† present volume.

In the preparation of this Volume, I have been guided by the suggestions given from time to time by Sri Asok Mitra, Registrar General, India, Sri D. Natarajan, Deputy Registrar General, India and Sri K. D. Ballal, Central Tabulation Officer, New Delhi.

It is also my pleasant duty to acknowledge the able assistance given by the following members of my staff.

1. Sri M. K. S. Mani, Tabulation Officer
2. Sri K. Kuppuswami, Lower Division Clerk
3. Sri K. Damodharan, Lower Division Clerk
4. Srimathi A. M. Mangayarkarasi, Lower Division Clerk
5. Sri P. V. Parthasarathy, Comptist

PREFACE

In this volume, I present the General Economic Tables — *B Series* — for Madras State. I have also added brief notes explaining the concepts on which the Tables are based.

The manner in which the data were collected and the nature of machinery employed have been discussed in the companion volume on *A Series*. I do not wish to cover the same ground again. The information covered by this volume have been collected on the basis of questions 8—12 in the individual slip. The broad basis is the division of the entire population into two classes called workers and non-workers. The principles on which a worker is defined and distinguished from a non-worker will be indicated later. All the workers are divided into four broad categories—Cultivator, Agricultural labourer, Household industry worker and others. The aim of allotting separate question to cultivator, agricultural labourer and a household industry worker is to emphasise the importance of these classes in the economic life of this country. Further, they have been defined in such a manner that cultivation and household industry denote specific items of activity with certain limitations imposed by the Census definition. All other items of work are covered by Question No. 11. Further in all these four categories, principal and secondary items of work have been ascertained for each individual.

It was not the original intention to distinguish between the principal and secondary work where a person does more than one work, because it was felt that in a large number of cases especially in rural areas where the work is seasonal, it would not be possible to determine which work is the principal and which the secondary. Later on, however, it was decided that an effort should be made to distinguish between the principal and secondary work at the enumeration stage, as otherwise it would be difficult to tabulate the data. The distinction was to be made on the basis of amount of time spent on each work. Instructions were issued that in the case of principal work the number of the question should be circled and in the case of secondary work a tick should be put against the question number. Tables B-I to B-VI of the Economic Tables are based on principal work. In Table B-VII-Part-A and Part-B an attempt has been made to cross tabulate principal and secondary work in respect of certain categories of workers.

Under Question No. 12 is collected the activity of persons who are classified as non-workers in this Census. They have been divided into 8 major groups.

Nine tables, some with parts of A, B and C, in total amounting to fourteen, have been presented. Of these, Table B-IX presents non-workers classified by sex, broad age groups and type of activity. B-VIII Part-A presents persons unemployed, aged 15 and above by sex, broad age groups and educational levels in Urban area and B-VIII Part-B presents the corresponding data for rural areas. Table B-I present workers classified by the nine industrial categories adopted for the Census and non-workers, classified by sex, and broad age groups. B-III Part-A and Part-B presents workers in each industrial category and non-workers, by educational levels in Urban and Rural areas respectively. B-II presents workers in each Industrial category and non-workers, in cities, town-groups and towns arranged territorially classified by sex and broad age groups. Table B-IV Part-A distributes workers at Household Industry into 'employee' and 'others' and each one is further classified by industries with reference to the division and major group of the Indian Standard Industrial Classification.

Table B-IV Part-B is a complementary table relating to non-household industry, trade, business, profession or service. Here workers are first classified into four classes namely 'employer', 'employee', 'single worker' and 'family worker', and each one is further classified by industries with reference to division, and major group of the I. S. I. C. In Table B-IV Part-C all workers are combined separately for workers at household industry and workers at non-household industry, etc., and each one is further classified by division, major group and minor group of I. S. I. C. Table B-V distributes persons at work other than cultivation, by their occupation with reference to division, group and family in the National Classification of Occupations. B-VI relates to the urban areas in which occupational divisions of persons at work other than cultivation, classified by sex, broad age groups and educational levels are given. As already indicated, Tables B-VII Part-A and Part-B relate to secondary work. B-VII Part-A exhibits persons working principally as cultivators, agricultural labourers or at household industry classified by sex and by secondary work: i) at household industry ii) as cultivator and iii) as agricultural labourer. B - VII Part - B provides the industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry. This is the general scheme of the presentation of Tables.

At the beginning of every Table, the concepts used and the broad categories into which workers have been divided will be explained, so that a reader can understand the Tables without any difficulty. The conclusions derived from these tables can be found in the chapters devoted to economic tables in the General Report of 1961 Census.

I have also added a note explaining the evolution of economic concepts used in 1961 Census and tracing the history of the economic questions put to the citizens. An extract of the Enumeration Manual explaining the economic questions and the manner in which information has been collected, has also been added. The comparability with the economic data collected during previous Censuses has been maintained and the principles on which this comparability can be assessed are found in the note.

—o—

PRELIMINARY NOTE

B-Series Tables presented in this volume relate to the economic data collected during 1961 Census. In every Census, economic questions have been included. Earlier, the Census was more concerned with sociological and anthropological studies. With every succeeding Census, however, the importance of economic questions and the scope of data relating to the economic factors increased. The concepts have also undergone changes, though an effort has been made to maintain continuity. In 1961, however, a major departure in the concept of the collection of economic data was made, when stress was laid on work, irrespective of income. This was in contrast to previous Censuses when income or economic independence was made the criterion for measuring the economy of the country. Thus the basis of economic classification changed from gainful occupation to productive work. This change is significant in relation to those who do not work but have income, and those who work but do not have income.

In this Census the population of the country was divided into two broad categories—workers and non-workers. In previous Censuses, distinction was drawn between economically independent persons and economically dependent persons. An intermediate category of economically

Economic Concepts 1881 - 1921

semi-dependents was introduced in 1931 which was called as 'working dependent' in 1931, 'partly dependent' in 1941, and 'earning dependent' in 1951. This intermediate category was abolished in 1961. Family workers who were not in receipt of any income and children who did not earn enough for their maintenance were also treated as workers in 1961. A study of the various economic classifications adopted and the economic questions included in the various Censuses will explain the basis of the change in concepts. In 1881 Census, no distinction was made between earners or dependents, workers or non-workers. The occupation of every male who was of age to do work and the chief source of income in the case of persons not having any occupation were recorded. Boys studying at school, girls, small children and women who did not do any regular work were excluded. No particulars were collected regarding the means of livelihood of the persons who did not come under the category of workers. Domestic occupation was not included unless the produce of labour was brought to the market. In 1891, a distinction was made between dependents and non-dependents. Any person who got income by work or through property, like rent or pension, was not a dependent and one who earned nothing by independent labour, but was supported by another, was treated as a dependent. In 1901, actual workers were distinguished from mere dependents. It also distinguished among the actual workers those workers who were partially agriculturists. A worker was defined as one who actually does work, whether personally or by means of servants, or carries on business or has an occupation or private property which brings him or her any income like house rent, pension, even if the income from that work, occupation or property, is not enough to support him or her entirely. Only the absolutely idle were classified as dependents. In 1911 and 1921, no change was made in the definition of workers and dependents. However, in 1921, children and women were also treated as workers, if any work was done by them to augment the family income. But as a general proposition, it was laid down that the work of children below the age of 10 would not be of sufficient value as to bring them under the category of workers.

In 1931 Census, a person was classified as earner or dependent for the first time in Census history. An earner was defined as one who had a distinct individual means or partial means of livelihood.

He need not be self-supporting nor need he actually work and have money income. An intermediate category of working dependents was also introduced in 1931. A person who contributed anything in cash or in kind towards support of himself or the family, but which was not definitely adequate to be self-supporting, was classified as a working dependent. The contribution must be sufficiently regular though the person need not work actually with body or mind to be included under this category. This was introduced to meet the prevalence of joint family system in India,

in which various members of the household depend upon the labours or earnings of one, even though they do make some kind of contribution towards family maintenance as a whole. By the introduction of this category of working dependent, the extent of this practice and total number of people supported indirectly, were ascertained. All those who did not have a distinct individual means or partial means of livelihood were classified as dependents.

In 1941, the term 'earner' was omitted. The concepts of 'fully dependent' and 'partly dependent' were introduced. As the results of the Census were not published in most parts of the country, the effects of the change could not be studied. In 1951, the concepts

1941-51

'self-supporting persons' and 'earning dependents' were introduced. A self-supporting person was defined as one who earned sufficient income to maintain himself, while an earning dependent was defined as one whose earning was not sufficient to maintain himself. In order that family workers who worked without earning any income might not be left out of count, subsequent instructions were issued that family workers who did not get any actual income should be treated as self-supporting person or earning dependent, according, as the income attributable to the person would be able to support that person or not.

In 1961, the intermediate category in workers was abolished and the entire population was divided into workers and non-workers. A person working in seasonal occupations like cultivation,

1961

livestock, household industry and so on was treated as a worker, if the person had some regular work for more than an hour per day, throughout the greater part of the working season. In the case of a person regularly employed in any trade, profession, service or business or commerce, the person was considered as worker, if he or she was employed during any of the 15 days preceding the day on which the Enumerator enumerated the particular household. But a regularly working person who was absent from work during 15 days preceding the day on which he was enumerated, due to illness or other causes, was included in the category of workers. The term 'work' not only included actual manual labour, but also effective supervision and direction. Persons under training as Apprentices also came under the definition of workers, whether they received stipend or not. A public or social worker, and a political worker actively engaged in furthering political aims of his party, was also regarded as worker. The under-trial prisoners and persons in jail who had not been convicted by a Court of Law were also treated as workers, if they were engaged before their arrest in any of the activities treated as work by the Census definition. Persons who were temporarily in hospitals or sanatoria as patients were considered as workers if they were engaged in work before they were admitted in hospitals or sanatoria. As in earlier Censuses, in this Census also, women engaged in household duties were not considered as workers, however useful their work be. Whereas in earlier Censuses income was the criterion to classify a person as a worker, and the rent receivers, pensioners and dividend or interest receivers were considered as workers, in this Census, as work was the criterion, pensioners, rent or dividend receivers earning an income but not participating in any productive work were not considered as workers unless they were engaged in productive work in industry, trade or commerce. The livelihood classes in this Census were divided into 9 groups, 2 in agricultural and 7 in non-agricultural. The details of these groups will be found in the Fly Leaf to Table B-I.

All persons who were not working, i.e. who did not come under the definition of workers, as explained above, were classified as non-workers. These non-workers were grouped under 8 different categories. The details of these categories can be found in the Fly Leaf to Table B-IX.

Only one economic question was put in the Censuses of 1881 and 1891. In 1881, particulars of occupation were collected only for persons having independent means. In 1891, particulars of Questions relating to source of income were collected for even dependents. The word 'dependent' economic data was added in the return relating to such persons. Three economic from 1881 to 1961 questions were asked in the Censuses of 1901, 1911 and 1921. No changes were made in the questions. The economic questions prescribed in

Censuses of 1881 to 1961 are presented in a tabular form as Appendix I to this note. The questions related to the principal occupation, subsidiary occupation, if any, and the principal occupation or means of subsistence of the actual worker on whom the dependents depended in the case of dependents. As the question asked was termed as means of livelihood, it became necessary to record in the case of even non-earning dependents, the means of livelihood of the persons on whom the dependents depended. The enumerators were asked to be precise in recording the answers relating to means of subsistence by distinguishing different services like Government service, Railway service etc., in cases where persons' occupation related to service, and by distinguishing rent receivers, actual cultivators, tenant cultivators, field labourers and so on; in case of agriculturists. Persons who were principally occupied in non-agricultural callings and engaged in part at least in agricultural occupations, whether as cultivating or non-cultivating landlords or tenants or as regular farm servants or as field labourers working for daily wages, were treated as partially agriculturists. In 1911 and 1921 statistics relating to industries were obtained by a special industrial return from the Manager of each establishment. For this purpose, in 1911, an industrial establishment was defined as an establishment having 20 and more employees. In 1921, however, an establishment having 10 and more persons as employees was treated as an industrial establishment. In 1931 Census, a question was included in the regular Census schedule to get the industrial statistics. The question was on the industry in which the person enumerated was employed. Thus the number of economic questions in 1931 Census became 4 as against 3 of the earlier Censuses.

As stated earlier, in 1931, a person was classified as earner or dependent separately based on the merit of his case. A separate question as to whether the person enumerated was an earner or a dependent was included in 1931. The principal occupation of earner was recorded separately and that of the dependent, if any, against the question relating to subsidiary occupation. A 'Nil' entry against the question 'principal occupation' and an entry against 'subsidiary occupation' showed the occupation of the working dependents. Apart from the introduction of the concept of semi-economic dependents in 1931, a significant change was made in the approach to the economic questions. The term 'means of livelihood' was given up and a more precise term 'occupation' was adopted. But in 1941, the term 'means of livelihood' was again used. The economic questions became 8. The question as to whether one employed a paid Assistant or members of the household and if so, how many, was asked to find out the general conditions under which one pursued the means of livelihood. Domestic servants were excluded from being included in the number of members employed, on the ground that they were concerned with the employer's mode of life and not the method of earning his living. To find out the number of persons seeking employment among the unemployed, a question was asked, to unemployed persons as to whether one was in search of employment. To assess the regularity of employment for the partly-dependent and to find out the duration of the subsidiary occupation for the non-dependents having a primary occupation, question as to the duration of the period in a year in which the means of livelihood (the only occupation in the case of partly dependents and subsidiary occupation in the case of non-dependents having primary occupation) existed was included. In the case of persons employed by some one else, the nature of the business of the employer was also recorded. In 1951 the economic questions were again reduced to 3—one relating to the economic status, dependency and employment and the other two relating to the principal means of livelihood and secondary means of livelihood. The semi-dependent category of the previous Census was called as earning dependent. In the case of earning dependents, the work of the persons on whom they depended was recorded as principal means of livelihood and the work from which earning dependents derived income, was recorded as secondary means of livelihood. The status of the employment like employer, employee, independent worker was also recorded. A person was recorded as self supporting, if the income whether in cash or kind received by him or her, through productive activity or not, was sufficient at least for his or her own maintenance, at his or her present level of living. Those who did not come under this definition were considered to be dependents and when a dependent secured some income which was not sufficient to support him, he was considered to be an earning dependent. In 1951 the self-supporting persons were divided into 8 livelihood classes, details

of which will be found in the notes to B-I Table. In 1961 Census, 5 economic questions were asked—4 relating to workers and 1 relating to non-workers. Separate questions were put to find out whether one was a cultivator or an agricultural labourer, whether one was working at household industry and if so, the nature of work and nature of household industry and in the case of work other than those mentioned above, the nature of work and the nature of industry, profession, trade or service and the name of establishment were asked. Question as to the class to which the worker belonged, whether he was an employer or employee or single worker, was also included. The definition of the concept of class of workers is given in the Fly Leaf to Table B-IV. The question relating to the household industry is a new feature of this Census. The concept of household industry has been defined in the notes to Table B-I and B-IV. The workers were classified into 9 groupings based on the industries. The details of these classifications are given in the notes to Table B-I.

Six economic Tables were prepared in 1881. The tables furnished the occupational particulars for males and females, separately for each district and for the total urban population in each district with age group particulars. Separate tables were also prepared for the agricultural population. An alphabetical list of occupations with the number in each sex and total in each occupation was also prepared. In 1891 only one table was prepared in three parts—one furnishing the State figures with age and occupation, the second furnishing the district figures and the third furnishing the figures of persons combining agriculture with other occupations. A tabular statement indicating the number and names of tables relating to economic questions prepared in Censuses of 1881—1961 is given as Appendix II to this note. Two tables in 1901, 4 in 1911, 5 in 1921, 1 in 1931, none in 1941 and 6 in 1951, out of which one was based on 20% sample, relating to economic data were prepared. In 1961 Census, 9 tables which with its parts amount to 14, have been prepared. The two tables of 1901 related to occupation and the traditional and actual occupation of the selected castes. Two new tables introduced in 1911 were that of the statistics of industries and subsidiary occupation of agriculturists. The new table introduced in 1921 dealt with the subsidiary occupations of persons having occupation other than agriculture as primary occupation. In 1931, in addition to the principal occupation and subsidiary occupation, particulars relating to working dependents were furnished. But all the particulars were presented in one table. The particulars of subsidiary occupation to all the main occupations as a whole were furnished in 1931. No table was prepared in 1941 owing to the outbreak of World War II. Six economic tables were prepared in 1951. Three came under *B Series* and they related to livelihood classes and sub-classes, the secondary means of livelihood, and employers, employees and independent workers in industries and services by divisions and sub-divisions. The table furnishing the population figures by livelihood classes for towns arranged in territorial order came under 'A' series which dealt with General Population tables. The table relating to the livelihood classes by age groups came under 'C' series which dealt with household and age tables. This series was prepared only on 20% sample basis. The table relating to livelihood classes by educational standards came under 'D' series which dealt with Social and Cultural tables. In 1961, 14 Tables constituting the *B Series*—B-I to B-IX have been prepared. In addition, for every taluk, village wise Primary Census Abstract with the area of village or town, as the case may be, the number of houses, households, institutional population, scheduled castes and tribes, literate persons and the number of workers under each of the 9 livelihood classes and the number of non-workers, has been prepared. The concepts used in each of the tables are explained in detail in the Fly Leaf to the respective tables.

In the case of persons having more than one occupation, question whether one occupation or all the occupations or only the first two, one as primary and the other as subsidiary has to be recorded and if so, which one has to be treated as primary means of livelihood and which as subsidiary, arises. In the Censuses of 1881 and 1891 provision was made to record only the chief occupation even though a person may have one or two or more occupations. The occupation from which

income was chiefly derived was considered as the chief occupation. In the case of persons who combined agriculture whether as landholder, tenant or field labourer, with any other profession or trade, both the occupations were recorded. India being predominantly an agricultural country, it was vital to collect particulars relating to all the workers engaged in agricultural activity with a view to find out the number of workers connected with agriculture and to study the changing pattern of its economy. While in 1881 and 1891 two occupations were recorded only when one of them was connected with agriculture, they were recorded in all cases in 1901. The question relating to occupation or means of subsistence of actual workers was divided into two parts providing one column for recording the principal work and the other for subsidiary work. The occupation which was the chief source of income was treated as the principal occupation and the additional occupation as subsidiary occupation. In the case of a person having several subsidiary occupations, the one in which he spent most of his time was treated as his subsidiary occupation.

From 1911 to 1931, any occupation pursued in addition to the principal occupation at any time of the year, was recorded as subsidiary occupation. In the case of persons having more than one subsidiary occupation, only the most important occupation was recorded. In 1941, various means of livelihood in the order in which they contributed to the livelihood of a person were recorded against the question 'Means of livelihood'. In the case of persons having a subsidiary means of livelihood, particulars as to whether the subsidiary work was exercised throughout the year and if not, the portion of the year in which the subsidiary means of livelihood was exercised were also recorded against the question 'portion of the year in which means of livelihood is exercised'. In 1951, the term 'subsidiary occupation' was changed as 'secondary means of livelihood'. But it involved no change in concept. The occupation from which greater part of income was derived was recorded as principal means of livelihood and the next as secondary means of livelihood. The requirement of 1941 Census that all the occupations should be recorded was given up. In 1961 the concept of principal work changed with the emphasis on work. The work on which a person spent most of his working time was considered as the principal work, irrespective of the income derived from it. Specific columns in the individual slip for recording cultivators, agricultural labourers, persons working in household industry and other workers engaged in sectors other than the ones mentioned above, were provided. If two entries were found in the answers to these questions, the enumerator found out the principal work and marked the question against which the principal work had been recorded with a ring around the question number. In the case of more than two entries, after thus marking the principal work, the other work next in importance was ascertained and marked with a tick mark on the right hand side of the proper question number. The importance of subsidiary work among other subsidiary works was decided on the basis of the time spent in that work. It was not the original intention to distinguish the principal work from subsidiary work when the individual slip was printed. As it was a later introduction, this method of indicating principal and subsidiary work had to be adopted. The main classification of workers has been done only on the basis of principal work. Primary Census Abstract and the economic tables have also been prepared on the basis of principal work, except for Table B-VII which presents the secondary occupation of the workers. I add as an Appendix (III) extracts of the Enumeration Manual indicating the definitions adopted during 1961 Census and the instructions issued to the Enumerators in filling up the individual slip. These extracts will be useful for a reader to assess the precise significance of the data collected and presented in this Table.

A relevant question may be raised whether any continuity has been maintained in the definition of the economic concepts and in the presentation of tables from Census to Census. No doubt certain categories have been included or excluded from Census to Census, but it is possible to compare the workers at each Census with the workers of 1961. A note prepared by Sri Kalra, Research Officer attached to the office of the Registrar General, India, is reproduced as Appendix IV to this note. It will help the reader to appreciate how comparability has been maintained. Detailed comments on these aspects will also be found in the economic chapters of General Census Report of 1961.

APPENDIX I

The economic questions in the Censuses from 1881 to 1961

1881	1931	1951
10. Occupation of men, also of boys and females who may do work.	9. Earner or dependant.	15. (Only to be asked in regard to means of livelihood of a person shown as partly dependant against question 9 or any subsidiary means of livelihood returned by other persons against question 14): Does this means of livelihood exist throughout the year? If not, for what part of the year?
	10. Principal occupation this will be blank for dependant	
1891	11. Subsidiary occupation (occupation of dependants may be given).	
11. Occupation or means of subsistence.	12. Industry in which employed (for organized employees only).	16. If you are employed by some one else, what is his business?
1901	1941	1961
9 & 10. Occupation or means of subsistence of actual workers.	9. Are you wholly or partly dependent on any one else?	9. Economic status. Part one: Dependency. Part two: Employment.
9. Principal		10. Principal means of livelihood.
10. Subsidiary		11. Secondary means of livelihood.
11. Means of subsistence of Dependants on Actual workers.	10. If so, means of livelihood of person on whom dependent.	
1911	1961	
9 & 10. OCCUPATION OR MEANS OF SUBSISTENCE OF ACTUAL WORKERS.	11. Do you employ: (a) Paid assistants, (b) Members of household? If so, how many?	8. Working as Cultivator
9. Principal occupation.		9. Working as agricultural labourer
10. Subsidiary occupation, if any.	12. Are you in employment now?	10. Working at household industry: (a) Nature of work (b) Nature of household industry (c) If employee
11. If dependant, principal occupation or means of subsistence of actual worker on whom dependent.	13. (Only to those who reply in the negative to question 12): Are you in search of employment? To those who reply in the affirmative, the further question will be put— How long have you been in search of it?	11. Doing work other than 8, 9 or 10: (a) Nature of work (b) Nature of industry, profession, trade or service (c) Class of worker (d) Name of establishment
1921		
9 & 10. OCCUPATION OR MEANS OF SUBSISTENCE OF ACTUAL WORKERS.		12. Activity if not working.
9. Principal.		
10. Subsidiary.		
11. For dependants, the occupation of the worker by whom supported.	14. Means of livelihood in order of importance.	

APPENDIX II—Contd.

Economic Tables presented in the Censuses from 1881 to 1961

1881	1901	1921
XII. Statement showing for each district occupations of population in each class, order and sub-order for males and females separately.	XV. Occupations—showing for each district, state and city and for eight classes, 24 orders, 79 sub-orders and 520 groups shown in the occupation scheme, the number of: (1) total actual workers of each sex, (2) partially agriculturists actual workers of each sex, (3) dependants of both sexes.	XVII. Occupation. XVIII. Subsidiary occupations of agriculturists—actual workers only. XIX. Subsidiary occupations of actual workers who returned a non-agricultural occupation as their principal occupation. XXI. Occupation by selected castes, tribes or races.
XII-A. Statement showing in the same form as XII the occupations of the total urban population in each district.		XXII. Industrial Statistics: Part I Provincial summary. Part II Distribution by districts, Part III Industrial establishments classified according to the class of owners and managers. Part IV Caste or race and birth place of skilled workmen classified according to their industry and occupation. Part V Caste or race and birth place of unskilled labourers classified according to the industry in which they are working.
XII-B. Statement showing occupations by age of the total male urban population.	XVI. Selected castes by traditional and actual occupations—for certain castes, selected in certain districts, their traditional occupation, the number of the actual workers in each following callings included in the 24 "orders" in Table XV.	
XII-C. Statement showing for each district, the occupations followed by the agricultural population, in conjunction with agriculture, for males and females separately.		
XII-D. Statement showing for the total town population of each district, the occupations followed by the agricultural population, for males and females separately.		
Alphabetical list of occupations with the number in each sex and total in each occupation, and also the districts.	XV. Occupation: XV-A. Part I Provincial summary Part II Details for districts, states and cities. XV-B. Subsidiary occupations of agriculturists. Actual workers only. XV-E. Statistics of Industries: Part I Provincial summary. Part II Distribution by Districts and States. Part III Particulars as to ownership of factories, etc. Part IV Caste or race of managers of factories, etc.	
1891	1911	1931
XVII. Occupations. Part A—showing by sexes and age periods the occupations of the rural and urban population. Part B Showing by sexes the occupation of the people. Part C Showing by sexes the occupations combined with an interest in land.		X. Occupation or means of livelihood. Part I. Provincial summary. Part II. District, State and City.

APPENDIX II—concl'd.

1941

No table was prepared because of the outbreak of World War II.

1951

*A-V Towns arranged territorially with population by livelihood classes.

B-Economic tables:

B-I Livelihood classes and sub-classes.

B-II Secondary means of livelihood.

B-III Employers, employees, and independent workers in industries and services by divisions and sub-divisions.

C-II Livelihood classes by age groups. (Sample)

†D-VII Livelihood classes by educational standards.

Note.—

*This Table A-V was classified under "General Population Tables-A"

†This Table D-VII was classified under "Social and Cultural Tables D"

1961

B-I workers and non-workers classified by sex and broad age groups.

B-II Workers and non-workers in cities, town groups and towns arranged territorially classified by sex and broad age-groups.

B-III Part A—Industrial classification of workers and non-workers by educational levels in urban areas only.

B-III Part B—Industrial classification of workers and non-workers by educational levels in rural areas only.

B-IV Part A—Industrial classification by sex and class of worker of persons at work at household industry.

B-IV Part B—Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.

B-IV Part C—Industrial classification by sex and divisions, major groups, and minor groups of persons at work other than cultivation.

B-V Occupational classification by sex of persons at work other than cultivation.

B-VI Occupational divisions of persons at work other than cultivation classified by sex, broad age groups and educational levels in urban areas only.

B-VII Part A—Persons working principally (i) as cultivators (ii) as agricultural labourers or (iii) at household industry classified by sex and by secondary work (i) at household industry, (ii) as cultivator (iii) as agricultural labourer.

B-VII Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession, or service who are also engaged in household industry.

B-VIII Part A—Persons unemployed aged 15 and above by sex, broad age groups and educational levels in urban areas only.

B-VIII Part B—Persons unemployed aged 15 and above by sex and educational levels in rural areas only.

B-IX Persons not at work classified by sex, broad age groups and type of activity.

APPENDIX III

Extract from the Census of India, 1961 Enumeration Manual—Instructions pertaining to economic questions prescribed for 1961 Census.

39. (a) Questions 8 to 11: The population of any country can be divided into workers and non-workers. Questions 8 to 11 apply to workers and their answers are of vital importance to our Census statistics. A person may be working as cultivator or an agricultural

Distinction between workers and non-workers labourer or in any household industry or may be engaged in doing some other work. The last named category will include persons who are engaged in productive activities other than cultivation, business, trade, communication or transport service or other miscellaneous services. In the case of persons who are employed during certain specified seasons only, as in cultivation, livestock, household industry, he will be regarded as worker, provided he has some regular work for more than an hour per day throughout the greater part of the working season. In the case of persons regularly employed in any trade, profession, service or business or commerce, he will be considered as a worker if he was employed during any of the 15 days preceding the day on which you make your visit to the household. The entries made against this question need not be revised even if the person is found to be unemployed during your second visit to the household for the revisional round from 1st March to 5th March, 1961. A person who works but was absent from his work during the 15 days preceding the day on which he was enumerated due to illness or other causes should be treated as a worker. It should be remembered that work not only includes actual manual labour but also effective supervision and direction. For example, a person having few acres of land may be supervising and directing without ploughing and harvesting himself. Such a person has to be regarded as worker. Persons under training as apprentices with or without stipend will also be regarded as workers. A public or social worker engaged actively in public or social work or a political worker actively engaged in furthering the political aims of his party should also be regarded as a worker. Under-trial prisoners or persons who are in jail but have not been convicted by a Court of law may be regarded as workers if they were engaged in any of the activities, which are considered as work by our definition, before their arrest. Similarly persons who are admitted in hospitals or Sanatoriums may be considered as workers if they were engaged in activities which are considered as work before they were so admitted.

(b) A person who has secured employment or has been offered a job but has not actually joined duty should be regarded as non-worker. Any adult woman engaged in household duties, however, useful it be, should not be considered as a worker. But if, in addition to her household duties, she is engaged in items of work like handpounding of rice, spinning of cotton, etc., which gives her some monetary reward either in cash or in kind or is employed on domestic duties for wages as servant-maid, ayah or cook or is employed in selling firewood, cutting and selling of grass, etc., she should be regarded as a worker.

(c) Beggars, pensioners, rent or dividend receivers who may be earning an income but are not participating in any productive work should not be considered as workers, unless they are also engaged in industry, trade or commerce. Those persons, who are long-term inmates of penal, charitable or mental institutions, even though previously engaged in activities which satisfy our definition of work, should be regarded as non-workers.

(d) After understanding the principles enunciated above regarding the classification of workers and non-workers you may now proceed to elicit answers to the questions. A person may be engaged in cultivation, in household industry or may be working as an agricultural labourer or doing some other work. He may be engaged in one of the above four categories or in more than one. A person working both as cultivator and agricultural labourer will be entered, as such, against questions 8 and 9. A person who is working both as cultivator and in household industry will be entered against questions 8 and 10. Persons working in any of the possible combination of cultivation, agricultural labour, household

industry and other kinds of work will be entered in the appropriate places, as in the examples mentioned above. If a person is engaged in only one kind of work, he will be entered against one of the four questions 8 to 11. A person who is engaged in various kinds of work will necessarily have one item of work which he considers to be the predominant or principal work. It, therefore, becomes necessary to decide for the purpose of our enumeration, what work is his principal work and what is his subsidiary work. The principal work is defined for our purposes as one in which a person spends most of his working time and not the one from which he gets the maximum income.

(e) After having collected the answers to questions 8 to 11, if you find any person with more than one productive activity you should ask him which one of the productive activity mentioned by him is his principal work. Put a ring round the number of the question 8, 9, 10, 11 to indicate his answer.

To illustrate, a person who returns himself as cultivator and who is engaged in some household industry tells you that he spends a major portion of his time in cultivation. Cultivation is his principal work and you should put a ring round question 8, against which his principal work, cultivation has been recorded. If only two items of work are recorded and one has been shown as principal work by circling the question number against which the principal work is recorded, the other work recorded in any more than two productive activities are recorded against questions 8 to 11. In such cases you should ascertain the work which is next in importance to his principal work and it will be the work, which after his principal work, occupies most of his time. His subsidiary occupation should be indicated by a tick mark on the right hand side of the appropriate question number. For example, if a person is engaged in cultivation and is also working as an agricultural labourer and in household industry, entries will be found against questions 8, 9 and 10. If, on enquiry, his principal work is known to be cultivation, a ring will be put round question 8, which relates to cultivation. If the person says that the work next in importance to cultivation is household industry a tick mark will be noted against question No. 10 on the right hand side.

EXAMPLES.

8. Working as Cultivator	...	...	...	C
9. Working as Agricultural Labourer	...	...	...	AL
10. Working at Household Industry :				
(a) Nature of work :	...	...	...	Joiner
(b) Nature of Household Industry :	...	...	...	Wooden toys making
(c) If employee :	...	...	...	

40. Question 8 : According to our definition, a person is said to be a cultivator if he or she is engaged as an employer, single worker or family worker in.

(i) cultivation of land or supervision or direction of cultivation of land owned or held from Government.

(ii) Cultivation of land or supervision or direction of cultivation of land held from private persons or institutions, for payment in money, kind of share in the produce of crop.

(iii) It is not necessary that a person should own the land absolutely. Even if the land cultivated is held on lease or under a variety of tenures the person will be entitled to be regarded as a cultivator. Cultivation involves ploughing, sowing, and harvesting and does not include the growing or keeping of orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plants. Persons engaged in tree growing or working in plantations like tea, coffee, rubber, cinchona should not be treated as cultivators but should be entered against Question 10 or 11 as the case may be. A person who leases out his lands to others for cultivation and gets a return in the shape of money or share of the crop and who does not even supervise and direct cultivation of land will not be treated

is cultivator. Similarly, a person working on another person's land as agricultural labourer and has no right or lease on the land on which he works, is not responsible for taking decisions as to the kind of crop to be sown and is paid wages in cash or kind, will not be treated as cultivator.

(a) Persons engaged in cultivation involving ploughing, sowing, harvesting of cereal crops such as rice, wheat and maize, tuber crops like potato and sweet-potatoes, sugar-cane, bengal gram, pulses such as ground-nut, kesar and other grams, production of raw jute and kindred fibre crops and production of raw cotton are considered to be cultivators.

(i) The land may be owned by any person in the household and the other members may be engaged in the cultivation, supervision or direction of all agricultural operations. You should ask the person enumerated, the question "Do you possess or hold any land or does your household possess or hold land?"

(b) If so, "Are you engaged in the cultivation of land or supervision or direction of land owned or held?"

The answers obtained should be recorded as follows :

'C' should be written in the cases of persons working as cultivators.

'X' for persons not working as cultivators or not working at all.

41. Question 9 : Agricultural labourer is a person who works on another's land for wages in cash or kind without having any supervision or direction in cultivation. The labourer will not have any right to lease the land on which he works nor will he be responsible for the crop he sows and he does not take any risk of cultivation. He may be paid his wages in kind. A person should have been working as agricultural labourer in the last or current cultivating season. After ascertaining from the person whether he works for wages on another person's land without any right to lease or contract, etc., he should be treated as an agricultural labourer and 'AL' should be recorded against this Question. 'X' should be recorded for in-applicable cases.

42. (a) Question 10 (a) It is defined as an industry conducted by the head of the household himself and/or by the members of the household/or at home within the village in rural areas and only at home in urban areas. In other words, a household industry can be located at home and within the limits of the villages in rural areas. In urban areas, the industry must be confined to the house or at least a major part of the work must be located at home. In the case of urban areas, where the industry is not conducted at home but is situated elsewhere it should not be treated as a household industry. The industry should not also be run on the lines of a factory. For purposes of classifying as a factory, an establishment should employ 20 persons when no power is used and 10 persons where some kind of power is used.

(b) A household industry should relate to the production, processing, servicing, repairing or making and selling of goods but should not be confined to the processess of buying and selling alone. For example, it does not include professions such as Pleader, Doctor and Astrologer. The test is mainly threefold:

(i) A household industry should embrace manufacture, processing or servicing and may include sale but is not confined simply to purchase and sale. At least part of the goods offered for sale should be manufactured there.

(ii) A household industry should not be carried on on the scale of a registered factory, but should be confined to the household scale where the workers will be composed of the head of the household and the members of the household, the role of hired workers from outside, being of minor

importance. The members of the household should be in a position to work in the industry whenever they find time from their daily routine. A household industry can use machinery and employ power like steam, electricity, oil etc., to drive the machinery.

(iii) Location is another important factor in classifying an industry as a household industry, for proximity decides participation by members of the household. In rural areas, if the industry is located within the village instead of at home, it is possible for members of the household, to move about freely in the village to look after the work. In urban areas, such free movement is not possible. Therefore, in urban areas, the definition of household industry is limited to industries which are located at home though part of the work may be done outside. To quote an example, in a house situated in an urban area weaving is done, for which the yarn has to be dyed before being used in looms for weaving. The dyeing of yarn may be done outside the house in an open space or even in a shed, some distance away from the house. The weaving industry, in this case, will be treated as a household industry, even though the dyeing of yarn is done outside the house. Some examples of household industry are given as Appendix IV to this booklet to which you can refer while filling these columns, e.g., beedi workers, who either singly or with the help of the members of the family roll beedies at home for wages, while the contractor supply the materials, certain processess like buttoning and hand-sewing of cloth are carried on at home by members of the household, both at residence and at the place of work; where women-folk of the household fill at home with lac, gold ornaments prepared at the shop by male members of the household. These activities can also be regarded as illustrations of household industry.

(c) Your task is to find out the nature of the work and the nature of the household industry. The status of the persons engaged in the industry should be recorded against this question. If an industry is conducted on the scale of a household and the person enumerated is a member of the same household participating in the industry, you should ascertain the nature of the work which he is doing and enter it against question 10 (a). The nature of the household industry in which he is working should be entered against question 10 (b). In such cases question 10 (c), "If employee" is not applicable an 'X' has to be written within the triangle set apart for the purpose.

(d) There are persons who may not be working in their own household industry but may be working as paid employees in another household industry. In that case, for such persons, the nature of work and the nature of household industry should be recorded against question 10 (a) and 10 (b) with respect to the household industry in which they are working and "EE" should be recorded against question 10 (c) in the triangle.

(e) There may be others who might be working unpaid in another industry carried on by a household in which they are not members. Even in such cases the correct particulars should be recorded against question 10 (a) and 10 (b) and 'EE' entered against question 10 (c). But apprentices who are working without wages or for a stipend and are normally resident with the household may be considered to be part of the household and the correct particulars entered against question 10 (a) and (b). Against question 10 (c), 'X' will be recorded within the triangle. But such of those apprentices who are not normally resident in the household and who do not form part of the household, may be treated as employees, irrespective of the fact whether they get a stipend or not and EE entered in the triangle against question 10 (c). A few illustrative examples as to how the answers are to be recorded against question 10 (a), (b) and (c) are furnished below:—

	10 (a) Nature of work	10 (b) Nature of Household Industry	10 (c) If employee
1	2	3	4
1. Person employed as Dyer of yarn in handloom weaving conducted by another household.	Dyeing yarn ...	Handloom weaving (dhoties and towels).	EE

	10 (a) Nature of work (2)	10 (b) Nature of Household Industry (3)	10 (c) if employee (4)
2. Person working as setter of precious stones in family jewellery.	Stonesetter ...	Gold and diamond jewels making.	X
3. Member of the household engaged in polishing wooden dolls made in the household.	Polishing wooden dolls.	Wooden Dolls making ...	X
4. Person employed for painting clay toys and dolls made in household industry at another household.	Painting clay dolls and toys.	Clay dolls and toys making ...	EE
5. Person joining sides of wooden boxes made in the household.	Joiner ...	Wooden boxes making ...	X
6. Person making pots ...	Throwing and turning pottery.	Earthen pottery ...	X
7. Person employed for filling with lac in household making silver images.	Filling silver ...	Silver smithy ...	X
8. A member of the household maintaining accounts in a household establishment of drugget manufacturers.	Keeping accounts ...	Drugget manufacture ...	X
9. Person employed to drive the bulls in an oil-chekku.	Labourer employed in driving bulls of oil-chekku.	Oil crushing ...	EE
10. Household member doing scrapping of rust, etc. of metal in a household doing electro-plating.	Scrapping and cleaning.	Electro-plating ...	X
11. Person spinning yarn ...	Spinning yarn on Ambar Charka.	Yarn spinning ...	X

43. Question 11 :—This is not applicable to persons working as cultivator or as agricultural labourer or in any household industry. As indicated earlier, cultivation involves ploughing, sowing and harvesting of certain specified crops. Growing of other field produce and plantation crops does not come within the purview of cultivation and has to be entered against question 11. A few examples of other field produce and plantation crops are furnished below for your guidance.

(a) Other field produce :

- Production of fruits and nuts in plantations and orchards (like Cocoanut, Arecanut, etc.)
- Production of wood, bamboo, cane reeds, thatching grass, etc.

- (iii) Production of other agricultural produce (including fruits and nuts not covered by item No. 1 and flowers) not covered above.

Plantation Crops :

(i) Tea Plantations

(ii) Coffee Plantations

(iii) Rubber Plantations

(iv) Production of tobacco on a large scale. This does not include tobacco which is cultivated as a rotation crop with other cereal crops, in which case it would be defined as cultivation crop.

(v) Production of ganja, cinchona, opium, pepper, saffron, etc.,

(vi) Production of other plantation crops not covered by the above items (e. g., cardamom, clove and other spices).

If a person is doing some other work in addition to the three items mentioned above or if a person is not working in any of the three categories, cultivation, agricultural labour or at household industry, the details of the work he is doing will be recorded against this question. If a person is engaged in more than one work and neither of them relate to any of the three categories mentioned above, write here the work for which he devotes a major part of his time.

(b) This question is divided into four parts. 11 (a) the nature of work, 11 (b) the nature of industry, profession, trade or service, 11 (c) class of worker and 11 (d) the name of the establishment in which the person is working. This question will not apply to persons who are not working or who work in any of the three categories mentioned earlier. For such persons write 'X' in all the four parts of this question.

(c) Detailed instructions for filling in the four parts are given below :—

11 (a): Full information as to the nature of work done by the persons should be recorded either in the vernacular or in English. If full information is not furnished, the correct position may not be ascertained. Against Question 11 (b) you should describe in detail the nature of industry, business, trade or service in which the person works. In the case of persons working in industries, the name of the articles produced, serviced or repaired should be clearly specified, e. g., Manufacture of Automobile Piston rings, Manufacture of Torch Light Cells or Bicycle rims, retreading of car and truck tyres, repairing of musical instruments, etc. If more than one article is produced, repaired or serviced, the name of the chief article produced, repaired or serviced should be indicated. In the case of business or trade the principal article of trade should be described and the fact whether retail or wholesale trade is carried on should also be indicated.

Example: Wholesale trade in cotton seeds, retail trade in cotton textiles, wholesale trade in jaggery, retail trade in stationery article, etc.

(d) In the case of service, describe the nature of service under which the person's work can be classified. The description recorded under question 11 (b) should be of the nature as would permit the classification of the establishment under the Industrial Classification Code, correctly. Some of the important points to be borne in mind while recording answers to questions 11 (a) and (b) are briefly mentioned below.

(i) In the case of women or children who help in work such as rice pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung

cakes, grass, etc., the nature of work should be described fully even if they work part-time. In the case of married or grown up women who do any of the work mentioned above, in addition to the usual household duties, such work should be fully described and 'HW' written in brackets after the full description.

(ii) If a person produces the article he sells, he should be entered as a producer-cum-seller.

(iii) Wherever possible, the work should be indicated by the vernacular name by which it is commonly known.

(e) The following terms which are vague must not be used when it is used to qualify the nature of work.

(iv) Scientist, Technician, Civil Servant, Clerk, Engineer, Inspector, Checker, Foreman, Overseer, Supervisor, Labourer, Machinist, Assistant, Contractor, Polisher.

(f) On the contrary such terms as Travelling Ticket Inspector, Contractor for building houses Government, P. W. D. Contractor, in charge of road works, Railway Goods clerk in the Southern Railway may be used, as they clearly indicate the nature of work.

(v) Labourers : For an unskilled labourer usually employed on one work only, indicate clearly the nature of work done, e. g., Railway Porter, Market or Bazaar Porter, Labourer employed on road digging, brick layer etc.,

(vi) Machine Operators : Always state the kind of machine operated by the person.

(vii) Shop-keeper: Retail dealers and shop Assistants if wholly or mainly engaged in selling, write 'Dealer' (if principal) or Shop Assistant or Salesman (if assisting) and state whether the business is wholesale or retail, or both.

(viii) Transport Workers : Describe fully the nature of the transport, e. g., air transport, rail transport, transport by motor car or motor cycles or vehicles drawn by horses, etc.

(ix) Services : For persons engaged in the Defence Services, write Service of the Central Government and Central Government employees against the nature of work.

(x) If the job is known in trade or industry by a special name, that name should be recorded. Managers, Foreman, etc., should be specified by the department in which they are working, e. g., Sales Manager, Machine Shop Foreman and Boiler Room Foreman, etc. The following terms should not be used alone:-

Manufacturer, Merchant, Agent, Broker, Refractor, Dealer, Engineer, and Iron Works, etc.

(xi) Domestic Services: In the case of a private service, i. e., a Cook or Domestic Servant write only private Cook or Domestic Servant. However, in the case of persons employed in hotels or restaurants, institutions, etc. the words hotel or restaurant, etc. should be added.

(g) For persons in the employ of firms carrying on two or more businesses if the businesses are carried on in separate premises, then the business carried on at the premises in which the person is employed should be given. Where two activities are carried on side by side, the primary or major activity of the firm or establishment should be specified.

(h) Commerce : The distinction between wholesale and retail business must be kept in mind. As in the case of other industries the goods handled should be clearly indicated.

44. (a) Question 11 (c) :— A person may be an employer or an employee, a single worker or a family worker in industry, trade, profession or service in which he is working. Employer, to define specifically, is a person who employs other persons in order to perform the work recorded against question 11 (a). As such he is not only responsible for his own work but also for the work done by others in the business mentioned above. However, a person who employs domestic servants for household duties or subordinates under him in an office where he is employed by others, e. g., Manager of the head of the department, does not come under the definition of an employer, even if he has been delegated the power to employ another person in his office on behalf of his employer or employers.

(b) An employee is a person who usually works under some person for salary or wages in cash or kind. Of course, there may be persons who are generally employed as Managers, Superintendents, Agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are considered as employees.

Single worker is a person who works by himself but not as the head of the household in a household industry.

He is not employed by anyone else and in his turn does not employ anyone, not even the member of his household, except casually. This definition of single worker includes a person who works in joint partnership with one or several persons, hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operative should be recorded as 'Single worker'.

(c) A family worker is a person who works without receiving wages in kind or cash in any business or trade conducted mainly by the members of the family and ordinarily does at least one hour of work everyday during the working seasons.

(d) For the purpose of entire Question 11 the reference to industry differs mainly from the household industry, in that, the industry is carried on a scale larger than what is covered under the former. The industry may be run at home or away from home in urban areas and even away from village in rural areas and should ordinarily be in the nature of a recognised Partnership, Joint Stock Company or a Registered Factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. A family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

(e) Members of the household, who help in performing household duties should not be treated as family workers.

To record the class of worker you should ask the person enumerated the following questions :—

- (i) Are you an employer (i. e.,) employing others in your work.? or
- (ii) Are you an employee (i. e.,) employed by others for wages or salaries in cash or kind? or
- (iii) Are you a single worker working singly without employing others? or
- (iv) Are you a family worker, i. e., helping in the family work without wage or salary in cash or kind.

(f) The answers obtained to these questions should be recorded by the authorised abbreviations as under :—

MR — For employer

EE — For employee

SW — For single worker and

FW — For family worker

For Persons to whom 'X' has been written against question 11 (a) and 11 (b) write 'X' against this question also.

45. (a) Question 11 (d): You should record the details of the name of the Factory, Workshop, Business House, Industry, Shop, etc., and also the place in which the same is situated. If a person has no fixed place of work, write "No fixed place of work".

(b) In some of the enumeration slips issued to you, an error in printing has crept in. In the vernacular forms this error has not been noticed. In English forms, instead of printing the words "name of the establishment" against question 11 (d) the words "nature of establishment" has been wrongly printed.

(c) As soon as you read these instructions kindly take up the enumeration slips issued to you and correct the words to read as "name of the establishment". This has to engage your attention immediately.

(d) A few illustrative answers to questions 11 (a) to 11 (d) are given below :—

	11 (a)	11 (b)	11 (c)	11 (d)
1. Labourer in Coffee Plantation.	Plantation labourer.	Coffee	EE	Kannan Devan Coffee Plantations, Pattiveeranpatti.
2. Technical Officer, Drugs Control Organisation, Madras.	Technical Officer for Drugs.	Drugs control organization.	EE	Government of India Assistant Drugs Controller, Madras.
3. Bank Cashier	Cashier	Bank	EE	Indian Bank Ltd., Alwarpet.
4. Motor Spare Parts Salesman.	Salesman	Motor spare parts sales (Retail).	EE	Lakshmi Motor (Private) Ltd., Madras.
5. Assistant Meteorologist, Regional Meteorological Centre, Meenambakkam.	Assistant Meteorologist.	Meteorological Forecasting Department.	EE	Regional Meteorological Centre, Meenambakkam.
6. Pilot, Air India International.	Air Pilot	Air Transport	EE	Air India International Ltd. Bombay.
7. Head Accountant, Taluk Office.	Account keeping.	District Revenue Establishment.	EE	Taluk Office, Vriddhachalam.

40. Salesman ...	Salesman ...	Retail shop of readymade garments, silk sarees, etc.	FW	Elsons & Sons, Madras.

46. Activity if not working: (a) Question 12: This applies to persons who are not working, i. e., those who are not engaged in cultivation, agricultural labour, household industry, trade, profession or service.

This category includes persons who are not active in the sense that they are not engaged in any productive work. Beggars, pensioners, persons receiving royalty from agricultural land or non-agricultural land, rent or dividend receivers, etc. though they may be earning an income do not participate in any productive work as well as inmates of institutions, convicts in jail, disabled persons not working, etc., are classified as persons "not working".

These persons have been grouped under eight different categories for Census purposes. Each group has to be indicated by authorised abbreviations as given below:

(b) To record an answer to this question, you should ask the person enumerated, the following questions. If the answer to the questions is in the affirmative you should indicate the group to which he belongs by the abbreviation mentioned against each:

Authorised abbreviations.

(i) Are you a full-time student or a child attending school who does no other work such as manufacturing articles at home for sale or helping your family in cultivation, industry, trade or business?

ST

(ii) Are you a person engaged in unpaid household chores or housewife or adult woman who does no other work such as making articles at home for sale or wages or helps regularly even part-time in family cultivation, household industry, trade or business?

APPENDIX IV.

Extract from 'A note on working force estimates, 1901—1961' By B. R. Kalra, Research Officer, office of the Registrar General, India'.

An attempt has been made in this note to work out estimates relating to working force in India in 1901—1961 (except 1941), based on Census Reports, so as to make them comparable with 1961 Census data. As the tripartite division of the economic status has been done away within 1961, the changes in 1951 and 1931 data have been made in order to conform to the new division of the population into workers and non-workers. For earlier censuses while 'actual workers' have been generally treated as workers, the 'dependants' have been shown among non-workers. Among 'actual workers', those pursuing unproductive occupations have been transferred to non-working population.

1951 CENSUS :—Workers in 1951 comprised of :

(i) All self-supporting persons with productive principal means of livelihood i.e. all self-supporting persons other than (a) agricultural rent-receivers belonging to livelihood Class IV and (b) self-supporting persons deriving their means of livelihood from non-agricultural, non-productive occupations, like beggars, pensioners etc., belonging to livelihood Class VIII.

(ii) Self-supporting persons belonging to livelihood Class IV (agricultural rent receivers) but deriving secondary means of livelihood from productive occupations i.e., other than Class IV.

(iii) All earning dependants in respect of their own (secondary) means of livelihood other than those who derived their secondary means of livelihood from :

(a) receipt of agricultural rent under Class IV, and

(b) non-agricultural non-productive occupations. (For calculating working force, no account has been made of the self-supporting persons whose principal means of livelihood was non-agricultural non-productive but who had a productive secondary means of livelihood, as unlike rent-receivers in Class IV, these persons were lumped in Class VIII and did not have a separate class of principal or secondary means of livelihood).

Non-workers of 1951 were equal to :

(i) All non-earning dependants ;

(ii) Self-supporting persons whose principal means of livelihood was agricultural rent (Class IV) and who had no productive secondary means of livelihood ;

(iii) The following groups of self-supporting persons included in non-agricultural Class VIII :

(a) Persons living principally on income from non-agricultural property ;

(b) Pensioners and remittance holders ;

(c) Inmates of jails, asylums, alms houses and recipients of doles, beggars and vagrants and

(d) Other persons living principally on income derived from non-productive activity.

(iv) Earning dependants whose own means of livelihood (Secondary means of livelihood) was agricultural rent-receiving under Class IV, and

(v) Earning dependants whose secondary means of livelihood was non-agricultural non-productive. The number of this group have been estimated at 455,792 (106,771 males and

349,021 females). This estimate has been worked out on the basis of proportion of non-productive self-supporting persons to all self-supporting persons in the non-agricultural classes. These earning dependants were deducted from Class VIII and placed among non-workers.

1931 CENSUS :

I. Workers :—(i) All earners following productive occupations and

(ii) All working dependants following productive occupations.

II. Non-Workers :—(i) All non-working dependants ;

(ii) Earners and working dependants following non-productive occupations

(a) Non-cultivating proprietors taking rent in money or kind ;

(b) Proprietors (other than agricultural land), fund, scholarship holders and pensioners ;

(c) Inmates of Jails, asylums and alm-houses

(d) Beggars and vagrants ;

(e) Procurers and prostitutes ;

(f) Other unclassified non-productive industries.

68 lakhs females in Madras and Travancore—Cochin who were returned as working dependants in domestic services have been subtracted from the working force and put under non-workers.

1921 and 1911 CENSUSES :

I. Workers :—All “ Actual workers ” having productive occupations ;

II. Non-Workers :—(i) All “ dependants ”; and

(ii) All “ Actual workers ” in non-productive occupations as stated in case of 1931 census.

1901 CENSUS :

I. Workers :—(i) All “ actual workers ” having productive occupations ;

II. Non-workers :—(i) All “ dependants ”; and

(ii) “ Actual workers ” in non-productive occupations ;

(a) Rent-receivers ;

(b) Prostitutes, procurers, pimps etc.

(c) Receivers of stolen goods ;

(d) Witches, wizards, cow-poisoners etc.

(e) House-rent, share and other property not being land ;

(f) Allowances for patrons or relatives ;

(g) Educational or other endowments, scholarship etc.

(h) Mendicancy (not in connection with a religious order) ;

(i) Pensioners, inmates of asylums, prisoners etc.

In the States of Assam, Punjab, Cochin, Rajputana, Central-India, Kashmir, Bihar, Madras, Mysore and Coorg, owner cultivators, tenant cultivators and lessees numbering 13,979,244 were shown under “ rent-receivers”. These have now been grouped under industrial category I of 1961 (Cultivators).

No sex-wise break-up of dependants was available in the censuses of 1921, 1911 and 1901. After subtracting from the male population all male workers of productive and un-productive occupations, the remainder gave an estimate of the male component of dependants. Similar procedure was adopted in the case of female dependants.

Table-I indicates the reclassification of groups and sub-divisions in earlier censuses on the basis of 1961 broad industrial classification. For this purpose, the groups in earlier censuses were first related to the groups in the Indian Standard Industrial Classification (I. S. I. C.), adopted in 1961 and then consolidated into nine broad industrial categories of workers. The following have been the main readjustments.

Owner cultivators, tenant cultivators, estate agents and managers and shifting cultivators have been shown against category I of 1961 (Cultivators). Toddy drawers who were included under food industries in previous censuses have been included in industrial category III. This could not be done in the case of 1951 since toddy drawers were included with other workers in processing and manufacture of beverages. No estimate could be made for persons working in industrial category IV (Household Industry). Persons working in Household Industry are included in industrial categories III and V.

Workers in generation and transmission of electric energy and gas works have been included in category V of 1961 (Manufacturing other than Household Industry). In the case of 1901 Census, “makers and sellers” have in all cases been listed under category V. Wherever possible, persons employed on construction and maintenance of roads, railways, bridges, harbours, canals, rivers, aerodromes, etc., have been shown under category VI (Construction). Workers who operated such transport works were shown under category VIII (Transport, Storage and Communications).

Rent Collectors, clerks, etc. of ex-zamindars and jagirdars have been transferred to category IX (Other Services). This category also includes washing, cleaning, and dyeing, barbers, hair-dressers and scavenging which were listed in earlier censuses in industry and hotel-keeping which was shown in earlier censuses under Trade. Private motor-drivers and cleaners have been included in category IX and not under Transport.

In 1951 Census, classification of population into divisions and sub-divisions was done only in respect of self-supporting persons and that also with regard to their principal means of livelihood. Thus, no divisionwise break-up of earning dependants and self-supporting persons with regard to their secondary means of livelihood was available. In these Tables earning dependants have been divided into their respective divisions and sub-divisions of the livelihood class to which they belonged in the proportion of self-supporting person in those divisions and sub-divisions as available in Economic Table III. Self-supporting persons belonging to livelihood Class IV who had a productive secondary means of livelihood have also been distributed in similar manner. However, while distributing earning dependants, it was assumed that their number in the following sub-divisions was insignificant as observed in the States of West Bengal and Uttar Pradesh where detailed classification of earning dependants into divisions and sub-divisions was made.

7-4 Railway Transport

7-6 Postal Services

7-7 Telegraph Services

7-8 Telephone Services

7-9 Wireless Services

8-1 Medical and other Health Services

8-4 Police (other than village watchmen)

- 8.6 Employees of Local Boards and Municipalities (but not including persons classifiable under any other division or sub-division)
- 8.7 Employees of State Governments (but not including persons classifiable under any other division or sub-division)
- 8.8 Employees of Union Government (but not including persons classifiable under any other division or sub-division)
- 8.9 Employees of non-Indian Governments

No allocation of earning dependants was, therefore, made in respect of these sub-divisions.

General Labour—During 1901 to 1931 Censuses, the following workers were returned under the head "General Labour".

<i>Year</i>	<i>Groups</i>	<i>Persons</i>	<i>Males</i>	<i>Females</i>
1	2	3	4	5
1901	(504)	8,216,412	4,530,856	3,685,556
1911	(167)	4,034,446	2,149,313	1,885,133
1921	(187)	4,555,194	2,429,943	2,125,251
1931	(191)	6,450,338	3,376,576	3,073,762

These have now been apportioned among industrial categories I-IX on a pro-rata basis in the proportion in which the rest of the working force exclusive of general labour is distributed.

"UNSPECIFIED" or "INSUFFICIENTLY" described occupations:—

From 1911 to 1931 Censuses, the following groups were returned as "Unspecified":—

1. Manufacturers, businessmen and contractors otherwise unspecified;
2. Cashiers, accountants, booking-clerks, clerks and other employees in unspecified offices, ware-houses and shops;
3. Mechanics otherwise unspecified;

Workers under the 1st group have been distributed between the industrial categories V and VII in the proportion of rest of the workers in the two categories. Workers in 2nd and 3rd groups have been distributed among industrial categories V-IX of 1961 according to the proportion of workers in these categories.

In 1901, the following groups were returned as "insufficiently described":

- (i) Uncertain or not returned;
- (ii) Services unspecified (Chakari)

While the workers in the first group have been distributed on a proportionate basis in all the industrial categories I-IX, those in the second group have been apportioned proportionately among non-agricultural categories V-IX of 1961.

TABLE B-I

Workers and Non-workers Classified by sex and broad age groups

FLY LEAF

This table presents the data relating to the entire population divided into two broad categories workers and non-workers. The number of workers have been further divided into 9 livelihood classes based on the classification of industries under which their work falls. Data for the population, total workers, workers of each category and non-workers, have been furnished for four broad age-groups 0-14, 15-34, 35-59 and 60 plus. The classification of workers and non-workers by age groups, is a special feature of this Census. The age-groups correspond to the different stages of life which have particular significance to their capacity to work, viz., children, young persons, middle aged persons and old persons. The data have been furnished separately for total, rural and urban.

In 1951, the population was divided into two broad livelihood categories namely Agricultural Class and Non-Agricultural Class, each class containing four categories. Each class was further sub-divided into three sub-classes with reference to the economic status, namely self-supporting persons, non-earning dependants, and earning dependants. As income was substituted by productive work in this Census, the sub-classifications 'Self-supporting, earning dependants and non-earning dependants' have been given up. The tabular statement given below gives the classifications adopted in 1951 and 1961 Censuses.

LIVELIHOOD CLASSIFICATION OF	
1951	1961
I. Cultivators of land wholly or mainly owned and their dependants	I. Cultivator
II. Cultivators of land wholly or mainly unowned and their dependants	II. Agricultural Labourer
III. Cultivating labourers and their dependants	III. Mining, Quarrying, Livestock, Forestry, Fishing, hunting and plantations, Orchards and allied activities.
IV. Non-cultivating owners of land, Agricultural rent receivers and their dependants	IV. Household Industry
V. Production other than cultivation	V. Manufacturing other than household industry
VI. Commerce	VI. Construction
VII. Transport	VII. Trade and Commerce
VIII. Other Services and Miscellaneous sources	VIII. Transport, Storage & Communications
	IX. Other Services
	X. Non-Workers

The term 'worker' and 'non-worker' has been defined in the preliminary note to his series. The workers have been classified into 9 main categories.

Upto 1941, the Classification of occupied population was based on occupation. In 1951, the unit of classification was the individual. All employers and all independant workers were classified with reference to the commodity produced or service rendered and employees engaged in production, commerce or transport excluding domestic servants were also classified with reference to their own activity. Domestic servants were classified into sub-divisions without reference to the nature of their work. All other employees were classified with reference to the commodity produced or service rendered by their employers. This scheme was known as Indian Census Economic Classification (I.C.E.C.) which was an adaptation of the International Standard Industrial Classification. In this Census, the establishment has been the unit of classification. Classification of establishment was based on the products made or services provided by that establishment. In the case of self-employed persons, they have been grouped under the classified industry to which their activity relates. In the case of others,

they have been grouped under the 'Industry' in which they are employed. This scheme of division known as Indian Standard Industrial Classification (I. S. I. C.) is based on and closely related to the International Standard Industrial Classification.

The first classification of workers is 'Cultivator'. A person has been classified as cultivator in this census, if he or she is engaged as an employer, single worker or family worker in

(i) cultivation of land or supervision or direction of cultivation of land, owned or held from Government;

(ii) Cultivation of land or supervision or direction of cultivation of land held from private persons or institutions, for payment in money, kind or share in the produce of crop;

(iii) It is not necessary that a person should own the land absolutely. Even if the land cultivated is held on lease or under a variety of tenures, the person has been regarded as a cultivator. Till 1961, a distinction was made in the censuses between different kinds of ownership of land which was interlinked with 'Gainful occupation'. In 1961, 'Cultivator,' has come to denote only fulfilment of an economic function and not a title. The shift of emphasis is from land ownership status to activity status. Cultivation involves ploughing, sowing and harvesting and does not include the growing or keeping of orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plants. Persons engaged in tree-growing or working in plantations like tea, coffee, rubber, cinchona have not been treated as cultivators. A person who leases out his lands to others for cultivation and gets a return in the shape of money or share of the crop and who does not even supervise and direct cultivation of land will not also come under the category of cultivator.

Person engaged in cultivation involving ploughing, sowing, harvesting, of cereal crops such as rice, wheat and maize, tuber crops like potato and sweet potatoes, sugar cane, bengal gram, pulses such as groundnut, kesar and other grams, production of raw jute and kindred fibre crops and production of raw cotton have been considered as cultivators. Growing of other field produce like fruits and nuts in plantations and orchards, wood, bamboo etc., and plantation crops like tea, coffee, rubber, etc., do not come within the purview of cultivation.

Any person who works on another's land for wages in cash or kind without having any supervision or direction in cultivation, has been classified as 'Agricultural Labourer'. Such a person should have been working as agricultural labourer in the last or current cultivating season, to be included under the category of 'Agricultural Labourer'. The labourer will not have any right to lease the land on which he works nor will he be responsible for the crop sown and he will not also bear any risk of cultivation.

The third classification of workers relate to the persons engaged in the Sector of Mining and Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and other allied activities. This includes mining of coal, iron ores, etc., quarrying of stone, clay, etc., production and rearing of livestock, planting and conservation of forests and production of other plantation crops, etc. Every census treated plantation crops like tea, coffee, etc., separately from cultivation proper.

A household industry is defined as an industry conducted by the head of the household himself and/or by the members of the household/or at home within the village in rural areas and only at home in urban areas.

The industry should not be run on the lines of a factory i.e., the establishment not using power should not employ 20 or more persons, and should not employ 10 or more persons, if some kind of power is used. It should be confined to the household scale where the workers will be composed of the head of the household, and the members of the household, the role of hired workers from outside being of minor importance. But a household industry can use machinery and employ power like steam, electricity, oil etc., to drive the machinery.

The household industry should relate to production, processing, servicing, repairing or making and selling of goods but should not be confined to the processes of buying and selling alone.

Location is an important factor in classifying an industry as a household industry, for proximity decides participation by members of the household. In rural areas, if the industry is located within the village instead of at home, it is possible for members of the household to move about freely in the village to look after the work. In urban areas, such free movement is not possible. Therefore, in urban areas, the definition of household industry is limited to industries which are located at home, though part of the work may be done outside.

Persons working in such household industries have been classified under the group 'Household Industries'. Persons working unpaid or working as apprentices in another industry carried on by a household in which they are not members, are also classified only under Household Industry.

Manufacturing other than household industry is the fifth classification of the workers adopted in this census. This includes manufacturing of foodstuffs, beverages, textile products, wooden products, paper products, leather products, basic metals, transport equipments, etc. This includes all manufacturing except manufacturing done in the household industry.

The sixth group of worker in the classification of workers is the person engaged in the sector of 'Construction'. This includes construction and maintenance of buildings, roads, telegraph, telephone line, waterways, reservoirs, etc.

The seventh group of worker relates to the workers in the sector of 'Trade and Commerce'. This includes retail and wholesale trade and commercial activities like banking, money lending, stocks and shares, etc.

The eighth group relates to workers in 'Transport, Storage and Communication'. This includes transport by all modes, storage and warehousing and Postal, Telephonic and other communications.

The ninth classification 'Other Services' includes worker in Governmental services, educational, Medical, Legal, Business services, Personal services, Community services, and the general or casual labourers who do not have any fixed place of work.

Persons not coming under the definition of workers, as defined above, have been classified as non-workers. These non-workers include eight groups consisting of students, housewives, dependant like infant and disabled person, retired persons, beggar or vagrant or independent woman, convict in jail or inmate of penal or charitable institution, person seeking employment for the first time and person employed before but now out of employment and seeking employment. The definition of these groups of non-workers, is dealt in detail in the fly leaf to table B-IX.

TABLE

Workers and Non-workers Classified

State and District	Total Rural Urban	Age-group	Total Population			Total workers	
			Persons	Males	Females	Males	Females

TABLE B-II

Workers and Non-workers in Cities, Town-groups and Towns arranged
territorially classified by sex and broad age-groups.

In this table the data relating to the number of workers in each category and the number of non-workers, by sex and broad age groups, furnished in Table B-I, are given separately for each city, town group and town arranged territorially. In the censuses earlier to that of 1951 Imperial table V furnished the data of population classified by religion, for cities and towns arranged in the territorial order. This was replaced by Table A-V in 1951 which furnished the data for towns arranged territorially, substituting the classification by religion, with classification by sex and eight main census livelihood classes. The figures for the agricultural livelihood classes I to III alone were clubbed together and data for other livelihood classes were given separately for each livelihood class. This table (A-V of 1951) was classified under 'A' — General Population Tables.

As stated in the Fly leaf to Table B-I, the division of population into livelihood classes was done first only in 1951, the unit of classification being the individual. In the previous censuses the classification of population was based on occupation for workers and in the case of dependents based on the occupation of the person on whom they depended. These occupations were divided into classes, orders, sub-orders, and groups, and the occupational data was furnished for these classifications for the actual workers and dependants. This data was furnished separately for cities in the earlier Censuses. Hence this Table B-II can be said to be on the model of Imperial Table-V of the censuses earlier than 1951, and an improvement of the table A-V of 1951.

The definitions of the classification of workers and non-worker have been already given in detail in the Fly leaf to table B-I. As this table furnishes the data for the urban areas of the State, it is necessary to know what an urban area is. The definition of urban area in the various censuses from 1901 to 1961 are given in detail in Part II-A. Hence the definition of urban area in 1961 census alone will now be indicated. All municipalities, cantonments, and townships are treated as towns. For other areas the following principles were followed:

- (i) the population of the area should not be less than 5,000
- (ii) 75% of the male population should depend on non-agricultural activity for their livelihood and
- (iii) the density should be 1,000 persons per sq. mile.

Some places in which only two of the three conditions were satisfied, and which had definite urban characteristics were also declared as urban. This applied mainly to newly founded industrial areas, large housing settlements, places of tourists importance with all civic amenities, areas surrounding the municipal or cantonment limits, but lying outside their jurisdiction.

Township is a new concept introduced in this census. Towns which are either contiguous or near each other having separate legally constituted civic administration like municipality, panchayat, cantonment or a township have been grouped together to form a town group which will serve as a unit for statistical purposes. 34 towngroups have been formed in this State and figures for each group have been furnished separately.

The towns including town group have been graded into six classes, based on their population. Class I represents towns of population of 1,00,000 and above and these are known as cities. There are 11 Class I towns, including town groups. Of these 11 towns 9 are cities and 2 are town groups, namely Kurichi and Palayamcottai. The town with a population of 50,000-99,999 has been classified as Class II, and the town having population ranging from 20,000 to 49,999 as Class III. There are 22 and 60 towns under Class II, and Class III respectively in this State. Class IV town consists of population of 10,000 to 19,999 and Class V of 5,000 to 9,999. There are 96 Class IV towns and 81 Class V towns in this State. The VI class of towns which number 17 in this State, consists of towns which have a population of less than 5,000 but which have been declared as urban areas because of their urban characteristics. Thus on the whole Madras State has 287 towns which includes 34 town groups and the data relating to total population, total workers in each category, and non-workers with sex break up and broad age-groups have been furnished in this table separately for each place.

TABLE B-III

PARTS A & B

Industrial Classification of Workers and
Non - workers by Educational Levels.

FLY LEAF

This table recalls the Table D-VII of 1951 Census but contains more detailed information. No tables were prepared for the livelihood classes by educational standards in the Censuses prior to 1951. In 1951, a table was prepared showing the distribution of only literate population among the eight livelihood classes by educational standards. In 1961, the figures relating to illiterates also have been shown for each of the nine categories of worker and for Non-worker. The classification of educational standards furnished in 1961, is also more elaborate than that of 1951. While in 1951 the table was prepared without Rural, Urban break up, in 1961, the table has been prepared in two parts, Part-A dealing with urban areas only and Part-B dealing with rural areas only. The educational standards adopted for the Table D-VII of 1951 and for the table B—III-A and B of 1961 are given below in a tabular form. In Part-B, the educational standards for literates who possess some educational qualification have been restricted to Primary or Junior Basic, and Matriculation and above, whereas in Part-A, in addition to the above educational standards, the standards of Technical Diploma not equal to Degree, Non-technical Diploma not equal to Degree, University non-technical Degree, and Technical Degree had been furnished separately. Under the 'Technical Degree', six important branches of Science namely, Engineering, Medicine, Agriculture, Veterinary, Technology and Teaching had been also listed out.

The Educational Levels Presented in

1951 Census Table D—VII (Only for Literates)	1961 Census Table B—III—A	1961 Census Table B—III—B
1. Literate	1. Illiterate	1. Illiterate
2. Middle School	2. Literate (without educational level)	2. Literate (without educational level)
3. Matriculate or S. S. L. C. Higher Secondary	3. Primary or Junior Basic	3. Primary or Junior Basic
4. Intermediate in Arts or Science	4. Matriculation or Higher Secondary	4. Matriculation and above
5. Degrees or Diplomas	**5. Technical Diploma not equal to Degree	
i. Graduate in Arts or Science	**6. Non-technical Diploma not equal to Degree	
ii. Post-graduate in Arts or Science		
iii. Teaching	7. University Degree or Post-graduate Degree other than technical Degree	
iv. Engineering		
v. Agriculture	8. Technical Degree or Diploma equal to Degree or Post-graduate Degree	
vi. Veterinary	i. Engineering	
*vii. Commerce	ii. Medicine	
*viii. Legal	iii. Agriculture	
ix. Medical	iv. Veterinary and Dairying	
x. Others	**v. Technology	
	vi. Teaching	
	vii. Others	

* Denotes the educational standards which have not been separately mentioned in 1961 tables.

** Denotes the educational standards which have been newly included as separate classifications in 1961 tables.

Knowledge of the definition of the concept of 'Literacy' according to Census will be of use to understand this table. A person has been considered as 'Literate' in the Census of 1961, if he is able to read and write. The test for literacy was satisfied if the person can, with understanding, read and write a simple letter. The person who does not satisfy this test is an 'Illiterate'. The literates consist of both, mere literates who just satisfy the definition of literacy without possessing any educational qualification, and literates who have passed some examinations. In all the Censuses the term 'Literate' was always used to denote 'Not Illiterate', as 'Literate' included persons who just know to read and write a simple letter. In the Censuses of 1881 and 1891 there were three classifications of persons regarding literacy. Persons under instruction either at home or school or college were treated separately. Among the others who were not under instruction those who were both able to read and write any language were distinguished from those who did not know to both read and write. In 1891, these three classifications were termed as 'Learning', 'Literate', and 'Illiterate' respectively. From 1901 the distinction of persons under instruction from those who have completed it and those who have not had it, was abolished. From 1901 to 1941 separate question was also asked to find whether one knows to read and write English. This separate question on English was abolished from 1951 census. In 1951, data relating to persons who know only to read was also collected and they were treated as 'Partly literates'. Detailed notes on the definitions of the concept of 'Literacy', questions asked on literacy and the tables prepared on literacy, have been given in the notes relating to 'C' series. (Social and Cultural Tables.)

The literates who have not passed any examination and the literates who have passed examination below that of Primary or Junior Basic examination, which includes even the persons who have failed in Primary or Junior Basic examination, have been included in the category of 'Literates without educa-

tional level'. All the other literates who have passed Primary or Junior Basic examination or higher examinations have been included in the respective categories.

Many persons possess technical Diploma and non-technical Diploma which are not equivalent to Degree. If these persons are classified according to the ordinary educational standards, a correct idea of the technical skill of these people will not be obtained. Hence new classifications of 'Technical Diploma not equal to Degree', and 'Non-technical Diploma not equal to Degree' have been introduced. Six important branches of science which can be classified as 'Technical' have been also separately listed under the major heading 'Technical Degree or Diploma equal to Degree or Post-graduate Degree'. Provision has also been made to record other technical personnel i.e. persons possessing technical Degree or Diploma equal to Degree in the technical branches of science other than those separately listed.

In Madras State 6.8% out of the total persons recorded under the major classification of 'Technical Degree or Diploma equal to Degree or Post-graduate Degree' come under 'others'. The proportion of persons coming under 'others' ranges in the districts from 0.3% in Madras and Kanyakumari to 30% in Thanjavur. Thanjavur, Trichi and Ramnad are the three districts which have recorded very high proportions of 30%, 27.5% and 22.3% persons under this classification of 'others', out of the total persons recorded in each of these districts under the major head 'Technical degree'. The reason for such a high proportion recorded in these three districts can be ascribed to the failure of the enumerator to record the exact technical qualifications of the enumerated personnel correctly, while recording merely as 'Technical degree'. Only those cases in which it had been merely mentioned in the individual slips as 'Technical Degree' had been classified under this sub-heading 'others'.

It can be also seen from the table that no person has been recorded under the Degree 'Technology' in South Arcot, Nilgiris and Kanyakumari districts. Nilgiris and Kanyakumari districts are comparatively small districts. It is quite possible that there are no persons with Degree in Technology in these districts. It is also possible that the persons belonging to these three districts who possess Degree in Technology may be residing and working in any of the other districts of the State or even in any other State. It can be seen that 2 persons who have attained Degree in Agriculture and 1 person with Degree in Veterinary and Dairying come under the Industrial category of Construction and 24 persons with Degree in Agriculture and 6 with Degree in Veterinary and Dairying come under the category of Trade and Commerce. There can be no strict correlation between the educational qualification and the work of an individual, in many fields of activity. It is quite possible that persons who possess Degree in Agriculture are being employed in a commercial firm selling fertilizers, or in any other commercial firm, or in a firm dealing with construction work, or may be contactors. As explained in Fly leaf to Table B-I, the classification of workers is based on the industry, in which they are employed or in the case of self-employed persons, the industry to which their activity relates.

This table will be of much use for assessment of the educational qualification of available man power, as this provides data relating to the employment of persons of different educational standards among the various categories of workers. The extent of literacy among the population as a whole in different age-groups and in both sexes, without reference to the category of workers, can be obtained from Table C-III.

Among the non-workers, the unemployed aged above 15 alone have been classified by broad age groups and educational standards, separately in the table B-VIII, prepared in two parts, part-A dealing with urban areas and Part-B dealing with rural areas, with the same educational standards as given in the two parts of this Table (B-III A and B).

TABLE—B-IV

PARTS A, B & C

Industrial classification of persons at work other than
cultivation by sex and class of workers.

FLY LEAF

The table B-IV provides data on employment in the various sectors based on the industrial classification. It partly corresponds to the table B-III of 1951 Census and forms an improvement on the Imperial Table XV-E of 1911 and XXII of 1921. In the Censuses prior to that of 1951, the working population were classified on the basis of their occupations. In 1911 and 1921 Censuses, however, Industrial statistics were presented in the Imperial Tables XV-E of 1911 and XXII of 1921. The classification was based on the nature of the establishment, that is, the products made or services rendered by the establishment. This datum was not collected by a direct question in the Census questionnaire. A special return was sent to the industrial establishments and the manager of each establishment was asked to send the required information. (For this purpose an industrial establishment was defined in 1911 as an establishment having 20 and more employees and in 1921 as an establishment having 10 and more persons as employees.) The returns contained full particulars about the ownership and management of the business, the articles produced, the power employed, and the number, sex, age, caste, and birth place of each employee. The industries were divided into 16 groups according to the nature of the establishment. The 16 groups are shown in the Appendix A to this note. Both in 1911 and 1921, the same groupings were adopted. Each industry coming under the group was also classified according to the number of persons employed. The industry using mechanical power was also distinguished from one not using such power. The division on the basis of the number of persons employed was as 20 to 50, 50 to 100, 100 to 200, 200 to 400 and 400 and over. The persons employed were also classified in 1911 as those engaged in direction, supervision and clerical work, skilled workers, and unskilled labourers. In 1921, the first classification was further subdivided into Managers, supervising and technical staff, and clerical staff. Both in 1911 and in 1921 for the unskilled labourers data were furnished in the tables separately for persons aged 14 and over, and for persons under 14 years. For the other categories data were presented separately for Europeans including Anglo-Indians and for Indians. In the remarks column of the table in 1911, even the state of business in each industry at the time of Census, that is, whether the business was normal or brisker than usual, or somewhat brisker than usual, or much brisker than usual, or slacker than usual, or some what slacker than usual or much slacker than usual, was also indicated. In 1911, the table was prepared in three parts, first furnishing provincial figures with all detailed classifications stated above, second furnishing district figures without showing the distinction of factories using power from that not using power and without stating the state of business, and the third part furnishing particulars of caste and nationality of owners and managers of factories owned by companies and factories owned by private persons, separately. In 1921, in addition to these three parts, four more parts, one dealing with the caste or race and birth place of skilled workmen, another with unskilled workmen, sixth giving particulars of the power employed and the seventh the number of looms in use in textile establishments were furnished.

As stated earlier in the preliminary note, the special industrial return was abolished in 1931, and the information on the nature of industry in which one was employed in the case of organised employees only was sought by introducing a question in the Census schedule itself. According to Mr. Yeatts, the Superintendent of Census Operations in 1931, special returns contained 'much that was more suitable for treatment by the Industries Department and at intervals more frequent than ten years, than as an ordinary census incident'. The definition of industry in 1931 was 'employment on wages in company with any other person by a third person.' This definition of course covers many non-industrial forms of employment but intention was to eliminate these during the tabulation stage. But the concept of 'Industry' and its interrelation with occupation were not clearly understood. The tables proposed to be prepared from the data collected were also abandoned on consideration unconnected with census, namely retrenchment. According to Mr. Yeatts, the disappearance of the tables need not be regretted, as even the tabulated returns would not have been of much value.

In 1951, the unit of classification was the individual and it was based more on occupation than on industry. This classification is known as Indian Census Economic Classification. (Refer Fly leaf to Table B-I—para 4). In 1961 Census, the unit of classification is the establishment and the basis of classification is the industry i.e. the sector of economic activity in which the worker is engaged as distinct from occupation which described the exact function the individual performs in that sector. The table B-III of 1951 roughly corresponds to the Table B-IV of 1961 in that, the division into Employer, Employee, Independent or Single worker, has been adopted. In 1951, the data on four non-agricultural livelihood classes were presented in 10 Divisions and 88 sub-divisions. The names of the Divisions which correspond to the livelihood classes are given in Appendix B to this Fly leaf. As stated in the Fly leaf to Table B-I, under the system of Indian Standard Industrial Classification adopted in this Census, the self-employed persons have been grouped under the industry to which their activity relates, and the others under the industry in which they are employed. According to this system, there are nine Divisions, each Division divided into a number of Major groups not exceeding ten, which in total amounts to 45, and each Major group is again sub-divided into a number of Minor groups not exceeding ten, which totals to 343. Three digit code numbers, the first representing the Division, the second the Major group and the third the Minor group have been devised and each industry has thus been codified. The code system known as the 'Digit' system is closely related to international usage as recommended by the International Labour Organisation.

The table B-IV is presented in three parts. In the first two parts of A and B, the data are furnished for each branch of Industry according to the classification of Division and Major group and in the third part-C, according to the classification of Division, Major group,

and Minor group also. The list of 'Standard Industrial Classification' is given as Appendix C to this note. In this table the non-agricultural categories of workers i.e. categories III to IX have been presented and assigned code numbers.

In B-IV—part-A, the figures relating to the workers in household industry only (category IV) has been furnished for each branch of industry, with the code numbers of Division and Major group. In B-IV—part-B, the figures relating to workers in non-household industry, trade, business, profession or service only (categories III and V to IX) are furnished for each branch of Industry, with the code numbers of Division and Major group. In part-C, the figures relating to the total workers of category III to IX, and separate figures for workers at household industry, and for workers in non-household industry, trade, business, profession or service etc., have been presented for each branch of Industry separately with the code numbers of Division, Major group and Minor group also.

In the first part of the table B-IV, namely part-A, figures are furnished for total, rural and urban separately and in the other two parts of the table namely B and C, figures are furnished for total and only urban separately. In all the three parts separate data for males and females have been presented.

In the first two parts, the data have been presented according to the status or class of worker also. By the term 'status of worker' or 'class of worker' is meant, whether the worker is an Employer or Employee or a Single worker or a Family worker. An employer is one who employs other persons for wages or salary to get any work done, who thus, will not only be responsible for his own work but also for the work done by others. However, a person who employs domestic servants for household duties or employs subordinates under him in an office where he himself is employed by others, do not come under the category of an employer, even when the power of appointing any other person is delegated to him.

An employee is a person who usually works under any person for salary or wages, irrespective of the powers. Even the unpaid worker in a household industry, if he is not a member of that household will be only an employee. Apprentices who do not form part of the household will also be an employee, whether he gets stipend or not. The person who works by himself neither employing persons under him for the work, nor being an employee under any other person, except casually, is termed as 'Single worker'. The head of the household in a household industry will not be classified as a single worker. But the definition of single worker includes a person who works in joint partnership with one or several persons, hiring no employees. Each member of a Producers' Co-operative Society will also come under the category of 'Single worker'.

A person who works in any business or trade conducted mainly by the members of the family, ordinarily at least for one hour everyday during the working season, without receiving any wages in cash or kind is a 'Family worker'. This definition does not include the members of the household who help in performing mere household duties.

In the Censuses upto 1941, the status or class of worker was not covered by any question or part of a question in the Census. In 1941 Census schedule, a question was asked as to whether one employs paid assistants or members of the household and if so, to indicate the number employed. In 1951 Census, a question on the economic status of an individual was asked and in that the enumerator was asked to denote whether a self-supporting Person earned his principal means of livelihood as an employer or as an employee or as an independent worker, by assigning number 1 for employer, 2 for employee, and 3 for independent worker. In the case of other self-supporting persons who did not come under these three classes, the enumerator was asked to write 0.

In this Census a part of the question relating to the household industry was intended to record whether the worker in the household industry is an employee or not, and a part of the question relating to other work, namely other than cultivation, agricultural labourer and household industry, was put with a view to record whether the worker is an employer, employee, a single worker, or a family worker. The answers to these questions were recorded by the authorised abbreviations as MR- for employer, EE- for employee, SW- for single worker, and FW- for family worker.

Thus in B-IV—Part-A, data on the class of workers in household industry are presented for employees and others separately, and in B-IV—Part-B, the data relating to the class of workers in non-household industry, trade, business, profession, or service, etc., is presented for the four classes of Employer, Employee, Single Worker and family worker separately. The class of workers are not presented in the Table B-IV—Part-C.

The concept of Household Industry and the other Categories of workers have already been explained in the Fly Leaf to Table B-I. What constitutes an urban area has also been already indicated in the Fly Leaf to Table B-II.

APPENDIX A

The Major Classification of Factories adopted in the Census Table

XV-E 1911	XXII 1921
I. Growing of Special Products	Growing of Special Products
II. Mines	Mines
III. Quarries of hard rocks	Quarries of hard rocks
IV. Textile Industries	Textile and connected Industries
V. Leather and other Industries	Leather and other Industries
VI. Wood Industries	Wood Industries
VII. Metal Industries	Metal Industries
VIII. Glass and Earthen ware Industries	Glass and Earthenware Industries
IX. Industries connected with chemical products	Industries connected with chemical products
X. Food Industries	Food Industries
XI. Industries of Dress	Industries of Dress
XII. Furniture Industries	Furniture Industries
XIII. Industries connected with building	Industries connected with building
XIV. Construction of Means of Transport	Construction of Means of Transport and Communication
XV. Production and Transmission of physical forces	Production, Application and Transmission of physical forces
XVI. Industries of Luxury	Industries of Luxury

APPENDIX B

Statement of Divisions adopted in 1951 Table B-III with the Corresponding Livelihood Classes

Livelihood Class	Division	Description Of Division
V. Production other than cultivation	0 to 4	0—Primary Industries not elsewhere specified 1—Mining and quarrying 2—Processing and manufacture - Foodstuffs, textiles, leather and products thereof 3—Processing and manufacture - Metals, chemicals and products thereof 4—Processing and manufacture not elsewhere specified
VI. Commerce	6	Commerce
VII. Transport	7	Transport, storage and communications
	(Sub-divisions 7.0 to 7.4)	
VIII. Other Services and Miscellaneous sources	5, 7, 8&9	5—Construction and utilities 7—Transport, Storage, and communications (with the exception of Sub-divisions 7.0 to 7.4) 8—Health, Education and Public administration 9—Services not elsewhere specified

APPENDIX C

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions and major groups with their Code numbers are listed below.

DIVISIONS

- 0 Agriculture, Livestock, forestry, fishing and hunting
- 1 Mining and Quarrying
- 2 & 3 Manufacturing
- 4 Construction
- 5 Electricity, Gas, Water and Sanitary services
- 6 Trade and Commerce
- 7 Transport, Storage and Communication
- 8 Services
- 9 Activities not adequately described

MAJOR GROUPS

Division 0 — Agriculture, livestock, forestry, fishing and hunting

- 00 Field produce and Plantation crops
- 01 Plantation crops
- 02 Forestry and Logging
- 03 Fishing
- 04 Livestock and Hunting

Division 1 — Mining and Quarrying

- 10 Mining and quarrying

Division 2 and 3 — Manufacturing

- 20 Foodstuffs
- 21 Beverages
- 22 Tobacco Products
- 23 Textile — cotton
- 24 Textile — jute
- 25 Textile — wool
- 26 Textile — silk
- 27 Textile — miscellaneous
- 28 Manufacture of wood and wooden products

- 29 Paper and paper products
- 30 Printing and publishing
- 31 Leather and leather products
- 32 Rubber, Petroleum and coal products
- 33 Chemicals and chemical products
- 34-35 Non-Metallic Mineral Products other than petroleum and coal
- 36 Basic Metals and their products except machinery and transport equipment
- 37 Machinery (all kinds other than Transport) and Electrical equipment
- 38 Transport Equipment
- 39 Miscellaneous Manufacturing Industries

Division 4 — Construction

- 40 Construction

Division 5 — Electricity, Gas, Water and Sanitary Services

- 50 Electricity and gas
- 51 Water supply and sanitary services

Division 6 — Trade and Commerce

- 60-63 Wholesale Trade
- 64-68 Retail Trade
- 69 Trade and Commerce-Miscellaneous

Division 7 — Transport, Storage and Communication

- 70-71 Transport
- 72 Storage and Warehousing
- 73 Communications

Division 8 — Services

- 80 Public Services
- 81 Educational and Scientific Services
- 82 Medical and Health Services
- 83 Religious and Welfare Services
- 84 Legal Services
- 85 Business Services
- 86 Community Services and trade and labour associations
- 87 Recreation Services
- 88 Personal Services
- 89 Services (not elsewhere classified)

Division 9 — Activities not adequately described

- 90 Activities unspecified and not adequately described. (This includes new entrants to the labour market)

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division O — Agriculture, livestock, forestry, fishing and hunting	
00	Field Produce and Plantation Crops—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	Plantation Crops—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032

Major Group (Code)	Description	Minor Group (Code)
1	2	3
04	Livestock and Hunting—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	Division 1—Mining and Quarrying—	
10	Mining and Quarrying—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing—	
20	Foodstuffs—	
	Production of rice, atta, flour, etc. by milling dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203

Major Group (Code)	Description	Minor Group (Code)
1	2	3
20	Foodstuff Contd.	
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	Textile—Cotton—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of Khadi textile in handlooms	236

Major Group (Code)	Description	Minor Group (Code)
1	2	3
23	Textile—Cotton—Contd.	
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	Textile—Jute—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine.	266
27	Textile—Miscellaneous—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275

Major Group (Code)	Description	Minor Group (Code)
1	2	3
27	Textile—Miscellaneous—Contd.	
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and Paper Products—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310

Major Group (Code)	Description	Minor Group (Code)
1	2	3
31	Leather and Leather Products—Contd.	
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products—	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339

Major Group (Code)	Description	Minor Group (Code)
1	2	3
34	Non-metallic Mineral Products other than Petroleum and Coal—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	Basic Metals and their Products except Machinery and Transport Equipment—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367

Major Group (Code)	Description	Minor Group (Code)
1	2	3
36	Basic Metals and their Products except Machinery and Transport Equipment—contd.	
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardware such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	Machinery (All kinds other than Transport) and Electrical equipment—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment, such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other railroad equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388

Major Group (Code)	Description	Minor Group (Code)
1	2	3
38	Transport Equipment—Contd.	
	Manufacture of other transport equipment not covered above such as animal drawn and handdrawn vehicles	389
39	Miscellaneous Manufacturing Industries—	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reser- voirs such as bund, embankments, dam, canal, tank, tube- wells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services :	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division 6—Trade and Commerce	
60	Wholesale Trade—	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuffs (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equip- ment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633

Major Group (Code)	Description	Minor Group (Code)
1	2	3
63	Wholesale Trade—Contd.	
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (Seed and powder,) aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Retail Trade—Contd.	
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	Trade and Commerce Miscellaneous—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	Transport—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704

Major Group (Code)	Description	Minor Group (Code)
1	2	3
70	Transport—Contd.	
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw, driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housings—	
	Operation of storage such as ware-houses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	Communication—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public Service in administrative departments and offices of Central Government	804
	Public Service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments	809
81	Educational and Scientific Services—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812

or Group (Code)	Description	Minor Group (Code)
1	2	3
82	Medical and Health Services—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	Religious and Welfare Services—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities. This includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	Legal Services—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	Business Services—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871

Major Group (Code)	Description	Minor Group (Code)
1	2	3
87	Recreation Services—Contd.	
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc. racing	873
88	Personal Services—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals. This includes all types of cleaning, dyeing, bleaching, dry cleaning services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	Services (Not elsewhere classified)—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described—	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX TO TABLE B-IV—PART-C

Minor groups having less than 1% of Workers of the respective Divisions (Less than 0.5% in case of Minor groups of Division 2 & 3 only) have been shown in this Appendix. The following abbreviations have been used:—

'HI' for Household Industry, 'NHI' for Non-household Industry, 'M' for Males, 'F' for Females

MADRAS STATE

005 Total HI (M26,F18); NHI (M1,269,F239); Urban HI (M12,F16); NHI (M775,F148); 007 Total HI (M10,F11); NHI (M520,F1,521); Urban HI (M1); NHI (M101,F470); 013 Total (M139,F3); NHI (M392,F109); Urban HI (M8); NHI (M177,F22); 014 Total NHI (M1,240,F966); Urban NHI (M1,049,F787); 020 Total NHI (M3,928,F588); Urban NHI (M1,349,F289); 022 Total NHI (M99,F94); Urban NHI (M44,F94); 024 Total NHI (M30,F409); Urban NHI (M28,F371);
