mineral Products*—There are no industries for manufacturing coal and petroleum products. Important industries, however, exist for manufacturing earthen mineral products. There is one large factory for cement manufacture which employs more than 1,000 workers. For stone dressing and stone crushing and for the manufacture of lime and *surkhi* and sundry non-metallic products such as con-

crete, hume pipes, etc., there are 34 factories only 2 of which employ over 100 workers each. Four factories make pottery and chinaware. For the manufacture of glass bangles, glass beads and other glass products there are 166 factories in the State, 53 of which employ 100 workers or more each, and 5 even more than 500 workers each. The distribution of these 205 factories is given in the following Table :

TABLE 3.9—Districtwise Distribution of Registered Factories Manufacturing Non-Metallic Mineral Products

19. Bijnor, Moradabad and to 21. Jaunpur	..	..	1 each	..	3
Total	1	4	166	34	205

There is one cement factory at Churk in Mirzapur district. This is the only factory in the State. Its production is 3 per cent of the total production in India.

Two factories in Meerut district, one at Khurja in Bulandshahr and one at Chunar in Mirzapur

are engaged in the manufacture of pottery and earthenware. Both Khurja and Chunar have earned a name for being important centres of pottery. For glassware and glass bangles Agra district is at the top. 138 factories out of a total of 166 exist there. Within the district Firozabad is the most important centre famous for its

bangles. As many as 125 factories are located there, though some of them are quite small employing less than 5 persons each; Sasni in Aligarh, Naini in Allahabad, Shikohabad in Mainpuri, Balawali in Bijnor, and Bahjoi in Moradabad are also noted for glass industry. Manufacture of electric bulbs is carried on at Shikohabad, and there are some miniature bulb factories at Dehra Dun and Kanpur also. The production of electric bulbs in the State is 29.3 per cent of the total production in India. Their manufacture has been included in glass industry in the classified list of registered factories instead of electric goods industry. For miscellaneous industries Jhansi in the Vindhyan plateau is the most important. It has 9 factories for granite crushing and allied activities.

17. *Chemicals, Chemical and Rubber Products*—Basic chemicals such as acids, alkalis and

their salts have a great importance in industry. Six factories are engaged in their production, one of which employs more than 500 persons. There are 5 factories for fertilizers, one of them employing more than 1,000 workers, and one for matches which also employs more than 1,000 workers. Thirty-three factories manufacture pharmaceutical preparations, perfumes, cosmetics and other toilet goods. Four of the factories preparing pharma preparations employ more than 100 workers each. Twenty-seven factories are preparing paints, colours, varnishes, turpentine, rosin, plastics, inedible oils, opium and miscellaneous chemical goods, 4 of them employing more than 100 workers each, and one over 500. There is no factory for the manufacture of rubber tyres, but one is making rubber footwear and four other rubber goods. The districtwise distribution of these factories is given in the following Table :

TABLE 3.10—District-wise Distribution of Registered Factories manufacturing Chemicals, Chemical Products and Rubber Goods

District	Basic Chemicals	Fertilizers	Matches	Pharma preparations	Other Chemical Products	Rubber Goods	Total
1. Kanpur	5	2	..	6	12	1	26
2. Lucknow	..	..	..	11	1	..	12
3. Meerut	1	1	..	2	2	2	8

13. Allahabad	..	..	..	..	1	..	1
14. Bara Banki	..	..	..	..	1	..	1
15. Almora	..	..	..	1	..	..	1
16. Naini Tal	..	..	..	1	..	..	1
17. Pilibhit	..	..	..	1	..	..	1
18. Dehra Dun	..	..	..	1	..	..	1
19. Farrukhabad	..	..	..	1	..	..	1
20. Etawah	..	..	..	1	..	..	1
Total	6	5	1	33	27	5	77

In chemical industries Kanpur is the most important district. The fertilizer factory at Varanasi is large, and all others are small. There is only one match factory. Match production in the State is 18.7 per cent of the total production in India. For pharma preparations, toilets, perfumes and cosmetics Lucknow is the most important.

18. (1) *Leather and Leather Products*—Leather

industry is an important industry of the State. For tanning and finishing of leather there are 30 factories, nine of them employing over 100 workers each. For making boots and shoes there are 42 factories, 2 of them employing over 100 workers each, and one over 2,000. Miscellaneous leather goods are made in 3 factories. The following Table gives district-wise distribution of leather and leather goods factories :

TABLE 3.11—District-wise Distribution of Registered Factories manufacturing Leather and Leather Products

District	Tanning and Finishing	Footwear	Other Goods	Total
1. Kanpur	24	8	1	33
2. Agra	3	34	1	38
3. Meerut	..	..	1	1
4. Farrukhabad, Fatehpur to and 6. Unnao	1 each	..	..	3
Total	30	42	3	75

Kanpur has been the most important centre for currying, tanning and finishing of hides and skins and preparation of finished leather for a long time. Agra specialises in boot and shoe making. It has more numerous factories than Kanpur, but they are all small compared to one factory at Kanpur. In fact this factory employs more workers than all the other factories put together. Besides Kanpur and Agra, no district is important for leather industry.

(2) *Wood, Paper, Printing and Publishing*—For wood-sawing, wood and wooden products there are 43 factories 3 of which employ more

than 100 workers each. For making pulp, paper and paper products there are 14 factories—2 factories manufacturing paper and 3 strawboard, employ more than 100 workers each, one of each kind employing more than 500.

Printing and publishing is also quite an important industry and there are 198 presses doing letter press and lithographic printing and book-binding. Fourteen of them employ 100 or more persons each ; one of these has 500–999 workers and 2 have more than 1,000 workers each.

Districtwise distribution of factories and presses is given in the following Table :

TABLE 3.12—Districtwise Distribution of Registered Factories manufacturing Wood and Wooden Products, Pulp, Paper and Paper Products, Printing and Publishing

District	Wood and Wooden Products	Paper and Paper Products	Total	Printing and Publication
1. Kanpur	5	4	9	20
2. Lucknow	8	1	9	36

22. Bulandshahr	..	..	..	2
23. Bijnor and	}	..	..	1 each
24. Rampur		..	..	
Total	43	14	57	198

Saharanpur and Lucknow are important centres for manufacture of paper. Handmade paper is produced on factory scale in two factories at Kalpi in Jalaun district. Meerut and Saharanpur are important for strawboard. In printing and publishing books and other material Allahabad, being the pioneer in literary activity, has earned a name for itself and the lead has been maintained. Lucknow comes next. The biggest presses are located at Allahabad, Aligarh and Lucknow, and they are engaged in Government printing. As many as 30 districts do not have any sizable press, and they have to depend either on small presses, or have to send their printing work to other districts.

19. *Textiles*—Cotton textile industry is one of the most important industries of the State. It has, however, not made as much progress here as in Bombay (Maharashtra) and Ahmedabad (Gujarat). In this State there are 72 cotton textile factories, 14 of which do cotton ginning, pressing and baling, and 58 cotton spinning and weaving. Twenty-eight of the latter employ between 100 and 499 persons each, 6 between 500 and 999, 11 between 1,000 and 4,999 and three 5,000 and above each. All the 3 cotton mills employing 5,000 or more workers are in Kanpur. Of the 11 factories employing between 1,000 and 4,999 workers each 7 are in Kanpur, one each

in Rampur, Saharanpur, Meerut and Aligarh districts.

For jute pressing there are 5 factories, only one of which employs more than 100 persons. There are, besides, 3 jute mills, each employing between 1,000 and 4,999 workers. There is one factory for jute cordage employing between 100 and 499 workers. Thus there are in all 9 factories in jute industry, which is not an important industry of the State.

Production of woollen cloth is an important industry. Wool pressing and baling is done in one factory and spinning and weaving in 10. In all 11 factories are engaged in wool industry. The most important mill is located at Kanpur. One factory employs 100-499 workers and another over 1,000.

Silk spinning and weaving is done in 10 factories, only one of these employs over 100 workers.

Carpet weaving is done in 14 factories, 4 of which employ between 100 and 499 workers each and one over 500.

For hosiery and knitting, embroidery, lace, clothing and miscellaneous textiles there are 43 factories, including 2 rayon factories in Kanpur and Meerut districts. Two factories making hosiery, one clothing and one other textiles employ between 100 and 499 workers each, and one rayon factory employs over 500 workers.

The districtwise distribution of textile industry is given in the following Table :

TABLE 3.13—Districtwise Distribution of Registered Factories manufacturing Textiles

District	Cotton Ginning and Baling	Cotton Spinning and Weaving	Jute	Woollen	Silk	Carpets	Others	Total
1. Kanpur	1	14	2	3	..	..	22	42

28. Bara Banki	..	1	..	..	..	..	..	1
Total	14	58	9	11	10	14	43	159

Taking all textiles together, Kanpur is by far the most important centre in the State, followed by Varanasi, Agra and Meerut. In cotton and woollen textiles Kanpur does not have even a near rival. In cotton Meerut, and in wool Mirzapur comes next. In Mirzapur wool weaving is done mostly for carpets. In silk Varanasi stands at the top. Banaras silks are well known. Varanasi, Mirzapur, Agra and Shahjahanpur are famous for their carpets. The carpet factories of Shahjahanpur are, however, small and, therefore, its name does not appear in the above list. Districts other than Kanpur, Varanasi, Agra, Meerut, Mirzapur, Aligarh and Basti have less than 5 textile factories each, and 26 districts have no textile factory at all. Uttar Pradesh is not a cotton-growing centre or wool-producing area and has mostly to depend on outside supplies of raw material for its textiles. Consequently, the production of cloth and yarn in the State is

TABLE 3.14—Districtwise Distribution of Registered Factories manufacturing Beverages and Ice

1. Dehra Dun	..	..	14	..	14
2. Allahabad	1	..	1	5	7
3. Meerut	3	..	..	3	6
4. Lucknow	1	..	..	4	5

only 6.6 per cent of the total production in India.

20. *Wines, Spirits, Industrial Alcohol, Soft Drinks, Tea and Ice*—There are 17 distilleries and breweries 5 of which employ more than 100 workers each. Most of the distilleries are in the vicinity of sugar mills. Production of alcohol in the State is 6.9 per cent of the total production in India. There is one factory for soft drinks and 15 for processing tea, of which 4 employ more than 100 workers each. Tea is grown in Dehra Dun district and 14 factories exist there. A new tea processing factory has been opened at Naini in Allahabad. There are 41 ice factories, and one of these employs more than 100 workers. There are no curing works for processing coffee, as coffee is not grown anywhere in the State. Districtwise distribution of these factories is given in the following Table :

District	Wines and Spirits	Soft Drinks	Tea	Ice	Total
5. Moradabad	1	..	..	3	4
6. Agra	..	..	..	4	4

21. *Tobacco Products*—There is one cigarette factory employing over 2,000 persons, and there are 9 factories for snuff, zarda and other tobacco products, 2 of which employ over 100 workers each. Districtwise distribution of factories engaged in the manufacture of tobacco products is given in the following Table :

TABLE 3.15—Districtwise Distribution of Registered Factories manufacturing Tobacco and Tobacco Products

District	Cigarettes	Zarda Snuff, and other Tobacco Products	Total
1. Saharanpur	1	..	1
2. Varanasi	..	5	5
3. Lucknow	..	2	2
4. Farrukhabad	..	1	1
5. Kanpur	..	1	1
Total	1	9	10

Saharanpur is very important for cigarette manufacture. Varanasi is famous for its chewing tobacco. Farrukhabad is an important tobacco-growing area.

22. *Sugar and Gur*—The production of sugar and gur is included in the foodstuff industry, but in view of its importance it is essential to treat it separately. Sugar industry is the leading industry of the State, and is vitally linked with the economy of sugarcane cultivation. There are 71 sugar mills in the State, 10 of which employ between 100 and 499 workers each, 44 between 500 and 999 workers each and 17 above 1,000 workers each. For preparing indigenous sugar there are 166 factories, 2 of which employ over 100 workers each. Gur is made in 90 factories, but only one of these employs more than 100 workers.

The 17 sugar factories which employ more than 1,000 workers each are situated in the districts of Rampur (2), Pilibhit (1), Saharan-

pur (3), Muzaffarnagar (4), Meerut (2), Kheri (1), Sitapur (1), Gorakhpur (1) and Deoria (2). The 2 indigenous sugar factories which employ more than 100 workers are in Shahjahanpur and Farrukhabad districts one in each; and the *gur* factory employing more than 100 workers is in Muzaffarnagar.

Districtwise distribution of sugar mills, indigenous sugar factories and *gur* factories is given in the following Table :

TABLE 3.16—Districtwise Distribution of Registered Factories manufacturing Sugar, Indigenous Sugar and Gur

Total	71	166	90	327

The distribution of sugar and *gur* factories is vitally connected with the production of sugarcane which is grown in a wide belt to the south of the Himalayan range. This belt covers Meerut and Rohilkhand Divisions and the northern districts of Lucknow, Faizabad and Gorakhpur Divisions. The greatest concentration of sugar mills is in Gorakhpur Division which has 23, and thereafter in Meerut Division which has 18. Deoria, Meerut, Gorakhpur, Muzaffarnagar, Saharanpur, Basti and Gonda districts are most important having 43 sugar mills out of 71. Sugar is a very important commodity for this State, the production of which is 50.4 per cent of the total production in India.

For indigenous sugar Muzaffarnagar is the most important district, closely followed by Bijnor and Bareilly. Kheri, Moradabad, Shahjahanpur and Farrukhabad also produce indigenous sugar. In *gur* industry also Muzaffarnagar is at the top. Meerut, Bijnor and Shahjahanpur are also noted for *gur*.

23. Foodstuffs other than sugar—Now comes the most important industries of the State connected with the production of foodstuffs. There are 237 factories engaged in the production of flour, rice and *dal* by milling, dehushing and processing of foodgrains, 23 of these are flour mills, 120 rice mills and 94 *dal* mills. Three of the flour mills employ more than 100 workers each. There are 11 factories for canning and preservation of fruits and vegetables and 7 factories for the manufacture of bakery products. One of each kind employs more than 100 workers. One factory

is engaged in the making of confectionery. Eight factories manufacture dairy products, and one of them has more than 100 workers.

Production of edible vegetable oils by crushing oil-seeds, including ground-nuts, is again a very important industry of the State and accounts for 100 factories. Fourteen factories employ 100 workers or more. Hydrogenated

oil is manufactured in 4 factories all of which employ more than 100 workers each. The production of Vanaspati in the State accounts for 18.7 per cent of the total production in India.

Districtwise distribution of factories manufacturing foodstuffs, other than sugar, is given in the Table below :

TABLE 3.17—Districtwise Distribution of Registered Factories manufacturing Foodstuffs other than Sugar

32. Bijnor	..	..	..	..	1	..	..	1
33. Muzaffarnagar	..	..	..	..	1	..	..	1
34. Etah	..	..	..	..	1	..	..	1
35. Rae Bareli	..	..	..	..	1	..	..	1
Total	237	11	7	8	100	4	1	368

The above Table reveals that in the manufacture of foodstuffs also Kanpur is at the top, bracketed with Aligarh. Kanpur, Agra and Meerut have 3 flour mills each. All the 3 mills of Kanpur and the one mill of Lucknow have more than 100 workers each. Bahraich, Etawah and Mainpuri have the largest number of rice mills; Aligarh, Kanpur and Agra have the largest number of dal mills. Twenty-six districts have no registered factories for producing flour, rice or *dal*, but the processing of foodgrains is a widespread industry, which is carried on in small establishments scattered all over. For the manufacture of edible oils Kanpur and Agra have the largest number of factories. Six factories of Kanpur, 2 of Agra, 3 of Aligarh, 2 of Allahabad and one each of Meerut and Lucknow employ more than 100 workers each. In the manufacture of hydrogenated oil Meerut comes first and Kanpur next. Fruit preservation factories, dairies, bakeries, etc. are small in number, and most of the dairies are co-operative or Government ventures.

24. The number of factories engaged in the production of foodstuffs including sugar is the largest for any Major Group in the Divisions under consideration and it speaks of the predominantly agricultural economy of the State. Industries giving the largest employment are textiles (chiefly cotton), sugar, repairs of rail-road equipment, metals and their products including machinery, glass and glass bangles, and milling of oil, rice, flour and *dal*. Two hundred

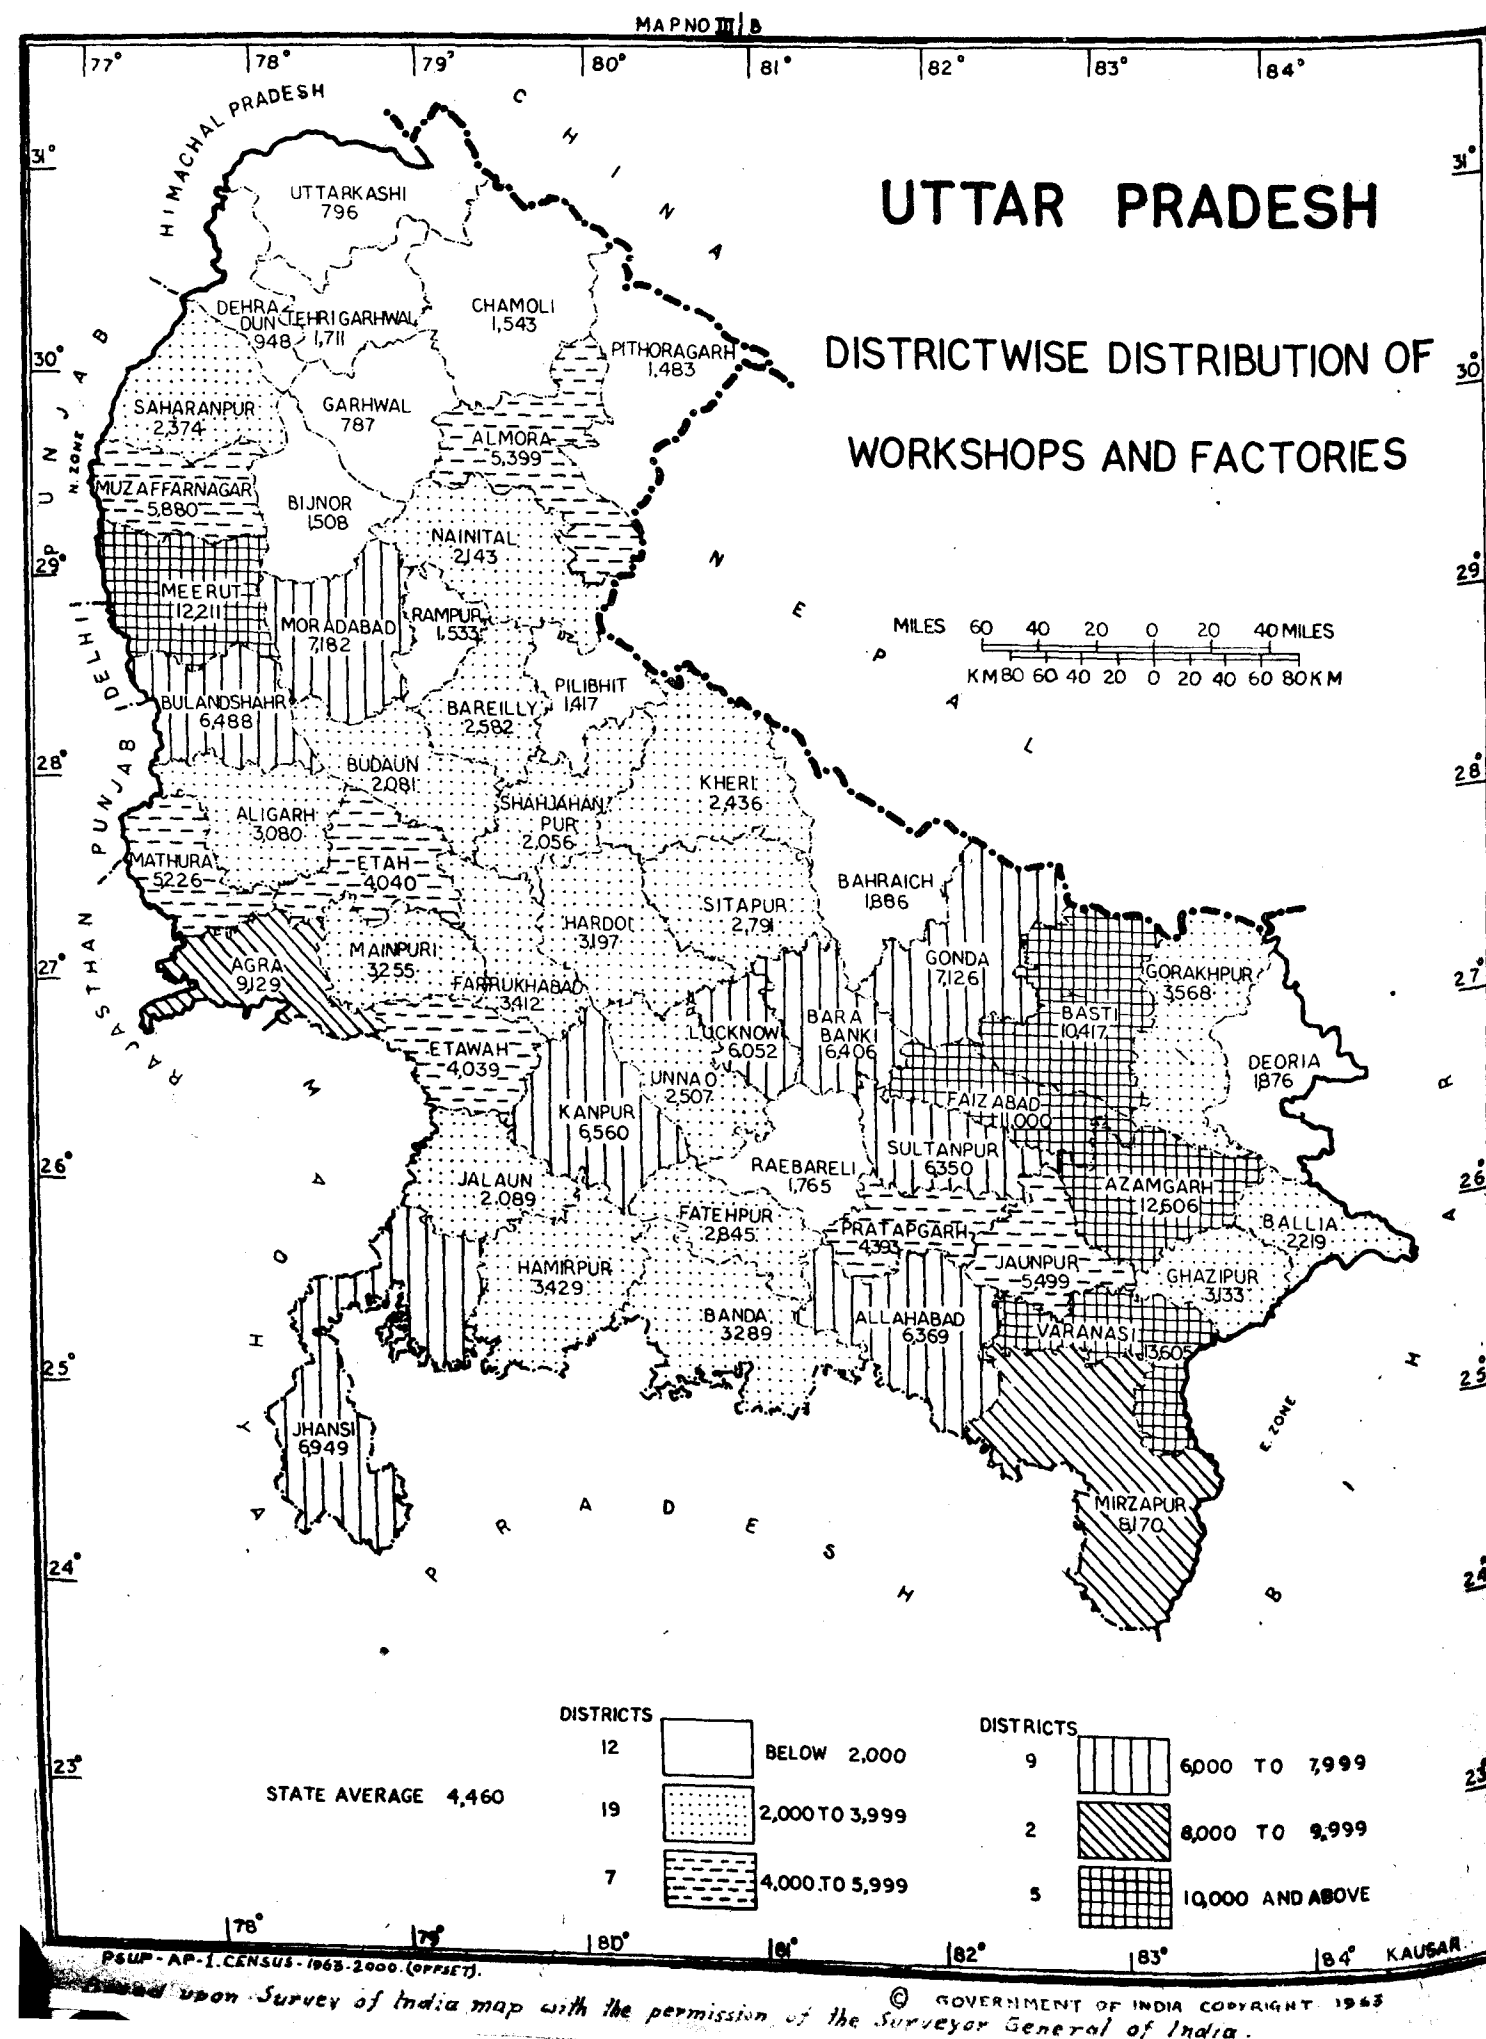

and seven units out of a total of 2,369, are Government workshops and factories most of which cater to the needs of the Government, and quite many are polytechnics and training institutions.

25. Kanpur, Meerut, Lucknow, Agra, Gorakhpur, Saharanpur and Deoria are the 7 districts of the State which provide employment to more than 10,000 workers. The names of notable industries in these districts are given below. The industries have not been arranged in order of employment provided by them, but in order of their importance in the industrial progress of a country.

KANPUR (354): Basic ferrous metals, metal products, production of light machinery and machine tools, motor transport repairs, manufacture of bicycles, basic chemicals and chemical products, cotton, jute, and woollen textiles, tanning of leather and leather footwear, edible vegetable oils, hydrogenated oils and processing of foodgrains chiefly *dal*, i.e., all branches of industry of any consequence. Textile, leather and ferrous metal industries are the most important industries of Kanpur.

MEERUT (219): Basic ferrous metals, light machinery and machine tools, repairs of rail-road equipment, manufacture of bicycles, chemical products, cotton textiles, alcohol, hydrogenated oils and sugar.

LUCKNOW (156): Production of light machinery and tools, repairs of rail-road equipment

and motor transport, manufacture of bicycles, scientific instruments, chemical products, cotton textiles, paper, printing and processing of foodgrains. Lucknow is known for paper and chemical products including cosmetics and perfumes.

AGRA (344): Basic ferrous metals, metal products, chemical products, wool spinning and weaving, carpet weaving, glass bangles and glass products, leather footwear, edible vegetable oils and processing of foodgrains. Glass bangles, glass products and leather footwear are the most important industries of Agra.

GORAKHPUR (40): Repairs of rail-road equipment and production of sugar.

SAHARANPUR (71): Scientific instruments, cotton textiles, paper, alcohol, cigarettes, sugar and processing of foodgrains chiefly milling of rice. Saharanpur is noted for paper, cigarettes and sugar.

DEORIA (19): Sugar alone is of importance.

The distribution of factories employing 100 workers and above in these districts is given in the following Table:

TABLE 3.18—Distribution of Registered Factories in 7 Districts having highest Factory Employment

District	100—499	500—999	1000—4999	5000 and Above
1. Kanpur	44	4	12	3
2. Meerut	22	10	3	..
3. Lucknow	22	4	3	...
4. Agra	48	2	...	...
5. Gorakhpur	10	4	2	1
6. Saharanpur	7	2	5	...
7. Deoria	2	11	2	..

26. India cannot yet be regarded as an industrially advanced country of the world, and Uttar Pradesh is a backward State in India. As already mentioned before, the absence of iron, coal and petroleum makes the State dependent on outside supplies, hauled over long distances. When-

ever a transport bottleneck occurs, production is crippled. Even then, there has been an all-round progress in industry. The number of registered factories has more than doubled during the decade 1950-60, and employment has risen by about 25 per cent—the difference in proportionate increase being attributable to the greater expansion in the number of smaller factories. Unfortunately, the rise in employment is to a large extent offset by increase in population which is over 16 per cent. Nevertheless, efforts are continuously being made to put Uttar Pradesh on the industrial map of India through successive Five Year Plans which aim at improving both the public and the private sectors of industry.

All Workshops and Factories General

27. We now take up the analysis of all workshops and factories, big or small, falling in Divisions 2 and 3 of the Standard Industrial Classification. The number of such workshops and factories according to the Houselist is 240,832. The following Table gives the number of such establishments and their number per one lakh population for all States and the adjoining Union Territories:

TABLE 3.19—Number of Workshops and Factories and Density per lakh population in States and certain Union Territories

States	Workshops and Factories	Density per lakh Population
1. Andhra Pradesh	150,596	419
2. Assam	11,023	93
3. Bihar	240,768	518
4. Gujarat	80,133	388
5. Jammu and Kashmir	41,889	1,176
6. Kerala	58,365	345
7. Madhya Pradesh	405,028	1,251
8. Madras	192,164	570
9. Maharashtra	320,460	810
10. Mysore	98,349	417
11. Orissa	226,715	1,292

States	Workshops and Factories	Density per lakh Population
12. Punjab	66,944	330
13. Rajasthan	44,215	219
14. Uttar Pradesh	240,832	327
15. West Bengal	157,021	450
Union Territories		
1. Delhi	8,414	316
2. Himachal Pradesh	38,251	2,831

The average density for India is 546 which is substantially higher than the State average of 327. The very small size of an average establishment partially accounts for the abnormally high density in Himachal Pradesh and high densities in Orissa, Madhya Pradesh and Jammu and Kashmir. Similarly, the comparatively large size of the average establishment is partially responsible for the abnormally low density in Assam and low densities in Rajasthan.

28. The average number of industrial establishments in this State is 4,460 per district. Map No. III/B gives their districtwise distribution. The number of districts in the various ranges is given in the following Table:

TABLE 3.20—Distribution of Districts by number of Workshops and Factories

Range	Number of Districts
Below 2,000	12
2,000—3,999	19
4,000—5,999	7
6,000—7,999	9
8,000—9,999	2
10,000 and Above	5

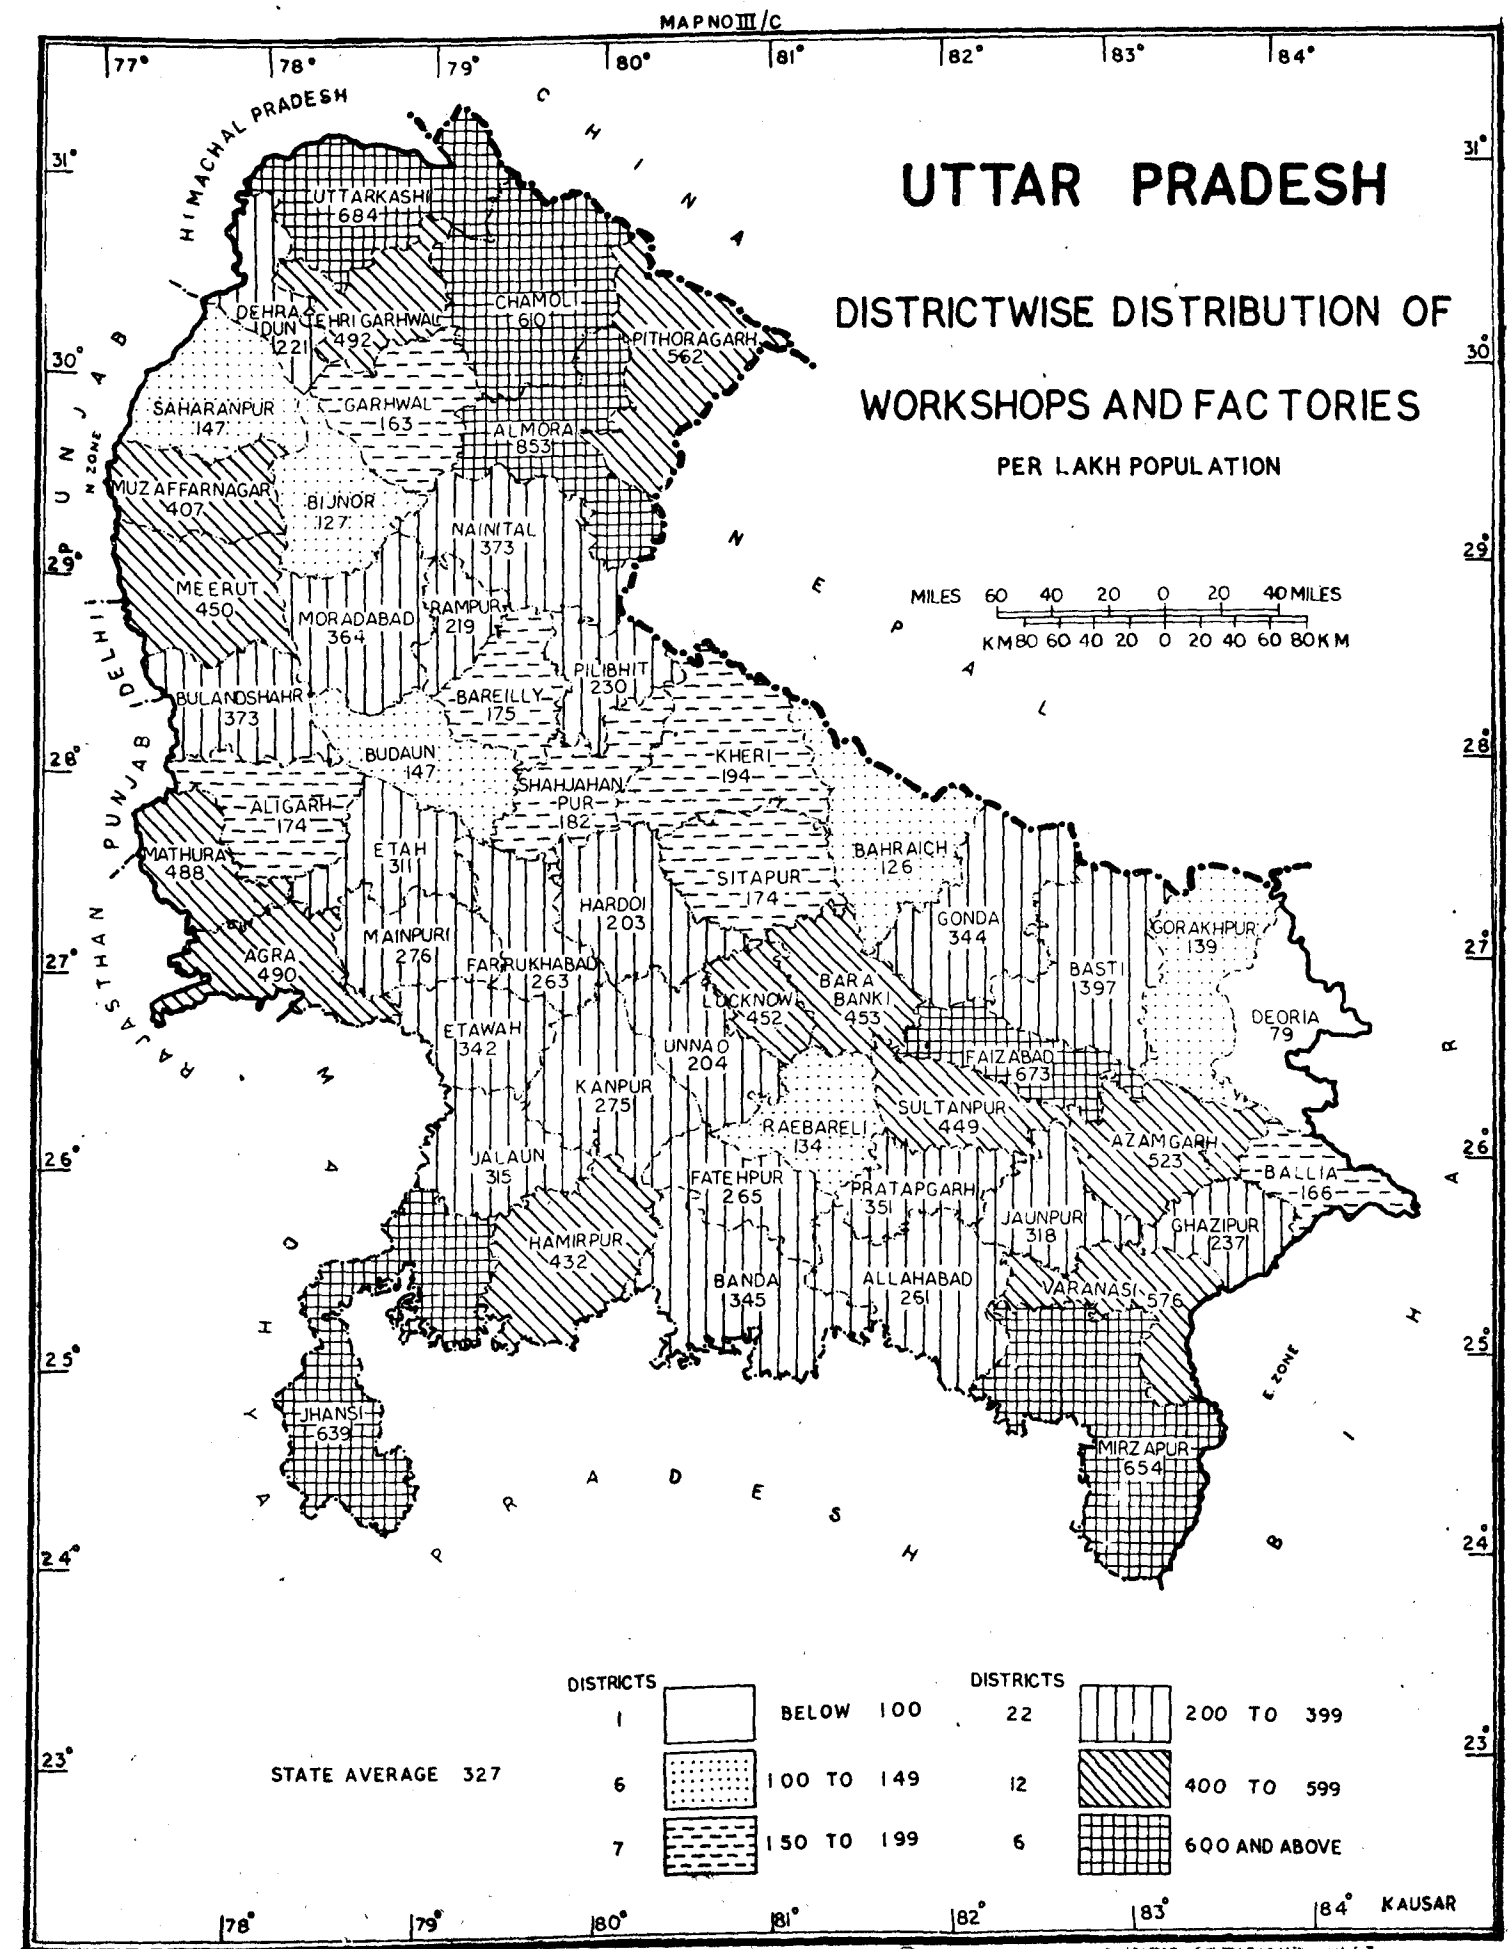

A glance through the above Table indicates that the range 2,000—3,999 accounts for the largest number of districts. The hill districts of Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal and Dehra Dun, the contiguous district of Bijnor in the northern part of the State, the Tarai districts of Rampur, Pilibhit, Bahraich

and Deoria, and the district of Rae Bareilly have less than 2,000 establishments each. Deoria and Rampur, however, have many large factories which make them the seventh and the thirteenth district respectively providing highest large-scale factory employment. The 7 districts possessing more than 8,000 industrial establishments each are the almost contiguous districts of Varanasi (13,605), Azamgarh (12,606), Faizabad (11,000) and Basti (10,417), and the districts of Meerut (12,211), Agra (9,127) and Mirzapur (8,170). Kanpur, Lucknow, Gorakhpur, Saharanpur, Aligarh, Allahabad, Bareilly and Muzaffarnagar which provide large-scale factory employment are conspicuous by their absence from this list due to comparatively fewer small establishments. On the other hand, Azamgarh, Faizabad, Basti and Mirzapur which occur in the list are not among the districts offering large-scale factory employment.

29. Table 3.19 of para 27 shows that the average density of industrial establishments in the contiguous hilly territory of Himachal Pradesh is 2,831 per lakh population. Most of these are very small. Density is high in certain hill districts of this State also, viz., Almora (852) Uttar Kashi (648) and Chamoli (610). Establishments in these districts also are small. This indicates that the incidence of industrial establishments in these areas is much less than in the neighbouring Himachal Pradesh. Map No. III/C gives the density of industrial establishments per lakh population in each district of this State. The following Table gives the number of districts in the various ranges of density:

TABLE 3.21—Distribution of Districts by Density of Workshops and Factories per Lakh Population

Range	Number of Districts
Below 200	14
200—399	22
400—599	12
600 and Above	6

A study of the above Table shows that the range 200–399 accounts for the highest number of districts. There are 14 districts in the smallest range of below 200 and they occur in four patches. The first patch consists of the contiguous districts of Garhwal, Bijnor and Saharanpur ; the second of Aligarh, Budaun, Bareilly, Shahjahanpur, Kheri, Sitapur and Bahraich ; the third of Gorakhpur, Deoria and Ballia ; and the last of the solitary district of Rae Bareli. Of these districts Gorakhpur, Saharanpur, Deoria, Aligarh and Bareilly, however, provide large-scale factory employment and have large establishments, but the remaining districts, viz., Budaun, Shahjahanpur, Kheri, Sitapur, Bahraich, Rae Bareli and Ballia, considering their population, are deficient both in respect of large and small establishments. As regards high density districts, besides the three Himalayan districts mentioned already, there are 3 more districts having a density exceeding 600, namely, the Vindhyan Plateau districts of Jhansi (639) and Mirzapur (654) and the plain district of Faizabad (673). None of these districts, however, provide any considerable large-scale factory employment. Faizabad and Mirzapur have already been discussed before. They do not possess many large-scale factories. Notwithstanding, they hold quite an honourable place in the sphere of medium-sized industries.

Rural-Urban Distribution

30. The proportion of urban establishments out of 1,000 industrial establishments in the State is 342. In 9 districts this proportion exceeds 500 as would appear from the following Table :

TABLE 3.22—Districts having more than half Workshops and Factories in Urban Areas

District	Total	Urban	Per Thousand
1. Lucknow	6,052	4,910	811
2. Agra	9,127	6,546	717
3. Kanpur	6,560	4,595	700
4. Varanasi	13,605	8,379	616
5. Saharanpur	2,374	1,450	611

District	Total	Urban	Per Thousand
6. Bareilly	2,582	1,493	578
7. Aligarh	3,080	1,651	536
8. Moradabad	7,182	3,708	516
9. Etah	4,040	2,070	512

Lucknow district has the highest proportion of urban industrial establishments, as it is a small district with a large urban area. High urban proportion is also pronounced in Agra, Kanpur, Varanasi and Saharanpur. District Etah of the above list is not considered to be an industrially developed district, in the usual sense, and it does not have a large urban area. The concentration of industry in towns shows the extent to which rural area is deficient.

31. The proportion of establishments in the urban area of the industrial districts not included in the preceding Table is given below :

TABLE 3.23—Proportion of Urban Workshops and Factories in other Industrial Districts

District	Total	Urban	Per Thousand
1. Rampur	1,533	731	477
2. Allahabad	6,369	2,744	431
3. Gorakhpur	3,568	1,443	404
4. Meerut	12,211	4,364	357
5. Deoria	1,876	233	124
6. Muzaffarnagar	5,880	683	116

The above Table reveals that in Rampur, Allahabad, and Gorakhpur districts the rural area has a larger number of industrial establishments than the urban, but the difference is not much ; in Meerut district the rural area has double the number of industrial establishments, while in Deoria and Muzaffarnagar districts industry is almost wholly rural.

32. The following districts have less than one-tenth industrial establishments in their urban areas:

TABLE 3.24—Districts having less than one-tenth Workshops and Factories in Urban Areas

District	Total	Urban	Percent
1. Pratapgarh	4,393	418	9.5
2. Pilibhit	1,417	112	7.9
3. Unnao	2,507	189	7.5
4. Sultanpur	6,350	368	5.8
5. Ballia	2,219	89	4.0
6. Tehri Garhwal	1,711	37	2.2
7. Basti	10,417	130	1.2
8. Almora	5,399	57	1.1
9. Uttar Kashi	796	4	0.5
10. Chamoli	1,543	..	..
11. Pithoragarh	1,482	..	..

None of the above districts has any urban area of importance, while Chamoli and Pithoragarh have no urban area at all.

33. Districts which have more than 4,000 industrial establishments in the urban area or more than 6,000 in the rural are given in the following Table:

TABLE 3.25—Districts having more than 4,000 Workshops and Factories in Urban Areas or more than 6,000 in Rural

Over 6,000 Rural		
1. Basti		10,287
2. Azamgarh		8,494
3. Meerut		7,847
4. Faizabad		7,465
5. Mirzapur		6,660
Over 4,000 Urban		
1. Varanasi		8,379
2. Agra		6,546
3. Lucknow		4,910
4. Kanpur		4,595
5. Meerut		4,364
6. Azamgarh		4,112

It will be seen from the above that Meerut and Azamgarh are the two districts which have a large number of both urban and rural industrial establishments, but there is a difference. Meerut has got a good number of large-scale factories, while Azamgarh has only a few.

Distribution of Workshops and Factories by Power and Fuel used

34. All workshops and factories have been divided into the following five categories according to the power or fuel used:

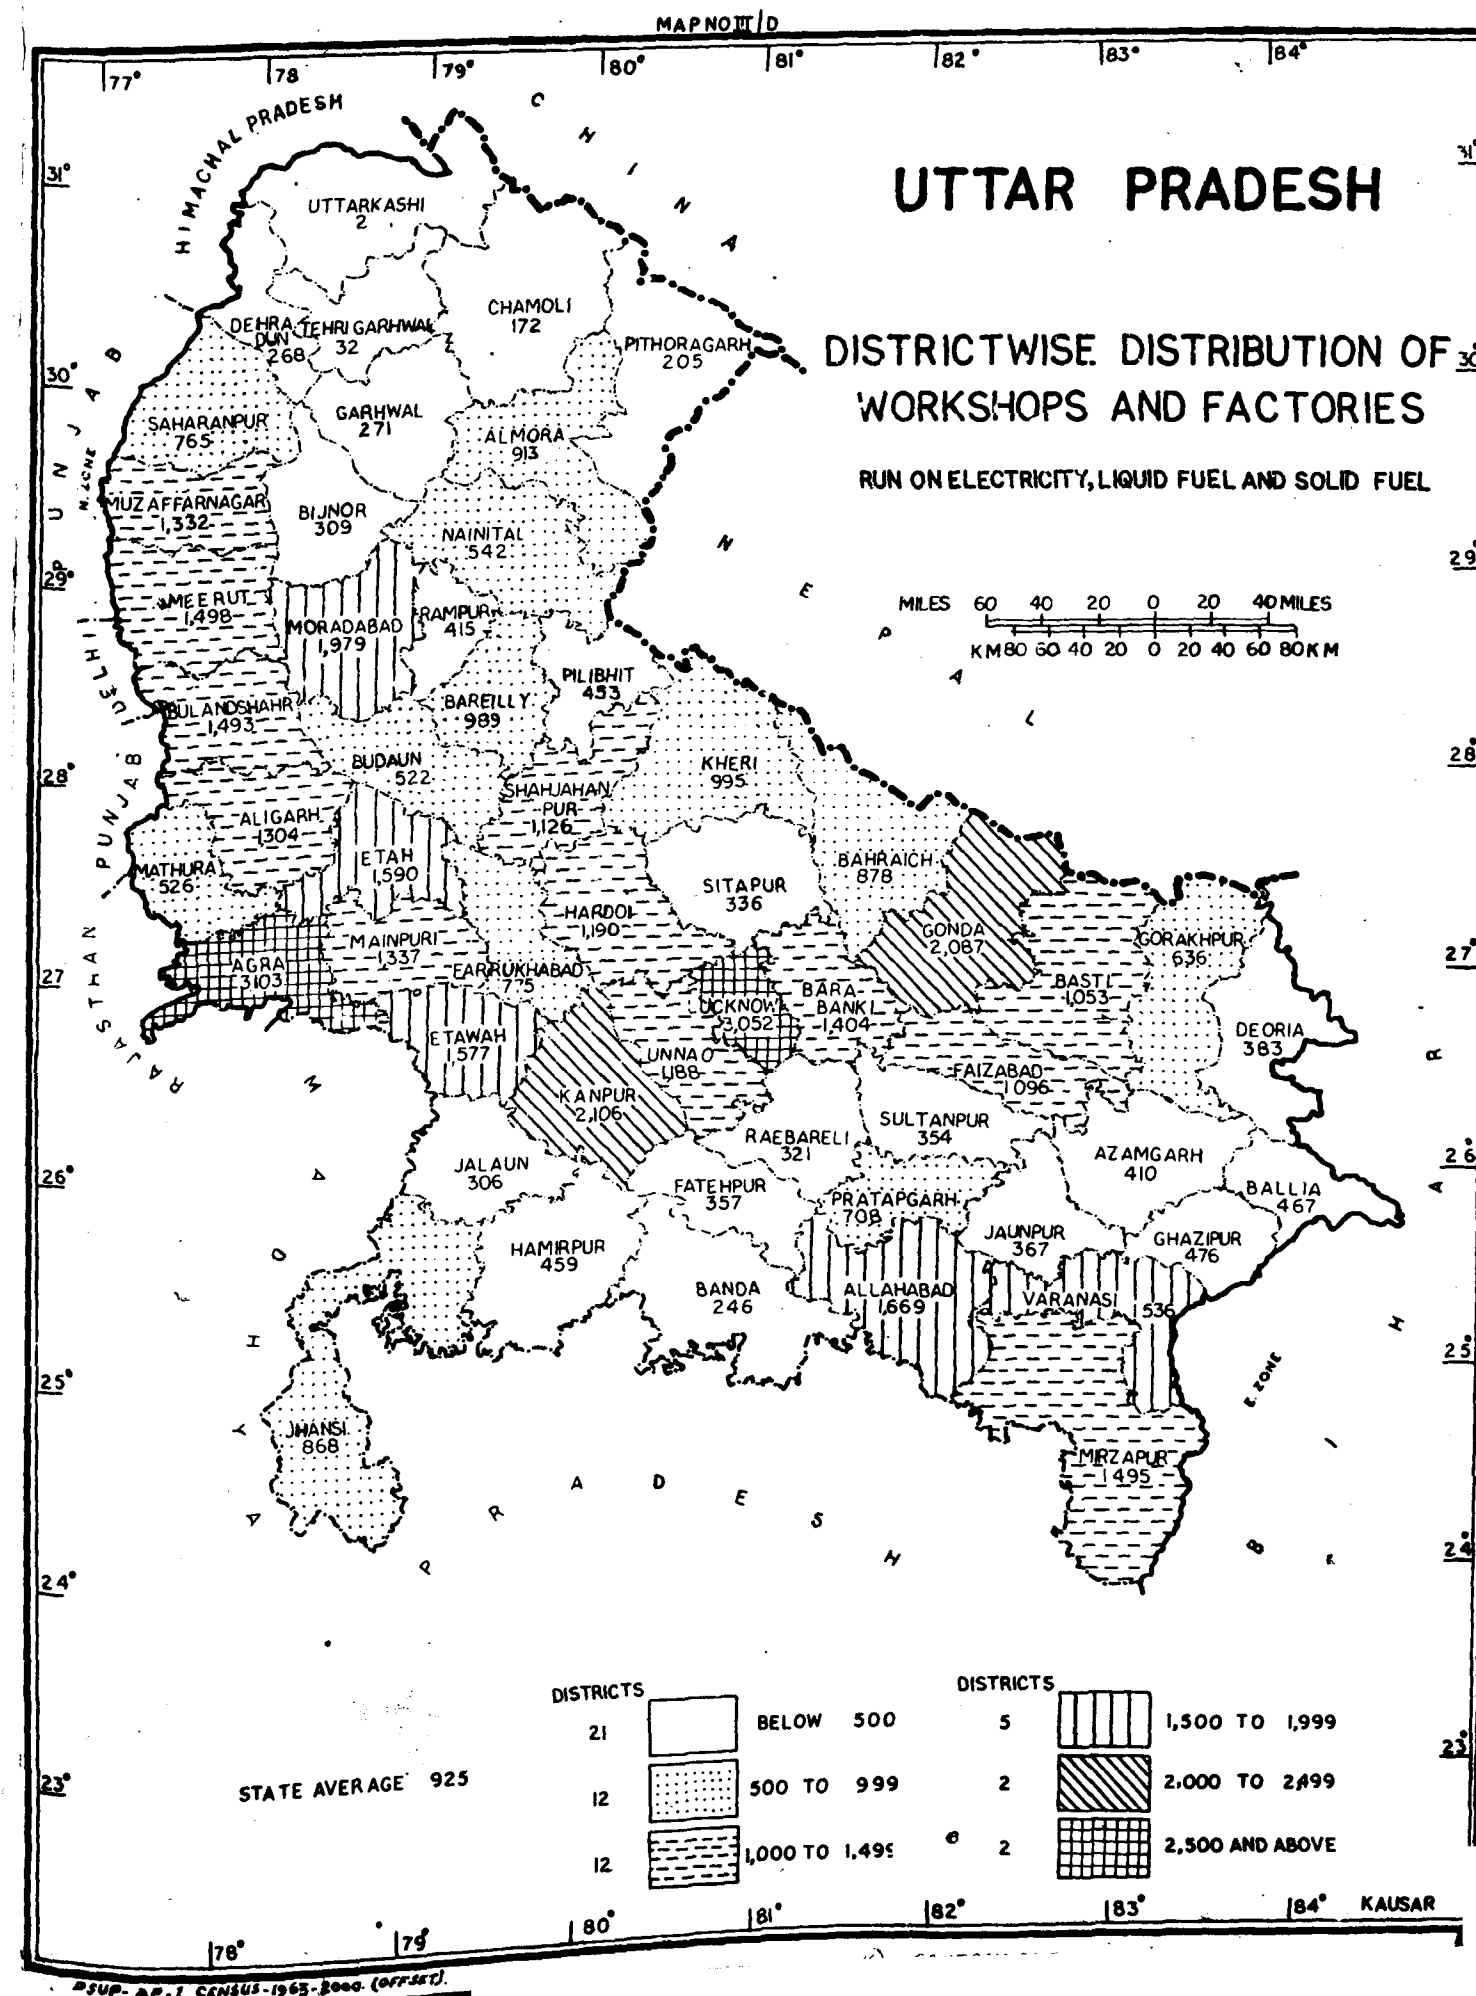

1. Electricity
2. Liquid Fuel, e.g. Petrol, Diesel, etc.
3. Solid Fuel, e.g. Coal, Wood or Bagasse
4. Other Power, and
5. No Power

Other Power includes water power, animal power and the like. No Power means doing things manually. Some enumerators omitted to record power. At times they were not clear as to the details required to be entered, when neither electricity nor liquid fuel nor solid fuel was being used, and left the column blank. This resulted in the classification of many industrial establishments under No Power, though quite many of them could have gone under Other Power. The figures of No Power have thus swollen, and the data require to be interpreted in this background. In order to obviate such danger it is proposed to consider Other Power and No Power jointly instead of separately.

35. Out of the total number of 240,832 industrial establishments 49,941 only are recorded as worked by electricity, liquid fuel, coal, etc., the proportion being 207 to 1,000. Their average number per district comes to 925. Map No. III/D shows the number of such establishments in each district. The number of districts in the various ranges is given in the following Table:

TABLE 3.26—Distribution of Districts by number of Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel

Range	Number of Districts
Below 500	21
500—999	12
1,000—1,499	12
1,500—1,999	5
2,000—2,499	2
2,500 and Above	2

The Himalayan districts of Uttarakashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal and Dehra Dun and the contiguous district of Bijnor in the northern part of the State; districts Rampur, Pilibhit and Sitapur; and a large patch of eleven districts consisting of Jalaun, Hamirpur, Banda, Fatehpur, Rae Bareilly, Sultanpur, Azamgarh, Deoria, Jaunpur, Ghazipur and Ballia have less than 500 establishments each worked by power or fuel. The 9 districts having the largest number of such establishments are Agra (3,103), Lucknow (3,052), Kanpur (2,106), Gonda (2,087), Moradabad (1,979), Allahabad (1,669), Etah (1,590), Etawah (1,577), and Varanasi (1,536).

36. The proportion of industrial establishments worked by power or fuel in the above 9 districts is given in the following Table :

TABLE 3.27—Proportion of Workshops and Factories worked by Electricity, Liquid Fuel, and Solid Fuel to all Workshops and Factories in 9 Districts

District	All Workshops and Factories	Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel	Proportion to 1,000
1. Lucknow	6,052	3,052	504
2. Etah	4,040	1,590	394
3. Etawah	4,039	1,577	390
4. Agra	9,127	3,103	340
5. Kanpur	6,560	2,106	321
6. Gonda	7,126	2,087	293
7. Moradabad	7,182	1,979	276
8. Allahabad	6,369	1,669	262
9. Varanasi	13,605	1,536	113

Meerut, Gorakhpur, Saharanpur and Deoria are not included in the above list, as the total number of industrial establishments worked by Electricity, Liquid Fuel and Solid Fuel is not very high. The proportions of establishments worked by power or fuel in these districts are 123, 178, 322 and 204 respectively.

37. It will appear from the above that only about one-fifth of the industrial establishments are worked by power or fuel. The only two districts in which more than half of the establishments are worked by power or fuel are Shahjahanpur (548) and Lucknow (504).

Shahjahanpur, however, is not industrially important. Even in such districts as Meerut and Varanasi the proportion is as low as 123 and 113. It will not be correct to assume that the proportion is higher in urban areas. The following Table gives the proportion for the urban areas of the 6 districts which have more than 4,000 urban establishments :

TABLE 3.28—Proportion of Urban Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel in certain Districts

District	Urban Workshops and Factories	Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel	Proportion to 1,000
1. Varanasi	8,379	1,012	121
2. Agra	6,546	2,256	345
3. Lucknow	4,910	2,450	499
4. Kanpur	4,595	1,477	321
5. Meerut	4,364	638	146
6. Azamgarh	4,112	135	33

The above Table reveals that, except in Lucknow, Agra and Kanpur, the proportion is insignificant. This shows the extremely limited extent to which industry in this State depends on power or fuel.

Distribution of Workshops and Factories by Size of Employment

38. The number of industrial establishments in each size of employment is given in the following Table :

TABLE 3.29—Distribution of Workshops and Factories by Size of Employment

Size of Employment	Number of Workshops and Factories	Proportion to 1,000
All sizes	240,832	1,000
One person	127,133	528
2—5 Persons	95,139	395
6—9 Do.	11,975	50
10—19 Do.	4,171	17
20—49 Do.	1,491	6
50—99 Do.	554	2.5
100 Persons and Above	369	1.5

The number of industrial establishments employing 100 workers and above is, more or less, the same as that of the registered factories in the same size of employment. The little difference which exists is due to the inclusion of some factories employing 100 persons and above in the working group of 50-99 persons and vice versa, but the differences in the two sets of figures for the working groups 50-99 and 20-49 are substantial and cannot be explained in this manner. The number of industrial establishments in these working groups, reported in the Houselists, is almost double the number of registered factories therein. The differences must, therefore, be ascribed to other causes.

39. From the preceding Table it is evident that more than half of the industrial establishments in the State are of the smallest size, i.e., one-worker establishments. The number of establishments in higher sizes of employment gets progressively less with great rapidity. In 38 districts more than half of the industrial establishments are one-worker establishments. The following Table gives the number of districts according to the proportion of one-worker establishments existing in each of them :

TABLE 3.30—Distribution of Districts by Proportion of One-Worker Industrial Establishments

Number of One-Worker Establishments per Thousand	Number of Districts
Below 300	1
300-399	4
400-499	11
500-599	23
600-699	7
700 and Above	8

The largest number of districts falls in the range 500-599. The only district in the lowest range is Dehra Dun. Saharanpur, Agra, Varanasi and Kanpur come in the next range 300-399. The dominant working group in Dehra Dun, Saharanpur, Meerut, Bulandshahr, Aligarh, Agra, Etah, Kanpur, Lucknow, Ghazipur and Varanasi is 2-5. Elsewhere, there is a preponderance of one-worker establishments. The 8 districts of the highest range which have

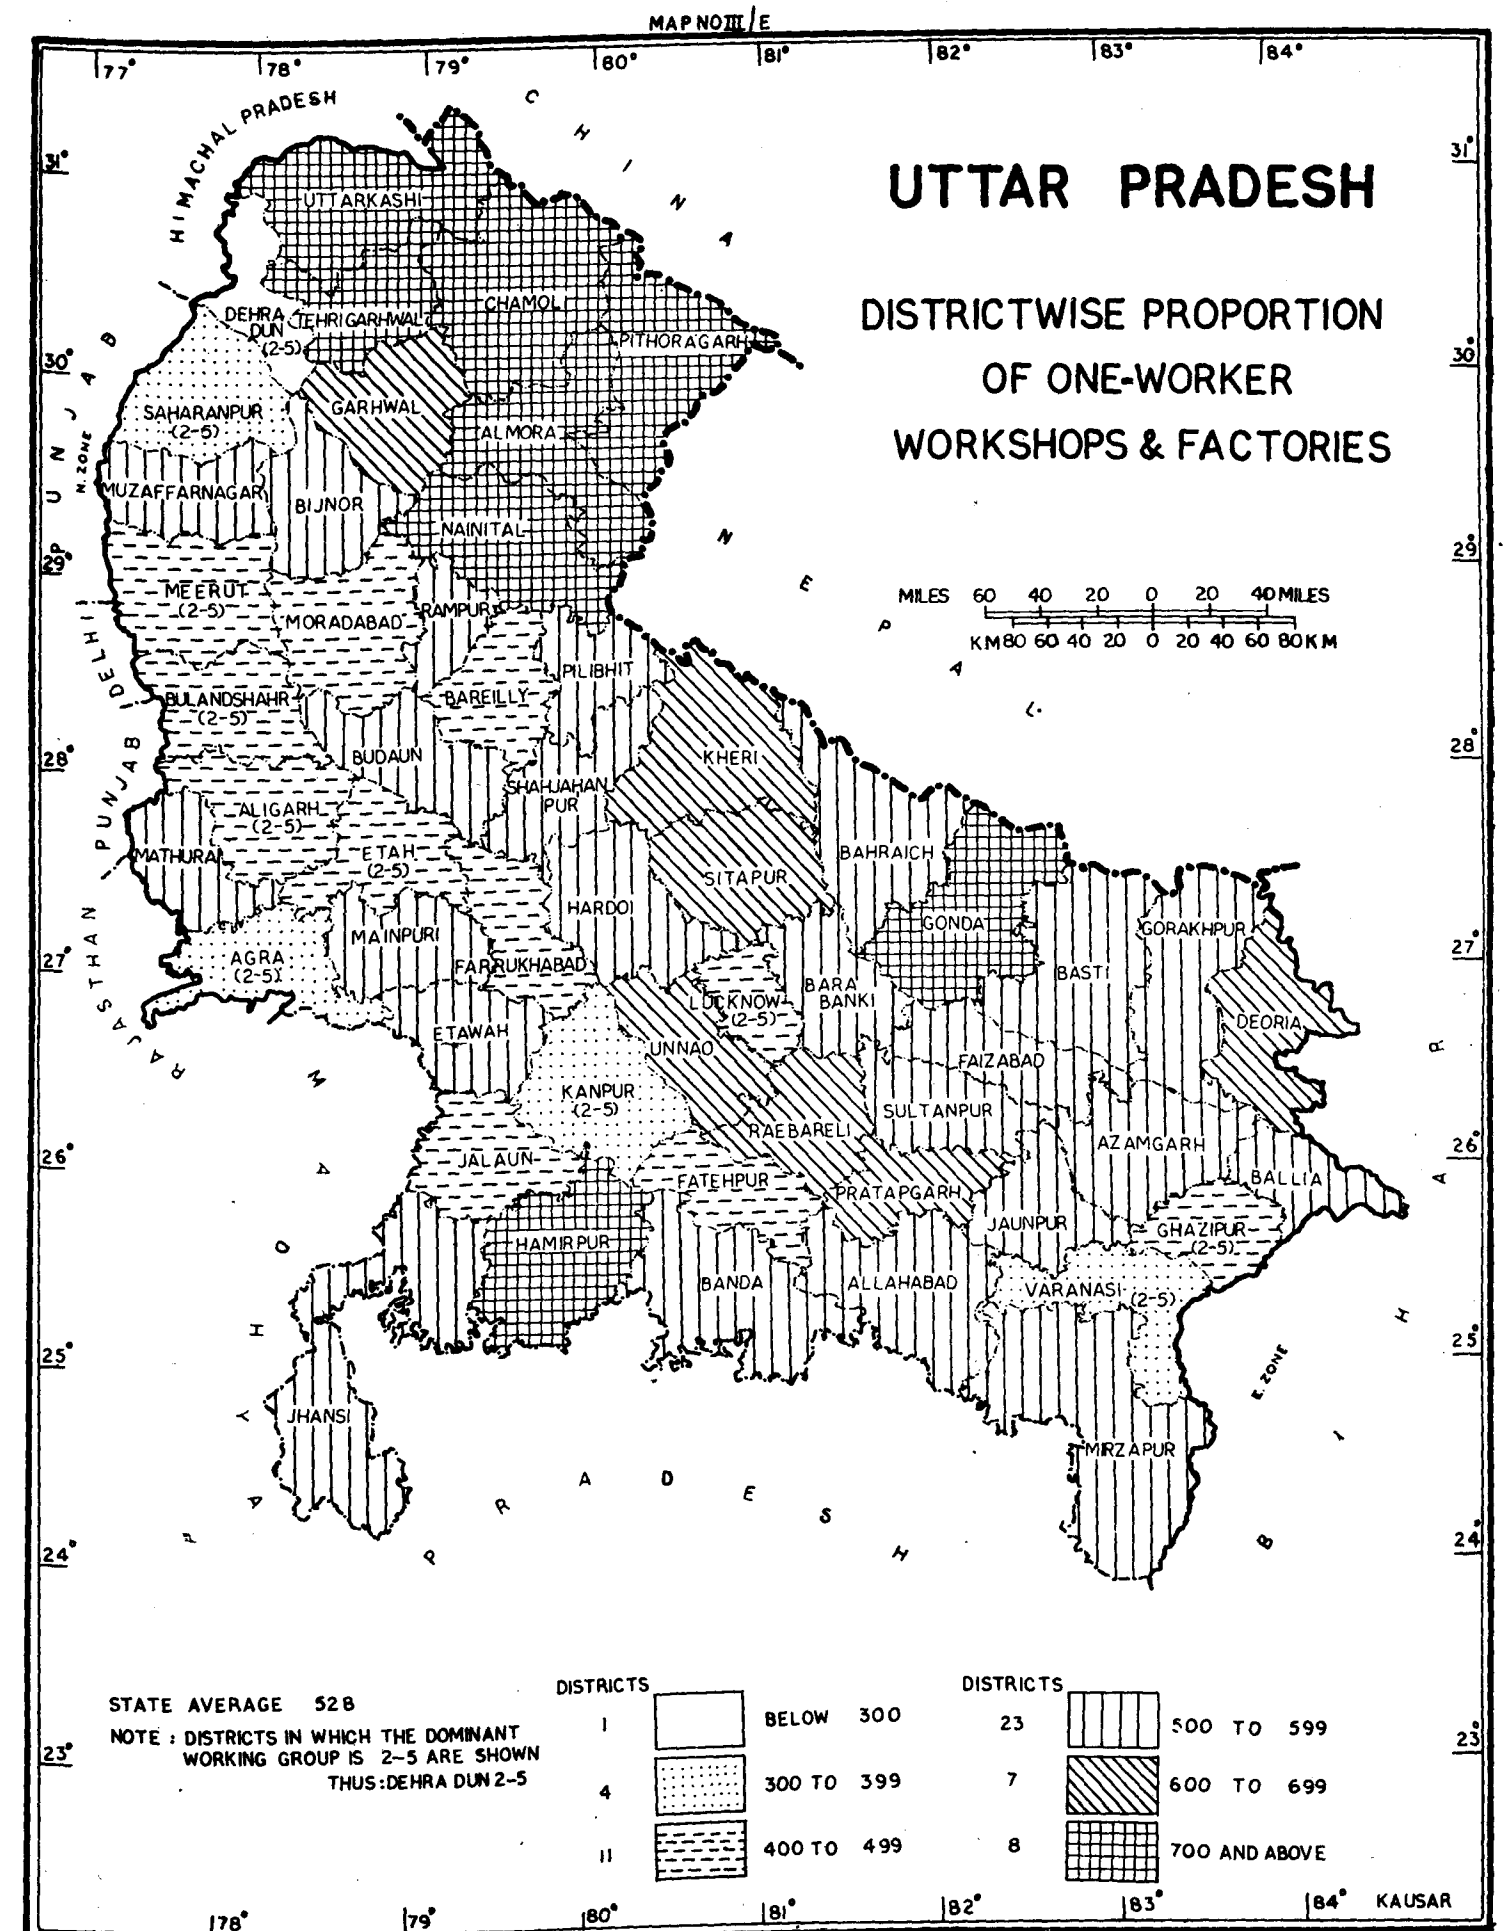

a very low average size of employment are Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Almora, Naini Tal, Hamirpur and Gonda. Districtwise proportion of one-worker establishments is shown in Map No. III/E.

40. So far rural and urban areas have been considered jointly from the point of view of the size of employment. They present different kinds of picture if they are taken up separately. 47 districts have a preponderance of one-worker establishments in the rural area, the exceptions being Moradabad, Dehra Dun, Saharanpur, Meerut and Bulandshahr in the western U. P., and Ghazipur and Varanasi in the eastern, where 2-5 worker establishments occur more numerous. In the urban areas of the State as a whole, and of 33 districts the 2-5 worker establishment is the normal feature, the exceptions being Uttar Kashi, Chamoli, Pithoragarh, Naini Tal, Moradabad, Bijnor, Mainpuri, Fatehpur, Allahabad, Jhansi, Jalaun, Hamirpur, Banda, Kheri, Sitapur, Rae Bareilly, Gonda, Sultanpur, Gorakhpur, Azamgarh and Jaunpur where one-worker establishment predominates.

41. Higher sizes of employment are predominant nowhere. The following districts have more than 300 establishments in the working group 6-9, or more than 100 in the working group 10-19, taking rural and urban areas separately :

TABLE 3.31—Districts having more than 300 Workshops and Factories in the Working Group 6-9 or more than 100 in the Working Group 10-19 in Rural and Urban Areas Separately

District	Working Group 6-9		Working Group 10-19	
	Rural	Urban	Rural	Urban
1. Muzaffarnagar	..	..	127	..
2. Meerut	550	..	114	171
3. Agra	..	537	..	447
4. Kanpur	..	438	..	224
5. Lucknow	..	389	..	158
6. Faizabad	352	310	..	..
7. Sultanpur	568	..	198	..
8. Azamgarh	509	372	123	222
9. Jaunpur	332	..	..	..
10. Varanasi	646	607	245	163
11. Mirzapur	..	..	..	112

PSUP-AP-1 CENSUS-1963-2000 (OFFSET).

Based upon Survey of India map with the permission of the Surveyor General of India. © GOVERNMENT OF INDIA COPYRIGHT 1963.

Azamgarh and Varanasi are the two districts which have more than 300 industrial establishments in the working group 6-9, and 100 in the working group 10-19, both in the rural and urban areas.

42. Districts which have more than 30 establishments in the working group 20-49, or 10 in the working group 50-99, taking the rural and urban areas separately, are given in the following Table :

TABLE 3.32—Districts having more than 30 Workshops and Factories in the Working Group 20-49 or more than 10 in the Working Group 50-99 in Rural and Urban Areas separately

District	Working Group 20-49		Working Group 50-99	
	Rural	Urban	Rural	Urban
1. Moradabad	..	31	..	..
2. Saharanpur	..	..	..	11
3. Muzaffarnagar	89	..	16	..
4. Meerut	75	60	9	33
5. Bulandshahr	79	42	..	..
6. Aligarh	..	94	..	..
7. Agra	..	173	12	54
8. Farrukhabad	43	..	..	..
9. Kanpur	..	116	..	23
10. Allahabad	..	38	..	22
11. Lucknow	..	51	..	11
12. Sultanpur	50	..	39	..
13. Basti	..	..	27	..
14. Gorakhpur	98	..	127	..
15. Jaunpur	..	..	18	..
16. Varanasi	..	48	..	24
17. Mirzapur	..	..	..	22

43. As regards industrial establishments employing 100 or more workers, not many districts possess them in any appreciable number. As their number is small, and there has been some inter-change with the establishments in the working group of 50-99, any detailed discussion on districtwise distribution is unsafe.

Distribution of Workshops and Factories in each kind of Fuel and Power by Size of Employment

44. So far working groups in industrial establishments have been studied in general. It will

now be useful to study them in relation to fuel or power used. The proportion of workshops and factories in each kind of fuel and power used to 1,000 workshops and factories is given in the Subsidiary Table E-III.2. The following Table gives the dominant group in each kind of fuel or power used for all States and the neighbouring Union Territories. Figures within brackets indicate the proportion to 1,000.

TABLE 3.33—Dominant Working Group in Workshops and Factories in each kind of Fuel and Power in States and certain Union Territories

(For Electricity and Liquid Fuel, the dominant working group is 2-5, except where indicated).

States		Rural Elec- Urban tricity	Liquid Fuel	Coal, Wood and Bagasse	Other Power	No Power
Andhra Pradesh.	R U	(548) (492)	(640) (439)	2-5(440) 2-5(403)	2-5(498) 2-5(409)	1(738) 2-5(476)
Assam	R U	(364) (373)	(383) (405)	2-5(364) 2-5(622)	2-5(435) 2-5(334)	2-5(526) 2-5(583)
Bihar	R U	(588) (559)	(679) (691)	1(576) 2-5(549)	2-5(501) 2-5(563)	1(628) 2-5(525)
Gujarat	R U	(496) (515)	(542) (550)	1(500) 2-5(626)	1(829) 1(623)	1(580) 2-5(508)
Jammu and Kashmir.	R U	(527) (489)	(558) (542)	1(648) 2-5(524)	1(947) 1(873)	1(784) 2-5(490)
Kerala	R U	(405) (452)	(365) (385)	20-49 (445) 2-5(444)	20-49 (445) 2-5(1000)	2-5(469) 2-5(577)
Madhya Pradesh.	R U	1(447) (502)	(500) (561)	2-5(200) 2-5(293)	1(1000) 2-5(571)	1(659) 2-5(496)
Madras	R U	(532) (473)	(654) (489)	2-5(544) 2-5(638)	2-5(657) 2-5(641)	2-5(439) 2-5(465)
Maharashtra	R U	1(472) (389)	1(625) (431)	.. 1(375)		1(646) 1(460)
Mysore	R U	1(474) (436)	(489) (524)	1(545) 2-5(560)	2-5(511) 2-5(479)	2-5(498) 2-5(551)
Orissa	R U	(416) (407)	1(535) (381)	2-5(562) 1(547)	2-5(667) 1(547)	2-5(614) 2-5(540)
Punjab	R U	(594) (517)	(779) (665)	1(448) 2-5(317)	1(913) 2-5(509)	1(724) 2-5(492)
Rajasthan	R U	(518) (569)	(688) (653)	1(626) 1(542)	1(702) 1(533)	1(624) 1(473)
Uttar Pradesh	R U	(587) (551)	(693) (604)	1(618) 2-5(483)	1(720) 2-5(484)	1(598) 2-5(463)

States	Rural Urban	Elec- tricity	Liquid Fuel	Coal, Wood and Bagasse	Other Power	No Power
West Bengal	R U	(400) (391)	(482) (489)	20-49(290) 2-5 (295)	2-5(273) 2-5(430)	2-5(327) 2-5(463)
<i>Union Territories</i>						
Delhi	R U	1(350) (424)	(761) (478)	100+(374) 2-5(556)	2-5(500) 2-5(476)	2-5(543) 2-5(551)
Himachal Pradesh	R U	(404) (400)	1(500) (667)	6-9(1,000) ..	1(984) 1(873)	1(826) 1(734)

45. It is evident from the above Table that in most of the States and Union Territories 2-5 is the dominant working group in industrial establishments worked by electricity or liquid fuel, both in the rural and the urban areas. Exceptions for electricity are the rural areas of Madhya Pradesh, Maharashtra, Mysore, and Delhi and for liquid fuel those of Maharashtra, Orissa and Himachal Pradesh where most of the establishments have one-worker each. There is no uniformity in the case of rural establishments worked by solid fuel. In some States the dominant working group is 2-5 and in others it is one, but Kerala and West Bengal, Delhi and Himachal Pradesh are exceptions where 20-49, 100 plus and 6-9 respectively are the dominant working groups. In urban establishments, however, there is uniformity, the dominant working group being 2-5. The exceptions are Maharashtra, Orissa and Rajasthan where it is one.

In the case of rural establishments worked by other power or no power there is ample diversity, the dominant working group in some States being 2-5 and in others one. The only exception is Kerala where it is 20-49 for other power. In urban establishments the dominant working group in most cases is 2-5.

46. In Uttar Pradesh 2-5 is the dominant working group for all kinds of urban industrial establishments whether worked by electricity, liquid fuel, solid fuel, other power or no power. In the rural areas workshops and factories run on electricity and liquid fuel usually have 2-5 workers each, while others are mostly one-worker establishments.

More than 90 per cent of the total number of rural establishments are of these kinds.

47. The highest proportion of large size establishments employing 50-99 or 100 workers and above is found in those run on electricity, and it gets progressively smaller in the case of those run on liquid fuel, solid fuel, other power and no power as the following Table will show. For the sake of simplicity, these two working groups as also other power and no power have been combined in this Table :

TABLE 3.34—Proportion of Workshops and Factories employing 50 Workers and Above in each kind of Fuel or Power

Kind of Fuel or Power	Rural Urban	Proportion to 1,000
1. Electricity	Rural Urban	27 34
2. Liquid Fuel	Rural Urban	4 15
3. Solid Fuel	Rural Urban	4 9
4. Other Power and No Power	Rural Urban	2 2

48. The following districts are exceptions to the general rule of 2-5 being the dominant working group in industrial establishments run on electricity and liquid fuel. The dominant working group wherever it differs from 2-5 is shown in the following Table :

TABLE 3.35—Districts not having a majority of 2-5 Worker Establishments among Workshops and Factories run on Electricity and Liquid Fuel

Electricity			Liquid Fuel		
District	Rural	Urban	District	Rural	Urban
1. Chamoli	1	..	1. Pithoragarh	6-9	..
2. Pithoragarh	1	..	2. Almora	1	..
3. Almora	1	..	3. Naini Tal	..	1
4. Budaun	..	1	4. Dehra Dun	..	10-19
5. Dehra Dun	10-19	..	5. Bijnor	1	..
6. Jhansi	1	..	6. Gonda	1	1
7. Jalaun	1	1			
8. Hamirpur	1	1			
9. Banda	20-49	..			
10. Pratapgarh	1	6-9			
11. Gorakhpur	1	1			

There are no workshops and factories run on electricity or liquid fuel in Uttar Kashi and Tehri Garhwal districts, and none on liquid fuel in Chamoli district. In the case of establishments worked by electricity Jalaun, Hamirpur, Pratapgarh and Gorakhpur are exceptions, both for the rural and the urban areas. Pratapgarh town has only 2 such establishments, which is far too small a number to indicate any tendency. Coming to establishments worked by liquid fuel, Gonda is an exception both for rural and urban areas where one-worker establishment is most predominant.

49. Factories worked by solid fuel, other power or no power are mostly one-worker establishments in the rural area, and 2-5 worker establishments in the urban area. The exceptions, however, are given in the following Table. Dominant working groups have been noted wherever they differ from the normal.

TABLE 3.36—Districts, not having a majority of One-Worker Establishments in Rural Areas and of 2-5, in Urban Areas, in respect of remaining Workshops and Factories

Solid Fuel			Other Power and No Power		
District	Rural	Urban	District	Rural	Urban
1. Almora	2-5	..	1. Moradabad	2-5	1
2. Bijnor	2-5	..	2. Bulandshahr	2-5	1
3. Rampur	2-5	..	3. Dehra Dun	2-5	..
4. Dehra Dun	2-5	..	4. Saharanpur	2-5	..
5. Bulandshahr	2-5	..	5. Meerut	2-5	..
6. Aligarh	2-5	..	6. Varanasi	2-5	..
7. Farrukhabad	2-5	..	7. Uttar Kashi	..	1
8. Fatehpur	2-5	..	8. Almora	..	1
9. Ghazipur	2-5	..	9. Naini Tal	..	1
10. Naini Tal	2-5	1	10. Bijnor	..	1
11. Bareilly	..	1	11. Rampur	..	1
12. Etah	..	1	12. Bareilly	..	1
13. Mainpuri	..	1	13. Mainpuri	..	1
14. Allahabad	..	1	14. Kanpur	..	1
15. Jalaun	..	1	15. Fatehpur	..	1
16. Hamirpur	..	1	16. Allahabad	..	1
17. Kheri	..	1	17. Jhansi	..	1
18. Bahraich	..	1	18. Jalaun	..	1
19. Gonda	..	1	19. Hamirpur	..	1
20. Bara Banki	..	1	20. Banda	..	1
21. Gorakhpur	..	1	21. Kheri	..	1
22. Jaunpur	..	1	22. Sitapur	..	1
23. Mirzapur	..	1	23. Lucknow	..	1

Solid Fuel		Other Power and No Power	
District	Rural Urban	District	Rural Urban
24. Pilibhit	.. 6-9	24. Rae Bareli	.. 1
25. Sitapur	2-5 6-9	25. Sultanpur	.. 1
26. Rae Bareli	2-5 6-9	26. Gorakhpur	.. 1
27. Sultanpur	2-5 20-49	27. Azamgarh	.. 1
28. Varanasi	6-9 ..	28. Jaunpur	.. 1

The urban areas of Pilibhit, Sitapur, Rae Bareli and Sultanpur have a majority of solid fuel establishments of 6-9 or 20-49 workers, but their number is too small to indicate any trend. The rural area of Varanasi, however, calls for notice. It has a considerable number of solid fuel establishments in the 6-9 working group.

Distribution of Workshops and Factories by Major and Minor Groups of Industry

50. Tables 3.37 and 3.38 give the distribution of 1,000 industrial establishments by the Major Groups of Divisions 2 and 3 respectively. Major Group 20—Foodstuffs accounts for more than 200 establishments out of 1,000 in the rural areas of Jammu and Kashmir, the Punjab, Uttar Pradesh and West Bengal and also the adjoining Union Territories of Delhi and Himachal Pradesh, and the urban areas of Bihar and Uttar Pradesh. Major Group 21—Beverages is significant in the rural areas of Assam where numerous establishments are engaged in the processing of tea. Major Group 22—Tobacco Products is very important in the rural and urban areas of Kerala and Madhya Pradesh and the rural areas of Maharashtra and Mysore where bidi manufacture is extensively done. Major Groups 23 to 27—Textiles account for 200 or more establishments out of 1,000 in the rural areas of Andhra Pradesh, Bihar, Madras, Mysore, Orissa, Uttar Pradesh and West Bengal (cotton handloom). Gujarat, Kerala and Maharashtra (textile goods), and the Union Territory of Himachal Pradesh (wool handloom); and in the urban areas of Andhra Pradesh, Madras, Mysore and Uttar Pradesh (cotton handloom), Assam, Bihar, Gujarat, Jammu and Kashmir, Kerala, Madhya Pradesh, Maharashtra, Orissa, the Punjab, West Bengal and Himachal Pradesh (textile garments). Major Group 28—Wood and Wooden Products is numerically significant

in the rural areas of Andhra Pradesh, Bihar, Gujarat, Madhya Pradesh, Maharashtra, Mysore, Orissa, the Punjab and Rajasthan ; and the urban areas of Orissa and the Union Territory of Himachal Pradesh. Major Group 29—Paper and Paper Products is not numerically important anywhere. Only the urban areas of Assam and Delhi have a good sprinkling of establishments engaged in making paper products.

TABLE 3.37—Distribution of 1,000 Workshops and Factories of all kinds by Major Groups of Division 2 in States and certain Union Territories

States	Major Group						
	20	21	22	23—27	28	29	
Andhra Pradesh	R 80	4	62	341	129	N	
	U 128	21	28	359	65	1	
Assam	R 125	94	2	181	83	1	
	U 112	11	6	200	92	10	
Bihar	R 191	12	24	321	110	1	
	U 251	11	70	249	59	2	
Gujarat	R 190	3	41	218	170	N	
	U 130	9	20	346	56	1	
Jammu and Kashmir	R 562	N	N	165	40	0	
	U 190	6	4	303	78	5	
Kerala	R 187	18	179	283	30	N	
	U 115	29	105	285	60	N	
Madhya Pradesh	R 103	2	178	128	171	N	
	U 183	4	164	215	80	1	
Madras	R 71	13	13	601	58	N	
	U 67	18	25	575	23	1	
Maharashtra	R 133	1	163	271	126	N	
	U 129	7	56	390	62	3	
Mysore	R 105	6	120	285	104	N	
	U 99	18	83	417	57	1	
Orissa	R 64	4	21	314	295	N	
	U 56	4	62	258	192	4	
Punjab	R 422	5	N	78	131	N	
	U 102	17	1	230	92	1	
Rajasthan	R 193	N	4	172	122	1	
	U 179	6	15	122	64	1	
Uttar Pradesh	R 379	1	8	244	55	1	
	U 234	4	9	285	54	2	
West Bengal	R 389	13	31	269	22	N	
	U 138	6	36	210	69	7	
Union Territories							
Delhi	R 303	4	4	35	4	0	
	U 94	13	1	91	64	14	
Himachal Pradesh	R 471	N	0	214	98	0	
	U 103	9	0	335	150	N	

'N' indicates a negligible proportion, viz. less than 0.5 to 1,000.

51. Coming to Division 3, the number of establishments in Major Group 30—Printing and Publishing—exceeds 50 in 1,000 only in the urban area of Delhi. Major Group 31—Leather and Leather Products is numerically important in the rural areas of Andhra Pradesh and Madhya Pradesh and in both the rural and urban areas of the Punjab, Rajasthan and Himachal Pradesh, where the proportion exceeds 100 to 1,000. Major Groups 32 and 33—Chemicals & Chemical Products ; Products of Rubber, Petroleum and Coal are numerically important in the rural area of Kerala, and urban area of Delhi where the proportion exceeds 50. As regards Major Groups 34 and 35—Non-Metallic Mineral Products the proportion is 100 and above in the rural areas of Bihar, Orissa, Rajasthan and Delhi (earthenware and pottery).

52. Major Group 36 comprises Basic Metals and their Products except Machinery and Transport Equipment. This Major Group is numerically important in the rural areas of Gujarat, Madhya Pradesh and Mysore, urban areas of Jammu and Kashmir and Delhi, and both the rural and urban areas of Assam, the Punjab and West Bengal where the proportion is 100 and above. Most of the establishments in this Major Group are engaged in the manufacture of sundry hardware. Production of Machinery, other than Transport Equipment, is covered by Major Group 37 which is not numerically significant anywhere. Only the urban areas of Gujarat, the Punjab and West Bengal and both the rural and urban areas of Delhi have more than 2 industrial establishments in 1,000 engaged in this activity. Major Group 38 is concerned with Transport Equipment. The proportion of industrial establishments engaged in the manufacture and repairs of transport equipment exceeds 100 in the urban areas of Assam, the Punjab and Rajasthan—mostly repairs of bicycles and in Assam repairs of motor vehicles. The last Major Group 39 covers Miscellaneous Manufacturing Industries ; its proportion exceeds 100 in the urban areas of all States and Union Territories except Madras, Mysore and Himachal Pradesh.

TABLE 3.38—Distribution of 1,000 Workshops and Factories of all kinds of Major Groups of Division 3 in States and certain Union Territories

States	Major Group											
	30	31	32	33	34	35	36	37	38	39

	U 3	193	6	24	69	8	17	84				

53. The proportion of workshops and factories by major and minor groups in each district of the State to 1,000 workshops and factories is given in the Subsidiary Table E—III. 1. It is very handy for studying the comparative distribution of industries in a particular district, but for appreciating the distribution of various industries districtwise within the State absolute

figures of industrial establishments are more important. In the discussion that follows absolute figures have been used, and they have been supplemented by proportionate figures, wherever necessary, for comparison. For Uttar Pradesh foodstuffs, textiles, metallic industries and miscellaneous manufacture are numerically most important as the following Table will show :

TABLE 3.39—Proportion of Workshops and Factories in selected Major Groups of Industry

Major Group of Industry		Proportion to 1,000	
		Rural	Urban
20	Foodstuffs	379	234
23—27	Textiles	244	285
36—38	Basic Metals and their Products, Machinery and Transport Equipment	81	154
39	Miscellaneous Manufacture	113	129

The rural area has the highest proportion of establishments engaged in the manufacture of foodstuffs, chiefly milling and dehusking of foodgrains, and the urban area has the highest proportion of establishments engaged in the manufacture of textiles, chiefly cotton goods.

54. Major Group 20—Foodstuffs—The average number of establishments in the manufacture of foodstuffs per district is 1,112 for the rural, and 357 for the urban areas. The following districts have more than 1,500 such establishments in their rural areas or more than 500 in the urban :

TABLE 3.40—Districts having more than 1,500 Rural or more than 500 Urban Workshops and Factories in Foodstuff Industries

District	Rural W and F	Proportion to 1,000		Urban W and F	Proportion to 1,000	
1. Almora	4,067	761	..	..	..	..
2. Moradabad	..	..	713	192	..	..
3. Bareilly	..	..	572	383	..	..
4. Meerut	1,950	248	828	190	..	..
5. Bulandshahr	..	..	982	324	..	..

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
6. Mathura	..	..	621	314
7. Agra	..	..	1,134	173
8. Kanpur	..	..	1,048	228
9. Allahabad	..	..	625	228
10. Jhansi	..	..	549	223
11. Lucknow	..	..	1,631	332
12. Gonda	2,567	442	..	..
13. Faizabad	3,268	438	1,524	431
14. Sultanpur	2,575	430	..	..
15. Pratapgarh	2,137	538	..	..
16. Basti	2,966	288	..	..
17. Azamgarh	2,942	346	526	128
18. Jaunpur	1,776	401	..	..
19. Varanasi	..	..	800	95
20. Mirzapur	2,116	318	..	..

Manufacture of *Khandsari* and *Gur* is the most extensive foodstuffs industry in the rural area of Meerut, and the production of edible oils in the rural areas of Gonda, Faizabad, Sultanpur, Pratapgarh, Basti, Jaunpur and Mirzapur districts of the above Table. In the urban areas of Mathura, Agra, Allahabad, Jhansi, Lucknow, Faizabad, and in the whole of Azamgarh the preparation of sweetmeats, confectionary and sundry food products accounts for the largest number of establishments. In the remaining areas the most important food industry is the production of rice, flour and *dal*. Manufacture of sugar in mills is a very important large-scale industry of the State. As many as 71 sugar mills were working at the time of houselisting. Large-scale manufacture of sugar, rice, flour, *dal*, hydrogenated oil, butter and milk products have already been discussed in paras 22 and 23.

More than half of the rural establishments of Almora, Pratapgarh, Tehri Garhwal, Chamoli,

Naini Tal, Gorakhpur, Bijnor, Pithoragarh, Uttar Kashi, Jalaun, Dehra Dun and Garhwal, in descending order, are engaged in foodstuff industries. Except in Bijnor, where the chief industry is the manufacture of *khandsari* and *gur*, and in Pratapgarh and Gorakhpur, where it is the manufacture of edible oils, the majority of rural establishments in these districts are producing rice, flour and *dal* by milling and dehushing foodgrains. The same is the case with the urban areas of Bijnor, Almora and Tehri Garhwal.

The rural areas of Meerut, Agra, Mathura, Etah, Muzaffarnagar, Bara Banki, Pilibhit, Hamirpur, Varanasi and Jhansi have less than one-fourth establishments in foodstuff industries, Jhansi being at the bottom. In Pilibhit wood industry and in Hamirpur miscellaneous manufactures are important; while in the remaining 8 districts textiles. The urban areas of 23 districts have less than one-fourth number of establishments in food industries. Districts which have less than one-fifth urban establishments in such industries are Sitapur, Moradabad, Meerut, Mirzapur, Saharanpur, Sultanpur, Agra, Azamgarh, Gorakhpur, Bara Banki, Varanasi and Uttar Kashi. For Moradabad wood, for Mirzapur metal, for Agra leather and for Sultanpur and Azamgarh miscellaneous manufactures are more important; and for the remaining seven districts, textiles.

55. *Major Group 21—Beverages*—Beverage industries are not numerically important. Distilleries and breweries, ice factories and tea processing factories have been dealt with in para 20.

56. *Major Group 22—Tobacco Products*—Tobacco industries again are not numerically important. *Bidis* are made in several districts, chief of which are Azamgarh, Farrukhabad and Allahabad. For the manufacture of cigarettes there is a big factory at Saharanpur.

57. *Major Groups 23 to 27—Textiles*—Textile industry is an extremely important industry of the State. The average number of textile establishments per district is 715 for the rural area and 433 for the urban. Twenty-two districts of the following Table have more than

1,000 rural or more than 500 urban textile establishments :

TABLE 3.41—Districts having more than 1,000 Rural or more than 500 Urban Workshops and Factories in Textile Industries

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
1. Moradabad	1,141	328	..	..
2. Saharanpur	..	..	546	377
3. Muzaffarnagar	2,111	406	..	..
4. Meerut	3,015	384	1,589	364
5. Bulandshahr	1,054	305	1,059	349
6. Mathura	1,059	326	..	..
7. Agra	..	..	846	129
8. Etah	..	..	656	317
9. Farrukhabad	..	..	603	375
10. Etawah	..	..	556	332
11. Kanpur	..	..	1,110	242
12. Jhansi	1,355	302	739	301
13. Sitapur	..	..	562	411
14. Lucknow	..	..	968	197
15. Bara Banki	2,268	465	1,038	678
16. Faizabad	1,238	166	549	155
17. Sultanpur	1,049	175	..	..
18. Basti	4,140	402	..	..
19. Gorakhpur	..	..	685	475
20. Azamgarh	2,093	246	544	133
21. Varanasi	3,754	718	6,078	725
22. Mirzapur	1,207	181	..	..

In the urban areas of Meerut, Bulandshahr, Agra, Farrukhabad, Kanpur, Lucknow and Faizabad districts making of garments is numerically the most dominant textile industry; and in the urban areas of Jhansi, cotton spinning. Carpet-making accounts for the largest number of establishments in the rural areas of Varanasi and Mirzapur, and handloom silk industry in the urban areas of Varanasi. Varanasi is famous for its silks, and both Varanasi and Mirzapur for

their carpets. Cotton weaving on handlooms is important for the remaining areas covered by the above Table. Heavy textile industries do not come into the picture in this Table because of their small number. They have been separately dealt with in para 19. Large cotton mills exist chiefly at Kanpur and also in Rampur, Saharanpur, Meerut and Aligarh districts. Large jute mills exist in Kanpur and Gorakhpur districts, and a large woollen mill at Kanpur. Kanpur, in fact, is the centre of large-scale production of all kinds of textiles.

The urban areas of Uttar Kashi, Varanasi, Bara Banki, Gorakhpur, Sitapur and Pilibhit, and the rural areas of Varanasi, Bara Banki, Aligarh, Muzaffarnagar and Basti have more than forty per cent industrial establishments in textile industries. Uttar Kashi town has the highest proportion, viz. 750 to 1,000, but it is not important as only 4 establishments exist in the town, 3 of which are engaged in the weaving of wool.

58. *Major Group 28—Wood and Wooden Products*—These industries do not have any great numerical significance, the average number of establishments per district being 160 for the rural, and 83 for the urban areas. The following 23 districts have more than 200 rural or more than 100 urban establishments engaged in wood and wooden products :

TABLE 3.42—Districts having more than 200 Rural or more than 100 Urban Workshops and Factories in Wood Industries

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
1. Moradabad	476	137	934	252
2. Budaun	226	151	..	..
3. Bareilly	..	..	272	182
4. Pilibhit	301	230	..	..
5. Saharanpur	..	..	187	129
6. Muzaffarnagar	389	75	..	..
7. Meerut	496	63	183	42

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
8. Bulandshahr	259	72	154	51
9. Mathura	264	81	124	62
10. Agra	..	..	235	36
11. Mainpuri	224	117	..	..
12. Etawah	255	108	101	60
13. Kanpur	..	..	211	46
14. Allahabad	..	..	114	42
15. Jhansi	581	129	114	46
16. Hamirpur	317	117	..	..
17. Lucknow	..	..	233	47
18. Gonda	731	126	..	..
19. Bara Banki	381	78	..	..
20. Basti	309	30	..	..
21. Azamgarh	291	34	..	..
22. Varanasi	..	..	112	13
23. Mirzapur	351	53	..	..

The proportion of establishments engaged in wood industries to all establishments exceeds 1 to 5 in Moradabad (urban), Pilibhit (rural) and Dehra Dun (urban). Wood industries are important in the economy of these areas. Dehra Dun does not appear in the above Table, as the total number of industrial establishments is small.

59. *Major Group 29—Paper and Paper Products*—These industries are not numerically significant anywhere. There are 2 large paper mills, one each at Saharanpur and Lucknow.

60. *Major Group 30—Printing and Publishing*—The number of establishments under this major group also is not large. The average for the rural area is less than 2 per district, and for the urban 21. The urban areas of the following 7 districts have more than 50 printing establishments each :

TABLE 3.43—Districts having more than 50 Urban Workshops and Factories in Printing Industry

District	Number of W and F	District	Number of W and F
1. Meerut	77	4. Allahabad	238
2. Agra	78	5. Lucknow	84
3. Kanpur	145	6. Azamgarh	51
		7. Varanasi	98

Allahabad has the largest number of printing presses. The biggest presses are located at Allahabad, Aligarh and Lucknow, though the number of presses at Aligarh is not large.

61. *Major Group 31—Leather and Leather Products*—Leather industry is an important industry of the State. The average number of establishments in the rural area is 147 per district and in the urban 98. The following districts have more than 300 rural and 200 urban establishments in this industry :

TABLE 3.44—Districts having more than 300 Rural or 200 Urban Workshops and Factories in Leather Industry

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
1. Muzaffarnagar	320	62	..	..
2. Meerut	1,030	131	209	48
3. Mathura	367	113	..	..
4. Agra	524	203	1,924	294
5. Kanpur	..	..	456	99
6. Jhansi	528	118	216	88
7. Hamirpur	306	113	..	..
8. Lucknow	..	..	405	82
9. Faizabad	421	56	..	..
10. Azamgarh	382	45	206	50
11. Mirzapur	834	125	..	..

The largest number of leather establishments is in the urban area of Agra district followed by the rural area of Meerut district. In Agra more than one-fifth establishments, both in the rural and the urban areas, are devoted to leather industry. Agra is renowned for boot and shoe manufacture. The largest factory, however, is located at Kanpur which is the most important tanning centre in the State.

62. *Major Group 32—Rubber, Petroleum and Coal Products*—These are of little consequence for this State. Tyres and tubes are not manufactured anywhere. The few factories shown against Minor Group 321 merely undertake their repairs. Rubber shoes are manufactured at Rampur, Agra and Kanpur, but only one of these establishments is a registered factory, others being very small. For miscellaneous rubber goods there are a few establishments at Pauri (Garhwal), Moradabad, Meerut, Agra and Kanpur, only 4 of which are large enough to be registered.

63. *Major Group 33—Chemicals and Chemical Products*—This Major Group also is not important for this State. The average number of chemical establishments per district is 20 for the rural area and 19 for the urban. Most of the rural establishments are engaged in the manufacture of explosives (fire works), indigenous drugs, perfumes, etc. As the manufacture of explosives is done away from habitation, many establishments are likely to have been missed. Indigenous drugs and perfumed oils are often prepared inside dwellings, no visible portion being set aside for this purpose. Consequently, many places of manufacture get omitted in the houselist and do not appear in the Tables. Manufacture of soap, including washing soap, accounts for the largest number of establishments in the urban areas, important places being Meerut, Mathura, Agra, Etah, Kanpur and Lucknow. Next in order of occurrence are establishments engaged in pharma preparations, toilet goods and explosives. Basic chemical industries exist chiefly at Agra, Kanpur, Lakhimpur-Kheri, Lucknow and Jaunpur, but only Kanpur is of any importance.

Matches are manufactured at Bareilly, Kanpur and Lucknow, but only the Bareilly factory is of industrial importance. Manufacture at other places is on a very small scale.

64. *Major Groups 34 and 35—Non-Metallic Mineral Products (other than Petroleum and Coal)*—These industries are important for the State, the average number per district being 176 for the rural and 56 for the urban areas. Over 80 per cent of rural establishments are engaged in the production of earthenware and earthen pottery, about 168 potters per district, this being so when numerous potters all over have been missed. In the urban areas also earthenware is the most extensive non-metallic mineral industry, the average per district being 25. Making of earthen images including toys comes next in order of occurrence, important areas being the whole of Azamgarh district and the rural portions of Sultanpur and Pratapgarh districts. As in many cases this work is done inside the home, numerous omissions have occurred, particularly in Lucknow which has a name for the quality of earthen toys and artware.

Glass-bangle industry accounts for the next largest number of non-metallic mineral establishments, the average for the rural and urban areas per district being 6 and 11.3, respectively. The following districts have more than 25 rural or urban establishments in this industry :

TABLE 3.45—Districts having more than 25 Rural or 25 Urban Workshops and Factories in Glass Bangle Industry

District	Rural W and F	Urban W and F
1. Agra	94	551
2. Aligarh	47	..
3. Mainpuri	64	..
4. Gonda	26	..

It will thus appear from the above Table that the glass-bangle industry is concentrated in Agra district. Its chief production centre is Firozabad. For other glass products also Agra is again the most important centre.

Chinaware and crockery manufacturing establishments are found in sizable numbers in the urban areas of Moradabad (131) and Bulandshahr (49) districts. Khurja in Bulandshahr district has a name for crockery of fair quality.

Manufacture of bricks and tiles is important for the building industry. Most of the brick kilns are situated in the rural area, on the outskirts of towns, but mostly they serve urban needs. It will, therefore, be useful to consider rural and urban kilns together. The average number of brick kilns per district is 6. The number of brick kilns in the following districts exceeds 12.

TABLE 3.46—Districts having more than 12 Brick Kilns

District	Number of Brick-kilns	District	Number of Brick-kilns
1. Meerut	43	6. Bulandshahr	35
2. Agra	28	7. Fatehpur	16
3. Moradabad	23	8. Allahabad	14
4. Bareilly	20	9. Faizabad	15
5. Muzaffarnagar	20	10. Jaunpur	13

Brick kilns are usually situated in isolation, and it is not surprising that some enumerators more intent on enumeration of population have omitted some of them.

For the manufacture of cement there is a large factory in Mirzapur district.

Other non-metallic mineral industries do not call for attention.

65. *Major Group 36—Basic Metals and their Products*—The working of basic metals, particularly iron, is extremely important for the economy of any State, because iron and steel form the basis of all heavy industries. The geological formation of Uttar Pradesh, unfortunately, marks it out for extreme deficiency both in metallic or non-metallic minerals. Basic metal industries such as smelting, refining, rolling and conversion into basic forms are, therefore, not nu-

merous and are confined to the towns, the average number of establishments per district being only 2 for ferrous and one for non-ferrous. The 7 districts of the following Table are above average; they possess more than 4 ferrous or more than 2 non-ferrous basic metal establishments:

TABLE 3.47—Districts having more than 4 Basic Ferrous or more than 2 Basic Non-Ferrous Metal Workshops and Factories

District	Basic Ferrous Metal W and F	Basic Non-ferrous Metal W and F
1. Moradabad	..	7*
2. Meerut	21	11
3. Aligarh	11	..
4. Agra	25	8*
5. Mainpuri	..	3
6. Kanpur	28	..
7. Mirzapur	..	3*

(*Incorrectly recorded less in the Housing Table)

For ferrous metals Kanpur is most important, followed by Agra and Meerut. For non-ferrous metals Moradabad, Aligarh, Meerut and Mirzapur occupy a respectable place. The last one has a large aluminium factory.

730 establishments in the State are engaged in the manufacture of weapons, such as daggers, spear-heads, etc. The largest number is located in Basti district (202), followed by Kanpur (91), Faizabad (56), Chamoli (55), Jalaun (40), Fatehpur (37), Banda (37), Jhansi (34), Almora (30), Rampur (27) and Agra (22). For sheet and plate manufacture there are 168 establishments, the chief centres being Faizabad (69), Jaunpur (18), Lucknow (17), Banda (14), and Mathura (12). For making iron and steel furniture there are 402 establishments, important centres being Varanasi (247), Meerut (60) and Jhansi (35).

Brass industry occupies a very important position in the State. The average number of brass and bell metal establishments per district

works out as 48. The following 6 districts possess more than 100 such establishments each:

TABLE 3.48—Districts having more than 100 Brass and Bell Metal Workshops and Factories

District	Brass and Bell Metal W and F	District	Brass and Bell Metal W and F
1. Moradabad	443	4. Azamgarh	212
2. Agra	126	5. Varanasi	134
3. Faizabad	118	6. Mirzapur	281

Moradabad is famous for its special kind of brassware. Next in importance come Mirzapur and Varanasi. Copper and brass artwares of Varanasi enjoy a good name throughout the country. Moradabad is an important centre for aluminium ware also.

For other metal products Moradabad, Kanpur and Lucknow are important.

Galvanising, enamelling, plating, polishing and welding are done chiefly at Moradabad, Aligarh, Agra, Kanpur, Meerut and Lucknow.

Production of sundry hardware is the most extensive industry, rural average per district being 140 and urban 63. It includes numerous blacksmith establishments also. The following districts possess more than 400 rural or 200 urban establishments in sundry hardware:

TABLE 3.49—Districts having more than 400 Rural or 200 Urban Workshops and Factories in Sundry Hardware

District	Rural W and F	Urban W and F
1. Almora	845	..
2. Moradabad	..	355
3. Muzaffarnagar	472	..
4. Meerut	568	..
5. Bulandshahr	..	241
6. Aligarh	..	644
7. Agra	..	251
8. Gonda	649	..

The majority of establishments in Aligarh are engaged in the manufacture of locks for which it is famous.

In Major Group 36, taken as a whole, the average number of rural establishments is 168 per district and of urban 127. The following Table gives the names of 9 districts which have more than 600 rural or more than 300 urban establishments in this Major Group:

TABLE 3.50—Districts having more than 600 Rural or 300 Urban Workshops and Factories in Basic Metals and their Products (except Machinery and Transport Equipment)

District	Rural W and F	Proportion to 1,000	Urban W and F	Proportion to 1,000
1. Almora	887	166	..	..
2. Moradabad	..	..	890	240
3. Meerut	611	78	342	78
4. Aligarh	..	..	700	424
5. Agra	..	..	488	75
6. Kanpur	..	..	400	87
7. Gonda	696	120	..	..
8. Varanasi	..	..	443	53
9. Mirzapur	..	..	317	210

Rural establishments are mostly occupied with the manufacture of sundry hardware, which has been dealt with in the preceding sub-para. The rural areas of Garhwal, Rampur and Pilibhit and the urban areas of Aligarh, Garhwal, Uttar Kashi, Moradabad, Almora, and Mirzapur, in descending order, have more than one-fifth establishments in metal industries. (There are only 4 industrial establishments in Uttar Kashi town, one of which is engaged in sundry hardware.)

66. *Major Group 37—Machinery and Electrical Equipment (other than Transport)*—Heavy machinery is not manufactured in this State. For other machinery some workshops and factories exist in large cities, chiefly Kanpur and Meerut. Some electrical equipment is made at

Kanpur, Meerut, Lucknow and Varanasi. Most of the electrical establishments are engaged in repairs and servicing work. The following 10 districts have more than 25 establishments each in this Major Group :

TABLE 3.51—Districts having more than 25 Workshops and Factories in Industries connected with Machinery and Electrical Equipment (other than Transport)

District	Number of W and F	District	Number of W and F
1. Meerut	102	6. Jhansi	47
2. Agra	27	7. Hardoi	28
3. Kanpur	99	8. Lucknow	145
4. Fatehpur	73	9. Faizabad	59
5. Allahabad	26	10. Varanasi	32

The majority of industrial establishments of this Major Group in Meerut, Kanpur, Lucknow and Varanasi districts are engaged in the manufacture of light machinery, such as agricultural and irrigation implements; while those in Allahabad and Faizabad are making insulated wires and cables. A good proportion of electrical establishments in Fatehpur and Jhansi does re-conditioning and re-charging of electrical batteries. A large number in Fatehpur and Lucknow are for repairs and servicing of radios and microphones.

67. *Major Group 38—Transport Equipment*—The average number of establishments engaged in these industries per district is 67 for the rural and 101 for the urban area. Repairing of bicycles accounts for the largest number, and then comes repairing of motor vehicles. Locomotives, wagons, coaches, tramways and motor cars are not manufactured anywhere in this State. Factories and workshops shown under Minor Groups 380–383 undertake repairs and assembly only. Some factories of the Minor Group 384—repairing and servicing of motor vehicles—appear to have been included in the Minor Group 383 due to misclassification. For bicycle manufacture there are 15 factories.

The average number of establishments per district for repairs and servicing of motor vehicles is 20. The following 15 districts have more than 20 motor vehicle repairs and servicing workshops each :

TABLE 3.52—Districts having more than 20 Workshops and Factories for Repairs and Servicing of Motor Vehicles

District	Number of W and F	District	Number of W and F
1. Dehra Dun	20	9. Banda	75
2. Muzaffarnagar	27	10. Sitapur	21
3. Meerut	21	11. Lucknow	53
4. Mathura	22	12. Faizabad	181
5. Agra	28	13. Gorakhpur	76
6. Kanpur	103	14. Jaunpur	57
7. Fatehpur	58	15. Varanasi	50
8. Allahabad	62		

There are numerous establishments for bicycle repairs both in rural and urban areas, the average per district for rural and urban being 60 and 76 respectively. The following districts have more than 150 rural or 200 urban bicycle repairing establishments :

TABLE 3.53—Districts having more than 150 Rural or 200 Urban Workshops and Factories for Bicycle Repairs

District	Rural W and F	Urban W and F
1. Meerut	150	249
2. Agra	..	367
3. Kanpur	..	256
4. Allahabad	..	285
5. Lucknow	..	355
6. Faizabad	154	..
7. Sultanpur	175	..
8. Azamgarh	317	204

Manufacture of other transport equipment such as animal-drawn and hand-drawn vehicles is carried on mostly in Agra, Fatehpur, Kanpur, Meerut, Etawah, Saharanpur, Kheri and Lucknow districts. Except in Fatehpur and Kheri this is chiefly an urban industry.

In the urban areas of Basti, Ballia, Gorakhpur, Allahabad, Rampur, Unnao, Muzaffarnagar, Pratapgarh and Mainpuri more than one-tenth establishments are occupied with the manufacture and repairs of transport equipment of all kinds, most of them in bicycle repairs.

68. *Major Group 39—Miscellaneous Manufacturing Industries*—The remaining industries are covered by this Major Group. The average number of establishments in this Major Group per district is 332 for the rural, and 196 for the urban areas. The following districts have more than 600 miscellaneous industrial establishments in the rural area or more than 300 in the urban :

TABLE 3.54—Districts having more than 600 Rural or 300 Urban Workshops and Factories in Miscellaneous Manufacturing Industries

District	Rural W and F	Urban W and F
1. Meerut	..	536
2. Mathura	..	378
3. Agra	..	483
4. Etah	..	358
5. Kanpur	..	450
6. Allahabad	..	454
7. Jhansi	644	320
8. Lucknow	..	496
9. Gonda	..	337
10. Bara Banki	638	..
11. Faizabad	1,386	486
12. Sultanpur	1,005	..
13. Basti	1,657	..
14. Azamgarh	1,186	1,858
15. Jaunpur	745	..
16. Varanasi	..	385
17. Mirzapur	1,339	..

Manufacture of jewellery and ornaments accounts for the highest proportion of establishments in this Major Group in the rural area of Bara Banki district and the urban areas of Meerut, Mathura, Agra, Kanpur, Allahabad, Jhansi,

Lucknow and Gonda districts.

The urban areas of Azamgarh, Gonda, Jaunpur, Jalaun, Bahraich, Sultanpur, Rae Bareilly, Basti and Ballia, and the rural areas of Mirzapur, Hamirpur and Lucknow, taken in order, have more than one-fifth of the total number of establishments in miscellaneous manufacturing industries. In the urban areas of Gonda, Bahraich and Basti the highest proportion within the Major Group is in jewellery, and in the remaining urban and rural areas, covered by the above list, in unclassified miscellaneous industries.

Relationship between Industry and Power

69. Subsidiary Table E-III.3 gives the distribution of 1,000 workshops and factories in each Division, each Major Group and selected Minor Groups, by kind of fuel or power used, for the rural and urban areas of all districts and for towns of 50,000 and above population. In the rural areas most of the establishments are run on other power or no power. Only a minority are worked by power or fuel. Large factories engaged in the manufacture of sugar, cotton textiles and cement, however, depend on electrically driven machines to a large extent. Sometimes both electricity and coal are used in the same factory. Liquid fuel is used in a considerable proportion in flour, rice and dal mills and sugar mills. Solid fuel, such as coal, wood or bagasse, is used in all metal industries and in the manufacture of sugar, confectionery, jute textiles, bricks, lime and miscellaneous articles. Important rural industries in which more than one-fifth establishments are worked by power or fuel are given in the following Table :

TABLE 3.55—Rural Industries having more than one-fifth Workshops and Factories worked by Power or Fuel

Industry	Proportion to 1,000		
	Electricity	Liquid Fuel	Solid Fuel
1. Rice, Flour and Dal	..	350	..
2. Sugar in mills	616	215	..
3. Confectionery	..	..	231
4. Cotton Textiles in mills	322	..	..

Industry	Proportion to 1,000		
	Electricity	Liquid Fuel	Solid Fuel
5. Jute Textiles			300
6. Bricks			430
7. Lime			313
8. Basic Metals and their Products			593
9. Miscellaneous			288

In the urban areas industrial establishments depend on power or fuel to a much larger extent. More than one-fifth establishments engaged in the production of rice, flour and *dal*, mill sugar, *khandsari*, beverages, cigarettes, cotton textiles (mill), cotton textiles (powerloom), paper, printed material, matches, and machinery use electricity. A little over one-fifth of the rice, flour and *dal* mills also use liquid fuel. Industries using solid fuel in more than one-fifth establishments are confectionery making, wool spinning, brick and lime burning, glass bangle making, manufacture of basic metals and their products and miscellaneous goods. Important urban industries in which more than one-fifth establishments are worked by power or fuel are given in the following Table:

TABLE 3.56—Urban Industries having more than one-fifth Workshops and Factories worked by Power or Fuel

Industry	Proportion to 1,000		
	Electricity	Liquid Fuel	Solid Fuel
1. Rice, Flour and <i>Dal</i>	576	222	..
2. Sugar in Mills	790	..	..
3. <i>Khandsari</i>	319	..	..
4. Confectionery	..	..	448
5. Cotton Textiles in Mills	688	..	..
6. Wool spinning	..	..	428
7. Paper	246	..	..
8. Printing	310	..	..
9. Matches	1 000	..	..

Industry	Proportion to 1,000		
	Electricity	Liquid Fuel	Solid Fuel
10. Bricks	..	..	256
11. Lime	..	..	452
12. Glass Bangles	..	..	397
13. Basic Metals and their Products	..	..	421
14. Machinery	474	..	..
15. Miscellaneous	..	..	273

It is obvious that among the various kinds of fuel and power, electricity is playing a dominant role.

Workshops and Factories in Cities and Towns having 50,000 Population and above

70. So far the discussion has been confined to the rural and urban portions of districts without specific reference to large towns. Large towns will now be studied separately as they possess special characteristics of their own. Varanasi has the largest number of industrial establishments and Pilibhit the smallest, the figures being 8,124 and 31, respectively. The number of towns in the various ranges, according to the number of industrial establishments, is given in the following Table:

TABLE 3.57—Distribution of Class I and II Towns by number of Workshops and Factories

Range	Number of	
	Cities	Towns
Below 250	1	5
250—499	1	5
500—999	3	5
1,000—1,999	6	3
2,000—3,999	2	..
4,000 and Above	4	..

The largest number of cities and towns lies in the range 1,000—1,999. Cities and towns in the lowest range, in descending order, are Muzaffar-

nagar, Meerut Cantt., Ghaziabad, Dehra Dun, Hardwar and Pilibhit. The 4 cities in the highest range are Varanasi, Kanpur M. C., Agra and Lucknow, and the 2 cities in the next range are Allahabad and Meerut M. B.

71. As cities and large towns are generally more industrialised than other urban areas, the proportion of workshops and factories run on electricity, liquid and solid fuels is also higher in their case. The following Table gives the distribution of cities and towns according to the number of workshops and factories worked by power or fuel:

TABLE 3.58—Distribution of Class I and II Towns by number of Workshops and Factories worked by Electricity, Liquid Fuel and Solid Fuel

Range	Number of	
	Cities	Towns
Below 250	6	16
250—499	4	2
500—999	4	..
1,000—1,499	1	..
1,500—1,999	1	..
2,000 and Above	1	..

The largest number of cities and towns is in the lowest range. Lucknow alone is in the highest range, and Agra and Kanpur M. C. in the next two ranges. Varanasi, which possesses the largest number of industrial establishments, has only 899 establishments worked by power or fuel which comes to less than one-ninth of the total number. The proportion of industrial establishments worked by fuel or power for Lucknow, Agra and Kanpur M. C. is 511, 345 and 330, respectively. In Rampur, Bareilly, Dehra Dun, Meerut M. B., Mathura, Kanpur M. C., Allahabad, Gorakhpur and Varanasi cities and Sambhal, Amroha, Pilibhit, Hardwar, Muzaffarnagar, Ghaziabad, Hapur, Hathras, Kanpur Cantt., Sitapur and Faizabad towns the highest proportion of establishments run on power or fuel is worked by electricity; in Budaun and Meerut Cantt., by liquid fuel; and in Moradabad, Shahjahanpur, Saharanpur,

Aligarh, Agra, Jhansi, Lucknow and Mirzapur cities and Firozabad, Farrukhabad, Etawah, Bahraich and Jaunpur towns by solid fuel. Industry in cities and large towns is depending more on electricity, less on solid fuel and least on liquid fuel.

72. The dominant working group for the urban areas generally is 2—5, but even in some cities and Class II towns one-worker establishments are most common. Such cities are Allahabad, Jhansi and Gorakhpur and towns Sambhal, Amroha, Budaun, Pilibhit, Hardwar, Ghaziabad, Hathras, Sitapur and Jaunpur. In Allahabad, Jhansi, Sambhal, Pilibhit, Hardwar and Jaunpur the proportion of one-worker establishments is more than half. Establishments in the working group 6—9 exceed 200 in Varanasi, Agra, Kanpur M. C., Lucknow, Moradabad and Allahabad; while those in the working group 10—19 exceed 100 in Agra, Varanasi, Lucknow, Kanpur M. C., and Firozabad and those in the working group 20—49 exceed 75 in Kanpur M. C., Agra, Aligarh and Firozabad. Combining the next two higher groups into 50 and above, the distribution of cities and towns, according to the number of establishments in this new working group, is as follows:

TABLE 3.59—Distribution of Class I and II Towns by number of Workshops and Factories in the Working Group 50 and Above

Range	Number of	
	Cities	Towns
0	1	6
1—9	6	10
10—19	3	1
20—39	5	..
40—59	1	..
60 and Above	1	1

The largest number of cities and towns lies in the range 1—9 for establishments employing 50 or more workers. Firozabad has 78, followed by Kanpur M. C. 73. Taking Kanpur M. C. and Cantt., together, the number is 78. In very large sizes of employment, however, Kanpur is easily at the top, the only 3 establishments employing 5,000 workers or above being located there.

73. Distribution of industrial establishments by minor groups of industry reveals that Dehra Dun, Bareilly and Hardwar have the highest proportion of establishments in rice, flour and *dal* milling; Pilibhit in bakery; Lucknow, Jhansi, Mathura and Ghaziabad in confectionery; Meerut M. B. in hand-spinning; Hathras in cotton dyeing and bleaching; Gorakhpur, Faizabad and Etawah in cotton handlooms; Varanasi in silk handlooms; Kanpur Cantt. in carpet and *dari* making; Kanpur M. C., Allahabad, Meerut Cantt., Shahjahanpur and Farrukhabad in making and tailoring textile garments; Amroha and Sambhal in wood, wooden and horn products; Agra in boots and shoes; Firozabad in glass bangles; Moradabad and Mirzapur in brassware; Saharanpur, Aligarh, Rampur and Hapur in sundry hardware (chief industry of Aligarh being lock making); Muzaffarnagar and Sitapur in cycle repairs; Budaun and Bahraich in jewelry and Jaunpur in miscellaneous manufactures.

74. It will also be useful to examine where the largest number of establishments in various important branches of industry are located. Largest numbers of establishments in the production of rice, flour and *dal*, dairy products, edible oils, chewing tobacco, cotton woollen and jute textiles (mill products), *daris*, leather tanning, chemicals, pharma preparations and

cosmetics, basic metals (ferrous), machinery, machine tools, motor vehicle repairs, cycles and miscellaneous manufacture exist at Kanpur. Largest numbers in confectionery, cotton ginning, preparation and tailoring of textile garments, making of earthenware and pottery and manufacture and repairs of electrical goods exist at Lucknow. Cotton spinning (other than in mills) and soap manufacturing establishments are most numerous at Meerut. *Bidi* making, printing and jewellery are extensively done at Allahabad silk and cotton textiles (on handlooms) and steel furniture at Varanasi; brassware and chinaware at Moradabad and lock manufacturing at Aligarh. The largest number of sugar mills is at Rampur and of *khandsari* plants at Bareilly. Cigarette manufacturing is done at Saharanpur. Printed cotton-textile establishments are most numerous at Farrukhabad, of wooden and horn products at Sambhal, of leather footwear at Agra and of glass bangles at Firozabad.

75. An attempt has been made in this short compass to give a bird's-eye view of the small and big workshops and factories occupied in various kinds of manufacture. This attempt is the first of its kind, and naturally suffers from serious drawbacks, but it is hoped that in spite of its shortcomings it will have some utility and will pave the way for better attempts in the future.

CHAPTER IV

MATERIALS OF WALLS AND ROOFS

(Housing Table E-IV and Subsidiary Tables)

Housing Table E-IV gives the number of households living in Census houses used wholly or partly as dwellings, classified by the material of walls and roofs. Like Table E-II, this Table has been prepared for sample households, and gives data for the rural and urban areas of each district and tahsil, and for every town with a population of 50,000 and over.

2. This Table was prepared with reference to entries in Column 9 (material of wall) and Column 10 (material of roof) of the House-list. The material of wall has been classified into the following 9 categories:

- (1) grass, leaf, reed or bamboo;
- (2) timber;
- (3) mud;
- (4) unburnt brick;
- (5) burnt brick;
- (6) C.I. sheet or other metal sheet;
- (7) stone;
- (8) cement concrete; and
- (9) all other material

The material of roof has been classified into the following 7 categories:

- (1) grass, leaf, reed, thatch, wood or bamboo;
- (2) tile, slate or shingle;
- (3) corrugated iron, zinc or other metal sheet;
- (4) asbestos cement sheet;
- (5) brick-and-lime;
- (6) concrete and cement slab; and
- (7) all other material

Two Subsidiary Tables have been prepared from this Table. Subsidiary Table E-IV.1 gives the distribution of 1,000 households living in Census houses used wholly or partly as dwellings, by wall material of the Census house. Subsidiary Table E-IV.2 gives the distribution of the same by roof material. Photographs and line-drawings showing the types of walls and roofs are given in the Chapter on Settlement Pattern.

A. Material of Wall

3. The following Table gives the distribution of 1,000 rural and 1,000 urban households living in Census houses, used wholly or partly as dwellings, by wall material for all States and adjoining Union Territories. The more important wall materials are given in Part I of the Table and the less important in Part II.

TABLE 4.1—Distribution of 1,000 Rural and 1,000 Urban Households in States and certain Union Territories, by Wall Material of the Census Houses occupied

		PART I				
States		Grass, leaf, reed or bamboo	Mud	Unburnt brick	Burnt brick	Stone

	U	20	2	49	18
	R	14	1	1	1
	U	7	8	17	0

Mud

4. The above Table reveals that mud is the predominant wall material for the rural areas of most of the States. In Assam the predominant wall material is grass, leaf, reed or bamboo; in Jammu and Kashmir and Himachal Pradesh, both of which are hilly, it is stone; while in the Punjab and Delhi it is unburnt brick and burnt brick respectively.

For the urban areas burnt brick is the predominant wall material in Delhi and most of the States. In Assam it is again grass, leaf, reed or bamboo. In Andhra Pradesh, Mysore and Orissa it is mud and in Kerala, Rajasthan and Himachal Pradesh, stone.

5. In the rural areas of Uttar Pradesh mud (744), unburnt brick (100), burnt brick (92) and stone (41) are the chief wall materials; and in the urban areas burnt brick (713), mud (214), unburnt brick (41) and stone (19). As the rural and urban patterns differ very widely, it will be better to treat them separately.

Wall Material in Rural Areas

6. Map No. IV/A shows the preponderant wall material in the rural area of each tahsil of the State. In all tahsils of Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal and Almora districts, tahsil Naini Tal of Naini Tal district and tahsil Chakrata of Dehra Dun district stone is the chief wall material. All these tahsils are in the Himalayan hills. The remaining tahsils of Naini Tal and Dehra Dun (except Mussoorie) are in the plain, which explains why stone is not the most important material there. In all tahsils of Muzaffarnagar; Baghpat, Ghaziabad and Mawana of Meerut; Sikandrabad, Bulandshahr and Khurja of Bulandshahr; Khair, Iglas, Hathras and Sikandra Rao of Aligarh; Sadabad of Mathura; all tahsils of Etah; Mainpuri and Bhongaon of Mainpuri unburnt brick is the chief wall material. All these tahsils are situated in the western Uttar Pradesh. The only tahsil in which grass, leaf, reed or bamboo is the chief wall material is Bhabar (Haldwani) of Naini Tal district. Everywhere else, mud is the predominant wall material for rural dwellings.

7. As already stated above, mud is the most important wall material for the rural areas. The following Table gives the proportion of mud-wall dwellings per 1,000 dwellings:

TABLE 4.2—Distribution of Districts by Proportion of Mud-Wall Dwellings (Rural)

Range	Number of Districts
0—199	6
200—499	9
500—699	5
700—799	5
800—899	15
900 and Above	14

Range 800—899 accounts for the largest number of districts. The lowest range comprises Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal and Almora districts. The districts in the next lowest range of 200—499 are Naini Tal, Dehra Dun, Muzaffarnagar, Meerut, Bulandshahr, Aligarh, Mathura, Etah and Mainpuri. In the 7 districts of Uttarakhand and Kumaon Divisions the chief material is stone; and in Muzaffarnagar, Meerut, Bulandshahr, Aligarh and Etah districts, unburnt brick. The districts in the highest range are Rampur, Shahjahanpur, Allahabad, Banda, Sitapur, Rae Bareilly, Bara Banki, Faizabad, Sultanpur, Pratapgarh, Azamgarh, Jaunpur, Ghazipur and Varanasi, all situated in the eastern and central plains. Of these, Pratapgarh (981) is at the top followed by Sultanpur (978) and Jaunpur (970).

8. The distribution of tahsils by the proportion of mud-wall houses is given in the following Table:

TABLE 4.3—Distribution of Tahsils by Proportion of Mud-Wall Dwellings (Rural).

Range	Number of Tahsils	Range	Number of Tahsils
0—49	23	500—699	29
50—299	9	700—899	81
300—499	21	900 and Above	68

It will be seen from the above table that the largest number of tahsils lies in the second

highest range of 700-899. All the 22 tahsils situated in the Himalayan hills, mentioned in para 6, where stone is used as wall material, and tahsil Budhana of district Muzaffarnagar where unburnt brick is the chief material are comprised in the lowest range of 0-49. Of the 68 tahsils in the highest range tahsil Machhlishahr (987) of Jaunpur and tahsil Kunda (987) of Pratapgarh are at the top, followed by tahsil Amethi (985) of Sultanpur.

9. Map No. IV/B shows the proportion of mud-wall dwellings in the rural area (by tahsils).

Unburnt Brick

10. The proportion of dwellings having walls of unburnt-brick to 1,000 dwellings in the rural areas of the State is 100. The following Table gives the distribution of districts by the proportion of unburnt-brick-wall dwellings:

TABLE 4.4—Distribution of Districts by Proportion of Unburnt-Brick-Wall Dwellings (Rural)

Range	Number of Districts	Range	Number of Districts
0-9	27	300-499	5
10-99	13	500 and Above	3
100-299	6		

The lowest range has the largest number of districts. The three districts in the highest range are Muzaffarnagar (550), Aligarh (516) and Etah (584) and the five in the next are Meerut (400), Bulandshahr (440), Mathura (344), Mainpuri (404) and Farrukhabad (313). All these 8 districts are situated in the western U. P., mostly in Meerut and Agra Divisions.

11. Taking up tahsils as units, their distribution by the proportion of such dwellings is as follows:

TABLE 4.5—Distribution of Tahsils by Proportion of Unburnt-Brick-Wall Dwellings (Rural)

Range	Number of Tahsils	Range	Number of Tahsils
0-9	113	300-499	21
10-99	54	500-699	9
100-299	31	700 and Above	3

The lowest range has the largest number of tahsils. The 3 tahsils in the highest range are

Budhana (751) of Muzaffarnagar; Hathras (733) of Aligarh and Etah (753) of Etah district. The 9 tahsils in the next range are Kairana (510) and Muzaffarnagar (532) of Muzaffarnagar; Mawana (568) of Meerut; Sikandarabad (550) of Bulandshahr; Iglas (503) and Sikandara Rao (657) of Aligarh; Jalesar (556) and Aliganj (519) of Etah; and Mainpuri (652) of Mainpuri district, all situated in the western U. P. where the use of unburnt bricks is popular.

Burnt Brick

12. The average proportion of dwellings having burnt brick as wall material to 1,000 dwellings is 92 for the rural areas. The following Table gives the distribution of districts by the proportion of burnt-brick-wall dwellings:

TABLE 4.6—Distribution of Districts by Proportion of Burnt-Brick-Wall Dwellings (Rural)

Range	Number of Districts	Range	Number of Districts
0-39	15	120-159	12
40-79	10	160-199	2
80-119	12	200 and Above	3

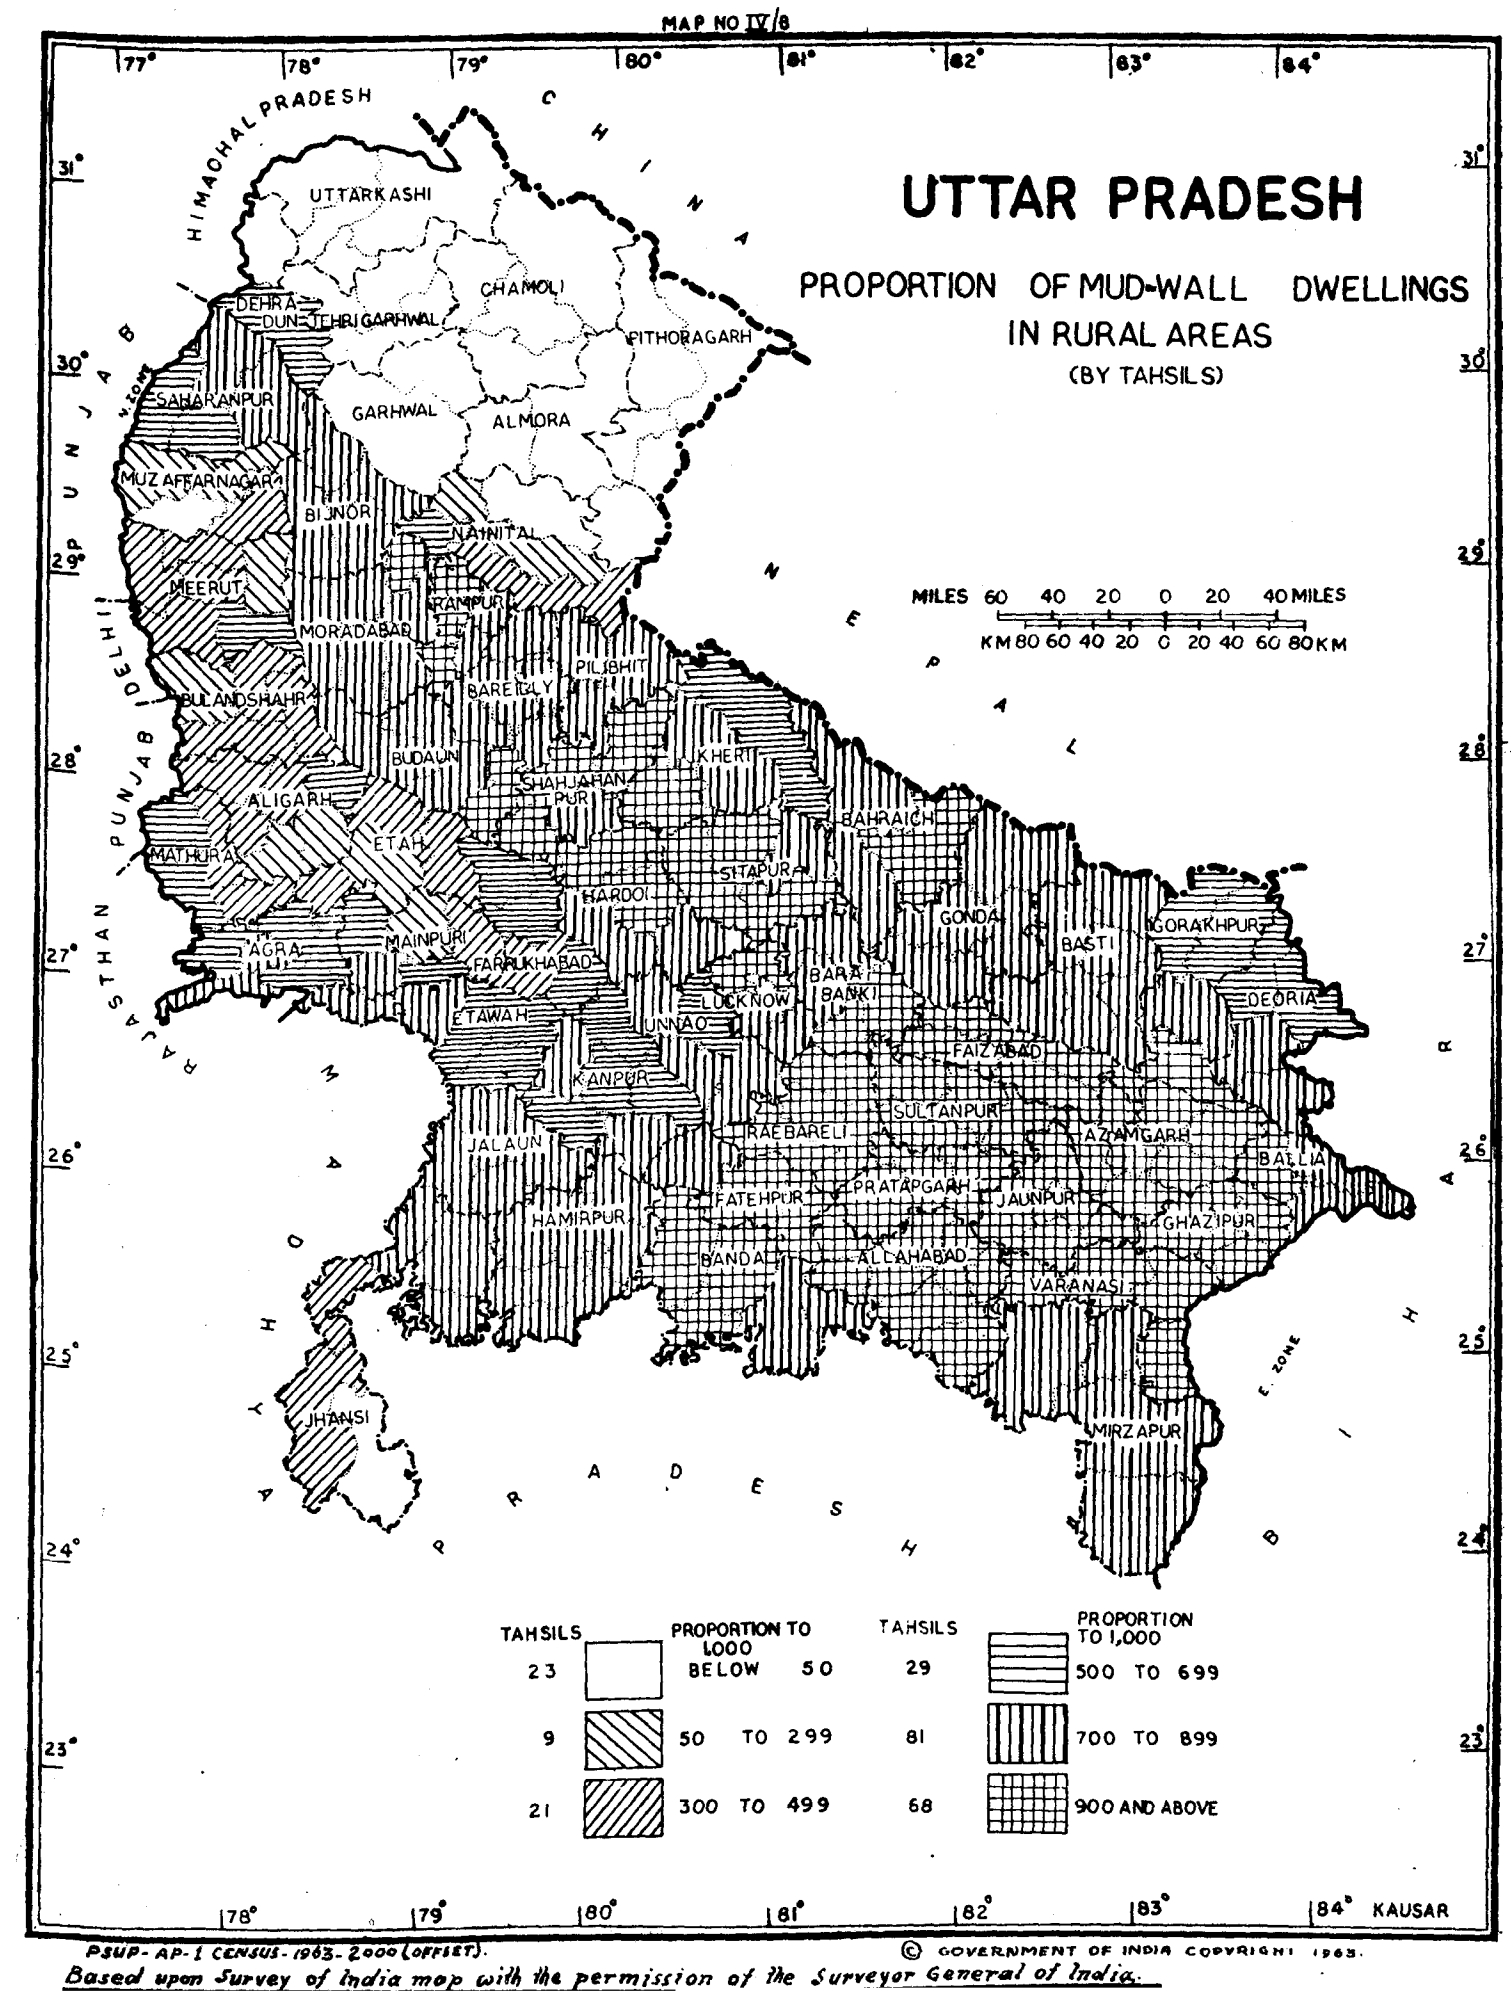

The largest number of districts is in the lowest range of 0-39. Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, and Almora districts of the Himalayan hills each have a proportion of less than 15. The 3 districts in the highest range are Meerut (206), Jhansi (247) and Gorakhpur (200).

13. Tahsilwise study gives the distribution of tahsils as follows:

TABLE 4.7—Distribution of Tahsils by Proportion of Burnt-Brick-Wall Dwellings (Rural)

Range	Number of Tahsils	Range	Number of Tahsils
0-19	36	100-199	73
20-49	47	200-299	14
50-99	59	300 and Above	2

The largest number of tahsils is in the range 100-199. The number of tahsils in the lowest range 0-19 is also quite high. The 2 tahsils in the highest range are Jhansi (358) and Lalitpur (418), both in Jhansi district. The tahsils in

the next range are Kashipur and Kichha of Naini Tal; Baheri of Bareilly; Budhana of Muzaffarnagar; Baghpat and Ghaziabad of Meerut; Chhata and Mathura of Mathura; Firozabad of Agra; Mahroni of Jhansi; Utraula of Gonda; and Pharenda, Maharajganj and Gorakhpur of Gorakhpur district. The use of burnt-brick as building material depends on many factors—economic, availability of suitable fuel for firing bricks, and personal preference. The presence of burnt-brick houses in the rural area is, undoubtedly, a sign of prosperity in the locality concerned. A large number of tahsils, however, has a very small proportion of such dwellings. 120 tahsils in the plain do not possess even ten per cent houses having burnt-brick walls.

Stone

14. Stone is almost an exclusive wall material in the Himalayan hills. In other places the proportion is either small or negligible. The following Table gives the distribution of districts by the proportion of stone-wall dwellings:

TABLE 4.8—Distribution of Districts by Proportion of Stone-Wall Dwellings (Rural)

Range	Number of Districts	Range	Number of Districts
Negligible	37	300—399	2
1—9	5	400—899	—
10—49	4	900 and Above	6
50—299	..		

The districts in the highest range are Uttar Kashi (983), Chamoli (997), Pithoragarh (995), Tehri Garhwal (985), Garhwal (967) and Almora (993). The 2 districts in the range 300—399 are Naini Tal (316) and Dehra Dun (366) which are partly hilly. The hilly tahsils of these districts are Naini Tal and Chakrata, and the proportion of stone-wall houses in them is 977 and 889, respectively. The Mussoorie area of tahsil Dehra Dun is also hilly and, therefore, the proportion for this tahsil is also quite high viz., 220. The 4 districts in the range 10—49 are Agra (35), Jhansi (23), Hamirpur (17) and Banda (24). Tahsils which have a considerable proportion of stone walls in these districts are Kiraoli (132) and Kheragarh (116)

of Agra; Mauranipur (23), Jhansi (32) and Lalitpur (58) of Jhansi; Mahoba (54) of Hamirpur; and Karwi (73) and Mau (35) of Banda districts. All these areas are situated in the southern hills and plateaus of the State, extending from the west to the east. The 5 districts in the range 1—9 are Budaun (1), Allahabad (2), Jalaun (4), Deoria (1) and Mirzapur (7).

Grass, Leaf, Reed or Bamboo

15. The average proportion of dwellings having walls of grass, leaf, reed or bamboo to 1,000 dwellings for the rural areas of the State is 18. The following Table gives the distribution of districts by the proportion of such dwellings:

TABLE 4.9—Distribution of Districts by Proportion of Grass, Leaf, Reed or Bamboo Wall Dwellings (Rural)

Range	Number of Districts
0—9	37
10—49	13
50 and Above	4

From the above Table it is evident that the largest number of districts is in the lowest range 0—9. Names of districts in the highest range are Naini Tal (218), Kheri (123), Bahraich (92) and Deoria (91). All of these are Sub-Himalayan.

16. Names of tahsils having a proportion of 50 and above are given in the following Table:

TABLE 4.10—Tahsils having 50 or more Dwellings with Walls of Grass, Leaf, Reed or Bamboo per 1,000 Dwellings (Rural)

(District) Tahsil	Proportion to 1,000	(District) Tahsil	Proportion to 1,000
(Naini Tal)		(Sitapur)	
1. Bhabar (Haldwani)	403	8. Biswan	84
2. Kashipur	120	(Bahraich)	
3. Kichha (Bareilly)	301	9. Nanpara	146
4. Bareilly (Pilibhit)	63	10. Kaisarganj (Gonda)	110
5. Puranpur (Kheri)	66	11. Tarabganj (Deoria)	106
6. Nighasan	276	12. Hata	129
7. Lakhimpur	77	13. Padrauna (Mirzapur)	207
		14. Dudhi	55

The above mentioned tahsils are situated either in the Sub-Himalayan region or in the Vindhyan plateau where grass, leaves, reeds and bamboo are plentiful. These materials are cheap, and are used by the poorest sections of the population for building purposes.

Timber, Cement Concrete, C. I. and other Metal Sheets, and all other Material

17. Remaining wall materials, viz. timber, cement concrete, C. I. and other metal sheets, and all other material either are not used at all, or are used in negligible proportion in all the districts of the State. A detailed discussion on these materials is, therefore, not necessary. It will be sufficient to give names of tahsils where these materials are used in the proportion of 10 or more to 1,000.

TABLE 4.11—Tahsils having 10 or more Dwellings per 1,000 Dwellings with Walls of Timber and other Material (Rural)

(District) Tahsil	Proportion to 1,000	
	Timber	Other Material
(Uttar Kashi)		
1. Puraula	20	...
(Naini Tal)		
2. Bhabar (Haldwani)	14	...
3. Kichha	...	99
(Dehra Dun)		
4. Chakrata	29	..
(Farrukhabad)		
5. Kaimganj	..	12
6. Chhibramau	..	10
7. Kannauj	..	19
(Kanpur)		
8. Bilhaur	11	..
9. Akbarpur	..	12
10. Ghatampur	..	17
(Allahabad)		
11. Meja	13	..
(Jhansi)		
12. Lalitpur	20	..
13. Mahroni (Gonda)	10	19
14. Tarabganj	13	..
(Basti)		
15. Harraiya	10	10

(District) Tahsil	Proportion to 1,000	
	Timber	Others Material
(Gorakhpur)		
16. Maharajganj	21	..
(Deoria)		
17. Padrauna	31	92
18. Salempur	..	10
(Ballia)		
19. Bansdih	..	11
20. Ballia	21	..
(Varanasi)		
21. Chakia	10	..
(Mirzapur)		
22. Mirzapur	23	..
23. Robertsganj	75	..
24. Dudhi	123	28

18. The above Table shows that timber walls exist in considerable proportion only in tahsils Robertsganj and Dudhi of Mirzapur district in the Vindhyan Plateau. There is no tahsil where the proportion of dwellings having walls of cement concrete or C. I. or other metal sheets exceeds 10 to 1,000.

Wall Material in Urban Areas

19. Materials for building walls in the urban areas, in descending order of importance, are burnt brick (713), mud (214), unburnt brick (41), stone (19), grass, leaf, reed or bamboo (6), cement concrete (3), timber (2), C. I. or other metal sheets (1) and all other material (1) for the State as a whole. There is no urban area in Chamoli and Pithoragarh districts. Taking the State, district by district, the chief wall material in Uttar Kashi, Tehri Garhwal, Garhwal, Almora and Naini Tal districts of Himalayan hills is stone. In Jalaun, Hamirpur, Banda and Mirzapur districts of Vindhyan hills and plateau and in Ghazipur district of the east plain it is mud. Elsewhere, in the remaining 42 districts it is burnt brick.

Burnt Brick

20. Burnt brick is by far the most important wall material in the urban areas. The following Table gives the distribution of districts by

the proportion of burnt-brick-wall dwellings in the urban areas :

TABLE 4.12—Distribution of Districts by Proportion of Burnt-Brick-Wall Dwellings (Urban)

Range	Number of Districts	Range	Number of Districts
0—99	3	700—799	17
100—499	10	800 and Above	6
500—699	16		..

The three districts in the lowest range are Uttar Kashi, Tehri Garhwal and Almora. The 10 districts in the range 100—499 are Garhwal (209), Naini Tal (387), Jalaun (316), Hamirpur (188), Banda (307), Hardoi (482), Bahraich (493), Azamgarh (490), Ghazipur (437) and Mirzapur (324). The 6 districts in the highest range are Bareilly (891), Aligarh (855), Mathura (830), Agra (850), Kanpur (873) and Lucknow (864). All of these districts have Class I cities, and 3 of them KAVAI cities.

Mud

21. Mud is the next important wall material in the urban areas. Districts which have a predominance of mud-walls are Jalaun, Hamirpur, Banda, Ghazipur and Mirzapur. The following Table gives the distribution of districts by the proportion of mud-wall dwellings in urban areas :

TABLE 4.13—Distribution of Districts by Proportion of Mud-Wall Dwellings (Urban)

Range	Number of Districts	Range	Number of Districts
0—99	9	400—499	7
100—199	10	500—599	1
200—299	13	600 and Above	3
300—399	9		

The districts in the lowest range are Uttar Kashi, Tehri Garhwal, Garhwal, Almora and Naini Tal of Himalayan hills and Bareilly, Muzaffarnagar, Aligarh and Kanpur of the plains. The districts in the highest range are Hamirpur (765),

Banda (657) and Jalaun (640), and the district in the next range is Ghazipur (539). More than half of the dwellings in the towns of these four districts have mud-walls.

22. There are 40 tahsils, more than half of the urban dwellings of which have mud-walls. Names of tahsils in which more than three-fourths urban dwellings have mud-walls are given in the following Table :

TABLE 4.14—Tahsils having more than $\frac{3}{4}$ th Mud-Wall Dwellings (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Rampur)		
1. Suar	947	Tanda T. A.
(Allahabad)		
2. Phulpur	853	Phulpur T. A.
(Jalaun)		
3. Jalaun	844	Jalaun M. B.
(Hamirpur)		
4. Hamirpur	798	Hamirpur M. B.
5. Charkhari	792	Charkhari M. B.
6. Mahoba	763	Mahoba M. B.
(Sitapur)		
7. Sidhauri	772	Mahmudabad T. A.
(Azamgarh)		
8. Ghosi	768	Kopaganj T. A.
(Varanasi)		
9. Bhadohi	765	Bhadohi M. B. and Gopiganj T. A.

The towns mentioned in column 3 have a very small proportion of brick-built houses, most of the dwellings having walls made of mud. The largest number of such towns is in Hamirpur district. One of these towns, namely, Tanda (Rampur) is in the western U. P., and all others are in the southern or eastern U. P.

Unburnt Brick

23. This is of no great importance in urban areas generally. There are only six districts which have more than one-tenth urban dwellings having walls made of unburnt brick. Their names are Bijnor (183), Budaun (137), Muzaffarnagar (154), Meerut (100), Mainpuri (131) and Farrukhabad (169). Names of tahsils which have more than one-fifth such dwellings in their urban areas, are given in the following Table :

urban areas, are given in the following Table :

TABLE 4.15—*Tahsils having more than one-fifth Unburnt-Brick-Wall Dwellings (Urban)*

(District) Tahsil	Proportion to 1,000	Name of Towns
(Bijnor) 1. Bijnor	315	Bijnor M. B. Chandpur M. B. and Mandawar T.A.
(Moradabad) 2. Sambhal	426	Sambhal M.B. and Bahjoi T.A.
(Budaun) 3. B. Jaun	203	Budaun M.B. and Ujhani M.B.
(Muzaffarnagar) 4. Budhana	255	Kandhla N.A.
(Meerut) 5. Mawana	368	Mawana M.B. and, Shahjahanpur
(Mainpuri) 6. Bhongaon	451	Bhongaon T.A.
(Farrukhabad) 7. Chhibramau	465	Chhibramau T.A.
(Mirzapur) 8. Dudhi	201	Pipri N.A.

All these towns are in the western U. P., with the exception of Pipri in Mirzapur district, where large-scale construction work on the Rihand Dam was in progress.

Stone

24. In all urban areas of hill districts of Uttar Kashi, Tehri Garhwal, Garhwal and Almora; and in Haldwani-cum-Kathgodam M. B., Ramnagar M. B., Naini Tal M. B. and Bhowali N. A. of district Naini Tal; Chakrata Cantt., Mussoorie M. B. and Landour Cantt. of district Dehra Dun stone is the almost exclusive wall material on account of being the most easily available.

25. Apart from the above mentioned Himalayan districts, only Mirzapur (46) has a sizable proportion of stone-wall houses. Coming to smaller units, the following tahsils have more

than one-tenth stone-wall dwellings in their urban areas :

TABLE 4.16—*Tahsils (other than those in Himalayan Hills) having more than one-tenth Stone-Wall Dwellings (Urban)*

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Agra) 1. Kiraoli	989	Fatehpur Sikri M. B. and Achhnera T. A.
(Mirzapur) 2. Chunar	120	Chunar M. B. and Ahraura N. A.

Fatehpur Sikri in Agra district has the highest proportion of stone-wall dwellings for historical reasons. This town was founded by the Mughal Emperor, Akbar the Great, in the 16th century, and it served as his capital for some time. Chunar in the Vindhyan plateau also has a considerable proportion of stone dwellings. It is famous for its stone. Both these towns are old and have a place in history.

Cement Concrete

26. Only Kanpur Municipal Corporation (14) only has any appreciable proportion of cement concrete dwellings.

Grass, Leaf, Reed or Bamboo

27. These are not important materials for cities and towns. The urban areas of the following tahsils only have more than one-tenth dwellings possessing such walls :

TABLE 4.17—*Tahsils having more than one-tenth Grass, Leaf, Reed or Bamboo Wall Dwellings (Urban)*

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Garhwal) 1. Lansdowne	114	Kotdwara M. B., Dogadda N. A. and Lansdowne Cantt.
(Naini Tal) 2. Haldwani	154	Haldwani-cum-Kathgodam M. B. and Ramnagar M. B.
3. Kichha	313	Rudrapur N.A.
(Deoria) 4. Padrauna	132	Padrauna M. B.

All these towns except Lansdowne Cantt. are situated in the Sub-Himalayan region. The poorer sections of the population, including temporary labour, live in huts made of such material.

Timber, C. I. Sheets, Other Material

28. Timber is of importance only in Dudhi tahsil of Mirzapur district. Pipri N. A. (317) is the only town in this tahsil where the proportion of such dwellings is considerable. On account of large-scale construction in connexion with the Rihand Dam numerous temporary structures were in existence at the time of house-listing.

29. For the same reason, the proportion of C. I. sheet dwellings also is the highest in Pipri (106). Next come Chakrata Cantt. (25) and Rudrapur N. A. (24) in Dehra Dun and Naini Tal districts, both of which have got an appreciable number of temporary structures.

30. Little need be said about 'all other material. The only two towns worth any mention are Rasra N. A. (72) in Ballia district and Barhalganj T. A. (45) in Gorakhpur district.

Wall Material in Cities and Towns having 50,000 Population and Above

31. The 35 cities and towns will now be studied. A perusal of Subsidiary Table E-IV.1 will show that only burnt brick; mud; unburnt brick; stone; and grass, leaf, reed or bamboo as wall material are of importance for these towns.

32. *Burnt Brick*—The following Table gives the distribution of towns by the proportion of dwellings having burnt-brick as wall material :

TABLE 4.18—*Distribution of Class I and II Towns by Proportion of Burnt-Brick-Wall Dwellings*

Range	Number of Towns	Range	Number of Towns
300—399	2	700—799	7
400—599	3	800—899	16
600—699	5	900 and Above	2

It will be seen from the above that the largest number of towns lies in the range 800—899. The two towns in the lowest range are Sambhal (368) and Mirzapur-cum-Vindhyachal (322).

In the former unburnt-brick is the predominant wall material and in the latter mud. One is situated in the western U. P. and the other in the Vindhyan hills. The two towns in the highest range are Firozabad (975) and Bareilly (948), where burnt-brick is the almost exclusive wall material.

33. *Mud*—The next important wall material is mud. The following Table gives the distribution of towns by the proportion of dwellings having mud-walls :

TABLE 4.19—*Distribution of Class I and II Towns by Proportion of Mud-Wall Dwellings*

Range	Number of Towns	Range	Number of Towns
0—49	3	200—299	6
50—99	5	300—399	3
100—199	15	400 and Above	3

The largest number of towns lies in the range 100—199. The three towns in the lowest range are Bareilly (39), Muzaffarnagar (30) and Firozabad (21). The 3 towns in the highest range are Mirzapur-cum-Vindhyachal (604), Bahraich (435) and Rampur (415). In Mirzapur-cum-Vindhyachal mud is the predominant wall material. The 9 cities and towns in the range 200—399 are Pilibhit (220), Shahjahanpur (308), Farrukhabad-cum-Fatehgarh (292), Etawah (211), Allahabad (214), Jhansi (308), Faizabad-cum-Ayodhya (228), Gorakhpur (229) and Jaunpur (302).

34. *Unburnt Brick*—This is the third important wall material for these towns. Table 4.20 gives the distribution of 35 towns by the proportion of unburnt-brick-wall dwellings :

TABLE 4.20—*Distribution of Class I and II Towns by Proportion of Unburnt-Brick-Wall Dwellings*

Range	Number of Towns	Range	Number of Towns
0—9	11	100—199	3
10—49	14	200 and Above	2
50—99	5		

The largest number of towns is in the range 10—49. The towns in the lowest range are Moradabad, Bareilly, Pilibhit, Dehra Dun,

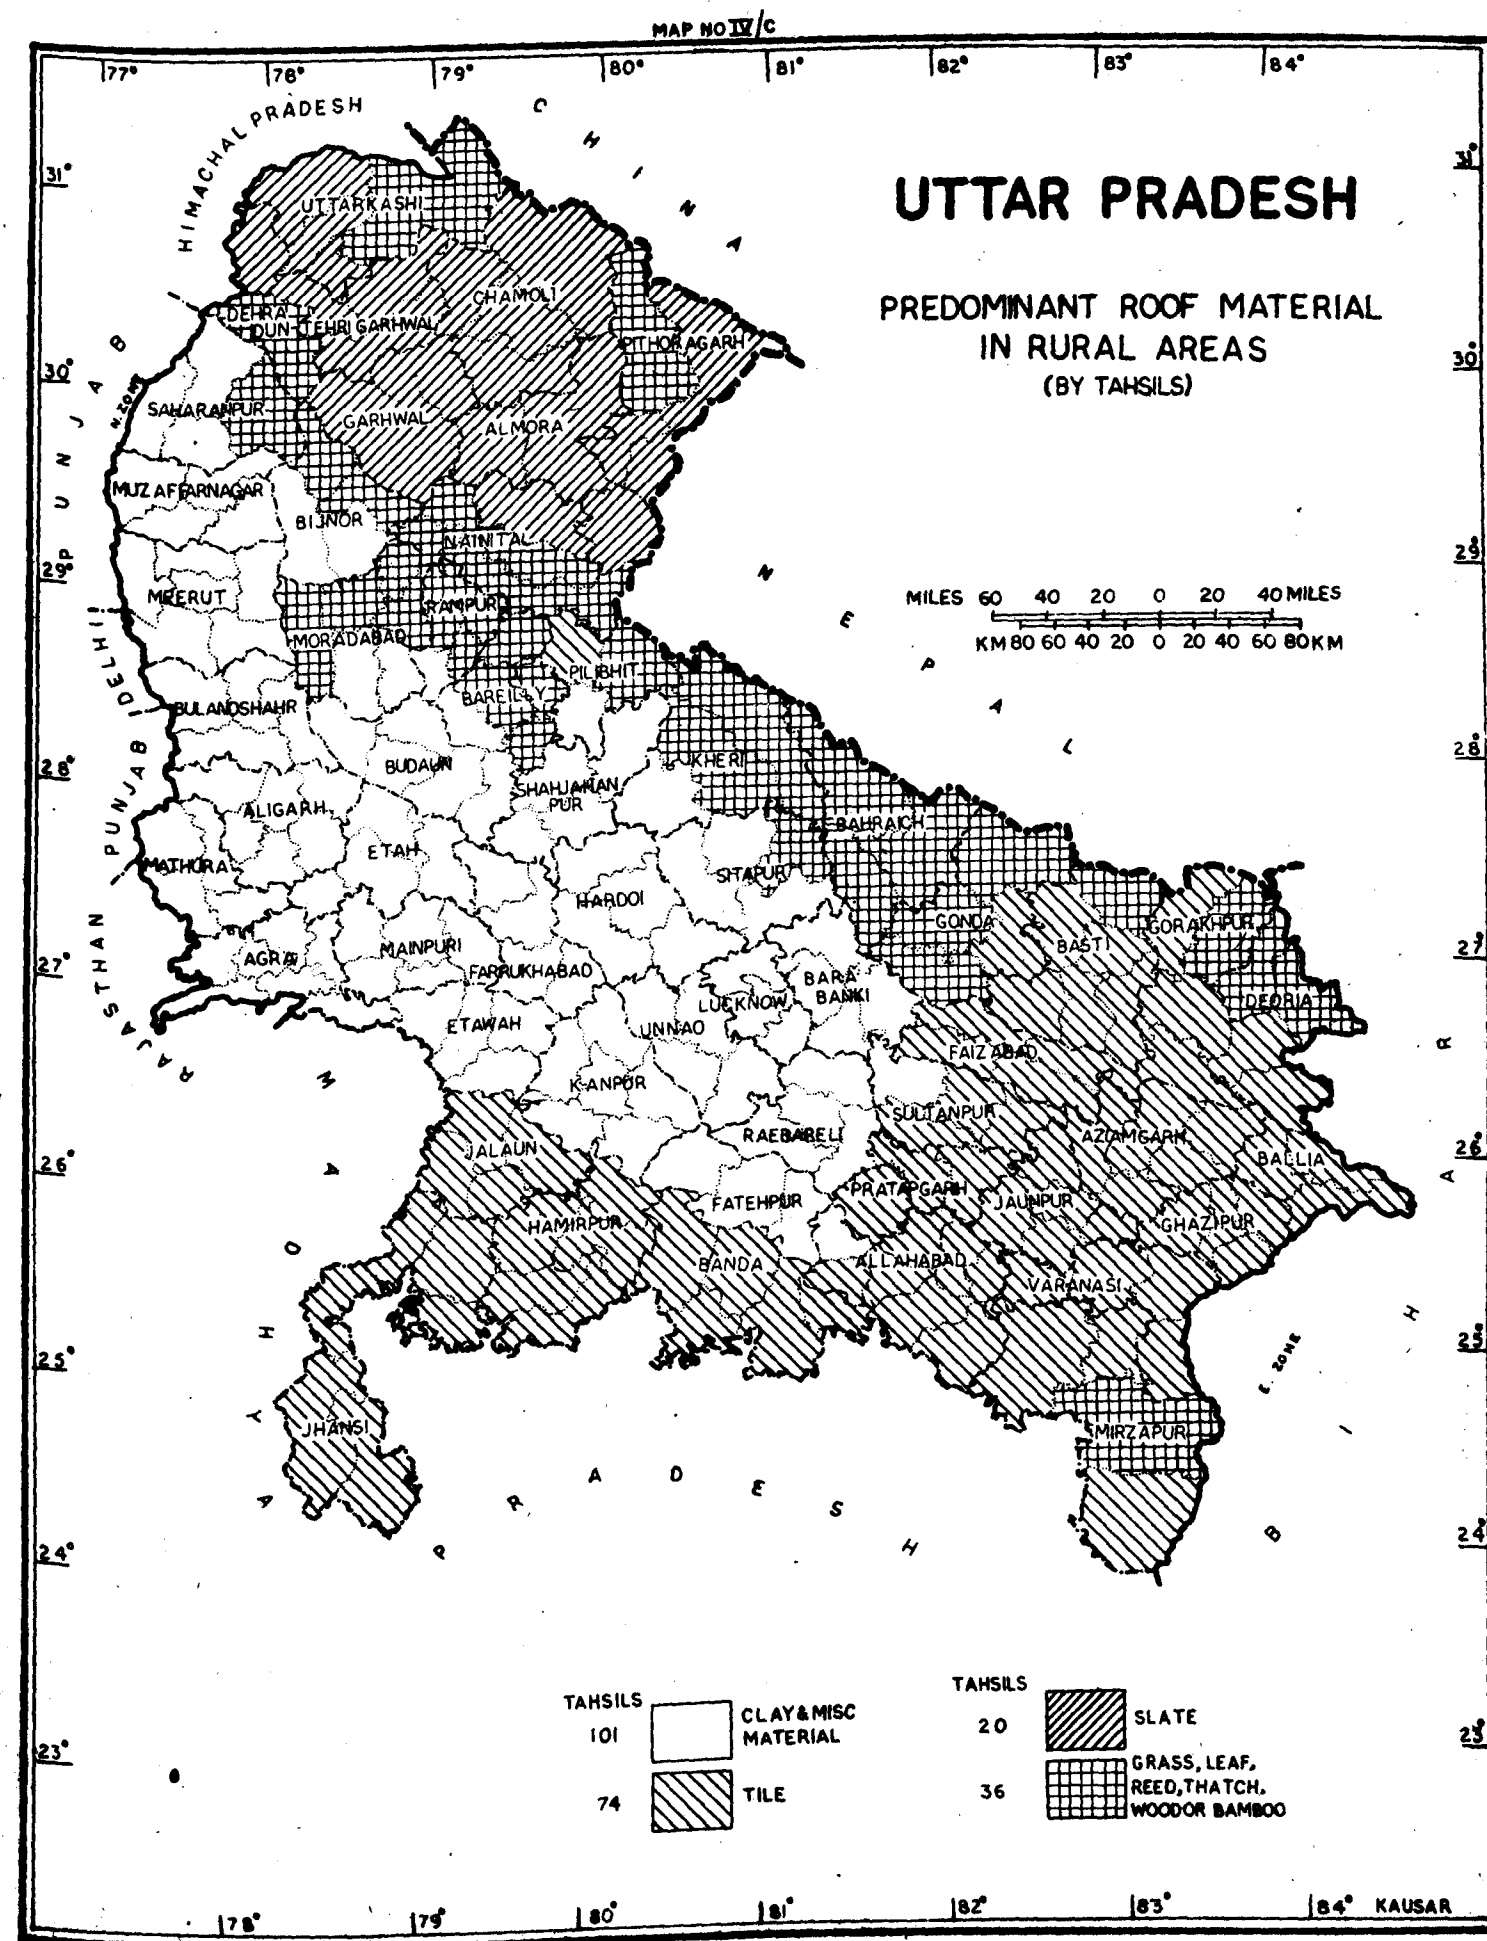

Roof Material in Rural Areas

39. The above Table reveals that tile, slate or shingle is the most important roof material for the rural areas in Bihār, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan and Himachal Pradesh. In Andhra Pradesh, Assam, Jammu and Kashmir, Kerala, Madras, Orissa and West Bengal grass, leaf, reed, thatch, wood or bamboo is the predominant roof material. 'All other material' is prominent in Uttar Pradesh and Mysore. In some areas, such as the Punjab and Delhi, flat roofs made of clay on a framework of wooden beams etc. have been included in grass, leaf, reed etc., while in others in 'all other material'. Keeping this in view, Uttar Pradesh, the Punjab and Delhi have the largest proportion of roofs of this type. The northern hilly districts of Uttar Pradesh have the same predominant roof material, viz., the slate, as the adjoining Union Territory of Himachal Pradesh. The western districts and the neighbouring State of the Punjab and the Union Territory of Delhi have a very high proportion of flat mud roofs, supported on wooden beams or a framework of bamboo etc. The southern and eastern districts share with the neighbouring Madhya Pradesh and Bihar the tile as the predominant roof material. For urban areas tile, slate or shingle is the most premoninent roof material in Bihar, Gujarat, Madhya Pradesh, Madras, Maharashtra, Mysore, West Bengal and Himachal Pradesh. In Andhra Pradesh, Jammu and Kashmir, Kerala and Orissa the predominant roof material is grass, leaf, reed, thatch, wood or bamboo. In the Punjab the roofs are mostly flat made of clay laid on a framework. In Assam corrugated iron and other metal sheets are the most important roof material, in Rajasthan and Delhi concrete-and-stone slab, and in Uttar Pradesh brick-and-lime.

40. In the rural areas of Uttar Pradesh clay on a framework of wooden beams etc. (391), tile and slate (370), and grass, leaf, reed, thatch, wood or bamboo (206) are the chief roof materials; while in the urban the chief materials are brick-and-lime (285), tile and slate (209), and concrete-and-stone slab (179). The rural and the urban patterns will now be taken up separately.

41. Map No. IV/C shows predominant roof material in the rural areas of the State (by tahsils). Grass, leaf, reed, thatch, wood or bamboo is predominant in 8 districts, namely, Naini Tal, Rampur, Bareilly, Pilibhit, Dehra Dun, Kheri, Bahraich, and Gonda. In Naini Tal district, except for tahsil Naini Tal, the whole area is a Sub-Himalayan plain. The other districts are also sub-montane. Slate is the predominant roof material in 6 hill districts, namely, Uttarakashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal and Almora; tile in 17 southern and eastern districts, namely, Allahabad, Jhansi, Jalaun, Hamirpur, Banda, Faizabad, Sultanpur, Pratapgarh, Basti, Gorakhpur, Deoria, Azamgarh, Jaunpur, Ballia, Ghazipur, Varanasi and Mirzapur. Jhansi, Jalaun, Hamirpur, Banda and Mirzapur are southern districts lying in the Vindhyan hills and plateaus. The other districts are in the eastern U. P. Of these Basti, Gorakhpur and Deoria are in the sub-montane region. The next important roof material in these districts is the same as in other sub-montane districts. In the remaining 23 districts, namely, Bijnor, Moradabad, Bulandshahr, Saharanpur, Muzaffarnagar, Meerut, Aligarh, Etah, Mainpuri, Farrukhabad, Agra, Mathura, Kanpur, Unnao, Lucknow, Rae Bareilly and Bara Banki, which are in the western and central plains, the roofs are mostly flat and made of material which is classed as 'all other material'. Usually an interwoven structure of wooden beams or twigs and dried long leaves is prepared for holding clay, which is usually obtained from the bottom of village ponds. To protect the walls from being damaged by rain, stalks of arhar etc. or sheafs of straw are sometimes plastered in a slanting manner to the edge of the roof. From a distance this protective covering looks like a thatch.

42. Districts having clay and miscellaneous material as the predominant roof material have an annual rainfall less than 100 centimetres. Where rainfall is heavy, roofs are not flat. Sloping roofs are made of slate or tile. Slate is used in the Himalayan districts and tile in others.

Sometimes the use of tile is also dictated by taste. Some of the central and eastern districts have less than 100 centimetres of rain, but the roofing pattern is entirely tile. Alternatively grass, leaf, reed, thatch, wood and bamboo are used for sloping roofs. *Pucca* roofs made of brick and lime, or of concrete and stone are also flat. Dwellings with such roofs are quite common in towns. In rural areas also, some well-to-do persons have houses with flat *pucca* roofs.

Clay and Miscellaneous Material (All Other Material)

43. Flat roofs of clay and miscellaneous things are most common in the rural areas of Uttar Pradesh. The following Table gives the distribution of districts by the proportion of dwellings having flat roofs of clay and miscellaneous material:

TABLE 4.23—Distribution of Districts by Proportion of Clay and Miscellaneous Material-Roof Dwellings (Rural)

Range	Number of Districts	Range	Number of Districts
0—99	25	600—799	6
100—399	6	800—899	7
400—599	2	900 and Above	8

The districts in the highest range are Muza-farnagar (933), Meerut (918), Bulandshahr (914), Mainpuri (961), Etawah (909), Kanpur (902), Lucknow (901) and Rae Bareli (950). All these districts are situated in the western and central U. P.

44. Taking tahsils as units, their distribution by the proportion of roofs made of clay and miscellaneous material is given in the following Table:

TABLE 4.24—Distribution of Tahsils by Proportion of Clay and Miscellaneous Material Roof Dwellings (Rural)

Range	Number of Tahsils	Range	Number of Tahsils
0—99	110	600—799	27
100—399	15	800—899	30
400—599	13	900 and Above	36

It will be seen from the above that the largest number of tahsils is contained in the lowest range 0—99. All these tahsils are situated in the Himalayan hills, Vindhyan hills and plateau, and the eastern U. P. In the following tahsils the proportion is negligible:

TABLE 4.25—Tahsils having negligible Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Rural)

(District)	(District)	(District)
Tahsil	Tahsil	Tahsil
(Uttar Kashi)	(Basti)	
1. Puraula	11. Khalilabad	22. Mariahu
	12. Bansi	23. Kerakat
(Allahabad)	(Gorakhpur)	
2. Phulpur	13. Pharenda	(Ballia)
(Jhansi)	14. Maharajganj	24. Ballia
3. Lalitpur	(Azamgarh)	(Ghazipur)
4. Mahroni	15. Sagri	25. Zamania
(Banda)	16. Ghosi	(Varanasi)
5. Banda	17. Azamgarh	26. Varanasi
6. Baberu	18. Muhammadabad	
7. Naraini	19. Phulpur	27. Chandauli
(Faizabad)	20. Lalganj	
8. Faizabad	(Jaunpur)	(Mirzapur)
9. Bikapur	21. Jaunpur	28. Mirzapur
10. Tanda		

The second largest number of tahsils is contained in the highest range. Tahsil Budhana of district Muza-farnagar has the highest proportion, followed by tahsil Karhal of district Mainpuri and tahsil Maharajganj of district Rae Bareli. Tahsils where the proportion is 900 and above are given below:

TABLE 4.26—Tahsils having a very high Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Rural)

(District)	Proportion to 1,000	(District)	Proportion to 1,000
Tahsil		Tahsil	
(Muza-farnagar)			
1. Kairana	967	5. Sardhana	953
2. Budhana	988	6. Meerut	915
(Meerut)		(Bulandshahr)	
3. Baghpat	963	7. Sikandrabad	951
4. Ghaziabad	907	8. Bulandshahr	904

(District) Tahsil	Proportion to 1,000	(District) Tahsil	Proportion to 1,000
9. Khurja (Aligarh)	928	23. Bilhaur (Kanpur)	947
10. Khair (Mathura)	927	24. Derapur	947
11. Sadabad (Agra)	911	25. Kanpur	900
12. Fatehabad (Etah)	935	26. Ghatampur (Unnao)	919
13. Jalesar	924	27. Hasanganj	947
14. Etah	933	28. Purwa	947
15. Jasrana (Mainpuri)	972	29. Malihabad (Lucknow)	937
16. Shikohabad	934	30. Mohanlalganj (Rae Bareli)	937
17. Karhal	985	31. Maharajganj	973
18. Mainpuri	963	32. Rae Bareli	966
19. Bhongaon (Etawah)	961	33. Dalmau	957
20. Etawah	912	34. Salon (Bara Banki)	906
21. Bidhuna	952	35. Ramsanehighat	903
22. Auraiya	906	36. Haidargarh	957

All these are situated in the western and central U. P. Map No. IV/D gives the proportion of clay and miscellaneous material roofs in the rural area (by tahsils).

Tile, Slate and Shingle

45. The proportion of dwellings having roofs of tile, slate or shingle to 1,000 dwellings in the rural areas is 370 for the State. Shingle is rarely used. In the Himalayan hills slate is the chief material, and in the Vindhyan hills and plateau and the eastern districts of U. P. the indigenously prepared semi-cylindrical tile.

TABLE 4.27—Distribution of Districts by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Rural)

Range	Number of Districts	Range	Number of Districts
0—99	23	600—799	7
100—399	8	800—899	8
400—599	1	900 and Above	7

The largest number of districts is contained in the lowest range 0—99. The districts in the highest range are Jhansi (927), Hamirpur (955), Banda (972), Azamgarh (921), Jaunpur (932), Ghazipur (920), and Varanasi (909) and in the next range Tehri Garhwal (828), Garhwal (894), Almora (876), Allahabad (830), Jalaun (838), Faizabad (828), Pratapgarh (837), and Ballia (848).

46. Taking up tahsils as units, their distribution by the proportion of dwellings having tiles, slate or shingle as roof material is as follows:

TABLE 4.28—Distribution of Tahsils by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Rural)

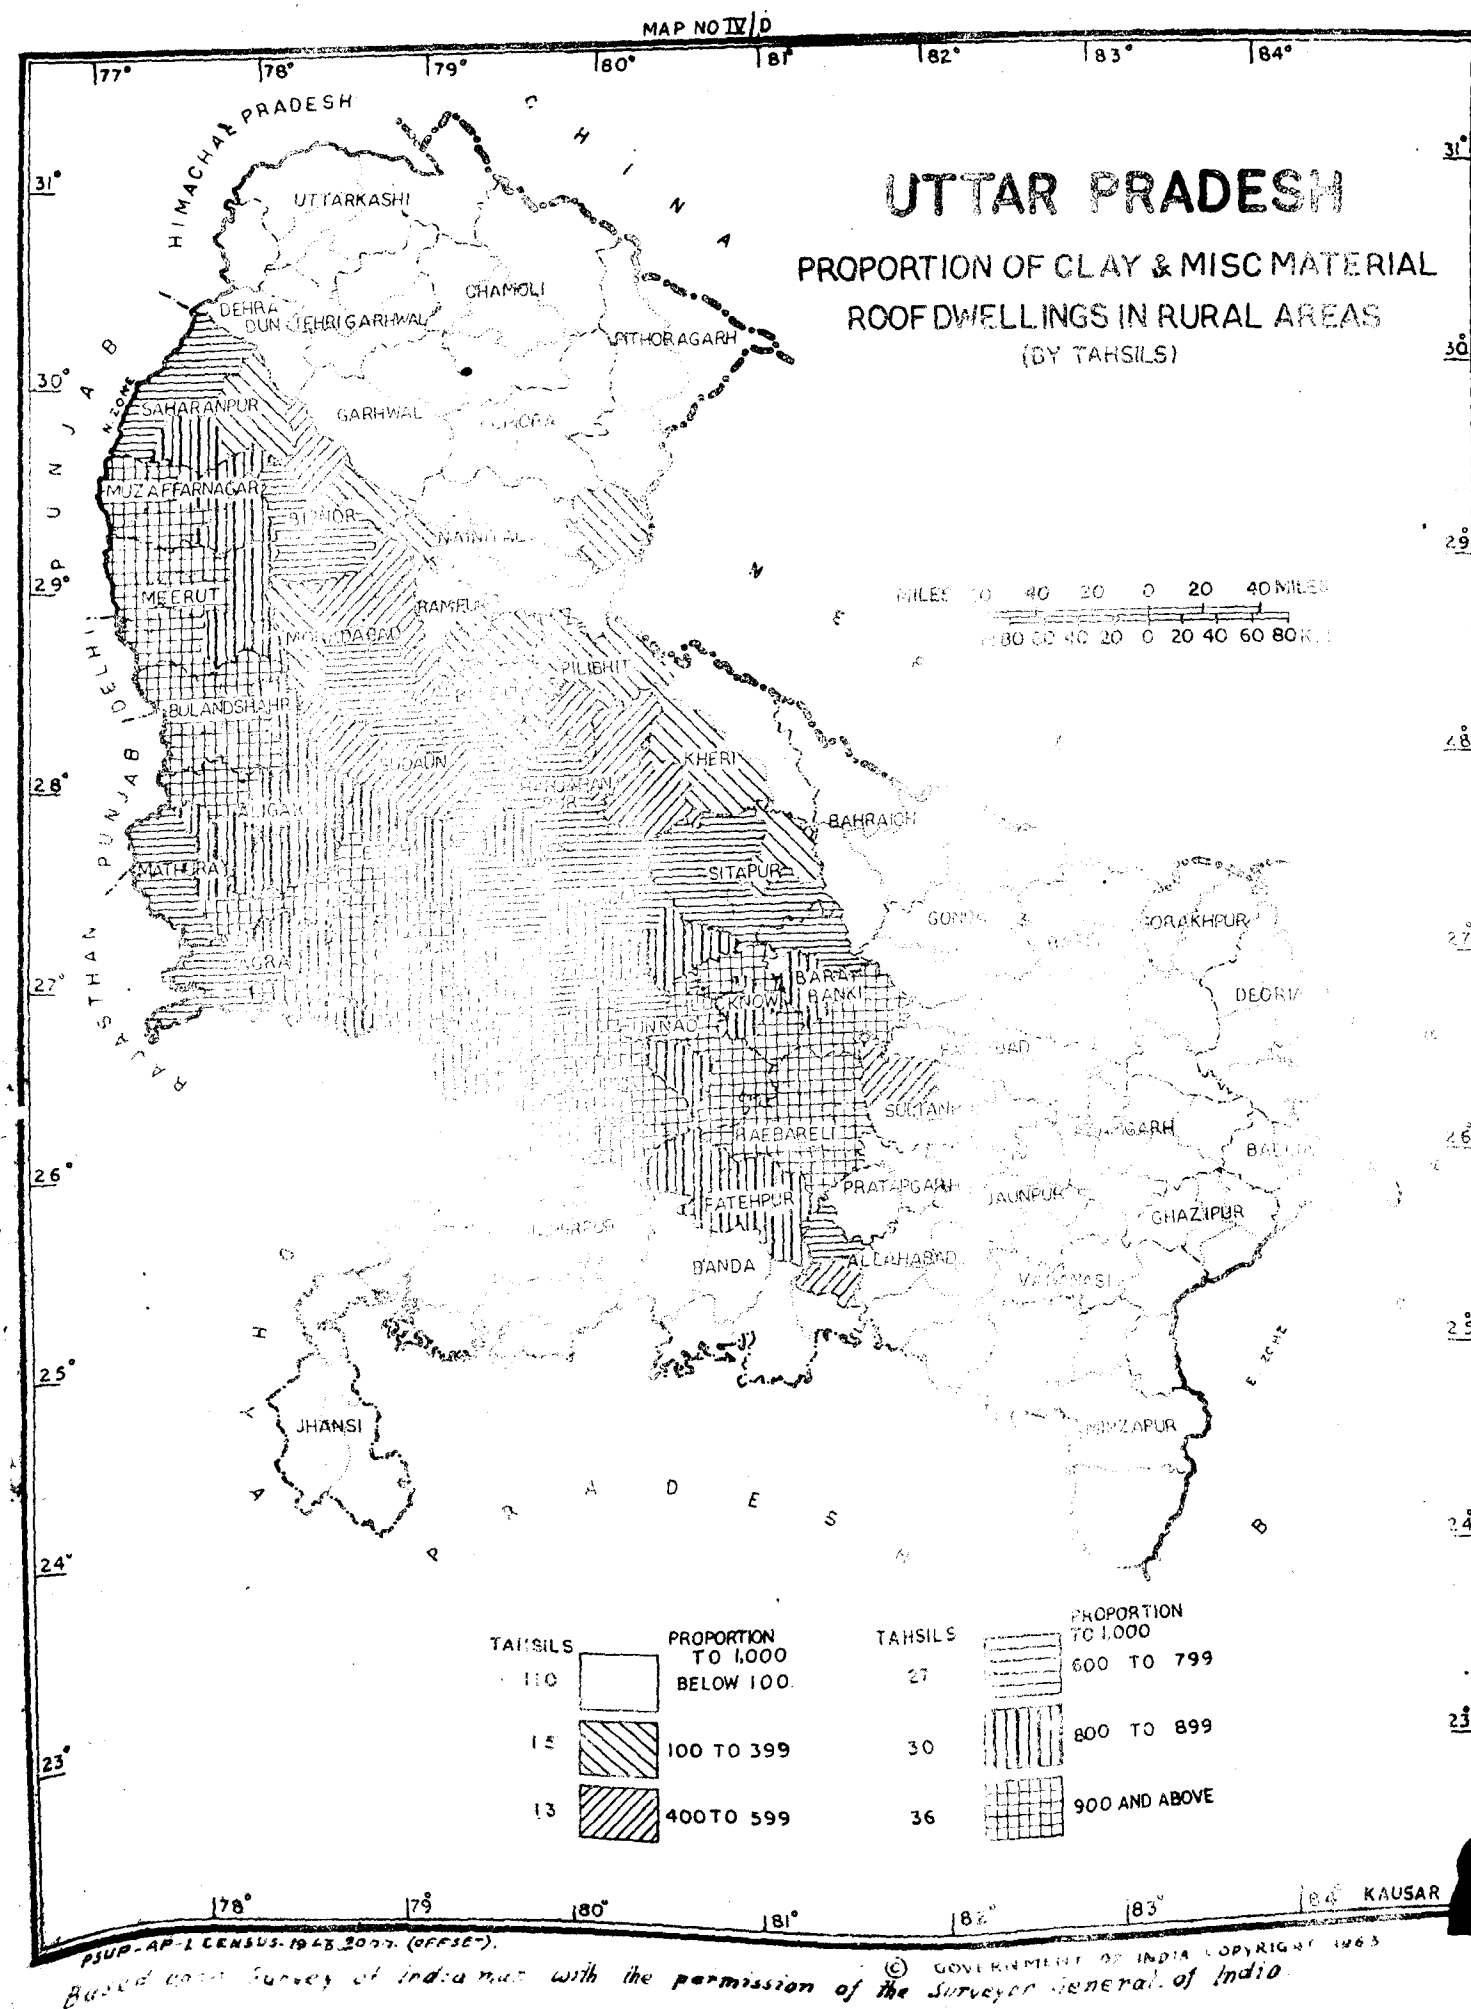

Range	Number of Tahsils	Range	Number of Tahsils
0—99	112	600—799	22
100—399	18	800—899	18
400—599	17	900 and Above	44

It will be seen from the above that the largest number of tahsils is in the lowest range 0—99. The next largest number of tahsils is contained in the highest range 900 and above. Names of 12 tahsils which have a proportion exceeding 950 are given in the following Table:

TABLE 4.29—Tahsils having more than 950 per 1,000 Dwellings with Roofs of Tile, Slate or Shingle (Rural)

(District)		(District)	
Tahsil		Tahsil	
(Allahabad)			
1. Chail	976	7. Charkhari	974
2. Soraon	986	8. Mahoba	983
3. Phulpur	972	(Banda)	
4. Handia	966	9. Banda	988
(Jhansi)		10. Baberu	993
5. Mahroni	968	11. Naraini	969
(Hamirpur)		(Azamgarh)	
6. Maudaha	958	12. Muhammadabad	955

All of them are in the southern and eastern U. P.

Grass, Leaf, Reed, Thatch, Wood or Bamboo

47. The proportion of dwellings having roofs of grass, leaf, reed, thatch, wood or bamboo in the rural area is (206) for the State. The following Table gives the distribution of districts by the proportion of dwellings having such roofs :

TABLE 4.30—Distribution of Districts by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Rural)

Range	Number of Districts	Range	Number of Districts
0—99	26	400—599	8
100—399	18	600 and Above	2

The largest number of districts is contained in the lowest range 0—99. Only 2 districts have a proportion of 600 and above. They are Rampur (675) and Kheri (624). Names of districts in the next highest range 400—599 are Naini Tal (558), Bijnor (428), Moradabad (449), Pilibhit (448), Dehra Dun (507), Bahraich (598), Gonda (570) and Deoria (474). All these districts are situated in the Sub-Himalayan region where this material grows in abundance. The names of tahsils where the proportion exceeds 750 are Bhabar (801) of Naini Tal district; Hasanpur (755) of Moradabad district; Suar (851) and Rampur (783) of Rampur district and Nighasan (850) of Kheri district. Tahsils which have a proportion of less than 10 are Budhana of Muzaffarnagar district; Jasrana and Karhal of Mainpuri district and Khaga of Fatehpur district where clay and miscellaneous material is most important. In Manjhanpur, Chail and Soraon of Allahabad district; Moth and Garautha of Jhansi district; Jalaun and Konch of Jalaun district; Rath, Maudaha, Charkhari and Mahoba of Hamirpur district and Banda, Baberu and Naraini of Banda district tile is the chief roof material.

Concrete-and-Stone Slab -

48. The proportion of roofs of concrete and stone slab in this State is 6 for rural areas. The proportion is so small that no discussion is called for.

Brick-and-Lime

49. In this State the proportion of dwellings having roofs made of brick-and-lime is 22 for the rural areas. The following Table gives distribution of districts by the proportion of dwellings having roofs of brick-and-lime :

TABLE 4.31—Distribution of Districts by Proportion of Dwellings with Roofs of Brick-and-Lime (Rural)

Range	Number of Districts	Range	Number of Districts
0—9	15	50—99	5
10—49	33	100 and Above	1

All districts have a proportion of less than 100, except Mathura (105) which has the highest proportion in the State. Names of districts in the next range are Agra (78), Jalaun (77), Dehra Dun (67), Naini Tal (65) and Saharanpur (58). Tahsils which have a proportion exceeding 100 are Kichha (132) of Naini Tal; Roorkee (119) of Saharanpur; Chhata (173) and Mathura (148) of Mathura and Firozabad (124) of Agra. These figures speak of comparative prosperity in the countryside of these tahsils.

Corrugated Iron, Zinc or other Metal Sheet

50. The proportion of dwellings having roofs of corrugated iron, zinc or other metal sheets is only 5 for the State, and consequently a detailed discussion is not required. Districts in which the proportion of such dwellings exceeds 100 are Naini Tal (132) and Dehra Dun (264), and the concerned tahsils are Kashipur (105) and Naini Tal (239) of district Naini Tal and Dehra Dun (318) of Dehra Dun. The areas where such roofs exist are rainy, being situated in the hills or the tarai, and are not so far removed from railheads as to make the transport of the material prohibitive.

Asbestos Cement Sheet

51. The average proportion for the rural areas of the State is negligible. The only tahsil which has a noticeable proportion is tahsil Dehra Dun (32) of Dehra Dun district. No discussion is required.

Roof Material in Urban Areas

52. The following are the most important materials used for the construction of roofs in the urban areas of the State :

Name of Material	Proportion to 1,000 Dwellings
1. Concrete-and-Stone Slab	179
2. Brick-and-Lime	285
3. All other material	221
4. Tile, Slate or Shingle	209

C. I. sheets, zinc or other metal sheets occupy an important place in the urban areas of Himalayan hills only. In the districts of the western plain 'all other material' is the most important, followed by brick-and-lime. In the districts of the central and eastern plains concrete-and-stone slab is the most important roof material.

Concrete-and-Stone Slab

53. Concrete-and-stone slab is the fourth important roof material in the urban areas. The following Table gives the distribution of districts by the proportion of dwellings having roofs of concrete-and-stone slab :

TABLE 4.32—Distribution of Districts by Proportion of Dwellings with Roofs of Concrete-and-Stone Slab (Urban)

Range	Number of Districts	Range	Number of Districts
0—99	26	300—399	4
100—199	11	400 and Above	1
200—299	10		

The majority of districts are comprised in the lowest range. The district in the highest range is Kanpur (430). Taking tahsils as units, there are 8 tahsils where the proportion of dwellings having such roofs exceeds 400 as the following Table will show :

TABLE 4.33—Tahsils having more than 40 per cent Dwellings with Roofs of Concrete-and-Stone (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Agra) 1. Kiraoli	429	Fatehpur Sikri M.B. Achhnera T.A.
(Kanpur) 2. Kanpur	430	Kanpur Town Group
(Gonda) 3. Balrampur	521	Balrampur M.B.
(Varanasi) 4. Varanasi	411	Varanasi Town Group and Ramnagar M.B.

The possibility of many roofs made of brick-and-lime being recorded as made of concrete-and-cement cannot be ruled out.

Brick-and-Lime

54. Brick-and-lime is the most important roof material in the urban areas. The following Table gives the distribution of districts by the proportion of dwellings having roofs of brick-and-lime :

TABLE 4.34—Distribution of Districts by Proportion of Dwellings with Roofs of Brick-and-Lime (Urban)

Range	Number of Districts
0—9	1
10—99	8
100—199	16
200—299	14
300—399	8
400—499	3
500 and Above	2

The largest number of districts is in the range 100—199. Mathura and Agra are in the highest range. Names of districts which have a proportion of 400 and above in this regard are Dehra Dun (461), Saharanpur (480), Mathura (571), Agra (528) and Etawah (482). All these districts are situated in the western U. P.

55. Among tahsils the highest proportion is for Etmadpur in district Agra, followed by tahsil Bharthana of district Etawah. There are

8 tahsils in which the proportion is 500 and above. They are given in the following Table :

TABLE 4.35—Tahsils having more than one-half Dwellings with Roofs of Brick-and-Lime (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Mathura) 1. Mathura	613	Mathura Town Group, Vrindaban M. B. Govardhan T. A.
(Agra) 2. Etmadpur	852	Etmadpur T. A. and Tundla T. A. and Tundla Railway Colony
3. Agra	550	Agra Town Group
(Saharanpur) 4. Saharanpur	583	Saharanpur M.B.
(Etawah) 5. Bharthana	783	Bharthana T. A.
(Bareilly) 6. Baheri	608	Baheri M.B.
(Hardoi) 7. Hardoi	599	Hardoi M.B.
(Gonda) 8. Gonda	692	Gonda M.B.

Most of these towns are in the western and the central U. P.

All Other Material

56. 'All Other Material' comprising clay and miscellaneous things is the second important roof material in the State. The following Table gives the distribution of districts by the proportion of dwellings having such roofs :

TABLE 4.36—Distribution of Districts by Proportion of Dwellings with Roofs of Clay and Miscellaneous Material (Urban)

Range	No. of Districts
0-9	18
10-99	8
100-199	5
200-399	3
400-499	6
500-599	4
600 and Above	8

The largest number of districts lies in the lowest range 0—9. The districts in the highest range are Muzaffarnagar (644), Bulandshahr (636),

Etah (631), Mainpuri (722), Farrukhabad (666), Fatehpur (811), Rae Bareli (608) and Bara Banki (647).

57. Taking tahsils as units, names of tahsils where more than 3/4th dwellings have this kind of roof are given in the following Table :

TABLE 4.37—Tahsils having more than three-fourth Dwellings with Roofs of Clay and Miscellaneous Material (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town (s)
(Moradabad) 1. Sambhal	793	Sambhal M.B. and Bahjoi T. A.
(Bareilly) 2. Aonla	832	Aonla M. B.
3. Faridpur	813	Faridpur M. B.
(Pilibhit) 4. Bisalpur	901	Bisalpur M. B.
(Shahjahanpur) 5. Tilhar	910	Tilhar M.B.
6. Powayan	843	Powayan T.A.
(Saharanpur) 7. Deoband	876	Deoband M. B. and Rampur T. A.
(Muzaffarnagar) 8. Budhana	937	Kandhla N. A.
9. Kairana	810	Kairana M. B. and Shamli M.B.
(Meerut) 10. Mawana	751	Mawana M. B. and Shahjahanpur
(Bulandshahr) 11. Sikandrabad	815	Sikandrabad M.B., Dadri T.A. and Dankaur T. A.
(Aligarh) 12. Atrauli	929	Atrauli M. B.
13. Sikandra Rao	838	Sikandra Rao M.B.
(Etah) 14. Jalesar	874	Jalesar M. B.
(Mainpuri) 15. Karhal	851	Karhal T. A.
16. Bhongaon	893	Bhongaon T. A.
(Farrukhabad) 17. Kaimganj	825	Kaimganj M.B.
18. Chhibramau	843	Chhibramau T. A.
19. Kannauj	758	Kannauj M.B.
(Fatehpur) 20. Bindki	764	Bindki M.B.
21. Fatehpur	836	Fatehpur M.B.
(Sitapur) 22. Sidhauri	855	Mahmudabad T. A.
(Hardoi) 23. Bilgram	783	Bilgram M.B. and Sandi M.B.
24. Sandila	832	Sandila M.B.

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Lucknow) 25. Malihabad	828	Malihabad T.A.
(Rae Bareli) 26. Salon	957	Jais T. A.
(Bara Banki) 27. Fatehpur	832	Fatehpur A.
28. Ramsanehighat	799	Rudauli N.A.

The general population of these towns is poor which cannot afford to live in *pucca* roof houses, and at the same time bricks are not easily available.

Tile, Slate and Shingle

58. The third important roof material is tile, slate or shingle. Tile is of great importance in districts of the eastern and southern Uttar Pradesh. The following Table gives the distribution of districts by the proportion of dwellings having roofs of tile, slate or shingle:

TABLE 4.38—Distribution of Districts by Proportion of Dwellings with Roofs of Tile, Slate or Shingle (Urban)

Range	No. of Districts
0-9	7
10-99	15
100-399	14
400-599	8
600-699	3
700 and Above	5

The largest number of districts is in the range 10-99. The districts in the lowest range are Bijnor, Budaun, Muzaffarnagar, Aligarh, Etah, Mainpuri and Kheri. In these districts the most important roof material in urban areas is 'all other material'. The districts in the highest range are Jhansi (810), Jalaun (802), Hamirpur (852), Banda (756) and Ghazipur (714), four of which are in the Vindhyan plateau and one in the eastern U. P.

59. Taking tahsils as units, 39 have more than one-half of urban dwellings with tile roofs. Names of tahsils where the proportion is above 800 are given below:

TABLE 4.39—Tahsils having more than 4/5th Dwellings with Roofs of Tile (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town (s)
(Allahabad) 1. Phulpur	908	Phulpur T. A.
(Jhansi) 2. Moth	821	Samthar N. A. Chirgaon T. A.
3. Mauranipur	803	Mauranipur M. B. and Ranipur T. A.
4. Jhansi	808	Jhansi Town Group Babina Cantt.
5. Lalitpur	824	Lalitpur M. B.
(Jalaun) 6. Jalaun	878	Jalaun M. B.
7. Orai	803	Orai M. B.
(Hamirpur) 8. Rath	841	Rath M. B.
9. Hamirpur	874	Hamirpur M. B.
10. Charkhari	944	Charkhari M. B.
(Azamgarh) 11. Ghosi	858	Kopaganj T. A.

Most of these towns are in the Vindhyan plateau, Phulpur in the central and Ghosi in the eastern U. P. also have tiled roofs. Urban areas of the Himalayan hills have a fair proportion of houses with roofs of slate.

C. I., Zinc or Other Metal Sheet

60. C. I. sheet, zinc or other metal sheet are important roof materials in the urban areas of Himalayan hills only. The following Table gives the distribution of districts by the proportion of dwellings having such roofs:

TABLE 4.40—Distribution of Districts by Proportion of Dwellings with Roofs of C. I., Zinc or other Metal Sheet (Urban)

Range	No. of Districts
0-9	17
10-49	26
50-99	3
100-299	1
300-399	4
400 and Above	1

The largest number of districts is comprised in the range 10-49. Only 6 districts have a proportion exceeding 200. These are Uttar Kashi (246), Tehri Garhwal (399), Garhwal (386), Almora (334), Naini Tal (310) and Dehra Dun (424) —all situated in the Himalayan hills and subject to heavy rainfall.

61. There are 6 tahsils in which the proportion of dwellings having roofs of C. I., zinc or other metal sheet exceeds 400. They are given in the following Table:

TABLE 4.41—Tahsils having Dwellings with Roofs of more than 2/5th C. I., Zinc or other Metal Sheet (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town(s)
(Tehri Garhwal) 1. Tehri	409	Tehri N.A.
(Garhwal) 2. Lansdowne	422	Lansdowne Cantt., Kotdwara M.B. and Doga- dda N.A.
(Almora) 3. Ranikhet	643	Ranikhet Cantt.
(Naini Tal) 4. Naini Tal	649	Naini Tal Town Group and Bhowali N.A.
(Dehra Dun) 5. Chakrata	756	Chakrata Cantt.
6. Dehra Dun	419	Dehra Dun Town Group, Clement Town Cantt. Rishikesh M.B., Mussoorie M.B., Landour Cantt. and Raipur

Grass, Leaf, Reed, Thatch, Wood or Bamboo

62. Grass, leaf, reed, thatch, wood and bamboo are used as roof material in the urban areas of most of the districts. However, they are important only in the Himalayan and Sub-Himalayan districts. The Table below gives the distribution of districts by the proportion of dwellings having such roofs:

TABLE 4.42—Distribution of Districts by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Urban)

Range	No. of Districts
0-9	4
10-99	35
100-199	10
200 and Above	3

The largest number of districts is covered in the range 10-99. The names of districts in the lowest range are Fatehpur, Jalaun, Hamirpur and Varanasi. The districts in the highest range are Almora (288), Naini Tal (226), and Bijnor (287).

63. There are 10 tahsils in which dwellings having such roofs are more than one-fourth of the total number of dwellings. Names of these tahsils are given below:

TABLE 4.43—Tahsils having more than one-fourth Dwellings with Roofs of Grass, Leaf, Reed, Thatch, Wood or Bamboo (Urban)

(District) Tahsil	Proportion to 1,000	Name of Town (s)
(Almora) 1. Almora	256	Almora Town Group
2. Ranikhet	349	Ranikhet Cantt.
(Naini Tal) 3. Bhabar (Haldwani)	275	Haldwani-cum-Kathgodam M.B. and Ramnagar M.B.
4. Kichha	406	Rudrapur N.A.
(Bijnor) 5. Bijnor	341	Bijnor M.B., Chandpur M.B. and Mandawar T.A.
6. Nagina	295	Nagina M.B. and Afzalgarh T.A.
(Moradabad) 7. Hasanpur	331	Hasanpur M.B. and Dhanaura N.A.
8. Thakurdwara	347	Thakurdwara T.A.
(Budaun) 9. Sahaswan	415	Sahaswan M.B. and Bilsa M.B.
(Deoria) 10. Padrauna	380	Padrauna M.B.

The highest figure for tahsil Sahaswan in district Budaun is in regard to M. B. Sahaswan and M. B. Bilsa. The next highest figure for Kichha in district Naini Tal is in respect of N. A. Rudrapur. The third highest figure for tahsil Padrauna in district Deoria refers to M. B. Padrauna. It is significant to note that most of these towns are situated in the Sub-Himalayan region. In other cities and towns also, the poorer folk live in houses with thatched roofs. Temporary structures also are quite often of this kind.

Asbestos-Cement Sheets

64. Asbestos-cement sheet is the least important roof material in the urban areas of this State. The proportion of dwellings having roofs of this material is either nil or negligible for most of the districts. Districts where the proportion is more than 10 are Bijnor, Shahjahanpur, Dehra Dun, Meerut, Lucknow, Basti, Ballia and Mirzapur. Only Mirzapur (105) has a proportion exceeding 100. Among the tahsils only 2 have a significant proportion of such roofs in their urban areas, viz., Sardhana (939) of Meerut district and Dudhi (584) of Mirzapur district. The urban area in the former is Sardhana N. A. and in the latter Pipri N. A. It is by no means certain that the very high proportion is not the result of faulty reporting and incorrect coding.

Roof Material in Cities and Towns having 50,000 Population and Above

65. A perusal of Subsidiary Table E-IV. 2 will show that the following materials are of importance in these cities and towns:

- (1) Brick-and-Lime
- (2) Concrete-and-Stone Slab
- (3) 'All other material' chiefly Clay and Miscellaneous Material
- (4) Tile, Slate or Shingle

66. *Brick-and-Lime*—The following Table gives the distribution of towns by proportion of dwellings having brick-and-lime as roof material:

TABLE 4.44—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Brick-and-Lime

Range	Number of Towns
0—99	3
100—199	9
200—299	5
300—399	7
400—499	7
500 and Above	4

It will be seen from the above that the largest number of towns lies in the range 100—199. The names of the towns in the lowest range are Sambhal (37), Jhansi (75) and Mirzapur-cum-Vindhyachal (69). Names of towns in the

highest range 500 and above are Saharanpur (583), Mathura (666), Agra (542) and Etawah (503).

67. *Concrete-and-Stone Slab*—The next important roof material is the concrete and stone slab. The following Table gives the distribution of towns by proportion of dwellings having roofs of concrete-and-stone slabs:

TABLE 4.45—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Concrete-and-Stone Slab

Range	Number of Towns
0—99	13
100—199	9
200—299	8
300—399	2
400 and Above	3

The largest number of towns lies in the lowest range 0—99. These towns are Sambhal (4), Amroha (1), Shahjahanpur (0), Dehra Dun (0), Saharanpur (34), Hardwar (2), Muzaffarnagar (15), Ghaziabad (18), Hapur (4), Aligarh (50), Etawah (N), Farrukhabad-cum-Fatehgarh (97) and Jhansi (82). Names of towns having proportions of 400 and above are Kanpur M. C. (430), Kanpur Cantt. (426) and Varanasi (415).

68. *Clay and Miscellaneous Material*—This is the third important roof material for these towns. The following Table gives the distribution of 35 towns by the proportion of dwellings having roofs of 'all other material':

TABLE 4.46—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Clay and Miscellaneous Material

Range	Number of Towns
0—99	13
100—199	4
200—299	6
300—399	6
400—599	3
600 and Above	3

It is evident from the above that the highest number of towns is in the range 0—99. These are Rampur (13), Bareilly (50), Dehra Dun (1), Kanpur M. C. (91), Kanpur Cantt. (70),

poorest section of the population or serve as temporary structures. The following Table gives the distribution of these towns by the proportion of dwellings having such roofs:

TABLE 4.48—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Grass, Leaf, Reed, Thatch or Bamboo

Range	Number of Towns
0—9	2
10—99	27
100—199	5
200 and Above	1

It is evident from the above Table that the largest number of towns is comprised in the range 10—99. Towns in the lowest range are Meerut Cantt. and Varanasi, one lying in the extreme west and the other in the extreme east of the State. The 6 towns having a proportion exceeding 100 are Sambhal (101), Budaun (104), Aligarh (213), Amroha (113), Ghaziabad (190) and Etawah (113). All of these are situated in western U. P.

71. *C. I., Zinc or Other Metal Sheet*—The following Table gives the distribution of these towns by the proportion of dwellings having such roofs:

TABLE 4.49—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of C. I., Zinc or other Metal Sheet

Range	Number of Towns
0—9	11
10—19	13
20—29	7
30—39	2
40—49	1
50 and Above	1

Only Dehra Dun (416) has a substantial proportion. Numerous dwellings in Dehra Dun City have roofs of corrugated iron sheets which is quite popular there.

Allahabad (6), Jhansi (2), Bahraich (1), Faizabad-cum-Ayodhya (7), Gorakhpur (4), Jaunpur (0), Varanasi (11) and Mirzapur-cum-Vindhyachal (9). They are fairly well distributed over the whole State. In towns only the poor section of the population goes in for this kind of dwelling. There are 6 towns where the proportion exceeds 400, namely, Sambhal (812), Amroha (626), Budaun (523), Muzaffarnagar (484), Hapur (586) and Farrukhabad-cum-Fatehgarh (608).

69. *Tile, Slate or Shingle*—The next important roof material in these towns is the tile. The following Table gives the distribution of 35 towns by the proportion of dwellings having such roofs:

TABLE 4.47—Distribution of Class I and II Towns by Proportion of Dwellings with Roofs of Tile

Range	Number of Towns
0—99	18
100—199	2
200—299	5
300—399	4
400—599	4
600 and Above	2

It is evident from the above that the largest number of towns is contained in the lowest range. Budaun, Muzaffarnagar, Ghaziabad, Meerut, Hapur, Aligarh, Hathras and Firozabad have a proportion of less than 10. All of these are situated in the western U. P.—an area where flat roofs are common. The 6 towns in the two highest ranges are Rampur (532), Allahabad (500), Jhansi (816), Bahraich (588), Gorakhpur (504) and Mirzapur-cum-Vindhyachal (735). All these towns are situated in areas where roofs are generally slopy.

70. *Grass, Leaf, Reed, Thatch, Wood or Bamboo*—Grass, leaf, reed, thatch, wood or bamboo is not an important material of roof in any town except Aligarh. But dwellings, having roofs of this material, are found in almost all towns. They are occupied by the

72. *Asbestos-Cement Sheet*—Asbestos-cement sheet as roof material is unimportant for these towns. For most of the towns the proportion is either zero or negligible. Only Shahjahanpur (63) has a proportion exceeding 50.

73. The most popular roof material for Class I and II towns is brick-and-lime, as many as 17 towns having roofs predominantly of this material. These towns are Moradabad, Bareilly, Dehra Dun, Saharanpur, Hardwar, Meerut M. B., Meerut Cantt., Ghaziabad, Aligarh, Hathras, Mathura, Agra, Firozabad, Etawah, Sitapur, Lucknow and Faizabad-cum-Ayodhya. With the exception of Sitapur, Lucknow and Faizabad-cum-Ayodhya of the central plain, they are situated in the western

U. P. Concrete-and-stone slab is prominent in Kanpur M. C., Kanpur Cantt., and Varanasi. Clay and miscellaneous material is predominant in Sambhal, Amroha, Budaun, Pilibhit, Muzaffarnagar, Hapur and Farrukhabad-cum-Fatehgarh which are the smaller towns of the western U. P. Tile which comes next is the predominant roof material for Rampur, Shahjahanpur, Allahabad, Jhansi, Bahraich, Gorakhpur, Jaunpur and Mirzapur-cum-Vindhyachal. With the exception of Shahjahanpur all these towns are situated in areas where the sloping roof is a popular feature. Corrugated iron or other metal sheets or asbestos-cement sheets are predominant nowhere, though Dehra Dun has a very high proportion of C. I. sheet roofs.

This chapter deals with the size and composition of households. The definition of a *household* at the 1961 Census was as follows :

"A Census household is a group of persons, who commonly live together and take their meals from a common kitchen, unless exigencies of work prevent any of them from doing so."

Up to the Census of 1931 no distinction was made between a *house* and a *household*. A house was treated as a dwelling place of a single commensal family using the same *chulha*, and was in fact a social rather than a structural unit. In 1941, for the first time, the two were distinguished. A *house* was defined as a human dwelling having a separate main entrance. The 1961 Census widened the scope of the meaning of the *Census house* so as to include dwellings, shop-cum-dwellings, workshop-cum-dwellings, places of halt, shops, business houses and offices, workshops and factories, educational institutions, eating houses, places of entertainment, public health and medical institutions, etc.

2. Housing Table E-V gives the distribution of households classified by the number of members and by the number of rooms occupied. Like Tables E-II and E-IV this Table has also been prepared for sample households. This Table was prepared with reference to entries in columns 13, 15, 16 and 17 of the Houselist. It gives the data for the rural and urban areas of districts and tahsils and for every town having a population of 50,000 or more. Subsidiary Table E-V. 1 gives the distribution of 1,000 households according to number of rooms occupied, and Subsidiary Table E-V. 2 gives the number of persons, males and females per room and persons per household in each category of household, viz., households having no regular room and those having one, two, three, four or five rooms and more.

CHAPTER V HOUSEHOLD POPULATION

(Housing Table E-V and Subsidiary Tables)

3. For the Census a room was defined as a structure or part of a structure having four walls with a door and a roof above and being spacious enough for a person to sleep in. Unenclosed verandahs, bath rooms, latrines, cattle sheds, stores, kitchens, etc. were not treated as rooms. The data collected do not take into account the size of rooms, and are not capable of interpretation in terms of square feet or cubic feet of space per person.

Household according to Rooms occupied

4. The following Table gives the distribution of 1,000 Census households, according to the number of rooms occupied, for all States and adjoining Union Territories:

TABLE 5.1—Distribution of 1,000 Census Households, according to number of Rooms occupied, in States and certain Union Territories

States	No regular room	One room	Two room	Three room	Four room	Five room and Above
Andhra Pradesh	0	645	222	71	33	29
Assam	2	366	348	150	70	64
Bihar	2	363	293	155	83	104
Gujarat	3	601	274	70	29	23
Jammu and Kashmir	16	486	234	122	65	77
Kerala	14	320	316	180	83	87
Madhya Pradesh	3	541	276	102	42	36
Madras	38	656	187	58	26	35
Maharashtra	23	649	227	64	21	16
Mysore	106	408	301	108	43	34
Orissa	1	319	371	149	87	73
Punjab	2	369	308	156	84	81
Rajasthan	2	512	249	119	58	60
Uttar Pradesh	3	333	276	165	101	122
West Bengal	5	648	218	67	38	24
<i>Union Territories</i>						
Delhi	7	604	239	79	39	32
Himachal Pradesh	3	258	285	149	137	168

It is evident from the above that in most cases households in occupation of one room are the

most numerous. Households in occupation of five or more rooms, are, however, quite common in Bihar, Uttar Pradesh and Himachal Pradesh.

5. A perusal of Table E.V. 1 would show that in Uttar Pradesh, as in most of the States and Union Territories, households living in one room are the most common. The proportion of households living in no regular room is very small. An examination of the district data discloses that households living in one room are predominant in 33 districts. Two-room households are predominant in Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal, Almora, Allahabad, Hamirpur, Kheri, Sitapur, Bara Banki, Pratapgarh, Deoria and Jaunpur districts. Three-room households are predominant only in district Jalaun and four-room households nowhere. Households occupying five or more rooms are predominant in Fatehpur, Faizabad, Sultanpur, Azamgarh, Ballia and Ghazipur districts. Map No. V/A gives the predominant type of household according to number of rooms (by tahsils).

Households with no Regular Rooms

6. Households with no regular rooms are comparatively few. Only 3 districts have a proportion of more than 10. They are Hardoi (12), Unnao (18) and Lucknow (25). The names of tahsils where the proportion exceeds 25 are Unnao (36) of Unnao and Malihabad (35) of Lucknow. The large proportion in Unnao and Lucknow districts can be attributed to the floods of October, 1960, which rendered many households houseless.

Households with One Room

7. The following Table gives the distribution of districts by the proportion of households living in one room to 1,000 Census households.

TABLE 5.2—Distribution of Districts by Proportion of Households living in One Room

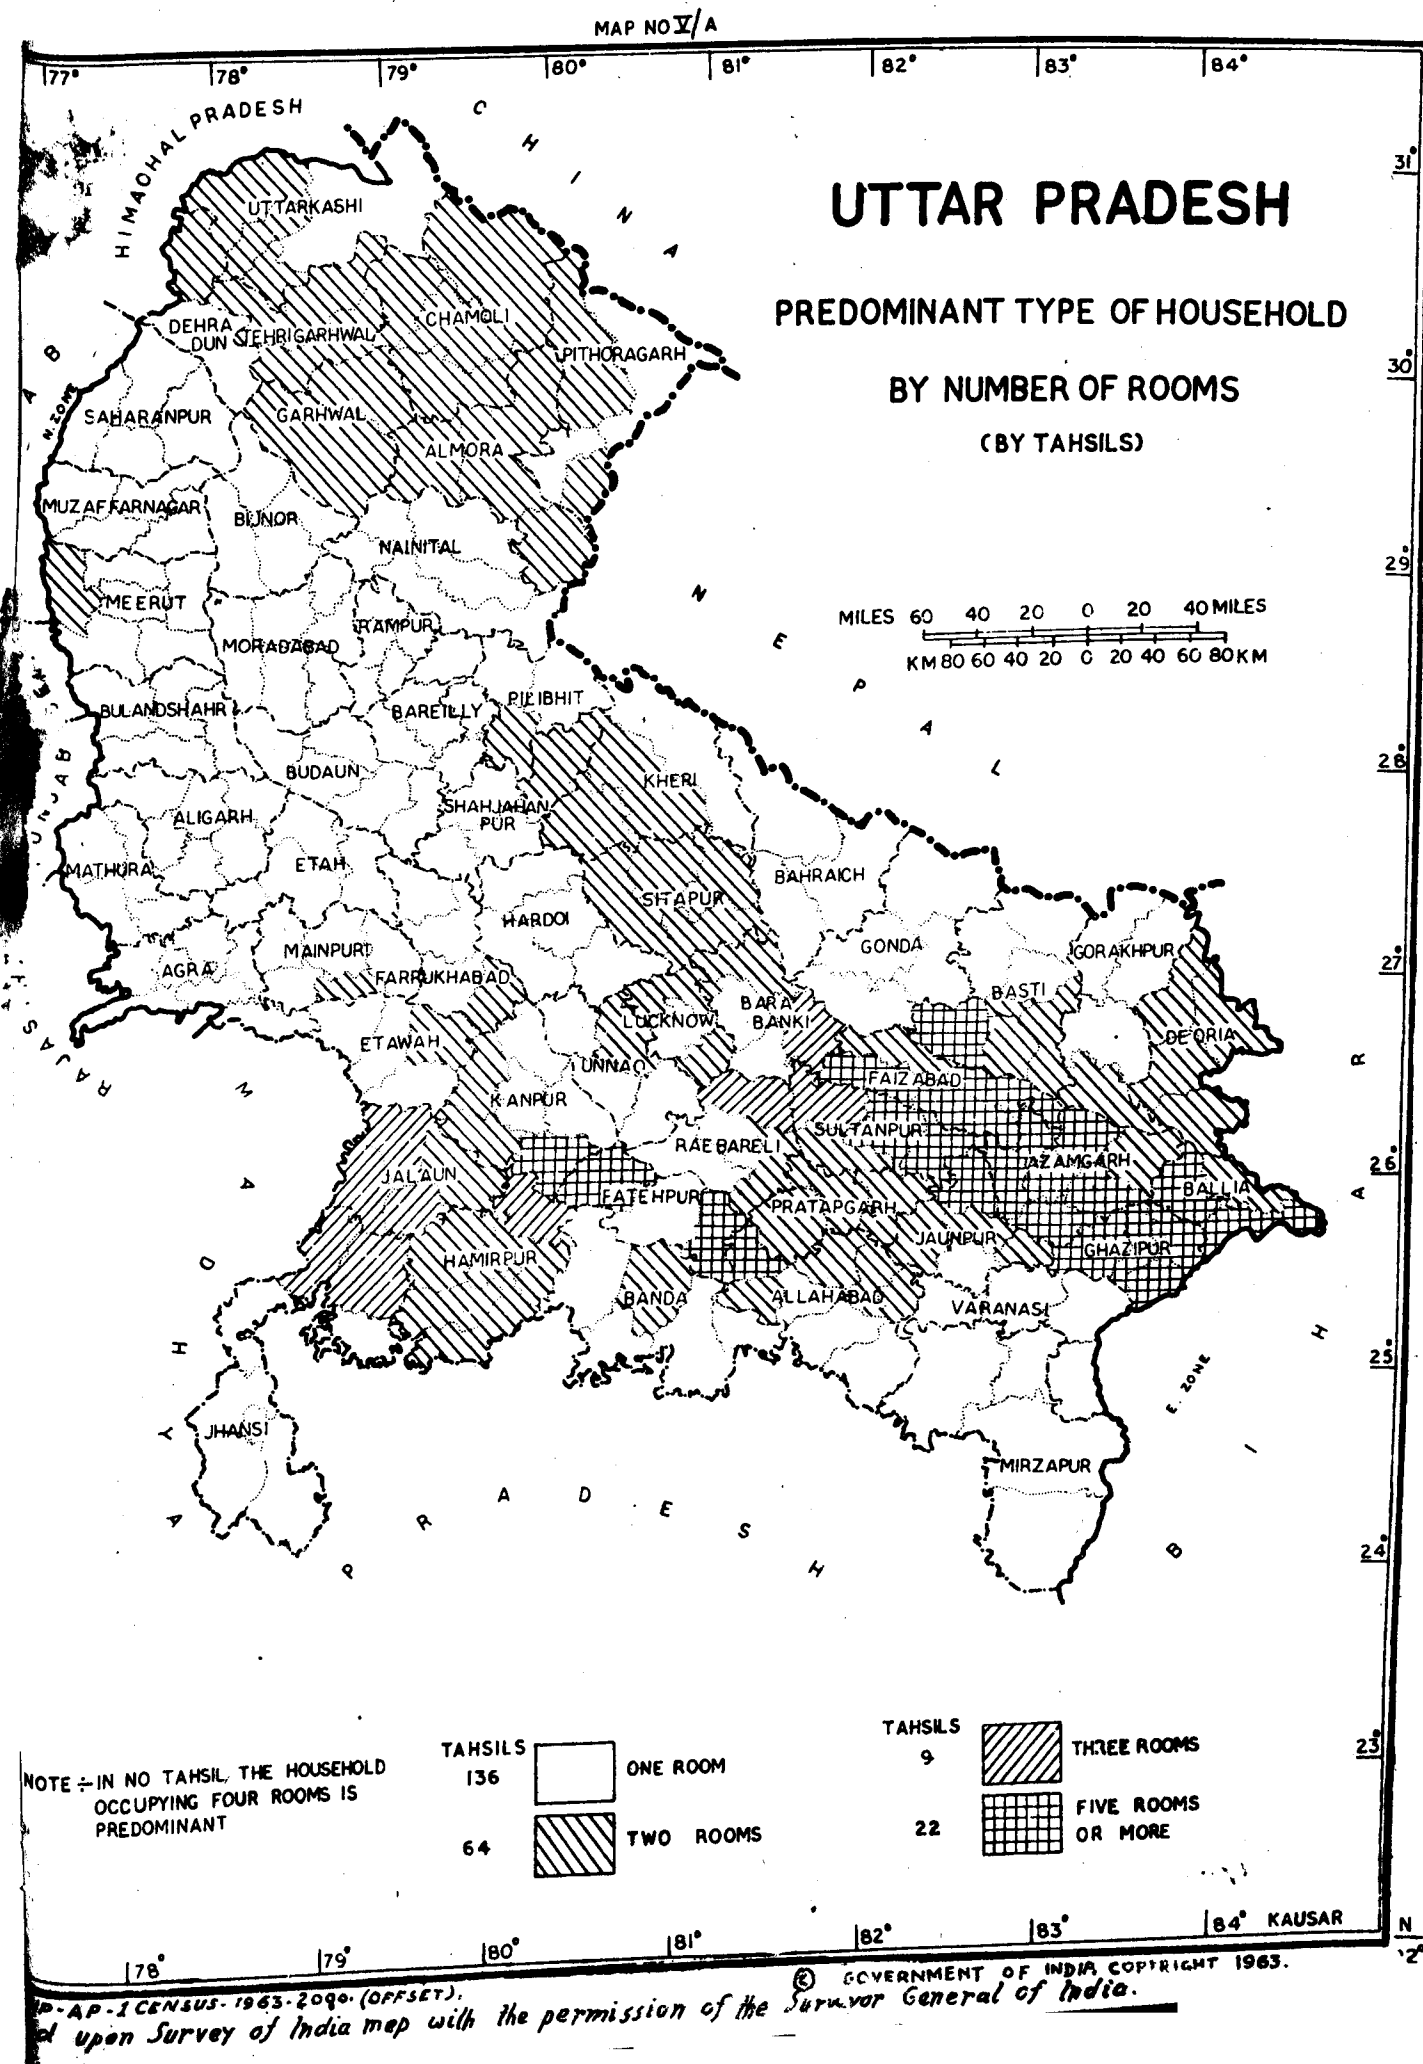

Range	Number of Districts
100—199	9
200—299	15
300—399	14
400—499	11
500 and Above	5

From the above Table it is evident that the majority of districts have 200—499 households per thousand living in one room. The districts in the lowest range are Tehri Garhwal, Garhwal, Fatehpur, Jalaun, Faizabad, Sultanpur, Azamgarh, Ballia and Ghazipur. Tehri Garhwal and Garhwal have a preponderance of households living in 2 rooms, Jalaun of those living in 3, and the remaining six of those living in 5 rooms or more. Names of districts where the number of households living in one room is more than one room. They are given in the following Saharanpur (579), Etah (521) and Mirzapur (504).

8. Taking tahsils as units, 23 are such as have more than one-half households living in one-room. They are given in the following Table:

TABLE 5.3—Tahsils having more than half Households living in One Room

(District)	Proportion to 1,000

22. Robertsganj	553
23. Dudhi	556

Most of these tahsils are situated in the western U. P. Tahsils Moradabad, Rampur, Saharanpur, Mathura, Agra and Kanpur have cities of population exceeding one lakh. Map No. V/B gives the proportion of households living in one room for each tahsil.

Households with Two Rooms

9. Households with two rooms come next. The following Table gives the distribution of districts by the proportion of households living in two rooms per 1,000 Census households :

TABLE 5.4—Distribution of Districts by Proportion of Households living in Two Rooms

Range	Number of Districts
200—249	12
250—299	26
300—349	10
350—399	3
400 and Above	3

It is evident from the above Table that the largest number of districts lies in the range 250-299. The districts in the lowest range are Kanpur, Fatehpur, Jalaun, Hamirpur, Lucknow, Rae Bareli, Bara Banki, Faizabad, Sultanpur, Azamgarh, Ballia and Ghazipur. Districts where the proportion exceeds 350 are Uttar Kashi (398), Chamoli (390), Pithoragarh (403), Tehri Garhwal (407), Garhwal (383) and Almora (408)—all of which are situated in the Himalayan hills. In these districts a two room dwelling is most popular.

10. Taking tahsils as units, 8 of them have more than 400 households per 1,000 living in two-room houses. All of them, with the exception of Kichha tahsil, are situated in the Himalayan hills ; whereas the Kichha tahsil is in the Sub-Himalayan region.

TABLE 5.5—Tahsils having more than two-fifth Households living in Two Rooms

(District) Tahsil	Proportion to 1,000
(Uttar Kashi)	
1. Rajgarhi	454
(Chamoli)	
2. Ukhi Math	414
(Pithoragarh)	
3. Pithoragarh	489
(Tehri Garhwal)	
4. Devaprayag	440
(Garhwal)	
5. Pauri	437
(Almora)	
6. Almora	447
7. Champawat	406
(Naini Tal)	
8. Kichha	405

Households with Three Rooms

11. The proportion of households with three rooms is 165 for the State. The following Table

The lowest proportion in the State is for tahsil Rajgarhi of district Uttar Kashi. Names of tahsils having a proportion of less than 50 are given below :

TABLE 5.10—Tahsils having less than one-twentieth Households living in Four Rooms

(District) Tahsil	Proportion to 1,000
(Uttar Kashi)	
1. Rajgarhi	20
(Naini Tal)	
2. Haldwani	43
3. Kashipur	45
Kichha	38
50—(Bijnor)	
75—Najibabad	46
Bijnor	22
Dhampur	35
(Moradabad)	
Hasanpur	46
9. Sambhal	48
10. Thakurdwara	35
11. Moradabad	43
12. Bilari	43
(Budaun)	
13. Gunnaur	42
14. Sahaswan	39
(Rampur)	
15. Rampur	45
16. Shahabad	40
(Bareilly)	
17. Aonla	48
(Pilibhit)	
18. Puranpur	27
(Saharanpur)	
19. Saharanpur	30
20. Roorkee	32
(Muzaffarnagar)	
21. Jansath	49
(Bulandshahr)	
22. Khurja	45
(Mathura)	
23. Chhata	39
(Agra)	
24. Kheragarh	44
(Etah)	
25. Kasganj	37
26. Jalesar	47
(Mirzapur)	
27. Robertsganj	48

Except Robertsganj tahsil of district Mirzapur all other tahsils are situated in the western U. P.

Households with Five Rooms and More

15. The proportion of households living in 5 rooms and more is 122 for the whole State.

The following Table gives the distribution of districts by the proportion of households living in five rooms and more to 1,000 Census households :

TABLE 5.11—Distribution of Districts by Proportion of Households living in Five Rooms and More

Range	Number of Districts	Range	Number of Districts
0—49	10	150—199	9
50—99	19	200—249	2
100—149	9	250 and Above	5

It is evident from the above Table that the largest number of districts is in the range 50—99. Districts in the lowest range are Pithoragarh, Naini Tal, Bijnor, Moradabad, Budaun, Rampur, Saharanpur, Bulandshahr, Etah and Bahraich — the lowest proportion being for Bijnor (31). Districts in the two highest ranges are Fatehpur (257), Faizabad (259), Sultanpur (242), Azamgarh (285), Jaunpur (217), Ballia (276) and Ghazipur (294). All of these districts lie in the central and eastern U. P.

16. Among tahsils the highest proportion is for tahsil Kadipur of district Sultanpur. Twenty tahsils having a proportion exceeding 250 are given below :

TABLE 5.12—Tahsils having more than one-fourth Households living in Five and more Rooms

(District) Tahsil	Proportion to 1,000
(Fatehpur)	
1. Bindki	308
2. Khaga	287
(Faizabad)	
3. Bikapur	261
4. Akbarpur	280
5. Tanda	303
(Sultanpur)	
6. Sultanpur	263
7. Kadipur	354
(Azamgarh)	
8. Sagri	283
9. Azamgarh	282

(District) Tahsil	Proportion to 1,000
10. Muhammadabad	340
11. Phulpur	286
12. Lalganj (Jaunpur)	339
13. Shahganj	265
14. Kerakat (Ballia)	257
15. Rasra	336
16. Ballia (Ghazipur)	273
17. Saidpur	287
18. Ghazipur	278
19. Muhammadabad	332
20. Zamania	275

All these tahsils are situated in the central and eastern U. P. In these five or more roomed houses are quite a common feature.

Households according to Rooms occupied in Cities and Towns with Population of 50,000 and Above

17. The 35 cities and towns will now be taken up for study. A perusal of Subsidiary Table E-V.1 shows that households in these towns are mostly in occupation of one or two rooms.

18. *Households with no Regular Rooms*—The proportion of households with no regular room is very small. Names of towns having a proportion of 10 or more are Agra (10), Kanpur M. C. (10), Sitapur (15), and Lucknow (26). All of these, with the exception of Sitapur, are large cities. In such cities, owing to acute congestion, an appreciable number of households lives in verandahs, open sheds, etc. The large proportion in the case of Sitapur and Lucknow can, to some extent, be explained by the occurrence of unprecedented floods, which preceded the Houselisting operation rendering many families houseless.

19. *Households with One Room*—The following Table gives the distribution of these 35 towns by the proportion of households living in one room:

TABLE 5.13—Distribution of Class I and II Towns by Proportion of Households living in One Room.

Range	Number of Towns
200—299	1
300—399	5
400—499	15
500—599	9
600 and Above	5

It is evident from the above that the large number of towns lies within the range 400—500. The lowest proportion is in the case of Jauri (270), which is rather lucky in the matter of congestion. Towns which have more than 400 of the households living in one-room are Amroha, Moradabad, Rampur, Pilibhit, Shahjahanpur, Saharanpur, Hardwar, Meerut M. C., Agra, Firozabad, Kanpur M. C., Kanpur Cantt. Bahraich and Gorakhpur. Of these Moradabad (605), Saharanpur (617), Firozabad (688), Kanpur M. C. (624) and Kanpur Cantt. (611) are in the highest range. Congestion in these towns is extremely severe.

20. *Households with Two Rooms*—The following Table gives the distribution of towns by the proportion of households living in two rooms:

TABLE 5.14—Distribution of Class I and II Towns by Proportion of Households living in Two Rooms

Range	Number of Towns
Below 200	2
200—249	8
250—299	20
300—349	4
350 and Above	1

It is evident from the above Table that the largest number of towns is comprised in the middle ranges of 200 to 299. The lowest proportion is for Meerut M. B. (196), followed by Firozabad (156), which have the greatest preponderance of one-room dwellings. The towns

in the two high ranges are Rampur (300), Bareilly (311), Ghaziabad (303), Meerut Cantt. (377) and Jhansi (312), which have a good number of households in occupation of two rooms.

21. *Households with Three Rooms*—The following Table gives the distribution of towns by the proportion of households living in three rooms:

TABLE 5.15—Distribution of Class I and II Towns by Proportion of Households living in Three Rooms

Range	Number of Towns
50—74	3
75—99	7
100—124	16
125—149	6
150—174	2
175 and Above	1

The majority of towns lies in the range 100—124. The highest proportion is for Jaunpur. Names of towns where the proportion is above 125 are Dehra Dun (147), Muzaffarnagar (131), Etawah (127), Allahabad (173), Jhansi (149), Sitapur (138), Faizabad-cum-Ayodhya (168), Jaunpur (190) and Mirzapur-cum-Vindhyachal (149), where a good sprinkling of three-room dwellings exists. The lowest proportion is for Moradabad. Names of towns where the proportion is less than 75 are Moradabad (56), Firozabad (70) and Kanpur M. C. (69) which are densely populated.

22. *Households with Four Rooms*—The following Table gives the distribution of towns by the proportion of households living in four rooms to 1,000 Census households:

TABLE 5.16—Distribution of Class I and II Towns by Proportion of Households living in Four Rooms

Range	Number of Towns
20—39	4
40—59	18
60—79	7
80—99	5
100 and Above	1

It is evident from the above Table that for the majority of towns the proportion is between 40—59. The highest proportion is for Jaunpur (109) and the lowest for Kanpur Cantt. (27). Names of towns where the proportion is 75 or above are Dehra Dun (77), Allahabad (89), Jhansi (88), Faizabad-cum-Ayodhya (91), Jaunpur (109), Varanasi (84) and Mirzapur-cum-Vindhyachal (80).

23. *Households with Five Rooms and Above*—The following Table gives the distribution of towns by the proportion of households living in five rooms and more:

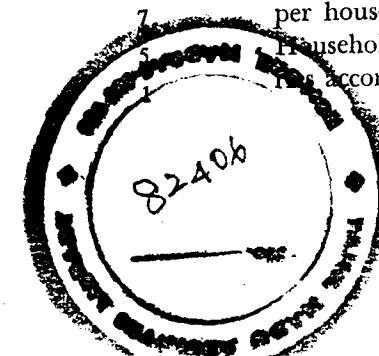

TABLE 5.17—Distribution of Class I and II Towns by Proportion of Households living in Five Rooms and More

Range	Number of Towns
0—49	8
50—74	15
75—99	8
100—124	2
125—149	1
150 and Above	1

The majority of towns are comprised in the range 50—74. Towns having more than 100 households per 1,000 living in houses of five or more rooms are Faizabad-cum-Ayodhya (134), Jaunpur (152), Varanasi (110) and Mirzapur-cum-Vindhyachal (112)—all of which are in the central and eastern U. P. Towns where the proportion is less than 50 are Amroha (47), Rampur (22), Shahjahanpur (47), Saharanpur (35), Meerut Cantt. (45), Firozabad (42), Kanpur M. C. (29) and Kanpur Cantt. (19).

Number of Persons per Room and per Household in each Category of Household

24. Subsidiary Table E-V.2 gives the average number of persons per room and the number of persons per household in each district, and of the average number of persons per room and per household for every category of households. Households have been divided into five categories according to the number of rooms occupied.

The Table gives data for each district, with rural and urban breakdown, and for all towns having a population of 50,000 and above.

25. The following Table gives the average number of persons occupying one room in the States and the adjoining Union Territories:

TABLE 5.18—Average Number of Persons per Room in States and certain Union Territories

States	Average Number of Persons per Room		
	Total	Rural	Urban
Andhra Pradesh	2.95	3.05	2.54
Assam	2.42	2.43	2.37
Bihar	2.30	2.29	2.43
Gujarat	3.27	3.49	2.76
Jammu and Kashmir	2.66	2.83	2.05
Kerala	2.44	2.47	2.28
Madhya Pradesh	2.68	2.75	2.33
Madras	3.03	3.17	2.70
Maharashtra	3.38	3.50	3.12
Mysore	2.82	2.92	2.52
Orissa	2.07	2.08	1.99
Punjab	2.47	2.46	2.47
Rajasthan	2.65	2.74	2.28
Uttar Pradesh	2.02	1.98	2.34
West Bengal	3.29	3.38	3.04
<i>Union Territories</i>			
Delhi	3.03	2.58	3.10
Himachal Pradesh	1.72	1.73	1.57

It is evident from the above Table that in the majority of States the number of persons per room is between 2 and 3. Uttar Pradesh has a comparatively low figure of 2.02. The number of persons per room in Gujarat, Madras, Maharashtra, West Bengal and the Union Territory of Delhi is above 3. An examination of separate figures for rural and urban areas shows that in the majority of States the number of persons per room is higher for the rural areas than for the urban. The exceptions are Bihar, the Punjab, Uttar Pradesh and Delhi.

26. Comparing the condition of housing in various States, it would appear that the degree of congestion in Uttar Pradesh is lower than in other States. An examination of number of persons per room for the districts of this State shows that the figure varies between 1.05 and 2.84. The following Table gives the distribution of districts by the number of persons per room:

TABLE 5.19—Distribution of Districts by Density of Persons per Room

Range	Number of Districts
1.00—1.50	2
1.51—1.75	14
1.76—2.00	9
2.01—2.25	15
2.26—2.50	4
2.51 and Above	10

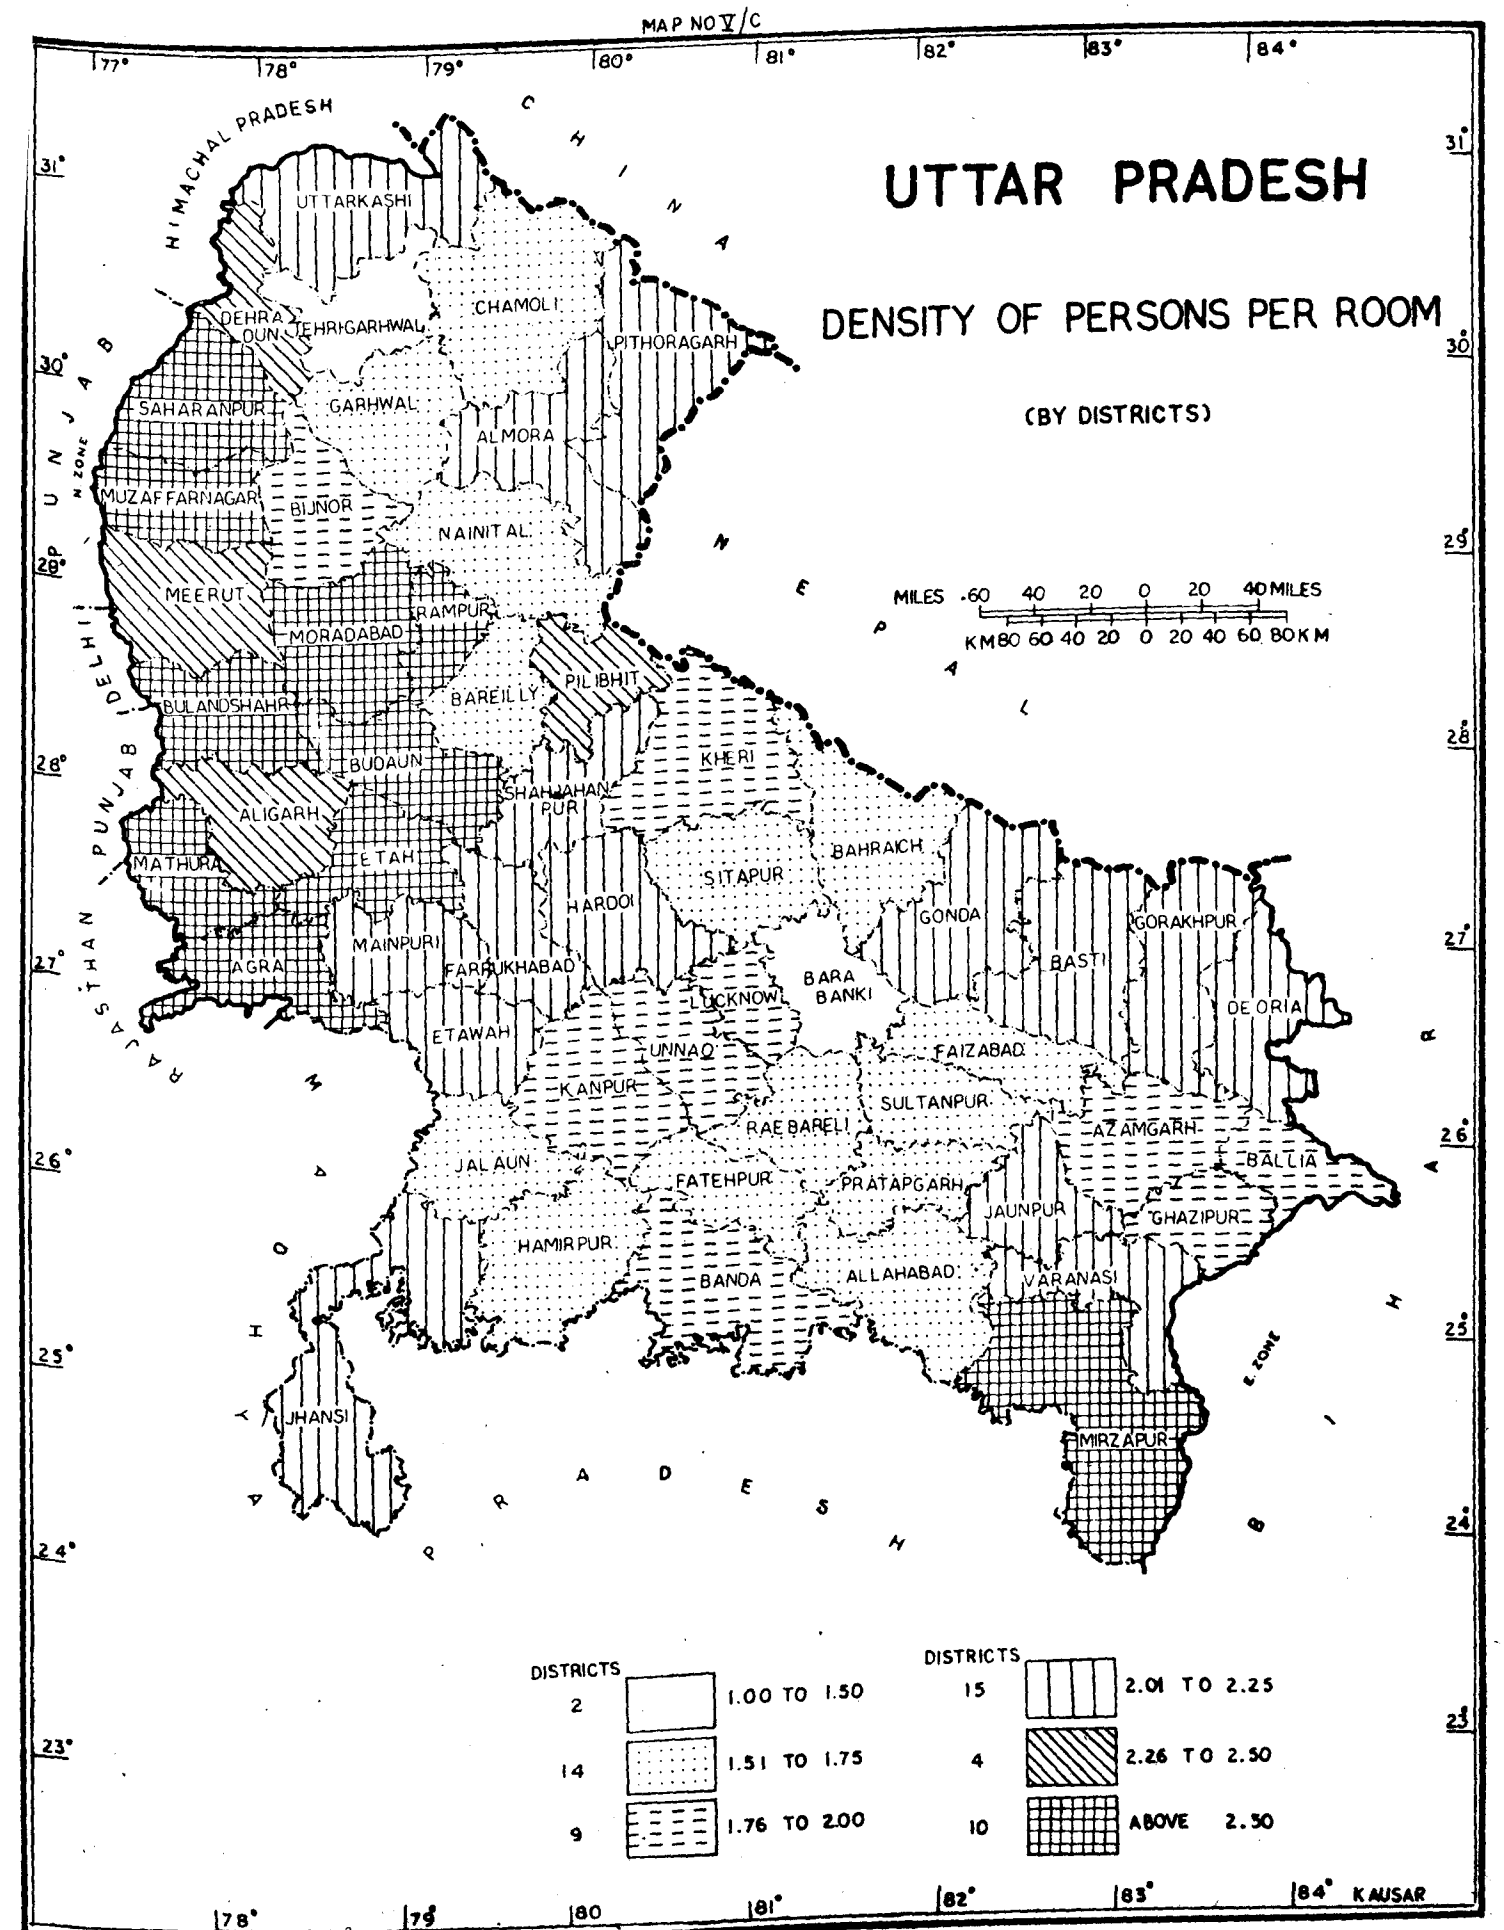

The largest number of districts is in the range 2.01—2.25. The 2 districts in the lowest range are Tehri Garhwal (1.05) and Bara Banki (1.50). The 10 districts in the highest range are Moradabad (2.76), Budaun (2.73), Rampur (2.51), Saharanpur (2.79), Muzaffarnagar (2.62), Bulandshahr (2.72), Mathura (2.51), Agra (2.68), Etah (2.84) and Mirzapur (2.54), all situated in the western U. P., with the exception of the last. The density of persons per room in each district is given in Map No. V/C.

Persons per Room in Rural Areas

27. The following Table gives the distribution of districts by the number of persons per room in rural areas:

TABLE 5.20—Distribution of Districts by Density of Persons per Room (Rural)

Range	Number of Districts
1.00—1.50	6
1.51—1.75	13
1.76—2.00	8
2.01—2.25	13
2.26—2.50	5
2.51 and Above	9

It will be seen from the above that in the majority of districts the density is between 1.51 and 2.25. Districts in the smallest range are Tehri Garhwal (1.04), Garhwal (1.50), Naini Tal (1.44), Fatehpur (1.49), Bara Banki (1.49) and Faizabad (1.47). In these districts housing conditions are not bad, either because the households are small or because a large percentage of them is in possession of houses with several rooms. Districts in the highest range are Moradabad (2.69), Budaun (2.74), Saharanpur (2.87), Muzaffarnagar (2.65), Bulandshahr (2.76), Mathura (2.54), Agra (2.58), Etah (2.87) and Mirzapur (2.63)—all of them except Mirzapur lying in the western U. P. Even districts with a high density of persons per room have less congestion than prevailing in many other States.

Persons per Room in Urban Areas

28. In Uttar Pradesh the density of persons per room is higher in urban areas, unlike the majority of States. The following Table gives the distribution of 52 districts having urban areas by the number of persons per room :

TABLE 5.21—*Distribution of Districts by the Density of Persons per Room (Urban)*

Range	Number of Districts
Up to 1.50	2
1.51—1.75	2
1.76—2.00	12
2.01—2.25	14
2.26—2.50	11
2.51—2.75	8
2.76 and Above	3

Most of the districts have a density between 1.76 and 2.50 persons per room. The two districts in the smallest range are Uttar Kashi (1.47) and Tehri Garhwal (1.31) where congestion is least. Names of districts having density exceeding 2.75 are Moradabad (3.04), Rampur (2.98) and Agra (2.89). The density of

Moradabad is higher than the average densities of most of the States and Union Territories except Maharashtra and Delhi.

Persons per Room in Cities and Towns with Population of 50,000 and Above

29. The following Table gives the distribution of 35 Class I and II towns by the number of persons per room :

TABLE 5.22—*Distribution of Class I and II Towns by Density of Persons per Room*

Range	Number of Towns
Up to 1.75	1
1.76—2.00	4
2.01—2.25	5
2.26—2.50	5
2.51—2.75	11
2.76—3.00	7
3.01 and Above	2

It will be seen that the largest number of towns lies in the range 2.51—2.75. The smallest number of persons per room is at Bareilly (1.69). Names of towns in the next lowest range are Dehra Dun (1.92), Hardwar (1.97), Allahabad (1.98) and Mirzapur-cum-Vindhyachal (1.89). In these towns available accommodation per person is better than in others. Towns in the two highest ranges are Sambhal (2.95), Amroha (2.98), Moradabad (3.38), Rampur (2.94), Saharanpur (2.96), Meerut M. B. (2.82), Agra (2.90), Firozabad (3.10) and Kanpur Cantt. (2.89). These towns offer the least living accommodation per person and are the most congested. The greatest congestion exists at Moradabad and Firozabad.

30. A separate study of some selected slum areas of Kanpur M. C. was made. 172 enumeration blocks in seven wards of Kanpur Municipal Corporation were selected for this purpose. The following Table gives the number

of households by the number of rooms and the number of persons for the selected areas :

TABLE 5.23—Households by Number of Rooms and Number of Persons in selected Blocks of Kanpur M. C.

(Kanpur Municipal Corporation : Selected Blocks of Ward Nos. 4, 15, 20, 21, 23, 31 and 33)

Number of Rooms	Total No. of Households	Number of Households according to Number of Persons in the Household					
		One Person	2-3 Persons	4-6 Persons	7-9 Persons	10 Persons and Above	
1	2	3	4	5	6	7	
No Regular room	56	20	16	13	5	2	
1 room	19,624	4,232	6,698	6,518	1,726	450	
2 rooms	4,750	404	1,325	1,397	844	280	
3 rooms	1,034	29	136	410	278	181	
4 rooms	373	9	32	106	117	109	
5 rooms	313	10	28	56	75	144	

This Table shows that the largest number of households lives in one-room accommodation. Of these more than 42 per cent are composed of more than 4 persons. There were as many as 450 households of 10 or more persons living in one-room accommodation. Similarly, out of 4,750 households living in 2 rooms, over 60 per cent were composed of 4 or more persons. These figures clearly indicate the extent of congestion prevailing in the slum areas of Kanpur.

31. The following Table gives the figures for wards which have the highest and lowest densities of persons per room in the five KAVAI cities, arranged according to their 1961 population :

TABLE 5.24—Wards in KAVAI Cities having Highest and Lowest Density of Persons per Room

	Highest		Lowest	
	Ward No.	Density	Ward No.	Density
Kanpur	23	4.03	2	2.06
	33	3.96	34	1.84
	31	3.72	28	1.69

Lucknow

Agra

Varanasi

Allahabad

	Highest		Lowest	
	Ward No.	Density	Ward No.	Density
Lucknow	29	3.16	21	2.15
	10	3.15	20	2.07
	12	3.10	31	1.93
Agra	5	3.26	3	2.79
	6	3.12	4	2.51
	2	2.89	1	2.46
Varanasi	5	3.56	17	1.80
	23	2.92	10	1.76
	21	2.91	24	1.23
Allahabad	17	2.57	5	1.68
	13	2.41	11	1.52
	19	2.37	6	1.50

32. The position obtaining in the remaining 12 cities arranged in order of their 1961 population is given by the following Table :

TABLE 5.25—Wards in Other Cities having Highest and Lowest Density of Persons per Room.

City	Highest		Lowest	
	Ward No.	Density	Ward No.	Density
Meerut	2	3.72	15	1.87
Bareilly	4	3.09	6 and 15	1.13
Moradabad	1	4.27	13	2.66
Saharanpur	11	3.45	9	2.00
Aligarh	15	3.25	7	1.72
Gorakhpur	4	3.30	8	1.59
Jhansi	10	2.77	7 and 14	1.64
Dehra Dun	5	2.69	6	1.27
Rampur	1	3.74	14	2.01
Mathura	2	3.00	1	2.32
Shahjahanpur	3	3.60	6	1.71
Mirzapur-cum-Vindhyachal	12	2.65	2	0.96

The greatest amount of congestion exists in Ward No. 1 of Moradabad, which even exceeds the congestion in Kanpur. Certain localities of Meerut, Bareilly, Saharanpur, Aligarh, Gorakhpur, Rampur, Mathura and Shahjahanpur are quite congested. In Moradabad, Saharanpur, Rampur and Mathura even the minimum is quite high.

Size of Households

General

33. The following Table gives the number of persons per household for total, rural and urban population of the States and the adjoining Union Territories :

TABLE 5.26—Number of Persons per Household in States and certain Union Territories

States	Persons per Household		
	Total	Rural	Urban
Andhra Pradesh	4.82	4.79	5.00
Assam	5.34	5.36	5.11
Bihar	5.57	5.58	5.49
Gujarat	5.30	5.35	5.15
Jammu and Kashmir	5.60	5.51	6.12
Kerala	5.85	5.79	6.25
Madhya Pradesh	4.82	4.84	4.70
Madras	4.62	4.57	4.76
Maharashtra	5.12	5.11	5.15
Mysore	5.42	5.42	5.41
Orissa	4.81	4.83	4.54
Punjab	5.71	5.84	5.21
Rajasthan	5.30	5.32	5.21
Uttar Pradesh	5.15	5.16	5.03
West Bengal	5.28	5.38	4.97
<i>Union Territories</i>			
Delhi	5.08	6.25	4.95
Himachal Pradesh	5.08	5.10	4.66

From the above Table it is evident that the size of an average household in rural and urban areas taken together varies between 4.62 and 5.85. In the majority of States the average size of a household is above 5.0. In Andhra Pradesh, Madhya Pradesh, Madras and Orissa it is less than 5.0. The largest average household is in Kerala and the smallest in Madras.

34. In the rural areas the average size varies from 4.57 in Madras to 6.25 in Delhi. In urban areas it varies from 4.54 in Orissa to 6.25 in Kerala. As a rule, the average rural household is larger than of the urban. The exceptions are Andhra Pradesh, Jammu and Kashmir, Kerala, Madras, and Maharashtra. In Uttar Pradesh the size of the average rural household is about 2 per cent larger than of the urban.

35. The following Table gives the average size of household for the rural and urban

population of the State for the years 1911 to 1961 :

TABLE 5.27—Average Size of Households in Uttar Pradesh from 1911 to 1961

Year	Total	Rural	Urban
1911	4.63	4.64	4.54
1921	4.56	4.57	4.54
1931	4.77	4.82	4.40
1941	5.04	5.01	5.25
1951	5.04	5.07	4.87
1961	5.15	5.17	5.03

There was a fall in the size of the average household in 1911 owing to an artificial increase in their number due to the prevalence of the plague, on account of which a large number of temporary structures had to be put up. The actual size in 1911 was slightly larger than what the figures indicate. In 1921 there was a fall, but it was insignificant taking into consideration that a large number of empty houses had been counted as occupied. The population fell during the decade 1911-21 by 3.1 per cent and the number of households by 1.7 per cent, thereby causing a decrease in the size of household. In 1931 the population, the number of households and the size of households all showed an increase. About half of the increase in the decade 1921-31 was due to increase in the size of average household, and half due to the increase in the number of households. The latter was caused by labour migrating to towns as a result of the abnormal fall in agricultural prices at the end of the decade, leaving the families in villages, and partly due to the continued breaking up of the joint family system. In 1941 the population, the number of households and the size of households again showed an increase. The population during this decade rose by 13.6 per cent, while the number of households increased by 7.6 per cent only, resulting in an increase in the size of the household. More than half of the increase in population in the decade 1931-41 was due to increase in the number of households, and the remaining due to the increase in the size of an average household. The causes of increase in the number of households were the same as in the previous decade. In the rural areas, owing to favourable

agricultural conditions, the tendency towards the breaking up of the joint family system was resumed. The increase in the size of the urban household, on the other hand, was remarkable. The immigrants had to join existing urban households as guests or visitors, or to huddle up in larger households owing to difficulties of housing. During the 1941-51 decade the increase in population and number of households was 12.2 per cent and 11.7 per cent, respectively. The size of the average household remained practically the same. In the urban areas the size decreased from 5.3 to 4.9. The increase in population is attributable to the increase in the number of households. The increase in the number of households was due to the movement of population from rural to urban areas and to the continued breaking up of the joint family system, facilitated by improvement in housing position. The story of the rise and fall in the number of households and their size during the period 1911-1951 has been borrowed from the *U. P. Census Report, 1951*.

36. In 1951-61 the population has increased by 16.66 per cent, but the number of households has increased only by 12.05 per cent, resulting in an increase in the size of an average household. Three-fourths of the population has increased on account of increase in the number of households, and one-fourth owing to increase in the size of an average household. Map No. V/ D gives the average size of households for each district.

Size of Household in Rural Areas

37. The following Table gives the distribution of districts according to the average size of households :

TABLE 5.28—*Distribution of Districts by average Size of Household (Rural)*

Range	Number of Districts
Up to 4.00	3
4.01—4.50	1
4.51—5.00	20
5.01—5.50	21
5.51—6.00	5
6.01 and Above	4

The size of household in a large majority of districts varies between 4.51 and 5.50. In Garhwal (4.47), Naini Tal (2.79), Bijnor (3.35) and Bahraich (3.55) the average household has fewer inmates than 4.50. Names of districts where the size of the average household is larger than 5.50 are Muzaffarnagar (5.58), Meerut (5.54), Agra (5.63), Deoria (5.90), Azamgarh (6.13), Jaunpur (5.92), Ballia (6.51), Ghazipur (6.43) and Varanasi (6.14). The size of the average household in the rural areas of Azamgarh, Ballia, Ghazipur and Varanasi is particularly large. In all these districts, except Varanasi, the typical household lives in a five-room dwelling.

Size of Household in Urban Areas

38. The following Table gives the distribution of districts according to the average size of urban households in 52 districts of the State:

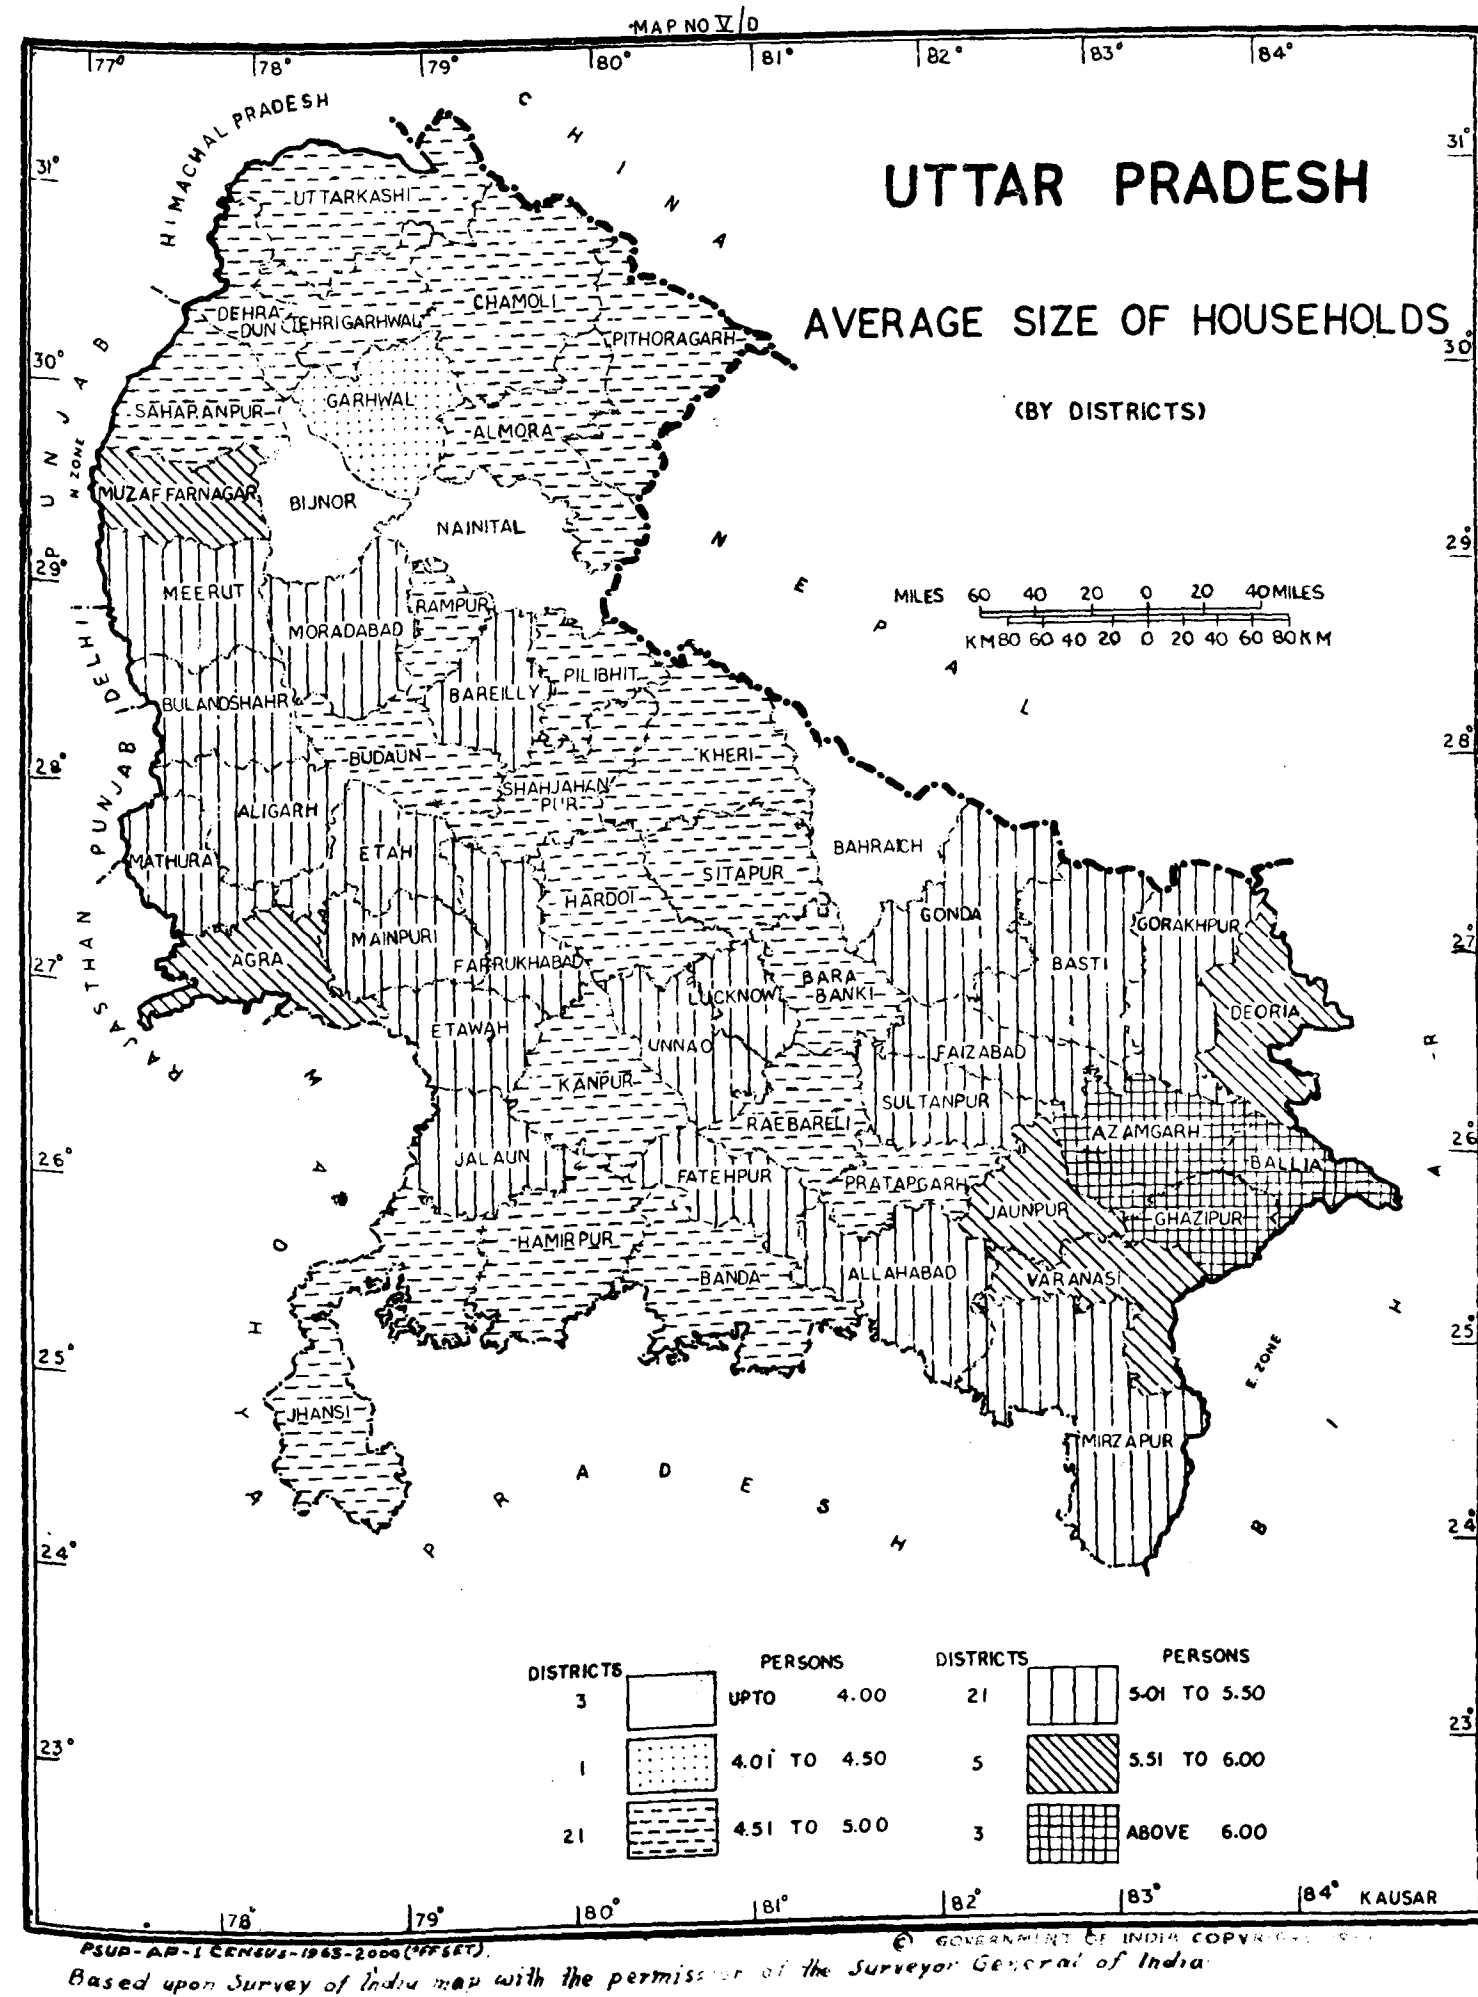

TABLE 5.29—Distribution of Districts by average Size of Household (Urban)

Range	Number of Districts
Up to 3·50	1
3·51—4·00	2
4·01—4·50	5
4·51—5·00	15
5·01—5·50	21
5·51 and Above	8

In the majority of districts the size of household varies between 4.51 and 5.50. Districts having the smallest urban households are Uttar Kashi (3.15), Garhwal (3.94) and Bijnor (3.89). Many inhabitants of the towns of these districts keep their families in villages. Districts where the number of persons per household is more than 5.50 are Moradabad (5.62), Agra (5.56), Jalaun (5.52), Deoria (5.62), Azamgarh (5.52), Jaunpur (5.66), Ballia (5.79) and Ghazipur (5.57).

Size of Household in Cities and Towns with Population of 50,000 and Above

39. The following Table gives the distribution of 35 towns having population of 50,000

and above according to the number of persons per household :

TABLE 5.30—Distribution of Class I and II Towns by average Size of Household

Range	Number of Towns
Up to 4.50	3
4.51—5.00	9
5.01—5.50	14
5.51 and Above	9

In a majority of towns the size of household varies between 4.51 and 5.50. Towns having the smallest households are Dehra Dun (4.44), Hardwar (3.97) and Kanpur M. C. (4.46). Towns in which the average household has more than 5.50 inmates are Sambhal (5.92), Amroha (5.51), Moradabad (6.14), Bareilly (5.52), Meerut M. B. (5.98), Hapur (5.62), Hathras (5.74), Agra (5.68) and Jaunpur (5.88)—all of which, with the exception of Jaunpur, are in the western U. P. Of all the cities, Moradabad has the largest average household.

Size of Households in Rural Areas according to the Number of Rooms

Households with One Room

40. In 48 districts the average number of persons per household varies between 3.01 and 4.50. Districts having less than 3.00 are Naini Tal (2.41), Rae Bareilly (2.69) and Bahraich (2.69) and districts having more than 4.50 are Bulandshahr (4.56), Mathura (4.54) and Agra (4.76). Conditions of living in the rural areas of these three districts are very congested.

Households with Two Rooms

41. In 47 districts the average number of persons per household varies between 4.01 and 5.50. The three districts having less than 4.00 persons are Naini Tal (2.14), Bijnor (3.26) and Bahraich (3.43). Districts which have an average of more than 5.50 are Bareilly (5.60), Muzaffarnagar (5.79), Mathura (5.52) and Agra (5.61).

Households with Three Rooms

42. In 39 districts the average is between 4.01 and 6.00. The two districts which have a smaller average are Naini Tal (3.91) and Bijnor (1.88). District which have an average exceeding 6.25

are Muzaffarnagar (6.51), Meerut (6.26), Bulandshahr (6.52), Agra (6.32), Etah (6.34) and Ballia (6.31).

Households with Four Rooms

43. In 42 districts the average number of persons varies between 5.01 and 7.00. The four districts with the smallest average are Garhwal (4.83), Naini Tal (4.43), Bijnor (4.50) and Bahraich (4.95). Districts where the average is more than 7.00 are Muzaffarnagar (7.40), Meerut (7.15), Bulandshahr (7.18), Aligarh (7.04), Gorakhpur (7.17), Ballia (7.18), Varanasi (7.45) and Mirzapur (7.14).

Households with Five Rooms and Above

44. In 46 districts the average number of persons per household varies between 6.51 and 9.00. The six districts which have an average lower than 6.51 are Garhwal (5.86), Fatehpur (6.21), Hamirpur (6.46), Banda (6.10), Sitapur (6.36) and Bahraich (6.40). The two districts having an average exceeding 9.00 are Muzaffarnagar (9.89) and Mirzapur (9.04).

Size of Households in Urban Areas according to the Number of Rooms

Household with One Room

45. In 44 districts, the average varies between 3.01 and 4.50. Districts having an average below 3.00 are Uttar Kashi (1.76), Almora (2.39), Banda (2.85), Faizabad (2.85) and Pratapgarh (2.06). The three districts which have an average of more than 4.50 persons per household are Moradabad (4.65), Pilibhit (4.52) and Agra (4.51). In the towns of these districts there is acute congestion.

Households with Two Rooms

46. In 40 districts the average varies between 4.51 and 5.50. Districts where the average number of persons is less than 4.51 are Uttar Kashi (3.31), Tehri Garhwal (3.30), Garhwal (3.74), Almora (3.87), Bijnor (3.51) and Banda (4.04). Districts in which the average number of persons is more than 5.50 are Moradabad (5.98), Bareilly (5.84), Meerut (5.69), Agra (6.11), Lucknow (6.46) and Deoria (6.23).

Households with Three Rooms

47. In 9 districts the average is between 5.01 and 5.50, and in 31 between 5.51 and 6.50.

Districts where the average number of persons per household is less than 5.01 are Tehri Garhwal (4.02), Almora (4.66), Naini Tal (3.87), Allahabad (4.59) and Hamirpur (4.99). Districts where the proportion is more than 6.50 are Moradabad (7.49), Bareilly (6.68), Meerut (6.52), Aligarh (6.90), Agra (6.87), Etah (6.57), and Pratapgarh (6.57).

Households with Four Rooms

48. In 44 districts the average varies between 5.51 and 7.50. Districts where the proportion is less than 5.51 are Uttar Kashi (5.10), Dehra Dun (5.30) and Hardoi (4.76). Districts where the average number of persons per household is more than 7.50 are Budaun (8.89), Rampur (7.80), Bareilly (7.63), Faizabad (7.65) and Pratapgarh (9.61).

Households with Five Rooms and Above

49. In 42 districts the average varies between 6.51 and 9.00. Names of districts where the proportion is less than 6.51 are Uttar Kashi (5.73), Tehri Garhwal (6.48), Garhwal (6.08) and Bijnor (6.24). Districts where the average number of persons per household is more than 9.00 are Moradabad (9.09), Meerut (9.17), Agra (9.14), Gonda (10.97), Faizabad (9.25) and Ballia (9.05).

The large dwellings of Uttar Kashi, Tehri Garhwal, Garhwal and Bijnor districts accommodate comparatively fewer persons.

Size of Households in Cities/Towns with Population of 50,000 and Above according to Number of Rooms

Households with One Room

50. The following Table gives the distribution of 35 towns according to the average number of persons per household living in one room :

TABLE 5.31—Distribution of Class I and II Towns by average Number of Persons per Household occupying One Room

Range	Number of Towns
Up to 3.50	2
3.51—4.00	12
4.01—4.50	12
4.51 and Above	9

Dehra Dun (3.31) and Faizabad-cum-Ayodhya (2.97) have the smallest number of persons per household. Towns having more than 4.50 persons per household in occupation of one room are Sambhal (4.61), Amroha (4.66), Moradabad (4.91), Bareilly (4.53), Pilibhit (4.65), Hapur (4.51), Meerut Cantt. (4.96), Hathras (4.56), and Agra (4.66). These figures speak of the extent of congestion at these places, all situated in the western U. P.

Households with Two Rooms

51. The following Table gives distribution of 35 towns according to the average number of persons per household living in two rooms :

TABLE 5.32—Distribution of Class I and II Towns by average Number of Persons per Household occupying Two Rooms

Range	Number of Towns
Up to 4.00	2
4.01—4.50	1
4.51—5.00	8
5.01—5.50	10
5.51—6.00	10
6.01 and Above	4

From the above Table it will be seen that for most of the towns the number of persons per household is between 4.51 and 6.00. Towns where the average number is up to 4.50 are Hardwar (3.95), Muzaffargarh (4.26) and Meerut Cantt. (3.23). Towns where the average number is more than 6.00 are Moradabad (6.94), Meerut M. B. (8.76), Firozabad (8.00), and Lucknow (6.60).

Households with Three Rooms

52. The following Table gives the distribution of 35 towns according to the average number of persons per household living in three rooms :

TABLE 5.33—Distribution of Class I and II Towns by average Number of Persons per Household occupying Three Rooms

Range	Number of Towns
Up to 5.00	4
5.01—5.50	4
5.51—6.00	5
6.01—6.50	11
6.51—7.00	6
7.01 and Above	5

Cantt. (8.68), Firozabad (8.18), and Faizabad-cum-Ayodhya (8.25).

Households with Five Rooms and Above

54. The following Table gives the distribution of 35 towns according to the average number of persons per household living in five rooms and more :

TABLE 5.35—Distribution of Class I and II Towns by average Number of Persons per Household occupying Five Rooms and More

Range	Number of Towns
Up to 7.00	3
7.01—7.50	4
7.51—8.00	8
8.01—8.50	6
8.51—9.00	6
9.01 and Above	8

From the above Table it will be seen that in a majority of towns the average number of persons per household is between 7.01 and 9.00. Names of towns where the proportion is below 7.01 are Bareilly (6.63), Meerut M.B. (6.55) and Kanpur Cantt. (6.12). In these towns the large dwellings have comparatively fewer inhabitants. Towns where the proportion is more than 9.00 are Amroha (10.19), Moradabad (9.25), Ghaziabad (9.63), Meerut Cantt. (14.89), Agra (9.63), Firozabad (10.02), Sitapur (9.32) and Faizabad-cum-Ayodhya (9.76).

For the majority of towns the average number of persons per household is between 5.01 and 7.00. Towns having an average of below 5.01 are Dehra Dun (4.89), Hardwar (3.66), Meerut Cantt. (4.83) and Allahabad (4.56). Towns where the average is more than 7.00 are Sambhal (9.86), Moradabad (12.07), Meerut M. B. (7.76), Hathras (7.80) and Firozabad (7.20).

Households with Four Rooms

53. The following Table gives the distribution of 35 towns according to the average number of persons per household living in four rooms :

TABLE 5.34—Distribution of Class I and II Towns by average Number of Persons per Household occupying Four Rooms

Range	Number of Towns
Up to 6.00	5
6.01—6.50	4
6.51—7.00	10
7.01—7.50	6
7.51—8.00	6
8.01 and Above	4

For the majority of towns the average number of persons per household is between 6.01 and 8.00. Names of towns where the average is below 6.01 are Pilibhit (5.87), Shahjahanpur (5.97), Dehra Dun (5.45), Hardwar (5.55) and Allahabad (5.79). Towns where the average is more than 8.00 are Budaun (10.12), Meerut

A Note on Settlement Pattern of Villages and House Types

A revenue *mauza* which forms the unit of revenue records is a demarcated area of land. It may be totally uninhabited or may have habitation. A revenue *mauza* with a number of human dwellings is usually called a village. Houses in a village may be scattered or may be in the form of an assemblage. There can also be several assemblages within the limits of a *mauza*. Each of these is strictly a hamlet, but the hamlet which takes its name after the *mauza* is loosely called the main village and the remaining ones only are called hamlets.

Villages were formed as man took to a settled agricultural life and side by side carried on rearing of cattle. Every village besides human dwellings has tracts of cultivable land, pasture-land and unculturable waste. India being predominantly an agricultural country, an overwhelming proportion of its population lives in villages. In Uttar Pradesh 87.1 per cent of the population is rural and there are 112,624 inhabited villages strewn all over the State. In agriculturally prosperous areas villages are compact. If in such areas dwellings become scattered, it shows that agricultural prosperity has declined. "Scattered type of occupation is an index of agricultural deterioration in old areas of settlement where otherwise the compact village is the general type."¹ Growth of size is another index of agricultural prosperity. "In the old settlement, if the village has not been enlarged, this means that the progress in agriculture has not kept pace and people must have migrated to surrounding areas where means of livelihood are available. Contrary to it, big villages have prosperous agriculture with the result that people have kept on dwelling in the same spot."²

Whenever a new settlement was contemplated, a convenient place was selected, but at times an inconvenient spot had to be chosen. "Potable water, defensible site and fertile soil are the main factors which determine the location and size of villages. Land forms, climate, vegetation and communications also determine village sites. Potable water is obtainable from a spring, a well, a reservoir, a stream or a canal. So where these are found at the outskirts of a sand-dune, a mountain ridge, a river bend, a raised ground in a marshy land, a lake etc., hamlets and villages are established".³ Since cultivation is the mainstay of the village economy, every effort was made to bring under cultivation the maximum extent of land, subject, of course, to the need of producing more and the availability of resources to exploit the land. In the earlier stages, when land was plentiful in comparison to demand, dwellings could be constructed on cultivable land. But with the passage of time, population increased resulting in greater pressure on land and hence *abadi* sites were located on cultivable land only when unculturable land was not available.

Superstition is another factor playing an important part in the location of *abadi*. No one would like to inhabit a place with unhappy and unpleasant associations in the past. For example, the *Tharus* in district Kheri who live in villages located in the forest belt of the *Tarai* Region would vacate a site as soon as the place is visited by an epidemic leading to deaths on a large scale. Thus the site of their original settlement is subject to constant change.

Proximity to fertile land and a good source of water supply are also important factors determining the selection of *abadi* site. A fairly large number of village and town settlements are located by the river side but at an elevation to avoid the risk of floods. Violent floods are a deterrent to the construction of dwellings in the vulnerable area. However, in some cases people continue to live in villages visited by floods annually, because the area of land liable to floods is too large to be left unpopulated. In Ballia, Deoria, Azamgarh, Ghazipur and some other districts of the eastern Uttar Pradesh, for example, people go on living in the *diar* and other areas inundated by flood water every year. They are vacated when the rivers are in spate and the danger to life and property is imminent, but are reoccupied when the flood recedes. "Save where the tract is too wide and too distant from the unsubmerged land to be cultivated therefrom, villages do not exist; where settlements upon the ground are necessary, the cultivators live in thatched huts with walls of wattle which can be removed in the event of an inundation, these settlements having the distinctive names of *chhapras*."⁴

In the hill areas, the availability of sun is another factor determining settlement. The sunny side of the hill is naturally more populated. Also the land on a hill should be such as can be terraced without much difficulty. The shelter of a forest or a large number of trees is also necessary for protection of houses from avalanches and landslides.

Land in the vicinity of area which is water-logged or covered with stagnant pools is not selected for habitation. The *Tarai* belts in the Himalayas remained sparsely populated for long due to its damp and malarial climate. Only after the successful implementation of malaria-eradication programme the *Tarai* is getting populated. Lastly, areas difficult of access are sparsely populated.

When the site has been selected, the question of allocation of land to settlers for the construction of houses arises. At this juncture caste plays the most important role. Members of the same caste usually congregate at one place and build houses close to each other. *Harjans* are mostly assigned an isolated area on the outskirts of the main settlement so that the traditionally high-caste people are not

1. *Principles of Human Geography* by Blache P. Vidal, p. 101
2. *India's Population Problem* by C. B. Mameria, pp. 167-168
3. *Ibid* p. 166
4. *Gazetteer of Ballia, 1907*

'polluted'. This arrangement still persists. Any deviation from the established practice is on account of the change in the attitude of the traditional high castes towards the lower castes as a result of reform measures and the force of circumstances. So great was the influence of caste in ancient times that the intermingling of residential houses of the upper and the lower castes was a rarity.

Houses in villages are not usually scattered. Contiguity and compactness ensure safety and social life. Where handicaps imposed by nature are too powerful to be eliminated through human endeavour houses are of necessity dispersed. On the hills there is dearth of level land and scattered houses exist. In the case of forest or *Tarai* villages houses are built of materials such as straw, grass, reed, and wood which are liable to catch fire easily. Such houses are, therefore, situated at a distance from each other, so that, if fire breaks out, it might not spread to other houses.

While selecting land for *abadi* surplus land is reserved so that more houses could be constructed when population increases in the course of time. On many occasions vacant space is not subsequently available to a caste in continuation of the existing block, and hence another *tola* or group of houses of the same caste comes into existence. A plot of land is set apart for serving as a cremation-ground as far as possible by the bank of a river or a pond. An open place is often left for use as a market-place or a common meeting ground on the outskirts of the village. Then there is village pasture having deep roots in the village economy.

While most of the villages were inhabited predominantly by the agricultural people with representatives of other professions and ranks to complete the village economy, some of the villages were also founded to serve military ends. Quite a few served as halting places where unserviceable animals and vehicles could be left and new ones obtained. Such villages to begin with were simple in character and were occupied by a particular class of persons. In course of time, these grew into composite villages where all classes of people, irrespective of caste and profession, lived together as a corporate unit. Such simple antiquated villages are still found in the remote and backward parts of the State.

Dr. Acharyya recounts the salient features of a general village in ancient India thus: "Each village is surrounded by a wall made of brick or stone. Beyond this wall there is a ditch broad and deep enough to cause serious obstructions in the event of an attack on the village. There are generally four gates at the middle of the four sides and as many at the four corners. Inside the wall, there is a large street running all round the village. There are two other large streets, each of which connects two opposite main gates. They intersect each other at the centre of the village, where a temple or a hall is generally built for the meeting of the villagers. The village is, thus, divided into four large blocks, each of which is again sub-divided into many blocks by streets which are always straight, and which run from one end to the other of a main block. The two main streets crossing at the centre have houses only on one side facing the street. The ground floors of these houses on the main street consist of shops. The surrounding street has also houses on one side. There are mainly public buildings, such as schools, colleges, libraries, guest-

houses, etc. All other streets generally have residential buildings on both sides. The houses high or low are always uniform in make. The drains (*jaladhārā*, i.e., water passages) are made towards the sloping of the village. Tanks and ponds are dug in all the inhabited parts and located in such quarters as can conveniently be reached by a number of inhabitants. Temples of public worship as well as the public commons, gardens, and parks are similarly situated. The people of the same caste or profession are generally housed in the same quarter—. The best quarters are generally reserved for the Brahmans and the artist classes. The habitations of the Chandālas as well as the places for cremation are located outside the village wall (in the north-west in particular). The temples of fearful deities such as Chamunda are also placed outside the wall."⁵

With the passage of time conditions of war and uncertainty subsided and fortified villages which were founded with a self-defence bias came to be replaced by convenient and accessible villages. Conscious planning is almost conspicuous by its absence in the development of villages in this State. With the growth in population, there was an uncontrolled and wanton construction of houses according to necessity. In Memoir No. 8-1961, *Peasant Life In India* published by the Anthropological Survey of India villages have been divided into the following four types:—

"(1) Shapeless cluster or agglomerate with streets not forming an integral part of the design. These may be of the (i) massive or (ii) dispersed type, in which the village is reckoned to consist of an assemblage of discrete clusters of comparatively small size.

It may be noted here that in villages belonging to this order there may be a tortuous or irregular road; but this grows according to local requirements, not as part of the original design.

(2) Linear cluster or assemblage with a regular open space or straight street provided between parallel rows of houses.

(3) Square or Rectangular cluster or agglomerate with straight streets running parallel or at right angles to one another.

(4) Villages formed of Isolated Homesteads, a number of which are treated together as a *mauza* for convenience of collection of rent or taxes.

"...much of the Gangetic plain, Rajasthan, the Malwa plateau and portions of Maharashtra are characterised by shapeless clusters. In western Rajasthan, in the districts Jaisalmer and Barmer, these occur along with villages of the dispersed type. Dispersed clusters by themselves occur over a long stretch of the Western Ghats from Thana to Kolhapur and also in portions of Kerala. The same types, namely, shapeless cluster and dispersed cluster, occur also in eastern Uttar Pradesh, portions of Madhya Pradesh and the Himalayan or Sub-Himalayan districts in the north of Bihar and practically over the whole of the Brahmaputra valley. Manipur and Mizo Districts also have examples of the clustered type.

"When we come to the linear type, the best examples are observed in the coastal districts of Orissa and Andhra Pradesh. This extends westwards into a large portion

of the Telugu-speaking area of the former princely state of Hyderabad. Gujarat also shows the same type in large villages, and even smaller ones are formed of parallel rows separated by broad streets. This is true of Kutch and Saurashtra as well as of districts stretching from the south of Rajasthan to Surat.

"The square development of the linear, if we may call it so, extends over a solid portion of Madras State including both the dry Rayalaseema districts as well as the prosperous agricultural districts of the coastal plain."

"There is an interesting feature noticeable in coastal Orissa and northern coastal Andhra. The houses tend to be contiguous and laid in an unbroken line, adjacent ones quite often sharing a common wall between themselves. As one proceeds southwards to Madras the arrangements remain the same, but the houses become separate—".⁶

The portion of Uttar Pradesh falling in the area of the Gangetic plain is the region of the Shapeless Agglomerate. The western part of the State is characterised by villages belonging to shapeless cluster, while in eastern Uttar Pradesh both the shapeless and dispersed clusters are found side by side. In the north-western portion of the State comprising the hill districts of Uttar Kashi, Chamoli, Pithoragarh, Tehri Garhwal, Garhwal, Almora, Naini Tal and Dehra Dun the rural settlements are of composite orders belonging to Dispersed Clusters and Isolated Homesteads. Villages lying in the south of Mirzapur district and in the south-east of Allahabad district are formed of Isolated Homesteads. Villages belonging to Linear Assemblage and Linear and Square Agglomerate are almost absent.

Himalayan Region—In the Himalayan region villages are usually small. The settlement is usually located on an airy spur, half-way up the sunny side of the hilly slopes, with terraced plots for cultivation all round. Fields are usually situated at a considerable distance from human habitation. Outpost quarters, locally called *chhaonis*, are set up in the distant fields to serve as sheds for cattle and temporary residence during agricultural operations. A village situated near the top of the hill is called a *dhar*. Scheduled Castes live in a separate cluster either on the outskirts or at a lower level. For selecting a site availability of water in the vicinity is an important consideration. Generally there are two sources of water, one for high castes and the other for the low castes. Since the *abadi* site is not level but slopy, houses are constructed at varying heights. Some lanes are paved with stones. Other lands and footpaths are strewn with *bajri*. The villages generally wear a rugged and clumsy appearance.

In villages of Jaunsar-Bawar (Chakrata tahsil) of Dehra Dun district the distribution of houses within the *abadi* is according to lineage. Originally every family reserved surplus space inside and about its house. On its division more huts for new units were built close to the ancestral house. Thus families having a common ancestry have a common home, locally known as a *bhera*.

Most of the villages consist of dispersed clusters and isolated homesteads. The life in the dispersed type of villages differs from that in the nucleated type. "Isolated houses or hamlets are tiny foci incapable of exerting any attraction comparable to that which centralises cultivated fields about the clustered villages on great plains. In its large aspects the appearance of the landscape resulting from such forms of establishments is characteristic of an entirely different type of agriculture, of another mode of life, and of a totally different arrangement from that of clustered villages."⁷

Gangetic Plain—The northern fringe of the Gangetic Plain is *Tarai* and *Bhabar*. The *Bhabar* is the piedmont zone skirting the Outer Himalayas where rivers suddenly flatten out and deposit the coarser boulders and gravels. In this tract, 20 miles wide in the west and narrowing eastwards, smaller streams except when in spate are lost. They reappear after some distance and deposit their finer material. A marshy tract covered with jungle and long grass has been formed, called the *Tarai*, stretching in a thin belt from Saharanpur to Deoria. In the *Tarai* and *Bhabar* most of the cultivators have their homesteads on their fields. In forest villages the population consists mainly of *laungiya* settlers and forest workers such as grass-cutters, sawyers, lumbermen, etc. The villages in the forest tract are mere clearings in the jungle and are seldom of a permanent character. Very few of them are of any antiquity. Village sites are scattered and *mauzas* cover a large area. Houses are usually of grass or wattle. As land is plentiful houses are constructed at a distance from each other. Besides the villages mentioned afore, there are especially settled villages of the *Tharu* and *Bhoksa* communities.

The villages of the Gangetic Plain outside the *Tarai* are of a permanent character. All districts of the West Plain,⁸ Allahabad district of the Central Plain⁹ and Bahraich district of the East Plain¹⁰ consist mostly of villages which can be called 'shapeless agglomerates' in appearance.

Most of the districts of the Central and East Plains have mixed types of villages, viz., 'shapeless agglomerates' and 'dispersed clusters.'

In the Upper Doab the habitation sites when viewed from outside look like a lofty mud-walled enclosure pierced by a few openings. In the Lower Doab they are irregular clusters of mud-huts built round the large brick dwellings of the ex-zamindars.

In Rohilkhand the usual type consists of a cluster of mud-built huts round the better dwellings of ex-zamindars.

In the eastern districts they consist of a small collection of mud-houses erected on an elevation, especially where the country is liable to inundation.

6. *Peasant Life of India*, pp. 1 to 4

7. *Principles of Human Geography*, p. 301

8. West Plain comprises all districts of Rohilkhand Division, all districts of Meerut Division except Dehra Dun, and Farrukhabad and Etawah districts of Allahabad Division and Kheri district of Lucknow Division

9. Central Plain comprises Kanpur, Fatehpur and Allahabad districts of Allahabad Division, all districts of Lucknow Division except Kheri, and all districts of Faizabad Division except Bahraich and Gonda

10. East Plain comprises Bahraich and Gonda districts of Faizabad Division, all districts of Gorakhpur Division, and all districts of Varanasi Division except Mirzapur

Hills and Plateau—This Natural Division comprises all the districts of Jhansi Division and Mirzapur district of Varanasi Division. Villages of the districts of Jhansi Division as well are more or less 'shapeless agglomerates'. They are situated at a much greater distance from each other than in the Gangetic Plain. Cluster of houses are perched on elevated sites. Their substantial nature lends an air of solidarity and strength. Villages situated on hillocks present a fort-like appearance. In areas intersected by streams 'dispersed clusters' are found. Villages of Mirzapur district differ from those in the same Natural Division. In a thin belt in the middle of the district, 'dispersed clusters' exist, while in the remainder of the district villages consist of 'isolated homesteads'.

Villages by Size of Population

The following Table shows the average village population in India and the various States:—

India and States			
INDIA	634	Madras	1,749
Andhra Pradesh	1,097	Maharashtra	792
Assam	426	Mysore	695
Bihar	629	Orissa	354
Gujarat	824	Punjab	763
Jammu and Kashmir	452	Rajasthan	523
Kerala	9,117	Uttar Pradesh	571
Madhya Pradesh	394	West Bengal	685

The average village in Kerala has a very high population (9,117). Madras (1,749) and Andhra Pradesh (1,097) are other two States having a high average village population. The villages of Uttar Pradesh with an average population of 571 persons are more populous than those of Orissa (354), Madhya Pradesh (394), Assam (426), Jammu and Kashmir (452) and Rajasthan (523).

The following Table shows the average village population in the State and natural divisions:—

State and Natural Divisions	Average Village Population	
	1951	1961
Uttar Pradesh		
Himalayan	489	571
West Plain	150	179
Central Plain	632	759
East Plain	558	642
Hills and Plateau	470	535
	456	555

In the Gangetic Plain villages get smaller from the west to the east. Those of the Himalayan Division are the smallest.

The districts having the largest average village population are all in the West Plain, viz., Meerut (1,455), Muzaffarnagar (1,351), Mathura (1,036), and Agra (1,005). Those having the lowest average village population are in the Himalayan Division, viz., Garhwal (142), Almora (156), Pithoragarh (158) and Tehri Garhwal (175).

The following Table gives the percentage of villages of various sizes in the State and the natural divisions:—

State and Natural Divisions	Percentage of Villages with Population of				
	Above 5,000	2,000 to 4,999	1,000 to 1,999	500 to 999	Under 500
1	2	3	4	5	6
Uttar Pradesh	0.3	3.4	11.4	23.1	61.8
Himalayan	0.0	0.2	0.6	4.1	95.1
West Plain	0.6	5.7	15.9	29.1	48.7
Central Plain	0.2	3.6	14.0	27.7	54.5
East Plain	0.2	2.6	10.4	23.4	63.4
Hills and Plateau	0.3	3.3	11.1	21.9	63.4

The number of villages with a population of 5,000 and above has considerably increased since 1951. The main reason for this is the change in the definition of urban areas, as a result of which many Town Areas treated as urban in 1951 have come under the category of villages.

Size and Distribution of Hamlets

Hamlets spring up either as habitations of persons belonging to one caste living separately from others or as homesteads of cultivators who wish to live close to their fields for convenience of agricultural operations. Increase in the number of hamlets is not only the sign of increase in population but also of settled times. In olden days, when the times were troubled, people used to live close together in compact sites and there was little dispersal. With the improvement in the law and order situation hamlets grew in number as more and more people found it easy and safe to live in the proximity of their fields. The following Table gives the number of hamlets per inhabited village and the average hamlet population in the State and the natural divisions treating the main village also as a hamlet:—

State and Natural Divisions	Hamlets per Inhabited Village		Average Population per Hamlet	
	1951	1961	1951	1961
Uttar Pradesh	2.30	2.32	212	246
Himalayan	1.09	1.20	138	149
West Plain	1.79	1.77	353	430
Central Plain	3.36	3.33	166	193
East Plain	2.66	2.69	176	199
Hills and Plateau	1.51	1.62	301	342

The Central Plain has the largest number of hamlets (3.33) per village followed by the East Plain (2.69), the West Plain (1.77), Hills and Plateau (1.62) and the Himalayan (1.20) Divisions. The number of hamlets per village has not shown any increase in the West and the Central Plains since 1951. In the Himalayan Division there are practically no hamlets except in Dehra Dun district, where the average is 2.3 per village. Similar is the case with the Hills and Plateau Division. Only Banda district is an exception where the average number per village is 3.2. The marked feature of this region is that the black-soil area has an insignificant number of hamlets due to its unhealthiness while the red-soil area has a greater dispersion in small settlements. In Bijnor, Saharanpur and Meerut districts the *abadi* is concentrated in large sites with little dispersion. Mathura (2.1), Agra (2.7), Etah (2.5), Mainpuri (3.2), Farrukhabad (2.8), Etawah (3.0) and Kheri (2.8) districts of the West Plain, however, have a considerable number of hamlets. In the East Plain

Gonda (6.0) and Bahraich (4.5) are prolific in this respect. The remaining districts have between 2 and 3 per village. The Central Plain has by far the largest number of hamlets per village, the districts having more than 3 hamlets per village being Sitapur (3.2), Rae Bareilly (4.5), Bara Banki (3.3), Faizabad (3.8), Sultanpur (4.1) and Pratapgarh (4.0).

The average population per hamlet in 1961 is 246 as compared to 212 in 1951. It is the lowest in the Himalayan Division on account of a low average density. Though the number of inhabited sites is large, the houses are not huddled together. Hamlets of Pithoragarh (127), Garhwal (133), Dehra Dun (135) and Uttar Kashi (138) districts have an average population of less than 140. Hamlets of the West Plain and Hills and Plateau have a large population. People perforce had to live together in large compact sites because of insecure conditions that prevailed in the 18th century. The average population per hamlet exceeds 1,000 in the districts of Meerut (1,295) and Muzaffarnagar (1,068) of the West Plain. Next to them are districts Bulandshahr (788), Saharanpur (650) and Mathura (503) of the West Plain and districts Hamirpur (688) and Jalaun (507) of Hills and Plateau in which the average exceeds 500. Hamlets in districts Etawah (240), Mainpuri (248) and Farrukhabad (250) of the West Plain and Mirzapur (260) and Banda (231) of Hills and Plateau are, however, small, having less than 300 persons. The population of the Central and East Plains is well dispersed. Districts Sultanpur (134), Pratapgarh (139) and Faizabad (143) of the Central Plain and Gonda (116) of the East Plain have small hamlets with an average population of less than 150.

Types of Houses

Houses can be classified into three types named below, following the pattern of the *Peasant Life of India*:—

1. with rectangular ground-plan and horizontal roof,
2. with rectangular ground-plan and inclined roof, and
3. with circular ground-plan and conical roof.

Rectangular Floors and Flat Roofs—Such houses are limited to regions having an annual rainfall below 100 cm. (40" approx.). Such houses are even more prominent in areas where rainfall is less than 60 cm. They occur widely in Jammu, the Punjab, western Uttar Pradesh, Rajasthan excluding Aravalli hills, central Maharashtra, eastern half of Mysore and the greater part of Andhra Pradesh.

In Mysore the courtyard is generally at the back. In Uttar Pradesh and parts of Rajasthan it is mostly in the centre and serves as a working place for the women of the household. Rooms are built about it on the outside. In Maharashtra even though a central courtyard exists the arrangement of rooms is different. A compound wall is first built and rooms are constructed continuously along its inner side. In other parts of the country the courtyard can be in the front or the back or the centre.

Districts of Uttar Pradesh which have predominantly rectangular rooms and flat roofs in rural areas are Bijnor (south), Moradabad (south), Budaun, Rampur (south), Bareilly (south), Pilibhit (south), Shahjahanpur, Saharanpur (west), Muzaffarnagar, Meerut, Bulandshahr, Aligarh, Ma-

thura, Agra, Etah, Mainpuri, Farrukhabad, Etawah and Kheri (south-west) of the West Plain; Kanpur, Fatehpur, Sitapur (west), Hardoi, Unnao, Lucknow, Rae Bareilly, Bara Banki, Sultanpur (north-west) and Pratapgarh (south-west) of the Central Plain. The flat roof is built of wooden beams, planks, stalks, bamboo, twigs, dry leaves and matting on which prepared clay is spread. Final touches are given with cow-dung to make the upper surface smooth. Arrangement is made for draining the rain-water from the roof by fixing a *parhala* (outlet) made of tin (in some cases of wood or of baked clay) at one corner of the roof. The upper edges around the roof are sometimes covered with grass or other matter for protection against heavy showers. If the kitchen is covered, a hole is provided in the roof as an outlet for smoke, which is covered with a piece of broken earthen pot as a precaution against rain-water.

Flat roofs of brick-and-lime are rare in rural areas as only the well-to-do can afford them. Tahsils having more than 10 per cent roofs of this kind are Kichha (Naini Tal), Roorkee (Saharanpur), Mathura and Chatta (Mathura) and Firozabad (Agra). Only *pucca* roofs in tahsil Kichha are made of brick-and-lime. Others are sloping roofs of grass, leaf, reed, thatch, wood or bamboo.

In most of the districts mentioned under flat roofs house walls are made of mud except in Muzaffarnagar, Meerut (part), Bulandshahr (part), Aligarh (part), Mathura (part), Etah and Mainpuri (part) where the unburnt brick is the chief wall material.

Rectangular Floors and Sloping Roofs—Such houses are more common in India. Except in Punjab plains, western U. P. and eastern Mysore they are found everywhere in appreciable number. They are prominent in the mountainous terrain of Kashmir, the Punjab and Uttar Pradesh; the Sub-Himalayan, eastern and southern Uttar Pradesh; Bihar, West Bengal, Assam, Orissa, Madhya Pradesh, plateau region of Rajasthan, Gujarat, Maharashtra (excluding teau region of Rajasthan, western Mysore, Kerala and Madras. In Jammu, remainder of Rajasthan, central Maharashtra and Andhra Pradesh they co-exist with flat-roof houses.

In the Himalayan region the slanting roofs are mostly of slate. In other places they are of thatch or tiles. The framework of the thatch is usually wood or bamboo often with reed matting. Straw or grasses of various kinds are put on it. Alternatively, semi-cylindrical or flat tiles are placed on the framework. "It is interesting that, as one travels from Bengal towards the north-west, straw for thatching first gives place to wheel-made semi-cylindrical tiles in Bihar. Farther west, in eastern Uttar Pradesh, for instance, flat hand-made tiles become increasingly frequent, until in Rajasthan the flat tile alone is employed unless the roof becomes a horizontal one of beaten earth and boards."¹¹

In Uttar Pradesh the roofs consist of two inclined planes which meet in a ridge. Hipped roofs of four inclined planes are rare. Nor are the convex roofs typical of West Bengal found. Roofs in hill districts, namely, Uttar Kashi (part), Chamoli, Pithoragarh (part), Tehri Garhwal, Garhwal, Almora, Naini Tal (Naini Tal tahsil) and Dehra Dun (Chakrata tahsil) are usually of slate. In Dehra Dun (Dehra Dun tahsil), Saharanpur (east), Bijnor (north), Naini Tal (plain portion), Moradabad (north),

Rampur (north), Bareilly (north), Pilibhit (north), Kheri (excluding south-west), Sitapur (east), Bahraich, Gonda (excluding east), Basti (north), Gorakhpur (north-east) and Deoria (north) roofs are thatched with grass, leaves, etc. because of their easy availability. All these lie in the sub-Himalayan belt of the West and East Plains. In Faizabad, Sultanpur (excluding north-west), Pratapgarh (excluding south-west) and Allahabad of the Central Plain, and Basti (excluding north), Gorakhpur (excluding north-east), Deoria (excluding north), Azamgarh, Jaunpur, Ballia, Ghazipur and Varanasi of the East Plain the roofs are mostly tiled.

In the Hills and Plateau Division also, tiled roofs are the most common except in the central portion of Mirzapur district where thatches of straw, grass, leaf, etc. are prominent.

In the Himalayan Division the courtyard is usually in front and in Bundelkhand portion of Hills and Plateau Division it is usually in the centre. In the remaining districts where sloping roofs predominate the courtyard is sometimes in front and sometimes in the centre, but the latter is the prevailing type.

Walls throughout the area of Uttar Pradesh in which sloping roofs are most common are made from mud, except in the Himalayan districts where they are made of stone.

Composite types of houses with rectangular ground-plans and flat or sloping roofs are found side by side in some of the districts of the State such as Meerut, Sitapur, Hardoi, Unnao and Bara Banki, which have a fair sprinkling of thatched houses.

Circular Floors with Conical Roofs—They are found in some parts of Rajasthan, Bihar, Gujarat, Andhra Pradesh and Madras. They are not found anywhere in Uttar Pradesh.

Village Housing Projects Scheme

The problem of rural housing is both complex and enormous. The vast majority of houses are hardly more than thatched huts lacking proper light and ventilation. Drains are absent, lanes are dirty and cattle-sheds are located in houses themselves. Thus there is insanitation all round. A tolerably decent living condition is a basic human need just like food and clothing.

The solution of the problem obviously lies in inhabiting new villages according to a proper plan and replanning the existing villages to the extent possible. The Ministry of Works, Housing and Supply of the Government of India made a provision of Rs. 10 crores in the Second Five Year Plan for rural housing. The sum was meant for setting up housing projects in 5,000 selected villages, which would act as a source of inspiration to other villages. Improvement of housing and physical reconstruction of villages were to be taken up as long-term programmes spread over a period of 10 years. The Government of India advanced loans to the States up to 50 per cent of the cost of construction of a house subject to a maximum of Rs. 1,500.

The scheme came into operation in 1958-59. A *Rural Housing Cell* was set up under the overall control of the Town and Village Planner. The staff consisted of an Executive Engineer, an Assistant Architect, an Assistant Town Planner besides other technical and clerical staff. A Control Committee consisting of the Deputy Secretary, Housing Department, the Town and Village Planner and the Director of Panchayats was also appointed to look after this work.

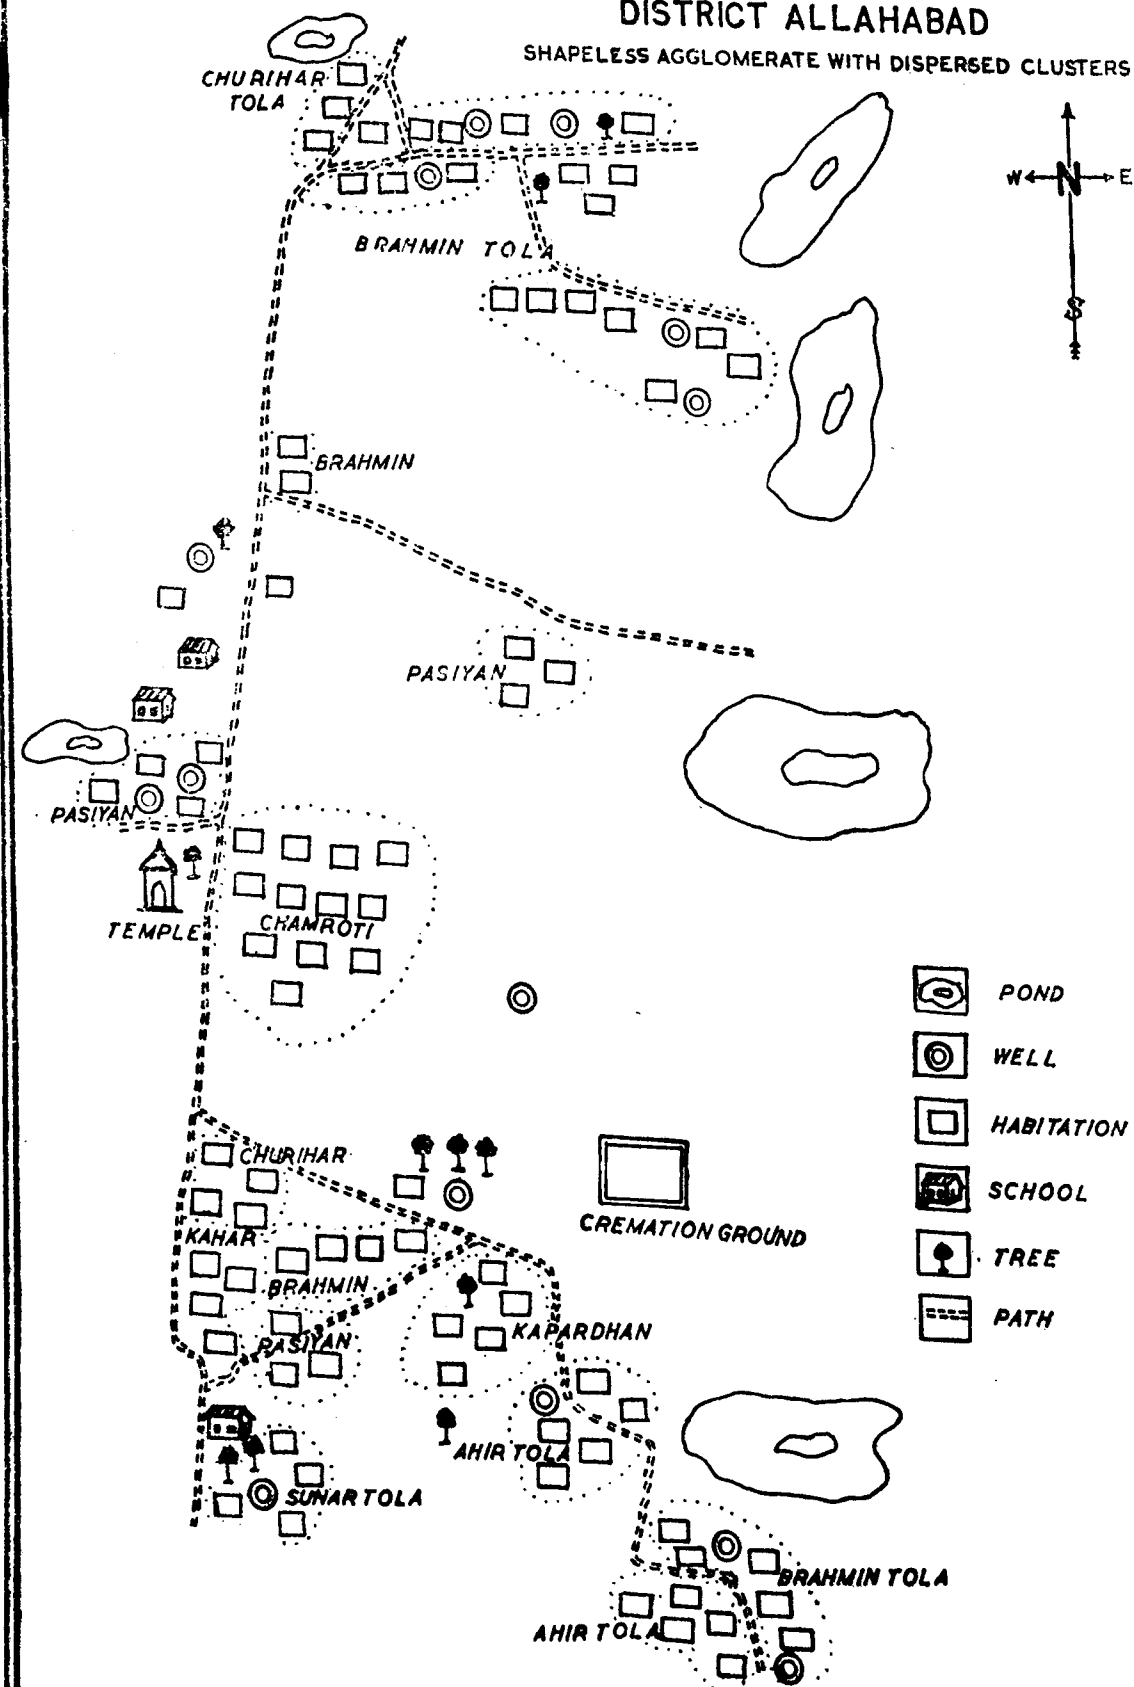

The target for the Second Five Year Plan was 850 villages and for the Third, 500. For various reasons progress did not fulfil expectation. Up to the end of December, 1963 only 240 villages could be covered. The achievements during this period were as follows :—

Year	Number of persons to whom Loan was sanctioned	Number of Houses completed	Number of Houses under construction
1958-59	439	..	21
1959-60	1,463	99	997
1960-61	1,796	486	1,698
1961-62	1,607	543	2,830
1962-63	41	202	2,279
1963-64 (up to 31-12-63)	125	500	1,928

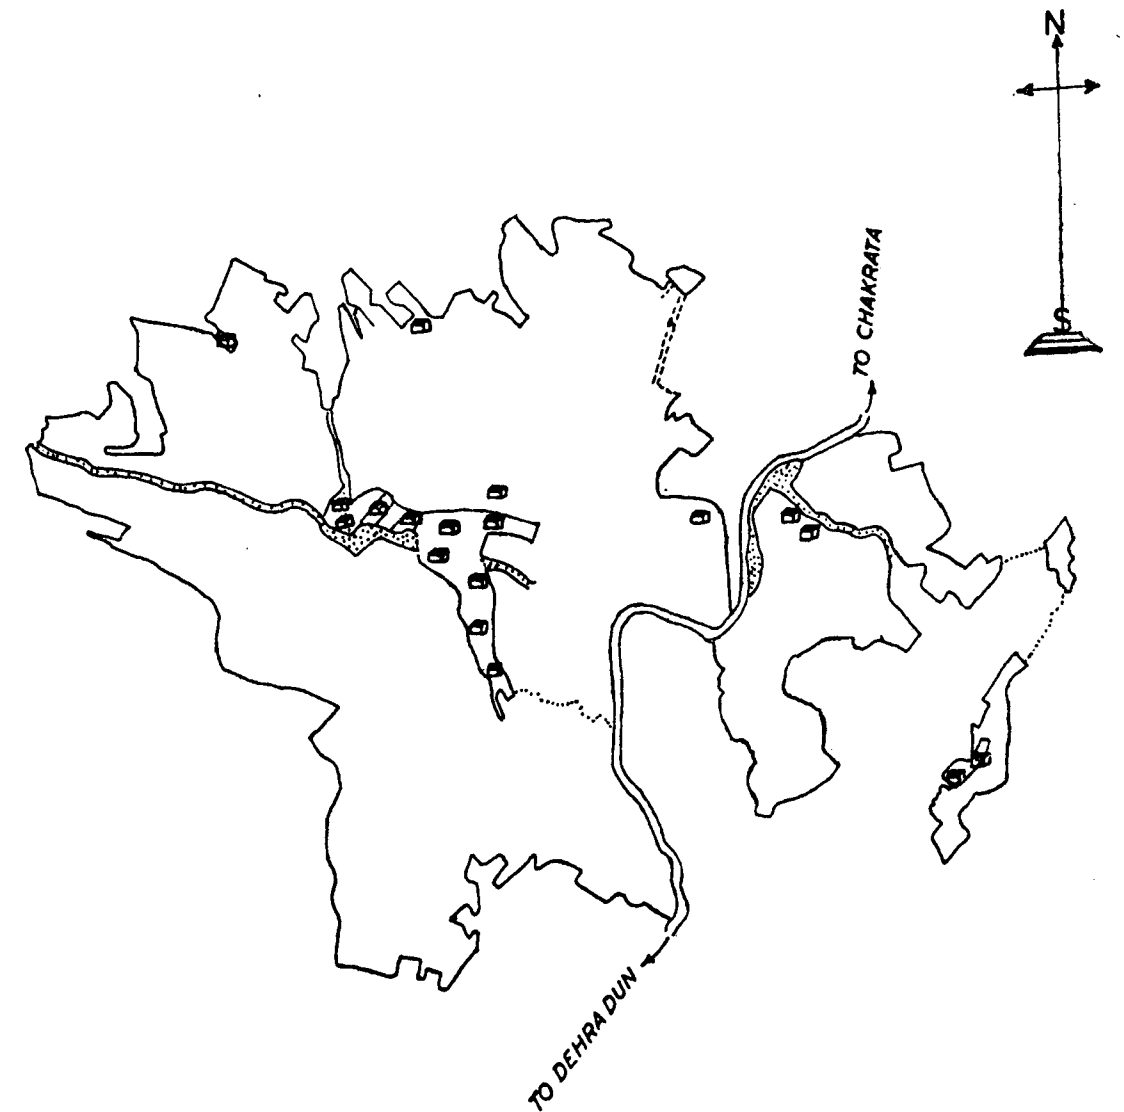

Thus out of the 5,471 persons to whom loans under the Scheme were sanctioned up to the 31st December, 1963 only 1,830 persons completed their houses within this period.

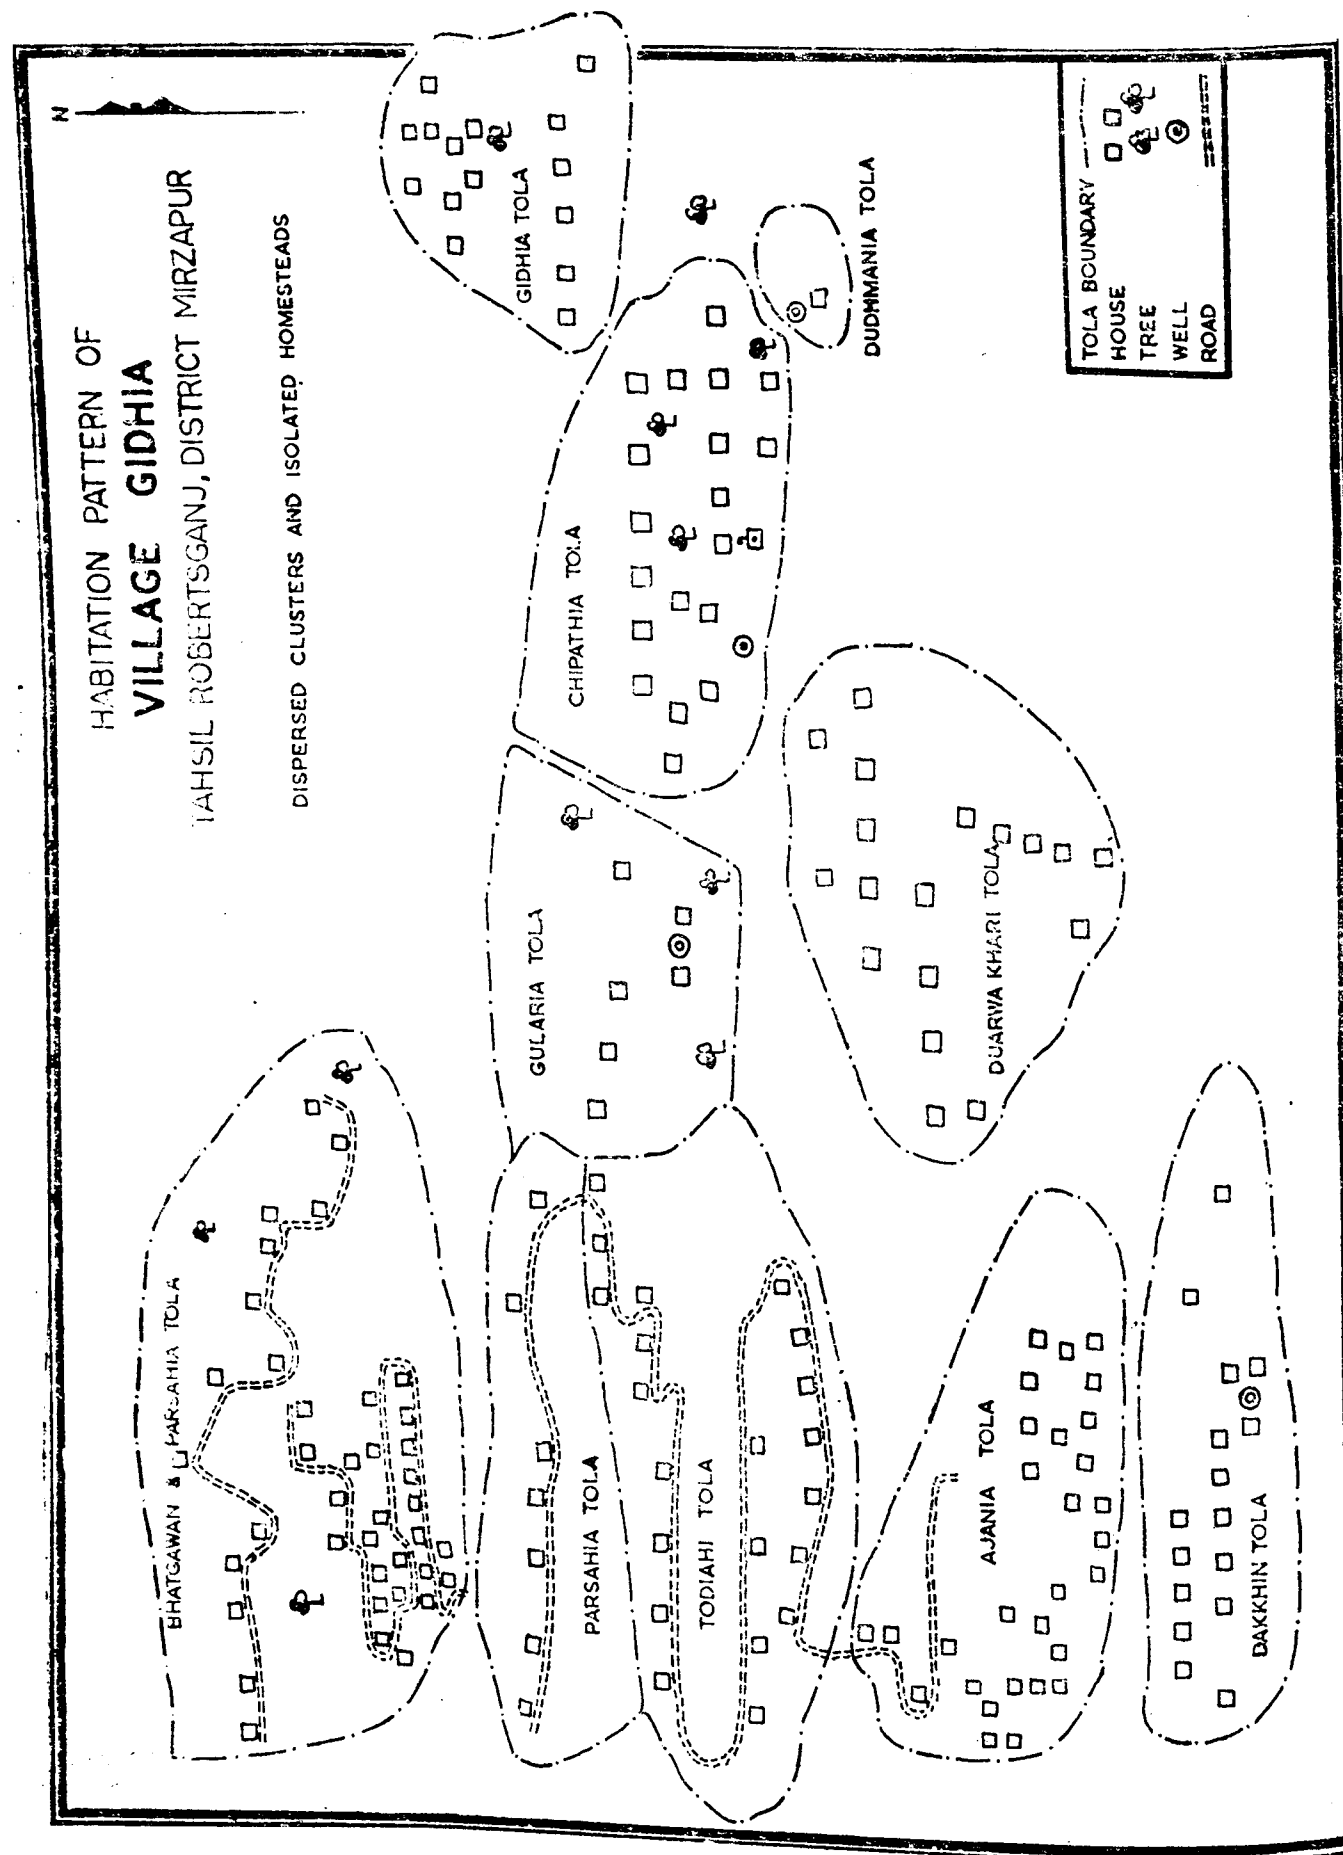

HABITATION PATTERN OF VILLAGE KALYANPUR DISTRICT ALLAHABAD

SHAPELESS AGGLOMERATE WITH DISPERSED CLUSTERS

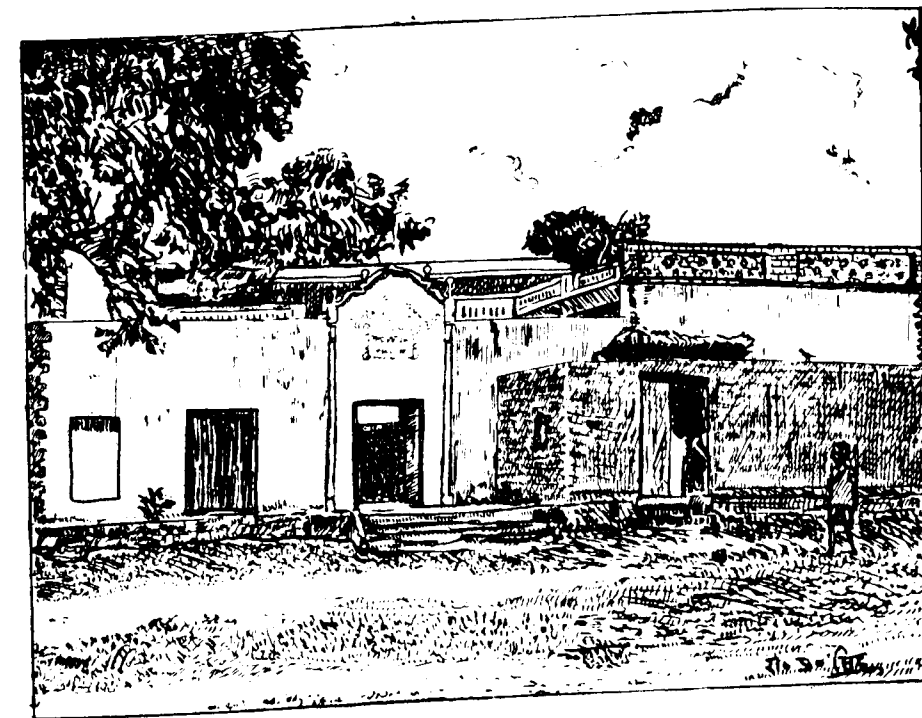

HABITATION PATTERN OF VILLAGE CHĀPNU TAHSIL CHAKRATA, DISTT. DEHRA DUN DISPERSED CLUSTERS WITH ISOLATED HOMESTEADS

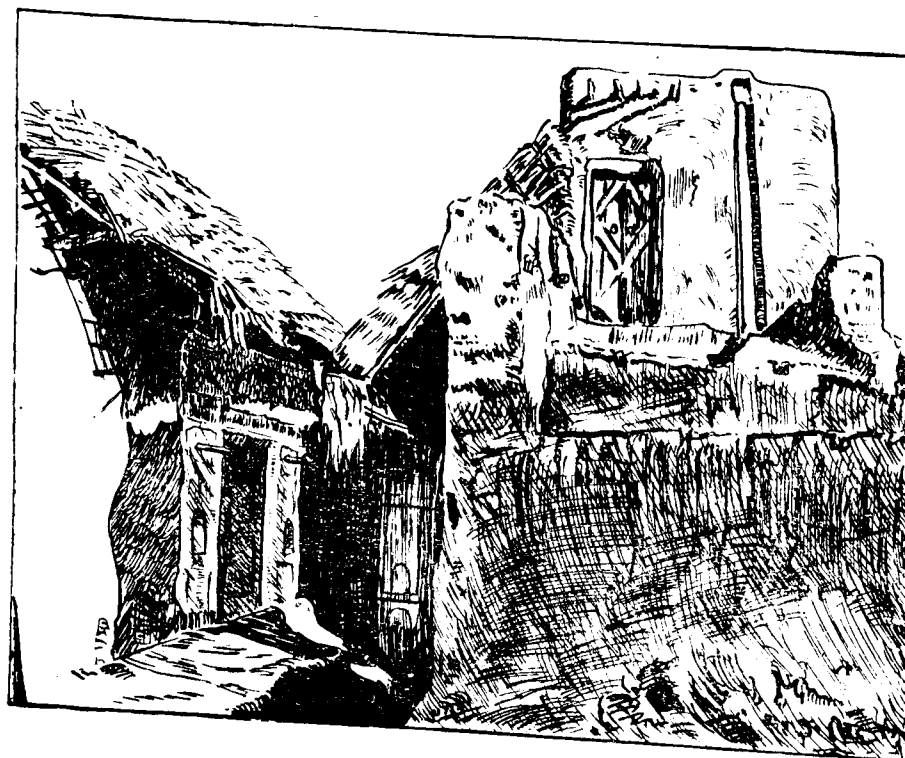

A pucca house in village Mirzapur Behta, Tahsil Bisauli
District Budaun
(West Plain)

*The walls and roofs are made of burnt bricks, some of these
being Kakaiya bricks which are thinner and broader than
usual bricks*

*A semi-pucca house in village Barauli, Tahsil Atrauli
District Aligarh (West Plain)
The front walls of the house are built of burnt bricks
and the remaining wall of sun-dried clay
bricks. The roofs are built of mango
beams covered with burnt bricks
and thin mud layer. A portion
has a thatch of moonj
Grass*

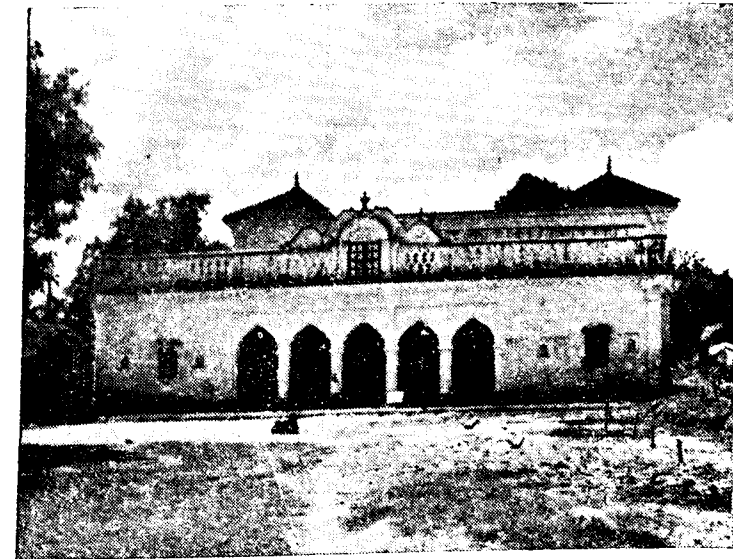

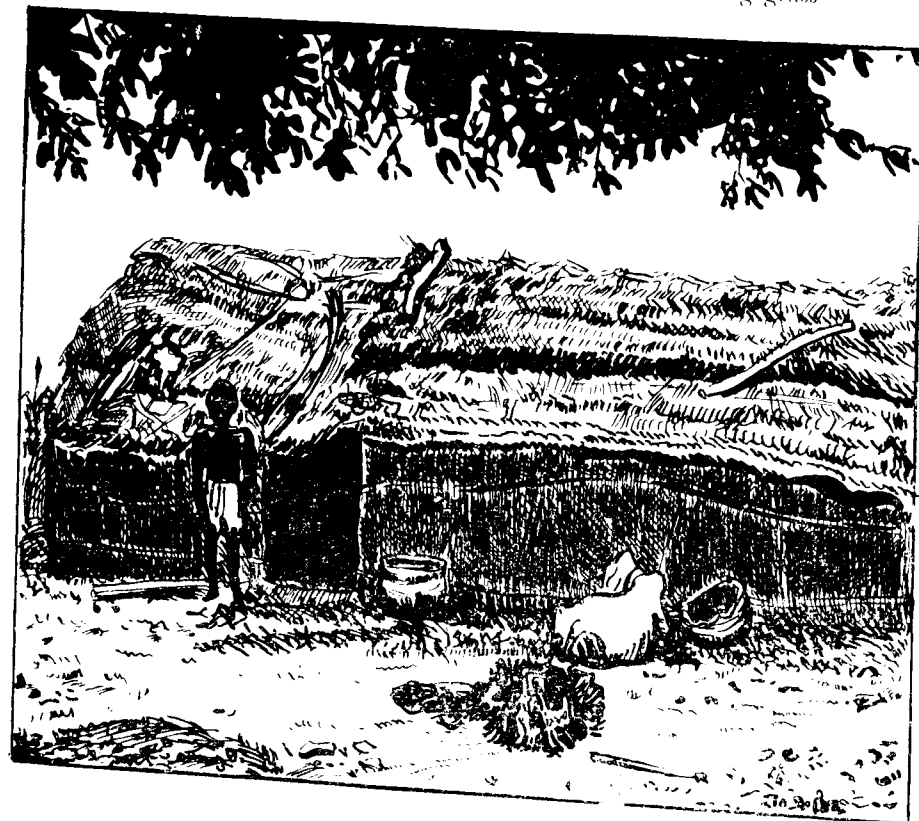

*A kachcha house in Village Rajderwa Tharu, Tahsil
Balrampur, District Gonda (East Plain Tarai)*

*The walls are made of stems of arhar and ghatara reed,
plastered with clay and dung. The roof is made
thatching grass and
wattle.*

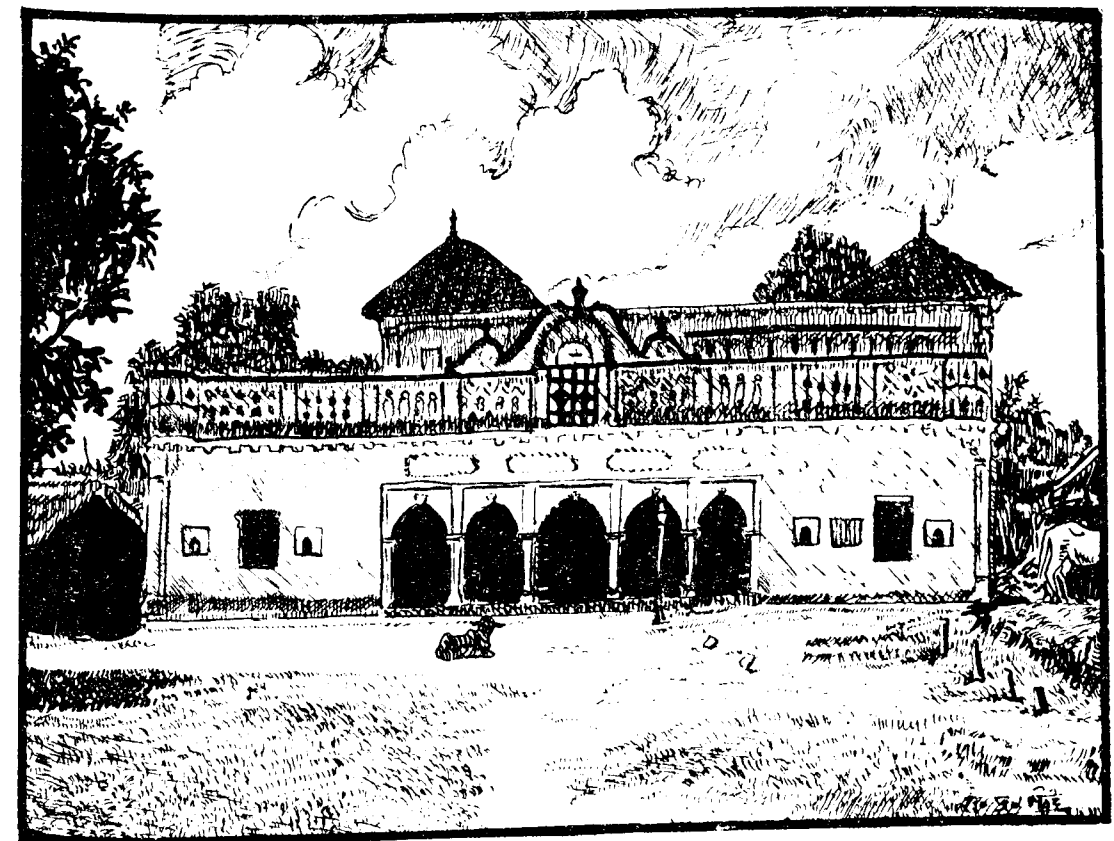

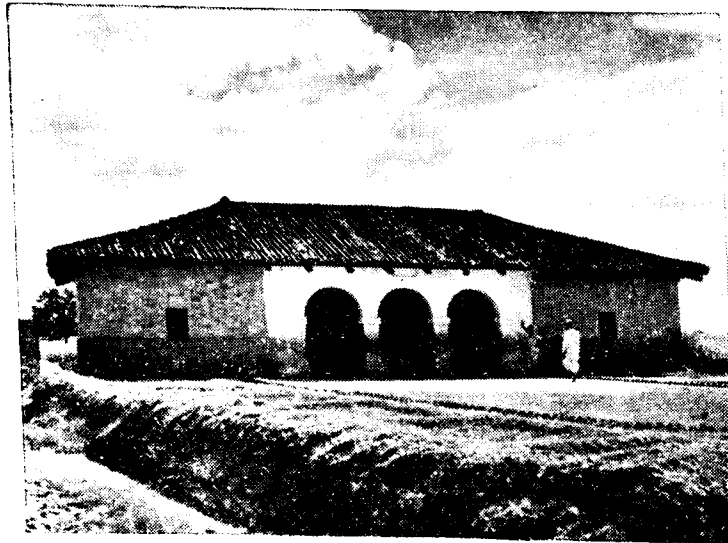

*A kachcha house in village Sumbha Dih, Tahsil Ghosi,
District Azamgarh (East Plain)*
The walls are made of reed and the roof of thatching grass

*A pucca house in village Sumbha Dih, Tahsil Ghosi,
District Azamgarh (East Plain)*

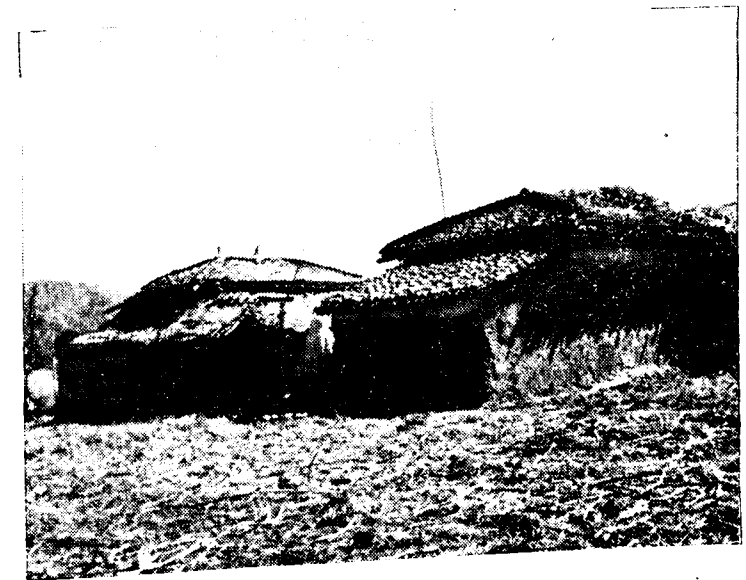

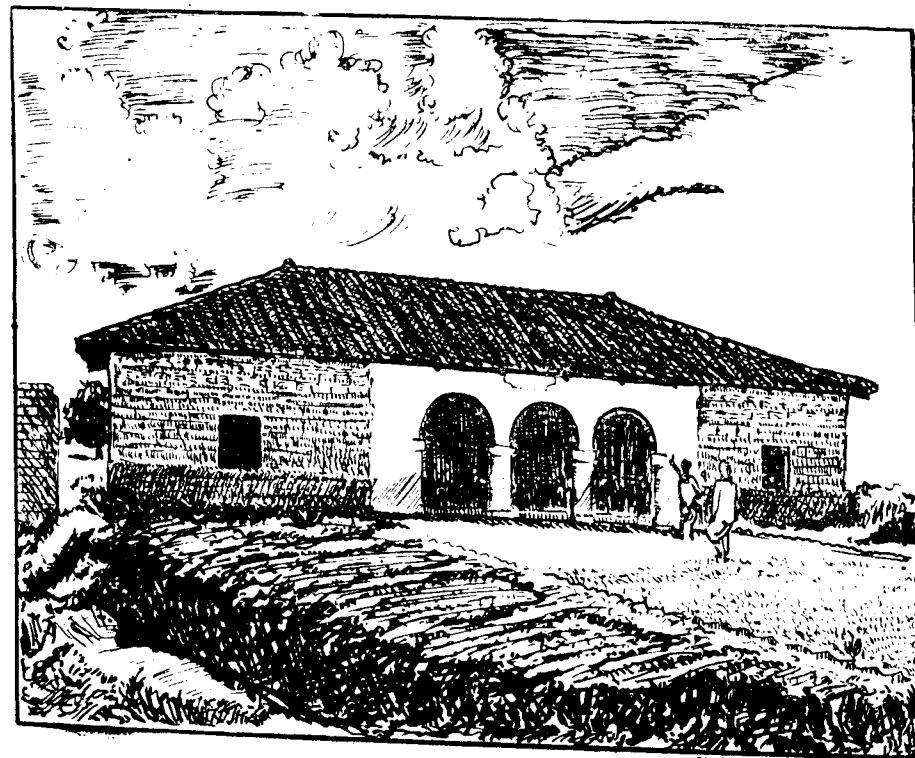

*The roofs and walls are made of burnt bricks. The roofs
of the upper storey are tiled*

*The Primary School Building in Village Mendigani,
Tahsil and District Varanasi (East Plain)*

*The building has a tiled roof and walls which are made
partly of burnt-bricks and partly of clay and mud*

*A kucha house in Village Parsoi, Tahsil Robertsganj,
District Mirzapur (Vindhyan Plateau)*

The house has mud walls and tiled roofs

APPENDIX

Standard Industrial Classification

Major Group (Code)	Divisions 2 & 3—Manufacturing Description	Minor Group (Code)
20	<i>Foodstuffs—</i>	
	Production of rice, atta, flour, etc., by milling, dehushing and processing of crops and food-grains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, kholi, cocoa, chocolate, toffee, lozenge	209
21	<i>Beverages—</i>	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	<i>Tobacco Products—</i>	
	Manufacture of <i>bidi</i>	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of <i>hookah</i> tobacco	223
	Manufacture of snuff	224
	Manufacture of <i>zerda</i> and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	<i>Textile-Cotton—</i>	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton cordage, rope and twine	239
24	<i>Textile-Jute—</i>	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244

Major Group (Code)	Divisions 2 & 3—Manufacturing Description	Minor Group (Code)
25	<i>Textile-Wool—</i>	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	<i>Textile-Silk—</i>	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	<i>Textile-Miscellaneous—</i>	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	<i>Manufacture of Wood and Wooden Products—</i>	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	<i>Paper and Paper Products—</i>	
	Manufacture of pulp from wood, rags, waste paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	<i>Printing and Publishing—</i>	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	<i>Leather and Leather Products—</i>	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311

Major Group (Code)	Divisions 2 & 3—Manufacturing Description	Minor Group (Code)
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	<i>Rubber, Petroleum and Coal Products—</i>	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	<i>Chemicals and Chemical Products—</i>	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	<i>Non-metallic Mineral Products other than Petroleum and Coal—</i>	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	<i>Manufacture of Earthenware and Earthen Pottery—</i>	
	Manufacture of chinaware and crockery	350
	Manufacture of porcelain and its products	351
	Manufacture of glass bangles and beads	352
	Manufacture of glass apparatus	353
	Manufacture of earthen image, busts and statues	354
	Manufacture of earthen toys and artwares except those covered by code No. 355	355
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	356
	Manufacture of other non-metallic mineral products not elsewhere specified	357
36	<i>Basic Metals and their Products except Machinery and Transport Equipment—</i>	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366

Major Group (Code)	Divisions 2 & 3—Manufacturing Description	Minor Group (Code)
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which can not be classified in major groups 36, 37, 38 and 39)	369
37	<i>Machinery (All kinds other than Transport) and Electrical Equipment—</i>	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	<i>Transport Equipment—</i>	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engines, parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles, and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	<i>Miscellaneous Manufacturing Industries—</i>	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
